National Grid – Keap Street

Data Usability Summary Report

BROOKLYN, NEW YORK

Volatile, Semivolatile, Metals and Miscellaneous Analyses

SDG# 220-9562

Analyses Performed By:
TestAmerica Laboratories
Shelton, Connecticut

Report: # 10702
Review Level: Tier III
Project: B0012552.0000.00002

SUMMARY

This data quality assessment summarizes the review of Sample Delivery Group (SDG) #220-9562 for samples collected in association with the National Grid Keap Street site. The review was conducted as a Tier III evaluation and included review of data package completeness. Only analytical data associated with constituents of concern were reviewed for this validation. Field documentation was not included in this review. Included with this assessment are the validation annotated sample result sheets, and chain of custody. Analyses were performed on the following samples:

Sample ID	Lab ID	Matrix	Sample Collection Date	Parent Sample	Analysis				
					VOC	SVOC	PEST PCB	MET	MISC
SB/MW-4 (25-30)	220-9562-1	Soil	7/6/2009		X	X		X	X
SB/MW-4 (4.5-5)	220-9562-2	Soil	7/6/2009		X	X		X	X
SB/MW-3 (10-15)	220-9562-3	Soil	7/7/2009		X	X		X	X
SB-MW-1 (5-10)	220-9562-4	Soil	7/7/2009		X	X		X	X
SB/MW-2 (5-10)	220-9562-6	Soil	7/8/2009		X	X		X	X

Note:

1. Miscellaneous parameters include free cyanide.
2. Matrix spike/matrix spike duplicate/laboratory duplicate was performed on sample locations SB-MW-1 (5-10).

ANALYTICAL DATA PACKAGE DOCUMENTATION

The table below is the evaluation of the data package completeness.

Items Reviewed	Reported		Performance Acceptable		Not Required
	No	Yes	No	Yes	
1. Sample receipt condition		X		X	
2. Requested analyses and sample results		X		X	
3. Master tracking list		X		X	
4. Methods of analysis		X		X	
5. Reporting limits		X		X	
6. Sample collection date		X		X	
7. Laboratory sample received date		X		X	
8. Sample preservation verification (as applicable)		X		X	
9. Sample preparation/extraction/analysis dates		X		X	
10. Fully executed Chain-of-Custody (COC) form		X		X	
11. Narrative summary of QA or sample problems provided		X		X	
12. Data Package Completeness and Compliance		X		X	

QA - Quality Assurance

DRAFT

ORGANIC ANALYSIS INTRODUCTION

Analyses were performed according to United States Environmental Protection Agency (USEPA) SW-846 Method 8260, 8270, 8081 and 8082 as referenced in NYSDEC-ASP. Data were reviewed in accordance with USEPA National Functional Guidelines of October 1999 and USEPA Region 2 Validation SOPs.

The data review process is an evaluation of data on a technical basis rather than a determination of contract compliance. As such, the standards against which the data are being weighed may differ from those specified in the analytical method. It is assumed that the data package represents the best efforts of the laboratory and had already been subjected to adequate and sufficient quality review prior to submission.

During the review process, laboratory qualified and unqualified data are verified against the supporting documentation. Based on this evaluation, qualifier codes may be added, deleted, or modified by the data reviewer. Results are qualified with the following codes in accordance with USEPA National Functional Guidelines:

- Concentration (C) Qualifiers

  U The compound was analyzed for but not detected. The associated value is the compound quantitation limit.

  B The compound has been found in the sample as well as its associated blank, its presence in the sample may be suspect.

- Quantitation (Q) Qualifiers

  E The compound was quantitated above the calibration range.

  D Concentration is based on a diluted sample analysis.

- Validation Qualifiers

  J The compound was positively identified; however, the associated numerical value is an estimated concentration only.

  UJ The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.

  JN The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification. The associated numerical value is an estimated concentration only.

  UB Compound considered non-detect at the listed value due to associated blank contamination.

  N The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification.

  R The sample results are rejected.

Two facts should be noted by all data users. First, the "R" flag means that the associated value is unusable. In other words, due to significant quality control (QC) problems, the analysis is invalid and provides no information as to whether the compound is present or not. "R" values should not appear on data tables because they cannot be relied upon, even as a last resort. The second fact to keep in mind is

DRAFT

that no compound concentration, even if it has passed all QC tests, is guaranteed to be accurate. Strict QC serves to increase confidence in data but any value potentially contains error.

DRAFT

VOLATILE ORGANIC COMPOUND (VOC) ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 8260	Water	14 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2 s.u.
	Soil	14 days from collection to analysis	Cooled @ 4 °C.

s.u. Standard units

All samples were analyzed within the specified holding time criteria.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

All compounds associated with the QA blanks exhibited a concentration less than the MDL, with the exception of the compounds listed in the following table. Sample results associated with QA blank contamination that were greater than the BAL resulted in the removal of the laboratory qualifier (B) of data. Sample results less than the BAL associated with the following sample locations were qualified as listed in the following table.

Sample Locations	Analytes	Sample Result	Qualification
SB/MW-4 (25-30) SB/MW-2 (5-10)	Methylene chloride	Detected sample results <RL and <BAL	"UB" at the PQL
SB/MW-4 (4.5-5) SB/MW-3 (10-15) SB-MW-1 (5-10)	Methylene chloride	Detected sample results <RL and <BAL	"UB" at the PQL
	Acetone		

RL Reporting limit

3. Mass Spectrometer Tuning

Mass spectrometer performance was acceptable and all analyses were performed within a 12-hour tune clock.

DRAFT

System performance and column resolution were acceptable.

4. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

4.1 Initial Calibration

The method specifies percent relative standard deviation (%RSD) and relative response factor (RRF) limits for select compounds only. A technical review of the data applies limits to all compounds with no exceptions.

All target compounds associated with the initial calibration standards must exhibit a %RSD less than the control limit (15%) or a correlation coefficient greater than 0.99 and an RRF value greater than control limit (0.05).

4.2 Continuing Calibration

All target compounds associated with the continuing calibration standard must exhibit a percent difference (%D) less than the control limit (20%) and RRF value greater than control limit (0.05).

All compounds associated with the calibrations were within the specified control limits, with the exception of the compounds presented in the following table.

Sample Locations	Initial/Continuing	Compound	Criteria
SB/MW-4 (25-30) SB/MW-4 (4.5-5) SB/MW-3 (10-15) SB-MW-1 (5-10) SB/MW-2 (5-10)	ICV %RSD	Chloroethane	33.6%
SB/MW-4 (25-30) SB/MW-4 (4.5-5)	CCV %D	Chloroethane	26.9%
SB/MW-3 (10-15) SB-MW-1 (5-10)	CCV %D	Bromomethane	37.5%
SB/MW-2 (5-10)	CCV %D	Bromomethane	35.0%

The criteria used to evaluate the initial and continuing calibration are presented in the following table. In the case of a calibration deviation, the sample results are qualified.

Initial/Continuing	Criteria	Sample Result	Qualification
Initial and Continuing Calibration	RRF <0.05	Non-detect	R
		Detect	J
	RRF <0.01[1]	Non-detect	R
		Detect	J
	RRF >0.05 or RRF >0.01[1]	Non-detect	No Action
		Detect	

DRAFT

Initial/Continuing	Criteria	Sample Result	Qualification
Initial Calibration	%RSD > 15% or a correlation coefficient <0.99	Non-detect	UJ
		Detect	J
Continuing Calibration	%D >20% (increase in sensitivity)	Non-detect	No Action
		Detect	J
	%D >20% (decrease in sensitivity)	Non-detect	UJ
		Detect	J

[1] RRF of 0.01 only applies to compounds which are typically poor responding compounds (i.e., ketones, 1,4-dioxane, etc.)

5. Surrogates/System Monitoring Compounds

All samples to be analyzed for organic compounds are spiked with surrogate compounds prior to sample preparation to evaluate overall laboratory performance and efficiency of the analytical technique. VOC analysis requires that all surrogates associated with the analysis exhibit recoveries within the laboratory-established acceptance limits.

All surrogate recoveries were within control limits.

6. Internal Standard Performance

Internal standard performance criteria insure that the GC/MS sensitivity and response are stable during every sample analysis. The criteria requires the internal standard compounds associated with the VOC exhibit area counts that are not greater than two times (+100%) or less than one-half (-50%) of the area counts of the associated continuing calibration standard.

All internal standard responses were within control limits.

7. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analysis

MS/MSD data are used to assess the precision and accuracy of the analytical method. The compounds used to perform the MS/MSD analysis must exhibit a percent recovery within the laboratory-established acceptance limits. The relative percent difference (RPD) between the MS/MSD recoveries must exhibit an RPD within the laboratory-established acceptance limits.

Note: The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the compound concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater.

Sample locations associated with the MS/MSD exhibiting recoveries outside of the control limits are presented in the following table.

Sample Locations	Compound	MS Recovery	MSD Recovery
SB-MW-1 (5-10)	Bromomethane	<LL but >10%	<LL but >10%
	Carbon disulfide	<LL but >10%	<LL but >10%
	Methylene chloride	<LL but >10%	<LL but >10%

DRAFT

Sample Locations	Compound	MS Recovery	MSD Recovery
	1,1-Dichloroethene	AC	<LL but >10%

AC Acceptable

The criteria used to evaluate the MS/MSD recoveries are presented in the following table. In the case of an MS/MSD deviation, the sample results are qualified as documented in the table below.

Control Limit	Sample Result	Qualification
> the upper control limit (UL)	Non-detect	No Action
	Detect	J
< the lower control limit (LL) but > 10%	Non-detect	UJ
	Detect	J
< 10%	Non-detect	R
	Detect	J
Parent sample concentration > four times the MS/MSD spiking solution concentration (D).	Detect	No Action
	Non-detect	

DRAFT

8. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The compounds associated with the LCS analysis must exhibit a percent recovery within the laboratory-established acceptance limits.

Sample locations associated with LCS analysis exhibiting recoveries outside of the control limits presented in the following table.

Sample Locations	Compound	LCS Recovery
SB/MW-4 (25-30) SB/MW-4 (4.5-5) SB/MW-3 (10-15) SB-MW-1 (5-10)	Acetone	> UL
SB/MW-2 (5-10)	Acetone	> UL
	Methyl ethyl ketone	> UL

The criteria used to evaluate the LCS/LCSD recoveries are presented in the following table. In the case of an LCS/LCSD deviation, the sample results are qualified as documented in the table below.

Control Limit	Sample Result	Qualification
> the upper control limit (UL)	Non-detect	No Action
	Detect	J
< the lower control limit (LL) but > 10%	Non-detect	UJ
	Detect	J
< 10%	Non-detect	R

Control Limit	Sample Result	Qualification
	Detect	J

Note: Sample results were not qualified as rejected (R) due to the deviations listed above.

9. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of three times the RL is applied for soil matrices.

Field duplicates were not included with this SDG.

10. Compound Identification

Compounds are identified on the GC/MS by using the analytes relative retention time and ion spectra.

All identified compounds met the specified criteria.

11. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

SEMI-VOLATILE VOLATILE ORGANIC COMPOUND (SVOC) ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 8270	Water	7 days from collection to extraction and 40 days from extraction to analysis	Cooled @ 4 °C
	Soil	14 days from collection to extraction and 40 days from extraction to analysis	Cooled @ 4 °C

All samples were analyzed within the specified holding time criteria.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Compounds were not detected above the MDL in the associated blanks; therefore detected sample results were not associated with blank contamination.

3. Mass Spectrometer Tuning

Mass spectrometer performance was acceptable and all analyses were performed within a 12-hour tune clock.

System performance and column resolution were acceptable.

4. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

4.1 Initial Calibration

The method specifies percent relative standard deviation (%RSD) and relative response factor (RRF) limits for select compounds only. A technical review of the data applies limits to all compounds with no exceptions.

DRAFT

All target compounds associated with the initial calibration standards must exhibit a %RSD less than the control limit (15%) or a correlation coefficient greater than 0.99 and an RRF value greater than control limit (0.05).

4.2 Continuing Calibration

All target compounds associated with the continuing calibration standard must exhibit a percent difference (%D) less than the control limit (20%) and RRF value greater than control limit (0.05).

All compounds associated with the calibrations were within the specified control limits, with the exception of the compounds presented in the following table.

Sample Locations	Initial/Continuing	Compound	Criteria
SB/MW-4 (25-30) SB/MW-4 (4.5-5) SB/MW-3 (10-15) SB-MW-1 (5-10) SB/MW-2 (5-10	ICV %RSD	4-Chloroaniline	18.4%

The criteria used to evaluate the initial and continuing calibration are presented in the following table. In the case of a calibration deviation, the sample results are qualified.

Initial/Continuing	Criteria	Sample Result	Qualification
Initial and Continuing Calibration	RRF <0.05	Non-detect	R
		Detect	J
	RRF <0.01[1]	Non-detect	R
		Detect	J
	RRF >0.05 or RRF >0.01[1]	Non-detect	No Action
		Detect	
Initial Calibration	%RSD > 15% or a correlation coefficient <0.99	Non-detect	UJ
		Detect	J
Continuing Calibration	%D >20% (increase in sensitivity)	Non-detect	No Action
		Detect	J
	%D >20% (decrease in sensitivity)	Non-detect	UJ
		Detect	J

[1] RRF of 0.01 only applies to compounds which are typically poor responding compounds (i.e., ketones, 1,4-dioxane, etc.)

5. Surrogates/System Monitoring Compounds

All samples to be analyzed for organic compounds are spiked with surrogate compounds prior to sample preparation to evaluate overall laboratory performance and efficiency of the analytical technique. SVOC analysis requires that two of the three SVOC surrogate compounds within each fraction exhibit recoveries within the laboratory-established acceptance limits.

DRAFT

All surrogate recoveries were within control limits.

6. Internal Standard Performance

Internal standard performance criteria insure that the GC/MS sensitivity and response are stable during every sample analysis. The criteria requires the internal standard compounds associated with the SVOC exhibit area counts that are not greater than two times (+100%) or less than one-half (-50%) of the area counts of the associated continuing calibration standard.

All internal standard responses were within control limits.

7. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analysis

MS/MSD data are used to assess the precision and accuracy of the analytical method. The compounds used to perform the MS/MSD analysis must exhibit a percent recovery within the laboratory-established acceptance limits. The relative percent difference (RPD) between the MS/MSD recoveries must exhibit an RPD within the laboratory-established acceptance limits.

Note: The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the compound concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater.

Sample locations associated with the MS/MSD exhibiting recoveries outside of the control limits are presented in the following table.

Sample Locations	Compound	MS Recovery	MSD Recovery
SB-MW-1 (5-10)	Pentachlorophenol	<LL but >10%	<LL but >10%
	Bis (2-ethylhexyl) phthallate	AC	<LL but >10%

AC Acceptable

The criteria used to evaluate the MS/MSD recoveries are presented in the following table. In the case of an MS/MSD deviation, the sample results are qualified as documented in the table below.

Control Limit	Sample Result	Qualification
> the upper control limit (UL)	Non-detect	No Action
	Detect	J
< the lower control limit (LL) but > 10%	Non-detect	UJ
	Detect	J
< 10%	Non-detect	R
	Detect	J
Parent sample concentration > four times the MS/MSD spiking solution concentration (D).	Detect	No Action
	Non-detect	

DRAFT

8. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The compounds associated with the LCS analysis must exhibit a percent recovery within the laboratory-established acceptance limits.

All compounds associated with the LCS analysis exhibited recoveries within the control limits.

9. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of three times the RL is applied for soil matrices.

Field duplicates were not included with this SDG.

10. Compound Identification

Compounds are identified on the GC/MS by using the analytes relative retention time and ion spectra.

All identified compounds met the specified criteria.

11. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

INORGANIC ANALYSIS INTRODUCTION

Analyses were performed according to United States Environmental Protection Agency (USEPA) SW-846 Methods 6020, 7471, and Free cyanide by ASTM D4282. Data were reviewed in accordance with USEPA National Functional Guidelines of July 2002 and USEPA Region 2 Validation SOPs.

The data review process is an evaluation of data on a technical basis rather than a determination of contract compliance. As such, the standards against which the data are being weighed may differ from those specified in the analytical method. It is assumed that the data package represents the best efforts of the laboratory and that it was already subjected to adequate and sufficient quality review prior to submission.

During the review process, laboratory qualified and unqualified data are verified against the supporting documentation. Based on this evaluation, qualifier codes may be added, deleted, or modified by the data reviewer. Results are qualified with the following codes in accordance with the USEPA National Functional Guidelines:

- Concentration (C) Qualifiers

  U The analyte was analyzed for but not detected. The associated value is the analyte instrument detection limit.

  B The reported value was obtained from a reading less than the contract-required detection limit (CRDL), but greater than or equal to the instrument detection limit (IDL).

- Quantitation (Q) Qualifiers

  E The reported value is estimated due to the presence of interference.

  N Spiked sample recovery is not within control limits.

  * Duplicate analysis is not within control limits.

- Validation Qualifiers

  J The analyte was positively identified; however, the associated numerical value is an estimated concentration only.

  UJ The analyte was not detected above the reported sample detection limit. However, the reported limit is approximate and may or may not represent the actual limit of detection.

  UB Analyte considered non-detect at the listed value due to associated blank contamination.

  R The sample results are rejected.

Two facts should be noted by all data users. First, the "R" flag means that the associated value is unusable. In other words, due to significant quality control (QC) problems, the analysis is invalid and provides no information as to whether the compound is present or not. "R" values should not appear on data tables because they cannot be relied upon, even as a last resort. The second fact to keep in mind is that no compound concentration, even if it has passed all QC tests, is guaranteed to be accurate. Strict QC serves to increase confidence in data but any value potentially contains error.

DRAFT

METALS ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 6020	Water	180 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2.
	Soil	180 days from collection to analysis	Cooled @ 4 °C.
SW-846 7470	Water	28 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2.
SW-846 7471	Soil	28 days from collection to analysis	Cooled @ 4 °C.

All samples were analyzed within the specified holding times.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Analytes were detected in the associated QA blanks; however, the associated sample results were greater than the BAL and/or were non-detect. No qualification of the sample results was required.

3. Calibration

Satisfactory instrument calibration is established to provide that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument's continuing performance is satisfactory.

3.1 Initial Calibration and Continuing Calibration

The correct number and type of standards were analyzed. The correlation coefficient of the initial calibration was greater than 0.995 for all non-ICP analytes and all initial calibration verification standard recoveries were within control limits.

All continuing calibration verification standard recoveries were within the control limit.

DRAFT

3.2 CRDL Check Standard

The CRDL check standard serves to verify the linearity of calibration of the analysis at the CRDL. The CRDL standard is not required for the analysis of aluminum (Al), barium (Ba), calcium (Ca), iron (Fe), magnesium (Mg), sodium (Na), and potassium (K). The criteria used to evaluate the CRDL standard analysis are presented below in the CRDL standards evaluation table.

All CRDL standard recoveries were within control limits.

3.3 ICP Interference Control Sample (ICS)

The ICS verifies the laboratories interelement and background correction factors.

All ICS exhibited recoveries within the control limits.

4. Matrix Spike/Matrix Spike Duplicate (MS/MSD)/Laboratory Duplicate Analysis

MS/MSD and laboratory duplicate data are used to assess the precision and accuracy of the analytical method.

4.1 MS/MSD Analysis

All metal analytes must exhibit a percent recovery within the established acceptance limits of 75% to 125%. The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the analyte's concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater. In instance where this is true, the data will not be qualified even if the percent recovery does not meet the control limits and the laboratory qualifier "N" will be removed.

All analytes associated with MS/MSD recoveries were within control limits with the exception of the following analyte present in the table below.

Sample Location	Analyte	MS Recovery	MSD Recovery
SB-MW-1 (5-10)	Copper	56%	AC
	Antimony	53%	54%
	Calcium	AC	186%
	Selenium	AC	72%

The criteria used to evaluate MS/MSD recoveries are presented in the following table. In the case of an MS/MSD deviation, the sample results are qualified. The qualifications are applied to all sample results associated with this SDG.

Control limit	Sample Result	Qualification
MS/MSD percent recovery 30% to 74%	Non-detect	UJ
	Detect	J
MS/MSD percent recovery <30%	Non-detect	R
	Detect	J

DRAFT

Control limit	Sample Result	Qualification
MS/MSD percent recovery >125%	Non-detect	No Action
	Detect	J

4.2 Laboratory Duplicate Analysis

The laboratory duplicate relative percent difference (RPD) criterion is applied when parent and duplicate sample concentrations are greater than or equal to 5 times the CRDL. A control limit of 20% for water matrices and 35% for soil matrices is applied when the criteria above is true. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the CRDL, a control limit of one times the CRDL is applied for water matrices and two times the CRDL for soil matrices.

A laboratory duplicate analysis was not performed on a sample location within this SDG.

5. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 100% for soil matrices and 50% for water matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of three times the RL is applied for soil matrices and two times the RL for water matrices.

Field duplicates were not included with this SDG.

6. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The analytes associated with the LCS analysis must exhibit a percent recovery between the control limits of 80% and 120%.

All LCS recoveries were within control limits, with the exception of the analytes associated with sample locations, as presented in the following table.

Sample Location	Analytes	LCS Recovery
All soil samples in this SDG	Aluminum	121%

The criteria used to evaluate LCS recoveries are presented in the following table. In the case of an LCS deviation, the sample results are qualified.

Control limit	Sample Result	Qualification
LCS (water) percent recovery 50% to 79%	Non-detect	UJ
	Detect	J
LCS (water) percent recovery <50%	Non-detect	R
	Detect	J
LCS (water) percent recovery >120%	Non-detect	No Action
	Detect	J
LCS (soil) percent recovery < lower limit	Non-detect	J

DRAFT

Control limit	Sample Result	Qualification
	Detect	J
LCS (soil) percent recovery > upper limit	Non-detect	No Action
	Detect	J

7. Serial Dilution

The serial dilution analysis is used to assess if a significant physical or chemical interference exists due to sample matrix. Analytes exhibiting concentrations greater than 50 times the MDL in the undiluted sample are evaluated to determine if matrix interference exists. These analytes are required to have less than a 10% difference (%D) between sample results from the undiluted (parent) sample and results associated with the same sample analyzed with a five-fold dilution.

A serial dilution analysis was not performed on a sample location within this SDG.

8. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

GENERAL CHEMISTRY ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
Free cyanide by ASTM D4282.2	Water	14 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of greater than 12.
	Soil		Cooled @ 4 °C.

All samples were analyzed within the specified holding times.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Analytes were not detected above the MDL in the associated blanks; therefore detected sample results were not associated with blank contamination.

3. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

The correct number and type of standards were analyzed. The correlation coefficient of the initial calibration was greater than 0.995 and all initial calibration verification standard recoveries were within control limits.

All calibration standard recoveries were within the control limit.

4. Matrix Spike/Matrix Spike Duplicate(MS/MSD)

MS/MSD and laboratory duplicate data are used to assess the precision and accuracy of the analytical method.

4.1 MS/MSD Analysis

All metal analytes must exhibit a percent recovery within the established acceptance limits of 75% to 125%. The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the analyte's concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater. In instance where this is true, the data will not be qualified even if the percent recovery does not

DRAFT

meet the control limits and the laboratory qualifier “N” will be removed.

The MS/MSD analysis performed on sample location SB-MW-1 (5-10) exhibited recoveries within the control limits.

4.2 Laboratory Duplicate Analysis

The laboratory duplicate relative percent difference (RPD) criterion is applied when parent and duplicate sample concentrations are greater than or equal to 5 times the CRDL. A control limit of 20% for water matrices and 35% for soil matrices is applied when the criteria above is true. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the CRDL, a control limit of one times the CRDL is applied for water matrices and two times the CRDL for soil matrices.

MS/MSD analysis was performed in replacement of the laboratory duplicate analysis. The MS/MSD recoveries exhibited acceptable RPD.

5. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of three times the RL is applied for soil matrices.

Field duplicates were not included with this SDG.

6. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The analytes associated with the LCS analysis must exhibit a percent recovery between the control limits of 80% and 120%.

The LCS analysis exhibited recoveries within the control limits.

7. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

National Grid – Keap Street

Data Usability Summary Report

BROOKLYN, NEW YORK

Volatile, Semivolatile, Metals and Miscellaneous Analyses

SDG# 220-9708

Analyses Performed By:
TestAmerica Laboratories
Shelton, Connecticut

Report: # 10703
Review Level: Tier III
Project: B0012552.0000.00002

SUMMARY

This data quality assessment summarizes the review of Sample Delivery Group (SDG) #220-9708 for samples collected in association with the National Grid Keap Street site. The review was conducted as a Tier III evaluation and included review of data package completeness. Only analytical data associated with constituents of concern were reviewed for this validation. Field documentation was not included in this review. Included with this assessment are the validation annotated sample result sheets, and chain of custody. Analyses were performed on the following samples:

Sample ID	Lab ID	Matrix	Sample Collection Date	Parent Sample	Analysis				
					VOC	SVOC	PEST PCB	MET	MISC
TB072309	220-9708-1	Water	7/23/2009		X				
FB072309	220-9708-2	Water	7/23/2009		X	X		X	X
MW-1	220-9708-3	Water	7/23/2009		X	X		X	X
MW-2	220-9708-4	Water	7/23/2009		X	X		X	X
MW-3	220-9708-5	Water	7/23/2009		X	X		X	X
MW-4	220-9708-6	Water	7/23/2009		X	X		X	X
REP072309	220-9708-7	Water	7/23/2009	MW-3	X	X		X	X

Note:

1. Miscellaneous parameters include free cyanide.
2. Matrix spike/matrix spike duplicate/laboratory duplicate was performed on sample location MW-1.

QA - Quality Assurance

DRAFT

ORGANIC ANALYSIS INTRODUCTION

Analyses were performed according to United States Environmental Protection Agency (USEPA) SW-846 Method 8260, 8270, 8081 and 8082 as referenced in NYSDEC-ASP. Data were reviewed in accordance with USEPA National Functional Guidelines of October 1999 and USEPA Region 2 Validation SOPs.

The data review process is an evaluation of data on a technical basis rather than a determination of contract compliance. As such, the standards against which the data are being weighed may differ from those specified in the analytical method. It is assumed that the data package represents the best efforts of the laboratory and had already been subjected to adequate and sufficient quality review prior to submission.

During the review process, laboratory qualified and unqualified data are verified against the supporting documentation. Based on this evaluation, qualifier codes may be added, deleted, or modified by the data reviewer. Results are qualified with the following codes in accordance with USEPA National Functional Guidelines:

- Concentration (C) Qualifiers

  U The compound was analyzed for but not detected. The associated value is the compound quantitation limit.

  B The compound has been found in the sample as well as its associated blank, its presence in the sample may be suspect.

- Quantitation (Q) Qualifiers

  E The compound was quantitated above the calibration range.

  D Concentration is based on a diluted sample analysis.

- Validation Qualifiers

  J The compound was positively identified; however, the associated numerical value is an estimated concentration only.

  UJ The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.

  JN The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification. The associated numerical value is an estimated concentration only.

  UB Compound considered non-detect at the listed value due to associated blank contamination.

  N The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification.

  R The sample results are rejected.

Two facts should be noted by all data users. First, the "R" flag means that the associated value is unusable. In other words, due to significant quality control (QC) problems, the analysis is invalid and provides no information as to whether the compound is present or not. "R" values should not appear on data tables because they cannot be relied upon, even as a last resort. The second fact to keep in mind is

DRAFT

that no compound concentration, even if it has passed all QC tests, is guaranteed to be accurate. Strict QC serves to increase confidence in data but any value potentially contains error.

DRAFT

VOLATILE ORGANIC COMPOUND (VOC) ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 8260	Water	14 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2 s.u.
	Soil	14 days from collection to analysis	Cooled @ 4 °C.

s.u. Standard units

All samples were analyzed within the specified holding time criteria.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Compounds were detected in the associated QA blanks; however, the associated sample results were greater than the BAL and/or were non-detect. No qualification of the sample results was required.

3. Mass Spectrometer Tuning

Mass spectrometer performance was acceptable and all analyses were performed within a 12-hour tune clock.

System performance and column resolution were acceptable.

4. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

DRAFT

4.1 Initial Calibration

The method specifies percent relative standard deviation (%RSD) and relative response factor (RRF) limits for select compounds only. A technical review of the data applies limits to all compounds with no exceptions.

All target compounds associated with the initial calibration standards must exhibit a %RSD less than the control limit (15%) or a correlation coefficient greater than 0.99 and an RRF value greater than control limit (0.05).

4.2 Continuing Calibration

All target compounds associated with the continuing calibration standard must exhibit a percent difference (%D) less than the control limit (20%) and RRF value greater than control limit (0.05).

All compounds associated with the calibrations were within the specified control limits, with the exception of the compounds presented in the following table.

Sample Locations	Initial/Continuing	Compound	Criteria
TB072309 MW-1 MW-2 MW-3 MW-4 REP072309	ICV %RSD	Acetone	16.5%
		Methylene chloride	18.7%
	CCV %D	Acetone	49.3%
		2-Hexanone	40.9%

The criteria used to evaluate the initial and continuing calibration are presented in the following table. In the case of a calibration deviation, the sample results are qualified.

Initial/Continuing	Criteria	Sample Result	Qualification
Initial and Continuing Calibration	RRF <0.05	Non-detect	R
		Detect	J
	RRF <0.01[1]	Non-detect	R
		Detect	J
	RRF >0.05 or RRF >0.01[1]	Non-detect	No Action
		Detect	
Initial Calibration	%RSD > 15% or a correlation coefficient <0.99	Non-detect	UJ
		Detect	J
Continuing Calibration	%D >20% (increase in sensitivity)	Non-detect	No Action
		Detect	J
	%D >20% (decrease in sensitivity)	Non-detect	UJ
		Detect	J

[1] RRF of 0.01 only applies to compounds which are typically poor responding compounds (i.e., ketones, 1,4-dioxane, etc.)

DRAFT

5. Surrogates/System Monitoring Compounds

All samples to be analyzed for organic compounds are spiked with surrogate compounds prior to sample preparation to evaluate overall laboratory performance and efficiency of the analytical technique. VOC analysis requires that all surrogates associated with the analysis exhibit recoveries within the laboratory-established acceptance limits.

All surrogate recoveries were within control limits.

6. Internal Standard Performance

Internal standard performance criteria insure that the GC/MS sensitivity and response are stable during every sample analysis. The criteria requires the internal standard compounds associated with the VOC exhibit area counts that are not greater than two times (+100%) or less than one-half (-50%) of the area counts of the associated continuing calibration standard.

All internal standard responses were within control limits.

7. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analysis

MS/MSD data are used to assess the precision and accuracy of the analytical method. The compounds used to perform the MS/MSD analysis must exhibit a percent recovery within the laboratory-established acceptance limits. The relative percent difference (RPD) between the MS/MSD recoveries must exhibit an RPD within the laboratory-established acceptance limits.

Note: The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the compound concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater.

The MS/MSD exhibited acceptable recoveries and RPD between the MS/MSD recoveries.

8. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The compounds associated with the LCS analysis must exhibit a percent recovery within the laboratory-established acceptance limits.

Sample locations associated with LCS analysis exhibiting recoveries outside of the control limits presented in the following table.

Sample Locations	Compound	LCS Recovery
TB072309 MW-1 MW-2 MW-3 MW-4 REP072309	Acetone	> UL
	1,1-Dichloroethene	> UL

The criteria used to evaluate the LCS/LCSD recoveries are presented in the following table. In the case of an LCS/LCSD deviation, the sample results are qualified as documented in the table below.

DRAFT

Control Limit	Sample Result	Qualification
> the upper control limit (UL)	Non-detect	No Action
	Detect	J
< the lower control limit (LL) but > 10%	Non-detect	UJ
	Detect	J
< 10%	Non-detect	R
	Detect	J

9. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Results for duplicate samples are summarized in the following table.

Sample ID/Duplicate ID	Compound	Sample Result	Duplicate Result	RPD
MW-3/ REP072309	All compounds	ND	ND	AC

AC Acceptable
ND Not detected

The calculated RPDs between the parent sample and field duplicate were acceptable.

10. Compound Identification

Compounds are identified on the GC/MS by using the analytes relative retention time and ion spectra.

All identified compounds met the specified criteria.

11. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

DRAFT

SEMI-VOLATILE VOLATILE ORGANIC COMPOUND (SVOC) ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 8270	Water	7 days from collection to extraction and 40 days from extraction to analysis	Cooled @ 4 °C
	Soil	14 days from collection to extraction and 40 days from extraction to analysis	Cooled @ 4 °C

All samples were analyzed within the specified holding time criteria.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

All compounds associated with the QA blanks exhibited a concentration less than the MDL, with the exception of the compounds listed in the following table. Sample results associated with QA blank contamination that were greater than the BAL resulted in the removal of the laboratory qualifier (B) of data. Sample results less than the BAL associated with the following sample locations were qualified as listed in the following table.

Sample Locations	Analytes	Sample Result	Qualification
MW-1 MW-2 MW-3	Butyl benzyl phthallate	Detected sample results <RL and <BAL	“UB” at the PQL

RL Reporting limit

3. Mass Spectrometer Tuning

Mass spectrometer performance was acceptable and all analyses were performed within a 12-hour tune clock.

System performance and column resolution were acceptable.

DRAFT

4. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

4.1 Initial Calibration

The method specifies percent relative standard deviation (%RSD) and relative response factor (RRF) limits for select compounds only. A technical review of the data applies limits to all compounds with no exceptions.

All target compounds associated with the initial calibration standards must exhibit a %RSD less than the control limit (15%) or a correlation coefficient greater than 0.99 and an RRF value greater than control limit (0.05).

4.2 Continuing Calibration

All target compounds associated with the continuing calibration standard must exhibit a percent difference (%D) less than the control limit (20%) and RRF value greater than control limit (0.05).

All compounds associated with the calibrations were within the specified control limits.
etc.)

5. Surrogates/System Monitoring Compounds

All samples to be analyzed for organic compounds are spiked with surrogate compounds prior to sample preparation to evaluate overall laboratory performance and efficiency of the analytical technique. SVOC analysis requires that two of the three SVOC surrogate compounds within each fraction exhibit recoveries within the laboratory-established acceptance limits.

All surrogate recoveries were within control limits.

6. Internal Standard Performance

Internal standard performance criteria insure that the GC/MS sensitivity and response are stable during every sample analysis. The criteria requires the internal standard compounds associated with the SVOC exhibit area counts that are not greater than two times (+100%) or less than one-half (-50%) of the area counts of the associated continuing calibration standard.

All internal standard responses were within control limits.

7. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analysis

MS/MSD data are used to assess the precision and accuracy of the analytical method. The compounds used to perform the MS/MSD analysis must exhibit a percent recovery within the laboratory-established acceptance limits. The relative percent difference (RPD) between the MS/MSD recoveries must exhibit an RPD within the laboratory-established acceptance limits.

DRAFT

Note: The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the compound concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater.

The MS/MSD exhibited acceptable recoveries and RPD between the MS/MSD recoveries.

8. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The compounds associated with the LCS analysis must exhibit a percent recovery within the laboratory-established acceptance limits.

All compounds associated with the LCS analysis exhibited recoveries within the control limits.

9. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Results for duplicate samples are summarized in the following table.

Sample ID/Duplicate ID	Compound	Sample Result	Duplicate Result	RPD
MW-3/REP072309	Benzo[a]anthracene	4.3 U	0.6 J	AC
	Benzo[a]pyrene	4.3 U	0.71 J	AC
	Benzo[b]fluoranthene	4.3 U	0.7 J	AC
	Benzo[g,h,i]perylene	4.3 U	4.6	AC
	Benzo[k]fluoranthene	4.3 U	0.61 J	AC
	Bis(2-ethylhexyl) phthalate	3.5 J	2.1 J	AC
	Butyl benzyl phthalate	4.3 U	0.59 J	AC
	Chrysene	4.3 U	0.56 J	AC
	Dibenz(a,h)anthracene	4.3 U	4.5	AC
	Di-n-butyl phthalate	4.3 U	4.4	AC
	Fluoranthene	4.3 U	0.36 J	AC
	Indeno[1,2,3-cd]pyrene	4.3 U	5.3	AC
	Phenanthrene	4.3 U	0.35 J	AC

AC Acceptable
ND Not detected

The calculated RPDs between the parent sample and field duplicate were acceptable.

10. Compound Identification

Compounds are identified on the GC/MS by using the analytes relative retention time and ion spectra.

All identified compounds met the specified criteria.

DRAFT

11. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

INORGANIC ANALYSIS INTRODUCTION

Analyses were performed according to United States Environmental Protection Agency (USEPA) SW-846 Methods 6020, 7471, and 9012. Data were reviewed in accordance with USEPA National Functional Guidelines of July 2002 and USEPA Region 2 Validation SOPs.

The data review process is an evaluation of data on a technical basis rather than a determination of contract compliance. As such, the standards against which the data are being weighed may differ from those specified in the analytical method. It is assumed that the data package represents the best efforts of the laboratory and that it was already subjected to adequate and sufficient quality review prior to submission.

During the review process, laboratory qualified and unqualified data are verified against the supporting documentation. Based on this evaluation, qualifier codes may be added, deleted, or modified by the data reviewer. Results are qualified with the following codes in accordance with the USEPA National Functional Guidelines:

- Concentration (C) Qualifiers

    U The analyte was analyzed for but not detected. The associated value is the analyte instrument detection limit.

    B The reported value was obtained from a reading less than the contract-required detection limit (CRDL), but greater than or equal to the instrument detection limit (IDL).

- Quantitation (Q) Qualifiers

    E The reported value is estimated due to the presence of interference.

    N Spiked sample recovery is not within control limits.

    * Duplicate analysis is not within control limits.

- Validation Qualifiers

    J The analyte was positively identified; however, the associated numerical value is an estimated concentration only.

    UJ The analyte was not detected above the reported sample detection limit. However, the reported limit is approximate and may or may not represent the actual limit of detection.

    UB Analyte considered non-detect at the listed value due to associated blank contamination.

    R The sample results are rejected.

Two facts should be noted by all data users. First, the "R" flag means that the associated value is unusable. In other words, due to significant quality control (QC) problems, the analysis is invalid and provides no information as to whether the compound is present or not. "R" values should not appear on data tables because they cannot be relied upon, even as a last resort. The second fact to keep in mind is that no compound concentration, even if it has passed all QC tests, is guaranteed to be accurate. Strict QC serves to increase confidence in data but any value potentially contains error.

DRAFT

METALS ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 6020	Water	180 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2.
	Soil	180 days from collection to analysis	Cooled @ 4 °C.
SW-846 7470	Water	28 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2.
SW-846 7471	Soil	28 days from collection to analysis	Cooled @ 4 °C.

All samples were analyzed within the specified holding times.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

All analytes associated with the QA blanks exhibited a concentration less than the IDL, with the exception of the analytes listed in the following table. Sample results associated with QA blank contamination that were greater than the BAL resulted in the removal of the laboratory qualifier (J) of data. Sample results less than the BAL associated with the following sample locations were qualified as listed in the following table.

Sample Locations	Analytes	Sample Result	Qualification
MW-3 MW-4 REP072309	Copper	Detected sample results <RL and <BAL	"UB" at the RL
MW-4	Antimony		
MW-1	Copper	Detected sample results >RL and <BAL	"UB" at detected sample concentration

RL = reporting limit

DRAFT

3. Calibration

Satisfactory instrument calibration is established to provide that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument's continuing performance is satisfactory.

3.1 Initial Calibration and Continuing Calibration

The correct number and type of standards were analyzed. The correlation coefficient of the initial calibration was greater than 0.995 for all non-ICP analytes and all initial calibration verification standard recoveries were within control limits.

All continuing calibration verification standard recoveries were within the control limit.

3.2 CRDL Check Standard

The CRDL check standard serves to verify the linearity of calibration of the analysis at the CRDL. The CRDL standard is not required for the analysis of aluminum (Al), barium (Ba), calcium (Ca), iron (Fe), magnesium (Mg), sodium (Na), and potassium (K). The criteria used to evaluate the CRDL standard analysis are presented below in the CRDL standards evaluation table.

All analytes associated with CRDL standard recoveries were within control limits with the exception of the analytes presented in the following table.

Sample Locations	Analytes	CRDL Recovery
All samples within this SDG	Manganese	42%
	Antimony	139%

The criteria applied to evaluate the CRDL Standard criteria are presented below. In the case of a calibration deviation, the sample results are qualified.

CRDL Standard Recovery Criteria			
Analytes	**Control Limit**	**Sample Result**	**Qualification**
All analytes, with the exception of Al, Ba, Ca, Fe, Mg, Na, and K	CRDL %R <50% (<30% for Sb, Pb, Tl)	Sample results ≥ MDL but <2x CRDL	R
		Non-detect sample results	R
		Detected sample results ≥ 2x CRDL	J
	CRDL %R 50-69% (30-49% for Sb, Pb, Tl)	Sample results ≥ MDL but <2x CRDL	J
		Non-detect sample results	UJ
		Detected sample results ≥ 2x CRDL	No Action
	%R >130% but <180% (>150% but <200% for Sb, Pb, Tl)	Sample results ≥ MDL but <2x CRDL	J
		Non-detect sample results	No Action

DRAFT

CRDL Standard Recovery Criteria			
Analytes	**Control Limit**	**Sample Result**	**Qualification**
		Detected sample results ≥ 2x CRDL	No Action
	CRI %R >180% (>200% for Sb, Pb, Tl)	Sample results ≥ MDL	R

3.3 ICP Interference Control Sample (ICS)

The ICS verifies the laboratories interelement and background correction factors.

All ICS exhibited recoveries within the control limits.

4. Matrix Spike/Matrix Spike Duplicate (MS/MSD)/Laboratory Duplicate Analysis

MS/MSD and laboratory duplicate data are used to assess the precision and accuracy of the analytical method.

4.1 MS/MSD Analysis

All metal analytes must exhibit a percent recovery within the established acceptance limits of 75% to 125%. The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the analyte's concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater. In instance where this is true, the data will not be qualified even if the percent recovery does not meet the control limits and the laboratory qualifier "N" will be removed.

All analytes associated with MS/MSD recoveries were within control limits with the exception of the following analyte present in the table below.

Sample Location	Analyte	MS Recovery	MSD Recovery
MW-1	Aluminum	192%	196%

The criteria used to evaluate MS/MSD recoveries are presented in the following table. In the case of an MS/MSD deviation, the sample results are qualified. The qualifications are applied to all sample results associated with this SDG.

Control limit	Sample Result	Qualification
MS/MSD percent recovery 30% to 74%	Non-detect	UJ
	Detect	J
MS/MSD percent recovery <30%	Non-detect	R
	Detect	J
MS/MSD percent recovery >125%	Non-detect	No Action
	Detect	J

DRAFT

4.2 Laboratory Duplicate Analysis

The laboratory duplicate relative percent difference (RPD) criterion is applied when parent and duplicate sample concentrations are greater than or equal to 5 times the CRDL. A control limit of 20% for water matrices and 35% for soil matrices is applied when the criteria above is true. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the CRDL, a control limit of one times the CRDL is applied for water matrices and two times the CRDL for soil matrices.

The laboratory duplicate sample results exhibited RPD within the control limit.

5. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Results for duplicate samples are summarized in the following table.

Sample ID/Duplicate ID	Compound	Sample Result	Duplicate Result	RPD
MW-3/REP072309	Aluminum	492	560	12.9 %
	Antimony	2.1 J	4 U	AC
	Arsenic	0.62 J	0.78 J	AC
	Barium	146	142	2.7 %
	Calcium	48500	48400	0.2 %
	Chromium	2.4 J	2.6 J	AC
	Cobalt	6.1	6	AC
	Copper	3.2 J	3.2 J	AC
	Iron	1120	1120	0 %
	Lead	1.7 J	1.8 J	AC
	Magnesium	7980	7980	0 %
	Manganese	5120	5100	0.3 %
	Nickel	42.6	42.8	0.4 %
	Potassium	6380	6450	1.0 %
	Selenium	3.1 J	2.3 J	AC
	Sodium	348000	350000	0.5 %
	Vanadium	2.9	3	AC
	Zinc	9 J	9.2 J	AC

AC Acceptable
ND Not detected

The calculated RPDs between the parent sample and field duplicate were acceptable.

6. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The analytes associated with the LCS analysis must exhibit a percent recovery between the control limits of 80% and 120%.

DRAFT

The LCS analysis exhibited recoveries within the control limits.

7. Serial Dilution

The serial dilution analysis is used to assess if a significant physical or chemical interference exists due to sample matrix. Analytes exhibiting concentrations greater than 50 times the MDL in the undiluted sample are evaluated to determine if matrix interference exists. These analytes are required to have less than a 10% difference (%D) between sample results from the undiluted (parent) sample and results associated with the same sample analyzed with a five-fold dilution.

The serial dilution performed on sample location MW-2 exhibited %D within the control limit.

8. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

GENERAL CHEMISTRY ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
Cyanide by EPA 9012	Water	14 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of greater than 12.
	Soil		Cooled @ 4 °C.

All samples were analyzed within the specified holding times.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Analytes were not detected above the MDL in the associated blanks; therefore detected sample results were not associated with blank contamination.

3. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

The correct number and type of standards were analyzed. The correlation coefficient of the initial calibration was greater than 0.995 and all initial calibration verification standard recoveries were within control limits.

All calibration standard recoveries were within the control limit.

4. Matrix Spike/Matrix Spike Duplicate(MS/MSD)

MS/MSD and laboratory duplicate data are used to assess the precision and accuracy of the analytical method.

4.1 MS/MSD Analysis

All metal analytes must exhibit a percent recovery within the established acceptance limits of 75% to 125%. The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the analyte's concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater. In instance where this is true, the data will not be qualified even if the percent recovery does not

DRAFT

meet the control limits and the laboratory qualifier “N” will be removed.

All analytes associated with MS/MSD recoveries were within control limits with the exception of the following analyte present in the table below.

Sample Location	Analyte	MS Recovery	MSD Recovery
MW-1	Cyanide	51%	53%

The criteria used to evaluate MS/MSD recoveries are presented in the following table. In the case of an MS/MSD deviation, the sample results are qualified. The qualifications are applied to all sample results associated with this SDG.

Control limit	Sample Result	Qualification
MS/MSD percent recovery 30% to 74%	Non-detect	UJ
	Detect	J
MS/MSD percent recovery <30%	Non-detect	R
	Detect	J
MS/MSD percent recovery >125%	Non-detect	No Action
	Detect	J

DRAFT

4.2 Laboratory Duplicate Analysis

The laboratory duplicate relative percent difference (RPD) criterion is applied when parent and duplicate sample concentrations are greater than or equal to 5 times the CRDL. A control limit of 20% for water matrices and 35% for soil matrices is applied when the criteria above is true. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the CRDL, a control limit of one times the CRDL is applied for water matrices and two times the CRDL for soil matrices.

MS/MSD analysis was performed in replacement of the laboratory duplicate analysis. The MS/MSD recoveries exhibited acceptable RPD.

5. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Results for duplicate samples are summarized in the following table.

Sample ID/Duplicate ID	Compound	Sample Result	Duplicate Result	RPD
MW-3/ REP072309	Cyanide	ND	ND	AC

AC Acceptable
ND Not detected

The calculated RPDs between the parent sample and field duplicate were acceptable.

6. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The analytes associated with the LCS analysis must exhibit a percent recovery between the control limits of 80% and 120%.

The LCS analysis exhibited recoveries within the control limits.

7. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

National Grid – Keap Street

Data Usability Summary Report

BROOKLYN, NEW YORK

Volatile, Semivolatile, Metals and Miscellaneous Analyses

SDG# 220-9590

Analyses Performed By:
TestAmerica Laboratories
Shelton, Connecticut

Report: # 10704
Review Level: Tier III
Project: B0012552.0000.00002

SUMMARY

This data quality assessment summarizes the review of Sample Delivery Group (SDG) #220-9590 for samples collected in association with the National Grid Keap Street site. The review was conducted as a Tier III evaluation and included review of data package completeness. Only analytical data associated with constituents of concern were reviewed for this validation. Field documentation was not included in this review. Included with this assessment are the validation annotated sample result sheets, and chain of custody. Analyses were performed on the following samples:

Sample ID	Lab ID	Matrix	Sample Collection Date	Parent Sample	Analysis				
					VOC	SVOC	PEST PCB	MET	MISC
EB-1	220-9590-1	Water	7/8/2009		X	X		X	X
TB-1	220-9590-2	Water	7/9/2009		X				

Note:

1. Miscellaneous parameters include cyanide.

DRAFT

ANALYTICAL DATA PACKAGE DOCUMENTATION

The table below is the evaluation of the data package completeness.

Items Reviewed	Reported		Performance Acceptable		Not Required
	No	Yes	No	Yes	
1. Sample receipt condition		X		X

12. Data Package Completeness and Compliance		X		X	

QA - Quality Assurance

DRAFT

ORGANIC ANALYSIS INTRODUCTION

Analyses were performed according to United States Environmental Protection Agency (USEPA) SW-846 Method 8260, 8270, 8081 and 8082 as referenced in NYSDEC-ASP. Data were reviewed in accordance with USEPA National Functional Guidelines of October 1999 and USEPA Region 2 Validation SOPs.

The data review process is an evaluation of data on a technical basis rather than a determination of contract compliance. As such, the standards against which the data are being weighed may differ from those specified in the analytical method. It is assumed that the data package represents the best efforts of the laboratory and had already been subjected to adequate and sufficient quality review prior to submission.

During the review process, laboratory qualified and unqualified data are verified against the supporting documentation. Based on this evaluation, qualifier codes may be added, deleted, or modified by the data reviewer. Results are qualified with the following codes in accordance with USEPA National Functional Guidelines:

- Concentration (C) Qualifiers

  U The compound was analyzed for but not detected. The associated value is the compound quantitation limit.

  B The compound has been found in the sample as well as its associated blank, its presence in the sample may be suspect.

- Quantitation (Q) Qualifiers

  E The compound was quantitated above the calibration range.

  D Concentration is based on a diluted sample analysis.

- Validation Qualifiers

  J The compound was positively identified; however, the associated numerical value is an estimated concentration only.

  UJ The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.

  JN The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification. The associated numerical value is an estimated concentration only.

  UB Compound considered non-detect at the listed value due to associated blank contamination.

  N The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification.

  R The sample results are rejected.

Two facts should be noted by all data users. First, the "R" flag means that the associated value is unusable. In other words, due to significant quality control (QC) problems, the analysis is invalid and provides no information as to whether the compound is present or not. "R" values should not appear on data tables because they cannot be relied upon, even as a last resort. The second fact to keep in mind is

DRAFT

that no compound concentration, even if it has passed all QC tests, is guaranteed to be accurate. Strict QC serves to increase confidence in data but any value potentially contains error.

DRAFT

VOLATILE ORGANIC COMPOUND (VOC) ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 8260	Water	14 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2 s.u.
	Soil	14 days from collection to analysis	Cooled @ 4 °C.

s.u. Standard units

All samples were analyzed within the specified holding time criteria.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Compounds were detected in the associated QA blanks; however, the associated sample results were greater than the BAL and/or were non-detect. No qualification of the sample results was required.

3. Mass Spectrometer Tuning

Mass spectrometer performance was acceptable and all analyses were performed within a 12-hour tune clock.

System performance and column resolution were acceptable.

4. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

DRAFT

4.1 Initial Calibration

The method specifies percent relative standard deviation (%RSD) and relative response factor (RRF) limits for select compounds only. A technical review of the data applies limits to all compounds with no exceptions.

All target compounds associated with the initial calibration standards must exhibit a %RSD less than the control limit (15%) or a correlation coefficient greater than 0.99 and an RRF value greater than control limit (0.05).

4.2 Continuing Calibration

All target compounds associated with the continuing calibration standard must exhibit a percent difference (%D) less than the control limit (20%) and RRF value greater than control limit (0.05).

All compounds associated with the calibrations were within the specified control limits, with the exception of the compounds presented in the following table.

Sample Locations	Initial/Continuing	Compound	Criteria
EB-1	ICV %RSD	Acetone	19.2%
		Methylene chloride	42.8%
TB-1	CCV %D	Bromomethane	34.8%
EB-1	CCV %D	Chloroethane	29.4%
		Methylene chloride	-27.4%
		2-Hexanone	-26.3%

The criteria used to evaluate the initial and continuing calibration are presented in the following table. In the case of a calibration deviation, the sample results are qualified.

Initial/Continuing	Criteria	Sample Result	Qualification
Initial and Continuing Calibration	RRF <0.05	Non-detect	R
		Detect	J
	RRF <0.01[1]	Non-detect	R
		Detect	J
	RRF >0.05 or RRF >0.01[1]	Non-detect	No Action
		Detect	
Initial Calibration	%RSD > 15% or a correlation coefficient <0.99	Non-detect	UJ
		Detect	J
Continuing Calibration	%D >20% (increase in sensitivity)	Non-detect	No Action
		Detect	J
	%D >20% (decrease in sensitivity)	Non-detect	UJ
		Detect	J

[1] RRF of 0.01 only applies to compounds which are typically poor responding compounds (i.e., ketones, 1,4-dioxane, etc.)

DRAFT

5. Surrogates/System Monitoring Compounds

All samples to be analyzed for organic compounds are spiked with surrogate compounds prior to sample preparation to evaluate overall laboratory performance and efficiency of the analytical technique. VOC analysis requires that all surrogates associated with the analysis exhibit recoveries within the laboratory-established acceptance limits.

All surrogate recoveries were within control limits.

6. Internal Standard Performance

Internal standard performance criteria insure that the GC/MS sensitivity and response are stable during every sample analysis. The criteria requires the internal standard compounds associated with the VOC exhibit area counts that are not greater than two times (+100%) or less than one-half (-50%) of the area counts of the associated continuing calibration standard.

All internal standard responses were within control limits.

7. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analysis

MS/MSD data are used to assess the precision and accuracy of the analytical method. The compounds used to perform the MS/MSD analysis must exhibit a percent recovery within the laboratory-established acceptance limits. The relative percent difference (RPD) between the MS/MSD recoveries must exhibit an RPD within the laboratory-established acceptance limits.

Note: The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the compound concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater.

A MS/MSD analysis was not performed on a sample location within this SDG.

8. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The compounds associated with the LCS analysis must exhibit a percent recovery within the laboratory-established acceptance limits.

Sample locations associated with LCS analysis exhibiting recoveries outside of the control limits presented in the following table.

Sample Locations	Compound	LCS Recovery
TB-1	Acetone	> UL

The criteria used to evaluate the LCS/LCSD recoveries are presented in the following table. In the case of an LCS/LCSD deviation, the sample results are qualified as documented in the table below.

DRAFT

Control Limit	Sample Result	Qualification
> the upper control limit (UL)	Non-detect	No Action
	Detect	J
< the lower control limit (LL) but > 10%	Non-detect	UJ
	Detect	J
< 10%	Non-detect	R
	Detect	J

9. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Field duplicates were not included with this SDG.

10. Compound Identification

Compounds are identified on the GC/MS by using the analytes relative retention time and ion spectra.

All identified compounds met the specified criteria.

11. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

DRAFT

SEMI-VOLATILE VOLATILE ORGANIC COMPOUND (SVOC) ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 8270	Water	7 days from collection to extraction and 40 days from extraction to analysis	Cooled @ 4 °C
	Soil	14 days from collection to extraction and 40 days from extraction to analysis	Cooled @ 4 °C

All samples were analyzed within the specified holding time criteria.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Compounds were not detected above the MDL in the associated blanks; therefore detected sample results were not associated with blank contamination.

3. Mass Spectrometer Tuning

Mass spectrometer performance was acceptable and all analyses were performed within a 12-hour tune clock.

System performance and column resolution were acceptable.

4. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

4.1 Initial Calibration

The method specifies percent relative standard deviation (%RSD) and relative response factor (RRF) limits for select compounds only. A technical review of the data applies limits to all compounds with no exceptions.

DRAFT

All target compounds associated with the initial calibration standards must exhibit a %RSD less than the control limit (15%) or a correlation coefficient greater than 0.99 and an RRF value greater than control limit (0.05).

4.2 Continuing Calibration

All target compounds associated with the continuing calibration standard must exhibit a percent difference (%D) less than the control limit (20%) and RRF value greater than control limit (0.05).

All compounds associated with the calibrations were within the specified control limits, with the exception of the compounds presented in the following table.

Sample Locations	Initial/Continuing	Compound	Criteria
EB-1	ICV %RSD	4-Chloroaniline	18.3%

The criteria used to evaluate the initial and continuing calibration are presented in the following table. In the case of a calibration deviation, the sample results are qualified.

Initial/Continuing	Criteria	Sample Result	Qualification
Initial and Continuing Calibration	RRF <0.05	Non-detect	R
		Detect	J
	RRF <0.01[1]	Non-detect	R
		Detect	J
	RRF >0.05 or RRF >0.01[1]	Non-detect	No Action
		Detect	
Initial Calibration	%RSD > 15% or a correlation coefficient <0.99	Non-detect	UJ
		Detect	J
Continuing Calibration	%D >20% (increase in sensitivity)	Non-detect	No Action
		Detect	J
	%D >20% (decrease in sensitivity)	Non-detect	UJ
		Detect	J

[1] RRF of 0.01 only applies to compounds which are typically poor responding compounds (i.e., ketones, 1,4-dioxane, etc.)

5. Surrogates/System Monitoring Compounds

All samples to be analyzed for organic compounds are spiked with surrogate compounds prior to sample preparation to evaluate overall laboratory performance and efficiency of the analytical technique. SVOC analysis requires that two of the three SVOC surrogate compounds within each fraction exhibit recoveries within the laboratory-established acceptance limits.

All surrogate recoveries were within control limits.

DRAFT

6. Internal Standard Performance

Internal standard performance criteria insure that the GC/MS sensitivity and response are stable during every sample analysis. The criteria requires the internal standard compounds associated with the SVOC exhibit area counts that are not greater than two times (+100%) or less than one-half (-50%) of the area counts of the associated continuing calibration standard.

All internal standard responses were within control limits.

7. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analysis

MS/MSD data are used to assess the precision and accuracy of the analytical method. The compounds used to perform the MS/MSD analysis must exhibit a percent recovery within the laboratory-established acceptance limits. The relative percent difference (RPD) between the MS/MSD recoveries must exhibit an RPD within the laboratory-established acceptance limits.

Note: The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the compound concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater.

A MS/MSD analysis was not performed on a sample location within this SDG.

8. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The compounds associated with the LCS analysis must exhibit a percent recovery within the laboratory-established acceptance limits.

All compounds associated with the LCS analysis exhibited recoveries within the control limits.

9. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Field duplicates were not included with this SDG.

10. Compound Identification

Compounds are identified on the GC/MS by using the analytes relative retention time and ion spectra.

All identified compounds met the specified criteria.

DRAFT

11. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

INORGANIC ANALYSIS INTRODUCTION

Analyses were performed according to United States Environmental Protection Agency (USEPA) SW-846 Methods 6020, 7471, and 9012. Data were reviewed in accordance with USEPA National Functional Guidelines of July 2002 and USEPA Region 2 Validation SOPs.

The data review process is an evaluation of data on a technical basis rather than a determination of contract compliance. As such, the standards against which the data are being weighed may differ from those specified in the analytical method. It is assumed that the data package represents the best efforts of the laboratory and that it was already subjected to adequate and sufficient quality review prior to submission.

During the review process, laboratory qualified and unqualified data are verified against the supporting documentation. Based on this evaluation, qualifier codes may be added, deleted, or modified by the data reviewer. Results are qualified with the following codes in accordance with the USEPA National Functional Guidelines:

- Concentration (C) Qualifiers

    U The analyte was analyzed for but not detected. The associated value is the analyte instrument detection limit.

    B The reported value was obtained from a reading less than the contract-required detection limit (CRDL), but greater than or equal to the instrument detection limit (IDL).

- Quantitation (Q) Qualifiers

    E The reported value is estimated due to the presence of interference.

    N Spiked sample recovery is not within control limits.

    * Duplicate analysis is not within control limits.

- Validation Qualifiers

    J The analyte was positively identified; however, the associated numerical value is an estimated concentration only.

    UJ The analyte was not detected above the reported sample detection limit. However, the reported limit is approximate and may or may not represent the actual limit of detection.

    UB Analyte considered non-detect at the listed value due to associated blank contamination.

    R The sample results are rejected.

Two facts should be noted by all data users. First, the "R" flag means that the associated value is unusable. In other words, due to significant quality control (QC) problems, the analysis is invalid and provides no information as to whether the compound is present or not. "R" values should not appear on data tables because they cannot be relied upon, even as a last resort. The second fact to keep in mind is that no compound concentration, even if it has passed all QC tests, is guaranteed to be accurate. Strict QC serves to increase confidence in data but any value potentially contains error.

DRAFT

METALS ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
SW-846 6020	Water	180 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2.
	Soil	180 days from collection to analysis	Cooled @ 4 °C.
SW-846 7470	Water	28 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of less than 2.
SW-846 7471	Soil	28 days from collection to analysis	Cooled @ 4 °C.

All samples were analyzed within the specified holding times.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Analytes were detected in the associated QA blanks; however, the associated sample results were greater than the BAL and/or were non-detect. No qualification of the sample results was required.

3. Calibration

Satisfactory instrument calibration is established to provide that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument's continuing performance is satisfactory.

3.1 Initial Calibration and Continuing Calibration

The correct number and type of standards were analyzed. The correlation coefficient of the initial calibration was greater than 0.995 for all non-ICP analytes and all initial calibration verification standard recoveries were within control limits.

All continuing calibration verification standard recoveries were within the control limit.

DRAFT

3.2 CRDL Check Standard

The CRDL check standard serves to verify the linearity of calibration of the analysis at the CRDL. The CRDL standard is not required for the analysis of aluminum (Al), barium (Ba), calcium (Ca), iron (Fe), magnesium (Mg), sodium (Na), and potassium (K). The criteria used to evaluate the CRDL standard analysis are presented below in the CRDL standards evaluation table.

All CRDL standard recoveries were within control limits.

3.3 ICP Interference Control Sample (ICS)

The ICS verifies the laboratories interelement and background correction factors.

All ICS exhibited recoveries within the control limits.

4. Matrix Spike/Matrix Spike Duplicate (MS/MSD)/Laboratory Duplicate Analysis

MS/MSD and laboratory duplicate data are used to assess the precision and accuracy of the analytical method.

4.1 MS/MSD Analysis

All metal analytes must exhibit a percent recovery within the established acceptance limits of 75% to 125%. The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the analyte's concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater. In instance where this is true, the data will not be qualified even if the percent recovery does not meet the control limits and the laboratory qualifier "N" will be removed.

A MS/MSD analysis was not performed on a sample location within this SDG.

4.2 Laboratory Duplicate Analysis

The laboratory duplicate relative percent difference (RPD) criterion is applied when parent and duplicate sample concentrations are greater than or equal to 5 times the CRDL. A control limit of 20% for water matrices and 35% for soil matrices is applied when the criteria above is true. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the CRDL, a control limit of one times the CRDL is applied for water matrices and two times the CRDL for soil matrices.

The laboratory duplicate sample results exhibited RPD within the control limit.

5. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Field duplicates were not included with this SDG.

DRAFT

6. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The analytes associated with the LCS analysis must exhibit a percent recovery between the control limits of 80% and 120%.

The LCS analysis exhibited recoveries within the control limits.

7. Serial Dilution

The serial dilution analysis is used to assess if a significant physical or chemical interference exists due to sample matrix. Analytes exhibiting concentrations greater than 50 times the MDL in the undiluted sample are evaluated to determine if matrix interference exists. These analytes are required to have less than a 10% difference (%D) between sample results from the undiluted (parent) sample and results associated with the same sample analyzed with a five-fold dilution.

The serial dilution performed on sample location EB-1 exhibited %D within the control limit.

8. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

GENERAL CHEMISTRY ANALYSES

1. Holding Times

The specified holding times for the following methods are presented in the following table.

Method	Matrix	Holding Time	Preservation
Cyanide by EPA 9012	Water	14 days from collection to analysis	Cooled @ 4 °C; preserved to a pH of greater than 12.
	Soil		Cooled @ 4 °C.

All samples were analyzed within the specified holding times.

2. Blank Contamination

Quality assurance (QA) blanks (i.e., method and rinse blanks) are prepared to identify any contamination which may have been introduced into the samples during sample preparation or field activity. Method blanks measure laboratory contamination. Rinse blanks measure contamination of samples during field operations.

A blank action level (BAL) of five times the concentration of a detected compound in an associated blank (common laboratory contaminant compounds are calculated at ten times) is calculated for QA blanks containing concentrations greater than the method detection limit (MDL). The BAL is compared to the associated sample results to determine the appropriate qualification of the sample results, if needed.

Analytes were not detected above the MDL in the associated blanks; therefore detected sample results were not associated with blank contamination.

3. Calibration

Satisfactory instrument calibration is established to insure that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument daily performance is satisfactory.

The correct number and type of standards were analyzed. The correlation coefficient of the initial calibration was greater than 0.995 and all initial calibration verification standard recoveries were within control limits.

All calibration standard recoveries were within the control limit.

4. Matrix Spike/Matrix Spike Duplicate(MS/MSD)

MS/MSD and laboratory duplicate data are used to assess the precision and accuracy of the analytical method.

4.1 MS/MSD Analysis

All metal analytes must exhibit a percent recovery within the established acceptance limits of 75% to 125%. The MS/MSD recovery control limits do not apply for MS/MSD performed on sample locations where the analyte's concentration detected in the parent sample exceeds the MS/MSD concentration by a factor of four or greater. In instance where this is true, the data will not be qualified even if the percent recovery does not

DRAFT

meet the control limits and the laboratory qualifier “N” will be removed.

A MS/MSD analysis was not performed on a sample location within this SDG.

4.2 Laboratory Duplicate Analysis

The laboratory duplicate relative percent difference (RPD) criterion is applied when parent and duplicate sample concentrations are greater than or equal to 5 times the CRDL. A control limit of 20% for water matrices and 35% for soil matrices is applied when the criteria above is true. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the CRDL, a control limit of one times the CRDL is applied for water matrices and two times the CRDL for soil matrices.

A laboratory duplicate analysis was not performed on a sample location within this SDG.

5. Field Duplicate Analysis

Field duplicate analysis is used to assess the precision and accuracy of the field sampling procedures and analytical method. A control limit of 50% for water matrices and 100% for soil matrices is applied to the RPD between the parent sample and the field duplicate. In the instance when the parent and/or duplicate sample concentrations are less than or equal to 5 times the RL, a control limit of two times the RL is applied for water matrices or three times the RL is applied for soil matrices.

Field duplicates were not included with this SDG.

6. Laboratory Control Sample (LCS) Analysis

The LCS analysis is used to assess the precision and accuracy of the analytical method independent of matrix interferences. The analytes associated with the LCS analysis must exhibit a percent recovery between the control limits of 80% and 120%.

The LCS analysis exhibited recoveries within the control limits.

7. System Performance and Overall Assessment

Overall system performance was acceptable. Other than for those deviations specifically mentioned in this review, the overall data quality is within the guidelines specified in the method.

NYC Environmental Protection

Vincent Sapienza, P.E.
Commissioner

Dear Friends:

This past year has presented our agency, our city, and our nation with historic challenges. The work we do at the Department of Environmental Protection (DEP) has never been more vital to protecting the health of New Yorkers.

Despite the challenges presented by the COVID-19 global pandemic, we have remained focused and disciplined in our commitment to being a world-class water utility and building a sustainable future for all New Yorkers. At DEP, we are no strangers to confronting situations that require quick thinking and innovative solutions. Through all the challenges we faced in 2020, I am proud to report that each day we continued to deliver one billion gallons of the best tap water in the world to more than 9.3 million New Yorkers.

In this report, you will see that New York City's drinking water continued to meet or surpass every national and state standard for quality. These data are based on 43,600 samples that were collected by DEP scientists throughout our reservoir system, and at nearly 1,000 street-side sampling stations in every neighborhood across the city. Those samples were analyzed 530,000 times by scientists working in our four water quality laboratories. Robotic monitoring stations on our reservoirs provided another 2.7 million tests to ensure DEP was sending the best-quality water to New York City at all times.

I want to especially thank the many DEP employees who went above and beyond in 2020, putting their commitment to public service before themselves, and truly embodying DEP's core values. And, as we embark on a new decade, I also want to thank each of you for entrusting DEP with your drinking water supply. We take great pride in delivering the best water to millions of New Yorkers every day.

Sincerely,

Vincent Sapienza, P.E.
Commissioner

DRAFT

Throughout the COVID-19 pandemic, DEP's 6,000 dedicated scientists, engineers, and other professionals continued to protect, operate, and maintain New York City's water supply system, delivering high-quality drinking water to millions of New Yorkers around the clock, without interruption

DRAFT

NEW YORK CITY'S WATER SUPPLY SYSTEM

New York City's water supply system provides more than one billion gallons of safe drinking water every day to more than 8.3 million residents of New York City and one million people living in the counties of Westchester, Putnam, Orange, and Ulster. In 2020, we delivered 104 million gallons per day to 74 communities and institutions outside NYC. In all, this system provides nearly half the population of New York State with high-quality drinking water.

New York City gets its drinking water from 19 reservoirs and three controlled lakes spread across a nearly 2,000-square-mile watershed. The watershed is located upstate in portions of the Hudson Valley and Catskill Mountains that are as far as 125 miles north of the city. New York City's water supply system is comprised of two primary surface water supplies called the Catskill/Delaware and Croton. The city also has a permit to operate a groundwater supply in Southeast Queens, although water from that system has not been delivered to customers in many years.

In 2020, New York City received a blend of drinking water from the Catskill/Delaware and Croton supplies. The Catskill/Delaware provided approximately 96 percent of the water, and approximately 4 percent was supplied by Croton. An estimated 10 percent of the water supply was lost due to distribution system leakage.

TREATING OUR DRINKING WATER

CATSKILL/DELAWARE SUPPLY

Due to the very high quality of our Catskill/Delaware supply, New York City is one of only five large cities in the country with a surface drinking water supply that does not utilize filtration as a form of treatment. The Catskill/Delaware supply operates under a filtration waiver, referred to as the "Filtration Avoidance Determination" (FAD), and the water from this supply is treated using two forms of disinfection to reduce microbial risk.

Water is disinfected with chlorine, a common disinfectant added to kill germs and stop bacteria from growing on pipes, and then with ultraviolet (UV) light at the Catskill/Delaware UV Disinfection Facility. The facility, located in Westchester County, is the largest of its kind in the world and is designed to disinfect more than two billion gallons of water per day. At the UV Disinfection Facility, exposure to UV light inactivates potentially harmful microorganisms without changing the water.

DEP also adds food grade phosphoric acid, sodium hydroxide, and fluoride to the water before sending it into distribution. Phosphoric acid is added because it creates a protective film on pipes that reduces the release of metals, such as lead, from service lines and household plumbing. Sodium hydroxide is added to raise the pH which reduces corrosion of household plumbing. Fluoride is added to improve dental protection and is effective in preventing cavities at a federally-approved level of 0.7 mg/L. During 2020, only 0.2 percent of the water produced by Catskill/Delaware supply was not fluoridated.

CROTON SUPPLY

The Croton supply is filtered by the Croton Water Filtration Plant, located underground in the Bronx. The plant has the ability to treat up to 290 million gallons of drinking water each day, which helps to ensure a large enough supply of water for the city to withstand droughts, periodically shut down other parts of the water supply, and respond to the potential effects of climate change. The Croton Water Filtration Plant first began operating in May 2015.

Once water arrives at the filtration plant it undergoes treatment to remove impurities. The treatment processes include coagulation, dissolved air flotation, filtration, and disinfection. During coagulation, chemicals are added to untreated water, causing any particulates to bunch together and become larger particles called floc. Then injected air bubbles float the floc to the top where it is skimmed off using a process called dissolved air flotation. Finally, the water flows through a filter bed removing any remaining particles. Just like the Catskill/Delaware supply, Croton water is disinfected with chlorine and UV light to protect against potentially-harmful microorganisms, and is treated with food grade phosphoric acid, sodium hydroxide, and fluoride. In 2020, DEP upgraded the material in the filter beds from anthracite to granular activated carbon (GAC) to improve the plant's performance. Once the change was completed, the plant resumed operations on October 27 to December 31, during which time, only 0.6 percent of the water produced by the plant was not fluoridated.

The New Croton Reservoir Dam

DRAFT

TESTING FOR QUALITY

DRINKING WATER SAMPLING AND MONITORING

DEP monitors the water in the distribution system, upstate reservoirs and feeder streams, and wells that are potential sources for New York City's drinking water supply. We continuously sample and conduct analyses for numerous water quality parameters, including microbiological, chemical, and physical measures, throughout the watershed and as the water enters the distribution system. DEP also regularly tests water quality at nearly 1,000 water quality sampling stations throughout New York City. In 2020, DEP performed over 363,200 analyses on 31,300 samples from the distribution system, meeting all state and federal monitoring requirements. These data are summarized in tables starting on page 11. Additionally, DEP performed over 166,800 analyses on 12,300 samples from the upstate reservoir watersheds and took more than 2.7 million robotic monitoring measurements to support FAD watershed protection programs and to optimize water quality.

DEP's water quality monitoring program—far more extensive than required by law—demonstrates that the quality of New York City's drinking water remains high and meets all state and federal drinking water standards

REGULATION OF DRINKING WATER

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activities. Contaminants that may be present in source water include microbial contaminants, inorganic contaminants, pesticides and herbicides, organic chemical contaminants, and radioactive contaminants.

To ensure that tap water is safe to drink, the New York State Department of Health (NYSDOH) and the United States Environmental Protection Agency (EPA) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. The NYSDOH and the federal Food and Drug Administration's (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. The presence of contaminants does not necessarily indicate that water poses a health risk. These regulations also establish the minimum amount of testing and monitoring that each system must undertake to ensure that the tap water is safe to drink.

Visit **epa.gov/safewater** or **health.ny.gov** for more information about drinking water.

DRAFT

PROTECTING OUR WATER AT THE SOURCE

10-YEAR FILTRATION AVOIDANCE DETERMINATION (FAD)

DEP funds and administers a number of watershed protection and pollution prevention programs to maintain the high quality of our drinking water. These science-based strategies are designed to protect New York City's drinking water at its source by keeping pollution out of our reservoirs and the streams, creeks, and rivers that feed them.

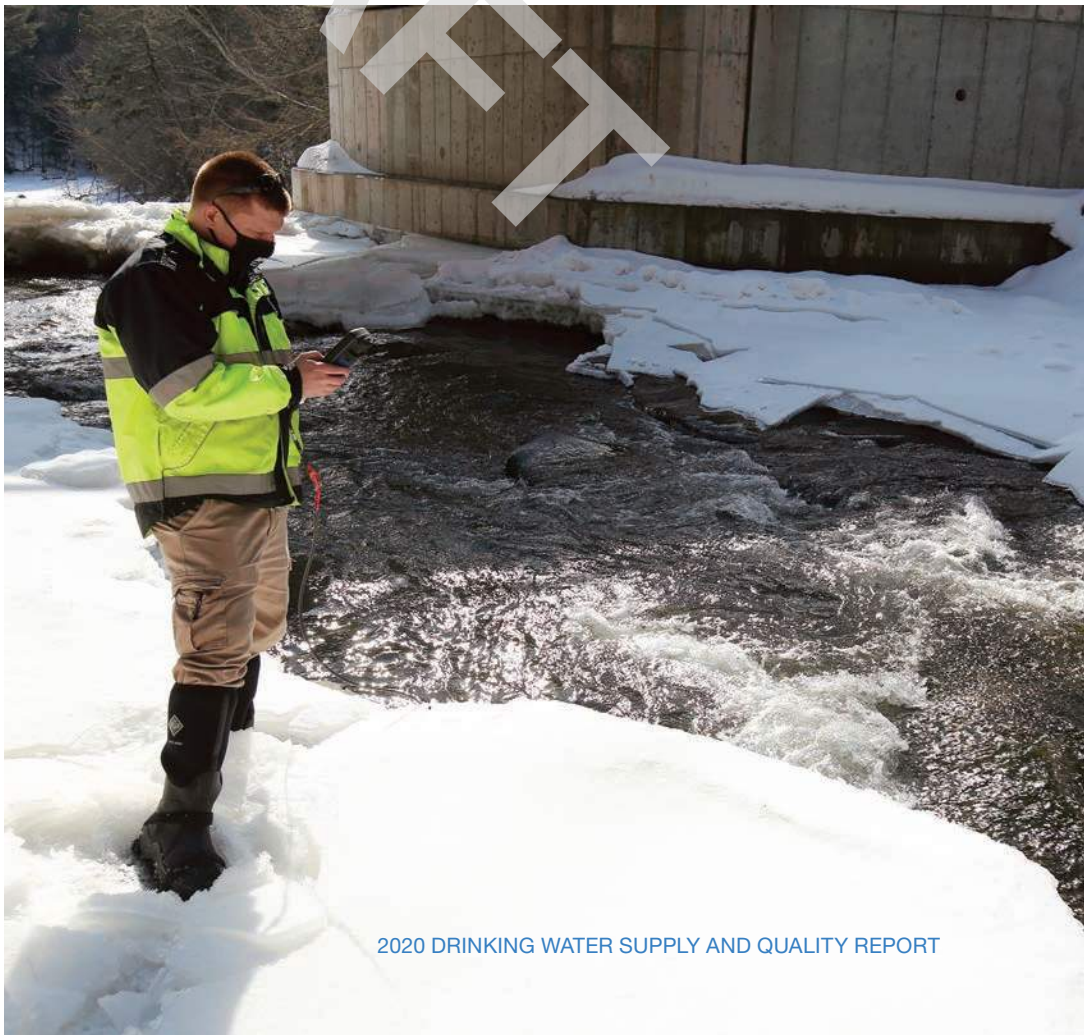
NYSDOH issued the most current FAD in 2017 that allows DEP to continue operating the Catskill/Delaware supply without filtration through at least 2027. DEP will commit an estimated $1 billion over the coming decade to comply with the FAD, which will go towards our watershed programs that conserve watershed lands, upgrade wastewater infrastructure, implement clean water strategies on watershed farms, and manage streams, forests, and other natural resources that affect water quality.

SOURCE WATER ASSESSMENT PROGRAMS

Federal regulations require states to develop and implement source water assessment programs to identify the areas that supply public tap water, inventory contaminants, assess water system susceptibility to contamination, and inform the public of the results. The states are given a great deal of flexibility on how to implement source water assessment programs. These assessments are created using available information to help estimate the potential for source water contamination. Higher susceptibility ratings do not mean that source water contamination has occurred or will occur in a water supply; rather, they indicate the need for water suppliers to implement additional precautionary measures. Because of DEP's extensive watershed protection and pollution prevention programs, NYSDOH does not find it necessary to perform a source water assessment on the New York City water supply.

DRAFT

Water quality monitoring at Bear Kill which leads to Schoharie Reservoir



CONSERVING OUR SUPPLY

Although New York City has grown by more than 1.3 million people since 1980, demand for water has dropped by approximately 35 percent—making it one of the most water-efficient large cities in the country.

The average single-family household in New York City uses approximately 70,000 gallons of water each year at a cost of $3.99 per 100 cubic feet of water (748 gallons), or about $373 a year. Since nearly all customers also receive wastewater collection and treatment services, which cost about $594, the combined annual water and sewer charge for the typical New York City household using 70,000 gallons per year is $967, calculated at fiscal year 2021 rates.

Advances in technology have played a key role in the drop of water consumption, from the replacement of thousands of inefficient toilets through DEP's toilet replacement program, to an automated leak detection program, which helps our customers save both money and water by alerting homeowners to unusual spikes in water consumption. DEP has also partnered with other city agencies, colleges, and businesses to help conserve water by installing more than 400 spray shower timers in NYC Parks playgrounds, 34,000 efficient bathroom fixtures in 402 New York City public schools, and a water reuse station at the Fire Department of the City of New York's (FDNY) Fire Training Academy on Randall's Island which includes a 40,000-gallon underground water storage tank used for calibrating equipment on pumper apparatus.

These, and other recent investments, have reduced overall demand for water by more than 11.2 million gallons per day. By 2022, we plan to nearly double that by conserving 20 million gallons per day through new and ongoing initiatives.

The DOs & DON'Ts of Water Conservation

BATHROOM

- ✔ Do take shorter showers and fill the tub halfway.
- ✖ Don't run water while washing your hands & brushing your teeth.

KITCHEN & LAUNDRY

- ✔ Do run the dishwasher & washing machine only when full.
- ✖ Don't let the water run while washing dishes. Kitchen faucets use 2 to 3 gallons a minute. Filling a basin only takes 10 gallons to wash and rinse.

EVERYWHERE

- ✔ Do install water-saving fixtures.
- ✖ Don't ignore water leaks. Turn taps off tightly.

OUTDOORS

- ✔ Do use a self-closing nozzle on your hose.
- ✖ Don't open fire hydrants.

REPORT LEAKS & WATER WASTE
Call 311

DRAFT

PLANNING FOR THE FUTURE

We are continuing to build upon DEP's legacy of long-term planning and have made significant progress on keystone projects already underway. In 2020, we completed the third year of an all-important capital project to rehabilitate the Catskill Aqueduct. Skilled workers replaced century-old valves along the northern 74 miles of the aqueduct and repaired minor leaks to ensure the aqueduct continues to deliver water from the Catskills to New York City after more than a century in service.

In May 2020, the final segment of steel lining was lowered into the Delaware Aqueduct Bypass Tunnel, marking another significant milestone in our project to repair the longest tunnel in the world. The last of 230 massive steel liners was lowered down an access shaft in the Town of Newburgh. Each steel segment is 16 feet in diameter, 40 feet long, and weighs 106,000 pounds. DEP expected to complete the installation of steel liners by August 2020, but laborers finished this vital portion of the $1 billion project several months ahead of schedule. In addition to meeting this milestone, we also placed more than 70 percent of the tunnel's finished concrete liner.

This summer, DEP announced the start of subsurface analyses for the future upgrades to the dam and dikes at Ashokan Reservoir. Field work began in August to support future upgrades to the dam and dikes that impound water at the reservoir. The work focuses on gathering soil and bedrock samples that are needed for the engineering and design of upgrades at each structure. The subsurface investigations are connected to the Ashokan Century Program, a comprehensive, multi-year capital program to upgrade the dam, dikes, chambers and other infrastructure at Ashokan Reservoir. The program comprises the largest public works project in the Catskills in more than 50 years.

DRAFT

Work on steel liners for the Delaware Aqueduct Bypass Tunnel (each liner section is 16' in diameter and 40' long)

CRYPTOSPORIDIUM AND *GIARDIA*

DEP maintains a comprehensive program to monitor its source waters and watersheds for the presence of *Cryptosporidium* and *Giardia*, microscopic organisms that can cause disease. In 2020, DEP collected weekly samples of water leaving Kensico Reservoir, prior to chlorination and UV disinfection, and leaving Hillview Reservoir, prior to secondary disinfection with chlorine. Water leaving New Croton Reservoir was sampled quarterly. Samples were analyzed using EPA Method 1623.1. The *Cryptosporidium* and *Giardia* data for water leaving the Kensico, Hillview, and New Croton reservoirs are presented in the table on page 14 of this report.

While there is no evidence that any cases of cryptosporidiosis or giardiasis have been caused by the New York City water supply, federal and state law requires all water suppliers to notify their customers about the potential risks from *Cryptosporidium* and *Giardia*. Cryptosporidiosis and giardiasis are intestinal illnesses caused by microscopic pathogens, which can be waterborne. Symptoms of infection include nausea, diarrhea, and abdominal cramps. Some people may be more vulnerable to disease causing microorganisms, or pathogens in drinking water than the general population. Immuno-compromised persons, such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly individuals, and infants, can be particularly at risk from infections. These people should seek advice from their health care providers about their drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium*, *Giardia*, and other microbial contaminants are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

New York City's Waterborne Disease Risk Assessment Program (WDRAP), a partnership between DEP and DOHMH, helps assess and ensure the microbial safety of NYC's tap water. Under WDRAP, NYC conducts disease surveillance for *Cryptosporidium* and *Giardia* to track incidence and to examine patterns and potential risk exposures in the population. The city also conducts syndromic surveillance for gastrointestinal symptoms to monitor trends to ensure identification of any waterborne disease outbreak, should one occur. Disease and syndromic surveillance continued to indicate that there have been no outbreaks of *Cryptosporidium* and *Giardia* attributed to tap water consumption in New York City.

Throughout the COVID-19 pandemic, DEP scientists continued their work to insure the high-quality of New York City's drinking water supply

LEAD IN DRINKING WATER: FREQUENTLY ASKED QUESTIONS

IS THERE LEAD IN MY DRINKING WATER?

New York City's award-winning tap water is delivered virtually lead-free through 7,000 miles of lead-free aqueducts, tunnels, and water mains in the city's water supply system. However, homes built prior to 1961 may have lead service lines (which connect your house to the city's water main in the street), and some homes, regardless of the year they were built, could have household plumbing and internal fixtures that contain lead. Although New York City takes extensive steps to protect water in homes that may have lead in their plumbing, lead from plumbing may still be released into a home's drinking water. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. DEP is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components.

HOW CAN I FIND OUT IF I HAVE A LEAD SERVICE LINE?

Visit nyc.gov/leadfree to view an interactive map. This map offers historical information largely based on third-party plumbing records, supplemented, in some cases by information gathered during inspections.

HOW CAN I TEST THE WATER IN MY HOME?

DEP offers free lead test kits to all New York City residents. Call 311 or visit nyc.gov/apps/311 to request a free lead test kit. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (1-800-426-4791) or at epa.gov/safewater/lead.

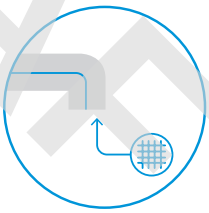
WHAT ARE THE HEALTH EFFECTS OF LEAD?

Exposure to lead can cause serious health problems, especially for pregnant women, infants, and young children. For more information, visit nyc.gov/lead.

How can I limit my lead exposure?

Run Your Tap
for 30 seconds to 2 minutes before using water for drinking or cooking, when your water has been sitting for several hours.

Use Cold Water
for cooking, drinking, or preparing infant formula. Hot tap water is more likely to contain lead and other metals.



Remove & Clean
the faucet screen monthly (also called an aerator), where small particles can get trapped.

Hire
a licensed plumber to identify and replace plumbing fixtures and/or service line that contain lead.

HOW TO READ THE NEW YORK CITY 2020 DRINKING WATER QUALITY TESTING RESULTS

The following section of this report compares the quality of your tap water to federal and state standards for each parameter (if applicable). The monitoring results show that New York City's drinking water met all drinking water standards in 2020.

The following tables reflect the compliance monitoring results for all regulated and non-regulated parameters, the number of samples collected, the range of values detected, the average of the values detected, and the possible sources of the parameters, unless otherwise footnoted. The monitoring frequency of each parameter varies and is parameter specific. Data presented are for the Catskill/Delaware and Croton supplies, which were the only sources of water in 2020. The table on page 15 represents those parameters monitored for, but not detected in any sample.

Most of our data are representative of 2020 testing; concentrations of parameters or contaminants do not change frequently.

THE NEW YORK CITY
2020 DRINKING WATER QUALITY TESTING RESULTS

DETECTED CONVENTIONAL PHYSICAL AND CHEMICAL PARAMETERS

PARAMETER	NYSDOH MCL (Highest Level Allowed)	EPA MCLG (Ideal Goal)	# SAMPLES	RANGE	AVERAGE	MCL VIOLATION	LIKELY SOURCES IN DRINKING WATER
Alkalinity (mg/L $CaCO_3$)	-		297	14 - 76	20	No	Erosion of natural deposits

LEAD AND COPPER RULE SAMPLING AT RESIDENTIAL WATER TAPS

PARAMETER	NYSDOH AL	EPA MCLG (Ideal Goal)	90% OF YOUR LEVELS WERE LESS THAN	RANGE	# SAMPLES EXCEEDING AL	Exceedance	LIKELY SOURCES IN DRINKING WATER
Copper (mg/L)	1.3	1.3	0.204	0.005 - 0.640	0 out of 411	No	Corrosion of household plumbing
Lead (µg/L)	15	0	11	ND - 120	28 out of 411	No	Corrosion of household plumbing

CRYPTOSPORIDIUM AND *GIARDIA* SAMPLING FROM SOURCE WATER LEAVING RESERVOIRS (19)

PARAMETER	RESERVOIR	# SAMPLES	# SAMPLES POSITIVE	RANGE	LIKELY SOURCES IN DRINKING WATER
Cryptosporidium (oocysts/50L)	Kensico	52	3	0 - 1	Animal fecal waste
	Hillview	52	2	0 - 1	
	Croton	4	0	0	
Giardia (cysts/50L)	Kensico	52	35	0 - 17	Animal fecal waste
	Hillview	52	17	0 - 5	
	Croton	4	3	0 - 8	

DRAFT

UNITS AND ABBREVIATIONS

$CaCO_3$ = calcium carbonate
CFU/mL = colony forming units per milliliter
/cm = per centimeter
D = detected parameter
°F = degrees Fahrenheit
µg/L = micrograms per liter (10^{-6} grams per liter)
µS/cm = microsiemens per centimeter
mg/L = milligrams per liter (10^{-3} grams per liter)
MPN/100mL = most probable number per 100 milliliters
ND = parameter is not detected
NDL = no designated limits
NTU = nephelometric turbidity units
/50L = per 50 liters

DEFINITIONS

Action Level (AL):
The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements that a water system must follow.

Maximum Contaminant Level (MCL):
The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible, using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG):
The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL):
The highest level of a disinfectant allowed in drinking water. The addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG):
The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contamination.

Treatment Technique (TT):
A required process intended to reduce the level of a contaminant in drinking water.

90th Percentile Value:
The values reported for lead and copper represent the 90th percentile. A percentile is a value on a scale of 100 that indicates the percent of a distribution that is equal to or below the value. The 90th percentile is equal to or greater than 90 percent of the lead and copper values detected at your water system.

NOT DETECTED PARAMETERS

Conventional Physical and Chemical Parameters:

Antimony, Arsenic, Asbestos, Beryllium, Cadmium, Cyanide, Gross alpha, Lithium, Mercury, Nitrite, Selenium, Silver, Thallium, Uranium

Principal Organic Contaminants:

Benzene, Bromobenzene, Bromochloromethane, Bromomethane, n-Butylbenzene, sec-Butylbenzene, tert-Butylbenzene, Carbon tetrachloride, Chlorobenzene, Chloroethane*, Chloromethane, 2-Chlorotoluene, 4-Chlorotoluene, Dibromomethane, 1,2-Dichlorobenzene, 1,3-Dichlorobenzene, 1,4-Dichlorobenzene, Dichlorodifluoromethane, 1,1-Dichloroethane, 1,2-Dichloroethane, 1,1-Dichloroethene, cis-1,2-Dichloroethylene, trans-1,2-Dichloroethylene, 1,2-Dichloropropane, 1,3-Dichloropropane, 2,2-Dichloropropane*, 1,1-Dichloropropene, cis-1,3-Dichloropropene, trans-1,3-Dichloropropene, total 1,3-Dichloropropene, Ethylbenzene, Hexachlorobutadiene, Isopropylbenzene, p-Isopropyltoluene, Methylene chloride, n-Propylbenzene, Styrene, 1,1,1,2-Tetrachloroethane, 1,1,2,2-Tetrachloroethane, Tetrachloroethylene, Toluene, 1,2,3-Trichlorobenzene, 1,2,4-Trichlorobenzene, 1,1,1-Trichloroethane, 1,1,2-Trichloroethane, Trichloroethene, Trichlorofluoromethane, 1,2,3-Trichloropropane, 1,3,5-Trimethylbenzene, m,p-Xylene, o-Xylene, total Xylene

Specified Organic Contaminants:

Alachlor, Aldicarb (Temik), Aldicarb sulfone, Aldicarb sulfoxide, Aldrin, Atrazine, Benzo(a)pyrene, Butachlor, Carbaryl, Carbofuran (Furadan), Chlordane, 2,4-D, 1,2-Dibromo-3-chloropropane, Di(2-ethylhexyl)adipate, Dicamba, Dieldrin, Dinoseb, 1,4-Dioxane, Diquat, Endothall, Endrin, Ethylene dibromide (EDB), Glyphosate, Heptachlor, Heptachlor epoxide, Hexachlorobenzene, 3-Hydroxycarbofuran, Lindane, Methomyl, Methoxychlor, Methyl-tertiary-butyl-ether (MTBE), Metolachlor, Metribuzin, Oxamyl (Vydate), Pentachlorophenol, Perfluorooctanesulfonic acid (PFOS), Perfluorooctanoic acid (PFOA), Picloram, Polychlorinated biphenyls (PCBs), PCB 1016 Aroclor, PCB 1221 Aroclor, PCB 1232 Aroclor, PCB 1242 Aroclor, PCB 1248 Aroclor, PCB 1254 Aroclor, PCB 1260 Aroclor, Propachlor, Simazine, 2,3,7,8-TCDD (Dioxin), Toxaphene, 2,4,5-TP (Silvex), Vinyl chloride

Unspecified Organic Contaminants:

Acenaphthene, Acenaphthylene, Acetochlor, Acetone, Acifluorfen, Allyl chloride, Ametryn, t-amyl ethyl ether, tert-Amyl methyl ether, Anthracene, Atraton, Bentazon, Benzo[a]anthracene, Benzo[b]fluoranthene, Benzo[g,h,i]perylene, Benzo[k]fluoranthene, beta-BHC, Bromacil, Bromoethane, 1,3-Butadiene, 2-Butanone (MEK), Butylate, Butylated hydroxytoluene (BHT), Butylbenzylphthalate, tert-Butyl ethyl ether, Caffeine, Carbon Disulfide, alpha-Chlordane, gamma-Chlordane, trans-Chlordane, Chlorfenvinphos, Chlorobenzilate, 2-Chlorobiphenyl, 4-Chlorobiphenyl, 1-Chlorobutane, Chlorodifluoromethane, Chloroneb, Chlorothalonil (Draconil,Bravo), Chlorpropham, Chlorpyrifos (Dursban), Chrysene, Cyanazine, Cycloate, 2,4-DB, DCPA (Dacthal), 2,4-DDD, 4,4'-DDD, 2,4-DDE, 4,4'-DDE, 2,4-DDT, 4,4'-DDT, DEET, Diazinon, Dibenz[a,h]anthracene, 3,5-Dichlorobenzoic acid, 2,4'-Dichlorobiphenyl, Dichlorprop, Dichlorvos (DDVP), Diethyl ether, Diethylphthalate, Di-isopropyl ether, Diisopropyl methylphosphonate, Dimethipin, Dimethoate, Dimethylphthalate, Di-n-Butylphthalate, 2,4-Dinitrotoluene, 2,6-Dinitrotoluene, Di-N-octylphthalate, Diphenamid, Disulfoton, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin aldehyde, Endrin Ketone, EPTC, Ethion, Ethoprop, Ethyl methacrylate, Etridiazole, Fenarimol, Fluoranthene, Fluorene, Fluridone, alpha-HCH, beta-HCH, delta-HCH, 2,2',3,4,4',5,5'-Heptachlorobiphenyl, 2,2',3,4,4',5'-Hexachlorobiphenyl, 2,2',3,4',5',6-Hexachlorobiphenyl, 2,2',4,4',5,5'-Hexachlorobiphenyl, Hexachloroethane, Hexachlorocyclopentadiene, Hexazinone, Indeno[1,2,3-cd]pyrene, Isophorone, Malathion, Methiocarb, Methyl acetate, Methyl iodide, Methyl parathion, 4-Methyl-2-pentanone (MIBK), Mevinphos, MGK264 - isomer a, MGK264 - isomer b, Molinate, Naphthalene, Napropamide, Nitrofen, cis-Nonachlor, trans-Nonachlor, Norflurzon, Oxyfluorfen, Paraquat, Parathion, Pebulate, Pendimethalin, 2,3,3',4',6-Pentachlorobiphenyl, 2,3',4,4',5-Pentachlorobiphenyl, Pentachloroethane, Perfluorobutanesulfonic acid, Perfluorodecanoic acid, Perfluorododecanoic acid, Perfluoroheptanoic acid, Perfluorohexanesulfonic acid, Perfluorohexanoic acid, Perfluorononanoic acid, Perfluorotetradecanoic acid, Perfluorotridecanoic acid, Perfluoroundecanoic acid, cis-Permethrin & trans-Permethrin, Permethrin (mixed isomers), Phenanthrene, Phorate, Phosphamidon, Profenofos, Prometon, Prometryn, Pronamide, Propazine, Propoxur (Baygon), Pyrene, Simetryn, 2,4,5-T, Tebuconazole, Tebuthiuron, Terbacil, Terbuthylazine, Terbutryn, 2,2',3,5'-Tetrachlorobiphenyl, 2,2',5,5'-Tetrachlorobiphenyl, 2,3',4',5-Tetrachlorobiphenyl, Tetrachlorovinphos, Tetrahydrofuran, Thiobencarb, Triademefon, Tribufos, 2,2',5-Trichlorobiphenyl, 2,4,4'-Trichlorobiphenyl, Trichlorotrifluoroethane(Freon 113), Trifluralin, 1,2,4-Trimethylbenzene, Vernolate, Vinclozolin

DRAFT

2020 MONITORING DATA FOOTNOTES

(1) EPA Secondary MCL: NYSDOH has not set an MCL for this parameter.

(2) Monitored for under the Fourth Unregulated Contaminant Monitoring Rule (UCMR4) in 2018 and 2019. UCMR4 included source water monitoring for bromide and total organic carbon; no MCL has been established for these parameters.

(3) Value represents MRDL, which is a level of disinfectant added for water treatment that may not be exceeded at the consumer's tap without an unacceptable possibility of adverse health effects. The MRDL is enforceable in the same manner as an MCL and is the calculated running annual average. Data presented are the range of individual sampling results and the highest of the four quarterly running annual averages.

(4) Determination of MCL violation: If a sample exceeds the MCL, a second sample must be collected from the same location within two weeks, or as soon as practical. If the average of the two results exceeds the MCL, then an MCL violation has occurred.

(5) Action Level (not an MCL) measured at-the-tap. The data presented in this table were collected from sampling stations at the street curb. For at-the-tap monitoring, see the Lead and Copper Rule Sampling at Residential Water Taps table.

(6) A Langelier Index of less than zero indicates corrosive tendencies.

(7) Hardness of up to 3 grains per gallon is considered soft water; between 3 and 9 is moderately hard water.

(8) If iron and manganese are present, the total concentration of both should not exceed 500 µg/L. One exceedance of the iron MCL occurred at site 30150 (East Village, 10009) on 7/7/20 following an emergency shutdown of the water main.

(9) Only detected in one sample: lead was detected at site 11750 (City Island, 10464) on 6/2/20, nickel was detected at site 22950 (Clinton Hill, 11205) on 7/7/20, and Bis(2-Ethylhexy)phthalate was detected at site 1SCL1 (Van Cortlandt Village, 10463) on 11/17/20 at the method reporting limit. In all other samples the parameter was not detected.

(10) NYSDOH established Optimal Water Quality Parameters (OWQP) under the Lead and Copper Rule which includes a range for pH and ortho-phosphate which are presented here. The reported average value for pH is the median value.

(11) Water containing more than 20 mg/L of sodium should not be used for drinking by people on severely restricted sodium diets. Water containing more than 270 mg/L of sodium should not be used for drinking by people on moderately restricted sodium diets.

(12) Turbidity is a measure of cloudiness of the water. Turbidity is monitored because it is a good indicator of water quality, because high turbidity can hinder the effectiveness of disinfection, and because it is a good indicator of the effectiveness of our filtration system.

(13) This MCL for turbidity is the monthly average rounded off to the nearest whole number. Data presented are the range of individual sampling results and the highest monthly average from distribution sites.

(14) This MCL for turbidity is on individual readings taken every four hours at the unfiltered Catskill/Delaware source water entry point. Value presented is the highest individual sampling result.

(15) This is a Treatment Technique performance standard for the Croton Filtration Plant. The value presented is the highest single combined filter effluent turbidity measurement which occurred on 11/25/20. In 2020, 100% of turbidity results were <0.3 NTU.

(16) Results for t-Butyl alcohol are only reported as detected (D) or not detected (ND).

(17) The MCLs for HAA5 and TTHMs are the calculated locational running annual average. The data in the Range column are the minimum and maximum values of all sample sites monitored in the distribution system whether for compliance purposes or not. The values in the Average column are the highest locational running annual averages under the Stage 2 Disinfectant and Disinfection By-Products Rule.

(18) If a sample and its repeat sample are both positive for coliform bacteria and one of the two samples is positive for *E. coli*, then an MCL violation has occurred.

(19) Samples are collected prior to final disinfection or filtration. Positive results indicate (oo)cyst detection, not viability or infectivity.

* Chloroethane and 2,2-Dichloropropane were incorrectly reported as having been monitored for in 2015 to 2019 in those year's reports. Monitoring for these two parameters, prior to 2020, last occurred in 2014 when they were not detected.

DRAFT

HILLVIEW RESERVOIR CONSENT JUDGEMENT

The Hillview Reservoir is the final stop for drinking water from the Catskill/Delaware System before it enters the city's distribution system. The City and DEP entered into a Consent Decree and Judgement with the United States and New York State, effective May 15, 2019, which sets forth a schedule of compliance for the City to cover the Hillview Reservoir as required by the Long Term 2 Enhanced Surface Water Treatment Rule (40 C.F.R §141.714). DEP and the City timely complied with all scheduled commitments due under the Decree in 2020.

CONTAMINANTS QUESTIONS
Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at 1-800-426-4791.

CERTIFICATE OF TITLE ISSUED BY

STEWART TITLE

INSURANCE COMPANY

Certifies to the proposed insured named in Schedule A that an Examination of title to the premises described in Schedule A has been made in accordance with its usual procedure and agrees to issue its standard form of title insurance policy in favor of the proposed insured, covering premises described in Schedule A, in the amounts hereinafter set forth, insuring the fee and/or mortgage and the marketability thereof, after the closing of the transaction in conformance with procedures approved by the Company excepting (a) all loss or damage by reason of the estates, interests, defects, objections, liens, encumbrances and other matters set forth herein that are not disposed of to the satisfaction of the Company prior to such closing or issuance of the policy (b) any question or objection coming to the attention of the Company before the date of closing, or if there be no closing, before the issuance of said policy.

This Certificate shall be null and void (1) if the fees therefore are not paid (2) if the prospective insured, his attorney or agent makes any untrue statement with respect to any material fact or suppresses or fails to disclose any material fact or if any untrue answers are given to material inquiries by or on behalf of the Company (3) upon delivery of the policy. Any claim arising by reason of the issuance hereof shall be restricted to the terms and conditions of the standard form of insurance policy. If title, interest or lien to be insured was acquired by the prospective insured prior to delivery hereof, the Company assumes no liability except under its policy when issued.

THIS REPORT IS NOT A TITLE INSURANCE POLICY. PLEASE REVIEW THIS REPORT WITH A REAL ESTATE PROFESSIONAL REPRESENTING YOUR INTEREST IN THIS TRANSACTION. PLEASE READ IT CAREFULLY. THE REPORT MAY SET FORTH EXCLUSIONS UNDER THE TITLE INSURANCE POLICY AND MAY NOT LIST ALL LIENS, DEFECTS, AND ENCUMBRANCES AFFECTING TITLE TO THE PROPERTY. YOU SHOULD CONSIDER THIS INFORMATION CAREFULLY.

SCHEDULE A CONTINUED

LEGAL DESCRIPTION

As to Lot 3:

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at the corner formed by the intersection of the northeasterly side of Kent Avenue and the southeasterly side of Keap Street;

RUNNING THENCE northeasterly along the southeasterly side of Keap Street 227 feet 5 inches to land now or late of Robert Bach;

THENCE southeasterly along said land 143 feet 9 1/4 inches;

THENCE southwesterly parallel with Keap Street 227 feet 5 inches to the northeasterly side of Kent Avenue;

THENCE northwesterly along the northeasterly side of Kent Avenue 143 feet 9 1/4 inches to the corner, the point or place of BEGINNING.

NOTE: Being Block(s) 2197, Lot(s) 3, Tax Map of the Borough of Brooklyn, County of Kings.

As to Lot 15:

ALL that certain plot, piece or parcel of land, with the building and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at a point on the southeasterly side of Keap Street distant 80 feet southwesterly from the corner formed by the intersection of the said southeasterly side of Keap Street (70 feet wide) and southwesterly side of Wythe Avenue (70 feet wide):

RUNNING THENCE southeasterly and parallel with the southwesterly side of Wythe Avenue, 153 feet 8 inches to the line of land now or formerly of Barnett Johnson or a line in prolongation thereof;

THENCE southwesterly along said line or Barnett Johnson, on a line forming an interior angle of 80 degrees 33 minutes 2 seconds on its westerly side, 96 feet, 9 inches with the last mentioned course;

THENCE southerly to the northwesterly side of Hooper Street (70 feet wide) on a line drawn at right angles thereto 47 feet 1 inch;

Issued by:
Madison Title Agency, LLC
1125 Ocean Avenue, Lakewood, NJ 08701
Telephone: 732-905-9400 Fax: 732-905-9420

THENCE southwesterly along the northwesterly side of Hooper Street, 21 feet;

THENCE northwesterly and at right angles to the northwesterly side of Hooper Street, 47 feet 3 inches to the said line of land now or formerly of Barnett Johnson;

THENCE southwesterly along the same, 19 feet 9 inches to a point distant of 153 feet southeast of the southeasterly side of Keap Street when measured along a line drawn parallel with the northeasterly side of Kent Avenue and distant 227 feet 5 inches northeast thereof;

THENCE northwesterly along said line 153 feet to the southeasterly side of Keap Street; and

THENCE northeasterly along the said southeasterly side of Keap Street, 145 feet, 7 inches to the point and place of BEGINNING.

NOTE: Being Block(s) 2197, Lot(s) 15, Tax Map of the Borough of Brooklyn, County of Kings.

Title No.: MTANY-174652

CLOSING REQUIREMENTS

1. All parties attending the closing will be required to furnish a photo driver's license or other acceptable photo identification card to be copied.

2. All personal checks in excess of $500.00 must be approved by the Company PRIOR TO CLOSING.

3. Borrower and lender must comply with the mortgage recording requirements of the New York State Department of Taxation and Finance. Every mortgage offered for recording must contain the following recital:

   "The real property [is or is not, whichever applies] principally improved or to be improved by one or more structures containing in the aggregate not more than six residential dwelling units, each dwelling unit having its own separate cooking facilities."

   NOTE: This recital may be stated on the mortgage instrument itself or it may be included by the attachment of a separate page to the mortgage signed by the person making the statement.

4. Applicable Mortgage Recording Tax is due at closing.

5. If an Assignment of Mortgage is offered at closing for recording, then the Borrower and Lender must comply with the requirements of Section 275 of the Real Property Law:

   a) The Assignment of Mortgage must contain the following language:

   "This assignment is not subject to the requirements of Section 275 of the Real Property Law because it is an assignment within the secondary mortgage market."

   -or-

   b) There must be affixed to, and recorded as part of the Assignment of Mortgage, an affidavit executed by the mortgagor stating that the assignee is not acting as a nominee of the mortgagor or owner of the property, and that the mortgage continues to secure a bona obligation.

6. If any of the closing instruments herein are to be executed by a Power of Attorney, then the following requirements must be complied with:

   a) The proposed Power of Attorney instrument must be submitted to this Company for Underwriting consideration prior to closing.

   b) At closing an affidavit will be required from the attorney for the Principal to show that the Power of Attorney has not been revoked and that the Principal of the Power is alive and competent at the time of closing.

   c) The Power of Attorney must be in recordable form and must be submitted at closing for recording simultaneously with the closing documents.

7. Tax Map block and lot numbers must appear on each instrument offered for recording.

SCHEDULE B CONTINUED

Hereinafter set forth are the additional matters which will appear in the policy as exceptions from coverage, unless disposed of to the Company's satisfaction prior to the closing or delivery of the policy. Company reserves the right to raise additional exceptions.

1. Rights of tenants or persons in possession, if any.

2. NO OPEN MORTGAGES OF RECORD. Company will require a written statement from the record owner(s) confirming there are no unrecorded open mortgage debts against the subject premises.

3. Covenants, Conditions, Restrictions, Easements, Agreements, etc. of record:
   1. Easement in CRFN 200800410103. (as to Lot 3)

4. Tax Search: Herein

5. Bankruptcy Searches run against the same/similar name as Nap Industries, Inc.
   Returns: None

6. Satisfactory Proof by affidavit must be furnished whether any work has been done upon the premises by the City of New York, or any demand made by the City for any work, which may result in charges being imposed by:

   a. the New York City Department of Rent and Housing Maintenance, Emergency Services;

   b. the New York City Department of Environmental Protection for Water Tap closing or any related work; and

   c. by the New York City Department of Health;

   whether or not such charges are liens against which this policy protects.

7. Policy excepts any fees, charges, liens and assessments which pursuant to the Administrative Code of the City of New York may have attached although not yet filed with the County Clerk, Register and/or Department of Finance (City Collector's Office).

   The purchaser and/or mortgagee should obtain satisfactory proof showing whether any work has been done upon the premises described in Schedule "A" by the City of New York, or any demand made by the City of New York for any such work which may result in fees, charges, liens and/or assessments by the New York City Department of Rent and Housing Maintenance, the New York City Department of Health, the New York City Department of Environmental Protection, the New York City Department of Buildings and the New York City Fire Department for emergency repairs, water tap closing, leaking tap or service pipe repairs or any related work. The Department of Buildings and the Fire Department may also have liens for unpaid fees for inspections, reinspections, examinations or services rendered by the Department, and for permit fees billed by the Department of Buildings.

8. For informational purposes only:

Stewart Title Insurance Company

Title No.: MTANY-174652

For New York City Properties Only: The City of New York requires the owners of certain income producing properties to file a Real Property Income and Expense ("RPIE") form with the City's Department of Finance annually. If the property owner does not file the RPIE form or files the form late, then the Department of Finance may assess a penalty of 3 to 5 percent of the property's final assessed valuation. The penalty will appear on the owner's real property tax bill. Because there may be significant time lag between the due date for the RPIE form and the date on which the penalty and interest appear on the tax bill, the policy will except and not cover any and all RPIE charges, fees and penalties which may be assessed by the Department of Finance against the property or its owner after the date of the title policy.

9. A final water/sewer rent bill is required at closing. In the absence of such a bill showing an actual reading of consumption, policy will except all water meter and/or sewer rent charges from the date of that last actual reading of the meter including all charges entered thereafter and which might include usage prior to date of the policy.

10. Note: A request for a final water reading must be made more than 30 days in advance of closing to the Bureau of Customer Services of the Department of Environmental Conservation in the County in which the property is located. Without receiving 30 days notice, which period runs from the date on which payment for the reading is posted to the property's account, the Department will not afford a purchaser innocent owner status, notwithstanding that a reading is posted by DEP after receiving the request for a reading and before closing.

11. PROPERTIES NOT YET CONVERTED TO METERED WATER BILLING:
DEP will be charging a 100% surcharge in the event a water meter has not yet been installed. Company will pick up same at time of closing if DEP shows property as subject to surcharge.

12. Please note for Kings, Queens, Bronx and New York Counties: If there will be a deed submitted for recording at or prior to closing, please be advised that all transfer tax forms must be in e-tax form format prepared on-line through the Acris system. For more information please see www.nyc.gov/acris.

13. Deeds and Mortgages must contain the covenant required by Section 13 of the Lien Law and such covenant must be absolute and not conditional. The covenant is not required in deeds from referees or other persons appointed by a court for the sole purpose of selling property.

14. Company requires identification for any and all parties signing on the closing documents.

15. Searches were run for judgments, liens, federal tax liens, etc. against the same/similar name as Nap Industries, Inc. The following returns were found: None

16. The name of the purchaser must be disclosed to the company prior to closing, so that the proper searches can be made. The contract of sale should also be produced for consideration of counsel. In addition, if the purchaser/mortgagor is a corporation, limited liability company or partnership, the Certificate of Incorporation, LLC articles and agreement, or Partnership Agreement, must be provided prior to or at closing.

17. Certificate of Good Standing is required for Nap Industries, Inc.

DRAFT

Issued by:
Madison Title Agency, LLC
1125 Ocean Avenue, Lakewood, NJ 08701
Telephone: 732-905-9400 Fax: 732-905-9420

18. Proof is required of payment of franchise tax on Nap Industries, Inc. to date of closing. Report requested from State Tax Commission.

19. Proof of payment of New York City Corporate Business Taxes on: Nap Industries, Inc. is required. Proof of payment in the form of a Status Report must be obtained from the New York City Department of Finance by an officer of the Corporation or their duly appointed attorney-in-fact. Status Reports are NOT made available to title companies.

20. If the present transaction consists in whole or in part of a conveyance or lease by a corporate grantor or lessor and the certificate of incorporation so requires, Company will require the written consent thereto by the holders of the outstanding shares of the corporation and the instrument on closing should so recite. In lieu thereof the consent of the holders of two-thirds of all the outstanding shares entitled to vote thereon obtained at a meeting duly noticed and called for the purpose of obtaining such consent in the manner called for in Section 605 of the Business Corporation Law is required and the instrument on closing should so recite. If neither of the above is obtained, then, the proofs showing the basis upon which the conveyance or lease is to be made must be submitted to counsel prior to closing.

21. Company requires the following for review **prior** to closing with regard to Nap Industries, Inc.:

    1. Proof of due formation: proof of filing of the Articles of Incorporation;

    2. Articles of Incorporation and Bylaws must be produced and reviewed; additional exceptions may be raised upon review of same;

    3. Proof that there has been no change in the make-up or composition of the Corporation, and that there have been no amendment made to the Articles of Incorporation and Bylaws;

    4. Proof that the party or parties executing instruments on behalf of the organization have authority to act.

22. Deed to contain the following language: "Being and intended to be the same premises conveyed to the party of the first part by the following:
    By Deed from North Eleventh Corp. recorded on 11/13/1972 in Reel 594, Page 1120 (as to Lot 3); and
    By Deed from New York Job Development Authority recorded 08/28/1998 in Reel 4267, Page 1602 (As to Lot 15)".

23. New York City Real Property Transfer Tax payment and return are due upon delivery of closing deed. NOTE: Where the consideration reported is $400,000.00 or more, the City of New York requires that a copy of the Contract of Sale be attached to the RPT return. New York City Smoke Detecting Alarm (Device) Affidavit must accompany closing deed for recording. Pursuant to NYC Administrative Code Sec. 27-2099, a closing deed, lease or memorandum of lease cannot be accepted for recording unless accompanied by: 1. If a multiple dwelling (3 families or more) - A "Preliminary Residential Property Transfer Form" as published by the Department of Housing, Preservation and Development of the City of New York. NOTE: In New York City ownership registration is required for all Multiple Dwellings, i.e.. 3 families or more, NYC Adm. Code Sec. 27-2097(b)(1); AND for all Non-multiple Dwellings, i.e.. 1-2 family dwellings, if the owners reside outside the City of New York, NYC adm. Code Sec. 27-2097(b)(2). Only one property may be registered on each form, therefore, the use of several forms will be required if the

DRAFT

instrument to be recorded affects more than one property. 2. If a non-multiple dwelling - An Affidavit executed by the purchaser stating that the deed, lease or memorandum of lease does not affect a multiple dwelling.

24. Tax Law _ 663(d), effective 9/1/2003 as revised, requires that a recording officer shall not record or accept for record any deed unless accompanied by a form IT-2663 for the appropriate year in which the transaction takes place, together with the payment of the estimated tax due, if any, by check made payable to "NYS Income Tax" or if the transaction is not subject to the filing and payment requirements of _ 663 because the seller is a resident individual, trust or estate, a TP-584 form which includes a completed certification by the transferor/seller that this section is inapplicable to the transfer.

25. Proof required to show all tenancies and parties in possession. All leases affecting the premises must be produced and examined in advance of closing, and determination made as to whether any instrument is required from the lessees in order to subordinate.

26. UCC Searches run in the county against Nap Industries, Inc. The following returns were found: 1 UCC. See herein.

    1. UCC:
    Debtor: Nap Industries, Inc.
    Secured Party: JPMorgan Chase Bank, NA
    Filed on: 12/08/2010
    CRFN # 2010000411477
    Affects Lot 3 only

    UCC Continuation Filed on 06/16/2015 in CRFN 2015000204418.
    UCC Continuation Filed on 07/08/2020 in CRFN 2020000193303.

27. UCC Searches run in the New York State Department of State against Nap Industries, Inc. The following returns were found: Numerous UCCs; see herein.

28. Terms and provisions of Lease made by and between N.J.R. Properties, as Landlord, and Bene Knitwear, Inc., as Tenant, dated April 23, 1979, Agreement to Assign and Assume Lease and Consent to Assignment recorded on February 20, 1990 in Reel 2517, Page 311.

29. As to Lot 15:
    Tax Lien Certificate No. 3B recorded on 09/15/2005 in CRFN 2005000516780, Amount $22,580.40.
    TO BE DISPOSED OF.

30. For Fee Policy: Policy will except any rent stabilization fees not transferred to the NYC Department of Finance as of date of closing. Company will order Rent Stabilization Fee Search upon request.

31. Until a guaranteed survey is received, policy will not insure courses, distances and dimensions of subject premises or the bed of any street, road or avenue passing through same, and will except any facts such a survey or personal inspection would show.

Privacy Policy Notice for Stewart Title Insurance Company and Madison Title Agency, LLC

Purpose of this Notice

Title V of the Gramm-Leach-Bliley Act (GLBA) generally prohibits any financial institution, directly or through its affiliates, from sharing nonpublic personal information about you with a nonaffiliated third party unless the institution provides you with a notice of its privacy policies and practices, such as the type of information that it collects about you and the categories of persons or entities to whom it may be disclosed. In compliance with the GLBA, we are providing you with this document, which notifies you of the privacy policies and practices of Stewart Title Insurance Company and Madison Title Agency, LLC.

We may collect nonpublic personal information about you from the following sources:

- Information we receive from you such as on applications or other forms;
- Information about your transactions we secure from our files, or from [our affiliates or] others;
- Information we receive from a consumer-reporting agency.
- Information that we receive from others involved in your transaction, such as the real estate agent or lender.

Unless it is specifically stated otherwise in an amended Privacy Policy Notice, no additional nonpublic personal information will be collected about you.

We may disclose any of the above information that we collect about our customers or former customers to our affiliates or to nonaffiliated third parties as permitted by law.

We also may disclose this information about our customers or former customers to the following types of nonaffiliated companies that perform marketing services on our behalf or with whom we have joint marketing agreements:

- Financial service providers such as companies engaged in banking, consumer finance, securities and insurance;
- Non-financial companies such as envelope stuffers and other fulfillment service providers.

WE DO NOT DISCLOSE ANY NONPUBLIC PERSONAL INFORMATION ABOUT YOU WITH ANYONE FOR ANY PURPOSE THAT IS NOT SPECIFICALLY PERMITTED BY LAW.

We restrict access to non-public personal information about you to those employees who need to know that information in order to provide products or services to you. We maintain physical, electronic and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

We appreciate this opportunity to be of service to you.

The undersigned acknowledges that I/we have read and understand the above Privacy Policy Notice.

STREET VAULTS

In New York City, if there is a STREET VAULT, it is suggested that applicant investigate possible unpaid license fees by the City of New York for the use of such vault, because the right to maintain it IS NOT INSURED, nor does the Company insure that the vault charges have been paid.

REAL ESTATE TAXES – NEW YORK CITY

TAX	FISCAL YEAR BEGINS	DUE DATES	LIEN DATES
City Assessed Valuation of $40,000 or less*	July 1	July 1, October 1, January 1 & April 1	July 1, October 1, January 1 & April 1
Assessed Valuation of over $40,000	July 1	**July 1 & January 1	**July 1 & January 1
Annual Water (non-metered) Annual Sewer	July 1	June 30	June 30

*Includes real property held in cooperative form where the assessed valuation for such property divided by the number of dwelling units equals $40,000 or less.

** Taxes are liens and are due and payable in semi-annual installments on July 1 and January 1. NOTE: Local Law requires owners of real estate assessed at more than $40,000 to pay real estate taxes in semi-annual installments while continuing quarterly payments for properties assessed at $40,000 or less.

CITY TAX	The grace period on taxes is through the 15th day of the month beginning with the due date. Interest from the due date is added at the rate of 9% per annum provided the property is improved and the annual tax is $2,750.00 or less. If the property is improved and the annual tax is more than $2,750 or if the property is vacant or unimproved land, interest is calculated at 18% per annum.
WATER METER CHARGES AND SEWER CHARGES	Water and sewer charges are now administered by the New York City Department of Environmental Protection (Bureau of Water and Energy Conservation) located at 59-17 Junction Blvd., Corona, New York, Telephone #718-595-4600. They have developed a new computer system (the Customer Information System, or CIS) for processing and issuing water and sewer charges. The charges generated through this new system will not be posted in the New York City Department of Finance's computer systems, where water and sewer charges have been posted in the past. Any search for unpaid water and sewer charges must include both the Department of Finance (for charges established before CIS was implemented and the Department of Environmental Protection (Bureau of Water and Energy Conservation). The charges are based on water meter readings. Sewer charges are calculated on the quantity of industrial wastes discharged into the sewer and become liens on the date of entry. If not paid within thirty days following the date of entry, interest at the rate of 18% per annum, from the date of entry is added to date paid. NOTE: To obtain a special meter reading, the homeowner should contact the New York City Department of Environmental Protection (Bureau of Water and Energy Conservation) at the above address for an appointment on payment of a fee of $55.00. If for any reason the homeowner fails to keep the appointment, the fee paid is non-refundable. The homeowner will then have to make another appointment on payment of the required fee of $55.00.

DRAFT

WATER AND SEWER CHARGES (FRONTAGE)	If annual charges are not paid by the last day of the month following the month of entry, interest at 18% per annum from the due date is added to date paid.	
WATER METER CHARGES AND SEWER CHARGES (FOR QUEENS COUNTY ONLY)	In certain areas of Queens County, metered water charges are paid to the Jamaica Water Company (a Private Co.). The meter is read approximately every 90 days and a bill mailed 7 days later. To obtain a special meter reading, the homeowner should contact the Jamaica Water Company (Telephone #718-298-8100) to set up an appointment at no charge to the customer. New York City Dept. of Environmental Protection bills all Queens residents for sewer charges (except areas where a cesspool is located). Sewer charges are based upon a percentage of water consumption. Jamaica Water Company supplies its Queens customers records to the City once a year so that they may bill for sewer charges. Jamaica Water Co. is not responsible for calculating any sewer charges. Any questions regarding sewer bills, contact the Bureau of Water and Energy Conservation at (718) 595-4600. NOTE: The New York City Bureau of Water and Energy Conservation now has access to Jamaica Water Company computer system and therefore can readily obtain information from them.	
ASSESSMENTS	LIEN DATE When entered	DUE DATE When entered
	LAST DAY TO PAY WITHOUT PENALTY Within 90 days of entry (within 30 days on assessments for emergency repairs or services and Department of Health Pest Control charges). INTEREST PENALTY FOR LATE PAYMENT Assessments accrue penalty at the same rate as a City Tax upon the premise to which they relate (except assessments based upon emergency repairs made or services performed pursuant to Department of Housing Preservation and Development authorization which accrue penalty at the rate of 10% per annum).	
BOILER AND ELEVATOR	LIEN DATE When entered	DUE DATE When entered
	LAST DAY TO PAY WITHOUT PENALTY Within 30 days of entry. INTEREST PENALTY FOR LATE PAYMENT Interest on all Boiler and Elevator charges ……18% per annum.	
VAULT	LIEN DATE June 1	DUE DATE June 1
	LAST DAY TO PAY WITHOUT PENALTY Within 30 days of entry. INTEREST PENALTY FOR LATE PAYMENT Interest rates on all Vault charges.....8% per annum. March 1, 1989 to date.....8.0% per annum.	

DRAFT

NOTES

1. Your canceled check is your receipt. Receipted bills will not be returned unless written request accompanies payment.

2. General information call: Taxpayer Assistance (718) 935-9500.

3. Interest computation: (For Real Estate Taxes call N.Y.C. Department of Finance (718) 934-6000.) Due to possible fluctuation in the interest rate and the complexity of interest calculations, it is recommended that an official bill be obtained from the appropriate Borough Office of the Department of Finance, requesting an interest calculation to the contemplated date of payment. (For water and sewer charges call the Department of Environmental Protection (718) 935-7000.)

4. Information regarding In Rem: Call (718) 935-6535, 6533, 6534.

5. Information regarding refunds: Call (718) 935-9500.

6. Certain assessments may be paid in installments by arrangement. Delinquent taxes and other charges may also be paid in installments by arrangement. Contact the local office of the Department of Finance to determine whether such an arrangement can be made.

7. Checks should be made payable to New York City Department of Finance.

8. Effective July 1, 1990, interest due on late payments is calculating using daily compounding rather than simple interest. The interest rate is fixed annually by the City Council.

9. To obtain a receipt upon payment, you must pay by cash or certified check.

DRAFT

MUNICIPAL, DEPARTMENTAL AND INFORMATIONAL SEARCHES

No state or municipal department searched for notices of violation of laws, regulations and ordinances filed therein are made UNLESS SPECIFICALLY REQUESTED BY THE APPLICANT. Such searches, if requested, are made by the particular municipal department and are called "Record Search" and disclose only those violations reported by the last inspection made by the City and do not show the present condition, which can be ascertained only by the applicant's requesting the City to make a new inspection and paying its fees therefore. Such searches are not continued to date of closing nor are new searches made even in event of adjournment of closing.

This Company does not, in any event, insure that the buildings or other erections upon the premises or their use comply with Federal, State and Municipal laws, regulations and ordinances, and therefore we assume no liability whatsoever by reason of the ordering of such searches and do not insure their accuracy. Such information as has been furnished to us by the various departments is set forth in the Municipal Department Violations Schedule.

Any searches or returns reported herein are furnished FOR INFORMATION ONLY. They will not be insured and the Company assumes no liability for the accuracy thereof. They will not be continued to the date of closing.

CENTRAL VIOLATIONS BUREAU

In New York City, since about July 1, 1961, only the Fire Department, the Department of Health, the Department of Air Pollution Control and the Department of Water Supply, Gas and Electricity have been reporting violations issued by them affecting multiple dwellings to the Central Violations Bureau established pursuant to Section 328 of the Multiple Dwelling Law. In its report of its search for violations the Department of Buildings includes such violations affecting multiple dwellings filed by the aforesaid departments in the central bureau.

STREET VAULTS

In New York City, if there is a STREET VAULT, it is suggested that applicant investigate possible unpaid license fees by the City of New York for the use of such vault, because the right to maintain it IS NOT INSURED.

A street vault is any subsurface opening, structure, or erection, whether or not covered over, to the extent that it extends from the building line under the street. If there is a street vault used in connection with the premises herein described, the applicant should acquaint himself with the provisions of Title Z of Chapter 46 of the Administrative Code of the City of New York, which imposes an annual charge for maintaining such vaults in New York City.

MUNICIPAL SEARCH SCHEDULE - Enclosed herewith.

THE CITY OF NEW YORK
TAX LIEN CERTIFICATE NO. 3B
Brooklyn
August 16, 2005

THIS CERTIFICATE, made as of August 16, 2005, from The City of New York, a municipal corporation existing under the laws of the State of New York (the "City") having an address at The City of New York, Department of Finance, 1 Centre Street, New York, New York 10007, to The Bank of New York, as Collateral Agent and Custodian (the "Collateral Agent and Custodian"), having an address at 101 Barclay Street, New York, New York 10286, Attention: Corporate Trust Department,

WITNESSETH:

THAT the City, in consideration of TEN DOLLARS ($10.00), lawful money of the United States, paid in hand by the Collateral Agent and Custodian, and other good and valuable consideration, receipt of which is hereby acknowledged, in accordance with Chapter 3 of Title 11 of the City Administrative Code, **DOES HEREBY SELL, TRANSFER, ASSIGN, CONVEY, GRANT AND RELEASE** unto the Collateral Agent and Custodian and its successors and assigns all of the City's right, title and interest in and to all real property taxes, assessments, sewer rents, sewer surcharges, water rents and any other City charges that, (A) prior to July 29, 2005, in the case of sewer rents, sewer surcharges and water rents listed under the heading "CIS" on Schedule A hereto, and (B) prior to July 19, 2005, in the case of all real property taxes, assessments and all other City charges, including sewer rents, sewer surcharges and water rents listed under the heading "Environ" on Schedule A hereto (each such date, a "Sale Date"), have become a lien against those certain parcels of real property (each, a "Property") located in the Borough of Brooklyn, County of Kings and listed on either Schedule A hereto by block and lot number, plus all interest and penalties accrued thereon to the applicable Sale Date, plus (except in the case of Properties as to which the owners thereof were subject to bankruptcy proceedings on the applicable Sale Date ("Bankruptcy Tax Liens")) costs of advertisements and notices of sale and a surcharge equal to five percent (5%) of the sum of all such amounts (all such amounts with respect to a Property, including costs of advertisements and notices of sale and the surcharge if any, collectively, a "Tax Lien") in the total amount (the "Tax Lien Principal Balance") set forth with respect to each Property on either Schedule A hereto, plus interest accruing thereon from the applicable Sale Date at the rate of eighteen percent (18%) per annum, compounded daily (or nine percent (9%) per annum, compounded daily, in the case of (A) real property taxes included in Bankruptcy Tax Liens on certain Properties and (B) sewer rents, sewer surcharges and water rents included in Bankruptcy Tax Liens).

THAT the Tax Lien Principal Balance for each Tax Lien is due and payable one year from the applicable Sale Date, unless it becomes due and payable earlier as set forth in Section 11-332 of the City Administrative Code. Accrued interest on the Tax Lien Principal Balance for each Tax Lien is payable semi-annually on the date which is six months from applicable Sale Date, and on each anniversary of such date and applicable Sale Date, until the Tax Lien Principal Balance is paid in full. The Tax Lien Principal Balance and all accrued interest thereon shall be payable directly to the Collateral Agent and Custodian or its designee.

PROOF

TO HAVE AND TO HOLD the premises herein granted unto the Collateral Agent and Custodian and its successors and assigns forever.

IN WITNESS WHEREOF, the City has duly executed this Certificate as of the day and year first above written.

Approved as to form:

NEW YORK CITY LAW DEPARTMENT

REAL PROPERTY INCOME AND EXPENSE SEARCH

DRAFT

It's in the law (The Rules of the City of New York §33-03(a)(2) – " Owners of income-producing property who fail to file an income and expense statement for three consecutive years (emphasis added) shall be subject to a penalty of five percent of the final actual assessed value for the property promulgated in the calendar year in which such a statement was to be filed."). It was not enforced previously; this year it was.

**Storefront Registry (new for calendar year 2020): Must register with the City if you own a property with ground-floor or second-floor commercial premises (storefronts). This applies to all tax class two and four property owners with ground-floor or second-floor storefronts. Owners of class one property in commercially zoned areas must register their storefronts if the space was not leased for any days during the previous year. For more information please contact MDS for requirement printouts or visit https://www1.nyc.gov/site/finance/taxes/property-rpie.page

AGREEMENT TO ASSIGN AND ASSUME LEASE

AND CONSENT TO ASSIGNMENT

AGREEMENT made as of the 22nd day of December, 1989 by and among NEW YORK JOB DEVELOPMENT AUTHORITY, having its office at 605 Third Avenue, New York, New York 10158 ("JDA"), and ZALMAN & DINA KLEIN, residing at 37 Rodney Street, Brooklyn, New York ("KLEIN"), and NAP INDUSTRIES INC., having its offices at 667 Kent Avenue, Brooklyn, New York ("NAP").

W I T N E S S E T H:

WHEREAS, a certain lease agreement was entered into on April 23, 1979 between N.J.R. PROPERTIES, as Landlord and BENE KNITWEAR, INC. ("BENE"), as Tenant, covering all of the premises known as 50 Keap Street, Brooklyn, New York, and

WHEREAS, JDA has succeeded by assignment to the rights of the Landlord under said lease and,

WHEREAS, the said lease had an option to purchase the premises upon the payment to JDA of the sum due pursuant to the lease purchase option stated in Article 37 of the lease, and

WHEREAS, BENE, by agreement made as of May 15, 1989, has assigned its rights to said lease to KLEIN (the "May 1989 Agreement"), and

WHEREAS, KLEIN is desirous of assigning its rights to said lease to NAP, and requests that JDA consent to same, and

AGREEMENT TO ASSIGN AND ASSUME LEASE

AND CONSENT TO ASSIGNMENT

AGREEMENT made as of the 22nd day of December, 1989 by and among NEW YORK JOB DEVELOPMENT AUTHORITY, having its office at 605 Third Avenue, New York, New York 10158 ("JDA"), and ZALMAN & DINA KLEIN, residing at 37 Rodney Street, Brooklyn, New York ("KLEIN"), and NAP INDUSTRIES INC., having its offices at 667 Kent Avenue, Brooklyn, New York ("NAP").

W I T N E S S E T H:

WHEREAS, a certain lease agreement was entered into on April 23, 1979 between N.J.R. PROPERTIES, as Landlord and BENE KNITWEAR, INC. ("BENE"), as Tenant, covering all of the premises known as 50 Keap Street, Brooklyn, New York, and

WHEREAS, JDA has succeeded by assignment to the rights of the Landlord under said lease and,

WHEREAS, the said lease had an option to purchase the premises upon the payment to JDA of the sum due pursuant to the lease purchase option stated in Article 37 of the lease, and

WHEREAS, BENE, by agreement made as of May 15, 1989, has assigned its rights to said lease to KLEIN (the "May 1989 Agreement"), and

WHEREAS, KLEIN is desirous of assigning its rights to said lease to NAP, and requests that JDA consent to same, and

WHEREAS, JDA has conditioned its consent upon NAP assuming the terms and obligations of the lease.

NOW THEREFORE, IT IS MUTUALLY AGREED BETWEEN THE PARTIES as follows:

1. JDA affirms that the lease dated April 23, 1979 is presently in effect, and has not been amended except by one amendment dated July 1, 1983 which reduced the monthly payments required to be made to JDA to the sum of $2,685.61 per month, inclusive of interest at the rate of eight percent (8%) per annum.

2. That the balance of principal and interest due as of December 22, 1989 to JDA is the sum of $159,151.75, and KLEIN is in good standing pursuant to the terms of the lease agreement.

3. That KLEIN hereby assigns all its rights pursuant to said lease to NAP, but Klein shall continue to remain liable for all of the tenant's obligations under the lease agreement.

4. That BENE shall continue to remain liable for all of the tenant's obligations under the lease pursuant to Paragraph 3 of the May 1989 Agreement.

5. That NAP hereby assumes all of the tenant's obligations pursuant to said lease and all of the terms and conditions of the lease.

6. All payments due hereafter to JDA shall be made by NAP and all notices and correspondence pertaining to said lease shall be given by JDA to NAP.

7. That JDA hereby consents to the assignment by KLEIN to NAP of all of its rights in said lease agreement.

DRAFT

WHEREAS, JDA has conditioned its consent upon NAP assuming the terms and obligations of the lease.

NOW THEREFORE, IT IS MUTUALLY AGREED BETWEEN THE PARTIES as follows:

1. JDA affirms that the lease dated April 23, 1979 is presently in effect, and has not been amended except by one amendment dated July 1, 1983 which reduced the monthly payments required to be made to JDA to the sum of $2,685.61 per month, inclusive of interest at the rate of eight percent (8%) per annum.

2. That the balance of principal and interest due as of December 22, 1989 to JDA is the sum of $159,151.75, and KLEIN is in good standing pursuant to the terms of the lease agreement.

3. That KLEIN hereby assigns all its rights pursuant to said lease to NAP, but Klein shall continue to remain liable for all of the tenant's obligations under the lease agreement.

4. That BENE shall continue to remain liable for all of the tenant's obligations under the lease pursuant to Paragraph 3 of the May 1989 Agreement.

5. That NAP hereby assumes all of the tenant's obligations pursuant to said lease and all of the terms and conditions of the lease.

6. All payments due hereafter to JDA shall be made by NAP and all notices and correspondence pertaining to said lease shall be given by JDA to NAP.

7. That JDA hereby consents to the assignment by KLEIN to NAP of all of its rights in said lease agreement.

Rebecca A. Bleakley

Project Manager

YEARS OF EXPERIENCE: 27

EDUCATION

Georgia Institute of Technology, Civil Engineering Program, 1991

LICENSES AND CERTIFICATIONS

Radon Measurement Certification

SUMMARY OF SKILLS AND TECHNICAL QUALIFICATIONS

Ms. Bleakley started in the environmental and industrial hygiene industry in 1991 performing electron microscopy analysis for asbestos in air samples. Since that time, Ms. Bleakley has had significant experience in due diligence, conducting Environmental Assessments on commercial property for buyers, owners, brokers, development companies, commercial banks, and agency lenders. From 1999 to 2021, Ms. Bleakley conducted and reviewed due diligence projects for commercial, multi-family residential, healthcare, and industrial projects.

ENVIRONMENTAL ASSESSMENT

An Environmental Professional in the industry, Ms. Bleakley has managed and/or performed over a thousand Phase I Assessments for buyers, owners, brokers, development companies, commercial banks and agency lenders.

PROFESSIONAL EXPERIENCE & CAREER HIGHLIGHTS

- ***Project Manager (1999-2004) Providence, RI and Charlotte, NC***

Performed Phase I ESAs and compliance reviews for industrial, commercial, and multi-family residential properties throughout the northeast and southeast. Responsibilities included inspections, historic and regulatory research and writing all reports.

- ***Technical Report Reviewer and Senior Environmental Consultant (2005-2008) Charlotte, NC***

Based in Cincinnati, Ohio, responsibilities included management of all aspect of environmental projects including marketing, development project scope with consideration to regulatory requirements based on facility type, coordination and completion of assessment and remediation activities, and report development. Many projects involved multiple scopes of work and communication with local and state regulatory agencies.

- ***Project Manager (2008-2021) Charlotte, NC***

Performed at least 800 Phase I ESA, transaction screens, and limited assessments for industrial, commercial, healthcare, and multi-family residential properties throughout the Carolinas and the southeast. Responsibilities include inspections, research, and writing reports

SECTION 1: EXECUTIVE SUMMARY

The subject property consists of a 1.27-acre, irregular-shaped parcel located on the east corner of the intersection of Kent Avenue and Keap Street in the Borough of Brooklyn, City of New York, Kings County, NY.

The subject property is developed with NAP Industries, a light manufacturing facility consisting of two buildings totaling 59,597 square feet. The current occupant, NAP, prints labels on plastic packaging and plastic bags and manufactures plastic labels. Onsite operations involve the use and storage of inks and adhesives during the printing and manufacturing process. Inks and adhesives are stored in 5 to 55 - gallon drums. The storage and use of some of these substances results in the generation of regulated or hazardous wastes and the subject property is identified as a current RCRA Large Quantity Generator (LQG) of hazardous waste.

GRS Group performed a Phase I Environmental Site Assessment for the Property (GRS Group Project # 22-5666.1) which identified one Recognized Environmental Condition associated with long term industrial use, partially performed prior to the promulgation of regulations regarding hazardous waste storage and disposal and tank maintenance and removal, as well as more recent industrial operations and violations associated with hazardous waste. A Phase II investigation was recommended.

Borings were installed on April 14, 2022. The proposed boring locations may have been modified based on site observations. In particular, the interior borings could not be advanced further to the southeast because machinery was in operation at the time of the assessment and potential dust from the interior concrete coring could be detrimental to the equipment and the finished product. The boring locations are illustrated on the site plan in Exhibit D and are described below. Site photographs taken during the installation and sampling are provided in Exhibit E.

- Boring SB-1 was placed below the floor slab inside at the northeast end of the building, approximately 40 feet southwest and 53 feet southeast of the northwest building corner.
- Boring SB-2 was placed below the floor slab inside at a central location of the building, approximately 175 feet southwest and 50 feet southeast of the northwest building corner.
- Boring SB-3 was placed below the sidewalk outside the building at the northeast side of the Property, approximately 32 feet southwest and five feet northwest of the northwest building corner.
- Boring SB-4 was placed below the sidewalk outside the building at the southwest side of the Property, approximately 37 feet northeast and five feet northwest of the northwest building corner.

No semi- volatile organic compounds were detected above NYSDEC Part 375 Protection to Groundwater Action Soil Cleanup Objectives for Restricted Soils. Acetone was detected in SB-4D at .160 mg/kg. The Protection to Groundwater Standard is .05 mg/kg. However, the commercial soil cleanup objective is 500 mg/kg. Groundwater was not encountered at 20 feet below ground surface in the soil boring. In addition, the groundwater in the area is not suitable for drinking purposes.

Based on the detected concentration under the commercial standard and since groundwater was not encountered, no further investigation is warranted based on the detection of acetone.

Mercury was detected above Protection to Groundwater Soil Cleanup Objective in SB-2 shallow (S) but not in SB-2 deep (D). Mercury was detected in SB-2S at 1.54 mg/kg. The Protection to Groundwater Soil Cleanup Objective is .73 mg/kg. However, the commercial soil cleanup objective is 2.8 mg/kg. Based on the commercial use of the Property and lack of impact detected in the deeper sample above soil cleanup objectives for the protection to groundwater, no further investigation is warranted.

Please refer to Table 1 for a summary of the metals and volatile organic compounds. Table 2 provides a summary of the semi-volatile organic compounds.

Based on the laboratory report and findings no further investigation is warranted for the RECs identified in the ESA.

1.1 Introduction

GRS Group recently completed a Phase I Environmental Site Assessment (ESA) for the Property. Findings of the ESA were presented in a report dated March 29, 2022 (GRS Group Project # 22-5666.1). The Phase I ESA report identified Recognized Environmental Conditions (RECs) and recommended a Phase II subsurface investigation to further evaluate the REC issues. This report describes the Phase II investigation that was completed, and the findings and conclusions derived from the investigation.

The following information provided is based on environmental assessment activities completed at 667 Kent Ave, Brooklyn, New York. The work was completed in accordance with GRS Group agreement March 24, 2022, governing the nature and extent of the assessment. Other conditions may exist at the Property which could not be identified as a result of this investigation or the Phase I Environmental Site Assessment (ESA).

1.2 Purpose

This investigation was intended as a screening tool to evaluate potential impact to soil from identified areas of concern in order to evaluate the related likelihood of a significant release of chemicals of concern. The investigation is not intended to be a comprehensive evaluation of the Property.

1.3 Background Information

The subject property consists of a 1.27-acre, irregular shaped parcel located on the east corner of the intersection of Kent Avenue and Keap Street in the New York City Borough of Brooklyn (Kings County), New York. The subject property is developed with Nap Industries, a light manufacturing facility consisting of two buildings totaling 59,597 square feet. The current occupant, NAP, prints labels on plastic packaging and plastic bags and manufactures plastic labels. Onsite operations involve the use and storage of inks and adhesives during the printing and manufacturing process.

One Recognized Environmental Condition was identified as a result of our assessment. Long term industrial use, partially performed prior to the promulgation of regulations regarding hazardous waste storage and disposal and tank maintenance and removal, as well as more recent industrial operations and violations associated with hazardous waste, represented a REC and further action was recommended.

The Phase I ESA identified the following Recognized Environmental Conditions for the Property:

- Potential hazardous material spillage.

The following additional actions were recommended in the Phase I ESA:

- Phase II investigations to determine whether subsurface media has been impacted.

According to the ESA, groundwater is estimated to be approximately 12-13 feet below ground level (bgl), and is expected to flow toward the west, southwest. However, GRS Group did not observe groundwater at 20 feet in the borings completed with a Geoprobe direct push rig as part of the Phase II investigation.

1.4 Scope of Work

GRS Group subcontracted a licensed drilling company to install five soil borings to collect soil samples. Two exterior borings were completed by a Geoprobe direct push drilling rig and were advanced to refusal. The interior borings were cored and then hand augered to a terminal depth of 5 feet below grade level. Continuous soil samples were collected from land surface to the terminal depths of the borings. Samples were field screened from the surface to the terminal depths with a photo-ionization detector (PID) to determine if volatile organic vapors are present. GRS Group collected two soil samples from each boring for laboratory analysis. It should be noted that due to the thickness of the concrete one soil boring was eliminated due to the difficulty of coring over 8 inches of concrete.

1.4.1 Health and Safety Plan

GRS Group developed a Health and Safety Plan that was specific to the Property. The development of this plan is required by the Occupational Safety and Health Administration (OSHA) under Hazardous Waste Operations & Emergency Response 29 CFR 1910.120. The Health and Safety Plan was designed to reduce the risk of physical or chemical exposures that may affect on-site workers in the proposed work area. The Health and Safety Plan includes information about chemicals expected on the property, health and safety procedures, and emergency response procedures. The Health and Safety Plan is on file at our office.

1.4.2 Utility Locating

A utility inspection was performed at the Property at least 72 hours prior to the initiation of the subsurface investigation, as required by New York State law. This inspection consisted of the marking of underground utility locations by authorized utility locating personnel. The ticket number was completed by the drilling firm. In addition, sidewalk permits were obtained to complete the two borings along Keap Street.

No Ground Penetrating Radar survey was completed for the project.

1.4.3 Permits

Kings County currently does not require drilling permits for borings or monitoring wells. Sidewalk opening permits were obtained by the drilling firm. A copy of the permit is attached with the boring logs in Exhibit D.

SECTION 2: SUBSURFACE INVESTIGATION

2.1 Borings

Borings were installed on April 14, 2022. The proposed boring locations may have been modified based on site observations. In particular, the interior borings could not be advanced further to the southeast because the machinery was in operation at the time of the assessment and potential dust from the interior concrete coring could be detrimental to the equipment and the finished product. Boring locations are illustrated on the site plan in Exhibit D and are described below. Site photographs taken during the installation and sampling are provided in Exhibit E.

- Boring SB-1 was placed below the floor slab inside at the northeast end of the building, approximately 40 feet southwest and 53 feet southeast of the northwest building corner.
- Boring SB-2 was placed below the floor slab inside at a central location of the building, approximately 175 feet southwest and 50 feet southeast of the northwest building corner.
- Boring SB-3 was placed below the sidewalk outside the building at the northeast side of the Property, approximately 32 feet southwest and five feet northwest of the northwest building corner.
- Boring SB-4 was placed below the sidewalk outside the building at the southwest side of the Property, approximately 37 feet northeast and five feet northwest of the northwest building corner.

2.2 Methodology

The following chemicals of concern would normally be expected to be associated with the identified areas of concern:

AREA OF CONCERN	CHEMICALS OF CONCERN	TEST METHODS
Hazardous Materials Discharges	Volatile Organic Compounds	EPA Method 8260
	Semi-Volatile Organic Compounds	EPA Method 8270
	Metals	EPA Method 6010

2.3 Soil Sampling

A total of four soil borings were advanced at the Property, labeled SB-1 through SB-4, respectively. Borings SB-1 and SB-2 were advanced within the building through the concrete slab floor. A concrete coring device was used to remove the slab floor at the boring location, and continuous soil samples were then collected from below the slab to the terminal depths using a 1.5-foot long, stainless-steel hand auger. At boring SB-1 the floor slab measured 8 inches thick, and the boring was subsequently advanced to a terminal depth of 3 feet below grade level (BGL), where refusal in the form of large gravel was encountered. At boring SB-2, the floor slab measured 6 inches thick, and the boring was subsequently advanced to a terminal depth of 4 feet BGL, where refusal in the form of large gravel was encountered.

Borings SB-3 and SB-4 were advanced below the sidewalk along Keap Street at the northern side of the building. Both boring SB-3 and SB-4 were advanced to a terminal depth of 20 feet below ground level (BGL) using a Geoprobe direct push drill rig. No groundwater was observed.

The soil samples collected from each boring were field screened for visual or olfactory indicators of contamination and using a photo-ionization detector (PID) to screen for the presence of volatile organic vapors (VOVs).

Soil encountered at the Property consisted mainly of heterogeneous mixes of sand, gravel, and sandy clays, with varying amounts of organics. The soil boring logs are attached in Exhibit D. Elevated PID readings, olfactory or visual indications of contamination were observed in the samples collected, as discussed below.

2.3.1 Sample Selection

Two soil samples from each boring were selected for submittal to the laboratory for chemical analysis. The shallowest soil samples collected from the borings were labeled SB-1S through SB-4S, respectively, and were collected from no deeper than 6 feet BGL. The deepest soil samples collected from the borings were labeled SB-1D through SB-4D, respectively. The soil samples were collected at either depth exhibiting the highest level of VOVs as detected with the PID, or, if no VOVs were detected, from a depth determined suitable to meet the agreed upon scope of work. Specifically, soil sample SB-1S was collected from 1 to 2 feet BGL and soil sample SB-1D was collected from 2 to 3 feet BGL. Soil sample SB-2S was collected from 1 to 2 feet BGL, and soil sample SB-2D was collected from 3 to 4 feet BGL. Soil sample SB-3S was collected from 5 to 6 feet BGL, and soil sample SB-3D was collected from 19 to 20 feet BGL. Soil sample SB-4S was collected from 5 to 6 feet BGL, and soil sample SB-4D was collected from 14 to 15 feet BGL.

The samples chosen for laboratory analyses were placed in clean, laboratory-supplied glass sample jars, labeled, and placed on ice in a cooler. The soil samples collected during this investigation were transported under chain of custody to Pace Analytical Laboratories, Mount Juliet, Tennessee, a laboratory certified by the New York State Department of Environmental Conservation. These samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals using approved EPA analytical methods. A summary of these analyses is provided on Table 1 for Metals and Volatile Organic compounds and Table 2 for Semi-Volatile Organic Compounds.

2.4 Groundwater Sampling

No groundwater sampling was completed as part of this assessment.

SECTION 3: LABORATORY ANALYSIS

3.1 Analytical Parameters

The soil and groundwater samples were transported under chain of custody to Pace Analytical Laboratories, Nashville, Tennessee, a laboratory certified by the New York State Department of Environmental Conservation.

Two soil samples from each boring, labeled SB-1S through SB-4S and SB-1D through SB-4D, respectively, were analyzed for VOCs, SVOCs, and metals.

Results of the testing are summarized in the attached tables. A copy of the laboratory analytical report is provided in Exhibit F.

3.2 Analytical Results

No semi- volatile organic compounds were detected above NYSDEC Part 375 Protection to Groundwater Action Soil Cleanup Objectives for Restricted Soils. Acetone was detected in SB-4D at .160 mg/kg. The Protection to Groundwater Standard is .05 mg/kg. However, the commercial soil cleanup objective is 500 mg/kg. Groundwater was not encountered at 20 feet in the soil boring. In addition, the groundwater in the area is not suitable for drinking purposes. Based on concentration detected under the commercial standard and since groundwater was not encountered, no further investigation is warranted based on the detection of acetone.

Mercury was detected above Protection to Groundwater Soil Cleanup Objective in SB-2S but not in SB-2D. Mercury was detected in SB-2S at 1.54 mg/kg. The Protection to Groundwater Soil Cleanup Objective is .73 mg/kg. However, the commercial soil cleanup objective is 2.8 mg/kg. Based on the commercial use of the property and lack of impact in the deeper sample above soil cleanup objections for the protection to groundwater, no further investigation is required.

Please refer to Table 1 for a summary of the metals and volatile organic compounds. Table 2 provides a summary of the semi-volatile organic compounds.

SECTION 4: CONCLUSIONS

The laboratory analytical report indicated mercury and acetone above Protection to Groundwater Soil Cleanup Objectives. However, these concentrations were below the commercial soil cleanup objectives. Based on the lack of usable groundwater in the New York City area, lack of groundwater detected in the soil borings, and lack of impact at greater depths for the mercury detected, GRS Group concludes that no further investigation is warranted for the RECs identified in the ESA.

No evidence of a significant impact was identified as a result of our investigation. GRS Group did not identify conditions which should be reported to regulatory agencies.

SECTION 5: RECOMMENDATIONS

GRS Group recommends no further investigation.

SECTION 6: CERTIFICATION AND RELIANCE

RESTRICTED USE AND RELIANCE - THIS REPORT WAS PREPARED BY GRS GROUP FOR THE SOLE USE AND BENEFIT OF OUR CLIENT AND MAY NOT BE USED OR RELIED UPON BY ANY THIRD-PARTY WITHOUT THE EXPRESS WRITTEN CONSENT OF GRS GROUP.

The conclusions represent professional judgments founded upon the findings of the investigations identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard of care. No other warranty or limitation exists, either expressed or implied.

This report is the intellectual property of GRS Group and may not be used or relied upon without GRS Group express written authorization. Unauthorized use of this report is a violation of GRS Group legal rights. Any unauthorized user of this report shall be subject to civil and criminal penalties and shall be responsible to indemnify, defend and hold GRS Group harmless from any and all losses, damages and claims arising, in any part, from such use. When allowable under contract, GRS Group may authorize additional parties to rely on the results of this assessment. Unless otherwise agreed in writing, such parties shall be considered as parties to the agreement under which the work was performed.

C: SITE PHOTOGRAPHS

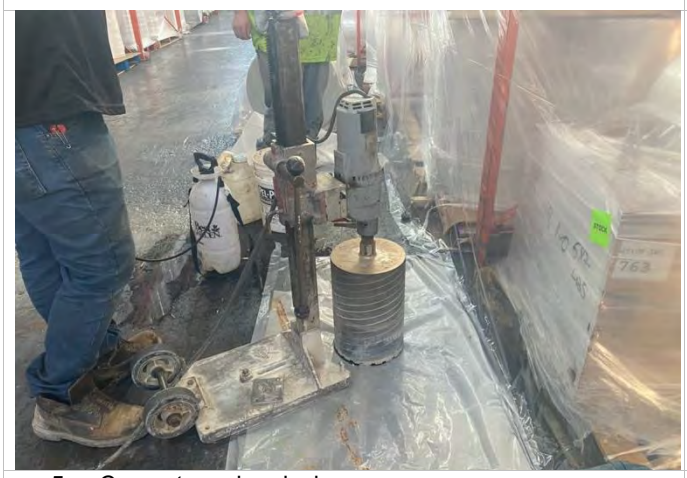
1. General view of the exterior sidewalk areas.

2. The Geoprobe unit.

3. General view of the interior areas investigated.

4. View of the operational areas where machinery was in use.



5. Concrete coring device.

6. Typical interior boring, concrete core, and soils encountered.

D: GEOPHYSICAL SURVEY REPORT
Intentionally Left Blank

E: SOIL BORING LOGS

BORING SB-1

Project No. 22-56666.4	**Sample Date:** 04/14/2022
Project Name: Brooklyn NY	**Field Professional:** Greg Bodnaruk
Site Location: 667 Kent Avenue, NY	**Drilled By:** ADT
Client: Ulmer & Berne	**Drill Method:** Hand Auger

Total Depth: 3 feet

Observed Depth to GW: N/A

Depth of Refusal: 3 feet

Drill Interval (Feet)	Core Recovery (Feet)	Sample ID Depth Time	Soil Description	USGS	PID (ppm)
0-1	1.0		0'-0.75': Concrete 0.75'-1': Gravelly sand	NA GP	BG BG
1-2	1.0	SB-1S 1'-2' 12:35	1'-2': Brown clayey sand	SC	BG
2-3	1.0	SB-1D 2'-3' 12:40'	2'-3': Brown clayey sand	SC	BG

NOTES:

- *At interior boring SB-1 the background PID reading measured 8.0.*

BORING SB-2

Project No. 22-56666.4	**Sample Date:** 04/14/2022
Project Name: Brooklyn NY	**Field Professional:** Greg Bodnaruk
Site Location: 667 Kent Avenue, NY	**Drilled By:** ADT
Client: Ulmer & Berne	**Drill Method:** Hand Auger

Total Depth: 4 feet

Observed Depth to GW: N/A

Depth of Refusal: 4 feet

Drill Interval (Feet)	Core Recovery (Feet)	Sample ID Depth Time	Soil Description	USGS	PID (ppm)
0-1	1.0		0'-0.5': Concrete 0.5'-1': Gravelly sand	NA GP	BG 4.1
1-2	1.0	SB-2S 1'-2' 14:50	1'-2': Black and grey sand	SP	4.2
2-3	1.0		2'-3': Brown clayey sand	SC	0.7
3-4	1.0	SB-2D 2'-3' 12:40	3'-4': Brown clayey sand	SC	1.6

NOTES:

- *At interior boring SB-2 the background PID reading measured 1.0.*

BORING SB-3

Project No. 22-56666.4	**Sample Date:** 04/14/2022
Project Name: Brooklyn NY	**Field Professional:** Greg Bodnaruk
Site Location: 667 Kent Avenue, NY	**Drilled By:** ADT
Client: Ulmer & Berne	**Drill Method:** Direct Push

Total Depth: 20 feet

Observed Depth to GW: N/A

Depth of Refusal: N/A

Drill Interval (Feet)	Core Recovery (Feet)	Sample ID Depth Time	Soil Description	USGS	PID (ppm)
0-5	3.0		0'-1': Tan sand 1'-3': Brown gravelly sand 3'-4': Moist dark grey gravelly sand 4-5': Brown sand and clay mix	SP GP GP SC	0.0 0.0 0.0 0.0
5-10	3.0	SB-3S 5'-6' 11:45	5'10': Brown sandy gravelly clay	CL	0.0

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

(dry)	Results are reported based on the dry weight of the sample. [this will only be present on a dry report basis for soils].
MDL	Method Detection Limit.
MDL (dry)	Method Detection Limit.
RDL	Reported Detection Limit.
RDL (dry)	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
C3	The reported concentration is an estimate. The continuing calibration standard associated with this data responded low. Method sensitivity check is acceptable.
J	The identification of the analyte is acceptable; the reported value is an estimate.
J1	Surrogate recovery limits have been exceeded; values are outside upper control limits.
J3	The associated batch QC was outside the established quality control range for precision.
J4	The associated batch QC was outside the established quality control range for accuracy.
J5	The sample matrix interfered with the ability to make any accurate determination; spike value is high.
J6	The sample matrix interfered with the ability to make any accurate determination; spike value is low.
O1	The analyte failed the method required serial dilution test and/or subsequent post-spike criteria. These failures indicate matrix interference.

John Burkart, P.G.

Director Phase II and Remedial Services

YEARS OF EXPERIENCE: 33

EDUCATION

University of Pittsburgh, Bachelor of Science in Earth and Environmental Sciences , 1984

LICENSES AND CERTIFICATIONS

Professional Geologist:

Indiana IN1274, Illinois #196.001.1256, Texas #912, Kentucky #0394, Tennessee #652, Washington State #1662 Geologist and Hydrogeologist, Mississippi # 0133, Alabama #3419, Pennsylvania # 107G, New Hampshire #717, Wyoming # 2356, REA I CA 0313.

SUMMARY OF SKILLS AND TECHNICAL QUALIFICATIONS

Mr. Burkart has successfully managed single and multi-site environmental due diligence projects encompassing a broad range of property types including, retail, office, industrial (ROI), hospitality, assisted living and special use. He has interfaced directly with bank loan officers, regulatory agencies, environmental analysts and numerous borrowers on subjects including environmental compliance and liability as well as contracting and scope of work issues. Mr. Burkart's major projects included large-scale loan portfolio due diligence assessments, subsurface soil and groundwater investigations, underground storage tank removals and desk reviews of inactive hazardous waste sites, cost analysis, Remedial Action Plans, Comprehensive Site Assessments and closure with regulatory agencies.

Mr. Burkart has 33 years of experience in the consulting field. Mr. Burkart has performed Environmental Site Assessments (ESAs) and Phase II Environmental Site Assessments (Phase II) throughout United States for major lending institutes, industrial and private companies. He has also performed geological and hydrogeological investigations, groundwater monitoring well development, and other soil and groundwater investigation projects as well as remediation of complex sites.

Mr. Burkart has also served as Project Manager for hazardous material compliance audits, remediation compliance issues and inactive hazardous waste site closures. He has been responsible for QA/QC oversight and successfully developed and implemented multiple project-tracking database programs.

Mr. Burkart is multiple disciplined in geology and hydrogeology and familiar with regulatory guidelines on a nationwide basis.

Mr. Burkart has published articles for trade shows and magazines as well as provided expert testimony for bankruptcy cases and environmental cases.

PROFESSIONAL EXPERIENCE & CAREER HIGHLIGHTS

- ***Haliburton Well Services (1984-1986)***

Mr. Burkart started his career after graduation as a field professional in 1984 assisting with well fracturing and well production through the northern camp in Bradford, PA.

- ***Environmental Engineering Consultants (1986-1990)***

Mr. Burkart worked as a Project Manager for a full service environmental consultant. Mr. Burkart handled the Coastal Fuels and Belcher Oil account throughout Florida and Texas. Project consisted of assessing, sampling, remediating and documentation to the regulatory agencies.

- ***Cooper Environmental Consultants (1990-2003)***

Mr. Burkart worked as a Vice President of Operations for a full service environmental consultant.
Mr. Burkart handled the daily operations, throughout North Carolina, South Carolina, Tennessee and Pennsylvania. Project consisted of assessing, sampling, remediating and documentation to the regulatory agencies

- ***LandAmerica Assessment Corp (2003-2008)***

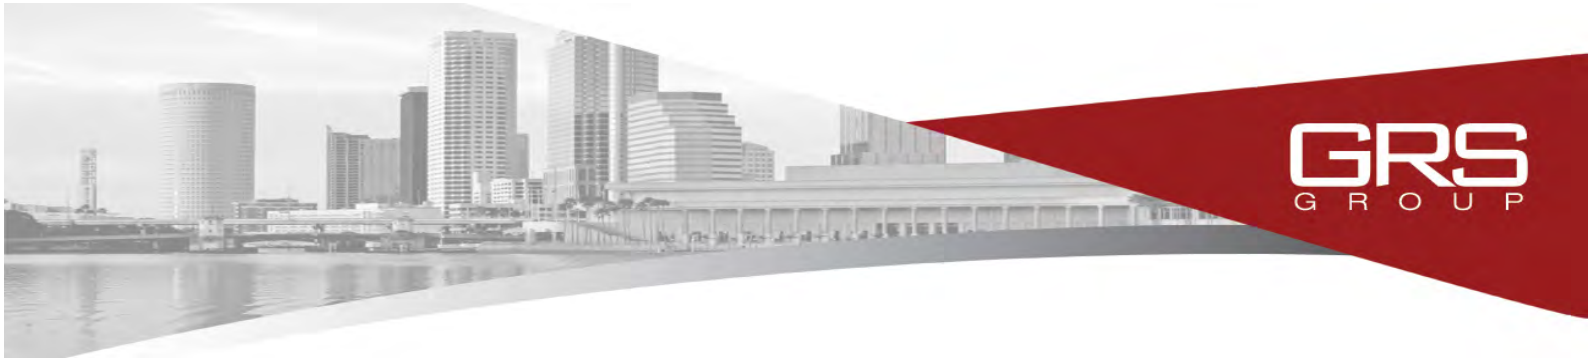
Mr. Burkart worked as a Director of Phase II for LandAmerica on a nationwide basis and well as an international basis with assessments completed in Mexico, Canada and assistance in Japan.

- ***A&W Professional Services PLLC (2008-2017)***

Mr. Burkart worked as owner for a full service environmental consultant.
Mr. Burkart handled clients such as GRS, EMG, EFI, Nova, and Private clients. Worked on a nationwide basis and well as an international basis with assessments completed in Mexico, Canada and Bahamas and Puerto Rico.

- ***GRS Group (2017 to Present)***

Mr. Burkart currently is Director of Phase IIs and Remedial Services on a nationwide basis for GRS projects.



Anthony Mueller

Vice President

YEARS OF EXPERIENCE: 30+

EDUCATION

B.S. Mechanical Engineering,
University of Illinois-Chicago

LICENSES AND CERTIFICATIONS

Professional Engineer - Illinois

AFFILIATIONS

Member, Chicago Real Estate Council

SUMMARY OF SKILLS AND TECHNICAL QUALIFICATIONS

Mr. Mueller manages client relationships and coordinates the team of professionals best suited to deliver consistent, superior services. Providing a single point of contact and equipped with a diverse range of enterprise resources, GRS Group VPs are able to customize each team to meet the specific needs of our clients.

ENVIRONMENTAL ASSESSMENT	Mr. Mueller has performed, reviewed and/or managed hundreds of Phase I and II Environmental Assessments for various lending institutions and investors.
PROPERTY CONDITION ASSESSMENT	Utilizes engineering background and knowledge of building systems to review and/or manage Property Condition Surveys for lenders, brokers and investors.

PROFESSIONAL EXPERIENCE & CAREER HIGHLIGHTS

- ***National Client Manager, 2004-2009***
  National real estate transaction services firm
- ***Director of Technical Services, 1996-2004***
  National real estate transaction services firm
- ***Project Manager, 1992-1996***
  National real estate transaction services firm

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Haley & Aldrich, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source
2019	1"=500'	Flight Year: 2019	USDA/NAIP

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

667 KENT AVENUE & 25 HOOPER STREET
BROOKLYN, NY 11249

COORDINATES

Latitude (North):	40.7017430 - 40° 42' 6.27''
Longitude (West):	73.9628980 - 73° 57' 46.43''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	587616.9
UTM Y (Meters):	4505954.5
Elevation:	15 ft. above sea level

EXECUTIVE SUMMARY

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal RCRA generators

RCRA-SQG ---------- RCRA - Small Quantity Generators

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state and tribal leaking storage tanks

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land
NY HIST LTANKS ---------- Listing of Leaking Storage Tanks

Lists of state and tribal registered storage tanks

FEMA UST ---------- Underground Storage Tank Listing
NY CBS UST ---------- Chemical Bulk Storage Database
NY MOSF UST ---------- Major Oil Storage Facilities Database
NY MOSF ---------- Major Oil Storage Facility Site Listing
NY MOSF AST ---------- Major Oil Storage Facilities Database
INDIAN UST ---------- Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

NY ERP ---- Environmental Restoration Program Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

NY SWTIRE ---- Registered Waste Tire Storage & Facility List
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
ODI ---- Open Dump Inventory
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
NY DEL SHWS ---- Delisted Registry Sites
US CDL ---- National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

NY HIST UST ---- Historical Petroleum Bulk Storage Database
NY HIST AST ---- Historical Petroleum Bulk Storage Database

Local Land Records

NY LIENS ---- Spill Liens Information
LIENS 2 ---- CERCLA Lien Information

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
NY Hist Spills ---- SPILLS Database
NY SPILLS 90 ---- SPILLS 90 data from FirstSearch
NY SPILLS 80 ---- SPILLS 80 data from FirstSearch

Other Ascertainable Records

DOD ---- Department of Defense Sites
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR ---- Financial Assurance Information
EPA WATCH LIST ---- EPA WATCH LIST
TSCA ---- Toxic Substances Control Act
TRIS ---- Toxic Chemical Release Inventory System
SSTS ---- Section 7 Tracking Systems
ROD ---- Records Of Decision
RMP ---- Risk Management Plans
MLTS ---- Material Licensing Tracking System

COAL ASH DOE ---- Steam-Electric Plant Operation Data
COAL ASH EPA ---- Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER ---- PCB Transformer Registration Database
RADINFO ---- Radiation Information Database
DOT OPS ---- Incident and Accident Data
CONSENT ---- Superfund (CERCLA) Consent Decrees
INDIAN RESERV ---- Indian Reservations
FUSRAP ---- Formerly Utilized Sites Remedial Action Program
UMTRA ---- Uranium Mill Tailings Sites
US MINES ---- Mines Master Index File
ABANDONED MINES ---- Abandoned Mines
MINES MRDS ---- Mineral Resources Data System
DOCKET HWC ---- Hazardous Waste Compliance Docket Listing
UXO ---- Unexploded Ordnance Sites
FUELS PROGRAM ---- EPA Fuels Program Registered Listing
PFAS NPL ---- Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES ---- Federal Sites PFAS Information
PFAS TRIS ---- List of PFAS Added to the TRI
PFAS TSCA ---- PFAS Manufacture and Imports Information
PFAS RCRA MANIFEST ---- PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR ---- PFAS Contamination Site Location Listing
PFAS WQP ---- Ambient Environmental Sampling for PFAS
PFAS NPDES ---- Clean Water Act Discharge Monitoring Information
PFAS ECHO FIRE TRAINING ---- Facilities in Industries that May Be Handling PFAS Listing
PFAS PART 139 AIRPORT ---- All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC ---- Aqueous Foam Related Incidents Listing
BIOSOLIDS ---- ICIS-NPDES Biosolids Facility Data
NY PFAS ---- PFAS Contamination Site Location Listing
NY COAL ASH ---- Coal Ash Disposal Site Listing
NY DRYCLEANERS ---- Registered Drycleaners
NY Financial Assurance ---- Financial Assurance Information Listing
NY VAPOR REOPENED ---- Vapor Intrusion Legacy Site List
NY UIC ---- Underground Injection Control Wells
NY COOLING TOWERS ---- Registered Cooling Towers

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner ---- EDR Exclusive Historical Cleaners

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

NY RGA HWS ---- Recovered Government Archive State Hazardous Waste Facilities List
NY RGA LF ---- Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/29/2024 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 8 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/06/2024 has revealed that there are 14 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/13/2023 has revealed that there is 1 NY SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/06/2024 has revealed that there are 36 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 19 NY UST sites within

approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 43 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/30/2024 has revealed that there are 4 FUDS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/28/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

NAP INDUSTRIES INC		SW 0 - 1/8 (0.009 mi.)	A11	200

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there are 3 NY HSWDS sites within approximately 0.5 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 12/31/2019 has revealed that there are 68 NY MANIFEST sites within approximately 0.25 miles of the target property.

NY MGP: From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

A review of the NY MGP list, as provided by EDR, and dated 09/05/2023 has revealed that there are 2 NY MGP sites within approximately 1 mile of the target property.

NY ILI: A solid waste site priority list of mitigation and remedial activities to address sites causing, or substantially contributing to, impairments of drinking water quality. Inactive solid waste disposal sites, primarily landfills, and their potential impact on New York?s drinking water resources from site-related contaminants, with a focus on emerging contaminants.

A review of the NY ILI list, as provided by EDR, and dated 01/30/2024 has revealed that there is 1 NY ILI site within approximately 0.5 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 18 UST FINDER sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 8 EDR MGP sites within

approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to

NAP INDUSTRIES INC (Continued) **1016106685**

track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D005
Waste Description: Barium

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO/TIBBE 10/18/2002 17:30 - NYC Fire Dept. responded to scene. It was a trafic accident. The saddle tank of the tractor traler with a capacity of 50 gallons leaked after the accident. Fire Haz Mat stopped leak and removed rest Diesel from tank. Street clean up conducted by Fire Department. No

SPILL NUMBER 0207463 (Continued) **S106008519**

further action required by FD to
either DEC or Sanitation Department. According to NYFD, only small portion leaked to street. There
was no drain or manhole involved. Clean up was completed by Fire Department. jz

Remarks: traffic accident - 50 gal spill - spill to the pavement and also to a catch basin -

DEC Memo: 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 9/26/03 SHAR addendum for installation of extraction
well, EW-1, and monitoring well, MW-5 received. 11/25/03 Reassigned from Vought to Foley. 12/8/03
Received Feasibility Pilot Testing, Analysis, and Report for SVE (Delta, 12/3/03) which concludes
SVE is a viable option. 3/19/04 3Q2003 monitoring report received. DTW 7-10'bgs. Total BTEX from

BP SERVICE STATION #24485 (Continued) **U001839388**

ND(MW-6, MW-7) to 231,200ppb(MW-3). MTBE from 5.1ppb to 77,100ppb(MW-3). 0.76' LNAPL in MW-3 and 0.02' in MW-4. 3/19/04 4Q2003 monitoring report received. Total BTEX from ND(MW-6) to 106,670(MW-3). MTBE from 4ppb(MW-7) to 77,500ppb(MW-3). 0.82' LNAPL in MW-3 and 0.16' in MW-4. 4/16/04 1Q2004 monitoring report received. Total BTEX from ND(MW-6 and MW-8) to 111,640ppb(MW-3). MTBE from ND(MW-8) to 77,500ppb(MW-3). 0.55' LNAPL detected in MW-3. 5/7/04 Portfolio meeting: Tanks were abandoned in place and found to be filled with concrete slurry. Adajcent to grade school. Pilot performed on MW-5 for MPE. Tight soils. Off-site wells, MW-7 and MW-8 OK. To submit RAP in a couple weeks. 0.3-0.6' of LNAPL detected. Install SVE first to address potential vapors to school. 5/26/04 Mailed stip. Due back 6/28/04. 6/29/04 Stip fully executed by T. Kunkel. 8/6/04 Received 2Q04 monitoring report. 0.37' LNAPL in MW-3. BTEX from ND(MW-6,7,8) to 74,490(MW-4). 8/31/04 Received Investigation Summary Report dated 8/27/04. 10/8/04 Mailed response to ISR. Requested borings/wells along Hewes Street, crossgradient of MW-4 and MW-5 and along the east side of Kent Avenue, downgradient of MW-3. Report due 12/15/04. 10/18/04 Cross-reference spill #9903413 for waste oil tank failure. Waste oil added to material spilled. 10/29/04 Received RAP and pilot test data for SVE. RAP does not address groundwater impacts. 10/29/04 Issued sidewalk access letter for installation of three monitoring wells 1) one along the east side of Kent Ave.(MW-9) 2) two on the south side of Hewes St.(MW-10, MW-11). Report due 12/15/04. 12/16/04 Received Subsurface Assessment Report for three additional wells installed on 11/15/04. Contaminated soils detected in MW-9 at 9.5-10.5'bgs. MW-10 and MW-11 had clean soil and gw. DTW 9.5-12.5'bgs. On 10/21/04, a round of GW samples were collected. MW-1 (0.5') and MW-3 (0.24') both contained LNAPL. DTW 7.17-9.67'bgs during 12/10/04 survey. Total BTEX ranged from ND(MW-7, MW-10, MW-11) to 415600ppb(MW-3). MTBE from ND(MW-8, MW-10, MW-11) to 272000ppb(MW-3). 1/3/05 Spoke to A. Lapine. Will send me a letter as an addendum to the RAP addressing groundwater concerns (will install PRBs to address free product simultaneously). Would like to install SVE and monitor groundwater. 1/17/05 B. Fisher will send out RAP addendum letter 1/18. 1/20/05 Received RAP addendum dated 1/18/05. The addendum addresses Delta's proposal to passively collect LNAPL from on-site MWs and to evaluate the potential need to address on-site dissolved-phase impacts in GW upon effective operation of the SVE system. A passive skimmer will be installed in MW-1(4 well). MW-3 and MW-4 are 1 wells and LNAPL recovery is not practical. However, LNAPL thickness will be monitored quarterly to

BP SERVICE STATION #24485 (Continued) **U001839388**

ensure LNAPL thickness does not
change. 1/21/05 Issued letter approving RAP and RAP addendum. 3/28/05 Update from B. Fisher: SVE
blower is on order and should be here within the next week or so. Have begun construction of the
SVE shed in the shop. Once the blower is received, they will complete the trenching of the
extraction wells. Installed the passive skimmer in MW-1. System to be installed by mid to late
April. 4/27/05 Portfolio meeting- Across from Brooklyn Navy Yard. Contamination discovered during
divestment. New owner (Mark Sapozhnikov) in 3/01. Source is tank mat (abandoned tanks with concrete
slurry). Grace school is upgradient but adjacent. Currently constructing SVE system. System should
be operting within the next two weeks. Passive skimmer operating in MW-1. 6/28/05 4Q04- 0.50' LNAPL
detected in MW-1 and 0.24' in MW-3. BTEX from ND(MW-6,7,10,11) to 103750ppb(MW-3). MTBE from
ND(MW-10,11) to 64500ppb(MW-3). 10/4/05 1Q05- DTW 7.24 to 9.55'bgs. 0.36' LNAPL detected in MW-1
and 0.11' in MW-3. BTEX from ND(MW-6,10,11) to 113890ppb(MW-3). MTBE from ND(MW-10,11) to
75400ppb(MW-3). 2Q05- DTW 6.69-8.96'bgs. 0.05' LNAPL detected in MW-3. BTEX from ND(MW-6,8,10,11)
to 120740ppb(MW-3). MTBE from ND(MW-8,10,11) to 50300ppb(MW-3). 12/6/05 3Q05 - DTW 7.09-9.02'bgs.
0.03' LNAPL in MW-1. BTEX from ND(MW-6,8,10,11) to 124500ppb. MTBE from ND(MW-8,10,11) to
48900ppb(MW-3). 3/16/06 Met with BP and Delta. Divested in 2001. Abandoned tanks were not removed
due to proximity to adjacent grade school building. Historically, MW-3 produced 3-4gal LNAPL which
was extracted and hasn't reappeared since. In 1Q05, the owner detected product in the interstitial
space of the mid-grade tank and sampled. Delta suspects that the tanks are out of compliance.
Start-up of SVE is pending Con Ed upgrade within the next couple of weeks. 4/26/06 4Q05 - DTW
6.6-9.11'bgs. 0.05' LNAPL in MW-1 and 0.03' LNAPL in MW-3. BTEX from ND(MW-6,8) to 153020ppb(MW-3).
MTBE from ND(MW-10) to 36100ppb(MW-3). 6/8/2006 - Feng - project reassigned to RJFeng. (RJF)
12/27/2006 - Feng - 2Q2006, 11/21/2006, by Delta. Groundwater sampled and gauged 4/14/2006. 11/14
monitoring wells were sampled. DTW 6.63' to 9.32' bg. Flows West-Northwest. LNAPL in MW-1 (0.31'),
and MW-3 (0.27'). MW-1, 24,374 ppb BTEX, 277 ppb MTBE. MW-2, 1,163 ppb BTEX, 6,160 ppb MTBE. MW-3,
122,800 ppb BTEX, 45,000 ppb MTBE. MW-4, 93,660 ppb BTEX, 147 ppb MTBE. MW-5, 1,857 ppb BTEX, 24.1
ppb MTBE. MW-6, BTEX ND, 11.6 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8, Dry. MW-9, destroyed
1Q2006. MW-10, 16.2 ppb BTEX, less than 1 ppb MTBE. MW-11, 605 ppb BTEX, less than 1 ppb MTBE.
MW-12, 1,212 ppb BTEX, 65.2 ppb MTBE. MW-13, 934 ppb BTEX, 32.1 ppb MTBE. MW14, 22,950 ppb BTEX,

BP SERVICE STATION #24485 (Continued) **U001839388**

3,320 ppb MTBE. (RJF) 12/28/2006 - Feng - 3Q2006, 12/11/2006, by Delta. Groundwater sampled and
gauged 7/27/2006. 11/14 monitoring wells were sampled. DTW 6.72' to 9.01' bg. Flows West-Northwest.
LNAPL in MW-1 (0.14'), and MW-3 (0.09'). MW-1, 21,886 ppb BTEX, 334 ppb MTBE. MW-2, 1,239 ppb BTEX,
3,880 ppb MTBE. MW-3, 136,520 ppb BTEX, 18,200 ppb MTBE. MW-4, 75,610 ppb BTEX, 3,030 ppb MTBE.
MW-5, 1,478 ppb BTEX, 13.3 ppb MTBE. MW-6, BTEX ND, 12.9 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8,
Dry. MW-9, destroyed 1Q2006. MW-10, ND, less than 1 ppb MTBE. MW-11, 4.95 ppb BTEX, 0.60 ppb MTBE.
MW-12, 102 ppb BTEX, 4.2 ppb MTBE. MW-13, 1,750 ppb BTEX, 21.4 ppb MTBE. MW14, 15,782 ppb BTEX,
1,950 ppb MTBE. (RJF) 3/6/2007 - Feng - 4Q2006, 2/15/2007. Groundwater sampled and gauged
10/19/2006. 12/12 monitoring wells were sampled. DTW 5.80' to 10.73' bg. Flows north-northwest. No
LNAPL. MW-1, 23,637 ppb BTEX, 276 ppb MTBE. MW-2, 1,008 ppb BTEX, 905 ppb MTBE. MW-3, 123,860 ppb
BTEX, 17,900 ppb MTBE. 36,210 ppb BTEX, 310 ppb MTBE. MW-5, MW-6, MW-8, and MW-10 are low in BTEX
and MTBE. MW-12, 2,326 ppb BTEX, 37 ppb MTBE. MW-13, 782 ppb BTEX, 9.5 ppb MTBE. MW-14, 12,791 ppb
BTEX, 1,160 ppb MTBE. Email Delta for the updates and status of the SVE system. (RJF) 3/6/3007 -
email from D. Taylor. It's been some difficulties running the SVE. Multiple site visits were
required to refine the system operation to the point that could maintain operation for more than a
few days after each O&M visit. It is now running at both wells (SVE-1 and SVE-2) on a consistent
basis without the shutdown issues that had in the past. O&M report will be submitted in 2 weeks.
(RJF) 4/19/2007 - Feng - Portfolio meeting with BP and Delta. The site was excavated and installed
new tanks in the south and north portion. Plan to excavate more soil source. The SVE only to
address the vapor issue for the school. It was used to have LNAPL in MW-1 and EFR events performed
until no recovery. Delta will wait until the completion of the new gas station and will re-install
the well-network. RAP addendum will be submitted. (RJF) 7/24/2007 - Feng - Tank Closure Report,
5/18/2007, by LongShore Environmental Inc.. On April 24, 2007, 4 (4,000-gallon) gasoline
double-wall steel USTs and 1 single-wall steel 550-gallon Waste Oil UST were removed. The USTs were
located in the west and northwest portion of the property. The tanks were in good condition. For
the 4,000-gallon USTs excavation, 6 composite sidewall soil samples and 1 bottom sample were
collected. Soil sample 4K-South Sidewall (east) at 7 feet bg, 500 ppb Benzene, 11,000 ppb
Ethylbenzene, 24,000 ppb Toluene, 83,000 ppb Xylenes, 2,500 ppb MTBE, 300,300 ppb Total VOCs.
4K-West Sidewall, 20,690 ppb Total VOCs. Following endpoint sampling,

BP SERVICE STATION #24485 (Continued) **U001839388**

the excavation was expanded
both vertically and horizontally for the installation of the new
tanks. Approximately 594.7 tons of
soil was removed from the site. For the 550-gallon waste oil UST
excavation, no impact was observed
and all soils were returned to the excavation. 4 composite sidewall
samples and 1 bottom sample
were taken. Some slight exceedance of SVOCs were detected. LongShore
recommended that the residual
impacted soils be managed under the ongoing remediation effort under
spill 00-09318. Email KE (BP)
for updates of the site. (RJF) 7/27/2007 - Feng - 1Q2007, 5/3/2007.
Groundwater sampled 1/5/2007.
All 11 monitoring wells were sampled. DTW 6.55' to 9.18' bg. Flows to
north-northwest. No LNAPL.
MW-1, 9,721 ppb BTEX, 87.5 ppb MTBE. MW-2, 964 ppb BTEX, 912 ppb MTBE.
MW-3, 103,250 ppb BTEX,
10,200 ppb MTBE. MW-4, 25,460 ppb BTEX, 50 ppb MTBE. MW-5, 729 ppb
BTEX, 9.3 ppb MTBE. MW-6, BTEX
ND, 9.3 ppb MTBE. MW-10, MW-11, ND. MW-12, 544 ppb BTEX, 26.2 ppb
MTBE. MW-13, 1,240 ppb BTEX, 19.6
ppb MTBE. MW-14, 8,887 ppb BTEX, 1,070 ppb MTBE. (RJF) 11/28/2007 -
Feng - 2Q2007, 8/29/2007.
Groundwater sampled 4/5/2007. 10/11 monitoring wells were sampled. DTW
6.42' to 9.13' bg. Flows to
northwest. LNAPL in MW-1 (0.03'). BTEX range ND to 101,490 ppb (MW-3).
MTBE range ND to 5,230 ppb
(MW-3). 3Q2007, 10/29/2007. Groundwater sampled 7/12/2007. 8/11
monitoring wells were sampled. DTW
6.90' to 9.29' bg. Flows to northwest. LNAPL in MW-1 (0.31'). BTEX
range ND to 70,040 ppb (MW-3).
MTBE range ND to 3,520 ppb (MW-3). 4Q2007, 11/16/2007. Groundwater
sampled 10/4/2007. 9/11
monitoring wells were sampled. DTW 6.99' to 9.29' bg. Flows to
north-northwest. LNAPL in MW-1
(0.28'). BTEX range ND to 73,790 ppb (MW-3). MTBE range ND to 3,150
ppb (MW-3). Remedial Action
Plan Addendum, 11/2/2007, submitted by Delta. Between 5/31 and
6/5/2007, EnviroTrac, under the
observation of Delta and on behalf of BP, performed soil
over-excavation activiites on the southern
portion of the subject site. The soil was over-excavated to a depth of
10.5 feet bgs, and the
over-excavation measured approximately 27 feet long by 20 feet wide.
The location of
over-excavation was determined based on known soil impacts in the area
and due to the
ineffectiveness of the on-site SVE system. Groundwater depth was
measured in the excavation to be
10.5 feet bg. Total of 297.52 tons of soil was disposed at the Clean
Earth of Philadelphia as
non-hazardous waste, manifests provided. 6 endpoint samples were
collected at 8.5'-9' bg. SW-14,
471,060 ppb BTEX, 723,350 ppb total VOCs. SW-15, 204,810 ppb BTEX,
367,570 ppb total VOCs. SW-16,
37,141 ppb BTEX, 89,975 ppb total VOCs. No bottom sample was collected
due to the presence of

BP SERVICE STATION #24485 (Continued) **U001839388**

groundwater. Spoke with David Greffenius (Delta). The abandoned tanks may still in place, they were
not removed due the structural restriction. The SVE system is shutdown because it has low/none
recovery and that's why the soil excavation at that area was performed. Biweekly bailing of the
LNAPL in MW-1 is performing, will be confirmed later on. DEC required additional delineation of
downgradient of MW-1 to see the movement of LNAPL. Once the investigation is done, RAP for the
entire site will be required. (RJF) 11/29/2007 - Feng - Letter to Kevin Endriss (BP). DEC requires
LNAPL recovery, further downgradient delineation, RAP for the entire site. A brief investigation
work plan to be submitted by 1/14/2008. (RJF) 1/2/2008 - Feng - Investigation Work Plan submitted
by Delta via email. (RJF) 1/22/2008 - Feng - Reviewed Investigation Work Plan. EFR events will be
conducted on MW-1 to remove LNAPL. 2 additional monitoring wells will be installed at the former
MW-4 and MW-9 locations respectively. And a revised RAP will be submitted upon the completion of
groundwater sampling of the newly installed monitoring wells. There is a building located north to
the site and no groundwater monitoring wells can be installed to the north of MW-1. DEC emailed to
Delta and required the EFR event to be started immediately. (RJF) 1/23/2008 - Feng - Email from
Igor Goldstein (Delta). Monthly EFR events will be conducted. Investigation Work Plan is approved.
Letter to BP and Delta. Required RIR and RAP to be submitted by 3/24/2008. (RJF) 2/1/2008 - Feng -
sidewalk permit letter to Delta for installation of MW-16. (RJF) 2/13/2008 - Feng - 1Q2008,
2/7/2008. Active service station. The monitoring well network was gauged and sampled on 1/18/2008
as part of the quarterly sampling shedule. The site is being remediated via the current operation
of an installed SVE system. 10 wells were gauged. DTW 6.48' to 9.07' bg. Flows to north-northeast.
LNAPL in MW-1 (0.06'). 8 wells were sampled. BTEX range ND to 57,100 ppb (MW-3). MTBE range ND to
4,900 ppb (MW-3). (RJF) 4/15/2008 - Feng - Reviewed the Remedial Investigation Report, dated
3/24/2008, by Delta, pdf copy. On February 20 and 27, 2008, Associated Environmental installed two
2-inch diameter monitoring wells MW-15 and MW-16. MW-15 located southwest to the former tank field
area and MW-16 at the sidewalk along Kent Ave. MW-15, final well depth at 18 feet, DTW 9 feet, 10
feet of 0.01-inch slotted schedule screen, set screen bottom at 16.5 feet. MW-16, final well depth
at 15 feet, DTW 5 feet, 10 feet of screen set screen bottom at 12 feet. No soil sample taken. On
3/12/2008, the wells were gauged and no LNAPL detected. Two groundwater samples were collected.
MW-15, ug/L, 2,100 benzene, 8,300 toluene, 3,700 ethylbenzene, 13,000

BP SERVICE STATION #24485 (Continued) **U001839388**

xylenes, 27,100 total BTEX,
430 MTBE. MW-16, 510 benzene, 15,000 toluene, 2,300 ethylbenzene,
10,000 xylenes, 27,810 BTEX, 57
MTBE. LNAPL in MW-1 recovery were conducted. 1/30/2008, EFR event, 0.5
gallon of LNAPL and 1,450
gallons of petroleum impacted groundwater was extracted. 2/18/2008,
hand bailing, 0.01 feet of
LNAPL. 2/26/2008, EFR event, 2,005 gallon of petroleum impacted
groundwater was extracted.
3/19/2008, hand bailing, no LNAPL. RAP will be submitted 4/18/2008.
(RJF) 5/5/2008 - Feng -
Reviewed Revised Remedial Action Plan, dated April 18, 2008. The
Revised RAP calls for monthly EFR
events on MW-1 and MW3. EFR effluent air will be sampled on monthly
basis. Groundwater gauging and
sampling will be quarterly. Letter to K. Endriss (BP) requiring the
revised RAP to include the
MW-15 and MW-16 area. Revision to be submitted 6/5/2008 (30 days).
(RJF) 5/8/2008 - Feng -
Conference call with K. Endriss (BP), G. Hinshalwood and I. Goldstein
(Delta). The proposed revised
RAP only for treating the source area. Delta will see 2 more quarters
of sampling of MW-15 and
MW-16 as well as the geochemical sampling to decide what remedy to
propose. Delta will submit an
addendum letter for conditionally approve the revised RAP. (RJF)
5/9/2008 - Feng - Reviewed the
Revised RAP Addendum Letter, dated 5/8/2008 by Delta. Approve Revised
RAP with the Addendum Letter.
Approval letter to BP and Delta. (RJF) 6/16/2008 - Feng - Letter from
Delta, 6/12/2008. On
5/29/2008, EFR event was conducted at MW-1 and found MW-3 to be an
1-inch diameter well and the
size is not suitable for use in EFR events. Delta will continue EFR at
MW-1 and install a 2-inch or
4-inch well in the MW-3 area. Schedule of well installation will be
informed. (RJF) 6/18/2008 -
Feng - Portfolio meeting with BP and Delta. The new well will put in
as near the MW-3 as possible,
will be 4-inch well. Utility will be marked out next week. (RJF)
10/27/2008 - Remedial Progress
Report, dated 9/29/2008, by Delta. On 7/16/2008, MW-17 was installed.
4-inch diameter, closed to
MW-3. Total depth 19 feet, groundwater was encountered at 10 feet. 15
feet of 0.02 slotted schedule
40 PVC screen. Monthly EFR events from May to 8/2008 on MW-1. Monthly
EFR on MW-17 from 7/2008 to
8/2008. A total of 5,255 gallons of water was extracted and disposed.
No measurable LNAPL in MW-1
during bailing event from 3/2008 to 9/2008. Groundwater was sampled
for bio-parameters. Delta will
propose RAP for bio-stimulation by 10/15/2008. They will provide work
plan to EPA for their
approval also. (RJF) 10/29/2008 - 2Q2008, 4/25/2008, by Delta, by
Delta. Active service station.
the monitoring well network was gauged and sampled 4/17/2008. The site
is being remediated via

BP SERVICE STATION #24485 (Continued) **U001839388**

monthly EFR events. First round of gauging and sampling event of the two new monitoring wells MW-15
and MW-16. 12 wells were gauged. Trace LNAPL in MW-1. DTW 6.66' to 8.88' bg. Flows to
north-northeast. 10 wells were sampled. BTEX range ND to 62,900 ug/L (MW-3). MTBE range ND to 6,200
ug/L (MW-3). (RJF) 3/4/2009 - 3Q2008, 11/13/2008, by Delta. Active Service Station. The monitoring
well network was gauged and sampled on 7/21 and 7/25/2008 as part of the quarterly sampling
schedule. The site is being remediated via monthly EFR events. Also worth noting that this was the
first round of gauging and sampling of one new monitoring wells (MW-17) which was installed on
7/18/2008. In addition, groundwater samples for geochemical parameters were also collected during
this monitoring event. 13 wells were gauged. LNAPL in MW-1 (0.02'). DTW 5.64' to 9.34' bg. Flows to
north-northeast. 9 wells were sampled. 4 wells were not sampled, MW-1 with LNAPL, MW-10, MW-12 and
MW-16 insufficient sample volume. BTEX range ND to 57,100 ug/L (MW-3). MTBE range ND to 6,200
(MW-3). 4Q2008, 11/20/2008, by Delta. Active service station. The monitoring well network was
gauged and sampled on 10/14/2008. The site is being remediated via Multi Fluid Recovery events. 13
wells were gauged. No LNAPL. DTW 7.11' to 9.80' bg. Flows to north-northeast. 13 wells were
sampled. BTEX range ND to 68,900 ug/L (MW-3). MTBE range ND to 6,000 ug/L (MW-3). (RJF) 3/23/2009 -
Reviewed the Work Plan Bio-Stimulation Remediation Pilot Study, dated 10/15/2008, by Delta. The
Work Plan calls for the application of 1,760 pounds of magnesium sulfate at a starting
concentration of 55,000 mg/L in a single monitoring well MW-15. Monitoring program including gauge
for the DTW, sulfate, sulfide, DO and pH immediately upon completion of the addition activities and
3 days after the addition, and weekly for 5 weeks. Groundwater will be monitored biweekly following
the current procedure for 2 rounds and then continue quarterly. The Work Plan is approved. Report
summarizing the pilot study and the recommendation for further corrective action will be submitted
by 6/2009. Letter to BP and Dleta. (RJF) 7/24/2009 - 2Q2009, 7/17/2009, by EnviroTrac. BP Service
station. The monitoring well network was gauged and sampled on 4/20/2009. 12 wells were gauged.
LNAPL in MW-3 (0.10'). DTW 6.20 to 9.37 feet bgs. Flows to north-northeast. 11 wells were sampled.
MW-3 with product and MW-6 were not sampled. Max benzene 2,500 ug/L (MW-17). Max BTEX 27,930 ug/L
(MW-15). Max MTBE 1,900 ug/L (MW-17). 7/24/2009 - Reviewed Drilling and Well Abandonment Work Plan,
dated June 25, 2009, by Delta. Delta proposes to abandon EW-1 and install MW-18 close to EW-1.
Email to Delta for another well at the proximity of EW-2. Revised work

BP SERVICE STATION #24485 (Continued) **U001839388**

plan due within 30 days.
(RJF) 8/20/2009 - send email to Gordon Hinshalwood (Delta) letting them go ahead with the
installation of 2 wells to replace EW-1 and EW-2 as we agreed to during the meeting with BP on
7/30/2009. SHARA due 11/2009. (RJF) 12/15/2009 - reviewed the Drilling and Well Abandonment Work
Plan revision, dated 9/10/2009, by Delta. Delta will abandon 2 extraction wells EW-1 and EW-2, and
will replace them with 2 new monitoring wells. SHARA will be in by 11/2009. (RJF) 4Q2009,
1/12/2010, by EnviroTrac. BP service station. The monitoring well network was gauged and sampled on
10/26/2009. 15 wells were gauged. LNAPL in MW-3 (0.26'). DTW 7.11-9.46' bg. Flows to
north-northeast. 14 wells were sampled. MW-3 was not sampled due to product. Max benzene 1,400 ug/L
(MW-17). Max BTEX 31,330 ug/L (MW-19). Max MTBE 1,100 ug/L (MW-17)
1Q2010, 4/9/2010, by EnviroTrac.
The monitoring well network was gauged and sampled on 1/15/2010. 15 wells were gauged. LNAPL in
MW-3 (0.02'). DTW 7.30-9.56' bg. Flows to north-northeast. 14 wells were sampled. Max benzene 2,400
ug/L (MW-17). Max BTEX 24,870 ug/L (MW-19). Max MTBE 710 ug/L (MW-17).
4/21/2010 - Reviewed
Subsurface Hydrocarbon Assessment Report Addendum, dated 12/3/2009, by Delta. On October 11, 2009,
EnviroTrac advanced 2 soil borings MW-18 and MW-19 to depth of 16 feet using Geoprobe 6620 DT
hollow stem auger and direct push macro core sampling unit. 3 soil samples were collected. unit in

diagram; 2) surrounding sketch; 3) check possible delineation at the commercial building and the
school, and definite delineation around MW-19. work plan due 5/2010. 6/2/2010 - 2Q2010, 5/18/2010,
by EnviroTrac. The monitoring well network was gauged and sampled on 4/14/2010. 15 wells were
gauged. NO LNAPL. DTW 6.50-8.73' bg. Flows to north-northeast. 15 wells were sampled. Max benzene
1,000 ug/L (MW-3). Max BTEX 47,700 ug/L (MW-3). Max MTBE 2,100 ug/L (MW-3). 7/29/2010 - Enhanced
Bioremediation Pilot Summary, dated May 31, 2010, by Delta. On October 26, 2009, all the wells were
gauged for DTW, and presense of lNAPL. Note that 0.18 feet of lNAPL in MW-3. All the wells were
sampled for baseline. On 11/3/2009, 460 lbs of magnesium sulfate was mixed with 1,000 gallons of
water and gravity feed into MW-15 over a four hour period. 11/4/2009, sulfate sampled. MW-15, 5,420
mg/L. MW-18, 1,520 mg/L. MW-12, MW-16 and MW-14 also exhitbited elevated sulfate concentrations
compared to the baseline analysis, while the other wells MW-2, MW-5, MW-6, MW-10, MW-11 and MW-19
did not. The sulfate ncentration in application monitoring well MW-15 initially spiked from less
than 1.5 mg/L to 5,420 mg/L within the first 24 hours, and then gradually decreased to 75.2 mg/L
after 80 days. In conclusion, the application was not exceed the boundary limit of 250 mg/L
sulfate; the increase of sulfate in MW-10 was most likely indicative of background sulfate
concentrations; only 6 wells were affected from the application point; elevated concentrations of
sulfate in the application well consistently dissipated during the 80 days. 8/2/2010 - email
comments on the pilot summary. 1) product in MW-3; 2) full scale work plan by 8/2010; 3) keep
monitoring all the wells to ensure that there is no exceedances of the 250 mg/L criteria.

sampled on 1/18/2012. MW-1, 0.01' of LNAPL. Multiple wells with high level of BTEX and relatively
high MTBE. The next scheduled sampling for April 2012. 6/29/2012 - reviewed Drilling Work Plan,
dated 6/11/2012, by Antea Group. Proposed 2 additional monitoring wells and 6 soil borings. The
borings are to assess the soil quality in areas where historical data showed hydrocarbon impacts
and/or soil data has not been evaluated. 2 wells are proposed to enhance the well network and
further delineate the gw impacts previously identified at the site, intended to target those area
adjacent to existing monitoring well MW-19 and former MW-8, as well as to the east of formerly
abandoned USTs. Email with 14 comments to BP/Antea. see eDoc. Revised work plan by the end of July
2012. 8/27/2012 - 2Q2012, 6/29/2012, by Antea Group. The groundwater was sampled on April 9, 2012.
The next sampling will be in July 2012. MW-1, 1,111 BTEX, 16 MTBE. MW-3, 45,800 BTEX, 1,100 MTBE.

BP SERVICE STATION #24485 (Continued) **U001839388**

MW-5, 297 BTEX, 14 MTBE. MW-12, 123 BTEX, 9.9 MTBE. MW-14, 386 BTEX, 2.1 MTBE. MW-15, 11,420 BTEX,
47 MTBE. MW-16, 4,302 BTEX, 2.3 MTBE. MW-17, 7,920 BTEX, 250 MTBE. MW-18, 1,550 BTEX, 49 MTBE.
MW-19, 19,620 BTEX, less than 10 MTBE. 10/10/2012 - Reviewed the Addendum to Work Plan for
Additional Delineation, dated 7/31/2012, by Antea Group. 5 soil borings and 3 wells are proposed.
Email to BP/Antea I am confused about which work plan do you want me to approve? Your email still
attached the one dated 6/11/2012. And I have the revised one dated 7/31/2012 which you responded to
our comments. Let me know. I am ok with your response on most of the parts. But I still insist to
see delineation in those two buildings area next to the station as I put in the comment 2 and
comment 7. MW-7 is far from the station which located across Kent Ave from the station but it still
had shown MTBE during the monitoring of its time. I was just trying to say that distance might not
a problem for the contaminant to migrate in this case. And if you look at the history of MW-1, MW-2
and MW-12 which located at the edge of the station property, they had high hit in their history.
And one of these two building is a 3-story school . So yes, I insist to see the delineation to be
done there. 11/30/2012 - 3Q2012, 09/27/2012, by Antea Group. The groundwater was sampled on July
26, 2012. The next sampling will be in October 2012. MW-1, 1,570 BTEX, 30 MTBE. MW-3, 48,300 BTEX,
1,200 MTBE. MW-5, 434 BTEX, 20 MTBE. MW-12, 231 BTEX, 16 MTBE. MW-13, 1,276 BTEX, 22 MTBE. MW-14,
1,457 BTEX, 2.7 MTBE. MW-15, 15,830 BTEX, 57 MTBE. MW-16, 2,753 BTEX, less than 2.5 MTBE. MW-17,
8,300 BTEX, 220 MTBE. MW-18, 1,539 BTEX, 52 MTBE. MW-19, 18,790 BTEX, less than 5.0 MTBE. 1/8/2013
- call from Chris Meyer of Antea Group. They did the drilling work according to the work plan
except the PMW-20 and former MW-7 area due to the utilities/subsurface infrastructure. Will submit
the investigation report. 12/17/2012 - email from Chris Meyer of Antea Group We are currently
planning to conduct the indoor air survey and inventory at the school this Wednesday. In addition
to collecting the PID readings you ve requested, we will also be completing the attached building
questionnaire. 8/5/2013 - 4Q2012, 2/28/2013, by Antea Group. The monitoring was done on 12/11/2012.
MW-1, 894 BTEX, 44 MTBE. MW-3, 61,600 BTEX, 1,000 MTBE. MW-5, 413 BTEX, 17 MTBE. MW-10, 20.5 BTEX.
MW-11, 29.2 BTEX. MW-12, 67.2 BTEX, 16 MTBE. MW-15, 13,750 BTEX, 59 MTBE. MW-16, 4,468 BTEX. MW-17,

MW-19, 2,537 BTEX. MW-24, 2,929 BTEX, 79 MTBE. 1/26/2016 - Feng - email from BP Nick Onufrak to DEC
Vought and Feng Hello June and Jeff, We received a call from the tenant of 33 Hewes Street,
Brooklyn NY. A Mr. Miller (847.538.9294) contacted Antea Group, by way of the neighboring gas
station 677-87 Kent Avenue, Brooklyn NY when he observed what he believed to be fuel oil in the
basement of the building. As 677-87 Kent Avenue is the location of active NYSDEC case number
00-09318, he was concerned whether the material in his basement was attributed to that open case.
We ve been out to his property, gauged the nearby wells, screened the rooms with a PID, and we

BP SERVICE STATION #24485 (Continued) **U001839388**

collected a few samples of the material, which have been sent to a lab for forensic analysis.
NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retails
station. Based on an overall absence of the elevated PID readings that would accompany
gasoline-range hydrocarbons, and absent this update forensics data, we have yet to find a link
between this material and the open spill number. Note that the current owner/operator of the retail
station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the
tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might
be able to further understand its origin. We thought you should be aware of this. Please give me a
call with any questions. We ll let you know more as this develops. DEC Feng spoke to Mr. Chan
Miller (347-538-9294) at 35 Hewes Street. The building is used as a Jewish elementary school. About
1 month ago, he found oil in his basement. His basement is about 15'x 15' and the oil was about 1-2
inches in depth flooded in the basement. He contacted BP and BP responded to the incident Wednesday
last week. Between the incident and the time BP came, Mr. Miller had some guy from a lab took a few
samples on 1/7/2016 and lab results show it is fuel oil/diesel/#2 oil. The basement is used for
boiler room and sprinkler system. There are sumps/drain/sewage in the basement. He and his people
cleaned up the basement today with mops and wipes. There is no smell/odor in the basement or the
entire building. There is no tank at all for this building. He is in the school during the day
9:00am to 4:00pm if inspection is needed. Discussed with J. Vought and sent email to BP Nick
Onufrak and Antea Gorup Chris Meyer Nick and Chris, I just spoke with the owner, Mr. Chan Miller
(347-538-9294). He stated that there was 1 to 2 inches of oil in his basement which is used for
boiler room and sprinkler system. He indicated that the building is used for elementary school. He
stated that there were no vapors in the basement or in the entire building. The basement was
cleaned up by Mr. Miller and his people today with mops and wipes. As the site is an elementary
school, we want to ensure timely investigation/remediation. We are sending a responder, possibly
Kumar Patel (copied above, 646-201-1488) tomorrow for a site inspection. Please let us know the
schedule to monitor and clean up the basement. If possible, please have the current tenant/owner
provide the tightness test data for the 6,000-gallon fuel oil UST at the location of the BP retail
station. Please provide the forensic sampling report as soon as it is available. We are also be
discussing this site with our PBS unit who may visit the BP station as

BP SERVICE STATION #24485 (Continued) **U001839388**

well to ensure all is in
working order. email to K. Patel the PBS record, 2013 inspection report and the 4Q2015 monitoring
report of the BP station at 677-87 Kent Ave for tomorrow's inspection. 1/27/2016 - As per J.
Vought, spill 15-10501 is added into UIS for 35 Hewes Street, Brooklyn. Conference call among Nick
Onufrak of BP, Kumar Patel, Jeff Vought and June Feng. K. Patel stated that during this inspection
this morning he did not see any oil drops. The basement is filled with sewage smell. The building
kitchen is in the area and he suspected that is the kitchen grease trap. Mr. Miller will hire a
plumber to check the sewage system. Nick has concern regarding the old abandoned USTs that near the
school area but could not be removed due to structural integrity. Nick shall have the forensic
report by Friday and he will share that with DEC as soon as it becomes available. email from Kumar
Patel to DEC Vought and Feng I inspected site 35 Hewes Street this morning and met Mr. Miller. We
walked through dining area and kitchen on first floor on our way to the basement. No petroleum
odors noted in dining area or kitchen, but noted sewage/grease trap odors at the basement hatch
which is inside the kitchen area. Found water on basement floor with strong sewage kind smell. No
sign of petroleum product (sheen or odors) noted in the basement. Mr. Miller confirmed absence of
petroleum odors in the building. Based on field observations, recommended him to have grease and
sewer trap checked by a plumber. email to NYSDOH and NYCDOH Dear Mike, Nathan, and Chris, On
1/26/2016, we received an email from BP and their consultant, Antea Group, stating that they had
been contacted by a tenant of 35 Hewes Street who had observed fuel oil in the basement of their
building. The building is used as a Jewish elementary school. BP and Antea Group is managing a long
term petroleum remediation project of gasoline contamination associated with an active BP gas
station located at 677-87 Kent Ave which is immediately adjacent to 35 Hewes Street. Antea Group
has gauged nearby monitoring wells at the BP station, screened 35 Hewes Street with PID meter, and
collected product samples from 35 Hewes Street for forensic analysis. Antea Group noted that they
had not found to date that they were the source of the seepage but still intended to clean up the
basement for further inspection of the possible seepage source. We spoke with the school
representative who noted that there were no odors in the basement or the entire building. According
to BP, the forensic report shall be available this Friday. Kumar Patel from our Unit inspected the
site this morning and met with the school representative. He noted no petroleum odor but did note

BP SERVICE STATION #24485 (Continued) **U001839388**

sewage/grease trap odors at the basement hatch which is inside the kitchen area. Water on the basement floor was found with strong sewage smell. No sign of petroleum product (sheen or odors) were noted in the basement. The school representative also confirmed the absence of petroleum odors in the building during his inspection. Kumar recommended the school have the grease and sewer trap be checked by a plumber and the representative agreed to have it performed. Kumar noted the address on the building is 35 Hewes Street. I checked the NYCDOB database and alternative addresses for this location included 33-39 Hewes Street, 35 Hewes Street and 671 Kent Ave. I also checked ACRIS and the address in the deed and mortgage agreement is 33 Hewes Street. Let us know if you have any questions/comments, need additional information, or think a NYCDOH inspection is warranted Thank you as always, 2/29/2016 - 1Q2016, 2/29/2016. Monitoring Report 4Q2017, 1/24/2018, by ARCADIS. MW-22 was detected with product the first time,
1.89 feet. Arcadis is doing investigation to find the source of the product. email to Sahithi
Rondla Sahithi, I reviewed the monitoring report and noticed that MW-22 was detected with product
the first time. Regarding the findings of the investigation for the source of the product, you
mentioned spill 15-10501. As I know, the school building did not have any tank back then. I checked
the PBS record, no registration as of today. Back then, when DEC inspected the site when the
incident occurred, the inspector noted there was sewage odor in the basement but no sign of
petroleum. He then recommended for the grease trap be checked by a plumber. As you said, the
product was estimated to be 6-7 years (+/- 2 years) old. It seems not matches the new unweathered
product. You mentioned the product from upgradient of MW-22, Manhole 59638. The spill number is
05-06675. According to DEC notes, it is a Con Ed spill. 2 gallons of unknown oil on top of 60
gallons of water. It has been cleaned up by removing the product and re-capping the leaking 3c
cable. The spill was then reclassified as dielectric fluid spill.
Spill was closed on 1/10/2008.
Have you checked to make sure that the monitoring well detected with product is the MW-22?
Confirmed the monitoring well was not damaged or unlocked when it was gauged/sampled? MW-22 has
been non-detected almost all the time since its installation in 2013. However, there is a
closed-in-place tank field in the southeast corner of the site. The monitoring wells, MW-4, MW-15,
MW-19, MW-8A, around the abandoned tank field have been either had product or high dissolved of
VOCs concentration. MW-22 is located near the area. MW-22 is not upgradient all the time, if you
check the flow direction, it varied or you may say it has been flowed to all direction. It shouldn
t be surprised if you see detection in that monitoring well MW-22.
Have you compared this product
to the product from other wells that currently have product, e.g. MW-3 and MW-17, and the diesel
product the station is selling? Have you done any product removal since its discovery to see if

BP SERVICE STATION #24485 (Continued) **U001839388**

there is any return of the product? I recommend to do the product removal immediately before it
migrates and dissolves more in groundwater while you continue to investigate for the source of the
product. Email from Sahithi Rondla Ms. Feng, We are pretty sure about identification of the
well,MW-22. The well was found to be intact with manhole cover and J-plug. I agree this well is in
close proximity to former abandoned tankfield. However based on Antea s Soil Boring investigation
in April 2016, a total of four soil borings were advanced (SB-20, SB-21, SB-22, SB-23) to assess
the subsurface soils between the adjacent property to the northeast(school) and the subject site
and two temporary monitoring wells (SB-20 and SB-22) were installed to further assess groundwater
conditions . VOC concentrations in excess of NYSDEC CP-51 Soil Cleanup Guidance for Gasoline
Impacted Sites were identified in one of the borehole locations (SB-20); SVOC concentrations in
excess of NYSDEC CP-51 Soil Cleanup Guidance for Fuel Oil Contaminated Sites were not identified in
any of the four borehole locations. Laboratory results indicated that soil impacts identified along
the northeast property boundary in the area of SB-20 are likely attributed to current BP assigned
spill number 00-09318. Laboratory analysis performed on the two groundwater samples collected from
temporary wells SB-20 and SB-22 identified several VOC concentrations above the GWQS in SB-20, but
no GWQS exceedances in SB-22. Laboratory analysis identified several SVOC concentrations above the
GWQS in the groundwater samples collected from SB-20 and SB-22. LNAPL was not detected in temporary
monitoring wells (SB-20 and SB-22) during the assessment. Note that SB-23 is the closest boring to
MW-22.Soil analytical data from SB-23 was clean. We compared the fingerprinting results from MW-22
to onsite historic LPH . LPH samples collected at MW-1 (Oct. 2004), MW-3 (March 2001 and Jan.
2013), and MW-8A (Jan. 2013) characterized by Torkelson Geochemistry in Antea Report as moderately
weathered to weathered premium grade gasoline (no mention of diesel being present in any sample).
However to clarify your question, we did not analyze diesel from existing service operations as we
do not believe is required due to the location of current tank field. Coincidentally we are the
site today performing 1st Qtr 2018 GW monitoring event. Per your suggestion, we will bail the LPH
from MW-22. However I would like to clarify that though we are bailing, Arcadis on behalf of our
client ,BP is not accepting the responsibility of LPH in MW-22 ,as we believe is not related to
current open spill number 00-09318 at this time. Arcadis is still conducting further investigation
into this. As I mentioned on the call, I will summarize the results of

71 MTBE. 12/11/2019 - Feng - email from Sahithi of Arcadis Ms. Feng, Just wanted to provide you an
update on activities mentioned in RAP for the aforementioned site :
-Arcadis installed Dual phase
extraction (DPE) wells on November 6th & 7th ,2019 as stated in RAP submitted to NYSDEC dated July
24,2019. -RAP outlines implementing first week long DPE event within 60 days following the DPE well
install . So technically ,first DPE event should have been conducted before January 7,2019 -However
due to upcoming holiday season, subcontractor scheduling and other logistics, Arcadis will delay
this implementation by a week. Arcadis is scheduled to conduct this work during week of January
13,2019. I hope NYSDEC has no objection to our extension request by a week s time. Feng replied no
objection. 3/20/2020 - email from Sahithi Rondla Ms. Feng, Per RAWP dated July 2019, Arcadis
conducted 2 of 5-day DPE events so far in January & February 2020. However we are having to suspend
March 2020 event because of ongoing global Covid-19 crisis. As you know this site operates as gas
station in NY where the epicenter for Covid-19 currently is and we are having difficulty with
staffing and dealing with logistics related to maintaining the separation distance based on the

BP SERVICE STATION #24485 (Continued) **U001839388**

scope of work & on site business operations. I hope you understand our current situation and be
assured that Arcadis will immediately mobilize to the site to conduct 3rd week long DPE event as
soon as conditions improve. I will continue to keep you posted about our plans. In the meantime,
please do not hesitate to let me know if you have any questions or concerns. Feng reply to Sahithi
Rondla Sahithi, I understand. Everybody please stay healthy and safe!
4/2/2020 - Feng - 4Q2019,
1/27/2020, by Arcadis. Monitoring on 10/24/2019. DTW 7.70 (MW-24) to 15.45 (MW-23). LPH was
recovered from MW-3, MW-17 and MW-22. The recovered LPH was stored in an onsite drum for subsequent
offsite disposal at a EPA approved disposal facility. MW-2, 117 BTEX, 11 MTBE. MW-3, 0.66' LNAPL.
MW-5, 90.6 BTEX. MW-8A, dry. MW-14, 1,275 BTEX. MW-15, 3,291 BTEX, 24 MTBE. MW-17, 0.02' LNAPL.
MW-18, 1,830 BTEX, 20 MTBE. MW-19, 366 BTEX. MW-22, 0.15' LNAPL.
MW-24, 1,219 BTEX, 77 MTBE.
5/11/2020 - Feng - 4/14/2020 email from S. Rondla. Due to COVID-19 pandemic, 2Q2020 field work,
i.e. groundwater monitoring and 3rd DPE event pilot test, will be defer to later in the quarter
until current situation gets stable. 6/8/2020 - Feng - 1Q2020 and VTE Event Summary Report,
5/29/2020, by Arcadis. Monitoring on 2/12/2020 and 3/16/2020. As of 3/16/2020 MW-1, less than 9
BTEX, 3 MTBE. MW-2, less than 14.5 BTEX, 3 MTBE. MW-3, dry. NO LNAPL. MW-4, abandoned well. MW-5,
74.4 BTEX, 7 MTBE. MW-6, less than 9 BTEX, 4 MTBE. MW-7, abandoned well. MW-8, abandoned well.
MW-8A, dry. MW-9, abandoned well. MW-10, less than 9 BTEX, less than 1 MTBE. MW-11, less than 8
BTEX, less than 1 MTBE. MW-12, dry. MW-12A, less than 9 BTEX, 13 MTBE. MW-13, dry. MW-14, 7.2J
BTEX, 2 MTBE. MW-15, 344J BTEX, 10 MTBE. MW-16, could not sample due to damaged well inner casing.
MW-17, 6,290 BTEX, 36 MTBE. MW-18, 343 BTEX, 11 MTBE. MW-19, 3.7J BTEX, 2 MTBE. MW-22, less than
8.7 BTEX, less than 1 MTBE. NO LNAPL. MW-23, less than 9 BTEX, less than 1 MTBE. MW-24, 2,478 BTEX,
12 MTBE. DPE-1, 550 BTEX, 21 MTBE. DPE-2, 557 BTEX, 10 MTBE. 6/22/2020 - Feng - Reviewed VTE Event
Summary. -Between November 6 and November 7, 2019, Arcadis oversaw the installation of 2 extraction
wells (DPE-1 and DPE-2) by Hawk Drilling. -Drilled using hollow stem auger drill rig to 25 feet.
-4-inch diameter, 15 feet of 0.02-inch slotted screen, 5 feet riser. -Each DPE wells includes a
5-foot sump so that pump intake can be adjusted during the VTE events to maximize mass recovery -2
multi-day VTE events were conducted in first quarter 2020, 1/20-23/2020, and 2/24-28/2020. -MW-3,
MW-5, MW-8A, MW-15, MW-17, MW-18, MW-19 and MW-22 were used as observation -interface probe was
used to collect depth to water and depth to product reading -a

BP SERVICE STATION #24485 (Continued) **U001839388**

top-loading pneumatic pump was
installed in each extraction well with the pump intake positioned near the bottom of the well
screen. -the pneumatic pumps were turned on to begin groundwater extraction -vacuum blower was
turned on to begin soil vapor extraction -reading were collected every 60 min throughout the day
-water discharge line from each pneumatic pump was run to a 250-gallon water storage tank and will
be pumped to vac truck for disposal once it is full by Lorco Petroleum in Elizabeth, NJ. -the
truck-mounted vacuum blower effluent line was connected to (2) 375-lb vapor-phase granular
activated carbon (VGAC) units in series to allow extracted soil vapor to be treated before
discharge to atmosphere. -DPE-1 recharge rate 5 gallons per minute -DPE-1 drawdown was limited to 1
ft -DPE-2 recharge less than 0.5 gpm -higher recharge rate in DPE-1 may be due to its presence of a
former excavation -DPE-2 may be the representative of actual groundwater recharge rate at the site.
-total 12,775 gallons of groundwater was extracted during the two VTE events. -max drawdown DPE-1
(1.2 feet), DPE-2 (6.1 feet), MW-15 (0.5 feet), MW-18 (1.0 feet), MW-3 (dry), MW-17 (0.4 feet),
MW-5 (0.1 feet). MW-19 (0.4 feet), MW-8A (dry), MW-22 (0.0 feet). -vacuum applied in DPE-1 and
DPE-2 from 4.9 in Hg to 6.3 in Hg. -air flow rates in DPE-1 and DPE-2 from 87 scfm to 132 scfm -all
the monitoring wells, except MW-22, recorded induced vacuum during the VTE. -ROI is 35 feet. -DPE-1
mass recovery ranged 41 to 51 lbs/day -DPE-2 mass recovery ranged 16 to 25 lbs/day -total 196 lbs
of vapor phase TPH were removed during the 2 VTE events Based on the high soil vapor mass recovery
rates observed in DPE-1 and DPE-2 during the 2nd VTE event, Arcadis proposes additional VTE events
at the site to continue removal of VOC mass from the subsurface.
3/2/2021 Feng - Monitoring 4Q2020,
1/29/2021, by Arcadis. Monitoring on 10/29/2020. DTW 6.78 (MW-24) to 13.60 (MW-23) below top of the
casing. Water flows to east at hydraulic gradient of 0.03 feet per feet. LNAPL in DPE-1 (0.14) the
first time. 0.4 gallons of LPH was recovered from the well via hand bailing using disposable
bailers. LPH was sampled on 11/10/2020. LPH samples were collected from DPE-1 and MW-3 to identify
the chemical composition and age o the LPH and to determine if the LPH observed in both wells have
resemble to each other. LPH in MW-3 contained weathered premium grade gasoline, consistent with the
historical fingerprinting analyses conducted in 2001 and 2013. LPH in DPE-1 contained weathered
regular grade gasoline and had different composition to LPH detected historically in MW-1, MW-3 and
MW-8A. Arcadis will proceed with mobile DPE events starting January 2021 but modifying the

BP SERVICE STATION #24485 (Continued) **U001839388**

technology by using Catalytic Oxidizer unit instead of vapor phase carbon units for off gas treatment. MW-1, 338 BTEX, 22 MTBE. MW-2, less than 3 BTEX, less than 1 MTBE. MW-3, 0.16 LNAPL. 189,000 BTEX, 2,320 MTBE. MW-4, abandoned 7/2007. MW-5, not sampled due to rain water flooding the well. MW-6, not sampled annually. MW-7, well not sampled since 1/2005. MW-8, well abandoned 1/2007. MW-8A, not sampled due to insufficient water volume. MW-9, well abandoned 4/2006. MW-10, sampled annually. MW-11, sampled annually. MW-12, dry. MW-12A, less than 3 BTEX, 5.9 MTBE. MW-13, inaccessible due to tire piles. MW-14, 849 BTEX, 3.7 MTBE. MW-15, 28.7 BTEX, 13.1 MTBE. MW-16, not sampled due to damaged well casing. MW-17, 5,480 BTEX, 69.4 MTBE. MW-18, 1,190 BTEX, 14.8 MTBE. MW-19, 73.2 BTEX, 5.0 MTBE. MW-22, less than 3 BTEX, less than 1 MTBE. MW-23, not sampled due to rain water flooding well. MW-24, 130 BTEX, 39.3 MTBE. DPE-1, 18,100 BTEX, 261 MTBE. DPE-2, 810 BTEX, 15.3 MTBE. 12/22/2022 - Feng - Call with Sahithi Rondla of Arcadis. DPE events stopped in 12/2021. They had switched carbon with a CatOx unit onsite. There are 4 quarters of monitoring and downward trend observed. They will submit a request for spill closure. 1/22/2023 - Feng - Monitoring 3Q2022, 11/9/2022, by Arcadis. Monitoring on 7/26/2022. MW-1, less than 3 BTEX, 1.5 MTBE. MW-2, less than 3 BTEX, 2.9 MTBE. MW-3, 2,060 BTEX, 110 MTBE. MW-4, abandoned 7/2007. MW-5, 4.4 BTEX, 3.0 MTBE. MW-6, not sampled annually. MW-7, well not sampled since 1/2005. MW-8, well abandoned 1/2007. MW-8A, 32.3 BTEX, ND MTBE. MW-9, well abandoned 4/2006. MW-10, sampled annually. MW-11, sampled annually. MW-12, Buried, No access. MW-12A, less than 3 BTEX, ND MTBE. MW-13, Buried, No Access. MW-14, 3.9 BTEX, ND MTBE. MW-15, 7.1 BTEX, 5.6 MTBE. MW-16, not sampled due to damaged well casing. MW-17, 167 BTEX, 36.1 MTBE. MW-18, 52.9 BTEX, 3.2 MTBE. MW-19, 13.8 BTEX, ND MTBE. MW-22, less than 3 BTEX, less than 1 MTBE. MW-23, less than 3 BTEX, less than 1 MTBE. MW-24, 137 BTEX, 60.1 MTBE. DPE-1, 2,680 BTEX, 23.7 MTBE. DPE-2, 441 BTEX, 7.4 MTBE. 6/15/2023 - Feng - email to Matt Watson of Arcadis. Matt, I reviewed the spill closure request. Elevated BTEX concentrations were still detected in MW-3 (5,237ug/L) and DPE-1 (4,738 ug/L) for the 10/2022 monitoring. My impression is that the BTEX was about 1,000-2,000 ug/L when I discussed with Sahithi. Please continue to monitor to see if the concentration goes down and stable. Table 3 showed that the influent sampling of the last DPE event indicating there are still recovery of BTEX, and TPH. Please consider to implement the DPE events again if the BTEX concentration remains. Let me know if there is any questions. 10/10/2023 - Feng - Monitoring

DEC Memo:	3/20/19-Zhune spoke to Mark Hewes. Mark sent the following email-On 3/18/2019 I received DEC inspection Report to determine Hewes Service Station Facility(PBS# 2-337900) compliance with New York State's PBS regulations. Spill was observed in under dispenser containment. I reported Spill (# (1812462) on March 20, 2019.To correct the above, prevent further spills, investigate the source and cause of the spill, licensed contractor Alvin Petroleum Systems, Inc. has been contracted by Hewes Service Station. For preliminary check 2 technician was at the Station on March 19, 2019; found traces of petroleum at the pump 5-6's pan. Alvin Petroleum technician's team will arrive to the site on Friday, March 22, 2019 to start the job to bring Hewes Service Station into compliance. After completing the job Contractor will submit necessary documents to DEC. Sincerely 03/28/19 - Lakhani Pumps 5 and 6 were leaking diesel from the meter. The meters

GAS STATION (Continued) **S123662032**

were replaced on 03/27/19. The
leak was stopped and the spill was contained and cleaned. 03/29/19 - Lakhani Alvin Petroleum
Systems checked all (4) dispenser pans. They found (3) dispenser pans clean. They found the
dispenser pan where the #5/6 dispenser is located had a small amount of diesel. They found a slight
leak on the meter and tightened up bolts. They also found a slight
leak on the union on #5. Alvin
replaced the union and found no leaks. They cleaned up the dispenser pan. Alvin was called back on
03/27 on the meter on #5 leaking again. They replaced the meter and cleaned the pan. Spill is
closed.

Remarks: discovered during inspection

DER Facility ID:	177715
DEC Memo:	8/26/15 - Obligado - Follow up on this line test failure. I spoke with TJ Connolly who said it was a product line between a dispenser and a 6000 gallon diesel tank. He has not yet been retained to do the repairs or retest. I called Steve 614-593-2736 at Business Brinks and left a message to call back the DEC. According to the PBS #2-034401, the site has 4 4000 gallon diesel tanks. Mail correspondence - Brinks Incorporated 652 Kent Avenue Brooklyn, NY 11211 718-260-2195 Site Owner First Jefferson 24 West 57 Street, STE 504 NY, NY 10019 I also called the Site Contacts - Gary Raff 917-939-1571. I left a message to call back the DEC. or 718-260-2195. Steve Boroski - steve.borkoski@brinksinc.com garry.raff@brinksinc.com Tank has been taken out of service. Steve Boroski - steve.borkoski@brinksinc.com 614-593-2736 Scott - sein2woh.com 8/22/16-Scott Fein sent the following email Ms. Zhune, the Company has retained a consultant and is evaluating, contact the NYCFD authorization to proceed and is evaluating remedial options. I will keep you apprised of all developments. If you have any questions, please contact me. Thank you. 12/16/16-Scott sent the following email Ms. Zhune, in order to fully comp0let the project (remediation and tank decommissioning) the Company is required to obtain several permits from the NYCFD. WE hope to have the permits within the next six weeks. 4/25/18-Scott sent the following email Ms. Zhune, in response to your question, an overview follows. Brink s transports and safeguards currency and negotiable instruments in New York City. A secure facility was constructed for Brink s in Brooklyn to allow Brink s armored trucks to unload cash and negotiable instruments. Since security measures prevent armored trucks from being fueled outside the facility, two diesel dispensing pumps were installed inside the facility when the facility was first constructed. Each dispensing pump is (was) connected by a narrow underground pipe to an underground diesel storage tanks located immediately exterior to the building. At some point there was a pressure fluctuation in one of the underground pipes connected to one of the two diesel dispensers inside the facility. The pressure fluctuation was detected by the facility s Veeder-Root pressure monitoring system. As soon as the pressure fluctuation was detected, the dispenser was shut down and oil no longer flowed from the pipe that triggered the Veeder-Root system. The pressure fluctuation was

PRIVATE RESIDENCE (Continued) **U003074285**

promptly reported to NYSDEC and the FDNY. In an effort to identify the issue, the exterior tanks were tightness was tested by a state certified consultant (the tanks held pressure and passed the test). The facility then contacted the FDNY and NYC agencies and sought authorization to, (i) remove the exterior tanks and underground pipes and, (ii) allow a fuel company to fuel trucks inside the building from a mobile tank truck operated by Diesel Direct, a third-party vendor. Internal fueling of armored truck would obviate the need for underground tanks, interior dispensers and underground pipes, which for environmental reasons was desirable. FDNY advised that interior fueling would require an FDNY issued variance. A variance application was submitted to the FDNY. Over the past seven months in furtherance of the variance application, FDNY inspected the facility several times, and sought a considerable volume of information including engineering plans. Two weeks ago, FDNY advised that justification for a variance was not sufficient and a variance would not issue. The facility has decided after obtaining the necessary permit to have the exterior underground tanks and all associated piping completely removed in and outside the facility (and of course any remediation conducted subject to NYSDEC supervision) and, proceed with an alternate fueling process for its armored vehicles. We anticipate that the existing tanks and piping will be removed within the next two months. In the event there is evidence of a release, remediation will be conducted by a certified environmental consultant, and overseen by Tenen Environmental Consulting and NYSDEC. We will keep you apprised of all progress. If you have any questions, please contact me. 1/10/2019 - Feng - Duty Desk. Received spill 18-10357 at the same site reported by Tenen Environmental. Spoke to Kristin Meisner of Tenen Environmental. They have filed a pre-work notification to DEC PBS unit for tanks and piping closure and removal. Today they exposed the piping and found there was minor stain underneath the piping and had PID reading, so they reported the spill. There are (4) 4,000-gallon diesel USTs located in the parking lot and the piping are running to inside of the building. They haven’t exposed the USTs yet. They have already flushed the pipes and the tanks, so no product right now. The tanks have been in services since 1985. No pre-classification soil samples have been done. Unsure if there was any other investigation has been done. Sometime next week they will start the tank removal process. They plan to overexcavate the soil and will collect soil endpoint samples. No plan for installation of new tanks, and no plan to develop the site. Kristin Meisner Tenen Environmental 646-606-2332 Ext. 104 KMeisner@Tenen-Env.com Searched database and found spill 15-05623 which was reported for line test failure. Briefed to and discussed with Veronica Zhune. The two spills will be consolidated under the old spill 15-05623. 5/14/19-Kristin Meisner from Tenen Environmental emailed the Spill and Tank Closure report dated 5/14/19. Based on the above tank closure activities, remedial activities and the results of the post remedial soil and groundwater samples, Tenen concludes the fallowing: . Four 4,000-gallon diesel USTs and two dispensers were properly decommissioned, accessible piping was removed and a portion of the underground piping was abandoned in place. . Petroleum impacted soil in the area of the dispensers was removed and disposed off-site; . All VOCs in soil were below the commercial Use SCOs and only one 1,2,3trichlorobenzene, was detected above the protection of groundwater SCOs; this compound was not detected in groundwater above the AWQS; . All SVOCs in soil are related to historic fill material;

PRIVATE RESIDENCE (Continued) **U003074285**

. All VOCs in groundwater were below the AWQS with the exception of five components at low concentrations that are associated with degraded petroleum releases; and, . two SVOCs in groundwater above the AWQS are not releated to a petroleum release. Spill Closed.

Remarks: failed line test - repair and retest clean up pending

Contact Name:	KRISTIN MEISNER
DEC Memo:	1/10/2019 - Feng - Duty Desk. Spoke to Kristin Meisner of Tenen Environmental. They have filed a pre-work notification to DEC PBS unit for tanks and piping closure and removal. Today they exposed the piping and found there was minor stain underneath the piping and had PID reading, so they reported the spill. There are (4) 4,000-gallon diesel USTs located in the parking lot and the piping are running to inside of the building. They haven't exposed the USTs yet. They have already flushed the pipes and the tanks, so no product right now. The tanks have been in services since 1985. No pre-classification soil samples have been done. Unsure if there was any other investigation has been done. Sometime next week they will start the tank removal process. They plan to overexcavate the soil and will collect soil endpoint samples. No plan for installation of new tanks, and no plan to develop the site. Kristin Meisner Tenen Environmental 646-606-2332 Ext. 104 KMeisner@Tenen-Env.com Searched database and found spill 15-05623 which was reported for line test failure. Briefed to and discussed with Veronica Zhune. The two spills will be consolidated under the old spill 15-05623.
Remarks:	active tank pull - "they've been flushed"

Contact Name:	CHAN MILLER
DEC Memo:	1/26/2016 - Feng - email from BP Nick Onufrak to DEC Vought and Feng Hello June and Jeff, We received a call from the tenant of 33 Hewes Street, Brooklyn NY. A Mr. Miller (847.538.9294) contacted Antea Group, by way of the neighboring gas station 677-87 Kent Avenue, Brooklyn NY when he observed what he believed to be fuel oil in the basement of the building. As 677-87 Kent Avenue is the location of active NYSDEC case number 00-09318, he was concerned whether the material in his basement was attributed to that open case. We ve been out to his property, gauged the nearby wells, screened the rooms with a PID, and we collected a few samples of the material, which have been sent to a lab for forensic analysis. NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retails station. Based on an overall absence of the elevated PID readings that would accompany gasoline-range hydrocarbons, and absent this update forensics data, we have yet to find a link between this material and the open spill number. Note that the current owner/operator of the retail station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might be able to further understand its origin. We thought you should be aware of this. Please give me a call with any questions. We ll let you know more as this develops. DEC Feng spoke to Mr. Chan Miller (347-538-9294) at 35 Hewes Street. The building is used as a Jewish elementary school. About 1 month ago, he found oil in his basement. His basement is about 15'x 15'

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

and the oil was about 1-2 inches in depth flooded in the basement. He contacted BP and BP responded
to the incident Wednesday last week. Between the incident and the time BP came, Mr. Miller had some
guy from a lab took a few samples on 1/7/2016 and lab results show it is fuel oil/diesel/#2 oil.
The basement is used for boiler room and sprinkler system. There are sumps/drain/sewage in the
basement. He and his people cleaned up the basement today with mops and wipes. There is no
smell/odor in the basement or the entire building. There is no tank at all for this building. He is
in the school during the day 9:00am to 4:00pm if inspection is needed. Discussed with J. Vought and
sent email to BP Nick Onufrak and Antea Gorup Chris Meyer Nick and Chris, I just spoke with the
owner, Mr. Chan Miller (347-538-9294). He stated that there was 1 to 2 inches of oil in his
basement which is used for boiler room and sprinkler system. He indicated that the building is used
for elementary school. He stated that there were no vapors in the basement or in the entire
building. The basement was cleaned up by Mr. Miller and his people today with mops and wipes. As
the site is an elementary school, we want to ensure timely investigation/remediation. We are
sending a responder, possibly Kumar Patel (copied above, 646-201-1488) tomorrow for a site
inspection. Please let us know the schedule to monitor and clean up the basement. If possible,
please have the current tenant/owner provide the tightness test data for the 6,000-gallon fuel oil
UST at the location of the BP retail station. Please provide the forensic sampling report as soon
as it is available. We are also be discussing this site with our PBS unit who may visit the BP
station as well to ensure all is in working order. email to K. Patel the PBS record, 2013
inspection report and the 4Q2015 monitoring report of the BP station at 677-87 Kent Ave for
tomorrow's inspection. 1/27/2016 - As per J. Vought, spill 15-10501 is added into UIS for 35 Hewes
Street, Brooklyn. Conference call among Nick Onufrak of BP, Kumar Patel, Jeff Vought and June Feng.
K. Patel stated that during this inspection this morning he did not see any oil drops. The basement
is filled with sewage smell. The building kitchen is in the area and he suspected that is the
kitchen grease trap. Mr. Miller will hire a plumber to check the sewage system. Nick has concern
regarding the old abandoned USTs that near the school area but could not be removed due to
structural integrity. Nick shall have the forensic report by Friday and he will share that with DEC
as soon as it becomes available. email from Kumar Patel to DEC Vought and Feng I inspected site 35
Hewes Street this morning and met Mr. Miller. We walked through dining

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

area and kitchen on first
floor on our way to the basement. No petroleum odors noted in dining area or kitchen, but noted
sewage/grease trap odors at the basement hatch which is inside the kitchen area. Found water on
basement floor with strong sewage kind smell. No sign of petroleum product (sheen or odors) noted
in the basement. Mr. Miller confirmed absence of petroleum odors in the building. Based on field
observations, recommended him to have grease and sewer trap checked by a plumber. email to NYSDOH
and NYCDOH Dear Mike, Nathan, and Chris, On 1/26/2016, we received an email from BP and their
consultant, Antea Group, stating that they had been contacted by a tenant of 35 Hewes Street who
had observed fuel oil in the basement of their building. The building is used as a Jewish
elementary school. BP and Antea Group is managing a long term petroleum remediation project of
gasoline contamination associated with an active BP gas station located at 677-87 Kent Ave which is
immediately adjacent to 35 Hewes Street. Antea Group has gauged nearby monitoring wells at the BP
station, screened 35 Hewes Street with PID meter, and collected product samples from 35 Hewes
Street for forensic analysis. Antea Group noted that they had not found to date that they were the
source of the seepage but still intended to clean up the basement for further inspection of the
possible seepage source. We spoke with the school representative who noted that there were no odors
in the basement or the entire building. According to BP, the forensic report shall be available
this Friday. Kumar Patel from our Unit inspected the site this morning and met with the school
representative. He noted no petroleum odor but did note sewage/grease trap odors at the basement
hatch which is inside the kitchen area. Water on the basement floor was found with strong sewage
smell. No sign of petroleum product (sheen or odors) were noted in the basement. The school
representative also confirmed the absence of petroleum odors in the building during his inspection.
Kumar recommended the school have the grease and sewer trap be checked by a plumber and the
representative agreed to have it performed. Kumar noted the address on the building is 35 Hewes
Street. I checked the NYCDOB database and alternative addresses for this location included 33-39
Hewes Street, 35 Hewes Street and 671 Kent Ave. I also checked ACRIS and the address in the deed
and mortgage agreement is 33 Hewes Street. Let us know if you have any questions/comments, need
additional information, or think a NYCDOH inspection is warranted Thank you as always, 1/27/2016 -
email from Nathan Walz June So we aren t sure if it was fuel oil or really gasoline that was

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

observed in the basement? Does the school heat with fuel oil, if so any signs of a leak from a tank located on school property? From a petroleum stand point it doesn t sound like there is a need for NYCDOH inspection since there are no odors that have been reported by any of the involved parties. Kumar Was there a strong odor of sewage or sewer gas thru out the building or only in the basement, just wondering if it was affecting where the students were? Thanks Nate email from K. Patel to N. Walz I did not notice oil tank in basement and strong sewer smell was in basement only. Hiralkumar Patel email from J. Feng to N. Walz Nathan, When I spoke to the school rep yesterday, he stated that they do not have any tanks at all for the building. I searched the PBS records, nothing was found for this location. BP/Antea indicated that they have collected samples when they responded to the incident. The sampling report shall be ready by this Friday, by then we may be able to confirm the type of material in the basement. Thank you, Email from N. Walz Okay thanks, think we should be all set unless there is a complaint from the school email from M. Hughes I spoke with Chris a short time ago, he has not seen these emails, tied up with other issues, but thinks this may be worth reporting to DEP and/or City DOH due to sewer odors. He will check email later and forward as appropriate. Allan out today and tomorrow. 1/28/2016 - email from Chris D'Andrea of NYCDOH Sewer gas odors may be handled by DEP or our Public Health Engineering Program (I copied the director Li Lily Huang). Occupants can call 311 to register a complaint and it will be routed to the appropriate group. -chris DEC Feng called Mr. Miller of the school (347-538-9294) and let him know that, as per NYCDOH's email, sewer gas odors may be handled by DEP or NYCDOH's Public Health Engineering Program. He shall call 311 to file a complaint and DEP/NYCDOH shall handle the complaint from there. Feng also advise Mr. Miller that the sampling report by BP shall be ready this Friday and will be shared with him when it becomes available. 1/29/2016 - received and reviewed Hydrocarbon Fingerprint Analysis and Evaluation Report, dated 1/28/2016, submitted by Antea Group. 3 product samples GS-D, GS-L and GS-M were collected and sent to Torkelson Geochemistry, Inc for fingerprint analysis. All 3 samples are most likely a moderately weathered middle distillate, either diesel fuel or fuel oil that was released 6+/-2 or 7+/-2 years ago. DEC Feng called Mr. Miller, the school rep and informed him the results of the fingerprint that the samples BP collected are most likely weathered diesel fuel or fuel oil. He confirmed again there is no smell in the building this morning, the sewer has been done, there

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

is no more water/oil in the
basement, no wetness/seepage in the walls. I asked him to call me if there is any water/oil
returned and smell in the building. 2/2/2016 - email from Chris D'Andrea It does not appear that
there was or is a fuel oil odor at this site or any visual evidence of a spill. I am unclear on the
meaning of these results. What was tested and a what levels was petroleum found? Are these simply
trace levels that might be found in any NYC building that has or has historically used fuel oil to
heat? Based on previous site visits, I don t see the need to inspect this location for fuel oil
impacts. -chris Email from Mike Hughes The analysis is a chromatographic scan of three water
samples I assume were taken from the basement, perhaps when sewer and/or gw was entering the
basement. The chromatogram only provides a qualitative summary of the VOCs in the water. Based on
the presence of C9 and higher aliphatic compounds the analyst thinks it is weathered fuel
oil/kerosene. Our lab performs similar analysis but is often able to quantify the results. The
presence of these aliphatic compounds do often result in odor complaints. The answer to your
question that these might be found in any building that has heated with fuel oil is yes, however,
our background study demonstrated what levels of petroleum vocs may be present that do not result
in odors, hence our use of the background study for comparison. In this case odors were reported in
the past suggesting petroleum contamination The lack of odors now seems to coincide with the
mitigation of water penetration into the basement suggesting that the source of the odors was
contaminated gw. In the end we would concur that a site visit by your office is not necessary at
this time. June coordinated with the school to have them report any future odors/problems. If we
need to discuss further let me know. Mike. email from Chris D'Andrea Thanks for the clarification
Mike. No need for further discussion, let us know if you need any future assistance with this site.
Thanks, Chris Email from Feng to all Thank you Mike for your prompt response. Just to clarify,
according to the school rep, Mr. Miller, there were no odors in the basement or the building during
the entire course of this incident. When Kumar Patel inspected the school the day after we were
notified, he confirmed there was sewage smell at the basement hatch which is inside the kitchen
area. The water on the basement floor was also found with strong sewage smell. Last Friday I spoke
with Mr. Miller again and he confirmed the sewer problem was checked/fixed by a plumber, there was
no water/oil in the basement and there was no wetness/seepage in the walls. He stated again that

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

there was no smell in the building. I would like to confirm that DEC should not require further
action at 35 Hewes Street unless water/oil returns to the school basement or any odor complaints
are reported. DEC will continue to direct BP on the remediation of the adjacent BP station site
spill (Spill 00-09318). Thank you again, email from Mike Hughes with no objection Thanks,
correction noted! 3/28/2016 - Feng - Discussed with J. Vought. Feng talked to Mr. Chan Miller
(347-538-9294), the school representative. He said everything is fine, nothing happened since the
last time we talked. Feng advised him to call the DEC hotline 1-800-457-7362 if anything happens
instead of calling me because I will on leave. As per J. Vought. The oily water has been cleaned
up. DEC has inspected the site and no re-occurrence of the returning of water. DOHs has no further
concerns. No further action is required at this time. Spill is closed in the database.

Remarks: 1/26/2016 - Email from BP Nick Onufrak to DEC Vought and Feng Hello June and Jeff, We received a call from the tenant of 33 Hewes Street, Brooklyn NY. A Mr. Miller (847.538.9294) contacted Antea Group, by way of the neighboring gas station 677-87 Kent Avenue, Brooklyn NY when he observed what he believed to be fuel oil in the basement of the building. As 677-87 Kent Avenue is the location of active NYSDEC case number 00-09318, he was concerned whether the material in his basement was attributed to that open case. We ve been out to his property, gauged the nearby wells, screened the rooms with a PID, and we collected a few samples of the material, which have been sent to a lab for forensic analysis. NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retails station. Based on an overall absence of the elevated PID readings that would accompany gasoline-range hydrocarbons, and absent this update forensics data, we have yet to find a link between this material and the open spill number. Note that the current owner/operator of the retail station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might be able to further understand its origin. We thought you should be aware of this. Please give me a call with any questions. We ll let you know more as this develops.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	e2mis no 154769 Brindisi found 3 qts unknown oil on 500 gallons water. Sample taken. Clean up pending test results. Lab Sequence Number: 04-06255-001: Aroclor 1260 < 1.0 ppm 8 Aug 04 This incident has not been completed to date because of access. The Manhole is located on an on-ramp to the Brooklyn Queens Expressway (BQE). Cars accelerate at this location as they go up the ramp. Doing this job at night will not help, because the cars only go faster. This job is also complicated by the fact that a large crane is currently parked on the shoulder of the ramp which further restricts traffic. Update: 8/30/04 - 0740 for MH 74032 F/O 66 Williamsburg St East (Incident #154769): The crane and construction material has been moved from this sight. An Environmental Crew sucked out the debris and water from the manhole, on the night of 29 Aug 04, before filling up their truck. The Crew will return to the location this evening. The environmental tag remains in place. UPDATE: 31-AUG-2004 0426HRS B BROWN AS PER E-MAIL Update for F/O 66 E Williamsburg St. (Inc #154769): MH 74032 was double washed with Biogen 760. The sump was found sealed. The environmental tag was pulled.
Remarks:	3 QRTS UNKNOWN OIL ON 500 GALLONS OF WATER. NO TO ALL 5 QUESTIONS. LAB RESULTS LESS THAN 1 PPM. COMING OFF 24 HOUR PROGRAM DUE TO NOT HAVING ACCESS TO MANHOLE. CON ED REF # 154769.

Tank Info:

Tank Number:	001
Tank ID:	42518
Tank Status:	In Service
Material Name:	In Service
Capacity Gallons:	4000
Install Date:	09/01/1992
Date Tank Closed:	Not reported
Registered:	True
Tank Location:	Underground
Tank Type:	Concrete
Material Code:	0009
Common Name of Substance:	Gasoline

Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Pipe Model:	Not reported
Modified By:	MJGRIFFI
Last Modified:	05/09/2022

Equipment Records:

B02 - Tank External Protection - Original Sacrificial Anode
D02 - Pipe Type - Galvanized Steel
J01 - Dispenser - Pressurized Dispenser
G04 - Tank Secondary Containment - Double-Walled (Underground)
L07 - Piping Leak Detection - Pressurized Piping Leak Detector
F02 - Pipe External Protection - Original Sacrificial Anode

WILLIAMSBURG SERVICE (Continued) **U000412114**

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
C02 - Pipe Location - Underground/On-ground
E00 - Piping Secondary Containment - None
K01 - Spill Prevention - Catch Basin
I02 - Overfill - High Level Alarm
H05 - Tank Leak Detection - In-Tank System (ATG)

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

TAYLOR WYTHE HOUSES -NYCHA (Continued) **S102399504**

mentions that Site Assessment
Report is available. Must inquire about report. - SK 07/07/06: NYCHA summary states that a site
assessment is available, but not what kind or the date. NYCHA recommends the Department review this
assessment. - SK 02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann. 06/05/17: J.Kann
- GSIP for investigation at this site was approved in 2016. As per NYCHA at May 31, 2017 meeting,
contractor has been selected for this work and will start work in summer 2017. Spill reassigned to
Andre Obligado. 9/19/18 - Obligado - I reviewed the Phase II investigation report. 4 soil borings
were advanced around the tanks. All soil samples were below CP-51 unrestricted clean up levels.
Groundwater was not encountered during geoprobe work. This spill does not appear to be a threat to
human health or the environment. Spill closed.

Remarks: CONTAMINATED SOIL FOUND WHILE REMOVING TANK. UTB WILL BE CLEANING IT UP. MOHAN SHARMA IS UTB CONTACT AT (516) 326-1160. There are two 20,000 gallon USTs at this site both installed in 1974. One failed tightness testing on 10/8/97, and had been taken out of service.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 001
Tank Id: 10960

TRUST MOTORS, INC. (Continued) **A100300653**

Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: Not reported
Capacity Gallons: 3000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MJGRIFFI
Last Modified: 05/09/2022
Material Name: #2 fuel oil (on-site consumption)

Tank Number: NEW
Tank Id: 229985
Material Code: 0022
Common Name of Substance: Waste Oil/Used Oil

Equipment Records:

J02 - Dispenser - Suction Dispenser
E00 - Piping Secondary Containment - None
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
G10 - Tank Secondary Containment - Impervious Underlayment
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
I01 - Overfill - Float Vent Valve
G01 - Tank Secondary Containment - Diking (Aboveground)
C01 - Pipe Location - Aboveground

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 09/11/1989
Capacity Gallons: 250

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Historic Generators:
Receive Date: 20160226
Handler Name: CON EDISON - MANHOLE 14244
Federal Waste Generator Description: Large Quantity Generator
State District Owner: Ny
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20150225
Handler Name: CON EDISON
Federal Waste Generator Description: Large Quantity Generator
State District Owner: Ny
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20150225
Handler Name: CON EDISON
Federal Waste Generator Description: Not a generator, verified
State District Owner: Ny

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
