Record Upd:	11/13/2012
Updated By:	BXANDERS
Site Description:	Location: Naval Station - Brooklyn is located in a flat industrial area within the New York Naval Shipyard in the Williamsburg section

NAVAL STATION-BROOKLYN, TRANSFORMER AREA (Continued) **S105586295**

of Brooklyn, north of Flushing Avenue, between Clinton Avenue and Williamsburg Place. Site Features: The East River is 1500 feet west of the site. There are two working electrical substations at the site which have three transformers employing dielectric fluid which formerly contained PCBs. Each of the substations is contained within an area surrounded by concrete walls. They are located in the northern portion of the property, adjacent to the property line. Current Zoning/Use(s): Industrial Historic Use(s): A 1987 Phase I investigation showed that the PCB content of the dielectric fluid in the transformers ranged from 250 to 590 parts per million (ppm). Transformer spills stained slabs and soil located beneath the transformers, with soil contamination ranging from 0.5 to 870 ppm. The PCB containing transformers were subsequently retro-filled. Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State.

Env Problem:	Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the location in a walled transformer yard beneath the crushed stone site cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None
Health Problem:	Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access.

Control Code: N
Control Type: INST
Dt record added: 06/22/2011
Dt rec updated: 10/17/2011
Updated By: JBSWARTO
Site Code: 55915
Site Description: Location: Naval Station - Brooklyn is located in a flat industrial area within the New York Naval Shipyard in the Williamsburg section of Brooklyn, north of Flushing Avenue, between Clinton Avenue and Williamsburg Place. Site Features: The East River is 1500 feet west of the site. There are two working electrical substations at the site which have three transformers employing dielectric fluid which formerly contained PCBs. Each of the substations is contained within an area surrounded by concrete walls. They are located in the northern portion of the property, adjacent to the property line. Current Zoning/Use(s): Industrial Historic Use(s): A 1987 Phase I investigation showed that the PCB content of the dielectric fluid in the transformers ranged from 250 to 590 parts per million (ppm). Transformer spills stained slabs and soil located beneath the transformers, with soil contamination ranging from 0.5 to 870 ppm. The PCB containing transformers were subsequently retro-filled. Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the

NAVAL STATION-BROOKLYN, TRANSFORMER AREA (Continued) **S105586295**

groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State.

Env Problem: Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the location in a walled transformer yard beneath the crushed stone site cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None

Health Problem: Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S113402002**

HW Code:	C224172
SWIS:	2401
Town:	New York City
Record Added Date:	01/25/2013
Record Updated Date:	08/15/2023
Update By:	SMQUANDT
Site Description:	Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills.
Health Problem:	People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings.

Date Record Added:	12/03/2014
Date Rec Updated:	08/03/2020
Updated By:	LSZINOMA
Site Description:	Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot.

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

	The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills.
Health Problem:	People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings.

Updated By: LSZINOMA
Site Code: 478229
Site Description: Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills.

Health Problem: People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings.

Name: FORMER ARKANSAS COMPANY, INC. SITE
Address: 74 WALLABOUT STREET
City,State,Zip: BROOKLYN, NY 11211
Site Code: 478229
Control Name: Landuse Restriction
HW Code: C224172
Control Code: 25
Control Type: INST
Dt record added: 12/03/2014
Dt rec updated: 08/03/2020
Updated By: LSZINOMA
Site Code: 478229
Site Description: Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills.
Health Problem: People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination.

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings.

DEC Memo:	12/19/2012-Potential BCP candidate. Subsurface investigation is being done to collect more data for BCP application.Andy Lockwood from P.W Grosser indicated that they had a prequalification meeting with DEC BCP few weeks ago. Andy Lockwood will send the report to VZ.(sr) 03/25/13-Zhune called amd spoke to Andy Lockwood from PW Grocery Consult 631-589-6353. He said they submitted the aplication to Brownfield program. They will know by Apri 10, 2013 weather or not they are going to be accepted. 06/13/13 Jonathan Greco sent the following email: The referenced spill site at 74 Wallabout Street in Brooklyn has been accepted into the Brownfield Cleanup Program as site #C224172. With your permission, I would like to reference this in the DEC Remarks section of the UIS and change myself to the project manager for the spill site. 07/09/14 The source of the spill has been determined to be a leaking UST located on the western portion of the site. The UST and free product located on-site will be addressed under the BCP (Site Code C224172). Off-site remediation of the floating product is at least being partially remedied by the BCP Volunteer, but it is expected that their efforts will not fully resolve the off-site issue, and further work may be conducted by the State and/or the RP under the Spills program following completion of the BCP. 11/7/14 On-site work has been completed and site construction is underway. Though bailing of product was conducted at two wells on many occassions, product is still present. Any further actions will be undertaken under Spills program. (Greco 11/7/14) 4/4/16 - Callout to determine off-site extent and address product off-site to be done FY 2016/17. 09/18/17-Hiralkumar Patel. DEC Austin assigned this case for remediation of off-site groundwater

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

impact from a BCP site.
10/27/17-Hiralkumar Patel. searched current and former tax lot maps and noted that the subject site
was on Block #: 2261 / Lot #: 1. the subject site was owned by B.C.G. Sales, Inc. from July 1977 to
Aug. 2012. alternate address: 74-88 Wallabout Street, 743-755 Kent Ave, 377-391 Flushing Ave PBS #:
2-612240. as per PBS record, the site had nine (9) 1,000 gal diesel USTs, removed in Jan. 2014. but
as per reports included in BCP file, PBS application was submitted to register following tanks: -
seven (7) 1,000 gal diesel USTs - one (1) 550 gal gasoline UST - one (1) 3,000 gal #2 oil UST other
spill # 0307065 was reported on 10/04/2003 due to discharge of natural gas line condensate as old
gas main punctured during installation of a new gas line. case closed. summary of available
investigation reports from BCP #: C224172: 1) Phase I Environmental Site Assessment Report dated
10/12/2006: - review of available Sanborn maps did not indicate the presence of any buried tanks on
the subject site - the subject site was utilized in the past by a bakery shop, a soap company, a
wood working company, a lumber company, a shelving company, a chemical company, a paint and varnish
manufacturing company, a rope manufacturing company, a plastic processing company, a cleaner
industries company and warehouse and household chemical distributing company - in 2006, there were
four (4) possible fill ports noticed inside the northern portion of the warehouse area on the main
floor of the building - in 2006, there was a capped fill port and a vent pipe noticed along the
western exterior wall of the building. according to the property owner, the capped fill port and
the vent pipe were associated with an AST that was removed from the building in the past - in 2006,
there was a hydraulic elevator motor noticed inside the northern portion of the warehouse area on
the main floor of the building. there was hydraulic oil staining and speedi dry noticed in the
vicinity of the hydraulic elevator motor 2) Supplemental Phase II Environmental Site Assessment
dated Jan. 2013: - review of historical Sanborn map performed as part of Phase I ESA indicated that
two gasoline UST existed inside the building ---------- Phase I report states that no buried tanks
were noted on Sanborn maps - a limited Phase II investigation was conducted in northern half of the
site in Jan. 2007 - in Dec. 2006, a geophysical survey was conducted. GPR profiles collected within
northeast corner of the building appeared to be consistent with the size and shape of six (6) 550
gal USTs. additionally, six vent lines (connected to the suspected USTs) were located on the
northeast corner of the building - in Dec. 2006, eight (8) soil borings (SB-1 through SB-8) were

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

installed in the vicinity of the suspected USTs on the northeast corner of the building, in the storage area and the asphalt parking lot - boring SB-1 was installed to 6 ft bg where fuel oil odors were detected and refusal encountered - boring SB-2 was installed to 16 ft bg - boring SB-3, SB-4 and SB-6 were installed to 12 ft bg - boring SB-5 and SB-7 were installed to 5 ft bg where refusal encountered - boring SB-8 was installed to 6 ft bg, where slight odors were detected and refusal encountered - one soil sample was collected from each boring, except borings SB-5 and SB-7 (as per table 1, samples were collected from depths between 6 and 11 inches, boring logs suggest that samples may have collected from depths between 6 and 11 ft) ---------- - in Jan. 2007, groundwater samples (GW-1, GW-2 and GW-3) were collected from borings SB-2, SB-3 and SB-4 (11-13 ft bg) ---------- - no contamination found in soil or groundwater samples collected in Dec. 2006 - supplemental Phase II investigation was conducted in Dec. 2012 - in Dec. 2012, eight (8) soil borings (SB009 through SB016) were installed - shallow soils, ranging from 0-8 ft bg were characterized as mostly non-native, historic fill material consisting of brown silty sands. deeper soils, ranging from 8-20 ft bg were characterized as mostly gray, low-plasticity, silty clay ---------- - petroleum like odor was observed in soil from SB009 (4-16 ft), SB014 (0-12 ft), SB015 (0-12 ft) and SB016 (0-12 ft) - visual staining was observed in soils from SB016 (8-12 ft) - in Dec. 2012, two groundwater samples (GW011 and GW013) were collected - in Dec. 2012, three (3) 2-in monitoring wells (MW001, MW002 and MW003) were installed with 10 ft of screen. screens were set 7 ft into and 3 ft above the water table at the time of installation - approx. 1 ft of LNAPL, similar to gasoline, was detected and observed in MW002, located on the southwestern corner of the site ------ - groundwater samples were collected from two wells MW001 and MW003 - in Dec. 2012, three soil vapor samples were collected - no contamination found in soil, groundwater or soil vapor samples - well MW002 was installed near boring SB009 where strong petroleum odors were noted below 8 ft depth - as per well logs, screen in wells MW001 and MW003 were installed below water table 3) Progress Report No. 3 dated 02/27/2014: - nine USTs were removed between 01/08/14 and 01/21/14 - as per tank removal affidavit dated 01/16/14, total of eight (8) 1,000 gal #2 oil USTs and one (1) 3,000 gal #6 oil UST were removed, but as per PBS application dated 05/20/14 shows seven (7) 1,000 gal diesel USTs, one (1) 550 gal gasoline UST and one (1) 3,000 gal #2 oil UST - the seven (7) 1,000 gal USTs were in group located in northeast corner of the site -

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

the 550 gasoline UST was
located along northern property line in western portion of the site -
the 3,000 gal (#2 or #6 oil)
UST was located in west-central portion of the site - 3,060 gal of
residual liquid and 14 drums of
tank bottoms removed - total of 21 endpoint samples (EP001 to EP 021)
were collected from northeast
corner of the site where 7 USTs were located in group - four endpoint
sidewall samples were
collected from location of tank #8 (gasoline UST - SW005 to SW008) and
tank #9 (#2 or #6 oil UST -
SW001 to SW004) - all samples were collected at 6 ft depth - no
contamination found in endpoint
samples, but detection limits were high for sidewall sample SW004
which was taken from west
sidewall of #2/#6 oil tank excavation 4) Remedial Investigation Report
dated 04/30/14: - a
geophysical survey conducted on 07/09/13 - due to reinforced concrete,
suspect tanks could not be
confirmed within eastern interior of the building - cut and capped
fill/vent lines were noted on
west exterior wall. there was no indication that the lines went
beneath the building slab and were
likely connected to an AST at one time - an anomaly consistent with a
UST was located in the north
parking lot perpendicular to the sidewalk of Wallabout street (tank #
8) - on 08/28/13, during
removal of the former buildings concrete foundation, one additional
anomaly (tank #9) was
identified in the southwestern portion of the property ----------
- total of fifteen (15) pits
and one concrete vault were identified - fourteen of the fifteen pits
were determined to have
concrete walls and bottoms - FD016 was determined to have and earthen
bottom - several of the
structures appeared to discharge into the large concrete vault and
several of the structures were
piped in the direction of the municipal sewer system - seven (7) soil
borings (SB017 through SB023)
were installed to a depth of 16 ft bg - shallow soils, ranging from 0
to 8 ft bg were characterized
as mostly non-native, historic fill material consisting of brown silty
sands. deeper soils, ranging
from 8 to 15 ft bg were characterized as mostly gray, low-plasticity,
silty clay - no contamination
noted in soil samples - four (4) 2-in observation wells (OB001 through
OB004), with 10 ft of
screen, were installed to determine horizontal extent of LNAPL in the
vicinity of MW002 - two (2)
2-in monitoring wells (MW004 and MW005), with 10 ft of screen, were
installed - based on well
gauging results, groundwater beneath the site flows towards the
west-northwest
---------- - groundwater samples were collected from
three temporary groundwater
sampling points (SB020, SB021 and SB022), two monitoring wells (MW004
and MW005) and one

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

observation well (OB003) - on 09/18/13, LNAPL found in two monitoring wells and three observations
wells - source of LNAPL is likely related to UST identified in the southwest portion of the
property - no contamination noted in groundwater samples - four (4) soil vapor sampling points
(SV004 through SV007) were installed - found Benzene (821 ug/m3) and TCE (143 ug/m3) in soil-vapor
samples product thickness on 09/18/13: MW002------2.48 ft MW005------4.95 ft OB001------4.91 ft
OB002------sheen OB004------0.02 ft 5) Site Management Plan dated Dec. 2014: - nine USTs were
removed - seven USTs (Tank 1 through 7) were identified within a subsurface concrete encasement in
the northeast corner of the property - Tank 8 was located in the northwest corner (as per site map,
tank was along northern property line in western portion) of the property and found to be encased
in concrete --------- - Tank 9 was located in southwest corner (as per site map, tank was in
west-central portion) of the property ---------- - the USTs were found to be in poor
condition with corrosion holes visually observed in Tanks # 4, 6 and 9 ranging in size up to 1/2
inch in diameter - groundwater was encountered beneath Tank #8 and 9 and LNAPL was visually
observed on the water table - there was no signs of petroleum impact beneath the northeast tanks -
since there was no evidence of a discharge and there was no groundwater beneath the USTs in the
northeast corner of the property, discrete center line soil samples were collected from beneath the
former location of the USTs (total 21 samples) - since there was evidence of a discharge and
groundwater was encountered beneath Tank # 8 and 9, sidewall samples were collected (total 8
samples) - soils were excavated to a minimum depth of 10 ft bg within the footprint of the proposed
building - soils were excavated to 8 ft bg in the portion of the site to be used for the future
school expansion ---------- - LNAPL removed through dewatering and VEFR events - LNAPL
migration mitigated through the use of the steel sheeting installed at the property's perimeter
---------- - installed a vapor barrier/water proofing membrane under the building's
foundation as per Final Engineering Report/Construction Completion Report dated 12/10/14, total of
18,900 gal of LNAPL/groundwater was removed from (excavation and wells) the site. DEC issued a
Certificate of Completion on 12/23/14. Andy Lockwood PW Grosser **BCP consultant** Ph. (631)

LLC. **property
owners/developers** review of Phase I report (dated 10/12/2006), Supplemental Phase II ESA (dated
January 2013) and RIR (dated 04/30/2014) suggests that presence of heating oil (#2 or #6) UST in
west-central portion of the site was not known until removal of former building concrete
foundation. ---------- phase I report from Middleton Env. mentioned that review of available
Sanborn Fire Insurance Maps did not indicate the presence of any buried tanks on the subject site.
but site history section of supplemental Phase II report from PWGC states that a review of
historical Sanborn Fire Insurance Map performed as part of the Phase I ESA indicated that two
gasoline underground storage tank (UST) existed inside the building.
========== 1:57 PM:-
spoke with Andy at PW Grosser and inquired him about well gauging data. Andy believes that off-site
wells were free of product after on-site remediation/dewatering and all wells have been closed. he
will send documents for review. 2:33 PM:- received email from DEC Forster including daily reports
07/23/14 to 09/1/14. 3:08 PM:- received email from Ryan Morley (ryanm@pwgrosser.com) including two
daily reports (both dated 09/16/14)and a site map (dated 09/18/13). both daily reports have same
date (09/16/14) at top, bottom of pages include different dates (09/16/14 and 09/17/14). Ryan
mentioned that last two gauging events occurred in Sep. 2014 before work was completed in Dec.
2014. product thickness (in ft): ----------OB004------MW005

09/17/14----------0.02-------0.81 10/30/17-Hiralkumar Patel. 8:54 AM:-
spoke with Andy. he
confirmed that daily reports submitted on 10/27/17 are from two different days and last well
gauging occurred in Sept. 2014. 11/01/17-Hiralkumar Patel. received email from Ryan Morley (at 1:41
PM on 10/31/17) from PW Grosser stating that wells MW005, OB003 and OB004 are currently viable at
the site. 11/13/17-Hiralkumar Patel. 4:08 PM:- sent email to Jennifer Lawrence at Environmental
Assessment & Remediation including a standby contractor authorization form for gauging of three
existing off-site wells, removal of any LNAPL found, sampling of

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

groundwater for VOC/SVOC analyses
and report preparation/submission. asked Jennifer to schedule well gauging work. 4:21 PM:- sent
email to Melissa Hass at TestAmerica including a standby contractor authorization form for VOC/SVOC
and fingerprint analyses of groundwater/product samples.
11/15/17-Hiralkumar Patel. 12:21 PM:-
received email from Jennifer. she mentioned that Erin Quell will be managing this project, and well
gauging has been scheduled for tomorrow. 11/16/17-Hiralkumar Patel.
12:30 PM:- visited site with
DEC Lin and met Michael Ford (EAR technician). three monitoring wells (MW005, OB003 and OB004) were
gauged and found product in well MW005. product thickness could not be found due to it's viscosity.
product samples have been collected for waste
characterization/fingerprint analyses. 1:11 PM:-
spoke with Erin. based on field observations, asked Erin to schedule three weekly VEFRing followed
by well regauging. also asked her to replace damaged well cap (OB003) and well cover plate (MW005).
Erin mentioned that weekly VEFRing will be scheduled after receiving product sample results.
12/01/17-Hiralkumar Patel. 9:31 AM:- received email from Erin including waste characterization
sample results. report did not include result of fingerprint analysis.
12/06/17-Hiralkumar Patel.
11:14 AM:- received email from Erin. she mentioned that first VEFRing will occur tomorrow by Island
Pump and Tank. 12/07/17-Hiralkuamr Patel. 9:46 AM:- received call from Erin. she mentioned that
vacuum truck is in area, but could not remove product from the impacted well due to parked
vehicles. asked Erin to have crew wait for sometime and pump out well if parking space become
available. also asked her about result of fingerprint analysis and replacement of damaged well
cap/cover. Erin mentioned that product sample collected on 11/16/17 was not analyzed for
fingerprinting. she will check with on-site tech and ask to collect product sample today, if
necessary tools are available, otherwise product sample will be collected next time. she will also
schedule well repair during next visit. 12:30 PM:- received call form Erin. she mentioned that crew
was able to remove product from well MW-5. crew used interface probe capable of gauging thick
product and noted 6.5 ft product in the well prior to pump out. crew conducted multiple pump outs
with approx. 15 minutes intervals in-between and gauged well between pump outs. total of 6 pump
outs were conducted. at the end, 0.4 ft of product noted in the well. asked Erin to schedule next
pump out in afternoon on 12/14/17. 1:13 PM:- left message in general mail box at Rabsky
Development, entity listed as owner in DOB permit application filed on 06/19/13. Rabsky Development

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

**owner listed in DOB application submitted in 2013. 505 Flushing Avenue Brooklyn, NY 11205 Attn.:
Simon Dushinsky / Raphael Ph. (718) 246-4762 email:
rabskygroup@thejnet.com 1:22 PM:- sent email to
Erin and asked her to schedule next pump in afternoon on 12/14/17.
also asked her to collect
product sample for fingerprint analysis and repair damaged wells
during next pump out. email copied
to Jennifer. 12/08/17-Hiralkumar Patel. 9:52 AM:- spoke with Sam
(347-761-2185), building super and
requested assistance to reserve some parking spots near well MW5 on
12/14/17. Top Quality
Management **building management** 199 Lee Avenue #286 Brooklyn, NY
11211 Attn.: Esty **property
manager** Ph. (718) 522-6582 Ext. 103 10:02 AM:- spoke with Erin. she
confirmed next pump out on
12/14/17. 3:38 PM:- received email from Erin including data tables
summarizing groundwater gauging
data and VEFRing event on 12/07/17. Erin mentioned that manhole covers
can not be secured because
the tabs have been broken of the rings and they have to replace the
entire manhole to fix it.
12/12/17-Hiralkumar Patel. 2:56 PM:- approved invoice (# 46288085)
from TestAmerica for waste
characterization analysis. 12/14/17-Hiralkumar Patel. 1:40 PM:-
received message from Erin. 1:42
PM:- spoke with Erin. she mentioned that 2.8 ft of product was noted
in well MW005 at beginning.
product sample has been collected for fingerprint analysis. the well
was vacuumed out for about 30
minutes. crew has been gauging well for 40 minutes after pump out and
found no more product
accumulation. asked Erin not to continue pump out today and to
schedule weekly pump out until
further notice. 12/15/17-Hiralkumar Patel. 3:07 PM:- received email
from Erin including updated
table summarizing data collected to date. 12/21/17-Hiralkumar Patel.
1:10 PM:- received call from
Erin. Island Pump gauged wells and found 1.41 ft product in well
MW005. after VEFRring for 45
minutes, no more product noted in the well. based on decreased amount
of product in the well, next
VEFRring will occur after two weeks. 12/27/17-Hiralkumar Patel. 9:25
AM:- received email from Erin
including updated table summarizing data collected to date. she
mentioned that Island Pump will be
at site at noon on 01/04/18. 12/28/17-Hiralkumar Patel. 1:25 PM:-
received email from Erin
including fingerprint result. lab report indicates that sample
contained a petroleum product within
most closely resembles degraded #4 oil. ----------
01/03/18-Hiralkumar Patel. 1:45 PM:- received
call from Erin. she mentioned that tomorrow's VEFR event has been
cancelled due to snow forecast.
01/08/18-Hiralkumar Patel. 1:24 PM:- received email from Erin stating
that next vacuum event has
been scheduled for 01/11/18. 01/10/18-Hiralkumar Patel. 1:38 PM:-

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

approved invoice (# 46289471)
from TestAmerica for fingerprint analysis. 01/11/18-Hiralkumar Patel. 12:15 PM:- visited site and
met Mike (EAR). on-site wells were gauged and found 0.75 ft of product in well MW-5. well MW-5 was
VEFRred for approx. 30 minutes. no product noted in well when re-gauged 15 minutes after VEFRring.
well MW-5 will be VEFRred again today. 2:03 PM:- received call from Erin. asked her to continue
weekly VEFRring. 01/16/18-Hiralkumar Patel. received email from Erin (at 4:17 PM on 01/15/18)
including updated table summarizing data collected to date. next gauging will occur on 01/18/18.
01/22/18-Hiralkumar Patel. 12:59 PM:- received call from Erin. 0.75 ft of product was found in well
MW-5 prior to VEFRing on 01/18/18. after 45 minutes of VEFRing, well was recharged with 0.05 ft of
product. 01/25/18-Hiralkumar Patel. received email from Erin (at 9:57 AM on 01/24/18) including
updated table summarizing data collected to date. 02/01/18-Hiralkumar Patel. 1:37 PM:- received
call from Erin. she mentioned that crew from EAR and Island Pump responded were on-site to gauge
and VEFR the well. EAR technician noted upto 0.47 ft of product in the well at the beginning. no
product was noted in the well 15 minutes after first round of VEFRring. Erin mentioned that towards
the end of work, an another vehicle struck the vacuum truck. driver of the other vehicle tried to
escape after the accident. no-one was hurt in the accident, but the vacuum truck was damaged and
need to be towed. Erin also mentioned that crew had to park vacuum truck in the 'no parking' zone
due to parking issues near the well location. 1:44 PM:- spoke with DEC Karen Quinn who handles
contract payments. informed Karen about accident at the site and damaged vacuum truck. 1:56 PM:-
approved invoice (# 121292-121299) from EAR for work performed (project review, well
gauging/product recovery, and lab coordination) between 11/14/17 and 11/30/17. 02/09/18-Hiralkumar
Patel. 9:49 AM:- approved invoice (# 121685-121704) from EAR for work performed (project review,
well gauging/product recovery, and coordination) between 12/01/17 and 12/31/17. 02/12/18-Hiralkuamr
Patel. 9:46 AM:- sent email to Erin and Jennifer including a revised standby contractor
authorization form. 1:23 PM:- received email from Erin stating that next well gauging/VEFRring will
occur on 04/14/18. 02/14/18-Hiralkumar Patel. 10:10 AM:- received email from Erin including
groundwater gauging data table. 12:33 PM:- received call from Erin. she mentioned that wells at the
site will not be gauged today as crew working at another site. asked Erin to gauge/VEFR wells next
week. 03/05/18-Hiralkumar Patel. 12:44 PM:- approved invoice (# 122366-122379) from EAR for work

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

performed (project review, well gauging/product recovery, and coordination) between 01/01/18 and
01/31/18. 03/14/18-Hiralkumar Patel. 3:11 PM:- received email from Erin stating that well
gauging/VEFRing will occur tomorrow. 03/22/18-Hiralkumar Patel. received email from Erin (at 11:56
AM on 03/21/18). VAC event scheduled for today has been cancelled due to weather.
03/30/18-Hiralkumar Patel. 10:59 AM:- received email from Erin including well gauging data table.
0.48 ft of product noted in well MW-5 on 03/29/18. 04/02/18-Hiralkumar Patel. discussed available
well gauging data with DEC Austin. due to continuous accumulation of product in well MW-5, he asked
to review available reports under BCP # C224172 to find details about soil profile and
site-specific groundwater flow direction. based on review of available on-site investigation data,
more monitoring well(s) may be needed downgradient of the site. 04/03/18-Hiralkumar Patel. 12:09
PM:- spoke with Erin and asked to hold future well gauging/VEFRing activities until further notice.
04/05/18-Hiralkumar Patel. 2:38 PM:- approved invoice (# 123114-123127) from EAR for work performed
(project review, well gauging/product recovery, and coordination) between 2/1/18 and 2/28/18.
05/10/18-Hiralkumar Patel. 9:18 AM:- approved invoice (# 123783-123802) from EAR for work performed
(project review, well gauging/product recovery, coordination and waste disposal) between 02/21/18
to 03/30/18. 2:33 PM:- sent email to Erin including revised standby contractor authorization form.
06/11/18-Hiralkumar Patel. 10:56 AM:- approved invoice (# 124479-124486) from EAR for project
review/coordination between 04/01/18 and 04/30/18. 06/19/18-Hiralkumar Patel. review of available
reports indicates presence of degraded #4 oil in monitoring well MW005 which is located
down-gradient of former on-site heating oil tank #9. there is conflicting info about grade of fuel
oil stored in tank #9: tank removal affidavit shows storage f #6 oil, but PBS application shows
storage of #2 oil. 9:58 AM:- sent email to Erin and asked her to schedule well gauging/VEFRring
(last gauging was three months ago on 03/29/18). 06/28/18-Hiralkumar Patel. 12:50 PM:- received
email from Erin. they gauged wells today and found approx. 1.2 ft of product in well MW-5.
06/29/18-Hiralkumar Patel. discussed with DEC Obligado. based on review of available information,
Obligado agreed with replacement of existing well MW-5 with a larger diameter well and passive
product recovery using absorbent socks. 07/02/18-Hiralkumar Patel. discussed with DEC Austin.
instead of expanding existing well MW-5, he asked to install three additional wells: one on east
sidewalk of Kent Ave and south of existing well MW-5, one on east

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

sidewalk on Kent Ave north of
existing well MW-5, and one on west sidewalk of Kent Ave down-gradient of existing well MW-5.
07/09/18-Hiralkumar Patel. 12:39 PM:- sent email to Erin including a site map with possible
off-site well location markings. 12:39 PM:- spoke with Erin. informed her that the department
requires off-site wells to further delineate groundwater impact. asked her to install 4 inch
diameter wells to a depth of at least 20 ft bg, with 15 ft of screen. as current PIN lab contracts
have expired and new contracts are being negotiated, asked Erin to install wells now only if they
can find lab as sub-contractor, otherwise wells should be installed once PIN lab contracts are
approved. informed her that soil must be screened and sampled (# of soil samples will depends of
field indication of impact) for 8260/8270 analysis. based on findings of product on groundwater,
either groundwater samples should be collected for 8260/8270 analyses or product sample should be
collected for fingerprint analysis. Erin mentioned that they may request for sidewalk closing
permit (if possible) due to parking issues in the area.
07/10/18-Hiralkumar Patel. received email
from Erin (at 4:31 PM on 07/09/18) summarizing off-site groundwater investigation discussed
yesterday. she inquired if groundwater from well development needs to be drummed. 9:11 AM:- spoke
with DEC Lisa Lewis about status on approval of lab contracts. she mentioned that lab contracts are
being reviewed and approval may occur in couple of months. 9:19 AM:- sent email to Erin and asked
her to proceed with off-site well installation as discussed yesterday. asked her to drum and
properly dispose groundwater from well development.
07/11/18-Hiralkumar Patel. 8:28 AM:- approved
invoice (# 125307-125308) from EAR for project review/coordination in May 2018. 08/17/18-Hiralkumar
Patel. 1:14 PM:- approved invoice (# 126103-126106) from EAR for project review/coordination/VEFR
in June 2018. 09/11/18-Hiralkumar Patel. 9:21 AM:- approved invoice (# 126789-126797) from EAR for
planning for additional well installation work. 10/05/18-Hiralkumar Patel. 2:11 PM:- approved
invoice (# 127774-127780) from EAR for disposal of contaminated water. (DEC Karen OKed typo in work
date on page # 18). 10/11/18-Hiralkumar Patel. 9:59 AM:- received call from Erin inquiring about
following: - need for trip blank/field blank: yes during new well installation - type of container
for VOC analysis: asked Erin to use simple glass jars for VOC analysis (any result less than 200
ppb will be flagged biased low) - # of product sample: product sample from each new well (if found)
and from one existing wells (to compare results between existing and new well) - need for TICs for

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

VOCs/SVOCs: no 10/12/18-Hiralkumar Patel. 10:17 AM:- sent email to Melissa at TestAmerica including
a revised standby contractor authorization form (due to a new contract #). 10/18/18-Hiralkumar
Patel. 12:16 PM:- sent email to Erin including a sidewalk permit request letter.
10/29/18-Hiralkumar Patel. 2:00 PM:- visited site and met Joy Sauer (516-983-6549) and crew from
ADT drilling. EAR completed well (MW-6) installation west side of Kent Ave. no high PID readings
were noted but some stained soil (not necessarily petroleum impacted) was noted below water table.
10/30/18-Hiralkumar Patel. 9:30 AM:- visited site and met Joy. at the time of inspection, crew was
installing well (MW-7) east side of Kent Ave, north of existing well MW-5. no PID readings were
noted until 7.5 ft bg, but noted more than 15,000 ppm on PID between 7.5 and 12.5 ft depth.
petroleum odors were noted in soil below 7.5 ft depth. asked Joy to collect multiple soil samples
(one above water table, one at groundwater interface and one towards end of boring) from each
boreholes. based on high PID readings during installation of well MW-7, inspected site 12 Franklin
Ave which is located up-gradient of well MW-5 and has oil tank. site 12 Franklin Ave has an AST on
saddles and no signs of spill noted from the tank. building representative mentioned that the tank
was installed prior to 1983. also inspected sump pit located in underground garage at the subject
site. the sump pit is located along Wallabout St (site's northern boundary), in central section. no
product/sheen was noted in the sump. no petroleum odors were noted in the garage. 1:07 PM:-
received call from Erin. she mentioned that crew completed drilling of the third well (MW-8) on
east side of Kent Ave, south of existing well MW-5. less than 300 ppm was recorded on PID in soil
below 7.5 ft depth, but free phase product was noted in soil. Erin mentioned that the PID meter was
recalibrated prior to installation of well MW-8. based on field observations and PID readings
during installation of MW-8, Erin suspects some sort of issue with PID meter during installation of
well MW-7 (meter read more than 15,000 ppm in soil in MW-7, but less than 300 ppm in soil in MW-8
even with free product in MW-8). based on available information, asked Erin for following: -
multiple soil samples from each boreholes (sampling depths were discussed based on PID values and
boring depth) - groundwater sample from all wells where no product noted - product sample from all
wells where noted - VEFRring of impacted wells next week
11/02/18-Hiralkumar Patel. received email
from Erin (at 6:06 PM on 10/31/18). she mentioned that EAR plans to return to the site the week of
November 12 for fingerprinting and groundwater sampling. the plan is

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

to gauge for DTW/DTP and
collect groundwater samples from OB003, OB004, MW005, MW006, MW007 and MW008. fingerprinting
samples will be collected from all wells with product. she inquired about well survey and
groundwater samples from wells with product. sent email to Erin (at 7:00 AM on 11/01/18) and
informed her that no need for well survey at this time, and not to collect groundwater samples from
wells with product. 11/14/18-Hiralkumar Patel. 12:42 PM:- received email from Erin. they gauged and
sampled on-site wells and noted product in well MW005 (1.75 ft) and sheen on purged water from
OB003 and OB004. 3:08 PM:- received email from Erin including result of soil samples collected
during installation of well MW006 (5-10 ft and 10-12.5 ft bg) on 10/29/18. no contamination noted
in soil samples from MW006. 3:13 PM:- received email from Erin including result of soil samples
collected during installation of wells MW007 and MW008. two soil samples were collected from both
wells. no contamination noted in soil samples except 1,600 ppb Benzene in soil sample from 5-7.5 ft
depth in MW008. 11/19/18-Hiralkumar Patel. 2:41 PM:- received email from TestAmerica including
result of product fingerprint analysis. product sample was collected from well MW005 on 11/08/18.
sample contained petroleum product which most closely resembles #6 fuel oil. 11/23/18-Hiralkumar
Patel. 2:49 PM:- approved invoice (# 128471-128476) from EAR for project coordination in Sept.
2018. 11/27/18-Hiralkumar Patel. 2:36 PM:- received email from Erin including result of groundwater
samples collected on 11/08/18. groundwater samples were collected from wells MW-X (blind duplicate
sample as per email from Erin dated 12/07/18), OB003, OB004, MW006, MW007 and MW008. minor
contamination noted in wells MW-X (1,033 ppb total BTEX) and OB003 (247 ppb total BTEX).
11/30/18-Hiralkumar Patel. 1:22 PM:- sent email to Erin including a revised standby contractor
authorization form with increased budget. 12/07/18-Hiralkumar Patel. 1:44 PM:- sent email to Erin.
asked her to gauge on-site wells (no product recovery at this time) and collect product sample, if
noted in wells other than MW005. also asked her to submit detailed logs (including
PID/visual/olfactory observations, soil type etc.) for recently installed monitoring wells. 1:57
PM:- approved invoice (# 129500-129517) from EAR for project coordination, mark-out and
installation of wells MW006/MW007/MW008. 12/11/18-Hiralkumar Patel. 11:34 AM:- received call from
Erin. she mentioned that technician went to site to gauge (no VEFRring) existing wells and noted
product in wells MW005 (2 ft), MW007 (0.03 ft) and MW008 (0.01 ft). as last VEFR occurred in June

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

2018, asked Erin to VEFR existing wells next week. 12/12/18-Hiralkumar Patel. 1:36 PM:- approved
invoice (# 4600006924M) from TestAmerica for analysis of soil samples collected during installation
of wells MW006/MW007/MW008 (10/29/18 and 10/30/18), product sample from MW005 (11/08/18) and
groundwater samples from existing wells (11/08/18).
12/13/18-Hiralkumar Patel. 11:12 AM:- spoke
with Erin. asked her to submit an update report, after next week's VEFR event, including summary of
work performed to date. 01/09/19-Hiralkumar Patel. 9:11 AM:- approved invoice (# 129959-129973)
from EAR for project coordination and groundwater/product sampling work conducted in month of Nov.
2018. 02/06/19-Hiralkumar Patel. 1:09 PM:- approved invoice (# 131267-131279) from EAR for report
preparation, well gauging and VEFRring conducted in month of Dec. 2018. 03/01/19-Hiralkumar Patel.
2:48 PM:- approved invoice (# 131833-131841) from EAR for report preparation. 03/15/19-Hiralkumar
Patel. received email from Joy (at 2:38 PM on 03/14/19) including site summary report. report
includes summary of field activities conducted between Nov. 2017 and Dec. 2018. groundwater purging
and field screening were not conducted on OB003, OB004 and MW005 due to sheen in well OB003/OB004
and measureable LNAPL in MW005. product sample from MW005 was collected for fingerprint analysis on
12/14/17 and 11/08/18. on 12/1/17, sample contained a petroleum product which most closely
resembles degraded #4 fuel oil. on 11/08/18, sample contained a petroleum product which most
closely resembles #6 fuel oil. silty clay was noted below 5 ft depth during installation of wells
MW006, MW007 and MW008. lab report shows higher VOC detection in duplicate groundwater sample
(MW-X: 1,033 ppb total BTEX) from well OB003 (247 ppb total BTEX). also, there was sheen noted on
groundwater sample from OB003. during well gauging and VEFRring in Dec. 2018, product was noted in
wells MW005 (1.5 to 2 ft), MW007 (0.03 to 0.13 ft) and MW008 (0.01 to 0.02 ft). 03/25/19-Hiralkumar
Patel. 10:14 AM:- sent email to Joy and asked her to schedule weekly vac events for four weeks,
beginning with first week of Apr. email copied to Jennifer and Robert. 04/11/19-Hiralkumar Patel.
10:25 AM:- approved invoice (# 132579-132588) from EAR for waste disposal and report
preparation/submission, conducted in month of Feb. 2019.
05/06/19-Hiralkuma Patel. representative
of property at 376-378 Flushing Ave (BCP #: C224264) submitted permit application for dewatering at
their site. site 376 Flushing Ave is located south of Flushing Ave, across the street from the
subject site (74 Wallabout St). the department staff (legal, spills and section A) discussed
proposed dewatering plans internally and with the applicant due to

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

possibility of migration of free
phase product noted on east side of Kent Ave (in wells MW005, MW007 and MW008). DEC legal issued a
letter on 05/03/19 to representative of 376 Flushing Ave with following comments (in reference to
free phase product at 74 Wallabout St): - the department will undertake all NAPL recovery and
vacuum recovery activities in existing well MW005 - the volunteer (BCP applicant for 376 Flushing
Ave) will install a sentinel monitoring well on north side of Flushing Ave approx. 75 ft east of
the corner of the new building constructed on the Former Arkansas Site (74 Wallabout St). the well
should be screened across the observed water table and should be constructed with at least 15 ft of
screen below the water table. the well should be 4 in. in dia. to allow for NAPL recovery if
necessary. - should NAPL be observed to have migrated into the sentinel well following the
initiation of dewatering on the site (376 Flushing Ave), the department will identify any specific
actions to abate or mitigate the movement of contamination, which shall be undertaken by the
volunteer (376 Flushing Ave) 05/13/19-Hiralkumar Patel. 7:57 AM:- approved invoice (#
133002-133007) from EAR for project review/coordination conducted in month of Mar. 2019.
05/15/19-Hiralkumar Patel. 11:56 AM:- received email from Joy including summary of well gauging/vac
event conducted on 04/04/19, 04/11/19, 04/18/19, 05/02/19 and 05/09/19. no gauging activities
occurred between 12/20/18 and 04/04/19. after Dec. 2018, product noted in wells MW005 (0.58 to 1.68
ft), MW007 (0.01 to 0.16 ft) and MW008 (0.03 to 0.58 ft). discussed available well gauging/product
recovery data with DEC Austin, and decided to continue monthly well gauging/VEFRring. 3:08 PM:-
sent email to Joy and asked her to continue monthly well gauging/vacuum recovery and data
submission until further notice. 06/05/19-Hiralkumar Patel. 8:48 AM:- received email from DEC Zheng
stating that sentinel well (under BCP #: C224264) will be installed on 06/07/19.
06/06/19-Hiralkumar Patel. 9:18 AM:- approved invoice (# 133932-133944) from EAR for project
coordination/VEFR conducted in month of Apr. 2019. 06/07/19-Hiralkumar Patel. 11:17 AM:- received
email from Joy including summary of well gauging/vac event conducted on 06/06/19. found product in
well MW005 (0.81 ft) and MW008 (0.04 ft). 07/05/19-Hiralkumar Patel. 12:51 PM:- approved invoice (#
134788-134802) from EAR for project coordination/VEFR conducted in month of May 2019.
08/26/19-Hiralkumar Patel. received email from Joy (at 2:06 PMon 08/05/19) including summary of
well gauging/vac event conducted on 07/11/19 and 08/01/19. on 07/11/19, product noted in wells

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

MW005 (0.93 ft), MW007 (0.31 ft) and MW008 (0.31 ft). on 08/01/19, product noted in wells MW005
(0.82 ft), MW007 (0.19 ft) and MW008 (0.16 ft). DEC Jane sent email (at 4:07 PM on 08/13/19) to Joy
approving weekly gauging of wells MW006, MW008, OB003 and OB004; in reference to dewatering
activities at adjacent BCP site (C224264). 9:34 AM:- approved invoice (# 135328-135337) from EAR
for project coordination/VEFR conducted in month of June 2019. 2:56 PM:- sent email to Joy and
asked her to gauge all monitoring wells weekly using interface probe. 08/30/19-Hiralkumar Patel.
2:33 PM:- received email from Joy including weekly gauging data for Aug. 2019. during weekly
gauging, all wells were gauged except MW005 and MW007. found product in well MW008 during all four
weekly gauging (between 0.16 and 0.29 ft). 09/03/19-Hiralkumar Patel. 9:40 AM:- spoke with Joy and
asked her to continue weekly gauging of all wells and monthly VAC of impacted wells.
09/10/19-Hiralkumar Patel. received email from Joy (at 4:52 PM on 09/09/19) including well gauging
data table/hydrographs. data suggests that wells OB-003, OB-004, MW-005 and MW-008 are being
influenced by the nearby dewatering. received email from Joy (at 5:09 PM on 09/09/19) including
well gauging data/VAC recovery summary. all wells were gauged on 09/05/19 and product was noted in
wells MW005 (1.10 ft), MW007 (0.61 ft) and MW008 (0.29 ft). product was recovered using vacuum from
three affected wells. 09/16/19-Hiralkumar Patel. received email from Joy (at 6:44 PM on 09/13/19)
including weekly well gauging data. all wells were gauged on 09/13/19 and product was noted in
wells MW005 (0.96 ft), MW007 (0.61 ft) and MW008 (0.26 ft). 9:28 AM:- approved invoice (#
136185-136193) from EAR for project coordination/VEFR conducted in month of July 2019.
09/23/19-Hiralkumar Patel. received email from Joy (at 6:14 PM on 09/20/19) including weekly well
gauging data. all wells were gauged on 09/20/19 and product was noted in wells MW005 (0.98 ft),
MW007 (0.59 ft) and MW008 (0.19 ft). Pat Benedetto EAR Ph. (631) 447-6400 Ext. 159 email:
benedetto@enviro-asmnt.com 10/03/19-Hiralkumar Patel. 2:58 PM:- received call from Pat. he
mentioned that they visited the site today for well gauging/VEFRing, but could only gauge the wells
due to parking issue. asked Pat to VEFR wells during next weekly event. 10/07/19-Hiralkumar Patel.
received email from Pat (at 4:01 PM on 10/04/19) including weekly gauging data. he mentioned that
wells MW006, MW007 and MW008 were removed from hydrographs as these wells were never surveyed and
casing elevations have not been established. all wells were gauged on 09/26/19 and 10/03/19. on
09/26/19, product was noted in wells MW005 (1.04 ft), MW007 (0.63 ft)

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

and MW008 (0.28 ft). on
10/03/19, product was noted in wells MW005 (0.05 ft), MW007 (0.60 ft) and MW008 (1.12 ft). 8:53
AM:- sent email to Pat and asked him to survey missing wells. email copied to Jennifer (EAR),
Robert (EAR), DEC O'Connell, DEC Zheng and DEC Martinkat.
10/10/19-Hiralkumar Patel. 10:01 AM:-
approved invoice (# 137125-137145) from EAR for project coordination/well gauging/VEFR conducted in
month of Aug. 2019. 10/24/19-Hiralkumar Patel. 2:59 PM:- received email from Pat including weekly
gauging data. all wells were gauged on 10/10/19 and 10/18/19. on 10/10/19, product was noted in
wells MW005 (1.04 ft), MW007 (1.12 ft) and MW008 (0.52 ft). on 10/18/19, product was noted in wells
MW005 (1.20 ft), MW007 (0.79 ft) and MW008 (0.13 ft).
10/31/19-Hiralkumar Patel. received email
from Pat (at 4:45 PM on 10/30/19) including weekly gauging data. all wells were gauged on 10/24/19
when product was noted in wells MW005 (1.49 ft), MW007 (0.86 ft) and MW008 (0.13 ft).
11/01/19-Hiralkumar Patel. received email from DEC Jane (at 3:43 PM on 10/31/19). she mentioned
that owner of site 347 Flushing Ave has applied for dewatering permit. as this site is not part of
BCP, Section A will not be monitoring dewatering activities at site 347 Flushing Ave which may
affect groundwater quality at 74 Wallabout St. site 347 Flushing Ave is approx. 425 ft west of site
74 Wallabout St. 11/12/19-Hiralkumar Patel. received email from Pat (at 4:10 PM on 11/07/19)
including weekly gauging data. all wells were gauged on 10/31/19 when product was noted in wells
MW005 (1.48 ft), MW007 (0.76 ft) and MW008 (0.26 ft). received email from DEC Caitlyn Nochols (at
1:23 PM on 11/08/19) including copy of dewatering permit (# 2-6101-01394/00001) for site 347
Flushing Ave. the permit requires: 1) installation of sentinel monitoring wells (4 inch diameter
wells with at least 15 ft of screen across the water table) on west side of Kent Ave, approx. 50
and 100 ft north of corner of Flushing Ave to monitor drawdown between 347 Flushing Ave and 74
Wallabout St 2) monitoring of water table elevation in wells prior to commencing dewatering
activities, and then daily during dewatering activities 3) weekly submission of groundwater
monitoring results 4) plan to abate or mitigate movement of contamination, if observed in sentinel
wells following initiation of dewatering 11/18/19-Hiralkumar Patel. received email from Pat (at
3:40 PM on 11/15/19) including weekly gauging data. all wells were gauged on 11/07/19 and 11/13/19.
on 11/07/19, product was noted in wells MW005 (1.32 ft), MW007 (0.76 ft) and MW008 (0.09 ft). on
11/13/19, product was noted in wells MW005 (1.28 ft), MW007 (0.78 ft) and MW008 (0.08 ft). 1:13

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

PM:- approved invoice (# 137660-137677) from EAR for project coordination/well gauging/VEFR conducted in month of Sept. 2019. 11/25/19-Hiralkumar Patel. 2:59 PM:- received email from Pat including weekly gauging data. all wells were gauged on 11/20/19 when product was noted in wells MW005 (1.59 ft), MW007 (1.21 ft) and MW008 (0.23 ft). 12/03/19-Hiralkumar Patel. received email from Pat (at 3:38 PM on 12/02/19) including weekly gauging data. all wells were gauged on 11/27/19 when product was noted in wells MW005 (2.34 ft), MW007 (1.01 ft) and MW008 (0.12 ft). 12/26/19-Hiralkumar Patel. 3:02 PM:- approved invoice (# 138437-138460) from EAR for project coordination/well gauging/VEFR conducted in month of Oct. 2019, and invoice from Island Pump & Tank for VEFR/disposal between 04/04/19 to 11/07/19. 01/13/20-Hiralkumar Patel. 9:32 AM:- approved invoice (# 139131-139152) from EAR for project coordination/well gauging/VEFR conducted in month of Nov. 2019. 01/16/20-Hiralkumar Patel. 3:24 PM:- received email from Pat including weekly gauging data collected in month of Dec. 2019. during four weekly gauging events, wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted between 1.46 to 1.74 ft in MW005, 1.05 to 1.06 ft in MW007, and 0.19 to 0.28 ft in MW008. 01/24/20-Hiralkumar Patel. 2:29 PM:- received email from Pat including well gauging and vacuum summary tables. wells MW005, MW007 and MW008 were vacuumed on 01/16/20. 01/30/20-Hiralkumar Patel. 3:25 PM:- received email from Pat including weekly gauging data collected in month of Jan. 2020. during four weekly gauging events, wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted between 1.18 to 1.89 ft in MW005, 0.61 to 1.57 ft in MW007 and 0.08 to 0.26 ft in MW008. 02/03/20-Hiralkumar Patel. 1:26 PM:- spoke with Mr. Brunner, representative of site 347 Flushing Ave. inquired him about status on installation of sentinel wells as part of dewatering permit (# 2-6101-01394/00001). he mentioned that the work has not begun yet and asked to contact Luzey Weiss who manages the site. Joseph Brunner Flushing Avenue Realty Holdings, LLC. Ph. (718) 302-2171 email: byd321@yahoo.com 1:28 PM:- spoke with Mr. Weiss. he mentioned that the sentinel wells have not been installed yet. asked him to provide contact details for the environmental contractor who will be managing well installation/monitoring. Luzey Weiss Ph. (718) 599-1105 Ext. 259 (347) 489-6234 email: luzey@empirebrooklyn.com 2:08 PM:- sent email to Mr. Weiss and asked to provide contact info for environmental contractor who will be installing/monitoring sentinel wells required under dewatering permit # 2-6101-01394/00001. email copied to Mr.

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

Brunner, Pat and DEC Atiqur
Rahman. 02/04/20-Hiralkumar Patel. 2:02 PM:- spoke with Ariel at AMC Engineering who may be
managing dewatering activities at 347 Flushing Ave. Ariel stated that piles being driven at 347
Flushing Ave and dewatering activities may not begin for another 2-3 months. 02/12/20-Hiralkumar
Patel. 1:45 PM:- approved invoice (# 139730-139748) from EAR for project coordination/well gauging
conducted in month of Dec. 2019. 02/13/20-Hiralkumar Patel. 1:46 PM:- received email from Pat
including weekly gauging data collected on 01/30/20 and 02/06/20 and summary of VEFR conducted on
02/06/20. well OB003 was inaccessible and OB004 was found dry. no product was noted in well MW006.
product was noted in well MW005 (0.94 and 0.85 ft), MW007 (0.33 and 1.04 ft) and MW008 (0.12 and
0.02 ft). 02/25/20-Hiralkumar Patel. received email from Pat (at 9:40 AM on 02/24/20) including
weekly gauging data collected on 02/12/20. well OB003 was inaccessible and OB004 was found dry. no
product was noted in well MW006. product was noted in well MW005 (0.60 ft), MW007 (0.50 ft) and
MW008 (0.03 ft). 03/04/20-Hiralkumar Patel. received email from Pat (at 4:27 PM on 03/03/20)
including weekly gauging data collected on 02/20/20 and 02/27/20. wells OB003 and OB004 were found
dry. no product was noted in well MW006. product was noted in well MW005 (0.92 and 0.96 ft), MW007
(0.67 and 0.71 ft) and MW008 (0.21 and 0.25 ft). 03/06/20-Hiralkumar Patel. 11:20 AM:- approved
invoice (# 140625-140648) from EAR for project coordination/well gauging conducted in month of Jan.
2020. 2:07 PM:- received email from Pat including weekly gauging data collected on 03/05/20. wells
OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005
(1.49 ft), MW007 (0.20 ft) and MW008 (0.15 ft). impacted wells were pumped out. 03/20/20-Hiralkumar
Patel. 12:35 PM:- received email from Pat including weekly gauging data collected on 03/11/20.
wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well
MW005 (1.09 ft), MW007 (0.31 ft) and MW008 (0.06 ft). 03/25/20-Hiralkumar Patel. received email
from Pat (at 4:41 PM on 03/24/20) including weekly gauging data collected on 03/19/20. wells OB003
and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005 (0.65
ft), MW007 (0.53 ft) and MW008 (0.12 ft). 03/30/20-Hiralkumar Patel. 3:20 PM:- received email from
Pat inquiring if they should continue well monitoring/VEFRring. 04/01/20-Hiralkumar Patel. 1:04
PM:- spoke with DEC Jane who mentioned that construction at nearby BCP site (376 Flushing Ave) is
considered essential as affordable housing building is being built at the site. as such, dewatering

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

at the BCP site will continue. 1:14 PM:- sent email to Pat and informed him that dewatering at BCP site will continue. as such, asked him to continue weekly well monitoring/monthly VEFRring, only if it is done as per applicable guidance in reference to COVID-19. email copied to DEC Jane, DEC Wendi, DEC Austin and Jennifer (EAR). 03/27/20-Hiralkumar Patel. 3:07 PM:- received email from Pat including weekly gauging data collected on 03/25/20. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005 (1.71 ft), MW007 (0.48 ft) and MW008 (0.05 ft). 04/15/20-Hiralkumar Patel. 2:15 PM:- received email from Pat including weekly gauging data collected on 04/03/20 and 04/09/20. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005 (0.89 ft and 0.92 ft), MW007 (0.42 ft and 0.29 ft) and MW008 (0.07 ft and 0.04 ft). 04/16/20-Hiralkumar Patel. 11:15 AM:- approved invoice (# 140775) from EAR for project coordination/well gauging conducted in month of Feb. 2020. 04/24/20-Hiralkumar Patel. 2:20 PM:- received email from Pat including weekly gauging data collected on 04/17/20 and 04/22/20. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005 (1.18 ft and 1.41 ft), MW007 (0.54 ft and 0.89 ft) and MW008 (0.03 ft and 0.16 ft). 05/04/20-Hiralkumar Patel. 2:22 PM:- received email from Pat including weekly gauging data collected on 04/29/20. well OB003 was inaccessible and OB004 was found dry. no product was noted in well MW006. product was noted in well MW005 (1.24 ft), MW007 (0.40 ft) and MW008 (0.03 ft). 05/08/20-Hiralkumar Patel. 2:10 PM:- received email from Pat including weekly gauging data collected on 05/06/20. well OB003 was inaccessible and OB004 was found dry. no product was noted in well MW006. product was noted in well MW005 (0.85 ft), MW007 (0.40 ft) and MW008 (0.03 ft). 05/11/20-Hiralkumar Patel. 12:02 PM:- approved invoice (# 140848) from EAR for project coordination/well gauging conducted in month of Mar. 2020. 05/15/20-Hiralkumar Patel. 2:03 PM:- received email from Pat including weekly gauging data collected on 05/14/20. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was noted in well MW005 (0.98 ft), MW007 (0.42 ft) and MW008 (0.06 ft). 05/27/20-Hiralkumar Patel. 1:41 PM:- received email from Pat including weekly gauging data collected on 05/21/20. no product was noted in wells OB003, OB004 and MW006. product was noted in well MW005 (0.13 ft), MW007 (0.71 ft) and MW008 (1.09 ft). 06/01/20-Hiralkumar Patel. 2:12 PM:- received call from Erin Quell from EAR. she mentioned that due to current COVID-19 situation and parking issues in the area, they

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

were not able to vacuum out
wells since 03/05/20. Erin inquired if they should call vacuum truck from Island during next visit.
suggested Erin to have EAR technician visit the site in morning to confirm parking availability for
the vacuum truck and then call the truck, if Island Pump can respond on short notice.
06/10/20-Hiralkumar Patel. 9:47 AM:- received email from Erin including weekly gauging data
collected on 05/28/20. well OB003 was not accessible due to garbage pile, well OB004 was found dry
and no product was noted in well MW006. product was noted in well MW005 (1.21 ft), MW007 (0.63 ft)
and MW008 (0.11 ft). 06/15/20-Hiralkumar Patel. 10:41 AM:- approved invoice (# 140914) from EAR for
project coordination/well gauging conducted in month of Apr. 2020.
07/07/20-Hiralkumar Patel. 2:36
PM:- received email from Erin including weekly gauging data collected on 06/05/20, 06/10/20,
06/18/20, 06/25/20 and 07/01/20. wells OB003 and OB004 were either found dry or no product. no
product was noted in well MW006. product was noted in well MW005 (between 0.80 and 1.39 ft), MW007
(between 0.27 and 1.04 ft) and MW008 (between 0.02 and 0.12 ft).
07/10/20-Hiralkumar Patel. 10:10
AM:- approved invoice (# 140981) from EAR for project coordination/well gauging conducted in month
of May 2020. 07/16/20-Hiralkumar Patel. 1:25 PM:- received email from Erin including weekly gauging
data collected on 07/09/20. well OB003 was not accessible. no product was noted in wells OB004 and
MW006. product was noted in well MW005 (1.30 ft), MW007 (0.85 ft) and MW008 (0.11 ft). Erin
mentioned that they were able to schedule a VAC event on 07/09/20, but did not VAC from MW008 due
to safety concerns. EAR technician had to repeatedly ask residents, including children, to leave
the vicinity of the work zone as they were just curious, but they were not adhering to social
distancing and kept trying to look into the wells while tech was working. 07/30/20-Hiralkumar
Patel. received email from Erin (at 4:28 PM on 07/29/20) including weekly gauging data collected on
07/15/20 and 07/21/20. no product was noted in wells OB003, OB004 and MW006. product found in well
MW005 (0.78 and 1.28 ft), MW007 (0.25 and 0.61 ft) and MW008 (0.05 and 0.07 ft).
08/13/20-Hiralkumar Patel. 10:40 AM:- approved invoice (# 141048) from EAR for project
coordination/well gauging conducted in month of June 2020.
08/06/20-Hiralkumar Patel. 9:36 AM:-
received email from Erin including weekly gauging data collected on 07/31/20. well OB003 was
inaccessible. no product was noted in wells OB004 and MW006. product found in well MW005 (1.11 ft),
MW007 (0.55 ft) and MW008 (0.13 ft). 08/06/20-Hiralkumar Patel. 3:18
PM:- received email from Erin

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

including weekly gauging data collected on 08/05/20 and 08/13/20. no product was noted in wells
OB003, OB004 and MW006. product found in well MW005 (1.11 ft both times), MW007 (0.48 and 0.88 ft)
and MW008 (0.05 and 0.10 ft). 08/24/20-Hiralkumar Patel. 1:06 PM:- received email from Erin
including a form requesting approval to use AB Env. (instead of Island Pump & Tank due to some
payment conflicts) as subcontractor for well vacuum events. 08/25/20-Hiralkumar Patel. received
email from Erin (at 5:00 PM on 08/24/20) including weekly gauging data collected on 08/19/20. no
product was noted in wells OB003, OB004 and MW006. product found in well MW005 (1.41 ft), MW007
(0.58 ft) and MW008 (0.09 ft). 08/27/20-Hiralkumar Patel. 12:42 PM:- sent email to Erin including
signed form authorizing use of AB Env. as subcontractor for well vacuum events. 09/01/20-Hiralkumar
Patel. 9:40 AM:- received email from Erin including weekly gauging data collected on 08/26/20. well
OB003 was inaccessible. no product was noted in wells OB004 and MW006. product found in well MW005
(1.34 ft), MW007 (0.49 ft) and MW008 (0.06 ft). Erin mentioned that they will be on-site tomorrow
(09/02/20) with AB Oil to conduct vacuum event. 09/04/20-Hiralkumar Patel. 10:15 AM:- received
email from Erin including weekly gauging/VEFRring data collected on 09/02/20. no product was noted
in wells OB003, OB004 and MW006. product found in well MW005 (0.68 ft), MW007 (1.43 ft) and MW008
(0.10 ft). 09/09/20-Hiralkumar Patel. 12:32 PM:- approved invoice (# 141112) from EAR for project
coordination/well gauging conducted in month of July 2020. 09/10/20-Hiralkumar Patel. 2:40 PM:-
received email from Erin including weekly gauging/VEFRring data collected on 09/09/20. no product
was noted in wells OB003, OB004 and MW006. product found in well MW005 (0.02 ft), MW007 (0.10 ft)
and MW008 (0.09 ft). 09/28/20-Hiralkumar Patel. 8:07 AM:- received email from Erin including weekly
gauging data collected on 09/17/20 and 09/23/20. no product was noted in wells OB003 (not
accessible on 09/17/20), OB004 and MW006. product found in well MW005 (0.76 and 1.52 ft), MW007
(0.26 and 0.72 ft) and MW008 (0.15 and 0.12 ft). 10/09/20-Hiralkumar Patel. 2:31 PM:- approved
invoice (# 141171) from EAR for project coordination/well gauging conducted in month of Aug. 2020.
10/14/20-Hiralkumar Patel. 11:56 AM:- received email from Erin including weekly gauging data
collected on 10/01/20 and 10/07/20. no product was noted in wells OB003 (not accessible on
10/07/20), OB004 and MW006. product found in well MW005 (0.57 and 0.51 ft), MW007 (0.31 and 0.25
ft) and MW008 (0.03 and 0.04 ft). wells were VEFRred on 10/07/20. 10/21/20-Hiralkumar Patel. 9:07
AM:- received email from Erin including weekly gauging data collected

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

on 10/14/20. well OB003 was
inaccessible. no product was noted in wells OB004 and MW006. product found in well MW005 (0.46 ft),
MW007 (0.18 ft) and MW008 (0.17 ft). 10/30/20-Hiralkumar Patel. 12:15 PM:- received email from Erin
including weekly gauging data collected on 10/21/20 and 10/28/20. well OB003 was inaccessible both
times due to garbage. no product was noted in wells OB004 and MW006. product found in well MW005
(0.48 and 0.22 ft), MW007 (0.24 and 0.53 ft) and MW008 (0.11 and 0.15 ft). 11/02/20-Hiralkumar
Patel. 2:26 PM:- DEC Jane forwarded email from Ariel Czemerinski of AMC Engineering regarding site
347 Flushing Ave. owner of site 347 Flushing Ave (which is approx. 425 ft west of the subject site)
applied for a dewatering permit. DEC Division of Permits issued the dewatering permit on 11/08/2019
with following condition: Additional Permit Conditions: The following activities will be completed
and monitoring implemented prior to beginning pumping operations and will continue until pumping
operations cease: A. Install Sentry Wells The applicant will install sentinel monitoring wells on
the west side of Kent Avenue approximately 50 feet and 100 feet north of the corner of Flushing
Avenue to monitor drawdown between 347 Flushing Avenue and the Former Arkansas Company, Inc. BCP
site. The wells should be screened across the observed water table and should be constructed with
at least 15 feet of screen below the observed water table. The wells should be 4 in diameter to
allow for NAPL recovery if necessary. Applicant will arrange for surveying of the well elevation in
the same datum as the existing wells. B. Daily Monitoring Using Sentry Wells: The applicant will
monitor the water table elevation in the monitoring well prior to commencing dewatering activities,
and then daily during dewatering activities. Monitoring results will be reported on a weekly basis
to: Hiralkumar Patel, NYSDEC Division of Environmental Remediation, Spill Response Section
hiralkumar.patel@dec.ny.gov C. Contingency Plan: Should NAPL be observed to have migrated into the
sentinel wells following the initiation of dewatering on the site, the Department will identify any
specific actions to abate or mitigate the movement of contamination, which shall be undertaken by
the applicant. Ariel stated that the driller attempted to install the sentry wells today
(11/02/20), but found a sewer pipe (which are not regularly marked up by the 811 service) along the
way. the sidewalk was marked out with electric and gas lines, many of which feed the buildings.
11/09/20-Hiralkumar Patel. 3:02 PM:- spoke with Ariel at AMC Eng. he stated that the driller tried
to install wells along the curb line. asked him to check site for possibility of well installation

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

closer to building on west sidewalk of Kent Ave. also asked him to provide their client's contact
info. 11/12/20-Hiralkumar Patel. received email from Erin (at 3:48 PM on 11/11/20) including weekly
gauging data collected on 11/04/20. wells OB003, OB004 and MW006 were not gauged. product found in
well MW005 (0.26 ft), MW007 (1.37 ft) and MW008 (0.19 ft). impacted wells were VEFRred on 11/04/20.
11/19/20-Hiralkumar Patel. received email from Ariel (at 7:02 PM on 11/18/20) including well logs.
two (2) 4-inch wells (MW-1 and MW-2) were installed (for dewatering at 347 Flushing Ave) to a depth
of 20.5 ft bg, with 15 ft of screen from 5.5-20.5 ft depth. 1:37 PM:- approved invoice (# 141233)
from EAR for project coordination/well gauging conducted in month of Sept. 2020. 1:57 PM:- sent
email to Ariel and asked him to submit scaled site map with well locations and well locations pics
(if available). 11/24/20-Hiralkumar Patel. 10:09 AM:- received email from Pat including weekly
gauging data collected on 11/11/20 and 11/16/20. no product was noted in wells OB003 (not
accessible on 11/16/20), OB004 and MW006. product was found in well MW005 (0.63 and 0.68 ft), MW007
(0.09 and 0.11 ft) and MW008 (0.07 and 0.14 ft). 12/01/20-Hiralkumar Patel. received email from
Ariel (at 3:47 PM on 11/30/20) including a well location map and daily log. two 4-inch wells (MWN
and MWS) were installed along west side of Kent Ave. both wells were gauged daily (except weekends)
since 11/17/20 and no product was found in both wells. wells MWS, MWN and MW-006 are located on
west sidewalk of Kent Ave. wells MWS and MWN were installed by AMC Engineering as part of
dewatering activities at site 347 Flushing Ave. well MW-006 was installed by EAR (DEC contractor)
as part of groundwater delineation for the subject site. from the northwest corner of the
intersection of Flushing Ave and Kent Ave, the well MWS is 43 ft north of the intersection corner,
well MWN is 102 ft north of the intersection corner and well MW-006 is approx. 162 ft north of the
intersection corner. groundwater was found around 8 ft bg in well MW-006, around 11 ft bg in MWN
and around 13 ft bg in MWS. 12/03/20-Hiralkumar Patel. 1:41 PM:- received email from Pat including
weekly gauging data collected on 11/25/20 and 12/02/20. well OB003 was not accessible both times
due to garbage. no product was noted in wells OB004 and MW006. product was found in well MW005
(0.68 and 0.48 ft), MW007 (0.26 and 0.09 ft) and MW008 (0.25 and 0.19 ft). 12/07/20-Hiralkumar
Patel. received email from Ariel (at 6:33 PM on 12/04/20) including daily well log for period
11/17/20 to 12/06/20. two wells MWN and MWS were gauged daily (except weekends) and no product was
found in both wells. 12/15/20-Hiralkumar Patel. 8:21 AM:- approved

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

invoice (# 141296) from EAR for
project coordination/well gauging conducted in month of Oct. 2020.
12/28/20-Hiralkumar Patel.
received email from Ariel (at 6:16 PM on 12/26/20) including daily
well log for period 12/06/20 to
12/25/20. two wells MWN and MWS were gauged daily (except weekends)
and no product was found in
both wells. 12/30/20-Hiralkumar Patel. 9:32 AM:- received email from
Erin including weekly gauging
data collected on 12/09/20. well OB003 was not accessible due to
garbage. no product was noted in
wells OB004 and MW006. product was found in well MW005 (0.69 ft),
MW007 (0.39 ft) and MW008 (0.27
ft). impacted wells were VEFRred on 12/09/20. 01/13/21-Hiralkumar
Patel. 1:55 PM:- approved invoice
(# 141369) from EAR for project coordination/well gauging conducted in
month of Nov. 2020.
01/05/21-Hiralkumar Patel. 1:14 PM:- received email from Erin
including weekly gauging data
collected on 12/23/20. well OB003 was not accessible due to garbage.
no product was noted in wells
OB004 and MW006. product was found in well MW005 (0.37 ft), MW007
(0.28 ft) and MW008 (0.18 ft).
01/11/21-Hiralkumar Patel. received email from Ariel (at 5:55 PM on
01/08/21) including daily well
log for period up to 01/06/21. two wells MWN and MWS were gauged daily
(except weekends) and no
product was found in both wells. 01/20/21-Hiralkumar Patel. 11:27 AM:-
received email from Erin
including weekly gauging data collected on 01/04/21 and 01/13/21. well
OB003 was not accessible on
01/04/21 due to garbage. no product was noted in wells OB003, OB004
and MW006. product was found in
well MW005 (0.49 and 0.55 ft), MW007 (0.25 and 0.43 ft) and MW008
(0.09 and 0.23 ft). impacted
wells were VEFRred on 01/13/21. 02/03/21-Hiralkumar Patel. 3:33 PM:-
received email from Erin
including weekly gauging data collected on 01/20/21. no product was
noted in wells OB003, OB004 and
MW006. product was found in well MW005 (0.36 ft), MW007 (0.14 ft) and
MW008 (0.07 ft).
02/08/21-Hiralkumar Patel. received email from Ariel (at 5:21 PM on
02/05/21) including daily well
log for period up to 02/05/21. two wells MWN and MWS were gauged daily
(except weekends) and no
product was found in both wells. 11:11 AM:- received email from Erin
including site pics. she
stated that they went to the site last week for gauging, but wells
were inaccessible due to snow
and thick layer of ice. she inquired if she can send two technicians
to the site to clear snow/ice
and gauge wells. she has postponed well VEFRring to next week.
02/09/21-Hiralkumar Patel. 12:43
PM:- received call from Erin inquiring about snow removal activity
under PIN contract. informed
Erin that inquiry about snow removal expense coverage under PIN
contract has been sent to contract

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

division in central office. asked Erin to suspend this week's well gauging activity and wait for
response from contract division regarding coverage of snow removal expense under PIN contract. DEC
Austin discussed snow removal expense with central office who confirmed that snow removal expense
will be covered as site access and maintenance would be part of the work. 2:09 PM:- sent email to
Erin and asked her to send technicians to the site to clear snow/ice to access monitoring wells.
asked her to gauge wells this week. email copied to Pat.
02/11/21-Hiralkumar Patel. 11:25 AM:-
approved invoice (# 141455) from EAR for project coordination/well gauging conducted in month of
Dec. 2020. 02/26/21-Hiralkumar Patel. 1:53 PM:- received email from Erin including weekly gauging
data collected on 01/27/21 and 02/12/21. well OB003 was not accessible on 02/12/21 due to garbage.
no product was noted in wells OB003, OB004 and MW006. no product was noted in well MW007 on
01/27/21. product was found in well MW005 (0.25 and 0.35 ft), MW007 (0.03 on 02/12/21) and MW008
(0.02 and 0.03 ft). 03/02/21-Hiralkumar Patel. received email from Erin (at 5:12 PM on 03/01/21)
including weekly gauging data collected on 02/17/21 and 02/24/21. well OB003 was inaccessible. no
product was noted in wells OB004 and MW006. product was found in well MW005 (0.54 and 0.28 ft),
MW007 (0.34 and 0.02 ft) and MW008 (0.47 and 0.01 ft). impacted wells were VEFRred on 02/17/21.
03/04/21-Hiralkumar Patel. 9:25 AM:- approved invoice (# 141525) from EAR for project
coordination/well gauging conducted in month of Jan. 2021.
04/09/21-Hiralkumar Patel. 9:48 AM:-
approved invoice (#141600) from EAR for project coordination/well gauging/VEFRring/snow removal
conducted in month of Feb. 2021. 03/22/21-Hiralkumar Patel. received email from Ariel (at 5:53 PM
on 03/19/21) including daily well log for period up to 03/17/21. two wells MWN and MWS were gauged
daily (except weekends) and no product was found in both wells. 03/29/21-Hiralkumar Patel. 1:09
PM:- received email from Erin including weekly gauging data collected on 03/03/21, 03/10/21 and
03/17/21. no product was noted in wells OB003, OB004 and MW006. product was found in well MW005
(0.31, 0.24 and 0.40 ft), MW007 (0.08, 0.19 and 0.28 ft) and MW008 (0.04 and 0 ft). impacted wells
were VEFRred on 03/17/21. 05/05/21-Hiralkumar Patel. received email from Erin (at 12:17 PM on
05/04/21) including weekly gauging data collected on 03/23/21, 03/29/21, 04/07/21, 04/14/21,
04/23/21 and 04/28/21. well OB003 was mostly inaccessible due to garbage. no product was noted in
wells OB004 (which was found dry during Apr. gauging events) and MW006. product was found in well
MW005 (0.19, 0.24, no data for 04/07, 1.09, 0.47 and 0.80 ft), MW007

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

(0.01, 0.03, trace, 0.48, 0.13
and 0.70 ft) and MW008 (trace, 0.02, trace, 0.08, 0.18 and 0.01 ft).
impacted wells were VEFRred on
04/23/21. 05/14/21-Hiralkumar Patel. 9:40 AM:- approved invoice
(#141672) from EAR for project
coordination/well gauging conducted in month of Mar. 2021.
05/24/21-Hiralkumar Patel. received
email from Weronika Patycka (at 5:00 PM on 05/21/21) from AMC Eng.
including daily well log for
period up to 05/21/21. two wells MWN and MWS were gauged daily (except
weekends) and no product was
found in both wells. Weronika Patycka AMC Engineering PH. (718)
545-0474 (718) 594-5841 email:
wpatycka1@amc-engineering.com 05/26/21-Hiralkumar Patel. received
email from Stephen Goetz (at 3:51
PM on 05/25/21) from EAR including weekly gauging data collected on
05/05/21, 05/12/21 and
05/19/21. well OB003 was found either dry or inaccessible due to
garbage. no product was noted in
wells OB004 (which was found dry in beginning of May) and MW006.
product was found in well MW005
(0.51, 1.15 and 0.50 ft), MW007 (0.29, 0.41 and 0.23 ft) and MW008
(0.01, 1.19 and 0.13 ft).
Stephen M. Goetz **new project manager** EAR PH. (631) 447-6400 Ext.
152 email:
goetz@enviro-asmnt.com 06/02/21-Hiralkumar Patel. received email from
Weronika (at 7:16 PM on
05/28/21) from AMC Eng. including daily well log for period up to
05/28/21. two wells MWN and MWS
were gauged daily (except weekends) and no product was found in both
wells. received email from
Steve (at 4:18 PM on 06/01/21) from EAR including weekly gauging data
collected on 05/25/21. wells
OB003 and OB004 were found dry. no product was noted in well MW006.
product was found in well MW005
(3.17 ft), MW007 (4.94 ft) and MW008 (1.47 ft) {- this high numbers
are due to technician's
misunderstanding.} impacted wells were VEFRred on 05/25/21. 10:35 AM:-
visited site and met Steve.
EAR crew had finished gauging wells prior to arrival to the site.
Steve mentioned that product was
found in only two wells: approx. 0.4 ft in MW5 and 0.18 ft in MW-7.
Steve also stated that high
product thickness noted during well gauging on 05/25/21 is actually
result of technician's
misunderstanding and not actual product thickness. Steve mentioned
that the next VEFRring will
occur in last week in June. asked him to schedule well
gauging/VEFRring in presence of DEC
personnel as may need to open/gauge two wells (MWN and MWS) on west
side of Kent Ave, installed by
AMC Eng. 12:24 PM:- sent email to Weronika requesting access to wells
MWN and MWS during well
gauging/VEFRring (possibly on 06/22/21). email copied to DEC Jane,
Steve, Ariel and
joel@empirebrooklyn.com. 06/03/21-Hiralkumar Patel. 10:48 AM:-
received email from Steve including

received email from Steve (at 5:55 PM on 07/09/21) including weekly gauging data collected on
07/08/21. well OB003 was inaccessible. well OB004 was found dry. no product was noted in well MW006
and MW008. product was found in well MW005 (0.37 ft) and MW007 (0.25 ft). 07/19/21-Hiralkumar
Patel. received email from Weronika (at 4:01 PM on 07/16/21) from AMC Eng. including daily well log
for period up to 07/16/21. no product was found in both wells MWN and MWS. 2:25 PM:- approved
invoice (#141810) from EAR for project coordination/well gauging conducted in month of May 2021.
07/19/21-Hiralkumar Patel. 12:13 PM:- received email from Steve including weekly gauging data
collected on 07/15/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and
MW008. product was found in well MW005 (0.41 ft) and MW007 (0.12 ft). Steve mentioned that an
absorbent sock was mistakenly placed in well MW007 which will be removed during next VEFRring
event. 07/26/21-Hiralkumar Patel. received email from Steve (at 5:55 PM on 07/23/21) including
weekly gauging data collected on 07/21/21. well OB003 was inaccessible. well OB004 was found dry.
no product was noted in well MW006 and MW008. product was found in well MW005 (0.66 ft). previously
placed absorbent sock was removed from well MW007, so product was not recorded in well MW007. well
MW005 was VEFRred on 07/21/21. 07/29/21-Hiralkumar Patel. received email from Steve (at 5:44 PM on
07/28/21) including weekly gauging data collected on 07/27/21. well OB003 was inaccessible. well
OB004 was found dry. no product was noted in well MW006 and MW008. product was found in well MW005
(0.37 ft) and MW007 (0.27 ft). 08/05/21-Hiralkumar Patel. received email from Steve (at 4:46 PM on
08/04/21) including weekly gauging data collected on 08/04/21. wells OB003 and OB004 were found
dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.60 ft) and
MW007 (0.32 ft). 08/06/21-Hiralkumar Patel. 2:02 PM:- received email from Weronika from AMC Eng.
including daily well log for period up to 08/06/21. no product was found in both wells MWN and MWS.
08/10/21-Hiralkumar Patel. 10:30 AM:- approved invoice (#141876) from EAR for project
coordination/well gauging conducted in month of June 2021.
08/17/21-Hiralkumar Patel. 1:24 PM:-
received email from Steve including weekly gauging data collected on 08/11/21. well OB003 was found
dry. no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.58 ft),
MW007 (0.27 ft) and MW008 (0.01). 08/20/21-Hiralkumar Patel. received email from Steve (at 5:23 PM

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

on 08/19/21) including weekly gauging data collected on 08/18/21. well OB003 and OB004 were found dry. no product was noted in well MW006. product was found in wells MW005 (0.56 ft), MW007 (0.27 ft) and MW008 (0.01). wells MW005 and MW007 were VEFRred on 08/16/21. Steve mentioned that the onsite technician received a complaint from a resident regarding the condition of the manhole at MW-5. resident reported that a child was able to remove its manhole cover. upon reviewing the condition of each of the manholes, it was discovered that there are no manhole cover bolts or bolt receivers present at OB003, OB004, MW005, and MW006. additionally, there are no manhole cover bolts present at MW007 and MW008. as the bolt receivers are in place at these locations, Steve will instruct the tech to replace the missing bolts and re-tap the bolt receivers (if necessary) during the next weekly gauging event. 08/30/21-Hiralkumar Patel. received email from Steve (at 6:05 PM on 08/27/21) including weekly gauging data collected on 08/26/21. well OB003 and OB004 were found dry. no product was noted in well MW006. product was found in wells MW005 (0.47 ft), MW007 (0.31 ft) and MW008 (0.01). 09/02/21-Hiralkumar Patel. 12:25 PM:- received email from Steve including weekly gauging data collected on 09/01/21. well OB003 and OB004 were found dry. no product was noted in well MW006. product was found in wells MW005 (0.66 ft), MW007 (0.32 ft) and MW008 (trace). 09/03/21-Hiralkumar Patel. 1:19 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 09/03/21. no product was found in both wells MWN and MWS. 09/09/21-Hiralkumar Patel. received email from Steve (at 5:29 PM on 09/08/21) including weekly gauging data collected on 09/08/21. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.48 ft), MW007 (0.19 ft) and MW008 (trace). 8:54 AM:- sent email to Steve requesting a call back to discuss issue about damaged well manholes/bolt receivers. 9:40 AM:- received call from Steve. he mentioned that they have replaced bolt receivers, but need to change few well manholes. asked Steve to repair/replace well components to make it secure/safe. 09/20/21-Hiralkumar Patel. received email from Steve (at 4:57 PM on 09/16/21) including weekly gauging data collected on 09/16/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.53 ft), MW007 (0.07 ft) and MW008 (trace). 09/22/21-Hiralkumar Patel. received email from Ryan Manen (rvanmanen@amc-engineering.com, at 11:28 AM on 09/21/21) from AMC Eng. including daily well log for period up to 09/20/21. no product was found in both wells MWN and MWS. 09/23/21-Hiralkumar Patel. 10:56 AM:-

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

approved invoice (#141946)
from EAR for project coordination/well gauging conducted in month of
July 2021. 09/29/21-Hiralkumar
Patel. received email from Steve (at 5:55 PM on 09/28/21). he
mentioned that manholes for wells
OB003, OB004, MW005 and MW006 have been replaced on 09/23-09/24. email
includes pics also.
10/04/21-Hiralkumar Patel. received email from Steve (at 5:45 PM on
09/29/21) including weekly
gauging data collected on 09/22/21 and 09/29/21. no product was noted
in wells OB003, OB004 and
MW006. product was found in wells MW005 (0.80 and 0.62 ft), MW007
(0.32 and 0.17 ft) and MW008
(0.05 and 0.01 ft). wells MW005, MW007 and MW008 were VEFRred on
09/22/21. received email from
Weronika (at 11:02 AM on 10/01/21) from AMC Eng. including daily well
log for period up to
10/01/21. no product was found in both wells MWN and MWS.
10/08/21-Hiralkumar Patel. received email
from Steve (at 12:00 PM on 10/07/21) including weekly gauging data
collected on 10/06/21. no
product was noted in wells OB003, OB004 and MW006. product was found
in wells MW005 (0.79 ft),
MW007 (0.51 ft) and MW008 (0.01 ft). 10/13/21-Hiralkumar Patel.
received email from Weronika (at
3:53 PM on 10/08/21) from AMC Eng. including daily well log for period
up to 10/08/21. no product
was found in both wells MWN and MWS. 10/20/21-Hiralkumar Patel.
received email from Steve (at 5:36
PM on 10/18/21) including weekly gauging data collected on 10/14/21.
no product was noted in wells
OB003, OB004 and MW006. product was found in wells MW005 (0.89 ft),
MW007 (0.34 ft) and MW008 (0.19
ft). 8:06 AM:- approved invoice (#142018) from EAR for project
coordination/well gauging conducted
in month of Aug. 2021. 10/25/21-Hiralkumar Patel. received email from
Steve (at 5:11 PM on
10/21/21) including weekly gauging data collected on 10/20/21. well
OB004 was found dry. no product
was noted in wells OB003 and MW006. product was found in wells MW005
(0.12 ft), MW007 (0.93 ft) and
MW008 (0.03 ft). wells MW005, MW007 and MW008 were VEFRred on
10/20/21. 10/28/21-Hiralkumar Patel.
2:02 PM:- sent email to Steve and inquired him about sudden change in
product thickness in wells
MW005 and MW007 (suspecting possible swap of data). 4:15 PM:- received
email from Steve. he
mentioned that the data in the report is as per the tech s field
sheet, so it s not a transcription
error. though the measurements and product thickness calculations
appear mismatched when compared
to the previous data. Steve inquired if need to swap numbers and
submit revised report. 4:27 PM:-
sent email to Steve. asked him not to change data, but to confirm
numbers with field tech and then
provide explanation for higher product thickness measurement in well
MW007. 11/12/21-Hiralkumar

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

Patel. received email from Steve (at 12:32 PM on 11/11/21) including weekly gauging data collected on 10/27/21, 11/04/21 and 11/10/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.40, 0.22 and 0.15 ft), MW007 (0.25, 0.16 and 0.63 ft) and MW008 (none, trace and 0.45 ft). Steve looked into the increased product thickness reported during the 10/20/21 VEFR event. there were no transcription errors while tabulating the field data. additionally, he has confirmed with the technician that MW-007 and MW-005 were not switched. as such, reported variations of product thickness are likely a result of groundwater table elevation fluctuations.
11/12/21-Hiralkumar Patel. 3:01 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 11/05/21. no product was found in both wells MWN and MWS.
11/16/21-Hiralkumar Patel. 12:10 PM:- approved invoice (#142088) from EAR for project coordination/well gauging conducted in month of Sept. 2021.
11/22/21-Hiralkumar Patel. received email from Steve (at 4:17 PM on 11/19/21) including weekly gauging data collected on 11/19/21. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.86 ft), MW007 (0.24 ft) and MW008 (0.13 ft).
11/24/21-Hiralkumar Patel. received email from Steve (at 5:17 PM on 11/23/21) including weekly gauging data collected on 11/23/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.82 ft), MW007 (0.15 ft) and MW008 (0.45 ft). wells MW005, MW007 and MW008 were VEFRred on 11/23/21. 12/02/21-Hiralkumar Patel. received email from Aerial (at 5:59 PM on 12/01/21) from AMC Eng. including daily well log for period up to 11/22/21. no product was found in both wells MWN and MWS. 12/09/21-Hiralkumar Patel. 8:40 AM:- approved invoice (#142160) from EAR for project coordination/well gauging conducted in month of Oct. 2021. 12/13/21-Hiralkumar Patel. 2:07 PM:- received email from Steve including weekly gauging data collected on 12/01/21 and 12/08/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.11 and 0.77 ft), MW007 (0.38 and 1.68 ft) and MW008 (none and 0.25 ft). 12/20/21-Hiralkumar Patel. 2:50 PM:- received email from Steve including weekly gauging data collected on 12/16/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.36 ft), MW007 (0.38 ft) and MW008 (trace).
12/21/21-Hiralkumar Patel. 9:15 AM:- visited site to witness well gauging, but EAR technician had already gauged wells earlier today. he noted 0.19 ft of product in well MW007 and 0.32 ft of product in well MW005. the EAR technician mistakenly wrote well MW007

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

as well MW005, and well MW005
as well MW007. asked him to correct well notations. 9:39 AM:- spoke with Steve at EAR about change
in well notations by technician. asked him to make note in gauging table about possible swap of
data between wells MW005 and MW007 for past couple of weeks. 12/23/21-Hiralkumar Patel. received
email from Steve (at 5:02 PM on 12/22/21) including weekly gauging data collected on 12/21/21. no
product was noted in wells OB003, OB004, MW006 and MW008. product was found in wells MW005 (0.32
ft) and MW007 (0.19 ft). Steve mentioned at the end of data table that MW005 and MW007 may have
been mistaken for each other during gauging/VEFR events. wells MW005 and MW007 were VEFRred on
12/21/21. 01/04/22-Hiralkumar Patel. 11:53 AM:- received email from Steve including weekly gauging
data collected on 12/30/21. well OB003 was inaccessible. no product was noted in wells OB004, MW006
and MW008. product was found in wells MW005 (0.11 ft) and MW007 (0.22 ft). 01/07/22-Hiralkumar
Patel. received email from Steve (at 4:06 PM on 01/06/22) including weekly gauging data collected
on 01/05/22. no product was noted in wells OB003, OB004, MW006 and MW008. product was found in
wells MW005 (0.19 ft) and MW007 (0.16 ft). the report includes a revised table with gauging data
from Jan. 2021. the hydrographs show data from Dec. 2017. discussed with DEC Austin and DEC Jane
O'Connell regarding alternative options to resolve this case. based on well gauging/VEFRing data
since Dec. 2017, it was decided to 1) stop weekly gauging of existing monitoring wells, 2) continue
monthly well gauging/VEFRing, and 3) explore options (feasibility / cost analysis) for excavation
of grossly contaminated soil. 11:13 AM:- sent email to Ms. Singer, property manager requesting a
call back to discuss possible excavation activities in front of the building entrance along Kent
Ave. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.:
Esty Singer Ph. (718) 522-6582 Ext. 103 email: esinger@topqualitymanagement.com 11:31 AM:- sent
email to Steve including a revised standby contractor authorization form. asked him to stop weekly
well gauging activities, but to continue monthly well gauging/VEFRing. also asked him to explore
option for excavation of grossly contaminated materials. email copied to Jennifer.
01/10/22-Hiralkumar Patel. 10:27 AM:- received email from Steve confirming receipt of the revised
standby contractor authorization form. 01/13/22-Hiralkumar Patel. 1:10 PM:- received call from Dini
(property manager) and Mendy (Dini's supervisor). Mendy mentioned that Dini manages that property
now. informed them about spill history and current impact under the sidewalk in front of building

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

entrance. asked Mendy about possibility of soil excavation in front of building's entrance. he mentioned that there is about six weeks window when kids in building go out for camping. informed him that Steve from EAR will contact building management to discuss possibility and process of soil excavation to expedite remediation. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.: Dini **property manager** Ph. (718) 522-6582 Ext. 103 email: maint4@topqualitymanagement.com Mendy email: mendy@topqualitymanagement.com 1:24 PM:- spoke with Steve and informed him about discussion with building management. asked him to contact building manager to discuss possibility/process of excavation. 1:44 PM:- sent email to Dini with Steve's contact details. informed her that Steve will contact building management to discuss excavation process. email copied to Mendy and Steve. 01/20/22-Hiralkumar Patel. 3:00 PM:- approved invoice (#142224) from EAR for project coordination/well gauging conducted in month of Nov. 2021. 01/25/22-Hiralkumar Patel. received email from Steve (at 3:44 PM on 01/24/22) including monthly report for Jan. 2022. existing wells were gauged/VEFRred on 01/19/22. no product was noted in wells OB003, OB004, MW006 and MW008. product was found in wells MW005 (0.47 ft) and MW007 (0.36 ft). 02/04/22-Hiralkumar Patel. 9:24 AM:- sent email to Steve inquiring update on possibility of soil excavation at the site. 02/09/22-Hiralkumar Patel. 1:52 PM:- received email from Steve. he attempted to request utility maps (water & sewer) from the NYCDEP, and the request was denied. as the work is being done for the DEC, DEP required a letter from DEC to supplement the request for the maps. 02/10/22-Hiralkumar Patel. 8:09 AM:- sent email to Steve including a sewer-water map request letter. 9:14 AM:- approved invoice (#142303) from EAR for project coordination/well gauging conducted in month of Dec. 2021. 02/17/22-Hiralkumar Patel. received email from Steve (at 5:46 PM on 02/16/22) including monthly report for Feb. 2022. existing wells were gauged/VEFRred on 02/16/22. well OB003 was inaccessible due to garbage. no product was noted in wells OB004, MW006 and MW008. product was found in wells MW005 (0.47 ft) and MW007 (0.36 ft). 03/01/22-Hiralkumar Patel. 12:29 PM:- received email from Steve stating that a foreman will visit the site tomorrow to review for potential excavation. 03/03/22-Hiralkumar Patel. 9:10 AM:- approved invoice (#142367) from EAR for project coordination/well gauging conducted in month of Jan. 2022. 03/16/22-Hiralkumar Patel. 11:52 AM:- received email from Steve including pics from site walk conducted on 03/02/22. he mentioned that following site review, internal discussions, and

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

results from a site walk conducted
on 03/02/22, EAR has determined that multiple onsite factors impact the ability to safely conduct
excavation activities. this includes utilities within the work zone, such as a 12-inch diameter gas
main in the middle of the sidewalk. also the building doors on Kent Avenue must remain accessible
during the proposed site work, which will further limit the space available for excavation.
additional limiting factors would include the need for shoring, supporting exposed utilities, and
dewatering of the excavation. 03/21/22-Hiralkumar Patel. received email from Steve (at 5:52 PM on
03/18/22) including monthly report for Mar. 2022. existing wells were gauged/VEFRred on 03/16/22.
well OB003 was inaccessible due to garbage. no product was noted in wells OB004 and MW006. product
was found in wells MW005 (0.61 ft), MW007 (0.03 ft) and MW008 (0.01 ft). 04/12/22-Hiralkumar Patel.
2:30 PM:- approved invoice (#142428) from EAR for project coordination/soil excavation feasibility
study/well gauging conducted in month of Feb. 2022.
04/14/22-Hiralkumar Patel. 2:56 PM:- received
email from Steve including monthly report for Apr. 2022. existing wells were gauged/VEFRred on
04/13/22. no product was noted in wells OB003, OB004, MW006 and MW008. product was found in wells
MW005 (0.40 ft) and MW007 (0.05 ft). 04/15/22-Hiralkumar Patel. 8:38 AM:- sent email to Dini and
informed her that soil excavation under the sidewalk is not feasible and the department will
continue monthly gauging of existing wells and product recovery. email copied to Mendy and Steve.
05/27/22 - Sekhon Received monthly report for May 2022 on 5/25/22. Existing wells were
gauged/VEFRred on 05/18/22. well OB003 was inaccessible due to garbage. no product was noted in
wells OB004, MW008 and MW006. product was found in wells MW005 (0.71 ft), MW007 (0.03 ft).
06/07/22-Hiralkumar Patel. DEC Piper approved invoice (#142498) from EAR on 05/18/22 for work
conducted in month of Mar. 2022. 11:19 AM:- approved invoice (#142569) from EAR for project
coordination/well gauging conducted in month of Apr. 2022.
06/15/22-Hiralkumar Patel. 10:11 AM:-
received email from Steve stating that today's VEFR event has been cancelled due to a lack of site
access caused from construction and residential moving activities occurring at or near site well
locations. VEFR event will be rescheduled. 06/30/22-Hiralkumar Patel. received email from Steve (at
5:43 PM on 06/29/22) including monthly report for June 2022. existing wells were gauged/VEFRred on
06/22/22. well OB003 was inaccessible due to garbage. no product was noted in wells OB004, MW006
and MW008. product was found in wells MW005 (0.58 ft) and MW007 (0.15 ft). 07/05/22-Hiralkumar

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

Patel. 1:59 PM:- approved invoice (#142649) from EAR for project coordination/well gauging
conducted in month of May 2022. 08/11/22-Hiralkumar Patel. 9:15 AM:- approved invoice (#142719)
from EAR for project coordination/well gauging conducted in month of June 2022. 9:26 AM:- received
email from Steve including monthly report for July 2022. existing wells were gauged/VEFRred on
07/13/22. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005
(0.02 ft), MW007 (0.01 ft) and MW008 (0.04 ft). 10:51 AM:- received email from Steve including
pics. he mentioned that yesterday during monthly well gauging/VEFRing, the tech reported some well
deficiencies, including a missing cover at MW-008 and missing manhole bolts at MWs 005, 007 and
OB004. 10:55 AM:- sent email to Steve and asked him to have missing components replaced.
08/15/22-Hiralkumar Patel. 12:09 PM:- received email from Steve including pics of repairs made to
on-site wells. 08/31/22-Hiralkumar Patel. 12:06 PM:- received email from Steve including monthly
report for Aug. 2022. existing wells were gauged/VEFRred on 08/10/22. well OB003 was inaccessible.
no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.53 ft), MW007
(trace) and MW008 (trace). 09/06/22-Hiralkumar Patel. discussed with DEC Austin. he mentioned that
the spill impacted area beneath the sidewalk has been flagged for dig alert with NYC DOT and any
future DOT permit to conduct work in the impacted area will require approval from NYS DEC. no
further remedial action is required based on following: - source removal (on-site source was
addressed during remediation under BCP # C224172) - free phase product on groundwater only beneath
the east sidewalk of Kent Ave, in front of on-site building's main entrance - clay formation
beneath the sidewalk - no possibility of soil excavation as impacted area is in front of the
building's main entrance and other utilities in the area - no reports of any impact to building's
interior - dig alert flag with NYC DOT that will prevent any subsurface work in the area without
addressing environmental concerns 09/07/22-Hiralkumar Patel. 11:24 AM:- received call from Steve.
informed him that the subject spill case will be closed based on review of all available
information. asked him to stop further well gauging/VEFRring and close existing monitoring wells
and submit well closure documentation. 09/08/22-Hiralkumar Patel. 8:24 AM:- sent email to Steve and
asked him to stop monthly well gauging/VEFRring and close existing wells. also asked him to submit
well closure documentation. email copied to Jennifer (EAR). 09/20/22-Hiralkumar Patel. 9:30 AM:-
approved invoice (#142783) from EAR for project coordination/well

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

gauging conducted in month of
July 2022. 09/28/22-Hiralkumar Patel. received email from Steve (at 3:25 PM on 09/27/22) inquiring
about replacement of sidewalk flags during well closure and status of well MW003 which was shown
within the property. 8:07 AM:- sent email to Steve and asked him to close accessible wells on
sidewalks, but no need to replace entire sidewalk flags where monitoring wells are located.
10/05/22-Hiralkumar Patel. 9:45 AM:- received call from Steve. he mentioned that EAR crew is
on-site to close existing monitoring wells. prior to well closure, they gauged the wells and noted
product in wells MW005 and MW007. asked Steve to proceed with well closure and sweep clean any oil
overflows during well closure. 10/13/22-Hiralkumar Patel. 1:25 PM:- approved invoice (#142847) from
EAR for project coordination/well gauging/well repairs conducted in month of Aug. 2022.
11/15/22-Hiralkumar Patel. 9:00 AM:- approved invoice (#142914) from EAR for well closure process
conducted in month of Sept. 2022. 11/21/22-Hiralkumar Patel. 10:50 AM:- received email from Steve
including well decommissioning letter. prior to closure, free phase product was noted in wells
MW005 (0.69 ft) and MW007 (0.92 ft). 12/15/22-Hiralkuamr Patel. 8:05 AM:- approved invoice
(#142987) from EAR for well closure field activities conducted in month of Oct. 2022.
1/10/23-Hiralkumar Patel. 10:30 AM:- approved invoice (#143062 - FINAL INVOICE) from EAR for
preparation/submission of well decommissioning letter submitted in month of Nov. 2022. case closed.
02/14/23-Hiralkumar Patel. 10:15 AM:- sent final ISR to email address DECISR@dec.ny.gov. email
copied to DEC Hale.

Remarks: soil testings confirm loss in monitoring well

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

CON EDISON (Continued) **1018278730**

storers, and disposers of hazardous waste.

~~Click this hyperlink~~ while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY PMS/Shaw investigated site and recommended a dual-phase extraction system to address free product, soil contamination and dissolved-phase groundwater contamination. The system was installed in summer of 2005, and after delays caused by DEP site personnel, started up in the fall of ’05, however, there were problems with electrical service and the system was shut down in October ’05. It may have been re-started in November and run through December, but never received any system start-up report or data. PMS/Shaw ceased activity at the site in late 2005, and site was transferred to Greyhawk in early 2006. - J. Kolleeny 05/30/06: NYCDDC Consent Order Bi-Monthly Site Status Rpt indicates that Greyhawk/Roux performed gauging and sampling of monitoring wells in April 2006. A sheen was observed in MW-16, 0.9 ft. of product in DPE-8, and 0.45 ft. of product in MW-21 (this well is upgradient of site and product was ID’ed by Shaw as no. 2/no. 6 fuel oil, which they suspected was from an off-site source). GW sampling showed high levels of dissolved-phase contamination in MW-3 (11,146 ppb TVOCs), MW-8 (1,385 TVOCs), MW-9 (5,150), MW-10 (815), MW-13 (646) and MW-16 (1,193). Rpt notes that DPE system is currently inactive. Sent email (in eDocs) to Andy Ledins of Greyhawk asking that they re-start system (making any needed repairs and/or improvements), or if they believe system to be inadequate, that they prepare and submit an alternative plan to expedite cleanup of site. - JK 07/09/07: A DPE system has been installed at this site but start-up and operation of system have been prevented by NYCDEP who have repeatedly requested changes to the system and its treated water

NYCDEP (Continued) **S103272814**

discharge location. Every time DDC consultants have met their demands, new demands are made.
Meanwhile, on-going site monitoring (see reports in eDocs) continues to show free product in
several wells and relatively high levels of dissolved-phase GW contamination in some wells. At
meeting on 5/30/07 with DDC, Greyhawk & Roux, monitoring report for Oct. '06 - Mar. '07 was
hand-delivered (in eDocs). I approved recommendations for removal of SVOCs from sampling program
(due to general absence in samples), change in well gauging frequency from monthly to quarterly,
and removal of wells MW-01, MW-04, MW-14, MW-15, MW-17 and MW-18 from monitoring/sampling program
(well MW-06 was also requested for removal, but I asked that it be included in one more sampling
round, after which if it is again ND, it can be dropped from program. Also agreed that DEC would
look into setting up conference call involving DEC and DDC legal staff to discuss how to handle
NYCDEP's lack of cooperation and resolve impasse. After meeting, Andy Ledins of Greyhawk mentioned
that one possible way around problem would be to operate system primarily in slurping mode, so
groundwater discharge would not be an issue. On 7/9/07, I sent an email to Brian Morrissey of Roux
and Andy Ledins asking if this was ever implemented, and for name of DEP contact. - J. Kolleeny
10/20/08: Reviewed April-Sept.'07 mon rpt, dated 12/21/07, and Oct.'07-June'08 mon rpt, dated
10/16/08, both by Roux (both in eDocs). April-Sept.'07 rpt confirms removal of wells MW-01, MW-04,
MW-14, MW-15 MW-17 & MW-18 from GW sampling program as approved by DEC at meeting on 5/30/07; gives
results of April '07 and Aug. '07 GW sampling events, showing high or moderate levels of VOCs in
several wells and free product in 4 and 2 wells, resp.; rpt notes that operation of on-site DPE
system will resume once sewer discharge connection is approved by DEP and built, and recommends
removing wells MW-05, MW-06, MW-12 and MW-21 from sampling program. Oct.'07-June'08 rpt gives
results of Dec.'07, March'08 and June'08 GW sampling events, showing high or moderate levels of
VOCs in several wells and free product in 2, 3, and 3 wells, resp. During June'08 event, product
was purged from MW-16 (0.4 gals) and DPE-08 (2.1 gals), absorbent sock was reinstalled in MW-21.
Rpt recommends resuming operation of DPE system after repairs & modifications to system and after
proposed sewer discharge pipe is connected to 12-inch sewer near intersect of Kent Ave & Little
Nassau St., and recommends removing wells MW-05, MW-06 and MW-27/DPE-03 from GW sampling program.
Sent email to Afsar Samani of DDC, cc's to Fatemeh Ashkan of DDC, Brian Morrissey of Roux, and
Andris Ledins of Greyhawk: I have reviewed monitoring report for

NYCDEP (Continued) **S103272814**

period October ’07 through June
’08 for this site, prepared by Roux Assoc. and dated 10/16/08. Report recommends (1) removing wells
MW-05, MW-06 and MW-27/DPE-03 from GW sampling program, and (2) resuming operation of on-site DPE
system after system modifications are complete and proposed system discharge pipe is connected to
local sewer main near intersection of Kent Avenue and Little Nassau Street. These recommendations
are approved. Please continue to keep me updated on status of remedial system at this site, and
feel free to contact me if you have any questions. - J. Kolleeny
08/13/09: Reviewed monitoring rpt
for July 2008 through April 2009, by Roux, dated 5/22/09 (in eDocs). Rpt states that on-site DPE
system has been operating continuously since 4/1/09, after new transfer pump was installed. GW
sampling in Dec.’08 showed moderate to high VOC levels in 7 wells, with worst contam in MW-03:
10,680 ug/L TVOCs. Free product was detected in 4 wells during rpt period, with greatest thickness
obserbed in well MW-26/DPE-15 during Sept.’08 gauging event: 1.20 ft. Roux will continue to
operate/monitor DPE system and continue quarterly GW sampling/gauging. Changed spill priority to
P2. - J. Kolleeny 10/01/09: On 9/14/09, received email from Hassan Hussein of DEC R2 Div of
Solid/Haz materials: Please provide details of remediation project at this facility. Info is needed
to complete our recent haz waste compliance inspection. We need to know when remed system was
installed, what waste streams are generated, what caused site contam, and where recovered materials
are stored. I sent reply: Remed system at DEP Kent Avenue Shop is dual-phase extraction system. It
is located in basement (equipment shed is in SE corner of basement). Construction of system began
in 2003. System was started up in ’05, but was shut down due to issues with NYCDEP, most notably
their insistence that City construct dedicated line to carry system’s treated water discharge to
sewer main in street (rather than combining their discharge with facility’s sewer discharge).
System was started briefly several times since then and shut down after short periods, but has been
running continuously since April ’09. Site contam was caused by gasoline & kerosene USTs, which
leaked based on sampling of soil & GW in areas of tanks. Free petroleum product, I.D.’ed as mineral
spirits, is present in several wells at site. System removes liquids and vapors from subsurface;
these fluids are separated by moisture condenser. Recovered vapors are treated by passing through
granular activated carbon & discharged to atmosphere. Vapor discharge is monitored with PID &
sampled for lab analysis to ensure compliance with benzene discharge std. Recovered liquids go thru

NYCDEP (Continued) **S103272814**

oil-water separator; free product goes to product holding tank, which is pumped out by vac truck when nearly full and transported to recycling facility. Water from oil-water separator passes thru GAC and is discharged to City's municipal sewer system. City's consultant has DEP permit for this discharge. You can find addt'l info about project in spills database. Hassan and I spoke on phone, he sent photos of 2 tanks at facility (in eDocs image folder), and I forwarded his questions/issues to Brian Morrissey of Roux Assoc., DDC's consultant. In response to questions about system, assoc. tanks, and vapors in equipment shed, Brian sent reply with attached IT Corp. RAP & design drawings (in eDocs): As requested, here is March 2001 Design Analysis Rpt & Remedial Design Work Plan by IT. Recovered product is periodically removed by AARCO with vac truck. Product recovery amount has not been substantial recently. Plans for replacement of vapor-phase carbon are in progress. I sent email to Brian: Thanks for RAP & diagrams. I have couple of questions: is product holding tank located in equipment enclosure in SE corner of basement? If so, is vent pipe routed to outdoors in some fashion? On 9/16/09, Brian sent email reply: Here are responses to questions in your email and our subsequent discussion: 1. Product recovered in oil/water separator is conveyed to & stored in tank T-1, 500-gal capacity AST, located in building but outside of treatment enclosure. AST is connected to vent line that runs to building exterior. 2. Recovered product that accumulates in T-1 is periodically removed with vac truck and taken to recycling facility. Copy of Jan. 2009 non-haz waste manifest is attached [in eDocs image folder]. Contact info for recycling facility: New York Oil Recovery Co., 94 Hausman St, Brooklyn, NY 11222,(718) 599-5120. 3. I spoke with Greyhawk regarding uncovered oil/water separator. We believe cover was temporarily removed for maintenance and operator neglected to reinstall cover at completion of activity. Greyhawk will direct its O&M subcontractor to ensure that cover will be on separator at all times except during maintenance tasks. 4. Since system commenced continuous operation, Greyhawk & Roux have not received any reports re: NYCDEP's concerns with vapors/odors. Treatment enclosure fan, which exhausted vapors out to garage area, has been shut off. There are no current plans to further address this issue. 5. I heard that DEC inspector inquired about registration status of 500-gallon AST and oil/water separator. Normally, process tanks including oil/water separators are not subject to tank registration requirements nor requirements of 6 NYCRR Parts 613 & 614. Based on my understanding of regs, there is no NYS requirement to register remedial system's AST or

NYCDEP (Continued) **S103272814**

oil/water separator. Do you
agree? On 9/22/09, I replied: Thanks for addt'l info and answers. About item 5, based on
conversations with Jacob Krimgold, head of PBS Unit, I agree that process tanks storing petrol
product recovered by remed system need not be registered. However, regarding vapors/odors, Haz
Waste inspector was not so much concerned by complaints of vapors and odors from DEP staff at
facility, he was concerned by strong and potentially combustible petroleum vapors within system
enclosure. I assume that if cover is kept on oil-water separator this would be less of problem, and
that all electronics in system enclosure are non-sparking, or whatever appropriate term is. Is
there anything else typically done to reduce vapors within such enclosure, and do you think that
such vapors in this case are any cause for concern? On 10/01/09, Brian wrote back: Here is some
info in response to your concerns regarding vapors & odors generated by operation of remed system
at Kent Ave: 1. Equipment in treatment room is XP, that is rated for Class 1, Div. 2 atmosphere. 2.
Current plan is to install carbon-based filter on room exhaust fan for odor control. 3. Greyhawk is
at site today working with their subcontractor to ensure that maintenance of oil-water separator
and waste generation/storage issues are properly attended to. Please let me know if you have any
other questions. - J. Kolleeny 09/07/10: Reviewed Site Turn-Over Status Rpt by LiRo, dated 6/24/10
(in eDocs). Rpt states that DPE system had significant downtime between Nov. 2008 and March 2009;
on 4/1/09, system resumed operation running on only one leg to reduce water influent flow. In Feb.
2010, LiRo replaced Greyhawk/Roux as CM/Consultant. Info provided to LiRo by Greyhawk in April 2010
indicated DPE system operated thru much of 2009; system air & water influent & effluent sampling
was performed in Dec. 2009. O&M info indicated excessive bio-fouling of oil/water separator, must
be cleaned regularly to keep system running. Rpt notes that last soil sampling was done in 2003,
and states that addt'l sampling is needed to determine current conditions and evaluate system
effectiveness. Free product is present in several wells and is recovered manually during quarterly
monitoring. GW sampling in Jan. 2010 showed worst contam persists in SW area of site (although most
wells in NE part of site weren't sampled), with MW-03 having 7,220 ug/L total VOCs (down from
10,680 ug/L in Dec. 2008), MW-09 having 2,783 ug/L tVOCs (up from 1,862 ug/L in Dec. 2008), MW-10
having 2,355 ug/L tVOCs (down from 2,719 ug/L in Dec. 2008), and MW-08 having 548 ug/L tVOCs (down
from 1,123 ug/L in Dec. 2008). Rpt recommends continuing quarterly product recovery and semi-annual

NYCDEP (Continued) **S103272814**

GW sampling; preparation of 6-month summary rpt and annual rpt with recommendations for changes as
needed; performing a supplemental soil investigation to determine current soil conditions,
providing data for evaluating system effectiveness and trunk line options; and submitting letter
rpt with results of soil investig and system evaluation. - J. Kolleeny 12/13/10: Reviewed Quarterly
Monitoring Rpt (June-Aug. 2010) by LiRo, dated 10/28/10 (in eDocs). GW data for June 2010 show high
levels of dissolved-phase contam persist in southwest part of site. Well MW-03 had 9,612 ug/L total
VOCs (up from 7,220 ug/L in Jan. 2010), MW-09 had 4,978 ug/L tVOCs (up from 2,783 ug/L in Jan.
2010), MW-10 had 1,961 ug/L tVOCs (down from 2,355 ug/L in Jan. 2010). On east side of site, well
DPE-08 had 768 ug/L tVOCs (up from 110 ug/L in Jan. 2010) and MW-26 had 638 ug/L tVOCs (not sampled
in Jan. 2010, but had 27 ug/L tVOCs in Dec. 2008). LiRo states that pre-remediation baseline soil
data from July 2003 should be updated to evaluate DPE system effectiveness and help focus system
operation, and rpt includes supplemental investigation work plan proposing 8 soil borings, with 3
possibly to be converted to monitoring wells, based on field observation of contam. I sent letter
(in eDocs) to Afsar Samani of DDC, cc's to Fatemeh Ashkan of DDC and Steve Frank of LiRo, approving
invest plan, but asking that one boring be moved to DPE-18 (which had high levels of VOCs in soil),
that GW samples be collected from wells MW-14, MW-15, MW-16 & MW-18 to supplement June 2010 GW
data, and that system O&M data be included in summary rpt to help evaluate system's effectiveness
and need for system modifications. - J. Kolleeny 12/23/10: [JK] Received System Shutdown
Notification email from John Proios of LiRo: Site Name: DEP-Kent Ave Shop Date and Time of
Shutdown: 12/22/10, 10:00 am Reason for Shutdown: Excessive iron fouling in moisture separator,
oil/water separator, and filter canisters Corrective Action Required: Pressure washing and
scrubbing at moisture separator, oil/water separator, and filter canisters Estimated Duration of
Shutdown: 5 days 12/29/10: [JK] Received System Shutdown Notification email from Ian Hoffman of
Envt'l Assessment and Remediations: Site Name: DEP-Kent Ave Shop Date and Time of Shutdown:
12/22/10, 10:00 am Reason for Shutdown: Excessive iron fouling in moisture separator, oil/water
separator, and filter canisters Corrective Action Required: Pressure washing and scrubbing at
moisture separator, oil/water separator, and filter canisters. Corrective action delayed due to
weather delays, logistical constraints regarding vacuum truck access. Estimated Duration of
Shutdown: 14 days 05/12/11: Reviewed Quarterly Mon Rpt & System

NYCDEP (Continued) **S103272814**

Performance Rpt for period
Sept.-Nov. 2010, dated 2/22/11, by LiRo (in eDocs). On-site DPE system operated ~86% of time, vapor
and GW discharges were in compliance with discharge limits. No free product was detected in wells.
Sept./Oct. 2010 GW sampling showed worst contam in several wells in vicinity of former USTs: MW-03
had 9,592 ug/L total VOCs (had 9,612 ug/L in June 2010), MW-09 had 3,356 ug/L tVOCs (down from
4,978 ug/L in June 2010), MW-10 had 2,944 ug/L tVOCs (up from 1,961 ug/L in June 2010). LiRo will
conduct soil investig to obtain current data in Feb. 2011. Rpt recommends continued system O&M and
GW Mon; rpt includes no proposals requiring DEC approval. - J. Kolleeny 08/22/11: Received System
Shutdown Notification email from Ian Hoffman of Envt'l Assessment and Remediations: Site Name:
DEP-Kent Avenue Shop Date and Time of Shutdown: Reported by LIRO 8/12/11 14:45:00 Reason for
Shutdown: high level alarm at moisture separator and high level alarm at product tank (false alarm
at product tank) Corrective Action Required: troubleshooting scheduled for Monday, 8/15 Estimated
Duration of Shutdown: 2.5 days 08/29/11: Reviewed Quarterly Mon Rpt & System Performance Rpt for
period Dec. 2010 thru Feb. 2011, dated 6/29/11, by LiRo (in eDocs). On-site DPE system operated
~82% of time, vapor and GW discharges were in compliance with discharge limits. Two wells in SE
corner of site had measurable free product in Jan. 2011: DPE-01 had 0.02 ft, and DPE-08 had 0.05
ft. Soil investigation in Feb. 2011 found overall lower total VOC levels and smaller area of impact
compared with July 2003 soil sampling data; however, sigificant levels of soil contam remain, esp.
along E side of site. GW sampling in Jan. & Feb. 2011 showed worst contam in several wells in
vicinity of former USTs in SW part of site: MW-03 had 9,020 ug/L total VOCs (down from 9,592 ug/L
in Sept. 2010), MW-09 had 5,731 ug/L tVOCs (up from 3,356 ug/L in Oct. 2010), MW-10 had 2,296 ug/L
tVOCs (down from 2,944 ug/L in Oct. 2010). Outlier well MW-15 (in NE corner of site) had 2,620 ug/L
tVOCs in Feb. 2011, up from ND in Jan. 2011 and ~2 ug/L in Oct. 2010; LiRo suspects this result may
be anomalous. Rpt proposes to reconfigure operation of DPE system by shutting off vapor extraction
component of system in west and northeast areas of site, to focus vapor extraction in areas with
high residual soil contam based on results of Feb. 2011 soil investigation. Specifically, LiRo
proposes to shut off air vacuum component at wells DPE-06, DPE-07, DPE-11, DPE-17, and DPE-18 (rpt
also proposes to shut off DPE-16, however, figures indicate that well has been destroyed, and this
was confirmed by Steve Frank of LiRo on 8/29/11). I sent email (in eDocs) approving proposed system

NYCDEP (Continued) **S103272814**

changes to Afsar Samani of DDC, cc's to Fatemeh Ashkan of DDC and Steve Frank of LiRo. - J.
Kolleeny 01/17/12: Reviewed Qtrly Monitoring and System Performance Rpt for March-May 2011 by LiRo,
dated 9/6/11 (in eDocs). On-site DPE system operated ~93.5% of rpting period. Vapor & GW discharges
were in compliance with limits. Free product was observed in only one well, MW-09, but not enough
to measure thickness (well was not sampled for dissolved VOCs). Feb. 2011 soil sampling showed high
VOC levels in SE part of site, but total mass and extent of VOCs have decreased compared with
historical maximums & distribution. May 2011 GW sampling showed highest dissolved VOCs persisting
in wells near closed-in-place USTs. Well MW-03 had 9,514 ug/L total VOCs (up from 9,020 ug/l in
Jan. 2011); well MW-10 had 2,730 ug/L tVOCs (up from 2,296 ug/L in Jan. 2011); all other wells
sampled in May 2011 had less than 1,000 ug/L tVOCs (with several being ND). LiRo concludes DPE
system is effectively reducing contam at site. LiRo will continue quarterly GW gauging & sampling,
maintain DPE system ops & monitoring, continue to submit quarterly rpts, and reconfigure operation
of system to focus on remaining areas with high VOC levels (as approved by DEC in Aug. 2011). - JK
05/11/12: Reviewed Qtrly Mon and Syst Performance Rpt for June-Aug. 2011 by LiRo, dated 1/4/12 (in
eDocs). On-site DPE system operated ~76% of rpting period. Vapor & GW discharges were in compliance
with limits. No measurable free product was detected in any wells during this period. August 2011
GW sampling showed high VOC levels persist in wells near closed USTs: MW-03 had 8,570 ug/L total
VOCs (down from 9,514 in May 2011); MW-09 had 6,249 ug/L tVOCs (not sampled in May 2011 due to
visible NAPL); MW-10 had 3,783 ug/L tVOCs (up from 2,730 ug/L in May 2011). LiRo concludes DPE
system is effectively reducing contam at site. LiRo will continue quarterly GW gauging & sampling,
maintain DPE system ops and monitoring, continue to submit quarterly rpts, and enact DEC approved
changes to DPE system. - J. Kolleeny 07/24/12: Reviewed Qtrly Mon and Syst Performance Rpt for
Sept. 2011 - Feb. 2012 by LiRo, dated 4/6/12 (in eDocs). On-site DPE system operated ~58% of time
from Sept-Nov 2011, and ~70% of time from Dec. 2011 thru Feb. 2012. Vapor & GW discharges were in
compliance with limits. No measurable free product was detected in any wells during this period. GW
sampling performed in Nov./Dec. 2011 and again in Jan. 2012 showed high VOC levels persisting in
wells near closed USTs: MW-03 had 7,393 ug/L total VOCs in Nov. 2011 (down from 8,570 ug/L in Aug.
2011), but went back up to 8,709 ug/L tVOCs in Jan. 2012; MW-09 had 3,952 ug/L tVOCs in Dec. 2011
(down from 6,249 ug/L in Aug. 2011), but went back up to 7,078 ug/L

NYCDEP (Continued) **S103272814**

tVOCs in Jan. 2012; MW-10 had
1,558 ug/L tVOCs in Dec. 2011 (down from 3,783 ug/L in Aug. 2011) and decreased further to 801 ug/L
tVOCs in Jan. 2012. LiRo concludes DPE system is operating effectively. They will continue
quarterly GW gauging & sampling, maintain DPE system ops and monitoring (replacement of blower in
progress), and continue to submit quarterly rpts. - J. Kolleeny
12/06/12: Reviewed Qtrly Mon and
Syst Performance Rpt for March-May 2012 by LiRo, dated 8/21/12 (in eDocs). On-site DPE system
operated only ~42% of rpting period, mainly due to 49-day shutdown caused by blower malfunction.
Vapor & GW discharges were in compliance with limits. No measurable free product was detected in
any wells during this period. GW sampling in April continued to show high VOC levels in wells near
closed USTs: MW-03 had 9,398 ug/L total VOCs (up from 8,709 ug/L in Jan. 2012); MW-09 had 5,038
ug/L tVOCs (down from 7,078 ug/L in Jan. 2012); and MW-10 had 3,127 ug/L tVOCs (up from 801 ug/L in
Jan. 2012). LiRo concludes DPE system is operating effectively. They will continue to do quarterly
GW gauging & sampling, maintain DPE system ops and monitoring, and submit quarterly rpts. - J.
Kolleeny 06/10/13: Reviewed Qtrly Mon and Syst Performance Rpt for June 2012 to Feb. 2013 by LiRo,
dated 5/6/13 (in eDocs). Rpt states that NYCDDC & NYCDEP have notified LiRo of site building
reconstruction program scheduled for 2014, during which on-site DPE system will temporarily be shut
down and place in secure storage. DPE system operated ~99% of this rpting period. Vapor & GW
discharges were in compliance with limits. No measurable free product was detected in any wells
during this period. GW sampling in June & Sept. 2012 and Jan. 2013 showed well MW-03 had 12,710
ug/L total VOCs in June 2012 (up from 9,398 ug/L in April 2012), increased to 14,790 ug/L tVOCs in
Sept. 2012, and decreased to 7,815 ug/L tVOCs in Jan. 2013; MW-09 had 8,978 ug/L tVOCs in June 2012
(up from 5,038 ug/L in April 2012), decreased to 8,644 ug/L tVOCs in Sept. 2012, and decreased to
5,092 ug/L tVOCs in Jan. 2013; MW-10 had 3,159 ug/L tVOCs in June 2012 (up from 3,127 ug/L in April
2012), decreased to 2,581 ug/L tVOCs in Sept. 2012, and decreased to 130 ug/L tVOCs in Jan. 2013.
LiRo concludes DPE system is operating effectively. They will continue quarterly GW gauging &
sampling, DPE system O&M, submission of quarterly rpts, and will continue to gauge and sample
accessible wells during upcoming building reconstruction and temporary DPE system shutdown
scheduled for 2014. - J. Kolleeny 10/07/13: Reviewed Quarterly Mon and Syst Performance Rpt for
March to May 2013 by LiRo, dated 8/12/13 (in eDocs). On-site DPE system was operation for ~72% of

NYCDEP (Continued) **S103272814**

reporting period. System's vapor discharge was in compliance with air discharge std. No free
product was detected in any wells during this period. Rpt states that due to NYCDDC budgetary
constraints, no GW samples were collected during this monitoring period. I sent email to Steve
Frank of LiRo, cc to Fatemeh Ashkan of DDC: Steve, I'm reviewing quarterly mon rpt for March to May
2013 for this site, dated 8/12/13. Rpt states (on page 10): Due to NYCDDC budgetary constraints, no
GW samples were collected during this monitoring period. Was I notified about this? I don't seem to
have any recollection of GW sampling having been suspended at any of my sites due to budget
problems. This site has an active remedial system and several wells with relatively high levels of
contam (in Jan. 2013, well MW-03 had 7,815 ug/L total VOCs and well MW-09 had 5,092 ug/L tVOCs).
Continuing with regularly scheduled quarterly GW sampling at this site seems to me like a fairly
high priority. Has funding for sampling at this site been restored? Has GW been sampled since
January 2013? Please let me know status of this site, and please let me know when situations like
this arise. Received email reply from Steve Frank: John, Our analytical services subcontract is now
funded and Kent Ave Site was sampled in August. Results are attached [in eDocs as brief]. I
apologize for not sending notification. There may be other sites of yours that we missed a sample
event at. I will send you a list if there are others. If there are any future issues that will
result in interruption of monitoring, we will send notification. Aug. 2013 GW data show well MW-03
had 10,487 ug/L total VOCs (up from 7,815 ug/L in Jan. 2013), well MW-09 had 6,525 ug/L tVOCs (up
from 5,092 ug/L in Jan. 2013). I asked Steve Frank why well MW-10 was not sampled in Aug. 2013, he
said because it went dry during purging and did not recharge. - J. Kolleeny 02/26/14: Reviewed
Quarterly Mon Rpt & System Performance Rpt for June to August 2013 by LiRo, dated 11/19/13 (in
DecDocs). Rpt states that on-site DPE system only operated 6 days out of mon period; system has
leak in oil/water separator and was shut down on 6/7/13. Rpt presents results of well gauging in
July & Aug. 2013 and GW sampling in Aug. 2013. No free product was detected during this mon period.
GW sampling showed MW-03 (worst well) had 10,487 ug/L total VOCs (up from 7,815 ug/L in Jan. 2013),
MW-08 had 83 ug/L tVOCs (down from 124 ug/L in Jan. 2013), MW-09 had 6,525 ug/L tVOCs (up from
5,092 ug/L in Jan. 2013), and MW-13 had 436 ug/L tVOCs (down from 556 ug/L in Jan. 2013). Rpt
concludes that tVOC concentrations remain high in area of MW-03 and MW-09, but overall,
dissolved-phase plume remained stable; absence of measurable free

NYCDEP (Continued) **S103272814**

product suggests DPE system has
been effective in removing product, and system has prevented off-site migration of dissolved plume.
Rpt states that following actions will be conducted as part of routine monitoring program: Continue
quarterly well gauging & sampling; prepare DPE system for temporary shutdown & storage pending site
Bldg reconstruction; continue to prepare/submit quarterly mon rpts; continue to gauge & sample
accessible mon wells during upcoming site Bldg reconstruction and temporary DPE system shutdown
scheduled for 2014. Rpt has no proposals requiring DEC response. - J. Kolleeny 05/05/14: Reviewed
Quarterly Mon Rpt & System Performance Rpt for Sept. to Nov. 2013 by LiRo, dated 1/8/14 (in
DecDocs). Rpt states that for Sept.-Nov. 2013 mon period, no system O&M data were collected due to
system being shut down for duration of quarter, and well gauging & GW sampling were conducted on
Dec. 4th & 5th due to scheduling issues. Dec. 2013 GW elevation data indicate GW flow is still
towards center of site, preventing off-site migration of contam plume. Dec. 2013 GW sampling
results show well MW-03 had 8,997 ug/L total VOCs (down from 10,487 ug/L in Aug. 2013), well MW-08
was inaccessible and not sampled, well MW-09 had 4,950 ug/L tVOCs (down from 6,525 ug/L in Aug.
2013), well MW-10 had 4,576 ug/L tVOCs (up from 130 ug/L in Jan. 2013, not sampled in Aug. 2013),
and well MW-13 had 583 ug/L tVOCs (up from 436 ug/L in Aug. 2013). Rpt states that LiRo will
continue to gauge & sample accessible site wells during upcoming bldg construction and anticipated
DPE system shutdown scheduled for 2014; replace DPE system's oil/water separator and operate system
until shutdown is required for pending bldg construction; and prepare/submit quarterly mon rpts. -
J. Kolleeny 08/08/14: Reviewed Quarterly Monitoring Rpt & System Performance Rpt for Dec. 2013 to
Feb. 2014 by LiRo, dated 4/8/14 (in DecDocs). Rpt states that on-site DPE system was operational
for 72 of 90 days during rpt period; oil-water separator was replaced on 12/5/13, allowing re-start
of system on 12/18/13. PID screening and lab sampling/analysis of vapor effluent showed system air
discharge in compliance with State stds. A GW effluent sample collected in Jan. 2014 was in
compliance with NYCDEP discharge criteria. Avg system flow rate was 0.55 gpm, and total GW
discharge for rpt period was 58,270 gals. Well gauging showed no free product in any wells during
this rpt period. GW sampling in Feb. 2014 showed well MW-03 had 6,533 ug/L total VOCs (down from
8,997 ug/L in Dec. 2013), well MW-09 had 5,101 ug/L tVOCs (up from 4,950 ug/L in Dec. 2013), well
MW-10 had 3,561 ug/L tVOCs (down from 4,576 ug/L in Dec. 2013), and well MW-13 had 978 ug/L tVOCs

NYCDEP (Continued) **S103272814**

(up from 583 ug/L in Dec. 2013). LiRo will continue to gauge & sample accessible site mon wells during upcoming site bldg reconstruction (scheduled for 2014), operate DPE system until temporary shutdown is required for upcoming bldg reconstruction, & prepare/submit quarterly mon rpts. - J. Kolleeny 11/10/14: Reviewed Quarterly Mon & System Performance Rpt for March-May 2014 by LiRo, dated 8/6/14 (in DecDocs). Rpt states that on-site DPE system was operational 92 out of 92 days during rpt period (100% of time). PID screening and lab analysis of vapor effluent showed system air discharge in compliance with State stds. Avg system flow rate was 0.65 gpm, total GW discharge during rpt period was 86,276 gals. GW sampling in April 2014 showed well MW-03 had 10,190 ug/L total VOCs (up from 6,533 ug/L in Feb. 2014), well MW-09 had 5,047 ug/L tVOCs (had 5,101 ug/L in Feb. 2014), well MW-10 had 2,942 ug/L tVOCs (down from 3,561 ug/L in Feb. 2014). LiRo will continue to gauge & sample accessible site mon wells during upcoming site bldg reconstruction (scheduled for 2014), operate DPE system until temporary shutdown is required for upcoming bldg reconstruction, and prepare/submit quarterly mon rpts. - J. Kolleeny 01/22/15: Reviewed Quarterly Mon & System Performance Rpt for June-Aug. 2014 by LiRo, dated 10/24/14 (in DecDocs). Rpt states that on-site DPE system was operational 86 out of 92 days (92.5%). PID screening and lab analysis of vapor effluent showed system air discharge was in compliance with State stds during rpt period. Avg system flow rate was 0.61 gpm, total GW discharge during rpt period was 75,705 gals. GW sampling in July 2014 showed well MW-03 had 10,274 ug/L total VOCs (up from 10,190 ug/L in April 2014), well MW-09 had 6,437 ug/L tVOCs (up from 5,047 ug/L in April 2014), well MW-10 had 6,063 ug/L tVOCs (up from 2,942 ug/L in April 2014). LiRo concludes that overall, GW data indicate dissolved-phase contaminant plume is similar to previous monitoring periods with no signficant changes in plume configuration. LiRo will continue to gauge & sample accessible site monitoring wells during upcoming site bldg reconstruction (scheduled for 2014), operate DPE system until temporary shutdown is required for upcoming bldg reconstruction, and prepare/submit quarterly mon rpts. - J. Kolleeny 03/16/15: Reviewed Quarterly Monitoring & System Performance Rpt for Sept.-Nov. 2014 by LiRo, dated 2/3/15 (in DecDocs). Rpt states that on-site DPE system was operation 86 of 91 days (94.5%); on 11/14/14, system was shut down, dismantled and placed in storage for duration of site reconstruction program. PID screening & lab analysis of vapor effluent showed system air discharge was in compliance with State stds during rpt period. Avg system GW

NYCDEP (Continued) **S103272814**

recovery flow rate was 0.61 gpm,
total GW discharge during rpt period was 75,705 gals [? data not updated from previous quarterly
rpt? Sent email inquiry to Steve Frank of LiRo]. GW sampling in Oct. 2014 showed well MW-03 had
9,919 ug/L total VOCs (down from 10,274 ug/L in July 2014), well MW-09 had 7,117 ug/L tVOCs (up
from 6,437 ug/L in July 2014), well MW-10 had 5,863 ug/L tVOCs (down from 6,063 ug/L in July 2014).
LiRo will continue to gauge & sample accessible mon wells during upcoming site reconstruction
(scheduled for 2015) and prepare & submit quarterly mon rpts. I sent email to Steve Frank of LiRo:
Steve, I have a question about LiRo s Qtrly Mon Rpt & System Performance Rpt for Sept.-Nov. 2014
for this site. On Page 7, rpt states that system was operational for 86 out of 91 calendar days in
this rpting period. However, on Page 8 text states For rpting period (92 days), average system flow
rate was 0.61 gpm and, Total net system GW effluent discharge for rpting period was 75,705 gals.
These flow rate & discharge numbers are identical to numbers in previous qtrly rpt (June-Aug.
2014), and since text here gives rpting period as 92 days (rather than 91, as stated on previous
page), I m wondering if flow rate & discharge data presented here are holdovers from previous qtrly
rpt, and were inadvertently not updated for this rpt? Please let me know if this is true, and if
so, please provide correct system flow rate in gpm and GW effluent discharge in gals, if those data
are available. - J. Kolleeny 03/17/15: Received email reply from Steve Frank of Liro: Jon, Your
guess was correct. We will send you a new pdf of rpt with corrected flow rate/discharge numbers. -
J. Kolleeny 03/24/15: Received email from Steve Frank of LiRo with revised Quarterly Monitoring &
System Performance Rpt for Sept.-Nov. 2014, uploaded to DecDocs. - J. Kolleeny 07/23/15: Reviewed
Quarterly Monitoring & System Performance Rpt for Dec. 2014 to Feb. 2015 by LiRo, dated 5/14/15 (in
DecDocs). Rpt notes that on-site DPE system was shut down and put into storage on 11/20/14, in
preparation for site construction work. In addition, due to interruption of DDC funding, no GW
sampling was performed this quarter. Therefore, site activities during this quarter were limited to
gauging of all accessible wells, which was performed in Jan. and Feb. 2015. No LNAPL was observed
in any wells. GW contour maps based on gauging measurements show GW flowing radially inward toward
center of site, altho this pattern appears to be less pronounced in Feb. 2015 map. Rpt states that
quarterly GW sampling at site resumed on 4/13/15 (results will be in next quarterly rpt). - J.
Kolleeny 10/30/15: Reviewed Quarterly Monitoring & System Performance Rpt for March to May 2015 by

NYCDEP (Continued) **S103272814**

LiRo, dated 8/26/15 (in DecDocs). Rpt notes that on-site DPE system was shut down and put into storage in Nov. 2014 in preparation for site construction work. GW sampling was performed in April 2015; results show well MW-03 had 11,071 ug/L total VOCs (up from 9,919 ug/L in Oct. 2014), well MW-08 had 161 ug/L tVOCs (up from 70 ug/L in Oct. 2014), well MW-09 had 3,839 ug/L tVOCs (down from 7,117 ug/L in Oct. 2014), well MW-10 had 1,717 ug/L tVOCs (down from 5,863 ug/L in Oct. 2014), well MW-13 had 323 ug/L tVOCs (down from 421 ug/L in Oct. 2014), and well DPE-13 had 109 ug/L tVOCs (up from 28 ug/L in Oct. 2014). Other wells had minimal VOCs or were ND, or were not sampled. Rpt states that generally reduced VOC concentrations in site perimeter wells and absence of free product indicate that DPE system was effective and functioned as designed by removing free product and preventing off-site migration of dissolved-phase GW plume. Rpt states that LiRo will continue quarterly well gauging and sampling to extent feasible during building reconstruction, will initiate monthly EFR events at accessible wells to remove contaminated GW during site reconstruction, and will continue to prepare/submit quarterly monitoring rpts. - J. Kolleeny
03/23/16: Reviewed Quarterly Monitoring & System Performance Rpt for June to Aug. 2015 by LiRo, dated 12/18/15 (in DecDocs). Rpt notes that on-site DPE system was shut down & put into storage in Nov. 2014 in preparation for site construction work. GW sampling was performed in June 2015; results show well MW-03 had 12,133 ug/L total VOCs (up from 11,071 ug/L in April 2015), well MW-08 had 137 ug/L tVOCs (down from 161 ug/L in April 2015), well MW-09 had 5,144 ug/L tVOCs (up from 3,839 ug/L in April 2015), well MW-10 had 4,283 ug/L tVOCs (up from 1,717 ug/L in April 2015), well MW-13 had 227 ug/L tVOCs (down from 323 ug/L in April 2015), well DPE-13 had 101 ug/L tVOCs (down from 109 ug/L in April 2015. Other wells had minimal VOCs or were ND, or were not sampled. No LNAPL was observed in any wells during rpt period. Rpt states that tVOCs in several wells remain high, but overall dissolved-phase plume is similar to previous monitoring periods. On 8/26/15, LiRo initiated EFR on six wells (MW-03, MW-09, MW-10, MW-13, DPE-01 & DPE-13) as an IRM; ~235 gals total fluids were recovered. Rpt states that LiRo will continue to gauge & sample accessible wells on a quarterly basis, will continue to do monthly EFR events as an IRM, and will continue to prepare/submit quarterly rpts. - J. Kolleeny 06/10/16: Reviewed Quarterly Monitoring & System Performance Rpt for Sept. to Nov. 2015 by LiRo, dated 3/24/16 (in DecDocs). Rpt notes that on-site DPE system was shut down & put into storage in Nov. 2014 in

NYCDEP (Continued) **S103272814**

preparation for site construction work;
states that when construction activities are complete LiRo will
evaluate remedial requirements and
determine if DPE system should be re-commissioned and reactivated. EFR
events were performed on 5
wells (MW-03, MW-09, MW-13, DPE-01, DPE-13) in Sept. 2015, removing
~35-40 gals from each well,
then on same 5 wells in Oct. 2015, removing ~53-54 gals from each
well, then from first 3 of those
wells in Nov. 2015 (DPE wells were blocked), removing from 50 to 65
gals from wells. GW sampling in
Sept/Oct 2015 showed well MW-03 had 12,255 ug/L (up from 12,133 ug/L
in June 2015), well MW-08 had
187 ug/L tVOCs (up from 137 ug/L in June 2015), well MW-10 had 6,149
ug/L tVOCs (up from 4,283 ug/L
in June 2015), well DP-12 had 282 ug/L tVOCs (had 4 ug/L when last
sampled in Oct. 2014), well
DP-13 had 42 ug/L tVOCs (down from 101 ug/L in June 2015). Well MW-09,
which had 5,144 ug/L tVOCs
in June 2015, was not sampled and no explanation is provided in text
or tables. Rpt notes that a
number of wells saw increases in VOCs this quarter, but states that
overall, there was no
significant change in plume configuration. LiRo will continue to gauge
& sample accessible wells on
a quarterly basis, will continue to do monthly EFR events as an IRM,
and will continue to
prepare/submit quarterly rpts. I contacted Steve Frank of LiRo
regarding well MW-09 not being
sampled this quarter; he responded that MW-09 was inaccessible at time
of sampling due to parked
vehicle over well, which was noted in well purge logs but not in text
or well gauging data table. -
J. Kolleeny 07/08/16: Reviewed Quarterly Monitoring & System
Performance Rpt for Dec. 2015 to Feb.
2016 by LiRo dated 4/29/16 (in DecDocs). Rpt notes that on-site DPE
remedial system is shut down
while site building undergoes renovations, but that monthly EFR on
impacted, accessible wells
continues to be performed as an interim measure to address GW contam.
In this quarter, EFR events
were performed in Jan. & Feb. of 2016, removing ~267 gals total
fluids, bringing total since IRM
began to 1,133 gals total fluids removed. GW sampling in Jan. 2016
showed well MW-03 had 15,871
ug/L total VOCs (up from 12,255 ug/L in Sept. 2015), well MW-09 had
6,138 ug/L tVOCs (up from 5,144
ug/L when last sampled in June 2015), well MW-13 had 217 ug/L tVOCs
(up from 42 ug/L in Sept.
2015); other wells sampled were either ND or had very low tVOCs. Wells
MW-08 & MW-10 were not
sampled; well purge logs indicate they were blocked by construction
equipment. LiRo concludes that
high tVOC levels remain in vicinity of MW-03, MW-09 & MW-10, but that
plume is similar to previous
monitoring periods. LiRo will continue to gauge & sample accessible
wells on a quarterly basis,

NYCDEP (Continued) **S103272814**

perform monthly EFR at select wells to remove contaminated GW as an IRM, & prepare/submit quarterly
monitoring rpts. - J. Kolleeny 09/09/16: Reviewed Quarterly Monitoring & System Performance Rpt for
March-May 2016, dated 7/20/16 (in DecDocs). Rpt notes that while DPE system is shut down for site
bldg renovations, monthly EFR continues to be performed on accessible wells with high levels of
dissolved VOCs (MW-03, MW-09, MW-13, DPE-01, DPE-13) as an IRM. In this quarter, EFR events were
performed in March, April & May 2016, removing total of ~321 gals total fluids, bringing total
since IRM began to 1,454 gals total fluids removed. No LNAPL was detected during rpt period. For
April 2016 GW sampling event, only two wells were accessible for sampling: LMW-01 and MW-19, both
of which were ND for VOCs. LiRo will continue to gauge & sample accessible wells quarterly, do
monthly EFR at impacted wells as an IRM, & submit qtrly mon rpts. I sent email to Steve Frank of
LiRo: Steve, I reviewed LiRo s Qtrly Mon & System Performance Rpt for March-May 2016 for Kent Ave
Shop, and I see that only 2 monitoring wells were accessible for GW sampling on 4/11/16 neither of
which is among highly contaminated wells at site. Yet EFR summary table indicates EFR events were
performed on all of those wells in April and on most of those wells in May 2016, so they must have
been accessible at those times. Why weren t critical wells (MW-03, MW-09, MW-13, DPE-01, DPE-13)
sampled when they were accessible on EFR visit dates? Please let me know. - J. Kolleeny 09/12/16:
Received email reply from Steve Frank of LiRo: Jon, Thanks for your note and I understand your
concern. Construction conditions are in a constant state of flux at Kent Shop. We tried to sample
wells on April 11 and found them blocked. We returned next week and found wells still blocked and
unfortunately, we moved on from trying to sample those wells in April. Different LiRo crews &
equipment are required to complete sampling vs EFR & there is a subcontractor involved & work
scheduled at other sites. We always go out in advance of attempting EFR & we did that on April
26th. Wells were accessible & we completed EFR on 27th. Going forward, I think we can coordinate
our sampling & EFR events more closely when we scout for EFR & see wells are accessible, we will
scramble a sampling crew to try & hit site to sample within a day or two. Just to give you an idea
of what we are up against, I attached photos of conditions inside. June 2016 photo is from area of
MW-03, 09 & 13 Stuff (not technical term) is piled up there because it was in way somewhere else.
It could sit there for 2 days or 2 months we have no say in that. In ramp removed photo ramp got
torn out, so until that gets rebuilt we cannot get personnel in there

NYCDEP (Continued) **S103272814**

at all. We are not currently
able to complete EFR or sampling but we continue to scout site monthly. Next time we see well
access, we will get a sampling crew there ASAP. I sent email reply: Steve, Thanks for explanation &
photos I can better see what you re up against. It occurs to me that there could be a quarterly
period during which your staff will be unable to either sample/gauge wells or perform EFR on wells
at this site. In that case, perhaps it makes sense to reduce reporting frequency from quarterly to
semi-annual, at least for duration of site renovations? If/when remedial system is re-started, LiRo
could resume submission of quarterly rpts. I m not sure whether or not to also suggest a reduction
of GW sampling frequency, and of course I d prefer to see EFR events continue monthly as approved
IRM while DPE system is off, assuming wells are accessible. Please let me know what you think. - J.
Kolleeny 09/15/16: Received email reply from Steve Frank of LiRo: Jon, I think switch to
semi-annual reporting until system is back on-line is a fine idea. We will continue to visit site
and try for monthly EFR (as construction conditions permit) and I think it would be best to stick
with quarterly GW sampling. I fear that if we dial back to semi-annual sampling and catch a period
with no well access we could end up with no data. I sent email reply: Steve, Sounds good, so I will
consider reporting schedule for this site to be changed to semi-annual for duration of building
reconstruction project, while EFR and GW sampling schedules will remain same, at monthly &
quarterly, resp. (with understanding that there may be months/quarters in which EFR/GW sampling of
certain wells is not possible to do access constraints). - J. Kolleeny 03/31/17: Reviewed
Semi-Annual Monitoring & System Performance Rpt for June to Nov. 2016, by LiRo, dated 1/30/17 (in
DecDocs). On-site DPE system was shut down in Nov. 2014 for building renovations. Monthly EFR was
performed in June & July 2016 as required IRM during system down time, removing ~205 gals of total
fluids (volume of total fluids removed since start of IRM is ~1,659 gals). LiRo made site visits in
Sept. & Oct. 2016 to attempt EFR & GW sampling, but was unable to do either due to construction
activities. Based on discussions with site personnel, EFR in basement will not be possible until
after Spring 2017. However, in early Nov. 2016 LiRo was able to collect GW samples from 10 out of
16 wells in monitoring program. No free product was detected in wells. Sampling results showed well
MW-3 had 11,191 ug/L total VOCs (down from 15,871 ug/L in Jan. 2016), well MW-10 had 957 ug/L tVOCs
(down from 6,149 ug/L in Sept. 2015, well MW-13 had 5 ug/L tVOCs (down from 217 ug/L in Jan. 2016),

NYCDEP (Continued) **S103272814**

well DPE-13 had 201 ug/L tVOCs (up from 42 ug/L in Sept. 2015); well MW-9 (historically high
impacts) could not be sampled. LiRo will continue to do quarterly well gauging & GW sampling, &
monthly EFR events as an IRM on accessible wells as permitted by site conditions, & will continue
to submit semi-annual mon rpts. - JK 11/27/17: Reviewed Semi-Annual Monitoring Rpt for Dec. 2016 to
May 2017 by LiRo, dated 8/31/17 (in DecDocs). On-site DPE system remains shut down for bldg
renovations. Rpt states LiRo conducted gauging of accessible site wells & sampling of 12 wells in
Feb. 2017 (5 wells couldn't be sampled due to access blocked by construction), and gauging of
accessible wells & sampling of 13 wells in May 2017 (4 wells couldn't be sampled due to access
blocked by construction). In March 2017, LiRo resumed EFR events, regaining access to basement
wells after reconstruction of access ramp & basement floor was completed. EFR was performed on 5
wells in March, April & May 2017, recovering ~268 gals of total fluids, bringing total recovered
since EFR began to ~1,725 gals total fluids. No measurable LNAPL was detected in this rpt period.
GW sampling showed well MW-03 had 16,775 ug/L total VOCs in Feb. 2017 (up from 11,191 ug/L in Nov.
2016) and had 10,806 ug/L tVOCs in May 2017; well MW-09 had 4,801 ug/L tVOCs in Feb. 2017 (not
accessible in Nov. 2016; had 6,138 ug/L tVOCs in Jan. 2016) and had 3,708 ug/L tVOCs in May 2017;
well MW-10 was not accessible in Feb. 2017 (had 957 ug/L tVOCs in Nov. 2016) and had 1,698 ug/L
tVOCs in May 2017; well MW-13 was not sampled in Feb. 2017 (had 5 ug/L tVOCs in Nov. 2016) and had
117 ug/L tVOCs in May 2017; well DPE-12 had 78 ug/L tVOCs in Feb. 2017 (down from 282 ug/L when
last sampled in Sept. 2015) and had 59 ug/L tVOCs in May 2017; well DPE-13 had 171 ug/L tVOCs in
Feb. 2017 (down from 201 ug/L in Nov. 2016) and had 120 ug/L tVOCs in May 2017. LiRo will continue
quarterly gauging/sampling of accessible site wells to extent feasible during bldg reconstruction
activities, continue monthly EFR at accessible wells as an IRM during reconstruction, & will
prepare/submit semi-annual monitoring rpts. - J. Kolleeny 07/19/18: Reviewed Semi-Annual GW
Monitoring Rpt (June 2017 to Jan. 2018) by LiRo dated 5/16/18 (in DecDocs). GW sampling in Oct.
2017 & Jan. 2018 showed (main wells of concern) MW-03 had 8,271 ug/L total VOCs in Oct. 2017 (down
from 11,850 ug/L in Aug. 2017) and had 8,921 ug/L tVOCs in Jan. 2017; well MW-09 had 2,858 ug/L
tVOCs in Oct. 2017 (down from 3,708 ug/L in Aug. 2017) and had 1,541 ug/L tVOCs in Jan. 2017; well
MW-10 had 1,905 ug/L tVOCs in Oct. 2017 (up from 1,068 ug/L in Aug. 2017) and had 939 ug/L tVOCs in
Jan. 2018; well MW-13 had 305 ug/L tVOCs in Oct. 2017 (up from 11 ug/L

NYCDEP (Continued) **S103272814**

in Aug. 2017) and had 154
ug/L tVOCs in Jan. 2018; well DPE-13 had 167 ug/L tVOCs in Oct. 2017 (same as in Aug. 2017) and had
119 ug/L tVOCs in Jan. 2018. EFR was performed monthly during rpt period, recovering ~982 gals
total fluids (bringing total fluids recovered since start of IRM to ~2,707 gals). In Dec. 2017,
LiRo drilled 16 soil borings to obtain current soil data for evaluation of remedial alternatives to
inactive on-site DPE system; 47 soil samples were collected and results ranged from ND in 25
samples to 173,410 ug/kg total VOCs. Based on Dec. 2017 soil data, areas of residual vadose zone
soil impacts are located in SW & E portions of site. Rpt states that data shows a general overall
decrease in total mass of VOCs in soil. Rpt includes an evaluation of remedial alternatives
including MNA with EFR, GWET, S-ISCO, and In-Situ Biorem (IB) with MNA. Rpt concludes best
alternative for site would be IB, which would involve application of bacteria & nutrients into
existing site wells by gravity feed, possibly supplemented with oxygen. Rpt states that quarterly
well gauging & GW sampling and monthly EFR will continue, pending DEC approval of proposed changes.
Proposals requiring DEC approval are: discontinue and decommission DPE system, discontinue monthly
EFR, reduce well gauging & GW sampling to semi-annual and analyze GW samples only for VOCs, prepare
& submit an IB design/treatment study work plan to evaluate this technology as remedial approach
for site. - J. Kolleeny 07/19/18 (cont.): I sent email to Steve Frank of LiRo: Steve, I m reviewing
Semi-Annual Mon Rpt for this site dated 5/16/18. Rpt recommends reducing GW sampling frequency from
quarterly to semi-annual, and includes latest GW data from a Jan. 2018 sampling event. Since site
is currently on quarterly schedule, I was wondering if you have any addt'l GW data, perhaps from
April or May 2018?I always like to see latest available GW data when reviewing remedial proposals.
Also, since LiRo is recommending a new remedial approach (In-Situ Bioremediation, or IB), are you
sure you want to reduce GW sampling frequency? Won t that delay your ability to evaluate
effectiveness of new approach? Finally, I see IB proposal recommends injection of bacteria &
nutrients into existing wells. Since those wells are screened to straddle water table, with screens
presumably extending only a few ft above water table, how would injections into those wells address
residual vadose zone soil impacts at site? Please feel free to call to discuss. - J. Kolleeny
07/27/18: Received email from Steve Frank of LiRo with answers to my 7/19/18 email: JK - Rpt
recommends reducing GW sampling frequency from quarterly to semi-annual, and includes latest GW

NYCDEP (Continued) **S103272814**

data from Jan. 2018 sampling event. Since it s currently on quarterly schedule, do you have any addt'l GW data for April or May 2018? SF - We have quarterly data from April & June. Latest GW data is attached. [In Decdocs.] JK - Seeing as LiRo is recommending a new remedial approach (In-Situ Bioremediation, or IB), wouldn't reducing GW sampling frequency delay ability to evaluate effectiveness of new approach? SF - Proposed reduction is for long-term routine sampling. We will develop an IB design/study work plan that will specify more frequent monitoring of wells in treatment area to evaluate effectiveness. JK - IB proposal recommends injection of bacteria & nutrients into existing wells, screened to straddle water table, with screens extending only a few feet above GW; how would injections into those wells address residual vadose zone soil impacts at site? SF - Water table is extremely shallow in treatment area and most soil contamination is in capillary fringe or below water table. IB design/treatment study proposed in our rpt will include an evaluation of potential effectiveness in capillary fringe. Reviewed addt'l GW data; well MW-3 had 11,742 ug/L total VOCs in April and had 8,199 ug/L tVOCs in June; well MW-9 had 2,059 ug/L tVOCs in April and 1,122 ug/L in June; well MW-10 had 1,257 ug/L tVOCs in April and 2,373 ug/L in June; other wells had low to moderate VOC levels. I sent letter (in DecDocs) approving proposals in LiRo's SAMR for June 2017 to Jan. 2018, to Jerry Aliberti of DDC, cc's to Marco Chen of DDC, Steve Frank & Martha DeLozier of LiRo. - J. Kolleeny 02/07/19: Reviewed Semi-Annual Monitoring Rpt for Monitoring Period (February to July 2018) by LiRo dated 12/11/18 (in DecDocs). Rpt presents results of GW sampling in April & June 2018; these are same data sent in July 2018 and reviewed in above 7/27/18 entry. Rpt notes that on 7/27/18 DEC approved LiRo's proposals to cease operating & decommission on-site DPE system, discontinue EFR as an IRM, and reduce well gauging & GW sampling frequency from quarterly to semi-annual, and that DEC requested preparation/submittal of an in-situ bioremediation work plan. Rpt states that LiRo will continue to gauge & sample accessible site wells on semi-annual basis, prepare/submit semi-annual rpts, and will prepare/submit in-situ bio-rem work plan in Jan. 2019 monitoring rpt. - JK 04/04/19: Reviewed Semi-Annual Monitoring Rpt for Monitoring Period (Aug. 2018 to Jan. 2019) by LiRo dated 2/28/19 (in DecDocs). One monitoring event was conducted during rpt period, in Oct. 2018. Well gauging showed no LNAPL in any site well. GW sampling showed well MW-03 had 6,327 ug/L total VOCs (down from 8,199 ug/L in June 2018), well MW-09 had 176 ug/L tVOCs (down from 1,122 ug/L in June 2018), well

NYCDEP (Continued) **S103272814**

MW-10 had 3,811 ug/L tVOCs (up
from 2,373 ug/L in June 2018), well MW-13 had 174 ug/L tVOCs (up from
78 ug/L in June 2018), well
DPE-13 had 102 ug/L tVOCs (up from 63 ug/L in June 2018); other wells
sampled were either ND or had
very low to moderately low (below 100 ug/) levels of tVOCs. Worst GW
impacts remain in SW area of
site. Rpt notes that contaminant plume appears to be confined to site.
LiRo will continue to gauge
& sample accessible site wells and submit monitoring rpts on
semi-annual basis; they will also
prepare a preliminary design for a bioremediation system and draft a
Remedial Action Work Plan. -
J. Kolleeny 09/30/19: Received email from Steve Frank of LiRo: Hi Jon,
I wanted to give you a
heads-up on our findings at Kent Ave shop. Some product appeared in
LMW-01 back in April
unfortunately (and I am sorry for this) no one immediately recognized
this as an unusual condition.
However, given that LMW-01 is an up-gradient well which has
historically not shown contamination, I
believe it is unusual. We tested product for fingerprint and it came
back as mineral spirits
(confirmed with a second ID sample). We started EFR on well and as of
this morning, thickness was
0.13 ft. There is no record of mineral spirits storage at site and
considering well location it is
possible that there is an off-site source. We ordered Sanborn maps and
an EDR database rpt (I
attached a Sanborn map) and records indicate that there was a fairly
large dry-cleaning plant (with
6 solvent tanks called out) from 1940s thru 90s or maybe a little
later even. From our mineral
spirits findings at Brooklyn 3/3A, we learned that a type of mineral
spirit (Stoddard Solvent) was
an early dry-cleaning chemical. Former dry-cleaning building (380
Flushing Ave) appears to have
been demolished (probably in 2018) and property has an E-designation.
I could not find addt'l info
on property in City s OER database. I was thinking that we could
continue to do EFR for a couple of
months and if product goes away, pursue source no further. If product
persists, I think we would
need to put in some addt'l up-gradient wells along Kent Ave to further
evaluate source. Let us know
what you think of my suggestions or if there are any other things you
would like us to do. I sent
email reply: Steve, Thanks for bringing this to my attention. I would
suggest continuing to do EFR
to see if product disappears in a month or two. I believe that
property at 380 Flushing Ave which
formerly was a dry cleaning plant is now a BCP site; I will follow up
on that to try to find out if
they have detected any mineral spirits in wells and/or if they have
knowledge of mineral spirits or
Stoddard Solvent having been stored at that site. I ll also find out
what sort of remediation they

NYCDEP (Continued) **S103272814**

have done or will be doing, and if they have done any off-site investigation. Thanks again for
heads-up on this, and please let me know how it goes with EFR efforts to eliminate product. I
checked Remediation database, found that former dry cleaning plant at 380 Flushing Ave is a BCP
project, no. C224264, off-site investigation under no. C22426A, being managed by Wendy Zheng of R2
Remediation Section A. According to notes in database, GW flow at site is to E (away from Kent Ave
Shop), and main impacts at site are from fuel oil. - J. Kolleeny
11/26/19: Discussed this site with
LiRo at 11/21/19 DDC Consent Order semiannual status meeting, told them Wendy Zheng said main site
contaminant is fuel oil, and off-site investigation will only be done to N and E, based on GW flow.
Steve Frank and Martha DeLozier of LiRo stated that Stoddard Solvent contamination in soil
resembles fuel oil. They also stated that EFR events have greatly reduced product in impacted well,
they will evaluate product rebound. On 11/26/19, Martha DeLozier sent follow-up email: Jon, As
discussed in our meeting last Thursday, attached is an excerpt from document titled Toxicological
Profile for Stoddard Solvent, US Dept. of Health & Human Services, Agency for Toxic Substances and
Disease Registry, dated June 1995. Excerpt discusses chemical and physical info for Stoddard
solvent which is similar in chemical composition to white spirits / mineral spirits. Also attached
is soil data from solvent tank (mineral spirit) excavation work related to DSNY-Former Brooklyn
North 3 site (314 Rutledge St parcel). As you can see from results, 1,2,4-Trimethylbenzene was
detected at highest percentage concentration levels. - JK 01/17/20:
Reviewed Semi-Annual GW
Monitoring Rpt for Monitoring Period (Feb. to July 2019) by LiRo dated 12/4/19 (in DecDocs). Well
gauging on April 8-9, 2019 showed well LMW-01 had 0.22 ft of LNAPL, later identified as mineral
spirits (i.e., Stoddard Solvent) (see above entries for 9/30/19 & 11/26/19); well gauging on
6/25/19 again showed 0.21 ft of LNAPL in well LMW-01. GW sampling in April 2019 showed well MW-03
had 11,066 ug/L total VOCs (up from 6,327 ug/L in Oct. 2018), well MW-09 had 2,002 ug/L tVOCs (up
from 176 ug/L in Oct. 2018), well MW-10 had 1,089 ug/L tVOCs (down from 3,811 ug/L in Oct. 2018),
well MW-13 had 113 ug/L tVOCs (down from 174 ug/L in Oct. 2018); other wells sampled had very low
to ND levels of VOCs. Rpt states that on 9/30/19, LiRo informed DEC of presence of mineral spirits
in well LMW-01 and of LiRo's intent to perform EFR on this well for two months to evaluate any
increases/decreases in mineral spirit thickness. Rpt notes that well LMW-01 is located up-gradient
of former on-site UST system, that this well never had mineral spirits

NYCDEP (Continued) **S103272814**

before, and there is no
record of mineral spirits being used or stored at site. Rpt also
states that with measurement of
LNAPL ID'ed as mineral spirits in LMW-01 in April and verified in June
2019, LiRo conducted EFR on
9/19/19 and 9/30/19; after two EFR events product thickness was
reduced to 0.13 ft. Based on this
reduction, EFR was discontinued. Rpt states that LiRo will continue
semiannual gauging & sampling
of accessible site wells and will perform EFR as required by SMP, and
for next monitoring period
will gauge wells monthly to evaluate presence of LNAPL. Rpt also
includes a RAWP proposing
Biological Augmentation, which I will review separately. - JK
01/22/20: Reviewed RAWP included as
attachment in LiRo's Semi-Annual GW Mon Rpt for Feb. to July 2019 (in
DecDocs). RAWP proposes
biological augmentation to address residual petroleum impacts at site.
RAWP states there is an area
of residual soil contam in a smear zone at water table, and this
contam soil is acting as an
ongoing source of GW contamination. To address soil contam, LiRo will
implement a GW recirculation,
mixing and oxygenation system. Proposed system will utilize conduits
and extraction wells from
former on-site DPE system. Two extraction wells (DPE-11 & DPE-13)
located up-gradient of presumed
contam soil mass will remove GW, which will be pumped to a treatment
system where nutrients &
oxygen will be added, with volume of additives and mixing rates
controlled by Biological Oxygen
Supply System (BOSS). Treated/amended water will then be gravity fed
to 3 re-circulation wells
(DPE-06, DPE-12 & DPE-17) located down-gradient of contam soil.
Bio-augmentation program will
extend over 12 months, with quarterly sampling of GW for bio
parameters, semi-annual sampling of GW
for petroleum contaminants (as per current monitoring schedule), and
confirmation soil sampling
after 9 months to evaluate progress of soil remediation. Operation and
performance monitoring of
bio-augmentation system will be summarized in usual semi-annual rpts,
and results of
bio-augmentation program will be summarized in a single rpt in first
semi-annual monitoring rpt
after receipt of confirmation soil sampling data. RAWP states that
LiRo will not implement
bio-augmentation program until there are no more measurable product
(mineral spirits) in any site
well. In quarter following no observation of product at site, after
bid document prep and USEPA
notification, program will be initiated. I sent letter (in DecDocs)
approving RAWP to Jerry
Aliberti of NYCDDC, cc's to Ricardo Walton of DDC; Steve Frank, Martha
DeLozier & John Proios of
LiRo, but suggesting that bio-program be implemented when there is no
more product in wells located

NYCDEP (Continued) **S103272814**

within proposed bio treatment area. - J. Kolleeny 06/04/20: Reviewed Semi-Annual Monitoring Rpt for Aug. 2019 to Jan. 2020 by LiRo, dated 4/23/20. Rpt notes that on 9/30/19, LiRo notified DEC of the presence of product ID'ed as mineral spirits in well LMW-01 and of LiRo's intent to do EFR on that well for 2 months to evaluate changes in product thickness. LiRo gauged site wells multiple times in Sept., Oct., Nov. & Dec. 2019 and Jan. 2020; product was identified intermittently in wells LMW-01, DPE-08, MW-06, MW-03 and DPE-03, and product thicknesses detected during this period ranged from 2.01 ft (LMW-01) to 0.01 (several wells). LiRo performed EFR on well LMW-01 on Sept. 19 & 30, 2019 and on wells LMW-01 and DPE-08 on Jan. 17 & 31, 2020. A total of 151.21 gals of fluids were removed from these wells during rpt period. LiRo installed an absorbent sock in LMW-01 on 10/10/19 and in MW-06 and DPE-08 on 11/21/19. A product sample from DPE-08 taken on 11/8/19 was ID'ed as possibly mineral spirits or weathered gasoline. Rpt notes that on 1/22/20, DEC approved LiRo's RAWP for biological augmentation (included in previous semiannual rpt), with caveat that RAWP will not be implemented until no free product is observed within treatment area. Site-wide GW sampling performed in Nov. 2019 showed well MW-03 had 7,412 ug/L total VOCs (down from 11,066 ug/L in April 2019), well MW-08 had 148 ug/L tVOCs (not sampled in April 2019, had 525 ug/L tVOCs in Aug. 2017), well MW-09 had 968 ug/L tVOCs (down from 2,002 ug/L in April 2019), well MW-10 had 797 ug/L tVOCs (down from 1,089 ug/L in April 2019), well MW-13 had 169 ug/L tVOCs (up from 113 ug/L in April 2019), well DPE-08 had 525 ug/L tVOCs (not analyzed in April 2019; had 153 ug/L tVOCs in June 2018), well LMW-01 had 391 ug/L tVOCs (not sampled in April 2019 due to free product; had 9 ug/L tVOCs in Oct. 2018), well DPE-13 had 110 ug/L tVOCs (up from 43 ug/L in April 2019). Rpt states that LiRo will continue semi-annual GW sampling, perform EFR as required by SMP, perform monthly gauging of accessible wells for next monitoring period to evaluate presence and migration of product, and will implement approved biological augmentation RAWP when there is no more product observed within treatment area. - J. Kolleeny 12/28/20: Reviewed Semi-Annual Monitoring Rpt for Feb. to July 2020 by LiRo, dated 11/13/20. During rpt period, LiRo completed semiannual GW sampling on 4/6/20 and 6/24-25/20; time gap was due to DEP restricting access to site interior due to COVID-19; LiRo collected free product and product/water mix samples from LMW-01 & DPE-14 on 7/30/20 and submitted for lab analysis of target VOCs; LiRo performed 11 addt'l well gauging events for product, installed & maintained absorbent socks in wells MW-06 &

NYCDEP (Continued) **S103272814**

DPE-8, and conducted 4 rounds of
EFR (twice in Feb., once in March and once in July 2020). Product thickness ranged up to 0.52 ft
(in DPE-08). A total of 36 gals of product were recovered from LMW-01, MW-09, DPE-08 & DPE-14 by
EFR this period, bringing cumulative total recovered to 187.71 gals since 4/8/19. Rpt states that
EFR seems to have short-term effect in reducing product thicknesses, but long-term effectiveness
will require further monitoring. Rpt states that LiRo will not implement approved biological
augmentation program until no more free product is observed within treatment area. June 2020 well
gauging data appear to show GW flow to ENE across site, instead of usual inward radial flow toward
site center. GW sample results show well LMW-01 had 85 ug/L total VOCs (down from 391 ug/L in Nov.
2019), well MW-03 had 7,582 ug/L tVOCs (up from 7,412 ug/L in Nov. 2019), well MW-08 had 1,451 ug/L
tVOCs (up from 148 ug/L in Nov. 2019), well MW-09 had 890 ug/L tVOCs (down from 968 ug/L in Nov.
2019), well MW-10 had 161 ug/L tVOCs (down from 797 ug/L in Nov. 2019), well DPE-08 was not sampled
due to LNAPL (had 525 ug/L tVOCs in Nov. 2019), well DPE-13 had 13 ug/L tVOCs (down from 110 ug/L
in Nov. 2019), well DPE-14 had 3,958 ug/L tVOCs (no earlier sampling data available). Other wells
sampled were ND or had very low tVOCs. Rpt notes that GW contam plume has expanded beyond bldg
footprint to include well LMW-01 and for 1st time includes on-site well DPE-14; this differs from
historical data showing no off-site migration, and LiRo states this trend will require further
monitoring. LiRo will continue monthly gauging of select wells for LNAPL and EFR as required by
SMP, and semiannual gauging and sampling of all accessible site wells. LiRo will implement approved
biological augmentation program when no LNAPL is observed in treatment area and funding constraints
are removed. - J. Kolleeny 07/01/21: Reviewed Semi-Annual Monitoring Rpt for Aug. 2020 to Jan. 2021
by LiRo Engineers dated 6/3/21. During rpt period, LiRo performed semiannual GW sampling in
Oct./Nov. 2020; 8 free product well gauging events; maintained absorbent socks in wells MW-06 and
DPE-08; and conducted three EFR/product removal events (due to budget constraints, product recovery
was performed by vac truck or peristaltic pump). Rpt states that distribution of free product
(ID'ed as mineral spirits) decreased this period to only 3 wells:
LMW-01, DPE-08 and DPE-14.
Product thickness ranged from 0.01 ft in DPE-14 to 0.52 ft in LMW-01. A total of 69 gals of product
were recovered by EFR during rpt period, bringing total recovered from April 2019 to Jan. 2021 to
256.21 gals. Rpt states that DEC is currently evaluating potential of BCP Site C222464A (former NY

NYCDEP (Continued) **S103272814**

Cleaning & Dyeing) as possible source of mineral spirits. GW elevation data indicate flow to E/SE.
GW sampling showed well LMW-01 had 103 ug/L total VOCs (up from 85 ug/L in April 2020), well MW-03
had 3,214 ug/L tVOCs (down from 7,582 ug/L in June 2020), well MW-08 had 301 ug/L tVOCs (down from
1,451 ug/L in June 2020), well MW-09 had 578 ug/L tVOCs (down from 890 ug/L in June 2020), well
MW-10 had 2 ug/L tVOCs (down from 161 ug/L in June 2020), well MW-13 had 25 ug/L tVOCs (down from
82 ug/L in June 2020), well DPE-14 had 186 ug/L tVOCs (down from 3,958 ug/L in June 2020); all
other wells sampled were either ND or had very low levels of VOCs similar to previous sampling
round. Rpt states that LiRo will continue monthly well gauging for free product, perform EFR as
required by SMP, continue semi-annual GW sampling and rpt submission; LiRo will also implement
biological augmentation program as per approved RAWP, once free product has been eliminated from
proposed treatment area and NYCDDC funding constraints have been removed. - J. Kolleeny 10/28/21:
Reviewed Semi-Annual Monitoring Rpt for Feb. to July 2021 by LiRo Engineers dated 10/7/21. During
rpt period, LiRo performed semiannual well gauging & GW sampling on 2/16-18/21; performed 9 addt'l
free product well gauging events; maintained petroleum-absorbent socks in MW-06 and DPE-08; and
conducted four EFR/product removal events (using combo of vac truck, peristaltic pump and/or hand
bailer, due to budget constraints). During this rpt period, measurable product was detected in 4
wells: LMW-01, MW-09, DPE-08 and DPE-14. Product thickness ranged from 0.01 ft (DPE-08) to 0.41 ft
(LMW-01). About 64 gals of GW w/product were recovered this rpt period; cumulative total of 320
gals of GW/product have been recovered since 9/19/19. Absorbent socks were replace 6 times in well
DPE-08 and twice in well MW-06. Rpt notes that product at site has been ID'ed as mineral spirits,
and states that DEC is currently evaluating possibility that up-gradient BCP site no. C22464A
(former NY Cleaning & Dyeing) may be source of product. GW sampling showed well MW-03 had 6,640
ug/L total VOCs (up from 3,214 ug/L in Oct. 2020), well MW-08 had 410 ug/L tVOCs (up from 301 ug/L
in Oct. 2020), well MW-09 had 686 ug/L tVOCs (up from 578 ug/L in Oct. 2020), well MW-10 had 3 ug/L
tVOCs (up from 2 ug/L in Oct. 2020), well MW-13 had 145 ug/L tVOCs (up from 25 ug/L in Oct. 2020),
well DPE-08 had 55 ug/L tVOCs (not sampled last two events; had 525 ug/L when last sampled in Nov.
2019), well DPE-13 had 49 ug/L tVOCs (was ND in Oct. 2020), well DPE-14 had 251 (up from 186 ug/L
in Nov. 2020); other wells sampled were either ND or had only trace levels (less than 1 ug/L) of
VOCs. Rpt states that LiRo will continue monthly well gauging for

NYCDEP (Continued) **S103272814**

product, perform EFR as required
by SMP, continue semiannual GW sampling and rpt submission, and will implement biological
augmentation program as per approved RAWP once product has been eliminated from proposed treatment
area & DDC funding constraints have been removed. - JK 07/22/22: Reviewed Semi-Annual Monitoring
Rpt for Aug. 2021 to Jan. 2022 by LiRo Engineers dated 6/20/22. Select wells (with a history of
LNAPL detections) were gauged six times during rpt period. On 8/10/21, well LMW-01 had 0.05 ft of
free product, well MW-9 had 0.04 ft, well DPE-14 had 0.01 ft; wells DPE-03, DPE-08 & MW-06 were dry
and well MW-03 was ND for product. On 8/17/21, well LMW-01 had 0.19 ft of product, well MW-09 had
0.01 ft, well DPE-08 had 0.14 ft, MW-03 was ND, MW-06 was dry, DPE-03 could not be accessed, DPE-14
was not measured. On 9/8/21, 6 accessible wells had no product; well DPE-03 could not be accessed.
On 10/13/21, well LMW-01 had 0.01 ft of product, 5 wells were ND for product, well DPE-03 could not
be accessed. On 12/27/21, wells DPE-03 & DPE-08 could not be accessed, other wells gauged had no
product. On 1/19/22, well DPE-03 could not be accessed, 6 other wells had no product. EFR was
performed on 8/17/21, removing 30 gals of product & GW from well LMW-01, 5 gals from MW-09 and 1
gal from DPE-08. Cumulative total of 356 gals of product & GW have been recovered by EFR from Sept.
2019 to Aug. 2021. Absorbent socks in wells DPE-08 and MW-06 were removed on 10/13/21 due to
diminishing product levels and to assess product thickness without socks ahead of bio-augmentation
implementation. Semi-annual GW sampling in Aug. 2021 showed well MW-03 had 5,819 ug/L total VOCs
(down from 6,640 ug/L in Feb. 2021), well MW-08 had 169 ug/L tVOCs (down from 410 ug/L in Feb.
2021), well MW-15 had 12 ug/L tVOCs (up from 3 ug/L in Feb. 2021), well DPE-13 had 39 ug/L tVOCs
(down from 49 ug/L in Feb. 2021); other wells were ND or had very low VOC detections, or could not
be sampled due to presence of product. Rpt states that LiRo will continue semi-annual GW sampling
and reporting, continue monthly well gauging for product, perform EFR as required, and implement
bio-augmentation program once there are no significant detections of product within proposed
treatment area. - J. Kolleeny 11/28/22: Reviewed Semi-Annual Monitoring Rpt for Feb. to July 2022
by LiRo Engineers, dated 10/27/22. Wells with a history of LNAPL detections were gauged 6 times
during rpt period; 7 wells had detections of measurable LNAPL (once in MW-03, MW-05, MW-09, MW-11
and DPE-11, and twice in LMW-01 and MW-04), ranging up to 0.05 ft in well MW-03. EFR was performed
on 3/30/22, recovering a total of 120 gals of impacted GW from 7 wells with LNAPL detections. After

NYCDEP (Continued) **S103272814**

EFR event, only one well (LMW-01) had measurable LNAPL (0.01 ft) in subsequent gauging events. GW sampling on Feb. 1-3, 2022 showed well MW-03 had 6,381 ug/L total VOCs (up from 5,819 ug/L in Aug. 2021), well MW-09 had 459 ug/L tVOCs (not sampled in Aug. 2021; had 686 ug/L tVOCs in Feb. 2021), well DPE-08 had 105 ug/L tVOCs (was dry in Aug. 2021; had 55 ug/L tVOCs in Feb. 2021); other wells sampled in Feb. 2022 were either ND or had very low VOC detections. Wells MW-08 and DPE-12 could not be accessed, and well DPE-02 had an obstruction so could not be sampled. LiRo will continue semi-annual gauging of all wells in monitoring program and will gauge all accessible monitoring wells monthly for free product to evaluate presence and migration of product, perform EFR as required by SMP, prepare & submit semi-annual monitoring rpts, and will implement approved RAWP for biological augmentation program once there are no measurable amounts of free product in proposed treatment area. - J. Kolleeny 06/16/23: Reviewed Semi-Annual Monitoring Rpt for August 2022 to January 2023 by LiRo Engineers, dated 5/31/23. During rpt period, LiRo conducted 6 well gauging events to check for free product, but no measurable product was detected in any of these events, so no EFR was performed. However, a product sheen was observed during purging of wells LMW-01, DPE-01, and DPE-08 prior to semi-annual GW sampling in August 2022. Currently, no petroleum-absorbent socks are deployed in any wells. On August 8-11, 2022, GW samples were collected from 13 of 18 wells in monitoring program; samples could not be collected from 5 wells due to lack of access. GW sample results showed well MW-03 had 7,585 ug/L total VOCs (up from 6,381 ug/L in Feb. 2022), well MW-05 had 15 ug/L tVOCs (was ND in Feb. 2022), well MW-09 had 51 ug/L tVOCs (down from 459 ug/L in Feb. 2022), well MW-15 had 16 ug/L tVOCs (up from 1 ug/L in Feb. 2022), well DPE-08 had 95 ug/L tVOCs (down from 105 ug/L in Feb. 2022), well DPE-13 had 54 ug/L tVOCs (up from 10 ug/L in Feb. 2022); other wells samples were ND or had very low detections of VOCs, similar to data for Feb. 2022. LiRo will continue gauging and sampling of site wells and submission of semi-annual rpts, perform EFR events when needed, and implement approved biological augmentation program once there are two consecutive monitoring periods with no measurable free product. - J. Kolleeny 09/22/23: Reviewed Semi-Annual Monitoring Rpt for February to July 2023 by LiRo Engineers, dated 9/12/23. Rpt states that LiRo performed six free product well gauging events during rpt period, but no measurable product was detected so no product recovery was performed. However, sheen or oil droplets were observed in purge water prior to sampling of wells MW-09, DPE-08, and

NYCDEP (Continued) **S103272814**

LMW-01 on 2/1/23. Gauging of
all wells on 2/1/23 showed GW flow to E on west side of site, water table flat in SE part of site,
and a water table depression in NE part of site with flow radially inward. GW sampling on 2/1-2/23
showed well MW-03 had 8,586 ug/L total VOCs (up from 7,585 ug/L in Aug. 2022), well MW-09 had 221
ug/L tVOCs (up from 51 ug/L in Aug. 2022), well DPE-08 had 141 ug/L tVOCs (up from 95 ug/L in Aug.
2022), well DPE-12 had 107 ug/L tVOCs (not sampled since Aug. 2021, when it had just 1 ug/L tVOCs),
well DPE-13 had 69 ug/L tVOCs (up from 54 ug/L in Aug. 2022), well LMW-01 had 36 ug/L tVOCs (up
from 0.35 ug/L in Aug. 2022); other wells sampled were either ND or had very low tVOC levels,
consistent with previous sampling event. Rpt states that Liro will continue semi-annual gauging &
sampling of site wells, perform EFR as needed, monthly gauging of accessible site wells for free
product, and will implement approved biological augmentation program once there have been two
consecutive monitoring periods with no observation of free product in wells. - J. Kolleeny
09/22/23: I sent an email to Steve Frank of LiRo Engineers, cc's to John Proios & Martha DeLozier
of LiRo, Carlos Maldonado and Ricardo Walton of NYCDDC: Steve, I ve reviewed Semi-Annual Monitoring
Rpt for February thru July 2023 pertaining to this spill site. Like many previous semi-annual rpts
for this site, this rpt states that biological augmentation program approved by DEC will be
implemented at site when no free product is observed in site wells for two consecutive monitoring
periods. Both this rpt and previous semi-annual rpt state that no measurable free product was
detected in site wells, but that sheen and oil droplets were observed in purge water from several
wells during GW sampling. Does this not satisfy requirement of two consecutive monitoring periods
with no free product in wells, allowing LiRo to implement biological augmentation program? Or do
you consider presence of sheen and oil droplets in purge water from several wells to be an
impediment to successful implementation of program? Please let me know your thoughts, as I would
like to see some sort of GW remediation implemented at this site to move spill case towards
closure. - J. Kolleeny 09/25/23: Received reply from Steve Frank of LiRo: Jon, we are still
concerned that sheen/oil droplets could affect effectiveness of treatment. That being said, we also
would like to move this site toward closure and will reach out to product provider to see what they
think. - J. Kolleeny 04/09/24: Reviewed Semi-Annual Monitoring Rpt for August 2023 to January 2024
by LiRo Engineers, dated 3/22/24. LiRo performed six monthly free product well gauging events

NYCDEP (Continued) **S103272814**

during rpt period; no measurable free product was detected, so no EFR/product recovery was performed, however, sheen or oil droplets were observed during purging of wells LMW-01, MW-03, MW-09, MW-10, MW-15, DPE-01, and DPE-08 prior to GW sampling in August 2023. Semi-annual well gauging on 8/4/23 indicated GW flow is generally radially inward toward a water table elevation low centered on well DPE-15, consistent with historical GW flow direction, as site has a basement sump pump that discharges to DEP sewer system and affects GW flow. GW sampling on 8/4/23 showed well LMW-01 had 25 ug/L total VOCs (down from 36 ug/L in Feb. 2023), well MW-03 had 6,781 ug/L tVOCs (down from 8,586 ug/L in Feb. 2023), well MW-09 had 383 ug/L tVOCs (up from 221 ug/L in Feb. 2023), well MW-13 had 5 ug/L tVOCs (up from 4 ug/L in Feb. 2023), well MW-15 had 2 ug/L tVOCs (down from 5 ug/L in Feb. 2023), well DPE-08 had 117 ug/L tVOCs (down from 141 ug/L in Feb. 2023), well DPE-12 had 98 ug/L tVOCs (down from 107 ug/L in Feb. 2023), well DPE-13 had 86 ug/L tVOCs (up from 69 ug/L in Feb. 2023); other wells sampled were either ND or had very low detections of VOCs, consistent with past sampling results. LiRo will continue monthly gauging of site wells for presence of LNAPL, conduct EFR as necessary to remove product, conduct semi-annual well gauging and GW sampling, submit semi-annual rpts, and will confirm that 2020 RAWP for biological augmentation remains optimal under current site conditions, and will prepare a bid package to retain a contractor to implement this work. - J. Kolleeny

BROWNFIELDS:

Name:	FORMER NY CLEANING AND DYEING SITE
Address:	376-378 FLUSHING AVENUE
City,State,Zip:	BROOKLYN, NY 11205
Program:	BCP
Site Code:	555285
Acres:	0.882
HW Code:	C224264
SWIS:	2401
Town:	New York City
Record Added Date:	07/25/2017
Record Updated Date:	12/30/2020
Update By:	AMSERVIS
Site Description:	Location: The Former NY Cleaning and Dyeing Site is located in an urban area located in the Bedford Stuyvesant section of Brooklyn (Kings County), New York. The site is comprised of two tax parcels (Block 1884, Lots 40 and 48) totaling 0.8822 acres. The site fronts on Flushing Avenue to the north, Franklin Avenue to the east, and Little Nassau Street to the south. Site Features: The site is being redeveloped into a mixed commercial-residential building. Previously, Lot 40 was a one-story commercial building approximately 13,250 sqft in size, occupied by a door and molding company. Lot 48 was a three

FORMER NY CLEANING AND DYEING SITE (Continued) **S122449226**

2-story commercial buildings occupied by a catering hall, a warehouse for the door and molding company on Lot 40, and office space. According to the NYC Department of Buildings, the current buildings were constructed in 1924 (Lot 48) and 1966 (Lot 40). Current Zoning and Land Use: The site is currently zoned R7A for residential use, with a C2-4 overlay which allows for commercial use. The area immediately surrounding site consists of a three-story commercial building to the southeast and a residential apartment building to the west. Past Use of the Site: The buildings present on the site are in use as a wood door and molding manufacturer and warehouse (Lot 40, p/o Lot 48) and a catering hall (p/o Lot 48). Lot 40 appears to have been redeveloped by 1928 with the existing one-story building identified as Priemo Garage. By 1945 the building was used by Metropolitan Distributers for the storage of ice cream and delivery trucks. From 1928 to 1934, 380 Flushing Avenue (Lot 48) was used as an auto body fabricator while two 1-story buildings, identified as an auto body repair and a paper company, were located in the western portion of the Lot. A sheet metal works was identified on a portion of Lot 48 from 1928-1940. By 1940, a commercial dry cleaning plant (NY Cleaners and Dyeing) occupied all of Lot 48. Based on the 1966 Certificate of occupancy, describing Lot 40 as being used for commercial vehicle storage and trucking terminal, the lack of city directory listings for this lot between 1949 and 1992 and the history of common ownership with Lot 48 by Uniform Rentals Inc., it is probable that both lots were part of the NY Cleaners-Uniform Rental operation with lot 40 being used to store and service the company's vehicle fleet from 1949 through 1986-1987. Although not reflected in the Sanborn Maps, the City Directory listings identify 376 Flushing Ave. (lot 40) as Alexander Supply (door and molding warehouse) in 1997 and 378 Flushing Ave (portion of lot 48) as Exclusive millwork in 1992. Exclusive Door and molding currently occupies both 376 and 378 Flushing Avenue. Therefore, the laundry operations and fleet maintenance garage vacated prior to these dates, most likely in 1986-1987 when Uniform Rentals sold the lots. Site Geology and Hydrology: The elevation of the site is approximately 16 feet above the National Geodetic Vertical Datum (NGVD). The area topography gradually slopes to the west. The depth to groundwater beneath the Site, as determined from field measurements, is approximately 9 to 13 feet below grade. Local groundwater flow is to the east. The nearest surface water body is Wallabout Channel, which is located approximately 0.5 miles from the site.

Env Problem:	Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern in soil and groundwater consist of petroleum related VOCs. Low levels of chlorinated solvents were found in soil vapor. Remedial actions have successfully achieved soil cleanup objectives for unrestricted use. Short-term groundwater monitoring is being managed under a Site Management Plan.
Health Problem:	Remedial actions are complete and measures are in place to prevent people from coming in contact with any residual contamination.

Town:	New York City
Record Added Date:	03/16/2018
Record Updated Date:	06/07/2021
Update By:	JHOCONNE
Site Description:	The area of concern subject to this work is considered off-site from BCP site No. C224264 Former NY Cleaning and Dyeing and reflects the investigation and possible remediation of contamination that may have migrated from that site. This work is being carried out as provided for under the Environmental Conservation Law Section 27-1411.5. Please see C224264 for further information regarding the status of the site in the Brownfield Cleanup program. Location: The Site includes properties around the BCP Site (C224264) located at 376-378 Flushing Avenue. This Site is an off-site project associated with the on-site BCP project as well as Spill No. 1609531. Site Features: The Site does not have definite boundaries since it is an off-site project associated with an on-site BCP project. Potentially impacted areas from the BCP Site Former NY Cleaning and Dyeing include the residential apartment building to the west and the three story commercial building to the east. The off-site areas are not necessarily limited to these areas. Current Zoning and Land Use: The Site is currently zoned M1-2 for manufacturing. The potentially impacted areas from the Former NY Cleaning and Dyeing Site (BCP: C224264) include a residential apartment building to the west and a three story commercial building to the east. Potential for further migration include downgradient impacts from the on-site BCP Site. Past Use of the Site: The Site has not yet been identified for its past historic use. The property potentially impacting the Site but not limited to, The Former NY Cleaning and Dyeing BCP site was historically used for several manufacturing and commercial processes including auto repair shops, storage facilities, and sheet metal works that occupied the BCP site from 1928-1940s. By the 1940s, a commercial dry cleaning plant (NY Cleaning and Dyeing) occupied Lot 48; vehicle storage and NY Cleaners-Uniform Rental services occupied Lot 40 of the site until the late 1980s. Currently, the site is occupied by a door and molding warehouse and a catering hall. Site Geology and Hydrology: Based on the information collected during the investigation of C224264, the soil beneath the site includes silt, sand non-native fill with brick, concrete, coal and other rubble associated with historic fill approximately 5 feet below grade. A native sand and clay layer is present below the historic fill to depths of approximately 12 feet below grade. The evaluation of the surrounding area is approximately 16 feet above the National Geodetic Vertical Datum (NGVD). The areas topography gradually slopes to the west. The depth to groundwater beneath the Site is approximately 9 to

FORMER NY CLEANING AND DYEING SITE - OFF-SITE (Continued) **S126369652**

	13 feet below grade. Local groundwater flow is to the east. The nearest surface water body is Wallabout Channel, which is approximately 0.5 miles northwest.
Env Problem:	During the on-site Remedial Investigation for site C224264, soil and groundwater samples were collected and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, PCBs, and pesticides. Soil vapor samples were analyzed for VOCs. Based upon the results of the RI, the primary contaminants of concern for on-site include vinyl chloride, trichloroethene (TCE) and tetrachloroethene (PCE). Contamination can likely be attributed to activities associated with the historic use of the site for manufacturing activities. Further investigation is needed to fully delineate the extent of off-site contamination.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

INDEPENDENCE TOWERS (Continued) **S104073512**

DEC Region: 2
DER Facility ID: 247446
DEC Memo: 12/14/05: This spill transferred from J.Kolleeny to S.Kraszewski. 03/23/06: This spill transferred to K.Tang - SK 12/10/07: J.Kann - spill reassigned to J.Kann. Spill consolidated with 9601867 (closed) 10/14/10: J.Kann - Investigative Work Plan received on 10/5/10. 05/29/12: J.Kann - priority P0 assigned to site 8/5/14: J.Kann - RAR received on 8/4/14 and under review. 8/7/14: J.Kann - reviewed the site file. In 1992 7 soil borings were advanced and one monitoring well installed. No free product encountered. Some stained soils observed. The tank was subsequently removed and replaced in 1999. The 2014 RAR was also reviewed. 6 borings were advanced and 1 monitoring wells installed. Many difficulties with advancing borings was encountered in the field. Groundwater is at at depth of approximately 45 feet bgs. Two of the deep borings could not advance beyond 35 feet so groundwater was not encountered. Screening did not reveal elevated PID readings, and no visual impacts were observed (see photos in report). Laboratory analysis was ND for groundwater. Soil analysis revealed one location with minor SVOC exceedences. Based on historic data and recent data as well as the tank replacement activities performed, the spill has been closed. NFA

Address:	43 FRANKLIN AVENUE
City,State,Zip:	BROOKLYN, NY 11205
Program:	BCP
Site Code:	630814
Acres:	0.809
HW Code:	C224351
SWIS:	2401
Town:	New York City
Record Added Date:	01/06/2022
Record Updated Date:	02/28/2023
Update By:	SMQUANDT
Site Description:	Location: The 35,250 square feet (0.809-acre) site is located at 43 Franklin Avenue, Brooklyn, NY 11205 in Kings County, identified as Brooklyn Block 1885, Lot 15. The site is located in an urban area in the Bedford Stuyvesant neighborhood and is bound to the north by an auto parts store followed by a mixed-use commercial/office building, to the east by Skillman Street followed by commercial/industrial buildings, to the south by multi-family residential buildings, and to the west by Franklin Avenue followed by a seafood distribution center and a hotel. The site is located within a mixed-use area

FORMER GUTTA PERCHA AND RUBBER MANUFACTURING SITE (Continued) **S128529090**

characterized by low-rise commercial, industrial, and residential buildings. Site Features: The rectangular-shaped lot is paved with asphalt and secured with a 10-foot fence. The site is currently vacant. There are no structures on the site. Current Zoning and Land Use: The site is located within a residential and manufacturing zoning district (R6A and M1-2) with Mandatory Inclusionary Housing (MIH). Past Use of the Site: The site was developed in the late 1800s and was part of the Gutta Percha & Rubber Manufacturing Company, a rubber manufacturing and thermoplastic dental filling company. Early Sanborn Maps depict several small buildings on the site with rooms designated for packing, pressing, and storage. Historical maps identify at least six storage tanks of unknown contents at the Site. Additionally, it is unknown if the storage tanks are above grade or below grade. Tank sizes are not identified with the exception of one, 60,000-gallon tank. In addition, Sanborn Maps dated 1904, 1918, and 1921 depict an 8-inch diameter well in the center of the Site while the property operated as a rubber manufacturing company. By the late 1940s, operations of Gutta Percha & Rubber ceased and the buildings were razed leaving the site as a vacant lot. The lot has been vacant since at least the 1960s, and then served as a parking lot (operations ceased October 2021). Site Geology and Hydrogeology: The site is underlain by historical urban fill predominantly consisting of light brown to dark brown medium to fine sand with trace amounts of silt and clay and varying amounts of loose gravel, brick and asphalt to depths extending approximately 6.5 to 8 ft below ground surface (bgs). The urban fill layer is underlain by a native layer consisting of brown to orange-brown, medium to fine sand with varying amounts of coarse sand, silt, gravel, and intermittent clay lenses. The topography of the site and the surrounding area slopes north towards the Brooklyn Navy Yard Basin and the East River. The ground level elevation at the site is approximately 16 feet above Mean Seal Level. During the December 2021 RI, groundwater was encountered at depths ranging from about 17 to 21 ft bgs and flow is to the northwest.

Env Problem:

Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was analyzed for VOCs. Based on findings summarized in the July 2022 Remedial Investigation Report (RIR), the primary contaminants of concern include SVOCs, metals and pesticides in soil; SVOCs, PFAS and metals in groundwater, and chlorinated VOCs in soil vapor. Soil - Soil data was compared to Unrestricted Use Soil Cleanup Objectives (UUSCOs). Soil impacts at the site primarily consisted of SVOCs, specifically polyaromatic hydrocarbons (PAHs), metals, and pesticides at concentrations exceeding the UUSCOs within the historic fill layer that extends 6.5 - 8.0 ft below ground surface (bgs). No VOCs were detected exceeding the UUSCOs in any of the soil The SVOCs identified exceeding UUSCOs include: benzo(a)anthracene (maximum concentration 62 parts per million, or ppm, compared to UUSCO 1.0 ppm), benzo(a)pyrene (maximum concentration 49 ppm, UUSCO 1.0 ppm), benzo(b)fluoranthene (maximum concentration of 65 ppm, UUSCO 1.0 ppm), and indeno(1,2,3-cd)pyrene (maximum concentration of 35 ppm, UUSCO 0.5 ppm). Metals including arsenic (maximum concentration of 167 ppm, UUSCO 13 ppm); barium (maximum concentration of 646 ppm, UUSCO 350 ppm); lead (maximum concentration of 1,830 ppm, UUSCO 63 ppm); and mercury (maximum concentration of 3.20 ppm, UUSCO 0.18 ppm)

FORMER GUTTA PERCHA AND RUBBER MANUFACTURING SITE (Continued) **S128529090**

were detected throughout the site. One soil sample exceeded the hazardous waste threshold for lead of 5 milligrams per liter (mg/L), with a result of 8.34 mg/L during the December 2021 RI. The hazardous lead area was then delineated for total lead and TCLP lead in May 2022. TCLP lead was not detected at concentrations exceeding the USEPA Allowable Limit of 5 mg/L in any of the samples collected. Three pesticides, 4,4'-DDE (maximum concentration of 0.00693 ppm, UUSCO 0.0033 ppm), 4,4'-DDT (maximum concentration of 0.00868 ppm, UUSCO 0.0033 ppm), and dieldrin (maximum concentration of 0.0186 ppm, UUSCO 0.005 ppm) were identified in shallow soil samples collected from 0-1 ft bgs at concentrations exceeding UUSCOs. Total PFOA/PFAS compounds detected ranged from 0.476 ng/g to 3.68 ng/g in soil samples. Data does not indicate any off-site impacts in soil related to the site. Groundwater - One VOC, chloroform, was identified at a concentration above the NYS Ambient Water Quality Standards (AWQS) with a concentration of 8.7 parts per billion, or ppb (AWQS is 7 ppb). The following six SVOCs, specifically PAHs, were identified at concentrations exceeding AWQS: benzo(a)anthracene (maximum concentration 0.8 ppb, AWQS 0.002 ppb); benzo(a)pyrene (maximum concentration 0.7 ppb, AWQS non-detect), benzo(b)fluoranthene (maximum concentration 0.9 ppb, AWQS 0.002 ppb); benzo(k)fluoranthene (maximum concentration 0.31 ppb, AWQS 0.002 ppb); chrysene (maximum concentration 0.67 ppb, AWQS 0.002 ppb); and, indeno(1,2,3-cd)pyrene (maximum concentration 0.48 ppb, AWQS 0.002 ppb). Five metals were identified in groundwater samples at concentrations exceeding the AWQS. Iron (maximum concentration 2,020 ppb, AWQS 300 ppb); magnesium (maximum concentration 50,700 ppb, AWQS 35,000 ppb); (maximum concentration 7,031 ppb, AWQS 300 ppb); and sodium (maximum concentration 116,000 ppb, AWQS 20,000 ppb) exceeded the NYS AWQS in numerous samples. These metal exceedances are likely naturally occurring and not a result of contamination on site. For the PFAS compounds, Perfluorooctanesulfonic Acid (PFOS) and Perfluorooctanoic Acid (PFOA) were detected at concentrations exceeding the Maximum Contaminant Level, or MCL (drinking water standard) of 10 parts per trillion (ppt) each. PFOS had a maximum concentration of 57 ppt and PFOA had a maximum concentration of 77 ppt. Soil Vapor - TCE was the only chlorinated VOC detected, with a concentration of 26.1 micrograms per cubic meter (?g/m3). Petroleum related VOCS such as benzene, toluene, ethylbenzene, and xylenes (BTEX) concentrations ranged from 10.20 ?g/m3 to 88.60 ?g/m3. Data does not indicate any off-site impacts in soil related to the site.

Health Problem: Since the site is fenced and covered by asphalt or concrete, people will not come into contact with site?related soil and groundwater contamination unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil), may move into buildings and affect the indoor air quality. This process is referred to as soil vapor intrusion. Soil vapor intrusion is not a current exposure concern because there are no occupied buildings on-site, however the potential exists for indoor air impacts via the soil vapor intrusion pathway in any future occupied buildings. Environmental sampling indicates soil vapor intrusion from site contaminants is not a concern off-site.

Contact Name:	ROBERT
DEC Memo:	5-9-17 - Obligado - Desk Duty (Covering for Jenn) - This is an OER remediation site. As per Jeff Vought, this spill is assigned to Pratik Lahkani. Spill summary from Shaminder Chawla OER email on 5-8-17 : RI investigations have been completed at above address. This property has a history of filling station. The filling station was closed last month and the underground storage tanks, pump islands and all associated piping was removed from the Site in March 2017. Specifically, three 4,000-gallon underground storage tanks (USTs) were removed from the Site at this time. No holes or

(Continued) **S120702652**

evidence of release was observed while removing the tanks from the ground. Additionally, endpoint samples collected by EBC showed no detections of CP-51 list VOCs or SVOCs. PBS # 2-600822 The proposed future use of the Site will include a new 5-story residential use building with a full cellar. Approximately half of the cellar level will require excavation to 7.5 feet below grade and the other half will require excavation to 11.75 feet below grade. RIR SUMMARY 1. Depth to groundwater was measured at 7-9 feet below grade surface (bgs); 2. SOIL- No VOC compounds detected in soil; 3. GROUNWATER- Elevated levels of petroleum-related VOCs were detected at concentrations exceeding GQS including 1,2,4-trimethylbenzene (max. 1,800 ug/L), 1,3,5-trimethylbenzene (max. 420 ug/L), benzene (max. 120 ug/L), ethylbenzene (max. 1,700 ug/L), isopropylbenzene (max. 160 ug/L), naphthalene (max. 340 ug/L), n-butylbenzene (max. 20 ug/L), n-propylbenzene (max. 300 ug/L), o-xylene (max. 1,100 ug/L), p-isopropyltoluene (max. 5.8 ug/L), sec-butylbenzene (max. 17 ug/L), styrene (max. 6.4 ug/L), and toluene (max. 390 ug/L); and 4. SOIL VAPOR - Soil vapor has trace concentrations of BTEX (max. of 193 g/m3), and no chlorinated VOCs. 05/10/17 - Lakhani As per DEC Vought, may have to consult with NYSDOH on vapor mitigation efforts in the new building unless the basement of the new building will be a ventilated parking garage, as the proposed depth of part of the new building is 7.5'bg and the contaminated groundwater is 7'-9'bg. OER Project #17TMP0397K File Review: RIR (EBC, 05/2017) - The proposed future use of the site will include a new 5-story residential use building with a full cellar. The cellar level of the building will consist of residential and accessory, open cellar space. Past uses of the site were commercial and residential which includes a radiator repair shop. By 1977 the site was developed into a filling station. The filling station was closed and USTs, pump islands and all associated piping was removed from the site in March 2017. Water level data was collected from four (4) monitoring wells. Depth to groundwater was measured at 7.12'-8.92'bg. Thirteen (13) soil samples were collected to be analyzed. Five (5) soil vapor probes were installed. One of the soil vapor samples could not be sampled because the vapor point flooded. Soil vapor probes were installed to a depth of 10'bg which represents the proposed new building's cellar foundation depth. Soil results are as follow: xylene 4300 ppb(SB-2, 0-2'bg), xylene 1010 ppb(SB-4, 8-10'bg). Groundwater results are as follow: benzene 9.3 ug/L(MW1), 1,2,4-trimethylbenzene 1800 ug/L(MW3), 1,3,5-trimethylbenzene 420 ug/L(MW3), benzene 120 ug/L(MW3), ethylbenzene 1700 ug/L(MW3), naphthalene 340 ug/L(MW3),

In his email, NYSDOH Nathan Walz notices an oddity in the vapor sampling. It is stated in the RIR
that groundwater was measured to a depth of 7.12-8.92'bg, however, the soil vapor samples were
collected at 10'bg. This would make them underwater, although, one of the points did flood. This
does not follow the NYSDOH's protocol which states that soil vapors must be sampled at either 5'bgs
or 2' above the groundwater interface. The below link includes several reports related to the spill
case:
https://www.dropbox.com/sh/fv25ppuoj1oqb1l/AADuZPMTwZvnuMOegomX4M1Ga?dl=0 05/11/17 - Lakhani
Three (3) 4000 gallon USTS were excavated and removed from the site in March 2017. Removal was
completed by CDSP, Inc. Tank removal work included excavating overlying or adjacent soil to expose
the individual tanks, removing and disposing of the tank contents, removing the tanks, and
disposing of the tank as recycled scrap metal. All dispensers, piping, and associated service
station equipment were also removed. The USTs were inspected and there was no evidence of holes in
any of the tanks. CDSP collected endpoint samples and screened them with a PID. Readings were
negligible and there was no visual/olfactory evidence of contamination. The five (5) endpoint
samples showed no exceedances of CP-51 SCLs for VOCs or SVOCs. 05/30/17 - Lakhani On 05/24/17,
spoke to OER Chawla regarding further remediation at the site. DEC Lakhani recommended a second
round of groundwater sampling. Upon receiving the groundwater data, if values are high then plans
will be developed and included in the RAWP as an addendum to treat the

(Continued) **S120702652**

water possibly by ORC. Soil
contamination is not of concern since excavation will be taking place down to groundwater. On
05/25/17, NYSDOH Nathan Walz emails to inform that the description of past use of the site fails to
report that there used to be until June 2009 or later two attached garage bays where automobile
work most likely occurred. It appears that there is a lack of data in the vicinity of former garage
area where they may have been floor drains etc., that may have led to subsurface contamination.
Nathan recommends collection of additional soil, groundwater, and soil vapor samples in this area.
Furthermore, the report does not state why only two (2) of the six (6) soil borings go to the
groundwater interface and the remainder are shallow 0-2 feet samples. As per the RIR, soil boring
samples were collected continuously from the surface to a final depth of 10' bg... Soil recovered
from each soil boring was field screened for the presence of VOCs with a PID and visually inspected
for evidence of contamination. Two (2) soil samples were retained from each soil boring
representing the shallow, 0-2' interval and deep, 8-10' interval except for at SB1 where an
additional soil sample was collected from the 6-8'interval. 07/06/17 - Lakhani OER Shaminder sent
the following the email: By the time we got your email that additional work is not needed, EBC was
in field collecting additional data. Attached is the new data and the old data combined for the 436
Flushing Ave site. The two additional borings SB7 & SB8 did were pretty consistent with the April
data, the groundwater data was slightly better and the soil vapor data was pretty consistent. Also,
the groundwater flow direction stayed pretty close to the same. We have reviewed RAWP prepared by
EBC. Edited clean and redline copies are attached. Pdf version is in EPIC. Basically, RAWP
requires: 1. Track 4 remedy full property excavations ranging from 7.5 to 11.5 feet below grade. 2.
Localized dewatering (GW table at 7) 3. End point sampling 4. Waterproofing/vapor barrier system
Grace 300R product 5. Composite cover with 6 concrete slab 6. Post excavation GW monitoring if
required by DEC This is rush job. We are planning to approve documents by end of this week. Let me
know if you have any comments 09/12/17 - Lakhani DEC Lakhani required a third round of post
excavation groundwater monitoring to confirm attenuation. 10/18/17 - Lakhani OER Shaminder informed
that all five (5) groundwater wells have been destroyed. DEC Lakhani confirmed that the wells do
not have to be reinstalled and so there is no continued monitoring required as there are no
sensitive receptors downgradient from the site. A third round of groundwater samples was not

(Continued) **S120702652**

collected since the wells were destroyed. 11/14/17 - Lakhani Three (3) tanks have been found on section B2 of the property. One tank was found on 10/20/17, another on 10/25/17 and the last on 11/01/17. The tanks were removed and endpoint samples were collected. Most samples results were returned indicating no VOC and SVOC exceedances, except UST-B for the tank found on 10/25/17. The concentration for xylene in UST-B was 427 ug/kg(5'bg). The final depth of excavation in this tank excavation area is 7'bg. 11/29/17 - Lakhani RAWP (EBC, 06/2017) - The proposed remedial action will consist of: 1) Selection of Track 4 Site Specific SCOs, 2) Completion of a waste characterization study prior to excavation activities, 3) pproximately half of the Site's footprint will require excavation to 7.5 feet below grade and the other half will require excavation to 11.75 feet below grade for the installation of the cellar level. Additional excavation will be required for the installation of footers and the elevator pit, 4) Removal of any additional UST is encountered, 5) Since groundwater is present at approximately 7 to 9 feet below grade and the redevelopment will require excavation from approximately 7 to 11.75 feet below grade for the installation of the cellar as well as an additional 5.5 feet for an elevator pit, groundwater will be encountered and local dewatering will be needed, 6) Collection of five (5) endpoint samples across the building's footprint, and 7) Installation of a waterproofing/vapor barrier system below the building's concrete poured slab as well as behind foundation walls of the proposed building. 12/28/17 - Lakhani EBC uploaded the endpoint samples to OER EPIC. Five (5) locations (EP1 through EP5) were sampled and vertically delineated. Sample results are as follow: 1,2,4-trimethylbenzene 6400 ppb(EP1, 11.5'bg), ethylbenzene 2000 ppb(EP1, 11.5'bg), toluene 1200 ppb(EP1, 11.5'bg), xylene less than 6570 ppb(EP1, 11.5'bg), 1,2,4-trimethylbenzene 13000 ppb(EP2, 11.5'bg), ethylbenzene 2700 ppb(EP2, 11.5'bg), toluene 1000 ppb(EP2, 11.5'bg), xylene less than 12240 ppb(EP2, 11.5'bg), 1,2,4-trimethylbenzene 4000 ppb(EP2, 12'bg), xylene less than 3290 ppb. Clean soils were encountered at 12.5'bg at EP1 and at 13'bg at EP2. No exceedances were observed in EP3 through EP5. 06/22/18 - Lakhani EBC informed that the current slab is roughly 7'bg on the southern half of the property and just over 10' on the northern. This required excavation depths of approx. 8' on the south side and 11'-11.5' on the north side. However, additional soil was removed from the north side after the first couple of endpoints failed. The northern portion of the property was excavated to 13'-13.5'bg at which depth groundwater was beginning to daylight.

(Continued) **S120702652**

This area was brought back to
the desired grade with 3/4 bluestone before pouring the 6 -8 cellar
floor. 08/05/19 - Lakhani -
Spill being transferred to Lin. 6/21/21-Lin-Reviewed Remedial Action
Report from NYCOER database.
USTs on-site were removed and endpoint samples came back clean. Soil
was excavated 8' to 10' bgs
across the entire site and bottom samples collected across the site
came back clean. Groundwater
was encountered 7' to 9' bgs. Monitoring wells were destroyed during
the excavation. Composite
cover was installed across the site as well as a waterproofing vapor
barrier. The source of
contamination (USTs and soil) were removed and groundwater
contamination is expected to attenuate
over time. The site will continue to be listed as E designated site.
Case closed.

Site Description: Location: The Skillman Street Holder Station is located in an urban area, at 7 Skillman Street, Brooklyn, NY. Site Features: The 7 Skillman Street parcel is completely covered by a two-story building. This building is used as a banquet/catering hall. Current Zoning/Use: The property is currently in active use as a banquet hall, and is zoned for mixed use, which includes residential, commercial, and light industrial uses. The surrounding parcels are currently used for a combination of commercial and residential purposes. The nearest residential building is approximately 150 feet to the southwest. Past Use of the Site: Two manufactured gas storage holders were constructed at the site between 1887 and 1904. These holders were operated solely as gas distribution holders, and no gas production facilities were present. At some point prior to 1935, gas storage operations ceased and the holders were demolished. The site remained

K - SKILLMAN ST. STATION (Continued) **S109321184**

under the ownership of the Brooklyn Union Gas Company until sometime prior to 1947. Upon being sold the property was used for automobile parking and storage. By 1950, the site was used as an automobile repair facility which remained until at least 1993. In 2003, the existing building was developed into a catering hall, which is presently in operation. Site Geology and Hydrogeology: The site is underlain by fill material, alluvial sands, glacial outwash and bedrock at depth. Groundwater is typically found at approximately 7 to 16 feet below ground surface (bgs), and flows generally to the west-northwest.

Env Problem: Based upon investigations conducted to date, the primary contaminants of concern are the volatile organic compounds (VOCs) benzene, toluene, ethylbenzene and xylene (together known as BTEX), and styrene; polycyclic aromatic hydrocarbons (PAHs); and metals. Soil- The subsurface soil exceedances for on-site VOCs (BTEX) were slightly above unrestricted soil cleanup objectives (USCOs), though no samples exceed the restricted residential SCOs. However sampling of soil beneath the site was limited due to the inability to access much of the property with a drill rig, and a source area of higher contaminant concentrations may be present beneath the buildings. Adjacent to the site, in a sample collected beneath Skillman Street at a depth of approximately 27 feet where evidence of coal tar was observed, the concentration of toluene was 160 ppm, ethylbenzene was 220 ppm, and xylenes were 840 ppm in subsurface soil. Styrene was also detected at this location at a concentration of 400 ppm. There were no detections of chlorinated solvents or total cyanide in soil above unrestricted SCOs either on or off-site. The PAH exceedances above unrestricted SCOs consisted of benzo(b)fluoranthene, benz(a)anthracene, benzo(a)pyrene, chrysene, indeno(1,2,3-cd)pyrene, and naphthalene. Adjacent to the site the concentration of naphthalene was 1000 ppm (at 27 feet below ground surface). The only inorganics to exceed unrestricted SCOs were lead and mercury, although neither exceeded the restricted residential SCOs in soil. Groundwater - Samples collected from monitoring wells located both on-site (temporary sampling points) and off-site exceeded groundwater quality standards (GWQS) for benzene, toluene, ethylbenzene, xylenes (BTEX) compounds, naphthalene, chlorinated VOCs, cyanide, and metals. On-site, benzene ranged from 13 to 5,600 ppb (GWQS of 1 ppb), toluene at 20,000 ppb (GWQS of 5 ppb), ethylbenzene at 12,000 ppb (GWQS of 5 ppb), xylenes at 9,400 ppb (GWQS of 5 ppb), isopropyl benzene at 420 ppb (GWQS of 5 ppb), styrene at 82 ppb (GWQS of 5 ppb), cis-1,2-dichloroethene at 9.2 ppb (GWQS of 5 ppb), naphthalene at 5,600 ppb (GWQS of 10 ppb), total cyanide at 240 ppb (GWQS of 200 ppb), chromium at 380 ppb (GWQS of 50 ppb), and lead at 280 ppb (GWQS of 25 ppb). Elevated BTEX and napthalene also indicate the possible presence of MGP-related contaminants in the subsurface beneath the building. Off-site, detections of benzene range from 100 ppb to 410 ppb; toluene from 79 ppb to 1,100 ppb; ethylbenzene from 32 ppb to 930 ppb; xylenes from 100 ppb to 3,900 ppb; tetrachloroethene (PCE) from 5.6 to 9,400 ppb; trichloroethene (TCE) from 140 to 1,900 ppb; vinyl chloride from 200 to 380 ppb; cis-1,2-dichloroethene from 600 ppb to 8,000 ppb; isopropyl benzene from 64 ppb to 420 ppb; styrene from 82 ppb to 1,800 ppb; and naphthalene from 62 ppb to 5,600 ppb. There were also eight inorganic compounds that exceeded the groundwater standards in both on-site and off-site wells. These compounds were copper, iron, magnesium, manganese, nickel, selenium, sodium, and thallium, all of which are not associated with the former

K - SKILLMAN ST. STATION (Continued) **S109321184**

MGP operations. Soil Vapor - Soil vapor samples collected from the site contained elevated levels of both MGP-related and non-MGP-related compounds. The MGP-related detections included benzene at 35 ug/m3; toluene at 96 ug/m3; ethylbenzene at 12 ug/m3; xylenes at 40 ug/m3; 1,2,4-trimethylbenzene at 12 ug/m3; and nonane at 8.4 ug/m3. The non-MGP constituents included PCE at 12,000 ug/m3, TCE at 1,200 ug/m3, and cis-1,2-dichloroethene at 1,500 ug/m3. Indoor Air - The contaminants present in soil vapor at elevated levels were detected at much lower concentrations in indoor air. The highest concentration of the BTEX compounds was toluene at 6.3 ug/m3. PCE was detected at a concentration of 0.66 ug/m3; TCE at 0.21 ug/m3; and ethanol at 450 ug/m3. The ethanol concentrations in indoor air were approximately an order of magnitude larger than the soil vapor concentrations, indicating the source to be within the building. No indoor air guidance values were exceeded for any compound. The owners of the affected property have been notified where mitigation or monitoring of impacts to indoor air is required. In 2018, several monitoring wells were sampled for PFAS and 1,4-dioxane as part of the Department's Emerging Contaminants initiative. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfanoic acid (PFOS) were reported at concentrations of up to 180 and 45 parts per trillion (ppt), respectively, exceeding the 10 ppt screening levels for groundwater for each. Individual PFAS exceeding the 100 ppt screening level included perfluorohexanoic acid (PFHxA) at a concentration of 208 ppt. Total PFAS, including PFOA and PFOS, were reported at concentrations of up to 817 ppt, which is above the 500 ppt screening level for total PFAS in groundwater. An Interim Site Management Plan (ISMP) is in place that governs soil disturbance and the required groundwater monitoring.

Health Problem: Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move in to the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Mitigation has been recommended to address the potential for people to inhale contaminants in indoor air of the onsite building due to soil vapor intrusion. Environmental sampling indicates that soil vapor intrusion is a concern for off-site buildings which are occupied.

Site Description: See Site 224068 Site Description Location The site is associated with the address at 7 Skillman Street (Tax Block 1886, Lots 19 and 30) in the Bedford-Stuyvesant neighborhood of Brooklyn, New York. Tax block 1886 is bordered by Flushing Avenue to the north, Bedford Avenue to the east, Park Avenue to the south, and Skillman Street to the west. Site Features The site occupies an area of about 30,710 square feet (0.705 acres). Lot 19 is improved with a two-story building. Lots 30 is an asphalt and concrete-paved vacant lots. The building on Lot 19 is used as a catering/banquet hall (Eden Palace) and is registered as a New York State Superfund site (Site #224068), managed by the New York State Department of Environmental Conservation (NYSDEC). Current Zoning and Land Use According to the New York City Planning Commission (NYCPC) Zoning Map 12d, the site is located in both an M1-2/R6A and MX-4 district. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. Offices, hotels and most retail uses are also permitted. R6A is a contextual district where the Quality Housing bulk regulations are mandatory. These regulations produce high lot coverage, six- to eight-story apartment buildings set at or near the street line. The Quality Housing Program also requires amenities relating to interior space, recreation areas and landscaping. The Special Mixed Use District (MX) encourages investment in existing neighborhoods with mixed residential and industrial uses in close proximity and creates expanded opportunities

K - SKILLMAN ST. STATION (Continued) **S109321184**

for new mixed use communities. The proposed use is consistent with applicable zoning laws and maps. Past Use of the Site The March 2014 Site Characterization Report and March 2017 Interim Site Management Plan, prepared by GEI Consultants, Inc., P.C. (GEI) for the Skillman Street Holder Station (7 Skillman Street, Lot 19) indicates that the site was located in a densely developed urban area, characterized by residential, commercial, and industrial uses. Lot 19 was developed with five unknown structures, by at least 1869 and operated as a manufactured gas plant (MGP) from about 1884 to 1940 by several companies, including The People s Gas Light Company and The Brooklyn Union Gas Company . Gas Holder No. 1 was built prior to 1884, and Holder No. 2 was built in 1891. The gas holders were reportedly used for gas distribution, as no gas production facilities were identified in historical records. Gas storage ended sometime before 1935 and the holders were partially demolished. By 1947, the site was used for automobile parking and automobile repair until 2002. In 2003, the building was redeveloped into a catering and banquet hall, which remains in use at present day. According to historical Sanborn Maps, the southern and western parts of Lot 30 were used as a junk yard between 1918 and 1935. By 1947, the junk yard was no longer present and the northwestern part of Lot 30 was improved with a building labeled as a machine shop. The Sanborn Maps do not identify the use between 1950 and 1965, but indicate the site was vacant between 1977 and 2003. The 2003 map depicts the northern entrance to the banquet/catering hall. Site Geology and Hydrogeology GEI conducted site characterization sampling in June 2013. One soil boring was installed in Lot 30, and three soil borings were installed in Lot 19. According to soil descriptions provided in GEI s Interim Site Management Plan the proposed brownfield site is predominantly underlain by uncontrolled fill, characterized by mostly brown and gray sand with varying amounts of silt, brick fragments, gravel, glass, concrete, coal and coal fragments, extending to about 18 to 26.5 feet below grade surface (bgs). Native soil was not encountered in the three borings on Lot 19 because of apparent refusal, which is suspected to be the bottom of the former gas holders. The uncontrolled fill was underlain by fine to medium sand and silt in the boring on Lot 30. Groundwater was reported between elevation 13 and 7 feet, as referenced to the North American Vertical Datum of 1988 (NAVD88) during GEI s 2013 site characterization sampling. Groundwater in the general area appears to flow west; however, according to GEI, groundwater at the site also flows southeast towards the Marcy Ave Metropolitan Transit Authority (MTA) dewatering system, which is located about 2,500 feet northwest of the site.

Env Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

Description:	Location: The Skillman Street Holder Station is located in an urban area, at 7 Skillman Street, Brooklyn, NY. Site Features: The 7 Skillman Street parcel is completely covered by a two-story building. This building is used as a banquet/catering hall. Current Zoning/Use: The property is currently in active use as a banquet hall, and is zoned for mixed use, which includes residential, commercial, and light industrial uses. The surrounding parcels are currently used for a combination of commercial and residential purposes. The nearest residential building is approximately 150 feet to the southwest. Past Use of the Site: Two manufactured gas storage holders were constructed at the site between 1887 and 1904. These holders were

K - SKILLMAN ST. STATION (Continued) **S109321184**

operated solely as gas distribution holders, and no gas production facilities were present. At some point prior to 1935, gas storage operations ceased and the holders were demolished. The site remained under the ownership of the Brooklyn Union Gas Company until sometime prior to 1947. Upon being sold the property was used for automobile parking and storage. By 1950, the site was used as an automobile repair facility which remained until at least 1993. In 2003, the existing building was developed into a catering hall, which is presently in operation. Site Geology and Hydrogeology: The site is underlain by fill material, alluvial sands, glacial outwash and bedrock at depth. Groundwater is typically found at approximately 7 to 16 feet below ground surface (bgs), and flows generally to the west-northwest.

Assess Env: Based upon investigations conducted to date, the primary contaminants of concern are the volatile organic compounds (VOCs) benzene, toluene, ethylbenzene and xylene (together known as BTEX), and styrene; polycyclic aromatic hydrocarbons (PAHs); and metals. Soil- The subsurface soil exceedances for on-site VOCs (BTEX) were slightly above unrestricted soil cleanup objectives (USCOs), though no samples exceed the restricted residential SCOs. However sampling of soil beneath the site was limited due to the inability to access much of the property with a drill rig, and a source area of higher contaminant concentrations may be present beneath the buildings. Adjacent to the site, in a sample collected beneath Skillman Street at a depth of approximately 27 feet where evidence of coal tar was observed, the concentration of toluene was 160 ppm, ethylbenzene was 220 ppm, and xylenes were 840 ppm in subsurface soil. Styrene was also detected at this location at a concentration of 400 ppm. There were no detections of chlorinated solvents or total cyanide in soil above unrestricted SCOs either on or off-site. The PAH exceedances above unrestricted SCOs consisted of benzo(b)fluoranthene, benz(a)anthracene, benzo(a)pyrene, chrysene, indeno(1,2,3-cd)pyrene, and naphthalene. Adjacent to the site the concentration of naphthalene was 1000 ppm (at 27 feet below ground surface). The only inorganics to exceed unrestricted SCOs were lead and mercury, although neither exceeded the restricted residential SCOs in soil. Groundwater - Samples collected from monitoring wells located both on-site (temporary sampling points) and off-site exceeded groundwater quality standards (GWQS) for benzene, toluene, ethylbenzene, xylenes (BTEX) compounds, naphthalene, chlorinated VOCs, cyanide, and metals. On-site, benzene ranged from 13 to 5,600 ppb (GWQS of 1 ppb), toluene at 20,000 ppb (GWQS of 5 ppb), ethylbenzene at 12,000 ppb (GWQS of 5 ppb), xylenes at 9,400 ppb (GWQS of 5 ppb), isopropyl benzene at 420 ppb (GWQS of 5 ppb), styrene at 82 ppb (GWQS of 5 ppb), cis-1,2-dichloroethene at 9.2 ppb (GWQS of 5 ppb), naphthalene at 5,600 ppb (GWQS of 10 ppb), total cyanide at 240 ppb (GWQS of 200 ppb), chromium at 380 ppb (GWQS of 50 ppb), and lead at 280 ppb (GWQS of 25 ppb). Elevated BTEX and napthalene also indicate the possible presence of MGP-related contaminants in the subsurface beneath the building. Off-site, detections of benzene range from 100 ppb to 410 ppb; toluene from 79 ppb to 1,100 ppb; ethylbenzene from 32 ppb to 930 ppb; xylenes from 100 ppb to 3,900 ppb; tetrachloroethene (PCE) from 5.6 to 9,400 ppb; trichloroethene (TCE) from 140 to 1,900 ppb; vinyl chloride from 200 to 380 ppb; cis-1,2-dichloroethene from 600 ppb to 8,000 ppb; isopropyl benzene from 64 ppb to 420 ppb; styrene from 82 ppb to 1,800 ppb; and naphthalene from 62 ppb to 5,600 ppb. There were also eight inorganic compounds that exceeded the

K - SKILLMAN ST. STATION (Continued) **S109321184**

groundwater standards in both on-site and off-site wells. These compounds were copper, iron, magnesium, manganese, nickel, selenium, sodium, and thallium, all of which are not associated with the former MGP operations. Soil Vapor - Soil vapor samples collected from the site contained elevated levels of both MGP-related and non-MGP-related compounds. The MGP-related detections included benzene at 35 ug/m3; toluene at 96 ug/m3; ethylbenzene at 12 ug/m3; xylenes at 40 ug/m3; 1,2,4-trimethylbenzene at 12 ug/m3; and nonane at 8.4 ug/m3. The non-MGP constituents included PCE at 12,000 ug/m3, TCE at 1,200 ug/m3, and cis-1,2-dichloroethene at 1,500 ug/m3. Indoor Air - The contaminants present in soil vapor at elevated levels were detected at much lower concentrations in indoor air. The highest concentration of the BTEX compounds was toluene at 6.3 ug/m3. PCE was detected at a concentration of 0.66 ug/m3; TCE at 0.21 ug/m3; and ethanol at 450 ug/m3. The ethanol concentrations in indoor air were approximately an order of magnitude larger than the soil vapor concentrations, indicating the source to be within the building. No indoor air guidance values were exceeded for any compound. The owners of the affected property have been notified where mitigation or monitoring of impacts to indoor air is required. In 2018, several monitoring wells were sampled for PFAS and 1,4-dioxane as part of the Department's Emerging Contaminants initiative. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfanoic acid (PFOS) were reported at concentrations of up to 180 and 45 parts per trillion (ppt), respectively, exceeding the 10 ppt screening levels for groundwater for each. Individual PFAS exceeding the 100 ppt screening level included perfluorohexanoic acid (PFHxA) at a concentration of 208 ppt. Total PFAS, including PFOA and PFOS, were reported at concentrations of up to 817 ppt, which is above the 500 ppt screening level for total PFAS in groundwater. An Interim Site Management Plan (ISMP) is in place that governs soil disturbance and the required groundwater monitoring.

Assess Doh: Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move in to the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Mitigation has been recommended to address the potential for people to inhale contaminants in indoor air of the onsite building due to soil vapor intrusion. Environmental sampling indicates that soil vapor intrusion is a concern for off-site buildings which are occupied.

Update By:	DJEVANS
Site Description:	Location: The site is located in the Bedford-Stuyvesant section of Brooklyn. The site is generally rectangular in shape with 193 feet of frontage along Bedford Avenue. The site is comprised of a single tax parcel (Block 1886, Lot 44). The site is approximately 0.46 acres in size. Site Features: Now that contamination has been removed, construction of a 7-story mixed-use commercial-residential building, which will cover the entire site, is underway. Current Zoning and Land Use: The current use of the site is vacant, zoned mixed commercial (M1-2 / R6A zoning) use. Past Use of the Site: According to Sanborn maps the southern portion of the site was occupied by a carriage repository in 1904 while the northern portion was occupied by single family homes. By 1918 the southern portion became occupied by a 50-car garage with underground gasoline tanks. By 1947 auto sales and service was added to the front portion of the garage. In 1950 the rear portion of the site remained residential. Sometime between 1965 and 1977 the homes on the northern portion were removed and replaced with a 1-story building identified as used auto sales. The use of the site remained as auto sales and auto repair through 1993 when the buildings were shown as vacant. The gas tanks remained on all the maps from 1918 through 1996. Site Geology and Hydrogeology: The elevation of the site ranges from 19 to 21 feet above the National Geodetic Vertical Datum (NGVD). The area topography gradually slopes to the north. Soil at the site is described as historic fill materials to a depth ranging from 4 to 6 feet below the surface followed by native silty-sand and gravel. The depth to groundwater beneath the Site is approximately 12 feet below grade and flows to the southwest toward dewatering wells at a subway station.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum-related VOCs, including ethylbenzene, n-propylbenzene, xylene, and 1,3,5-Trimethylbenzene (1,3,5-TMB) which exceeded the unrestricted use soil cleanup objectives (UUSCOs). Metals (copper, lead, mercury, and zinc) were also detected in the soil exceeding UUSCOs. Remedial actions have successfully achieved soil cleanup objectives for unrestricted use. Low level VOCs found in soil vapor were addressed by the extensive site excavation (source removal) and following a

744 BEDFORD AVENUE (Continued) **S116712571**

	soil vapor intrusion evaluation, no further actions were necessary to address exposures related to soil vapor intrusion.
Health Problem:	Remedial actions are complete and have eliminated the potential for contact with site-related contaminants.

DEC Region:	2
DER Facility ID:	524404
DEC Memo:	6/7/2018 - Feng - Duty Desk. Spoke to Peter Mirabile of Millennium Tank Services. He went through old files and came across this one. There are (2) 20,000-gallon USTs tested on 1/12/2018. 1 passed and 1 failed with suspected the vent line . Not know if the owner reported that, but he was notified. No notes indicates of any actual spill. He gave the contact information of the property manager. Peter Mirabile Millennium Tank Services 718-685-2545 Spoke with Robert. The tank tester did not notify them right away. He did get a call a week ago. The building is running on gas 95% of the time. But in winter, when the temperature below 15 degree, they had to use the oil. They have two 20,000-gallon tanks. The tanks are no in use at this time. They had last delivery in Jan or Feb 2018. According to the National Grid rule, they have to maintain the oil to a certain level. There is oil inside, but not in full. Staff advised him that do the tight test again, find the problem if it fails, repair, and then retest. Robert Property Manager 917-299-6195 Robert1210_2000@yahoo.com 8/10/2018 - Feng - Reviewed the Spill Closure Report, dated 8/9/2018, by CC Controlled Combustion Co., Inc. The report states that the investigation showed that the manhole cover on the tank was leaking. The manhole covers, gaskets, and bolts on both tanks were replaced. Both tanks were retested on 6/21/2018 and passed the retest. Requests spill closure. No actual spill. Repair has been made to the tanks and the tanks passed the retest. Spill is closed.
Remarks:	tank failure, possibly vent line failure.

(Continued) **S104279121**

03/02/07. spoke with Mr. Balinco, property manager. he doesn't know anything about contamination soil at site. this proeprty occupies block between Ryerson st and Grand Ave (main office). building area along Ryerson st is vacant since 1999, which was found with contaminated soil. asked Mr. Balinco to find out tank closure report. Yaniv Balinco Moishe's Self Storage 32 Grand Avenue Brooklyn, NY 11205 Ph. (718) 237-9735 Fax (718) 237-9771 email: ybalinco@moishesselfstorage.com 03/08/07-Hiralkumar Patel. tried to reach Mr. Balinco but he is on vacation and will be back on 03/27/07. 06/14/07-Hiralkumar Patel. PBS #: 2-602131. as per PBS record, site had two 5000 gal #2 oil USTs and were removed in 2000. from city records, property owner: Ryerson Street Realty Corp. 450 W 15th Street New York, NY 10011-7097 and alternate addresses: 35-57 Ryerson street, 315-333 Park Avenue, 32 Grand Avenue. sent letter to Mr. Balinco at 32 Grnad Avenue and also to Ryerson St Realty corp requiring soil/groundwater investigation in area of previously removed tanks. letter emailed to Mr. Balinco. 06/26/07-Hiralkumar Patel. letter, that was sent to Ryerson St REalty corp address, came back undelivered. 07/25/07-Hiralkumar Patel. spoke with Mr. Balinco. he didn't received any letter. sent copy of previously sent letter to Mr. Balinco at different email address (brooklynstorage@moishes.com). 08/20/07-Hiralkumar Patel. received call from Mr. Bartley from Accutech. he mentioned about tank closure report dated Oct. 18, 2000. asked Mr. Bartley to submit that report. James Bartley Accutech Environmental Services Ph. (732) 739-6444 Ext. 14 08/27/07-Hiralkumar Patel. received report from James. abstract: - report prepared on Oct. 18, 2000 - Accutech removed one 12,000 gal #2 UST and one hydraulic lift and abandoned one 12,000 #2 oil UST - western UST (UST #1) was located immediately adjacent to the footings of a loading dock existing on the adjacent property - was determined that the removal of UST #1 would seriously undermine the footings of loading dock, so UST #1 was abandoned-in-place with cement slurry - eastern UST (UST #2) was removed - stained soil was observed around the fill pipes of both USTs and on the bottom of the UST's excavation - groundwater was not encountered in the bottom of the UST's common excavation at approx. 16 ft bg - 8 inch thick concrete anchor slab, on which the USTs were installed, was found on the bottom of the UST's excavation - sandy clay found from 2 ft to 10 ft and silty clay was found from 10 ft to 16 ft depth - tops of the UST's were located approx. 3.5 ft bg - no holes were found in UST #2 - stained soil was removed from the northern, eastern and southern sidewalls and the bottom of the excavation - excavated was extended vertically to approx. 16 ft bg in the eastern portion of the excavation, between the edge of the anchor slab and the buildng foundations - UST #1 was inspected in place. no holes were observed on the exposed top and eastern side of UST #1 - hydraulic lift, located immeidately adjaced to the eastern sidewall of the UST's excavation, was corroded and stained sol was observed on top, around and beneath the hydraulic lift - total of 113.47 tons of contamianted soil was removed - collected a total of 14 post-excavation soil samples from sidewalls and bottom of the UST's and hydraulic lift's common excavation - samples were analyzed via TCLP methods - found SVOC contamination in all samples and VOC contamination in one sample P-1, bottom sample under hydraulic lift discussed with DEC Krimgold. as excavation done below tank bottom and no groundwater was encoutnered, after reviewing analytical data, Krimgold asked to close the case. case closed.

Remarks: THEY HAVEN'T GOT WATER SAMPLES YET JUST SOIL SAMPLES - CONTAMINATED

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This gasoline spill case has been reassigned from DEC (Sigona) to Rommel on January 7, 2004. Jones - March 2006 - Reporter's and Spill location phone numbers no longer in service. Recommend return to region 1. Next step: Establish contact with current occupant of the site or track down former owner. 5/16/2006 - Mike - Could not find a contact for current site occupant. Contacted Protest Enterprises who had the same old information the Spill Report states, However Protest the company who did the test has records that tank was tested again on the same day which the tank passed. Also stated there was no spill.
Remarks:	TESTED TANK, TANK FAILED

DEC Memo:	09/23/2011-Zhune spoke to Kevin Brusse from Environmental Business Consultant 631-504-6000 He said. They are doing Phase II for potential purchaser. They found one UST not properly abandoned. Yesterday they did boribgs arround the tank and found soil contaminated. They went 20' down and found a gray sheen in the groundwater interface. They collected soil and groundwater samples. 05/14/12-Zhune called to Kevin Brusse. He said the site has been accepted into the Brownfield

EAST COAST INDUSTRIAL UNIFORM CORP (Continued) **1000391505**

program. He also said Mandy Yau is the project manager for this site.
05/14/12- Zhune spoke to Jane
O'Connell she request to assign this spill to Mandy Yau.

Remarks: Caller advised during inspection of property found a leaking fuel tank unknown amount of oil spilled into soil. Clean up is pending.

Site Description: This site was terminated. Plume track down 224251 identified 735 Bedford Avenue/12 Spencer Street at the source of CVOC contamination. The plume trackdown project was originally called the Spencer Street Groundwater plume trackdown. The name was changed to 735 Bedford Avenue in 2018. The plume trackdown project was generated based on information collected on the public sidewalk of Spencer Street between Flushing Avenue and Park Avenue. The project area is located

12 SPENCER STREET (Continued) **S123159094**

on the western extent of Long Island, in the New York City Borough of Brooklyn, in the northern section of the Bedford/Stuyvesant neighborhood. The area of investigation includes Spencer Street and Bedford Avenue, south of Flushing Avenue. The surrounding area is predominantly industrial/commercial with mixed commercial and residential properties. The area of investigation is approximately 1.3 miles east southeast of the East River. Location The Site is located in the Bedford Stuyvesant section of Kings County. The Site is located in the City of New York and Borough of Brooklyn. The Site is rectangular shaped spanning between Bedford Avenue and Spencer Street with 25 feet of frontage along both Bedford Avenue and Spencer Street. The north and south sides of the property are bordered by residential buildings. The west side is bordered by the Bedford Avenue and the east side by Spencer Street. Site Features The Site is improved with a multi-story commercial building with one half accessible by Bedford Avenue and the other half accessible on Spencer Street. There is currently a cellar level below the 735 Bedford Avenue portion of the site. Current Zoning and Land Use The property is currently zoned M1-2. M1 districts are often buffers between M2 or M3 districts and adjacent residential or commercial districts. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. Nearly all industrial uses are allowed in M1 districts if they meet the stringent M1 performance standards. Offices, hotels and most retail uses are also permitted. The current use of the building as office space is in compliance with the zoning. Surrounding land use includes multi-family residential properties to the north, commercial / retail / office use to the west, residential and commercial (warehouses) to the south and commercial (warehouses) to the east. The area surrounding the property is highly urbanized and predominantly consists of older industrial / commercial buildings with mixed use (retail / residential) buildings along main corridors such as Bedford Avenue Flushing Avenue and Park Avenue. There are ten schools located within 1,200 feet of the Site including Bnei Shimon Yisroel of Sopron approximately 450 feet to the east. There were no nursing homes or hospitals identified within 1,000 feet of the Site. Past Use of the Site The environmental history of the subject property was previously investigated through the review of Federal and State Environmental databases, Environmental Sanborn Fire Insurance maps, NYC Department of Building records and the NYC Department of Finance databases. According to the review of these sources the Site has been developed since at least 1887 with a residential home through at least 1904. In 1918 the property is shown to be redeveloped with a 1story building identified as a carriage and auto repair shop. The present 3-story building is shown by 1935. The use from 1935 to 1965 is shown as storage. From 1977 to 1989 the building is labeled with an M which refers in general to manufacturing. From 1991 to 1996 the use is not specified. The Requestor purchased the property in March 2015. The investigation of this brownfield site is the result of the 735 Bedford Ave. (Site #224251) (aka Spencer Street Groundwater Plume) groundwater plume trackdown. Site Geography and Geology Subsurface soils at the Site consist of historic fill materials to a depth of approximately 1 to 5 feet below grade followed by native silty-sand and clay. According to the USGS topographic map for the area (Brooklyn Quadrangle), the elevation of the property is approximately 20 feet above mean sea level. The topography within the immediate area slopes gradually from

12 SPENCER STREET (Continued) **S123159094**

south to north. Groundwater occurs beneath the Site at a depth of approximately 15 feet below grade under water table conditions. Based on groundwater flow maps on properties in the vicinity, groundwater flow is generally east. However, the groundwater flow direction was determined from groundwater elevation measurements taken on the Site show the flow direction to be from the south east to the northwest in the eastern half of the Site. The Site is not located within a designated flood zone area.

Env Problem: Background: 224281 was identified as a potential source for contamination outlined in a plume track down identified as Spencer Street GW (Site 224251). As part of an off-site investigation performed upgradient to BCP site C224204 (11 Spencer) groundwater samples were collected showing high concentrations of chlorinated volatile organic compounds (CVOCs). Tetrachloroethene (PCE) was detected at 120,000 parts per billion or ppb (compared to a groundwater standard of 5 ppb), trichloroethene was detected at 38,000 ppb (compared to a groundwater standard of 5 ppb) and 1,1,1-trichloroethane was detected at 86,000 ppb (compared to a groundwater standard of 5 ppb). These elevated values located as part of an up-gradient plume led to the creation of P-Site Spencer Street GW. In the summer of 2017 Environmental Assessment Remediation (EAR) on behalf of the Department performed the plume track down. Four (4) monitoring wells (MW-1 to MW-4) were installed to delineate the plume. Concentrations of PCE ranged from 150,000 ppb in MW-3 to 0.33 ppb in MW-1 (compared to a groundwater standard of 5 ppb). Along with the groundwater analysis, five (5) soil samples were collected from four locations (MW-1 through MW-4) at the water table interface and/or the depth interval exhibiting indication of impact. PCE in soil samples ranged from 4,200,000 ppb in MW-3 to 0.7 ppb in MW-4 (compared to commercial soil cleanup objective (CSCO) of 150,000 ppb). C224282: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), some metals, and polychlorinated biphenyls (PCBs) as part of a limited subsurface investigation performed by Environmental Business Consultants (EBC) on behalf of the property owner. Sub slab soil Vapor samples were collected and analyzed for VOCs. Based upon the limited investigation conducted to date, the primary contaminants of concern are tetrachloroethene (PCE), trichloroethene (TCE), and 1,2-dichlorethene (1,2-DCE). Soil Based on the investigations completed to date, chlorinated VOCs are detectable in soil. Maximum concentration of PCE in soils collected on site are 4.2 ppm (unrestricted use soil cleanup objective (UUSCO) is 1.3 ppm). Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, and Dibenzo(a,h)anthracene were detected above CSCO objectives throughout the site. Groundwater PCE [maximum concentration 45,000 parts per billion (ppb), standard 5 ppb], TCE (9,100 ppb max, 5 ppb standard), 1,2-dichlorethene (4,200 ppb max, 5 ppb standard), and well as 1,1,1-TCA, 1,1-DCA, and 1,1-DCE were detected above the NYSDEC GA Groundwater Quality Standards. Sub-slab soil vapor and indoor air CVOCs were detected in the sub slab vapor and indoor air samples. Further evaluation of the results is required to determine if monitoring or mitigation is necessary on-site.

Health Problem: People are not expected to come into contact with contaminated soil or groundwater because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination.

12 SPENCER STREET (Continued) **S123159094**

Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The on site commercial building is occupied and actions are recommended to address potential exposures associated with soil vapor intrusion. Additional investigation is needed to determine whether additional actions may be needed to address the potential for exposure associated with soil vapor intrusion off-site.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 5/15/03 - ROSSAN, DDO - Tank test failure letter prepared and sent to: Mr Ricky Brons Kent Village Housing Inc. 60 Division Avenue Brooklyn, NY 11211 4/23/2004 Sangesland saw that the PBS records show that tank #1 passed it's TT in May 2003 and Tank #2 failed in May 2003 and retested and passed in June 2003. Letter sent to owner requesting info on passing tank #2, so DEC can close out the case. 6/7/2004 Sangesland received a package of info from Kent Village Housing Inc. Robert Kotara (718-387-8213). Package has a summary of the work done along with copies of the various tank testing. It says the failure was in the fill line of tank #2 approx 2 feet from the fill cup - corroded threading . DEC contacted PTC to ask about the repair of this location. Ray at PTC says this work was done by someone else. PTC was called back to retest the system after the fill line pipe had been repaired. Sangesland spoke with Robert Kotara (Director of Physical Operations at Kent Village) He said the fill line was replaced/ repaired by the building super. He says there was NO CONTAMINATION SEEN IN THE SOIL AROUND THIS LOCATION. A written

HW Code: 224137
Record Add: 11/17/2009
Record Upd: 10/01/2020
Updated By: DJEATON
Site Description: The Kent Avenue Generating Station Site is located in Brooklyn, NY. It is along the waterfront (Wallabout Channel, trib to East River) on the west side of Kent Avenue, south of the intersection with Division Avenue. The site is the location of the former Kent Avenue Generating Station, which has since been demolished. Excepting activities related to building demolition and property rehabilitation, with respect to current use the site is considered inactive. The uses of the surrounding parcels are varied: across Kent Avenue is a NYC Park (Roberto Clemente Ballfield); immediately to the south is the Brooklyn Navy Yard 13 Acre Parcel Site (NYSDEC Site No. 224019A); immediately to the north across Division Avenue are commercial uses; properties to the northeast and to the southeast appear to have residential uses. Prior uses that appear to have led to site contamination include discharges during the period of operation of the power plant and on-site re-use of prior demolished structures as fill material. A number of environmental investigations of the property have occurred including a Phase II (2000) and other investigations focused on particular issues or areas of the site from 2006 to present. Reclassified to N. See V00732 - Kent Avenue Station Site. Work to be done under VCA Amendment.
Env Problem: This site has been successfully remediated. The information on the remedy is included under site V00732. The following description was true during the early stages of work at this site. The primary contaminants of concern at the site known at the time include PCBs, asbestos, various metals, petroleum constituents and PAHs. Investigations indicate SCG exceedances of PCB and petroeum compounds in sediments/ sludge contained in a large concrete structure (known as the ash pit); asbestos, metals and PAHs in subsurface soils/fill; and an area of groundwater petroleum contamination in the southwest corner of the property. The significance of the contamination needs to be determined.

Updated By:	DJEATON
Site Description:	Location: The site is located in a mixed-use area along the Brooklyn waterfront. It is bounded by Kent Avenue to the east, Wallabout Channel to the west, Division Avenue to the north, and the Brooklyn Navy Yard to the south. Site Features: The site has been sold to a developer but is still currently vacant and open. In the subsurface, a large concrete-lined pit is present in the northwest corner of the site and along the edge of the Wallabout Channel. A large concrete slab which is part of a former power plant foundation occupies the center of the site. The slab has been covered with clean fill. Current zoning/use. The site is zoned for industrial use but is currently vacant. It is surrounded by commercial buildings and multiple occupancy residences. Past Use of the Site: The site was previously an electrical generating station and substation from 1906 until the late 1990s. The site was razed from 2007 to 2009. The main sources of contamination were the concrete-lined ash pit storage area and by-products of the electrical generating process which are scattered across the site. Site Geology and Hydrogeology: The site is underlain by a 5 to 10 foot layer of fill material. Under the fill are intermingled layers of silt and sand down to roughly 100 feet below grade. Beneath the silt and sand is a clay confining unit. The water table lies roughly 8 feet below the ground surface. Based on the site s proximity to the Wallabout channel, groundwater levels are probably tidally influenced. The far western edge of the site is built out on piles over the bank of the Wallabout Channel.
Env Problem:	Active Remediation at the site is complete. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) in soil, volatile organic compounds (VOCs) in groundwater and polychlorinated biphenyls (PCBs) in the ash pit sediments.

KENT AVENUE STATION SITE (Continued) **S102663001**

Health Problem:	The site is completely fenced, which restricts public access. Persons who dig below the ground surface may come into contact with contaminants in the subsurface soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for people to inhale site contaminants in indoor air due to soil vapor intrusion in any future on-site building development and occupancy.

DEC Memo: 11/22/10 - Austin - This spill has been reassigned to Douglas MacNeal in DER-Albany, as part of a remediaton project he is handling - end 11/24/10 - MacNeal - The Asbestos brought to the surface has been handled by a National Grid Contractor. I am awaiting a report from National Grid documenting the clean-up. Any additional asbestos material will be handled under the existing VCA (V00732) 3/31/2011 - MacNeal - The spill is closed. The date of closure is the date that correspondence was received from National Grid which contained air monitoring reports and a waste manifest which confirmed proper disposal of the asbestos which was released. Those items have been placed in edocs.

Remarks: While taking bore samples has a release into the apmosphere. Location is a former ConEd site.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 12/9/99: Spoke with Pete Tokarz (Hudson Ave Env. Mgr.) - Drum found while excavating test pit for Phase II investigation. Drum found at about 4 ft below grade. Drum was somewhat porous - some staining on soil and brick/debris. All visible contamiantion was removed, placed on plastic sheeting with drum and covered. Sample taken from drum for oil ID and PCB analysis.(JHO) 12/10/99 - voice mail update from Rich Roach, Con Ed CIG: quantity of spill upgraded to 25 gallons. Called Stan Piczszatowski (CE ERT) - this estimate is based on amount of contamianted soil surrounding drum, not free-flowing oil. (JHO) 12/14/06: spoke with David Rubin, Con Ed Remediation project manager. Apparently the site is undergoing second Phase II for property transfer. Con Ed also plans on demolishing the former gen station building. They expect a summary report of investigation with recommendations for remediation from consultant during 1Q07. I told Dave to make sure DEC receives a copy, since we have a number of outstanding spills related to the site. (JHO) 01/09/08: This spill is closed, track under spill # 9911014.(MA)
Remarks:	excavation site encountered contaminated soil. samples. cleanup completed. unknown where the drum is from but was found during the escavation

have a number of outstanding spills related to the site. (JHO)
3/14/08: NYSDEC received Ash Pit
Remedial Investigation (RI) summary report dated March 3, 2008 from
Con Ed. See eDocs for details.
(MA, 4/04/08) 4/3/08: Spoke with Con Ed Remediation project manager,
David Rubin regarding suitable
time-frame for submission of feasibility study work plan (FSWP) and
RAWP related to Ash Pit site.
The Department has approved 90 days period as requested by Con Ed for
submission of FSWP and RAWP.
4/14/08: NYSDEC sent comments letter to Con Ed in response to Ash Pit
Remedial Investigation
Summary Report dated March 3, 2008. Comments letter is in eDocs. (MA).
4/17/08: NYSDEC is in
receipt of response letter from ConEd. The letter requests for
modification of time-frame requested
in comments letter of April 4, 2008 for submission of RAWP and
Feasibility Study report. See eDocs
for details. (MA) 4/18/08: NYSDEC sent approval letter to ConEd, the
letter modified submission of
FS and RAWP schedule. Document in eDocs. (MA) 11/25/09. This site was
transfered to Hazardous Waste
Program and should be tracked under HW224137. Spill case closed. JK.
5/23/13 - note that the prior
comment needs clarification; the investigation finding that was
reported to the Department via this
spill is being addressed through the Voluntary Cleanup Program (VCP)
as site V00732. The prior
comment also notes that the spill case was closed, but it was not. It
is closed today as an
administrative closure as referred to V00732. Refer to VCP site V00732
for further information.
(JOC)

HW Code:	C224204
SWIS:	2401
Town:	New York City
Record Added Date:	12/17/2014
Record Updated Date:	01/04/2024
Update By:	HMDUDEK
Site Description:	Location The Site is located in the Bedford Stuyvesant section of Kings County and is comprised of three tax parcels identified as Block 1716, Lots 20, 21 and 24 on the New York City Tax Map. The combined lots total 18,774 square feet (0.43 acres). The Site has 167.25 ft of street frontage on Spencer Street and 75 feet of street frontage on Flushing Avenue. The area surrounding the Site includes commercial to the south and west, mixed-use (1st floor retail) properties to the east, residential properties to the northwest, and commercial / industrial properties to the north. Site Features The Site is currently vacant with no structures present and is not being used. An 8-foot high construction fence borders the property on the north and west sites to prevent unauthorized access. Current Zoning and Land Use The property is currently zoned M1-2. M1 districts are often buffers between M2 or M3 districts and adjacent residential or commercial districts. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. Nearly all industrial uses are allowed in M1 districts if they meet the stringent M1 performance standards. Offices, hotels and most retail uses are also permitted. Certain community facilities, such as hospitals, are allowed in M1 districts only by special permit, but houses of worship are allowed as-of-right. Surrounding land use ncludes commercial to the south and west, mixed-use (1st floor retail) properties to the east, residential properties to the northwest, and commercial / industrial properties to the north. The area surrounding the property is highly urbanized and predominantly consists of older industrial/ commercial buildings with mixed use (retail / residential) buildings along main corridors such as Bedford Avenue, Flushing Avenue and Park Avenue. There are eight schools located within 1,200 feet of the Site including Bnei Shimon Yisroel of Sopron approximately 200 feet to the east (see Figure 5). There were no nursing homes or hospitals identified within 1,000 feet of the Site. Past Use of the Site Lot 21 was originally developed prior to 1887 with a 2-story residential home along Spencer Street and a stone yard which fronted on Flushing Avenue. The most recent building was constructed in 1935 and was used as a garage. By 1947, the main portion of the building was used as a sheet metal works with the Spencer Street portion used as a private garage. By 1950 the private garage became part of the sheet metal works and was used for painting and spraying and making wire and wire products. The building remained in this use through at least the

THE W GROUP OF BROOKLYN LLC (Continued) **S117362879**

1990's. Lot 20 was originally a storefront but has been a vacant lot used for parking since 1935. Lot 24 was used as a lumber shed in 1918, then as a tire shop from 1935 to 1950, storage from 1965 to 1996. The current owner purchased the property in March 2015. The buildings on lot 21 and 20 were demolished in 2018?. Site Geology and Hydrogeology Subsurface soils at the site include a silty non-native fill with ash and other rubble which varies in depth from 1 to 5 feet. A fine silt, and in some locations clay, is present beneath the fill at a depth of approximately 3 to 5 feet. Crushed rock and course sand grading to fine sand and silt is present below the fill and silt and extends to the water table (10 to 15 feet bgs). This is followed by a medium to coarse sand to a depth of 20 feet with cobbles and coarse sand observed in the vicinity of the source area from 20 to 50 feet below grade. The groundwater flow direction as determined from on-site groundwater elevation measurements is north and east. A site location map is attached as Figure 1.

Env Problem:

Nature and Extent of Contamination : Soil: A Focused Subsurface Site Investigation was conducted in July 2014 and a Supplemental Focused Subsurface Investigation was conducted in September 2014. The primary contaminant of concern in soil is PCE. PCE was detected at all 46 reported on-site soil sampling locations, at a maximum of 32 parts per million (ppm) in one of the soil samples collected from a boring that was installed near the concrete degreasing pit within the building. This concentration exceeds both the Unrestricted Use soil cleanup objective (UUSCO) of 1.3 ppm and the Protection of Groundwater SCO (1.3 ppm). No petroleum-related volatile organic compounds (VOCs) were detected in soil at concentrations exceeding the UUSCOs. Additional soil samples were collected in 2015, 2016 and 2017. During that investigation, the highest concentration of PCE was detected in MWC2 (2/22/17) at 900 ppm at 11/12 feet below grade surface . Contaminants of concern have also been detected in off-site soil samples collected to the north and west of the BCP site. Adjacent BCP sites abut the Site to the east. Additional delineation of off-site impacted will be required as part of the RAWP. Groundwater: Multiple investigations were performed on-site from 2014 to 2019. Groundwater samples have been collected from nineteen monitoring wells. Several compounds were detected well above standards in groundwater during the Focused Subsurface Site Investigation. PCE was detected at a maximum of 47,000 parts per billion (ppb) (standard of 5 ppm), TCE at a maximum of 250 ppb (standard of 5 ppm), DCE at a maximum of 260 ppb (standard of 5 ppm), and 1,1,1-TCA at a maximum of 3,100 ppb (standard of 5 ppm). During a supplemental investigation, toluene was detected at a maximum of 66,000 ppb (standard of 5 ppm). Supplemental groundwater samples were collected in 2017. CVOCs were the primary contaminants of concern. PCE was detected at a maximum concentration of 120,000 ppb (standard of 5 ppm), TCE at a maximum concentration of 38,000 ppb (standard of 5 ppm), DCE at a maximum concentration of 4,200 ppb (standard of 5 ppm), and 1,1,1-TCA at a maximum concentration of 86,000 ppb (standard of 5 ppm). Contaminants of concern have also been detected in off-site groundwater samples collected to the north and west of the BCP site. Adjacent BCP sites abut the Site to the east. Additional delineation of off-site impacted will be required as part of the RAWP. Soil Vapor and Indoor Air: Sub-slab vapors containing PCE and TCE have been found beneath the building slab at levels as high as 1.6 million micrograms per meter cubed (ug/m3) and 82,000 ug/m3, respectively. These same compounds have been detected

THE W GROUP OF BROOKLYN LLC (Continued) **S117362879**

	within the indoor air in the building on Lot 21 (prior to demolition), with PCE observed as high as 80 ug/m3 and TCE observed as high as 30.8 ug/m3. These concentrations represent a concern for soil vapor intrusion with respect to any on-site buildings that will be built and nearby offsite buildings. Neighboring lots were analyzed for soil vapor intrusion as part of the remedial investigations. Lot 26 had maximum sub-slab concentrations of PCE and TCE a5.47 ug/m3 and 3,000 ug/m3 respectively. Indoor air concentrations of PCE and TCE within Lot 26 resulted maximum concentrations of 14.4 ug/m3 and 0.84 ug/m3 respectively.
Health Problem:	Access is restricted by a fence. People may contact contaminants in soil by walking on the site, digging, or otherwise disturbing the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is currently vacant and redevelopment is planned. The potential exists for the inhalation of site contaminants due to soil vapor intrusion for future on-site buildings. Action is recommended to address potential exposures at an adjacent building. Additional investigation is needed to determine whether actions are needed to address soil vapor intrusion in other off-site structures.

review. 3:23 PM:- left message for
Alan Brooks, whose name is listed in last property tax bill from NYC Finance. as per NYC Finance
record, property is owned by I. T. F. Corp. I. T. F. Corp. **property owner as per NYC Finance**
c/o Alan Brooks Brooks & Cantor LLP. 3000 Marcus Avenue, Sutie 2E4 New Hyde Park, NY 11042-1005 Ph.
(516) 326-6767 Fax (866) 344-7288 email: brooksea@optonline.net 3:30 PM:- sent email to Mr. Brooks
with copy of email previously sent to Mr. Mandell. asked Mr. Brooks to submit copy of available
environmental investigation reports for review. 09/25/14-Hiralkumar Patel. 7:04 AM:- received email
from Frank including draft copy of Focused Subsurface Site Investigation report and Supplemental
Focused Subsurface Site Investigation report. Frank mentioned that these reports were made for
Merritt Environmental, who subcontracted them. abstract of focused subsurface site investigation
report: - site consists multiple lots on two block: 1. Block# 1716 / Lot# 24 (and 25, as per tax
lot) (1-9 Spencer St, 466-468 Flushing Ave) - approx. 2,500 sq. ft. vacant located at the southeast
corner of the intersection between Flushing Ave and Spencer St 2. Block# 1716 / Lot# 20 (15 Spencer
St) and 21 (11 Spencer St, 476-478 Flushing Ave) - one large 20,000 sq. ft. vacant one-story former
manufacturing building with no basement used in large part for sheet metal manufacturing
---------- 3. Block# 1716 / Lot# 15 (25 Spencer St) and 16 (23 Spencer St, 28-32 Walworth St)
- one approx. 4,000 sq. ft. single-story manufacturing/warehouse building that is currently
contains a seafood distributor 4. Block# 1716 / Lot# 14 (27 Spencer St) - approx. 7,000 sq. ft
exterior stockyard used by the seafood distributor 5. Block# 1715 / Lot# 29 (12 Spencer St, 735
Bedford Ave) - vacant three-story commercial building with a full basement - site elevation is
estimated at roughly 20 ft above mean sea level - Phase I conducted by Merritt Engineering - Phase
I indicated historical underground benzene storage tank, evidence of a former aboveground storage
tank containing TCE and at least two historical gasoline USTs at 476 Flushing Ave (former sheet
metal manufacturing facility) ---------- - GPR survey found one subsurface anomaly resembling
a UST at the Flushing Ave side of the former sheet metal manufacturing building, and possible UST
fill pipe in vacant lot (lot #: 24/25) - one 07/21/14, total of 16 borings (B1 through B16) were
installed on lots associated with this project - borings B15 and B16 were installe in the basement
of building at 12 Spencer St (lot #: 29), to a maximum depth of 3 ft below basement floor where
refusal encountered - during field activities, it was observed that all equipment and other items

THE W GROUP OF BROOKLYN LLC (Continued) **S117362879**

associated with former operations within the sheet metal manufacturing building had been removed -
a large concrete-lined pit is located within this building and its former use was unknown. however,
a former employee of the manufacturing operations said that the pit was a former dipping tank for
cleaning metal with solvents - former worker also recalled possible dumping of water solvent at the
southeast corner of the open stockyard at south end of the site
---------- - groundwater was
encountered at approx. 13 ft bg - a distinct solvent odor was detected in soil and groundwater
samples collected from boring B10, which was located nearest to the concrete pit in the sheet
manufacturing building - due to field evidence of possible contamination, two soil samples were
collected from boring B10 - groundwater samples were collected from borings B1, B6, B7, B8, B9, B10
and B14 - found chlorinated solvent contamination in soil and groundwater samples soil analyticals:
----------B10 9-10 ft PCE----------32,000
groundwater analyticals:
----------B1GW-----B6GW-----B7GW-----B8GW-----B9GW-
------B10GW-----B14GW
1,1,1-Trichloroethane----------44-------97-------22----------18-
------3,100
1,1-Dichloroethene----------5--------6--------3----------
--------260
cis-1,2-Dichloroethene---------17-------95-------21
PCE----------120------180------170--------9------250-
-----47,000--------98
TCE----------44-------41-------71-------11-------23-
--------250---------6
abstract of supplemental focused subsurface site investigation report:
- additional six (6) soil
borings were installed (B17 to B22) to investigate groundwater quality - shallow and/or deeper
groundwater samples were collected from borings, based on its location in reference to borings
installed during previous investigation - shallow groundwater samples were collected from the water
table zone (13-17 ft bg) and deeper samples were collected from 31-35 ft bg groundwater
analyticals:
----------B18----------B18----------B19----------B22 13-17
ft 30-34 ft
31-35 ft 31-35 ft Toluene----------66,000----------860
Naphthalene---------390
PCE----------210----------46----------210----------14
TCE----------19----------35----------16 -
boring B19 was installed near
previous boring B10 and only deeper groundwater sample was collected from B19 as shallow sample was
collected from B10 earlier - toluene release may hve originated from a small flammable materials
storage room at the west side of the 11 Spencer St building. this area was formerly used for spray

THE W GROUP OF BROOKLYN LLC (Continued) **S117362879**

painting metal products other spill #: 9311586 was reported on 12/28/1993 at 25 Spencer Street (lot #: 25) due to dumping issue. case closed. ---------- PBS #: 2-356913 is recorded for 21-23 Spencer Street (lot #: 16). as per PBS record, building 23 had one (1) 1,000 gal #2 oil UST and two (2) 275 gal #2 oil ASTs. the UST was removed in Oct. 1993 and the ASTs were coverted to non-regulated use. --------- 2:01 PM:- spoke with Victoria at Merritt Engineering and asked for copy of Phase I report. she mentioned that someone from her office will call back. 09/26/14-Hiralkumar Patel. 10:04 AM:- received email from Maryann Wegh (mwegh@merrittec.com) of Merritt Engineering including link to Phase I report. abstract of Phase I: - on-site investigation was conducted on 07/07/14 - property currenly consists of a four (4) 1-story vacant and one (1) occupied commercial manufacturing warehouse buildings, located on a combined plot size of approx. 33,724 sq. ft. - the buildings were constructed circa 1931 - database review indicated 550 gal UST for Benzene and a 275 gal AST for TCE (CBS #: 2-000024) were registered to 476 Flushing Ave (aka 11 Spencer St) ---------- - as per CBS record, the Benzene UST was removed in May 1992 and the TCE AST was removed in Jan. 1995 ---------- - there appears to be two (2) underground gasoline tanks which are no longer in use buried in the 1-9 Spencer St AKA 476-478 Flushing Ave front driveway on Spencer St and under the ground floor slab of 476-478 Flushing Ave - sanborn map for 1935 shows a gasoline tank present at the 476-479 Flushing Ave - a gasoline fill box which is no longer in use was noted in the parking lot next to the 11 Spencer st building - surface oil staining was noted throughout 13-15 Spencer St and 476-478 Flushing Ave - there is a 2,000 gal #2 oil AST located in the basement of the Flushing Ave building but the size of the tank could not be confirmed due to flooding - RCRA Non Generator, EPA ID #: NYD001287671 - Delta Metal Products Co. - 476 Flushing Ave - historical use of 1-15 Spencer St and 466-468 and 476-478 Flushing Ave consisted of a junkyard, shed, manufacturing, sheet metal works and paint spraying ---------- - two (2) 275 gal #2 oil ASTs are located in the basement of 12 Spencer St discussed with DEC Jane O'Connell. after reviewing the data, she asked to transfer case to her name. 7/3/15 Greco assigned as PM of spill #1406369. Spill will be addressed under 11 Spencer Street BCP Site. 5/27/21 - reassigned to Aaron Fischer. See site no. C224204. (JHO)

BROWNFIELDS:

Name:	480 FLUSHING
Address:	480 FLUSHING AVENUE
City,State,Zip:	BROOKLYN, NY 11205
Program:	BCP
Site Code:	578363
Acres:	0.102
HW Code:	C224259
SWIS:	2401
Town:	New York City
Record Added Date:	10/16/2018
Record Updated Date:	03/21/2023
Update By:	HMDUDEK
Site Description:	Location The site is in the Bedford Stuyvesant section of Brooklyn in the City of New York and is comprised of a single tax parcel totaling 4,450 square feet (0.102 acre). The site is rectangular in shape with 50 feet of frontage on Flushing Avenue and 89.25 feet of frontage on Walworth Street. The north side of the property is bordered by Flushing Avenue, and the east side is bordered by Walworth Street. Two Brownfield sites with co-mingled contaminant plumes adjacent to the target property. 11 Spencer Street (C224204) to the west and 8 Walworth Street (C224239) to the south. Site Features The site is currently vacant with no structures and is not being used. An 8-foot-high construction fence borders the property on the north and west sites to prevent unauthorized access. Current Zoning and Land Use The property is currently zoned M1-2. M1 districts are often buffers between M2 or M3 districts and adjacent residential or commercial districts. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. M2 districts buffer light industrial zones (M1) and zones which are occupied by heavy industrial use (M3) (i.e. power plants, solid waste transfer facilities and recycling plants).

480 FLUSHING (Continued) **S121933852**

Nearly all industrial uses are allowed in M1 districts if they meet the stringent M1 performance standards. Offices, hotels and most retail uses are also permitted. Certain community facilities, such as hospitals, are allowed in M1 districts only by special permit, but houses of worship are allowed as-of-right. The site is currently vacant with no structures present and is not being used. Surrounding land use includes commercial and mixed-use (retail / residential) properties along the north side of Flushing Avenue, commercial / office use to the west, commercial (warehouses) properties to the south and to the east. The area surrounding the property is highly urbanized and predominantly consists of older industrial / commercial buildings with mixed use (retail / residential) buildings along main corridors such as Bedford Avenue, Flushing Avenue and Park Avenue. There are ten schools located within 1,200 feet of the site including Bnei Shimon Yisroel of Sopron approximately 150 feet to the east. There were no nursing homes or hospitals identified within 1,000 feet of the site. Past Use of the Site The environmental history of the subject property was previously investigated through the review of Federal and State Environmental databases, Environmental Sanborn Fire Insurance maps, NYC Department of Building records and the NYC Department of Finance databases. According to the review of these sources the property was developed sometime prior to 1887 with two 2-story residences in the southern portion of the Lot with the northern portion vacant. A 1-story building was constructed on the northern portion which is shown as broom manufacturers supply till 1950. Based on sources provided, a 1 story building was constructed in 1965 and identified as paint mixing. The northern building is shown as storage or warehouse. Both buildings remain unchanged till 2016 when the north building was demolished. The south building was demolished in 2018. The property was known to be most recently used by an auto repair shop and a fish market. Site Geology and Hydrogeology Subsurface soils at the site consist of historic fill materials to a depth of approximately 1 foot below grade followed by native silty-sand and clay. According to the USGS topographic map for the area (Brooklyn Quadrangle), the elevation of the property is approximately 16 feet above mean sea level. The topography within the immediate area slopes gradually from south to north. Groundwater was reported to be present under semi-confined conditions at approximately 12-14 ft below grade. Based upon the site characterization, groundwater flow was reported to be northwest. Neighboring sites indicate an east by northeast groundwater flow. The site is not located within a designated flood zone area.

Env Problem:
Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was sampled for VOCs. Based on the investigations conducted to date, the primary contaminants of concern are VOCs and SVOCs in soil; VOCs and SVOCs in groundwater; and VOCs in soil vapor. Soil VOCs and SVOCs were found at concentrations exceeding the applicable restricted residential soil cleanup objectives (RRSCOs) and Protection of Groundwater soil cleanup objectives (PGSCOs) including tetrachloroethene (PCE) (max of 99 parts per million (ppm); RRSCO is 19 ppm and PGSCO is .3 ppm), benzo(a)anthracene (max of 260 ppm, standard 1 RRSCO), benzo(a)pyrene (max of 230 ppm, standard 1 RRSCO), benzo(b)fluoranthene (max of 280 ppm, RRSCO is 1 ppm), benzo(k)Fluoranthene (max of 100 ppm, RRSCO is 1 ppm), dibenzo(a,h)anthracene (max of 37 ppm, RRSCO is 0.33 ppm),

480 FLUSHING (Continued) **S121933852**

	indeno(1,2,3-cd)pyrene (max of 140 ppm, RRSCO is 0.5 ppm). Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were reported at concentrations below soil cleanup guidance values for restricted residential use and protection of groundwater within soil. Data does not indicate any impacts in soil related to this site. Groundwater: Exceedances of the ambient groundwater quality standards (AWQS) for VOCs include PCE (max of 7,300 parts per billion (ppb); AWQS of 5 ppb), trichloroethylene (TCE) (max of 350 ppb (ppb); AWQS of 5 ppb), and cis-1,2-dichlorethene (max of 340 ppb (ppb); AWQS of 5 ppb). Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were reported at concentrations of up to 124 and 116 parts per trillion (ppt), respectively, exceeding the Maximum Contaminant Level (drinking water standard) of 10 ppt in groundwater. Data indicates off-site impacts in groundwater related to this site. Off-site impacts will be further delineated during remediation. Soil Vapor: The site is currently undeveloped. Three soil vapor samples were collected on-site with elevated concentrations of chlorinated VOCs. Max concentrations of PCE are 40.6 micrograms per cubic meter (ug/m3), TCE 1470 ug/m3 and vinyl chloride 7.77 ug/m3. Data indicates there is potential for off-site impacts in soil vapor related to this site.
Health Problem:	Access is restricted by a fence. People may contact contaminants in soil by walking on the site, digging, or otherwise disturbing the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is currently vacant and redevelopment is planned. The potential exists for the inhalation of site contaminants due to soil vapor intrusion for future on-site buildings. Additional investigation is needed to determine whether actions are needed to address soil vapor intrusion in off-site structures.

Acres: 5.890
HW Code: 224019A
Record Add: 11/18/1999
Record Upd: 10/17/2023
Updated By: DKMACNEA
Site Description: Location: This site is on the north-east portion of the Brooklyn Navy Yard Development Corp. Industrial Park (BNYDC) and is a portion of the site (224019A) which had been operated by the NYC Sanitation Department is currently being redeveloped by Steiner Studios into a new roadway and elevated parking lot. The site is bordered by the East River on the north and west, by Kent Avenue on the east, and by the rest of BNYDC site on the south. Site Features: The 13-Acre parcel site includes the former Building 419 transformer substation area and two former drum storage areas. The site surrounds Wallabout Channel (barge basin)on three sides. The 224019A site deals with only 5.89 acres of the parcel, and excludes the former coal gasification plant known to have existed at the remaining 3.5 acres of the site. Those 3.5 acres have been designated as a separate site and given the ID number of 224019B. Also excluded from the original 13 acres are an

BROOKLYN NAVY YARD 13 ACRE PARCEL (Continued) **S105586296**

	approximate 3.61 acres of land under water, which have been excluded from the original site definition. Current Zoning and Land Use: The site is zoned for commercial and industrial uses, and is currently used for vehicle and materials storage. The surrounding area includes industrial, commercial and residential uses. Past Use of the Site: The site was used in support of ship building and repair activities. Support actions included waste storage at the two drum storage areas, and power distribution at the transformer substation. The railroad siding area was used for the loading and unloading of materials and fuels. These uses, as well as historic filling practices throughout the waterfront, have led to demonstrable levels of lead, Polycyclic Aromatic Hydrocarbons (PAHs) and/or polychloriinated biphenyls (PCB) contamination. Site Geology and Hydrogeology: The site is underlain by historic fill to a depth of approximately fifteen feet in many areas. Beyond the fill material is a silt sand, then sand unit down to a depth of approximately 100 feet where the Gardiners Clay is found. Groundwater occurs at depths of approximately five feet, and flow is generally to the north and west towards the East River.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds and PCBs in the soil. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil is being managed under a Site Management Plan.
Health Problem:	Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site.

Updated By:	KNLILOIA
Site Description:	Location: This site is on the north-east portion of the Brooklyn Navy Yard Development Corp. Industrial Park (BNYDC) and is a portion of the site (224019A) which had been operated by the NYC Sanitation Department is currently being redeveloped by Steiner Studios into a new roadway and elevated parking lot. The site is bordered by the East River on the north and west, by Kent Avenue on the east, and by the rest of BNYDC site on the south. Site Features: The 13-Acre parcel site includes the former Building 419 transformer substation area and two former drum storage areas. The site surrounds Wallabout Channel (barge basin)on three sides. The 224019A site deals with only 5.89 acres of the parcel, and excludes the former coal gasification plant known to have existed at the remaining 3.5 acres of the site. Those 3.5 acres have been designated as a separate site and given the ID number of 224019B. Also excluded from the original 13 acres are an approximate 3.61 acres of land under water, which have been excluded from the original site definition. Current Zoning and Land Use: The site is zoned for commercial and industrial uses, and is currently used for vehicle and materials storage. The surrounding area includes industrial, commercial and residential uses. Past Use of the Site: The site was used in support of ship building and repair activities. Support actions included waste storage at the two drum storage areas, and power distribution at the transformer substation. The railroad siding area was used for the loading and unloading of materials and fuels. These uses, as well as historic filling practices throughout the waterfront, have led to demonstrable levels of lead, Polycyclic Aromatic Hydrocarbons (PAHs) and/or polychloriinated biphenyls (PCB) contamination. Site Geology and Hydrogeology: The site is underlain by historic fill to a depth of approximately fifteen feet in many areas. Beyond the fill material is a silt sand, then sand unit down to a depth of approximately 100 feet where the Gardiners Clay is found. Groundwater occurs at depths of approximately five feet, and flow is generally to the north and west towards the East River.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds and PCBs in the soil. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil is being managed under a Site Management Plan.
Health Problem:	Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site.

Site Code: 57818
Site Description: Location: This site is on the north-east portion of the Brooklyn Navy Yard Development Corp. Industrial Park (BNYDC) and is a portion of the site (224019A) which had been operated by the NYC Sanitation Department is currently being redeveloped by Steiner Studios into a new roadway and elevated parking lot. The site is bordered by the East River on the north and west, by Kent Avenue on the east, and by the rest of BNYDC site on the south. Site Features: The 13-Acre parcel site includes the former Building 419 transformer substation area and two former drum storage areas. The site surrounds Wallabout Channel (barge basin)on three sides. The 224019A site deals with only 5.89 acres of the parcel, and excludes the former coal gasification plant known to have existed at the remaining 3.5 acres of the site. Those 3.5 acres have been designated as a separate site and given the ID number of 224019B. Also excluded from the original 13 acres are an approximate 3.61 acres of land under water, which have been excluded from the original site definition. Current Zoning and Land Use: The site is zoned for commercial and industrial uses, and is currently used for vehicle and materials storage. The surrounding area includes industrial, commercial and residential uses. Past Use of the Site: The site was used in support of ship building and repair activities. Support actions included waste storage at the two drum storage areas, and power distribution at the transformer substation. The railroad siding area was used for the loading and unloading of materials and fuels. These uses, as well as historic filling practices throughout the waterfront, have led to demonstrable levels of lead, Polycyclic Aromatic Hydrocarbons (PAHs) and/or polychloriinated biphenyls (PCB) contamination. Site Geology and Hydrogeology: The site is underlain by historic fill to a depth of approximately fifteen feet in many areas. Beyond the fill material is a silt sand, then sand unit down to a depth of approximately 100 feet where the Gardiners Clay is found. Groundwater occurs at depths of approximately five feet, and flow is generally to the north and west towards the East River.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds and PCBs in the soil. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil is being managed under a Site Management Plan.
Health Problem: Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	D040

TECHTRONICS ECOLOGICAL CORP (Continued) **1000244308**

Waste Description: Trichlorethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

BROWNFIELDS:

Name:	8 WALWORTH
Address:	8 WALWORTH STREET
City,State,Zip:	BROOKLYN, NY 11205
Program:	BCP
Site Code:	552969
Acres:	0.089
HW Code:	C224239
SWIS:	2401
Town:	New York City
Record Added Date:	06/21/2017
Record Updated Date:	12/07/2023
Update By:	HMDUDEK
Site Description:	Location: The site is identified as Brooklyn Tax Block 1716, Lot 33 and is located in the Bedford Stuyvesant neighborhood on the city block bounded by Flushing Avenue to the north, Walworth Street to the east, Park Avenue to the south, and Spencer Street to the west. The subject property occupies an area of 3,910 square feet (0.089 acres) in the northeastern portion of a city block. The property is rectangular shaped with 78 feet of frontage along Walworth Street. The north, south and west sides of the property are bordered by warehouses and commercial / industrial buildings. Two Brownfield sites with co-mingled contaminant plumes adjacent to the target property. 11 Spencer Street (C224204) to the west and 480 Flushing Avenue (C224259) to the north. Site Features: The site is improved with a 3,910 square foot one-story masonry building constructed in approximately 1982. The building is divided into two sections each with its own access to the outside; the north section was used as warehouse space and the south section was used as a prayer room. The building is currently vacant. Current Zoning and Land Use: The property is currently zoned M1-2. The site is zoned for light industrial uses, such as repair shops and wholesale service, offices, retail and certain community facilities, such as hospitals, are allowed in M1 districts only by special permit. The proposed project, which includes a community facility, is compatible with the surrounding land use and will be in compliance with the current zoning. Past Use of the Site: The historic use of the site includes a storefront building, garage and residence from sometime prior to 1887 to sometime before to sometime before 1965 when a two-story residence remained on the south side of the site and a single-story warehouse used for chemical drum storage was present on the north side of the site. By 1977, the two-story residence was no longer present, and the single-story chemical drum storage warehouse remained on the north side of the site. By 1982 the site was redeveloped with a single-story paint mixing warehouse. The site was utilized as community gathering space and prayer room prior to entering the Brownfield Cleanup Program. The site and adjacent properties have remained generally unchanged through the current day. This site was originally a P site (Former Techtronics Ecological Site, Site No. 224239). The site then entered the BCP program in March 2018 to complete the remedial investigation and remedy. Site Geography and Geology: The geologic setting of Long Island is well documented and consists of crystalline bedrock overlain by layers of unconsolidated deposits. According to geologic maps of the area created by the United States Geologic Survey (USGS), the bedrock in this area of Brooklyn is an igneous intrusive classified as the Ravenswood grano-diorite of middle Ordovician to middle Cambrian age.

TECHTRONICS ECOLOGICAL CORP (Continued) **1000244308**

Unconsolidated sediments overlie the bedrock and consist of Pleistocene aged sand, gravel and silty clays, deposited by glacial-fluvial activity. Non-native fill materials consisting of dredge spoils, rubble and / or other materials have historically been used to reinforce and extend shoreline areas and to raise and improve the drainage of low-lying areas. Subsurface soils at the site consist of historic fill materials to a depth of approximately 4 to 6 feet below grade. Silty sand and gravel are present immediately below this layer. According to the USGS topographic map for the area (Brooklyn Quadrangle), the elevation of the property is approximately 20 feet above mean sea level. Depth to groundwater is approximately 13 feet below grade. The topography within the immediate area slopes gradually from south to north. The groundwater flow direction as determined from on-site and off-site groundwater elevation measurements is east-southeast. The site is not located within a designated flood zone area. The nearest moderate risk flood zone is located 800 feet to the northwest and the nearest high risk flood zone is located 950 feet to the northwest.

Env Problem:

Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern include chlorinated VOCs, SVOCs and metals in soil, chlorinated VOCs in groundwater, and chlorinated VOCs in soil vapor. Soil Chlorinated Volatile Organic Compounds (CVOCs) were detected above Protection of Groundwater Soil Cleanup Objectives (PGSCO) and Restricted Residential Soil Cleanup Objectives (RRSCO). The highest concentrations of tetrachloroethene (PCE) are 3,200 parts per million (ppm) (PGSCO: 1.3 ppm and RRSCO: 19 ppm), and trichloroethene (TCE) are 200 ppm (PGSCO: 0.47 ppm and RRSCO: 21 ppm). SVOCs and Metals were also detected above RRSCOs. The highest concentrations of lead are 8,970 ppm (RRSCO: 400 ppm), mercury are 5.2 ppm (RRSCO: 0.81 ppm), benzo(a)anthracene are 4 ppm (RRSCO: 1 ppm), benzo(a)pyrene are 3.3 ppm (RRSCO: 1 ppm), benzo(b)fluoranthene are 3.1 ppm (RRSCO: 1 ppm) and Indeno(1,2,3-C,D)Pyrene are 2.9 ppm (RRSCO: 0.5 ppm). Perfluorooctanesulfonic acid (PFOS) was measured in soil at concentrations ranging from 0.00478 part per billion (ppb) to 26.8 ppb, which is below the guidance value for restricted residential use of 44 ppb. Perfluorooctanoic acid (PFOA) was measured in soil at concentrations ranging from 0.00043 part per billion (ppb) to 0.915 ppb, which is below the guidance value for restricted residential use of 33 ppb. Data does not indicate any off-site impacts in soil related to this site. Groundwater - Groundwater samples collected at the site exceeded the Ambient Water Quality Standards (AWQSs) for PCE at a maximum concentration of 58,000 ppb (AWQS is 5 ppb), TCE was detected at a maximum concentration of 69,000 ppb (AWQS is 5 ppb), and cis-1,2-dichlorethene was detected at a maximum concentration of 120,000 ppb (AWQS is 5 ppb). PFOS was detected above the maximum contaminant limit (MCL drinking water standard) of 10 parts per trillion (ppt) at a maximum concentration of 12.51 ppt. PFOA was not detected at concentration exceeding the MCL. Data indicates off-site impacts in groundwater related to this site. Off-site impacts will be further delineated during remediation. Soil Vapor, Sub-Slab Soil Vapor and Indoor Air - Chlorinated VOCs were detected in soil vapor samples, including TCE at a maximum concentration of 488,000 micrograms per cubic meter (ug/m3) and PCE

TECHTRONICS ECOLOGICAL CORP (Continued) **1000244308**

	at a maximum concentration of 590,000 ug/m3. Chlorinated VOCs were detected in indoor air samples including TCE at a maximum concentration of 1,570 ug/m3 and PCE at a maximum concentration of 3,690 ug/m3. Data indicates there is potential for off-site impacts in soil vapor related to this site.
Health Problem:	People may contact contaminated soils or groundwater if they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and this site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is currently vacant and redevelopment is planned. The potential exists for the inhalation of site contaminants due to soil vapor intrusion for future onsite buildings. Additional investigation is needed to determine whether actions are needed to address soil vapor intrusion in offsite structures.

Name:	FORMER TECHTRONICS ECOLOGICAL CORP.
Address:	8 WALWORTH STREET
City,State,Zip:	BROOKLYN, NY 11205
Program:	HW
Site Code:	529340
Classification:	N
Region:	2
Acres:	0.090
HW Code:	224239
Record Add:	06/23/2016
Record Upd:	11/08/2021
Updated By:	HMDUDEK
Site Description:	This site is being managed under BCP site C224239.
Env Problem:	Nature and Extent of Contamination: The chlorinated solvent compounds tetracholoethylene (PCE) and its breakdown products trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE), as well as other volatile organic compounds (VOCs) were detected in soil and groundwater samples during investigation in December 2007. Soil Chlorinated solvents were detected in one soil sample collected from above the water table at concentrations exceeding unrestricted use soil cleanup objectives: PCE (4.3 parts per million, or ppm) and TCE (0.87 ppm). Groundwater Chlorinated solvents were detected in all four groundwater samples collected at the site: PCE ranges from 17 to 30,845 parts per billion, or ppb; TCE ranges from 31 to 48,675 ppb; and cis-1,2-DCE ranges from 7 to 164,000 ppb. Non-chlorinated VOCs were detected in one groundwater sample (MW-2): toluene (75,488 ppb), ethylbenzene (4,393 ppb) and xylene (17,405 ppb). Significant Threat: A significant threat determination will be made following completion of a site characterization.
Health Problem:	As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

DER Facility ID:	314980
DEC Memo:	06/01/06-Vought-Daytime duty desk officer. Spill assigned to DEC Piper (daytime runner). Vought called and spoke to Danny Singh (fax 718-857-2100) and as per Singh owner is: Myer Stern 545 Broadway Suite 1C Brooklyn, NY 11206 Cell 718-599-5569 Fax 718-599-5632 Contaminated soil found on top of 8000-gallon #4 fuel oil UST which was removed. Contamination found at 6' below grade. Soil being stockpiled on plastic sheeting. Site will be overexcavated and samples sent for disposal analysis. Groundwater very deep at site. Site will be developed as six family residential site and is E designated. This site is lot 3 and lot 1 is E designated and NYCDEP requests lot 3 to be part of E designation review. NYCDEP contact is Tyrell Estesen (718-595-4473 fax 718-595-4479). Previous Phase II investigation performed. Spill number on Lot #1 is 0601468. DEC

VACANT LOT (Continued) **S107789535**

requires STIPULATION AGREEMENT due to development issues of site: 1)endpoint samples 2)vapor barrier and possible sub-slab depressurization system 3)delineation 3)submission of PBS registration. Vought called Myer Stern and left message to return to DEC Piper. STIPULATION sent with above requirements with cc to DEP and Singh. 6/2/06- DEC Piper sent STIP. 6/15/06- DEC Piper left message for ted at Don Carlo Env. requesting callback. 8/21/06- DEC Piper received signed STIP agreement, w/ Myer Stern. 9/26/06- DEC Piper responded to site. Don Carlo and owner on site to witness excavation of contaminated soils. Soil was stockpiled. 5 Endpoints colled and waiting for 14-48 hr turnaround to determine if additional excavation is neeeded. 10/27/06- DEC Piper reviewed closure request. As per report and analytical, this spill is closed.See e-docs if warranted.

Remarks: 8000 GALLON TANK HAD CONTAMINATED SOIL

Contact Name: SALVATORE MENNELLA
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 4/12/04-Vought-Spill transferred from Mulqueen to Vought as per Rommel. 3/24/06 Diaz - Next steps required - review file, track down contacts. Spill transferred back to Region 2 3/10/08 - Austin - Spill assigned to Ahmed for followup - end 10/27/11 - Austin - Transferring this case from Ahmed to Ketani - end 9/23/13 - Raphael Ketani. I spoke to Heidi Unwin (518) 786-4347, Environmental Specialist II, Environmental Compliance Branch regarding the spill. She said that she had been looking through some old records and discovered that the spill had not been closed out. I told her that the DEC had only two letters stating that the investigation and remediation was going to take place. Ms. Unwin stated that she will send the DEC copies of all of the remediation, sampling and disposal information that she has on file. 10/8/13 - Raphael Ketani. Ms. Unwin sent 4 documents regarding the tank removal and soil excavation. These documents were: the Solution Mechanical Corp. 7/11/96 pre-excavation soil endpoint analytical report; the Solution Mechanical Corp. 7/18/96 post-excavation soil endpoint analytical report; the Solution Mechanical Corp. 7/26/96 tank removal and remediation report; and the NYS Division of Military and Naval Affairs 10/2/13 Spill Closure Letter. The pre-excavation soil endpoint samples were analyzed for VOCs and SVOCs. Samples were taken from all four sidewalls and two samples from the bottom. The results were either non-detect or well below the CP-51 unrestricted standards. The post-excavation soil endpoint samples were analyzed for VOCs and SVOCs. Samples were taken from all four sidewalls and two samples from the bottom. Samples were also taken from the soil stockpile and around the stockpile. The results were almost entirely non-detect for the endpoints and non-detect to well below standards for the soil stockpile samples. The tank removal and remediation report had a map showing where the tanks and the pump islands had been. Both 2,000 gal. USTs had contained gasoline, even though one was labeled as containing diesel. The cause of the spill was the sweating of product from the joints of the fill pipes and the suction lines. The excavation of the soil had started on 6/24/96. The contaminated soil was shipped to a landfill in Albany, NY. Tanks were cleaned and shipped to a scrap metal facility. Manifests were included for the soil and the tanks. The Spill Closure Letter stated that about 63.4 tons of soil had been excavated. 10/10/13 - Raphael Ketani. The spill case was presented to Hassan Hussein, supervisor Unit C, Region 2, Remediation for closure. Mr. Hussein

UNITED STATES ARMORY (Continued) **S103569544**

accepted the closure of the spill case. Based upon the information in the case record, the site has
been successfully remediated and there are no threats to the public of the environment. Therefore,
I am closing the spill case effective today.

Remarks: upon digging out tanks it was discovered that soil was contaminated from gasoline and possibly diesel fuel-area has been cleaned up

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SUN 1/12/06: Reviewed the third triannual 2005 update report dated 1/9/06. Samples taken on 11/18/05. Max BTEX 680ppb (MW5), max MTBE 120 ppb (MW6). Plume located on northern corner of the property and no off-site delineation. Sent off-site delineation required letter. 1/26/05: 1/25/06 meeting with Quantum, NYSDEC, and ET. We will wait one more quarter to investigate the peak in concentration in MW-5 and MW-6. 6/5/06: Received first triannual update report. ORC socks installed in MW 5 and 6 on 2/24/06. Max BTEX 328 in MW5, max MTBE 85 in MW6. Depth to water 21-25 ft. Closure was requested. 8/28/06: Reviewed March - June 2006 update report. Wells sampled on 6/15/06. Large increase in BTEX concentration in MW5.

SPEEDWAY 7810 (Continued) **1000263768**

Max BTEX 1180 in MW5, max MTBE 165 ppb in MW5. ORM socks will be replaced in August 2006. 9/27/06:
Spill 06-01468 was opened on the property directly downgradient, 791 Bedford Avenue. Sent letter to
Hess requesting additional delineation downgradient of the site due 11/29/06. 11/2/06: Spill
0601468 was consolidated with this spill. Residual BTEX contamination remains on 791 Bedford
Avenue. 12/18/06: Emailed Hess to followup on status of off-site delineation. Received email from
Hess: Hess requests that the DEC provide all available information including analytical results,
sampling depths and locations, figures and reports related to the off-site contamination observed
on the auto yard property. The information is necessary to evaluate potential off-site delineation.
1/17/07: Meeting on 1/16/07 with Hess, Delta, NYSDEC. A FOIA request was submitted for downgradient
spill. 1/23/07: Received update report. Wells sampled on 10/2/06. Max BTEX 354 ppb (MW5), max MTBE
54 ppb (MW5). ORC socks in MW 5 and 6. Triannual sampling. 2/22/07: Received email from Aaron: We
are still awaiting FOIA response from our January 12th request.
4/26/07: Received update report.
Wells sampled on 2/23/07. Max BTEX 755 ppb (MW5). Max MTBE 45 ppb (MW5). Report states that
downgradient site has cVOCs and metal impact which Hess could not be a source of. However,
downgradient site has no soil VOC impact, while it does have low level VOC groundwater impact.
9/4/07: Reviewed site status report. General decreasing trend. Wells sampled on 6/26/07. Max BTEX
33 ppb (MW6). Max MTBE 7 ppb (MW6). NFA requested. 2/11/08: Reviewed August 2007 to November 2007
Site Status Report. Wells sampled on October 5, 2007. Max BTEX 520 ppb (MW5), max MTBE 17 ppb
(MW5). Triannual groundwater monitoring and sampling will continue. 5/14/08 - Carlson: Meeting on
5/7/08 with Hess and Envirotrac. The Department requested the installation of two sidewalk wells.
Wells sampled on 2/26/08. Low dissolved concentrations. 9/8/08 - Carlson: Reviewed update report.
Low dissolved concentrations. Emailed Hess/Envirotrac - IP for delineation wells due on October
8th. 10/15/08 - Carlson: Received workplan for the installation of two downgradient wells on the
north side of Park Avenue. Approved well locations by email. 10/22/08 - Carlson: Meeting with
Hess/Envirotrac. The Department requested confirmatory soil borings be completed. RIR due by end of
year. 11/6/08 - Carlson: Issued delineation workplan approval letter. 3/5/09 - Carlson: Received
notification that well installation is scheduled for 3/9/09. 3/11/09 - Carlson: Received update
report. Confirmatory soil boring data showed low level impact remains in SB1. 3/18/09 - Carlson:
Meeting with HESS/Envirotrac. Access denied for off-site delineation.

SPEEDWAY 7810 (Continued) **1000263768**

Quarterly gauging requested.
4/6/09 - Carlson: Emailed Ed Russo to get contact information for
off-site owner. 4/8/09 - Carlson:
Received email from John Schenkewitz with name of off-site owner. Hess
does not feel comfortable
installing wells in this location due to conflict with off-site owner.
7/3/09 - Carlson: Received
June 2009 update report. Low dissolved concentrations. 8/19/09 -
Carlson: Meeting held with Hess
and Envirotrac. Install approved monitoring wells as borings with
temporary piezometers only, due
to access issues with off-site property owner. 10/21/09 - Carlson:
Reviewed September 2009 Update
Report. Low level dissolved concentrations remain. No update on
off-site delineation. 10/30/09 -
Carlson: DEC Tibbe contact off-site owner (Isaac Genud, 347-495-9584).
Mr. Genud will provide
access for sidewalk well installation. 12/3/09 - Carlson: Witnessed
off-site well installation on
Park Avenue. 1/7/10 - Carlson: Reviewed December 2009 update report.
Low dissolved concentrations.
Off-site well installation data to be reported in next quarterly
report (March 2010). 1/27/2010 -
Carlson: Meeting with Hess. 4/21/2010 - Carlson: Reviewed March 2010
update report. Off-site wells
installed - clean. Spike in groundwater concentrations in MW5 and MW6.
Confirmatory soil borings
completed in 11/2008 showed residual soil impact in these areas.
Issued letter requiring RAP in 30
days. 7/13/2010 - Carlson: Reviewed update report. RAP received -
submitted separately. 8/3/2010 -
Carlson: Reviewed delineation workplan/RAP. Two boring, one monitoring
well, two AS wells proposed.
Soil borings will be completed as monitoring wells if soil impact is
encountered. STRE will be
conducted. Issued approval letter. 3/3/11- Obligado - I reviewed the
3Q10 report. Maximum benzene
concentration is 157 ug/L. Max MTBE is 5.8 ug/L in MW6. Maximum BTEX
is 206 ug/L in MW6. 4/11/11 -
Obligado - Hess submitted a closure petition. I reviewed and rejected
the petition. They have not
yet implemented the approved RAP. I emailed a letter to Ed Russo cc to
John Engdahl requiring
implementatino of the approved RAP. 8/17/11 - Obligado - Email from Ed
Russo. They will implement
STRE event next week and submit a report in September. 9/7/2012 -
1Q2012, 6/29/2012, by EnviroTrac.
The groundwater was sampled on 4/17/2012. DTW 20.66 to 25.59. Flows to
north. NO LNAPL. The next
sampling will be in 7/2012. Hess to evaluate historical soil,
groundwater and STRE data to
determine remedial efficiency. MW-9, 15.9J BTEX, 2.8 MTBE. MW-5, 0.40J
BTEX, 200 MTBE. MW-6, 3.98J
BTEX, MTBE ND. MW-10, 3.79J BTEX, 1.5 MTBE. 11/6/2012 - 2Q2012,
9/28/2012, by EnviroTrac. The
groundwater was sampled on July 31, 2012. DTW 21.73 to 25.87. Flows to
north. MW-5, 20.83 BTEX, 110

SPEEDWAY 7810 (Continued) **1000263768**

MTBE. MW-6, 149.7 BTEX, 0.76J MTBE. MW-4, 28.06J BTEX, MTBE ND. The next sampling will be in
October 2012. Hess to evaluate historical soil, groundwater and STRE data to determine remedial
efficiency. 2/1/2013 - 3Q2012, 12/31/2012, by EnviroTrac. The groundwater was sampled on 10/9/2012.
DTW 21.73 to 25.87 feet. NO LNAPL. Flows to north. MW-5, 28.25J BTEX, 34.5 MTBE. MW-6, 116.9 BTEX,
1.5 MTBE. The next sampling will be in 1/2013. Hess to conduct 6 STRE in area of concern beginning
1/2013. 9/24/2013 - 4Q2012, 3/29/2013, by EnviroTrac. The groundwater was sampled on 1/14/2013. On
1/3/2013, STRE on MW-5 and MW-6. DTW 22.11 to 26.22 feet. Flows to north. NO LNAPL. MW-5, 94.7
BTEX, 29.2 MTBE. MW-6, 36.5J BTEX, 0.68J MTBE. 1Q2013, 6/28/2013, by EnviroTrac. The groundwater
was sampled on 4/16/2013. Based on the groundwater sampling data, MW-1, MW-2 and MW-3 will be
removed from the sampling plan. MW-9, 255 BTEX, 26.2 MTBE. MW-5, 288.8 BTEX, 10.4 MTBE. MW-6, 56.3
BTEX, 1.2 MTBE. On 2/20 and 4/10/2013, STRE on MW-5 and MW-6. MW-5/AS-1, PID reading 1,046 ppm.
MW-6/AS-2, PID reading 2,000 ppm. 3/14/2014 - Conference among OER Shaminder Singh and Shana
Holberton, DEC J. Vought and J. Feng. The station will be rebuilt into a new station. Vapor barrier
and SSDS will be installed for the new convenience store. 3/20/2014 - Discussed with J. Vought.
Spill is closed based on: 1) Source removal, i.e. (36) 550-gallon previously abandoned gasoline
USTs, (4) 4,000-gallon gasoline USTs, (2) 2,000-gallon gasoline USTs, (1) 1,000-gallon fuel oil
UST, (1) 550-gallon waste water UST and all associated dispensers, piping and remote fills were
removed in 8/1995. 2) A total of 1,400 tons of petroleum impacted soil was removed offsite for
disposal during the USTs removal activities. 3) Subsurface investigation as 11 monitoring wells,
two Air Sparge wells and 3 soil borings have been installed. The extent of soil and groundwater
contamination has been delineated at this time. 4) The soil boring SB-1 was found to have remaining
soil contamination at 24-25 feet where at the smear zone. Downgradient well MW-6 nearby show low
and downward trend in BTEX concentration suggest that the soil contamination possibly no longer
contribute to groundwater contamination. 5) No groundwater contamination has been found in the
downgradient wells MW-7 and MW-8 since their installation. It suggest that the contamination plume
is contained onsite. 6) The maximum BTEX 100.5J ug/L and 39.9 ug/L MTBE was detected in MW-5 on
1/6/2014. The groundwater has been demonstrated a significant reduction in contamination levels.
Groundwater monitoring data showing downward trend which suggest attenuation is occurring. 7) The
site will be re-developed as a new station, vapor barrier and SSDS

SPEEDWAY 7810 (Continued) **1000263768**

will be installed for the new
convenience store. No change use of the property has been aware of at
this time. 8) The residual
contamination notification language will be included into the Spill
Closure Letter. 3/21/2014 -
Spill closure letter to Hess and copied EnviroTrac and OER.

Remarks: UPGRADE OF TANKS IN PROCESS - SOIL FOUND TO BE CONTAMINATED PROBABLY FROM OLD LEAKING TANK - WILL BE REMOVING ALL CONTAMINATED SOIL

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was SUN 10/7/03 TIPPLE
UPDATING///GASOLINE IN TWO SUMPS 20GAL IN ONE, 30 GAL IN ANOTHER. ALARM WENT OFF INDICATING SPILL,
SUMPS SOUND AND HESS IS CURRENTLY TRANSFERRING GAS BACK INTO TANKS. FROM CURRENT INFORMATION THE
PRODUCT IN THE SUMPS APPEAR TO CORRELATE TO A DELIVERY FROM ISLAND TRANSPORT. 1/12/2004 Reassigned
from Sangesland to Sun. Also refer to Spill # 95-06480 for this site. 1/12/2004 This spill # is
closed. To be investigated and remediated under Spill # 95-06480.

Remarks: caller believes there was a delivery overfill - not sure yet - all
materal contained in a sump area - all materal cleaned up

BROWNFIELDS:

Name:	85 SKILLMAN STREET - FORMER JUNK YARD
Address:	85 SKILLMAN STREET
City,State,Zip:	BROOKLYN, NY 11205
Program:	BCP
Site Code:	487038
Acres:	0.191
HW Code:	C224183
SWIS:	2401
Town:	New York City
Record Added Date:	09/19/2013
Record Updated Date:	12/10/2015
Update By:	RECURLEY
Site Description:	Location: The 85 Skillman Street site (Site) is located in the Bedford-Stuyvesant section of Brooklyn. The site is bounded by commercial/residential properties and Park Avenue to the north, residential properties, a fire station and Bedford Avenue to the east, commercial, vacant property and Myrtle Avenue to the south and Skillman Street to the west. Site Features: The site is identified as 85 Skillman Street, Section 3, Block 1900, Lot 16 on the NYC tax map. Lot 16 encompasses approximately 0.19 acres of property and includes former lots 14, 15, 16 and 17, that were consolidated into one through a lot merger. The site was formerly vacant property covered

85 SKILLMAN STREET - FORMER JUNK YARD (Continued) **S113916513**

with crushed stone and gravel and used as a parking lot. Current Zoning and Land Use: The site is zoned M1-2/R6A in a mixed use zoning district. This mixed use district permits a mixture of residential and non-residential (commercial, community, light manufacturing) uses in the same building. After remediation, the site has been developed for restricted residential use as a multi-story apartment building with a basement. Past Use of the site: All of the lots which now make up the site parcel were developed as residential properties at one time. Former lot 17 on the north side was redeveloped for industrial use as a sheet metal facility for a short period around 1950, an auto repair facility and then as a junk storage or storage facility. The structure on this lot was demolished around 1978, however the lot continued to be used as a small junkyard up until recently. The residence on former lot 16 was demolished around 1965. Residential structures on former lots 14 and 15 were demolished around 1981. Since the demolitions, former lots 14, 15 and 16 have been used for parking. Site Geology and Hydrogeology: The topography of the site and the surrounding area slopes gently to the northwest towards the New York Shipyard and the East River. The ground level elevation on the property is approximately 33 feet above mean sea level. The site is underlain by a layer of historic fill that is approximately 2 to 7 feet thick starting just below the ground surface. The historic fill generally consists of silty-sand, brick, wood, concrete and other debris. The native soils below the historic fill consist of brown silty-sand. The approximate depth to groundwater is 31 feet below ground surface (bgs) in the area. Regional groundwater contour maps indicated that the groundwater flow should be to the northwest towards the East River. However, contrary to this, monitoring well water level measurements appear to indicate that the site area flow is in a southeasterly direction. Additional research indicates that groundwater flow, particularly on the eastern half of the site, may be influenced by the MTA's six subway dewatering wells located in the Nostrand and Marcy Avenue area 1,600 feet to the east of the site.

Env Problem:

Remediation at the site is complete. Prior to remediation, the primary contaminants were PCBs in soil, as well as lead and polycyclic aromatic hydrocarbons in soil. Minimal amounts PCBs were also detected in groundwater. Remedial actions have been achieved unrestricted soil cleanup objectives, PCBs are no longer present in groundwater and no environmental easement or site management plan are necessary. The text below remains for information. Nature and Extent of Contamination: Soil - A total of 17 soil samples were initially collected at the site. Twelve of these samples were collected from six borings at two different depth intervals (0 to 2 and 6 to 8 feet) in each boring. Two soil samples were collected at the groundwater interface in two of the borings. Additionally three shallow hand-augured soil samples were collected at a suspected hotspot area in the NE corner of the site. At the request of the USEPA, eight additional soils samples (B7 to B14) were collected from 0 to 2 feet below grade to further delineate the horizontal extent of soil with PCB concentrations greater than 50 ppb. The shallow soils on northern lot 17 and on the western half of lot 16 were impacted by polychlorinated biphenyls (PCBs). PCB (Aroclor 1254) were found in the range of 0.51 to 150 parts per million (ppm) in the 0 to 2 foot depth interval. The shallow soils throughout the site have also been impacted by metals and polycyclic aromatic hydrocarbons (PAHs). Lead was found in the range of 450 to 5,300 ppm and individual PAHs from non-detectable to 18 ppm. No volatile organic compounds (VOCs) were

85 SKILLMAN STREET - FORMER JUNK YARD (Continued) **S113916513**

encountered during the RI Except at one location where metals and PAHs were found in fill materials, there was no contamination, including PCBs found above unrestricted use SCOs in the deeper (6 to 8 foot) native soils. The RI report cited the presence of subsurface electrical equipment located in the northeast corner of the property as the possible source of the PCB contamination. The metals and PAH contamination found throughout the site, appears to be indicative of typical historic fill in NYC. Remediation consisted of excavation and disposal of contaminated soil, followed by confirmation sampling. Initially, areas of soil containing PCBs above 40 ppm (PCB Hot Spot) and PCBs between 1 ppm and 40 ppm (PCB Cold Spot) were divided into grids and sampled individually to ensure PCB removal. Upon completion of PCB soil removal, and after removal of the remaining historic fill and clean soil necessary for building construction, nine endpoint samples were taken. These indicated that no exceedances of unrestricted soil cleanup objectives for PCBs, metals, VOCs, SVOCS or pesticides remain at the site. Groundwater - PCE and TCE were initially found in groundwater at two monitoring well locations on the eastern side of the property. Both compounds were above the groundwater standards of 5.0 ppb for each and were believed to originate from an off-site source. The maximum PCE concentration was 26 ppb and the maximum TCE concentration was 38 ppb. Filtered samples of groundwater exceeded SCGs for sodium and manganese as well as for iron, which are commonly found in shallow groundwater in this region and are not considered site specific contaminants of concern. PCBs were also found in groundwater in three of the monitoring wells. Concentrations ranged from 1.5 to 2.3 ppb. Based on the fact that PCBs were not detected in the deeper soils, the depth to groundwater and the installation of the wells in contaminated boreholes, the RI report attributed the PCBs in groundwater to cross-contamination during monitoring well construction. All four wells were removed during construction. After remediation, four groundwater wells were re-installed at the site. The groundwater was sampled twice and did not contain PCBs. Although the PCE and TCE were attributed to an off-site source, groundwater was also sampled for VOCs. While the PCE in the first well was 26 ppb, the TCE decreased by 60 percent to a final concentration of 12 ppb. In the second well, the groundwater concentrations of both PCE and TCE decreased by over 90 percent (to 1.9 and 1.3 ppb respectively). Soil Vapor - During the remedial investigation, soil vapor on the property was found to contain low levels of several volatile organic compounds. The PCE concentrations found in soil vapor were less than 1.0 micrograms per cubic meter and TCE was not detected in the soil vapor. No remedial measures were necessary to address soil vapor onsite.

Health Problem:	Remedial actions completed at the site have eliminated all potential exposures to site-related contamination.

Updated By: SNBOLLER
Site Description: Location: The site is known as the Former Domsey Fiber Corp. Site, and was comprised of a single tax parcel identified as Block 2135, Lot 1. It has since been subdivided into lots 1-9 with the construction of the initial redevelopment which consists of eight buildings in the northern section (lots 2-9). The site was previously occupied by Domsey Fiber Corp., is located in the Williamsburg section of Brooklyn (Kings County) and is currently comprised of two sections, north and south, which are divided by a public road, South 10th Street,totaling 111,465 square feet (2.56 acres). The site has

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

237 feet of frontage on South 11th Street, 490 feet on Wythe Avenue, and 498 feet on Kent Avenue. The north sector designated A totals 60,448.96 sf (1.38 acres) and is bounded by S. 9th Street to the north, Wythe Avenue to the east, Kent Avenue to the west and a planned road, identified as S. 10th Street, to the south. The south sector designated "B" totals 51,015.63 sf (1.17 acres) and is bounded by a planned road, S. 10th Street, to the north, Wythe Avenue to the east, Kent Avenue to the west and S. 11th Street to the south. Site Features: The subject site was prevoiusly developed with three buildings which were demolished prior to remediation. As the initial part of the redevelopment, eight seven-story buildings for residential occupancy have been constructed in the north section of the site. Similar redevelopment is planned for the southern section. Properties located north and northwest of the subject property have recently been developed as residential and mixed residential/commercial properties. Properties to the east and west along Wythe Avenue and Kent Avenue are mixed with commercial and residential properties. Properties to the south consist of older commercial/industrial buildings. Current Zoning: In 2002 the subject Site and two additional parcels were rezoned from M3-1 heavy industrial to R7A Residential as part of the Domsey Rezoning Conditional Negative Declaration (CEQR No. 00DCP008K). Historic Uses: The subject site was utilized primarily for a variety of commercial and industrial uses from the late 1800s to the 1940s. Former on-site commercial/industrial operations included the following; machine shops, a pump works, leather goods manufacturing, pen manufacturing, coffin manufacturing, confectioners, paint and varnish manufacturing companies, a gas appliance manufacturing company, truck and auto repair shops, laboratories, and construction companies. All of the buildings within the footprint were demolished sometime before 1959 (except the two-story and four-story buildings mentioned in the Site Features section, above)and then redeveloped with the warehouse building that currently occupies the site for use by the F and M Schaefer Brewing Co. for warehousing and shipping of beer. The last tenant was Domsey International Trading Co. (used clothing factory), which was reported to have moved in sometime between 1975 and 1986 and left by 2002. Site Geology and Hydrogeology: Subsurface soils at the Site consisted of a silty, non-native fill with bricks, wood and other rubble which ranges in thickness from 2 feet in the eastern part to 12 feet in the western section of the building. Most of this fill was excavated and removed as part of the remedial action. Native fine brown silty-sand is present immediately below the fill material to a depth of approximately 14 feet below grade. The fine silty-sand layer is underlain by a fine to coarse sand and gravel layer to the water table approximately 22 feet below grade. The elevation of the property is approximately 16-25 feet above the National Geodetic Vertical Datum (NGVD). The topography in the immediate area of the property generally slopes downward from east to the west. The depth to groundwater beneath the site is approximately 17 to 23 feet below grade within the native silty-sand. Groundwater flow is generally from the northeast to the southwest with some mounding exhibited in the northwest portion of the Site. The nearest body of water to the subject site is Wallabout Channel (a portion of the East River) located approximately 400 feet to the west.

Env Problem: Nature and Extent of Contamination: Prior to remediation: Soil - Soil and groundwater at the site were impacted by a release(s) of petroleum, PCE and possibly TCE particularly in the northwest corner

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

of the Site. These contaminants were found to be limited to the top 13 to 15 feet of soil within an approximate radius of 35 feet. The release scenario is unknown but likely caused by a spill from waste fuel stored in a drum or above ground tank. Waste PCE was likely discharged to the same container resulting in PCE contaminated waste oil being spilled. The released fluid was of insufficient quantity to migrate through the 20 foot soil column to the water table, terminating at a depth of 13 to 15 feet below ground surface. Groundwater - Groundwater in the location mentioned above also exhibited high SVOC concentrations. This would indicate that this area is not the source of site wide CVOC contamination in groundwater; this was further evaluated as stated in the Elements of the Proposed Remedy section, below. The wide distribution of CVOCs in groundwater may be a function of the limited slope in the water table. Based on the groundwater flow direction and distribution of CVOCs across the Site, a low level CVOC plume appears to be migrating onto the Site from the northeast (upgradient) direction. The results of the subsequent off-site groundwater sampling confirmed that the aforementioned contaminant plume is from an upgradient source. Soil Vapor - CVOCs are present in soil vapor at elevated concentrations in many areas of the Site. CVOCs are either off-gassing from impacted groundwater and soil on-site or are migrating onto the Site from off-site sources. The highest concentration of PCE and TCE in soil vapor occurred in locations along the western and eastern property line in the southern section of the Site. However, this does not correspond with the highest concentrations of these contaminants in groundwater or soil which were encountered in the northeast and northwest corner of the Site respectively. In general, CVOC concentrations in soil vapor were higher in perimeter locations than those within the footprint of the former building. Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs, CVOCs and metals such as chromium in soil. Remedial action has successfully achieved soil cleanup objectives for a contingent Track 1 cleanup to not include unrestricted use. On-site soil vapor contamination will be mitigated by the sub-slab depressurization system (SSDS), and this is being managed under a Site Management Plan. Based on the results of supplemental soil vapor intrusion testing at the site, the Remedial Engineer (P.E.) certified in the report that the site remains protective of human health and the environment without reliance on the SSDS. The NYSDOH then reviewed and concurred with the request to terminate the SSDS operation. A letter was then issued by NYSDEC in July 2019 approving termination of the SSDS. Pursuant to 6 NYCRR Part375-3.8(e)(1)(iv)(a) the remedial program has now achieved a Track1 unrestricted use cleanup as the SSDS is no longer required as an engineering control after 5 years of mitigation.

Health Problem: Remedial actions are complete and have eliminated the potential for contact with site-related contaminants.

Site Code:	462026
Site Description:	Location: The site is known as the Former Domsey Fiber Corp. Site, and was comprised of a single tax parcel identified as Block 2135, Lot 1. It has since been subdivided into lots 1-9 with the construction of the initial redevelopment which consists of eight buildings in the northern section (lots 2-9). The site was previously occupied by Domsey Fiber Corp., is located in the Williamsburg section of Brooklyn (Kings County) and is currently comprised of two sections, north and south, which are divided by a public road, South 10th Street,totaling 111,465 square feet (2.56 acres). The site has

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

237 feet of frontage on South 11th Street, 490 feet on Wythe Avenue, and 498 feet on Kent Avenue. The north sector designated A totals 60,448.96 sf (1.38 acres) and is bounded by S. 9th Street to the north, Wythe Avenue to the east, Kent Avenue to the west and a planned road, identified as S. 10th Street, to the south. The south sector designated "B" totals 51,015.63 sf (1.17 acres) and is bounded by a planned road, S. 10th Street, to the north, Wythe Avenue to the east, Kent Avenue to the west and S. 11th Street to the south. Site Features: The subject site was prevoiusly developed with three buildings which were demolished prior to remediation. As the initial part of the redevelopment, eight seven-story buildings for residential occupancy have been constructed in the north section of the site. Similar redevelopment is planned for the southern section. Properties located north and northwest of the subject property have recently been developed as residential and mixed residential/commercial properties. Properties to the east and west along Wythe Avenue and Kent Avenue are mixed with commercial and residential properties. Properties to the south consist of older commercial/industrial buildings. Current Zoning: In 2002 the subject Site and two additional parcels were rezoned from M3-1 heavy industrial to R7A Residential as part of the Domsey Rezoning Conditional Negative Declaration (CEQR No. 00DCP008K). Historic Uses: The subject site was utilized primarily for a variety of commercial and industrial uses from the late 1800s to the 1940s. Former on-site commercial/industrial operations included the following; machine shops, a pump works, leather goods manufacturing, pen manufacturing, coffin manufacturing, confectioners, paint and varnish manufacturing companies, a gas appliance manufacturing company, truck and auto repair shops, laboratories, and construction companies. All of the buildings within the footprint were demolished sometime before 1959 (except the two-story and four-story buildings mentioned in the Site Features section, above)and then redeveloped with the warehouse building that currently occupies the site for use by the F and M Schaefer Brewing Co. for warehousing and shipping of beer. The last tenant was Domsey International Trading Co. (used clothing factory), which was reported to have moved in sometime between 1975 and 1986 and left by 2002. Site Geology and Hydrogeology: Subsurface soils at the Site consisted of a silty, non-native fill with bricks, wood and other rubble which ranges in thickness from 2 feet in the eastern part to 12 feet in the western section of the building. Most of this fill was excavated and removed as part of the remedial action. Native fine brown silty-sand is present immediately below the fill material to a depth of approximately 14 feet below grade. The fine silty-sand layer is underlain by a fine to coarse sand and gravel layer to the water table approximately 22 feet below grade. The elevation of the property is approximately 16-25 feet above the National Geodetic Vertical Datum (NGVD). The topography in the immediate area of the property generally slopes downward from east to the west. The depth to groundwater beneath the site is approximately 17 to 23 feet below grade within the native silty-sand. Groundwater flow is generally from the northeast to the southwest with some mounding exhibited in the northwest portion of the Site. The nearest body of water to the subject site is Wallabout Channel (a portion of the East River) located approximately 400 feet to the west.

Env Problem: Nature and Extent of Contamination: Prior to remediation: Soil - Soil and groundwater at the site were impacted by a release(s) of petroleum, PCE and possibly TCE particularly in the northwest corner

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

of the Site. These contaminants were found to be limited to the top 13 to 15 feet of soil within an approximate radius of 35 feet. The release scenario is unknown but likely caused by a spill from waste fuel stored in a drum or above ground tank. Waste PCE was likely discharged to the same container resulting in PCE contaminated waste oil being spilled. The released fluid was of insufficient quantity to migrate through the 20 foot soil column to the water table, terminating at a depth of 13 to 15 feet below ground surface. Groundwater - Groundwater in the location mentioned above also exhibited high SVOC concentrations. This would indicate that this area is not the source of site wide CVOC contamination in groundwater; this was further evaluated as stated in the Elements of the Proposed Remedy section, below. The wide distribution of CVOCs in groundwater may be a function of the limited slope in the water table. Based on the groundwater flow direction and distribution of CVOCs across the Site, a low level CVOC plume appears to be migrating onto the Site from the northeast (upgradient) direction. The results of the subsequent off-site groundwater sampling confirmed that the aforementioned contaminant plume is from an upgradient source. Soil Vapor - CVOCs are present in soil vapor at elevated concentrations in many areas of the Site. CVOCs are either off-gassing from impacted groundwater and soil on-site or are migrating onto the Site from off-site sources. The highest concentration of PCE and TCE in soil vapor occurred in locations along the western and eastern property line in the southern section of the Site. However, this does not correspond with the highest concentrations of these contaminants in groundwater or soil which were encountered in the northeast and northwest corner of the Site respectively. In general, CVOC concentrations in soil vapor were higher in perimeter locations than those within the footprint of the former building. Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs, CVOCs and metals such as chromium in soil. Remedial action has successfully achieved soil cleanup objectives for a contingent Track 1 cleanup to not include unrestricted use. On-site soil vapor contamination will be mitigated by the sub-slab depressurization system (SSDS), and this is being managed under a Site Management Plan. Based on the results of supplemental soil vapor intrusion testing at the site, the Remedial Engineer (P.E.) certified in the report that the site remains protective of human health and the environment without reliance on the SSDS. The NYSDOH then reviewed and concurred with the request to terminate the SSDS operation. A letter was then issued by NYSDEC in July 2019 approving termination of the SSDS. Pursuant to 6 NYCRR Part375-3.8(e)(1)(iv)(a) the remedial program has now achieved a Track1 unrestricted use cleanup as the SSDS is no longer required as an engineering control after 5 years of mitigation.

Health Problem: Remedial actions are complete and have eliminated the potential for contact with site-related contaminants.

Updated By: SNBOLLER
Site Code: 462026
Site Description: Location: The site is known as the Former Domsey Fiber Corp. Site, and was comprised of a single tax parcel identified as Block 2135, Lot 1. It has since been subdivided into lots 1-9 with the construction of the initial redevelopment which consists of eight buildings in the northern section (lots 2-9). The site was previously occupied by Domsey Fiber Corp., is located in the Williamsburg section of Brooklyn (Kings County) and is currently comprised of two sections, north and south, which are divided by a public road, South 10th Street,totaling 111,465 square feet (2.56 acres). The site has 237 feet of frontage on South 11th Street, 490 feet on Wythe Avenue, and 498 feet on Kent Avenue. The north sector designated A totals 60,448.96 sf (1.38 acres) and is bounded by S. 9th Street to the

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

north, Wythe Avenue to the east, Kent Avenue to the west and a planned road, identified as S. 10th Street, to the south. The south sector designated "B" totals 51,015.63 sf (1.17 acres) and is bounded by a planned road, S. 10th Street, to the north, Wythe Avenue to the east, Kent Avenue to the west and S. 11th Street to the south. Site Features: The subject site was prevoiusly developed with three buildings which were demolished prior to remediation. As the initial part of the redevelopment, eight seven-story buildings for residential occupancy have been constructed in the north section of the site. Similar redevelopment is planned for the southern section. Properties located north and northwest of the subject property have recently been developed as residential and mixed residential/commercial properties. Properties to the east and west along Wythe Avenue and Kent Avenue are mixed with commercial and residential properties. Properties to the south consist of older commercial/industrial buildings. Current Zoning: In 2002 the subject Site and two additional parcels were rezoned from M3-1 heavy industrial to R7A Residential as part of the Domsey Rezoning Conditional Negative Declaration (CEQR No. 00DCP008K). Historic Uses: The subject site was utilized primarily for a variety of commercial and industrial uses from the late 1800s to the 1940s. Former on-site commercial/industrial operations included the following; machine shops, a pump works, leather goods manufacturing, pen manufacturing, coffin manufacturing, confectioners, paint and varnish manufacturing companies, a gas appliance manufacturing company, truck and auto repair shops, laboratories, and construction companies. All of the buildings within the footprint were demolished sometime before 1959 (except the two-story and four-story buildings mentioned in the Site Features section, above)and then redeveloped with the warehouse building that currently occupies the site for use by the F and M Schaefer Brewing Co. for warehousing and shipping of beer. The last tenant was Domsey International Trading Co. (used clothing factory), which was reported to have moved in sometime between 1975 and 1986 and left by 2002. Site Geology and Hydrogeology: Subsurface soils at the Site consisted of a silty, non-native fill with bricks, wood and other rubble which ranges in thickness from 2 feet in the eastern part to 12 feet in the western section of the building. Most of this fill was excavated and removed as part of the remedial action. Native fine brown silty-sand is present immediately below the fill material to a depth of approximately 14 feet below grade. The fine silty-sand layer is underlain by a fine to coarse sand and gravel layer to the water table approximately 22 feet below grade. The elevation of the property is approximately 16-25 feet above the National Geodetic Vertical Datum (NGVD). The topography in the immediate area of the property generally slopes downward from east to the west. The depth to groundwater beneath the site is approximately 17 to 23 feet below grade within the native silty-sand. Groundwater flow is generally from the northeast to the southwest with some mounding exhibited in the northwest portion of the Site. The nearest body of water to the subject site is Wallabout Channel (a portion of the East River) located approximately 400 feet to the west.

Env Problem: Nature and Extent of Contamination: Prior to remediation: Soil - Soil and groundwater at the site were impacted by a release(s) of petroleum, PCE and possibly TCE particularly in the northwest corner of the Site. These contaminants were found to be limited to the top 13 to 15 feet of soil within an approximate radius of 35 feet. The release scenario is unknown but likely caused by a spill from waste

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

fuel stored in a drum or above ground tank. Waste PCE was likely discharged to the same container resulting in PCE contaminated waste oil being spilled. The released fluid was of insufficient quantity to migrate through the 20 foot soil column to the water table, terminating at a depth of 13 to 15 feet below ground surface. Groundwater - Groundwater in the location mentioned above also exhibited high SVOC concentrations. This would indicate that this area is not the source of site wide CVOC contamination in groundwater; this was further evaluated as stated in the Elements of the Proposed Remedy section, below. The wide distribution of CVOCs in groundwater may be a function of the limited slope in the water table. Based on the groundwater flow direction and distribution of CVOCs across the Site, a low level CVOC plume appears to be migrating onto the Site from the northeast (upgradient) direction. The results of the subsequent off-site groundwater sampling confirmed that the aforementioned contaminant plume is from an upgradient source. Soil Vapor - CVOCs are present in soil vapor at elevated concentrations in many areas of the Site. CVOCs are either off-gassing from impacted groundwater and soil on-site or are migrating onto the Site from off-site sources. The highest concentration of PCE and TCE in soil vapor occurred in locations along the western and eastern property line in the southern section of the Site. However, this does not correspond with the highest concentrations of these contaminants in groundwater or soil which were encountered in the northeast and northwest corner of the Site respectively. In general, CVOC concentrations in soil vapor were higher in perimeter locations than those within the footprint of the former building. Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs, CVOCs and metals such as chromium in soil. Remedial action has successfully achieved soil cleanup objectives for a contingent Track 1 cleanup to not include unrestricted use. On-site soil vapor contamination will be mitigated by the sub-slab depressurization system (SSDS), and this is being managed under a Site Management Plan. Based on the results of supplemental soil vapor intrusion testing at the site, the Remedial Engineer (P.E.) certified in the report that the site remains protective of human health and the environment without reliance on the SSDS. The NYSDOH then reviewed and concurred with the request to terminate the SSDS operation. A letter was then issued by NYSDEC in July 2019 approving termination of the SSDS. Pursuant to 6 NYCRR Part375-3.8(e)(1)(iv)(a) the remedial program has now achieved a Track1 unrestricted use cleanup as the SSDS is no longer required as an engineering control after 5 years of mitigation.

Health Problem: Remedial actions are complete and have eliminated the potential for contact with site-related contaminants.

All of the buildings within the footprint were demolished sometime before 1959 (except the two-story and four-story buildings mentioned in the Site Features section, above)and then redeveloped with the warehouse building that currently occupies the site for use by the F and M Schaefer Brewing Co. for warehousing and shipping of beer. The last tenant was Domsey International Trading Co. (used clothing factory), which was reported to have moved in sometime between 1975 and 1986 and left by 2002. Site Geology and Hydrogeology: Subsurface soils at the Site consisted of a silty, non-native fill with bricks, wood and other rubble which ranges in thickness from 2 feet in the eastern part to 12 feet in the western section of the building. Most of this fill was excavated and removed as part of the remedial action. Native fine brown silty-sand is present immediately below the fill material to a depth of approximately 14 feet below grade. The fine silty-sand layer is underlain by a fine to coarse sand and gravel layer to the water table approximately 22 feet below grade. The elevation of the property is approximately 16-25 feet above the National Geodetic Vertical Datum (NGVD). The topography in the immediate area of the property generally slopes downward from east to the west. The depth to groundwater beneath the site is approximately 17 to 23 feet below grade within the native silty-sand. Groundwater flow is generally from the northeast to the southwest with some mounding exhibited in the northwest portion of the Site. The nearest body of water to the subject site is Wallabout Channel (a portion of the East River) located approximately 400 feet to the west.

Env Problem: Nature and Extent of Contamination: Prior to remediation: Soil - Soil and groundwater at the site were impacted by a release(s) of petroleum, PCE and possibly TCE particularly in the northwest corner of the Site. These contaminants were found to be limited to the top 13 to 15 feet of soil within an approximate radius of 35 feet. The release scenario is unknown but likely caused by a spill from waste fuel stored in a drum or above ground tank. Waste PCE was likely discharged to the same container resulting in PCE contaminated waste

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

oil being spilled. The released fluid was of insufficient quantity to migrate through the 20 foot soil column to the water table, terminating at a depth of 13 to 15 feet below ground surface. Groundwater - Groundwater in the location mentioned above also exhibited high SVOC concentrations. This would indicate that this area is not the source of site wide CVOC contamination in groundwater; this was further evaluated as stated in the Elements of the Proposed Remedy section, below. The wide distribution of CVOCs in groundwater may be a function of the limited slope in the water table. Based on the groundwater flow direction and distribution of CVOCs across the Site, a low level CVOC plume appears to be migrating onto the Site from the northeast (upgradient) direction. The results of the subsequent off-site groundwater sampling confirmed that the aforementioned contaminant plume is from an upgradient source. Soil Vapor - CVOCs are present in soil vapor at elevated concentrations in many areas of the Site. CVOCs are either off-gassing from impacted groundwater and soil on-site or are migrating onto the Site from off-site sources. The highest concentration of PCE and TCE in soil vapor occurred in locations along the western and eastern property line in the southern section of the Site. However, this does not correspond with the highest concentrations of these contaminants in groundwater or soil which were encountered in the northeast and northwest corner of the Site respectively. In general, CVOC concentrations in soil vapor were higher in perimeter locations than those within the footprint of the former building. Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs, CVOCs and metals such as chromium in soil. Remedial action has successfully achieved soil cleanup objectives for a contingent Track 1 cleanup to not include unrestricted use. On-site soil vapor contamination will be mitigated by the sub-slab depressurization system (SSDS), and this is being managed under a Site Management Plan. Based on the results of supplemental soil vapor intrusion testing at the site, the Remedial Engineer (P.E.) certified in the report that the site remains protective of human health and the environment without reliance on the SSDS. The NYSDOH then reviewed and concurred with the request to terminate the SSDS operation. A letter was then issued by NYSDEC in July 2019 approving termination of the SSDS. Pursuant to 6 NYCRR Part375-3.8(e)(1)(iv)(a) the remedial program has now achieved a Track1 unrestricted use cleanup as the SSDS is no longer required as an engineering control after 5 years of mitigation.

Health Problem:	Remedial actions are complete and have eliminated the potential for contact with site-related contaminants.

Site Description: Location: The site is known as the Former Domsey Fiber Corp. Site, and was comprised of a single tax parcel identified as Block 2135, Lot 1. It has since been subdivided into lots 1-9 with the construction of the initial redevelopment which consists of eight buildings in the northern section (lots 2-9). The site was previously occupied by Domsey Fiber Corp., is located in the Williamsburg section of Brooklyn (Kings County) and is currently comprised of two sections, north and south, which are divided by a public road, South 10th Street,totaling 111,465 square feet (2.56 acres). The site has 237 feet of frontage on South 11th Street, 490 feet on Wythe Avenue, and 498 feet on Kent Avenue. The north sector designated A totals 60,448.96 sf (1.38 acres) and is bounded by S. 9th Street to the north, Wythe Avenue to the east, Kent Avenue to the west and a planned road, identified as S. 10th Street, to the south. The south sector designated "B" totals 51,015.63 sf (1.17 acres) and

FORMER DOMSEY FIBER CORP SITE (Continued) **U003074765**

is bounded by a planned road, S. 10th Street, to the north, Wythe Avenue to the east, Kent Avenue to the west and S. 11th Street to the south. Site Features: The subject site was prevoiusly developed with three buildings which were demolished prior to remediation. As the initial part of the redevelopment, eight seven-story buildings for residential occupancy have been constructed in the north section of the site. Similar redevelopment is planned for the southern section. Properties located north and northwest of the subject property have recently been developed as residential and mixed residential/commercial properties. Properties to the east and west along Wythe Avenue and Kent Avenue are mixed with commercial and residential properties. Properties to the south consist of older commercial/industrial buildings. Current Zoning: In 2002 the subject Site and two additional parcels were rezoned from M3-1 heavy industrial to R7A Residential as part of the Domsey Rezoning Conditional Negative Declaration (CEQR No. 00DCP008K). Historic Uses: The subject site was utilized primarily for a variety of commercial and industrial uses from the late 1800s to the 1940s. Former on-site commercial/industrial operations included the following; machine shops, a pump works, leather goods manufacturing, pen manufacturing, coffin manufacturing, confectioners, paint and varnish manufacturing companies, a gas appliance manufacturing company, truck and auto repair shops, laboratories, and construction companies. All of the buildings within the footprint were demolished sometime before 1959 (except the two-story and four-story buildings mentioned in the Site Features section, above)and then redeveloped with the warehouse building that currently occupies the site for use by the F and M Schaefer Brewing Co. for warehousing and shipping of beer. The last tenant was Domsey International Trading Co. (used clothing factory), which was reported to have moved in sometime between 1975 and 1986 and left by 2002. Site Geology and Hydrogeology: Subsurface soils at the Site consisted of a silty, non-native fill with bricks, wood and other rubble which ranges in thickness from 2 feet in the eastern part to 12 feet in the western section of the building. Most of this fill was excavated and removed as part of the remedial action. Native fine brown silty-sand is present immediately below the fill material to a depth of approximately 14 feet below grade. The fine silty-sand layer is underlain by a fine to coarse sand and gravel layer to the water table approximately 22 feet below grade. The elevation of the property is approximately 16-25 feet above the National Geodetic Vertical Datum (NGVD). The topography in the immediate area of the property generally slopes downward from east to the west. The depth to groundwater beneath the site is approximately 17 to 23 feet below grade within the native silty-sand. Contact Name:	KEITH WILLIAMS
DEC Memo:	8/22/14: Mahat DEC Mahat contacted Mr. Keith Williams (DEP @ (347) 672-6075) inquiring more about the spill and its nature. He mentioned that it is a construction site and poor house keeping resulting in a motor oil spill in the area. DEC Mahat is responding to the site for further investigation. 8/22/14: Mahat Site Visit: DEC Mahat partnered with DEP Keith Williams to investigate further on the site. The contruction site is a Bwown Filed site and it is Managed by DEC Bouler. The site does not have any petroelem spill. However, the site appear to have some DEP waste water violations. A Tickert was issued to the managment company for improper use of the catch basin. Furthermore, a ticket was issued by a ECO for deleberate discharge of the water from the building to the coned vault. The case is disussed with Brown Field Manager and no further investigation is required by the Spill program. Hence, the spill will be closed in the database. **** Spill Close ****
Remarks:	mechanical discharge, purposeful and unknown oil or quantity; cleanup not pending at this time, spilled on grass/soil

DEC Memo:	2/21/2012 - Owner: Wythe & Kent Realty LLC. Joel Braver Express Builders 144 spencer St, Brooklyn Sangesland spoke to Kevin Brussee at Environmental Business Consultants. He said the site is a former industrial site (between oil terminals). Site is now rezoned for residential towers. Soil borings done as part of the redevelopment Phase 2 discovered VOC, SVOC, PCE & TCE contamination. Developer has already given a presentaion and prepared a plan for the City office of OER. Since the city OER can not deal with PCE & TCE, the developer may apply to the NYSDEC Brownfield program. This is NOT a short term cleanup case. 2/24/2012 Kevin Brussee at EBC said he's working with Shaminder (Former DEC now City OER) at 212-442-3007. Shaminder said he already sent the technical report outlining the contamination to Paul John (Copy has now been forwarded to Ryan Piper). After this report is reviewed and confirmed that it is NOT a short term cleanup, Randy Austin said it can be forwarded on to Remediation for action. 5/25/16- DEC Piper- Site is in NYSDEC BCP- This spill closed and referred to C224158

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Feature Description:	As per Declaration of Taking dated 29 January 1941, the Department of the Navy obtained 2.638 acres fee. On 15 April 1975, the Department of the Navy conveyed 2.638 acres fee to GSA. As per quitclaim deed dated 4 June 1979, GSA conveyed 0.294 acre fee to the Department of Health and Hospitals Corporation (HHC) of the City of New York. Said deed did not contain any recapture or restoration clauses but did contain a restrictive clause (to be used public health purposes for a period of thirty years -from the date of conveyance). As per quitclaim deed dated 22 February 1985, GSA conveyed 2.344 acres fee to the City of New York. Said deed did not contain any recapture, restoration or restrictive clauses. On 8 September 1986, the 0.294 acre fee reverted back to GSA because of a breach of contract by HHC. GSA is still the owner of record of the 0.2 94 acre fee.

Description:	The Navy Barracks are located in the County of Kings, Borough of Brooklyn, City of New York, State of New York. The site is bounded on the North by Flushing Avenue, on the South by Park Avenue, on the East by Vanderbilt Avenue and on the West by Clermont Avenue. The site was improved by a six story concrete building utilized as a military prison and three story brick building used as barrack and for administrative purposes. The NYC Department of Corrections is used as the Brooklyn Correctional Facility. The former military prison building and associated utilities are beneficially used by the present owner the New York City Department of Corrections. The former Navy barrack and administrative building is abandoned and owned by GSA. There are number of underground storage tanks, which were never used by the present owner.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 5/12/04 - AUSTIN - TRANSFERRED FROM MULQUEEN TO TIPPLE - END 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 7/23/09- File Review by Intern EM Ibeh. The file being reviewed in SP# 9605522, PIN# 94724, spill date 7/30/96 on 823 Bedford Ave, Williamsburg, Brooklyn. Caller remarks from Spill report states that owner put 55gal. drum of oil out in the street that tipped over spilling oil . A search of PBS tank registrations produced 15 tanks below 1100gallons for the property with PBS# 2-322148 that were removed in 1993. No spills were found. Owner type as per PBS printed 7/30/96 is listed as corporate/commercial and the operator is listed as Fredrick Freedman with address below: Adfreed Oil Co. Inc 823 Bedford Ave Brooklyn NY 11205 P. 718.855.0512 Pictures taken on the day of the spill show a cordoned area of the sidewalk of the affected building and beyond it, covered in layer of sand and a drum of oil in front of the building on a patch of oil-stained concrete. 7/30/96: Letter from DEC to Milro Associates, Inc authorizing them to transport 7 drums of non-hazardous petroleum contaminated soil to their facility for proper storage until laboratory analysis of samples collected are performed and proper disposal arrangements made. 2 Non- hazardous waste manifests showing disposal of non-hazardous absorbents (speedy-dry sand and pads). 7/30/96- ISR to Bureau of Spill Response. 8/21/96- EcoTest Laboratories soil sample analytical report: Oil sample extracted and analyzed on 8/01 contained low viscosity lubricating oil, gasoline, kerosene and fuel oil analyzed by NYSDOH Method 310.13. Soil sample extracted 8/06 and analyzed 8/07 contained <5000ppm kerosene and fuel oil, low viscosity lubricating oil analyzed by NYSDOH Method 310.13 and no presence of gasoline. Petroleum products were not broken down into their respective constituent

SATMAR MEAT (Continued) **S102401866**

compounds for comparison by TAGM cleanup objectives. Oil sample analyzed contained heavy metals in minimal concentrations, <2.5ppm, except for Chromium and Lead, which were 3.6ppm and 3.8ppm respectively. Oil sample analyzed thereafter contained 1.6ppm Cr and 0.47ppm Pb with Aroclor, analyzed by EPA Method 608, at <5ppm. 8/22/01- Initial Demand letter from NYSOAG to Mr., Lazar Mauskopf of 683 Bedford Ave, Brooklyn re: 823 Bedford Ave, Brooklyn stating that the State has determined him liable for the cleanup and removal costs incurred by the New York Environmental Protection and Spill Compensation Fund. 8/22/01- Initial Demand letter from NYSOAG to A&M Baking Goods, Inc, 683 Bedford Ave, Brooklyn re: 823 Bedford Ave, Brooklyn stating that the State has determined them liable for the cleanup and removal costs incurred by the New York Environmental Protection and Spill Compensation Fund. 7/30/09- As per Bechard of OAG, the responsible parties were Lazar Mauskopf and A&M Baking Goods of 683 Bedford Ave, Brooklyn settled in 2002 and all costs to the spill fund were covered. 08/17/09-Vought-Vought and Ibeh reviewed site with DEC Austin and spill closed as spill was on concrete sidewalk and on concrete in basement (as per photographs and ISR) and spill cleaned by state contractor including application and recovery of absorbents. Ibeh spoke with NYSOAG Bechard and NYSOAG settled with responsible party (A&M Baking Goods). Spill closed by Vought. Need for final ISR awaiting callback from DEC Farrar. 08/18/09-Vought-Spoke to DEC Farrar and as Att. Gen. Close Date box is filled out in UIS, no Final ISR needed.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

FINDS:
Registry ID: 110056379814

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110070727293

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	124588
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 9/24/03 There was a Ferric Chloride spill called in to the DEC Hotline by DEP James Daley at 8:37 AM on September 24,2003. Reportedly, the spill was caused by a tank failure. DEC Spill responder Michelle Tipple and Joseph Kudirka from the Water unit responded to this spill. Upon investigation, an 8000 gallon tank of Ferric Chloride had an internal failure and released some of it's contents to a secondary containment tank, this secondary tank released some of the Ferric Chloride into the containment area surrounding the secondary tank. The containment area surrounding the secondary tank had been modified with the installation of a wooden structure secured with steel bolts around the top of the containment. When the chemical hit the bolts they were dissolved, allowing a small amount,10-15 gal of Ferric Chloride beyond the containment areas. Soda Ash was applied to the Ferric Chloride as required by DEP protocol. Mats were placed on the drain inlets in the vicinity to reduce the possibility of the chemical reaching the water. Eagle Brook Pump and repair were in route to remove all product from the tanks and containment area, assess and repair the system. DEP Plant Superintendent Joseph Massaro will keep DEC updated. 9/25/03 Tipple followed up with James Daly- DEP safety. Eagle Brook worked until 4:30 this AM removing product and thoroughly cleaning the tanks and impacted area, all product removed from the site was carried by the eagle brook company's properly tagged tank trucks. Upon inspection of the cleaned system it was determined that the discharge line on the bottom of the tank was compromised causing the release. The system repairs are scheduled to begin later today.
Remarks:	ruptured tank caused materal to leak - attm to stop leak now - haz mat enroute - 10 to 15 gal on the ground -- over 1000 gal in the tank -- potential for a large spill

DEC Memo:	7/14/10-HRAHMED-Spoke and got email from Stephen B. Warlick, Environmental Health and Safety Manager for Brooklyn Navy Yard Cogeneration Plant (718-246-0870 (x16)). As per the email, the fire protection foam (Ansul 3% Fluoroprotein Foam Concentrate) system deployment was caused by heat detector activation false alarm. There was no fire or release of a petroleum product. Some of it got in the water of East river, contained by the permanent boom placed near the entrance for the dry dock area. A copy of MSDS for the foam was uploaded to UIS. Spill closed a notified to Water Division.
Remarks:	false alarm at fuel oil storage tank/no loss of product/small amount of fire retardant went into the bay

BROWNFIELDS:

Name:	100 UNION AVENUE REDEVELOPMENT SITE
Address:	100 UNION AVENUE
City,State,Zip:	BROOKLYN, NY 11206
Program:	BCP
Site Code:	569083
Acres:	0.240
HW Code:	C224274
SWIS:	2401
Town:	New York City
Record Added Date:	04/17/2018
Record Updated Date:	05/18/2023
Update By:	AAOBLIGA
Site Description:	Location: The 100 Union Avenue site is located in an urban area at 100 Union Avenue, Brooklyn, NY. It is bordered by Middleton Street to the north, a small parking area and multi-story residential building to the south/southeast, Union Avenue to the west, and a New York City Transit (NYCT) substation and multi-story residential buildings to the east. Site Features: The site is 10,566 square feet (0.24 acres) in area and is currently vacant. Surface cover is mostly concrete with patches of vegetation throughout the site, and it is surrounded by a plywood fence along the two bounding streets. Current Zoning and Land Use: The site is zoned R6A (residential district) with C2-4 commercial overlay and is currently vacant. Past Use of the Site: The site was historically occupied by a church and by residential dwellings from 1887 through 1935. The site was vacant by 1950. The site was used for auto sales between 1965 and 1991 and then as an auto repair shop and junk yard from 1992 until 2014. Site Geology and Hydrology: The site is generally level and is at an elevation of approximately 16 feet above sea level. The topographic gradient of the site and the surrounding area gradually slopes west northwest towards the East River. Fill composed of brown medium sand, some medium gravel and cinders were identified throughout the site between 0 to 8 feet below ground surface (ft-bgs). Gray silty sand was also identified throughout the site between 8 and 15 ft-bgs. A layer of localized peat was identified in the northeastern area of the site at depths of 8 to 9.5 ft-bgs. A confining clay layer was observed at between 9 and 15 ft-bgs. Bedrock was not encountered. Groundwater was found to flow in a south/southeast direction. Groundwater was encountered between approximately 6.76 and 8.49 ft-bgs.
Env Problem:	Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted at the Site, the primary contaminants of concern are chlorinated solvents, specifically tetrachloroethylene (PCE) and trichloroethene (TCE). Soil: No VOCs were detected at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the applicable protection of groundwater SCOs. SVOCs were detected at concentrations above RRSCOs in the upper 2 feet of soil only including benzo(a)anthracene at 7.47 parts per million (ppm), benzo(a)pyrene at 5.16 ppm and benzo (b) fluoranthene at 5.7 ppm, all

100 UNION AVENUE REDEVELOPMENT SITE (Continued) **S117676130**

above their respective RRSCO of 1 ppm. Indeno(1,2,3-cd)pyrene was detected at 2.2 ppm (RRSCO of 0.5 ppm), dibenz[a,h]anthracene at 0.95 ppm (RRSCO of 0.33 ppm), and chrysene and benzo(k)fluoranthene at 5.66 ppm and 5.07 ppm, respectively (RRSCO of 3.9 ppm). Metals exceeding RRSCOs include lead detected at a maximum concentration of 900 ppm (RRSCO of 400 ppm) and mercury at a maximum of 7.28 ppm (RRSCO of 0.81 ppm). Data does not indicate any off-site impacts in soil related to the site. Groundwater: PCE exceeded the NYSDEC Ambient Water Quality Standards and Guidance Values (AWQSGV) with a maximum concentration of 19 parts per billion (ppb)compared to the AWQSGV of 5 ppb. The SVOCs mentioned above exceeded AWQSGV in four samples with concentrations an order of magnitude higher than the standard of 0.002 ppb including benzo(a)pyrene at 0.03 ppm and benzo(b)fluoranthene at 0.02 ppm. Dissolved metal exceedances included iron, manganese, selenium and sodium which are likely naturally occurring and are not considered to be site-specific contaminants. Perfluorooctanoic acid (PFOA) exceeded the AWQSGV of 6.7 parts per trillion (ppt) with a maximum concentration of 199 ppt and perfluorooctanesulfonic acid (PFOS) exceeded the AWQSGV of 2.7 ppt with a maximum concentration of 106 ppt. Data does not indicate any off-site impacts in groundwater related to the site. Soil Vapor: PCE and TCE were detected at elevated concentrations across the northern portion of the Site where groundwater exceedances were also identified. PCE concentrations ranged from 37 to 1450 micrograms per cubic meter (ug/m3) and TCE ranged from 1.34 to 61.3 ug/m3. Data indicates the potential for off-site impacts in soil vapor related to the site.

Health Problem: The site is completely fenced or boarded which restricts public access. Persons who enter the site can contact contaminants in the soil by walking through or digging below surface soil or otherwise disturbing soil beneath the concrete cover. Contaminated groundwater at the site is not used for drinking or other purposes, since the site is served by a public water supply that obtains its water from a source not affected by site contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion is not a current concern on-site because the site is vacant; however, the potential exists for the inhalation of site contaminants due to soil vapor intrusion in any future on-site buildings. Soil vapor intrusion is a potential exposure concern for site-related contaminants off-site.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Updated By:	JHOCONNE

Site Description: Location: The 0.49 acre site is located at 98, 100, and 104 South 4th Street in the Borough of Brooklyn, Kings County, NY in an urban area. It was previously known as 98-116 South 4th Street. Site Features: The site consists of three buildings: 98-102 (now 98), 104-114 (now 100) and 116 (now 104) South 4th Street. Occupying almost the entirety of the site is a multi-story structure made up of a 7 story structure in the center (100 South 4th St.) flanked by two smaller 1 story structures. Two of the buildings were constructed in 1910 and the third was constructed in 1950. All three buildings were renovated in the early 2000s. The 7 story structure is a residential building with approximately 74 units. Current Zoning and Land Use: The site is currently zoned as M1-2/R6 and is surrounded by residential, commercial and industrial uses. It is identified as a single tax lot, Block 2443, Lot 13 and is a rectangular shaped parcel along the southern side of South 4th St., between Berry St. and Bedford Ave. Past Use of the Site: The site previously had a variety of manufacturing uses, including an adhesives factory (98 S. 4th St,

FORMER EL PUENTE (Continued) **S121933853**

formerly 98-102 S 4th St), an electroplating operation, a laboratory (100 S. 4th St, formerly 104-114 S 4th St), and a dye factory (116 S 4th St). Carmin Industries was identified as a Large Quantity Generator of hazardous wastes, including undefined hazardous wastes, ignitable hazardous wastes, corrosive hazardous wastes, reactive hazardous wastes, chromium, lead and cyanides. Site Geology and Hydrogeology: Soil borings conducted in 1996 identified fill materials to a depth of approximately 7 feet below grade from the first floor of 98 S. 4th St and to a depth of approximately 6 feet below the basement floor of 100 S. 4th St. Beneath the surface fill layer is sand and silt to a depth of at least 17 feet below grade. Groundwater is present at a depth of approximately 15-17 feet below grade.

Env Problem: Nature and Extent of Contamination: A subsurface investigation was performed in 1997 in support of an application to participate in the Voluntary Cleanup Program (see site no. V00094). Soil samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and polychlorinated biphenyls (PCBs). Groundwater samples were analyzed for VOCs only. Soil A total of nine soil borings were advanced throughout buildings 2 and 3 (access to building 1 was precluded by structural deficiencies). Samples were collected from nine soil borings. Various VOCs were detected at concentrations exceeding the unrestricted use soil cleanup objectives (SCOs), including: tetrachloroethylene (PCE) at a maximum concentration of 5.5 parts per million (ppm); trichloroethene (TCE) at 3.7 ppm; and toluene at 1.4 ppm. SVOCs were also detected above the unrestricted use SCOs including: fluoranthene at a maximum concentration of 14 ppm; phenanthrene at 19 ppm; and pyrene at 19 ppm. The majority of the contaminants appear to be found beneath building 3 (the western one-story building). Groundwater Groundwater samples were collected from 3 locations on-site. PCE was detected at a maximum concentration of 86 parts per billion (ppb), TCE at 100 ppb, and toluene at 28 ppb. In addition, groundwater samples collected from a property immediately adjacent to the south of the site (BCP site no. C224233) identified PCE at a maximum concentration of 71.4 ppb and TCE at 27.2 ppb. Soil Vapor No soil vapor samples were collected. Groundwater samples collected from a property immediately adjacent to the south of the site (BCP site no. C224233) identified PCE at a maximum concentration of 2870 micrograms per cubic meter (ug/m3) and TCE at 3510 ug/m3. Further delineation of the soil vapor was performed at 2 residential buildings located to the west of the Site on Berry Street identified the need for mitigation. See also site no. C224260.

Health Problem: As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention

PFIZER INC (Continued) **1000443177**

activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	2/5/2020-Lin- Tank was found 9’ to 10’ below grade where the water table is. No sheen was observed around the tank. PID reading of 55ppm from the soil around the tank. Previous use of the site were three auto repair shops and is currently under NYCOER VCP program managed by Anna Brook. Tank is suspected to be a 275 or smaller. The content of the tank is some type of petroleum product. Plan to retain contractor to pump out the tank and remove it. Consultant for this job: Kbutler@ebcincny.com 5167766629 Property owner contact info: Moshe Jacobowitz ZBL Bartlett LLC 1418

(Continued) **S110242445**

65th Street Brooklyn, NY 11218 Tel: 718-685-8984 Fax: 718 226-0288 jacobowitzm@gmail.com 3/10/20-
DEC Piper received and reviewed closure report. 550 UST removed. Petroleum spill completed and
closed. However there is still a Chlorinated issue that is being dealt with by NYC OER and DEC. As
per DEC O'Connell, this spill can be closed and Chlorinated issue will be addressed by NYC OER and
follow up with DEC upon completion of new building SSDS etc. Report is in DEC DOcs. This spill is
closed. Summary of Environmental Findings 1. Depth to groundwater was measured at approximately 8-9
feet below grade surface (bgs) and 1.5 foot below the existing basement floor slab; 2. Soil/fill
samples results were compared to New York State Department of Environmental Conservation (NYSDEC)
Unrestricted Use Soil Cleanup Objectives and Restricted Residential Use Soil Cleanup Objectives
(SCOs) as presented in 6NYCRR Part 375-6.8. Soil sampling results indicated: a. No Pesticides or
PCBs were detected across all samples; b. One VOC, tetrachloroethene (PCE) (max. 3,300 g/kg) was
detected exceeding its Unrestricted Use SCOs (UUSCO) in one shallow (0-2) soil sample SB-4; c. Six
semi-volatile organic compounds (SVOCs) compounds including benzo(a)anthracene (max. 6,500 g/kg),
benzo(a)pyrene (max. 5,500 g/kg), benzo(b)fluoranthene (max. 5,600 g/kg), benzo(k)fluoranthene
(max. 5,000 g/kg), chrysene (max. 6,500 g/kg), dibenzo(a,h)anthracene (max. 1,000 g/kg), and
indeno(1,2,3-cd)pyrene (max. 4,400 g/kg) were detected exceeding Restricted Residential Use SCOs in
shallow samples (0-2); 3. Groundwater sample results were compared to New York State 6NYCRR Part
703.5 Class GA groundwater quality standards (GQS). No PCBs or pesticides were detected at any
measurable concentration. Several VOCs including acetone, carbon disulfide, methyl t-butyl ether,
PCE and toluene were detected in one or more groundwater samples, but at concentrations below their
respective NYSDEC Groundwater Quality Standards (GQS). Six SVOCs including benzo(a)anthracene (max.
0.5 ug/L), benzo(a)pyrene (max. 0.46 ug/L), benzo(b)fluoroanthene (max. 0.44 ug/L),
benzo(k)fluoroanthene (max. 0.4 ug/L), chrysene (max. 0.42 ug/L), and indeno(1,2,3-cd)pyrene (max.
0.29 ug/L) were detected above their respective GQS s. Several metals, including aluminum (max.
0.303 mg/L), manganese (max. 3.22 mg/L) and sodium (max. 45.3 mg/L) were detected above their
respective GQS in the dissolved groundwater samples and duplicate; and a. Sub-slab soil vapor
samples collected during the RI were compared to the compounds listed in Table 3.1 of the Air
Guideline Values Derived by the NYSDOH located in the New York State Department of Health (NYSDOH)
Final Guidance for Evaluating Soil Vapor Intrusion dated October 2006.

(Continued) **S110242445**

The soil vapor sample results showed Chlorinated VOCs and petroleum-related VOCs (BTEX) were detected at low concentrations. The total concentration of petroleum-related VOCs (BTEX) ranged from 161.2 g/m3 to 702.14 g/m3. Overall, the highest reported concentration was for toluene (max. 500 g/m3); b. The chlorinated VOC, tetrachloroethene (PCE), was detected in all samples at concentrations ranging from 23.7 g/m3 to 8,000 g/m3; c. Trichloroethene (TCE) was detected in three samples at concentrations ranging from 0.32 g/m3 to 4.19 g/m3; Summary of the Remedy 1. Excavation and removal of soil/fill exceeding Track 4 Site-Specific SCOs. For development purposes, the entire Site will be excavated to 2 ft below sidewalk grade. Excavation for the cellar will be to approximately 10 ft below grade and deeper excavation will be performed to 15 ft for the elevator pit. Sloped excavation will be performed around the cellar area to shoring or to the base of excavation. 2. Collection and analysis of six end-point samples and five separate Hot-Spot endpoint samples to determine the performance of the remedy with respect to attainment of Track 4 Site-Specific SCOs; 3. Installation and operation of an active sub-slab depressurization system (SSDS) consisting of one loop of horizontal pipe, set in the middle of a gas permeable layer, will be installed immediately beneath the building slab, and waterproofing/vapor barrier system. 4. Installation of a waterproofing/vapor barrier system 5. Installation of an engineered composite cover 6. Dewatering is anticipated 7. A deed restriction will be placed on the property

DEC Memo:	Phase 2 - soil samples have contamination in it - Owner wants to move this to brownfields. 7/23/07 - Raphael Ketani. I have heard nothing in a long time regarding this site as to whether it is part of the voluntary cleanup program (VCP). So I talked to Jocelyn Shapiro, EG I of unit A of DER Region 2, as she is involved in some VCP projects. She said it wasn't her site and directed me to Jane O'Connell or the unit head, Dan Walsh, EG III. I spoke to Mr. Walsh. He said that there was a pre-application meeting in January 2007, but nothing else happened. I looked for the site in the DER database and found nothing. Therefore, I am going to start the process of investigating this site as a spill location and I will send out a CSL. The block and lot are: 02353 and 0013. The main address is 291 Metropolitan Avenue. The alternate addresses are: 146 Roebling Street and 206 to 212 North 4th Street. The site has two PBS records, #2-145726 and #2-455083. #2-145726 is a closed case with the name as Arvy Service Station Inc./Getty. Six 550 gas tanks are listed as administratively closed on 4/1/95. #2-455083 is active with the name G&A Auto Repair. One 250 waste oil tank is in service with the other six gas tanks listed as closed in place. There are two owners: C&H Holding Corp., 1394 Third Avenue, NY, 10021; 291 Metropolitan Avenue, LLC, 861 Manhattan Avenue, Suite 14, Brooklyn, NY, 11222. I sent out the CSLs to both owners. 7/26/07 - Raphael Ketani. Eva Krocka of Minnow Associates (291 Metropolitan Avenue, LLC) called to say that

G&A AUTO REPAIR (Continued) **S108294903**

the site is part of the
brownfield program. I told her that the DEC doesn't have anything confirming this and that their
site does not appear in the DEC Remediation database. She said that Advanced Site Restoration Co.
(212) 809-1110 was remediating the site and was supposed to take care of everything. She said that
DEC was sent reports. I told her that we have nothing in our files regarding the site. She said she
will get back to me. A new search of the Remediation database revealed that 291 Metropolitan Avenue
has made an application to be part of the BCP. The case number is C224124. The case manager is
Sondra Martinkat of DER Region 2 Unit A. I spoke to her and she said that the site is not yet
approved for the BCP, but she expected them to be so very soon. She said that she was willing to
accept the spill case. I spoke to Randall Austin, Chief of the Spills Unit, and he told me to
change the case manager to Ms. Martinkat. I changed the case manager to her name. 8/5/09: BCP
termination letter sent by OGC (D. Tuohy) - see eDocs. Management of site reverts back to Region 2
spills. Transferred to R. Ketani. (JHO) 8/6/09 - Raphael Ketani. I was assigned the spill case
yesterday. So I talked to the former case manager, Brian (York) Wong from Unit A of Region 2 DER.
He said that he was waiting for the project to be accepted into the BCP, but this never happened as
the corporation fell apart. He said that no cleanup or development has taken place regarding the
case since 2007. I made an unannounced site visit and took several pictures (see E-docs). The site
consists of a service station. There is an old, small, three story walk up apartment building to
the west of the service station. The service station has a sign that displays G&A Auto Diagnostic
Center (718) 486-3700. The apartment building is the other property that the corporation had owned.
I met a person who worked at the service station. He said that a waste oil UST and the gas USTs
were closed in place with cement. He showed me the many cement filled boring locations that are on
site. He said that there were no problems. I asked him who he was, but he just said that he was
someone who works here. However, he did say that C&H owned the site. After this I left. 8/7/09 -
Raphael Ketani. I tried to contact Chris Tomasello of ASR (212) 809-1110 regarding the site and its
ownership, but could only leave a message. I reviewed the October 2006 ISR. The elevation of the
site is at 23' above mean sea level. Groundwater was encountered at a depth of 17' to 20' below
grade. However, Section 9 of the ISR states that groundwater is 9' to 10' below grade. Groundwater
flow direction is unknown. There is a school directly across the street to the northeast. Soil

G&A AUTO REPAIR (Continued) **S108294903**

contamination that exceeds TAGM was present at SB-5 at 10' to 16.' Groundwater contamination with high exceedences was found at SB-2 and SB-3. There is also a page with case manager notes that refer to wells marked AOC and TW, but there are no diagrams depicting these wells in the case file. 8/10/09 - Raphael Ketani. Mr. Tomasello returned my call. He talked about the site. He mentioned that the partnership broke up and the property was sold about a year ago. The former owner was Robert Vigorito of C&H Holding Corp., 1394 Third Avenue, NY, 10021. Mr. Tomasello has had no contact with the former or present owners since then. I looked up the property ownership on Property Shark and on ACRIS. The property was sold on 9/6/09 or 9/15/09, respectively. The new owner is: 291 Metropolitan Avenue, LLC, 861 Manhattan Avenue, Suite 14, Brooklyn, NY, 11222. I wrote a revised CSL for the sole owner, 291 Metropolitan Avenue, LLC, and sent it out with a green return card. 9/10/09 - Raphael Ketani. The deadline for a response to the CSL was today and there has been no response from the owners of the site. I have not received the green return card, either. I will wait until 9/17/09 before sending a more strongly worded letter to the owners. 9/14/09 - Raphael Ketani. The CSL came back unopened and marked Unclaimed/Unable to Forward on the envelope. I checked PBS record #2-455083 for any contact information. The record showed the name Ismael Cisneros, Jr. (718) 384-4141. I spoke to Mr. Cisneros. He said that the owner had moved to Manhattan. I asked him who the owner was. He didn't want to say. However, he said that if I sent a letter directly to the service station, then he will forward it to the owners. I told him that I will do this. I resent the CSL to G&A Auto Repair, 291 Metropolitan Avenue, Brklyn, 11211 by regular mail and by green return card. However, according to the property database ACRIS, 291 Metropolitan Avenue LLC at 861 Manhattan Avenue is still listed as the owner. 9/21/09 - Raphael Ketani. I received the green return receipt card signed by Mendes. 10/29/09 - Raphael Ketani. The owners of the site failed to respond to the CSL by the deadline of October 14, 2009. So I drafted a strongly worded letter stating that the DEC will take legal action if the investigation plan is not received by November 13, 2009. The draft letter was submitted to Randall Austin, Chief of the Spills Unit, for his approval. 11/2/09 - Raphael Ketani. I spoke to Mr. Austin about the case and the letter that I wanted to send. He said that I should submit a Case Initiation Package. 11/3/09 - Raphael Ketani. I put together the Case Initiation Package and submitted it to Mr. Austin for his signature. Mr. Austin signed the CIP and it was hand delivered to the

G&A AUTO REPAIR (Continued) **S108294903**

legal department. 4/26/10 -
Raphael Ketani. John Urda, Assistant Regional Attorney for Region 2 of DEC, sent Jerrietta
Hollinger, a principal of 291 Metropolitan LLC, a STIP agreement today by e-mail. Her address is:
Jerrietta R. Hollinger, Esq. Ganz & Hollinger 1394 Third Avenue New York, New York 10075 Ms.
Hollinger responded back by e-mail that she will submit the document to her members and get back to
Mr. Urda in a week. 5/13/10 - Raphael Ketani. Ms. Hollinger sent the following e-mail to Mr. Urda:
I expect to review the Stip with Mr. Cisneros next Tues. I am out of office tomorrow and Monday and
will contact you by middle of next week. 5/20/10 - Raphael Ketani. Ms. Hollinger requested a change
in the STIP package CAP that was sent to her by Mr. Urda. She wanted the deadline for submission of
the Remedial Investigation Work Plan changed from 15 days to 30 days (paragraph one). Mr. Urda
agreed to the change and sent her a STIP with a CAP wherein the owners have 30 days to submit the
RIWP (see E-docs). 5/24/10 - Raphael Ketani. The owners of the site signed the STIP. 5/25/10 -
Raphael Ketani. The Region 2 director signed the STIP and, thus, it was fully executed and in
effect (see E-docs). 7/14/10 - Raphael Ketani. To date, the owners of the site have not submitted
the RIWP. The deadline was July9 25, 2010. I drafted a letter to Ms. Hollinger for the review of
John Urda of the Office of General Counsel. Mr. Urda reviewed the letter and it was sent out today.
7/15/10 - Raphael Ketani. Ms. Hollinger called me today. She said that P.W. Grosser (the consulting
company) is supposed to get back the groundwater analytical data for the site. They will send the
DEC a report soon. 7/27/10 - Raphael Ketani. Ms. Hollinger called today. She said that Mr. Wenskus
of P.W. Grosser is working on the analytical report for DEC and should submit it in the very near
future. The report will state that the soil is alright, but that the groundwater is contaminated. I
told Ms. Hollinger that, at the very least, the groundwater contamination needs to be delineated.
8/3/10 - Raphael Ketani. I reviewed the July 30, 2010 P.W. Grosser Phase II ESA report. The scope
of the work was based on P.W. Grosser's 6/21/10 proposal and Advanced Site Restoration's October
2006 ISR. The tanks have fuel oil, waste oil, and gasoline. In October 2006, the site was operated
only as a car repair shop. Groundwater is at about 18' to 20' below grade and flows
north-northwest. ASR found contamination in soil borings at SB-1, 3, 5, and 6. There were also
elevated levels of arsenic, cadmium and lead at SB-1. There was elevated groundwater contamination
at SB-2 and SB-3. There had been no subsequent investigations or remedial efforts since ASR's 2006

G&A AUTO REPAIR (Continued) **S108294903**

investigation. P.W. Grosser did a Phase II in July 2010. The locations of SB-1, 3, 5, and 6 were utilized for this investigation. P.W. Grosser took soil samples to 20' below grade. Groundwater was sampled from SB-1 to SB-3. The soil results for VOCs and SVOCs were below TAGM RSCOs. Arsenic, cadmium, and lead were below the RSCOs. However, mercury was above its respective RSCO. The groundwater results from SB-6 (downgradient) were completely non-detect. However, there was 22 ppb of naphthalene at SB-3 and 392 ppb of naphthalene at SB-2, with several other low exceedences. MTBE was 421 ppb at SB-1 and 1370 ppb at SB-3. SB-2 had 112,000 ppb of MTBE and 6 other VOC exceedences above 1,000 ppb. P.W. Grosser recommends removing the tanks and quarterly monitoring. I sent an e-mail to Mr. Wenskus (631) 589-6353 with the following questions and comments: 1) why wasn't a boring done in the vicinity of the fuel oil tank to the northwest? 2) is the fuel oil tank a UST or an AST? 3) was staining observed in the vicinity of the fuel oil tank? 4) why wasn't a boring conducted directly to the northwest of the gasoline tanks? 5) why weren't borings conducted next to the waste oil tank? The DEC concurs with the removal of the gas and oil tanks. Groundwater should be collected from SB-2 in order to reduce the MTBE concentration at this location. 8/6/10 - Raphael Ketani. Mr. Wenskus responded back by e-mail today: 1) Due to the presence of debris in the area, PWGC was unable to access the immediate vicinity of the fuel oil tank. During the inspection, PWGC did not see evidence of an AST in the area of the fuel oil tank as identified on the figure. Additionally, PWGC utilized the figure that was provided in the 2006 ASR Phase II for approximate locations of borings and other site conditions. 2) This is unknown at this time; however, according to the ASR report, the fuel oil tank is a UST. As stated above, there was no evidence of an AST in that vicinity. PWGC will contact the property owner to confirm the presence of the fuel oil tank. 3) No staining was observed in the area where the fuel oil tank is reportedly located. 4) As stated above, Mr. Cisneros wanted to confirm the findings of the 2006 Phase II and requested that only the impacted borings from that Phase II be re-sampled. 5) The exact location of the Waste oil UST was unknown and PWGC placed the boring SB-1 in the vicinity of the former boring. The location of SB-1 in the PWGC site plan; however, is incorrect. In addition, the tank locations on our site plan are approximate, based upon the ASR Phase II site plan. The site plan will be corrected to show the correct location of boring SB-1. I responded back and stated that the DEC still wants a boring performed to the northwest of the gas USTs, next to the waste oil

G&A AUTO REPAIR (Continued) **S108294903**

tank, and next to the fuel oil
UST to the northwest. Also, P.W. Grosser must submit a site plan which is to scale and which shows
the actual location of all appertenances, tanks and pump islands. Mr. Wenskus replied back that the
borings will be performed. 8/12/10 - Raphael Ketani. Mr. Wenskus sent me an e-mail that he informed
the owners about DEC's request for additional investigative work. However, he has not heard back
from them. 8/18/10 - Raphael Ketani. Mr. Wenskus sent me an e-mail that the drilling for the three
additional borings will take place on 8/24/10. 9/27/10 - Raphael Ketani. I received the
Supplemental Phase II Environmental Site Assessment report dated 9/22/10 from P.W. Grosser. I began
my review. 9/28/10 - Raphael Ketani. I finished my review of the Supp. Phase II. There was no soil
contamination above TAGM standards. However, groundwater was found to be impacted. LNAPL was found
near the waste oil tank and oil based liquids in the tank. Concentrations of total VOCs were
detected up to 128,988 ppb in the immediate vicinity of the gas USTs. SB-2 was the most
contaminated groundwater location. SB-3 had elevated groundwater contamination. P.W. Grosser
recommends the following: proper closure of the gas and waste oil USTs removal and disposal of all
impacted soil injection of oxidants to breakdown the contamination collection of end point samples
installation of groundwater wells removal of LNAPL quarterly groundwater monitoring I sent an
e-mail to Mr. Wenskus asking him to proceed with the remediation as soon as possible. 11/19/10 -
Raphael Ketani. Mr. Wenskus sent the November 2010 Remedial Action Plan by e-mail. I reviewed the
plan and it formalized and expanded the remediation plan that was initially described in the
Supplemental Phase II. The RAP looked fine, but they weren't planning to install a monitoring well
downgradient of the waste oil UST. So I let Mr. Wenskus know that the DEC wanted a well installed
in this location and to submit a revised site map showing this well. Mr. Wenskus responded back
that a well will be installed downgradient of the waste oil UST. 2/25/11 - Raphael Ketani. I spoke
to Mr. Wenskus (631) 589-6353 and asked him about progress on the site. He said that the owners had
received P.W. Grosser's proposal. They told him that they needed to secure funding for the project.
However, that was back a couple of months ago. Mr. Wenskus hasn't heard anything since. I asked Mr.
Wenskus to contact the owners anyway and to try and find out what is happening. Ms. Hollinger sent
me an e-mail asking whether there was any type of funding that could be obtained for doing the
additional work. I wrote that there wasn't and to commence the work immediately. 3/2/11 - Raphael

G&A AUTO REPAIR (Continued) **S108294903**

Ketani. Today I received the January 27, 2011 investigation and remediation work proposal and cost estimate from Mr. Wenskus at P. W. Grosser. I reviewed the proposal and it seemed to cover the work that the DEC had asked to be performed. I spoke to Mr. Wenskus (631) 589-6353 and told him that the DEC found the proposal to be acceptable. I asked him whether he had heard from Ms. Hollinger. He said that he hadn't. I told him to call her and to let her know that the DEC is concerned that no progress is being made. He said that he will. 3/3/11 - Raphael Ketani. Mr. Wenskus sent Ms. Hollinger an e-mail (with me as a c-c) stating that the DEC had the approved work plan. He also wrote in the e-mail that P.W. Grosser was ready to go to work on the site as soon as a retainer is submitted. 3/7/11 - Raphael Ketani. Mr. Wenskus said that he hasn't received approval yet to start the work. 4/5/11 - Raphael Ketani. I received an e-mail today from Mr. Wenskus as a c-c. In the e-mail, Mr. Wenskus stated that he hasn't heard from Ismael Cisneros, Jr. in two weeks. In response, I sent an e-mail to Mr. Urda of DEC Region 2 stating that it appears as if work at the site has come to a standstill for this spill. 4/22/11 - Raphael Ketani. Mr. Wenskus sent an e-mail to M I Mechanical requesting a startup date for the work at the site. Ms. Hollinger responded back by e-mail that Mr. Cisneros was out of town, but would be back next week. Once he is back, Ms. Hollinger wrote, Mr. Cisneros will set up a starting date. 4/27/11 - Raphael Ketani. I sent an e-mail to Ms. Hollinger asking whether Mr. Cisneros had returned and whether a starting date had been picked. 5/17/11 - Raphael Ketani. Mr. Wenskus sent me an e-mail that the work will re-start during either later June or early July 2011. 6/6/11 - Raphael Ketani. Mr. Wenskus sent me an e-mail that work will resume at the site on July 18. 7/7/11 - Raphael Ketani. Mr. Wenskus (631) 589-6353 sent me an e-mail that work will start on July 18. He expects the work to take 2 weeks. 7/14/11 - Raphael Ketani. Jerry Hickson of G. Construction Enterprises (631) 206-3700 ext 100 called. His company will be pulling 7 tanks on either tuesday or wednesday. They will remove 3 gas tanks, 3 diesel tanks, and 1 waste oil tank. 7/20/11 - Raphael Ketani. I received the following e-mail today from Mr. Wenskus: The implementation of the approved RAP began today. The site activities today included the following: Expose the seven onsite 550-gallon tanks to determine their current condition, Assess the tanks to determine their contents (each contained oily water) Pump the tanks out approximately 2,200 gallons removed Each tank, with the exception of the waste oil tank was encased in concrete. No tanks were removed from the ground today;

G&A AUTO REPAIR (Continued) **S108294903**

excavation of the tanks will
continue tomorrow. 7/22/11 - Raphael Ketani. Mr. Wenskus (631)
589-6353 called me in a conference
call with Jen Lewis of P.W. Grosser. He said that the 7 USTs had been
removed. There was a concrete
slab beneath them. The tanks were all in good shape. However, there
were signs of a little
associated pipe leaking. The contractor had excavated 15 feet down to
remove the contaminated soil,
but there still was contamination and he hadn't reached the water
table, which is at 18 feet below
grade. Mr. Wenskus and Ms. Lewis were asking whether the digging could
stop as the contractor would
have to get a larger machine, and this would take time, and as he
would also have to get special
permits for digging deeper. Mr. Wenskus added that the contractor had
dug pretty close to the
building and the sidewalk and they didn't want to jeopardize their
integrity. I told Mr. Wenskus
that the contractor could either install shoring to hold up the sides
of the hole or backfill and
do treatment solution injections where there still is contamination
deep down and under the
sidewalk. Mr. Wenskus opted to backfill and treat. I asked him whether
the contractor could dig out
more contamination laterally. Ms. Lewis said that he could. I told Mr.
Wenskus and Ms. Lewis to do
all of the calculations necessary, including permeability, to
determine what it will take to
effectively treat the remaining contamination. They said that they
will. Later, Mr. Wenskus (631)
589-6353 called me back. He said that he talked to his supervisor
about the treatment solution
injections proposed for the contaminated dry soil. They agreed that
the solutions would work
initially, but that they would stop as soon as they would dry out and,
therefore, wouldn't be very
effective. Mr. Wenskus will have the contractor get a larger excavator
and dig deeper. I asked him
about the contamination under the sidewalk. I added that this couldn't
be left in place. He said
that he wasn't sure where the contamination will end. I told him to
keep field screening with a PID
meter and to eventually take end points to determine whether they
needed to excavate further. He
said that he will. 9/12/11 - Raphael Ketani. I tried to contact Mr.
Wenskus (631) 589-6353, but I
could only leave a message regarding progress at the site. 9/13/11 -
Raphael Ketani. Mr. Wenskus
called me back. He said that the work at the site has stopped as P.W.
Grosser isn't getting paid.
The owners, 291 Metropolitan LLC, want to save some money with the
remediation project and want to
put in fewer wells and do less soil removal. He said that 80 tons have
already been removed, as
best as he can guess (he doesn't have the disposal manifests). A large
covered soil pile is sitting

G&A AUTO REPAIR (Continued) **S108294903**

at the site. Mr. Wenskus said he told them that the DEC had approved the work plan and so any
changes were not likely to be accepted. After this, the conversation ended. 9/15/11 - Raphael
Ketani. I reviewed the November 2010 RAP for the work schedule. While the tanks (item 1) had been
removed, the soil excavation was not completed by the allotted time as more soil needed to be
removed than had been previously estimated. I sent Mr. Wenskus an e-mail requesting a revised work
schedule. 10/13/11 - Raphael Ketani. I contacted Mr. Wenskus (631) 589-6353. He said that 291
Metropolitan LLC still hasn't paid P.W. Grosser for the rest of the work. So nothing is happening.
Mr. Wenskus said that he had spoken with Ms. Hollinger about a couple of weeks ago, but she gave no
indication that payments would be forthcoming. He said that he will try contacting her today. As no
work had been taking place for over a month, I drafted a letter to 291 Metropolitan, LLC stating
that they were in violation of the STIP and the environmental law. The letter was sent to Mr. Urda
and approved. I sent it out today with an October 28 deadline for re-starting the work, or else
legal action will be taken. 10/20/11 - Raphael Ketani. Ms. Hollinger (212) 517-5500 called
regarding the soil excavation and planned well installation. She said that P.W. Grosser dug out a
lot more dirt than had been planned and that this has become very expensive. She asked what could
be done about this and whether the number of planned groundwater monitoring wells could be reduced
in order to save money. I told her that contaminated soil has to be dug out to the extent practical
and that if they have to remove the sidewalks to do it, then that's what is necessary. I added that
P.W. Grosser should be screening the soil with a PID meter as they go so that they can see whether
there is more contaminated soil to remove. Then, once they have very low PID hits or no hits, they
can take end point samples and have them analyzed to be sure that they have removed all of the soil
with elevated contamination. Ms. Hollinger asked whether one or two wells could be cut out from the
plan. I told her that the DEC didn't ask for more wells than were necessary in order to monitor the
groundwater contamination. I added that if contaminated soil is left in place and the groundwater
starts circulating through it, then the groundwater will carry weathered gasoline and vapors
downgradient to the school behind the service station. I said that, so far, there are no vapors in
the school, but this can still happen if contaminated soil is left. I mentioned that there are kids
in the school. She said that she was just concerned about how much soil was removed because it was
truck loads and truck loads. I told her that P.W. Grosser was removing

G&A AUTO REPAIR (Continued) **S108294903**

what was necessary and that
this is good. Ms. Hollinger said that she will talk to Mr. Wenskus and discuss the issue. Then she
will get back to me. Later, Ms. Hollinger sent me the following e-mail: After we spoke, I had a
telephone call with Rocky. He said he was in the middle of finishing another project but would
review the test results and call you next week to see if it is possible to amend the plan to be
more economical and to make certain contamination is cleared. The necessary wells will then be
installed. As mentioned the work done to date cost more than twice the estimated amount. Soil Safe
carted away 447.2 tons of soil. 10/26/11 - Raphael Ketani. Mr. Wenskus (631) 589-6353 called with a
progress update. He said that, right now, work still has not resumed. He said that he had spoken to
Ms. Hollinger about the site and the soil contamination that still exists. He said that the
concentrations of the individual analytes is in the hundreds of thousands of parts per billion for
the soil in the sidewall of the pit that is next to the sidewalk. I told him that this soil, the
soil under the sidewalk and possibly the soil under the street must come out. Mr. Wenskus said that
the additional remediation will be performed as in the approved RAP. He mentioned possibly
collecting the contaminated groundwater. I told him that it would probably be cheaper to dig out
the contaminated soil and get rid of the contamination once and for all. Then he wont have to worry
about groundwater contamination. I also told Mr. Wenskus that I will let Mr. Urda know about the
impass with Ms. Hollinger. 10/27/11 - Raphael Ketani. I made an unannounced site visit today. I
took 3 pictures. I could see a gravel area where the gasoline USTs used to be and a sandy soil area
where the waste oil UST used to be. There was no other changes to the site conditions. So I left
the site. 10/28/11 - Raphael Ketani. A Case Initiation package was signed by Hassan Hussein,
Supervisor of the RCRA-Remediation Unit, and sent to the Office of General Counsel. 11/29/11 -
Raphael Ketani. Ms. Hollinger (212) 517-5500 sent me an e-mail that the well installations will
take place soon. I responded back that the excavation also needed to resume. 12/27/11 - Raphael
Ketani. Nick Pressly of Pressly & Associates Inc. (607) 264-9521/cell (607) 435-9589 called. He
said that he has been retained by Ms. Hollinger to continue the work at the site. We discussed the
present site status and what still needed to be done. Mr. Pressly said that the DEC will receive a
work plan by January 9, 2012. 1/18/12 - Raphael Ketani. Mr. Pressly sent me the 1/9/12 work plan by
e-mail. The plan called for the installation of 6 soil borings and the construction of 4 monitoring

G&A AUTO REPAIR (Continued) **S108294903**

wells. Some of the wells would be constructed in such a manner as to allow their use for SVE or air sparging. I found the locations of two of the proposed wells to be unacceptable as they are not downgradient of the former gasoline UST locations and the waste oil tank location. Also, if some wells are used for SVE or air sparging, then they can't be used for groundwater monitoring. So more wells are needed. They also did not mention continuing the excavation both deeper and under the sidewalk. Lastly, they did not mention sending the DEC the manifests for the soil that has been excavated, nor product collection or quarterly groundwater sampling and reporting. I sent an e-mail to Mr. Pressly indicating the disapproval and the need for including the above comments in a new work plan. Mr. Pressly sent me the manifests for the soil that had already been removed. I spoke to Mr. Pressly (607) 264-9521/cell (607) 435-9589 about the above comments. There is a 1 inch well next to the waste oil tank. He believes that there is a lot of oil on the water table. Due to the waste oil, air sparging will not be possible. The waste oil will be addressed in a separate plan. Mr. Pressly will add two additional wells due to the presence of the LNAPL. The other well positions can be adjusted to be downgradient. SVE wells will be installed near the sidewalk in an upgradient position. Borings will be done right up against the sidewalk. Wells for just monitoring during SVE or air sparging will be installed. He will resubmit the work plan next week. Also, he expects to start the work by January 30, 2012. I told him that will be fine. 1/25/12 - Raphael Ketani. Mr. Pressly (607) 264-9521/cell (607) 435-9589 sent me the 1/20/12 Revised Subsurface Investigation Work Plan for installing SVE wells, AS wells and monitoring wells. I reviewed the work plan. 1/30/12 - Raphael Ketani. I finished my review of the 1/20/12 work plan. There was one proposed monitoring well far upgradient of the waste oil UST and no well directly downgradient of the waste oil UST. I determined that they should install wells at positions that are a short distance downgradient of the waste oil UST and the former tank field. I also stated that there should be separate monitoring wells at P.W. Grosser's SB-7 boring, which had NAPL, and at P.W. Grosser's SB-3, which had contaminated groundwater. I added that groundwater extraction should take place at SB-3 and product collection should take place at SB-7 before AS or SVE takes place. Lastly, I asked for the details of the proposed AS and SVE systems: soil permeability, air flow or vacuum calculations, material specs and the design layouts.I sent a letter disapproving the work plan and including the above comments. The due date for the revised

G&A AUTO REPAIR (Continued) **S108294903**

work plan was set at February
29. Mr. Pressly sent me a revised map/plan for the locations of the proposed monitoring wells. I
responded back that the well for the waste oil UST should be more upgradient than sidegradient. I
asked him to fix this and then the plan would be fine. Also, he will hold off installing the SVE
and AS wells for now. 2/1/12 - Raphael Ketani. Mr. Pressly (607) 264-9521/cell (607) 435-9589 sent
me an e-mail containing the second revision of the Revised Subsurface Investigation Work Plan. Four
instead of five wells were proposed, but the locations were as requested in DEC's 1/30/12 letter.
However, there was no mention of extracting contaminated groundwater at SB-2 and product at SB-7. I
responded back and let him know about the deficiencies. Mr. Pressly wrote back that, presently
there were no wells at SB-3 and SB-7, these were only former soil boring locations. However, a well
will be installed at the former location of SB-3. He asked that installing a well at SB-7 for
product collection be put on hold for now so that the work plan can be approved and work can
proceed. I responded back that the DEC was approving the 2/1/12 work plan and to proceed with the
investigation. Mr. Pressly wrote that the work is tentatively scheduled to start on February 8.
2/3/12 - Raphael Ketani. Mr. Pressly sent me an e-mail that the drilling will definitely start on
February 6. 2/6/12 - Raphael Ketani. Mr. Pressly called today. He said that he was at the site, but
that there was a problem. He stated that the downgradient well for the waste oil UST would be right
against the wall of the building. So it can't be drilled right there. He suggested moving the
well's locations to where the A in LNAPL (for SB-7) is on revision 4 of the map which is attached
to the 2/1/12 work plan. This would still put the well in a downgradient position. I told him this
would be fine. 2/8/12 - Raphael Ketani. Mr. Pressly (607) 264-9521/cell (607) 435-9589 called today
with an update. First, he stated that P.W. Grosser's boring SB-7 was found to be much closer to the
waste oil UST than was drawn on the map. He put in a new well mid-way between the building and the
UST about 3 feet from SB-7. However, no oil was found, only a sheen. Mr. Pressly believes that the
oil that was found at SB-7 was very localized and that maybe P.W. Grosser hit the edge of the tank
pit that was holding the free oil. Once the pit was nicked, the oil flowed to the location of SB-7.
I told Mr. Pressly this was possible. He responded by saying that he will re-drill SB-7 and put in
a 2 inch recovery well. Also, there was no odor of gasoline at SB-7 and that it looks like there
are 2 plumes. One for the gasoline that is flowing due north, and another plume that is flowing

G&A AUTO REPAIR (Continued) **S108294903**

more northwest. A boring was done through the sidewalk. It was found to be a gasoline contamination
hot spot. So an extra sparge well was installed in the center of the former UST field. A well was
put in at SB-3, but no odors of gasoline were found. Another well by the building had gasoline
odors. A well couldn't be put in far downgradient inside the building as the geoprobe wouldn't fit.
The soil profile is from 6 to 8 feet of silt and clay, then glacial till, and finally at 19 feet
below grade there is gravelly brown sand. Groundwater is at about 22 feet below grade. 2/9/12 -
Raphael Ketani. Mr. Pressly called me today. He said that they had overdrilled SB-7 and found a
black slime on their augers when they pulled them up. He believes that the slime is sludge from the
waste oil tank. Next, they moved the rig over to where the waste oil tank used to be and drilled
another hole. However, they didn't find oil, but hit a cavernous spot many feet down. When the
equipment was pulled out, he could see pieces of metal in the cavern. Another hole was drilled and
they hit gasoline contaminated groundwater. Mr. Pressly said that it smelled like weathered
gasoline. 3/9/12 - Raphael Ketani. I spoke to Mr. Pressly (607) 264-9521 today. He said that he
found 1500 to 2000 ppb of MTBE in the perimeter wells. He recommended to the client to have more
wells put in. Two sparge wells have been installed. He also recommended to the client to have the
site capped very soon. The other wells don't have MTBE, but do have BTEX. Groundwater appears to go
northwest. An upgradient well was installed, but the MTBE is about 1500 ppb. However, the southeast
part of the property is full of concrete urban fill. The waste oil tank is above the fill. They
broke tools trying to drill in the southeast part of the property. 3/14/12 - Raphael Ketani. I
received the 3/8/12 Subsurface Investigation Report from Pressly & Associates. I began my review.
3/16/12 - Raphael Ketani. I finished reviewing the SIR. The investigation work took place from
2/6/12 to 2/13/12. Monitoring wells MW-1 to MW-3, SVE-1 and HVE-1 were constructed of 2 inch PVC.
MW-4 was constructed of 1 inch PVC. Refusal was hit at 3 locations to the southeast of MW-3. There
was native soil at MW-1 to MW-3 and at SVE-1 down to 18 feet bgs. The soil consisted of fine to
medium sand with silt and clay. Urban fill was encountered at MW-4 and HVE-1 to 15 feet bgs. Below
15 feet, there was native sand. Groundwater was encountered at 18 feet bgs (elevation 80' to 83').
SB-7 had a 1 inch PVC riser with oil sludge at the bottom. HVE-1 was installed within the footprint
of the waste oil UST excavation patch. Waste oil was not detected within the former waste oil tank
area (MW-4 and HVE-1). A 3 inch band of oily soil was observed at 19

G&A AUTO REPAIR (Continued) **S108294903**

feet bgs. MW-2 had 113 ppm of
total VOC vapors at the 15 to 20 foot interval. SVE-1 had from 173 ppm to 332 ppm of total VOC
vapors from 5 to 20 feet below grade. The soil sample from SVE-1 had the highest total VOCs at
112910 ppb. Groundwater total VOC concentrations varied from a low of 927 ppb at MW-1 to a high of
21,169 ppb at SVE-1. NAPL was not seen on the water table at any location. A subsurface release was
not detected in the soil and the groundwater within the former waste oil UST area. The elevated VOC
concentrations at SVE-1 correspond to the former location of a fill line. The higher concentrations
at SVE-1 and lower concentrations at MW-2 suggest that the source is upgradient near the sidewalk.
The MTBE concentrations suggest that it has migrated beyond SVE-1 and MW-2. The sludge at SB-7 is
considered to be an anomalie by Mr. Pressly. In the report, it is recommended that another
monitoring well be installed to the northwest in order to monitor the MTBE. The pavement should be
replaced at the location of the excavation in order to prevent groundwater mounding and
infiltration. Additional wells should be installed for the SVE/AS system for recovering the MTBE.
Lastly, the SVE/AS system should be installed to remove the VOCs. A letter was drafted for the
review of Hassan Hussein, EE 3 and head of the Hazardous Materials Unit. The letter was addressed
to Mr. Pressly and approved the SIR and the recommendations. However, the DEC requested that soil
samples be taken upgradient of SVE-1 in order to fully delineate the extent of the contamination. A
deadline of April 20 was set for starting the work. 3/22/12 - Raphael Ketani. The letter was
approved by Mr. Hussein and was sent out today to Mr. Pressly and to Ms. Hollinger. 4/25/12 -
Raphael Ketani. Mr. Pressly (607) 264-9521 left me a message today. He said that he needed more
time to contract a drilling company and mobilize to start the work that was requested in the
3/22/12 letter. I gave him until 5/25/12 to start the work. 5/9/12 - Raphael Ketani. Mr. Pressly
sent me an e-mail. He stated that the additional monitoring wells will be installed on May 29 and
the piping and other parts of the SVE/AS system will be installed during the same week. 6/19/12 -
Raphael Ketani. Mr. Pressly sent me an e-mail stating that the new monitoring wells and the SVE/AS
system had been installed. A report containing the system results will be forthcoming in the near
future. 8/7/12 - Raphael Ketani. I reviewed the Pressly & Associates 7/23/12 Supplemental
Subsurface Investigation Report. The supplemental investigation took place during 6/5/12 to
6/14/12. MW-5 was installed to the north and downgradient. MW-6 was installed to the southeast of

G&A AUTO REPAIR (Continued) **S108294903**

SVE-1 through the sidewalk that runs parallel to Metropolitan Avenue. The SVE system consists of 3
SVE wells (SVE-1 to SVE-3) and 5 AS wells (AS-1 to AS-5). The SVE wells averaged 60 scfm, 40 psi
with a ROI of 20 feet. The AS wells averaged 4 scfm, 4 psi with a ROI of 10 feet. Total VOCs at
MW-5 were 13.1 ppb. Total VOCs at MW-6 were 22,530 ppb. The system was started on 7/20/12. The AS
operating pressure was 3 psi with a flow rate of 4 scfm. The SVE well head vacuum was 45 inches of
water and a total flow rate of 120 scfm. A grab air sample was taken with a summa canister and the
results will be available in two weeks. Pressly & Associates recommends collecting system PID, flow
and pressure data from individual SVE/AS wells on a quarterly basis and the collection of well head
vacuum readings from on site wells to evaluate the effective ROI of the system and the collecting
of SVE off gas samples on a quarterly basis. Quarterly reporting will be made to the DEC for the
system. I found the SSIR to be acceptable and drafted an approval letter for the review of Mr.
Hussein. The requirement that confirmatory soil samples be taken once remediation by the SVE/AS is
deemed complete was added to the letter. A deadline of October 31, 2012 was set for the submission
of the first quarterly SVE/AS system report. The letter was approved and was sent out. 8/16/12 -
Raphael Ketani. Jay Stockwell of Blue Zs Realestate, LLC (212) 965-0298 called. He said that he was
a real estate developer and he was interested in buying the property. He said that the present
owners are trying to sell it again. He said that he was interested in putting up an apartment
building with stores in the first floor. He asked how long it would take for the SVE/AS system to
remediate the site. I told him that they started the system during July 2012. So it has not been
running long. I told him that my best estimate for how long it will take to clean up the site is
one year. However, every site is different and there is a lot of contamination under the sidewalk
and the street. Mr. Stockwell said that this was what he had expected. With that, the conversation
ended. 11/9/12 - Raphael Ketani. I tried to contact Mr. Pressly (607) 264-9521 by e-mail regarding
the first quarterly SVE/AS remediation report was due on 10/31/12, but the e-mails bounced back. I
then left a message on his voice mail. I tried contacting Mr. Pressly at his cell phone (607)
435-9589, but I could only leave a message. Next, I tried to contact Ms. Hollinger (212) 517-5500,
but, again, I could only leave a message. Later, Ms. Hollinger called me back. She said that she
thought the September 2012 quarterly report had been submitted. She said that he was paid for the
report. She will try calling him later to see what happened to the

G&A AUTO REPAIR (Continued) **S108294903**

report. 11/12/12 - Raphael
Ketani. Ms. Hollinger sent me an e-mail stating that Mr. Pressly was sending me the report.
11/26/12 - Raphael Ketani. I received the 11/26/12 SVE/AS OM&M Status Report. I reviewed the
report. An exhaust sample was collected on 7/19/12. There were 8 VOC hits in the sample. Another
exhaust sample was collected on 9/22/12. There was only 1 hit of 41 ug/m3 of methylene chloride.
The next site visit will be on December 4, 2012. I had no comments and approved the report.
11/28/12 - Raphael Ketani. Ms. Hollinger sent a letter to John Urda, Region 2 Assistant Regional
Attorney, stating that the ownership of the property had been transferred to 291 Metropolitan
Realty, LLC. Also, Mr. Pressly sent me an e-mail stating that he was still balancing the SVE/AS
system. 12/4/12 - Raphael Ketani. Mr. Pressly (607) 264-9521/cell (607) 435-9589 called today. He
said that he was going to meet with the attorney for the new owner, Joel Grunfeld, 277 Classon
Avenue, Brooklyn, 11238, (917) 470-3650, jig@sygrealties.com. He will try to explain to him that
the SVE/AS process has to continue and that the DEC wants the site cleaned up. Regarding the SVE
and AS system. There is an SVE well and a monitoring well next to the sidewalk hotspot. The radius
of influence of each SVE well is assumed to be 20 ft. The radius of inlfuence for each AS well is
assumed to be 15 to 20 ft. However, a pilot test was never done to find out the real radius of
influence. The estimated radius was taken from information regarding a sandy soil. I told Mr.
Pressly to keep the DEC informed regarding what transpires at his meeting and whether he will be
retained. I added that Ms. Hollinger should be told that her client is still responsible for the
contamination. Mr. Pressly said that he told her this. 12/5/12 - Raphael Ketani. Mr. Pressly
called. He met with Mr. Grunfeld. Mr. Grunfeld said that he wanted to remediate the site as quickly
as possible so that he can build a new building there. Mr. Pressly brought up the idea of solution
injection to treat the contamination. He also explained that whether solution injection is used or
excavation, the additional remedial actions may cost from $50,000 to $100,000. Mr. Grunfeld was
concerned about the range of pricing, but he told Mr. Pressly that he wanted things to move
forward. Mr. Pressly explained to me that he will send a work plan for installing a well in the
sidewalk and a well in the road in order to find out what the concentrations of the contaminants
are at these locations. He added that the SVE and AS functioning will be modified in order to try
and remove more of the contaminants. 12/7/12 - Raphael Ketani. Mr. Pressly (607) 264-9521/cell

G&A AUTO REPAIR (Continued) **S108294903**

(607) 435-9589 called. He said that the owner wants to build his building quickly and has contacted the NYC OER in order to move the process along for the remediation of the site. Mr. Pressly stated that the drilling contractor is hesitant to drill in the street due to logistical reasons and would prefere to install wells in the adjacent sidewalk and across the street in the distant sidewalk. Mr. Pressly added that he would like to install additional wells in the sidewalk in order to laterally delineate the contamination. After this, he would install SVE/AS wells in the edge of the sidewalk where it meets the road which have a 20 foot radius of influence (the road is 40 feet wide) in order to remove any contamination under the road. I told him that this sounded fine. He said that he will talk to the owner about this and put together a work plan. 12/27/12 - Raphael Ketani. Shaminder Chawla of the NYC OER (212) 442-3007/ shaminderc@dep.nyc.gov/100 Gold Street, 2nd Floor, New York, NY 10038 sent me the following e-mail: 291 Metropolitan Avenue property has a new developer/owner who has approached us to enter NYC Voluntary Cleanup program. Previous owner has a stip agreement and an approved RAP (with multiple SVE points)from you. Their development/ remedy has changed and includes excavation of entire property to at least 10 to 12 feet depths. OER is sending them back to field to conduct additional soil, soil vapor and groundwater investigation. OER informed them that they need to approach you and get spill approvals exclusively from DEC. We will accept your approved RAP and add additional requirement that we need to issue Notice to Proceed. I forwarded this information to Mr. Pressly and he responded with the e-mail below: Hi Rafiel, The last time I emailed Joel Gruenfeld was about a week ago and he said he was going to get back to me regarding a proposal I sent about 2 -3 weeks ago to investigate the road and the sidewalk. For this I had proposed 5 soil borings with 3 to be completed as MWs to get lateral and southern extent. I had also advised him to get OER involved sooner than later. I have not heard back from him. since. I also gave him options to clean the on-site groundwater problem quicker using chemical oxidation with direct push (20 points) to facilitate building construction. In addition, I had proposed SVE AS system as possible remedy for sidewalk/ road to be incorporated into any new building construction. NYC VCP may be good to make this an engineering/institutional control? The building design was recommended to include a special XP equipment room for this purpose in the basement. I'll give him a call and let you know what I find out. Best, Nik 12/28/12 - Raphael Ketani. Charles Sosik, PG, Environmental Business

G&A AUTO REPAIR (Continued) **S108294903**

Consultants (631) 504-6000, ext
112/csosik@ebcincny.com called me today. 1/2/2013 - Raphael Ketani. I spoke to Mr. Sosik today
about the remediation of the site. He said that he has been in contact with the NYC OER and they
told him to talk to me about what should be done. We discussed the site history and what Mr.
Pressly's company had been doing regarding SVE and AS. Mr. Sosik said that he went to the site to
see what the present conditions were and found that the SVE air blower and other equipment was
missing. Mr. Sosik also asked for the P.W. Grosser 9/22/10 Supplemental Phase II and the Pressly
and Associates 3/8/13 Subsurface Investigation Report. I sent him the reports. Later, he sent me
the EBC 12/28/12 Phase II Work Plan. I reviewed the work plan. Four soil borings will be installed:
B1 to B4. Soil samples will be taken from 0 to 2 feet below grade and from 10 to 12 feet below
grade. The soil and groundwater samples will be tested via methods 8260, 8270, 8082 for PCBs, 8081
for pesticides and methods 6010 and 7471 for metals. Temporary well MW-6 will be installed at
boring B4. Wells MW-1 to MW-3 and MW-6 will be sampled for groundwater. Soil vapor testing will be
performed at 4 locations at 12 feet below grade. Subslab, soil gas and indoor air sampling will
take place for VOCs. I drafted a letter approving the work plan with comments. First, soil sampling
should take place at the most contaminated horizon. If no contamination is found at the boring
location, then a sample should be taken just above the water table. Soil borings must also be
performed at the locations of the Pressly & Associates wells SVE-1 (extremely high total VOCs) and
MW-6 (high total VOCs) and to the south of MW-6 to confirm the contaminant concentrations. All
results should be compared to the CP-51 standards for soil and the TOGS 1.1.1 standards for
groundwater. Additionally, TCLP method 1311 must be used to test for lead and the results must be
compared to the limits in Part 371.3(e). A revised work plan must be submitted by January 31, 2012.
The letter was sent to Mr. Hussein for his review. 1/3/13 - Raphael Ketani. Mr. Hussein approved
the letter and it was sent out. According to deed dated 11/27/12 shown in ACRIS, the new owner for
291 Metropolitan Avenue, Brooklyn, 11211 (block and lot 2353/13) is 291 Metropolitan Realty, LLC,
199 Lee Avenue, Ste 693, Brklyn, 11211. Another company is also at this address, 64 St. James
Realty, LLC. Later, Mr. Sosik sent me an e-mail stating that the boring work will start on 1/4/13.
Later, Mr. Sosik sent me a revised Phase II Work Plan dated 1/3/13 which was also a Scope of Work.
This work plan incorporated the comments from the DEC 1/3/13 letter. Otherwise, it was the same

G&A AUTO REPAIR (Continued) **S108294903**

work plan. However, more comments were generated. These were that the Department still wanted a
boring in the street south of MW-6. Also, subslab soil vapor sampling must take place at three (3)
locations along the west wall of the garage and at two (2) locations along the east wall of the
garage. The extra boring location and the extra soil vapor sampling locations were indicated on two
attachments to the DEC work plan approval letter. Lastly, all seven wells must be sampled during
the same sampling event and well redevelopment should take place if necessary for the older wells.
The letter was submitted to Mr. Hussein for his review. 1/14/13 - Raphael Ketani. Mr. Hussein
approved the letter and it was sent out with an attachment indicating where the Department wanted a
boring in the street and additional soil vapor samples within the garage footprint. Later, Mr.
Sosik sent me the following e-mail: The work plan was approved with conditions on 1/3/13. We
accepted those conditions and returned the revised plan as requested the same day. The work has
already been completed. Eight soil gas samples is a lot of samples for a property this size. Also
we cannot access the 3 western locations you are requesting. As you know the bulk of the
contamination is in front of the building in the former tank area. There is no difference between
conditions beneath the garage and those outside of the building as all are taken at the basement
level depth. The four samples provide good coverage across the site and will be representative of
conditions. The highest concentrations will be in the SG2 location and will represent a worst case
condition. Subsequent to this, I called Mr. Sosik (631) 504-6000, ext 112. We discussed the soil
vapor sampling. He said that the issue was that he could not get a piece of equipment into the
garage, due to its low clearance, that can bore down 12 feet to take soil gas samples. I told Mr.
Sosik that he didn't need to go down 12 feet. That the Department simply wanted more information
regarding what the vapors may be in the shallow subsurface. Mr. Sosik responded that he could have
holes drilled by hand and then have samples taken. I told him this would be fine. He said he will
do this, but that he thought there were too many vapor sampling locations for a site this size. I
told him that, from my professional experience, the number of sampling locations were alright. Mr.
Sosik agreed to do the work. 2/6/13 - Raphael Ketani. I spoke to Mr. Sosik today. He said that the
vapor sampling took place, but the street boring hasn't been done. A permit is needed to perform
this boring. 3/8/13 - Raphael Ketani. I received 3 documents for the site from Shaminder Chawla of
the NYC Office of Environmental Remediation. These documents included

G&A AUTO REPAIR (Continued) **S108294903**

a pdf containing Tables 2 to 11, which consisted of soil, groundwater and vapor data. The second pdf contained boring logs for borings B1 to B5. The last pdf contained 6 maps with soil, groundwater and soil gas data. I looked at all of the information. The data tables showed that there were significant soil exceedences at borings B1, B2 and B5 for VOCs and SVOCs when compared to the CP-51 standards. Some metals, such as lead and mercury also had significant exceedences in samples from the shallow subsurface, but the results were for total metals, not TCLP analysis. So it was not clear whether these results were a concern. Groundwater exceedences of the TOGS 1.1.1 standards were present in samples from MW-2 and MW-6. Mr. Chawla wrote that the site will be excavated down to 11 feet below grade. However, this doesn't address the contamination under Metropolitan Avenue to the south of MW-6. 3/12/13 - Raphael Ketani. A conference call took place between Mr. Chawla, Hannah Moore (engineer) and myself. We discussed the site and the environmental issues present. It was mentioned that excavation will take place down to 11 or 12 feet below grade. This will remove all of the shallow contamination. However, there is contamination at the water table which is 18 to 20 feet down. Ms. Moore and Mr. Chawla stated that this will be addressed by the injection of treatment solutions at depth. I told them that the most contaminated areas are B1, B2, B5, MW-2 and MW-6. They said that these areas will be targeted. I also stated that more investigation needed to take place south of MW-6 to see how much contamination is under the street. I asked that a treatment and investigation work plan be submitted by Mr. Sosik. They said the DEC will receive the work plan. 3/18/13 - Raphael Ketani. I reviewed the February 2013 Remedial Investigation Report that was submitted by Environmental Business Consultants. It was a compilation of the reports that had been submitted by the previous consultants and also contained many Sanborn maps. The only new information was the soil vapor and sub-slab vapor data. BTEX was found at a maximum of 21.29 ug/m3 in the soil vapor. The sub-slab vapor reached a maximum of 31.07 ug/m3. PCE concentrations at all 4 soil vapor sites and in the 3 sub-slab vapor sites varied from 4.13 ug/m3 to 37.8 ug/m3. TCE was present in 1 of the 4 soil vapor locations at 0.537 ug/m3 and in 1 of the 3 sub-slab vapor locations at 4.89 ug/m3. According to the report, the results were below NYS DOH monitoring levels for the soil vapor guidance matrix. Next, I reviewed the February 2013 Remedial Action Work Plan. They will do community air monitoring, remove all tanks, remove soil and fill exceeding the restricted residential standards, sample and

G&A AUTO REPAIR (Continued) **S108294903**

have analyzed all excavated material, collect and analyze the end point samples, install a vapor barrier, generally excavate to 12 feet below grade - though they will excavate deeper in the UST and pump island areas, if necessary, inject chemical oxidants to reduce groundwater contamination. The health and safety plan was included in the document. A Remedial Action Report will be submitted by the EBC. I found both the Remedial Investigation Report and the Remedial Action Work Plan to be acceptable. However, I noted in the letter that they must compare all of the soil analytical results to the unrestricted residential standards in CP-51 and the groundwater results to TOGS 1.1.1. Also, all contaminated soil which is found at 12 feet below grade which exceeds the unrestricted standards will have to be removed. 3/19/13 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out. 4/11/13 - Raphael Ketani. I received and reviewed the EBC 4/11/13 additional 3 borings report. The borings were conducted in the vicinity of MW-6. They were designated as B6 to B8. B6 was just to the west of MW-6. B7 was about 17 feet west of B6. B8 was about 13 feet east of MW-6. Sampling was continuous from grade to 20 feet bgs. The sample with the highest PID detection in the respective boring and the sample at the bottom of each boring were retained and sent to the lab for analysis. The total VOCs ranged from 432 ppb in the 18 to 20 foot sample from B7 to 113,100 ppb in the 18 to 20 foot sample from B6. B6 had the most contamination in the 18 to 20 foot sample with the highest analyte concentration as 32,000 ppb of total xylenes. B7 had the most contamination in the 3 to 5 foot sample with the highest analyte concentration as 4160 ppb total xylenes. B8 had the most contamination in the 13 to 15 foot sample with the highest analyte concentration as 8400 ppb of ethylbenzene. The SVOC results were mostly non-detect with many low benzo series hits in the 3 to 5 foot sample from B7. However, naphthalene hits were present in the 18 to 20 foot sample from B6 and in both samples from B8. I drafted a letter approving the report and stating that the Department required the remediation of the contamination at the locations of B6 to B8 and MW-6. The letter was submitted to Mr. Hussein for his approval. 4/17/13 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out with a due date of May 24, 2013 for the submission of the work plan for remediating the contamination under the sidewalk and the street. 4/24/13 - Raphael Ketani. Mr. Sosik submitted an addendum to the 3/2/13 RAWP dated April 24, 2013. The only change from the previous RAWP was that treatment solution injections will take place in the vicinity of MW-6 in order to

G&A AUTO REPAIR (Continued) **S108294903**

remediate the soil contamination at this location. I approved the addendum and responded via e-mail, but I strongly warned Mr. Sosik that he and 291 Metropolitan Realty were responsible for obtaining all of the necessary permits to conduct the injections and must consult with Con Edison, the NYC DEP, the NYC DOT and other concerned parties regarding the work he intends to perform. I also warned him that confirmatory soil samples and groundwater samples will need to be taken in each treatment area and that if the results are still well above the CP-51 standards and the TOGS 1.1.1 standards, then solution injections will have to be done again. I told him to make sure that the solutions travel to the contamination under the road. 6/14/13 - Raphael Ketani. I called Mr. Sosik (631) 504-6000, ext 112 regarding progress at the site. He said that the service station building will be demolished next week. This will be followed by the site excavation the following week. 8/12/13 - Raphael Ketani. I called Mr. Sosik today to find out what progress had been made at the site. He said that the building had been demolished and test pits had been performed to characterize the waste. The soil results indicated that they could dispose of the material at either Clean Earth of Soil Safe. However, the excavation contractor has not made contact with Mr. Sosik in some time. The permits are in place and NYC OER has given the go ahead to do the work and to construct the building. I told Mr. Sosik that the permits have expiration dates. So he should get ahold of the contractor and start the work before they expire. Mr. Sosik said that he knows this and he will call the contractor and find out what the hold up is regarding doing the excavation. Mr. Sosik said that he will send an e-mail when he has a definite start date. I told him that will be fine. 8/27/13 - Raphael Ketani. A meeting took place today at the office of the NYC OER. In attendance were Mr. Grunfeld, Mr. Sosik, and Dan Walsh, Mr. Chawla and Ms. Moore (212) 442-6372 of the NYC OER, and myself. The meeting was held in order to iron out some of the details of the work that will take place and associated matters. The topics discussed included: excavating the site down to 12 feet below grade, treating all of the hot spots (both within the building footprint and under the Metropolitan Avenue sidewalk) with solution injections, monitoring truck traffic and dust, monitoring odors and noise during the excavating and construction, the submission of a work plan for the excavating and solution injections to the DEC for approval and sending progress updates to OER and DEC. Mr. Grunfeld stated that digging should start tomorrow and continue for two to three

G&A AUTO REPAIR (Continued) **S108294903**

months. An estimated 3,000 cu. yds. of soil will be removed. The soil will go to Soil Safe in
Carteret, NJ and Prospect Park, NJ. Soil Safe will supply all of the trucks. Manifests will be
received by EBC for each load of soil. A vapor barrier, VB20, will be installed as part of the
building construction. Mr. Sosik stated that there will be 8 injection points. I mentioned that
confirmatory soil samples and groundwater samples will need to be taken 1 month after each
injection round. Mr. Sosik said that this will be done. One of Mr. Grunfeld's assistants mentioned
that the floor of the excavation will remain as open dirt until the soil treatment is finished.
After this, a concrete slab will be poured. I mentioned that removing as much of the soil
contamination was important because VOCs can get washed down into the groundwater by the rain, make
there way under the school which is downgradient and result in vapors coming up into the school.
Mr. Grunfeld said that they will make sure that the soil is treated. He also stated that the school
will be notified about the excavation plan. I asked whether the community board had been notified
about the impending work. Mr. Chawla said that they had been. One of Mr. Grunfeld's assistants
stated that the dirt trucks will enter and leave the site from Metropolitan Avenue, not the street
next to the school. Work will start at 7:30AM and end at 3:30PM. I suggested that both dust and
noise monitoring take place during the excavating in particular. I also added that the soil results
must meet the unrestricted residential standards and the groundwater must meet the TOGS 1.1.1
standards for the case to be closed. Everyone agreed that they understood what was to take place
and the meeting adjourned. 10/18/13 - Raphael Ketani. I spoke to Kevin Brussee and Mr. Sosik (631)
504-6000, ext 112 by phone regarding progress at the site. They mentioned that the construction
crew had been working at the site for only 6 full days. They had to do some site preparation work
before conducting the excavating. The excavating is taking place starting at the rear of the
property and they will work towards the front. Right now, they are digging just to make the pit for
the building. They will dig to remove the contamination later. The crew is putting in the footings,
but only in the back. Progress reports are being sent to the NYC OER and will be sent to the DEC. I
received 9 Daily Status Report documents for the period from 9/11/13 to 10/15/13. They indicated
that the contaminated soil was being sent to Soil Safe in New Jersey and that the clean soil was
being sent to the Malanka Landfill in New Jersey. Pictures of the clean soil showed red brown
glacial till with a few boulders and cobbles and a good percentage of

G&A AUTO REPAIR (Continued) **S108294903**

fines. The north half of the site had been excavated by 10/15/13. A vapor barrier was installed under the footings. Concrete buttoning up had been done in the northwest corner where the neighboring building was still standing. Other pictures showed rebar form work taking place in the northeast corner by 10/15/13. I had no comments about the reports. Later, Mr. Brussee sent me the following documents: Soil Safe 8/28/13 approval letter for receiving excavated soil from 0 to 6 feet below grade Fill Material Certification Letter dated 9/3/13 for the Malanka Landfill for soil originating from greater than 6 feet below grade Test Pit location map with the 7/16/13 soil analytical report I reviewed the documents, but had no comments. 10/28/13 - Raphael Ketani. Mr. Brussee sent me some pictures of a previously unknown UST that was uncovered under the southeast corner of the property. He explained in the e-mail that: One 275-gallon UST was encountered at 291 Metropolitan Avenue today. I will prepare an updated PBS application once excavation is completed just in case we find another one later. Although there were some rust holes in the tank, it does not appear as though the tank leaked. The tank is still full and no contaminated soil below the tank was observed. A tank removal company will be retained to cut and clean the tank, and I'll be sure they issue a NYCFD tank removal affidavit. I responded back by e-mail that a site map from ASR dated 8/6/09 shows the existence of a waste oil UST at the same location. I added that people need to look at the old maps and see where other features may be in order to avoid tearing them open and creating a spill. 10/29/13 - Raphael Ketani. I reviewed the October 28, 2013 Daily Status Report. Seventeen truck loads of contaminated soil were sent to Soil Safe. Excavation in the southeast corner of the site went down from 0' to 6' below grade. The foundation wall was installed in the northern part of the site. Troy Cutter came and removed the 275 gal. tank after it had been cleaned out. Picture 4 of the report shows a worker shoveling out thick sludge from the tank. The tank appears to have been filled completely with sludge. The air monitoring results were within ambient air limits. I approved the report. However, I sent an e-mail to EBC stating that the DEC wanted confirmation that the area where the UST had been emptied was clean. Later, Mr. Brussee sent me 3 photos showing the handling of the tank and the work area after the tank was emptied and removed. The floor in the area looked clean. 11/4/13 - Raphael Ketani. Mr. Brussee sent me copies of the tank removal paperwork. 12/2/13 - Raphael Ketani. I spoke to Mr. Brussee (631) 504-6000 regarding progress at

G&A AUTO REPAIR (Continued) **S108294903**

the site. He said that they had basically dug down 12 feet below grade throughout the site.
However, there is one corner with gray soil. He added that they want to remove this area of gray
soil and then bring in a geoprobe to put in the injection wells. The construction crew may be
putting in footings now. Otherwise, nothing else significant is happening. 12/18/13 - Raphael
Ketani. I had a phone conversation with Mr. Sosik (631) 504-6000, ext 112. He said that the
contractor is presently removing the contaminated soil in the excavation pit. Also, a drilling rig
was lowered into the pit in order to drill holes for treatment solution injection. I told Mr. Sosik
that the contractor should follow the soil contamination in order to remove as much contamination
as possible. 2/12/14 - Raphael Ketani. I tried to contact Mr. Sosik regarding progress at the site,
but I could only send an e-mail. 2/24/14 - Raphael Ketani. I made an unannounced site visit today
to see the physical status of the site. I took a few pictures. A large pit had been excavated. The
building was being constructed. The steel frame had been partially completed. Workers were pouring
concrete and doing masonry work. The sidewalk did not appear to have been dug up in order to remove
the contamination at the location of MW-6 and borings B-6 to B-8. In fact, the plywood wall along
the sidewalk obscured the location of MW-6 and B-6 to B-8. There were viewing portals in the
plywood walls, but there was nothing else to see except the construction that was taking place. So,
I left the site. 2/26/14 - Raphael Ketani. I spoke to Mr. Sosik (631) 504-6000, ext 112 today
regarding the submission of the remediation report. He told me that the remediation hadn't been
completed yet and that is why DEC didn't get the report. He added that the contaminated soil was
dug out from under the sidewalk. End point samples were taken about 2 months ago in the excavation
pit. The injection points were installed, but the solution injections have not taken place yet. He
wasn't sure why. Mr. Sosik will send the NYC OER Interim report. However, he was not sure when this
report will be completed as he has to follow a very specific format and there is a lot of
information to include in the report. 5/20/14 - Raphael Ketani. As progress reports have not been
submitted. I sent Mr. Sosik (631) 504-6000, ext 112 an e-mail requesting the NYC OER Interim
Report. 5/21/14 - Raphael Ketani. Mr. Sosik responded by e-mail stating that there will not be an
Interim Report. A Final Report to OER will be submitted. Mr. Sosik added that it will take several
weeks to put the report together. 6/23/14 - Raphael Ketani. As I hadn't received the Final Report
from Mr. Sosik (631) 504-6000, ext 112/(631) 357-4927, I left a voice

G&A AUTO REPAIR (Continued) **S108294903**

message on both of his phones
requesting this report. 8/25/14 - Raphael Ketani. Since my last voice message to Mr. Sosik, we had
discussed the submission of a final report for the site. He had told me weeks ago that the NYC OER
had a rigid format that must be followed regarding report submission and what each report must
contain. So, he couldn't submit the final report at the time. However, he had told me that he would
send it eventually. As the report still hasn't been received, I sent him [(631) 504-6000, ext
112/csosik@ebcincny.com] an e-mail requesting it. 11/25/14 - Raphael Ketani. As Mr. Sosik hasn't
sent the final report, I sent him another e-mail requesting the report. 11/26/14 - Raphael Ketani.
Mr. Sosik responded by e-mail today that the site is on his list of projects to finish. He added
that there were endpoints taken from the sidewalk and injections performed. 3/10/15 - Raphael
Ketani. I sent an email to Mr. Sosik (631) 504-6000, ext 112/(631) 357-4927 /csosik@ebcincny.com
requesting the closure report. 6/26/15 - Raphael Ketani. As there has been no response from Mr.
Sosik in some time, I sent an email to Ms. Hollinger (jrhollinger@juno.com) stating that the
Department was owed the closure report as part of the requirements of the Stipulation Agreement in
order to close the spill case. Ms. Hollinger responded back that she was waiting to hear from the
R.P.'s attorney. 6/29/15 - Raphael Ketani. I made an unannounced site visit today. The building had
been completely constructed. It appeared that they had finished construction just recently as the
planting areas between the sidewalks and the street were still just areas of dirt. I saw some
construction workers standing outside the front of the building (which faces the school). They were
not going into the building and the building itself was locked and dark. I took a picture of the
building and the sidewalk along Metropolitan Avenue which still had access ports for 3 wells. After
this, I left the site. 9/16/15 - Raphael Ketani. The excavation within the footprint of the new
building was deep enough (about 20 feet) to remove the great majority of the soil contamination and
almost all of the groundwater contamination. The only soil contamination which remained was in the
area of the former remote fill port, which was under the utilities and could not be removed easily
or treated. Given the present condition of the site, I determined that the spill had effectively
been remediated and that the residual contamination was not a threat to the public or the
environment. Therefore, I closed the spill case effective today.

Remarks: not yet cleaned

DEC Memo:	10/25/17 TJD Spill assigned to Rick Lin as per Vought. 10/26/17- Lin - Received emails from Vought with reports. No alternate address or PBS registration found. Review reports with Vought: Remedial Investigation Report (Langan October 2017 Draft) prepared for RedSky Capital, 3 Hope Street, Brooklyn, NY 11211. The Site is 5,000-square feet and is bounded by North 4 Street followed by Public School 017, which consists of a five-story public use building and open air playground, to the north, a four-story mixed use residential/commercial building to the south, a two-story manufacturing building to the east, and Driggs Avenue followed by an open-air parking lot to the west. Currently, the Site is an asphalt-paved lot used for storage of stone slab building materials and is enclosed by a perimeter fence along the property boundary. The proposed future use of the Site will consist of a six-story mixed-use commercial and residential building, with a single below-grade cellar level. The building s below-grade cellar will be used for storage (including residential tenant storage), pet grooming, and building mechanical equipment rooms. Parking proposed for second floor. Excavation will be performed as part of construction of the cellar to a depth of approximately 15.5-feet below sidewalk grade across the entire Site footprint; an elevator pit in the south-central portion of the lot will be excavated to approximately 19.5-feet below sidewalk grade. Work performed under remedial investigation: Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.). Installed five soil borings across the entire project Site, and collected 10 soil samples for chemical analysis from the soil borings to evaluate soil quality. Installed three temporary groundwater monitoring wells throughout the Site to establish groundwater flow and collected three groundwater samples for chemical analysis to evaluate groundwater quality. Installed three soil vapor probes around Site perimeter and collected three samples for chemical analysis. Environmental findings: Elevation of the property ranges from 24 to 26-feet with respect to the North American Vertical Datum of 1988

625 DRIGGS AVENUE (Continued) **S121119942**

(NAVD 88). Depth to groundwater ranges from 18.5- to 21-feet below existing site grade at the Site.
Groundwater flow is inferred to be from southeast to northwest beneath the Site. The stratigraphy
of the site, from the surface down, consists of approximately 5.5- to 10-feet of historic fill
material underlain by native sands with varying amounts of gravel and silt. The bottom of the sand
unit and bedrock was not encountered during the RI. Data (Soil) 1,2,4-trimethylbenzene 16,000 ppb

ug/l(LMW-3) 10/27/2017 -Lin/Vought- Redevelopment of the property is anticipated to begin in 2017.
A Remedial Action Work Plan to address the hazardous material portion of the E-Designation will be
provided within one week of the submittal of this Remedial Investigation Report. DEC possibly
requires: 1) Air Monitoring due to adjacent playground/school 2) Submission of Transaction Screen
Environmental Site Assessment Report prepared by LCS Inc for M&T bank

625 DRIGGS AVENUE (Continued) **S121119942**

on behalf of RedSky Capital
dated June 2015 as per the RIR. 3) Hotspot excavation, if found, as groundwater is contaminated and
no vertical pathway has been found to date in soil sample. 4) Soil vapor mitigation after
discussion with NYSDOH Walz due to up to 250 ug/m^3 TCE 5) Question on presence of underground
gasoline tanks due to consultant review of transaction Screen Environmental Site Assessment Report
11/1/2017- Lin/Vought- Lin and Vought had the conference call with Walz from NYSDOH and
Samantha/Shaminder from OER. Per Shaminder, the consultant estimated that only 22'' between the
foundation and the water table, so there might not be enough room to install a SSDS (subslab
depressurization system). Installation of a vapor barrier. PID during excavation and hot spot
excavation. Remedial action plan with community air monitoring plan will come in this week. Nathan
suggested a permanent air monitoring set up in the direction of the school. 8/23/21-Lin-Depth to
groundwater is at 18.5' to 21'. The groundwater flow direction is to the northwest toward east
river. Two (2) 275 gallon and one (1) 550 gallon USTs were removed. Since the tanks were found near
the site boundary, three (3) sidewall soil samples toward the site boundary were taken. All three
(3) soil samples came back clean. Soil on site was excavated to a depth of 15' to 16' bgs. A
hotpsot identified during the RI was excavated down to 20' bgs. Five (5) endpoint bottom samples
were taken across the site and two of the samples were taken in the hotspot area. All five (5)
endpoint soil samples came back clean. Dissolved contamination in the groundwater is expected to
attenuate over time as no contaminated soil remains on site. An engineering composite and vapor
barrier system were installed. An active SSDS was installed. Case closed.

Remarks: cleanup pending - would like to have assigned to Ricky Linn

Waste Code:	D026
Waste Description:	Cresol
Waste Code:	D027
Waste Description:	1,4-Dichlorobenzene
Waste Code:	D028
Waste Description:	1,2-Dichloroethane
Waste Code:	D029
Waste Description:	1,1-Dichloroethylene
Waste Code:	D030
Waste Description:	2,4-Dinitrotoluene
Waste Code:	D031
Waste Description:	Heptachlor (And Its Epoxide)
Waste Code:	D032
Waste Description:	Hexachlorobenzene
Waste Code:	D033
Waste Description:	Hexachlorobutadiene
Waste Code:	D034
Waste Description:	Hexachloroethane
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D036
Waste Description:	Nitrobenzene

RADIAC RESEARCH CORP (Continued) **1000245435**

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene,

RADIAC RESEARCH CORP (Continued) **1000245435**

2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F010
Waste Description: Quenching Bath Residues From Oil Baths From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.

Waste Code: F011
Waste Description: Spent Cyanide Solutions From Slat Bath Pot Cleaning From Metal Heat Treating Operations.

Waste Code: F012
Waste Description: Quenching Wastewater Treatment Sludges From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.

Waste Code: F019
Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P002
Waste Description: 1-Acetyl-2-Thiourea (Or) Acetamide, N-(Aminothioxomethyl)-

Waste Code: P003
Waste Description: 2-Propenal (Or) Acrolein

Waste Code: P004
Waste Description: 1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha,

RADIAC RESEARCH CORP (Continued) **1000245435**

4abeta, 5alpha, 8alpha, 8abeta)- (Or) Aldrin

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P006
Waste Description: Aluminum Phosphide (R,T)

Waste Code: P007
Waste Description: 3(2h)-Isoxazolone, 5-(Aminomethyl)- (Or) 5-(Aminomethyl)-3-Isoxazolol

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P009
Waste Description: Ammonium Picrate (R) (Or) Phenol, 2,4,6-Trinitro-, Ammonium Salt (R)

Waste Code: P010
Waste Description: Arsenic Acid H3aso4

Waste Code: P011
Waste Description: Arsenic Oxide As2o5 (Or) Arsenic Pentoxide

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P013
Waste Description: Barium Cyanide

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P015
Waste Description: Beryllium

Waste Code: P016
Waste Description: Dichloromethyl Ether (Or) Methane, Oxybis[Chloro-

Waste Code: P017
Waste Description: 2-Propanone, 1-Bromo- (Or) Bromoacetone

Waste Code: P018
Waste Description: Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-

Waste Code: P020
Waste Description: Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-

Waste Code: P021
Waste Description: Calcium Cyanide (Or) Calcium Cyanide Ca(Cn)2

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P023
Waste Description: Acetaldehyde, Chloro- (Or) Chloroacetaldehyde

Waste Code: P024

RADIAC RESEARCH CORP (Continued) **1000245435**

Waste Description: Benzenamine, 4-Chloro- (Or) P-Chloraniline

Waste Code: P026
Waste Description: 1-(O-Chlorophenyl)Thiourea (Or) Thiourea, (2-Chlorophenyl)-

Waste Code: P027
Waste Description: 3-Chloropropionitrile (Or) Propanenitrile, 3-Chloro-

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P031
Waste Description: Cyanogen (Or) Ethanedinitrile

Waste Code: P033
Waste Description: Cyanogen Chloride (Or) Cyanogen Chloride (Cn)Cl

Waste Code: P034
Waste Description: 2-Cyclohexyl-4,6-Dinitrophenol (Or) Phenol, 2-Cyclohexyl-4,6-Dinitro-

Waste Code: P036
Waste Description: Arsonous Dichloride, Phenyl- (Or) Dichlorophenylarsine

Waste Code: P037
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2aalpha, 3beta, 6beta, 6aalpha, 7beta, 7aalpha)- (Or) Dieldrin

Waste Code: P038
Waste Description: Arsine, Diethyl- (Or) Diethylarsine

Waste Code: P039
Waste Description: Disulfoton (Or) Phosphorodithioic Acid, O,O-Diethyl S-[2-(Ethylthio)Ethyl] Ester

Waste Code: P040
Waste Description: O,O-Diethyl O-Pyrazinyl Phosphorothioate (Or) Phosphorothioic Acid, O,O-Diethyl O-Pyrazinyl Ester

Waste Code: P041
Waste Description: Diethyl-P-Nitrophenyl Phosphate (Or) Phosphoric Acid, Diethyl 4-Nitrophenyl Ester

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P043
Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

Waste Code: P044
Waste Description: Dimethoate (Or) Phosphorodithioic Acid, O,O-Dimethyl S-[2-(Methylamino)-2-Oxoethyl] Ester

RADIAC RESEARCH CORP (Continued) **1000245435**

Waste Code: P045
Waste Description: 2-Butanone, 3,3-Dimethyl-1-(Methylthio)-, O-[Methylamino)Carbonyl] Oxime (Or) Thiofanox

Waste Code: P046
Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P047
Waste Description: 4,6-Dinitro-O-Cresol, & Salts (Or) Phenol, 2-Methyl-4,6-Dinitro-, & Salts

Waste Code: P048
Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P049
Waste Description: Dithiobiuret (Or) Thioimidodicarbonic Diamide [(H2n)C(S)]2nh

Waste Code: P050
Waste Description: 6,9-Methano-2,4,3-Benzodioxathiepin,6,7,8,9,10,10-Hexachloro-1,5,5a,6, 9,9a-Hexahydro-,3-Oxide (Or) Endosulfan

Waste Code: P051
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2abeta, 3alpha, 6alpha, 6abeta, 7beta, 7aalpha)- & Metabolites (Or) Endrin (Or) Endrin, & Metabolites

Waste Code: P054
Waste Description: Aziridine (Or) Ethyleneimine

Waste Code: P056
Waste Description: Fluorine

Waste Code: P057
Waste Description: Acetamide, 2-Fluoro- (Or) Fluoroacetamide

Waste Code: P058
Waste Description: Acetic Acid, Fluoro-, Sodium Salt (Or) Fluoroacetic Acid, Sodium Salt

Waste Code: P059
Waste Description: 4,7-Methano-1h-Indene, 1,4,5,6,7,8,8-Heptachloro-3a,4,7,7a-Tetrahydro- (Or) Heptachlor

Waste Code: P060
Waste Description: 1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5beta, 8beta, 8abeta)- (Or) Isodrin

Waste Code: P062
Waste Description: Hexaethyl Tetraphosphate (Or) Tetraphosphoric Acid, Hexaethyl Ester

Waste Code: P063
Waste Description: Hydrocyanic Acid (Or) Hydrogen Cyanide

Waste Code: P064
Waste Description: Methane, Isocyanato- (Or) Methyl Isocyanate

RADIAC RESEARCH CORP (Continued) **1000245435**

Updated By: KAMALONE
Site Description: Location: The Brooklyn Gas Light Works Manufactured Gas Plant (MGP) is located at 1 Hudson Avenue in Brooklyn, New York in Kings County. Site Features: An active generating station (Hudson Ave.), owned by Consolidated Edison, currently operates at the site. The site is covered by buildings, some asphalt parking areas and walkways. Current Zoning and Land Use: The site is currently an active generating station and is zoned for light manufacturing and commercial uses. The nearest residential area is 0.3 miles to the south. Past Use of the Site: The MGP plant operated from 1849 until approximately 1900. The property was sold to Brooklyn Edison Company between 1922 and 1928. The MGP buildings and associated above-ground structures were subsequently removed and the generating station was built. Consolidated Edison purchased the property and generating station in approximately 1950. Site Geology and Hydrogeology: The general geology in the area is artificial fill and alluvial deposits ranging between 15-20 feet thick. The next layer consists of glacial deposits (clay, sand, gravel and boulders); then a layer of Gardiner's Clay; coarse sand and gravel; a clay and silty clay layer; a sand layer interbedded with gravel clay and silt; and finally a bedrock consisting of gneiss, schist and pegmatite. Overall groundwater ranges between 5 and 22 feet below ground surface (bgs), and generally flows to the north towards the East River. The site groundwater is tidally influenced.
Env Problem: Environmental conditions at the site will be determined during the Site Characterization.
Health Problem: The NYSDOH will evaluate the potential for impacts to public health from exposure to site contaminants once sufficient information from the investigation of the site becomes available for review.

Site Description: Location: The 2825 square foot site is located at 134 Metropolitan Avenue in the Borough of Brooklyn, Kings County, NY in an urban area. The site is bounded by Metropolitan Avenue to the north, a movie theater to the east, North 1st Street to the south, and a commercial/residential building to the west. Site Features: The Site is approximately 2,825 square-feet and is currently occupied by a two-story commercial building with partial basement (30% of site) and a partial sub-basement. Current Zoning and Land Use: The site is currently zoned as M1-2 (manufacturing) with an R6A (residential) overlay. The on-site building was most recently occupied by a bar/nightclub which closed in 2016. Past Use of the Site: Historic uses at the Site include wire works (prior to 1887), a machine shop (1887-1905), and manufacturing (1951). The current owner plans to add 3 additional floors on the building for residential use. Site Geology and Hydrogeology: According to maps and reports published by the United States Geological Survey (USGS), the Property is situated at approximately 36 feet above mean sea level and is underlain by glaciofluvial deposits of Upper Cretaceous and/or Quaternary age consisting of sand, silt, clay gravel, cobbles and boulders. These deposits rest unconformably on crystalline bedrock of early Paleozoic and/or Precambrian age. Soil borings were completed during the investigation to depths ranging from approximately 20 to 39 feet below land surface. Depth to water readings collected during this investigation indicate shallow groundwater beneath the Site ranges from 19.83 feet below grade at GW-5 to 38.97 feet below grade at GW-1. Based upon regional maps published by the USGS shallow groundwater flow appears to be moving in a westerly direction.

Env Problem: Nature and Extent of Contamination: This site was referred to the Department from the NYC Office of Environmental Remediation (OER). A soil vapor intrusion investigation was undertaken on the site under the direction of OER as a result of an environmental e designation on the site. Historic uses at the site include wire works (prior to 1887), a machine shop (1887-1905), and unspecified manufacturing (1951). The site is currently occupied by a two-story commercial building with partial basement and a partial sub-basement. Based on the soil vapor investigation conducted under OER, the chlorinated solvents tetrachloroethylene (PCE) and its degradation products trichloroethene (TCE) and 1,2 dichloroethene (DCE) were detected at maximum concentrations of PCE at 223,000 micrograms per cubic meter (ug/m3), TCE at 203 ug/m3, and DCE at 114 ug/m3. Subsequently, a site

134 METROPOLITAN AVENUE-OER (Continued) **S108076312**

characterization (SC) was conducted under a NYSDEC consent order. Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), pesticides and per and polyfluoroalkyl substances (PFAS). Soil vapor was sampled for VOCs. During the SC, the soil vapor concentrations identified in the initial OER investigation were not duplicated. Soil During the site characterization investigation, No PID readings exceeded zero parts per million (ppm) in any of the screened soil samples and no VOCs were detected at concentrations above their respective restricted residential soil cleanup objectives (RRSCOs) and protection of groundwater soil cleanup objectives (PGWSCOs) in soil samples collected at the site. SVOCs were detected at concentrations exceeding the RRSCOs in shallow soil at the site. SVOCs include benzo(a)anthracene (max of 11 ppm; RRSCO is 1 ppm), benzo(a)pyrene (max of 8.7 ppm; RRSCO is 1 ppm), benzo(b)fluoranthene (max of 11 ppm; RRSCO is 1 ppm), dibenzo(a,h)anthracene (max of 1.3 ppm; RRSCO is 0.33 ppm), and Indeno(1,2,3-cd)pyrene (max of 5.5 ppm; RRSCO is 0.5 ppm). Metals were detected above their respective RRSCOs including mercury (max of 1.87 ppm; RRSCO is 0.81 ppm), and lead (max of 475 ppm; RRSCO is 400 ppm). 1,4-dioxane was not detected in any soil samples. PFOA and PFOS were not found at concentrations exceeding either the restricted-residential use or the protection of groundwater guidance values. Data does not indicate any off-site impacts in soil related to this site. Groundwater Chlorinated - VOCs were found in groundwater on the south of the site one off-site well. VOCs exceeding their respective ambient water quality standards (AWQS) include trichloroethene (max 97 parts per billion (ppb); AWQS is 5 ppb), and cis-1,2-Dichloroethene (max 43 ppb; AWQS is 5 ppb). SVOCs detected in groundwater above the AWQS include benzo(a)anthracene at a maximum concentration of 0.12 (AWQS is 0.002 ppb), benzo(a)pyrene at a maximum concentration of 0.11 (AWQS is non-detect), benzo(b)fluoranthene at a maximum concentration of 0.13 (AWQS is 0.002 ppb), benzo(k)fluoranthene at a maximum concentration of 0.04 (AWQS is 0.002 ppb) and chrysene at a maximum concentration of 0.1 (AWQS is 0.002 ppb). In groundwater, lead was detected at a maximum concentration of 45.92 ppb compared to 25 ppb and mercury was at 2.03 ppb compared to 0.7 ppb. Only naturally occurring dissolved metals (manganese, sodium, magnesium) were detected at concentrations exceeding AWQS. PFOS was detected at a maximum concentration of 7.72 parts per trillion (ppt) compared to the Maximum Contaminant Level of 10 ppt, and PFOA at a maximum concentration of 62 ppt (MCL 10 ppt). No Pesticides, PCBs and 1,4 -dioxane were identified above ambient water quality standards in any groundwater samples. Data does not indicate any off-site impacts in groundwater related to this site. Sub-slab soil Vapor and Indoor Air Low-levels of VOCs were detected in on-site sub slab soil vapor. The maximum concentration of tetrachloroethylene (PCE) and trichloroethylene (TCE) were detected in sub slab soil vapor samples at 6.39 micrograms per cubic meter (ug/m3), and 1.2 ug/m3, respectively. PCE was detected in the indoor air at a maximum concentration of 0.346 ug/m3. No TCE were detected in the indoor air. Data does not indicate any off-site impacts in soil vapor related to this site.

Health Problem: People will not come into contact with contaminated soil or groundwater unless they dig below the ground surface. People are not drinking the groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic

134 METROPOLITAN AVENUE-OER (Continued) **S108076312**

compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is vacant so inhalation of site contaminants in indoor air via soil vapor intrusion is not a current concern, however the potential exists for soil vapor intrusion to occur and affect the indoor air of any future occupied buildings on the site. An evaluation of the potential for soil vapor intrusion to occur will be completed should the current use of the site change. Environmental sampling indicates that the potential for exposure due to soil vapor intrusion from site contaminants is not a concern off-site.

Contact Name:	DOUG HARM
DEC Memo:	1/10/14: Mahat DEC made an attempt to contact Mr. Doug Harm (Brinkerhoff Environmetal @ 732.223.2225 : 732.674.4064) inquiring more information about the site. A voice message was left to Mr. Harm to call back DEC for more information. 8/18/2014: Another voice message was left to Mr. Doug Harm inquring more information about the nature of the spill. 9/17/14: Mahat DEC Mahat received a call from Mr. Shawn Harrison from Brinkerhoff Environmental mentioning that a closure report is ready and will be submitted to the Department. DEC is waiting for a closure report. 6/6/16: Mahat t/c : DEC Mahat contacted Mr. Shawn Harrison inquiring about the closure report on the spill case. He mentioned that the report has been all completed and will be submitted to the Department promptly. 6/9/16: Mahat t/c : DEC Mahat talked to Mr. Shawn and he mentioned that the Closure Report in under internal review. It will be submitted to the Department as soon as possible. 10/6/2016: Rashad Spill will be reassigned to DEC Omar from DEC Mahat. 10/11/2016: Rashad 502 Metropolitan Avenue does not have an alternate address. No additional spills or PBS registrations found for site. No documents found in D2. Emailed Sean Harrison about status of closure report. 10/13/2016: Rashad Sean replied on 10/12 and will check the status of report. 11/1/2016: Rashad Received report from Sean Harrison, it has been uploaded to D2. Review of UST closure report is as follows: During excavation activities on 2/6/14, three fuel oil USTs were encountered. The site is currently being redeveloped and is E-Designated. Impacted soils and strong petroleum odors were identified in the northwest corner of the site, adjacent to the intersection of Rodney Street and Metropolitan Avenue. Brinkerhoff collected five soil samples to delineate the extent of the petroleum impacted soil. The northern most UST was filled with liquid consisting of a water-sludge mixture, the two southernmost USTs were filled in with

COMMERCIAL LOT (Continued) **S116156582**

concrete. The tank was pumped,
cleaned and removed, the other 2 USTs were also removed. A total of 280 tons of soil was excavated
and properly disposed of. On 9/29/14 additional impacted soil was identified within the location of
the former USTs. On 10/6/14 the material was excavated, and one sample was taken, almost 25 tons of
soil was removed. The site is currently being redeveloped as a 14 story mixed use building (hotel
rooms and residential apartments). Additionally the site development consists of underground
parking and underground and ground floor retail space. In conclusion, Brinkerhoff is requesting
spill closure. Review of 2/4/14 sample data: Minor SVOC exceedances in SB-2 (5.5-6ft). VOC
exceedances in SB-4 (5.5-6ft): Xylene-2.8ppm, Toluene-.96ppm, benzene-.18ppm Review of 2/28/14
sample data (similar locations to SB): Minor SVOC exceedances in PE-2 (10-10.5ft). Minor SVOC
exceedances in PE-3 (10-10.5ft) Review of 10/6/14 sample S-9 taken at the base of the excavation at
12 ftbgs yielded no exceedances in VOCs or SVOCs. Review of 1/6/15 sample EP-7 taken as Endpoint
bottom sample at 15 ftbgs yielded no exceedances in VOCs and SVOCs. Area of concern SB-4 which
recorded the highest VOC values was further excavated as reflected by sample S-9 and EP-7 which
were in the same area. Spill will be closed as final sampling shows no elevations of VOCs or SVOCs
after excavation activities. In addition USTs have been removed and decommissioned. Closure letter
will be prepared and sent to owner as per tax records: 475 Keap Street, LLC 512 7th Ave Ny, NY
10018 Letter will also be emailed to Sean Harrison of Brinkerhoff. Closure letter uploaded to D2.
Spill closed

Remarks: 3 tanks found during excavation/clean up pending

Updated By: JHOCONNE
Site Description: Location: The site is located in the Williamsburg section of Brooklyn. The site is bounded by Havemeyer Street to the northwest, North 6th Street to the southwest, Macri Triangle park to the southeast, and North 8th Street to the northeast. Site Features: The site is completely covered with buildings in the northwest section; and covered with asphalt, concrete, and open park space in the southeast section. The site is bisected by an elevated portion of I-278 (the Brooklyn-Queens Expressway (BQE)) adjacent to the park.The former footprint of the Ansbacher Color and Dye Factory was identified to extend to Lot 9, Lot 20, Lot 45, portions of I-278 (Brooklyn Queens Expressway (BQE) and parts of Marci Triangle park. Current Zoning and Land Use(s): The site is zoned for residential, manufacturing, and commercial uses. The residential area is in the northwest section of the site. The manufacturing building along Meeker Avenue is unoccupied. Past Use of the Site: According to Sanborn maps, the former Ansbacher Color and Dye Factory (Ansbacher) occupied multiple buildings along North 6th Street, North 7th Street, and Metropolitan Avenue from ~1887 to ~1945. The assumed use of the facility was to manufacture paints and/or pigments for commercial and industrial use. In the early 1950's, the buildings in the southeastern section of the site were torn down to make room for the construction of the BQE. It is believed that during this construction, waste material and debris from the former Ansbacher plant may have been used as fill material in the project area. A Phase II - type investigation was conducted by the New York State Department of Transportation (NYSDOT) in 1988. The investigation found hazardous levels of arsenic and lead in the soil and elevated levels of arsenic, lead and cyanide in the groundwater. During the reconstruction of the BQE in the early 1990s, the NYSDOT completed an IRM (soil removal) within the project's right-of way. The remaining contaminated soil is located beneath asphalt and concrete. A Preliminary Site Assessment was completed by the New York State Department of Environmental Conservation (NYSDEC) during the summer of 1999 to evaluate the areas outside the BQE footprint. The sampling results indicate that the subsurface soils within the footprint of the former Ansbacher Plant contain elevated levels of arsenic, lead, and mercury. The groundwater in this area is also contaminated with these metals, but the contaminated groundwater has not migrated significantly beyond the footprint of the former factory. In 2015, the NYSDEC initiated an investigation on the perimeter of the site to identify the origin of chlorinated solvents found in groundwater beneath the sidewalk as part of routine sampling. Site Geology and Hydrogeology: The site is underlain by fine to medium sands; with limited quantities of coarse sand, gravel, and silt throughout the site at varying intervals. Groundwater is approximately 9.5 - 12.5' below grade. Flow direction in shallow groundwater is toward the west-southwest, while deeper groundwater appears to flow towards the east. (This may be due to the presence of the L train subway tunnel underneath North 7th Street.)
Env Problem: Nature and Extent of Contamination: - Soil Sampling was completed in multiple stages from 1988 to 1999. The primary contaminants of concern in soil at this site are arsenic, lead, and mercury. Arsenic

BQE/ANSBACHER COLOR & DYE FACTORY (Continued) **S106780917**

has been found at concentrations up to 7,500 ppm, well above the cleanup objective for commercial use (16 ppm). This soil failed for EP Toxicity (48 mg/l, 5.0 mg/l criteria), indicating the soil is hazardous. Lead has been found at concentrations up to 10,600 ppm, well above the cleanup objective for commercial use (1,000 ppm). This soil failed for EP Toxicity (20.3 mg/l, 5.0 mg/l criteria), indicating the soil is hazardous. Mercury was also found at concentrations up to 294 ppm, well above the cleanup objective for commercial use (2.8 ppm). These concentrations were all found in the vicinity of the Arsenate Of Lead building in the southeast area of the site, which is now located in the footprint of the BQE. - Groundwater Sampling has been completed in multiple stages from 1988 to 2015. The primary contaminants of concern in groundwater are arsenic, lead, and mercury. Arsenic has been found at concentrations up to 15,500 ppb, well above the Class GA standard of 25 ppb. Lead has been found at concentrations up to 431 ppb, above the Class GA standard of 25 ppb. Mercury has been found at concentrations up to 75 ppb, well above the Class GA standard of 0.7 ppb. These concentrations were all found in the vicinity of the Arsenate Of Lead building in the southeast area of the site, which is now located in the footprint of the BQE. In 2015, groundwater in the northwest portion of the site was also found to contain tetrachloroethene (PCE) up to 1,900 ppb, trichloroethene (TCE) up to 120 ppb, and cis-1,2-dichloroethene (DCE) up to 320 ppb. PCE, TCE, and DCE all have a Class GA standard of 5 ppb. Significant Threat: The site does not constitute a significant threat to human health or the environment as the contaminated soil is covered by existing layers of asphalt and concrete, and the contaminated groundwater has not migrated significantly beyond the footprint of the former factory. Portions of the former factory have been redeveloped into commercial/residential buildings.

Health Problem: Residual arsenic and lead contamination remain under the BQE and is covered with several layers of concrete and asphalt, thereby preventing direct contact. Contaminated soil also underlies several on-site buildings formerly used by Ansbacher. Groundwater in the area is not used, since public water is available. Off-site sampling of surface soils from residential yards adjacent to the site indicated the presence of metals (particularly arsenic and lead) at concentrations above the range of concentrations typically encountered in urban neighborhoods. However, the exact source of the metals in the soils could not be determined from the data collected. The NYSDOH gave the residents advice on how to minimize their exposure to these surface soil contaminants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City?s Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

667 KENT AVE / 25 HOOPER ST
667 KENT AVENUE & 25 HOOPER STREET
BROOKLYN, NY 11249

TARGET PROPERTY COORDINATES

Latitude (North):	40.701743 - 40° 42' 6.27''
Longitude (West):	73.962898 - 73° 57' 46.43''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	587616.9
UTM Y (Meters):	4505954.5
Elevation:	15 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14115940 BROOKLYN, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

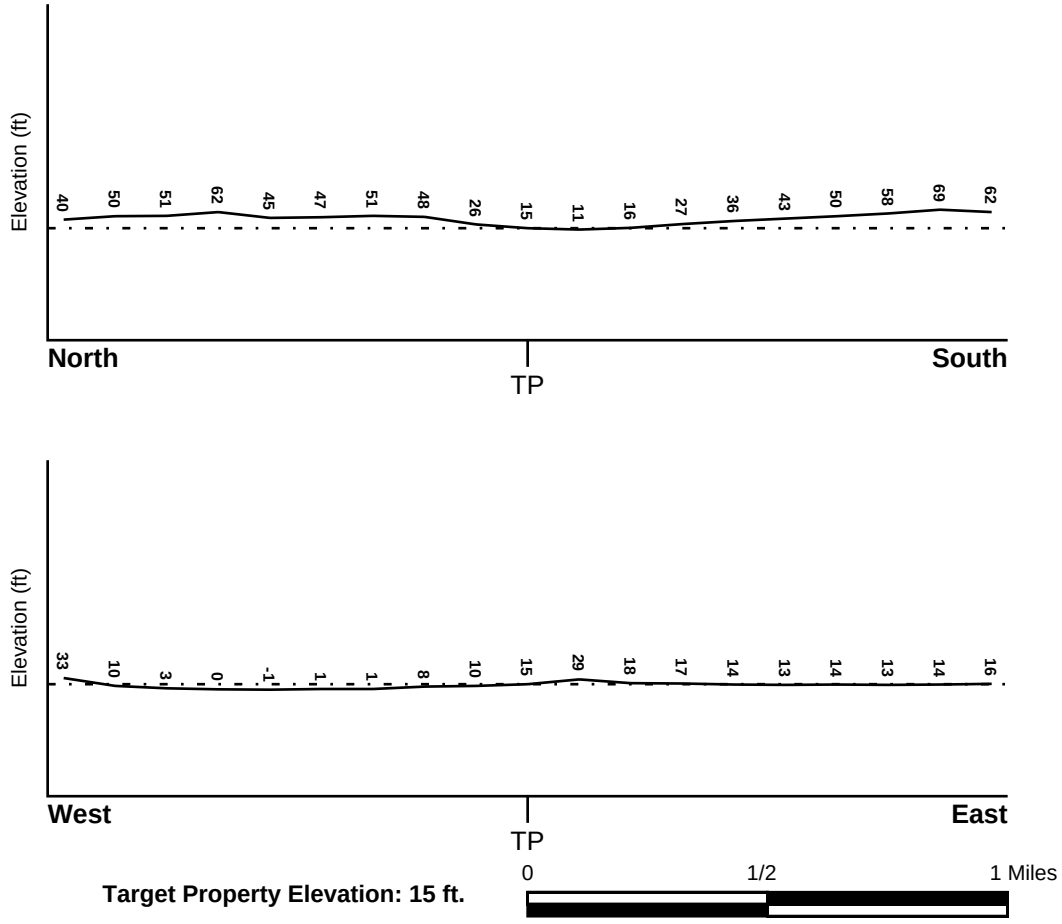
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 15 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970204F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970203F	FEMA FIRM Flood data
3604970063B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile SW
Site Name:	Naval Station Ny
Site EPA ID Number:	NY5170022250
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	14 feet in a well located 1 mile southeast of the site.
Hydraulic Connection:	Information is not available about the hydraulic connection between the surficial aquifer (upper glacial till) and underlying aquifer(s). Bedrock is present at an estimated depth of 100 feet.
Sole Source Aquifer:	A sole source aquifer is persent at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic
System:	Cretaceous
Series:	Upper Cretaceous
Code:	uK *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Description:

PERMIT DESCRIPTION
NAP Industries, Inc.
DEC ID # 2-6101-00016/00004 (Ren 4)

This is a renewal of the Title V operating permit for NAP Industries, Inc., DEC ID #2-6101-00016/00004 that was issued on 5/10/2017. The facility operates two (2) flexographic printing presses (Emission Sources 000P6 & 000P7), and one (1) natural gas fired catalytic oxidizer (Emission Control 00008) in Emission Unit 0-00CFI to produce flexible packaging materials. The catalyric oxidizer destroys the VOC emissions from each printing press during the period from March 1 to October 31 **y**early (ozone season - Process P01). Process P02 is when the catalytic is not operated during the remaining part of the year (November 1 to February 28) during the non-ozone season as per a variance under 6 NYCRR Part 234.3(h). Process P02 is when the catalytic oxidizer is not being used, the emissions from each pring press ar bypassing the catalytic oxidizer and ar individually vented through individual emission points (00006 & 00007) directly to the atmosphere.

The facility is a major source of VOC, but a minor source of Hazardous Air

Pollutants (HAPs). The VOC emissions remains capped at 113.31 Tons/year.

NAP Industries, located at 667 Kent Avenue in Brooklyn, New York is engaged in flexographic printing operations of mainly plastic substrates, operating under an approved seasonal variance from VOC incineration. The standard industrial classification codes are 3081- Unsupported Plastics Film and Sheet, 2673-Plastics, Foil, and Coated Paper Bags and 2759-Flexographic Printing.

NAP Industries, Inc. is a flexographic printing facility using both aqueous-based and solvent-based inks applied to paper and film/polyethylene substrate rolled sheeting producing material for a variety of commercial and industrial packaging applications. Normal operations include a 5-day work week, 12 hours/day for Monday through Friday with a total of 60 hours per week during this period. The facility creates VOC emissions that are currently processed through a natural gas- fired catalytic oxidizer with an approved VOC seasonal variance operating between March 1 and October 31, with a destruction efficiency of 90% before emitting to the environment.

The Title V Permit Renewal #4 involves the removal of two (2) printing presses (Emission Sources 000P2 & 000P5) with corresponding Emission Points 000P2 & 000P5). Both printing presses are 50 inches each and to be ducted (Process P01) to a newly replaced (2/10/2017) 25,000 CFM ANGUIL ENV. SYSTEMS Model 250 Regenerative Thermal Oxidizer - RTO (Emission Control 00008) all under Emission Unit 0-00CFI. The removal of the (2) printing presses will result in a decrease in the facility's PTE; therefore, the facility is not subject to New Source Review or Part 231-2.2.

On 7/1/2017, the following two presses were removed from the facility:

P2 - Prestige 806 Press, 6-color (Emission Source 000P2 with corresponding Emission Point 00002.

P5 - CMF Omat 808 (first), 8-color (Emission Source 000P5 with corresponding Emission Point 00005.

The old RTO - The 10,000 CFM RTO ANGUIL ENV. SYSTEMS/100 Regenerative Thermal Oxidizer (Emission Control 00001) was removed on 1/10/2017, and was replaced with a new RTO (Emission Control 00008), which was installed on 1/10/2017 and began operating on 2/10/2017.

The two (2) flexographic printing presses and RTO in Emission Unit 0-00CFI to produce flexible packaging materials at this facility are:

P6 - Uteco Onyx 2687 Press, 8-color (Emission Source 000P6) with correspongin Emission Point 00006.

P7 - Uteco Onyx 2295 Press, 8-color (Emission Source 000P7), with corresponding Emission Point 00007.

Their corresponding RTO - 25,000 CFM ANGUIL ENV. SYSTEMS Model 250 RTO Regenerative Thermal Oxidizer (Emission Control 00008).

Both flexographic printing presses are 50 inches each and are with gas-fired dryers. Printing presses P6 and P7 are 8-color each. Their corresponding regenerative thermal oxidizer (RTO) operates under its seasonal variance (from March 1 thru October 31).

The facility is a major source of VOC, but a minor source of Hazardous Air pollutants (HAPs). HAPs emissions since Ren #1 was issued on 3/30/2007, on average amount to less than 3,000 pounds annually. Speciated HAPs and VOC emissions from combustion sources are minimal. The facility's NESHAP compliance is met by exemption as no individual HAP exceeds 10 TPY emissions and combined HAP emissions are less than 25 TPY. The VOC emissions are driven by the production-related printing operations and their subsequent emissions from the solvent-based printing inks and press cleaning materials that contain volatile organic compounds (VOC). The VOC emissions remains capped at 113.31 Tons/year. The annual facility VOC emissions have steadily decreased from 87.2 tons in 2016 to 49.5 tons in 2020 as summarized below:

Year	Actual VOC Emissions
2016	87.2
2017	68.0
2018	73.0
2019	54.0
2020	49.5

The Title V permit contains a complete listing of the applicable federal, state and compliance monitoring requirements for the facility, its emission units and emission points. This permit renewal does not add, remove or change in any way the applicable and pertinent regulations of the existing Title V permit, including record keeping and reporting requirements.

The facility's potential emissions for volatile organic compounds exceed the major source threshold for Title V applicability. As such, the facility is subject

to the permitting requirements stated in 6 NYCRR 201-6. The facility is subject to the provisions of 6 NYCRR 234. To comply with the requirements of 6 NYCRR 234-4(b) for its printing operations, the facility must follow record keeping/maintenance procedures of all the ink & solvent and HAP & VOC components of ink formulations purchased by the facility on a monthly basis. The facility is subject to 6 NYCRR 234-6, the proper handling, storage and disposal of VOC, and 6 NYCRR 234.7 for recordkeeping requirements. Also, the facility is subject to 6 NYCRR 234-8, limiting the opacity from Emission Unit 0-00CFI to a maximum of 10%, but graphic arts processes that are subject to 6 NYCRR 234 are exempt from the provisions of 6 NYCRR 212-1.4 (p). Emission Unit 0-00CFI is subject to 6 NYCRR 234-4(c), continuous monitors to measure the exhaust gas temperature of the incinerator and 6 NYCRR 234-4 (a), the VOC/solvent recovery and also 6 NYCRR 234-3(b)(1)(i), the incinerator must destroy at least 90% of the VOC emitted to the envirnment for an overall removal effeciency of at least 90 %. Finally, Emission Unit 0-00CFI is subject to variance for VOC under 6 NYCRR 234.3(h), the afterburner shutdown between November 1 and February 28. The facility will demonstrate that it is not subject to 40 CFR 63.829(d), printing and publishing NESHAP-recordkeeping by maintaining its emissions are below the 10 tons per year of any individual HAP and below the 25 tons per year of total HAPs based on a 12-month rolling average by maintaining records of all required measurements and emission calculations of individual HAP and total HAPs.

The facility operates other sources which are considered exempt from permitting in accordance with 6 NYCRR 201-3.2(c), including twelve (12) natural gas fired space heaters (each unit < 10 MM Btu/hr), one (1) ventillation system for flammable ink storage room, and seventeen (17) bag processing machines.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: STEPHEN A WATTS
47-40 21ST ST
LONG ISLAND CITY, NY 11101-5401

Authorized Signature: _____ Date: ___ / ___ / _____

Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS
****** General Provisions ******
For the purpose of your Title V permit, the following section contains state-only enforceable terms and conditions.
GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department
Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:
The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item3.2:
The permittee must submit a renewal application at least 180 days before the expiration of permits for Title V and State Facility Permits.

Item 3.3
Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be

submitted prior to actual transfer of ownership.

Condition 4: Permit modifications, suspensions or revocations by the Department
Applicable State Requirement: 6 NYCRR 621.13

Item 4.1:
The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

****** Facility Level ******

Condition 5: Submission of application for permit modification or renewal - REGION 2 HEADQUARTERS
Applicable State Requirement: 6 NYCRR 621.6 (a)

Item 5.1:
Submission of applications for permit modification or renewal are to be submitted to:

NYSDEC Regional Permit Administrator
Region 2 Headquarters
Division of Environmental Permits
1 Hunters Point Plaza, 4740 21st Street
Long Island City, NY 11101-5407

FEDERALLY ENFORCEABLE CONDITIONS

Renewal 4/FINAL ****** Facility Level ******

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS

The items listed below are not subject to the annual compliance certification requirements under Title V. Permittees may also have other obligations under regulations of general applicability.

Item A: **Public Access to Recordkeeping for Title V Facilities - 6 NYCRR 201-1.10 (b)**

The Department will make available to the public any permit application, compliance plan, permit, and monitoring and compliance certification report pursuant to Section 503(e) of the Act, except for information entitled to confidential treatment pursuant to 6 NYCRR Part 616 - Public Access to records and Section 114(c) of the Act.

Item B: **Timely Application for the Renewal of Title V Permits - 6 NYCRR 201-6.2 (a) (4)**

Owners and/or operators of facilities having an issued Title V permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

Item C: **Certification by a Responsible Official - 6 NYCRR 201-6.2 (d) (12)**

Any application, form, report or compliance certification required to be submitted pursuant to the federally enforceable portions of this permit shall contain a certification of truth, accuracy and completeness by a responsible official. This certification shall state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Item D: **Requirement to Comply With All Conditions - 6 NYCRR 201-6.4 (a) (2)**

The permittee must comply with all conditions of the Title V facility permit. Any permit non-compliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

Item E: **Permit Revocation, Modification, Reopening, Reissuance or Termination, and Associated Information Submission Requirements - 6 NYCRR 201-6.4 (a) (3)**

This permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and

reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Item F: **Cessation or Reduction of Permitted Activity Not a Defense - 6 NYCRR 201-6.4 (a) (5)**

It shall not be a defense for a permittee in an enforcement action to claim that a cessation or reduction in the permitted activity would have been necessary in order to maintain compliance with the conditions of this permit.

Item G: **Property Rights - 6 NYCRR 201-6.4 (a) (6)**

This permit does not convey any property rights of any sort or any exclusive privilege.

Item H: **Severability - 6 NYCRR 201-6.4 (a) (9)**

If any provisions, parts or conditions of this permit are found to be invalid or are the subject of a challenge, the remainder of this permit shall continue to be valid.

Item I: **Permit Shield - 6 NYCRR 201-6.4 (g)**

All permittees granted a Title V facility permit shall be covered under the protection of a permit shield, except as provided under 6 NYCRR Subpart 201-6. Compliance with the conditions of the permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that such applicable requirements are included and are specifically identified in the permit, or the Department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the major stationary source, and the permit includes the determination or a concise summary thereof. Nothing herein shall preclude the Department from revising or revoking the permit pursuant to 6 NYCRR Part 621 or from exercising its summary abatement authority. Nothing in this permit shall alter or affect the following:

i. The ability of the Department to seek to bring suit on behalf of the State of New York, or the Administrator to seek to bring suit on behalf of the United States, to immediately restrain any person causing or contributing to pollution presenting an imminent and substantial endangerment to public health, welfare or the environment to stop the emission of air pollutants causing or contributing to such pollution;

ii. The liability of a permittee of the Title V

facility for any violation of applicable requirements prior to or at the time of permit issuance;

iii. The applicable requirements of Title IV of the Act;

iv. The ability of the Department or the Administrator to obtain information from the permittee concerning the ability to enter, inspect and monitor the facility.

Item J: Reopening for Cause - 6 NYCRR 201-6.4 (i)

This Title V permit shall be reopened and revised under any of the following circumstances:

i. When additional applicable requirements under the act become applicable to a title V facility with a remaining permit term of three or more years, a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended by the department pursuant to the provisions of section 201- 6.6 of this Subpart.

ii. The Department or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

iii. The Department or the Administrator determines that the Title V permit must be revised or reopened to assure compliance with applicable requirements.

iv. If the permitted facility is an "affected source" subject to the requirements of Title IV of the Act, and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.

Proceedings to reopen and issue Title V facility permits shall follow the same procedures as apply to initial permit issuance but shall affect only those parts of the permit for which cause to reopen exists.

Reopenings shall not be initiated before a notice of such intent is provided to the facility by the Department at least thirty days in advance of the date that the permit

is to be reopened, except that the Department may provide a shorter time period in the case of an emergency.

Item K: **Permit Exclusion - ECL 19-0305**
The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

Item L: **Federally Enforceable Requirements - 40 CFR 70.6 (b)**
All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS SUBJECT TO ANNUAL CERTIFICATIONS AT ALL TIMES

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements at all times.

Condition 1: **Acceptable Ambient Air Quality**
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 200.6

Item 1.1:
Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where

contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

Condition 2: Fees
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (a) (7)

Item 2.1:
The owner and/or operator of a stationary source shall pay fees to the Department consistent with the fee schedule authorized by ECL 72-0303.

Condition 3: Recordkeeping and Reporting of Compliance Monitoring
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (c)

Item 3.1:
The following information must be included in any required compliance monitoring records and reports:

(i) The date, place, and time of sampling or measurements;

(ii) The date(s) analyses were performed;

(iii)The company or entity that performed the analyses;

(iv) The analytical techniques or methods used including quality assurance and quality control procedures if required;

(v) The results of such analyses including quality assurance data where required; and

(vi) The operating conditions as existing at the time of sampling or measurement.

Any deviation from permit requirements must be clearly identified in all records and reports. Reports must be certified by a responsible official, consistent with Section 201-6.2 of Part 201.

Condition 4: Records of Monitoring, Sampling, and Measurement
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (c) (2)

Item 4.1:
Compliance monitoring and recordkeeping shall be conducted according to the terms and conditions contained in this permit and shall follow all quality assurance requirements found in applicable regulations. Records of all monitoring data and support information must be retained for a period of at least 5 years from the date of the monitoring, sampling, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all

reports required by the permit.

Condition 5: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (c) (3) (ii)

Item 5.1:
The Compliance Certification activity will be performed for the Facility.

Item 5.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

To meet the requirements of this facility permit with respect to reporting, the permittee must:

Submit reports of any required monitoring at a minimum frequency of every 6 months, based on a calendar year reporting schedule. These reports shall be submitted to the Department within 30 days after the end of a reporting period. All instances of deviations from permit requirements must be clearly identified in such reports. All required reports must be certified by the responsible official for this facility.

Notify the Department and report permit deviations and incidences of noncompliance stating the probable cause of such deviations, and any corrective actions or preventive measures taken. Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. Where the underlying applicable requirement fails to address the time frame for reporting deviations, reports of deviations shall be submitted to the permitting authority based on the following schedule:

(1) For emissions of a hazardous air pollutant (as identified in an applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.

(2) For emissions of any regulated air pollutant, excluding those listed in paragraph (1) of this section, that continue for more than two hours in excess of permit requirements, the report must be made within 48 hours.

(3) For all other deviations from permit requirements,

the report shall be contained in the 6 month monitoring report required above.

(4) This permit may contain a more stringent reporting requirement than required by paragraphs (1), (2) or (3) above. If more stringent reporting requirements have been placed in this permit or exist in applicable requirements that apply to this facility, the more stringent reporting requirement shall apply.

If above paragraphs (1) or (2) are met, the source must notify the permitting authority by telephone during normal business hours at the Regional Office of jurisdiction for this permit, attention Regional Air Pollution Control Engineer (RAPCE) according to the timetable listed in paragraphs (1) and (2) of this section. For deviations and incidences that must be reported outside of normal business hours, on weekends, or holidays, the DEC Spill Hotline phone number at 1-800-457-7362 shall be used. A written notice, certified by a responsible official consistent with 6 NYCRR Part 201-6.2(d)(12), must be submitted within 10 working days of an occurrence for deviations reported under (1) and (2). All deviations reported under paragraphs (1) and (2) of this section must also be identified in the 6 month monitoring report required above.

The provisions of 6 NYCRR 201-1.4 shall apply if the permittee seeks to have a violation excused unless otherwise limited by regulation. In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets. Notwithstanding any recordkeeping and reporting requirements in 6 NYCRR 201-1.4, reports of any deviations shall not be on a less frequent basis than the reporting periods described in paragraphs (1) and (4) above.

In the case of any condition contained in this permit with a reporting requirement of "Upon request by regulatory agency" the permittee shall include in the semiannual report, a statement for each such condition that the monitoring or recordkeeping was performed as required or requested and a listing of all instances of deviations from these requirements.

In the case of any emission testing performed during the previous six month reporting period, either due to a request by the Department, EPA, or a regulatory requirement, the permittee shall include in the semiannual

report a summary of the testing results and shall indicate whether or not the Department or EPA has approved the results.

All semiannual reports may be submitted electronically or physically. Electronic reports shall be submitted using the Department's Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). Mailing addresses for the above referenced persons are contained in the monitoring condition for 6 NYCRR Part 201-6.4(e), contained elsewhere in this permit.

Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 6: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (e)

Item 6.1:
The Compliance Certification activity will be performed for the Facility.

Item 6.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

Requirements for compliance certifications with terms and conditions contained in this facility permit include the following:

i. Compliance certifications shall contain:
- the identification of each term or condition of the permit that is the basis of the certification;
- the compliance status;
- whether compliance was continuous or intermittent;
- the method(s) used for determining the compliance status of the facility, currently and over the reporting period consistent with the monitoring and related record keeping and reporting requirements of this permit;
- such other facts as the Department may require to determine the compliance status of the facility as

specified in any special permit terms or conditions; and
- such additional requirements as may be specified elsewhere in this permit related to compliance certification.

ii. The responsible official must include in the annual certification report all terms and conditions contained in this permit which are identified as being subject to certification, including emission limitations, standards, or work practices. That is, the provisions labeled herein as "Compliance Certification" are not the only provisions of this permit for which an annual certification is required.

iii. Compliance certifications shall be submitted annually. Certification reports are due 30 days after the anniversary date of four consecutive calendar quarters. The first report is due 30 days after the calendar quarter that occurs just prior to the permit anniversary date, unless another quarter has been acceptable by the Department.

iv. All annual compliance certifications may be submitted electronically or physically. Electronic reports shall be submitted using the Department's Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). The mailing addresses for the above referenced persons are:

Chief – Air Compliance Branch
USEPA Region 2 DECA/ACB
290 Broadway, 21st Floor
New York, NY 10007

The address for the RAPCE is as follows:

Regional Air Pollution Control Engineer
Hunters Point Plaza
47-40 21st Street
Long Island City, NY 11101-5407

The address for the BQA is as follows:

NYSDEC
Bureau of Quality Assurance

625 Broadway
Albany, NY 12233-3258

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 4/30/2023.
Subsequent reports are due on the same day each year

Condition 7: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 202-2.1

Item 7.1:
The Compliance Certification activity will be performed for the Facility.

Item 7.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Emission statements shall be submitted on or before April 15th each year for emissions of the previous calendar year. Statements are to be mailed to: New York State Department of Environmental Conservation, Division of Air Resources, Bureau of Air Quality Planning, 625 Broadway, Albany NY 12233-3251

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 0 days after the reporting period.
The initial report is due 4/15/2023.
Subsequent reports are due every 12 calendar month(s).

Condition 8: Recordkeeping requirements
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 202-2.5

Item 8.1:
(a) The following records shall be maintained for at least five years:

(1) a copy of each emission statement submitted to the department; and

(2) records indicating how the information submitted in the emission statement was determined, including any calculations, data, measurements, and estimates used.

(b) These records shall be made available at the facility to the representatives of the department upon request during normal business hours.

Condition 9: Open Fires - Prohibitions

Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 215.2

Item 9.1:
Except as allowed by Title 6 NYCRR Section 215.3, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item 9.2
Per Section 215.3, burning in an open fire, provided it is not contrary to other law or regulation, will be allowed as follows:
(a) On-site burning in any town with a total population less than 20,000 of downed limbs and branches (including branches with attached leaves or needles) less than six inches in diameter and eight feet in length between May 15th and the following March 15th. For the purposes of this subdivision, the total population of a town shall include the population of any village or portion thereof located within the town. However, this subdivision shall not be construed to allow burning within any village.
(b) Barbecue grills, maple sugar arches and similar outdoor cooking devices when actually used for cooking or processing food.
(c) Small fires used for cooking and camp fires provided that only charcoal or untreated wood is used as fuel and the fire is not left unattended until extinguished.
(d) On-site burning of agricultural wastes as part of a valid agricultural operation on contiguous agricultural lands larger than five acres actively devoted to agricultural or horticultural use, provided such waste is actually grown or generated on those lands and such waste is capable of being fully burned within a 24-hour period.
(e) The use of liquid petroleum fueled smudge pots to prevent frost damage to crops.
(f) Ceremonial or celebratory bonfires where not otherwise prohibited by law, provided that only untreated wood or other agricultural products are used as fuel and the fire is not left unattended until extinguished.
(g) Small fires that are used to dispose of a flag or religious item, and small fires or other smoke producing process where not otherwise prohibited by law that are used in connection with a religious ceremony.
(h) Burning on an emergency basis of explosive or other dangerous or contraband materials by police or other public safety organization.
(i) Prescribed burns performed according to Part 194 of this Title.
(j) Fire training, including firefighting, fire rescue, and fire/arson investigation training, performed under applicable rules and guidelines of the New York State Department of State's Office of Fire Prevention and Control. For fire training performed on acquired structures, the structures must be emptied and stripped of any material that is toxic, hazardous or likely to emit toxic smoke (such as asbestos, asphalt shingles and vinyl siding or other vinyl products) prior to burning and must be at least 300 feet from other occupied structures. No more than one structure per lot or within a 300 foot radius (whichever is bigger) may be burned in a training exercise.
(k) Individual open fires as approved by the Director of the Division of Air Resources as may be required in response to an outbreak of a plant or animal disease upon request by the commissioner of the Department of Agriculture and Markets, or for the destruction of invasive plant and insect species.
(l) Individual open fires that are otherwise authorized under the environmental conservation law, or by rule or regulation of the Department.

MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS SUBJECT TO ANNUAL CERTIFICATIONS ONLY IF APPLICABLE

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements only if effectuated during the reporting period. [NOTE: The corresponding annual compliance certification for those conditions not effectuated during the reporting period shall be specified as "not applicable".]

Condition 10: Maintenance of Equipment
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 200.7

Item 10.1:
Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications, required to operate such device effectively.

Condition 11: Recycling and Salvage
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-1.7

Item 11.1:
Where practical, the owner or operator of an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of the ECL.

Condition 12: Prohibition of Reintroduction of Collected Contaminants to the air
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-1.8

Item 12.1:
No person shall unnecessarily remove, handle or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

Condition 13: Exempt Sources - Proof of Eligibility
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-3.2 (a)

Item 13.1:
The owner or operator of an emission source or activity that is listed as being exempt may be

required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all records necessary for demonstrating compliance with this Subpart on-site for a period of five years, and make them available to representatives of the department upon request.

Condition 14: Trivial Sources - Proof of Eligibility
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-3.3 (a)

Item 14.1:
The owner or operator of an emission source or activity that is listed as being trivial in this Section may be required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all required records on-site for a period of five years and make them available to representatives of the department upon request.

Condition 15: Requirement to Provide Information
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (a) (4)

Item 15.1:
The owner and/or operator shall furnish to the department, within a reasonable time, any information that the department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the department copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to the administrator along with a claim of confidentiality, if the administrator initiated the request for information or otherwise has need of it.

Condition 16: Right to Inspect
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (a) (8)

Item 16.1:
The department or an authorized representative shall be allowed upon presentation of credentials and other documents as may be required by law to:

(i) enter upon the permittee's premises where a facility subject to the permitting requirements of this Subpart is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;

(ii) have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(iii) inspect at reasonable times any emission sources, equipment (including monitoring and air pollution control equipment), practices, and operations regulated or required under the permit; and

(iv) sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

Condition 17: Required Emissions Tests
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 202-1.1

Item 17.1:
For the purpose of ascertaining compliance or non-compliance with any air pollution control code, rule or regulation, the commissioner may require the person who owns such air contamination source to submit an acceptable report of measured emissions within a stated time.

Condition 18: Accidental release provisions.
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:40 CFR Part 68

Item 18.1:
If a chemical is listed in Tables 1,2,3 or 4 of 40 CFR §68.130 is present in a process in quantities greater than the threshold quantity listed in Tables 1,2,3 or 4, the following requirements will apply:

a) The owner or operator shall comply with the provisions of 40 CFR Part 68 and;

b) The owner or operator shall submit at the time of permit issuance (if not previously submitted) one of the following, if such quantities are present:

1) A compliance schedule for meeting the requirements of 40 CFR Part 68 by the date provided in 40 CFR §68.10(a) or,

2) A certification statement that the source is in compliance with all requirements of 40 CFR Part 68, including the registration and submission of the Risk Management Plan. Information should be submitted to:

Risk Management Plan Reporting Center
C/O CSC
8400 Corporate Dr
Carrollton, Md. 20785

Condition 19: Recycling and Emissions Reduction
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:40CFR 82, Subpart F

Item 19.1:
The permittee shall comply with all applicable provisions of 40 CFR Part 82.

The following conditions are subject to annual compliance certification requirements for Title V permits only.

Condition 20: Emission Unit Definition
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR Subpart 201-6

Item 20.1:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-00CFI
Emission Unit Description:
Emission Unit 0-00CFI consists of two (2) Central Impression Cylinder (CIC) flexographic printing presses that are used to print on polyethylene substrate. Each printing press is 50 inches and the emissions from each printing press (Emission Sources (0000P6 & 000P7) are ducted/directed commonly to a gas-fired catalytic oxidizer(Emission Control 00008) to destroy the VOC during the period from March 1 to October 31 yearly (ozone season - Process P01), operating under a seasonal variance from using the catalytic oxidizer between November 1 and February 28. The catalytic oxidizer is not operated during the remaining part of the year (November 1 to February 28) as per a variance granted under 6 NYCRR Part 234.3(h). When the catalytic oxidizer is not being used between November 1 and February 28 yearly (non-ozone season - Process P02), the emissions from each press (the same two presses) are bypassing the catalytic oxidizer and are individually vented through individual emission points directly to the atmosphere.
The two (2) flexographic printing presses and the Regenerative Thermal Oxidizer in Emission Unit 0-00CFI at this facility are:

P6 - Uteco Onyx 2687 Press, 8-color (Emission Source 000P6) with corresponding Emission Point 00006 ,

P7 - Uteco Onyx 2295 Press, 8-color (Emission Source 000P7) with corresponding Emission Point 00007, and

RTO - 25,000 CFM ANGUIL ENV. SYSTEMS Model 250 RTO (Emission Control00008) with corresponding Emission Point 00008.

Building(s): MAIN/ROOF

Condition 21: Progress Reports Due Semiannually
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (d) (4)

Item 21.1:
Progress reports consistent with an applicable schedule of compliance are to be submitted at least semiannually, or at a more frequent period if specified in the applicable requirement or by the department. Such progress reports shall contain the following:

(i) dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones or compliance were achieved; and

(ii) an explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

Condition 22: Operational Flexibility
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (f)

Item 22.1:
A permit modification is not required for changes that are provided for in the permit. Such changes include approved alternate operating scenarios and changes that have been submitted and approved pursuant to an established operational flexibility protocol and the requirements of this section. Each such change cannot be a modification under any provision of Title I of the Clean Air Act or exceed, or cause the facility to exceed, an emissions cap or limitation in the permit. The facility owner or operator must incorporate all changes into any compliance certifications, record keeping, and/or reporting required by the permit.

Condition 23: Non Applicable requirements
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 201-6.4 (g)

Item 23.1:
This section contains a summary of those requirements that have been specifically identified as being not applicable to this facility and/or emission units, emission points, processes and/or emission sources within this facility. The summary also includes a justification for classifying any such requirements as non-applicable.

6 NYCRR Part 212
Reason: Part 212 for Processes P01 and P02:

Part 212 is not applicable to this graphic arts facility
for Processes P01 & P02 because none of the VOCs emitted
by this facility were given an "A" rating. So, Part
212.1-4 (p) applies for the exception to Part 234.

Condition 24: Facility Permissible Emissions
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR Subpart 201-7

Item 24.1:
The sum of emissions from the emission units specified in this permit shall not equal or exceed the following
Potential To Emit (PTE) rate for each regulated contaminant:

CAS No: 0NY998-00-0 PTE: 226,620 pounds per year
Name: VOC

Condition 25: Capping Monitoring Condition
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR Subpart 201-7

Item 25.1:
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 231-2

Item 25.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 25.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 25.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 25.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 25.6:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 25.7:
Compliance Certification shall include the following monitoring:

Capping: Yes
Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
The sum of emissions from the emission units specified in this permit shall not equal or exceed the following.

The Total VOCs per year shall not exceed 226,620 pounds/year or 113.31 tons per year.

To demonstrate compliance, the facility is to record and keep ink and solvent purchases and/or usage records of all inks and solvents used monthly on a computer spread sheet, and perform a monthly and rolling 12-month total VOC calculations to demonstrate compliance with the 226,620 pounds/year or 113.31 tons per year limit.

The facility shall maintain the following records for each ink, cleaning solvent, and other VOC used in the printing process, on a monthly and yearly basis:

1. The brand and product name or code for the inks, thinners and solvents and any other material containing VOC.
2. The quantity of the inks, thinners and solvents and any other material containing VOC used during the calendar month and year.
3. The VOC content of the inks, thinners and solvents and any other material containing VOC.

In addition, copies of all purchase orders, invoices, and other documents for supplies and equipment that are used to support the monthly and the yearly log are to be kept on site. As specified in 6NYCRR Part 201-6.5(c)(3), NAP Industries, Inc. is required to include a statement in the semiannual report whether the monitoring and/or recordkeeping was performed as required or requested and a listing of instances of deviations from these requirements.

The facility should record the amount of VOC used and the emissions of VOC (taking into account the destruction

efficiency of the catalytic oxidizer) during the seasonal variance period and during the non- seasonal variance period. The VOC emissions can be calculated using the two following formulas:

During the seasonal variance period, when the catalytic oxidizer is not operational (Process P02), from November 1 through February 28):

Monthly VOC usage = the summation of [the % by weight of VOC in each product used X the amount used of each product containing VOC]

During the non- seasonal variance period, when the catalytic oxidizer is operational (Process P01), March 1 through October 31):

Monthly VOC usage = the summation of [the % by weight of VOC in each product used X the amount used of each product containing VOC] X [100 - % of the catalytic oxidizer's destruction efficiency/100]

An overall catalytic oxidizer's destruction efficiency of 90% for this facility shall be used for purposes of calculating HAPs and VOC emission when the control system is operating.

The facility will demonsttare compliance with the 113.31 tons per year VOCs cap by keeping monthly records of all VOCs used. The facility must keep records for a minimum of five years.

Parameter Monitored: VOC
Upper Permit Limit: 226620 pounds per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 26: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 202-2.1

Item 26.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-00CFI Emission Point: 00008
Process: P01 Emission Source: 00008

Emission Unit: 0-00CFI Emission Point: 00006
Process: P01 Emission Source: 000P6

Emission Unit: 0-00CFI Emission Point: 00007
Process: P01 Emission Source: 000P7

Item 26.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

To maintain 100 % capture efficiency, NAP Industries shall operate the Permanent Total Enclosure criteria outlined in 40 CFR 51, Appendix M. Method 24, at any time any printing press is operating.

This can be achieved or met by:

1. having the face velocity (FV) of air through all NDO's (natural draft opening) shall be at least 200 ft/min. The direction of all air flow through all NDO's shall be in the encolure measuring the FV (face velocity), or

2. having the process room be enclosed and under negative static pressure relative to the rest of the building, adequate to prevent the uncontrolled release of air prom the process room during all weather conditions. Negative pressure will be monitored via a differential pressure transmitter, or other technology acceptable to the Department, which will activate the sound of an alarm to alert nearby workers to remind them to close the door, and alert the facility's operator in the control room each time the negative pressure is compromised.

Reference Test Method: 40 CFR 51, Appendix M, Method 204
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 4/15/2023.
Subsequent reports are due every 12 calendar month(s).

Condition 27: Visible Emissions Limited
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 211.2

Item 27.1:
Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute

average) except for one continuous six-minute period per hour of not more than 57 percent opacity.

Condition 28: Once in, always in
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.1 (c)

Item 28.1:

A printing process that is subject to the provisions of Part 234 will remain subject to these provisions even if the emission of VOC from the facility or printing press later falls below the applicability criteria.

Condition 29: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.3 (h)

Item 29.1:
The Compliance Certification activity will be performed for the Facility.

Item 29.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The facility may shut down the natural gas fired afterburners, used to control emissions from printing processes subject to this Part, from November 1st through February 28th for the purposes of natural gas conservation. This does not excuse the facility from adhering to other emission limits included in this permit. The afterburners shall be returned to service (a) in order to ensure compliance with other permitted emission limits or (b) if the Department makes a determination that air quality is jeopardized.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 30: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.4 (a)

Item 30.1:

The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-00CFI Emission Point: 00008
Process: P01 Emission Source: 00008

Emission Unit: 0-00CFI Emission Point: 00006
Process: P01 Emission Source: 000P6

Emission Unit: 0-00CFI Emission Point: 00007
Process: P01 Emission Source: 000P7

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 30.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
When a printing process utilizes control equipment to comply with the provisions 6NYCRR Part 234, test methods acceptable to the Department must be used when demonstrating the overall removal efficiency.

(a) This demonstration may be performed by directly measuring VOC/solvent recovery and VOC/solvent usage rates where VOC/solvent recovery is the only control technique.

(b) For control equipment other than VOC/solvent recovery, this demonstration must include provisions to determine both the efficiency of the capture system and of the subsequent destruction and/or removal of these air contaminants by control equipment prior to their release to the atmosphere.

Manufacturer Name/Model Number: ANGUIL ENV. SYSTEMS Model 250 RTO
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 31: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.4 (a)

Item 31.1:
The Compliance Certification activity will be performed for the facility:

The Compliance Certification applies to:

Emission Unit: 0-00CFI Emission Point: 00008
Process: P01 Emission Source: 00008

Emission Unit: 0-00CFI Emission Point: 00006
Process: P01 Emission Source: 000P6

Emission Unit: 0-00CFI Emission Point: 00007
Process: P01 Emission Source: 000P7

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 31.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
At all times that any of the printing presses are in operation between March 1 and October 31, NAP Industries, Inc. shall satisfy the Permanent Total Enclosure requirement for the capture efficiency as specified in USEPA Method 204. The capture efficiency for VOC emissions from the printing operations is assumed to be 100% based on the results of the criteria test specified in Method 204 for Permanent Total Enclosures (PTE). A PTE is an enclosure that completely surrounds a source such that all volatile organic compound emissions are contained and directed to a control device. The Permanent Total Enclosures at the facility is the room containing the presses. The control device is a natural gas fired catalytic oxidizer which handles the emissions from all the printing presses from March 1 through October 31. The permit provides that all the presses in the press room are to be contained in a "total enclosure" as defined by USEPA guidelines and satisfy EPA Method 204 and that the emissions are controlled by the catalytic oxidizer. The facility is to operate under the same conditions as the conditions under which the stack testing was conducted. In accordance with the USEPA's "Guidelines for Determining Capture Efficiency" (1/9/95), an enclosure must meet certain criteria at all times during the printing operation to qualify as a Permanent Total Enclosure with 100% capture efficiency to assure the integrity of the total enclosure for the printing area, as follows:

(1) Any natural draft opening (NDO) must be at least 4 equivalent opening diameters from each VOC-emitting point. An "equivalent diameter" is the diameter of a circle that has the same area as the opening. The equation for equivalent diameter is specified in 40CFR51,

Appendix M, Method 204, "Criteria for the Verification of a Permanent or Temporary Total Enclosure". For a circular NDO, the equivalent diameter equals the diameter of the opening.

(2) The total area of all NDO's shall not exceed 5 percent of the surface area of the enclosure's walls, floor and ceiling.

(3) The average face velocity (FV) of air through all NDO's shall be at least 200 ft/min. The direction of air flow through all NDO's shall be into the enclosure.

(4) All access doors and windows whose areas are not included as NDO's and are not included in the calculation of FV shall be closed during routine operation of the printing process.

(5) All the exhaust gases from the enclosure are directed to the control device.

(6) Any doorways that are fitted with tightly overlapping vertical vinyl strips that extend to within a few inches of the floor shall be in place during routine operation of the printing process. The purpose of the barrier created by the hanging plastic strips and any other components of the enclosure (such as negative air pressure) to achieve 100 % capture efficiency is not compromised.

(7) The room is to be maintained at a negative static pressure relative to the rest of the building.
Method 204 specifies that If the Permanent Total Enclosure criteria are not met, then the capture efficiency must be measured.

(8) an operating parameter (e. g. pressure drop across the permanent enclosure) should be established during the stack test. This established pressure drop will be periodically monitored so the facility can demonstrate continuous compliance with the required 100 % capture efficiency. See related condition # 17 for 6 NYCRR 202-2.1.

To maintain 100% capture efficiency, the presses shall be operated at all times under the same conditions that were applied during the last performance of Method 204. All NDO's must be closed during printing presses operation except those NDOs which shall be enclosed with a plastic strip barrier. Any NDOs open during operation of the presses shall be considered a violation. If a violation occurs, the capture efficiency shall be measured based on

the conditions observed at the time of the violation and utilized in the facility-wide VOC emissions calculations to determine compliance with the VOC emissions.

The capture efficiency for the VOCs emitted during the printing process should be 100% based on permanent total room enclosure of the presses with negative room pressure in accordance with Method 204. Reasonable steps shall be taken to maximize the capture of VOC emissions from the VOC sources. Overall reduction shall be the combined efficiency of capture of VOC and destruction in the catalytic oxidizer. Therefore, the overall reduction in volatile organic compounds (VOC) emissions as a result of the catalytic oxidizer shall be no less than 90%. An overall catalytic oxidizer's destruction efficiency of 90% for this facility shall be used for purposes of calculating HAPs and VOC emissions reduction when the control system is operating.

NAP Industries, Inc. must prepare VOC emission records based on the monthly purchases. Monthly VOC emissions shall be calculated based on monthly purchases and/or usage of ink, solvents, thinners and other VOC containing products, the VOC content of the products, 100% capture efficiency, and the 90% destruction efficiency of the catalytic oxidizer. The monthly emissions shall be used to compute the annual facility-wide VOC emissions using a rolling 12-month period (current monthly emissions added to the sum of the VOC emissions from the previous 11 months) on a monthly basis.

The facility is to operate under the same conditions as the conditions under which the last stack testing was conducted.

Manufacturer Name/Model Number: ANGUIL ENV. SYSTEMS Model 250 RTO
Parameter Monitored: VOC
Lower Permit Limit: 100 percent
Reference Test Method: Method 204
Monitoring Frequency: Once every five years
Averaging Method: MINIMUM - NOT TO FALL BELOW STATED VALUE AT ANY TIME
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 32: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.4 (c)

Item 32.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-00CFI Emission Point: 00008
Process: P01 Emission Source: 00008

Emission Unit: 0-00CFI Emission Point: 00006
Process: P01 Emission Source: 000P6

Emission Unit: 0-00CFI Emission Point: 00007
Process: P01 Emission Source: 000P7

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 32.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Inspection and Maintenance of the Catalytic Oxidizer Bed:

The catalyst shall be visually inspected, at a minimum semi-annually, or as needed during scheduled maintenance shutdowns, for the presence of trash, physical impurities or deterioration or coating on the catalyst. The inspector shall look for areas of discoloration on the catalyst, buildup of deposits, or signs that an area is being bypassed by the airflow. Before performing any physical inspections within the combustion or catalyst chambers, the system must be allowed to cool down naturally to a temperature close to the ambient. Typical maintenance procedures for catalytic oxidizers include catalyst cleaning at intervals between three and twelve months. Cleaning is usually accomplished by blowing clean compressed air through the catalyst element, by vacuuming, or by washing the element with water or a mild detergent that does not contain phosphates. Any catalyst maintenance program should include periodic inspections and maintenance of the oxidizer burner and control equipment. The proper operation of the high temperature alarm and burner shutdown systems are essential to prevent thermal deactivation of the catalyst, in case a process upset or burner fault incident occurs. In order to avoid a loss of performance, the catalyst shall be sampled by the facility or by the catalyst manufacturerand then tested by the catalyst manufacturer when a degradation in catalyst activity occurs, to check for poisoning, coating or for the need for replacement.

Regarding the catalyst performance, any possible degradation in catalyst activity can be seen through a temperature rise or a pressure drop. The user should track down these values and investigate any observed changes. The unit provides a recording of the temperature rise and provides a warning when the pressure drops across the metal monolith. The catalyst shall be sampled by the facility or by the catalyst manufacturer and then tested by the catalyst manufacturer only when a difference in operational performance is established. Once the cause of performance is known, the best method of regenerating the catalyst can be established. The proper cleaning procedure(s) can remove contaminants from the catalyst and usually restore the catalyst activity. These records of inspection, maintenance sampling (when necessary) and analysis shall be maintained on-site in an orderly manner for five years and shall be available for NYSDEC review upon request.

Manufacturer Name/Model Number: ANGUIL ENV. SYSTEMS Model 250 RTO
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 33: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.4 (c)

Item 33.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-00CFI Emission Point: 00008
Process: P01 Emission Source: 00008

Emission Unit: 0-00CFI Emission Point: 00006
Process: P01 Emission Source: 000P6

Emission Unit: 0-00CFI Emission Point: 00007
Process: P01 Emission Source: 000P7

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 33.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL

DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

Any time that any of the flexographic printing presses is operating between March 1 and October 31, the catalytic oxidizer must be started and allowed to reach operating temperature (minimum of 550 degrees Fahrenheit) prior to starting the presses.

The inlet gas temperature to the bed of the catalytic oxidizer shall be monitored continuously in order to demonstrate compliance with Part 234. The pre-heat (inlet) temperature of the gas to the catalytic bed shall be maintained at no less than 550 degrees Fahrenheit and no more than 950 degrees Fahrenheit and the outlet gas temperature out of the bed of the catalytic oxidizer shall be maintained at no less than 550 degrees Fahrenheit at all times of operation at which compliance with Part 234 has been demonstrated by performance tests. The temperatures shall be continuously monitored, calibrated, and measured by a sensing device and recorded respectively according to the manufacturer's instructions and must be operated at all times that the catalytic oxidizer is operated which is whenever any of the printing presses are operating. Such records shall be maintained at the site and kept for a period of five years, and shall be presented upon request by Department representatives. The catalytic oxidizer must be operated from March 1 to October 31 as per Part 234.3(h). When and if required, during off-season (November 1 to February 28), the catalytic oxidizer will be activated and operated upon notification by NYSDEC or USEPA.

The exhaust gas temperature from all incinerators used to comply with 6NYCRR Part 234 shall be monitored continuously. The temperature of the exhaust gas shall not fall below the minimum temperature at which compliance with Part 234 has been demonstrated by performance test.

The continuous monitor which measures the inlet, the exhaust and the catalytic bed temperatures, shall be installed, periodically calibrated, operated, and continuously monitored according to the manufacturer's specifications, at all times the catalytic oxidizer is operting (between March 1 and October 31).

The facility shall comply with 6NYC 200.7 which requires the emission control device, the catalytic fume oxidizer, to be kept in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications, required to operate such

device effectively.

Manufacturer Name/Model Number: ANGUIL ENV. SYSTEMS Model 250 RTO
Parameter Monitored: TEMPERATURE
Lower Permit Limit: 550 degrees Fahrenheit
Upper Permit Limit: 950 degrees Fahrenheit
Monitoring Frequency: CONTINUOUS
Averaging Method: RANGE - NOT TO FALL OUTSIDE OF STATED RANGE AT ANY TIME
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 34: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.6

Item 34.1:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 34.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
An owner or operator of a facility subject to this Part shall not:

(a) Use open containers to store or dispose of cloth or paper impregnated with VOC or solvents that are used for surface preparation, cleanup or the removal of ink, coating or adhesive;

(b) Use open containers to store or dispose of spent or fresh VOC or solvents used for surface preparation, cleanup or the removal of ink, coating or adhesive;

(c) Use open containers to store, dispose or dispense ink, coating or adhesive unless production, sampling, maintenance or inspection procedures require operational access. This provision does not apply to the actual device or equipment designed for the purposes of applying an ink, coating or adhesive to a substrate.

Monitoring Frequency: DAILY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.

The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 35: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.7

Item 35.1:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 35.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

Purchase, use, and production records of ink, coating, adhesive, VOCs, solvent, fountain solution and cleaning material must be maintained in a format acceptable to the Department, and upon request, submitted to the Department. Any other information required to determine compliance with this Part must be provided to the Department in an acceptable format. Records must be maintained at the facility for five years.

The results of an analysis or other procedure used to establish compliance with this Part must be provided to the Department. Department representatives shall be permitted, during reasonable business hours, to obtain ink, coating, adhesive, cleaning material and fountain solution samples to determine compliance with this Part.

The owner or operator of a graphic art facility which is not subject to the control requirements of this Part because its annual potential to emit VOC or its total actual VOC emissions, whichever applies is below the applicability criteria, must maintain records in a format acceptable to the Department that verify the facility's annual potential to emit VOC or its total actual VOC emissions. Upon request, these records must be submitted to the Department.

Monitoring Frequency: MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 36: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:40CFR 63.829(d), Subpart KK

Item 36.1:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY100-00-0 TOTAL HAP

Item 36.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

NAP Industries, Inc. shall demonstrate that its emissions are below the 10 tons per year of any individual HAP and below the 25 tons per year of total HAPs based on a 12-month rolling average by maintaining records of all required measurements and emission calculations of individual HAP and total HAPs. This facility is a minor and not a major source of HAPs. However, this facility is a major source of VOC.

To demonstrate that this facility will continue to be a minor of HAP, the owner or operator shall maintain records of all required measurements and emissions calculations of individual HAP and total HAPs from all activities at the facility.

The facility should record the amount of HAPs used and the emissions of HAPs (taking into account the destruction efficiency of the catalytic oxidizer) during the seasonal variance period and during the non- seasonal variance period. The HAPs emissions can be calculated using the two following formulas:

During the seasonal variance period, when the catalytic oxidizer is not operational (Process P02), from November 1 through February 28):

Monthly HAPs usage = the summation of [the % by weight of HAPs in each product used X the amount used of each product containing HAPs]

During the non-seasonal variance period, when the catalytic oxidizer is operational (Process P01), from March 1 through October 31):

Monthly HAPs usage = the summation of [the % by weight of

HAPs in each product used X the amount used of each product containing HAPs] X [100 - % of the catalytic oxidizer's destruction efficiency/100]

An overall catalytic oxidizer's destruction efficiency of 90% for this facility shall be used for purposes of calculating HAPs and VOC emission when the control system is operating.

These records shall be kept on a monthly basis, and shall include the mass of all HAP-containing materials used during the month, and the mass fraction of HAP present in each HAP-containing material used. Please see the permit condition that is associated with 6 NYCRR 234.4(b) for keeping records of HAPs.

The facility shall maintain records of ink, thinner and solvent purchases and/or usages and HAP components on a monthly basis. HAP components of ink formulations will be recorded. Purchase and/or usage will be tracked and emissions will be recorded with and without add-on controls. An overall reduction efficiency of 90% shall be used for purposes of calculating HAP emission when the control system is operating. These records, including the calculations used to determine the emissions, shall be retained on site for a period of at least five years and shall be available for inspection by NYSDEC and/or USEPA inspectors during normal business hours.

The major source thresholds :

individual HAP: 10.0 tons per rolling 12-month period

total HAPs: 25.0 tons per rolling 12-month period

Monitoring Frequency: MONTHLY
Averaging Method: 12-MONTH TOTAL, ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

****** Emission Unit Level ******

Condition 37: Emission Point Definition By Emission Unit
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR Subpart 201-6

Item 37.1:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-00CFI

Emission Point: 00002
Height (ft.): 50 Diameter (in.): 46
NYTMN (km.): 4506.023 NYTME (km.): 587.633 Building: MAIN/ROOF

Emission Point: 00005 Removal Date: 07/01/2017
Height (ft.): 31 Diameter (in.): 18
NYTMN (km.): 4506.023 NYTME (km.): 587.633 Building: MAIN/ROOF

Emission Point: 00006
Height (ft.): 50 Diameter (in.): 46
NYTMN (km.): 4506.023 NYTME (km.): 587.633 Building: MAIN/ROOF

Emission Point: 00007
Height (ft.): 33 Diameter (in.): 34
NYTMN (km.): 4506.023 NYTME (km.): 587.633 Building: MAIN/ROOF

Emission Point: 00008
Height (ft.): 32 Diameter (in.): 18
NYTMN (km.): 4506.023 NYTME (km.): 587.633 Building: MAIN/ROOF

Condition 38: Process Definition By Emission Unit
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR Subpart 201-6

Item 38.1:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-00CFI
Process: P01 Source Classification Code: 4-05-003-11
Process Description:
Process P01 consists of two (2) flexographic printing presses (Emission Sources 00006 & 00007) in Emission Unit 0-00CFI that are used to print on packaging materials by applying solvent based inks to polyethylene sheeting. Each printing press is 50 inches and the emissions from the printing presses commonly duct/vent to a natural gas-fired catalytic oxidizer (Emission Control 00008). The catalytic thermal oxidizer (RTO) - Emission Control 00008 operates under a seasonal variance granted under 6 NYCRR Part 234.3(h) and is utilized between March 1 and October 31 each year (for 8-month period).

Normal operations include a 5-day work week during this period. The operating schedule calls for operation of 12 hours/day for Monday through Friday (60 hours). Total operating hours/week = 60 hours/week.

The two (2) flexographic printing presses and the RTO in Emission Unit 0-00CFI at this facility are:

P6 - Uteco Onyx 2687 Press, 8-color (Emission Source 000P6),

P7 - Uteco Onyx 2295 Press, 8-color (Emission Source 000P1), and

RTO - 25,000 CFM ANGUIL ENV. SYSTEMS Model 250 Regenerative Thermal Oxidizer (Emission Control 00008).

Emission Source/Control: 00008 - Control
Control Type: CATALYTIC AFTERBURNER WITH HEAT EXCHANGER

Emission Source/Control: 000P6 - Process
Design Capacity: 50 inches

Emission Source/Control: 000P7 - Process
Design Capacity: 50 inches

Item 38.2:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-00CFI
Process: P02 Source Classification Code: 4-05-003-11
Process Description:

Process P02 consists of the same two (2) flexographic printing presses (Emission Sources 00006 & 00007) used in Emission Unit 0-00CFI, are used between November 1 and February 28 yearly under a seasonal variance without the use of the catalytic oxidizer (Emission Control 00008). The printing presses are used to print on packaging materials by applying solvent based inks to polethylene sheeting. Each printing press is 50 inches and has its own individual emission point (Emission Points 00006 & 00007; respectively), and the presses commonly duct/vent to the individual emission point between November 1 and February 28. The catalytic oxidizer is not being used for a four-month period by bypassing the catalytic oxidizer and venting directly to the atmosphere between November 1 and February 28.

Normal operations include a 5-day work week during this period. The operating schedule calls for operation of 12 hours/day for Monday through Friday (60 hours). Total operating hours/week = 60 hours/week.

The two (2) flexographic printing presses in Emission Unit 0-00CFI at this facility are:

P6 - Uteco Onyx 2687 Press, 8-color (Emission Source 000P6), and

P7 - Uteco Onyx 2295 Press, 8-color (Emission Source 000P7).

Emission Source/Control: 000P6 - Process
Design Capacity: 50 inches

Emission Source/Control: 000P7 - Process
Design Capacity: 50 inches

Condition 39: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.4 (b)

Item 39.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-00CFI

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 39.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of a printing process subject to this Part must follow notification requirements and test procedures in Part 202-1 of this Title.

One of the following test methods from appendix A of 40 CFR 60 (see Table l, 6 NYCRR Part 200.9) must be used to measure the VOC concentration of a gas stream at the inlet and outlet of the control equipment:

(i) Method 18, Measurement of Gaseous Organic Compound Emissions by Gas Chromatography;

(ii) Method 25, Determination of Total Gaseous Non-methane Organic Emissions as Carbon; or

(iii) Method 25A, Determination of Total Gaseous Organic Concentration Using a Flame Ionization Analyzer.

(iv) Methods not listed above must be approved in advance by the Department and the United States Environmental Protection Agency.

Acceptable analytical methods for determining the VOC content, water content, density, volume of solids and weight of solids of surface coatings and printing inks are presented in appendix A, methods 24 and 24A (as appropriate), of 40 CFR 60 (see Table l, 6 NYCRR Part 200.9). Alternate analytical methods for surface coating and printing ink analysis must be approved by the Department and the United States Environmental Protection Agency. Instead of analytical methods, the Department may accept the manufacturer's certification of VOC content of ink coating or adhesives, if supported by actual batch records.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 40: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.8

Item 40.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-00CFI

Item 40.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
No person shall cause or allow emissions to the outdoor atmosphere having an average opacity of 10 percent or greater for any consecutive six-minute period from any emission source subject to 6 NYCRR 234.
NAP Industries, Inc. shall perform the following:

1) Observe each stack once per day while the presses are operating for visible emissions. These observations must be conducted during the daylight hours except during adverse weather conditions (fog, rain or snow).

2) The results of each observation must be recorded in a

bound logbook or other format acceptable to the Department. The following data must be recorded after each observation:

- weather conditions
- was a plume observed?

This logbook must be retained by the facility for five years after the date of the last entry.

3) If visible emissions are observed (other than steam - see below) on two consecutive days from a given stack(s), then a Method 9 analysis (based upon a six-minute mean) must be conducted for that stack(s) within two (2) business days of such occurrence. The results of the Method 9 analysis must be recorded in the logbook. The Regional Air Pollution Control Engineer must be contacted with one (1) business day of performing the Method 9 analysis if the opacity standard is contravened. Upon notification, any corrective action or further compliance schedules shall be presented to the Department for acceptance.

NOTE Steam plumes generally form after stack gases leave the top of the stack. This is referred to as a detached plume. The distance between the stack and the beginning of the plume may vary, however, there is normally a distinctive distance between the stack and the plume. Steam plumes are white in color and have a billowy consistency. Steam plumes dissipate within a short distance of the stack (the colder the air the longer the steam plume will last) and leave no dispersion trail downwind of the stack.

Parameter Monitored: OPACITY
Lower Permit Limit: 10 percent
Monitoring Frequency: DAILY
Averaging Method: 6-MINUTE AVERAGE (METHOD 9)
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 41: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.8

Item 41.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-00CFI

Item 41.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
A person shall not cause or allow emissions having an average opacity of 10 percent or greater for any consecutive six minute period from any emission source subject to this Part into the outdoor atmosphere.

Parameter Monitored: OPACITY
Upper Permit Limit: 10 percent
Monitoring Frequency: DAILY
Averaging Method: 6-MINUTE AVERAGE (METHOD 9)
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

Condition 42: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.3 (b) (1) (i)

Item 42.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-00CFI
Process: P01

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 42.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
A heat-set web offset lithographic printing process that uses ink, coating or adhesive containing VOC shall not operate if it: is located in a severe ozone non-attainment area; has an annual potential to emit VOC of 25 tons per year or more; or is located at a facility that has an annual potential to emit VOC of 50 tons per year or more, unless the control equipment provides for an overall removal efficiency of 90.0 percent or greater for control equipment that was first installed prior July 8, 2010.

Parameter Monitored: VOC
Lower Permit Limit: 90 percent reduction

Reference Test Method: Methods 18, 25 or 25A
Monitoring Frequency: Once every five years
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: ONCE / BATCH OR MONITORING OCCURRENCE

Condition 43: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.4 (a)

Item 43.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-00CFI
Process: P01

Item 43.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

Printing processes that use control equipment to comply with the provisions of Part 234 must test and monitor the control equipment to ensure the overall removal efficiency. Test methods included in this section must be used to demonstrate the overall removal efficiency.

(1) For control equipment that uses VOC/solvent recovery, overall removal efficiency must be demonstrated using methods described in paragraphs (b)(1) and (2) of 6 NYCRR Part 234.4.

(2) For control equipment other than VOC/solvent recovery, the chosen demonstration method must include provisions to determine the overall removal efficiency.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 44: Compliance Certification
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable Federal Requirement:6 NYCRR 234.4 (c)

Item 44.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-00CFI
Process: P01

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 44.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

Continuous control equipment monitors for the following parameters must be installed, periodically calibrated, and operated at all times that the associated control equipment is operated:

(1) Combustion zone temperature of all oxidizers;

(2) Inlet temperature at the catalytic oxidizer bed;

(3) Break-through of VOC on a carbon adsorption unit; and

(4) Any other continuous monitoring or recording device required by the Department.

Monitoring Frequency: CONTINUOUS
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2022.
Subsequent reports are due every 6 calendar month(s).

STATE ONLY ENFORCEABLE CONDITIONS
****** Facility Level ******

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency, as defined in 6 NYCRR subpart 201-2, constitutes an affirmative defense to penalties sought in an enforcement action brought by the department for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) an emergency occurred and that the facility owner or operator can identify the cause(s) of the emergency;
(2) the equipment at the facility was being properly operated and maintained;
(3) during the period of the emergency the facility owner or operator took all reasonable steps to minimize the levels of emissions that exceeded the emission standards, or other requirements in the permit; and
(4) the facility owner or operator notified the department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and any corrective actions taken.

(b) In any enforcement proceeding, the facility owner or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or malfunction provision contained in any applicable requirement.

Item B: **General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5**
Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all

criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS

The following conditions are state applicable requirements and are not subject to compliance certification requirements unless otherwise noted or required under 6 NYCRR Part 201.

Condition 45: Contaminant List
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable State Requirement:ECL 19-0301

Item 45.1:
Emissions of the following contaminants are subject to contaminant specific requirements in this permit(emission limits, control requirements or compliance monitoring conditions).

CAS No: 0NY100-00-0
Name: TOTAL HAP

CAS No: 0NY998-00-0
Name: VOC

Condition 46: Malfunctions and Start-up/Shutdown Activities
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable State Requirement:6 NYCRR 201-1.4

Item 46.1:
(a) The facility owner or operator shall take all necessary and appropriate actions to prevent the emission of air pollutants that result in contravention of any applicable emission standard during periods of start-up, shutdown, or malfunction.

(b) The facility owner or operator shall compile and maintain records of all equipment maintenance and start-up/shutdown activities when they are expected to result in an exceedance

of any applicable emission standard, and shall submit a report of such activities to the department when required by a permit condition or upon request by the department. Such reports shall state whether an exceedance occurred and if it was unavoidable, include the time, frequency and duration of the exceedance, and an estimate of the emission rates of any air contaminants released. Such records shall be maintained for a period of at least five years and made available for review to department representatives upon request. Facility owners or operators subject to continuous monitoring and quarterly reporting requirements need not submit additional reports of exceedances to the department.

(c) In the event that air contaminant emissions exceed any applicable emission standard due to a malfunction, the facility owner or operator shall notify the department as soon as possible during normal working hours, but not later than two working days after becoming aware that the malfunction occurred. In addition, the facility owner or operator shall compile and maintain a record of all malfunctions. Such records shall be maintained at the facility for a period of at least five years and must be made available to the department upon request. When requested by the department, the facility owner or operator shall submit a written report to the department describing the malfunction, the corrective action taken, the air contaminants emitted, and the resulting emission rates and/or opacity.

(d) The department may also require the facility owner or operator to include, in reports described under Subdivisions (b) and (c) of this Section, an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions.

(e) A violation of any applicable emission standard resulting from start-up, shutdown, or malfunction conditions at a permitted or registered facility may not be subject to an enforcement action by the department and/or penalty if the department determines, in its sole discretion, that such a violation was unavoidable. The actions and recordkeeping and reporting requirements listed above must be adhered to in such circumstances.

Condition 47: Air pollution prohibited
Effective between the dates of 06/15/2022 and 06/14/2027

Applicable State Requirement:6 NYCRR 211.1

Item 47.1:
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT-THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY

THIS INDENTURE, made as of the 3rd day of October, 2022

BETWEEN

NAP INDUSTRIES, INC.

With an address of: **667 Kent Avenue**
Brooklyn, New York 11249

party of the first part,

and

KENT AVE PROPERTY, LLC
with an address of: **1000 Gates Avenue, Suite 5,**
Brooklyn, New York 11221

party of the second part,

WITNESSETH, that the party of the first part, in consideration of $10.00 dollars paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in, the County of Kings, City of New York, State Of New York.

SEE SCHEDULE A ATTACHED HERETO.

"Being and intended to be the same premises conveyed to the party of the first part by the following:
By Deed from North Eleventh Corp. recorded on 11/13/1972 in Reel 594, Page 1120 (as to Lot 3); and By Deed from New York Job Development Authority recorded 08/28/1998 in Reel 4267, Page 1602 (As to Lot 15)"

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose. The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

LEGAL DESCRIPTION

As to Lot 3:

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at the corner formed by the intersection of the northeasterly side of Kent Avenue and the southeasterly side of Keap Street;

RUNNING THENCE northeasterly along the southeasterly side of Keap Street 227 feet 5 inches to land now or late of Robert Bach;

THENCE southeasterly along said land 143 feet 9 1/4 inches;

THENCE southwesterly parallel with Keap Street 227 feet 5 inches to the northeasterly side of Kent Avenue;

THENCE northwesterly along the northeasterly side of Kent Avenue 143 feet 9 1/4 inches to the corner, the point or place of BEGINNING.

NOTE: Being Block(s) 2197, Lot(s) 3, Tax Map of the Borough of Brooklyn, County of Kings.

As to Lot 15:

ALL that certain plot, piece or parcel of land, with the building and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at a point on the southeasterly side of Keap Street distant 80 feet southwesterly from the corner formed by the intersection of the said southeasterly side of Keap Street (70 feet wide) and southwesterly side of Wythe Avenue (70 feet wide):

RUNNING THENCE southeasterly and parallel with the southwesterly side of Wythe Avenue, 153 feet 8 inches to the line of land now or formerly of Barnett Johnson or a line in prolongation thereof;

THENCE southwesterly along said line of Barnett Johnson, on a line forming an interior angle of 80 degrees 33 minutes 2 seconds on its westerly side, 96 feet, 9 inches with the last mentioned course;

THENCE southerly to the northwesterly side of Hooper Street (70 feet wide) on a line drawn at right angles thereto 47 feet 1 inch;

THENCE southwesterly along the northwesterly side of Hooper Street, 21 feet;

THENCE northwesterly and at right angles to the northwesterly side of Hooper Street, 47 feet 3 inches to the said line of land now or formerly of Barnett Johnson;

THENCE southwesterly along the same, 19.69 feet (Deed: 19 feet 9 inches) to a point distant of 153 feet southeast of the southeasterly side of Keap Street when measured along a line drawn parallel with the northeasterly side of Kent Avenue and distant 227 feet 5 inches northeast thereof;

THENCE northwesterly along said line 9.18 feet, and again along same 143.79 feet (Deed: 153 feet) to the southeasterly side of Keap Street; and

THENCE northeasterly along the said southeasterly side of Keap Street, 145 feet, 7 inches to the point and place of BEGINNING.

NOTE: Being Block(s) 2197, Lot(s) 15, Tax Map of the Borough of Brooklyn, County of Kings.

NOTE: Lot and Block shown for informational purposes only.

Customer Registration Form for Water and Sewer Billing

Property and Owner Information:

(1) **Property receiving service: BOROUGH: BROOKLYN** **BLOCK: 2197** **LOT: 3**

(2) **Property Address: 667 KENT AVENUE, BROOKLYN, NY 11249**

(3) **Owner's Name:** **KENT AVE PROPERTY, LLC**

Additional Name:

Affirmation:

☑ Your water & sewer bills will be sent to the property address shown above.

Customer Billing Information:

Please Note:

A. Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges. Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, the property being placed in a lien sale by the City or Service Termination.

B. Original bills for water and/or sewer service will be mailed to the owner, **at the property address or to an alternate mailing address**. DEP will provide a duplicate copy of bills to one other party (such as a managing agent), however, any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her liability to pay all outstanding water and sewer charges. Contact DEP at (718) 595-7000 during business hours or visit www.nyc.gov/dep to provide us with the other party's information.

Owner's Approval:

The undersigned certifies that he/she/it is the owner of the property receiving service referenced above; that he/she/it has read and understands Paragraphs A & B under the section captioned "Customer Billing Information"; and that the information supplied by the undersigned on this form is true and complete to the best of his/her/its knowledge.
