Re: Phase I Environmental Site Assessment
92-94 North 9th Street
Brooklyn, New York

Dear Mr. Ben-Kimon:

Pursuant to our proposal dated June 14, 2024, GZA is pleased to submit the appended Phase I Environmental Site Assessment Report for the above-referenced Subject Property. GZA completed this Phase I Environmental Site Assessment in general conformance with the guidelines described in ASTM International's *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-21).

We hope this satisfies your present needs. If you need additional information, please contact Victoria Whelan at (212) 594-8140.

Very truly yours,

GZA GEOENVIRONMENTAL OF NEW YORK

EXECUTIVE SUMMARY

E&M Builders (also referred to herein as "Client" or "User") retained GZA GeoEnvironmental of New York (GZA) to perform a Phase I Environmental Site Assessment (ESA) of the target property located at 92-94 North 9th Street, Brooklyn, New York (Subject Property). GZA performed this Phase I ESA in connection with the Client's planned purchase of the Subject Property.

This Phase I ESA was performed in general conformance with the scope and limitations of ASTM International's *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-21) and included our visual observation of the Subject Property; a review of historical information, environmental databases, and information provided by the User; and one or more interviews with a current representative of the Subject Property. GZA prepared this Phase I ESA Report in conformance with the limitations presented in **Section 14.0** and with the terms and conditions of our proposal dated June 14, 2024, which are included in **Appendix A**. Limiting conditions and/or deviations from ASTM E1527-21 are described in **Section 1.4** of this Phase I ESA Report.

Records from as early as 1897, showed the Subject Property as subdivided residential lots (with noted addresses 92 and 94 North 9th Street) that were improved by two-story dwellings. By 1965 the Subject Property is shown as one combined tax parcel that is used as a parking lot. By the mid-1980s, the Subject Property was converted from a parking lot to a lumber storage yard by 1986 and remained until the late 2000s. At the time of GZA's Site reconnaissance on June 24, 2024, the 92 and 94 North 9th Street was a vacant property.

Historic records of the surrounding properties indicate that from as early as 1897, the surrounding vicinity has been mostly developed with 1-story to 2-story dwellings, commercial practices, and multiple industrial and manufacturers. By the early 1900s the surrounding area was developed with multiple residential, commercial and industrial properties which included ironworks, manufacturing businesses, chalk mills, and coal companies. There is Public School No. 38 to the southeast. By the mid early 1940s several properties to the south and west are depicted as having gasoline tanks on their properties, along with an automobile repair shop to the south as well. Adjoining the Subject Property to the north becomes a woodworking company during this time. At the time of GZA's site reconnaissance on June 24, 2024, the surrounding vicinity was mainly occupied by residential and commercial uses with some manufacturing and industrial practices to the northwest.

Based on the findings of our Phase I ESA and on our professional judgment, GZA has identified the following in connection with the Subject Property:

Recognized Environmental Conditions (RECs)

- The adjoining property across North 9th Street has been utilized for woodworking from at least 1940 to 2007. As indicated on the Sanborn Fire Insurance Maps, the Subject Property was a lumber storage yard from at least 1986 through to 2007. The Subject Property historic use as a lumber storage yard along with the neighboring lumber manufacturer processes could have a negative impact on the Subject Property and therefore, since the Subject Property does have an e-designation, a subsurface investigation should be completed under the auspices of the New York City Office of Environmental Remediation (NYCOER).

Controlled Recognized Environmental Conditions (CRECs)

- In GZA's opinion, this Phase I ESA revealed no evidence of CRECs in connection with the Subject Property.

Historical Recognized Environmental Conditions (HRECs)

- In GZA's opinion, this Phase I ESA revealed no evidence of HRECs in connection with the Subject Property.

***De Minimis* Conditions**

- This Phase I ESA revealed no *de minimis* conditions in connection with the Subject Property.

Significant Data Gaps

In GZA's opinion, based on the information made available during this assessment, we did not encounter significant data gaps that affected our ability to identify RECs, CRECs, or HRECs at the Subject Property.

Business Environmental Risks

This Phase I ESA revealed the following Business Environmental Risks (BERs):

- The E Designation E-138 is listed on both parcels of the Subject Property for Hazardous Materials, Air Quality, and Noise. This requires soil, soil vapor, and groundwater sampling to be performed on the Subject Property before redevelopment is approved.

- Future redevelopment activities at the Subject Property might encounter residual contamination in soil or groundwater related to historic use. Impacted material must be managed either on or off the Subject Property in conformance with applicable federal, state, and local regulations.

- If dewatering is required for construction, groundwater sampling and testing in conformance with federal, state, and/or local sewer discharge permit/approval requirements may be required.

1.0 INTRODUCTION

This Phase I Environmental Site Assessment Report (Phase I ESA Report) presents the field observations, results, and opinions of a Phase I ESA conducted by GZA GeoEnvironmental, Inc. (GZA) for E&M Builders (also referred to herein as "Client" or "User") at the target property identified as 92-94 North 9th Street, Brooklyn, New York (Subject Property). GZA prepared this Phase I ESA Report in conformance with the limitations presented in **Section 14.0** and with the terms and conditions of our proposal dated June 14, 2024, which are included in **Appendix A**. This Phase I ESA Report is subject to modification if GZA or another party develops subsequent information.

1.1 REASON FOR PERFORMING THE PHASE I ENVIRONMENTAL SITE ASSESSMENT

GZA understands that this Phase I ESA was requested as part of environmental due diligence in support of the proximate purchase of the Subject Property. We understand that this Phase I ESA is not funded with a federal grant under the US Environmental Protection Agency (EPA) Brownfield Assessment and Characterization Program or the US Small Business Administration, and that an evaluation of controlled substances at the Subject Property is not required.

1.2 PROJECT OBJECTIVES

We designed the Scope of Services described below in general conformance with ASTM International's *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-21). The objectives of this Phase I ESA were:

- To render an opinion as to whether surficial or historical evidence indicates the presence of recognized environmental conditions (RECs) that could result in the presence of hazardous substances or petroleum products in the environment, as defined in ASTM E1527-21; and
- To permit the User of this Phase I ESA to satisfy the requirements for qualifying for certain Landowner Liability Protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

1.3 DEFINITIONS

As defined in ASTM E1527-21:

- A REC is "(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment."
- A "Controlled REC" (CREC) is a REC "affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority…with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls…" This term applies to a site that has reached regulatory closure with the implementation of an engineering control, such as an impermeable cap, an institutional control, such as a deed restriction or activity and use limitation (AUL), and/or other property use limitation.

- A "historical recognized environmental condition" (HREC) is "a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations,)…"

- A "*de minimis* condition" is "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." ASTM E1527-21 does not consider *de minimis* conditions to be RECs.

- A "data gap" is "a lack of or inability to obtain information required by [E1527-21] despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice…" A data gap is only considered significant if other information and/or the Environmental Professional's experience raises reasonable concerns involving the data gap.

- A "business environmental risk" (BER) is "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily limited to those environmental issues required to be investigated [under ASTM E1527-21]." BERs may involve one or more of the non-scope considerations outlined in ASTM E1527-21 including, but not necessarily limited to, asbestos-containing building materials, lead paint, lead and arsenic in drinking water, radon, wetlands, cultural and historical resources, regulatory compliance, industrial hygiene, health and safety, indoor air quality, and mold.

1.4 SCOPE OF SERVICES

GZA's Scope of Services consisted of the following activities:

- A review of federal and State regulatory agency databases for the Subject Property and the minimum applicable search distances from the Subject Property;

- Contact with certain local regulatory agencies to inquire about environmental conditions at the Subject Property and in its vicinity;

- A review of the Subject Property history through available Standard Historical Sources;

- A review of previous environmental reports prepared for the Subject Property;

- A site reconnaissance to observe current Subject Property conditions for evidence of recognized environmental conditions;

- The completion of a reconnaissance of the Subject Property vicinity;

- A review of adjoining properties to identify likely uses of hazardous substances or petroleum products;

- Interview with the Key Site Manager, as well as certain other available occupants and major tenants, regarding the current and past Subject Property usage and facility operations; and

- The preparation of this Phase I ESA Report presenting our findings.

In GZA's opinion, our ESA involved no significant deviations from ASTM E1527-21.

- ASTM identifies a title search for environmental liens as a User Responsibility and recommends that the User provide it to the Environmental Professional for review. The Client did not provide a title search for our review. In GZA's opinion, however, this is not a significant deviation.

- Past owners were not interviewed as part of this assessment. However, in GZA's experience, it is unlikely that the past owners would provide information not obtained from other sources. It is GZA's opinion that this is not a significant deviation.

- In some cases, historical sources were reviewed at intervals greater than 5 years. In GZA's opinion, based on the information provided, this is not a significant deviation.

This Phase I ESA does not include an evaluation of environmental issues or conditions that ASTM E1527-21 considers non-scope considerations.

2.0 DESCRIPTION OF SUBJECT PROPERTY AND VICINITY

GZA obtained the following information from our site reconnaissance, our research, and our interviews with people knowledgeable about the Subject Property. Photographs depicting Subject Property conditions during GZA's reconnaissance are presented in **Appendix B**.

2.1 SUBJECT PROPERTY LOCATION

The Subject Property is located at 92-94 North 9th Street and is comprised of two New York City (NYC) tax lots in the Greenpoint neighborhood of Brooklyn, New York. The Subject Property is identified as Block 2310 and Lots 9 and 10, respectively on the Brooklyn Tax Map. The Subject Property is a vacant lot on the south side of North 9th Street. The surrounding properties are residential to the east, south, and west, a hotel to the northwest and an active construction site to the north. A topographic map showing the location of the Subject Property is provided as **Figure 1**.

2.2 DESCRIPTION OF SUBJECT PROPERTY AND BUILDINGS

The Subject Property includes two adjoining rectangular shaped NYC tax lots totaling 3,334 square feet. The Subject Property has approximately 33 feet of street frontage along North 9th Street and is enclosed by chain-link fence at the property line. The two tax lots are paved with asphalt throughout the entirety of the Subject Property. The Subject Property is undeveloped.

2.3 CURRENT SUBJECT PROPERTY USE

At the time of GZA's site reconnaissance, North Wythe LLC, the current owner, was not using the Subject Property and is a vacant lot.

2.4 ADJOINING PROPERTIES

The following table lists the properties that adjoin the Subject Property and describes their current use.

Direction	Street Address/Location	Name (as applicable) and Current Use
Northwest	97 Wythe Avenue, Brooklyn, New York	The property 0.49-acres developed with a hotel.
North	93 North 9th Street, Brooklyn, New York	The property is a 0.23-acre active construction site when completed will be an office building.
South	95 North 8th Street, Brooklyn, New York	The property is a 0.06-acre apartment building.
South	97 North 8th Street, Brooklyn, New York	The property is a 0.06-acre apartment building.
East	96 North 9th Street, Brooklyn, New York	The property is a 0.04-acre duplex.
West	84 North 9th Street, Brooklyn, New York	The property is a 0.31-acre apartment building.

2.5 VICINITY PROPERTIES

As part of this Phase I ESA, GZA performed a reconnaissance of the immediate Subject Property and its vicinity. The surrounding area is primarily residential with some office and commercial practices.

3.0 PHYSICAL SETTING

The following subsections provide information regarding the general physiographic, geologic, hydrogeologic, and hydrologic conditions in the area of the Subject Property.

3.1 REGIONAL PHYSIOGRAPHY

Based on a review of the U.S. Geological Survey (USGS) topographic map Brooklyn Quadrangle, New York, 7.5-minute series, 2023, the Subject Property is situated at an approximate elevation of 30 feet above mean sea level (amsl). The topographic gradient near the Subject Property slopes gently to the northwest. The nearest water body is the East River, which is located approximately 0.3 miles west of the Subject Property.

3.2 GEOLOGIC, HYDROGEOLOGIC, AND HYDROLOGIC CONDITIONS

Based on US Department of Agriculture Soil Conservation Service, State Soil Geographic Dataset 2 (STATSGO2), overburden at the Subject Property consists of urban fill. Based on the 1994 USGS publication, Bedrock and Engineering Geologic Maps of New York County and Parts of Kings and Queens Counties, New York, and Parts of Bergen and Hudson Counties, New Jersey (Baskerville 1994), bedrock near the Subject Property consists of white to pinkish white medium grained gneissic quartz-microcline-muscovite granite and thinly laminated gray biotite-muscovite-quartz schist interbedded with gray garnet-kyanite-muscovite-biotite-oligoclase-quartz schist with unevenly foliated gray sillimanite-plagioclase-muscovite schist, and greenish-black amphibolite of the Hartland Formation. We anticipate bedrock to be encountered at depths of more than 100 feet below ground surface (bgs).

Based on USGS Water Table Altitude in Kings and Queens Counties, New York (Monti Jr. and Chu, 1997), the estimated depth to groundwater is approximately between 5 and 10 feet bgs. Based on local topography and surface water flow patterns , the inferred direction of groundwater flow is northwesterly. We subsequently refer to upgradient and downgradient properties in this Phase I ESA Report based on the inferred northwesterly direction of groundwater flow. However, the localized direction of groundwater flow near the Subject Property

might vary because of underground utilities, subsurface preferential pathways, variations in weather, or heterogeneous geological and/or anthropogenic conditions.

4.0 HISTORICAL USE INFORMATION

The Subject Property history was developed from "Standard Historical Sources" as defined in ASTM E1527-21, from available files at the NYC Department of Building (DOB) Building Information System (BIS), New York State Department of Environmental Conservation (NYSDEC), NYC Department of Finance (DOF) Automated City Register Information System (ACRIS), NYC Open Accessible Space Information System (OASIS), NYC Office of Environmental Remediation (OER) Searchable Property Environmental E-Database (SPEED), NYC Department of City Planning (DCP), and from interviews with knowledgeable parties. ASTM indicates that "all obvious uses of the property shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier. ASTM further indicates that "data failure is not uncommon" when trying to establish the historical use of a property. Specific information obtained from standard historical sources is contained in the following subsections.

4.1 SUBJECT PROPERTY AND AREA HISTORY SUMMARY

Records from as early as 1897, showed the Subject Property as subdivided residential lots (with noted addresses 92 and 94 North 9th Street) that were improved with two-story dwellings. By 1965 the Subject Property is shown as one combined tax parcel that is used as a parking lot. By the mid-1980s, the Subject Property was converted from a parking lot to a lumber storage yard by 1983 and remained until the late 2000s. At the time of GZA's Site reconnaissance on June 24, 2024, the 92 and 94 North 9th Street was a vacant property.

Records indicate that the surrounding area has been historically densely developed to residential and commercial use properties. Records from as early as 1897, showed the surrounding vicinity mostly urban developed with 1-story to 2-story dwellings, commercial practices, and multiple industrial and manufacturers. By the early 1900s the area was developed with multiple residential properties and commercial properties, and industrial properties which included ironworks, manufacturing businesses, chalk mills, and coal companies. Public School No. 38 is located to the southeast. By the mid early 1940s several properties to the south and west are depicted as having gasoline tanks on their properties, along with an automobile repair shop to the south as well. Adjoining the Subject Property to the north becomes a woodworking company during this time. For the next several decades the vicinity remains relatively consistent with some manufacturing practices being replaced by other industrial practices, a recycle facility to the northwest, and the removal of the three gas tanks depicted on the historical fire insurance maps. At the time of GZA's site reconnaissance on June 24, 2024, the surrounding vicinity was mainly occupied by residential and commercial uses with some manufacturing and industrial practices to the northwest.

4.2 AERIAL PHOTOGRAPH REVIEW

GZA consulted historical aerial photographs provided by Environmental Data Resources, Inc., (EDR). The table below contains GZA's description of the Subject Property and vicinity properties as shown in the aerial photographs. The Aerial Photographs are provided in **Appendix C**.

Year	Scale	Description of Subject Property	Description of Vicinity
1924, 1944, 1951, 1954, 1961	1" = 500'	The Subject Property is depicted as having two residential buildings on the property.	The vicinity is depicted as being mostly residential and commercial to the south and east. To the north are several massive

Year	Scale	Description of Subject Property	Description of Vicinity
			ASTs and industrial buildings. To the west is depicted as warehouses, dock yards, and storage for the docks. The southern portion of the vicinity is blacked out on the 1944 photograph.
1966, 1974, 1976, 1980	1" = 500'	The Subject Property is depicted as two adjoining vacant lots that are used as parking with the previous two residential buildings now demolished.	The vicinity is depicted as being similar to the 1961 photograph, with additional residential properties to the north.
1984, 1991, 1994, 2002, 2006, 2011	1" = 500'	The Subject Property appears to be vacant.	The vicinity is depicted as being similar to the 1980 photograph, with additional developments of residential and commercial properties scattered throughout.
2015	1" = 500'	The Subject Property appears to be vacant.	The vicinity appears to be similar to the 2011 photograph with the exception of some properties being shown as construction sites to the southeast, north, and the adjoining property across North 9th Street.
2019	1" = 500'	The Subject Property appears to be vacant.	The vicinity appears to be similar to the 2015 photograph with the exception of a property being shown as a construction site to the northeast and the previous construction sites being completed with the adjacent property to the north depicted as a hotel.

4.3 FIRE INSURANCE MAPS

GZA consulted historical fire insurance maps provided by EDR. The table below contains GZA's description of the Subject Property and vicinity properties as shown in the historical fire insurance maps. The Fire Insurance Maps are provided in **Appendix D**.

Year	Description of Subject Property	Description of Vicinity
1897	The Subject Property is depicted as being two separate lots each improved with a 2-story residential dwelling, Lot 10 is also improved with a shed at the rear of the property.	The vicinity is mostly depicted as being developed with residential and storefronts to the east, north and south. To the northeast there is depicted as Taylor & Co Iron Foundry, to the west adjoining the property is a Paper Box Factory, further to the west is Engine no 112, to the northwest is Farrington & Whitney Lock & Hardware Manufacturing and J Parkinson which has two separate coal sheds, to the north is HECLA Iron Works, Tuttle & Bailey Manufacturing Co Hot Air Register & Ventilator Factory, and Brooklyn Color Co. To the southeast Public School No 38 is depicted.

Year	Description of Subject Property	Description of Vicinity
1905	The Subject Property is depicted as being similar to the 1897 map.	The vicinity is depicted as being similar to the 1897 with a few exceptions, the adjoining property to the west is now depicted as a storage space, further to the west Is E.E. Wirths & Co Chalk Mills, Tuttle & Bailey Manufacturing Co. expanded their operation south replacing several residential buildings and the Taylor & Co Iron Foundry, Hecla Iron Works also expanded to the north and replaced the Brooklyn Color Co., to the northwest Palmer's Docks Stable, Brooklyn Galvanizing & Manufacturing Co, Parkinson Coke & Coal Co., and W.H. Grimmel & Sons Glassware are depicted.
1916	The Subject Property is depicted as being similar to the 1897 map.	The vicinity is depicted as being similar to the 1905 map, the adjacent property to the west is now depicted as being vacant, further to the west American Kalamein Works Inc is now depicted, the adjacent property to the north is now depicted as not being residential and now having a Oxy-Acetylene Welding.
1942	The Subject Property is depicted as being similar to the 1916 map.	The vicinity is depicted as being mostly residential and commercial with industrial and manufacture practices to the west and north. To the southeast of the Subject Property is depicted as a truck garage with a gasoline tank, further southeast is another garage with a 500-gallon gasoline tank, and to the south an automobile repair shop is depicted as well. The adjacent property to the west is now depicted as a manufacturing flat with a 5,000-gallon water tank. Adjoining to the north is now depicted as a Coal Yard, a wood tank manufacturing, and Lumber Sheds. To the north several new industrial and manufacturing practices are depicted Horton Wiping Materials Co. Inc., Register Gaille Manufacturing Co. Inc., American Beverage Corporation, Carl Schultz Divn – Mineral Waters that has a 10,000-gallon and a 25,000-gallon water tank located on the property, and Dimuth Glass Works. To the northwest an Asbestos grinding warehouse, John Morrell & Co. Meat Packing are now depicted. To the west is now depicted as having New York Quinine & Chemical Works Inc., Brooklyn Coal Co., and Ash Can Manufacturing which has one gasoline tank on the property.
1951	The Subject Property is depicted as similar to the 1942 map, with Lot 9 now depicted as a carpentry practice instead of a residential dwelling.	The vicinity is depicted as similar to the 1942 map, the adjoining property to the north is now depicted as a woodworking business, to the northwest the asbestos grinding warehouse is now American Molding Powder and Chemical Corporation. To the southeast a metal spinning manufacturer is now

Year	Description of Subject Property	Description of Vicinity
		depicted where the public school once was, and a new iron works is now depicted on North 8th Street.
1965	The Subject Property is depicted as being one lot and as a parking lot.	The vicinity is depicted as similar to the 1951 map, with American Beverage Corp now becoming Fock Warehousing & Bottling, the gasoline tank to the south and the gasoline tank to the west of the Subject Property are now depicted as being removed. A new steel manufacturer is to the northwest (Parker Steel).
1978, 1979, 1980, 1981, 1982, 1983	The Subject Property is depicted as being similar to the 1965 map.	The vicinity is depicted similar to the 1965 map with the exception of the second gas tank to the south being depicted as removed and the coal yard to the west not being present.
1986, 1987, 1988, 1989	The Subject Property is depicted as a lumber storage yard.	The vicinity is depicted as similar to the 1983 map, with the exceptions that a majority of named manufacturing and industrial practices to the west and northwest are not named any longer on the maps.
1991, 1993, 1995, 1996	The Subject Property is depicted as being similar to the 1989 map.	The vicinity is depicted as similar to the 1989 map with the exception of a new recycling facility to the northwest.
2001, 2002, 2003, 2004, 2005, 2006, 2007	The Subject Property is depicted as being similar to the 1989 map.	The vicinity is depicted as similar to the 1996 map with the exception of the adjacent property to the west now being listed as loft apartments and minor changes to residential and commercial properties around the vicinity.

4.4 PROPERTY TAX FILES

GZA consulted property tax files available at NYCDOF ACRIS, which provides records from 1969 to 2012 for the property. The property records for the Subject Property show a deed from 2012 that establish North Wythe LLC as the owner of the Subject Property. The property tax documents are included in **Appendix E.**

4.5 LAND TITLE RECORDS

The review of a title search helps to identify the historical use of the Subject Property, as well as applicable environmental liens and Activity and Use Limitations (AULs); ASTM identifies a title search as a User Responsibility. No title information was provided by the Client as part of the User's Responsibilities, and the completion of a title search was not included in the scope of this assessment.

4.6 HISTORICAL USGS TOPOGRAPHIC MAPS

GZA reviewed historical USGS topographic maps provided by EDR. The table below contains GZA's description of the Subject Property and vicinity properties as shown on the historical topographic maps. The historical topographic maps are provided in **Appendix F**.

Year	USGS Map Quad	Description of Subject Property	Description of Vicinity
1897, 1898, 1900	Brooklyn	The property is depicted in a highly developed area approximately between 30 and 40 feet amsl.	The vicinity is depicted as highly developed with a high point to the south depicted at 60 feet amsl.
1947	Brooklyn	The property is depicted in a highly developed area approximately between 30 and 40 feet amsl.	The vicinity is depicted as highly developed with a high point to the south (Eastern District High School) depicted at 60 feet amsl.
1956	Brooklyn	The property is depicted in a highly developed area approximately between 30 and 40 feet amsl).	The vicinity is depicted as highly developed with a high point to the south (Eastern District High School) depicted at 60 feet amsl. The Brooklyn Queens Expressway is under construction during this topographic map.
1967, 1979, 1995, 2013, 2016, 2019	Brooklyn	The property is depicted in a highly developed area approximately between 30 and 40 feet amsl.	The vicinity is depicted as highly developed with a high point to the south (Eastern District High School) depicted at 60 feet amsl. The Brooklyn Queens Expressway is now depicted as being completed on these topographic maps.

4.7 CITY DIRECTORIES

GZA reviewed historical city directory abstract provided by EDR. Addresses in the immediate vicinity of the Subject Property were reviewed for North 9th Street and Wythe Avenue The table below contains GZA's description of the Subject Property and adjoining properties as presented in the historical city directory abstract. The historical city directories are provided in **Appendix G**.

Year(s)	Listings for Subject Property 92 North 9th Street
1928, 1934	Residential Occupants

Year(s)	Listings for Subject Property 94 North 9th Street
1934	Residential Occupants

Year(s)	Listings for 93 North 9th Street, adjoining property to the north
2005	D Edgar Inc
1960-2000	Columbia Woodworking Co
1934	King Chas Scrap Metals
1928	Chas Iron & Metals

Year(s)	Listings for 96 North 9th Street, adjoining property to the east
2005-2020	Residential Occupants
1985	Rosenwach Inc, Sudol Eugienuisz
1970-1976	Allied Tower & Tank Co Inc, Atlantic Tank Corp, Rosenwach Tank Co Inc, United Tower Maintnce Inc.
1960, 1965	Allied Tower & Tank Co Inc, Rosenwach Tank Co Inc
1934	H, Cikanovich Anthony Tailor H, Cikanovich Anthony Jr Clk R, Cikanovich Bruno Baker R

Year(s)	Listings for 97 Wythe Avenue (87 North 9th Street), adjoining property to the northwest
1985-2014	Rosenwach Tank Co Inc.
1928	North Ninth Street Lumber Co, Rosenwach Julius Wood Tanks

Year(s)	Listings for 84 North 9th Street, adjoining property to the west
2020	Lido Knitg Mills Inc, Leo Knitting Corp, Mindset Create LLC, Tala Pearl LLC, Residential Occupants.
2010-2017	Lido Knitg Mills Inc, Residential Occupants
2005	Residential Occupants, Ola LTD LLC, DMJH Co
2000	Amrcn Trying Inc, Lido Kntg Mils Inc, Pnths Indstrs Drp
1995	Hard to Beat Movers Inc, Penthouse Industries
1992	Penthouse Industries Manufactures, Spread Drapenes & Curtains
1985	Omega Uphlstring Inc, Penthouse Industries
1976	Elman Knitg Mills Inc
1973	D&R Cutting Inc, Elman Knitg Mills Inc
1970, 1965	Advance Cushion Corp, Elman Knitg Mills, Inc, Table Art Mat Corp
1960	Advance Cushion Corp, Stonie Knit Inc, Table Art Mat Corp, Vivid Fashion Knitwear Inc.
1949	Residential Occupants, Radio Receptor Co Inc
1934	Daneau Florence EMP Cable Radio Tube Corp, Sheridan T W & C B Co, Legrand L Clark Pres Fred S Lipson Sec-Treas Mach MA

4.8 BUILDING DEPARTMENT RECORDS

GZA reviewed building department records available from the NYC DOB BIS for the Subject Property. No temporary or permanent Certificate of Occupancy is listed on the NYC DOB BIS for the Subject Property. No information relating to the existence of RECs at the Subject Property was available in the building department records reviewed by GZA.

4.9 OTHER HISTORICAL RECORDS

GZA requested access to records through a Freedom of Information Law (FOIL) request from the following:

- New York State Department of Environmental Conservation (NYSDEC)
- New York City Department of Environmental Protection (NYCDEP)
- New York State Department of Health (NYSDOH)
- New York City Office of Environmental Remediation (NYCOER)
- New York City Department of Buildings (NYCDOB)
- New York City Department of Health and Mental Hygiene (NYCDOHMH)
- New York City Fire Department (FDNY)

FOIL correspondence is included in **Appendix H**. These records were not available within the timeframe allotted for this Phase I ESA.

5.0 PREVIOUS INVESTIGATIONS

GZA requested information regarding previous site investigations from the Client. According to the Client, no such documentation was available.

6.0 SITE RECONNAISSANCE

The purpose of GZA's site reconnaissance was to observe current Subject Property conditions for evidence of recognized environmental conditions that could result in the presence of hazardous substances or petroleum products in the environment at the Subject Property. GZA Geologist I Mark Frey conducted a site reconnaissance at the Subject Property on June 24, 2024. Andrew Manasia, Senior Associate for Terra CRG, accompanied GZA during the site reconnaissance. GZA documented its observations and photo-documented the pertinent features and/or areas of environmental concern which we reference in this Phase I ESA Report. Selected photographs are included in **Appendix B**, and **Figure 2** – **Subject Property Plan** depicts pertinent features of the property.

Limitations to GZA's site reconnaissance, if any, are noted in **Section 1.4**.

The following table discusses features of potential environmental concern that we identified at the Subject Property.

Feature	Description
Aboveground storage tank (AST) systems	Not observed
Underground storage tank (UST) systems	Not observed
Chemical or petroleum storage or handling areas	Not observed
Chemical waste or petroleum waste storage or handling areas	Not observed
Dumpsters	Not observed
Floor drains, trenches, sumps and associated piping	Not observed
Oil/water separators	Not observed
Storm water drains, grates and associated piping	Not observed
Drainage swales, culverts, impoundments, and surface water bodies	Not observed
Septic systems, leach fields, seepage pits, and dry wells	Not observed
Open pipe discharges	Not observed
Landfills and solid waste dumping	Not observed

Feature	Description
Historical fill or other fill material	Not observed
Staining or stressed vegetation	Not observed
Strong, pungent, or noxious odors	Not observed
Electrical transformers or capacitors	Not observed
Hydraulic equipment, including lifts, elevators, and compactors	Not observed
Active or inactive production wells	Not observed
Monitoring wells, former boreholes, or other evidence of environmental investigations	Not observed
Other observations potentially indicative of the presence of RECs	Not observed

7.0 REGULATORY DATABASE REVIEW

This section is based on publicly available information from various federal, state, and local agencies that maintain environmental regulatory databases.

7.1 FEDERAL AND STATE ENVIRONMENTAL RECORD SOURCES

Federal and state databases were searched by EDR, a professional data search company, and search results were provided to GZA in a report dated June 20, 2024. The following table indicates the databases searched by EDR, the minimum search distances from the Subject Property, and the number of properties that appear on the database within the minimum search distances used. Descriptions of the federal and state databases, and the dates on which EDR accessed these databases, are provided in EDR report (see **Appendix I**).

Federal and State List	Approximate Minimum Search Distance*	Subject Property and Adjoining Properties	# Sites Within Search Distance
NPL	*1 mile*	0	2
Delisted NPL	*½ mile*	0	0
SEMS	*½ mile*	0	1
SEMS ARCHIVE	*½ mile*	0	4
RCRIS CORRACTS	*1 mile*	0	1
RCRIS-TSD	*½ mile*	0	1
RCRIS-LQG/SQG	*Subject Property and adjoining properties*	0	0
Federal IC/EC Registries	*Subject Property only*	0	0
ERNS	*Subject Property only*	0	0
State Equivalent NPL	*1 mile*	0	0
State Equivalent CERCLIS	*½ mile*	0	0
SWMF	*½ mile*	0	16

Federal and State List	Approximate Minimum Search Distance*	Subject Property and Adjoining Properties	# Sites Within Search Distance
State Landfill and/or Solid Waste Disposal Site	*½ mile*	0	9
Leaking Underground Storage Tanks (LUSTs)	*½ mile*	1	28
Registered USTs	*Subject Property and adjoining properties*	0	0
State IC/EC Registries	*Subject Property only*	0	0
Voluntary/Brownfield Cleanup Program Sites	*½ mile*	0	84
NY Spills	*1/8 mile*	0	37
EDR Historic Auto	*1/8 mile*	0	1

* The approximate minimum search distance indicates the minimum distance measured from the nearest Subject Property boundary for which EDR performed the database review.

7.2 LISTINGS FOR SUBJECT PROPERTY AND ADJOINING PROPERTIES

The following databases list the Subject Property: E Designation. This E designation would constitute as a REC for the Subject Property.

Name	Lot 9, Tax Block 2310 North 9 Street and Lot 10, Tax Block 2310, North 9 Street
Address	92-94 North 9th Street, Brooklyn, New York
Database(s)	E-Designation
Comments	The Subject Property is listed under the E Designation E-138 for Underground Gasoline Storage Tanks Testing Protocol. A E designation is a consequence of a zoning action that requires a property to be investigated before an owner can obtain a building permit for the redevelopment of the property. This constitutes as a REC for the Subject Property.

The following databases list the adjoining properties to the north and east: E designation, LTanks, and NY Spills. The E designation on the adjoining property to the east is the same as the E designation listed on the Subject Property and will constitute as a REC, the NY Spill and LTank listing will not constitute as a REC due to both being closed.

Name	Lot 11, Tax Block 2310 North 9 Street
Address	96 North 9th Street, Brooklyn, New York
Distance/Direction from Subject Property	4 feet to the east of the Subject Property, Upgradient
Database(s)	E-Designation
Comments	The adjoining property to the east is listed under E Designation E-138 for Underground Gasoline Storage Tanks Testing Protocol. A E designation is a consequence of a zoning action that requires a property to be investigated before an owner can obtain a building permit for the redevelopment of the property.

Name	93 North 9th Street
Address	93 North 9th Street, Brooklyn, New York
Distance/Direction from Subject Property	32 Feet to the north of the Subject Property, Downgradient
Database(s)	LTanks, NY Spills
Comments	The adjoining property is listed in the LTanks database for a spill reported on February 16, 2000, under spill number 9913062. The spill was recorded due to a tank test failure, which was followed by a retest that the tank passed. The tank was eventually removed during renovations in July of 2001. The spill was closed on June 21, 2005, after the DEC reviewed the information provided and therefore does not pose a material threat to the Subject Property. The adjoining property is listed in the NY Spill database for a spill reported on June 26, 2001, under spill number 0103335. The spill was recorded due to a caller reporting the tanks on the property being removed and leaking, endpoint samples were taken and discovered to have slight petroleum contamination. The soil was excavated and removed this was followed by more endpoint samples that results came back acceptable for closing. The spill was closed on October 31, 2005. The spill was closed to the satisfaction of the DEC and therefore does not pose a material threat to the Subject Property.

GZA submitted FOIL requests regarding the E Designation listing for the Subject Property/adjoining properties with OER. A summary of the correspondence is provided in **Section 7.5** below.

7.3 LISTINGS FOR OTHER VICINITY PROPERTIES

The NPL database lists two sites with the NPL designation within the ASTM recommended search radius of the Subject Property. The NPL listings are located over 4,700 feet upgradient from the Subject Property with the EPA IDs NYN000203407 (Meeker Avenue Plume) and NYN000206282 (Newtown Creek). The corrective action process for Meeker Avenue is currently in the remedy selection phase according to the EPA and the Newtown Creek is currently finished with the remedy selection phase and currently awaiting the start of the remedial action. Due to the distance and direction from the Subject Property, the NPLs are not anticipated to impact the Subject Property.

The SEMS database lists one property with the SEMS designation within the ASTM recommended search radius of the Subject Property. The SEMS listing is located over 2000 feet downgradient from the Subject Property with the EPA ID NYC200400950. The site is listed as removal only and does not need any assessment work according to the EPA oversight. Due to the distance and direction from the Subject Property, the SEMs site is not anticipated to impact the Subject Property.

The SEMS Archive database lists four properties with the SEMS Archive designation within the ASTM recommended search radius of the Subject Property. The SEMS Archive listings are located over 700 feet downgradient from the Subject Property with the EPA IDs NYD980532105, NYD001384072, NYN000206659, and NYD980532030. The four sites are listed as listed as finished with the latest finished date being July 2014. Due to the distance and direction from the Subject Property, the SEMs Archive sites are not anticipated to impact the Subject Property.

The Corracts Archive database lists one property with the Corracts designation within the ASTM recommended search radius of the Subject Property. The Corracts facility is located over 2,400 feet downgradient under EPA ID NYD049178296. The site is listed as a storage facility with the last Biennial reporting stopping in 2005. Due to the terminated status of the remedial action, the distance, and direction from the Subject Property the Corracts facility is not anticipated to impact the Subject Property.

The RCRA TSDF Archive database lists one property with the RCRA TSDF designation within the ASTM recommended search radius of the Subject Property. The RCRA TSDF facility is located over 2,400 feet downgradient under EPA ID NYD049178296. Due to the distance and direction from the Subject Property the RCRA TSDF facility is not anticipated to impact the Subject Property.

The SHWS database lists 16 Sites with SHWS designation within the ASTM recommended search radius of the Subject Property. The SHWS are located over 800 feet from the Subject Property with two of the 16 sites being upgradient of the Subject Property. Due to the distance, the SHWS listing is not anticipated to impact the Subject Property.

The SWF/LF database lists nine Sites with SWF/LF designation within the ASTM recommended search radius of the Subject Property. The closest SWF/LF is located 543 feet from the Subject Property, with the nine listings currently being inactive and located down gradient. Due to the distance, the SWF/LF listings are not anticipated to impact the Subject Property.

The NY LTANKs database lists 28 reported spills within the ASTM recommended search radius of the Subject Property. The 28 listings are downgradient from the Subject Property and were reported closed by the NYSDEC at the time of this report. These LTanks do not pose a material threat to the Subject Property.

The VCP database lists 61 sites within the ASTM recommended search radius. The closest VCP site is located 330-feet downgradient from the Subject Property. Ten of the 61 VCP listings are upgradient from the Subject Property. The closest upgradient site is 1,916 feet to the south and six of the ten listings are completed. There are 12 VCPs that are within 1,000 feet of the Subject Property, one is in the remedial investigation phase, five are in the construction phase, two are in the site management phase, and four are completed. Due to the location of the sites and/or their respective regulatory status, the VCP property are not anticipated to impact the Subject Property.

The Brownfields database lists 23 sites within the ASTM recommended search radius. The closest Brownfield site is located 468-feet downgradient, with the other 22 sites being downgradient as well. 12 of the 23 Brownfields have had their remediation completed, four are in application review, and seven are either active or collecting more samples to determine the remedial action. Due to the location of the sites and their respective regulatory status, the BCP properties are not anticipated to impact the Subject Property.

The NY Spills database lists 37 reported spills within the ASTM recommended search radius of the Subject Property. 11 of the 37 listings are upgradient from the Subject Property. The 37 spill listings were reported closed by the NYSDEC at the time of this report. Due to their distance, and/or status, the listings are not considered a material threat to the Subject Property.

The EDR Historic Auto databases list one Historic Auto sites within ⅛-mile search radius of the Subject Property. The Historic Auto listings is Bomb Shell Accessories with no prior violations. Due to the location or no prior violations, the Historic Auto listing does not pose a material threat to the Subject Property.

Other federal and state-listed sites were identified within the search distances used. Based on their distance from the Subject Property, closed regulatory status, or the anticipated hydraulic gradient, it is GZA's opinion that the remaining listed sites are unlikely to impact the soil, groundwater, or soil vapor conditions at the Subject Property.

7.4 EVALUATION OF UNMAPPED PROPERTIES

GZA also reviewed the list of orphan sites, which are properties with insufficient address information to allow the mapping software to plot a location. Based on the incomplete descriptions provided in the database summary and based on their distance and direction from the Subject Property, it does not appear that the listed properties could impact the Subject Property.

7.5 REGULATORY FILE REVIEW

GZA requested access to records available at the NYSDEC, NYSDOH, FDNY, NYCOER, NYCDEP, NYCDOB, and NYCDOHMH through a Freedom of Information Act (FOIA) request. These records were not available within the timeframe allotted for this Phase I ESA.

8.0 INTERVIEWS

Mark Frey interviewed the following people, including the sellers' representative Andrew Manasia, as part of this Phase I ESA. The information that each interviewee provided is discussed and referenced within the text of this Phase I ESA Report.

- Andrew Manasia, Terra CRG, Senior Associate, Investment Sales, June 24, 2024.

9.0 USER-PROVIDED INFORMATION

GZA requested information from the Client regarding title information, environmental liens, Activity and Use Limitations, and specialized knowledge or commonly known information regarding the Subject Property and, if applicable, the reason for a significantly discounted purchase price. The completed User Questionnaire is provided in **Appendix J**.

10.0 NON-ASTM E1527-21 CONSIDERATIONS

This Phase I ESA does not include an evaluation of environmental issues or conditions that ASTM E1527-21 stipulates as non-scope considerations.

11.0 FINDINGS AND CONCLUSIONS

GZA performed a Phase I ESA in general conformance with the scope and limitation of ASTM E1527-21 for the Subject Property located at 92-94 North 9th Street, Brooklyn, New York. Exceptions to, or deviations from, this practice are described in **Section 1.4** of this Phase I ESA Report.

11.1 RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

This Phase I ESA identified the following RECs in connection with the Subject Property:

- The adjoining property across North 9th Street has been utilized for woodworking from at least 1940 to 2007. As indicated on the Sanborn Fire Insurance Maps, the Subject Property was a lumber storage yard from at least 1986 through to 2007. The Subject Property historic use as a lumber storage yard along with the neighboring lumber manufacturer processes could have a negative impact on the Subject Property and therefore, since the Subject Property does have an e-designation, a subsurface investigation should be completed under the auspices of the NYCOER.

11.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)

In GZA's opinion, this Phase I ESA revealed no evidence of CRECs in connection with the Subject Property.

11.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HRECs)

In GZA's opinion, this Phase I ESA revealed no evidence of HRECs in connection with the Subject Property.

11.4 *DE MINIMIS* CONDITIONS

This Phase I ESA identified the following *de minimis* conditions in connection with the Subject Property:

11.5 SIGNIFICANT DATA GAPS

In GZA's opinion, based on the information made available during this assessment, we did not encounter significant data gaps that affected our ability to identify RECs, CRECs, or HRECs at the Subject Property.

11.6 NON-ASTM E1527-21 CONSIDERATIONS

No non-ASTM E1527-21 considerations were evaluated as part of GZA's Scope of Services.

11.7 BUSINESS ENVIRONMENTAL RISKS (BERS)

This Phase I ESA revealed the following BERs:

- The E-Designation E-138 is listed on both parcels of the Subject Property for Hazardous Materials Air Quality, and Noise. This requires soil, soil vapor, and groundwater sampling to be performed on the Subject Property before redevelopment is approved.

- Future Subject Property redevelopment activities might encounter residual contamination in soil or groundwater related to past industrial use. Impacted material must be managed either on or off the Subject Property in conformance with applicable federal, state, and local regulations.

- If dewatering is required for construction, groundwater sampling and testing in conformance with federal, state, and/or local sewer discharge permit/approval requirements may be required.

13.0 ENVIRONMENTAL PROFESSIONAL OPINION

I declare, to the best of my professional knowledge and belief, that I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312; that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the Subject Property; and that I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312. The signature of the Environmental Professional is contained on the cover letter of this Phase I ESA Report. The qualifications of the Environmental Professional are provided in **Appendix K**.

14.0 LIMITATIONS

GZA prepared this Phase I ESA Report on the Subject Property on behalf of, and for the exclusive use of, E&M Builders for the purpose indicated above. However, GZA acknowledges and agrees that this Phase I ESA Report may be conveyed to the real estate broker and property owner associated with the proximate purchase of the Subject Property to the extent set forth in our Terms and Conditions provided in **Appendix A**. Use of this Phase I ESA Report, in whole or in part, at other locations, or for other purposes, might lead to inappropriate conclusions, and we do not accept any responsibility for the consequences of such use. Further, reliance by any party not identified in the agreement for any use, shall be at that party's sole risk, and without any liability to GZA.

In conducting this Phase I assessment, GZA performed its services using that degree of skill and care ordinarily exercised by qualified professionals performing the same type of services, at the same time, under similar conditions, at the same or a similar property. We make no warranty, express or implied.

Our findings and conclusions are based on the work conducted as part of the Scope of Services set forth in this Phase I ESA Report and reflect our professional judgment. Our findings and conclusions should not be considered as scientific certainties or engineering certainties, but rather as our professional opinions based on the limited data gathered during the course of our work.

No environmental site assessment can eliminate the uncertainty of the possible presence of RECs. This Phase I ESA Report was prepared to help reduce, not to eliminate, such uncertainty. Consistent with ASTM E1527-21, we developed our opinions in light of the constraints imposed by time and budget.

As indicated within this Phase I ESA Report, we observed conditions at the Subject Property and at adjoining properties for evidence of RECs at the Subject Property. Where access to portions of the Subject Property or to structures on the Subject Property was unavailable or limited, GZA renders no opinion as to the presence of hazardous substances, hazardous waste, or petroleum products, or to the presence of indirect evidence relating to these materials, in those portions of the Subject Property or structures. In addition, GZA renders no opinion as to the presence of hazardous substances, hazardous waste, or petroleum products, or to the presence of indirect evidence relating to these materials, where direct observation of the interior walls, floors, and/or ceilings of a structure on the Subject Property was obstructed by objects and/or coverings on and/or over such surfaces. We based our opinions on such limited observations. Additionally, some activities or events impacting environmental conditions at the Subject Property or at adjoining properties might have been transient and not observable at the time of GZA's site reconnaissance.

We relied upon information made available by federal, state, and local authorities, the Key Site Manager, and others. We did not attempt to independently verify the accuracy or completeness of that information. To the extent we encountered inconsistencies in this information, they were identified within the Report.

The lender, seller, buyer, or other parties that might become involved with the Subject Property might develop additional opinions or information regarding the presence or absence of RECs at the Subject Property. Such additional opinions or information might not fully support the opinions provided in this Phase I ESA Report. In the event such additional opinions or information is developed, we recommend retaining GZA to review this material so that we have the opportunity to evaluate and modify, as necessary, the opinions provided in this Phase I ESA Report.

Unless otherwise specified within this Phase I ESA Report, we have rendered no opinion on the compliance of Subject Property conditions or activities with federal, state, and local codes, laws, or regulations.

GZA based the opinions expressed in this Phase I ESA Report on conditions observed during the course of our work on this Subject Property; these conditions might change over time. ASTM E1527-21 specifies that observations and opinions are only valid for 180 days from the date the underlying information is developed. After 180 days, portions of this Phase I ESA Report may need to be updated.

Appendix A - Project Terms and Conditions

TERMS AND CONDITIONS FOR PROFESSIONAL SERVICES

© 2023 by GZA GeoEnvironmental, Inc.

Client ("You"):
Proposal No:
Site:

These Terms and Conditions, together with GZA's Proposal, make up the Agreement between GZA and you, Client, named above.

BEFORE SIGNING THE PROPOSAL, BE SURE YOU READ AND UNDERSTAND THE PARAGRAPHS ENTITLED "INDEMNIFICATION" AND "LIMITATION OF REMEDIES" WHICH DEAL WITH THE ALLOCATION OF RISK BETWEEN YOU AND GZA.

1. Services. GZA will perform the services set forth in its Proposal and any amendments or change orders authorized by you (the "Services"). Any request or direction from you that would require extra work or additional time for performance or would result in an increase in GZA's costs will be the subject of a negotiated amendment or change order.

2. Standard of Care; Warranties.

a. GZA will perform professional Services with the degree of skill and care ordinarily exercised by qualified professionals performing the same type of services at the same time under similar conditions in the same or similar locality.

b. EXCEPT AS SET FORTH IN SUBSECTIONS 2a ABOVE, NO WARRANTY, EXPRESS OR IMPLIED, INCLUDING WARRANTY OF MARKETABILITY OR FITNESS FOR A PARTICULAR PURPOSE, IS MADE OR INTENDED BY GZA'S PROPOSAL OR BY ANY OF GZA'S ORAL OR WRITTEN REPORTS.

c. GZA assigns to you any manufacturers' warranties of equipment or materials purchased from others, to the extent they are assignable, and your sole recourse will be against the manufacturer. Full risk of loss of materials and equipment will pass to you upon delivery to the Site, and you will be responsible for insuring and otherwise protecting them against theft and damage.

3. Payment.

a. Except as otherwise stated in the Proposal, you will compensate GZA for the Services at the rates set forth in the applicable Proposal, amendment or change order; reimburse its expenses, which will include a communication fee calculated as a percentage of labor invoiced; and pay any sales or similar taxes thereon.

b. Any retainer specified in GZA's Proposal shall be due prior to the start of Services and will be applied to the final invoice for Services.

c. GZA will submit invoices periodically, and payment will be due within 20 days from invoice date. Overdue payments will bear interest at 1½ percent per month or, if lower, the maximum lawful rate. GZA may terminate the Services upon 10 days' written notice anytime your payment is overdue on this or any other project and you will pay for all Services through termination, plus termination costs. You will reimburse GZA's costs of collecting overdue invoices, including reasonable attorneys' fees (including costs for time expended by in-house counsel, which will be charged to you at the prevailing market rate for attorneys of similar experience practicing in the jurisdiction).

4. Your Responsibilities.

a. Except as otherwise agreed in writing, you will secure the access agreements, approvals, permits, licenses and consents necessary for performance of the Services. If you are the owner or operator of the Site, you will provide GZA with all documents, plans, information concerning underground structures (including but not limited to utilities, conduits, pipes, and tanks), information related to hazardous materials or other environmental or geotechnical conditions at the Site (including, if applicable, asbestos containing materials ["ACM"]) and other information that may be pertinent to the Services or, if you are not the owner or operator of the Site, you agree to make reasonable efforts to obtain these same documents and provide them to GZA. Unless otherwise indicated in writing, GZA will be entitled to rely on documents and information you provide.

b. If you use the services of a contractor or construction manager at the Site, you agree to use best and reasonable efforts to include in your agreement(s) with the construction contractor provisions obligating the latter:

   (i) to defend, indemnify and hold harmless, to the fullest extent permitted by law, you and GZA and its officers, directors, members, partners, agents, employees, and subconsultants (the "GZA Indemnitees"), for or on account of any claims, liabilities, costs and expenses, including attorneys' fees, arising out of or relating to the design or implementation of construction means, methods, procedures, techniques, and sequences of construction, including safety precautions or programs, of the contractor, or any of its subcontractors or any engineer engaged by it;

   (ii) to name you and GZA as additional insureds under general liability and builder's risk insurance coverages maintained by the contractor, or any of its subcontractors, and to ensure that such policies are primary and noncontributory with regard to the above indemnity obligations; and

   (iii) to require that all of its subcontractors agree and be bound to the obligations set forth in (i) and (ii) above.

c. In the event that you are unable to secure such provisions in the agreement(s) with the construction contractor, you shall promptly (but in any event prior to the commencement of the Services) notify GZA and GZA shall have the opportunity to negotiate with you reasonable substitute risk allocation and insurance indemnities and protections.

5. Right of Entry; Site Restoration. You grant GZA and its subcontractor(s) permission to enter the Site to perform the Services. If you do not own the Site, you represent and warrant that the owner has granted permission for GZA to enter the Site and perform the Services; you will provide reasonable verification on request; and you will indemnify the GZA Indemnitees for any claims by the Site owner related to alleged trespass by GZA or its subcontractors. Although GZA will exercise reasonable care to limit damage to landscaping, paving, systems and structures at the Site, you acknowledge that some damage may occur even with the exercise of due care and you agree to compensate GZA for any restoration it is asked to perform, unless otherwise indicated in the Proposal.

6. Underground Facilities. GZA's only responsibility under this Agreement will be to provide proper notification to the applicable state utility "Call-Before-You-Dig" program. You further agree to assume responsibility for and to defend, indemnify and hold harmless GZA with respect to personal injury and property damages due to GZA's interference with subterranean structures including but not limited to utilities, conduits, pipes, and tanks:

   (i) that are not correctly shown on any plans and information you or governmental authorities provide to GZA; or

   (ii) that are not correctly marked by the appropriate utility.

7. Reliance. The services, information, and other data furnished by you shall be at your expense, and GZA may rely upon all information and data that you furnish, including the accuracy and completeness thereof. You acknowledge that the quality of the Services provided by GZA is directly related to the accuracy and completeness of the information and data that you furnish to GZA. **GZA's REPORTS ARE PREPARED FOR AND MADE AVAILABLE FOR YOUR SOLE USE. YOU ACKNOWLEDGE AND AGREE THAT USE OF OR RELIANCE UPON THE REPORT OR THE FINDINGS IN THE REPORT BY ANY OTHER PARTY, OR FOR ANY OTHER PROJECT OR PURPOSE, SHALL BE AT YOUR OR SUCH OTHER PARTY'S SOLE RISK AND WITHOUT ANY LIABILITY TO GZA. YOU SHALL INDEMNIFY AND HOLD HARMLESS THE GZA INDEMNITEES FROM ALL CLAIMS, DAMAGES, LOSSES, AND EXPENSES, INCLUDING ATTORNEYS' FEES, ARISING OUT OF OR RESULTING FROM ANY USE, REUSE, OR MODIFICATION OF THE DOCUMENTS WITHOUT WRITTEN VERIFICATION, COMPLETION, OR ADAPTATION BY GZA AND SUCH LIMITED LICENSE TO YOU SHALL NOT CREATE ANY RIGHTS IN THIRD PARTIES.**

8. Lab Tests and Samples. GZA is entitled to rely on the results of laboratory tests using generally accepted methodologies. GZA may dispose of samples in accordance with applicable laws 30 days after submitting test results to you unless you request in writing for them to be returned to you or to be held longer, in which case you will compensate GZA for storage and/or shipping beyond 30 days.

9. GZA Professionals. GZA employees or consultants may act as licensed, certified or registered professionals (including but not limited to Professional Engineers, Licensed Site or Environmental Professionals, Certified Hazardous Materials Managers,, or Certified Industrial Hygienists collectively referred to in this section as "GZA Professionals") whose duties may include the rendering of independent professional opinions. You acknowledge that a federal, state or local agency or other third party may audit the Services of GZA or other contractor/consultant(s), which audit may require additional Services, even though GZA and such GZA Professionals have each performed such Services in accordance with the standard of care set forth herein. You agree to compensate GZA for all Services performed in response to such an audit, or to meet additional requirements resulting from such an audit, at the rates set forth in the applicable Proposal, amendment or change order.

10. Hazardous Materials; GZA "Not a Generator". Before any hazardous or contaminated materials, including, if applicable, ACMs (the "Wastes") are removed from the Site, you will sign manifests naming you as the generator of the Wastes (or, if you are not the generator, you will arrange for the generator to sign). You will select the treatment or disposal facility to which any Wastes are taken. GZA will not be the generator or owner of, nor will it possess, take title to, or assume legal liability for any Wastes at or removed from the Site. GZA will not have responsibility for or control of the Site or of operations or activities at the Site other than its own. GZA will not undertake, arrange for or control the handling, treatment, storage, removal, shipment, transportation or disposal of any Wastes at or removed from the Site, other than any laboratory samples it collects or tests. You agree to defend, indemnify and hold the GZA Indemnitees harmless for any costs or liability incurred by GZA in defense of or in payment for any legal actions in which it is alleged that GZA is the owner, generator, treater, storer or disposer of any Wastes.

11. Limits on GZA's Responsibility. GZA will not be responsible for the acts or omissions of contractors or others at the Site, except for its own subcontractors and employees. GZA will not supervise, direct or assume control over or the authority to stop any contractor's work, nor shall GZA's professional activities nor the presence of GZA or its employees and subcontractors be construed to imply that GZA has authority over or responsibility for the means, methods, techniques, sequences or procedures of construction, for work site health or safety precautions or programs, or for any failure of contractors to comply with contracts, plans, specifications or laws. Any opinions by GZA of probable costs of labor, materials, equipment or services to be furnished by others are strictly estimates and are not a guarantee that actual costs will be consistent with the estimates.

12. Changed Conditions.

a. You recognize the uncertainties related to the Services (including, without limitation, environmental and geotechnical Services), which often require a phased or exploratory approach, with the need for additional Services becoming apparent during the initial Services. You also recognize that actual conditions encountered may vary significantly from those anticipated, that laws and regulations are subject to change, and that the requirements of regulatory authorities are often unpredictable.

b. If changed or unanticipated conditions or delays make additional Services necessary or result in additional costs or time for performance, GZA will notify you and the parties will negotiate appropriate changes to the scope of Services, compensation and schedule.

c. If no agreement can be reached, GZA will be entitled to terminate the Services and to be equitably compensated for the Services already performed. GZA will not be responsible for delays or failures to perform due to weather, labor disputes, intervention by or inability to get approvals from public authorities, acts or omissions on your part, or any other causes beyond GZA's reasonable control, and you will compensate GZA for any resulting increase in its costs.

13. Documents and Information. All documents, data, calculations and work papers prepared or furnished by GZA are instruments of service and will remain GZA's property. Designs, reports, data and other work product delivered to you are for your use only, for the limited purposes disclosed to GZA. Any delayed use, use at another site, use on another project, or use by a third party will be at the user's sole risk, and without any liability to GZA. Any technology, methodology or technical information learned or developed by GZA will remain its property. Provided GZA is not in default under this Agreement, GZA's designs will not be used to complete this project by others, except by written agreement relating to use, liability and compensation.

14. Electronic Media. In accepting and utilizing any drawings, reports and data on any form of electronic media generated by GZA, you covenant and agree that all such electronic files are instruments of service of GZA, who shall be deemed the author and shall retain all common law, statutory law and other rights, including copyrights. In the event of a conflict between the signed documents prepared by GZA and electronic files, the signed documents shall govern. You agree not to reuse these electronic files, in whole or in part, for any purpose or project other than the project that is the subject of this Agreement. Any transfer of these electronic files to others or reuse or modifications to such files by you without the prior written consent of GZA will be at the user's sole risk and without any liability to GZA.

15. Confidentiality; Subpoenas. Information about this Agreement and GZA's Services and information you provide to GZA regarding your business and the Site, other than information available to the public and information acquired from third parties, will be maintained in confidence and will not be disclosed to others without your consent, except as GZA reasonably believes is necessary: (a) to perform the Services; (b) to comply with professional standards to protect public health, safety and the environment; and (c) to comply with laws, regulations, court orders and professional obligations. GZA will make reasonable efforts to give you prior notice of any disclosure under (b) or (c) above. Information available to the public and information acquired from third parties will not be

considered confidential. You will reimburse GZA for responding to any subpoena or governmental inquiry or audit related to the Services, at the rates set forth in the applicable Proposal, amendment or change order.

16. Insurance. During performance of the Services, GZA will maintain workers' compensation, commercial general liability, automobile liability, and professional liability/contractor's pollution liability insurance. GZA will furnish you certificates of such insurance on request.

17. Indemnification. You agree to hold harmless, indemnify, and defend the GZA Indemnitees against all claims, suits, fines and penalties, including mandated cleanup costs and attorneys' fees and other costs of settlement and defense, which claims, suits, fines, penalties or costs arise out of or are related to this Agreement or the Services, except to the extent they are caused by GZA's negligence or willful misconduct.

18. Limitation of Remedies.

a. To the fullest extent permitted by law and notwithstanding anything else in this Agreement to the contrary, the aggregate liability of GZA and its affiliates and subcontractors and their employees, officers, directors and agents (collectively referred to in this paragraph as "GZA") for all claims arising out of this Agreement or the Services is limited to $50,000 or, if greater, 10% of the compensation received by GZA under this Agreement.

b. You may elect to increase the limit of liability by paying an additional fee, such fee to be negotiated prior to the execution of this Agreement.

c. Any claim will be deemed waived unless written notice of such claim is received by GZA within one year of substantial completion of the Services.

d. GZA will not be liable for lost profits, loss of use of property, delays, or other special, indirect, incidental, consequential, punitive, exemplary, or multiple damages.

e. GZA will not be liable to you or the Site owner for injuries or deaths suffered by GZA's or its subcontractors' employees.

f. You will look solely to GZA for your remedy for any claim arising out of or relating to this Agreement, including any claim arising out of or relating to alleged negligence or errors or omissions of any GZA principal, officer, employee or agent.To the extent damages are covered by property insurance or any other insurance, both you and GZA waive all rights against each other and against the contractors, consultants, agents, and employees of the other, for damages, except such rights as they may have to the proceeds of such insurance as set forth in this Agreement. The you or GZA, as appropriate, shall require of the contractors, consultants, agents, and employees of any of them, similar waivers in favor of the other parties enumerated herein.

19. Disputes.

a. All disputes between you and GZA shall be subject to non-binding mediation.

b. Either party may demand mediation by serving a written notice stating the essential nature of the dispute, the amount of time or money claimed, and requiring that the matter be mediated within forty-five (45) days of service of notice.

c. The mediation shall be administered by the American Arbitration Association in accordance with its most recent Construction Mediation Rules, or by such other person or organization as the parties may agree upon.

d. No action or suit may be commenced unless mediation has occurred but did not resolve the dispute, or unless a statute of limitation period would expire if suit were not filed prior to such forty-five (45) days after service of notice. However, where non-payment of an invoice has occurred and GZA sends you a final demand letter for payment, your failure to respond within ten (10) days of receipt (or, for certified mail, the date of the first attempt to deliver the letter to your address of record if you ultimately do not accept receipt of the letter) of such letter will be deemed to be a waiver of your right to enforce this mediation clause and GZA may immediately file suit to enforce the terms of this Agreement.

20. Miscellaneous.

a. This Agreement and all claims relating thereto shall be governed by the substantive and procedural laws of the Commonwealth of Massachusetts, as they presently exist or may hereafter be amended, without regard to principles of conflict of laws.

b. The above terms and conditions regarding Limitation of Remedies and Indemnification shall survive the completion of the Services under this Agreement and the termination of the contract for any cause.

c. Any amendment to these Terms and Conditions must be in writing and signed by both parties. No modification of these Terms and Conditions will be binding against GZA unless specifically approved in writing by a Principal of GZA.

d. Having received these Terms and Conditions, your oral authorization to commence Services, your acceptance of performance of the Services, your actions, or your use of the Report or Work Product constitutes your acceptance of them.

e. This Agreement supersedes any contract terms, purchase orders or other documents issued by you, even if signed by an authorized representative of GZA.

f. Neither party may assign or transfer this Agreement or any rights or duties hereunder without the written consent of the other party.

g. Your failure or the failure of your successors or assigns to receive payment, reimbursement, insurance proceeds or grant funds from any other party for any reason whatsoever shall not absolve you, your successors or assigns of any obligation to pay any sum to GZA under this agreement.

h. These Terms and Conditions shall govern over any inconsistent terms in GZA's Proposal.

i. The provisions of this Agreement are severable; if any provision is unenforceable it shall be appropriately limited and given effect to the extent it is enforceable.

j. The covenants and agreements contained in this Agreement shall apply to, inure to the benefit of and be binding upon the parties hereto and upon their respective successors and assigns.

k. Any reports generated by GZA will be subject to GZA's standard report limitations for that particular type of report.

21. Asbestos Abatement Services (If Applicable). If the Services include asbestos abatement services, then the following terms and conditions will apply and will supersede any conflicting terms contained elsewhere in this Agreement.

a. You acknowledge that conditions can vary from those encountered at the times and locations of explorations and data collection, and that the limitation on available data may result in some level of uncertainty with respect to the interpretation of those conditions, despite due professional care. GZA therefore cannot guaranty specific results such as the identification or removal of all asbestos or other contamination.

22. **Microbial Services (If Applicable).** If the Services include microbial services, then the following terms and conditions will apply and will supersede any conflicting terms contained elsewhere in this Agreement.

a. You recognize that meeting the standard of care does not establish an assurance that corrective procedures will be permanent. Because Microbial infestations are created by near-omnipresent living microscopic spores, grows very quickly and are influenced by nanoclimatological conditions that are very difficult to detect and sources of water intrusion, elevated moisture or relative humidity over which GZA has neither control or responsibility, GZA cannot and does not claim that its Services will eliminate the risk of a Microbial infestation recurring.

b. You acknowledge that the Services entail risk of personal injury and property damage (including cross-contamination) that cannot be avoided, even with the exercise of due care. You also acknowledge that environmental conditions can vary from those encountered at the times and locations of explorations and data collection, and that the limitation on available data may result in some level of uncertainty with respect to the interpretation of these conditions, despite due care. GZA therefore cannot guaranty specific results such as the identification of all contamination or other environmental conditions or problems nor their resolution.

c. You acknowledge that Microbial infestations may be hidden from view and concealed in locations that are difficult to discover. Accordingly, you agree that despite GZA's efforts, some Microbial locations may remain undetected. In such situations, you agree that you will have no claim against GZA provided GZA followed all applicable laws and regulations pertaining to the Work.

d. For purposes of this Agreement, Microbial is defined as any and all fungal and/or bacterial growth including but not limited to mold, mildew, yeast, fungus, fungi, bacteria, spores, odors, particulates, vapors, gas, or other emissions produced by or arising out of or toxins emanating therefrom.

e. You further agree that where GZA shall performs Services intended to minimize the risk of Microbial infestations, GZA shall not be liable for damages resulting from Microbial contamination including but not limited to fungal or bacterial infestations and water damage or dry or wet rot and you agree to waive any Microbial infestation claim(s) against GZA, and you agree to indemnify, defend and hold the GZA Indemnitees harmless from any claim alleging that GZA's Services caused or aggravated a Microbial infestation or did not prevent a Microbial infestation from re-occurring.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GZA GeoEnvironmental of NY were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: E79E-40E6-90BD

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

GZA GeoEnvironmental of NY (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Form 8004 (3/00) – Quitclaim Deed–Individual or Corporation. (single sheet)

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT – THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.

THIS INDENTURE, made the 5th day of January , 2005 and

BETWEEN

United Tower Maintenance Inc., a New York corporation (successor in interest pursuant to merger to North Tenth Street Corporation, a New York corporation), having an address at 4025 Crescent Street, Long Island City, New York 11101

party of the first part, and

JWH Real Estate Holding Corp., a New York corporation, having an address at 4025 Crescent Street, Long Island City, New York 11101

party of the second part,

WITNESSETH, that the party of the first part, in consideration of ten dollars paid by the party of the second part, does hereby remise, release and quitclaim unto the party of the second party, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the

Borough of Kings, City and State of New York, as more fully set forth on Exhibit A, annexed hereto and made a part hereof, being (i) with respect to Parcels 1,2, 4 and 5 the same premises conveyed to North Tenth Street Corporation, Grantor's predecessor-in-interest, pursuant to deed dated 11/18/68 and recorded 4/28/69 in Reel 330, Page 505, and (ii) with respect to Parcel 3 the same premises conveyed to North Tenth Street Corporation, Grantor's predecessor-in-interest, pursuant to deed dated 5/26/59 and recorded 6/04/59 in Liber 8732, Page 91.

TOGETHER with all right, title and interest, if any, of the party of the first part, in and to any streets and roads abutting the above-described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN PRESENCE OF:

UNITED TOWER MAINTENANCE INC., BY**

BARGAIN AND SALE DEED WITHOUT COVENANT AGAINST GRANTOR'S ACTS

THIS INDENTURE, dated as of December 27, 2012, between JWH REAL ESTATE HOLDING CORP., a New York corporation, having an address c/o The Rosenwach Group, 40-25 Crescent Street, Long Island City, New York 11101 ("**Grantor**"), and NORTH WYTHE LLC, a New York limited liability company, having an address at 144 Spencer Street, Brooklyn New York 11205 ("**Grantee**").

WITNESSETH, that Grantor in consideration of the sum of Ten Dollars ($10.00), and other good and valuable consideration paid by Grantee, the receipt and sufficiency of which is hereby acknowledged by Grantor, does hereby grant and release and assign forever unto Grantee, and the heirs or successors and assigns of Grantee, all those certain plots, pieces or parcels of land commonly known as 92-94 North 9th Street and located in the City of New York, County of Kings and State of New York, as more particularly bounded and described in **Exhibit A** attached hereto and made a part hereof (the "**Land**");

TOGETHER with the building(s) now located or hereafter erected on the Land (the "**Building**") and any and all other fixtures and improvements now located or hereafter erected on the Land (the Building and such other fixtures and improvements being hereinafter collectively referred to as the "**Improvements**");

TOGETHER with all right, title and interest, if any, of Grantor in and to the land lying in the bed of any street, highway, road or avenue, opened or proposed, public or private, in front of or adjoining the Land, to the center line thereof, any rights of way, appendages, appurtenances, easements, sidewalks, alleys, gores or strips of land adjoining or appurtenant to the Land and used in conjunction therewith, any development rights appurtenant to the Land and any award or payment made or to be made in lieu of any of the foregoing or any portion thereof and any unpaid award for damage to the Land or any of the Improvements by reason of change of grade or closing of any street, road or avenue, (the foregoing rights, together with the Land and the Improvements being hereinafter referred to, collectively, as the "**Premises**");

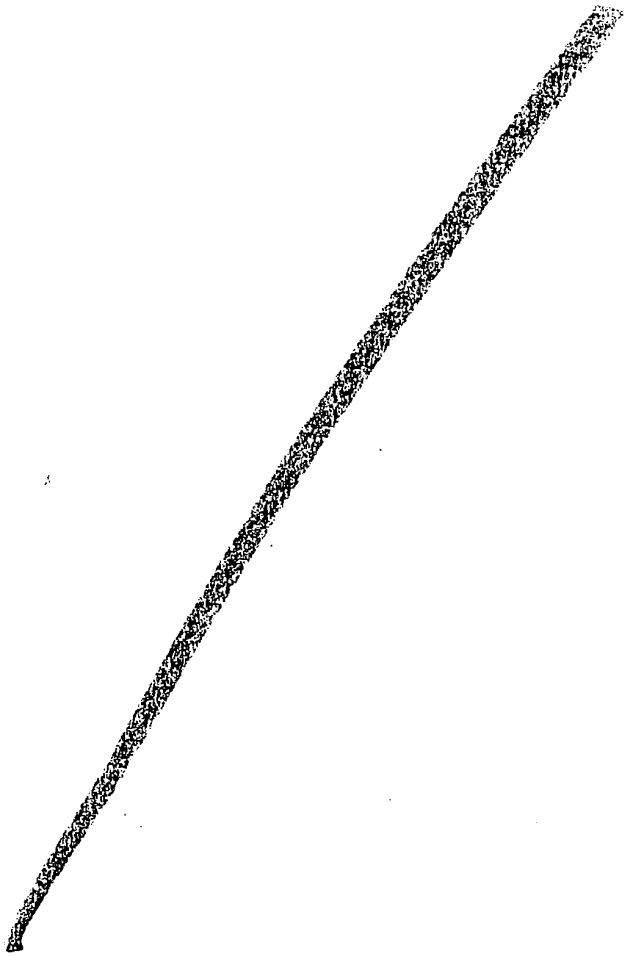
TO HAVE AND TO HOLD the Premises herein granted, or mentioned and intended so to be, unto Grantee, and the heirs, successors and assigns of Grantee, forever.

AND Grantor, in compliance with Section 13 of the Lien Law, covenants that Grantor will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of improvements and will apply the same first to the payment of the cost of improvements before using any part of the total of the same or any other purpose.

Being and intended to be a part of the same premises conveyed to the party of the first part by Deed from United Tower Maintenance Inc. dated January 5, 2005 and recorded March 14, 2006 in CRFN 2006000143412 in the New York City Register's Office, Kings County.

This conveyance is being made in the ordinary course of business of the grantor and has been made with the unanimous consent in writing of all the stockholders of the party of the first part.

[SIGNATURE PAGE FOLLOWS]



IN WITNESS WHEREOF, Grantor has duly executed this deed the day and year first above written.

GRANTOR:

Customer Registration Form for Water and Sewer Billing

Property and Owner Information:

(1) **Property receiving service: BOROUGH: BROOKLYN** **BLOCK: 2310** **LOT: 9**

(2) **Property Address: N/A NORTH 9TH STREET, BROOKLYN, NY 00000**

(3) **Owner's Name:** **NORTH WYTHE LLC**

Additional Name:

Affirmation:

☑ Your water & sewer bills will be sent to the property address shown above.

Customer Billing Information:

Please Note:

A. Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges. Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, the property being placed in a lien sale by the City or Service Termination.

B. Original bills for water and/or sewer service will be mailed to the owner, **at the property address or to an alternate mailing address**. DEP will provide a duplicate copy of bills to one other party (such as a managing agent), however, any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her liability to pay all outstanding water and sewer charges. Contact DEP at (718) 595-7000 during business hours or visit www.nyc.gov/dep to provide us with the other party's information.

Owner's Approval:

The undersigned certifies that he/she/it is the owner of the property receiving service referenced above; that he/she/it has read and understands Paragraphs A & B under the section captioned "Customer Billing Information"; and that the information supplied by the undersigned on this form is true and complete to the best of his/her/its knowledge.

FILED 330 PAGE 509

THIS MORTGAGE, made the 8th day of January, nineteen hundred and sixty-nine

BETWEEN NORTH TENTH STREET CORP., a New York corporation, having its principal office at No. 2 Harbour Road, Great Neck, County of Nassau, State of New York,

, the mortgagor,

and ROSENWACH REALTY CORPORATION, a New York corporation, having its principal office at No. 96 North Ninth Street, Borough of Brooklyn, City and State of New York,

, the mortgagee,

WITNESSETH, that to secure the payment of an indebtedness in the sum of THIRTY THOUSAND ($30,000.00) ----------dollars, lawful money of the United States, to be paid on or before December 31, 1973,

with interest thereon to be computed from the date hereof, at the rate of six (6%) per centum per annum, and to be paid on the 31st day of December 1969, next ensuing and annually thereafter,

according to a certain bond, note or obligation bearing even date herewith, the mortgagor hereby mortgages to the mortgagee

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, of the City of New York, bounded and described as follows:

PARCEL 1

BL 2303
Lots 1-7

BEGINNING at the corner formed by the intersection of the easterly side of Wythe Avenue with the northerly side of North Ninth Street; running thence easterly along the northerly side of North Ninth Street, 100 feet; thence northerly, parallel with Wythe Avenue, 175 feet; thence westerly parallel with North Ninth Street 100 feet to the easterly side of Wythe Avenue, and thence southerly along the easterly side of Wythe Avenue, 175 feet to the corner, the point or place of beginning.

Said premises being known as No. 87 North Ninth Street, Brooklyn, New York.

PARCEL 2

BL 2310
Lot 10

ALL that certain lot, piece or parcel of land, with the dwelling house and improvements thereon erected, situate, lying and being in the Fourteenth Ward of the Borough (formerly City) of Brooklyn, County of Kings, City and State of New York, bounded and described as follows, to wit:-

BEGINNING at a point on the southerly side of North Ninth Street, distant one hundred and sixteen (116) feet and eight (8) inches easterly from the corner formed by the intersection of the easterly side of Wythe Avenue (formerly Second Street) with the southerly side of North Ninth Street; and running thence southwardly at right angles to North Ninth Street and partly through the centre of a party wall, one hundred (100) feet to the centre line of the block between North Eighth and

North Ninth Streets; thence eastwardly, along said centre line and parallel with North Ninth Street, sixteen (16) feet, eight (8) inches; thence northwardly, at right angles to the centre line of the block and partly through the centre of another party wall, one hundred (100) feet to the southerly side of North Ninth Street, and thence westwardly, along the southerly side of North Ninth Street, sixteen (16) feet eight (8) inches, to the point or place of beginning.

Said premises being known as No. 94 North Ninth Street, Brooklyn, New York.

SCHEDULE B - (See Attached)

TOGETHER with all right, title and interest of the mortgagor in and to the land lying in the streets and roads in front of and adjoining said premises;

TOGETHER with all fixtures, chattels and articles of personal property now or hereafter attached to or used in connection with said premises, including but not limited to furnaces, boilers, oil burners, radiators and piping, coal stokers, plumbing and bathroom fixtures, refrigeration, air conditioning and sprinkler systems, wash-tubs, sinks, gas and electric fixtures, stoves, ranges, awnings, screens, window shades, elevators, motors, dynamos refrigerators, kitchen cabinets, incinerators, plants and shrubbery and all other equipment and machinery, appliances, fittings, and fixtures of every kind in or used in the operation of the buildings standing on said premises, together with any and all replacements thereof and additions thereto;

TOGETHER with all awards heretofore and hereafter made to the mortgagor for taking by eminent domain the whole or any part of said premises or any easement therein, including any awards for changes of grade of streets, which said awards are hereby assigned to the mortgagee, who is hereby authorized to collect and receive the proceeds of such awards and to give proper receipts and acquittances therefor, and to apply the same toward the payment of the mortgage debt, notwithstanding the fact that the amount owing thereon may not then be due and payable; and the said mortgagor hereby agrees, upon request, to make, execute and deliver any and all assignments and other instruments sufficient for the purpose of assigning said awards to the mortgagee, free, clear and discharged of any encumbrances of any kind or nature whatsoever.

AND the mortgagor covenants with the mortgagee as follows:

1. That the mortgagor will pay the indebtedness as hereinbefore provided.

2. That the mortgagor will keep the buildings on the premises insured against loss by fire for the benefit of the mortgagee; that he will assign and deliver the policies to the mortgagee; and that he will reimburse the mortgagee for any premiums paid for insurance made by the mortgagee on the mortgagor's default in so insuring the buildings or in so assigning and delivering the policies.

3. That no building on the premises shall be altered, removed or demolished without the consent of the mortgagee.

4. That the whole of said principal sum and interest shall become due at the option of the mortgagee: after default in the payment of any instalment of principal or of interest for fifteen days; or after default in the payment of any tax, water rate, sewer rent or assessment for thirty days after notice and demand; or after default after notice and demand either in assigning and delivering the policies insuring the buildings against loss by fire or in reimbursing the mortgagee for premiums paid on such insurance, as hereinbefore provided; or after default upon request in furnishing a statement of the amount due on the mortgage and whether any offsets or defenses exist against the mortgage debt, as hereinafter provided. An assessment which has been made payable in instalments at the application of the mortgagor or lessee of the premises shall nevertheless, for the purpose of this paragraph, be deemed due and payable in its entirety on the day the first instalment becomes due or payable or a lien.

5. That the holder of this mortgage, in any action to foreclose it, shall be entitled to the appointment of a receiver.

6. That the mortgagor will pay all taxes, assessments, sewer rents or water rates, and in default thereof, the mortgagee may pay the same.

7. That the mortgagor within five days upon request in person or within ten days upon request by mail will furnish a written statement duly acknowledged of the amount due on this mortgage and whether any offsets or defenses exist against the mortgage debt.

8. That notice and demand or request may be in writing and may be served in person or by mail.

9. That the mortgagor warrants the title to the premises.

10. That the fire insurance policies required by paragraph No. 2 above shall contain the usual extended coverage endorsement; that in addition thereto the mortgagor, within thirty days after notice and demand, will keep the premises insured against war risk and any other hazard that may reasonably be required by the mortgagee. All of the provisions of paragraphs No. 2 and No. 4 above relating to fire insurance and the provisions of Section 254 of the Real Property Law construing the same shall apply to the additional insurance required by this paragraph.

11. That in case of a foreclosure sale, said premises, or so much thereof as may be affected by this mortgage, may be sold in one parcel.

12. That if any action or proceeding be commenced (except an action to foreclose this mortgage or to collect the debt secured thereby), to which action or proceeding the mortgagee is made a party, or in which it becomes necessary to defend or uphold the lien of this mortgage, all sums paid by the mortgagee for the expense of any litigation to prosecute or defend the rights and lien created by this mortgage (including reasonable counsel fees), shall be paid by the mortgagor, together with interest thereon at the rate of six per cent. per annum, and any such sum and the interest thereon shall be a lien on said premises, prior to any right, or title to, interest in or claim upon said premises attaching or accruing subsequent to the lien of this mortgage, and shall be deemed to be secured by this mortgage. In any action or proceeding to foreclose this mortgage, or to recover or collect the debt secured thereby, the provisions of law respecting the recovering of costs, disbursements and allowances shall prevail unaffected by this covenant.

Reel 330 page 511

RIDER

PARCEL 3

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Fourteenth Ward of the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BL 2311
Lot 11

Beginning at a point on the southerly side of North 9th Street, distant 133 feet 4 inches easterly from the corner formed by the intersection of the southerly side of North 9th Street with the easterly side of Wythe Avenue (formerly 2nd St.) running thence easterly along said southerly side of North 9th Street, sixteen (16) feet eight (8) inches, thence southerly and parallel with Wythe Avenue and part of the distance through a party-wall one hundred (100) feet to the centre line of the block between North 8th Street and North 9th Street, thence westerly along said centre line of the block sixteen (16) feet eight (8) inches and thence northerly parallel with said Wythe Avenue and part of the distance through the centre of a party wall one hundred (100) feet to the southerly side of North 9th Street at the point or place of beginning.

Said premises being known as No. 96 North Ninth Street, Brooklyn, New York.

PARCEL 4

ALL that certain plot, piece or parcel of land with the buildings and improvements thereon erected, situate, lying and being in the Fourteenth Ward of the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BL 2311
Lot 9

BEGINNING at a point on the southerly side of North 9th Street distant 100 feet easterly from the corner formed by the intersection of the southerly side of North 9th Street with the easterly side of Wythe Avenue (formerly 2nd Street); running thence southerly at right angles to North 9th Street 100 feet to the center line of the block between North 8th Street and North 9th Street; thence easterly sixteen (16) feet eight (8) inches; thence northerly at right angles to the center line of the block and partly through the center of a party wall 100 feet to the southerly side of North 9th Street; thence westerly along the southerly side of North 9th Street sixteen (16) feet eight (8) inches to the point or place of beginning.

Said premises being known as No. 92 North Ninth Street, Brooklyn, New York.

13. That the mortgagor hereby assigns to the mortgagee the rents, issues and profits of the premises as further security for the payment of said indebtedness, and the mortgagor grants to the mortgagee the right to enter upon and to take possession of the premises for the purpose of collecting the same and to let the premises or any part thereof, and to apply the rents, issues and profits, after payment of all necessary charges and expenses, on account of said indebtedness. This assignment and grant shall continue in effect until this mortgage is paid. The mortgagee hereby waives the right to enter upon and to take possession of said premises for the purpose of collecting said rents, issues and profits, and the mortgagor shall be entitled to collect and receive said rents, issues and profits until default under any of the covenants, conditions or agreements contained in this mortgage, and agrees to use such rents, issues and profits in payment of principal and interest becoming due on this mortgage and in payment of taxes, assessments, sewer rents, water rates and carrying charges becoming due against said premises, but such right of the mortgagor may be revoked by the mortgagee upon any default, on five days' written notice. The mortgagor will not, without the written consent of the mortgagee, receive or collect rent from any tenant of said premises or any part thereof for a period of more than one month in advance, and in the event of any default under this mortgage will pay monthly in advance to the mortgagee, or to any receiver appointed to collect said rents, issues and profits, the fair and reasonable rental value for the use and occupation of said premises or of such part thereof as may be in the possession of the mortgagor, and upon default in any such payment will vacate and surrender the possession of said premises to the mortgagee or to such receiver, and in default thereof may be evicted by summary proceedings.

14. That the whole of said principal sum and the interest shall become due at the option of the mortgagee: (a) after failure to exhibit to the mortgagee, within ten days after demand, receipts showing payment of all taxes, water rates, sewer rents and assessments; or (b) after the actual or threatened alteration, demolition or removal of any building on the premises without the written consent of the mortgagee; or (c) after the assignment of the rents of the premises or any part thereof without the written consent of the mortgagee; or (d) if the buildings on said premises are not maintained in reasonably good repair; or (e) after failure to comply with any requirement or order or notice of violation of law or ordinance issued by any governmental department claiming jurisdiction over the premises within three months from the issuance thereof; or (f) if on application of the mortgagee two or more fire insurance companies lawfully doing business in the State of New York refuse to issue policies insuring the buildings on the premises; or (g) in the event of the removal, demolition or destruction in whole or in part of any of the fixtures, chattels or articles of personal property covered hereby, unless the same are promptly replaced by similar fixtures, chattels and articles of personal property at least equal in quality and condition to those replaced, free from chattel mortgages or other encumbrances thereon and free from any reservation of title thereto; or (h) after thirty days' notice to the mortgagor, in the event of the passage of any law deducting from the value of land for the purposes of taxation any lien thereon, or changing in any way the taxation of mortgages or debts secured thereby for state or local purposes; or (i) if the mortgagor fails to keep, observe and perform any of the other covenants, conditions or agreements contained in this mortgage.

15. That the mortgagor will, in compliance with Section 13 of the Lien Law, receive the advances secured hereby and will hold the right to receive such advances as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

Strike out this clause 16 if inapplicable.

16 That the execution of this mortgage has been duly authorized by the board of directors of the mortgagor.

This mortgage may not be changed or terminated orally. The covenants contained in this mortgage shall run with the land and bind the mortgagor, the heirs, personal representatives, successors and assigns of the mortgagor and all subsequent owners, encumbrancers, tenants and subtenants of the premises, and shall enure to the benefit of the mortgagee, the personal representatives, successors and assigns of the mortgagee and all subsequent holders of this mortgage. The word "mortgagor" shall be construed as if it read "mortgagors" and the word "mortgagee" shall be construed as if it read "mortgagees" whenever the sense of this mortgage so requires.

IN WITNESS WHEREOF, this mortgage has been duly executed by the mortgagor.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

NEW YORK STATE | Department of Health

Dear Mark Frey,

This message confirms receipt of your request. Your request was received in this office on 6/25/2024 and given the reference number R002608-062524 for tracking purposes.

Records Requested: GZA is conducting a Phase I Environmental Site Assessment for the above-referenced Site and is requesting publicly available information from your files. Documents of interest include notices of violations, spill/incident reports, UST/AST registrations, UST/AST removal reports, response records, cleanup records, chemical/petroleum storage permits, or other records of environmental interest. Please contact me if you have any questions or need additional information to conduct the file review.

If you submitted a request for records outside of our normal business hours, your request will be marked as received on the next business day. The Department will acknowledge your request within five business days of the day it is marked as received.

Sincerely,

David J. Harvey, Records Access Officer
NYS Department of Health

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 02/29/2024 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MEEKER AVENUE PLUME	***MEEKER AVENUE***	***ENE 1/2 - 1 (0.893 mi.)***	***0***	***9***
NEWTOWN CREEK	***SOUTH END OF IVY HIL***	***N 1/2 - 1 (0.972 mi.)***	***0***	***13***
Cerclis ID:: 206282				
EPA Id: NYN000206282				

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/22/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a

given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/22/2024 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 19 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/06/2024 has revealed that there are 16 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/06/2024 has revealed that there are 28 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 32 NY UST sites within approximately 0.25 miles of the target property.

NY CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS UST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 NY MOSF UST sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/06/2024 has revealed that there are 37 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 72 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/28/2023 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lower Elevation	Address	Direction / Distance	Map ID	Page
Not reported	***69 NORTH 6 STREET***	***WSW 0 - 1/8 (0.120 mi.)***	***H144***	***361***
LOT 15,TAXBLOCK 2304	***144 NORTH 10 STREET***	***ESE 0 - 1/8 (0.123 mi.)***	***J149***	***371***

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there are 2 NY HSWDS sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
BUG, PEOPLES WORKS Facility Id: HS2016	KENT AVE.	NNW 1/8 - 1/4 (0.135 mi.)	L177	440
BUG, WILLIAMSBURG WO Facility Id: HS2017	KENT AVENUE, NORTH 1	N 1/8 - 1/4 (0.198 mi.)	AG324	1128

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 12/31/2019 has revealed that there are 114 NY MANIFEST sites within approximately 0.25 miles of the target property.

NY MGP: From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

A review of the NY MGP list, as provided by EDR, and dated 03/04/2024 has revealed that there is 1 NY MGP site within approximately 1 mile of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 6 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 29 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 10 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
BOMB SHELL ACCESSORI	97 N 10TH ST	NE 0 - 1/8 (0.067 mi.)	B29	69

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 15 records.

Site Name	Database(s)
DAVIDSON PIPE SUPPLY COMPANY	NY SHWS
BOX STREET GW	NY SHWS
KENT TERMINAL	NY SHWS, NY VCP
JONES MOTORS	NY SHWS
MEEKER AVENUE PLUME TRACKDOWN	NY SHWS
K - SCHOLES ST. STATION	NY SHWS, NY BROWNFIELDS, NY MGP
EAST RIVER PARK COMPOST YARD	NY SWF/LF
MCCARREN COMFORT STSTION	NY LTANKS
BASEMENT	NY LTANKS
KEAP ST. STATION	NY VCP
PEOPLES WORKS	NY VCP
PEOPLES WORKS	NY VCP
RUTLEDGE STATION	NY VCP
WYTHE AVE (BERRY ST.) STATION	NY VCP
CE - E. 14TH ST. (STUYTOWN) WORKS	NY VCP, NY MGP

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	2/1/24 - Ye - DDO - On 1/31, spoke to the caller, from NYCDEP. They received a complaint from 2 weeks prior of odors in the basement. They visited the location on 1/28 and smelled solvents near a tree pit. They emailed the Parks Department. They visited a few residences on 1/31. 99 N 8th Street had PID readings of 18 ppm VOCs when the resident opened the sewer trap in the basement. They visited 101 N 8th Street, which did not have odors in the basement. The resident at 97 N 8th Street

RESIDENTIAL BUILDING (Continued) **S131743659**

was drunk and cursing at the tree. DEP put the PID at the sidewalk, which was lifted from a tree root, and it read 35 ppm. They believe there may have been rat poison dumped at the tree pit, which entered soil and is causing vapors to impact 99 N 8th Street. Sewer maintenance for 99 N 8th Street looked at the sewer in the basement and said it was an old type with a soil base. DEP sent photos of the location, showing a sewer main in the street, and a map showing 19.2 ppm in the sewer manhole, which decreased to 3.1 ppm after flushing out the manhole, 3.1 ppm in the next manhole, 35 ppm VOCs at the tree bed, and 0 ppm in the subsequent manholes on both sides. Discussed with DEC Piper, who will inspect the site. Called and heard from the Nimitt, who's currently housesitting for the owner, who's aware of the odor situation. They said they smell the odors in the bathroom, which is closest to the tree, and by the trap door in the basement. They've been sleeping upstairs with the windows open and keep the bathroom door closed. DEC Piper responded to site. Investigation revealed chemical odor coming from utility box in bathroom of apartment. low level VOCs less than 1ppm in residence. Approx 5-6 ppm in trap door. Inspected tree box and found no odor however, Con Ed electrical box had same odor in it. It is possible someone dumped chemical on tree or poured down electrical grate thinking it was a sewer. I contacted COn Ed and let them know about third party dumping. 3/27/24- DECP iper spooek with tenant. Odor has dissipated and has not returned. Spill closed.

Remarks: found readings in basement and in city sewer. Unknown chemical dumped in tree bed. C/U pending.

DEC Memo:	On July 10, 2001, RGM Liquid Waste Removal provides NYSDEC with end-point sample results collected on July 3, 2001. 07/11/2001, nysdec notes that the TANK PULLED,SOIL EXCAVATED AND STOCKPILED WAITING FOR DISPOSAL. END POINT SAMPLES TAKEN. 9/2/03 TIPPLE SENT REQUEST FOR DOCUMENTATION. On September 26, 2003, American Environmental Assessment Corporation provided notarized documentation that the tank was properly removed from the site on July 13, 2001. On November 24, 2003, NYSDEC was provided documentation of two Non-hazardous Material Manifests for the disposal of petroleum-contaminated soil dated July 13, 2005. Also, on November 24, 2003, NYSDEC was provided documentation of six soil sample analyses from the sides of the tank pit and the bottom of the pit, dated July 3, 2001. The samples were analyzed for STARS 8021 and 8270 and are acceptable for closing (per TAGM 4046) Spill No.0103335.
Remarks:	anonymous caller reported tanks being removed and tanks are leaking

DEC Memo:	Sangesland spoke to Dave Wagner at the oil company. He said there was a leak in the fill line (in the basement) between the foundation wall and the tank. Approx 2 gal of oil spilled onto the cement basement floor. No on going leak (problem only during fill). Leak has been cleaned. Owner has hired oil company to repair the piping before next delivery.
Remarks:	LEAK IN A FILL LINE: CONTAINED AND CLEANE DUP

Update By:	JHOCONNE
Site Description:	The area of concern subject to this work is considered off-site from BCP site C224188 and reflects the investigation and possible remediation of contamination that may have migrated from that site. This work is being carried out as provided for under the Environmental Conservation Law Section 27-1411.5. Please see C224188

87 KENT AVENUE - (OFF-SITE) (Continued) **S118457876**

for further information regarding the status of the site in the Brownfield Cleanup program. Site Location: 87 Kent Ave - Off-site is located in the Williamsburg area of Brooklyn, Kings County. To the north of the site is North 9th Street, to the south is North 8th Street, to the west is Kent Avenue, and to the east is Wythe Avenue. Site Features: The site consists of the areas surrounding by 87 Kent Ave. Current Zoning and Land Use: The site is included in the M1-2/R6A mixed use district. Site Geology and Hydrogeology: The surface topography in the surrounding area is generally flat, gradually sloping northwest towards the East River. Based on reports compiled by the United States Geological Survey (Brooklyn, NY Quadrangle), the property lies at an elevation of approximately 20 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). Based on information collected during the investigation of C224188, The soil beneath the site is miscellaneous fill at depths of up to eight feet. This is underlain by a fine to medium sand with silt and clay layers of varying thicknesses. United States Geological Survey reports indicate that the depth to bedrock at the site is expected to be approximately 100 feet below ground surface. Groundwater is approximately 15 feet below ground surface. The East River is the nearest surface water body, approximately 700 feet to the northwest. Groundwater beneath the site flows in north-northeast direction.

Env Problem:	During the on-site Remedial Investigation for site C224188, soil and groundwater samples were collected and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, PCBs, and pesticides. Soil vapor samples were analyzed for VOCs. Based upon the results of the RI, the primary contaminants of concern for on-site include trichloroethene (TCE) and cis-1,2-DCE. Contamination can likely be attributed to activities associated with the historic use of the site for manufacturing activities. Further investigation is needed to fully delineate the extent of off-site contamination.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Date Rec Updated:	02/23/2017
Updated By:	HRAHMED
Site Description:	Site Location: The site is located at the corner of Kent Avenue and North 9th Street in the Williamsburg area of Brooklyn, Kings County. To the north of the site is North 9th Street, to the south is North 8th Street, to the west is Kent Avenue, and to the east is Wythe Avenue. Site Features: The site is approximately 0.39 acres in size. The site will be used for a seven-story, mixed-use residential/commercial building, which is under development. The site is surrounded by mixed commercial and residential property uses. Current Zoning and Land Use: The site has an E-designation as part of the Greenpoint-Williamsburg Rezoning and is included in the M1-2/R6A mixed use district. The property is currently vacant. Past Use of the Site: From approximately 1980 to until 1998, the site was operated by Barouh Eaton Allen Corp., a manufacturer of typewriter ink and printer products. The building was used from 1998 to 2010 for warehousing and distribution by Lucky Paper Inc. (eastern portion), a distributor or restaurant supplies, and by LJJ, Inc. (western portion), a clothing wholesaler and distributor and from 2010 to 2012 by 200 Supplies Corp., a plumbing supplier. Site Geology and Hydrogeology: The surface topography in the surrounding area is generally flat, gradually sloping northwest towards the East River. Based on reports compiled by the United States Geological Survey (Brooklyn, NY Quadrangle), the property lies at an elevation of approximately 20 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). The soil beneath the site is miscellaneous fill at depths of up to eight feet. This is underlain by a fine to medium sand with silt and clay layers of varying thicknesses. United States Geological Survey reports indicate

87 KENT AVENUE (Continued) **S116550038**

	that the depth to bedrock at the site is expected to be approximately 100 feet below ground surface. Groundwater is approximately 15 feet below ground surface. The East River is the nearest surface water body, approximately 700 feet to the northwest. Groundwater beneath the site flows in north-northeast direction.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern in soil were trichloroethene, benzo(a)pyrene, chrysene and metals including mercury, copper and lead. Remedial actions have successfully achieved soil cleanup objectives for unrestrited use. Prior to remediation, the compounds exceeded groundwater standard were trichloroethene, cis-1,2-DCE and metals including mercury, copper and lead. Remedial action taken place at site removed on-Site sources and post-remedial groundwater sampling documented that the concentrations do not require further treatment or monitoring. Although chlorinated volatile organic compounds were detected in groundwater and soils during the remedial investigation, remediation at the Site consisted of removal of approximately 13,000 cubic yards of contaminated soil and approximately 5.5 million gallons of contaminated groundwater. Furthermore, the foundation of the Site building is below the water table which necessitated installation of a 60 mil thick polyethylene/rubberized asphaltic waterproofing material as part of foundation construction. No further actions are needed to address soil vapor intrusion based on post-remedial environmental data and the construction elements of the building.
Health Problem:	Remedial actions are complete and have eliminated the potential for contact with site-related contaminants on-site. Additional evaluation is needed to determine whether actions are needed to address soil vapor intrusion off-site.

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern in soil were trichloroethene, benzo(a)pyrene, chrysene and metals including mercury, copper and lead. Remedial actions have successfully achieved soil cleanup objectives for unrestrited use. Prior to remediation, the compounds exceeded groundwater standard were trichloroethene, cis-1,2-DCE and metals including mercury, copper and lead. Remedial action taken place at site removed on-Site sources and post-remedial groundwater sampling documented that the concentrations do not require further treatment or monitoring. Although chlorinated volatile organic compounds were detected in groundwater and soils during the remedial investigation, remediation at the Site consisted of removal of approximately 13,000 cubic yards of contaminated soil and approximately 5.5 million gallons of contaminated groundwater. Furthermore, the foundation of the Site building is below the water table which necessitated installation of a 60 mil thick polyethylene/rubberized asphaltic waterproofing material as part of foundation construction. No further actions are needed to address soil vapor intrusion based on post-remedial environmental data and the construction elements of the building.

Health Problem: Remedial actions are complete and have eliminated the potential for contact with site-related contaminants on-site. Additional evaluation is needed to determine whether actions are needed to address soil vapor intrusion off-site.

Site Code: 492995
Site Description: Site Location: The site is located at the corner of Kent Avenue and North 9th Street in the Williamsburg area of Brooklyn, Kings County. To the north of the site is North 9th Street, to the south is North 8th Street, to the west is Kent Avenue, and to the east is Wythe Avenue. Site Features: The site is approximately 0.39 acres in size. The site will be used for a seven-story, mixed-use residential/commercial building, which is under development. The site is surrounded by mixed commercial and residential property uses. Current Zoning and Land Use: The site has an E-designation as part of the Greenpoint-Williamsburg Rezoning and is included in the M1-2/R6A mixed use district. The property is currently vacant. Past Use of the Site: From approximately 1980 to until 1998, the site was operated by Barouh Eaton Allen Corp., a manufacturer of typewriter ink and printer products. The building was used from 1998 to 2010 for warehousing and distribution by Lucky Paper Inc. (eastern portion), a distributor or restaurant supplies, and by LJJ, Inc. (western portion), a clothing wholesaler and distributor and from 2010 to 2012 by 200 Supplies Corp., a plumbing supplier. Site Geology and Hydrogeology: The surface topography in the surrounding area is generally flat, gradually sloping northwest towards the East River. Based on reports compiled by the United States Geological Survey (Brooklyn, NY Quadrangle), the property lies at an elevation of approximately 20 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). The soil beneath the site is miscellaneous fill at depths of up to eight feet. This is underlain by a fine to medium sand with silt and clay layers of varying thicknesses. United States Geological Survey reports indicate that the depth to bedrock at the site is expected to be approximately

87 KENT AVENUE (Continued) **S116550038**

100 feet below ground surface. Groundwater is approximately 15 feet below ground surface. The East River is the nearest surface water body, approximately 700 feet to the northwest. Groundwater beneath the site flows in north-northeast direction.

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern in soil were trichloroethene, benzo(a)pyrene, chrysene and metals including mercury, copper and lead. Remedial actions have successfully achieved soil cleanup objectives for unrestrited use. Prior to remediation, the compounds exceeded groundwater standard were trichloroethene, cis-1,2-DCE and metals including mercury, copper and lead. (western portion), a clothing wholesaler and distributor and from 2010 to 2012 by 200 Supplies Corp., a plumbing supplier. Site Geology and Hydrogeology: The surface topography in the surrounding area is generally flat, gradually sloping northwest towards the East River. Based on reports compiled by the United States Geological Survey (Brooklyn, NY Quadrangle), the property lies at an elevation of approximately 20 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). The soil beneath the site is miscellaneous fill at depths of up to eight feet. This is underlain by a fine to medium sand with silt and clay layers of varying thicknesses. United States Geological Survey reports indicate that the depth to bedrock at the site is expected to be approximately

87 KENT AVENUE (Continued) **S116550038**

100 feet below ground surface. Groundwater is approximately 15 feet below ground surface. The East River is the nearest surface water body, approximately 700 feet to the northwest. Groundwater beneath the site flows in north-northeast direction.

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern in soil were trichloroethene, benzo(a)pyrene, chrysene and metals including mercury, copper and lead. Remedial actions have successfully achieved soil cleanup objectives for unrestrited use. Prior to remediation, the compounds exceeded groundwater standard were trichloroethene, cis-1,2-DCE and metals including mercury, copper and lead. Remedial action taken place at site removed on-Site sources and post-remedial groundwater sampling documented that the concentrations do not require further treatment or monitoring. Although chlorinated volatile organic compounds were detected in groundwater and soils during the remedial investigation, remediation at the Site consisted of removal of approximately 13,000 cubic yards of contaminated soil and approximately 5.5 million gallons of contaminated groundwater. Furthermore, the foundation of the Site building is below the water table which necessitated installation of a 60 mil thick polyethylene/rubberized asphaltic waterproofing material as part of foundation construction. No further actions are needed to address soil vapor intrusion based on post-remedial environmental data and the construction elements of the building.

Health Problem: Remedial actions are complete and have eliminated the potential for contact with site-related contaminants on-site. Additional evaluation is needed to determine whether actions are needed to address soil vapor intrusion off-site.

BROWNFIELDS:

Name:	87 KENT AVENUE
Address:	56 NORTH 9TH STREET (AKA 87 KENT AVENUE)
City,State,Zip:	BROOKLYN, NY 11249
Program:	BCP
Site Code:	492995
Acres:	0.390
HW Code:	C224188
SWIS:	2401
Town:	New York City
Record Added Date:	03/25/2014
Record Updated Date:	01/02/2018
Update By:	BXANDERS
Site Description:	Site Location: The site is located at the corner of Kent Avenue and North 9th Street in the Williamsburg area of Brooklyn, Kings County. To the north of the site is North 9th Street, to the south is North 8th Street, to the west is Kent Avenue, and to the east is Wythe Avenue. Site Features: The site is approximately 0.39 acres in size. The site will be used for a seven-story, mixed-use residential/commercial building, which is under development. The site is surrounded by mixed commercial and residential property uses. Current Zoning and Land Use: The site has an E-designation as part of the Greenpoint-Williamsburg Rezoning and is included in the M1-2/R6A mixed use district. The property is currently vacant. Past Use of the Site: From approximately 1980 to until 1998, the site was operated by Barouh Eaton Allen Corp., a manufacturer of typewriter ink and printer products. The building was used from 1998 to 2010 for warehousing and distribution by Lucky Paper Inc. (eastern portion), a distributor or restaurant supplies, and by LJJ, Inc. (western portion), a clothing wholesaler and distributor and from 2010 to 2012 by 200 Supplies Corp., a plumbing supplier. Site Geology and Hydrogeology: The surface topography in the surrounding area is generally flat, gradually sloping northwest towards the East River. Based on reports compiled by the United States Geological Survey (Brooklyn, NY Quadrangle), the property lies at an elevation of approximately 20 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). The soil beneath the site is miscellaneous fill at depths of up to eight feet. This is underlain by a fine to medium sand with silt and clay layers of varying thicknesses. United States Geological Survey reports indicate

DEC Memo:	report will send report shortly. 7/9/07- DECP iper recieved and reviewed RAP. As per RAP, a new building will go up. The siute is e- designated. The plan calls for soil removal and a new foundation. Soils will be disposed of properly. The RAP is in order though where the prior fill material came from is unknown. A subsurface investigation was conducted in the spring of 2007. The site was formerly residential and supplied by gas. GPR survey found no anomolies. Soil testing found elevated level of zinc over Eastern Background levels and minpor exceedances in SVOC's potentially related to historic urban fill or recent fill material. groundwater sample showed no elevated levels. Based on investigation and only one exceedance. This spill closed. NFA granted. Site to be excavated apporx 15 bgs for ne foundation. See e-docs if warranted.
Remarks:	FILL MATERIAL THAT WAS BROUGHT TO SITE FOLLOWING DEMOLITION, SUMMER

DEC Memo:	Hydraulic Hammer spilled less than one gallon to the adjacent property.Clean up pending on property owner's consent. 10/23/2013 : Mahat A complaint was received from Mr. Boyes (Property owner) about the spill on his property. He mentioned Jeremiah (DEP) on the site to adress the complaint on 8/19/13. DEC Sharif also received a call from Mr. Boyes on the event of the spill. As of today, spill has not cleaned as per Mr. Boyes. 10/24/2013: Mahat A consultation session was conducted with Vought DEC. He suggested asking Mr. Boyes to take some picture of the impacted area and property. 10/25/2013: Mahat An email was received from Mr. Boyes with attachment of damaged property. All the pictures were taken at the time of the event. As a conversation over phone with Mr. Boyes, he mentioned RP performed a cleanup. DEC requires pictures of the current situation of the property (after the cleanup). This would help DEC to provide further guidance to both parties. A phone call was made to the responsible party. He mentioned that initial clean up was performed and intends to remove the boulders and rocks once the foundation work is performed on adjacent property. He used Zep instant spill absorbent to clean the ground in the vicinity of the spill and Simple Green Stone Cleaner on the rock. Received an email from Mr. Vaadia including the picture of the boulders and rocks (after an initial clean up from responsible party). 10/29/13: Mahat 10:25am : Left a message to Mr. Vaadia for a call back. 2:20pm: Mr. Vaadia replied back the call and asked DEC to provide the written letter from RP to excavate the stained boulders and rocks. Also, received an email from Mr. Kenney stating there is legal issue going between two property owners. He mentioned he performed the initial clean up and rest will be handled between two property owner directly.

(Continued) **S113915259**

3/17/14: Mahat T/C : A voice message was left to Mr. Kenny (Notifier @ 203.572.3752) to call back
the Department with more information. A call was received from Mr. Knnny mentioning that the
dispute between two property owner is going in a civil matter. There is no contmaniantion or
impacts that is impacting property of State. Hence, no further investigatio nis required by the
Department.

Remarks: Hydraulic hose leaked oil to boulders on neighbors property. Neighbor was not happy about this. Spill was less than a gallon. Hazmat is on scene, possibly from DEP.

DEC Memo:	209651. see eDocs 3/11/08: Spill submitted for closure by Con Ed. Sample was collected from material in vault and was ID'd as similar to dielectric fluid , with a PCB count of 211 ppm. Also, a crack was found in the floor of the structure. Con Ed sealed the crack in the floor without ascertaining if any oil leaked onto underlying soil. Request for closure denied, with following comment: Crack in floor must be broken out and soil beneath crack tested for PCBs to ensure that no oil leaked to soil. (JHO) 5/23/08: Con Ed crew broke out crack in floor and sampled soil beneath. Results <1 ppm PCB. Close. (JHO)

Contact Name:	ABOVE CALLER
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 09/28/2001 - Letter received from Scott Spector, the owner of the property. He states that the concrete floors were cleaned up by the former of the building. (Regency Metal Stampingf) This was done as part of the sales agreement. He personally observed the clean up. The floors were scraped, steam cleaned and were imaculate after the process was completed. He then took possession of the property. WILLIAM T. CHRISTENSEN see also 98-04127.
Remarks:	callers business is moving into factory bldg and last tenants had spilled above material and it seeped into concrete. caller already spoke to dec mr austin, dec sandra martionkat to handle monday

Hazardous Waste Summary:

Waste Code:	D040
Waste Description:	Trichlorethylene
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The

NORTH 9TH BROWNFIELD BCP #C224188 (Continued) **1018281199**

Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	24357
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	F00 - Pipe External Protection - None
	H00 - Tank Leak Detection - None
	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	G02 - Tank Secondary Containment - Vault (w/access)
Tank Location:	Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	12/01/1980
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	09/18/2003
Register:	True
Modified By:	MJGRIFFI

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT See also spill #95414404. Steve Zalloughi, Con Ed - both transformers leaking, also fuel oil in vault. Found drip marks on street indicating fuel oil from outside source. Dark stains

VAULT 2017 (Continued) **S103035648**

on wall indicate this may have
happened before. Zalloughi feels that could be accidental or
intentional dumping. 2 side-by-side
transformers in different vaults. Sump pum in vault TM-2476. Sump in
TM-2017, which flows to
TM-2476. In TM-2017 PCB count >70 ppm (historical). Plan to wait for
Chem Lab results on PCBs. Sump
pump has been disengaged. Must schedule outage. Transformers are not
stock items - wil be removed.
Leaks are from corrosion on bottom. 2/21/96: Tony Lebrono, Con Ed Chem
Lab - Sump pit - <1 ppm PCB;
vault bottom <1 ppm; debris on floor of vault 3 ppm; water/oi 8 ppm;
oil from vault <1 ppm. To be
cleaned when transformer removed and replaced. 2/7/05: Con Ed
conducted site visit in 8/04 - no
evidence of residual contamiantion. Sloe out. (JHO)

Remarks: TRANSFORMER LEAKED 4 GALLONS INTO THE HOLE

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D008

125 NORTH 10TH STREET LLC (Continued) **1006931253**

Waste Description: Lead

Waste Code: D018
Waste Description: Benzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

DEC Memo: Question is this TCE (PERC) or is it Petroleum? Is this managed by DEC Spills? - Depends on the quantity Case is now being worked on by Tyree - Matt Boeckel 631-249-3150 ext 241 04/25/12 Three hydraulic lifts were removed. End point samples were taken from surrounding the lifts.Some SVOCs exceedances observed in lab analytical data.One VOC TCE was detected(1800 ppb)above DEC guidelines(1300 PPB)in one sample.This detected level is not too high.Therefore,case is closed.(sr)

Remarks: 1800ppb on soil samples. No odor no staining

Spiller Name:	JOHN MITCHELL
Spiller Company:	CON ED
Spiller Address:	4 IRVING PLACE
Spiller Company:	001
Contact Name:	SAME
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 1/17/97 mmm:CALLED BACK JOHN MITCHELL FROM CON ED. #7 PIPELINE UNDER PRESSURE AND CON ED EMPLOYEE FOUND OIL IN ADJACENT ELECTRIC MANHOLE AT INTERSECTION OF KENT AVENUE & N. 10TH STREET. PIPELINE IS BEING TAKEN OUT OF SERVICE AND LOW POUR BEING INTRODUCED. EXCAVATION CREW MOBILIZED TO E.I. & R. 1/18/97:09:00 HRS- UPDATE-STILL DIGGING. NO LEAK FOUND 1/18/97:18:45 HRS- STILL DIGGING, NO LEAK FOUND YET 1/19/97:12:30 HRS - CALL FROM PAUL CARBONE FROM CON ED, STILL EXCAVATIONG ALONG KENT AVENUE. FOUND SMALL AMOUNT OF OIL IN TRENCH BUT NO LEAK ALONG PIPELINE (-20 WINDCHILLS). 1/20/97: MULQUEEN DOES SITE INSPECTION AND DISCUSSES SPILL WITH JOHN MITCHELL. TWO (2) TWENTY YARD ROLLOFFS FILLED WITH PETROLEUM CONTAMINATED SAND. TWO (2) MEG & ONE (1) CLEAN HARBORS VAC TRUCK(S) STANDING BY. THIS PIPELINE SECTION IS OFFSET TO THE WEST TO GO AROUND CON ED ELECTRIC MANHOLE. CON ED DIGGING AND LOOKING AT THE WELDS. FREE PRODUCT NOTED ON WATER TABLE IN POCKETS ALONG PIPELINE. APPROXIMATELY 70 FEET OF PIPELINE EXPOSED AT THIS TIME. 13:30 HRS: RETURN PAGE FROM PAUL CARBONE FROM CON ED. ACCORDING TO PAUL, THE STEAM PLANT IN MANHATTAN IS NOT IN FULL OPERATION AND RAVENSWOOD HAS BEEN GENERATING STEAM TO COMPENSATE, ESPECIALY DURING THE COLD WEATHER. RAVENSWOOD IS RUNNING LOW ON FUEL AND CON ED IS REQUESTING THAT THE PIPELINE IS ALLOWED TO GO BACK IN SERVICE. HE CITED THAT THERE WAS NO PRESSURE DECAY DURING TESTING. I TOLD HIM THAT IT WAS PROBABLY A FALSE POSITVE, DUE TO EXTREME COLD WEATHER. SINCE THIS WAS AN EMERGENCY, I TOLD HIM THAT THEY COULD PUT THE LINE BACK IN SERVICE, PROVIDED THAT THE EXCAVTED AREA IS ROADPLATED AND MONITORED. IF THERE IS ANY OTHER SIGNS OF OIL, THEN THEY ARE REQUIRED TO LAY THE PIPELINE UP AND DO REPAIRS AND CLEANUP. 1/22/97 UPDATE GHK: 10:00 ACCORDING TO JOHN MITCHELL, U.T. THE LINE IS STILL PRESSURIZED. 10:05 MET KAREL KONRAD/CHRISTINE KOVARI ONSITE. HE INDICATED THE FOLLOWING: THE OIL IN THE MANHOLE AND TRENCH WAS SAMPLED AND ANALYZED FOR FINGERPRINT AND PCB'S. THE RESULTS FROM THE TRENCH REVEALED PCB CONCENTRATIONS OF 98 AND 142 PPM. ADDITIONAL SAMPLES WERE COLLECTED TODAY. THE OIL IN THE MANHOLE REVEALED 36 PPM PCB'S. THE FINGERPRINT REVEALED HEAVY FUEL OIL. ALL ANALYTICAL WAS PERFORMED BY CON ED'S ASTORIA CHEM LAB. CON ED WILL PERFORM A SITE CHARACTERIZATION AND INSTALL TWO TO THREE 6 RECOVERY WELLS WITHIN THE EXISTING EXCAVATION (APPROXIMATELY 10 FEET INTO GROUNDWATER) AND INSTALL

N 10TH ST/KENT AVE (Continued) **S103272943**

AT LEAST ONE UPGRADIENT AND ONE DOWNGRADIENT MONITORING WELL. CHRISTINE KOVARI WILL BE THE CON ED
PROJECT MANAGER. 2/11/97: GHK update from C. Kovari (Con Ed Remediation) - no oil in recovery
wells. 2/13/97: GHK at site with John Mitchell and Christine Kovari. Will return next week to see
if any oil enters wells. If it does they will dample for oil ID, if not will analyze ground water
for VOCs and SVOCs via 8021 and 8270 in Friday Feb. 21.

DEC Memo:	01/10/08 - See eDocs for Con Ed report detailing cleanup and closure. e2mis no 158995 P. STANFORD, REPORTS FINDING APPX 1 PT OF UNK OIL ON APPX 20 GALS OF WATER IN THE STRUCTURE. NO SEWERS, WATERWAYS AFFECTED, SPILL APPEARS TO BE CONTAINED TO THE STRUCTURE. WATER IS STANDING STILL THERE IS NO VISUAL MOVEMENT, THERE IS NO SUMP IN THE STRUCTURE AND HE CANNOT VERIFY ANY SEWER CONNECTIONS AT THIS TIME. HE ALSO REPORTS VACTOR No. 60624 HAS TAKEN UP OIL AND IS CONTAMINATED. VACTOR WILL REMAIN ON LOCATION PENDING TEST RESULTS. ENVIRONMENTAL TAG NO. 43726 WAS PLACED IN THE STRUCTURE, SAMPLE TAKEN FOR PCB'S. THIS CLEANUP WILL BE TREATED AS > 50PPM, TO ALLOW ACCESS INTO THE STRUCTURE FOR THE EMERG. NO. 9 CREWS ON LOCATION. UPDATE 6/7/05 02:35 HRS ENV SUPV R. QUIJIJE REPORTS HE HE TOOK ANOTHER SAMPLE FOR A FLASH POINT TEST ON CHAIN OF CUSTODY# DD11069. THERE ARE NOW THREE SAMPLES PENDING, OIL ID, PCB, AND FLASHPOINT. Lab Sequence Number: 05-05404-001 - Flash Point, PMCC > 176 deg F QC ID: 01-200506032040 - PCBs < 1 ppm LAB RESULT RECEIVED 6/7/05 - 1049. 05-05408. OIL I.D. INDICATES A LIGHT FUEL OIL & ASPHALT. UPDATE: 6/7/05 - 1735 A. WALKER - O.S. - ENV. OPS., REPORTS A LIGHT FUEL OIL SEEPING THROUGH THE WALLS INTO THE STRUCTURE. THIS HAS CAUSED A THICK BUILD UP THAT WILL BE SOAKED WITH BIO GEN 715 TO LOOSEN IT UP.
Remarks:	one pint of unknown oil on 20gal of water in a manhole. This is coming off of the 24hr. diminimus program. Location is at the northwest corner of Kent Ave. when they went to the scene to clean they found light oil seeping through the walls. Will apply agent to clean walls and them they need to find the source of the oil because it will be continuous. ConEd#158995

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL Con Ed e2MIS notes: Approx. 2 gallons of an unknown solid oily substance on walls of MH-4353. No water in manhole. Spill appears to be contained. Two liquid samples (PBD & ID) taken. 4/5/00, 2255 hrs: Analysis indicates presence of a substance similar to a heavy fuel oil. 54 ppm PCBs. 4/7/00, 2230 hrs: drain is cemented. Barrels were picked up. Clean up completed by double washing structure with biogen 760. Liquid waste removed by tanker. Solid waste placed into 2 barrels and picked up by Astoria transp. for disposal. No sump. No leaking equipment. Over 50 ppm clean up paperwork retained with Env. Ops.

MANHOLE #4353 (Continued) **S107788100**

DEC Memo: 164204. 5/11/06 - 1820hrs - Damien Youngblood #15199 Splicer, UG, reports while on location for splicing on fdr 6B41 using account #20190 found 3 gallons unknown oil coming thru duct in MH4353 on floor, walls and cable in structure. No water involved. No fire/smoke involved. No sewers or waterways affected. No private property affected. There is a previous incident 164158 cleaned and closed out on 5/9/06 - less than 1ppm. There is also an incident on MH4352 #164182 dated 5/10/06 - pcb results less than 1pm - sample taken for oil id this date. This MH4352 turned into EH&S for remediation. Sample taken marked E priority for oil id and pcb and flashpoint chain of custody EE17036. Env stop tag # 38237 placed. As per T. Fernandez OS Env. Ops, reported to D. Hearns that this incident along with other will be turned over to Ann Ip EH&S for remediation due to the reoccurences of same. Clean up pending. cn#19661 11/18/16 Austin This spill report is being transferred from Joe O Connell to Kumar Patel - end 12/09/16-Hiralkumar Patel. as per notes by previous project manager, unknown oil found seeping into the manhole. 07/20/17-Hiralkumar Patel. 2:05 PM:- sent email to Paul Walsh at ERT requesting emis report. 07/24/17-Hiralkumar Patel. received email from Paul (at 4:08 PM on 07/21/17) including updated emis report. the subject spill case was reported on 05/11/2006 due to seepage of an unknown oil into manhole through duct. product sample analysis indicated presence of heavy fuel oil. manhole was cleaned out on 05/13/06, but oil was found again during subsequent inspection on 05/15/06. based on discussion with Con Ed, there was #6 oil line (Pipeline # 7) running along Kent Ave. this line was owned and operated by Con Ed and line was closed in 1998. similar issue (seepage of heavy fuel oil) was noted in manholes along N. 12th St (little west of Kent Ave) and seepage was noted multiple times. 9:12 AM:- left message for Con Ed Kenneth Reinhart requesting site inspection. during spills database search, found another spill case (# 1406210) reported by Verizon as heavy oil found seeping into their manhole along Kent Ave between N. 11th and N. 12th St. 12:50 PM:- sent email to Con Ed Kenneth Reinhart and Con Ed Neil O'Halloran. informed them about three similar spill cases (heavy fuel seepage into manholes/vault - 0203699, 0601588 & 1406210) along Kent Ave, in area where Con Ed's former Pipeline #7 is located. asked them to submit pipeline closure documents for review prior to site inspection. 07/25/17-Hiralkumar Patel. discussed with DEC Joseph O'Connell. he mentioned that a 20 inch diameter pipeline #7 was running underneath the Kent Ave. section of the pipeline in the area of N 10th St/N 12th St was removed, along with some surrounding soil. 12:25

MANHOLE #4353 (Continued) **S107788100**

PM:- visited area along Kent
Ave, between N. 10th St and N. 12th St to locate manholes/vault related to spill # 0203699, 0601588
& 1406210. during inspection, a Con Ed manhole was noted along west side of Kent Ave, at the
intersection of Kent Ave & N 10th St. this manhole is located in front of entrance to property 60
Kent Ave. 07/26/17-Hiralkumar Patel. found a Pipeline Closure and Remediation Report dated
05/31/2006 under spill #: 0000333. summary: - a 20-inch pipeline (Pipeline 7) formerly carried #6
fuel oil from North 1st St storage facility to the Rainey Tank Farm in Queens - area of Appendix B
Site 25 starts 50 ft south of Metropolitan Ave, runs north along Kent Ave/Franklin St to Eagle St,
and ends on Eagle St 130 ft east of Franklin St ---------- - multiple spills occurred from section
of pipeline in Site 25 - report includes results of endpoint soil sample collected in 2005 after
removal of the pipeline - after reviewing endpoint sample results, DEC OKed to handover section to
NYC DDC as per the pipeline closure report, the pipeline was removed and endpoint samples were
collected in 2005, but the subject spill case was reported on 05/11/2006 due to seepage of heavy
fuel oil into manhole. 08/09/17-Hiralkumar Patel. received message from Robert Duffy (at 3:02 PM on
08/08/17) from ConEd to schedule inspection of ConEd structures. 8:50 AM:- left message for Robert.
scheduled a site inspection at 9 AM on 08/11/17. 08/11/17-Hiralkumar Patel. site inspection has
been postponed and will be rescheduled. 11/13/17-Hiralkumar Patel. 11:51 AM:- spoke with Rob
regarding site inspection. he will ask project manager to call back to schedule an inspection.
06/08/20-Hiralkumar Patel. after discussing with DEC Austin, case closed based on review of
available information.

Remarks: No to the five questions. Unknown cause of the spill. Clean up is pending test results. ConEd#164204

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL CON ED E2MIS REPORT
5-17-01 V-5413 leaked approx. 1 pint of oil onto unit and concrete floor of structure from
secondary bushing. It is not leaking at this time. Records show 1ppm dated 5-11-98. Unit was
pressure tested and failed, will be replaced. Sump pump found unplugged. 1 sample taken and tag
placed. Spill appears contained, no sewer/waterway appear affected. 1520hrs. Cleanup status will be
changed from 24hr.program due to the replacement of the unit. Dielectric transformer spill.

VAULT 5413 (Continued) **S105057451**

2040hrs. Crew did spot cleanup as 50-499ppm and removed 1 drum of debris. tag left in place pending
the removal of unit. Drum brought to 3rd Ave. yard under the 1-trip rule. 6-11-01 1215hrs. 19ppm
cleanup completed by double washing structure with slix, waste product removed with vactor. Sump
pump in concrete sump is unplugged. tag removed.

Remarks: LEAKING BUSHING ON TRASFORMER - LEAKED 1 PINT - THEY HAVE TO REMOVE TRANSFORMER PRIOR TO CLEAN UP - REF #137157

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DER Facility ID:	25519
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 9/23/03, ROSSAN; DDO: Tank test failure letter was prepared and sent to: Mr. Frank Dross F N W Mechanical 139 North 10th Street Brooklyn, NY 11211 Ed. 10/3/05: CBN Called Phil Fazin, the tank tester and was told he would get back to DEC with more info. 9/22/06 ttf letter sent to owner: Sandra Maislen San Ten Raz LLC 120 Pleaseant St., Apt. 2 Brookline, MA 02446 bf 11/13/06 On 10/12/06, received letter from Sandra Maislen in response to ttf letter. Reviewed letter and the attachments. The fill line, stick line, and vent line failed. I called Petroleum Tanks to see if they remember detecting any contamination when lines were replaced. I was told Mark Salamack was the person in charge of the tank repairs. He was in a meeting at the time of the call and I left a message for him to call me. Mr. Salamack (718-624-4842) called me back and told me that there was no observed contamination and no elevated reading on the PID meter used at the time of the repairs. NFA. bf

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Property is being sold. Purchaser hired a firm to do a phase 2 and found contaminated soil under a crack in the cement floor. This location used to have an oil tank standing above it. Eastern Environmental has been hired by the current owner. They have opened the floor and will have a guzzler truck suck out contaminated soil. In the next few days they HOPE to hit clean endpoints and send samples in to confirm cleanup is complete. If they do not get clean endpoints they will call Sharif Rahman directly for further instructions. 10/08/10 Stopped by the site.The area in questionw was dug and contaminated soil was removed and excavation backfilled,

CON EDISON (Continued) **S104789770**

cemented.Report will be sent
to DEC.(sr) 12/14/10 Rec'd analytical report for soil sample.VOCs/SVOCs exceedances are
minor.Report in edocs.Case closed.(sr) 05/12/11 Doug from Eastern Environmental(631-727-2700)
called me to say that his company was not paid for the work and asked why the spill was closed
without disposal manifest.He also mentioned that the tank and associated contamination was removed
properly.I explained it to him that the spill was closed based on end point data.(sr)

Remarks: onto concrete. Further Information Unknown at this time.

Spiller Company:	SUPERIOR INGREDIENTS
Spiller Address:	74 WYTHE AVE
Spiller Company:	999
Contact Name:	ANONYMOUS
DEC Memo:	04/09/10-Hiralkumar Patel. visited site (at 4:05 PM on 04/08/10). found red food color on water from backside of the warehouse. no oil spilled. no odors. case closed.
Remarks:	Caller states that a liquid petroleum looking product is running down the road from the back door of the warehouse.Spill is visible from North of 12TH ST, has not entered sewer yet, DEC DLE # 10-005628 generated also.

HW Code: C224268
Control Code: 12
Control Type: ENG
Date Record Added: 07/29/2022
Date Rec Updated: 12/28/2022
Updated By: SNBOLLER
Site Description: Location: The site is located in an urban area in the Williamsburg neighborhood of Brooklyn, NY. The approximately 35,942 square-foot (0.825-acre), irregularly shaped site is bounded to the north by North 12th Street, to the east by Berry Street, to the west by a warehouse building used by the Brooklyn Brewery, and to the south by North 11th Street and two buildings containing residential apartments. Site Features: The site is developed with an L-shaped, seven-story residential building that fronts Berry and North 12th Streets, with an open courtyard area located behind the building in the central portion of the site. A basement level parking garage is located under the building and courtyard, with an entrance ramp located on North 11th Street. A small, street-level valet parking lot is also located on North 11th Street, immediately east of the garage entrance ramp. Current Zoning and Land Use: The site is zoned as M1-2/R6A (light manufacturing and residential uses). The surrounding area is developed primarily with residential and commercial properties. Past Use of the Site: Historic records indicated that the site was developed with industrial and manufacturing uses, including the New York Quinine and Chemical Works between 1887 and 1951. After 1951, the site was used for freight loading and parking of vehicles. Sanborn maps from 1965 to 2006 (after decommissioning of the quinine factory) depict a large 2-story freight loading facility and warehouse in the western portion of the site, a 2-story truck repair facility/warehouse and a 4-story unspecified manufacturing facility in the southwestern portion of the site, and a parking lot in the eastern portion of the site containing two gasoline tanks of unspecified capacity. All on-site buildings were demolished starting in April 2008, and construction of the existing residential structure started in June 2008. Building construction was completed in early 2009. Site Geology and Hydrogeology: The surface topography in the surrounding area is flat, gradually sloping northwest towards the East River, which is located approximately 1,100 feet from the site. The site lies at an elevation of approximately 20 feet above sea level. Prior to development, shallow subsurface soils included urban fill material containing brick, asphalt, and concrete fragments to approximately 6 to 10 feet below ground surface (bgs), underlain by apparent native silty sand and silt. Most of the fill was removed during development to construct the current structure. Depth to bedrock at the site is expected to be approximately 100 feet bgs. The dominant groundwater flow direction at the site is to the north and northeast, with some variations to the northwest. Groundwater is present at depths ranging from approximately 5 to 8 feet below the basement garage floor, which corresponds to approximate depths of approximately 11 to 14 feet bgs. There are no surface water bodies or streams on or immediately adjacent to the site.
Env Problem: Post-Remediation: Remediation of the site is complete. Prior to remediation the primary contaminants of concern were Light Non-Aqueous Phase Liquid (LNAPL) associated with fuel oil leaks from USTs and volatile organic compounds (VOCs) namely 1,2-dichloroethane (DCA). The VOCs were detected in groundwater at concentrations exceeding ambient water quality standards. Remedial actions have

34 BERRY STREET (Continued) **S121933779**

successfully achieved the site cleanup objectives under a track 4 cleanup which included a site cover, enhanced recovery of the LNAPL through injection of a surfactant blend and biological treatment of the groundwater to reduce VOC contamination. Sub-slab/soil vapor is not a concern at the site. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: During the Remedial Investigation soil and groundwater were sampled and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), pesticides, and emerging contaminants (ECs). Sub-slab soil vapor and indoor air were analyzed for VOCs. Based upon the investigations conducted, the primary contaminants of concern were identified as petroleum in the form of Light Non-Aqueous Phase Liquid (LNAPL)and chlorinated VOCs. Soil - The investigation documented that VOC contamination in soil is present in two distinct contaminant zones: 1,2-dichloroethane (DCA) on the eastern side of the site, and petroleum LNAPL on the western side of the site. Fingerprint analysis completed during a previous investigation identified the LNAPL as fuel oil. Since 2009 the NAPL has been managed by a collection system, which was upgraded as an IRM during the Spring of 2019. Quarterly gauging of monitoring wells indicates the extent and thickness of the plume has been reduced by the LNAPL collection system. One VOC, 1,2-DCA, was detected at a concentration in excess of its restricted residential soil cleanup objective (RRSCO) at a depth of 14 to 15 feet below garage basement grade (bbg) (the water table is at 6ft-bbg), at a concentration of 7.9 parts per million (ppm) compared to a RRSCO of 3.1 ppm and the applicable protection of groundwater SCO (PGWSCO) of 0.02 ppm. 1,2-DCA was not detected in any other soil sample collected during the RI, or all the previous investigations at the site, that would indicate any additional source areas. Trivalent chromium was found at a concentration of 251 ppm, which exceeds the applicable RRUSCO of 180 ppm. This metal appears to be attributable to historic fill. Fourteen per- and polyfluoroalkyl substances (PFAS) were detected in one or more soil samples at concentrations ranging from an estimated 0.017 parts per billion (ppb) to 0.12 ppb. None of the detected PFAS compounds had concentrations above the screening level of 1 ppb. Perfluorooctanesulfonic acid (PFOS) was detected at a maximum concentration of 0.12 ppb and perfluorooctanoic acid (PFOA) was detected at a maximum of 0.039 ppb. 1,4-dioxane was not detected in soil samples. No SVOCS, PCBs or pesticides were detected at concentrations exceeding the unrestricted use SCOs. Data does not indicate any off-site impacts in soil related to this site. Groundwater - Eight VOCs were detected at concentrations above their respective Ambient Water Quality Standards (AWQS) in one or more samples. These included the petroleum VOCs related to the LNAPL zone, and chlorinated solvents. The petroleum VOCs include benzene at a maximum concentration of 430 ppb compared to the AWQS of 1 ppb and toluene at a maximum concentration of 17 ppb (AWQS is 5 ppb). Chlorinated VOCs include 1,2-DCA at a maximum concentration of 660 ppb (AWQS is 0.6 ppb), 1,2-dichloropropane at a maximum concentration of 160 ppb (AWQS is 1.0 ppb), trichloroethene (TCE) at a maximum concentration of 21 ppb (AWQS is 5.0 ppb), chlorobenzene at a maximum concentration of 5.7 ppb (AWQS is 5.0 ppb), chloroform at a maximum concentration of 34 ppb (AWQS is 7.0 ppb), and tetrachloroethene (PCE) at a maximum concentration of 13 ppb (AWQS is 5.0 ppb). PFOS

34 BERRY STREET (Continued) **S121933779**

and PFOA were detected at concentrations above the NYSDEC screening level of 10 parts per trillion (ppt) each with the maximum PFOA concentration of 130 ppt and the maximum PFOS concentration of 47.7 ppt. 1,4-Dioxane was detected at a maximum concentration of 0.69 ppb, below its screening level of 1 ppb. There is no record of use of PFAS or 1,4-dioxane at this site and the site is not considered a source of emerging contaminants. No SVOCS, PCBs or pesticides were found exceeding AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9 g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Site Description:	Location: The site is located in an urban area in the Williamsburg neighborhood of Brooklyn, NY. The approximately 35,942 square-foot (0.825-acre), irregularly shaped site is bounded to the north by North 12th Street, to the east by Berry Street, to the west by a warehouse building used by the Brooklyn Brewery, and to the south by North 11th Street and two buildings containing residential apartments. Site Features: The site is developed with an L-shaped, seven-story residential building that fronts Berry and North 12th Streets, with an open courtyard area located behind the building in the central portion of the site. A basement level parking garage is located under the building and courtyard, with an entrance ramp

34 BERRY STREET (Continued) **S121933779**

located on North 11th Street. A small, street-level valet parking lot is also located on North 11th Street, immediately east of the garage entrance ramp. Current Zoning and Land Use: The site is zoned as M1-2/R6A (light manufacturing and residential uses). The surrounding area is developed primarily with residential and commercial properties. Past Use of the Site: Historic records indicated that the site was developed with industrial and manufacturing uses, including the New York Quinine and Chemical Works between 1887 and 1951. After 1951, the site was used for freight loading and parking of vehicles. Sanborn maps from 1965 to 2006 (after decommissioning of the quinine factory) depict a large 2-story freight loading facility and warehouse in the western portion of the site, a 2-story truck repair facility/warehouse and a 4-story unspecified manufacturing facility in the southwestern portion of the site, and a parking lot in the eastern portion of the site containing two gasoline tanks of unspecified capacity. All on-site buildings were demolished starting in April 2008, and construction of the existing residential structure started in June 2008. Building construction was completed in early 2009. Site Geology and Hydrogeology: The surface topography in the surrounding area is flat, gradually sloping northwest towards the East River, which is located approximately 1,100 feet from the site. The site lies at an elevation of approximately 20 feet above sea level. Prior to development, shallow subsurface soils included urban fill material containing brick, asphalt, and concrete fragments to approximately 6 to 10 feet below ground surface (bgs), underlain by apparent native silty sand and silt. Most of the fill was removed during development to construct the current structure. Depth to bedrock at the site is expected to be approximately 100 feet bgs. The dominant groundwater flow direction at the site is to the north and northeast, with some variations to the northwest. Groundwater is present at depths ranging from approximately 5 to 8 feet below the basement garage floor, which corresponds to approximate depths of approximately 11 to 14 feet bgs. There are no surface water bodies or streams on or immediately adjacent to the site.

Env Problem: Post-Remediation: Remediation of the site is complete. Prior to remediation the primary contaminants of concern were Light Non-Aqueous Phase Liquid (LNAPL) associated with fuel oil leaks from USTs and volatile organic compounds (VOCs) namely 1,2-dichloroethane (DCA). The VOCs were detected in groundwater at concentrations exceeding ambient water quality standards. Remedial actions have successfully achieved the site cleanup objectives under a track 4 cleanup which included a site cover, enhanced recovery of the LNAPL through injection of a surfactant blend and biological treatment of the groundwater to reduce VOC contamination. Sub-slab/soil vapor is not a concern at the site. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: During the Remedial Investigation soil and groundwater were sampled and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), pesticides, and emerging contaminants (ECs). Sub-slab soil vapor and indoor air were analyzed for VOCs. Based upon the investigations conducted, the primary contaminants of concern were identified as petroleum in the form of Light Non-Aqueous Phase Liquid (LNAPL)and chlorinated VOCs. Soil - The investigation documented that VOC contamination in soil is present in two distinct contaminant zones: 1,2-dichloroethane (DCA) on the eastern side of the site, and

34 BERRY STREET (Continued) **S121933779**

petroleum LNAPL on the western side of the site. Fingerprint analysis completed during a previous investigation identified the LNAPL as fuel oil. Since 2009 the NAPL has been managed by a collection system, which was upgraded as an IRM during the Spring of 2019. Quarterly gauging of monitoring wells indicates the extent and thickness of the plume has been reduced by the LNAPL collection system. One VOC, 1,2-DCA, was detected at a concentration in excess of its restricted residential soil cleanup objective (RRSCO) at a depth of 14 to 15 feet below garage basement grade (bbg) (the water table is at 6ft-bbg), at a concentration of 7.9 parts per million (ppm) compared to a RRSCO of 3.1 ppm and the applicable protection of groundwater SCO (PGWSCO) of 0.02 ppm. 1,2-DCA was not detected in any other soil sample collected during the RI, or all the previous investigations at the site, that would indicate any additional source areas. Trivalent chromium was found at a concentration of 251 ppm, which exceeds the applicable RRUSCO of 180 ppm. This metal appears to be attributable to historic fill. Fourteen per- and polyfluoroalkyl substances (PFAS) were detected in one or more soil samples at concentrations ranging from an estimated 0.017 parts per billion (ppb) to 0.12 ppb. None of the detected PFAS compounds had concentrations above the screening level of 1 ppb. Perfluorooctanesulfonic acid (PFOS) was detected at a maximum concentration of 0.12 ppb and perfluorooctanoic acid (PFOA) was detected at a maximum of 0.039 ppb. 1,4-dioxane was not detected in soil samples. No SVOCS, PCBs or pesticides were detected at concentrations exceeding the unrestricted use SCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - Eight VOCs were detected at concentrations above their respective Ambient Water Quality Standards (AWQS) in one or more samples. These included the petroleum VOCs related to the LNAPL zone, and chlorinated solvents. The petroleum VOCs include benzene at a maximum concentration of 430 ppb compared to the AWQS of 1 ppb and toluene at a maximum concentration of 17 ppb (AWQS is 5 ppb). Chlorinated VOCs include 1,2-DCA at a maximum concentration of 660 ppb (AWQS is 0.6 ppb), 1,2-dichloropropane at a maximum concentration of 160 ppb (AWQS is 1.0 ppb), trichloroethene (TCE) at a maximum concentration of 21 ppb (AWQS is 5.0 ppb), chlorobenzene at a maximum concentration of 5.7 ppb (AWQS is 5.0 ppb), chloroform at a maximum concentration of 34 ppb (AWQS is 7.0 ppb), and tetrachloroethene (PCE) at a maximum concentration of 13 ppb (AWQS is 5.0 ppb). PFOS and PFOA were detected at concentrations above the NYSDEC screening level of 10 parts per trillion (ppt) each with the maximum PFOA concentration of 130 ppt and the maximum PFOS concentration of 47.7 ppt. 1,4-Dioxane was detected at a maximum concentration of 0.69 ppb, below its screening level of 1 ppb. There is no record of use of PFAS or 1,4-dioxane at this site and the site is not considered a source of emerging contaminants. No SVOCS, PCBs or pesticides were found exceeding AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA

34 BERRY STREET (Continued) **S121933779**

was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9 g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9 g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Health Problem: Measures are in place to prevent exposures to remaining contaminants.
Dump: False

Site Code: 564025
Site Description: Location: The site is located in an urban area in the Williamsburg neighborhood of Brooklyn, NY. The approximately 35,942 square-foot (0.825-acre), irregularly shaped site is bounded to the north by North 12th Street, to the east by Berry Street, to the west by a warehouse building used by the Brooklyn Brewery, and to the south by North 11th Street and two buildings containing residential apartments. Site Features: The site is developed with an L-shaped, seven-story residential building that fronts Berry and North 12th Streets, with an open courtyard area located behind the building in the central portion of the site. A basement level parking garage is located under the building and courtyard, with an entrance ramp located on North 11th Street. A small, street-level valet parking lot is also located on North 11th Street, immediately east of the garage entrance ramp. Current Zoning and Land Use: The site is zoned as M1-2/R6A (light manufacturing and residential uses). The surrounding area is developed primarily with residential and commercial properties. Past Use of the Site: Historic records indicated that the site was developed with industrial and manufacturing uses, including the New York Quinine and Chemical Works between 1887 and 1951. After 1951, the site was used for freight loading and parking of vehicles. Sanborn maps from 1965 to 2006 (after decommissioning of the quinine factory) depict a large 2-story freight loading facility and warehouse in the western portion of the site, a 2-story truck repair facility/warehouse and a 4-story unspecified manufacturing facility in the southwestern portion of the site, and a parking lot in the eastern portion of the site containing two gasoline tanks of unspecified capacity. All on-site buildings were demolished starting in April 2008, and construction of the existing residential structure started in June 2008. Building construction was completed in early 2009. Site Geology and Hydrogeology: The surface topography in the surrounding area is flat, gradually sloping northwest towards the East River, which is located approximately 1,100 feet from the site. The site lies at an elevation of approximately 20 feet above sea level. Prior to development, shallow subsurface soils included urban fill material containing brick, asphalt, and concrete fragments to approximately 6 to 10 feet below ground surface (bgs), underlain by apparent native silty sand and silt. Most of the fill was removed during development to construct the current structure. Depth to bedrock at the site is expected to be approximately 100 feet bgs. The dominant groundwater flow direction at the site is to the north and northeast, with some variations to the northwest. Groundwater is present at depths ranging from approximately 5 to 8 feet below the

34 BERRY STREET (Continued) **S121933779**

basement garage floor, which corresponds to approximate depths of approximately 11 to 14 feet bgs. There are no surface water bodies or streams on or immediately adjacent to the site.

Env Problem: Post-Remediation: Remediation of the site is complete. Prior to remediation the primary contaminants of concern were Light Non-Aqueous Phase Liquid (LNAPL) associated with fuel oil leaks from USTs and volatile organic compounds (VOCs) namely 1,2-dichloroethane (DCA). The VOCs were detected in groundwater at concentrations exceeding ambient water quality standards. Remedial actions have successfully achieved the site cleanup objectives under a track 4 cleanup which included a site cover, enhanced recovery of the LNAPL through injection of a surfactant blend and biological treatment of the groundwater to reduce VOC contamination. Sub-slab/soil vapor is not a concern at the site. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: During the Remedial Investigation soil and groundwater were sampled and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), pesticides, and emerging contaminants (ECs). Sub-slab soil vapor and indoor air were analyzed for VOCs. Based upon the investigations conducted, the primary contaminants of concern were identified as petroleum in the form of Light Non-Aqueous Phase Liquid (LNAPL)and chlorinated VOCs. Soil - The investigation documented that VOC contamination in soil is present in two distinct contaminant zones: 1,2-dichloroethane (DCA) on the eastern side of the site, and petroleum LNAPL on the western side of the site. Fingerprint analysis completed during a previous investigation identified the LNAPL as fuel oil. Since 2009 the NAPL has been managed by a collection system, which was upgraded as an IRM during the Spring of 2019. Quarterly gauging of monitoring wells indicates the extent and thickness of the plume has been reduced by the LNAPL collection system. One VOC, 1,2-DCA, was detected at a concentration in excess of its restricted residential soil cleanup objective (RRSCO) at a depth of 14 to 15 feet below garage basement grade (bbg) (the water table is at 6ft-bbg), at a concentration of 7.9 parts per million (ppm) compared to a RRSCO of 3.1 ppm and the applicable protection of groundwater SCO (PGWSCO) of 0.02 ppm. 1,2-DCA was not detected in any other soil sample collected during the RI, or all the previous investigations at the site, that would indicate any additional source areas. Trivalent chromium was found at a concentration of 251 ppm, which exceeds the applicable RRUSCO of 180 ppm. This metal appears to be attributable to historic fill. Fourteen per- and polyfluoroalkyl substances (PFAS) were detected in one or more soil samples at concentrations ranging from an estimated 0.017 parts per billion (ppb) to 0.12 ppb. None of the detected PFAS compounds had concentrations above the screening level of 1 ppb. Perfluorooctanesulfonic acid (PFOS) was detected at a maximum concentration of 0.12 ppb and perfluorooctanoic acid (PFOA) was detected at a maximum of 0.039 ppb. 1,4-dioxane was not detected in soil samples. No SVOCS, PCBs or pesticides were detected at concentrations exceeding the unrestricted use SCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - Eight VOCs were detected at concentrations above their respective Ambient Water Quality Standards (AWQS) in one or more samples. These included the petroleum VOCs related to the LNAPL zone, and chlorinated solvents. The petroleum VOCs include benzene at a

34 BERRY STREET (Continued) **S121933779**

maximum concentration of 430 ppb compared to the AWQS of 1 ppb and toluene at a maximum concentration of 17 ppb (AWQS is 5 ppb). Chlorinated VOCs include 1,2-DCA at a maximum concentration of 660 ppb (AWQS is 0.6 ppb), 1,2-dichloropropane at a maximum concentration of 160 ppb (AWQS is 1.0 ppb), trichloroethene (TCE) at a maximum concentration of 21 ppb (AWQS is 5.0 ppb), chlorobenzene at a maximum concentration of 5.7 ppb (AWQS is 5.0 ppb), chloroform at a maximum concentration of 34 ppb (AWQS is 7.0 ppb), and tetrachloroethene (PCE) at a maximum concentration of 13 ppb (AWQS is 5.0 ppb). PFOS and PFOA were detected at concentrations above the NYSDEC screening level of 10 parts per trillion (ppt) each with the maximum PFOA concentration of 130 ppt and the maximum PFOS concentration of 47.7 ppt. 1,4-Dioxane was detected at a maximum concentration of 0.69 ppb, below its screening level of 1 ppb. There is no record of use of PFAS or 1,4-dioxane at this site and the site is not considered a source of emerging contaminants. No SVOCS, PCBs or pesticides were found exceeding AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9 g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Site Code: 564025
Site Description: Location: The site is located in an urban area in the Williamsburg neighborhood of Brooklyn, NY. The approximately 35,942 square-foot (0.825-acre), irregularly shaped site is bounded to the north by North 12th Street, to the east by Berry Street, to the west by a warehouse building used by the Brooklyn Brewery, and to the south by North 11th Street and two buildings containing residential apartments. Site Features: The site is developed with an L-shaped, seven-story residential building that fronts Berry and North 12th Streets, with an open courtyard area located behind the building in the central portion of the site. A basement level parking garage is located under the building and courtyard, with an entrance ramp located on North 11th Street. A small, street-level valet parking lot is also located on North 11th Street, immediately east of the garage entrance ramp. Current Zoning and Land Use: The site is zoned as M1-2/R6A (light manufacturing and residential uses). The surrounding

34 BERRY STREET (Continued) **S121933779**

area is developed primarily with residential and commercial properties. Past Use of the Site: Historic records indicated that the site was developed with industrial and manufacturing uses, including the New York Quinine and Chemical Works between 1887 and 1951. After 1951, the site was used for freight loading and parking of vehicles. Sanborn maps from 1965 to 2006 (after decommissioning of the quinine factory) depict a large 2-story freight loading facility and warehouse in the western portion of the site, a 2-story truck repair facility/warehouse and a 4-story unspecified manufacturing facility in the southwestern portion of the site, and a parking lot in the eastern portion of the site containing two gasoline tanks of unspecified capacity. All on-site buildings were demolished starting in April 2008, and construction of the existing residential structure started in June 2008. Building construction was completed in early 2009. Site Geology and Hydrogeology: The surface topography in the surrounding area is flat, gradually sloping northwest towards the East River, which is located approximately 1,100 feet from the site. The site lies at an elevation of approximately 20 feet above sea level. Prior to development, shallow subsurface soils included urban fill material containing brick, asphalt, and concrete fragments to approximately 6 to 10 feet below ground surface (bgs), underlain by apparent native silty sand and silt. Most of the fill was removed during development to construct the current structure. Depth to bedrock at the site is expected to be approximately 100 feet bgs. The dominant groundwater flow direction at the site is to the north and northeast, with some variations to the northwest. Groundwater is present at depths ranging from approximately 5 to 8 feet below the basement garage floor, which corresponds to approximate depths of approximately 11 to 14 feet bgs. There are no surface water bodies or streams on or immediately adjacent to the site.

Env Problem: Post-Remediation: Remediation of the site is complete. Prior to remediation the primary contaminants of concern were Light Non-Aqueous Phase Liquid (LNAPL) associated with fuel oil leaks from USTs and volatile organic compounds (VOCs) namely 1,2-dichloroethane (DCA). The VOCs were detected in groundwater at concentrations exceeding ambient water quality standards. Remedial actions have successfully achieved the site cleanup objectives under a track 4 cleanup which included a site cover, enhanced recovery of the LNAPL through injection of a surfactant blend and biological treatment of the groundwater to reduce VOC contamination. Sub-slab/soil vapor is not a concern at the site. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: During the Remedial Investigation soil and groundwater were sampled and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), pesticides, and emerging contaminants (ECs). Sub-slab soil vapor and indoor air were analyzed for VOCs. Based upon the investigations conducted, the primary contaminants of concern were identified as petroleum in the form of Light Non-Aqueous Phase Liquid (LNAPL)and chlorinated VOCs. Soil - The investigation documented that VOC contamination in soil is present in two distinct contaminant zones: 1,2-dichloroethane (DCA) on the eastern side of the site, and petroleum LNAPL on the western side of the site. Fingerprint analysis completed during a previous investigation identified the LNAPL as fuel oil. Since 2009 the NAPL has been managed by a collection system, which was upgraded as an IRM during the Spring of 2019.

34 BERRY STREET (Continued) **S121933779**

Quarterly gauging of monitoring wells indicates the extent and thickness of the plume has been reduced by the LNAPL collection system. One VOC, 1,2-DCA, was detected at a concentration in excess of its restricted residential soil cleanup objective (RRSCO) at a depth of 14 to 15 feet below garage basement grade (bbg) (the water table is at 6ft-bbg), at a concentration of 7.9 parts per million (ppm) compared to a RRSCO of 3.1 ppm and the applicable protection of groundwater SCO (PGWSCO) of 0.02 ppm. 1,2-DCA was not detected in any other soil sample collected during the RI, or all the previous investigations at the site, that would indicate any additional source areas. Trivalent chromium was found at a concentration of 251 ppm, which exceeds the applicable RRUSCO of 180 ppm. This metal appears to be attributable to historic fill. Fourteen per- and polyfluoroalkyl substances (PFAS) were detected in one or more soil samples at concentrations ranging from an estimated 0.017 parts per billion (ppb) to 0.12 ppb. None of the detected PFAS compounds had concentrations above the screening level of 1 ppb. Perfluorooctanesulfonic acid (PFOS) was detected at a maximum concentration of 0.12 ppb and perfluorooctanoic acid (PFOA) was detected at a maximum of 0.039 ppb. 1,4-dioxane was not detected in soil samples. No SVOCS, PCBs or pesticides were detected at concentrations exceeding the unrestricted use SCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - Eight VOCs were detected at concentrations above their respective Ambient Water Quality Standards (AWQS) in one or more samples. These included the petroleum VOCs related to the LNAPL zone, and chlorinated solvents. The petroleum VOCs include benzene at a maximum concentration of 430 ppb compared to the AWQS of 1 ppb and toluene at a maximum concentration of 17 ppb (AWQS is 5 ppb). Chlorinated VOCs include 1,2-DCA at a maximum concentration of 660 ppb (AWQS is 0.6 ppb), 1,2-dichloropropane at a maximum concentration of 160 ppb (AWQS is 1.0 ppb), trichloroethene (TCE) at a maximum concentration of 21 ppb (AWQS is 5.0 ppb), chlorobenzene at a maximum concentration of 5.7 ppb (AWQS is 5.0 ppb), chloroform at a maximum concentration of 34 ppb (AWQS is 7.0 ppb), and tetrachloroethene (PCE) at a maximum concentration of 13 ppb (AWQS is 5.0 ppb). PFOS and PFOA were detected at concentrations above the NYSDEC screening level of 10 parts per trillion (ppt) each with the maximum PFOA concentration of 130 ppt and the maximum PFOS concentration of 47.7 ppt. 1,4-Dioxane was detected at a maximum concentration of 0.69 ppb, below its screening level of 1 ppb. There is no record of use of PFAS or 1,4-dioxane at this site and the site is not considered a source of emerging contaminants. No SVOCS, PCBs or pesticides were found exceeding AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9

34 BERRY STREET (Continued) **S121933779**

g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Health Problem: Measures are in place to prevent exposures to remaining contaminants.

Control Type: INST
Dt record added: 07/29/2022
Dt rec updated: 12/28/2022
Updated By: SNBOLLER
Site Code: 564025
Site Description: Location: The site is located in an urban area in the Williamsburg neighborhood of Brooklyn, NY. The approximately 35,942 square-foot (0.825-acre), irregularly shaped site is bounded to the north by North 12th Street, to the east by Berry Street, to the west by a warehouse building used by the Brooklyn Brewery, and to the south by North 11th Street and two buildings containing residential apartments. Site Features: The site is developed with an L-shaped, seven-story residential building that fronts Berry and North 12th Streets, with an open courtyard area located behind the building in the central portion of the site. A basement level parking garage is located under the building and courtyard, with an entrance ramp located on North 11th Street. A small, street-level valet parking lot is also located on North 11th Street, immediately east of the garage entrance ramp. Current Zoning and Land Use: The site is zoned as M1-2/R6A (light manufacturing and residential uses). The surrounding area is developed primarily with residential and commercial properties. Past Use of the Site: Historic records indicated that the site was developed with industrial and manufacturing uses, including the New York Quinine and Chemical Works between 1887 and 1951. After 1951, the site was used for freight loading and parking of vehicles. Sanborn maps from 1965 to 2006 (after decommissioning of the quinine factory) depict a large 2-story freight loading facility and warehouse in the western portion of the site, a 2-story truck repair facility/warehouse and a 4-story unspecified manufacturing facility in the southwestern portion of the site, and a parking lot in the eastern portion of the site containing two gasoline tanks of unspecified capacity. All on-site buildings were demolished starting in April 2008, and construction of the existing residential structure started in June 2008. Building construction was completed in early 2009. Site Geology and Hydrogeology: The surface topography in the surrounding area is flat, gradually sloping northwest towards the East River, which is located approximately 1,100 feet from the site. The site lies at an elevation of approximately 20 feet above sea level. Prior to development, shallow subsurface soils included urban fill material containing brick, asphalt, and concrete fragments to approximately 6 to 10 feet below ground surface (bgs), underlain by apparent native silty sand and silt. Most of the fill was removed during development to construct the current structure. Depth to bedrock at the site is expected to be approximately 100 feet bgs. The dominant groundwater flow direction at the site is to the north and northeast, with some variations to the northwest. Groundwater is present at depths ranging from approximately 5 to 8 feet below the basement garage floor, which corresponds to approximate depths of approximately 11 to 14 feet bgs. There are no surface water bodies or streams on or immediately adjacent to the site.

34 BERRY STREET (Continued) **S121933779**

Env Problem: Post-Remediation: Remediation of the site is complete. Prior to remediation the primary contaminants of concern were Light Non-Aqueous Phase Liquid (LNAPL) associated with fuel oil leaks from USTs and volatile organic compounds (VOCs) namely 1,2-dichloroethane (DCA). The VOCs were detected in groundwater at concentrations exceeding ambient water quality standards. Remedial actions have successfully achieved the site cleanup objectives under a track 4 cleanup which included a site cover, enhanced recovery of the LNAPL through injection of a surfactant blend and biological treatment of the groundwater to reduce VOC contamination. Sub-slab/soil vapor is not a concern at the site. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: During the Remedial Investigation soil and groundwater were sampled and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), pesticides, and emerging contaminants (ECs). Sub-slab soil vapor and indoor air were analyzed for VOCs. Based upon the investigations conducted, the primary contaminants of concern were identified as petroleum in the form of Light Non-Aqueous Phase Liquid (LNAPL)and chlorinated VOCs. Soil - The investigation documented that VOC contamination in soil is present in two distinct contaminant zones: 1,2-dichloroethane (DCA) on the eastern side of the site, and petroleum LNAPL on the western side of the site. Fingerprint analysis completed during a previous investigation identified the LNAPL as fuel oil. Since 2009 the NAPL has been managed by a collection system, which was upgraded as an IRM during the Spring of 2019. Quarterly gauging of monitoring wells indicates the extent and thickness of the plume has been reduced by the LNAPL collection system. One VOC, 1,2-DCA, was detected at a concentration in excess of its restricted residential soil cleanup objective (RRSCO) at a depth of 14 to 15 feet below garage basement grade (bbg) (the water table is at 6ft-bbg), at a concentration of 7.9 parts per million (ppm) compared to a RRSCO of 3.1 ppm and the applicable protection of groundwater SCO (PGWSCO) of 0.02 ppm. 1,2-DCA was not detected in any other soil sample collected during the RI, or all the previous investigations at the site, that would indicate any additional source areas. Trivalent chromium was found at a concentration of 251 ppm, which exceeds the applicable RRUSCO of 180 ppm. This metal appears to be attributable to historic fill. Fourteen per- and polyfluoroalkyl substances (PFAS) were detected in one or more soil samples at concentrations ranging from an estimated 0.017 parts per billion (ppb) to 0.12 ppb. None of the detected PFAS compounds had concentrations above the screening level of 1 ppb. Perfluorooctanesulfonic acid (PFOS) was detected at a maximum concentration of 0.12 ppb and perfluorooctanoic acid (PFOA) was detected at a maximum of 0.039 ppb. 1,4-dioxane was not detected in soil samples. No SVOCS, PCBs or pesticides were detected at concentrations exceeding the unrestricted use SCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - Eight VOCs were detected at concentrations above their respective Ambient Water Quality Standards (AWQS) in one or more samples. These included the petroleum VOCs related to the LNAPL zone, and chlorinated solvents. The petroleum VOCs include benzene at a maximum concentration of 430 ppb compared to the AWQS of 1 ppb and toluene at a maximum concentration of 17 ppb (AWQS is 5 ppb). Chlorinated VOCs include 1,2-DCA at a maximum concentration of 660

34 BERRY STREET (Continued) **S121933779**

ppb (AWQS is 0.6 ppb), 1,2-dichloropropane at a maximum concentration of 160 ppb (AWQS is 1.0 ppb), trichloroethene (TCE) at a maximum concentration of 21 ppb (AWQS is 5.0 ppb), chlorobenzene at a maximum concentration of 5.7 ppb (AWQS is 5.0 ppb), chloroform at a maximum concentration of 34 ppb (AWQS is 7.0 ppb), and tetrachloroethene (PCE) at a maximum concentration of 13 ppb (AWQS is 5.0 ppb). PFOS and PFOA were detected at concentrations above the NYSDEC screening level of 10 parts per trillion (ppt) each with the maximum PFOA concentration of 130 ppt and the maximum PFOS concentration of 47.7 ppt. 1,4-Dioxane was detected at a maximum concentration of 0.69 ppb, below its screening level of 1 ppb. There is no record of use of PFAS or 1,4-dioxane at this site and the site is not considered a source of emerging contaminants. No SVOCS, PCBs or pesticides were found exceeding AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9 g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Health Problem: Measures are in place to prevent exposures to remaining contaminants.

Site Description: Location: The site is located in an urban area in the Williamsburg neighborhood of Brooklyn, NY. The approximately 35,942 square-foot (0.825-acre), irregularly shaped site is bounded to the north by North 12th Street, to the east by Berry Street, to the west by a warehouse building used by the Brooklyn Brewery, and to the south by North 11th Street and two buildings containing residential apartments. Site Features: The site is developed with an L-shaped, seven-story residential building that fronts Berry and North 12th Streets, with an open courtyard area located behind the building in the central portion of the site. A basement level parking garage is located under the building and courtyard, with an entrance ramp located on North 11th Street. A small, street-level valet parking lot is also located on North 11th Street, immediately east of the garage entrance ramp. Current Zoning and Land Use: The site is zoned as M1-2/R6A (light manufacturing and residential uses). The surrounding area is developed primarily with residential and commercial properties. Past Use of the Site: Historic records indicated that the site was developed with industrial and manufacturing uses, including

34 BERRY STREET (Continued) **S121933779**

the New York Quinine and Chemical Works between 1887 and 1951. After 1951, the site was used for freight loading and parking of vehicles. Sanborn maps from 1965 to 2006 (after decommissioning of the quinine factory) depict a large 2-story freight loading facility and warehouse in the western portion of the site, a 2-story truck repair facility/warehouse and a 4-story unspecified manufacturing facility in the southwestern portion of the site, and a parking lot in the eastern portion of the site containing two gasoline tanks of unspecified capacity. All on-site buildings were demolished starting in April 2008, and construction of the existing residential structure started in June 2008. Building construction was completed in early 2009. Site Geology and Hydrogeology: The surface topography in the surrounding area is flat, gradually sloping northwest towards the East River, which is located approximately 1,100 feet from the site. The site lies at an elevation of approximately 20 feet above sea level. Prior to development, shallow subsurface soils included urban fill material containing brick, asphalt, and concrete fragments to approximately 6 to 10 feet below ground surface (bgs), underlain by apparent native silty sand and silt. Most of the fill was removed during development to construct the current structure. Depth to bedrock at the site is expected to be approximately 100 feet bgs. The dominant groundwater flow direction at the site is to the north and northeast, with some variations to the northwest. Groundwater is present at depths ranging from approximately 5 to 8 feet below the basement garage floor, which corresponds to approximate depths of approximately 11 to 14 feet bgs. There are no surface water bodies or streams on or immediately adjacent to the site.

Env Problem: Post-Remediation: Remediation of the site is complete. Prior to remediation the primary contaminants of concern were Light Non-Aqueous Phase Liquid (LNAPL) associated with fuel oil leaks from USTs and volatile organic compounds (VOCs) namely 1,2-dichloroethane (DCA). The VOCs were detected in groundwater at concentrations exceeding ambient water quality standards. Remedial actions have successfully achieved the site cleanup objectives under a track 4 cleanup which included a site cover, enhanced recovery of the LNAPL through injection of a surfactant blend and biological treatment of the groundwater to reduce VOC contamination. Sub-slab/soil vapor is not a concern at the site. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: During the Remedial Investigation soil and groundwater were sampled and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), pesticides, and emerging contaminants (ECs). Sub-slab soil vapor and indoor air were analyzed for VOCs. Based upon the investigations conducted, the primary contaminants of concern were identified as petroleum in the form of Light Non-Aqueous Phase Liquid (LNAPL)and chlorinated VOCs. Soil - The investigation documented that VOC contamination in soil is present in two distinct contaminant zones: 1,2-dichloroethane (DCA) on the eastern side of the site, and petroleum LNAPL on the western side of the site. Fingerprint analysis completed during a previous investigation identified the LNAPL as fuel oil. Since 2009 the NAPL has been managed by a collection system, which was upgraded as an IRM during the Spring of 2019. Quarterly gauging of monitoring wells indicates the extent and thickness of the plume has been reduced by the LNAPL collection system. One VOC, 1,2-DCA, was detected at a concentration in excess

34 BERRY STREET (Continued) **S121933779**

of its restricted residential soil cleanup objective (RRSCO) at a depth of 14 to 15 feet below garage basement grade (bbg) (the water table is at 6ft-bbg), at a concentration of 7.9 parts per million (ppm) compared to a RRSCO of 3.1 ppm and the applicable protection of groundwater SCO (PGWSCO) of 0.02 ppm. 1,2-DCA was not detected in any other soil sample collected during the RI, or all the previous investigations at the site, that would indicate any additional source areas. Trivalent chromium was found at a concentration of 251 ppm, which exceeds the applicable RRUSCO of 180 ppm. This metal appears to be attributable to historic fill. Fourteen per- and polyfluoroalkyl substances (PFAS) were detected in one or more soil samples at concentrations ranging from an estimated 0.017 parts per billion (ppb) to 0.12 ppb. None of the detected PFAS compounds had concentrations above the screening level of 1 ppb. Perfluorooctanesulfonic acid (PFOS) was detected at a maximum concentration of 0.12 ppb and perfluorooctanoic acid (PFOA) was detected at a maximum of 0.039 ppb. 1,4-dioxane was not detected in soil samples. No SVOCS, PCBs or pesticides were detected at concentrations exceeding the unrestricted use SCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - Eight VOCs were detected at concentrations above their respective Ambient Water Quality Standards (AWQS) in one or more samples. These included the petroleum VOCs related to the LNAPL zone, and chlorinated solvents. The petroleum VOCs include benzene at a maximum concentration of 430 ppb compared to the AWQS of 1 ppb and toluene at a maximum concentration of 17 ppb (AWQS is 5 ppb). Chlorinated VOCs include 1,2-DCA at a maximum concentration of 660 ppb (AWQS is 0.6 ppb), 1,2-dichloropropane at a maximum concentration of 160 ppb (AWQS is 1.0 ppb), trichloroethene (TCE) at a maximum concentration of 21 ppb (AWQS is 5.0 ppb), chlorobenzene at a maximum concentration of 5.7 ppb (AWQS is 5.0 ppb), chloroform at a maximum concentration of 34 ppb (AWQS is 7.0 ppb), and tetrachloroethene (PCE) at a maximum concentration of 13 ppb (AWQS is 5.0 ppb). PFOS and PFOA were detected at concentrations above the NYSDEC screening level of 10 parts per trillion (ppt) each with the maximum PFOA concentration of 130 ppt and the maximum PFOS concentration of 47.7 ppt. 1,4-Dioxane was detected at a maximum concentration of 0.69 ppb, below its screening level of 1 ppb. There is no record of use of PFAS or 1,4-dioxane at this site and the site is not considered a source of emerging contaminants. No SVOCS, PCBs or pesticides were found exceeding AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9 g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second

34 BERRY STREET (Continued) **S121933779**

round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Health Problem: Measures are in place to prevent exposures to remaining contaminants.

The site lies at an elevation of approximately 20 feet above sea level. Prior to development, shallow subsurface soils included urban fill material containing brick, asphalt, and concrete fragments to approximately 6 to 10 feet below ground surface (bgs), underlain by apparent native silty sand and silt. Most of the fill was removed during development to construct the current structure. Depth to bedrock at the site is expected to be approximately 100 feet bgs. The dominant groundwater flow direction at the site is to the north and northeast, with some variations to the northwest. Groundwater is present at depths ranging from approximately 5 to 8 feet below the basement garage floor, which corresponds to approximate depths of approximately 11 to 14 feet bgs. There are no surface water bodies or streams on or immediately adjacent to the site.

Env Problem:

Post-Remediation: Remediation of the site is complete. Prior to remediation the primary contaminants of concern were Light Non-Aqueous Phase Liquid (LNAPL) associated with fuel oil leaks from USTs and volatile organic compounds (VOCs) namely 1,2-dichloroethane (DCA). The VOCs were detected in groundwater at concentrations exceeding ambient water quality standards. Remedial actions have successfully achieved the site cleanup objectives under a track 4 cleanup which included a site cover, enhanced recovery of the LNAPL through injection of a surfactant blend and biological treatment of the groundwater to reduce VOC contamination. Sub-slab/soil vapor is not a concern at the site. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. Prior to Remediation: Nature and Extent of Contamination: During the Remedial Investigation soil and groundwater were sampled and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), pesticides, and emerging contaminants (ECs). Sub-slab soil vapor and indoor air were analyzed for VOCs. Based upon the investigations conducted, the primary contaminants of concern were identified as petroleum in the form of Light Non-Aqueous Phase Liquid (LNAPL)and chlorinated VOCs. Soil - The investigation documented that VOC contamination in soil is present in two distinct contaminant zones: 1,2-dichloroethane (DCA) on the eastern side of the site, and petroleum LNAPL on the western side of the site. Fingerprint analysis completed during a previous investigation identified the LNAPL as fuel oil. Since 2009 the NAPL has been managed by a collection system, which was upgraded as an IRM during the Spring of 2019. Quarterly gauging of monitoring wells indicates the extent and thickness of the plume has been reduced by the LNAPL collection system. One VOC, 1,2-DCA, was detected at a concentration in excess of its restricted residential soil cleanup objective (RRSCO) at a depth of 14 to 15 feet below garage basement grade (bbg) (the water table is at 6ft-bbg), at a concentration of 7.9 parts per million (ppm) compared to a RRSCO of 3.1 ppm and the applicable protection of groundwater SCO (PGWSCO) of 0.02 ppm. 1,2-DCA was not detected in any other soil sample collected during the RI, or all the previous investigations at the site, that would indicate any additional source areas. Trivalent chromium was found at a concentration of 251 ppm, which exceeds the applicable RRUSCO of 180 ppm. This metal appears to be attributable to historic fill. Fourteen per- and polyfluoroalkyl substances (PFAS) were detected in one or more soil samples at concentrations ranging from an estimated 0.017 parts per billion (ppb) to 0.12 ppb. None of the detected PFAS compounds had concentrations above the screening level of 1 ppb.

34 BERRY STREET (Continued) **S121933779**

Perfluorooctanesulfonic acid (PFOS) was detected at a maximum concentration of 0.12 ppb and perfluorooctanoic acid (PFOA) was detected at a maximum of 0.039 ppb. 1,4-dioxane was not detected in soil samples. No SVOCS, PCBs or pesticides were detected at concentrations exceeding the unrestricted use SCOs. Data does not indicate any off-site impacts in soil related to this site.
Groundwater - Eight VOCs were detected at concentrations above their respective Ambient Water Quality Standards (AWQS) in one or more samples. These included the petroleum VOCs related to the LNAPL zone, and chlorinated solvents. The petroleum VOCs include benzene at a maximum concentration of 430 ppb compared to the AWQS of 1 ppb and toluene at a maximum concentration of 17 ppb (AWQS is 5 ppb). Chlorinated VOCs include 1,2-DCA at a maximum concentration of 660 ppb (AWQS is 0.6 ppb), 1,2-dichloropropane at a maximum concentration of 160 ppb (AWQS is 1.0 ppb), trichloroethene (TCE) at a maximum concentration of 21 ppb (AWQS is 5.0 ppb), chlorobenzene at a maximum concentration of 5.7 ppb (AWQS is 5.0 ppb), chloroform at a maximum concentration of 34 ppb (AWQS is 7.0 ppb), and tetrachloroethene (PCE) at a maximum concentration of 13 ppb (AWQS is 5.0 ppb). PFOS and PFOA were detected at concentrations above the NYSDEC screening level of 10 parts per trillion (ppt) each with the maximum PFOA concentration of 130 ppt and the maximum PFOS concentration of 47.7 ppt. 1,4-Dioxane was detected at a maximum concentration of 0.69 ppb, below its screening level of 1 ppb. There is no record of use of PFAS or 1,4-dioxane at this site and the site is not considered a source of emerging contaminants. No SVOCS, PCBs or pesticides were found exceeding AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Sub-Slab Soil Vapor and Indoor Air - SVI sampling was performed both on-site and in the adjacent commercial/residential building to the southeast of the site. For the on-site building, the following VOCs were detected in sub-slab vapor samples during the October 2018 sampling event: mixed xylenes at a maximum concentration of 1780 micrograms per cubic meter (g/m3); ethylbenzene at a maximum concentration of 190 g/m3; PCE at a maximum concentration of 5.3 g/m3; TCE at a maximum concentration of 12 g/m3; and vinyl chloride at a maximum concentration of 9.4 g/m3. 1,2-DCA was not detected in any of the sub-slab vapor samples. On-site indoor air samples collected in the basement parking garage during the October 2018 sampling event found the following maximum concentrations of VOCs: xylenes at 8.l4 g/m3; ethylbenzene at 1.9 g/m3; PCE at 2.8 g/m3; and TCE at 0.21 g/m3. An additional round of sampling was completed in August 2019 and TCE was not detected in any of the samples (soil vapor or indoor air). The results of the second round of sampling determined that additional monitoring is not necessary provided that the existing parking garage ventilation system and passive SSDS installed as part of the building redevelopment in 2008 are properly maintained. Sampling will occur as part of the remedy for this site to ensure these systems continue to be effective at preventing potential indoor air impacts via the soil vapor intrusion pathway. Data does not indicate any off-site impacts in soil vapor related to this site.

Tank Info:

Tank Number:	001
Tank ID:	3926
Tank Status:	Closed - Removed
Material Name:	Closed - Removed
Capacity Gallons:	550
Install Date:	Not reported
Date Tank Closed:	12/01/1994
Registered:	True
Tank Location:	Underground
Tank Type:	Steel/carbon steel
Material Code:	0009
Common Name of Substance:	Gasoline

Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Pipe Model:	Not reported
Modified By:	MJGRIFFI
Last Modified:	05/09/2022

Equipment Records:

H00 - Tank Leak Detection - None
I00 - Overfill - None
C02 - Pipe Location - Underground/On-ground
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
B00 - Tank External Protection - None

DEC Memo:	Tank test failure. PBS file shows tank in service, but next tank tes due prior to the date of this spill. PBS registration expired in 2000. Need to follow up. 9/22/06 left message for attorney found on deed to contact Williamsburgh Square LLC (new owner as of 2003). address:154 N. 7th St., Brooklyn 11211. deed had no individual's name (only corporation). bf 4/30/08 Sent Old TTF letter to: Jerry Lebedowicz Williamsburg Square LLC 52-47 Browvale Lane Little Neck, NY 11362 Address obtained from tank closure application. bf 5/2/08 Received message from J. Lebedowitz to call him back. bf 5/5/089 Received call from J. Lebedowitz tank was closed. Athena Environmental sampled after tank was removed. bf 6/18/08 Yesterday,

154-158 NORTH 7TH ST/BKLY (Continued) **S104275561**

Remarks:	recieved message from Spiro of (Name not clear) Environmental Services. He requested call back to (718)784-7490. I called the number today, but number is not in service at this time and no further informatuion is available. Review of PBS file shows tank was closed in 2008. They should have closure report. Called Jerry Lebedowicz and left message to call me back. His number (from PBS application) is (718)784-7490. Mr. lebedowicz hand-delivered sampling results from Athenica Environmental Services. One contaminant was above soil clean-up objectives to protect gw quality: chrysene (690 ppb) in sample B-3. Faxed nfa letter to Mr. Lebedowicz. Fax: (718)229-7111. Also mailed letter to him at address above. NFA. bf

Tank Info:

Tank Number:	1
Tank Id:	53846
Material Code:	0008
Common Name of Substance:	Diesel

Equipment Records:

B04 - Tank External Protection - Fiberglass
I02 - Overfill - High Level Alarm
J02 - Dispenser - Suction Dispenser
G04 - Tank Secondary Containment - Double-Walled (Underground)
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
C00 - Pipe Location - No Piping
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Fiberglass Coated Steel
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	06/01/1997
Capacity Gallons:	4000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	11/19/2008

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	U019
Waste Description:	Benzene (I,T)
Waste Code:	X001
Waste Description:	Not Defined

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHITOMIRSKY TRANSFERRED FROM Y.KRIMGOLD. Also, refer to spill # 9607376 & 9401167. 12/14/04-Spill Case is trnsferred to I. Islam. The site is under remediation by LiRo Engineers. - II 4/22/05- Reviewed the quarterly monitoring report (Nov./04 - Jan./05). The monitoring data show persistently high level of both soil and groundwater contamination. LiRo claims that the long history of the site for operation as a manufactured gas plant (MGP) may be the cause of this. However, a letter has been issued in order for LiRo to consider alternative measure(s) to remediate the site. The monitoring report has been installed in the eDoc Folder. - II 5/13/05- Afsar Samani of DDC raised the MGP issue of this site in the meeting with DEC on 5/4/05 as LiRo has written them either to increase the cost for remediation of the MGP related contaminants at the site or get the Key Span and/or other responsible agency handle the MGP site through DEC. Koon Tang is exploring with the Central office as to the finding of responsible agency to handle the former MGP site remediation.- II. 5/31/03- Joe Moloughney of Central Office confirmed via email that this site would be remediated under the KeySpan Consent Order for MGP sites. This site has been assigned with # 224055 as the MGP site. Therefore, the spill is closed.- II
Remarks:	also ground water affected - reprts says that site is contaminated with petro and heavy metals. Also see spill # 9401167.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

NATIONS RENT (Continued) **S104621824**

Contact Name: UNK
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 9/3/99 - Environmental firm was hired by company which is buying the on site company and leasing the land. Environmental firm did a phase 1 & phase 2 assessment with several wells and borings. Found floating product and contamination. SS told them to delineate the site, submit a profile of what is there now and a proposal of what will be done to clean it up. They asked about DEC going after a former owner, SS said no, DEC holds present owner responsible. Envir. firm will submit such a report soon 2/18/2000 Sangesland called Mr. Pradhan at Malcolm Pirnie (614-888-4953). Left a voice mail to ask whatever happened to the report DEC asked for in Sept.99 Report should include: 1) Delineate the site 2) Outline what is on the property now and what will be built 3) Identify how the product will be remediated. ALSO SEE SPILL # 0003390 4/12/04-Vought-Spill transferred from Sangesland to Rommel as per Rommel. 1/11/2006 - Haggerty - Malcolm Pirnie did Phase I,II site assessments to determine if this property was a canidate for development. After discovering free-floating product on groundwater, the decision was made not to develop this property. As far as I know, no additional investigation or remediation was done on site. I have made every attempt to locate responsible party with no luck I am requesting a site visit Alternate addresses 70-72 Wythe Ave 91-101 N 12 St 82 N 13 St 58 Wythe Ave 92 N 13 St I believe this property is located at the intersection of North 13th and Wythe Ave Region 2 rep visited the site, but could not get inside to inspect. Site is rented to Nations Rent - Oscar Parker salesman - 718-387-4872 Posted sign showed two different property managers: Segal Realty Group LLC 718-388-9000 M.C. O'Brien Inc. 718-252-9191 Albany review (above) - jcgrathw 1/29/07 - Austin - Transferred from Albany assignment to Patel in R-2 office for further work - end 03/09/07-Hiralkumar Patel. left message for Bill Blaker (718-387-4872), tenant (Nations Rent) at site. 03/14/07-Hiralkumar Patel. spoke with Mr. Blaker. he gave Mr. Prigozen's number (718-366-7930). spoke with Sage Prigozen. he will ask his father, who is owner of property, to call. received message from Mr. Prigozen (Cell: 917-750-4112), property owner. 03/16/07-Hiralkumar Patel. spoke with Mr. Prigozen, property owner. currently he is living in Florida. as per him, they found this contamination during tank removal and has all paperwork in storage in NY. he will submit these paper once he comes to NY in June 07. Elliot Prigozen 3400 Pen American Drive Miami, Florida 33133 Ph. (917) 750-4112 (C) Fax (305) 860-6699 email:

NATIONS RENT (Continued) **S104621824**

elliotp@bobcatzone.com 06/14/07-Hiralkumar Patel. tried cell number for Elliot, but no success.
left message for Elliot's son. 06/15/07-Hiralkumar Patel. left message for Elliot's son.
06/18/07-Hiralkumar Patel. received call from Elliot Prigozen. he searched for records and found
some reports on tank removals. asked him to send copy of those reports. Mr. Prigozen will be back
in city after 10 days and will send copies at that time. PBS #: 2-091030. as per PBS record, site
had following tanks: 1. two 1,500 gal Lube Oil UST, closed and removed in July 2000 2. one 1,500
gal gasoline UST, closed and removed in July 2000 3. four 550 gal diesel USTs, closed and removed
in Dec. 1998 4. one 1,000 gal diesel AST, closed and removed in Apr. 2002 5. one 550 gal gasoline
UST, closed-in-place in June 1989 6. one 550 gal diesel UST, closed-in-place 7. one 1,100 gal
gasoline UST, closed-in-place total 11 tanks were on-site. sent letter to Mr. Prigozen requiring
Phase I, soil and groundwater delineation. letter emailed to Mr. Prigozen. 07/02/07-Hiralkumar
Patel. received message from Mr. Prigozen. left message for Sage Prigozen as Elliot's number was
busy. 07/05/07-Hiralkumar Patel. received copy of three reports from Mr. Prigozen. 1. addendum to
tank closure report (don't have original tank closure report) for four 550 gal USTs 2. geoprobe
investigation report for soil investigation in area of previously removed four 550 gal USTs (four
550 gal USTs were located in parking lot along Kent Avenue) 3. closure report for four 1500 gal
tanks, which were located near main entrance (on north side) along north 12th street, and were
removed in June 2000. addendum to four 550 gal USTs closure includes a further review of sample
analyticals for samples taken after tanks removed in Aug. 1998. during tank removal found heavy
SVOC contamination in three endpoint samples out of four samples. geoprobe investigation in area of
previously removed 550 gal USTs was done as found heavy SVOC contamination during endpoint
analysis. abstract: - report prepared on Oct. 7, 1998 - four borings were installed (one on each
side of excavation area of previous 550 gal UST location) - three soil samples from the smear zone
at approx. 7 ft bg, were chosen for analysis: S-1 (southeast of excavation), S-3 (northwest of
excavation) and S-4 (northeast of excavation) - all three samples were analyzed for SVOCs only (as
didn't found VOCs in previous sampling) - few SVOC contamination found in sample S-3 (which is
along Kent ave) abstract of tank closure report for 1500 gal tanks: - removed four 1500 gal single
wall, concrete-encased USTs. - from regional water table maps, groundwater occurs approx. 15 ft bg
and flows in a northwesterly direction - tanks were located approx. 4

NATIONS RENT (Continued) **S104621824**

ft bg - tanks were in good
condition with no corrosion. no visible holes or leaks were noted - sidewall samples were collected
at 8 ft and bottom sample was collected at 12 ft bg - groundwater was not encountered at the site
during excavation - approx. 79.16 tons of contaminated soil were removed - highest PID observed in
west side wall sample (PID: 398.3 ppm) - due to observed staining, odors and documented PID
readings, the DEC was notified (spill #: 0003390) - minor contamination found in soil endpoint
samples spoke with Mr. Prigozen. explained him that spill was reported as found free product on
groundwater during environmental investigation in 1999. and during tank removal activities, no
groundwater sample was taken. asked him to delineate groundwater contamination. asked him to
install monitoring wells atleast to previous tanks locations (one along kent ave and one along
north 12th street). sent email to Mr. Prigozen with specific requirement of monitoring well
locations. 07/09/07-Hiralkumar Patel. received call from Mr. Prigozen. he mentioned that he removed
four 550 gal tanks from his site, which were located along Kent Avenuen and based on closure report
addendum, there was no soil contamination. and he believes that groundwater contamination, found in
1999, came from Texaco oil terminal along Kent Avenue. asked Mr. Prigozen to look for investigation
report from Aug. 1999, based on which this case was reported. if monitoring wells, during that
investigation, were installed along kent ave and found contaminated then based on groundwater flow
direction data (if available in report), the department can ask upgradient property to do
investigation, but if no site specific groundwater flow direction or previous monitoring well
location available to the Deparment, then the department requires him to do groundwater delineation
with site-specific groundwater flow direction. Mr. Prigozen will look for report. 07/09/07-
Sangesland received a call from an Environmental consultant in Charlotte, North Carolina. He asked
if the DEC required work to be done by a licenced New York State Prof. Engineer. Sangesland said
no. The only requirement is the lab used for testing must be NYS Licenced and if any material is
removed from the site it must be taken by a licenced hauler. 07/13/07-Hiralkumar Patel. received
limited Phase II report from Mr. Prigozen. abstract: - an affidavit dated 06/13/1989 indicates that
one 550 gal gasoline tank was purged and filled with concrete slurry in the sourthern portion of
the site - two soil borings and nine monitoring wells were installed - highest PID reading found in
boring BK-6 (595 ppm) at 5 to 7 ft bg less than -------- - groundwater sample was not obtained from

NATIONS RENT (Continued) **S104621824**

boring location BK-6, which was installed closed to sediment trap area less than ---------- -
based on site topography and nearby waterways, it is determined that the nearby groundwater flow
direction is to the northwest - free product was measured in two monitoring wells (MW-10 with 1.5
inch and MW-7 with 0.05 inch of free product) less than
---------- - minor tetracholorethane
was found in (assumed) upgradient groundwater samples (BK-1, BK-2 and BK-3) - MTBE contamination
(236 ppb) found in groundwater samples MW-2 and MW-3 (area near abandoned gasoline tank) - highest
contamination found in soil sample at BK-6 (near old sediment trap)
----------Xylene----Benzene BK-6 (1-3 ft)------8,730-----2,025
BK-6 (3-5
ft)------3,320-------327 //during Phase II, borings were installed to maximum depth of 17.5 ft bg,
but report doesn't mentioned about groundwater depth.//
07/18/07-Hiralkumar Patel. after reviewing
available reports found following: - no groundwater depth information
- free product in wells MW-7
and MW-10 along Kent Avneue, but no groundwater flow direction - MTBE contamination in groundwater
sample at BK3, which is close to previously abandoned gasoline tank location - benzene and xylene
contamination in sample at BK-6, which is close to sediment trap. no groundwater sample taken from
there. spoke with Mr. Prigozen. based on available data, asked Mr. Prigozen to do following: - soil
and groundwater sampling at previous sampling location BK-6 (as found Benzene and Xylene in soil
and had highest PID during Phase II investigation) - soil and groundwater sampling at previous
sampling location BK-3, close to previously abandoned gasoline UST (as found MTBE in gw) - complete
groundwater delineation (with atleast three permanent monitoring wells and site specific
groundwater flow direction) in area of previous boring locations MW-7 and MW-10. asked Mr. Prigozen
to check any previous wells exists on site. if not then he needs to install new wells. based on
available data and reports, asked Mr. Prigozen to disregard requirement of Phase I investigation,
as mentioned in letter dated June 18, 2007. 07/19/07-Hiralkumar Patel. sent letter to Mr. Prigozen
requiring soil/groundwater sampling at previous boring locations BK-3 and BK-6 and complete
groundwater delineation in area of previous boring locations BK-7 and BK-10. letter emailed to Mr.
Prigozen with map (from former phase II report) indicating locations where the Department requires
further investigation. 09/06/07-Hiralkumar Patel. received email from Mr. Prigozen. he is
contacting companies for price quote. 09/13/07-Hiralkumar Patel. left message for Mr. Prigozen.
received call from Mr. Prigozen. he is reviewing quotes from companies and will fanalize next week.

NATIONS RENT (Continued) **S104621824**

he will send company's name next week with scheduling and estimated date for report submission.
09/20/07-Hiralkumar Patel. received email from Mr. Prigozen. he has hired Hart & Hickman to do the
investigative work. they will be on site in two to three weeks. Theron Grim Hart & Hickman, PC Ph.
(704) 586-0007 Mr. Prigozen will call once get dates finalized for investigation work.
09/28/07-Hiralkumar Patel. received email from Mr. Prigozen. contractor will start work on Oct.
8th, 2007. 10/23/07-Hiralkumar Patel. received call from Mr. Grim. he just received analytical data
from lab and they found contamination and free product in groundwater. Mr. Grim will submit report
within two weeks. asked Mr. Grim to send analytical data, groundwater flow direction and site map
with sampling locations for review. he will send these tomorrow.
10/26/07-Hiralkumar Patel.
received analytical data for few samples and site map. found soil and groundwater contamination in
area of former sediment trap. waiting for full report.
11/06/07-Hiralkumar Patel. spoke with Mat
Ingalls Hart & Hickman, PC. Mr. Grim is no longer working there. Mat is sending report to Mr.
Prigozen to review and approval and once gets approval, he will forward report. Mat Ingalls Ph.
(704) 887-4617 email: mingalls@harthickman.com 11/15/07-Hiralkumar Patel. received report from Mr.
Ingalls. abstract: - installed four soil borings (BK-3A, BK-6A, BK-7A and BK-10A); three soil
samples (BK-3A, BK-7A and BK-10A) were advanced to depth of 5 ft below grade adjacent to existing
wells and boring BK-6A was installed adjacent to the northwest corner of the sediment trap and was
advanced to depth of 12 ft bg (later converted to temporary well) - installed one temporary well
(BK-6A) - found high PID in BK-6A (from 21.3 ppm to 2,350 ppm with max at water table at 7 ft
depth) - sampled recently installed temporary well and two existing wells (BK-3 and BK-7) - depth
to groundwater at the site ranges from approx. 5 ft bg in the northern portion of the site to 10 ft
bg in the southern portion of the site - map indicates shallow groundwater generally flows to the
southwest less than -------- - during static water level measurements, 2.37 ft of free product was
measured in monitoring well BK-10 less than ---------- - directly south of the bayside fuel oil
depot and also upgradient of the subject site is the former Williamburg Manufactured Gas site. soil

conclusions: - based on groundwater
elevation data and lack of impacts at the potential source area well BK-7 (previous 550 gal USTs
area), it appears the free product in well BK-10 is likely from an offside source - Bayside fuel
oil depot is located adjacent and upgradient, and site is under Voluntary Cleanup Program (ID #:
V00587-2) less than ---------- - petroleum impacts identified in soil sample collected from BK-6A
are likely associated with four 1500 gal USTs located adjacent to sediment trap - lack of
groundwater impacts in downgradient monitoring well BK-3 indicates impacts from onsite or
upgradient sources have likely not migrated off-site report missing following: - no analysis done
to identify product found in well # 10 - no site specific groundwater flow direction available - no
information about tidal influence on flow direction
11/20/07-Hiralkumar Patel. left message for Mr.
Ingalls to provide missing information. sent email to Mr. Prigozen and Mr. Ingalls with missing
information including detailed scaled site plan with all major suspected sites in neighbourhood.
11/21/07-Hiralkumar Patel. received message from Mr. Ingalls. left message for Mr. Ingalls.
11/26/07-Hiralkumar Patel. received email from Mr. Ingalls proposing fingerprint analysis of oil
from well # 10, 12 hour tidal survey and detailed site map. sent email to Mr. Ingalls asking 24
hours of tidal survey (instead of 12 hours), fingerprint analysis and detailed site map with
surrounding area. 11/28/07-Hiralkumar Patel. received call from Mr. Ingalls. they will do tidal
survey on two day period as access available from 8 am to 6 pm only. will submit report after Dec.
10, 2007. 12/13/07-Hiralkumar Patel. received addendum to Phase II report. abstract: - collected
groundwater elevation data from monitoring wells BK-3, BK-4, BK-7, BK-8, BK-10 and BK-11 less than
---------- - product was found in wells BK-10 and BK-4 less than ---------- - tidal influence
survey indicates that the monitoring well water levels were consistent during the observation
period (9.5 hours) and showed no tidal influence less than --------- - direction of groundwater
flow was determined to be southeast less than ---------- - product observed in BK-10 is highly
weathered middle distillate such as diesel oil or fuel oil less than -------- - floating free
product (approx. 0.46 ft) was observed in BK-4; BK-4 is located near four former 1500 gal USTs -
collected sample from BK-04 and held at lab (not analyzed) - Bayside Oil is located upgradient from

NATIONS RENT (Continued) **S104621824**

subject site based on following, contractor believes that product in BK-10 is from off-site: -
product thickness (2.67 ft) - degree of weathering and biological degradation - sepearation
distance (approx. 50 ft) and cross gradient location of BK-10 from the former UST basin - confirmed
site groundwater flow direction to the southeast - absence of floating product in BK-7 installed in
the immediate vicinity of former UST basin summary: found free product in two wells: BK-4 and
BK-10. BK-4 is located in area of previous 1500 gal USTs and BK-10 is located close to corner of
Kent ave and N. 13th st. oil in BK-4 could be from previously removed tanks on-site, but oil in
BK-10 could be coming from off-site. spoke with Matt. he mentioned that they did not found well
BK-4 during Phase II investigation, but found during recent well survey. found free product in well
and took sample and it is on hold, in lab. asked Matt to analyze sample from BK-4. also asked him
to monitor and remove product from existing wells on-site. discussed with DEC Austin. as owner
suspecting off-site spill that impacting well BK-10 at his property, Austin asked to pump out
product, weekly for a month to see if any more product comes to the site and then based on product
recovery data, may require futher work by site owner. sent email to Matt and Mr. Prigozen requiring
analysis of sample from BK-4 and monitoring and product removal from existing wells on weekly
basis. 12/24/07-Hiralkumar Patel. spoke with DEC Leszek, who is handling project at Bayside Oil. he
confirmed that there was no product found in two monitoring wells (MW-4 & MW-12) located along Kent
ave, near 91 N 12th street site. 01/08/08-Hiralkumar Patel. spoke with Matt. he submitted proposal
for product removal but haven't heard back. spoke with Mr. Prigozen. he hasn't hire anyone to
remove product. asked Mr. Prigozen to remove product from wells on his property and also explained
him to install well upgradient from well # 10, on sidewalk, to prove any off-site migration.
01/15/08-Hiralkumar Patel. spoke with Mr. Prigozen. he has authorized Matt to pump product out.
asked him to schedule upgradient well installation on sidewalk along kent ave. he is waiting for
proposal from Matt. left message for Matt to submit analyticals for sample taken from well # 4.
also asked to submit schedule for product removal and to plan for upgradient (from well # 10) well
installation. 01/17/08-Hiralkumar Patel. received message from Matt. left message for Matt.
received analyticals for sample from well BK-4. during fingerprint analysis, found product from
well BK-4 in range from degraded gasoline or similar material to diesel or fuel oil. well BK-4 is
installed in area of previous 1500 gal USTs. 01/24/08-Hiralkumar

NATIONS RENT (Continued) **S104621824**

Patel. received call from Matt.
they are removing product from BK-4 and BK-10. asked them to continue removing product from these
wells for about a month and then based on remaining product, the department may require
downgradient well from BK-4 and upgradient well from BK-10. Matt will send report.
03/20/08-Hiralkumar Patel. left message for Mr. Ingalls to submit product recovery data. sent email
to Mr. Ingalls and Mr. Prigozen to submit product recovery data by end of 03/28/08.
03/24/08-Hiralkumar Patel. received message from Mr. Ingalls. they finished field work and will
submit report, once get Mr. Prigozen reviews it. 03/27/08-Hiralkumar Patel. received report from
Mr. Ingalls. abstract: - fingerprint result indicate that the product observed in BK-4 is a mix of
low boiling material such as petroleum solvent or degraded gasoline, and a middle distillate such
as diesel fuel or fuel oil that has undergone extensive biological degradation apparent product
thickness (in feet) in BK-4 and BK-10:
----------01/21/08---------02/06/08---------02/14/08----------02/21/
08
BK-04---------0.53----------0.21----------0.29----------0.34
BK-10---------2.55----------0.76----------0.56----------0.91
04/25/08-Hiralkumar Patel.
left message from Mr. INgalls to continue product recovery from both wells until finds clean
groundwater. based on recent product recovery report, product thickness in wells BK-04 and BK-10
has been reduced. but closest well to well BK-10 is BK-07 which is 50 ft away and crossgradient and
next downgradient well from BK-10 is BK-06A which is 250 ft away and has groundwater contaminated.
also closest well to BK-04 is BK-06A which is about 40 ft away and crossgradient and there are no
downgradient well from BK-04. discussed with DEC Austin. as product thickness in both wells
reduced, Austin believes that this could be localized problem. Austin asked for complete horizontal
delineation of groundwater contamination around BK-04, BK-10 and BK-06A. Austin asked to call owner
regarding continuous recovery of product and about further groundwater investigation work. spoke
with Mr. Prigozen. asked him to continue product recovery from both wells. also mentioned to him
regarding further groundwater delineation. Mr. Prigozen still believes that product in both wells
coming from off-site. sent letter to Mr. Prigozen requiring removal of product from existing wells
and further soil/groundwater delineation around wells BK-04 and BK-10 and previous boring location
BK-06A. letter emailed to Mr. Prigozen and Mr. Ingalls.
04/30/08-Hiralkumar Patel. received call
from Mr. Ingalls. they still believes that product in BK-10 is coming from off-site. they are

NATIONS RENT (Continued) **S104621824**

planning to install well on sidewalk to see any off-site migration. Mr. Ingalls asked for number of wells around BK-10 and BK-04. mentioned to Mr. Ingalls that the department requires complete delineation which may require multiple wells on-site as well as off-site. asked him to install one permanent well at previous boring location BK-06 as found contaminated groundwater in previous investigation and BK-06 is cross gradient from BK-04. 06/04/08-Hiralkumar Patel. left message for Mr. Ingalls. spoke with Mr. Prigozen. they are currently removing oil from wells and will install required well in two weeks. 07/08/08-Hiralkumar Patel. spoke with Mr. Ingalls. they are removing oil from wells on weekly basis but haven't heard from owner regarding further well installation. spoke with Mr. Prigozen. he was out for work and just came back. he will talk to Mr. Ingalls regarding further well installation and will submit schedule by end of 07/18/08. 08/25/08-Hiralkumar Patel. left message for Mr. Prigozen. 09/19/08-Hiralkumar Patel. spoke with Mr. Ingalls. he mentioned that he tried few times but no response from Mr. Prigozen. left message for Mr. Prigozen. 09/22/08-Hiralkumar Patel. received call from Mr. Prigozen. he mentioned that he was out of country and will contact Mr. Ingalls. will install wells in early october. Mr. Prigozen will ask Mr. Ingalls to call with work schedules. 12/01/08-Hiralkumar Patel. left message for Mr. Ingalls. spoke with Mr. Prigozen. he will call back as was busy. 12/02/08-Hiralkumar Patel. received message from Mr. Prigozen. left message for Mr. Prigozen. 12/03/08-Hiralkumar Patel. received call from Mr. Ingalls. they are still waiting for authorization for required work. received call from Mr. Prigozen. he mentioned that he has gave authorization long time back. asked Mr. Prigozen to contact Mr. Ingalls to solve this confusion and asked to call back with work schedule. received call from Mr. Ingalls. he spoke with Mr. Prigozen and Mr. Prigozen asked him to start work after New Year holiday. mentioned to Mr. Ingalls that required report is overdue since June 2008 and the department can't approve any more extension. he will contact Mr. Prigozen and will call back. 12/04/08-Hiralkumar Patel. received call from Mr. Ingalls. he got approval from Mr. Prigozen for additional work. he spoke with drilling company and can start work from 12/22/08. approves it and asked Mr. Ingalls to submit proposed well location map alongwith existing well locations. sent email to Mr. Ingalls to submit proposed well location map, by end of 12/09/08, including locations of previous borings and wells. email copied to Mr. Prigozen. 12/05/08-Hiralkumar Patel. received email from Ed from Hart & Hickman

NATIONS RENT (Continued) **S104621824**

with proposed well location.
they are proposing to install three wells: one upgradient from BK-10 (along property boundry along
Kent ave), one downgradient from BK-04 (along N. 12th street) and one downgradient from previous
boring BK-06 (across sediment trap which might be route for groundwater contamination.) Edward H.
Stephens Hart & Hickman, PC Ph. (704) 586-0007 (704) 887-4609 Fax (704) 586-0373 email:
EStephens@harthickman.com sent email to Ed and Mr. Prigozen approving proposed well locations.
email copied to Mr. Ingalls. required investigation report submission by the end of Jan. 26, 2009
and weekly submission of well monitoring/product recovery data. 12/09/08-Hiralkumar Patel. received
call from Ed from Hart & Hickman. he asked about location of well BK-14. he proposed to install
well downgradient from sediment trap instead of at BK-14. mentioned to Ed that the Department wants
well at (suspect) source location (which is sediment trap) to capture mostly contaminated material
and based on findings, more wells needs to be installed. 12/15/08-Hiralkumar Patel. spoke with Ed
at Hart & Hickman. they have scheduled well installation on 12/29/08. 01/06/09-Hiralkumar Patel.
received email from Ed. they installed four monitoring wells on 12/30/08 and will submit report
once gets sample analyticals. 02/04/09-Hiralkumar Patel. received email from Ed with site map
including results of recent groundwater investigation. four more wells (or borings) were installed.
well/boring BK-12 installed upgradient from BK-10. no contamination found in BK-12. well/boring
BK-14 installed near previous sediment trap and found contaminated groundwater. well/boring BK-13
installed on southwest side of BK-14, where no contamination found. well/boring BK-15 was installed
on northwest of BK-4 and found contaminated groundwater. groundwater analyticals:
----------BK-14------BK-15 Benzene----------1,060
Ethylbenzene----------468
Xylene----------204 Naphthalene----------738------1,040
02/11/09-Hiralkumar Patel.
received call from Ed. he mentioned that during recent survey, they found groundwater flowing in
southeast towards northwest portion of the site (near intersection of Kent ave and N. 13th street)
and groundwater flowing in south direction towards southeast portion of the site (near intersection
of N. 12th street and Wythe ave). according to recent groundwater flow direction, BK-13 is
downgradient from BK-14, but cross gradient from BK-4. asked Ed for off-site investigation,
downgradient from wells BK-15 and BK-4. also asked for weekly monitoring and recovery of free
product. Ed will speak with Mr. Prigozen and will submit complete investigation report.

NATIONS RENT (Continued) **S104621824**

02/12/09-Hiralkumar Patel. received additional Phase II report (analyticals recorded earlier).
abstract: - four borings were advanced to depth of 15 ft bg - one soil sample, with highest PID,
from each boring was sent for analysis - groundwater flows to the southeast in the western portion
and to the south in eastern portion of the site - found 1.78 ft of free product in BK-10A - strong
odor found during installation of wells BK-12 and BK-13 - high PID readings were found during
installation of BK-13 (276 ppm at 5 ft) and BK-14 (729 ppm at 6 ft) conclusions from Ed: - free
product was not observed in BK-12 (which is upgradient from BK-10) during the recent assessment, it
is not common to observe a delay in free product recharge into newly installed monitoring well.
BK-12 should be observed over time to confirm occurence of free product. - based on local
groundwater flow direction and the absence of a potential on-site source in the vicinity of the
observed free product at BK-10A, H&H believes the observed free product has migrated on-site from
the upgradient Bayside Oil Depot. - based upon the result of the receptor survey, soil and
groundwater assessment, existing poor groundwater quality in the vicinity of the subject property,
and a documented upgradient source of groundwater impacts including free product, soil and
groundwater impacts at the site can be most effectively managed through LAND USE RESTRICTIONS AND
STANDARD ENGINEERING CONTROLS. 02/20/09-Hiralkumar Patel. spoke with Ed regarding conclusions in
submitted report. mentioned to Ed that clean groundwater was found in upgradient well BK-12 which
indicates no off-site source. Ed mentioned that they will go back to site to check well again as
suspecting that newly installed well could recharge slowly. spoke with Mr. Prigozen. based on
results of investigations till date, asked him to start weekly monitoring of all wells, and removal
of any product, immediately. also asked him for off-site investigation downgradient from wells BK-4
and BK-15. told him that product must be removed from wells by next week (end of 02/28/09) and
weekly there after. 02/23/09-Hiralkumar Patel. spoke with Mr. Prigozen. will do product removal on
02/25/09. alternate addresses: 58 Wythe Ave, 91-101 N 12 St, 70-72 Wythe Ave, 82 N 13 St, 92 N 13
St found two old closed spill reports: 1. 0003390:- consolidated with this spill 2. 0207277:-
surface spill reported 02/25/09-Hiralkumar Patel. spoke with Mr. Prigozen. he has hired his
mechanic guy to bail out product from wells. he mentioned that he got directions from Ed how to
remove product and got some forms for recording. he also mentioned that they have waste oil tank
on-site and they will collect product into this on-site tank and will

NATIONS RENT (Continued) **S104621824**

pump out tank once get full.
asked Mr. Prigozen to call once he reach to site tomorrow (02/26/09).
Mr. Prigozen asked to send
STIP at following address: Sylvan Holdings LLC. **property owner** c/o
Sage Prigozen **Elliot's
son** 58-64A Maurice Avenue Maspeth, NY 11378 Ph. (917) 750-4112 (C)
Fax (305) 860-6699 email:
sagep@bobcatzone.com 02/26/09-Hiralkumar Patel. received call from Mr.
Prigozen. he has hired
Tri-State environment for product removal (not local mechanic). will
submit report. asked him to
remove product weekly. 02/27/09-Hiralkumar Patel. received call from
Mr. Prigozen. he is planning
to hire some local investiation team for further investigation. will
call back with company's name
who will do further investigations. sent STIP to Mr. Prigozen (7005
1820 0007 9827 6066). STIP
emailed to Mr. Prigozen. 03/13/09-Hiralkumar Patel. received call from
Paul from Ecosystems. they
have been hired by Mr. Prigozen. will submit work plan for additional
investigation. Paul Ciminello
Ecosystems Strategies Inc. Ph. (845) 452-1658 (O) (914) 475-4208 (C)
Email:
paul@ecosystemsstrategies.com 03/16/09-Hiralkumar Patel. received STIP
delivery confirmation
(letter delivered on 03/11/09). 03/25/09-Hiralkumar Patel. received
email from Ecosystems with work
plan for further investigation. abstact: - will put absorbent pads in
wells BK-4 and BK-10 as an
interim remedial measure; pads will be changed, as needed, on a weekly
basis - will verify
groundwater flow direction - propose to install six to ten borings on
site - borings will be
extended (at a minimum) to the soil/groundwater interface or until
refusal - at least two soil
samples will be collected: one with highest PID and one at groundwater
interface; if no PIDs found
then only one soil sample will be collected at groundwater interface -
convert one to two borings
into a monitoring well - wells will be installed with a ten ft of
screen; mimimum of 2 ft of
screening will extend above water table according to submitted site
plan in proposed work plan,
Ecosystems is planning to install all borings around BK-10, but no
investigation proposed to
delienation soil/groundwater contamination around BK-04. less than
---------- spoke with Mr.
Prigozen. told him that without having signed Stipulation agreement, i
can't approve any work plan.
Mr. Prigozen mentioned that his attorney asked him not to sign STIP as
he might loose right to get
fund from brownfield program. Mr. Prigozen will ask him attorney to
call. Mr. Prigozen has choose
to proceed with proposed plan without having approval from the
department. spoke with Paul at
Ecosystems. they are at the site today and are surveying all wells to
confirm groundwater flow

NATIONS RENT (Continued) **S104621824**

direction. they have put absorbent pads in wells and recovering free product. asked Paul about
investigation around BK-04. he is currently concentrating on finding source for BK-10 and will
eventually include investigation around BK-04. mentioned to him that the department requires
investigation around BK-04 also and will only approve the work plan if includes soil/gw
investigation around BK-04 along with investigation around BK-10.
03/26/09-Hiralkumar Patel.
received email from Larry Schnapf, environmental attorney representing Mr. Prigozen. Larry claims
that contamination found in BK-10 is from an upgradient oil depot, so he advised his client not to
sign STIP which result in waiver of righs to seek reimbursement from the spill fund. he mentioned
that his client will sign STIP if oil spill fund waiver paragraph deleted from agreement. Larry
Schnapf email: Lawrence.Schnapf@srz.com 04/01/09-Hiralkumar Patel.
spoke with Paul at Ecosystem.
groundwater flow direction found almost in same direction as found earlier. no product found in
well upgradient from BK-10. 04/02/09-Hiralkumar Patel. received email from Paul with report.
abstract: - groundwater flow measurements are broadly consistent with the findings of previous
consultant - groundwater flowing towards the south - review of sanborn maps indicates that the
western portion was associated with oil refining activities predominantly performed on the
adjoining property to the west (towards bayside oil depot) - numerous tanks are shown on the site
between 1887 and 1916 - between 1905 and 1965 a tunnel, that appears to have contained pipes
connecting both sites, extended beneath Kent ave less than ----------
- according to sanborn maps
from 1887 to 1916, western portion of the site (in area of Bk-10) was occupied by an oil refining
company and site had multiple tanks on western portion - adjoining to the southwest was MGP site
from 1887 to 1916 - 1942 sanborn map showing a tunnel beneath kent ave between the subject site and
western property (currently bayside oil depot) spoke with Mr. Schnapf. Mr. Schnapf mentioned that
they are suspecting that old tunnel between two properties (current bayside oil depot and subject
site) might be bringing contamination on his client's property. he is planning for more soil and
groundwater investigation and investigation about a tunnel before signing STIP. discussed with DEC
legal and legal division agreed with this. asked Mr. Schnapf to submit revised work plan for soil
and groundwater investigation around BK-4 and BK-10 and tunnel investigation with time schedule.
Mr. Schnapf will ask Paul to submit revised work plan by 04/06/09.
spoke with Paul at Ecosystems.
asked him for revised work plan. also asked him to submit site map

NATIONS RENT (Continued) **S104621824**

with approx. locations of
following: - BK-10, BK-4 - previous tanks on the property (from 1887 to 1916) - adjoining MGP site
- tunnel under kent ave 04/06/09-Hiralkumar Patel. sent email (at 3:30 PM) to Mr. Prigozen to
submit revised work plan by 4 PM today. received revised work plan. abstract: - absorbent booms
will be used in wells BK-04 and BK-10 as an interim remedial measures - will sample all wells -
proposes to dig minimum of three test pits in area where tunnel was located - test pits will be
extended to a maximum depth of 10 ft bg or until groundwater is reached - if contamination found in
soil during test pit installation, samples will be collected and soil will be removed for off-site
disposal - total of 8 to 12 soil borings will be extended across the site with 3 to 5 of these
boring being completed as wells - borings will be extended (at a minimum) to the soil/groundwater
interface - two soil samples will be collected from each borings: one at soil/groundwater interface
and one at highest PID - will submit investigation report within 10 weeks of the approval less than
-------- 04/07/09-Hiralkumar Patel. sent work plan approval letter to Mr. Prigozen. letter emailed
to Mr. Prigozen, Paul and Mr. Schnapf. 04/16/09-Hiralkumar Patel. received email from Richard
Hooker from Ecosystems. will start investigation work at 8 AM on 04/23/09. 05/06/09-Hiralkumar
Patel. received email from Richard. they completed extension of test pits at the western property
line and the sampling and laboratory analysis of all existing wells. will install on- and off-site
monitoring wells and extension of soil boring on-site on 05/13/09. 06/16/09-Hiralkumar Patel. 4:58
PM:- received email from Paul. he just received comments on the draft report from client and will
incorporate these changes. will submit report tomorrow. 06/19/09-Hiralkumar Patel. 3:21 PM:-
received investigation summary report from Paul. abstract: - one test pit was installed immediately
southeast of center point of western property line - eleven soil borings were installed: nine
borings (B-1 through B-9) were installed in the vicinity of BK-4 and two borings (B-10 and B-11)
were installed in the vicinity of BK-10 - sampling was conducted at each boring location at five-ft
intervals to a maximum depth of 20 ft bg or until refusl was reached - test pit documented the
presence of a 10 inch diameter iron pipe in a brick-lined depression - broken end of pipe was found
approx. 2.5 ft bg and the pipe was found to extend down to approx. 6 ft bg before turning sharply
west beneath Kent Ave - water was encountered in test pit at approx. 4 ft bg and no evidence of
contamination was encountered less than ---------- - field evidence of contamination was observed

NATIONS RENT (Continued) **S104621824**

at the groundwater interface at most borings extended in the vicinity of BK-4 less than
---------- - no field evidence of contamination was encountered in the vicinity of BK-10 less
than ========= - soil borings B-1, B-9 and B-10 were completed as temporary monitoring wells MW-1,
MW-2 and MW-3 respectively - screen interval from 2 ft above to 8 ft below static groundwater level
- free product was noted in monitoring well MW-2 (B-9) and remains in BK-10 - previously unknown
well (MW-4) was discovered to the northeast of BK-10 - found free product in BK-10: 4.7 inches of
product on 03/25/09 and 4.2 inches of product on 05/13/09 less than ---------- - found 1.5 inch of
free product in MW-2 less than ---------- - borings B-10 and B-11 were installed to the southwest
and southeast of BK-10; soil samples from these borings at the groundwater interface found no
contamination - boring B-10 was converted into well MW-3; sampled MW-3 and previously unknown well
MW-4 (20 ft north of BK-10) and found no contamination - soil samples from borings collected in the
area of BK-4 indicate significant, but uneven soil contamination immediately southeast of the
repair shop; these results confirm the presence of an area of subsurface petroleum contamination
beneath and southeast of the repair shop - petroleum odors found in borings B-1 throgh B-9 - high
PID readings found in borings B-2, B-5, B-6 and B-7 PID readings (in ppm): depth (in

based on results of further investigation, informed him that the department requires stipulation
agreement signed before reviewing or approving any remediation action work plan. also asked him to
schedule a site visit. he agreed to meet at the site at 10 AM on 07/01/09. 2:03 PM:- received call
from Paul. he spoke with Mr. Prigozen and will meet at 10 AM on 07/01/09. 07/01/09-Hiralkumar
Patel. 10:00 AM:- visited site. met Mr. Prigozen and Paul. repair shop nearby entrance along N.
12th street consists three 275 gal ASTs: two for fresh oil and one for waste oil. waste oil tank is
not registered. asked Mr. Prigozen to register waste oil tank. inpected areas around sediment
trap/repair shop, BK-10, old abandoned tunnel and previosly abandoned gasoline UST. Paul mentioned
that abandoned tunnel extends towards BK-10. Paul will submit RAP by 07/17/09. proposes to excavate
area by repair shop entrance as found heavily impacted soil in boring B7. asked Mr. Prigozen to
excavate all following areas: - around BK-10 (as it could be localized problem) - entire abandoned
tunnel running towards BK-10 (to investigate any more product in tunnel) - in front of repair shop
in area of B-7 - around B-9/MW-2 as found free product in it suggest to remove old abandoned
gasoline UST as found 236 ppb MTBE in well BK-3 nearby tank location. Paul suggest to sample BK-3
again before any excavation in this area. mentioned to Mr. Prigozen that based on gw analytical
results from BK-3, the department doesn't require removal of the tank, but as they will do
excavation in other part of site, it will be easy to use on-site equipments to dug this suspected
area. Mr. Prigozen will discuss with Paul regarding gasoline UST removal. found self-contained
parts cleaning machine with small tank (probably 15-20 gal). no stains/odors found around parts
cleaning machine. found well cap missing for BK-10. asked Paul to replace it. asked Mr. Prigozen to
send his tenant's contact info. 12:46 PM:- received email from Mr. Prigozen with tenant's contact
info. David Williams Director of Real Estate and Construction Sunbelt Rentals 800 Hartford Turnpike
Shrewsbury, MA 01545-4107 Ph. (508) 925-1611 (O) (508) 245-1107 (C) email:

NATIONS RENT (Continued) **S104621824**

David.williams@sunbeltrentals.com 1:40 PM:- left message for Mr. Williams. 3:51 PM:- sent revised STIP to Mr. Prigozen. asked him to submit signed STIP by end of 07/13/09. 07/06/09-Hiralkumar Patel. 1:45 PM:- received message from Mr. Williams. 07/24/09-Hiralkumar Patel. 10:41 AM:- received work plan from Ecosystems. proposes to monitoring/recover product from wells, excavate contaminated soils from areas of B-7 and BK-10. 07/27/09-Hiralkumar Patel. 10:40 AM:- spoke with Paul about work schedule. today he will send cost estimates to Mr. Prigozen and expect to start work by Aug. 3, 2009. asked him to send confirmed work schedule. 10:43 AM:- sent email to Mr. Prigozen approving proposed plan and asked to submit work schedule. email copied to Paul. 08/06/09-Hiralkumar Patel. 11:53 AM:- left message for Paul about work schedule. 12:18 PM:- received message from Paul. he met property owner and tenant yesterday to coordinate excavation and planning to start work on 08/14/09. will send email with confirmed schedule. 08/12/09-Hiralkumar Patel. 10:39 AM:- received email from Paul. they will start soil excavation on 08/21/09 and expect to finish by 08/22/09. 2:10 PM:- sent email to Paul. asked him to call me once excavation starts as planning to visit site during endpoint sample collection. 08/21/09-Hiralkumar Patel. 8:48 AM:- spoke with Richard (845-803-2709) at Ecosystems. they have started excavation in area of BK-10. found contaminated sand, construction debris and clay layer. thick clay layer found right below water table. 11:20 AM:- received call from Richard. while digging area around BK-10, well was destroyed and found brick structure in ground and heavily contaminated soil. 2:00 PM:- visited site. area around BK-10 was excavated and patially backfilled after collecting endpoint samples. found water in excavation, but no product. Richrd mentioned that brick walls found on both side of BK-10 running parallel to N. 13th Street. Richard believes that this channel in ground around BK-10 was holding some product which was appearing in BK-10. crew was excavating area around B-7 (in front of garage entrance) at the time of site visit. found sticky black material from excavation with strange odors. Richard believes that this black material could be source of heavy contamination in B-7. will excavate to depth of 8 ft where contamination found during soil investigation. crew was also working inside garage where B-2 was installed and product found in MW-2. will collect appropriate endpoint samples. left site around 3 PM. 3:47 PM:- received call from Mr. Prigozen. while working inside garage around MW-2, they found abandoned tank in ground. will investigate more. 08/22/09-Hiralkumar Patel. 9:25 AM:- received call from Mr. Prigozen. they are planning to

NATIONS RENT (Continued) **S104621824**

remove tank.
08/24/09-Hiralkumar Patel. 8:09 AM:- received call from Mr. Prigozen. he mentioned that tank
removal is not possible as tank is located closed to foundation wall. it is about 1,500 gal tank.
as per Mr. Prigozen, tank was full of product when discovered. asked him to pump out tank, clean it
and then collect soil samples through bottom and sides of the tank to confirm no contamination
around tank. 08/25/09-Hiralkumar Patel. 10:58 AM:- spoke with Mr. Prigozen. they pumped out at
least 3,000 gal of product from tank. currently cleaning tank.
09/23/09-Hiralkumar Patel. 2:22 PM:-
received call from Mr. Williams from Sunbelt Rentals inquiring about waste oil tank registration.
2:26 PM:- sent email to Mr. Williams with PBS registration form and instruction.
09/28/09-Hiralkumar Patel. 2:54 PM:- left message for Paul inquiring about cleanup report.
10/30/09-Hiralkumar Patel. 2:25 PM:- received tank closure and cleanup report from Ecosystems.
abstract: - found shallow (18 inches) dark-stained soil immediately beneath the asphalt during
excavation around BK-10 - beneath the stained material, found construction debris to 7 ft bg around
BK-10; no evidence of contamination - immediately beneath well BK-10, a brick lined channel was
encountered at 10 ft bg; expanding northwest-southeast for approx. 15 ft, the channel contained
grossly contaminated sandy soil and debris - excavation in area immediately southeast of the
machine shop found no field evidence of contamination until groundwater was encountered at approx.
7 ft bg and in shallow soils at the far southeastern corner of the excavation where an area of
heavy, bituminous material was encountered at between 2 and 3 ft bg - found 3,000 gal previously
unknown UST in area of MW-2 inside shop - collected four soil samples through sidewall and two soil
samples through bottom of 3,000 gal tank - collected total of six endpoint soil samples (four
sidewalls and two bottoms) from each excavations at BK-10 as well as outside of repair shop -
collected groundwater samples from wells BK-4, BK-13, BK-14, BK-15 and MW-1 - found little SVOC
contamination in endpoint soil samples, but no VOC contamination - found VOC contamination in
groundwater sample from BK-13 (but as per report dated 03/04/10, sampling data for BK-13 and BK-14
were switched in the subject report and contamination was actually found in BK-14) - proposes
quarterly monitoring for a year based on groundwater result from BK-13 VOC result:
----------BK-14 Benzene----------570
Toluene----------86
Ethylbenzene----------530 Xylene----------239
1,2,4-Trimethylbenzene-----1,400

NATIONS RENT (Continued) **S104621824**

Naphthalene----------430 MTBE----------87
11/02/09-Hiralkumar Patel.
reviewed all previous soil and groundwater data and found: - according to Limited Phase II
Environmental Site Assessment, dated Aug. 16, 1999, no contamination found in soil sample in BK-4
at 7-9 ft - found free product in well BK-4, BK-10 and well MW-2 (inside repair shop) - found soil
contamination at the entrance of repair shop - contaminated soil removed from area around BK-10 and
at the entrance of repair shop - found old 3,000 gal tank inside repair shop nearby MW-2 -
collected soil samples through walls and bottom of 3,000 gal UST and found no contamination -
installed two wells BK-13 and MW-1 downgradient from BK-4 - no free product ever observed in BK-13
and MW-1 - no free product or groundwater contamination observed in BK-4 during sampling in Oct.
2009 - found soil and groundwater contamination in area around sediment trap (BK-6 and BK-6A) -
found high PID in BK-6A throughout boring (from 21.3 ppm to 2,350 ppm with max at water table at 7
ft depth) - no excavation conducted in area of sediment trap spoke with Richard about excavation
around sediment trap and BK-6/BK-6A area. Richard mentioned that as found clean sidewall sample
from excavation in front of repair shop area, they didn't excavated area around sediment trap.
11/03/09-Hiralkumar Patel. 9:35 AM:- spoke with Mr. Prigozen and informed him that the department
requires removal of contaminated soil from area of BK-6/BK-6A (as there was soil contamination
above water table and high PID readings during installation of boring BK-6A). also mentioned that
the Department suggest to excavate area around BK-4, while excavating area around BK-6A, as found
free product earlier. Mr. Prigozen requested copy of site map and he will discuss with Ecosystem.
9:52 AM:- spoke with Richard about location of 3,000 gal tank and MW-2 inside repair shop. Richard
mentioned that MW-2 was about 6 ft from tank's north end and there was drain between tank and MW-2.
they removed contamination from drain and MW-2 areas. MW-2 was destroyed during excavation work.
10:32 AM:- sent email to Mr. Prigozen with copy of site maps with sample analyticals and asked Mr.
Prigozen to remove contaminated soil from area of sediment trap. email copied to Paul.
11/20/09-Hiralkumar Patel. 3:02 PM:- spoke with Mr. Prigozen regarding excavation in sediment trap.
he spoke with Paul and waiting for his response. will call back.
11/24/09-Hiralkumar Patel. 10:39
AM:- received email from Richard. they are discussing with Mr. Prigozen and will call back by next
week. 12/04/09-Hiralkumar Patel. 2:43 PM:- left message for Mr. Prigozen. 2:47 PM:- spoke with
Richard. they are currently discussing and will call back by end of

NATIONS RENT (Continued) **S104621824**

12/07/09. 3:45 PM:- received
call from Mr. Prigozen. he spoke with Richard and will call back once gets answer from Ecosystem
next week. 12/09/09-Hiralkumar Patel. received email from Ecosystem (at 5:20 PM on 12/08/09)
including response to soil excavation requirement in area of BK-6/BK-4 (response was recalled
immediately). Ecosystem proposed for quarterly groundwater sampling instead of soil excavation in
area between BK-6 and BK-4 based on endpoint samples from recent excavation and groundwater sample
results in Oct. 2009 2:15 PM:- spoke with Mr. Prigozen. based on level of soil contamination and
depth of water table, suggested Mr. Prigozen to excavate area around sediment trap and BK-4 to
remove probably last spot of contamination. Mr. Prigozen mentioned that he would like to do
excavation, if any, in his presence. he is out of NY during winter and will be back in summar. he
requested to postpone soil excavation, if any, till summer. based on spill history and soil/gw
sample results, approved Mr. Prigozen's request to postpone any soil excavation till summer, but
required monthly monitoring and quarterly sampling from existing wells. 2:31 PM:- spoke with
Richard at Ecosystem regarding their response which was recalled. Richard mentioned that there is
some change in it and will send revised one. Richard requested to hold requirement of gw monitoring
and sampling until they submit revised response. 12/15/09-Hiralkumar Patel. 11:38 AM:- spoke with
Richard regarding response to soil excavation in area of BK-6/BK-4. Richard mentioned that owner's
attorney is currently reviewing it and will submit soon.
12/21/09-Hiralkumar Patel. 2:02 PM:- spoke
with Richard and asked to send document by end of tomorrow.
12/22/09-Hiralkumar Patel. received
email from Richard (at 4:29 PM on 12/21/09) including response regarding excavation in area of
BK-6/BK-4. Ecosystem recommends at least three quarterly rounds of groundwater sampling from
existing wells and continued monitoring of the booms in BK-4 prior to decision regarding
implementation of any additional remediation. 12/23/09-Hiralkumar Patel. 1:37 PM:- left message for
Mr. Prigozen and informed him that the department is agreed with recommendations for three rounds
of quarterly sampling. asked him to provide dates for first round of sampling. 1:39 PM:- spoke with
Richard. informed him that the department agreed with their recommendation of quarterly groundwater
sampling. asked Richard to send dates for first round of sampling. 1:53 PM:- sent email to Mr.
Prigozen and asked to submit first quarterly groundwater sampling report by the end of 02/12/10.
email copied to Richard and Paul. 2:54 PM:- received call from Mr. Prigozen. he received email and

NATIONS RENT (Continued) **S104621824**

will ask Paul to collect groundwater samples in Jan. 2010.
03/04/10-Hiralkumar Patel. 12:02 PM:-
received first quarterly groundwater sampling report. collected
groundwater samples from wells
MW-1, BK-4, BK-13, BK-14 and BK-15 on 02/01/10. groundwater samples
were analyzed for VOCs (via
8260) only. no free product observed in well BK-4. found VOC
contamination in groundwater sample
from BK-14 and very minor contamination in other wells. but as per
report from Oct. 2009, no
contamination found in BK-14, but contamination was found in BK-13.
Paul mentioned that sample
results for BK-13 and BK-14 were switched in report dated 10/30/09.
groundwater analyticals:
----------BK-14 Benzene----------469
Toluene----------89
Ethylbenzene----------485 Xylene----------201
1,2,4-Trimethylbenzene-----1,290
Naphthalene----------266 MTBE----------61
06/22/10-Hiralkumar Patel.
received quarterly groundwater sampling report from Ecosystems. on
06/08/10, they sampled wells
MW-1, BK-4, BK-13, BK-14 and BK-15. found contamination in groundwater
sample from well BK-14: the
well in previous sediment trap area. found only MTBE (71 ppb) in well
BK-4. will sample wells again
in Sep. 2010. groundwater analyticals:
----------BK-14
Benzene----------600 Toluene----------92
Ethylbenzene----------470
Xylene----------196 1,2,4-Trimethylbenzene-------930
Naphthalene----------250
MTBE----------64 11:56 AM:- spoke with Mr. Prigozen.
informed him that groundwater
is contaminated near sediment trap area and if they continue
groundwater monitoring and are
planning for no excavation, then this case may be transferred to
remediation group for long-term
remediation. Mr. Prigozen will discuss with Ecosystems and will call
back by 07/10/10.
07/28/10-Hiralkumar Patel. 11:08 AM:- received email from Mr.
Prigozen. he mentioned that they will
excavate area around BK-6/BK-4 in August, 2010. Ecosystem will send
work schedule.
08/04/10-Hiralkumar Patel. 9:01 AM:- received email from Richard. they
have scheduled a soil
excavation around sediment trap on 08/12/10. work will start at 9 AM.
09/13/10-Hiralkumar Patel.
11:51 AM:- sent email to Paul inquiring updates. email copied to Mr.
Prigozen. 11:53 AM:- received
email from Paul. he will submit report by end of Sep., 2010.
10/26/10-Hiralkumar Patel. 1:56 PM:-
received supplemental remediation report from Ecosystems. the
submitted report doesn't include info
about depth of endpoint sidewall samples and sample analyticals were
compared with Part 375 instead
of TAGM 4046. 10/27/10-Hiralkumar Patel. 10:22 AM:- spoke with Richard

NATIONS RENT (Continued) **S104621824**

at Ecosystems regarding
excavation dimension and endpoint sampling depths. Richard mentioned that final excavation was
approx. 50 ft by 30 ft to 15 ft depth. they collected endpoint sidewall samples at groundwater
interface (at 7 ft depth) and bottom soil sample was collected at 15 ft depth. as per Richard,
groundwater was seeping into excavation at very low rate, so groundwater was not present in
exavation for sampling. asked Richard to submit revised report including info about sidewall
sampling depth and sample results comparison with TAGM 4046 instead of Part 375. 10:31 AM:- left
message for Mr. Prigozen. informed him that based on results of endpoint samples, the department
requires further investigation/remediation. 10:40 AM:- sent email to Richard asking to submit
revised report. email copied to Mr. Prigozen. 11:38 AM:- received call from Mr. Prigozen. he
mentioned that he doesn't remeber discussing about excavation around BK-4 and based on groundwater
sampling results, he does not want to dug in area of BK-4. informed Mr. Prigozen that based on
quarterly groundwater sampling results from BK-4, the department does not require excavation, but
based on endpoint sample results from recent excavation, the department requires further
investigation/remediation. 11/30/10-Hiralkumar Patel. 9:32 AM:- spoke with Rich. he will submit
revised report. they are proposing for groundwater monitoring at this time and based on monitoring
results, may propose additional investigation in former sediment trap area. 12/02/10-Hiralkumar
Patel. 2:13 PM:- received revised report from Ecosystems. - excavated area around former sediment
trap and well BK-14 - no field evidence of contamination until groundwater was encountered at
approx. 7 ft bg and in shallow soils at the far southeastern corner of the excavation where an area
of heavy, bituminous material was encountered at between 2 and 3 ft bg - during excavation,
petroleum odors and PID readings between 300 and 600 were recorded - five endpoint samples (four
sidewalls and one bottom) were collected from excavation - sampled groundwater in wells BK-4,
BK-13, BK-15 and MW-1 - petroleum contaminated soils remain at depths greater than 15 ft below the
former sediment trap and below static water level - found heavy contamination in bottom endpoint
soil sample - very minor VOC contamination found in groundwater samples (max 43 ppb MTBE in BK-4)
----------bottom 15 ft bg
Benzene----------3,400
Toluene----------2,900
Ethylbenzene----------31,000
Xylene----------5,400
1,2,4-Trimethylbenzene---------210,000

NATIONS RENT (Continued) **S104621824**

Naphthalene----------29,000
Isopropylbenzene----------19,000
n-Butylbenzene----------33,000
n-Propylbenzene----------37,000 due to heavy soil
contamination in endpoint bottom sample and heavy contamination in groundwater sample from well
BK-14, which was installed in the vicinity of the sediment trap, the department requires further
complete delineation of soil and groundwater investigation including installation of one well at
the location of endpoint bottom sample with deeper screen.
12/07/10-Hiralkumar Patel. discussed
with DEC Austin regarding soil contamination below water table. he asked to contact MGP project
manager in Albany as MGP site was in neighbourhood. 11:10 AM:- spoke with DEC William Ottaway in
Albany regarding MGP site. Bill mentioned that Douglas MacNeal is the project manager for MGP site
(V-00732) on Kent ave. Bill mentioned that MGP waste contains very high SVOCs and may have some
VOCs. reviewed recent report. no SVOCs found in any endpoint sample. 1:38 PM:- sent letter to Mr.
Prigozen requiring additional soil and groundwater investigation in former sediment trap area.
letter emailed to Mr. Prigozen and Paul. 12/20/10-Hiralkumar Patel. 2:22 PM:- received message from
Paul from Ecosystems. 12/21/10-Hiralkumar Patel. 2:31 PM:- left message for Paul.
12/29/10-Hiralkumar Patel. 1:35 PM:- received email from Rich. a well at the former sediment trap
will be installed on 01/06/11. 01/04/11-Hiralkumar Patel. 3:21 PM:- spoke with Rich. they will
start well installation work around 8 AM. he also mentioned that a new drain structure has been
installed in the previous sediment trap area. so they have to relocate the new well. Rich will
decide well location once visit the site. 01/06/11-Hiralkumar Patel. 10:01 AM:- received call from
Rich. they installed boring in area close to former sediment trap. boring was installed to 19 ft
depth where they found refusal. during boring, found 160 ppm on PID at groundwater interface
(groundwater at 7 ft depth) and 75 ppm from 10-15 ft depth. there was no recovery in 15-20 ft
range. the boring was installed in previously excavated area to 15 ft depth. so highest PID was
found at groundwater interface in backfill material. a well will be installed in boring with 15 ft
of screen. as high soil contamination found at 15 ft depth in endpoint sample from excavation and
as no recovery in 15-20 ft depth, asked Rich to install another boring in area. 11:15 AM:- visited
site. Rich installed another boring to 20 ft depth and collected soil from 15 to 20 ft depth only.
minor odor noticed in clayey material from 15 to 20 ft depth. asked Rich to collect two soil
samples: one at 15-16 and one at 19-20 ft depth. Rich will sample all

NATIONS RENT (Continued) **S104621824**

existing wells, around former
sediment trap area, next week. 02/17/11-Hiralkumar Patel. 1:13 PM:- received supplemental
investigation report from Rich. abstract: - two soil borings (2B-1 and 2B-2) installed in former
sediment trap area - collected two soil samples from each boring: at 7 and 15 ft from 2B-1 and at
15 and 20 ft at 2B-2 - installed 2 inch well (BK-14(R)) at boring 2B-1 with 10 ft of screen (from 5
to 15 ft bg) - sampled water from wells BK-4, BK-13, BK-14(R) and BK-15 - no contamination found in
any soil sample (not even in sample at 15 ft bg in 2B-1 which was collected in same area as
endpoint bottom sample after excavation around former sediment trap) - very minor contamination
found in water samples except sample from BK-14(R) groundwater analyticals:
----------BK-14(R) Benzene----------190 Ethylbenzene----------280 Xylene----------120
1,2,4-Trimethylbenzene------1,300 Naphthalene----------210 - recommended sampling of wells
MW-1, BK-4, BK-13, BK-14(R) and BK-15 after three months 03/17/11-Hiralkumar Patel. discussed with
DEC Austin. based on consistent data in well BK-14, Austin asked for remediation. 3:16 PM:- sent
letter to Mr. Prigozen requiring submission of a RAP for remediation of contamination in and around
the area of the former sediment trap. letter emailed to Mr. Prigozen, Paul and Rich.
05/20/11-Hiralkumar Patel. 10:40 AM:- received call from Paul. he mentioned that as groundwater
contamination found in only by former sediment trap area, he propose to monitor groundwater for
some time before any active remediation. he will send work plan by 06/03/11. 07/20/11-Hiralkumar
Patel. 1:46 PM:- received quarterly groundwater sampling report from Ecosystem. on 04/28/11,
groundwater samples were collected from wells MW-1, BK-4, BK-13, BK-14R and BK-15 and analyzed for
VOCs only. next round of quarterly sampling is schedule for the end of July 2011. found
contamination in samples from BK-14R. groundwater analyticals:
----------BK-14(R)
Benzene----------44 Ethylbenzene----------150
Xylene----------182 1,2,4-Trimethylbenzene--------380
Naphthalene----------240 Paul mentioned that results of groundwater samples support the
conclusion that significant natural attenuation of contamination is taking place and he requested
to close the case (but quarterly sampling is scheduled for end of July, 2011). need a revised
report as confusing info in the report. 08/03/11-Hiralkumar Patel. 11:43 AM:- left message for
Paul. 12:32 PM:- sent email to Paul requiring to submit revised report. informed him that the
Department requires minimum of two years of groundwater monitoring before considering case closure.

NATIONS RENT (Continued) **S104621824**

asked him to submit revised report and results of groundwater samples that must have been taken in
july 2011. email copied to Mr. Prigozen, Larry Schnapf (attorney) and Richard. 08/05/11-Hiralkumar
Patel. 2:14 PM:- received call from Richard. he mentioned that as first round of groundwater
samples taken in 2009, two years of monitoring is over and thats why they requested closure.
informed him that the Department requires two years of groundwater monitoring after the replacement
of well in the former sediment trap area. 02/08/12-Hiralkumar Patel. 3:42 PM:- spoke with Mr.
Prigozen. he mentioned that groundwater samples were taken last month. asked him to submit report
by the end of 02/17/12. 3:45 PM:- sent email to Mr. Prigozen and asked to submit report by
02/17/12. email copied to Paul. 02/10/12-Hiralkumar Patel. received email from Paul (at 5:55 PM on
02/08/12). he will submit report by 02/21/12. 02/21/12-Hiralkumar Patel. 11:22 AM:- received
quarterly groundwater monitoring report from Ecosystems. abstract: - wells MW-1, BK-4, BK-13,
BK-14R and BK-15 were sampled on 02/01/12 - found very minor contamination in groundwater samples
(max 41 ppb 1,2,4-Trimethylbenzene in BK-14R) 04/02/12-Hiralkumar Patel. after reviewing available
information, case closed based on results of soil endpoint samples and groundwater samples. 3:35
PM:- sent spill closure letter to Mr. Prigozen. letter emailed to Mr. Prigozen and Paul.
12/05/14-Hiralkumar Patel. received call from Charles Sosik from EBC. he mentioned that soil
contamination was noted during collection of waste characterization samples as part of proposed
redevelopment of the site by the new owner. he inquired about either reopening the subject spill or
reporting a new one. informed him that the case was closed based on available sample results and
work summary and it will only be reopened if previously unknown environmental conditions found at
the site which requires further work. asked him to provide sample results once available. he
mentioned that the entire site will be dug down to 20-25 ft along with dewatering. 3:11 PM:-
received email from Mr. Sosik including above discussion.

Remarks: HISTORICAL SPILL-FLOATING PRODUCT ON GROUND WATER-SPILL WILL CONTINUE TO BE INVESTIGATED.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Updated By: BXANDERS
Site Description: Location: The site is located in an urban area at 135 Kent Avenue in the Borough of Brooklyn, Kings County, NY. The site is bordered to the north by North 6th Street, to the west by Kent Avenue, to the south by a vacant 2-story warehouse (see BCP site no. C224159), and to the east by a three story building which appears to consist of a garage on the first floor with residential above. Single and multi-family residential is located across North 6th St. and newly-constructed multi-story residential towers are located across Kent Avenue. Site Features: The Site currently consists of a 11,000 sq. ft. (0.27 acre) 2 story brick building with commercial units on

CLEANER SALES & EQUIPMENT CORP. (Continued) **S103942699**

the first floor and residential units on second floor. Current Zoning/Use(s): The site is currently zoned M1-2 (manufacturing) with an R6A (residential) overlay. The site is located within the Greenpoint-Williamsburg Rezoning District, and is surrounded by mixed commercial and residential uses. The Site has a NYC Restrictive Declaration (similar to E-Designation) for Hazardous Materials (E-138) and Air Quality (E-227). Past Site Use(s): The Site was previously occupied by a warehouse which operated as a commercial dry cleaner supplies distribution facility (Cleaners Sales & Equipment Corp.). This facility operated from about 1958 to 2002. Cleaners Sales & Equipment Corp. has a USEPA ID no. NYR000113480 for hazardous waste generation (tetrachloroethylene, or PCE). Furthermore, the site is a registered Chemical Bulk Storage Facility (CBS No. 2-000353 for a 5,000 gallon aboveground PCE storage tank) and Petroleum Bulk Storage facility (PBS No. 2-608579 for a 3,000 gallon closed-in-place underground storage tank. Site Geology and Hydrogeology: Soil borings installed on a neighboring property identified fill materials consisting of medium-grained sand with some gravel and brick fragments to a depth of approximately 8 feet below grade. Beneath the surface fill layer is sand and gravel to a depth of at least 28 feet below grade. Groundwater is present at a depth of approximately 12 feet below grade. Groundwater flows generally to the west-southwest towards the East River, which is located approximately 550 feet west of the site. Borings done in the sidewalk on N 6th St showed sand to 28 feet followed by a clay layer and then silty sand at 35 feet. Groundwater was at 17 feet below ground surface. This site has been accepted into the Brownfield Cleanup Program and, therefore, investigation and remediation will occur under that program. The site Index is C224177.

Env Problem: Nature and Extent of Contamination: Recent sampling was conducted as part of the Remedial Investigation for the adjacent BCP site. Soil vapor samples were collected from immediately in front of the loading dock for the former cleaner supply facility, which identified PCE at a concentration of 25,300,000ug/m3, and TCE 10,400 g/m3 and cis-1,2-DCE at 7,060 ug/m3. Significant Threat: Based upon the soil vapor sampling results there is a potential for inhalation of the site contaminants in indoor air due to soil vapor intrusion for the on-site building and off-site structures. The NYSDOH made an evaluation of significant threat for this site. The site was accepted in the Brownfield Cleanup Program (BCP) and the Index # is C224177.

Health Problem: Volatile organic compounds related to the site in the groundwater may move into soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for the inhalation of site contaminants in indoor air due to soil vapor intrusion for the on-site building and off-site structures.

BROWNFIELDS:

Name:	FORMER CLEANERS SALES & EQUIPMENT CORP
Address:	135 KENT AVENUE
City,State,Zip:	BROOKLYN, NY 11249
Program:	BCP
Site Code:	484026
Acres:	0.290
HW Code:	C224177
SWIS:	2401
Town:	New York City
Record Added Date:	07/02/2013
Record Updated Date:	08/28/2023
Update By:	AAOBLIGA
Site Description:	Location: The site is bounded to the north by North 6th St., to the west by Kent Avenue, to the south by BCP C224159, and to the est by mixed commercial/residential buildings. Site Features: The site is currently developed with a 2-story commercial/residential building (measuring approx. 125 ft x 100 ft). The first floor of the building is divided into individual tenant spaces operated by a coffee shop, deli, furniture store, clothing store, and storage area. A small sub-grade utility room exists beneath part of the first floor, where a boiler historically operated. One sump and two cleanout accesses, all with dirt bottoms, exist in the floor of the utility room. The second floor consists of 11 residential units. Current Zoning and Land Use: The site use is commercial and it is included in an M1-2/R6A (Manufacturing with a Residential Overlay) mixed use district. Past Use of the Site: Former Cleaners Sales & Equipment Corp., a dry cleaning fluid distribution facility and laundry supply distributor, operated onsite from approximately 1958 to 2002. Site Geology and Hydrogeology: USGS reports indicate the depth of the bedrock expected to be approximatively 100 feet below ground surface (fbsg). Based on the local topograpy, groundwater most likely flows in the west-southwest direction toward East River, located 500 feet from the subject site. The depth to the groundwater is expected to be 8 to 10 fbsg.
Env Problem:	Nature and Extent of Contamination: Limited information about site contamination has been obtained through investigations performed on an adjacent site, and investigations performed on the sidewalk in front of the site by NYSDEC (see former site no. 224177). Further investigation of the on-site portions of the site are planned. The primary contaminants of concern are tetrachloroethylene (PCE) and its breakdown products trichloroethene (TCE), 1,2-dichloroethene (DCE) and vinyl chloride (VC). In May and June 2013, NYSDEC performed limited investigation on the sidewalk in front of 135 Kent Ave. and identified these contaminants in soil, groundwater, and soil vapor. Soil - PCE concentrations were detected at concentrations as high as 1.6 ppm (compared with Unrestricted Use Soil Cleanup Objective of 1.3 ppm); VC was detected at concentrations as high as 0.064 ppb (compared with 6NYCRR Part 375-6.8(a) UUSCO of 0.02 ppm). Groundwater - PCE concentrations were detected as high as 870 ppb (compared with Ambient Water Quality Standard of 5 ppb); TCE was found at up to 33 ppb (compared with AWQS of 5 ppb), and DCE was found at up to 20 ppb (compared with AWQS of 5 ppb). Soil vapor - PCE was identified at a concentration of 25,300,000 ug/m3, TCE at 10,400 g/m3 and DCE at 7,060 ug/m3.
Health Problem:	Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. People are not drinking

CLEANERS SALES & EQUIPMENT (Continued) **1006810542**

contaminated groundwater associated with the site because the area is served by a public water supply that is not contaminated by this site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface in to the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling identified impacts to the indoor air quality of the on-site building and immediate actions have been taken to minimize exposures. Additional evaluation is needed to determine whether soil vapor intrusion is a concern for off-site buildings.
