# EXECUTIVE SUMMARY

Brussee Environmental Corporation (BEC) prepared this Phase I Environmental Site Assessment (ESA) for the commercial property located on the northern side of Atlantic Avenue, between Classon Avenue to the west, and Franklin Avenue to the east, in the Bedford Stuyvesant section of the Borough of Brooklyn, New York City, Kings County, New York (hereinafter the "subject property"). The subject property is identified by the street addresses of 1029-1035 Atlantic Avenue, and as Borough 3 – Block 2020 – Lot Nos. 86 and 89 on the New York City (NYC) tax maps.

The purpose of the Phase I ESA was to identify and evaluate the presence of recognized environmental conditions. Recognized environmental conditions are defied as (1) the presence of hazardous substances or petroleum products in, on or at the property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the property due to a release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. The work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-21 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule), and BEC's proposal for services.

BEC was able to establish a history for the property dating back to 1887. According to a review of NYC records, Sanborn maps, aerial photographs, historic city directories, and historic topographic maps, as well as personal interviews, the subject property was developed with several 1- and 2-story structures by at least 1888, including a stable, a carriage factory, a small office and multiple small outbuildings. By the late 1900s, western portions remained developed with a 2-story stable building. Eastern portions were developed with several interconnected 1- and 2-story structures identified as the Glidden Scaffolding & Rigging Co. By 1932, western portions were developed with a 2-story garage building. Eastern portions were developed with a 1-story building identified as a garage (west) and an auto sales & service facility (east). The west building occupied the entire footprint of its parcel, with a small rear yard/alleyway at the north side of the eastern building. s. By the early-1950s, the western parcel was developed with a 1-story auto service facility and the eastern building identified as a sign manufacturer. The west building was occupied by an auto repair and paint shop by the early 1960s and a toy manufacturer by 1965. By the mid-1970s, the west building was

occupied by an auto repair shop and the east building occupied by a warehouse. City directory listings revealed the western building was occupied by an auto service facility or muffler repair shop from the mid-1970s through 2020. Listings for the eastern building include auto repair shops, a sheet metal company and a restaurant equipment supply also from the 1970s through 2020.

The property is currently developed with two 1-story buildings, both with partial basements/utility rooms. The building on Lot No. 86 (1035 Atlantic Avenue) occupies the majority of the parcel footprint, with a small rear yard/alleyway and fronts south along Atlantic Avenue. The building on Lot No. 89 (1029 Atlantic Avenue) occupies the entire parcel footprint and also fronts south along Atlantic Avenue. Sidewalks are south of the property along Atlantic Avenue. The building at 1029 Atlantic Avenue is occupied by a Meineke Muffler Shop, and consists of a customer waiting area, an office, restrooms, a large garage/repair shop area, and several storage/utility rooms. The building at 1035 Atlantic Avenue is occupied by B&H Restaurant Equipment, and consists of an office area, restrooms, and a large warehouse area (divided into eastern and western portions).

Based on the results of the site inspection, records review and interviews, it was determined that there were two RECs identified for the subject property. RECs are those conditions, which could adversely affect the environmental integrity of the property. No controlled recognized environmental conditions (CRECs) or historical recognized environmental conditions (HRECs) were identified. The identified RECs are summarized below:

- Information obtained from various historic sources revealed that the subject property has historically been utilized for commercial/industrial purposes, including auto sales/service facilities, auto/auto body repair, garages, and various manufacturing operations. While no specific environmental issue was identified based upon a review of regulatory database records, there is a potential for historic operations at the subject property to have impacted the subsurface. Therefore, the historic use of the subject property, including the potential presence of out-of-service hydraulic vehicle lifts, is considered a REC.

- The eastern adjacent property (1045-1065 Atlantic Avenue) is listed on the NY BROWNFIELDS and several other regulatory agency databases. This property was historically utilized for various commercial/industrial uses, including auto repair, warehousing, petroleum delivery, auto painting,

Soil/fill materials were impacted with volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals. Groundwater and soil vapor were impacted with VOCs, Remediation and redevelopment of this property have been completed with the NYSDEC issuing a Notice of Completion in December 2024. Residual contamination is being addressed under a Site Management Plan (SMP) with engineering and institutional controls in-place. According to site personnel, several soil borings were reportedly conducted within the 1035 Atlantic Avenue building; however, no sampling data was provided. In addition, no sampling data specific to the subject property was identified during a review of documents available on the NYSDEC website. Although this property was issued a Certificate of Completion by the NYSDEC, given the documented presence of soil vapor impacts in close proximity to the subject property and the absence of soi vapor data for the subject property, there is a potential for soil vapor and indoor air at the subject property to be impacted by contaminants migrating from this property. As such, the eastern adjacent BROWNFIELDS site is considered a REC.

Based upon the above findings and conclusions, BEC recommends following:

- A geophysical survey (e.g., magnetometer and/or ground penetrating radar survey) should be conducted in the vicinity of the suspected hydraulic lift equipment (1029 Atlantic Avenue) to confirm their presence/location, as well as the configurations of existing underground utilities in advance of a soil boring program. Any identified geophysical anomalies should be further investigated through the excavation of test pits, with soil samples collected for laboratory analysis as warranted.

- To evaluate potential impacts related to the historic use of the subject property, including the suspect in-ground hydraulic lift equipment, and/or documented impacts associated with the eastern adjacent property (NY BROWNFIELDS site), a subsurface investigation should be performed. At a minimum, the investigation should include the installation of soil borings with the collection of representative samples for laboratory analysis to document subsurface conditions and determine the nature and extent of contamination (if present). Since the subject property also has an E-Designation for hazardous materials there is an option to conduct a due diligence Phase II or a more extensive investigation to satisfy the E-Designation requirements in conjunction with the re-development of the subject property.

In addition to the aforementioned RECs, BEC identified several environmental concerns (ASTM Non-Scope issues/Business Environmental Risks [BERs]) for the subject property. The environmental concerns/BERs and BEC's recommendations are summarized as follows:

- The subject property was listed on the E-Designation database as having E-HazMat and Noise restrictions (E-810), which were determined during the Atlantic Avenue Mixed-Use Plan Rezoning completed by the City in May 2025 (CEQR 24DCP019K). The E-designations require the issuance of a Notice to Proceed by the NYCOER before the property can be redeveloped. The presence of the E-Designation is considered a BER

- Fluorescent light ballasts were observed throughout both buildings, which based on the ages of the buildings, may contain polychlorinated biphenyls (PCBs). BEC recommends that a PCB survey be performed prior to demolition and/or renovation activities. Any PCB-containing equipment affected by the development of the site must be properly managed during demolition and/or renovation activities. In addition, while the disposal of non-leaking PCB ballasts is not currently regulated by the United States Environmental Protection Agency (USEPA), BEC recommends that the PCB ballasts be packaged in a lined, steel drum containing an absorbent material and disposed of as PCB-waste to reduce the potential for environmental contamination and potential liability for cleanup of any environmental release of PCBs from the ballasts.

- No suspect asbestos-containing materials were observed within accessible portions of the buildings during the inspection. However, due to the ages of the buildings, it is possible that roofing, roof flashing and other (inaccessible) building materials may contain asbestos.

  If activities in the buildings (i.e., renovation or demolition) will disturb any suspect asbestos material, then BEC recommends that an asbestos survey be performed to determine if ACMs are present prior to the proposed work. If ACMs are present, then a New York City (NYC) and New York State (NYS)-licensed contractor must be retained to remove the asbestos in accordance with federal, NYS and NYC regulations.

- Several small area of water-stained and damaged sheetrock were observed in the 1035 Atlantic Avenue building, which appear related to former roof leaks. No active water leaks or visible mold growth was observed.

  As future plans for the subject property are unknown, BEC provides the following recommendations: If the buildings are to be demolished, then no mold abatement is warranted at this time. However, if future plans include the use/renovation of the existing structures, then any evidence of mold should be cleaned and removed in accordance with the New York State Department of Health (NYSDOH) Guidelines on Assessment & Remediation of Fungi in Indoor Environments prior to occupancy. Finally, sheetrock/plaster, wood, and other water damaged building materials should be removed from the building and properly disposed.

# 1.0 INTRODUCTION

## 1.1 Purpose

This document is a Phase I Environmental Site Assessment (ESA) prepared to determine recognized environmental conditions (RECs) and/or potential environmental concerns (PECs) in connection with the commercial property located on the northern side of Atlantic Avenue, between Classon Avenue to the west, and Franklin Avenue to the east, in the Bedford Stuyvesant section of the Borough of Brooklyn, New York City, Kings County, New York (hereinafter the "subject property"). The subject property is identified by the street addresses of 1029-1035 Atlantic Avenue, and as Borough 3 – Block 2020 – Lot Nos. 86 and 89 on the New York City (NYC) tax maps (Figures 1 through 4). Representative site photographs are included in Appendix A.

## 1.2 Detailed Scope of Services

This Phase I ESA has been prepared in accordance with procedures established by environmental professionals and in concert with the guidance of regulatory agencies and funding institutions and American Society of Testing and Materials (ASTM) Practice E1527-21, inclusive of the United States Environmental Protection Agency (USEPA) "all appropriate inquiry" requirement published in the Federal Register on November 1, 2005. The USEPA "all appropriate inquiry" requirement establishes specific regulatory requirements for conducting all appropriate inquiries into the previous ownership, uses, and environmental conditions of a property for the purposes of qualifying for certain landowner liability protections under Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

The purpose of ASTM Practice E1527-21 is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of CERCLA and petroleum products. As such, the practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability; that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 U.S.C. §9601 (35)(B).

As stated in ASTM Practice E1527-21, the purpose of the Phase I ESA is to identify, to the extent feasible pursuant to the process established by ASTM Practice E1527-21, *"recognized environmental conditions in connection with the subject commercial parcel."*

The term *recognized environmental conditions*, as defined by ASTM Practice E1527-21 means*"...the (1) the presence of hazardous substances or petroleum products in, on or at the property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the property due to a release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."*

*"The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be de minimis are not recognized environmental conditions. A material threat is a physically observable or obvious threat which is reasonably likely to lead to a release that is threatening and might result in impact to human health and the environment."*

This Phase I Environmental Site Assessment, as required by ASTM Practice E1527-21, specifically consists of the following four components:

1. Records Review;
    a. Physical settings document review;
    b. Regulatory database records search;
    c. Local municipal agency records search; and
    d. Historic use records search.
2. Site Reconnaissance;
3. Interviews with Past and Present Owners and Occupants; and
4. Evaluation and Reporting.

As stated in Practice E1527-21, there may be environmental issues or conditions at the property, which may be requested by the user to be addressed as part of the Phase I ESA, which are not covered within the

scope of ASTM Practice E1527-21. The issues are referred to as non-scope considerations. The following is a list of non-scope considerations, which may be addressed, in a limited capacity within this Phase I Environmental Site Assessment:

- Radon;
- Lead-Based Paint;
- Asbestos-Containing Materials;
- Wetlands; and
- Mold and Water Damage.

## 1.3 Significant Assumptions

In preparation of the Phase I Environmental Site Assessment, it is assumed that information provided within the Environmental Database, regulatory agency records, municipal agency records, as well as information obtained from the user is accurate.

## 1.4 Limitations and Exceptions

The conclusions presented in this report are professional opinions based on the data described in this report. These opinions have been arrived at in accordance with currently accepted engineering and hydrogeologic standards and practices applicable to this location, and are subject to the following inherent limitations:

1. The data presented in this report are from visual inspections, examination of records in the public domain, and interviews with individuals having information about the subject property. The passage of time, manifestation of latent conditions, or occurrence of future events may require further exploration of the subject property, analysis of data, and re-evaluation of the findings, observations, and conclusions presented in this report;

2. The data reported, and the findings, observations, and conclusions expressed are limited by the scope of work and defined in ASTM Practice E1527-21. Any deviations from this scope are defined below. Furthermore, the scope of work was defined and developed pursuant to the request of the Client;

3. No warranty or guarantee, whether expressed or implied, is made with respect to the data reported, findings, observations, or conclusions. These are based solely upon site conditions in existence at the time of the investigation, and other information obtained and reviewed by Brussee Environmental Corporation (BEC);

4. BEC's Phase I ESA report presents professional opinions and findings of a scientific and technical nature. While attempts were made to relate the data and findings to applicable environmental laws and regulations, the report will not be construed to offer legal opinion or representations as to the requirements of, or compliance with, environmental laws, rules, or regulations, or policies of federal, state, or local government agencies. BEC does not assume liability for financial or other losses or subsequent damage caused by or related to any use of this document;

5. The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the purpose, site location, and project indicated. This report is not a definitive study of contamination at the subject property and should not be interpreted as such. An evaluation of subsurface soil and groundwater conditions was not performed as part of this investigation. As at any site, the actual condition of the groundwater and sub-surface soil cannot be determined without further investigation;

6. This report is based, in part, on information supplied to BEC by third-party sources. While efforts have been made to substantiate this third-party information, BEC cannot attest to the completeness or accuracy of information provided by others; and

7. The Phase I ESA practice does not include any testing or sampling of materials (e.g., soil, water, air, building materials).

## 1.5 User Reliance

This report was prepared in August 2025 by BEC at the request of Mr. Zelig Weiss representing AZW Realty, Inc., for use by AZW Realty, Inc., their legal and consulting representatives and other agents authorized to act on their behalf, in conjunction with the sale, lease, acquisition, or financing of the subject property. BEC assumes no liability for the use of this report by any person or entity other than those for which it was prepared.

# 2.0 SITE DESCRIPTION

## 2.1 Property and Address Location

The subject property consists of two contiguous tax parcels located on the northern side of Atlantic Avenue, between Classon Avenue to the west, and Franklin Avenue to the east, in the Bedford Stuyvesant section of the Borough of Brooklyn, New York City, Kings County, New York. The subject property is identified by the street addresses of 1029-1035 Atlantic Avenue (Figures 1 through 4).

### 2.1.1 Tax Map Number

The subject property is designated as Borough 3 – Block 2020 – Lot Nos. 86 and 89 on the NYC tax maps.

### 2.1.2 Acreage and Building Size

According to New York City Tax Maps, the subject property consists of three contiguous tax parcels, totaling 0.36-acre (15,704 square feet). The property is currently developed with two 1-story buildings, both with partial basements/utility rooms. The building on Lot No. 86 (1035 Atlantic Avenue) occupies the majority of the parcel footprint, with a small rear yard/alleyway, fronts south along Atlantic Avenue, and has an area of 7,800 gross square feet (SF). The building on Lot No. 89 (1029 Atlantic Avenue) occupies the entire parcel footprint, fronts south along Atlantic Avenue, and has an area of 7,735 gross SF. Sidewalks are south of the property along Atlantic Avenue.

### 2.1.3 Ownership

According to information maintained by the New York City Department of Finance, the current property owner is identified as 1029 Atlantic Ave. LLC (Lot No. 89) and 1035 Atlantic Ave. LLC (Lot No. 86).

### 2.1.4 Zoning

According to the City of New York Zoning Maps, the subject property is zoned for commercial (C6-3A) use (Figures 5A and 5B).

## 2.2 Current Occupancy and Property Use

The property is currently developed with the two aforementioned 1-story commercial buildings, both with partial basements/utility rooms. The building at 1029 Atlantic Avenue is occupied by a Meineke Muffler Shop, and consists of a customer waiting area, an office, restrooms, a large garage/repair shop area, and several storage/utility rooms. The building at 1035 Atlantic Avenue is occupied by B&H Restaurant

Equipment, and consists of an office area, restrooms, and a large warehouse area (divided into eastern and western portions).

# 3.0 USER PROVIDED INFORMATION

## 3.1 Title Records

As of the date of this report the Client did not engage BEC to perform a Chain of Title review nor was a Chain of Title provided for review.

## 3.2 Environmental Liens

An environmental lien is a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup or other remediation of hazardous substances or petroleum products upon a property, including, but not limited to, liens imposed pursuant to CERCLA 42 USC § 9607 (1) & 9607(r) and similar state and local laws. The user has not made BEC aware of any environmental liens against the subject property and has not requested that BEC perform an environmental lien search for the subject property.

## 3.3 Specialized Knowledge

The user has not made BEC aware of any specialized knowledge regarding the chemicals or processes formerly in use at the subject or surrounding properties.

## 3.4 Commonly Known or Reasonably Ascertainable Information

The user has not made BEC aware of any commonly known or reasonably ascertainable information regarding the past uses of the Subject property, specific chemicals in use at the Subject property or any spills, chemical releases, or environmental cleanups at the Subject property.

## 3.5 Valuation Reduction for Environmental Issues

The user has not made BEC aware of any valuation reduction regarding the sale price of the property.

## 3.6 Reason for Performing Phase I ESA

The Phase I ESA was performed to identify recognized environmental conditions at the subject property as part of the due diligence to support the acquisition/financing of the property by AZW Realty, Inc.

# 4.0 SITE GEOLOGY AND HYDROGEOLOGY

## 4.1 Topography and Site Characteristics

### 4.1.1 Elevation

The topography of the site and surrounding area was reviewed from the United States Geological Survey (USGS) 7.5-minute series topographic map for the Brooklyn, NY Quadrangle (Figure 4). The elevation of the subject property is approximately 79 feet above mean sea level (amsl). The subject property is relatively flat with the general topographic gradient sloping downward to the north-northeast.

### 4.1.2 Surface Water Bodies

There are no surface water bodies on or adjacent to the subject property. The nearest surface water is a small, unnamed pond within the Brooklyn Botanic Gardens, located approximately 0.8 mile to the south-southwest.

### 4.1.3 Soils

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining, and distributing soil survey information for privately owned lands in the United States. Soil maps, based on the State Soil Geographic (STATSGO) Database, are compiled by generalizing more detailed Soil Survey Geographic (SSURGO) database maps.

According to the STATSGO data, the soil component in the vicinity of the subject property is identified as Urban Land and is described as having a variable surface texture. The STATSGO database states that additional subordinate soil types may be present in the general vicinity of the subject property. These soil types are described as mainly loamy sand and silt loam. Deeper soil types consist of very gravelly, loamy sand, unweathered bedrock and stratified sandy loam.

Additional information regarding the soil classification is also included in on Page A-4 of the Environmental Data Resources, Inc. (EDR) database report (Appendix D).

## 4.2 Groundwater Characteristics

### *4.2.1 Depth to the Water and Groundwater Flow Direction*

Estimated groundwater levels and flow directions may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or de-watering operations. Generally, groundwater flow typically mimics surface topography and will also tend to flow towards nearby bodies of water. Information contained in the EDR database report, the USGS Water-Table and Potentiometric-Surface Altitudes in the Upper Glacial, Magothy and Lloyd Aquifers Beneath Long Island, March-April 2013 (Figure 6), the USGS web site and topographic map were used to estimate groundwater depth and flow direction.

Based upon a surface elevation of 79 feet amsl, the depth to groundwater in the vicinity of the subject property is approximately 65 feet below grade surface (bgs). Groundwater is expected to flow to the northeast, consistent with the regional trend.

A review of well data available from the USGS indicates that the nearest USGS monitoring well with groundwater measurement data (K97.1) is located approximately one-half mile north-northwest of the subject property. The well has an unspecified grade elevation and is screened in the Upper Glacial at a depth of 120 feet. A total of six groundwater measurements were collected from this well between May 1943 and April 1969. These data indicate the depth to groundwater fluctuated between -26.58 and 4.39 feet amsl.

## 4.3 Geology

According to the USGS Ground Water Atlas of the United States, New York region (1995) and the USGS Hydrogeologic Framework of Long Island, New York, the site is situated within the Coastal Plain physiographic province. The Coastal Plain physiographic province is characterized by layers of Cretaceous age sediments (primarily clay, sand, and gravel) overlying igneous and metamorphic rocks that crop out in Connecticut. The surface of these rocks slope to the southeast, and the overlying Coastal Plain sediments slope and thicken in the same direction. Quaternary glacial deposits (primarily outwash sand and gravel) cover the Coastal Plain sediments on Long Island to depths of as much as 600 feet. In the area of the site, bedrock is present at a depth of approximately 225 feet below grade and is overlain by the Jameco Aquifer, the Gardiners Clay, and Upper Glacial Aquifer, with the Lloyd Aquifer, Raritan Confining Unit, and Magothy Aquifer absent from the geologic sequence.

# 5.0 SITE HISTORY

## 5.1 Municipal Records Review

As the subject property is located in the Borough of Brooklyn, New York City, Kings County, on-line records searches were conducted or Freedom of Information Act (FOIA) requests were sent to the following agencies: New York City Department of Finance, New York City Registrar, New York City Department of Buildings, the New York City Fire Department, the New York City Department of Environmental Protection (NYCDEP), the New York City Department of Health (NYCDOH), and the New York State Department of Environmental Conservation (NYSDEC) requesting available regulatory information regarding the subject property. Regulatory agencies usually take six to eight weeks to process FOIA requests. Responses/information received to date are included in Appendix B. Any additional responses will be reviewed and forwarded upon receipt. As of the date of this report, the following information has been received:

**New York City Department of Finance**

The following is a summary of pertinent information obtained:

| | |
|---|---|
| Tax Lot: | Borough 3 – Block 2020 – Lot No. 86 |
| Address: | 1035 Atlantic Avenue |
| Owner: | 1035 Atlantic Ave. LLC |
| Lot Size: | 67.25 by 119 feet – irregular |
| Building Class: | E9 - Miscellaneous warehouse |
| Zoning: | Commercial (C6-3A) |

| | |
|---|---|
| Tax Lot: | Borough 3 – Block 2020 – Lot No. 89 |
| Address: | 1029 Atlantic Avenue |
| Owner: | 1029 Atlantic Ave. LLC |
| Lot Size: | 65 by 119 feet – irregular |
| Building Class: | G1 – All parking garages |
| Zoning: | Commercial (C6-3A) |

**New York City Department Buildings**

Computerized Property Profile Overviews (PPOs) available from the New York City Department of Buildings (NYCDOB) Building Information System (BIS) website were reviewed for information regarding the subject property. Pertinent information regarding the subject property is summarized below:

Lot No. 89 - BIN 3057589 – 1029 Atlantic Avenue

According to the PPO, six Actions are listed for this BIN: one alteration permit, dated in 1950, one building notice, dated in 1950; one Certificate of Occupancy (C/O), dated in 1932; one demolition permit, dated in 1932; one electric sign permit, dated in 1942; and one plumbing repair slip, dated in 1986. Review of the C/O revealed that the property was developed with a 1-story auto showroom and repair shop with a basement (1932).

No DOB violations or Environmental Control Board (ECB) violations are listed for this BIN.

Five Complaints are listed for this BIN. The Complaints, dated between January 1991 and May 2023, are related to renovation, plumbing, electrical and demolition work without permits. However, each of the Complaints is listed as closed/resolved.

One Job/Filing and no ARA/LAA jobs are listed for this BIN. A summary of the Job/Filing is provided with the DOB records in Appendix B.

Lot No. 86 - BIN 3057894 – 1035-1039 Atlantic Avenue

According to the PPO, 79 Actions are listed for this BIN: 18 alteration permits, one undated and the others dated in 1901, 1902 (4), 1903, 1906, 1908 (2), 1909 (2), 1910, 1911, 1912. 1943, 1962, and 1979; three building notices, dated in 1906 and 1910 (2); five C/Os, one undated and the others dated in 1905, 1907, 1908, 1910; 21 electric sign permits, dated in 1901, 1905, 1906, 1907 (2), 1909 (3), 1910 (4), 1912 (8), and 1923; one oil burner application, dated in 1904; five new building notices, one undated and the others dated in 1902 (2), 1904, and 1923; five plumbing permits, one undated and the others dated in 1902 (3), 1903, and 1906; two sprinkler permits, dated in 1906 and 1982; one unsafe building notice, dated in 1910; and 16 unknown/unspecified items, six undated and the others dated in 1903, 1904, 1914, 1919, 1922 (3), 1926, 1927, and 1928. A review of the C/Os revealed that the property was developed with a public and store

(1923), a 1-story retail tire store with a basement (1944), a 1-story auto repair shop. One of the C/OS available on the website was not associated with the subject property and another was illegible.

Two DOB violations and one ECB violation is listed for this BIN. Both of the listed DOB violations are identified as closed/resolved. The one open ECB violation, dated in May 2023, is related to construction work without permits. While the open/active violation does not appear to represent an environmental concern, action should be taken to resolve it with the appropriate agency.

Four Complaints are is listed for this BIN. The Complaints, each dated in May 2023, are related to plumbing, electrical demolition and construction work without permits. However, the Complaints are each listed as closed/resolved.

Seven Jobs/Filings and no ARA/LAA jobs are listed for this BIN. A summary of the Jobs/Filings is provided with the DOB records in Appendix B.

Lot No. 86 - BIN 3804523 – 1033 Atlantic Avenue

According to the PPO, 13 Actions are listed for this BIN: two alteration permits, dated in 1923 and 1978; two C/Os, dated in 1923 and 1944; five electric sign permits, dated in 1925 (2); 1934, 1940, and 1950); one new building notice, dated in 1923; one plumbing repair slip, dated in 1988; and two unknown/unspecified items, dated in 1923 and 1987.

No DOB violations, ECB violations, Complaints, Jobs/Filings or ARA/LAA jobs are listed for this BIN.

**New York City Fire Department**

Freedom of Information Law (FOIL) application FOIL applications were forwarded to the New York City Fire Department (FDNY) on August 20, 2025. Responses from the FDNY are pending.

**New York City Department of Health**

A FOIL application was forwarded to the New York City Department of Health (NYCDOH) on August 20, 2025. A response from this agency is pending.

**New York City Department of Environmental Protection**

A FOIL application was forwarded to the New York City Department of Environmental Protection (NYCDEP) on August 20, 2025. A response from this agency is pending.

## 5.2 Historical Resources Review

### 5.2.1 Sanborn Fire Insurance Map Review

EDR conducted a search of available Sanborn Fire Insurance Maps for the subject property and immediate surrounding area. Fire Insurance Maps were provided for the years 1887, 1888, 1904, 1906, 1908, 1915, 1926, 1932, 1938, 1950, 1951, 1962, 1963, 1965, 1969, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1985, 1986, 1987, 1988, 1989, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006. and 2007 (Appendix C). BEC's review of the Sanborn Maps is provided on the following table:

| Date | Comments |
|---|---|
| **1887-1906** | **Subject Property:** Shown as developed with several 1- and 2-story buildings, including a livery stable (west) a carriage factory, an office and several small outbuildings. The subject property is not depicted on the 1887, 1904 and 1906 maps.<br>**Surrounding Properties:** Dense, low-rise residential development is to the north, followed by Lefferts Place, with additional residences beyond. A horse shoer is to the west, followed by a carpenter's shop/residence, with a retail store, a stable and Classon Avenue beyond. Atlantic Avenue and railroad tracks are to the south, followed by residences and undeveloped land. A residence, a stable and a small outbuilding are to the east, followed by undeveloped land. Map coverage for 1887, 1904 and 1906 is limited to areas west of Classon Avenue. As such, adjacent properties are not depicted. |
| **1908-1926** | **Subject Property:** Western portions are developed with a 2-story private stable and two 1-story outbuildings. Undeveloped yard areas are north and east of the stable building. Eastern portions are developed several 1- ang 2-story structures. These building occupy the entire parcel footprint and are identified as the Glidden Scaffolding & Rigging Co. The subject property is not depicted on the 1915 and 1926 maps.<br>**Surrounding Properties:** Dense, low-rise residential development is to the north, followed by Lefferts Place, with additional residences beyond. A horse shoer is to the west, followed by retail stores, a hay & feed facility and a wagon shed, with Classon Avenue beyond. A church is to the west-northwest. Atlantic Avenue is to the south, followed by residences and a piano factory, A lumber storage yard is to the southeast. A residence and a furniture repair shop are to the east, followed by undeveloped land, with a candy factory and stable beyond. Map coverage for 1915 and 1926 is limited to areas west of Classon Avenue. As such, adjacent properties are not depicted. |

| | |
|---|---|
| **1932-1950** | **Subject Property:** The western portion of the property is developed with a 2-story garage building. The building occupies the entire parcel footprint with a ramp on the eastern side for access to the upper floor. Eastern portions are developed with a 1-story structure. This building occupies the majority of the parcel footprint, with a small rear yard area. The building is divided into two sections, a garage (west) and an auto sales & service facility (east). The subject property is not depicted on the 1938 and 1950 maps.<br><br>**Surrounding Properties:** Dense, low-rise residential development is to the north, followed by Lefferts Place, with additional residences beyond. N auto welding facility is to the west, followed by a battery service, with Classon Avenue beyond. A church is to the west-northwest. Atlantic Avenue is to the south, followed retail stores, the Brooklyn Radio Service Corp. and a piano factory. An auto sales & service facility and garage is to the east, followed by additional auto repair and sales facilities. The eastern adjacent building contains at least two underground gasoline tanks. Map coverage for 1938 and 1950 is limited to areas west of Classon Avenue. As such, adjacent properties are not depicted. |
| **1951-1969** | **Subject Property:** Western portions have been redeveloped with a 1-story commercial building. The building occupies the entire parcel footprint and is identified an auto service facility. Eastern portions of the property remain developed with the previously existing 1-story structure, which is now identified as occupied by a sign manufacturer. The western building is identified as an auto repair & painting shop on the 1962 map, and as a toy manufacturer on the 1965 map. The subject property is not depicted on the 1963 and 1969 maps.<br><br>**Surrounding Properties:** Properties to the north and south are shown generally consistent with their 1932 map depictions, except that western adjacent building (former welding shop) is now occupied by an auto glass shop. Atlantic Avenue is to the south, followed by a service station (southwest) and two 5-story retail store/loft buildings, with a dry-cleaning shop to the southeast. The eastern adjacent building is now occupied by the US Metal Products Co. (manufacturing). A retail store, storage buildings and auto repair shops are further to the east. The surrounding properties are not depicted on the 1963 and 1969 maps. |
| **1976-1981** | **Subject Property:** Developed generally consistent with the 1965 map depiction, except that the western building is occupied by an auto repair hop and the eastern building occupied by a non-specific warehouse. The subject property is not depicted on the 1981 map.<br><br>**Surrounding Properties:** Also shown generally consistent with their 1965 map depictions, except that the eastern adjacent building (former US Metal Products) is now occupied by Blue Foix Industries. Properties across Atlantic Avenue are shown as undeveloped beginning on the 1979 map, except for the service station to the south-southwest. The western adjacent building and the battery service further to the west are both identified as non-specific commercial uses beginning on the 1979 map. The surrounding properties are not depicted on the 1981 map. |
| **1982--1991** | **Subject Property:** Developed generally consistent with the 1980 map depiction. The subject property is not depicted on the 1985, 1986, and 1989 maps.<br><br>**Surrounding Properties:** Also shown generally consistent with their 1980 map depictions, except that n undeveloped lot is visible to the north. In addition, the eastern adjacent property is now shown as several 1-story office and non-specific commercial uses, with a parking lot to the north. Auto repair and auto body shops are further to the east. A small non-specific commercial use building is also visible across Atlantic Avenue to the south. The surrounding properties are not depicted on the 1985, 1986, and 1989 maps. |

| | |
|---|---|
| **1995-2007** | **Subject Property:** Developed generally consistent with the 1991 map depiction. The subject property is not depicted on the 1994 and 1996 maps.<br>**Surrounding Properties:** Also shown generally consistent with<br>**Surrounding Properties:** Also shown generally consistent with their 1991 map depictions, except that the two commercial buildings to the west are now identified as auto repair shops. A car wash is visible to the southeast across Atlantic Avenue, beginning on the 2001 map. The surrounding properties are not depicted on the 1994 and 1996 maps. |

The Sanborn maps did not identify the presence of gasoline or other storage tanks on the subject property; however, the maps from 1932 through 2007 revealed that the property was utilized as garages, auto sales/service, auto repair, and various manufacturing operations. Although the subject property is not listed on any regulatory agency databases indicative of hazardous western generation, petroleum/chemical storage or spills, except for a RCRA listing attributed to Con Edison, given the long-term auto repair/service and industrial/manufacturing use of the subject property, there is a potential for historic site operations to have impacted the subsurface. As such, BEC considers the historic use of the subject property to be a REC.

### 5.2.2 Historic Aerial Photograph Review

EDR conducted a search and provided copies of available historical aerial photographs showing the subject and surrounding properties. Aerial photographs were provided for the years 1924, 1951, 1954, 1961, 1966, 1974, 1976, 1980, 1984, 1991, 1994, 2002, 2006, 2011, 2015, and 2019 (Appendix C). However, given that the historical use of the site was established through a review of a Sanborn Maps, city directories and topographic maps, BEC determined that the historical use of the site has been properly assessed, and, therefore, the historic aerials were only briefly reviewed for evidence of significant differences and to fill in time gaps (if any).

The photographs do not show any evidence of historic water bodies, significant re-grading, mining, or historic dumping activities, which would indicate a potential environmental risk to the property. In addition, due to the long term, dense urban use of the subject property and surrounding areas, the aerial photographs did not provide significant details regarding potential environmental concerns at the site or surrounding properties.

### 5.2.3 Historic Topographic Map Review

BEC reviewed the 2023 Brooklyn, NY USGS topographic quadrangle map, as well as available historic topographic quadrangle maps provided by EDR. BEC's review of the topographic maps is provided on the following table:

| Date | Comments |
|---|---|
| **1897-1900** | **Subject Property:** Shaded black, indicating that the site is developed with one or more structures, consistent with the livery stable and carriage factory buildings depicted on the 1888 Sanborn maps (see Section 5.2.1).<br>**Surrounding Properties:** Properties to the north, south and west are shaded mostly black indicating they are densely developed with buildings. Narrow unshaded areas are in the center of most blocks to depict open yards. Properties to the east are unshaded (undeveloped). Atlantic Avenue is adjacent to the south, Classon Avenue is further to the west and Lefferts Place is further to the north. A railroad line is further to the east, with Franklin Avenue beyond. |
| **1947** | **Subject Property:** Shaded black, indicating that it is developed with one or more structures.<br>**Surrounding Properties:** Dense development (black shading) is to the north, followed by Lefferts Place, with dense development beyond. Dense development ius to the west, followed by Classon Avenue, with additional dense development beyond. Atlantic Avenue and railroad tracks are to the south, followed by dense development. Dense development is to the west, followed by a railroad line, with dense development and Franklin Avenue beyond. |
| **1956-1995** | **Subject Property:** Shaded pink to indicate dense, urban development, with no improvements depicted.<br>**Surrounding Properties:** Shaded pink to indicate dense, urban development, with no improvements depicted. Atlantic Avenue and railroad tracks are adjacent to the south, Classon Avenue is further to the west, and Lefferts Place is further to the north. A railroad (subway) track is further to the east, with Franklin Avenue beyond. The 1967 through 1995 maps also show a church to the west (east side of Classon Avenue). |
| **2013-2023** | **Subject and Surrounding Properties:** The 2013 through 2023 maps do not depict any buildings or other structures. Surrounding roads are visible, consistent with their current configuration. Schools are further to the northeast, northwest. and west-northwest. The 2016-2023 maps also show a railroad track along the south side of Atlantic Avenue, with another railroad line visible further to the east. |

BEC's historic topographic map review did not reveal evidence of recognized environmental conditions in connection with the site or adjoining properties.

### 5.2.4 Historical City Directory Search

EDR conducted a search and provided copies of available historical city directory listings for the subject and adjacent properties. The historical city directory listings (Appendix D) were reviewed, to identify information regarding past uses of the subject and surrounding properties to determine if historical usage represented a REC to the subject property. The listings for the subject property are summarized in the following table:

| Date | Comments |
|---|---|
| **1928** | **Subject Property:** J.J. Hart Ford Dealer (1029) and Raritan Truck Tire Service Station (1037) |
| **1934** | **Subject Property:** "Address not Listed in Research Source" |
| **1940** | **Subject Property:** LAD Service Corp. (1029) and J.J. Hart and Lincoln Salon (1035) |

| | |
|---|---|
| **1945** | **Subject Property:** Atlantic Pontiac Co. (1029); Willys Overland, Inc. and Lear & Mc Mahon (1033); and General Tire & Rubber Co. and Kings County General Tires (1035) |
| **1949** | **Subject Property:** General Tire & Rubber Co. (1035) |
| **1960** | **Subject Property:** Benson Service Auto Adjusters and Lyke Nu Auto Painters (1029); Broadway Storefront Co. (1033); and Isbet Signs (1035) |
| **1965** | **Subject Property:** Healthways and Stafford Enterprises (1029) and Isbet Signs (1035) |
| **1970** | **Subject Property:** "Address not Listed in Research Source" |
| **1973** | **Subject Property:** Isbet Signs (1035) |
| **1976** | **Subject Property:** Tilden Car Care Service Center (1029) |
| **1980** | **Subject Property:** Tilden Car Care Service Center (1029) and A to Z Auto Restorers (1035) |
| **1985** | **Subject Property:** Rich Lee Construction Corp. (1033) |
| **1992** | **Subject Property:** Meineke Discount Mufflers (1029); Deweese-Mellor Builders, Inc. (1033); Bergen Sheet Metal Manufacturing (1037); and the names of individuals |
| **1995** | **Subject Property:** Meineke Discount Mufflers (1029); Deweese-Mellor Builders, Inc. (1033); Bergen Sheet Metal Manufacturing (1037); and the names of individuals |
| **1997** | **Subject Property:** Meineke Discount Mufflers (1029); World Wide Classic Cars (1033); and the names of individuals |
| **2000** | **Subject Property:** Meineke Discount Mufflers (1029); World Wide Classic Cars (1033); and the names of individuals |
| **2005** | **Subject Property:** Meineke Car Care Center and Meineke Discount Mufflers (1029); Atlantic Restaurant Equipment (1035); and the names of individuals |
| **2010** | **Subject Property:** Meineke Car Care Center (1029) and Atlantic Restaurant Equipment (1035) |
| **2014** | **Subject Property:** Meineke Car Care Center (1029) and the names of individuals |
| **2017** | **Subject Property:** Meineke Car Care Center (1029) |
| **2020** | **Subject Property:** "Address not Listed in Research Source" |
| **2022** | **Subject Property:** Meineke Car Care Center (1029) and the names of individuals |

Note: Addresses shown in ( ) are on Atlantic Avenue unless noted otherwise.

BEC notes that the subject and nearby properties were identified as predominantly commercial/retail uses along the Atlantic Avenue corridor, with residential uses and various commercial/retail uses along adjacent roads since 1928, including auto repair shops, service stations, restaurants/groceries, knitting mills, cabinet shops, machine shops, religious and community organizations, and retail shops. Given the time of operation for these facilities and their potential prior use, the area cannot be confirmed of having no subsurface impacts; however, no specific operation or activity was noted that warrants additional investigation at this time. BEC notes that several of the adjacent/surrounding properties were listed on various regulatory databases indicating hazardous waste generation, petroleum storage and/or petroleum releases; however, these listings are further discussed in Section 6 where they were determined unlikely to present a significant environmental concern to the subject property, except for potential vapor intrusion concerns associated with the eastern adjacent

property (1045-1065 Atlantic Avenue).

### 5.2.5 Previous Environmental Site Assessments

No previous ESAs or information regarding previous environmental investigations/reports for the subject property were provided to BEC for review by the property owner or their representatives.

### 5.2.6 Environmental Liens or Activity and Use Limitations

A search was conducted for Activity and Use Limitations (AULs) associated with the subject property, more specifically Institutional Controls (ICs) and/or Engineering Controls (ECs), which have been placed upon the property because of environmental issues identified at the property. In the City of New York, information on such AULs is maintained by the City of New York Department of City Planning (NYCDCP) and is commonly depicted on zoning maps with an "E" designation, as well as maintained within Chain of Title Records. For a site to be designated with an "E" restriction, several criteria must be met. First, a property must be included within a designated re-zoning area, then the property must be identified as a "Potential" or "Projected" re-development property, and finally, the site must be listed on one or more environmental regulatory databases as listed in the ASTM standard, be adjacent to such a site, and/or have historical usage associated with hazardous materials with the potential to impact human health and/or the environment should a release have occurred. Sites with an "E" designation require additional investigation and/or remediation be performed to determine if the historical use of a property, typically manufacturing or chemical usage, have impacted the site. No change of use or development requiring a building permit will be issued for an "E" designated site without approval from the New York City Office of Environmental Remediation (NYCOER).
The search for environmental liens and AULs also included a review of information available from the New York City Department of Finance, New York City DOB, the EDR database report, City of New York Environmental Quality Review Requirement Declarations, City of New York Zoning maps, and the NYCDCP and NYCOER websites.

The City of New York Environmental Quality Review (CEQR) Requirement Declarations and City of New York Zoning maps and website, as well as the EDR database report, indicate that the subject property (all three parcels) is identified as having E-HazMat and Noise restrictions (E-810), which were determined during the Atlantic Avenue Mixed-Use Plan Rezoning completed by the City in May 2025 (CEQR 24DCP019K). The Hazardous Materials designation indicates that there is a potential for soil and groundwater beneath the subject property to be impacted by historic operations at the subject or adjacent properties. As such, the

property requires an environmental assessment and review by the NYCOER to determine if the current and/or historic use of the property has impacted the subsurface and if additional investigation/remediation is warranted. The Noise E-Designation requires that any future residential and/or commercial development must provide a closed-window condition with a minimum 31 decibels (dBA) window/wall attenuation on all facades. In order to maintain a closed-window condition, an alternative means of ventilation must also be provided.

The E-designation requires the issuance of a Notice to Proceed by the NYCOER before the property can be redeveloped. The presence of the E-Designations is considered a Business Environmental Risk (BER).

## 5.3 Summary of Site History

BEC was able to establish a history for the property dating back to 1887. According to a review of NYC records, Sanborn maps, aerial photographs, historic city directories, and historic topographic maps, as well as personal interviews, the subject property was developed with several 1- and 2-story structures by at least 1888, including a stable, a carriage factory, a small office and multiple small outbuildings. By the late 1900s, western portions remained developed with a 2-story stable building. Eastern portions were developed with several interconnected 1- and 2-story structures identified as the Glidden Scaffolding & Rigging Co. By 1932, western portions were developed with a 2-story garage building. Eastern portions were developed with a 1-story building identified as a garage (west) and an auto sales & service facility (east). The west building occupied the entire footprint of its parcel, with a small rear yard/alleyway at the north side of the eastern building. s. By the early-1950s, the western parcel was developed with a 1-story auto service facility and the eastern building identified as a sign manufacturer. The west building was occupied by an auto repair and paint shop by the early 1960s and a toy manufacturer by 1965. By the mid-1970s, the west building was occupied by an auto repair shop and the east building occupied by a warehouse. City directory listings revealed the western building was occupied by an auto service facility or muffler repair shop from the mid-1970s through 2020. Listings for the eastern building include auto repair shops, a sheet metal company and a restaurant equipment supply also from the 1970s through 2020.

The property is currently developed with two 1-story buildings, both with partial basements/utility rooms. The building on Lot No. 86 (1035 Atlantic Avenue) occupies the majority of the parcel footprint, with a small rear yard/alleyway and fronts south along Atlantic Avenue. The building on Lot No. 89 (1029 Atlantic Avenue) occupies the entire parcel footprint and also fronts south along Atlantic Avenue. Sidewalks are

south of the property along Atlantic Avenue. The building at 1029 Atlantic Avenue is occupied by a Meineke Muffler Shop, and consists of a customer waiting area, an office, restrooms, a large garage/repair shop area, and several storage/utility rooms. The building at 1035 Atlantic Avenue is occupied by B&H Restaurant Equipment, and consists of an office area, restrooms, and a large warehouse area (divided into eastern and western portions).

# 6.0 REGULATORY AGENCY DATABASE SEARCH

EDR was retained to provide a computerized database search of the project area within an ASTM-standard radius of the subject property. A list of the databases searched, and the search radius is shown on the summary table below. BEC reviewed the database output to determine if the property appears on any of the regulatory agency lists.

## 6.1 Federal Databases

| Listing Name or Database Searched | Abbreviation | Search Distance | Subject Property Listed? | No. of Sites within the Search Radius |
|---|---|---|---|---|
| National Priorities List Sites, including Proposed and Delisted Sites | NPL | 1.0 mile | No | 0 NPL<br>0 Proposed<br>0 Delisted |
| Superfund Enterprise Management System (SEMS) and SEMS Archive Sites | SEMS and SEMS-ARCHIVE | 0.5 mile | No | 0 SEMS<br>0 SEMS-ARCHIVE |
| Corrective Action Reports | CORRACTS | 1.0 mile | No | 0 |
| Federal Facility Site Information | FFSI | 1.0 mile | No | 0 |
| Resource Conservation and Recovery Act - Treatment, Storage and Disposal Facilities | RCRA-TSD | 0.5 mile | No | 0 |
| Resource Conservation and Recovery Act – Active and Former Hazardous Waste Generators | RCRA LQG/SQG/VSQG/ NonGen | Site & Adjoining | **Yes** | 1 LQG<br>0 SQG<br>0 VSQG<br>4 NonGen |
| Land Use Control Information System | LUCIS | 0.5 mile | No | 0 |
| Engineering Control Sites | USEC | Site | No | NA |
| Institutional Control Sites | USIC | Site | No | NA |
| Emergency Response Notification System | ERNS | Site | No | NA |
| Federal Brownfields Sites | US Brownfields | 0.5 mile | No | 0 |

The subject property was identified on the Resource Conservation and Recovery Act (RCRA) NonGen, ECHO, FINDS, and MANIFEST databases. These listings are summarized as follows:

*Federal Resource Conservation and Recovery Act (RCRA):* The site address was listed twice on the RCRA-NonGen database. A NonGen facility is a former registered/regulated generator which does not presently generate hazardous waste. These listings are summarized as follows:

- Con Edison Service Box 14843 (USEPA ID No. NYP004422606), 1037 Atlantic Avenue. This facility is listed as operating as a RCRA-VQG generator in January 2014. The facility was cross-referenced on the NY MANIFEST database, and is identified as generating lead wastes. No RCRA violations are listed. Based on this information and the absence of violations, there is no reported evidence in the database search to suggest that this listing presents an environmental concern.

*Facility Index System (FINDS) and Enforcement and Compliance History Information (ECHO) databases:* The FINDS database is a compilation of information contained in major and minor federal environmental databases. It contains some facility information but mostly provides leads to the individual databases or other sources that contain more information. The ECHO database integrates compliance and enforcement information for federally regulated facilities. Review of the FINDS and ECHO databases are not mandated by ASTM. The subject property's inclusion on the FINDS and ECHO databases is related to its inclusion on the RCRA database. Therefore, BEC concludes that the FINDS and ECHO listings are not expected to be a concern.

In addition to the federal databases included on the table above, over 30 additional federal databases were searched to determine if the subject and/or surrounding properties were listed. The subject property was not listed on the additional federal databases included in the EDR search report and no adjacent or surrounding listings were identified with the potential to represent an environmental concern to the subject property.

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the subject property:

Federal Resource Conservation and Recovery Act (RCRA): This database includes selective information on facilities which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). One of the listed RCRA sites are located adjacent to the subject property, and they are summarized below:

- 1065 Atlantic Ave LLC (ID No. NYR000260927), 1057 Atlantic Avenue, adjacent to the east, and hydraulically crossgradient of the subject property. This facility has operated as a RCRA-LQG since at least February 2023. This facility was cross referenced on the MANIFEST database and identified as generating lead wastes. No violations were identified for this facility, and there is no reported evidence in the database search to suggest that it represents a significant environmental concern to the subject property.

In addition, four RCRA-NonGen listings (Con Edison Service Box 14842, 1027 Atlantic Avenue; Vanco Environmental, 1045 Atlantic Avenue; Con Edison Brooklyn OPS, 1053 Atlantic Avenue; and Con Edison Service Box 14849, 1061 Atlantic Avenue) were identified for adjacent properties. A NonGen facility is a former registered/regulated generator which does not presently generate hazardous waste. Information provided within the EDR report indicates that there are no open/active violations for these facilities. Therefore, it is unlikely that these facilities represent a significant environmental concern to the subject property.

## 6.2 State Databases

| Listing Name or Database Searched | Abbreviat0ion | Search Distance | Subject Property Listed? | No. of Sites within the Search Radius |
|---|---|---|---|---|
| Inactive Hazardous Waste Disposal Sites, including De-listed Sites | SHWS | 1.0 mile | No | 2 SHWS<br>0 Delisted SHWS |
| Vapor Intrusion Legacy Site List | VAPOR | 1.0 mile | No | 0 |
| Hazardous Substance Waste Disposal Site | HSWDS | 0.5 mile | No | 0 |
| Solid Waste Facilities/Landfill Sites | SWF/LF | 0.5 mile | No | 4 |
| Registered Recycling Facility List | SWRCY | 0.5 mile | No | 0 |
| Registered Waste Tire Storage Facility List | SWTIRE | 0.5 mile | No | 0 |
| Leaking Underground Storage Tanks | LTANKS | 0.5 mile | No | 43 LTANKS |

**BEC notes that according to ASTM E 1527-21, Section 8.1.2.1, the search distance may be reduced at the discretion of the environmental professional. The potential to impact the site, including BEC's decision to reduce the search distances, was based on several factors including, but not limited to regulatory status by applicable agencies, medium impacted, distance from the site, historical use of the site and surrounding properties, estimated direction of groundwater flow, soil/geologic factors, urban setting, and other factors. In this case, there were no databases with reduced search distances.*

The subject property is identified on the E-Designation database. This listing is summarized as follows:

*NYC E-Designated Sites(E-DES):* The subject property (all three parcels) is listed on the E-Designation database as having an E-HazMat and Noise restrictions (E-810), which were determined during the Atlantic Avenue Mixed-Use Plan Rezoning completed by the City in May 2025 (CEQR 24DCP019K). The HazMat and Noise E-designations require the issuance of a Notice to Proceed by the NYCOER before the property can be redeveloped. The presence of the E-Designations is considered a BER (see Section 5.2.6).

In addition to the New York State (NYS) databases included on the table above, over, ten additional NYS databases were searched to determine if the subject and/or surrounding properties were listed. The subject property was not listed on the additional State databases included in the EDR search report and no adjacent or surrounding listings were identified with the potential to represent an environmental concern to the subject property.

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the subject property:

State Inactive Hazardous Waste Sites (SHWS): SHWS records are New York State's equivalent to the CERCLIS. These properties may or may not already be listed on the federal CERCLIS list. Priority sites

planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. These records come from the New York State Department of Environmental Conservation (NYSDEC). Two SHWS listings were identified within a one-half mile radius of the subject property, and they are summarized as follows:

- 517-523 Nostrand Avenue Site (ID No. 224376), 517-523 Nostrand Avenue, approximately 2,220 feet east and hydraulically crossgradient of the subject property. This property was historically utilized for various commercial purposes, including dry cleaning, and is underlain by 15 feet of urban fill. Prior investigations revealed that soil/fill materials are impacted with volatile and semi-volatile organic compounds (VOCs and SVOCs, PCBs, pesticides, and metals. Groundwater is impacted by VOCs, SVOCs and PFAS. Soil vapor is impacted by petroleum-related and chlorinated VOCs. The site is classified "P" indicating a potential SHWS, which is under review by the NYSDEC and New York State Department of Health (NYSDOH). Based on this information, its distance, presumed hydraulic gradient, and that the subject property and surrounding area is supplied potable water from a municipal source, it is unlikely that this facility represents a significant environmental concern to the subject property.

- 1104-1106 Bedford Avenue Site (ID No. 224257), 1104-1106 Bedford Avenue, approximately 2,550 feet north-northeast and hydraulically cross- to downgradient of the subject property. No additional information regarding this facility was available in the EDR report or the NYSDEC website, except that it is identified as a potential SHWS site and it is being managed by NYCOER. Based on the information in the database report, its distance in a dense urban area and the presumed hydraulic gradient, it is unlikely that this facility presents a significant environmental risk to the subject property.

Solid Waste Facilities/ Landfill Sites (SWF/LF): This database is an inventory of solid waste disposal facilities or landfills in New York State. Three SWF/LF listings were identified within a one-quarter mile radius of the subject property. These listings are summarized as follows:

- Atlantic Auto Sales, 1120 Atlantic Avenue, approximately 370 feet southeast and hydraulically crossgradient of the subject property. This facility is identified as an inactive vehicle dismantling facility with no violations.

- Grand Recycling Corp., 535 Grand Avenue, approximately 1,100 feet west-southwest and hydraulically cross- to upgradient of the subject property. This facility is identified as an inactive transfer station facility with no violations.

- Bergen Street Used Parts, Inc., 762-765 Bergen Street, approximately 1,580 feet west-southwest and hydraulically cross- to upgradient of the subject property. This facility is identified as an inactive vehicle dismantling facility with no violations.

- Parts Express II, Inc., 860-864 Atlantic Avenue, approximately 2,410 feet west and hydraulically crossgradient of the subject property. This facility is identified as an active vehicle dismantling facility with no violations.

Based on the information provided in the database report, their distances, and/or the presumed hydraulic gradient, these facilities are unlikely to represent a significant environmental concern to the subject property.

Leaking Underground Storage Tanks (LTANKS): Forty-three LTANKS listings were identified within a one-half mile radius of the subject property. Each of the 43 LTANKS sites listed in the database were issued letters of no further action by the NYSDEC, and there is no reported evidence in the database search which suggests that these sites are a significant environmental concern to the subject property. In addition, none of the properties with listed closed LTANKS incidents are located adjacent to the subject property.

Petroleum Bulk Storage – Tank Facility Listings (TANKS) and Underground and Aboveground Storage Tank Databases (PBS-UST/AST): Twenty-four PBS-UST, 29 PBS-AST, and two TANKS sites are listed in the database report. The inclusion on the PBS-UST/AST or TANKS databases means that a site has one or more registered underground/aboveground storage tank(s), regulated under regulated under 6 NYCRR Part 612 (NYSDEC Petroleum Bulk Storage) and/or the New York City Fire Department (FDNY). This database does not indicate leaks, spills, or other violations.

Three of the listed PBS-UST sites and two of the listed PBS-AST sites are located adjacent to the subject property. These listings are summarized as follows:

- 1045 Atlantic Avenue (PBS ID No. 2-603436), 1045-1057 Atlantic Avenue, adjacent to the east and hydraulically crossgradient. This facility is listed on both the PBS-UST and the PBS-AST databases and is identified as having two removed ASTs and four removed USTs. The tanks ranged in size from 270 to 3,000-gallons and contained No. 2 fuel oil, diesel fuel, and other, and were removed in 2023 and 2024 as part of a re-development project. This property was not cross-referenced on the LTANKS or NYSPILLS databases, as such it is unlikely to represent a significant environmental concern to the subject property.

- Bismillah Auto Repair (PBS ID No. 2-609720), 1064 Atlantic Avenue, adjacent to the southwest, across Atlantic Avenue, and hydraulically upgradient. This facility is listed on both the PBS-UST and the PBS-AST databases and is identified as having one 275-gallon steel UST containing waste oil, installed in 1987 and closed-in-place in 2009 and one 275-gallon steel AST containing waste oil, installed in 2009. This property was cross-referenced on the NYSPILLS database related to one closed spill incident. This spill is detailed below in the NYSPILLS sites section, where it was determined unlikely to represent a significant environmental concern to the subject property.

- SA Wassam Corp. (PBS ID No. 2-602128), 1062-1064 Atlantic Avenue, adjacent to the southwest, across Atlantic Avenue, and hydraulically upgradient. This facility is listed on the PBS-UST database and is identified as having four 4,000-gallon steel USTs containing gasoline, installed in 1972 (2) and 1984 (2) and one 275-gallon steel UST, containing waste oil, installed in 1974 and closed-in-place in 2009. This property was cross-referenced on the NYSPILLS database related to one closed spill incident. This spill is detailed below in the NYSPILLS sites section, where it was determined unlikely to represent a significant environmental concern to the subject property.

Voluntary Cleanup Program (VCP) Sites: VCP sites are those facilities where the property owner has to investigate and remediate the site. New York's VCP is a cooperative program for lenders, developers, and prospective purchasers to investigate and/or remediate contaminated sites and return them to productive use. Under the VCP, a volunteer performs remedial activities pursuant to one or more NYSDEC approved work plans and agrees to remediate the site to a level that is protective of public health and the environment for the present or intended use of the property. Investigation and remediation are conducted under oversight of the NYSDEC, and the New York State Department of Health (NYSDOH) and the volunteer pays the State's

oversight costs. When the volunteer completes work, a release from liability from the Department is provided with standard reservations.

Five VCP sites were identified within a one-eighth mile radius of the subject property. Four of the five sites have been remediated and redeveloped under NYCOER oversight and issued Notices of Satisfaction/Completion. As such, it is unlikely that these sites represent a significant environmental concern to the subject property. The remaining active VCP site is summarized as follows:

- 1034-1042 Atlantic Avenue Site (ID No. 23CVCP052K), 1034-1042 Atlantic Avenue, approximately 440 feet west-southwest and hydraulically cross- to upgradient of the subject property. Information obtained from the NYCOER website indicates this site was an undeveloped lot, proposed to be redeveloped with a 9- and interconnected 17-story mixed-use building with a basement. Soils at the property were impacted by semi-volatile organic compounds (SVOCs) and metals. Soil vapor was impacted by chlorinated volatile organic compounds (CVOCs). The proposed remedial action includes soil removal, and the installation of a composite cover system including a vapor barrier. Remediation and redevelopment are on-going. Based on the information in the database report, its remedial status, and/or the presumed hydraulic gradient, it is unlikely that this facility represents a significant environmental concern to the subject property.

Twenty-six additional VCP listings were identified between a one-eighth and one-half mile radius of the subject property. Based on the information in the database report, as well as that available from the NYCOER website, their distance, the presumed hydraulic gradient, and that the subject property and surrounding area is supplied potable water from a municipal source it is unlikely that these facilities represent a significant environmental concern to the subject property.

New York State Brownfields Sites (BROWNFIELDS): In New York State, a Brownfields site is any real property in the State, whose redevelopment or reuse may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant, except those properties which are listed as Class 1 or 2 in the Registry of Inactive Hazardous Waste Disposal Sites (Class 2 sites owned by a Volunteer are eligible until July, 1, 2005); sites on the USEPA NPL; hazardous waste treatment, storage, or disposal facilities (TSDFs) permitted under ECL §27-0901 ("interim status" facilities are eligible); sites subject to a cleanup order or Stipulation under Article 12 of the Navigation Law (oil spill prevention, control, and

compensation) or under Title 10 of ECL Article 17 (control of the bulk storage of petroleum); or sites subject to any on-going state or federal enforcement actions regarding solid/hazardous waste or petroleum.

Two BROWNFIELDS sites were identified within on-half mile of the subject property. These listings are summarized as follows:

- Atlantic Brooklyn Project (ID C203161), 1045-1065 Atlantic Avenue, adjacent to the east, and hydraulically crossgradient of the subject property. This property was historically comprised of five separate tax parcels and utilized for various commercial/industrial uses, including auto repair, warehousing, petroleum delivery, auto painting, Soil/fill materials were impacted with VOCs, SVOCs, and metals. Groundwater and soil vapor were impacted with VOCs, Remediation and redevelopment of this property have been completed with the NYSDEC issuing a Notice of Completion in December 2024. Residual contamination is being addressed under a Site Management Plan (SMP) with engineering and institutional controls in-place. According to site personnel, several soil borings were reportedly conducted within the 1035 Atlantic Avenue building; however, no sampling data was provided. In addition, no sampling data specific to the subject property was identified during a review of documents available on the NYSDEC website. Although this property was issued a Certificate of Completion by the NYSDEC, given the documented presence of soil vapor impacts in close proximity to the subject property and the absence of soi vapor data for the subject property, there is a potential for soil vapor and indoor air at the subject property to be impacted by contaminants migrating from this property. As such, the eastern adjacent BROWNFIELDS site is considered a REC.

- 1015 Atlantic (ID C224293), 1013-1015 Atlantic Avenue, approximately 210 feet west, and hydraulically crossgradient of the subject property. This property was historically utilized as a gasoline station and auto repair shop. Site soils were impacted by petroleum-related VOCs, SVOCs and metals. Minor soil vapor and groundwater impacts were also identified; however, there were no documented off-site impacts. The site was remediated and redeveloped and NYSDEC issued a Notice of Completion in December 2023. Based on the information in the database report, its distance and presumed hydraulic gradient, it is unlikely that this facility represents a significant environmental concern to the subject property.

NYCDCP Environmental Designation Sites (E-DES): Environmental "E" designation sites are those sites identified by the NYC Department of City Planning (DCP), which need to be evaluated to address potential issues related to hazardous materials, air quality and/or noise. This designation is typically associated with areas NYC has designated for re-development and/or re-zoning and ensure that sampling and remediation (if warranted) or other measures implemented at the property if demolition, excavation, and construction are proposed to be conducted.

Three types of E-DES listings (HazMat, Air and Noise) exist, although a property can be assigned multiple designations based on known or potential risks to redevelopment. However, only those with a HazMat designation are considered to present a concern based on their historic use/development (i.e., service station, dry cleaner, manufacturing facility, etc.). The HazMat designation indicates that projected and potential development of these sites requires an environmental assessment and review by the NYC Office of Environmental Remediation (NYCOER) to determine if the current and/or historic use of a property has impacted the subsurface and if additional investigation/remediation is warranted.

Forty-four E-DES listings were identified within a one-eighth mile of the subject property, five of which (1041, 1053, 1029, 1061, and 1065 Atlantic Avenue) are adjacent to the subject property. These sites each have E-Designations for Hazardous Materials and Noise. The Hazardous Materials Designation indicates that projected and potential development of this property requires the completion of an environmental assessment and review by the NYCOER to determine if the current and/or historic use of the property impacted the subsurface and if additional investigation and/or remediation is warranted. This designation does not indicate the presence of contamination, nor does it indicate the presence/potential presence of offsite impacts. Therefore, there is no information in the database report that indicates the E-DES listings represent a significant environmental concern to the subject property.

NYC Office of Environmental Remediation Sites (NYCOER): This database is a listing of those properties remediated under the oversight of the NYC Office of Environmental Remediation (OER) as part of either the E-Designation program or NYC VCP. The database includes sites that have been completed or are in-progress. Seven NYCOER sites were identified within a one-eighth mile radius of the subject property . Based upon a review of the information included in the database report and available from the NYCOER website, remediation has been completed at six of the seven facilities. The remaining active site (1034-1042 Atlantic Avenue) is located hydraulically crossgradient of the subject property. As such, there is no

information to indicate that this facility represents a significant environmental concern to the subject property (see VCP section above).

Eighty-one additional NYCOER listings were identified between one-eighth mile and one-mile from the subject property; however, based upon their distances in a dense urban area, the presumed hydraulic gradient, and/or that the site and surrounding area is supplied potable water from a municipal source, these facilities are unlikely to represent a significant environmental concern to the subject property.

Registered Drycleaning Facilities (DRYCLEANERS): Three DRYCLEANERS sites (Celene Cleaners, 1126 Fulton Street; Franklin Avenue Cleaners, 507 Franklin Avenue; and Crystal French Cleaners, 1192 Fulton Street) were listed within a one-quarter mile radius of the subject property. Each of these facilities is cross-referenced on the RCRA database as a current or former hazardous waste generator with no violations. In addition, each of these facilities is located hydraulically cross- to downgradient. Based on the information listed in the database report, their distances, the absence of violations, and/or the presumed hydraulic it is unlikely that these facilities represent a significant environmental concern to the subject property.

New York Spills Information Database (NYSPILLS): Thirty-three NYSPILLS listings were identified within a one-eighth mile radius of the subject property. Each of the 33NYSPILLS sites listed in the database were issued letters of no further action by the NYSDEC, and there is no reported evidence in the database search which suggests that these sites are a significant environmental concern to the subject property. One of the listed closed NYSPILLS are located adjacent to the subject property, and they are summarized as follows:

- Spill No. 10-01935 – Unknown Gas Station, 1064 Atlantic Avenue, adjacent to the southwest, across Atlantic Avenue, and hydraulically upgradient. This spill, which occurred on May 20, 2010, is related to the report of illegal dumping to on-site catch basins. No additional information is provided; however, the NYSDEC closed the spill on May 26, 2010.

## 6.3 Tribal Records and EDR Proprietary Databases

| Listing Name or Database Searched | Abbreviation | Search Distance | Subject Property Listed? | No. of Sites within the Search Radius |
|---|---|---|---|---|
| Indian Reservations | IRESERVE | 1.0 mile | No | 0 |

| | | | | |
|---|---|---|---|---|
| Indian Reservation - Leaking Underground Storage Tanks | ILTANKS | 0.5 mile | No | 0 |
| Indian Reservation - Registered Underground Storage Tanks | IUST | 0.25 mile | No | 0 |
| Indian Reservation – Voluntary Cleanup Program Sites | IVCP | 0.5 mile | No | 0 |
| Indian Reservation – Open Dump Inventory Sites | IODI | 0.25 mile | No | 0 |
| Manufactured Gas Plants | MGP/NY MGP | 1.0 mile | No | 0 |
| Historic Cleaners | HISTCL | Site & Adjoining | No | 0 |
| Historic Auto Stations | HISTAS | Site & Adjoining | No | 2 |

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the subject property:

Historical Auto Stations Database (HISTAS): The HISTAS database provides information compiled by EDR from multiple sources that identify potential sites historically occupied by a filling/gasoline/service station, auto repair shop, auto service station, etc. There are ten HISTAS listings in the database report, two of which (Consumers Auto Repair, 1064 Atlantic Avenue and Ultimate Auto Repair, 1066 Atlantic Avenue) are associated with adjacent properties. Ultimate Auto Repair is an auto repair/service station that reportedly operated under several names between 1969 and 1991. Consumers Auto Repair is also listed as an auto repair/service station that reportedly operated under several names between 1995 and 2014. This property is currently developed with a service station. Database listings for these addresses include PBS-UST/AST and one closed spill incident. These listings were previously summarized above, where they were determined unlikely to represent a significant environmental concern to the subject property.

## 6.4 Orphan Site Summary

The database report also includes four “orphan” sites, which are those properties where due to poor or inadequate address information the location of the property cannot be determined sufficiently for it to be included on the radius map. However, sites with similar street names or zip codes are summarized in the database report as these sites may present environmental risks to the subject property. BEC reviewed additional information available from EDR regarding this site, as well as available USEPA and NYS data and maps to determine if the orphan site presents a significant environmental risk to the subject property. The listed Orphan sites do not appear to represent an environmental concern to the subject property.

# 7.0 SITE RECONNAISSANCE

## 7.1 Site Inspection

BEC representative, Keith Butler, inspected the subject property on August 20, 2025, accompanied by Mr. Giancarlo Cugini of James Lang Lasalle (JLL), the property owner's representative. The Mr. Cugini provided a brief site history and other general site information.

## 7.2 Methodology and Limiting Conditions

Site reconnaissance included a visual inspection of the building interiors, exterior areas, building systems (HVAC, plumbing, electrical, etc.), the sidewalk areas immediately adjoining the property, and the exteriors of adjacent properties. No limiting conditions were encountered during the survey.

## 7.3 Site Description

The subject property consists of two contiguous tax parcels located on the northern side of Atlantic Avenue, between Classon Avenue to the west, and Franklin Avenue to the east, in the Bedford Stuyvesant section of the Borough of Brooklyn, New York City, Kings County, New York (hereinafter the "subject property"). The subject property is identified by the street addresses of 1029-1035 Atlantic Avenue, and as Borough 3 – Block 2020 – Lot Nos. 86 and 89 on the NYC tax maps (Figures 1 through 4).

The property is currently developed with two 1-story buildings, both with partial basements/utility rooms. The building on Lot No. 86 (1035 Atlantic Avenue) occupies the majority of the parcel footprint, with a small rear yard/alleyway, fronts south along Atlantic Avenue, and has an area of 7,800 gross SF. The building on Lot No. 89 (1029 Atlantic Avenue) occupies the entire parcel footprint, fronts south along Atlantic Avenue, and has an area of 7,735 gross SF. Sidewalks are south of the property along Atlantic Avenue. Site perimeters are bordered by the site and adjacent buildings, except for the rear yard/alleyway north of the 1035 Atlantic Avenue parcel which are enclosed with chain-link fencing.

The building at 1029 Atlantic Avenue is occupied by a Meineke Muffler Shop, and consists of a customer waiting area, an office, restrooms, a large garage/repair shop area, and several storage/utility rooms. The building at 1035 Atlantic Avenue is occupied by B&H Restaurant Equipment, and consists of an office area, restrooms, and a large warehouse area (divided into eastern and western portions). The basement areas for both buildings are small approximately 10 by 10-foot areas accessible via metal doors in the sidewalks south

of the respective buildings. The basements contain utility service connections, and the gas/electric meters. However, BEC notes that gas services to both buildings are reportedly disconnected. The buildings are accessible via roll-up garage doors (vehicle) leading from driveways along Atlantic Avenue. Pedestrian entrance doors also lead from Atlantic Avenue, with the 1035 Atlantic Avenue building also having a rear door leading to the northern yard/alleyway.

## 7.4 Utilities

Based upon information provided to KBEA and/or obtained during the site inspection, the following is a table of utilities supplied to the subject property and the names of the suppliers:

| Utility | Provider |
|---|---|
| Domestic Water | New York City Department of Environmental Protection (NYCDEP) |
| Sanitary Sewer | NYCDEP |
| Storm Sewer | NYCDEP |
| Electricity | Con Edison |
| Natural Gas | National Grid |

## 7.5 Surrounding Land Use

The subject property is located in a densely developed, mixed-use urban area of Brooklyn, known as Bedford Stuyvesant. The following surrounding land uses were observed during the Phase I ESA site inspection:

**North:** Several 3- and 4-story multi-family residences (160-172 Lefferts Place) and a NYC Parks Community Garden (162 Lefferts Place), followed by Lefferts Place, with low-rise retail development beyond.

**South:** Atlantic Avenue with Long Island Railroad tunnels below grade), followed by a service station and auto repair shop (1062-1064 Atlantic Avenue) and a tool rental facility and truck parking lot (1072 Atlantic Avenue), with a car wash to the southeast (1087 Pacific Street).

**East:** A 17-story mixed-use (commercial/retail and residential) building (1045-1065 Atlantic Avenue), followed by a NYC Transit Authority property (elevated C and S subway lines) Avenue), with commercial/retail development beyond.

**West:** A vacant 1-story commercial building (1027 Atlantic Avenue), followed by a 2-story warehouse building and a church, with Classon Avenue beyond.

## 7.6 Interviews

Mr. Giancarlo Cugini of JLL, the property owner's representative provided site access and was present during the site inspection. In addition, Mr. Cugini provided a brief site history and general site information. Pertinent statements made by Mr. Cugini are included throughout this report.

## 7.7 Summary of Environmental Site Features

### 7.7.1 Chemical Use and Storage

In addition, the antifreeze stored in the two 100-gallon ASTs, Meineke Muffler stores various quantities of moto oil, lubricating oils, car wash detergents, cleaners and other automotive fluids. The identified materials are stored in both the garage/repair shop area, with quantities ranging from retail size containers, five-gallon pails, and 30 and 55 gallon drums. These materials are consistent with normal auto repair operations.

Minor quantities of paints and typical household cleaning and maintenance chemicals were also observed within the storage and janitorial areas in both buildings. These materials are stored in retail-size containers and their storage is consistent with normal building cleaning and maintenance activities. The on-site storage of these materials is not considered a REC.

### 7.7.2 Hazardous and Non-Hazardous Waste Storage and Disposal

No evidence that regulated hazardous materials and/or hazardous wastes are generated, treated, stored, or disposed of at the subject property was observed on the date of the survey. However, the subject property was listed on the RCRA database under the name Con Edison, as a former hazardous waste generator. As detailed in Section 6.1, this listing is unlikely to represent a significant environmental concern to the subject property. Meineke Muffler are stored in one 250-gallon tote and several 55-gallon drums (within the eastern portion of the garage/repair shop). No secondary spill containment is provided for the tote/drum storage area. These wastes are collected by Safety Kleen or other licensed waste hauler on a periodic basis for offsite disposal/recycling. Meineke Muffler also generates waste tire which are stored within the northern portions of the garage/shop. The tires are removed by a private carter on an as needed basis for off-site disposal/recycling.

Solid wastes and recyclables generated onsite are temporarily stored in small trash dumpsters within each of the building. These wastes are placed curbside for collection by private carters for disposal offsite. No RECs associated with solid waste generation, storage, and disposal were identified on the subject property during the reconnaissance or through personnel interviews.

### 7.7.3 Underground and Aboveground Storage Tanks

Each of the site buildings are/were heated and supplied hot water by natural gas-fired. Natural gas service connections were observed in the sidewalk areas adjacent to each building. In addition, a ceiling-mounted gas heater was observed within both buildings; however, both building tenants stated that gas service to the buildings is currently disconnected.

Meineke Muffler maintains two approximately 100-gallon plastic ASTs within the northwestern portion of the shop area. These ASTs contain antifreeze.

No evidence of underground storage tanks (i.e., vent or fill pipes) were observed on the property at the time of the site inspection. The EDR database report did not identify any registered petroleum or chemical ASTs or USTs for the subject property, and there are no known spills/releases attributed to the subject property.

Additional information may be available in files maintained by the FDNY, NYCDEP and/or NYCOER, however, no responses to BEC's FOIL requests have been received to date. Any information received from these agencies will be reviewed upon receipt and pertinent information forwarded to the client.

### 7.7.4 Sanitary and Stormwater Disposal

The subject property is serviced by the NYC municipal sewer system.

Storm drains and floor drains that discharge directly to subsurface soils pose a potential environmental concern because they provide a pathway for impacts to the subsurface and are classified as Class V injection wells under the USEPA's Underground Injection Control (UIC) program. These structures are required to be properly closed or permitted to stay open.

No storm drains were observed on the property at the time of the site inspection. Storm water from the subject property drains to curbside drains along the adjacent roadways and infiltrates to the ground in unpaved areas. Curbside drains discharge to the NYC municipal sewer system.

Several floor drains were observed within the garage/repair shop and warehouse portions of both buildings. The floor drains reportedly discharge to the NYC municipal sewer system and, as such, would be exempt from UIC Program regulations. No chemicals are stored near the floor drains. No significant staining, corrosion, odors or other evidence of potential environmental impairment was observed around the floor drains.

### 7.7.5 Polychlorinated Biphenyls

Polychlorinated biphenyls (PCBs) were used until 1978 and are a group of compounds formed by the chlorination of biphenyl. PCBs have extremely high physical and chemical stabilities which led to their being used in many applications, including heat transfer fluids, hydraulic fluids, and dielectrics. PCBs are often found in transformers, capacitors, and hydraulic systems.

Electrical equipment containing PCBs are still in use and can pose a serious health hazard if fluids come in direct contact with humans, soil, or groundwater. Fires involving electrical equipment containing PCBs can cause the material to be dispersed over a large area and potentially expose many people to a health risk. Because of the health hazard associated with PCBs, they are regulated under the Toxic Substances Control Act (TSCA).

Fluorescent light ballasts were observed throughout both buildings, which based on the ages of the buildings, may contain PCBs. The disposal of leaking PCB ballasts is subject to federal regulations. No evidence of leakage associated with observed light ballasts was apparent as viewed from ground level. Based on the ages of the structure sand the potential for the fluorescent light ballasts to contain PCBs, the light ballasts are considered an environmental concern for the subject property.

The Meineke Muffler shop (1029 Atlantic Avenue) was equipped with five aboveground hydraulic electric vehicle lifts/alignment racks. No sub grade equipment (i.e., pistons or fluid reservoir tanks) were associated with these lifts. No evidence of spills/leaks was observed in the vicinity of the lifts at the time of the site inspection. Due to the reported age of these lifts, they are unlikely to utilize PCB-containing hydraulic fluids.

Inspection of the Meineke Muffler shop also reveled the presence of several square and rectangular features in the floor of the garage/repair shop areas possibly indicative of historic hydraulic lift pistons and other equipment. Hydraulic lifts pose a potential environmental concern because they typically have small (30-50 gallon) hydraulic fluid reservoirs (tanks) below grade. Typically, hydraulic lift tanks are not tightness tested. No information regarding the integrity of the tanks or soil conditions beneath the former lifts were provided of BEC for review. Therefore, the potential presence of underground hydraulic tanks represents a REC.

No hydraulic automotive lifts, electrical transformers, hydraulic elevators or other equipment suspected to contain PCBs were identified within the 1035 Atlantic Avenue building at the time of the site inspection.

### 7.7.6 Debris, Dumping and Surficial Staining

No evidence of chemical spills, stains or odors was observed on the property at the time of the site inspection. In addition, based on inspection observations and the review of historical and regulatory records, no evidence of landfills and/or direct burial activities was identified on or proximate to the subject property. However, as the subject property was formerly developed with multiple buildings, including stables, a carriage factory/office, a scaffolding company, a garage and multiple small outbuildings, there is a potential for fill materials to be present (utilized to backfill the foundations and/or basements of the former structures following their demolition). As no information regarding the nature or source of the fill materials was available for review, there is a potential for contaminated and/or structurally unsuitable fill materials to be present on the subject property. The potential presence of fill materials is considered a BER.

### 7.7.7 Stressed Vegetation

No stressed vegetation was present at the time of inspection.

### 7.7.8 Other Environmental Concerns

BEC also inspected the subject properties for evidence of the following potential environmental concerns:

| OTHER AREAS OF CONCERN | | |
|---|---|---|
| **Area of Concern** | **Not Observed** | **Observed** |
| Chemical/Petroleum Odors | X | |
| Pools of Liquid | X | |
| Stains or Corrosion | X | |

| Stressed Vegetation | X | |

# 8.0 NON-SCOPE CONSIDERATIONS

## 8.1 Radon

Radon is a colorless, radioactive, inert gas formed by the decay of radium and may be present in soils and rocks containing granite, shale, phosphate, and pitchblende. The USEPA's Map of Radon Zones for New York State, September 1993, indicates that the Brooklyn area is not a radon risk area. The EDR report provides information from the New York State Department of Health (NYSDOH) radon survey which indicates that 51 radon tests have been conducted in Kings County. Test results indicate average radon concentrations of 0.75 pCi/L (first floor level) and 1.37 pCi/L (basements). Data indicate that approximately two percent of basements tested showed results in excess of the 4.0 pCi/L USEPA action level.

Additional data (November 2024) obtained from the NYSDOH indicates that 505 basement radon tests have been conducted in Kings County, with average radon basement concentration of 2.08 pCi/L. Based on these data, radon is not likely to represent an environmental concern for the subject property.

## 8.2 Lead-Based Paint

In 1978, the U.S. Product Safety Commission issued a ban on paints or surface coatings that contain greater than 0.06 percent lead. A visual inspection of painted surfaces conducted during the site inspection indicated that interior paints within the buildings was in generally fair condition, with minor areas of chipping, peeling, well-worn or damaged paint. BEC notes that some areas within both buildings were unpainted. Exterior walls consisted of painted and unpainted brick. Exterior paints were good to fair condition. The lead content of the paints is unknown; however, due to the ages of the buildings, the presence of LBP is possible. Since the site improvements are currently utilized for commercial purposes, lead-based paint is not considered an environmental concern. In addition, the buildings are not subject to LBP testing and other requirements specified in NYC Local Law No. 1 for 2004. The disposal of lead paint waste resulting from renovation or demolition activities may be subject to federal and State regulations.

## 8.3 Asbestos-Containing Materials

Asbestos is the name given to a group of fibrous silicate minerals, typically those of the serpentine group. The tensile strength, flexibility, and non-flammability of asbestos have led to many uses including structural materials, brake linings, insulation, and pipe manufacture. Asbestos is of concern as an air pollutant because

when inhaled it may cause asbestosis, mesothelioma, and bronchogenic carcinoma. In 1989, the USEPA announced regulations that would phase out most uses of asbestos by 1996.

As part of the site inspection, a visual survey was conducted of accessible areas for the presence of suspect asbestos-containing materials (ACM). No suspect asbestos-containing materials were observed within accessible portions of the buildings during the inspection. BEC notes that most of the exposed pipes were either uninsulated or were insulated with fiberglass or foam rubber. However, due to the ages of the buildings, it is possible that roofing, roof flashing and other (inaccessible) building materials may contain asbestos. No sampling of suspect ACMs was conducted in coordination with this Phase I ESA.

Thermal insulation, surfacing materials, and vinyl/asphalt floor materials installed before 1981 are presumed to contain asbestos. The Occupational Safety and Health Administration (OSHA) asbestos standards (effective October 1995) require owners of commercial or industrial buildings (constructed before 1981) to identify potential asbestos hazards, keep records about potential asbestos hazards, post signs to warn of asbestos hazards, and communicate information about the hazards.

## 8.4 Wetlands

A review of the NYSDEC Freshwater Wetland Map, Brooklyn, NY Quadrangle, indicates that there are no NYS freshwater wetlands located within a one-mile radius of the subject property. BEC also reviewed NYSDEC Tidal Wetlands Maps available online. The tidal wetlands map indicates that there are no NYS tidal wetlands located within a one-mile radius of the subject property.

Potential federal wetlands were identified from the U.S. Fish and Wildlife Service (FWS) Wetlands Mapper software, which indicates that the nearest potential federal wetlands are located approximately 0.8 mile south-southwest of the subject property and associated with a small, unnamed pond within the Brooklyn Botanic Gardens. The wetlands are classified as PUBH wetlands, which are defined as palustrine water bodies with unconsolidated bottoms, which are permanently flooded. Additional information obtained from the FWS website is included in Appendix E.

Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRMs) were reviewed to determine if the subject property is located within the 100-year or 500-year flood zones. The FIRM showing

the property (No. 3604970212F) indicates that entire property is located outside the 100-year and 500-year flood zones. This indicates that there is a minimal risk of flooding at the subject property.

## 8.5 Mold and Water Damage

Concern about indoor exposure to mold has been increasing as the public becomes aware that exposure to mold can cause a variety of health effects and symptoms, including allergic reactions. Molds can be found almost anywhere; they can grow on virtually any organic substance, as long as moisture and oxygen are present. There are molds that can grow on wood, paper, carpet, foods, sheetrock, plaster, and insulation. When excessive moisture accumulates in buildings or on building materials, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed.

As part of this assessment, a visual inspection was conducted for the presence of water damage and odors, indicative of the potential for mold growth. Several small area of water-stained and damaged sheetrock were observed in the 1035 Atlantic Avenue building, which appear related to former roof leaks. No active water leaks or visible mold growth was observed.

## 8.6 Vapor Encroachment

As part of this assessment, BEC evaluated the potential for vapor encroachment into onsite structures following the general methodology outlined in ASTM E-2600-10 utilizing professional judgment. The Tier 1 screening assessment was employed to determine if a potential vapor encroachment condition (VEC) exists at the site. The site, adjoining properties and hydraulically upgradient properties were assessed for known or suspected contaminated facilities within approximate minimum search distances. A Tier 1 screening assessment generally consists of the following: a search distance test to identify if there are any known or suspected contaminated sites within the area of concern (AOC); a chemicals of concern (COC) test to determine if chemicals of concern exist at the known or suspected contaminated facilities and a plume test to determine whether or not COC in the contaminated plume may be within the critical distance (or AOC). The critical distance is defined as the linear distance in any direction from the nearest edge of the plume to the site. If the critical distance from the site to the nearest edge of a petroleum hydrocarbon plume is within 528 feet (1/10-mile) or within 1,760 feet (1/3-mile) for non-petroleum COC (e.g., trichloroethylene, perchloroethylene, etc.), then it is assumed that COC are within the AOC and a potential VEC exists, and additional screening may be necessary. The critical distance and AOC may be modified using professional judgment based on hydraulic gradient direction and contaminant plume width.

The decision to recommend additional screening, even if a potential VEC is determined by distance, is based on other criteria including existing and planned use of the property, type of structures potentially impacted, physical setting, hydraulic gradient, depth to groundwater, soil characteristics, activities in the surrounding area and the presence of natural or manmade conduits. Based on an evaluation of this collective criteria, the potential for a VEC from current and surrounding land use activities is considered moderate to high due to the long term manufacturing and auto repair/service use of the subject property and the documented soil vapor impacts associated with the eastern adjacent NY BCP site. The potential soil vapor intrusion risk is considered a REC and should be evaluated as part of a Phase II investigation. BEC notes that soil vapor sampling is a required part of the NYCOER E-Designation HazMat investigation program.

# 9.0 CONCLUSIONS AND RECOMMENDATIONS

This Phase I ESA has been prepared in conformance with the scope and limitations of ASTM Practice E1527-21 (inclusive of the USEPA all appropriate inquiry requirements) for the commercial property located on the northern side of Atlantic Avenue, between Classon Avenue to the west, and Franklin Avenue to the east, in the Bedford Stuyvesant section of the Borough of Brooklyn, New York City, Kings County, New York (hereinafter the "subject property"). The subject property is identified by the street addresses of 1029-1035 Atlantic Avenue, and as Borough 3 – Block 2020 – Lot Nos. 86 and 89 on the NYC tax maps. Any exceptions to, or deletions from, this practice are described in the section of the report entitled Limitations and Exceptions.

Based on the results of the site inspection, records review and interviews, it was determined that there were two RECs identified for the subject property. RECs are those conditions, which could adversely affect the environmental integrity of the property. No controlled recognized environmental conditions (CRECs) or historical recognized environmental conditions (HRECs) were identified. The identified RECs are summarized below:

- Information obtained from various historic sources revealed that the subject property has historically been utilized for commercial/industrial purposes, including auto sales/service facilities, auto/auto body repair, garages, and various manufacturing operations. While no specific environmental issue was identified based upon a review of regulatory database records, there is a potential for historic operations at the subject property to have impacted the subsurface. Therefore, the historic use of the subject property, including the potential presence of out-of-service hydraulic vehicle lifts, is considered a REC.

- The eastern adjacent property (1045-1065 Atlantic Avenue) is listed on the NY BROWNFIELDS and several other regulatory agency databases. This property was historically utilized for various commercial/industrial uses, including auto repair, warehousing, petroleum delivery, auto painting, Soil/fill materials were impacted with VOCs, SVOCs, and metals. Groundwater and soil vapor were impacted with VOCs, Remediation and redevelopment of this property have been completed with the NYSDEC issuing a Notice of Completion in December 2024. Residual contamination is being addressed under a Site Management Plan (SMP) with engineering and institutional controls in-place.

According to site personnel, several soil borings were reportedly conducted within the 1035 Atlantic Avenue building; however, no sampling data was provided. In addition, no sampling data specific to the subject property was identified during a review of documents available on the NYSDEC website. Although this property was issued a Certificate of Completion by the NYSDEC, given the documented presence of soil vapor impacts in close proximity to the subject property and the absence of soi vapor data for the subject property, there is a potential for soil vapor and indoor air at the subject property to be impacted by contaminants migrating from this property. As such, the eastern adjacent BROWNFIELDS site is considered a REC.

Based upon the above findings and conclusions, BEC recommends following:

- A geophysical survey (e.g., magnetometer and/or ground penetrating radar survey) should be conducted in the vicinity of the suspected hydraulic lift equipment (1029 Atlantic Avenue) to confirm their presence/location, as well as the configurations of existing underground utilities in advance of a soil boring program. Any identified geophysical anomalies should be further investigated through the excavation of test pits, with soil samples collected for laboratory analysis as warranted.

- To evaluate potential impacts related to the historic use of the subject property, including the suspect in-ground hydraulic lift equipment, and/or documented impacts associated with the eastern adjacent property (NY BROWNFIELDS site), a subsurface investigation should be performed. At a minimum, the investigation should include the installation of soil borings with the collection of representative samples for laboratory analysis to document subsurface conditions and determine the nature and extent of contamination (if present). Since the subject property also has an E-Designation for hazardous materials there is an option to conduct a due diligence Phase II or a more extensive investigation to satisfy the E-Designation requirements in conjunction with the re-development of the subject property.

In addition to the aforementioned RECs, BEC identified several environmental concerns (ASTM Non-Scope issues/Business Environmental Risks [BERs]) for the subject property. The environmental concerns/BERs and BEC's recommendations are summarized as follows:

- The subject property was listed on the E-Designation database as having E-HazMat and Noise restrictions (E-810), which were determined during the Atlantic Avenue Mixed-Use Plan Rezoning completed by the City in May 2025 (CEQR 24DCP019K). The E-designations require the issuance of a Notice to Proceed by the NYCOER before the property can be redeveloped. The presence of the E-Designation is considered a BER

- Fluorescent light ballasts were observed throughout both buildings, which based on the ages of the buildings, may contain PCBs. BEC recommends that a PCB survey be performed prior to demolition and/or renovation activities. Any PCB-containing equipment affected by the development of the site must be properly managed during demolition and/or renovation activities. In addition, while the disposal of non-leaking PCB ballasts is not currently regulated by the USEPA, BEC recommends that the PCB ballasts be packaged in a lined, steel drum containing an absorbent material and disposed of as PCB-waste to reduce the potential for environmental contamination and potential liability for cleanup of any environmental release of PCBs from the ballasts.

- No suspect asbestos-containing materials were observed within accessible portions of the buildings during the inspection. However, due to the ages of the buildings, it is possible that roofing, roof flashing and other (inaccessible) building materials may contain asbestos.

  If activities in the buildings (i.e., renovation or demolition) will disturb any suspect asbestos material, then BEC recommends that an asbestos survey be performed to determine if ACMs are present prior to the proposed work. If ACMs are present, then a NYC and NYS-licensed contractor must be retained to remove the asbestos in accordance with federal, NYS and NYC regulations.

- Several small area of water-stained and damaged sheetrock were observed in the 1035 Atlantic Avenue building, which appear related to former roof leaks. No active water leaks or visible mold growth was observed.

  As future plans for the subject property are unknown, BEC provides the following recommendations: If the buildings are to be demolished, then no mold abatement is warranted at this time. However, if future plans include the use/renovation of the existing structures, then any evidence of mold should be cleaned and removed in accordance with the New York State Department of Health (NYSDOH)

Guidelines on Assessment & Remediation of Fungi in Indoor Environments prior to occupancy. Finally, sheetrock/plaster, wood, and other water damaged building materials should be removed from the building and properly disposed.

# 10.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

This Phase I ESA has been prepared in accordance with procedures established by environmental professionals and in concert with the guidance of regulatory agencies and funding institutions, ASTM Practice E1527-21, inclusive of the USEPA "All Appropriate Inquiry" requirement published in the Federal Register on November 1, 2005. The USEPA "All Appropriate Inquiry" requirement establishes specific regulatory requirements for conducting all appropriate inquiries into the previous ownership, uses, and environmental conditions of a property for the purposes of qualifying for certain landowner liability protections under CERCLA.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 part of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the site referenced above. BEC has developed and performed the "All Appropriate Inquiries" in conformance with the standards and practices set forth in 40 CFR Part 312.

Section 11.0 contains the data gaps and deficiencies of the research data encountered during BEC's preparation of this report.

# QUALIFICATIONS OF

# ENVIRONMENTAL PROFESSIONAL

# Keith W. Butler, Associate Senior Project Manager

## PROFILE

Mr. Butler has extensive project management experience with respect to environmental due diligence and subsurface investigations. He is responsible for the preparation of project proposals, Phase I and II Environmental Site Assessments, Work Plans, Health and Safety Plans, Quality Assurance Project Plans, and investigation reports. Additionally, Mr. Butler has conducted and managed numerous Phase I and II ESAs. In these roles, Mr. Butler is responsible for applying the various state and local regulations, which govern environmental compliance and determine the need for additional investigation and/or remediation.

## SELECTED PROJECTS

Madison National Bank, Various Sites, New York

Mr. Butler served as the Project Manager and principal contact for Madison National Bank. He was responsible for the preparation of Transaction Screen and Phase I/II Environmental Site Assessments (ESAs) at various sites throughout the New York metropolitan area, as required by the bank to satisfy client mortgage or construction loan requests.

Jewish Home & Hospital, Manhattan, NY

Most recently, Mr. Butler completed a Phase I ESA at their Bronx campus to obtain US. Housing and Urban Development (HUD) funding for a future construction project. Mr. Butler was also responsible for implementing a Remedial Action Work (RAW) Plan at the Bronx facility as required by the NYSDEC under a Voluntary Cleanup Agreement. The RAW included the preparation of contract documents, excavation of over 2,000 tons petroleum contaminated soils, installation of a Soil Vapor Extraction (SVE) system remedial oversight, and sampling.

Pulte Homes of New York, Patchogue, NY

Mr. Butler served as the Project Manager for the re-development of this six-acre site and was responsible for field oversight and coordination between remediation contractors and various regulatory agencies. Initial phases of the project included the completion of Phase I and II ESAs. Subsequent remediation consisted of UST removal, excavation of petroleum-impacted soils, closure of three NYSDEC spill numbers, removal of contaminated UIC sediment/sludge, the closure of commercial and residential UIC structures and the excavation of arsenic and metals contaminated soil. The project was conducted under approved Remedial Work and Soil Management Plans with oversight from the State, County and Village agencies.

Town of Islip, Blydenburgh Road Landfill, Hauppauge, NY

Mr. Butler served as the Project Manager for the groundwater and leachate monitoring program at the Blydenburgh Road Landfill - Cleanfills 1 and 2 and Leachate Impoundment Area. Mr. Butler was the principal contact for the Town's Resource Recovery Agency. He prepared the quarterly and annual monitoring reports, oversaw sampling efforts, and coordinated with the Town's analytical laboratory and data validation contractors. Mr. Butler was also responsible for preparing quarterly well condition reports and leachate quality reports for compliance with the Town's Suffolk County Discharge Certification Permit.

Ogden Aviation, Various Sites, JFK International Airport, Jamaica, New York

Mr. Butler served as the project manager for the rehabilitation of the satellite fuel farm recovery well system. Recovery wells at the fuel farm had become clogged with iron deposits and bacteria limiting product recovery efforts. Mr. Butler developed and supervised chemical cleaning and redevelopment of recovery wells under the approval of the NYSDEC. The chemical treatment has resulted in significant increases in product recovery volumes.

Brookhaven National Laboratory, Upton, NY

Mr. Butler has worked on a number of remediation system and monitoring well installation projects at BNL. His duties included oversight of installations, system pump tests, performance evaluations, and well development. He also provided oversight of soil borings, temporary well construction, soil and water sampling, and air monitoring for groundwater screening survey of two operable units in hazardous and radioactive waste storage areas. Mr. Butler also provided oversight for groundwater monitoring, well construction, well abandonment, and methane-monitoring wells for landfill closure.

metroPCS, Various Sites, New York

Mr. Butler served as the Project Manager for metroPCS' Long Island region telecommunications site acquisition and expansion program. Mr. Butler was responsible for the preparation of Phase I ESAs, the conduct of Phase II ESAs, including asbestos, lead paint and soil sampling, and coordination of National Environmental Policy Act (NEPA) reports and planning studies at various locations proposed for construction of new cellular telephone facilities. Reports and associated communications were transmitted electronically through metroPCS' data management system.

Dormitory Authority - State of New York, Harlem Hospital Center Modernization Project - Hazardous and Universal Waste Survey, Harlem Hospital, New York, NY

Mr. Butler served as the field team leader for conducting hazardous and universal waste surveys in multiple buildings affiliated with Harlem Hospital Center. The survey included the identification of hazardous and universal waste materials including chemicals, paints, fluorescent bulbs, high intensity discharge bulbs/fixtures, battery operated equipment, above and underground petroleum storage tank identification, PCB containing light ballasts and electrical equipment.

The hospital is comprised of a number of buildings, many that were abandoned and slated for demolition.

SVE Monitoring at Newark International Airport, Elizabeth, NJ
A routine leak detection test indicated that two 10,000-gallon underground storage tanks, which were used to store unleaded gasoline, had failed tightness tests. Follow-up investigation revealed that the product had impacted the subsurface environment. In response to this, a soil vapor extraction system was installed to reduce the residual concentrations of petroleum constituents in soil and groundwater and to minimize vapor migration into subsurface utility vaults. Mr. Butler was responsible for implementing the Remedial Action Work Plan, developed for the site by Ogden and the State of New Jersey. Activities conducted under the RAW include quarterly groundwater monitoring, air sampling, vacuum pressure monitoring, system maintenance and reporting.

Federal Express Site, Newark International Airport, Elizabeth, NJ
Mr. Butler worked with Ogden Aviation and the State of New Jersey to address outstanding environmental issues at the site related to a spill of jet fuel, which occurred during a construction accident. Mr. Butler performed a site assessment, which included groundwater monitoring, product gauging, and groundwater flow modeling. After reviewing these data, Mr. Butler determined that fill material at the site was contributing to soil and groundwater contamination and has petitioned the State for partial site closure. Mr. Butler is continuing to address the remaining area of concern through product recovery and continued monitoring.

Northrop Grumman, Various Sites
Mr. Butler conducted three Phase I ESAs and a Phase II investigation for the presence of PCBs in soil. He also inspected and supervised the removal of underground storage tanks, asbestos abatement projects, and sanitary system closures related to the facility decommissioning. Mr. Butler also conducted groundwater investigations and provided oversight during soil sampling, drilling and soil remediation activities.

New York City Department of Environmental Protection, Various Sites
Mr. Butler served as an Environmental Scientist for hazard investigation at seven sewage pump stations. Mr. Butler addressed a wide range of environmental concerns including asbestos, lead based paints, PCB oil, light ballasts, and other hazardous building materials. He conducted field investigations, sampling, and prepared Hazardous Materials Survey Reports for use during preparation of plans and specifications for proposed pump station construction projects.

Fresh Kills Landfill, Staten Island, New York
Mr. Butler participated in the field operations during pump and yield tests conducted on Cells 1 and 9. The tests were performed to determine the hydraulic properties of the landfill's refuse. He collected groundwater and leachate measurements in recovery wells and in adjacent observation wells under pumping and non-pumping conditions.

# Request a Record

Please make your request specific so you receive the fastest service. After you submit a FOIL request you will receive a confirmation number so you can track the status of the response. The agency will notify you about how much time is required to respond to your request.

## Category (required)

Selecting a category helps clarify which agency will receive the request by listing agencies grouped by categories.

Environment

## Agency (required)

Select the agency that will handle your request.

Department of Environmental Protection (DEP)

## Request Title (required)

Phase I ESA

79 characters remaining

**Note: The agency, category, and title of your request will be visible to the public. Do not enter personal information here.**

**Ex: Queens Blvd Roadwork Permit.**

## Request Description (required)

All documents related to the environmental condition and/or the historic use of the property at 1029-1039 Atlantic Avenue, Brooklyn, NY 11238 (Block 2020, Lot Nos. 86 and 89). These documents are being requested in conjunction with the preparation of a Phase I Environmental Site Assessment (ESA).

4702 characters remaining

**Note: The request details you write here will not be visible to the public. However, the agency may post a description of the records provided.**

**Ex: Roadwork permits for work done in on Queens Blvd. between 40th and 45th streets, Borough of Queens, in September and October 2017.**

**Re: Freedom of Information Request**
**1029-1039 Atlantic Avenue**
**Block 2020, Lot Nos. 86 and 89**
**Brooklyn, New York 11238**

Dear Sir or Madam:

Our firm has been retained to prepare an Environmental Assessment for the above-referenced properties. We are respectfully requesting information regarding any flammable storage permits, chemical or petroleum storage, spills, registered above or underground storage tanks, air discharge permits, investigations of environmental concern (e.g., asbestos, lead paint), etc. for the facility. We agree with the department's decision to omit any health or personal identification in the records provided.

If you require additional information to respond to this request or if there are costs associated with same, please, do not hesitate to contact me. Thank you for your cooperation.

Sincerely,

**Brussee Environmental Corp,**

Keith Butler
Associate Senior Project Manager

Contact: Keith Butler

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by KB Environmental Assessment were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### Limited Permission To Make Copies

KB Environmental Assessment (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

**Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by KB Environmental Assessment were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

# EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

Summary information obtained is provided in the text of this report.

## RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

# EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

***Lists of state- and tribal hazardous waste facilities***

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 04/30/2025 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

# EXECUTIVE SUMMARY

Site Code: 545384

***Lists of state and tribal landfills and solid waste disposal facilities***

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the  list.

A review of the NY SWF/LF list, as provided by EDR, and dated 02/20/2025 has revealed that there are 4 NY SWF/LF sites within approximately 0.5 miles of the target property.

***Lists of state and tribal leaking storage tanks***

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/03/2025 has revealed that there are 43 NY LTANKS sites within approximately 0.5 miles of the target property.

***Lists of state and tribal registered storage tanks***

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 24 NY UST sites within approximately 0.25 miles of the target property.

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Records of Emergency Release Reports***

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/03/2025 has revealed that there are 33 NY Spills sites within approximately 0.125 miles of the target property.

***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 145 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 19 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 56 E MANIFEST sites within approximately 0.25 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 12/31/2019 has revealed that there are 180 NY MANIFEST sites within approximately 0.25 miles of the target property.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

# EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

| Material Code: | 0001 |
| Common Name of Substance: | #2 Fuel Oil (On-Site Consumption) |

Equipment Records:

H00 - Tank Leak Detection - None
K00 - Spill Prevention - None

**1045 ATLANTIC AVENUE (Continued)** **U003397168**

A01 - Tank Internal Protection - Epoxy Liner
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle
F00 - Pipe External Protection - None
C01 - Pipe Location - Aboveground
J05 - Dispenser - On Site Heating System (Supply/Return)
L00 - Piping Leak Detection - None

Tank Location: Aboveground in subterranean vault with access for inspections.....
Tank in subterranean vault but accessible for inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 01/01/1950
Capacity Gallons: 3000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 12/20/2022
Register: True

| Site Description: | Location: The site is located within an urban area at 1045 - 1065 Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.0814 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Prior to January 2023, the site was improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The building occupied the entire lot. 1059 Atlantic Avenue (former Lot 73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. |

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

| | |
|---|---|
| | ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan. |
| Health Problem: | Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination. |

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.0814 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Prior to January 2023, the site was improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The building occupied the entire lot. 1059 Atlantic Avenue (former Lot 73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to prevent

| Updated By: | JKGONZAL |
| Site Description: | Location: The site is located within an urban area at 1045 - 1065 Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.0814 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Prior to January 2023, the site was improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The building occupied the entire lot. 1059 Atlantic Avenue (former Lot |

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

(RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete.
Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan.

1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination.

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

Name: ATLANTIC BROOKLYN PROJECT
Address: 1045 - 1065 ATLANTIC AVENUE
City,State,Zip: BROOKLYN, NY 11238
Site Code: 598940
Control Name: O&M Plan
HW Code: C224305
Control Code: 33
Control Type: INST
Dt record added: 09/15/2023
Dt rec updated: 01/31/2025
Updated By: JKGONZAL
Site Code: 598940
Site Description: Location: The site is located within an urban area at 1045 - 1065 Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.0814 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Prior to January 2023, the site was improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The building occupied the entire lot. 1059 Atlantic Avenue (former Lot 73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination.

Name: ATLANTIC BROOKLYN PROJECT
Address: 1045 - 1065 ATLANTIC AVENUE
City,State,Zip: BROOKLYN, NY 11238
Site Code: 598940
Control Name: Site Management Plan
HW Code: C224305
Control Code: 32
Control Type: INST
Dt record added: 09/15/2023
Dt rec updated: 01/31/2025
Updated By: JKGONZAL
Site Code: 598940
Site Description: Location: The site is located within an urban area at 1045 - 1065 Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.0814 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Prior to January 2023, the site was improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

building occupied the entire lot. 1059 Atlantic Avenue (former Lot 73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination.

Name: ATLANTIC BROOKLYN PROJECT
Address: 1045 - 1065 ATLANTIC AVENUE
City,State,Zip: BROOKLYN, NY 11238
Site Code: 598940
Control Name: Landuse Restriction
HW Code: C224305
Control Code: 25
Control Type: INST
Dt record added: 09/15/2023
Dt rec updated: 01/31/2025
Updated By: JKGONZAL
Site Code: 598940
Site Description: Location: The site is located within an urban area at 1045 - 1065 Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.0814 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Prior to January 2023, the site was improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The building occupied the entire lot. 1059 Atlantic Avenue (former Lot 73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination.

Name: ATLANTIC BROOKLYN PROJECT
Address: 1045 - 1065 ATLANTIC AVENUE
City,State,Zip: BROOKLYN, NY 11238
Site Code: 598940
Control Name: Environmental Easement
HW Code: C224305
Control Code: J
Control Type: INST
Dt record added: 09/15/2023
Dt rec updated: 01/31/2025
Updated By: JKGONZAL
Site Code: 598940
Site Description: Location: The site is located within an urban area at 1045 - 1065 Atlantic Avenue in the Bedford-Stuyvesant neighborhood of Brooklyn, NY. The approximately 1.0814 acres site is identified on the New York City Tax Map as Block 2020, Lot 68 (formerly Lots 68, 70, 73, 74 and 77). The site is bounded by residential properties to the north followed by Lefferts Place, commercial properties to the west, south, and east, and elevated railroad to the east followed by Franklin Avenue, and Atlantic Avenue to the south. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Prior to January 2023, the site was improved as follows: 1065 Atlantic Avenue (former Lot 68) was formerly occupied by a two-story building with a garage on the first floor and office space, storage, and an artist's loft on the second floor. The building occupied the entire lot. 1061-1063 Atlantic Avenue (former Lot 70) was formerly occupied by a two-story commercial/light industrial building with a partial cellar on the south side of the building. The

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

building occupied the entire lot. 1059 Atlantic Avenue (former Lot 73) was formerly occupied by a concrete paved lot. 1053 and 1057 Atlantic Avenue (former Lot 74) was formerly occupied by a one-story building with two commercial units. There was a small paved rear yard behind 1053 Atlantic Avenue that contained a walk-in freezer and storage. 1045 Atlantic Avenue (former Lot 77) was formerly occupied by a one-story industrial building, a warehouse building, and a concrete paved rear yard. Current Zoning and Land Use: The site is currently vacant and is zoned M1-1 light manufacturing and is surrounded by similarly zoned properties to the east, west, and south. Properties to the north are zoned R6B residential with a C2-4 commercial overlay; the majority of the properties to the north long Lefferts Place appear to be single family residences. Past Use of the Site: 1065 Atlantic Ave (former lot 68) was first developed between 1888 and 1908 and used for commercial/industrial purposes, including a wagon house in 1908 and an auto repair shop with battery service by 1932 to present. 1061 to 1063 Atlantic Ave (former Lot 70) was first developed sometime prior to 1888 and use for commercial and industrial purposes. Historical uses included an auto repair and brake shop, office space, a church, and a variety of commercial usages. 1059 Atlantic Ave. (former Lot 73) was developed prior to 1888 with a building for beer bottling. Between 1908 and 1932, it was redeveloped into an auto repair shop. The building was demolished between 1965 and 1976 and has been vacant since. 1053 and 1057 Atlantic Ave (former Lot 74) was developed prior to 1888 and used for commercial and industrial purpose from at least 1888 to present. Historical usage of the subject site indicative of potential recognized environmental concerns includes auto painting and auto repair from 1965 to 2007. 1045 Atlantic Ave (former Lot 77) was first developed prior to 1888, used for residential purposed from at least 1888 to 1908 and commercial and industrial purposes from at least 1932 to the present. historical usage of the subject site indicative of potential recognized environmental concern includes metal manufacturing, auto repair, and petroleum delivery services. Site Geology and Hydrogeology: The site is underlain by historic fill material to approximately 6 feet below grade (ftbg) on the western portion of the site and down to about 9 ftbg on the eastern portion of the site. Underlaying the historical fill materials are native soil which were mostly poorly graded, with alternating layers of fine to medium grained sands with occasional layers of gravel around 30 - 40 ftbg. Groundwater is present at depths of approximately 70-73 ftbg and flows generally to the northwest.

Env Problem: Prior to Completion of Remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil, and VOCs in soil vapor and groundwater. Soil Several VOCs were found at concentrations exceeding the restricted residential soil cleanup objectives (RRSCO) or the protection of groundwater soil cleanup objectives (PGSCOs), including tetrachloroethene (PCE) at 4.6 parts per million or ppm (PGSCO is 1.3), trichloroethene (TCE) at 17 ppm (PGSCO is 0.47 ppm), and naphthalene at 320 ppm (RRSCO is 100 ppm). SVOCs exceeding RRSCOs include benzo(a)anthracene up to 230 ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 200 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene

**ATLANTIC BROOKLYN PROJECT (Continued)** **S127750690**

up to 250 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 82 ppm (RRSCO is 3.9 ppm), chrysene up to 220 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 26 ppm (RRSCO is 0.33 ppm), fluoranthene up to 470 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 110 ppm (RRSCO is 0.5 ppm), phenanthrene up to 490 ppm (RRSCOs is 100), and pyrene up to 400 ppm (RRSCO is 100 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including total chromium at 7960 ppm (RRSCO is 180 ppm), trivalent chromium at 420 ppm (RRSCO is 180 ppm), lead at 754 ppm (RRSCO is 400 ppm), mercury at 3.96 ppm (RRSCO is 0.81 ppm), and nickel at 714 ppm (RRSCO is 310 ppm). Generally, most of the metal impacts were found in the fill layer and appear to be related to historical fill, with the exception of chromium which extended deeper into the native material and may be related to historic site uses. PFOS and PFOA were not detected in soil at concentrations exceeding the restricted residential guidance values. No pesticides, PCBs and herbicides were found at concentrations exceeding RRSCOs. Data did not indicate off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including chloroform at a maximum concentration of 34 parts per billion, or ppb (AWQS is 7 ppb) and TCE at 42 ppb (AWQS is 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 1 ppb, benzo(b)fluoranthene at 1.5 ppb, benzo(k)fluoranthene at 0.49 ppb, indeno(1,2,3-cd)pyrene at 0.97 ppb, and chrysene at 0.96 ppb compared to their respective AWQS of 0.002 ppb. PFAS were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) each with perfluorooctanesulfonic acid (PFOS) at a maximum concentration of 19 ppt and perfluorooctanoic acid (PFOA) at 79.3 ppt. Data did not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Chlorinated VOCs were detected in soil vapor samples including PCE at 42,200 micrograms per cubic meter (ug/m3), and TCE at 190,000 ug/m3. Data indicated that there is the potential for off-site impacts in soil vapor related to this site. Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were PCE, TCE, SVOCs, and metals in soil, and PCE and TCE in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted-residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Tank Info:

Tank Number: 003
Tank Id: 34936
Material Code: 0009
Common Name of Substance: Gasoline

Equipment Records:

J02 - Dispenser - Suction Dispenser
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
H00 - Tank Leak Detection - None
I00 - Overfill - None
A00 - Tank Internal Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)

Tank Location: Aboveground in subterranean vault with access for inspections.....
Tank in subterranean vault but accessible for inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 06/01/1962
Capacity Gallons: 550
Tightness Test Method: 03
Date Test: 08/01/1995
Next Test Date: Not reported
Date Tank Closed: 09/01/1999
Register: True

| DEC Memo: | 9/12/2018 - Obligado - Desk Duty - Contamination found during Phase II investigation. 09/14/18-Hiralkumar Patel. alternate address: 1013-1015 Atlantic Ave, 1021 Atlantic Ave, 582 Classon Ave no other spills found. PBS #: 2-356808. as per PBS record, the site has/had following tanks: - thirteen (13) 550 gal gasoline USTs removed in Sept. 1999 - one (1) 550 gal #2 oil UST, removed in Sept. 1999 - one (1) 550 gal unknown product UST, removed in Sept. 1999 - one (1) 6,000 gal gasoline UST, converted to non-regulated use - one (1) 3,000 gal diesel UST, converted to non-regulated use - one (1) 6,000 gal gasoline UST, in-service, installed in Jan. 2000 - one (1) 12,000 gal gasoline UST, in-service, installed in Jan. 2000 - one (1) 4,000 gal diesel UST, in-service, installed in June 1962 summary of Phase I dated 09/15/14: - site currently improved with one (1) one-story gasoline service station with no basement or sub-grade areas - as per NYC DOB records, the building was constructed in 1961 - subject site is listed as a RCRA Non-Generator and AIRS site, with no violations found. the station was identified as a large quantity generator in 1980, and a non-generator in 1999 and 2006 - the 4,000 gal diesel tank was upgraded to a cathodically protected tank in 2000 - on-site tanks are monitored with a veeder-root system and were last tightness tested in 2005 (gasoline tanks) and 2006 (diesel tank) - fifteen (15) 550 gal USTs were removed between Sept. 28 and Oct. 14, 1999 - certificate of occupancy were issued in 1931 and 1943 for use of the subject site as a gas station ---------- - site is located at an elevation of 81 ft above mean sea level summary of Phase II dated 09/07/2018: - site developed with a gasoline filling station with a single-story auto repair shop and three dispenser islands in the |

**GAS STATION (Continued)** **S122877363**

south and east portion of the site - three large anomalies that are consistent with the on-site
known USTs were noted - a large anomaly was identified in the northeast portion of the site (along
Classon Ave sidewalk) - multiple anomalies, consistent with hydraulic tanks and a floor drain was
located within the on-site building - total of eight (8) soil borings (SB1 through SB8) were
installed - borings SB1, SB2 and SB6 through SB8 were installed to a terminal depth of 20 ft bg -
boring SB3 was installed to 15 ft bg where concrete refusal encountered - borings SB4 and SB5 were
installed to a terminal depth of 5 ft bg - soil beneath the site consisted of historic fill
material which varied in depth from 5 to 10 ft across the site underlain by silt, clay and rock
from 10 to 20 ft - no visual, olfactory or PID detections above background levels were encountered
in borings SB3 through SB7 - low PID readings (0-10 ppm) and slight petroleum odors were noted in
boring SB1 and SB2 from 0 to 10 ft bg - elevated PID readings of 2,000 ppm with staining and
petroleum odors were identified in SB8 from 15 to 20 ft bg (no staining or PID readings were noted
from 0 to 15 ft bg) ---------- - groundwater is estimated at 60 to 65 ft bg - one soil sample was
collected from each boring, except borings SB4 and SB5 - soil samples were collected at the end of
each boring, except from SB1 where sample was collected from 8-10 ft bg due to detection of some
stained soil and petroleum odors - shallow soil samples (0-2 ft bg) were collected from SB3, SB5
and SB8 - no contamination noted in soil samples, except from 18-20 ft depth from SB8 soil
analyticals (in ppb): ----------SB8 18-20 ft
Benzene----------1,200
Toluene----------250,000 Ethylbenzene----------86,000
Xylene----------440,000 1,2,4-Trimethylbenzene----180,000
1,3,5-Trimethylbenzene-----52,000 Naphthalene----------21,000
8:42 AM:- spoke with Kevin at
EBC. he mentioned that Phase II investigation was conducted to confirm site’s condition (any
environmental impacts due to site’s use as gas station). inquired Kevin about 1) reason for not
conducting investigation inside the repair shop, 2) stopping drilling at 20 ft bg at SB8, and 3)
purpose of shallow borings SB4 and SB5. Kevin mentioned that low ceiling had prevented
investigation inside the repair shop. the authorized work proposal included borings to a depth of
20 ft bg so driller stopped at 20 ft bg in SB8 and by the time Kevin knew about contamination at
the end of boring, driller had already left the site so they could not extend boring at SB8.
shallow borings SB4 and SB5 were installed to investigate any release from existing pump islands,
but these borings may not have served purpose as borings were located

**GAS STATION (Continued)** **S122877363**

at least 10-12 ft away from
dispenser islands. Kevin Waters EBC PH. (718) 545-0474 email:
kwaters@ebcincny.com 10:52 AM:- spoke
with Mr. Shapiro. he mentioned that current property owner purchased
the site in 2015, but did not
conduct any Phase II investigation prior to purchase. Mr. Shapiro
doesn't have any documents
confirming location of previously removed 550 gal tanks. they
conducted Phase II investigation as
part of possible property transaction. Atlantic Classon Group LLC.
**property owner** c/o Sterling
Town Equities LLC. 936 Fulton Street, Brooklyn, NY, 11238 Attn.:
Yaakov Shapiro Construction
Administrator PH. (718) 783-2121 Ext. 19 Fax (718) 783-7616 email:
yaakov@sterlingtown.com 2:01
PM:- sent letter to Mr. Shapiro requiring submission of a scaled site
map with location of
current/former tank systems (including piping) and delineation of
contamination noted in boring
SB8. asked him to submit investigation report by the end of 11/30/18.
letter emailed to Mr. Shapiro
and Kevin. 09/18/18-Hiralkumar Patel. 1:57 PM:- received call from
Charles Sosik fom EBC. he
mentioned that property transaction will occur sometime after 11/30/18
and potential buyer is
planning to redevelop the site after removing on-site structures/tank
systems. Charles requested
approval to postpone required subsurface investigation as the
potential buyer will conduct
subsurface investigation (not only to delineate petroleum
contamination but also to satisfy e
designation requirements) after purchasing the property. informed him
that prior to approving the
request, the Department requires vertical delineation at boring SB8
and tentative schedule for
property transfer. 10/24/18-Hiralkumar Patel. received email from
Kevin (at 4:18 PM on 10/23/18)
including site map, boring logs and sample result summary tables. as
per result summary table,
additional soil samples were collected at former boring location SB8
on 10/09/18. soil samples were
collected from 20-22 ft and 22-24 ft intervals. no contamination was
noted at 22-24 ft depth and
2,550 ppb of total BTEX was noted at 20-22 ft depth, but 777,200 ppb
of total BTEX was noted at
18-20 ft depth in same boring during sampling on 08/09/18. as per the
submitted log, boring SB8 was
installed on 08/09/18 to a depth of 24 ft bg, which is not correct as
per discussion with Kevin on
09/14/18. 10/29/18-Hiralkumar Patel. 1:20 PM:- sent email to Kevin and
asked him to submit correct
boring logs and complete lab report for sampling on 10/09/18. email
copied to Mr. Shapiro, Charles,
pm@sterlingtown.com, Paul Amit (paul@sterlingtown.com) and Yossi Ariel
(yossi@sterlingtown.com).
1:57 PM:- received email from Kevin including boring logs and lab
report for sampling conducted on

**GAS STATION (Continued)** **S122877363**

10/09/18. Kevin mentioned that EBC advanced a second boring on 10/09/18 in the SB8 location to vertically delineate the petroleum impacted soil. the second SB8 boring was installed to a depth of 24 ft bg, adjacent to the initial location. petroleum impacted soil was observed in the SB8 20-22 interval, with light petroleum odors and PID readings of 86.7 ppm. the SB8 22-24 interval exhibited light petroleum odors and a PID reading of 1.2 ppm. both the SB8 20-22 and 22-24 intervals were submitted to the lab for analysis of VOC and SVOC CP-51 list. the submitted boring log for SB8 includes field observations/PID reading details for drilling on 08/09/18 and 10/09/18. as per combined log of SB8, petroleum odor/contamination was noted from 15 to 22 ft depth. 777,200 ppb of total BTEX was noted at 18-20 ft depth and 2,550 ppb of total BTEX was noted at 20-22 ft depth in area of SB8. 12/10/18-Hiralkumar Patel. 1:06 PM:- left message for Mr. Shapiro and inquired him about current/future use of the property. 12/17/18-Hiralkumar Patel. 3:06 PM:- received email from Mr. Shapiro. he mentioned that the current use of site is gas station/auto mechanic, and the future usage is a residential building. 12/18/18-Hiralkumar Patel. 12:39 PM:- left message for Mr. Shapiro and inquired him about schedule for site's redevelopment into residential building. 12/19/18-Hiralkumar Patel. received email from Mr. Shapiro (at 5:29 PM on 12/18/18). they expect property transfer around 04/01/19. based on site's current commercial use and presence of deeper soil contamination (at least below 15 ft depth), no remedial actions are required at this time, but further investigation and remediation are required prior to future site redevelopment into residential building. 04/27/20-Hiralkumar Patel. reviewed NYC ACRIS record and noted that the property has been transferred to a new owner as of 04/01/19. 10:47 AM:- left message at Key Developers (347-425-7781) whose number listed in NYCDOB permit to construct a new 6 story building with a cellar. 1015 Holdings LLC. **current property owner** 143 Division Avenue Brooklyn, NY 11211 Attn.: Solomon Feder Ph. (347) 425-7781 email: keydevelopersny@gmail.com Solomon Feder Velocity Framers USA Inc. 670 Myrtle Ave, Suite 370 Brooklyn, NY 11205 email: sol@velocityframers.com 11:15 AM:- sent email to Mr. Feder (email addresses listed in DOB applications) and asked him to provide current status of the site. email copied to OER Shaminder. 04/30/20-Hiralkumar Patel. received email from Charlie (at 3:57 PM on 04/29/20) stating that the subject site has been enrolled in BCP (# C224293). reviewed documents on DECDocs and noted that the BCP agreement was executed in Aug. 2019. case assigned to DEC Steven Wu, BCP project manager. 11:20 AM:-

**GAS STATION (Continued)** **S122877363**

sent email to DEC Wu and
informed him about case transfer. email copied to DEC O'Connell and DEC Austin.

Remarks: gas tank was replaced in 1999, test results showed contamination from system being replaced

| | |
|---|---|
| Name: | 1015 ATLANTIC |
| Address: | 1013-1015 ATLANTIC AVENUE |
| City,State,Zip: | BROOKLYN, NY 11238 |
| Program: | BCP |
| Site Code: | 585865 |
| Acres: | 0.192 |
| HW Code: | C224293 |
| SWIS: | 2401 |
| Town: | New York City |
| Record Added Date: | 04/02/2019 |
| Record Updated Date: | 12/27/2023 |
| Update By: | AMSERVIS |
| Site Description: | Location: The site is located in the Bedford Stuyvesant section of Brooklyn and is comprised of a single tax parcel totaling 8,340 square feet (0.1915 acres). The site is irregular in shape with frontage along Atlantic Avenue and Classon Avenue. Site Features: Remedial excavation has been completed and the site is currently undergoing redevelopment. Current Zoning and Land Use: The property is currently zoned R7A (residential) with a C2-4 (commercial) overlay. The planned multi-family residential building will be in compliance with the zoning. Past Use of the Site: Historically, the property was occupied by a diner from approximately 1934 to 1961. The gas station/vehicle repair facility operated from 1961 to the mid-2010s, after which it was used as a parking lot. Site Geography and Geology: Subsurface soils at the site consist of historic fill materials to a depth of approximately 5 to 10 feet below grade followed by native silty-sand and clay. Groundwater occurs beneath the site at a depth of approximately 70 to 75 feet below grade. Groundwater flows to the northeast. |
| Env Problem: | Remediation at the site is complete. Prior to remediation, the primary contaminants of concern for the site include petroleum related VOCs,SVOCs and Metals. Remedial actions have successfully achieved soil cleanup objectives for residential use. Prior to remediation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for the site include petroleum related VOCs, SVOCs and metals. Soil: Petroleum-related VOCs were found in soil exceeding the applicable Unrestricted Use soil cleanup objectives (UUSCOs) including m- & p-xylene at a maximum concentration of 310 parts per million (ppm) compared to the UUSCO of 0.26 ppm, ethylbenzene at a maximum concentration of 88 ppm (UUSCO is 1 ppm), toluene at a maximum concentration of 250 ppm (UUSCO is 0.7 ppm), 1,2,4-trimethylbenzene (TMB) at a maximum concentration of 180 ppm (UUSCO is 3.6 ppm), and 1,3,5-TMB at a maximum concentration of 52 ppm (UUSCO is 8.4 ppm). Several SVOCs were found in soil exceeding their respective UUSCOs including benzo(a)anthracene at a maximum concentration of 30 ppm (UUSCO is 1 ppm), benzo(a)pyrene at a maximum concentration of 29 ppm (UUSCO is 1 ppm) and benzo(b)fluoranthene at a maximum concentration of 20 ppm (UUSCO is 1 ppm). The following |

**1015 ATLANTIC (Continued)** **S125298837**

metals were detected at concentrations exceeding UUSCOs: lead at 817 ppm (UUSCO is 63 ppm), barium at concentrations 791 ppm (UUSCO is 350 ppm) and mercury at 2.15 ppm (UUSCO is 0.18 ppm). The pesticide 4,4'-DDD was found in soil at maximum concentration of 0.062 ppm exceeding UUSCO of 0.0033 ppm. Data does not indicate any off-site impacts in soil related to this site. Groundwater: VOCs including toluene, ethylbenzene and xylene was found in groundwater in the southern portion of the site in the vicinity of the fuel pumps. The maximum concentration of o-xylene was 29 parts per billion (ppb) compared to ambient water quality standard (AWQS) of 5 ppb, the maximum concentration of ethylbenzene was 18 ppb (AWQS is 5 ppb) and the maximum concentration of toluene was 22 ppb (AWQS is 5 ppb). The SVOCs benzo(a)anthracene and benzo(b)fluoranthene were found at a concentration of 0.14 ppb (AWQS is non-detectable) and 0.1 ppb (AWQS is 0.02 ppb), respectively. No dissolved metals, PCBs, or pesticides were found exceeding AWQS. No PFAS compounds were found at concentrations exceeding the maximum contaminant limit of 10 parts per trillion. Data does not indicate any off-site impacts in groundwater-related to this site. Soil Vapor: Petroleum related VOCs were identified in soil vapor, including heptane at a maximum concentration of 1,160 micrograms per cubic meter (ug/m3), hexane at a maximum concentration of 638 ug/m3, benzene at a maximum concentration of 121 ug/m3 and ethylbenzene at a maximum concentration of 122 ug/m3. Chlorinated VOCs were also identified in soil vapor, including tetrachloroethene at a maximum concentration of 50.8 ug/m3.Data does not indicate any off-site impacts in soil vapor related to this site.

| | |
|---|---|
| Health Problem: | Remedial actions are complete, the site was cleaned up to meet unrestricted use, and all known exposure pathways were addressed by the remedy for the site. |

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Mohamed H. Abdou **property
owner** 3760 Polar Street Brooklyn, NY 11224 PH. (718) 636-2222 (917)
887-7771 email:
mabdou3000@msn.com 01/19/17-Hiralkumar Patel. 9:00 AM:- DEC Piper
forwarded email from NYC DEP Alex
Castro including pics. 12:00 PM:- left message for Mr. Abdou. 12:38
PM:- received call from Mr.
Abdou. he mentioned that he cleared out the lot recently for
construction of a new warehouse. after
cleaning the lot, he let one of his friend from neighborhood park his
vehicles until gets approval
from NYC DOB for warehouse construction. Mr. Abdou has no knowledge of
any spills at the site.
asked him to have site cleaned up and call for an inspection. 12:52
PM:- received call from Mr.
Abdou. he spoke with his friend who is using the lot currently. as per
his friend, a garbage truck
was parked inside the lot and while backing up, the truck hit an oil
container. Mr. Abdou will
inspect site today. 1:00 PM:- sent email to Mr. Abdou including
available site pics. 3:12 PM:-
received email from Mr. Abdou including site pics. 5:09 PM:- spoke
with Mr. Abdou. he mentioned
that the spilled material on property and sidewalk has been cleaned
up. he is available next week
for site inspection and will call back on 01/23/17 with schedule.
01/23/17-Hiralkumar Patel. 9:55
AM:- spoke with Mr. Abdou and scheduled a site inspection at 9:30 AM
tomorrow. 01/24/17-Hiralkumar
Patel. 9:40 AM:- visited site and met Mr. Abdou. no signs of oil noted
on sidewalk or along curb.
inspected the site. Mr. Abdou removed vehicles stored on eastern half
of the lot and cleaned up
spilled materials. but two broken garbage trucks were located along
western half of the site. found
evidence of oil spill beneath these trucks. asked Mr. Abdou to remove
remaining contaminated
materials. 12:54 PM:- sent letter to Mr. Abdou requiring submission of
spill cleanup report by the
end of 02/24/17. letter emailed to Mr. Abdou. 02/06/17-Hiralkumar
Patel. 9:34 AM:- received message
from Mr. Abdou. 9:37 AM:- spoke with Mr. Abdou. he claimed that most
of spilled material had washed
away in rain event. asked him to schedule a site inspection. 2:15 PM:-
visited site and met Mr.
Abdou. all the vehicles were removed from the lot. found frozen ground
with ice in some areas which
is result of liquid spilled from previously parked garbage trucks.
minor staining noted in some
areas, but no petroleum odors. Mr. Abdou mentioned that they are
modifying the construction plan to
include a full basement at the site and during site redevelopment, all
surface soil will be
removed. asked Mr. Abdou to properly dispose any contaminated
materials found during construction
of warehouse at the site. case closed based on field observations
(open lot with no odors) and

**LOT 11,TAXBLOCK 1134 (Continued)** **S119029551**

proposed future use (warehouse with basement). 3:52 PM:- spoke with Alex at DEP and informed him
about case closure. 02/08/17-Hiralkumar Patel. 10:48 AM:- sent spill closure letter to Mr. Abdou.
letter emailed to Mr. Abdou.

Remarks: The caller said that this place is like a parking lot from a business and there are a lot of containers with oil that are open and spilled all over and the rain is washing a very thick oil . He is requesting dec to go and check.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: 8/12/2020 - Feng - Desk Duty in office. Called EBC and left call back info. Environmental Business Consultants Kevin Brussee 631-504-6000 x114 KBrussee@EBCIncNY.com Zhune-Spoke to Kevin Brussee of Environmental Business Consultants. It is an OER project. They did a Phase 2 and found one soil sample of the boring at 0-2 feet sampling depth show exceedances of BTEX and related gasoline compounds. Additional delineation has been done around that boring and found only some minor exceedance and mainly naphthalene. The OER RAWP is not approved yet pending on the spill reporting. The RAWP calls for excavation of the soil down to 12 feet for 90% of the celler. They will excavate down 4-5 feet and then 45 degree sloping for the rest of the depth excavation. The site is 200'x100' in size. They will submit spill closure report upon the completion of the excavation and collecting the endpoint samples. He will forward the link for the OER reports. Spill is assigned to V. Zhune. Kevin Brusee(cell) 631-338-1749 10/27/20- Kevin Brusee sen the following email The developer anticipates starting immediately after the DOB plans are approved. He is expecting the start date to be in January. 10/27/20 Kevin Brusee emailed the phase I and phase II Phase 1 ------- Environmental Planning & Management performed the phase I. The Phase I ESA Repor (dated February 13, 2015) identified the following Recognized Environmnental Conditions: Building cellar. Historic use. Vacant lot Off-site impacts. Ground Penetrating Radar (GPR) Survey ---------- No indication of a subsurface tank were identified in the area of the cellar. However, ananomaly with the approximate dimensions of a 10,000 gallon tank was found within the vacant lot in the location of the gasoline tank identified in the phase I ESA. Phase II ---------- On march 14, 2015, AARCO Environmental Services Corp. (AARCO) installed six (6)soil borings under the supervision of an Integral geologist. Soil Analytical Results and Analysis. The results from the soil samples were compared to the New York State Department of Environmental Conservation (NYSDEC) CP-51 Unrestricted Use Soil cleanup Objectives (SCOs). VOCs ------ No unrestricted Use SCOs were exceeded for VOCs in the soil samples. However, several VOCs were detected at lower concentrations: acetone, ethylbenzene, naphthalene (an SVOCs), xylene, and toluene. The detection of these compounds in the borings immediately adjacent to the suspected gasoline UST on the vacant lot (SB-3, SB-4 and SB-5)could indicate a historic release from the tank; however, it is likeky that, if a release had occurred, it was relatively minor in nature due

**CON EDISON (Continued)** **S116043817**

to the low concentration in the samples. SVOCs ====== Seven (7)SVOCs were detected above
unrestricted Use SCOs in the shallow soil samples (5-10 ft)below ground surface (BGS)of two borings
SB-4 and SB-5 (both near the vacant lot gasoline UST). However, all concentrations were within one
order of magnitude of its SCO. Low levels of SVOCs found within these two borings could be
attributed to the placement of historic fill. Metals ======== Concentrations of lead, mercury, and
nickel exceeded their respective SCOs in three of the borings advance on the local lot. Similarly
to SVOCs the presence of low levels of these metals could be attributed to the placement of
historic fill. PCBs ====== NO PCBs were detected in any of the soil samples. Please see attchedment
B for the table of all detected compounds and attachment C for the full laboratory report.
3/5/21-Zhune - Kevin sent the following email Two crushed 275-gallon aboveground storage tanks and
some other metal structure were found at 1010 Pacific Street, Brooklyn, NY in the hotspot area that
high VOCs. Picture provided below. The hotspot is being excavated and loaded into trucks for
transport to Clean Earth of North Jersey. Leszek I don t think either tank needs to be recorded
with the DEC on a PBS Application or a Pre-Work Notification is required because they are both
aboveground tanks that someone crushed and used as backfill, but I wanted to check to make sure.
The VOC hotspot was previously delineated with insitu soil borings/samples and the hotspot will be
excavated to at least the boundaries of the delineation samples, but we ll be collecting some soil
samples from the area after it is excavated as a pre-caution .
4/9/21-Kevin Brusee emailed the
Remedial Investigation Report A summary of the subsurface Investigation performed by Integral
Engineering P.C. in February of 2015 and the Remedial Investigation performed by EBC in January and
February of 20920 is summarized below. Imtegral Engineering P greater than C greater than performed
the following scope of work within the boundary of Site in May of 2015: 1. Installed six soil
borings and collected eleven soil samples and one duplicate for chemical analysis from the soil
borings to evaluate soil quality. 2. Performed a GPR survey. EBC performed the following scope of
work within the boundary of Site in January and February of 2020. 1. Conducred a Site inspection to
identify AOVs and physical obstructions (i.e. structures, building etc.): 2. Installed nine soil
borings(SB1 through SB9) and collected eighteen soil samples and one duplicate for chemical
analysis from the soil borings to evaluate soil quality; 3. Installed two groundwater monitoring
wells, One of the monitoring wells was dry, and very little water was

**CON EDISON (Continued)** **S116043817**

present in the second
monitoring well. The third monitoring well was not attempted.
Therefore, only one groundwater
sample could be collected for chemical analysis of VOCs to evaluate
groundwater quality; and 4.
Installed one sub-slab soil gas implant (SG1) and collected one
sub-slab soil gas sample, and
installed seven soil vapor probes (SV1 through SV7) and collected
seven soil vapor samples for
chemical analysis. . Eight VOCs were detected above UUSCOs in one
shallow soil sample (B6(0-2))
including acetone (maximum (max.)of 2,500 ug/kg ), benzene (at 72
ug/kg), ethlylbenzene at (4,000
ug/kg), m&p-xylenes (max. of 17,000 ug/kg), Naphthalene (max. of 25000
ug/kg)o-Xylene (at 6,100
ug/kg), tetrachloroethene (at 1,500 ug/kg)and Toluene (max.
64,000ug/kg. Several additional VOCs
were detected at trace concentrations within several soil samples; .
Seven SVOCs including
Benzo(a)anthracene (max.of 7,500ug/kg, Benzo(a) pyrene (max.of
12,000ug/kg,Benzo(b)fluoranthene
(max.9,200 ug/kg), Benzo (K) fluoranthene (max. of 7,100 ug/kg),
Chryzene (max. of 7,700 ug/kg),
dibenz (a,h) anthracene (max. of 2,700 ug/kg), and indeno (1,2,3-cd)
pyrene (max. 9,100 ug/kg)were
detected above RRSCOs; . Two Pescticides including 4,4'-DDE (at 4.2
ug/kg and 4,4'DDT (max. of18
ug/kg) were detected above UUSCOs. No pestices were detected above
RRSCOs. . On PCB, PCB-1254 (at
2,000 ug kg) was detected at the RRSCO of 2,000 ug/kg. . Seven metals
including cadmium (max. 7.6
mg/kg), Chromium (max. 550 mg/kg), Copper (max of 104 mg/kg,lead
(max.of 719 mg/kg)mercury (max.of
3,01 mg/kg), nikel (max.of 86.1 mg/kg)and zinc (max. of 1,310 mg/kg
were detected above UUSCos. Of
the detected metals, cadmium, lead, and mercury were detected
exceeding RRCOs . Five PFA compounds
were detected in the sample for a total of 1046 ug/kg Groundwater
---------- Groundwater samples
results were compared to New York State 6 NYCRR Part 703.5 class GA
groundwater quality standards
(GQS) . Two VOCs, acetone (at 52 ug/L) and methylene chloride (at 54
ug/L) were detected above
their respective GQS. Soil Vapor ---------- Figure 8 shows the
location and posts the values for
sub-slab soil gas and soil vapor samples with detected concentrations.
The sub slab soil gas and
soil vapor results collected during the Remedial Investigation were
compared to the compounds
listed in Table 3.1 Air Guidance Values derived by the New York State
Department of health (NYSDOH)
located in the NYSDOH Final Guidance for Evaluating Soil Vapor
Intrusion, dated October 2006 and
the revised NYSDOH Decision Matrices dated May 2017. . The sub slab
soil gas and soil vapor results
indicated low levlesl of petroleum related VOCs and low levels of
chlorinated VOCs: . Total

**CON EDISON (Continued)** **S116043817**

concentrations of petroleum-related VOCs (BTEX)within the eight soil vapor /gas samples ranged from
0 ug/m3 to 1.81ug/m3. . The chlorinated solvents detected include 1,1,1,-trichloroethane (TCA)at a
concentration of 2.20 ug/m3 in one of the eight samples, carbon tetrachloride ranged from 0.22
ug/m3 to 0.4 ug/m3, tetrachloroethene (PCE) at a concentration of 0.33 ug/m3; . The chlorinated VOs
1,1-dichloroethene, cis-1,2 dichloroethene, methylene chlorine, trichloroethene (TCE)and vinyl
Chloride were not detected within any of the soil vapor samples . All chlorinated VOCs were
detected below the monitoring level ranges established within the NYSDOH soil vapor guidance
matrix. 3/31/21- Zhune- Kevin Brusee sent the RAWP dated April 2020 approved by the office of
environmental Remediation. 5/8/21-Zhune-Kevin Brusee sent the Spill Closure Letter dated March 11,
2021. Conclusions ---------- Gasoline related VOCs were detected above Unrestricted Use SCOs
within a surface (0-2 ft)soil sample collected in the northeast of the property. Delineation
sampling indicated the impacted area was smaller than 20ft by 20ft area. On March 5,2021 a25ft by
45 ft area was over excavated and transported to Clean Earth North Jersey for proper off site
disposal. No PID or olfactory evidence of petroleum soil was observed after the excavation was
completed, and the laboratory results of endpoint soil samples collected after the excavation was
completed indicate all of the petroleum impacted has been removed. Spill Closed.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

| DEC Memo: | 160712. 8/25/2005 11:15 HRS. N. FRUSTACI #14757, OUTSIDE PLANT MECHANIC A WITH EQUIPMENT GROUP, REPORTS WHILE ON LOCATION FOR TRANSFORMER REMOVAL (ACCOUNT 44098) AT 11:05 HRS. FOUND APPROX. 1 GAL. OIL SOAKED IN DIRT ON FLOOR OF TM-817 (FEEDER 6B56). TRANSFORMER WAS PREVIOUSLY DRAINED OF OIL AND HAS NOW BEEN REMOVED FROM STRUCTURE. HE IS UNABLE TO GET A LIQUID SAMPLE FROM STRUCTURE. HE SPOKE WITH ENV DESK SUPERVISOR D.HEARNS AND REPORTED THAT OIL LEAKED FROM PRIMARY CHAMBER INTO A PLASTIC BAG THAT HAD BEEN PLACED TO CONTAIN OIL. BASED ON THAT INFORMATION THIS IS BEING CONSIDERED A SPILL OF TRANSFORMER OIL. HEARNS INSTRUCTED HIM TO TAKE A LIQUID SAMPLE OF TRANSFORMER OIL THAT HAD LEAKED INTO PLASTIC BAG. SPILL APPEARS TO BE CONTAINED. NO SEWERS OR WATERWAYS APPEAR TO BE AFFECTED. NO PRIVATE PROPERTY AFFECTED. NO FIRE OR SMOKE INVOLVED. ENV STOP TAG # 45415 PLACED. LIQUID SAMPLE TAKEN ON E PRIORITY TURNAROUND. CHAIN OF CUSTODY FORM DD-14516. CLEANUP PCB PENDING RESULTS FROM CHEM LAB. ** TRANSFORMER INFORMATION FROM E.C.C. WAREHOUSE: ** Serial ID: 1219011, MFG Code: WE, KVA: 500, Mfr Date: 12/01/1931, Install Date: 01/01/1969 ** HISTORICAL PCB RESULTS AS OF 10/02/2002: 4 PPM, LAB SEQ # 02-00251-012. -- W. WAINWRIGHT #17344 -- 8/25/2005 12:05 HRS. -- N. FRUSTACI REPORTS CONE HIVES ON LOCATION MAINTAINING ACCESS. D. HEARNS SPOKE WITH EQUIP. GROUP SUPERVISOR G. ROSADO AND CONE HIVES WILL REMAIN ON LOCATION UNTIL PCB RESULTS ARE RECEIVED AND THEY ARE RELIEVED BY BROOKLYN ENV OPS FOR CLEANUP OF EMPTY STRUCTURE. -- W.W. #17344 -- 8/26/05 0046HRS LAB RESULT RETURNED 6 PPM LSN-05-08955-001 UPDATE 26-AUG-2005 07:30 HRS. AS PER A CONVERSATION BETWEEN ENVIR. OPER. O.S. E.WILLIAMS AND O.G.S. D.HEARNS: DUE TO THE WALLS OF STRUCTURE IN NEED OF REPAIR, (SAFE ACCESS) INCIDENT 160712 WILL BE REMOVED FROM THE 72HR CLOCK AND RE-CLASSIFIED AS SPILL- DIELECTRIC FLUID. SSC DEPT. HAS BEEN CONTACTED TO MAKE REPAIRS. C.HOGAN 07511 |
| Remarks: | Caller reports spill from a transformer in a manhole. Spill is |

**TM 817 (Continued)** **S107408510**

contained and ConEd will be doing the cleanup. Coming off the 72 hour clock. Walls of structure need to be repaired before cleanup. Lab results 6ppm. Ref #106712. No to questions 1 through 4 and yes to number 5.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

| DEC Memo: | 8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 12/27/2012 - Sangesland spoke to Charlie from Environmental Business Co. Problem was with a 550 gal buried waste oil tank. Property was being sold, buyer ran a tank test and it failed. Later RP did a Phase 2 soil borings around the tank and they were clean. Another company did Another Phase 2 soil borings around the tank again and they also came up clean. Charlie from Environmental Business Co. will send an e-mail to DeMeo showing all the data and requesting a closure 1/16/13 TJD File review. Property owner is requesting closure of spill originally reported as a tank test failure associated with a 550 UST - currently storing waste oil at a vehicle repair facility. Owner of the property has performed a subsurface investigation as part of a planned redevelopment (mixed use - commercial/residential) of this property. Laboratory results of collected samples reveal exceedances to RSCO for SVOC's and metals in several samples. UST which failed tightness testing remains at site - it is unclear if the tank is in service based upon the documentation submitted. Owner's consultant current proposal includes request for spill closure followed by removal and managemnent of contaminated soils during redevelopment activities at this site and an unspecified later date. Consultant further recommends to owner that in lieu of the potentially costly tasks of conducting a required site assesment in accordance with applicable DEC regulations the tank should be removed and replaced with an aboveground tank. Owner of property has failed to provide DEC with passing tightness test associated with UST. Additionally, the owner's consultant recommends removal of contaminated soils identified during sub-surface investigation and removal of UST following the closure of open spill file. Based upon documentation submitted spill is not currently elidgible for closure. 4/4/13 TJD File review. In April 2011 Prestige Environmental performed (3) borings around in service 550 UST (Waste Oil) - no VOC's or SVOC's were identified which exceed RSCO, however tank had previously been tightness tested and failed (gross failure). In November 2012, Environmental Business Consultants (EBC) performed a second round of sampling (2 borings) around the in service waste oil tank with similar findings - no RSCO exceedances. A closure request was submitted to DEC - as the tank remains in service DEC required a second tightness test as the initial test performed on 4/12/11 failed. A second attempt at testing UST failed on 2/7/13, reported that vent pipe could not be located or isolated to perform test. The owner proceeded with a tank abandonment on 2/21/13 at which time (2) holes were cut in tank bottom following the removal of 400 gallons of product/sludge. Soil samples were then collected from directly beneath tank for laboratory analysis - all target analytes are reported below CP-51 and Part 375 allowable concentrations. An affadavid of proper abandonment has been provided by EBC as part of closure report dated 3/7/13. Based upon above investigation the reported spill associated with 550 waste oil tank is closed. All |

**COMMERCIAL SITE - TTF (Continued)** **S111012256**

other environmental conditions identified during previous investigations, primarily consisting of minor elevated concentrations of SVOC's and metals attributed by current and previous consultants, are to be properly managed during redevelopment of property in coordination with and under direct oversight of NYC Office of Environmental Remediation. No further action is required at this time.
Not reported

Remarks: Caller reporting a tank test failure.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
