Attention: Mr. Konstantin Gubareff

Subject: ASTM Phase I Environmental Site Assessment
Proposed 255-261 Douglass Street Redevelopment
255-261 Douglass Street
Brooklyn, New York

Ladies and Gentlemen:

The enclosed report presents the results of a Phase I Environmental Site Assessment (Phase I) conducted at the above-referenced property, located at 255-261 Douglass Street, in Brooklyn, New York (herein referred to as the "subject property"). This work was performed by H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York), in accordance with our proposal to 255 261 Douglas Street LLC. This Phase I was conducted in conformance with the scope and limitations of the ASTM International (ASTM) E1527-21 Standard Practice for Environmental Site Assessments.[1] The objective of a Phase I is to assess whether known and/or suspect recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) are associated with the subject property, as defined in the ASTM E1527-21 Standard.

Thank you for the opportunity to perform these services for you. Please do not hesitate to contact us if you have any questions or comments.

Sincerely yours,
HALEY & ALDRICH OF NEW YORK

James Bellew
Principal

Enclosures

[1] The ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21 Standard) as referenced in Code of Federal Regulations Title 40 Part 312 (the All Appropriate Inquiries Rule).

Executive Summary

H & A of New York Engineering and Geology LLP (Haley & Aldrich of New York) has performed a Phase I Environmental Site Assessment (Phase I) of the property located at 255-261 Douglass Street in Brooklyn, New York (herein referred to as the "subject property"). This Phase I was performed for 255 261 Douglas Street LLC who seeks to acquire the property. This Phase I was performed in conformance with the scope and limitations of the ASTM International (ASTM) E1527-21 Standard and (AAI) Rule.

SUBJECT PROPERTY DESCRIPTION

The subject property, identified as Block 412, Lots 45 and 48 on the New York City tax map, is approximately 0.30 acres (13,000 square feet) in size and is located in the Gowanus neighborhood of Brooklyn, New York. The property is currently improved by a vacant two-story structure, and a one-story industrial building currently operated Band Spaces NYC as a rentable rehearsal studio space for musicians.

The property is located within a light manufacturing district (M1-4) and a medium-density residential zoning area (R7X) with special Gowanus mixed use district overlay (G) and is surrounded by a mix of manufacturing and industrial properties, as well as mixed residential and commercial properties. The subject property is bounded to the north by warehouses occupied by a beverage and grocery distributor and a furnishings/display warehouse distributor, followed by Butler Street; to the east by a four-story commercial building occupied by a weightlifting gym and a three-story commercial and office building occupied by an emergency animal hospital; to the south by Douglass Street, followed by Thomas Greene Playground; and to the west by a fifteen-story mixed-use residential and commercial building under construction, followed by Nevins Street. The subject property location is shown on Figure 1, and the subject property layout (site plan) is shown on Figure 2.

OBJECTIVE

The objective of a Phase I is to assess whether recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) are associated with the subject property. Our conclusions are intended to help the user evaluate the business environmental risk associated with the subject property. Our opinion regarding a REC's potential impact on the subject property is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intention to acquire the property.

SIGNIFICANT DATA GAPS

Our ability to identify and evaluate RECs at the subject property is conditioned upon significant data gaps identified as part of this Phase I. The ASTM E1527-21 Standard defines a significant data gap as a data gap that affects the ability of the Environmental Professional to identify a REC.

No significant data gaps were identified during the performance of this Phase I. Thus, it is our opinion that sufficient information was obtained to identify subject property conditions indicative of releases or threatened releases of hazardous substances and petroleum hydrocarbons. Our opinion is limited by the

conditions prevailing at the time our work is performed and the applicable regulatory requirements in effect.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a REC as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

The following RECs listed below were identified in connection with the subject property.

REC #1: Historical Use of Subject Property

Historical uses of the subject property included operations by J.S. Loomis Co. Lumber Yard in the 1900s, as well as operations associated with a paint house and a glass storage building. Additional historic uses included operations by Bay Ridge Cooperage Co. from the 1920s through 1950, wood box manufacturing, operations by Douglass Woodworking Corp. from 1945 to 1949, and operations by Quality Woodworking Corp. from 1952 to 2022. These historic uses are considered a REC, as potential or undocumented releases of petroleum products, solvents, paints, wood treatment compounds, and other hazardous materials may have adversely affected soil, groundwater, and/or soil vapor at the subject property.

REC #2: Documented Subsurface Contamination at the Adjacent Property

The west adjacent property, located at Block 412, Lot 50, was identified in the Brownfield database for several historical industrial uses that resulted in subsurface contamination. Historical operations at the west adjacent property included Bradley & Son Stone Works, Scranton & Lehigh Coal Co., and a private garage. This site was accepted into the Brownfield Cleanup Program (BCP), with remedial activities commencing in October 2023 and concluding circa December 2025.

Prior to remediation, contaminants of concern included coal tar grossly contaminated material (GCM), semi-volatile organic compounds (SVOCs), and metals in soil; coal tar non-aqueous phase liquid (NAPL), VOCs, SVOCs, and metals in groundwater; and VOCs in soil vapor.

Remedial activities included the removal of five underground storage tanks (USTs), contaminated soil disposal, and DNAPL recovery. Post-remedial sampling results indicated that remaining contamination includes SVOCs, and metals in soil, VOCs and SVOCs in groundwater, and VOCs in soil vapor. The property is currently being managed under a Site Management Plan (SMP) with engineering and institutional controls with requirements for mitigating and controlling vapor intrusion. As this property contains residual impacts in soil, groundwater, and soil vapor, this adjacent property is considered a potential source that may have adversely impacted subsurface conditions at the subject property.

REC #3: Historical and Current Uses of Surrounding Properties

Properties surrounding the subject property were historically utilized for various commercial, industrial, and manufacturing operations, including stone works, clothing manufacturing, wood box manufacturing, supply manufacturing, coal company operations, truck garages, auto repair shops, button manufacturing, bluestone works, the Brooklyn Union Gas Company Fulton Municipal Branch, marble works operations, sash, door, and blind manufacturing, and coal yard operations. Several of these surrounding properties are listed in the Resource Conservation and Recovery Act (RCRA) database as generators of hazardous waste and have also been identified in spill incident databases. The historical uses of these surrounding properties are considered a REC, as potential or undocumented releases from these adjacent and upgradient properties may have adversely impacted soil, groundwater, and/or soil vapor, with the potential to migrate onto the subject property.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a CREC as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

CRECs were not identified in connection with the subject property.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines an HREC as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. A historical recognized environmental condition is not a recognized environmental condition.

HRECs were not identified in connection with the subject property.

OTHER FINDINGS

The ASTM does not define the term “other finding”; however, Haley & Aldrich of New York utilizes the category to indicate conditions of potential risk that are not clearly defined in the ASTM Standard. While not considered RECs, Haley & Aldrich of New York identified the following Other Findings:

Other Finding #1: New York City E-Designation

The subject property was identified as an E-Designation site by the NYCOER. The property was assigned E-601 for Air Quality which requires that heating, ventilation and air conditioning (HVAC) fuel is limited natural gas with low NoX only, exhaust stack location limitations, and hazardous materials Phase I and Phase II Testing Protocol. The designation also includes Window Wall Attenuation and alternate ventilation requirements (CEQR No. 19DCP157K). The E-Designation program requires satisfaction of the procedures outlined for hazardous materials potentially present at the subject property.

Other Finding #2: Urban Fill

The overburden on the subject property is classified as Urban Land, which refers to soils that have been altered by human activities, thus making them unidentifiable. Typically, these soils have been mixed with other materials, such as brick and concrete (urban fill).

Other Finding #3: Above Ground Storage Tank (AST)

A 1,080-gallon gasoline AST was observed in the northwest portion of the cellar on Lot 48. The AST was observed to be encased in concrete and use of the tank was confirmed to be for the building's boiler as per the key site manager. The AST was not identified as registered on the New York State Department of Environmental Conservation (NYSDEC) petroleum bulk storage database.

SUMMARY AND RECOMMENDATIONS

In summary, we identified three RECs and two "Other Findings" during this Phase I, including the following:

- **REC #1:** Historical Use of Subject Property
- **REC #2:** Documented Subsurface Contamination at West Adjacent Property
- **REC #3:** Historical and Current Uses of Surrounding Properties
- **Other Finding #1:** New York City E-Designation
- **Other Finding #2:** Urban Fill
- **Other Finding #3:** AST

Continued Viability of Environmental Site Assessment

In accordance with the ASTM E1527-21 Standard, the following components of the Phase I Report must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction:

1. Interviews with owners, operators, and occupants. Completed on: September 15, 2025.
2. Searches for recorded environmental cleanup liens (a user responsibility). Completed on: September 15, 2025.
3. Reviews of federal, tribal, state, and local government records. Completed on: September 15, 2025.
4. Visual inspections of the subject property and of adjoining properties. Completed on: September 15, 2025
5. The declaration by the Environmental Professional responsible for the assessment or update (refer to Section 9). Completed on September 18, 2025.

1. Introduction

This report presents the results of an ASTM International (ASTM) Phase I Environmental Site Assessment (Phase I) conducted at 255-261 Douglass Street located in Brooklyn, New York (herein referred to as the "subject property"). The approximately 13,000 square foot (sq ft) subject property is currently improved by a vacant two-story structure and a one-story industrial building, which is operated by Band Spaces NYC as a rentable rehearsal studio space for musicians . The property is shown on the Project Locus, Figure 1. This Phase I was conducted in consideration of 255 261 Douglas Street LLC's intention to acquire the property.

1.1 OBJECTIVE

The objective of a Phase I is to assess whether recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) are associated with the subject property by evaluating site history, interviews, existing observable conditions, current site use, and current and former uses of adjoining properties, as well as potential releases at surrounding properties that may impact the subject property. Our conclusions are intended to help the user evaluate the business environmental risk associated with the subject property.

The ASTM E1527-21 Standard defines a REC as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The definitions of RECs, CRECs, and HRECs are included in the Glossary section of this report.

1.2 SCOPE OF SERVICES

This Phase I was performed by H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) in conformance with the scope and limitations of the ASTM E1527-21 Standard and All Appropriate Inquiries (AAI) Rule. The Phase I limitations and Agreement are attached hereto as Appendix A.

As part of this Phase I, Haley & Aldrich of New York conducted visual observations of site conditions and of abutting property use, and interviewed a key site manager and applicable tenant representatives (subject property reconnaissance); reviewed federal, state, tribal, and local environmental database information, federal and state environmental files, previous reports (if identified and provided), and site historical use records; and formulated conclusions regarding the potential presence and impact of RECs.

1.3 NON-SCOPE CONSIDERATIONS

The ASTM E1527-21 Standard includes the following list of "additional issues" that are non-scope considerations outside of the scope of the ASTM Phase I practice: asbestos-containing materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality related to release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint unrelated to releases into the environment, lead in drinking water, mold or microbial growth conditions, polychlorinated biphenyl (PCB)-containing

materials, naturally-occurring radon, regulatory compliance, substances not defined as hazardous substances (emerging compounds), and wetlands. These items were not included in this Phase I of the subject property.

The assessment of the presence of PCBs is limited to those potential sources specified in the ASTM E1527-21 Standard as "electrical or hydraulic equipment known or likely to contain PCBs…to the extent visually and or physically observed or identified from the interview or records review."

Note that PCBs may be present in miscellaneous building materials, such as caulking, sealants, insulation and sound dampening materials, paint, gaskets, roofing and siding materials, waterproofing compounds, enamel coatings, and other chemical products manufactured prior to 1979. Evaluating the subject property building for potential PCB-containing building materials and possible PCB-containing materials other than "electrical or hydraulic equipment known or likely to contain PCBs" was outside the scope of this Phase I.

1.4 LIMITING CONDITIONS/DEVIATIONS

Haley & Aldrich of New York completed this Phase I in substantial conformance with the ASTM E1527-21 Standard. In our opinion, no additions were made to, or deviations or deletions made from, the ASTM work scope in completing this Phase I.

1.5 USER RESPONSIBILITIES

The completion of this Phase I is only one component of the process required to satisfy the AAI Rule. In addition, the user must adhere to a set of user responsibilities as defined by the ASTM E1527-21 Standard and the AAI Rule. User responsibilities are discussed in Section 6.6 of this report. A user seeking protection from Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability as an innocent landowner, bona fide prospective purchaser, or contiguous property owner must complete all components of the AAI process in addition to meeting ongoing obligations. AAI components, CERCLA liability relief, and ongoing obligations are discussed in the AAI Rule and in Appendix X1 of the ASTM E1527-21 Standard.

2. Site Description

A description of the subject property is detailed in the sections below. Refer to Figure 1 for a project locus and Figure 2 for a site plan showing relevant subject property features and adjacent properties.

2.1 SITE OWNERSHIP, LOCATION, AND VICINITY DESCRIPTION

Site Description		
Owner	255 DOUGLAS RE LLC 323 East Lexington Avenue Oceanside, New York 11572	
Operator	Band Spaces NYC, Drum Lessons with Sam Russo	
Current Subject Property Use	255 Douglass Street: vacant 261 Douglass Street: music studio space	
Size	Approximately 13,000 sq ft	
Building Square Footage	261 Douglass Street (Block 412 Lot 45): 3,300 sq ft 255 Douglass Street (Block 412 Lot 48): 9,500 sq ft	
USGS 7.5-Minute Topographic Map	Brooklyn, 2019	
Site County	Kings County	
Zoning	M1-4/R7X/G	
Parcel Information	Section 3, Block 412, Lots 45 and 48	
Utilities	Water:	City of New York
	Sewerage:	New York City Department of Environmental Protection (NYCDEP)
	Electricity:	Consolidated Edison (Con Edison)
	Gas/Oil/LPG:	Con Edison
Heating/Cooling System	255 Douglass Street (Block 412 Lot 48): N/A 261 Douglass Street (Block 412 Lot 45): Central Air - Unitary Products Group, Model ZS-25N40BTAAA1B	

Site Vicinity Description		
General Area Description	The area surrounding the subject property consists of residential, commercial, and manufacturing-use properties.	
Adjoining Property Description	North:	Warehouses followed by Butler Street
	East:	One four-story commercial weightlifting space and gym and a three-story commercial building occupied by an emergency animal hospital, followed by 3rd Avenue
	South:	Douglass Street, followed by Thomas Greene Park
	West:	One fifteen-story mixed-use residential and commercial building undergoing construction, followed by Nevins Street

2.2 PHYSICAL SETTING

Subsurface explorations and/or hydrogeologic investigations were not performed for this Phase I. Subject property geology and hydrology were evaluated on the basis of readily available public information or references, and/or based upon our experience and understanding of subsurface conditions in the vicinity of the subject property. It is unknown to what extent localized variations in groundwater depth and flow occur on the subject property.

Physical Setting		Source
Topography Summary	The subject property slopes gradually to the west.	2,3
Subject Property Elevation (El.)	Approximate El. 16 feet (ft) above sea level	2,3
Overburden Soils	Subsurface soil consists of Urban Land, which refers to soils that have been altered by human activities, thus making them unidentifiable. The urban fill at sites adjacent to the subject property primarily contains slag, brick, and gravel within a brown fine- to medium-grained sand matrix. This fill material was encountered at depths ranging from 4 to 20 ft bgs. The fill is reportedly underlain by native soil consisting predominantly of brown fine- to medium-grained sand with gravel and silt. Clay layers have been encountered at adjacent sites at depths ranging from approximately 28 to 37.5 ft bgs.	2,6
Bedrock Formation	The subject property is underlain by Quaternary glacial and alluvial deposits, with the underlying bedrock geology unknown.	4,6
Depth to Bedrock	Estimated to be approximately 150 to 200 ft bgs	2,5
Depth to Groundwater	Approximately 8 to 12 ft bgs	5,6

Physical Setting		Source
Surface Water Flow Direction	Surface water appears to flow toward the west southwest based on observed surface topography.	2,3
Regional Groundwater Flow Direction	Regional groundwater flow appears to flow to the west based on the subject property's proximity to the Gowanus Canal.	2,6
Nearest Surface Water Body	The Gowanus Canal is located approximately 0.12 miles west of the subject property.	2

3. Previous Reports

Previously prepared reports for the subject property were not identified or provided as part of this assessment.

4. Subject Property History

Haley & Aldrich of New York assessed past usage of the subject property and adjoining properties through a review of:

- Sanborn Fire Insurance Maps dated 1886, 1888, 1904, 1906, 1915, 1922, 1926, 1928, 1938, 1950, 1951, 1965, 1969, 1977,1978, 1979, 1980,1981, 1982, 1985, 1986, 1987, 1988, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, and 2007;
- Topographic Maps dated 1897, 1998, 1900, 1947, 1955, 1956, 1967, 1979, 1981, 1995, 2013, 2014, 2016, 2019, and 2023;
- Aerial Photographs dated 1924, 1940, 1943, 1951, 1954, 1961, 1966, 1971, 1974, 1980, 1984, 1991, 1994, 2002, 2006, 2009, 2013, 2017, 2021, and 2024;
- City Directories dated 1898, 1920, 1923, 1927, 1928, 1931, 1933, 1934, 1937, 1938, 1939, 1940, 1942, 1945, 1947, 1949, 1950, 1952, 1953, 1956, 1957, 1958, 1960, 1961, 1963, 1965, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1976, 1977, 1978, 1980, 1981, 1983, 1984, 1985, 1986, 1987, 1988, 1990, 1991, 1992, 1995, 2000, 2005, 2010, 2014, 2017, 2022, and 2024;
- Municipal records.

Copies of information obtained from historical references reviewed are included in Appendix B. Unless otherwise noted below, per the ASTM standard, sources were reviewed dating back to 1940 or first developed use, whichever is earlier, and at 5-year intervals if the use of the property has changed within the time period.

4.1 SUBJECT PROPERTY

According to Sanborn Maps, aerial photographs, and City Directory records, the subject property was undeveloped in 1886. By 1904, the subject property was partially developed and operated by J.S. Loomis Co. Lumber Yard on Lot 45, which was improved with four sheds, a lumber yard, and a carriage house. The western portion of the subject property, Lot 48, was developed with a paint house, a glass storage building, and a two-story dwelling. By 1938, the storage building on Lot 48 had been expanded to incorporate the former dwelling, while the lumber yard on Lot 45 was further developed with a cooperage building. On Lot 45, City Directories note Bay Ridge Cooperage Co. as operating from 1928 through 1949. By 1950, the improvements on Lot 48 were converted to a wood box manufacturing operation, including a warehouse and shavings room, while the cooperage building on Lot 45 remained relatively unchanged. City Directory listings indicate that Douglass Woodworking Corp. operated on Lot 48 from 1945 through 1949, followed by Quality Woodworking Corp. from 1952 through 2022. By 1977, the cooperage operation on Lot 45 was depicted as a general manufacturing building, while the warehouse, shavings room, and wood box manufacturing operations on Lot 48 remained unchanged through 2007. City Directory listings indicate that Lot 45 was operated by Band Spaces LLC from 2014 to 2017. According to City Directories, Lot 48 was briefly operated by Gemini & Scorpio, an event venue, in 2017, and is currently vacant.

The table below provides a detailed summary of pertinent information from the historical sources reviewed.

Dates	Description of Subject Property	Sources
1886 to 1938	The 1886 Sanborn Map depicts the subject property as undeveloped. By 1904, the subject property was partially developed and operated by J.S. Loomis Co. Lumber Yard on Lot 45, which was improved with four sheds, a lumber yard, and a carriage house. The western portion of the subject property, on Lot 48, was developed with a paint house and a glass storage building, and a two-story dwelling.	Sanborn Maps, Aerial Photographs
1938 to 1977	By 1938, the storage building on Lot 48 had been expanded to incorporate the former dwelling. The lumber yard on Lot 45 was developed with a cooperage building. By 1950, the improvements on Lot 48 were converted to a wood box manufacturing operation, including a warehouse and shavings room, while the cooperage building on Lot 45 remained relatively unchanged. City Directory listings indicate that Douglass Woodworking Corp. operated on Lot 48 from 1945 through 1949, followed by Quality Woodworking Corp. from 1952 through 2022. On Lot 45, Bay Ridge Cooperage Co. is documented as operating from 1928 through 1949.	Sanborn Maps, Aerial Photographs, City Directory
1977 to present	By 1977, the cooperage operation on Lot 45 was depicted as a general manufacturing building. The warehouse, shavings room, and wood box manufacturing operations on Lot 48 remained unchanged until 2007. City Directory listings indicate that Lot 45 was operated by Band Spaces LLC from 2014 to 2017. According to City Directories, Lot 48 was briefly operated by Gemini & Scorpio, an event venue, in 2017, and is currently vacant.	Sanborn Maps, Aerial Photographs, City Directory

4.2 ADJOINING PROPERTIES

The table below provides a summary of pertinent information from the historical sources reviewed regarding adjacent properties:

Dates	Description of Adjacent Properties	Sources
1886 to 1938	North: By 1886, the north-adjacent properties were partially developed with Loomis' Sash, Door & Blind Factory. By 1904, J.S. Loomis Company operated in a two-story building containing a painting and glazing room and sash, door, and blind storage room. An additional two-story building was occupied by Stanley & Unckles for the painting and glazing of sash, doors, and blinds. By 1915, the north-adjacent properties remained largely unchanged, with the exception that the Stanley & Unckles operation had been replaced by a marble works operation. South: By 1886, the south-adjacent property was largely undeveloped and operated partially as a coal yard. By 1904, the property was occupied by the Brooklyn Union Gas Company Fulton Municipal Branch and had been partially developed with stone yards, stone cutting sheds, a wagon shed, offices, and a carriage house. Sanborn maps depict five gas oil tanks, one napth tank, a large hydrogen tank, and two large oil tanks associated with the Brooklyn Union Gas Company. East: By 1886, the east-adjacent property was vacant and undeveloped. By 1904, the property was developed and operated as Bluestone Works with an engine room. By 1915, the property was occupied by the Hine & Froud Company button factory. West: By 1886, the west-adjacent property was largely undeveloped and operated by Bradley & Son Stone Works and Scranton & Lehigh Coal Co. By 1904, the property continued to be occupied by Bradley & Son Stone Works and had been partially developed with tracks for traveling cranes and stone cutting, sawing, and planing sheds. By 1915, the property was occupied by Thomas Harrington's Sons Company and had been further developed with wagon and storage sheds.	Sanborn Maps, Aerial Photographs
1938 to 1950	North: By 1938, the Loomis operation remained at the northwest portion of the north-adjacent properties, while the northeast portion had been developed with a one-story trucking garage. South: By 1938, the Brooklyn Union Gas Company operations had been relocated farther down the block and condensed, leaving the south-adjacent property largely vacant and undeveloped. East: By 1938, the button factory had been removed, and the east-adjacent property was depicted as a loft building. City directories indicate that the property was occupied by Ferber Gentile & Camposarcone Clothing Manufacturers between 1937 and 1947. West: By 1938, the west-adjacent property had been redeveloped with a garage containing a depicted gas tank, followed by a vacant building.	Sanborn Maps, Aerial Photographs, City Directory

Dates	Description of Adjacent Properties	Sources
1950 to present	North: By 1950, the Loomis operation had been replaced with wood box manufacturing operations, including a warehouse and woodworking shop. The garage at the northeast portion of the north-adjacent properties remained unchanged and was depicted with a gas tank. By 1969, the garage was occupied by an export crating operation and the other north-adjacent properties remained unchanged. By 1978, the wood box manufacturing operation remained within one building at the northwest portion of the north-adjacent properties, while the remaining properties were occupied by warehouses. By 1987, the north-adjacent properties were occupied entirely by warehouses. By 1988, the north-adjacent properties continued to consist primarily of warehouses, with the northwesternmost adjacent property occupied by an auto repair shop. From 1996 to 2007, the north-adjacent properties were occupied by two auto repair shops and a manufacturing building. Currently, the north-adjacent properties are occupied by a beverage and grocery distributor and a furnishings/display warehouse distributor. South: By 1950, the Brooklyn Union Gas Company operations had been completely removed from the block. The south-adjacent property was vacant with the exception of a small comfort station. By 1977, the south-adjacent property had been further developed with a pool, lockers, and a filter room. By 2003, the south-adjacent property remained unchanged and had been identified as Thomas Greene Playground. The south-adjacent property remains occupied by Thomas Greene Playground today. East: By 1950, the property had become part of the Manifold Supplies Company manufacturing operations. By 1977, the east-adjacent property continued to be occupied by a manufacturing building and included a storage room. Currently, the east-adjacent property is occupied by a commercial building operated as a weightlifting gym known as UpFit Training Academy. West: By 1950, the property was occupied by an office building containing a gas tank and apartments. By 1969, the west-adjacent property remained relatively unchanged and the following lot was converted into a parking area. By 1979, the parking area had been replaced with storage facilities. By 2007, the west-adjacent property remained relatively unchanged with a gas tank still depicted in Sanborn Maps. Currently, the west-adjacent property is being redeveloped with a new 15-story mixed-use residential and commercial building.	Sanborn Maps, Aerial Photographs, City Directory

5. Environmental Records Review

5.1 ENVIRONMENTAL DATABASE RECORDS SEARCH

Haley & Aldrich of New York used an electronic database service[2], to complete the environmental records review. The database search was used to identify properties that may be listed in the referenced agency records, located within the ASTM-specified approximate minimum search distances as shown in the table below. A description of each database searched is provided in Section 11.2 of this report. The complete environmental database report is provided in Appendix C. Pertinent information obtained from the database is summarized in Section 5.3.

Database Searched	Approximate Minimum Search Distance	Subject Property Listed?	Number of Sites within Search Distance[1]
1. NPL Sites	1 mile	No	1
2. Delisted NPL Sites	0.5 miles	No	0
3. CERCLIS/SEMs[2] Sites	0.5 miles	No	2
4. CERCLIS-NFRAP/SEMs[2] Sites	0.5 miles	No	1
5. Federal ERNS	Site only	No	Not Applicable
6. RCRA non-CORRACTS TSD Facilities	0.5 miles	No	1
7. RCRA CORRACTS TSD Facilities	1 mile	No	1
8. RCRA Generators	Site & Adjoining	No	1
9. Federal Institutional/Engineering Controls	Site Only	No	Not Applicable
10. State/Tribal Equivalent NPL Sites	1 mile	No	1
11. Lists of state and tribal hazardous waste facilities[2]	0.5 miles	No	3
12. State/Tribal Registered Storage Tanks	Site & Adjoining	No	7
13. State/Tribal Landfills and Solid Waste Disposal Sites	0.5 miles	No	8
14. State/Tribal Leaking Storage Tanks	0.5 miles	No	65
15. State/Tribal Institutional Controls/Engineering Controls	Site Only	No	Not Applicable
16. State/Tribal Voluntary Cleanup Sites	0.5 miles	No	22
17. State/Tribal Brownfield Sites	0.5 miles	No	36
18. Orphan Site List[3]	Site & Adjoining	No	0

Notes:

1. *Some sites may be included on multiple databases.*
2. *Formerly the CERCLIS database.*
3. *Haley & Aldrich of New York also searched the Orphan Site List provided in the database report for the subject property and sites adjoining the subject property. Orphan sites are those that, due to incorrect or incomplete addresses, could not be mapped.*

[2] Examples of electronic database services are EDR/Lightbox and ERIS.

5.2 ADDITIONAL ENVIRONMENTAL RECORDS OR FILE REVIEW

To supplement the environmental record search, we contacted the following state and local government agencies and searched applicable online databases. If copies of the documents reviewed were obtained, pertinent material is included in Appendix C. Relevant information obtained is included in the appropriate sections of the report and/or discussed in Section 5.3. Adjacent properties were also included in requests for additional information if a significant incident or release was identified. Those adjacent properties reviewed for this assessment include:

Agency	Request Sent or Files Searched		Files Exist and are Available for Review	Files Reviewed
	Subject Property	Adjoining Properties		
NYSDEC[1,2]	Yes	No	No Response Yet	Yes (online)
New York State Department of Finance City Registry[3]	Yes	No	Yes	Yes (online)
New York City Department of Buildings (NYCDOB)[4]	Yes	No	Yes	Yes (online)
New York State Department of Health (NYSDOH)[1,5]	Yes	No	No Response Yet	N/A
Fire Department of New York (FDNY)[6]	Yes	No	No	N/A
NYCDEP[1,7]	Yes	No	No Response Yet	N/A
New York City Office of Environmental Remediation (NYCOER)[8]	Yes	No	No	N/A

Notes:

1. *To date, no responses have been received from the Freedom of Information Act (FOIA) requests noted above. Based on the information obtained through our review of other records, it does not appear that responses to the FOIA requests should affect our conclusions regarding RECs on the subject property. However, when a response is received, it will be forwarded to 255 261 Douglas Street LLC and if it affects our conclusions regarding the subject property, 255 261 Douglas Street LLC will be informed.*
2. *The NYSDEC maintains information regarding spills, Petroleum Bulk Storage (PBS), including USTs and aboveground storage tanks (ASTs), and investigations/remediations overseen by New York State regulatory programs. The PBS database listing and spill cases for the subject property were reviewed in the online database. A response has not yet been received from NYSDEC.*
3. *The New York State Department of Finance City Registry maintains information regarding property transactions, including deeds, leases, and mortgage documents. Records were reviewed in the online database.*
4. *The NYCDOB maintains information regarding violations, complaints, Certificates of Occupancy, elevator records, asbestos assessments, and permits. Records were reviewed in the online database, and six Certificates of Occupancy were found for the subject property.*
5. *The NYSDOH maintains information regarding environmental concerns for public health. A response has not yet been received from the NYSDOH.*
6. *The FDNY maintains information regarding USTs and emergencies/fire episodes. A response has been received from the FDNY; the FDNY no longer carries out FOIL request searches*
7. *The NYCDEP maintains information regarding wastewater discharge and boilers. A response has not yet been received from the NYCDEP.*
8. *The NYCOER maintains information regarding investigations/remediations, manages the New York City Voluntary Cleanup Program (VCP), and assists with guidance through all the City Environmental Quality Review (CEQR) requirements.*

5.3 DETAILED DESCRIPTION OF RELEVANT INFORMATION

5.3.1 Subject Property

Based on the review of historical and regulatory records, the subject property is listed in the NYC Land Use database, categorized as an industrial and manufacturing facility. The subject property is listed in the E-Designation database with an environmental E-Designation (E-601) for Air Quality, with limited exhaust ventilation, and air conditioning (HVAC) fuel limited to natural gas, and for Hazardous Materials, requiring Phase I and Phase II testing protocols. The designation also includes Window Wall Attenuation and alternate ventilation requirements (CEQR No. 19DCP157K).

Listing	Description	Potential Impact
NYC Land Use E-Designation	The subject property is listed in the NYC Land Use database for use as an industrial and manufacturing building. The subject property has been assigned an environmental E-Designation (E-601) for Air Quality- HVAC fuel limited natural gas with low Nox only, exhaust stack location limitations, and hazardous materials Phase I and Phase II Testing Protocol; Window Wall Attenuation and alternate ventilation (CEQR No. 19DCP157K). Satisfaction of the E-Designation requirements is subject to review and approval of the NYCOER prior to redevelopment.	A listing in this database does not necessarily indicate an environmental concern; however, satisfaction of the E-Designation requirements is subject to review and approval by the NYCOER prior to redevelopment.

5.3.2 Nearby Sites

Several sites were listed in the database report within the applicable search radii or identified in regulatory records reviews. Due to their location with respect to the subject property (on the opposite side of a hydrogeologic barrier, distance from the site, location of the site relative to inferred groundwater flow, subsurface utilities and building levels, etc.), or their status (closed-out release, etc.), several of the sites are not likely to adversely affect the subject property and are not discussed herein. Only those sites adjacent to the subject property and sites with a potential to have impacted the subject property are discussed below. The complete database report and relevant records review information is included in Appendix C.

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
251 Douglass Street (Approximately 9 ft west, west adjacent)	Spills PFAS BROWNFIELDS UST RCRA- LQG E-Manifest	Spill No. 2405439 was reported to NYSDEC on September 11, 2024, due to the release of an unknown amount of petroleum caused by two leaking 550-gallon USTs. The spill was closed on an unreported date. Spill No. 2307767 was reported to NYSDEC on December 12, 2021, due to the release of 10 gallons of petroleum caused by a leaking UST. The spill was closed on an unreported date. Spill No. 2406677 was reported to NYSDEC on October 25, 2024, due to the release of 20 gallons of unknown petroleum caused by a	Since the Site is adjoining the subject property and residual impacts may remain in soil, groundwater, and soil vapor this is considered to potentially adversely impact subsurface conditions at the subject property and is considered a REC.

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
		leaking 10,000-gallon UST. The spill was closed on October 20, 2025. This site was listed in the PFAS database associated with the Brownfields listing. Primary contaminants of concern were related to coal tar GCM which includes VOCs, SVOCs and metals in soil; coal tar NAPL, VOCs, SVOCs and metals in groundwater; and VOCs in soil vapor. Remedial actions are complete and successfully achieved soil cleanup objectives for restricted residential use. The property is listed in the Brownfield Cleanup Program (BCP) database and remedial actions are complete. Measures are in place to prevent people from coming in contact with remaining contamination in soil, groundwater, and soil vapor. This site is listed in the UST database under CBS ID 2-612275. The CBS ID is associated with four closed USTs, including: • Closed 10,000-gallon UST that was installed on March 1, 1955, and closed on October 26, 2024; • Closed 5,000-gallon UST that was installed on March 1, 1955, and closed on November 1, 2024; • Closed 550-gallon UST that was installed on January 1, 1980, and closed on December 21, 2023; • Closed 1,080-gallon UST that was installed on January 1, 1980, and closed on November 27, 2023. Gowanus Douglass Street LLC is listed in the RCRA database as a Large Quantity Generator under USEPA ID: NYR000262063 for the production of waste containing benzene. No violations are associated with this listing. Gowanus Douglass Street LLC is listed in the E Manifest database under USEPA ID: NYR000262063 for the transportation of 2,100 pounds (lbs) of hazardous waste containing benzene on January 3, 2024.	
Con Edison Service Box: 2 265 Douglass Street	RCRA NonGen Manifest	The service box is listed in the RCRA database as a Non-Generator/No Longer Regulated facility with Con Edison as the handler under	Since there are no violations associated with these listings,

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
(Approximately 25 ft east, east adjacent)		USEPA ID: NYP004341855. The property was also historically listed as a Very Small Quantity in August 2013. As of September 2013, the listing is identified as "not a generator, verified." No violations are associated with this listing. The Con Edison service box is listed in the Manifest database under USEPA ID: NYP004341855 for the transportation of 50 gallons of hazardous waste containing lead from this service box on August 5, 2013.	they are not anticipated to adversely affect the subject property.
267 Douglass Street (Approximately 50 ft east, east adjacent)	UST UST Finder LTANKS	This property is listed in the UST and UST Finder databases under PBS ID 2-070114 as an inactive petroleum storage facility (D Gaver & Sons Inc.). The PBS ID is associated with one 7,000-gallon capacity UST closed on April 1, 1998. D Gaver & Sons Inc. is listed in the LTanks database for test tank failure with Spill No. 8800904. The spill date was April 28, 1988, and led to the release of 1 gallon of petroleum. The spill was closed on October 2, 1992.	Since this spill case reported release of 1 gallon of petroleum and has achieved regulatory closure, this listing is not anticipated to adversely affect the subject property.
Douglass Street (Approximately 26 ft south, south adjacent)	Spills	Spill No. 0503531 was reported to NYSDEC on June 23, 2005, due to the release of unknown petroleum causing a sheen on surface water. The spill was closed on July 13, 2005. Spill No. 0307793 was reported to NYSDEC on October 23, 2003, due to a call concerning an abandoned tanker truck holding #4 fuel oil. The spill was closed on November 13, 2003.	Since these spill cases have achieved regulatory closure and the Site is located cross gradient to the subject property, the listings are not anticipated to adversely affect the subject property.
L.C.R. Trucking LLC 241 Douglass Street (Approximately 55 ft west, west adjacent)	UST Finder	This property is listed in the UST Finder database under facility ID: NY498587 as an inactive petroleum storage facility (L.C.R. Trucking LLC). The facility ID is associated with one 10,000-gallon UST and one 5,0000-gallon UST installed on March 1, 1995, and closed on an unreported date.	Since there are no reported releases associated with the UST listing and the Site is located down gradient to the subject property, this is not anticipated to adversely affect the subject property.
X 5 MOBIL 264 Butler Street	EDR Hist Auto	The property is listed as a historic service station under the name X 5 MOBIL. This listing	Due to the lack of violations or

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
(Approximately 46 ft north, north adjacent)		provides the years of service for the service station as being from 2008 to 2013. The database does not provide detailed operational history, total years of activity, or specific materials handled.	documented releases associated with this listing and the Site is located cross gradient to the subject property, it is not anticipated to adversely affect the subject property.
Con Edison 262 Butler Street (Approximately 46 ft north, north adjacent)	E Manifest	Con Edison is listed in the E Manifest database under USEPA ID: NYR000114579 for the transportation of 1,500 lbs. of hazardous waste on July 20, 2022.	A listing on this database by itself does not necessarily indicate an adverse affect on the subject property.
260 Butler Street (Approximately 48 ft north, north adjacent)	Spills	Spill No. 1216855 was reported to NYSDEC on March 30, 2013, due to a truck spill of #2 fuel oil onto the street. The spill was closed on April 1, 2013.	Since this spill case has achieved regulatory closure and the Site is located cross gradient to the subject property, this listing is not anticipated to adversely affect the subject property.
Petroleum Tank Cleaners LTD. 236 Butler Street (Approximately 209 ft northwest)	UST UST Finder AST Spills VCP NYC OER RCRA NonGen Manifest	Petroleum Tank Cleaners LTD. is listed in the UST, and UST Finder databases under PBS facility ID: 2-399760 for four closed USTs, including: • Closed 3,000-gallon UST that was installed on December 1, 1984, and closed on July 1, 2013; • Closed 10,000-gallon UST that was installed on November 16, 1984, and closed on January 8, 2014; • Closed 10,000-gallon UST that was installed on November 16, 1984, and closed on January 9, 2014; • Closed 20,000-gallon UST that was installed on November 16, 1984, and closed on an unreported. date. Petroleum Tank Cleaners LTD. is listed in the AST databases under PBS facility ID: 2-399760 for two closed ASTs, including: • Closed 7,000-gallon UST that was installed on December 1, 1985, and closed on December 9, 2015;	Due to the distance from the subject property, location cross gradient from the subject property, and since the spill cases achieved regulatory closure, these listings are not anticipated to adversely affect the subject property.

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
		• Closed 1,080-gallon UST that was installed on January 1, 1975, and closed on May 10, 2015; • Closed 275-gallon UST that was installed on March 20, 2006, and closed on February 12, 2015; • Closed 275-gallon UST that was installed on April 13, 2011, and closed on November 17, 2017; • Closed 275-gallon UST that was installed on April 13, 2011, and closed on November 17, 2017. Spill No. 1204042 was reported to NYSDEC on July 24, 2012, due to housekeeping causing the release of an unknown amount of petroleum. The spill was cleaned and closed on July 25, 2012. Spill No. 1112454 was reported to NYSDEC on November 1, 2011, due to leaking USTs causing the release of waste oil onto surface water and soil. The spill was cleaned and closed on August 10, 2016. Spill No. 0806428 was reported to NYSDEC on September 9, 2006, due to a broken drum causing the release of an unknown amount of petroleum to run into the sewer. The sewer was pumped, and the spill closed on September 16, 2008. Spill No. 1403412 was reported to NYSDEC on June 30, 2014, due to improper storage of petroleum causing the release of an unknown amount of petroleum. The spill was cleaned and closed on July 11, 2014. Spill No. 1216856 was reported to NYSDEC on March 30, 2013, due to equipment failure on a tank truck causing the release of 200 gallons of petroleum into soil and sewer drains. The spill was cleaned and closed on July 17, 2013. Spill No. 1403303 was reported to NYSDEC on May 21, 2014, due to the deliberate discharge of petroleum into the soil causing the release of an unknown amount of petroleum into soil across the site. The spill was cleaned and closed on July 11, 2014.	

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
		Petroleum Tank Cleaners LTD. is listed in the NYCOER VCP under Site No. 18TMP0853K,19CVCP007K,22EH-N270K. The site is at the Site Management Phase. The site is listed in the RCRA database as a Non-Generator/No Longer Regulated facility with Petroleum Tank Cleaners LTD. as the handler under USEPA ID: NYD020585733. No violations are associated with this listing. Petroleum Tank Cleaners LTD. is listed in the Manifest database under USEPA ID: NYD020585733 for the transportation of 3,500 lbs. of hazardous waste from this site on September 26, 1988.	
Con Edison Douglass Street & 3rd Ave (Approximately 226 ft southeast)	Manifest	Con Edison is listed in the Manifest database under USEPA ID: NYP004916725 for generating 1,200 lbs. of hazardous waste on February 22, 2017.	A listing on this database by itself does not necessarily indicate an adverse affect on the subject property.
Turoff M & Sons Inc. 170 3rd Ave (Approximately 251 ft northeast)	EDR Hist Auto	The property is listed as a historic service station under the name Pace Automotive Center. This listing provides the years of service for the service station as being from 1973 to 1979. The database does not provide detailed operational history, total years of activity, or specific materials handled.	Due to the distance from the subject property, location cross gradient from the subject property and the lack of violations or documented releases associated with this listing, it is not anticipated to adversely affect the subject property.
Con Edison Manhole #2578 Butler Street & 3rd Ave (Approximately 255 ft northeast)	Spills	Spill No. 0600728 was reported to NYSDEC on April 19, 2006, due to a leak from a reservoir tank, causing the release of 26 ounces of dielectric fluid. The spill was closed on May 15, 2006.	Due to the distance from the subject property, location cross gradient from the subject property and since this spill case has achieved regulatory closure, this listing is not anticipated to adversely affect the subject property.

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
CITGO (Approximately 272 ft northeast)	LTANKS	CITGO NY is listed in the LTanks database for a test tank failure with Spill No. 8907825. The spill date was November 6, 1989, and led to the release of an unknown amount of gasoline. The spill was closed on November 8, 1989.	Due to the distance from the subject property, location cross gradient from the subject property and since this spill case has achieved regulatory closure, this listing is not anticipated to adversely affect the subject property.

5.4 VAPOR MIGRATION

The ASTM E1527-21 Standard states that "for the purposes of this practice, “migrate” and “migration” refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." Thus, this section specifies whether or not we perceive a risk of vapor migration to the subject property.

To assess a vapor migration risk, Haley & Aldrich of New York conducted a detailed review and analysis of the site-specific environmental database report and/or other reasonably ascertainable records to assess whether:

1. Off-site properties have documented chlorinated volatile organic compound (VOC) contamination located, specifically, the edge of the contamination plume, within 100 feet of the subject property boundary; or
2. Off-site properties have a documented volatile petroleum hydrocarbon (VPH) contamination plume within 30 feet of the subject property boundary.

Based on our records review, we have identified and assessed the following potential sources for vapor migration:

Multiple spill incidents, underground storage tanks (USTs), and RCRA generator database listings have been documented at properties adjacent to the subject property. In addition, unreported or undocumented releases at the subject property, as well as potential releases migrating from adjacent properties, may have adversely impacted subsurface vapor conditions at the site. Specifically, the western adjacent property, identified as Block 412, Lot 50, is listed in the Brownfield database due to several historical industrial operations that resulted in subsurface contamination.

Historical operations at the west adjacent property included Bradley & Son Stone Works, Scranton & Lehigh Coal Co., and a private garage. The property was subsequently accepted into the BCP in October 2023, and remedial activities successfully achieved soil cleanup objectives for restricted residential use.

Prior to remediation, the primary contaminants of concern included coal tar grossly contaminated material (GCM), semi-volatile organic compounds (SVOCs), and metals in soil; coal tar non-aqueous phase liquid (NAPL), VOCs, SVOCs, and metals in groundwater; and VOCs in soil vapor. Residual

contamination in soil, groundwater, and soil vapor continues to be managed under a Site Management Plan. Given the remaining impacts to soil, groundwater, and soil vapor, the western adjacent property is considered a potential source that may have adversely affected subsurface vapor conditions at the subject property.

6. Subject Property Reconnaissance and Key Personnel Interview(s)

A site visit to observe subject property conditions was conducted by Ali Reach of Haley & Aldrich of New York on Monday, September 15, 2025. Access to the subject property was provided by Anthony Borruso, former owner and operator of the subject property.

Haley & Aldrich of New York personnel observed accessible interior areas of the subject property building(s), including common areas, basement areas, mechanical spaces, and tenant spaces. Haley & Aldrich of New York also observed the exterior portions of the subject property, including the property boundaries, and observed adjoining property conditions from the subject property boundaries and/or public thoroughfares. No weather-related conditions or other conditions that would limit our ability to observe the subject property or adjoining properties occurred during our site visit. The northeastern portion of the cellar on lot 48 appeared to have been previously renovated and blocked from access. However, based on data collected from other sources, this potential data gap is not expected to adversely impact the results of this assessment.

An interview with the key site manager, Anthony Borrusso, was performed in conjunction with the site visit. Per the ASTM Standard, past owners, operators, and occupants of the subject property who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. Haley & Aldrich of New York was not provided with contact information to interview past owners and/or operators at the subject property. Based upon historical data collected from other sources, this potential data gap is not expected to adversely impact the results of this assessment.

The findings of the site visit and interviews are discussed below. Subject property photographs are included in Appendix D.

ASTM E1527-21 Standard Section 10.8 requires that, prior to the site visit**,** the current subject property owner or key site manager and user, if different from the current owner or key site manager, be asked if there are any helpful documents that can be made available for review. Documents were not provided.

6.1 CURRENT USE OF THE SUBJECT PROPERTY

The subject property is currently developed with a vacant two-story building and a one-story industrial building currently operated as a rental rehearsal studio space for musicians as Band Spaces NYC.

6.2 GENERAL DESCRIPTION OF STRUCTURES

The subject property is currently developed with a vacant two-story brick building and partial cellar on Lot 48, and a one-story brick industrial building. The buildings encompass the entirety of the lot with the exception of a narrow concrete alleyway separating Lots 45 and 48. A two-story former woodworking shop with a partial cellar is present on Lot 48 of the subject property. A one-story former industrial building, currently fitted with roughly 90 individual storage spaces is present on Lot 45 of the subject property. No other buildings or temporary structures were observed on the subject property.

6.3 USE, STORAGE, AND DISPOSAL OF PETROLEUM PRODUCTS AND HAZARDOUS MATERIALS

Petroleum products and/or hazardous materials were observed or reported to be used, stored, and/or disposed of at the subject property as described below.

The following bulk storage tanks were observed or reported to be associated with the subject property during the site visit:

Tank #	AST/ UST	Contents/ Capacity	Location[1]	Use	Closure Status
001	AST	Gasoline/1,080-gallons	Northwest corner of the cellar floor on Lot 48 of the subject property.	Bulk storage of gasoline	Unregulated/active
Notes: 1. *Approximate tank location is shown on Figure 2.*					

The AST was observed to be encased in concrete, measuring 18'2" long by 3'6" wide, in the northwestern corner of the cellar on Lot 48 of the subject property. No staining or odor was observed surrounding the AST secondary containment. A fill port was observed along Douglass Street on Lot 48 of the subject property.

6.4 OTHER SUBJECT PROPERTY OBSERVATIONS

The table below summarizes items that were observed and/or reported at the subject property during the site visit other than those items related to use, storage, and/or disposal of petroleum or hazardous materials (described in Section 6.3 above). If items were observed or reported, they are further described either in the table or below.

Description	Observed or Reported at Time of Site Visit	Observations/Comments
Potable Water Supply	Yes	New York City Water
Nearest Drinking Water Source	No	
Sewage Disposal System	No	
Septic System	No	
Unidentified Storage Containers	Yes	Multiple unlabeled 55-gallon steel drums containing general refuse were located throughout the cellar area on Lot 48 of the subject property.
Wastewater Discharge	No	
Stormwater Discharge	No	
Odors	No	
PCBs Associated with Electrical or Hydraulic Equipment	No	
Elevators (Traction or Hydraulic)	No	
Vehicle Maintenance Lifts	No	
Emergency Generators	No	

Description	Observed or Reported at Time of Site Visit	Observations/Comments
Sprinkler System Pumps	Yes	
Heating System	Yes	Heating, ventilation, and air conditioning (HVAC) system on the roof
Cooling System	Yes	HVAC system on the roof
Stains or Corrosion on Floors, Walls, or Ceilings	No	
Floor Drains	Yes	Located within the alleyway on Lot 45
Sumps	Yes	One sump was observed in the cellar on Lot 48 of the subject property.
Catch Basins	No	
Pits, Ponds, Lagoons, and Pools of Liquid	No	
Stained Soil or Pavement	No	
Stressed Vegetation	No	
Solid Waste and Evidence of Waste Filling	No	
Dry Wells	No	
Monitoring Wells	No	
Water Supply Wells	No	
Irrigation Wells	No	
Injection Wells	No	
Abandoned Wells	No	

Notes:

1. *N/A items are those that were not observed or reported and/or not anticipated to be present given the nature of the subject property (e.g., building features not present on an undeveloped property).*

6.5 ADJOINING PROPERTY OBSERVATIONS

The subject property is bounded to the north by warehouses occupied by a beverage and grocery distributor and a furnishings/display warehouse distributor, followed by Butler Street; to the east by a four-story commercial building occupied by a weightlifting gym and a three-story commercial and office building occupied by an emergency animal hospital; to the south by Douglass Street, followed by Thomas Greene Playground; and to the west by a fifteen-story mixed-use residential and commercial building under construction, followed by Nevins Street.

6.6 USER RESPONSIBILITIES

The AAI Rule requires that the user of the report consider the following:

- Whether the user has specialized knowledge about previous ownership or uses of the subject property that may be material to identifying RECs;
- Whether the user has determined that the subject property's title contains environmental liens or other information related to the environmental condition of the property, including engineering and institutional controls and Activity and Use Limitations (AULs), as defined by ASTM;

- Whether the user is aware of commonly known or reasonably ascertainable information about the subject property including whether or not the presence of contamination is likely on the subject property and to what degree it can be detected; and
- Whether the user has prior knowledge that the price of the subject property has been reduced for environmentally-related reasons.

While such information is not required to be provided by the Environmental Professional(s), the information can assist the Environmental Professional in identifying RECs. The AAI Final Rule (Code of Federal Regulations Title 40 [40 CFR] Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for one of the Landowner Liability Protections (LLPs) to CERCLA liability.

A User Questionnaire was provided by Haley & Aldrich of New York, but a completed version was not received. The absence of a completed user questionnaire is not considered significant and does not alter our conclusions.

7. Findings and Opinions

7.1 SIGNIFICANT DATA GAPS

Our ability to identify and evaluate RECs at the subject property is conditioned upon significant data gaps identified as part of this Phase I. The ASTM E1527-21 Standard defines a significant data gap as a data gap that affects the ability of the Environmental Professional to identify a REC.

No significant data gaps were identified during the performance of this Phase I. Thus, it is our opinion that sufficient information was obtained to identify subject property conditions indicative of releases or threatened releases of hazardous substances and petroleum hydrocarbons. Our opinion is limited by the conditions prevailing at the time our work is performed and the applicable regulatory requirements in effect.

7.2 RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a REC as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Our opinion regarding a REC's potential impact on the subject property is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intended use for the subject property.

The following RECs listed below were identified in connection with the subject property.

REC #1: Historical Use of Subject Property

Historical uses of the subject property included operations by J.S. Loomis Co. Lumber Yard in the 1900s, as well as operations associated with a paint house and a glass storage building. Additional historic uses included operations by Bay Ridge Cooperage Co. from the 1920s through 1950, wood box manufacturing, operations by Douglass Woodworking Corp. from 1945 to 1949, and operations by Quality Woodworking Corp. from 1952 to 2022. These historic uses are considered a REC, as potential or undocumented releases of petroleum products, solvents, paints, wood treatment compounds, and other hazardous materials may have adversely affected soil, groundwater, and/or soil vapor at the subject property.

REC #2: Documented Subsurface Contamination at the Adjacent Property

The west adjacent property, located at Block 412, Lot 50, was identified in the Brownfield database for several historical industrial uses that resulted in subsurface contamination. Historical operations at the west adjacent property included Bradley & Son Stone Works, Scranton & Lehigh Coal Co., and a private

garage. This site was accepted into the BCP, with remedial activities commencing in October 2023 and concluding circa December 2025.

Prior to remediation, contaminants of concern included coal tar grossly contaminated material (GCM), semi-volatile organic compounds (SVOCs), and metals in soil; coal tar non-aqueous phase liquid (NAPL), VOCs, SVOCs, and metals in groundwater; and VOCs in soil vapor.

Remedial activities included the removal of five underground storage tanks (USTs), contaminated soil disposal, and DNAPL recovery. Post-remedial sampling results indicated that remaining contamination includes SVOCs, and metals in soil, VOCs and SVOCs in groundwater, and VOCs in soil vapor. The property is currently being managed under a Site Management Plan (SMP) with engineering and institutional controls with requirements for controlling vapor intrusion. As this property contains residual impacts in soil, groundwater, and soil vapor, this adjacent property is considered a potential source that may have adversely impacted subsurface conditions at the subject property.

REC #3: Historical and Current Uses of Surrounding Properties

Properties surrounding the subject property were historically utilized for various commercial, industrial, and manufacturing operations, including stone works, clothing manufacturing, wood box manufacturing, supply manufacturing, coal company operations, truck garages, auto repair shops, button manufacturing, bluestone works, the Brooklyn Union Gas Company Fulton Municipal Branch, marble works operations, sash, door, and blind manufacturing, and coal yard operations. Several of these surrounding properties are listed in the Resource Conservation and Recovery Act (RCRA) database as generators of hazardous waste and have also been identified in spill incident databases.

The historical uses of these surrounding properties are considered a REC, as potential or undocumented releases from these adjacent and upgradient properties may have adversely impacted soil, groundwater, and/or soil vapor, with the potential to migrate onto the subject property.

7.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a CREC as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

CRECs were not identified in connection with the subject property.

7.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines an HREC as “a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. A historical recognized environmental condition is not a recognized environmental condition.

HRECs were not identified in connection with the subject property.

7.5 DE MINIMIS CONDITIONS

The ASTM E1527-21 Standard defines a *de minimis* condition as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. The ASTM E1527-21 Standard notes that conditions determined to be *de minimis* are not recognized environmental conditions.

De minimis conditions were not identified in connection with the subject property.

7.6 OTHER FINDINGS

The ASTM does not define the term "other finding"; however, Haley & Aldrich of New York utilizes the category to indicate conditions of potential risk that are not clearly defined in the ASTM Standard. While not considered RECs, Haley & Aldrich of New York identified the following Other Findings:

Other Finding #1: New York City E-Designation

The subject property was identified as an E-Designation site by the NYCOER. The property was assigned E-601 for Air Quality- which requires that HVAC fuel limited natural gas with low NoX only, exhaust stack location limitations, and hazardous materials Phase I and Phase II Testing Protocol. The designation also includes Window Wall Attenuation and alternate ventilation requirements (CEQR No. 19DCP157K). The E-Designation program requires satisfaction of the procedures outlined for hazardous materials potentially present at the subject property.

Other Finding #2: Urban Fill

The overburden on the subject property is classified as Urban Land, which refers to soils that have been altered by human activities, thus making them unidentifiable. Typically, these soils have been mixed with other materials, such as brick and concrete (urban fill).

Other Finding #3: Above Ground Storage Tank (AST)

A 1,080-gallon gasoline AST was observed in the northwest portion of the cellar on Lot 48. The AST was observed to be encased in concrete and use of the tank was confirmed to be for the building's boiler as per the key site manager. The AST was not identified as registered on the NYSDEC petroleum bulk storage database.

8. Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527 of 255-261 Douglass Street, the subject property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of RECs in connection with the subject property, except for the following:

- **REC #1:** Historical Use of Subject Property
- **REC #2:** Documented Subsurface Contamination at West Adjacent Property
- **REC #3:** Historical and Current Uses of Surrounding Properties
- **Other Finding #1:** New York City E-Designation
- **Other Finding #2:** Urban Fill
- **Other Finding #3:** Above Ground Storage Tank (AST)

9. Environmental Professional Certification

The undersigned declare the following:

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312; and

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

James M. Bellew
Principal

10. Credentials

This Phase I report was prepared by James Bellew, who served as the Environmental Professional(s) for this project. Qualification information for the project personnel is provided below.

James M. Bellew, is a Principal at Haley & Aldrich of New York with more than 20 years of experience conducting Phase I and Phase II Environmental Site Assessments.

11. Glossary and Other Descriptions

11.1 GLOSSARY

All Appropriate Inquiry (AAI) — that inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in CERCLA, 42 U.S.C. §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C. §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

Business Environmental Risk — a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

Controlled Recognized Environmental Condition (CREC) — a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Significant Data Gap — a data gap that affects the ability of the Environmental Professional to identify a recognized environmental condition.

De Minimis Conditions — a condition related to a release that generally does not present those conditions which "do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." The ASTM E1527-21 Standard notes that conditions determined to be *de minimis* are not recognized environmental conditions.

Environmental Professional — a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b).

Historical Recognized Environmental Condition (HREC) — a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. A historical recognized environmental condition is not a recognized environmental condition.

Key Site Manager — the person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property.

Material Threat — an obvious threat which is likely to lead to a release and that, in the opinion of the Environmental Professional, would likely result in impact to public health or the environment.

Orphan Site — (not ASTM E1527-21 definition) — sites that could not be mapped due to poor or inadequate address information.

Recognized Environmental Condition (REC) — (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

11.2 DESCRIPTIONS OF DATABASES SEARCHED

Numerous regulatory databases were searched during this Phase I. Each database reviewed is described in the database report presented in Appendix C. Those databases required by the E1527-21 Standard are identified below.

1. **NPL Sites:** The National Priorities List (NPL) is a list of contaminated sites that are considered the highest priority for cleanup by the U.S. Environmental Protection Agency (USEPA).
2. **Delisted NPL Sites:** The Delisted NPL is a list of formal NPL sites formerly considered the highest priority for cleanup by the USEPA that met the criteria of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) for deletion from the NPL because a no further response was appropriate.
3. **CERCLIS Sites:** The Comprehensive Environmental Response, Compensation, and Liability Act Information System (CERCLIS) list identifies sites which are suspected to have contamination and require additional investigation to assess whether they should be considered for inclusion on the NPL.
4. **CERCLIS-NFRAP Sites:** CERCLIS-NFRAP status indicates that a site was once on the CERCLIS List but has No Further Response Actions Planned (NFRAP). Sites on the CERCLIS-NFRAP List were removed from the CERCLIS List in February 1995 because, after an initial investigation was performed, no contamination was found, contamination was removed quickly, or the contamination was not significant enough to warrant NPL status.
5. **Federal ERNS:** The Federal Emergency Response Notification System (ERNS) list tracks information on reported releases of oil and hazardous materials.
6. **RCRA non-CORRACTS TSD facilities:** The Resource Conservation and Recovery Act (RCRA) non-CORRACTS TSD Facilities List tracks facilities which treat, store, or dispose of hazardous waste and are not associated with corrective action activity.
7. **RCRA CORRACTS TSD facilities:** The RCRA CORRACTS TSD Facilities list catalogues facilities that treat, store, or dispose of hazardous waste and have been associated with corrective action activity.
8. **RCRA Generators:** The RCRA Generator list is maintained by the USEPA to track facilities that generate hazardous waste.
9. **Federal Institutional Controls/Engineering Controls:** The Federal Institutional Control list and Engineering Control list are maintained by the USEPA. Some Institutional Control and Engineering Control information may not be made publicly available and therefore will not be included on this registry.

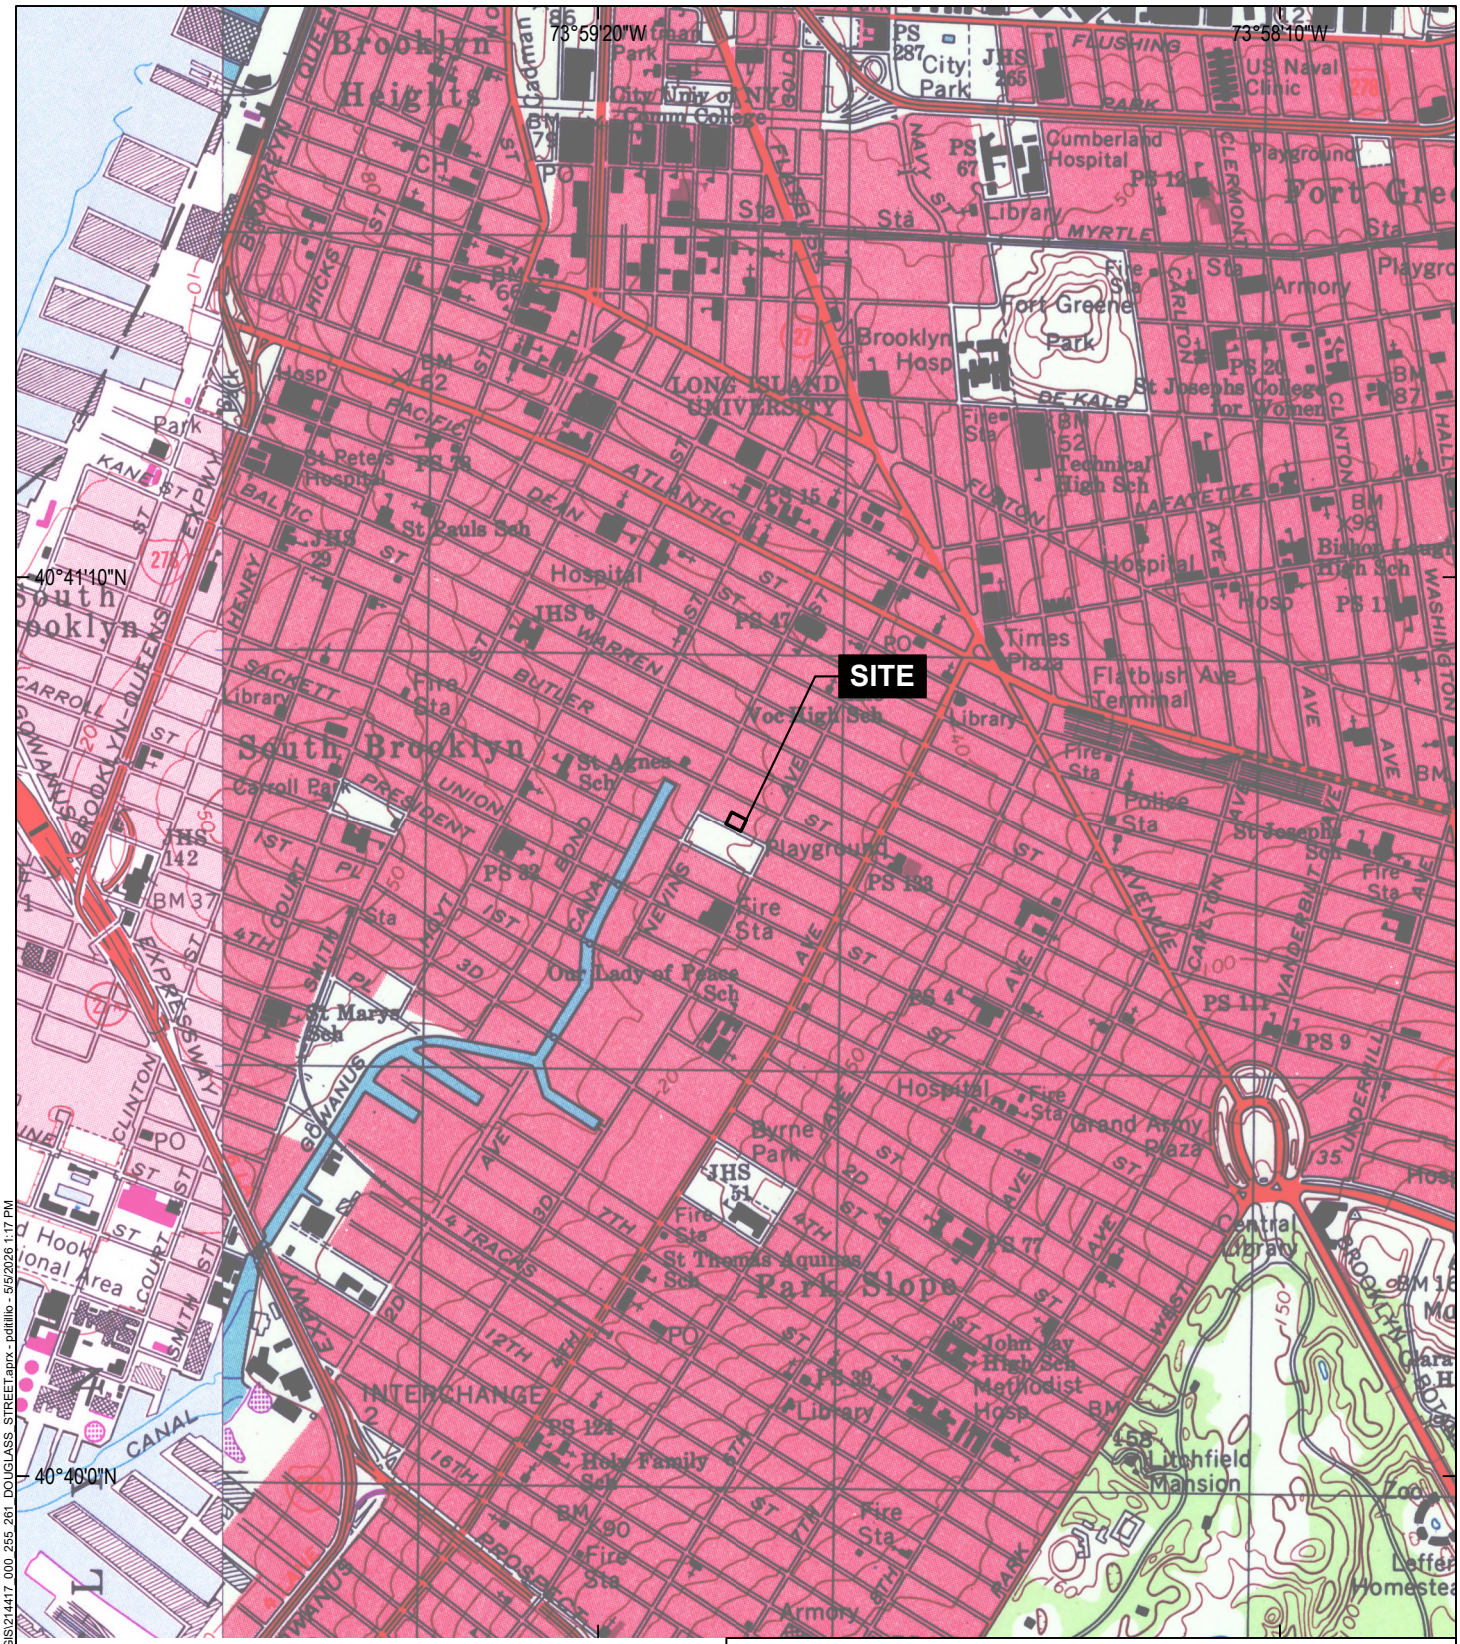
10. **State and Tribal Equivalent NPL/CERCLIS Sites:** The ASTM E1527-21 Standard requires searching "State and Tribal Equivalent NPL Sites." In New York, the equivalent NPL is the Inactive Hazardous Waste Disposal Sites, which is maintained by the New York State Department of Environmental Conservation (NYSDEC).

11. **State and Tribal Registered Storage Tanks:** The NYSDEC maintains a list of aboveground and underground storage tanks registered with the NYSDEC PBS Program.

12. **State and Tribal Landfills and Solid Waste Disposal Sites:** The NYSDEC maintains a list of regulated waste disposal sites.

13. **State and Tribal Leaking Storage Tanks:** The NYSDEC maintains a list of Leaking Storage Tanks (LUST/LAST). The LUST/LAST lists are a listing of release sites that have an Underground or Aboveground Storage Tank listed as the source.

14. **State and Tribal Institutional Controls/Engineering Controls:** The NYSDEC maintains a list of sites with Institutional or Engineering controls in place.



15. **State and Tribal Voluntary Cleanup Sites:** The NYSDEC maintains a list of Voluntary Cleanup sites.

16. **State and Tribal Brownfield Sites:** The NYSDEC maintains a list of Brownfield sites, which includes properties where redevelopment or reuse may be compromised by the presence or presumed presence of hazardous materials or petroleum.

APPENDIX A
Limitations

APPENDIX A

Haley & Aldrich of New York Limitations

Environmental site assessment (Phase I Environmental Site Assessment) reports prepared by Haley & Aldrich of New York are for the sole and exclusive use of its Client. Haley & Aldrich of New York represents that the Phase I Environmental Site Assessment was prepared in accordance with the ASTM International (ASTM) Standard E1527-21 entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM E1527-21). The findings, opinions, conclusions, and information contained in the ASTM E1527-21 Phase I Environmental Site Assessment are limited to, and solely based upon, information reasonably ascertainable by Haley & Aldrich of New York at the time the ASTM E1527-21 Phase I Environmental Site Assessment was completed.

All users of this E1527-21 Phase I Environmental Site Assessment are bound to the terms and conditions and limitations contained in the accompanying Proposal, Terms and Conditions, and Limitations for this ASTM E1527-21 Phase I Environmental Site Assessment. The findings, opinions, conclusions, and information contained in this report are based solely on the Scope of Services provided pursuant to the Proposal and its attachments and the information reasonably ascertainable by Haley & Aldrich of New York at the time the ASTM E1527-21 Phase I Environmental Site Assessment was completed. Haley & Aldrich of New York has not performed any additional observations, investigations, studies, or other testing not specified in the Scope of Services. Haley & Aldrich of New York shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Scope of Services.

This ASTM E1527-21 Phase I Environmental Site Assessment is prepared for the exclusive use of Haley & Aldrich's client in connection with the subject property for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property. There are no intended beneficiaries other than Haley & Aldrich of New York's client. Haley & Aldrich of New York shall owe no duty whatsoever to any other person or entity by issuing the ASTM E1527-21 Phase I Environmental Site Assessment. Use of this ASTM E1527-21 Phase I Environmental Site Assessment by any person or entity, including by Haley & Aldrich of New York's client, for a purpose other than for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property is expressly prohibited unless such person or entity obtains written authorization from Haley & Aldrich of New York indicating that the ASTM E1527-21 Phase I Environmental Site Assessment is adequate for such other use. Use of this ASTM E1527-21 Phase I Environmental Site Assessment by any person or entity for such other purpose without written authorization by Haley & Aldrich of New York shall be at such person's or entity's sole risk and shall be without legal exposure or liability to Haley & Aldrich of New York.

Haley & Aldrich of New York may authorize third-party reliance on the ASTM E1527-21 Phase I Environmental Site Assessment by providing reliance letters to third party(ies) provided that the third party(ies) agree: (1) to use the ASTM E1527-21 Phase I Environmental Site Assessment only for the purpose of assessing the potential or existing environmental contamination liabilities associated with real property; (2) to be bound by the terms and conditions and limitations contained in the ASTM E1527-21 Phase I Environmental Site Assessment report and the proposal and its Attachments, Terms and Conditions, and Limitations; (3) to accept the form and substance of Haley & Aldrich of New York's reliance letter; and (4) to deliver to Haley & Aldrich of New York a signed copy of a reliance letter by an authorized representative of the relying party, within thirty (30) days after said reliance letter is

provided to the relying party, signifying the relying party's acceptance of the aforementioned conditions. Upon Haley & Aldrich of New York's receipt of the signed reliance letter by the relying party(ies), the relying party(ies) will be authorized to rely on Haley & Aldrich of New York's ASTM E1527-21 Phase I Environmental Site Assessment for the limited purpose of identifying potential or existing environmental contamination liabilities associated with the subject property. The relying party(ies) agree(s) to bind each of its respective successors and assigns to the aforementioned Terms and Conditions.

This ASTM E1527-21 Phase I Environmental Site Assessment reflects subject property conditions observed and described by records available to Haley & Aldrich of New York as of the date of ASTM E1527-21 Phase I Environmental Site Assessment preparation. The passage of time may result in significant changes in subject property conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the ASTM E1527-21 Phase I Environmental Site Assessment. Accordingly, Haley & Aldrich of New York's client and any other party to whom the ASTM E1527-21 Phase I Environmental Site Assessment is provided recognize and agree that Haley & Aldrich of New York shall bear no liability for deviations from observed conditions or available records after the time of ASTM E1527-21 Phase I Environmental Site Assessment preparation. Haley & Aldrich of New York makes no express or implied representation that the information contained in the E1527-21 Phase I Environmental Site Assessment has continued viability after 180 days of the ASTM E1527-21 Phase I Environmental Site Assessment's completion date, and any use or reliance on the ASTM E1527-21 Phase I Environmental Site Assessment after 180 days of the ASTM E1527-21 Phase I Environmental Site Assessment's completion date by Haley & Aldrich of New York's client or any other authorized person or entity will be at that party's sole risk and without liability to Haley & Aldrich of New York.

Notwithstanding anything contained herein, Haley & Aldrich of New York shall not be liable for any claim or damage arising from environmental contamination liabilities that occurred on the subject property after the effective date of the ASTM E1527-21 Phase I Environmental Site Assessment. Likewise, Haley & Aldrich of New York shall not be liable for any existing or future property owner's failure to satisfy any continuing obligation for CERCLA liability protection or under the Federal Environmental Protection Agency's All Appropriate Inquiries rule.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Haley & Aldrich, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.

LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/26/2026 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/26/2026 has revealed that there are 2

SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/26/2026 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 16 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 7 RCRA-VSQG sites within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/30/2025 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/02/2026 has revealed that there are 7 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/09/2025 has revealed that there are 8 NY SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 10/30/2025 has revealed that there are 65 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 37 NY UST sites within approximately 0.25 miles of the target property.

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY MOSF UST site within approximately 0.5 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is

1 NY CBS AST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 22 NY VCP sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there are 91 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 01/30/2026 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

PFAS RCRA MANIFEST: To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

A review of the PFAS RCRA MANIFEST list, as provided by EDR, and dated 12/17/2025 has revealed that there is 1 PFAS RCRA MANIFEST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/17/2025 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 30 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 11 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

NY PFAS: DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

A review of the NY PFAS list, as provided by EDR, has revealed that there are 3 NY PFAS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY MGP: From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

A review of the NY MGP list, as provided by EDR, and dated 11/25/2025 has revealed that there are 5 NY MGP sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 5 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past

sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

SUDANCO GAS STATION	165 3RD AVE	ENE 0 - 1/8 (0.081 mi.)	G115	367

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to

GOWANUS CANAL (Continued) **1010782149**

track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

DEC Memo:	9/11/24-Lin-Active brownfield site. Located two (2) 550 gallon UST sitting on groundwater around 7' bgs. The sheen was seen top of ground water. One of the UST was pulled out and one is still in excavation. Contractor will mobilize to pump out out water and remove the tank. Both USTs had corrosion hole and had water inside the tanks. Marnie Deluke is the DEC PM for this site.
Remarks:	Unknown quantity. Located two 550-gallon USTs with sheen during excavation. Cleanup is pending.

DEC Memo:	10/21/2025: Spill was addressed under remedial action from BCP site no. C224367. Site part of BCP C224367. While excavating, unknown UST found. ABC was hired to remove contents. When tank was removed from ground, staining was visible beneath the tank. Contractor spoke with DEC PM Deluke and was informed to call in spill. Area will be excavated further. Spill assigned to DEC Deluke for follow up and closure.

Site Description:	"Location: The site is situated in an urban area surrounded by primarily industrial properties. The Gowanus Canal, a USEPA National Priorities List (NPL) site, is located approximately 260 feet west of the site and was once a vital cargo transportation hub prior to the mid-20th century. The subject property has a total footprint of approximately 28,500 square feet (0.65 acres). Site Features: Prior to remediation, the main site features were two partial building

251 DOUGLASS STREET (Continued) **S128902247**

foundation from one (1) single-story 10,000 sf vacant warehouse structure on the westernmost portion of the site (formerly identified as Lot 1) and one (1) two-story, 2,500 sf vacant commercial structure (easternmost portion of the site formerly identified as Lot 50) which contains a partial cellar accessible through bilco doors in the sidewalk adjacent to Douglass Street. The buildings were demolished in November of 2022. Current Zoning and Land Use: The site is currently vacant and dominantly zoned M1-4/R7X with the northern portion (former lot 15) zoned M1-4/R6A. The zoning designations are representative of residential zoning. The site, prior to a zoning change that went into effect in November 2021 by the New York City Council, was formerly located within a M1-2 designation. The M1-2 designation is a district characterized by light industrial uses such as woodworking, repair shops, wholesale service and storage facilities. In general, the surrounding parcels were part of the re-zoning and are presently designated as M1-4/R6A and M1-2 to the north, M1-4/R6A and M1-4/R7X to the east, M1-4/R6B to the west with a park to the south. Past Use of the Site: Based on historic Sanborn Fire Insurance Maps, portions of the site were developed prior to 1900. Between 1886 and 1904, the site was occupied by Bradley & Son Stone Works. By 1915, Scranton & Lehigh Coal Co. occupied the western portion (former lot 1) and Thomas Harrington s Sons Co. Contractors occupied the eastern portion (former lots 15, 50 and 51). According to historic building records, the two (2) on-site buildings were constructed in 1931. The 1938 Sanborn Map depicts both buildings as garages, each containing one (1) gasoline tank. In 1950, the western structure (former lot 1) was utilized as a motor freight station, and the eastern structure (former lot 50) was used for office space. From 1969 to 1987, the western structure was used as a private garage and automobile repair facility, while former lots 15 and 51 were used for parking or storage. Site Geology and Hydrogeology: The ground surface at the site slopes slightly to the south toward the intersection of Douglass Street and Nevins Street. The elevation of the property ranges from approximately +15 (NAVD-88) feet in the northeastern portion to +11 (NAVD-88) feet in the southwest. Dpeth to groundwater ranges between 6.81 to 11.21 feet below grade (bgs.). Groundwater flow to the west toward the Gowanus Canal, which is located approximately 260 feet to the west. According to the Federal Emergency Management Agency (FEMA), the site is located within a designated flood plain. A small western portion of the site is located within a Special Flood Hazard Area (SFHA), Zone AE, characterized by having a 1 percent annual chance of flooding, and the remainder of the site is located within a moderate risk floodplain, Zone X, having a 0.2 percent annual chance of flooding. Previous investigations characterized subsurface soil as historic fill primarily containing slag, brick, and gravel in a brown fine to medium grained sand matrix. The fill material was encountered at grade to depths of 4 to 10 feet bgs throughout the majority of the site. The fill material was reportedly underlain by native soil, generally consisting of brown fine to medium sand with gravel, silt and/or clay. Bedrock was not encountered during historic investigations. "

Summary: "Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination."

Summary: "Post-Remediation: Remedial actions have successfully achieved soil

251 DOUGLASS STREET (Continued) **S128902247**

cleanup objectives for restricted residential use. Prior to remediation of the site, the primary contaminants of concern were related to coal tar GCM which includes VOCs, SVOCs and metals in soil; coal tar NAPL, VOCs, SVOCs and metals in groundwater; and VOCs in soil vapor. Residual contamination in the soil and groundwater is being managed under a Site Management Plan. Prior to Completion of Remediation: Nature and Extent of Contamination Documented under the Remedial Investigation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was sampled analyzed for VOCs. Soil - Grossly contaminated material and non-aqueous phase liquid (GCM/NAPL) associated with MGP coal tar contamination from the Former Fulton MGP site has been encountered in on-site borings and delineated across the entire site. Volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals and pesticides were detected above Restricted Residential Soil Cleanup Objectives (RRSCOs) and/or protection of groundwater soil cleanup objective (PGSCOs). VOCs, primarily petroleum/coal tar related, were found in soils across the site including 1,2,4-trimethylbenzene at 1,299 parts-per million (ppm) (RRSCO: 47 ppm & PGSCO: 3.6 ppm), 1,3,5-trimethylbenzene at 130 ppm (RRSCO: 47 ppm & PGSCO: 8.4 ppm), benzene at 850 ppm (RRSCO: 41 ppm & PGSCOs: 1 ppm), ethylbenzene at 1,100 ppm (RRSCO: 4.8 ppm), n-propylbenzene at 37 ppm (PGSCOs: 3.9 ppm), naphthalene at 16,000 ppm (RRSCO: 100 ppm, PGSCO: 12 ppm), toluene at 1,600 ppm (RRSCO: 100 ppm & PGSCO: 0.7 ppm), and total xylenes at 1,500 ppm (RRSCO: 100 ppm & PGSCOs: 1.6 ppm). SVOCs, primarily PAHs (Polycyclic aromatic hydrocarbons), were found in soils across the site including acenaphthene at 890 ppm (RRSCO: 100 ppm & PGSCOs: 98 ppm), acenaphthylene at 680 ppm (RRSCO: 100 ppm & PGSCOs: 107 ppm), benzo(a)anthracene at 200 ppm (RRSCO/PGSCO: 1 ppm), benzo(a)pyrene at 200 ppm (RRSCO: 1 ppm & PGSCOs: 22 ppm), benzo(b)fluoranthene at 140 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), benzo(k)fluoranthene at 43 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), chrysene at 200 ppm (RRSCO & PGSCOs: 1 ppm), dibenz(a,h)anthracene at 15 ppm (RRSCO: 0.33 ppm), fluoranthene at 380 ppm (RRSCO: 100 ppm), naphthalene at 5,100 ppm (RRSCO: 100 ppm & PGSCO: 12 ppm), phenanthrene at 330 ppm (RRSCO: 100 ppm), and pyrene at 600 ppm (RRSCO:100 ppm). Metals were detected in soils above respective cleanup objective, including arsenic at 66.2 ppm (RRSCO/PGSCO: 16 ppm), copper at 3,050 ppm (RRSCO: 270 ppm), Lead at 3,890 ppm (RRSCO: 400 ppm), and mercury at 91.7 ppm (RRSCO: 0.81 ppm). Pesticides including 4,4' -DDD at 9.8 ug/kg, 4,4' -DDE at 14 ug/kg, 4,4' -DDT at 40 ug/kg and dieldrin at 7.3 ug/kg. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were reported at concentrations below soil cleanup guidance values for restricted residential use and protection of groundwater. Groundwater - VOCs, SVOCs and metals were detected in groundwater samples exceeding the NYSDEC Ambient Water Quality Standards (AWQS). VOCs, primarily petroleum/coal tar related, were found in groundwater at the site including 1,2,4-trimethylbenzene at 450 parts-per billion (ppb) (AWQS: 5 ppb), 1,3,5-trimethylbenzene at 620 ppb (AWQS: 5 ppb), 2-Butanone at 1,700 ppb (AWQS: 50 ppb), acetone at 650 ppb (AWQS: 50 ppb), benzene at 20,000 ppb (AWQS: 1 ppb), ethylbenzene at 1,900 ppb (AWQS: 5 ppb), Methyl tert butyl ether at 38 ppb (AWQS: 10 ppb), naphthalene at 12,000 ppb (AWQS: 10 ppb), toluene at 15,000 ppb (AWQS: 5 ppb), xylenes at 4,100 ppb (AWQS: 5 ppb), styrene at 5,000

251 DOUGLASS STREET (Continued) **S128902247**

ppb (AWQS: 5 ppb), trichloroethene at 9.3 ppb (AWQS: 5 ppb), isopropyl benzene at 32 ppb (AWQS: 5 ppb), n-butylbenzene at 14 ppb (AWQS: 5 ppb), n-propylbenzene at 68 ppb (AWQS: 5 ppb), and sec-butylbenzene at 13 ppb (AWQS: 5 ppb). SVOCs, primarily PAHs, were found in groundwater including acenaphthalene at 100 ppb (AWQS: 20 ppb), benzo(a)anthracene at 16 ppb (AWQS: 0.002 ppb), benzo(a)pyrene at 7 ppb (AWQS: 0 ppb), benzo(b)fluoranthene at 11 ppb (AWQS: 0.002 ppb), benzo(k)fluoranthene at 5.3 ppb (AWQS: 0.002 ppb), chrysene at 16 ppb (AWQS: 0.002 ppb), Fluorene at 74 ppb (AWQS: 50 ppb), indeno(1,2,3-cd)pyrene at 5.6 ppb (AWQS: 0.002 ppb), naphthalene at 9,000 ppb (AWQS: 10 ppb), phenanthrene at 130 ppb (AWQS: 20 ppb), and pyrene at 56 (AWQS: 50 ppb). Metals detected in groundwater include arsenic at 36.79 ppb (unfiltered) and 26.8 ppb (dissolved) (AWQS: 25 ppb). Groundwater impacts have the potential to migrate off-site. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were detected above the respective AWQS of 10 ng/L in groundwater at maximum concentrations of 215 ng/L and 44.1 ng/L, respectively. Soil Vapor - Sub slab soil vapor had elevated chlorinated volatile organic compounds (CVOCs) including cis-1,2-dichloroethene at 59 micro-grams per cubic meter (ug/m3), trichloroethene at 78.4 ug/m3, methylene chloride at 130 ug/m3, tetrachloroethene at 685 ug/m3, and vinyl chloride at 92.5 ug/m3. "

BROWNFIELDS:
Name: 251 DOUGLASS STREET
Address: 251 DOUGLASS STREET
City,State,Zip: BROOKLYN, NY 11217
Program: BCP
Site Code: 636256
Acres: 0.654
HW Code: C224367
SWIS: 2401
Town: New York City
Record Added Date: 05/11/2022
Record Updated Date: 12/29/2025
Update By: LAGORTON
Site Description: "Location: The site is situated in an urban area surrounded by primarily industrial properties. The Gowanus Canal, a USEPA National Priorities List (NPL) site, is located approximately 260 feet west of the site and was once a vital cargo transportation hub prior to the mid-20th century. The subject property has a total footprint of approximately 28,500 square feet (0.65 acres). Site Features: Prior to remediation, the main site features were two partial building foundation from one (1) single-story 10,000 sf vacant warehouse structure on the westernmost portion of the site (formerly identified as Lot 1) and one (1) two-story, 2,500 sf vacant commercial structure (easternmost portion of the site formerly identified as Lot 50) which contains a partial cellar accessible through bilco doors in the sidewalk adjacent to Douglass Street. The buildings were demolished in November of 2022. Current Zoning and Land Use: The site is currently vacant and dominantly zoned M1-4/R7X with the northern portion (former lot 15) zoned M1-4/R6A. The zoning designations are representative of residential zoning. The site, prior to a zoning change that went into effect in November 2021 by the New York City

251 DOUGLASS STREET (Continued) **S132691308**

Council, was formerly located within a M1-2 designation. The M1-2 designation is a district characterized by light industrial uses such as woodworking, repair shops, wholesale service and storage facilities. In general, the surrounding parcels were part of the re-zoning and are presently designated as M1-4/R6A and M1-2 to the north, M1-4/R6A and M1-4/R7X to the east, M1-4/R6B to the west with a park to the south. Past Use of the Site: Based on historic Sanborn Fire Insurance Maps, portions of the site were developed prior to 1900. Between 1886 and 1904, the site was occupied by Bradley & Son Stone Works. By 1915, Scranton & Lehigh Coal Co. occupied the western portion (former lot 1) and Thomas Harrington s Sons Co. Contractors occupied the eastern portion (former lots 15, 50 and 51). According to historic building records, the two (2) on-site buildings were constructed in 1931. The 1938 Sanborn Map depicts both buildings as garages, each containing one (1) gasoline tank. In 1950, the western structure (former lot 1) was utilized as a motor freight station, and the eastern structure (former lot 50) was used for office space. From 1969 to 1987, the western structure was used as a private garage and automobile repair facility, while former lots 15 and 51 were used for parking or storage. Site Geology and Hydrogeology: The ground surface at the site slopes slightly to the south toward the intersection of Douglass Street and Nevins Street. The elevation of the property ranges from approximately +15 (NAVD-88) feet in the northeastern portion to +11 (NAVD-88) feet in the southwest. Dpeth to groundwater ranges between 6.81 to 11.21 feet below grade (bgs.). Groundwater flow to the west toward the Gowanus Canal, which is located approximately 260 feet to the west. According to the Federal Emergency Management Agency (FEMA), the site is located within a designated flood plain. A small western portion of the site is located within a Special Flood Hazard Area (SFHA), Zone AE, characterized by having a 1 percent annual chance of flooding, and the remainder of the site is located within a moderate risk floodplain, Zone X, having a 0.2 percent annual chance of flooding. Previous investigations characterized subsurface soil as historic fill primarily containing slag, brick, and gravel in a brown fine to medium grained sand matrix. The fill material was encountered at grade to depths of 4 to 10 feet bgs throughout the majority of the site. The fill material was reportedly underlain by native soil, generally consisting of brown fine to medium sand with gravel, silt and/or clay. Bedrock was not encountered during historic investigations. "

Env Problem: "Post-Remediation: Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Prior to remediation of the site, the primary contaminants of concern were related to coal tar GCM which includes VOCs, SVOCs and metals in soil; coal tar NAPL, VOCs, SVOCs and metals in groundwater; and VOCs in soil vapor. Residual contamination in the soil and groundwater is being managed under a Site Management Plan. Prior to Completion of Remediation: Nature and Extent of Contamination Documented under the Remedial Investigation: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was sampled analyzed for VOCs. Soil - Grossly contaminated material and non-aqueous phase liquid (GCM/NAPL) associated with MGP coal tar contamination from the Former Fulton MGP site has been encountered in on-site borings and delineated across the entire site. Volatile

251 DOUGLASS STREET (Continued) **S132691308**

organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals and pesticides were detected above Restricted Residential Soil Cleanup Objectives (RRSCOs) and/or protection of groundwater soil cleanup objective (PGSCOs). VOCs, primarily petroleum/coal tar related, were found in soils across the site including 1,2,4-trimethylbenzene at 1,299 parts-per million (ppm) (RRSCO: 47 ppm & PGSCO: 3.6 ppm), 1,3,5-trimethylbenzene at 130 ppm (RRSCO: 47 ppm & PGSCO: 8.4 ppm), benzene at 850 ppm (RRSCO: 41 ppm & PGSCOs: 1 ppm), ethylbenzene at 1,100 ppm (RRSCO: 4.8 ppm), n-propylbenzene at 37 ppm (PGSCOs: 3.9 ppm), naphthalene at 16,000 ppm (RRSCO: 100 ppm, PGSCO: 12 ppm), toluene at 1,600 ppm (RRSCO: 100 ppm & PGSCO: 0.7 ppm), and total xylenes at 1,500 ppm (RRSCO: 100 ppm & PGSCOs: 1.6 ppm). SVOCs, primarily PAHs (Polycyclic aromatic hydrocarbons), were found in soils across the site including acenaphthene at 890 ppm (RRSCO: 100 ppm & PGSCOs: 98 ppm), acenaphthylene at 680 ppm (RRSCO: 100 ppm & PGSCOs: 107 ppm), benzo(a)anthracene at 200 ppm (RRSCO/PGSCO: 1 ppm), benzo(a)pyrene at 200 ppm (RRSCO: 1 ppm & PGSCOs: 22 ppm), benzo(b)fluoranthene at 140 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), benzo(k)fluoranthene at 43 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), chrysene at 200 ppm (RRSCO & PGSCOs: 1 ppm), dibenz(a,h)anthracene at 15 ppm (RRSCO: 0.33 ppm), fluoranthene at 380 ppm (RRSCO: 100 ppm), naphthalene at 5,100 ppm (RRSCO: 100 ppm & PGSCO: 12 ppm), phenanthrene at 330 ppm (RRSCO: 100 ppm), and pyrene at 600 ppm (RRSCO:100 ppm). Metals were detected in soils above respective cleanup objective, including arsenic at 66.2 ppm (RRSCO/PGSCO: 16 ppm), copper at 3,050 ppm (RRSCO: 270 ppm), Lead at 3,890 ppm (RRSCO: 400 ppm), and mercury at 91.7 ppm (RRSCO: 0.81 ppm). Pesticides including 4,4' -DDD at 9.8 ug/kg, 4,4' -DDE at 14 ug/kg, 4,4' -DDT at 40 ug/kg and dieldrin at 7.3 ug/kg. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were reported at concentrations below soil cleanup guidance values for restricted residential use and protection of groundwater. Groundwater - VOCs, SVOCs and metals were detected in groundwater samples exceeding the NYSDEC Ambient Water Quality Standards (AWQS). VOCs, primarily petroleum/coal tar related, were found in groundwater at the site including 1,2,4-trimethylbenzene at 450 parts-per billion (ppb) (AWQS: 5 ppb), 1,3,5-trimethylbenzene at 620 ppb (AWQS: 5 ppb), 2-Butanone at 1,700 ppb (AWQS: 50 ppb), acetone at 650 ppb (AWQS: 50 ppb), benzene at 20,000 ppb (AWQS: 1 ppb), ethylbenzene at 1,900 ppb (AWQS: 5 ppb), Methyl tert butyl ether at 38 ppb (AWQS: 10 ppb), naphthalene at 12,000 ppb (AWQS: 10 ppb), toluene at 15,000 ppb (AWQS: 5 ppb), xylenes at 4,100 ppb (AWQS: 5 ppb), styrene at 5,000 ppb (AWQS: 5 ppb), trichloroethene at 9.3 ppb (AWQS: 5 ppb), isopropyl benzene at 32 ppb (AWQS: 5 ppb), n-butylbenzene at 14 ppb (AWQS: 5 ppb), n-propylbenzene at 68 ppb (AWQS: 5 ppb), and sec-butylbenzene at 13 ppb (AWQS: 5 ppb). SVOCs, primarily PAHs, were found in groundwater including acenaphthalene at 100 ppb (AWQS: 20 ppb), benzo(a)anthracene at 16 ppb (AWQS: 0.002 ppb), benzo(a)pyrene at 7 ppb (AWQS: 0 ppb), benzo(b)fluoranthene at 11 ppb (AWQS: 0.002 ppb), benzo(k)fluoranthene at 5.3 ppb (AWQS: 0.002 ppb), chrysene at 16 ppb (AWQS: 0.002 ppb), Fluorene at 74 ppb (AWQS: 50 ppb), indeno(1,2,3-cd)pyrene at 5.6 ppb (AWQS: 0.002 ppb), naphthalene at 9,000 ppb (AWQS: 10 ppb), phenanthrene at 130 ppb (AWQS: 20 ppb), and pyrene at 56 (AWQS: 50 ppb). Metals detected in groundwater include arsenic at 36.79 ppb (unfiltered) and 26.8 ppb (dissolved) (AWQS: 25 ppb). Groundwater impacts have the potential to migrate off-site. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS)

251 DOUGLASS STREET (Continued) **S132691308**

	were detected above the respective AWQS of 10 ng/L in groundwater at maximum concentrations of 215 ng/L and 44.1 ng/L, respectively. Soil Vapor - Sub slab soil vapor had elevated chlorinated volatile organic compounds (CVOCs) including cis-1,2-dichloroethene at 59 micro-grams per cubic meter (ug/m3), trichloroethene at 78.4 ug/m3, methylene chloride at 130 ug/m3, tetrachloroethene at 685 ug/m3, and vinyl chloride at 92.5 ug/m3. "
Health Problem:	"Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination."

Update By:	LAGORTON
Site Description:	"This site is identified as the offsite component of the current Brownfield project located at 251 Douglass Street, site #C224367. Location: The site is situated in an urban area surrounded by primarily industrial properties. The Gowanus Canal, a USEPA National Priorities List (NPL) site, is located approximately 260 feet west of the site and was once a vital cargo transportation hub prior to the mid-20th century. The subject property has a total footprint of approximately 28,500 square feet (0.65 acres). Site Features: The main site features are two partial building foundation from one (1) single-story 10,000 sf vacant warehouse structure on the westernmost portion of the site (formerly identified as Lot 1) and one (1) two-story, 2,500 sf vacant commercial structure (easternmost portion of the site formerly identified as Lot 50) which contains a partial cellar accessible through bilco doors in the sidewalk adjacent to Douglass Street. The buildings were demolished in November of 2022, the site is currently unoccupied. Current Zoning and Land Use: The site is currently vacant and dominantly zoned M1-4/R7X with the northern portion (former lot 15) zoned M1-4/R6A. The zoning designations are representative of residential zoning. The site, prior to a zoning change that went into effect in November 2021 by the New York City Council, was formerly located within a M1-2 designation. The M1-2 designation is a district characterized by light industrial uses such as woodworking, repair shops, wholesale service and storage facilities. In general, the surrounding parcels were part of the re-zoning and are presently designated as M1-4/R6A and M1-2 to the north, M1-4/R6A and M1-4/R7X to the east, M1-4/R6B to the west with a park to the south. Past Use of the Site: Based on historic Sanborn Fire Insurance Maps, portions of the site were developed prior to 1900. Between 1886 and 1904, the site was occupied by Bradley & Son Stone Works. By 1915, Scranton & Lehigh Coal Co. occupied the western portion (former lot 1) and Thomas Harrington s Sons Co. Contractors occupied the eastern portion (former lots 15, 50 and 51). According to historic building records, the two (2) on-site buildings were constructed in 1931. The 1938 Sanborn Map depicts both buildings as garages, each containing one (1) gasoline tank. In 1950, the western structure (former lot 1) was utilized as a motor freight station, and the eastern structure (former lot 50) was used for office space. From 1969 to 1987, the western structure was used as a private garage and automobile repair facility, while former lots 15 and 51 were used for parking or storage. Site Geology and Hydrogeology: The ground surface at the site slopes slightly to the south toward the intersection of Douglass Street and Nevins Street. The elevation of the property ranges from approximately +15 (NAVD-88) feet in the northeastern portion to +11 (NAVD-88) feet in the southwest. Depth to groundwater ranges between 6.81 to 11.21 feet below grade (bgs.). Groundwater flow to the west toward the Gowanus Canal, which is located approximately 260 feet to the west. According to the Federal Emergency Management Agency (FEMA), the site is located within a designated flood plain. A small western portion of the site is located within a Special Flood Hazard Area (SFHA), Zone

251 DOUGLASS STREET - OFF-SITE (Continued) **S132691312**

AE, characterized by having a 1 percent annual chance of flooding, and the remainder of the site is located within a moderate risk floodplain, Zone X, having a 0.2 percent annual chance of flooding. Previous investigations characterized subsurface soil as historic fill primarily containing slag, brick, and gravel in a brown fine to medium grained sand matrix. The fill material was encountered at grade to depths of 4 to 10 feet bgs throughout the majority of the site. The fill material was reportedly underlain by native soil, generally consisting of brown fine to medium sand with gravel, silt and/or clay. Bedrock was not encountered during historic investigations. "

Env Problem: "The on-site investigation yielded the following results: Soil - Grossly contaminated material and non-aqueous phase liquid (GCM/NAPL) associated with MGP coal tar contamination from the Former Fulton MGP site has been encountered in on-site borings and delineated across the entire site. Volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals and pesticides were detected above Restricted Residential Soil Cleanup Objectives (RRSCOs) and/or protection of groundwater soil cleanup objective (PGSCOs). VOCs, primarily petroleum/coal tar related, were found in soils across the site including 1,2,4-trimethylbenzene at 1,299 parts-per million (ppm) (RRSCO: 47 ppm & PGSCO: 3.6 ppm), 1,3,5-trimethylbenzene at 130 ppm (RRSCO: 47 ppm & PGSCO: 8.4 ppm), benzene at 850 ppm (RRSCO: 41 ppm & PGSCOs: 1 ppm), ethylbenzene at 1,100 ppm (RRSCO: 4.8 ppm), n-propylbenzene at 37 ppm (PGSCOs: 3.9 ppm), naphthalene at 16,000 ppm (RRSCO: 100 ppm, PGSCO: 12 ppm), toluene at 1,600 ppm (RRSCO: 100 ppm & PGSCO: 0.7 ppm), and total xylenes at 1,500 ppm (RRSCO: 100 ppm & PGSCOs: 1.6 ppm). SVOCs, primarily PAHs (Polycyclic aromatic hydrocarbons), were found in soils across the site including acenaphthene at 890 ppm (RRSCO: 100 ppm & PGSCOs: 98 ppm), acenaphthylene at 680 ppm (RRSCO: 100 ppm & PGSCOs: 107 ppm), benzo(a)anthracene at 200 ppm (RRSCO/PGSCO: 1 ppm), benzo(a)pyrene at 200 ppm (RRSCO: 1 ppm & PGSCOs: 22 ppm), benzo(b)fluoranthene at 140 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), benzo(k)fluoranthene at 43 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), chrysene at 200 ppm (RRSCO & PGSCOs: 1 ppm), dibenz(a,h)anthracene at 15 ppm (RRSCO: 0.33 ppm), fluoranthene at 380 ppm (RRSCO: 100 ppm), naphthalene at 5,100 ppm (RRSCO: 100 ppm & PGSCO: 12 ppm), phenanthrene at 330 ppm (RRSCO: 100 ppm), and pyrene at 600 ppm (RRSCO:100 ppm). Metals were detected in soils above respective cleanup objective, including arsenic at 66.2 ppm (RRSCO/PGSCO: 16 ppm), copper at 3,050 ppm (RRSCO: 270 ppm), Lead at 3,890 ppm (RRSCO: 400 ppm), and mercury at 91.7 ppm (RRSCO: 0.81 ppm). Pesticides including 4,4' -DDD at 9.8 ug/kg, 4,4' -DDE at 14 ug/kg, 4,4' -DDT at 40 ug/kg and dieldrin at 7.3 ug/kg. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were reported at concentrations below soil cleanup guidance values for restricted residential use and protection of groundwater. Groundwater - VOCs, SVOCs and metals were detected in groundwater samples exceeding the NYSDEC Ambient Water Quality Standards (AWQS). VOCs, primarily petroleum/coal tar related, were found in groundwater at the site including 1,2,4-trimethylbenzene at 450 parts-per billion (ppb) (AWQS: 5 ppb), 1,3,5-trimethylbenzene at 620 ppb (AWQS: 5 ppb), 2-Butanone at 1,700 ppb (AWQS: 50 ppb), acetone at 650 ppb (AWQS: 50 ppb), benzene at 20,000 ppb (AWQS: 1 ppb), ethylbenzene at 1,900 ppb (AWQS: 5 ppb), Methyl tert butyl ether at 38 ppb (AWQS: 10 ppb), naphthalene at 12,000 ppb (AWQS: 10 ppb), toluene at 15,000 ppb (AWQS: 5 ppb), xylenes at 4,100 ppb (AWQS: 5 ppb), styrene at 5,000

251 DOUGLASS STREET - OFF-SITE (Continued) **S132691312**

ppb (AWQS: 5 ppb), trichloroethene at 9.3 ppb (AWQS: 5 ppb), isopropyl benzene at 32 ppb (AWQS: 5 ppb), n-butylbenzene at 14 ppb (AWQS: 5 ppb), n-propylbenzene at 68 ppb (AWQS: 5 ppb), and sec-butylbenzene at 13 ppb (AWQS: 5 ppb). SVOCs, primarily PAHs, were found in groundwater including acenaphthalene at 100 ppb (AWQS: 20 ppb), benzo(a)anthracene at 16 ppb (AWQS: 0.002 ppb), benzo(a)pyrene at 7 ppb (AWQS: 0 ppb), benzo(b)fluoranthene at 11 ppb (AWQS: 0.002 ppb), benzo(k)fluoranthene at 5.3 ppb (AWQS: 0.002 ppb), chrysene at 16 ppb (AWQS: 0.002 ppb), Fluorene at 74 ppb (AWQS: 50 ppb), indeno(1,2,3-cd)pyrene at 5.6 ppb (AWQS: 0.002 ppb), naphthalene at 9,000 ppb (AWQS: 10 ppb), phenanthrene at 130 ppb (AWQS: 20 ppb), and pyrene at 56 (AWQS: 50 ppb). Metals detected in groundwater include arsenic at 36.79 ppb (unfiltered) and 26.8 ppb (dissolved) (AWQS: 25 ppb). Groundwater impacts have the potential to migrate off-site. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were detected above the respective AWQS of 10 ng/L in groundwater at maximum concentrations of 215 ng/L and 44.1 ng/L, respectively. Soil Vapor - Sub slab soil vapor had elevated chlorinated volatile organic compounds (CVOCs) including cis-1,2-dichloroethene at 59 micro-grams per cubic meter (ug/m3), trichloroethene at 78.4 ug/m3, methylene chloride at 130 ug/m3, tetrachloroethene at 685 ug/m3, and vinyl chloride at 92.5 ug/m3. "

Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

DEC Memo:	During a PBS inspection on 11/1/11, petroleum staining was found on the ground around various UST's. In addition, there was a sheen visible on the water, which should not be present, in the secondary containment basin of Tank 005. On the floor of the boiler room, there were spill pads saturated with petroleum. 1/27/12 Spill case opened today at request of DLE. PBS settlement conference held today. General Counsel will be issuing a consent oprder to PTC shortly. PTC was told today to provide sampling locations and depths of the unpaved areas where contaminated soil was found. They provided photos showing no visible contamination at the unpaved areas. No photos of the secondary containment area of Tank 005 or of the boiler room were provided. PTC stated that those areas were cleaned and epoxied (photos to be required in the compliance schedule). At the meeting, PTC was told that photos opf these areas are required. bf 2/24/12 Yesterday, sent e-mail to Nathan Edeson, engineer. He also e-amiled me on 2/15/12 and called and left messages on 2/15, 2/21, and 2/23. He requested approval of their sampling plan and a copy of the PBS Inspection Report. The contaminated soil in the yard was removed according to PTC. Tjhey will sample in the affected areas. I replied to Mr. Edeson by e-mail yesterday requesting a list of contaminants they plan on sampling for and I provided the inspection report. He replied that they will sample for B-Tex. Today I responded stating that they need to sample for the contaminants listed in Table 3 of CP-51. I sent attached a pdf of Table 3 to the e-mail. bf 9/10/12 Called N. Edeson (917)299-4340. Left voicemaikl message requesting the status of the sampling results. bf 7/11/14 TJD File reassigned from Falvey to DeMeo. Spill #1403412 & 1403303 have been closed and cross-referenced to oldest open spill at this location (1112454) for oversight by a single DEC project manager (DeMeo). All documentation for the above referenced spills will be saved under this file. 08/03/16 TJD File review. PTC and their consultant (Nathan Edison, P.E.) have completed all required investigatory and remedial actions required under the consent agreement. All improperly stored solid waste (drums) have been removed and disposed of in accordance with

PETROLEUM TANK CLEANERS (Continued) **S109371167**

applicable regulations. All tanks have
been emptied and removed or properly abandoned in place. Soil borings have been advanced in all
accessible areas and samples collected for laboratory analysis - minor SVOC contamination
consistent with urban fill were identified which does not require further investigation or
remediation. Groundwater samples were collected from upgradient and downgradient of site with all
target analytes within acceptable limits. Based upon the investigation findings no further action
in required at this time. Documentation has been uploaded to DECDOCS.

DEC Memo:	Sangesland spoke to Joe Ostrowski. He said there was a 55 gal drum that broke while being loaded onto a truck. Spill was contained and cleaned. Joe says there was NO oil into the storm drain. Piper will make a site visit. Piper. While moving a drum of waste oil fro mthe yard. The bottom broke. An oil water mixture ran down the curb and int othe sewer . upon arrival PTC was pumping the sewer clean and the roadway was cleaned using speedy dry. Spill closed.
Remarks:	caller states that there is a massive oil spill coming from a tank out of a garage and flowing down the street into the sewer. caller states that the oil is flowing like a small stream. caller was drving by and noticed the spill.

DEC Memo:	6/30/14- Zhune spoke to Mark from PTC. He said Mosses was doing inspection couple of month ago at this site and Tim Demeo is doing a follow up. 6/30/14 TJD Site inspection. Multiple PBS vilations noted - unregistered tanks in service identified. Multiple unreported spills identified including product found in outside storage yard (soil affected), inside secondary containment structures for AST's and on concrete surfaces in main garage area, basement and indoor storage area. Out of service tank trucks are being utilized to improperly store waste fuel throughout facility. Facility is being improperly operated as a TSDF. Several hundred drums of petroleum impacted soils are stored in drums are located within trucks and within the indoor storage area at facility. Facility representatives (Mark Salamac and Bob Lamarada) have been directed to transport offsite and properly dispose of all petroleum products not currently stored in registered vessels and transport and dispose of all improperly stored drums contained petroleum impacted soils - proof of properly disposal of all regulated waste being improperly stored at facility is required to be presnted at settlement conference scheduled for July 17, 2014 at the Region 2 office. Facility personnel have been directed to bring all tanks at the facility into compliance with PBS regulations. DEC further required the immediate clean-up and removal of spilled product identified throughout the facility. 7/11/14 TJD File review. Multiple spills open at this location. Spill #1403412 & 1403303 have been closed and cross-referenced to the oldest open spill file at this address for oversight by a single DEC project manager (DeMeo). Primary spill # for this address is 1112454.
Remarks:	unknown how much in total, thinks about less than 100 gallons total, cleanup in progress

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	12/20/05-Sharif// Mr. Feroze and I responded to the site on 12/16/05.Approx. 200 gallons spilled all over the yard. Possible source of the spill is a oil tank truck owned by Bonafide Energy whose valve broke and spilled oil. The side walk and street were impacted. PTC has been hired by Bonafide Energy, Marino Mazzei,(718)788-2222 to clean up the yard and remediate the site.I notified DEP about their sewer impact and Mr. Dennis Huacon,(718)595-4722 from Pollution Prevention Section responded to the site. I sent a letter to Marino Mazzei Bonafide Energy, 444 3rd Avenue, Brooklyn, NY 11215. 04/21/06 Sharif Rahman-Rec'd investigation report from ENVIROTRAC. A total of 12 borings were attempted in the reported area of the spill as per previously submitted work plan.Samples were collected and screened visually,olfactoraly and with a PID for the

BROOKLYN TRUCKING (Continued) **S107521267**

presence of oil.No petroleum contamination was discovered in the lab analytical result. Photographs were included.NFA required.

Town:	New York City
Record Added Date:	04/04/2018
Record Updated Date:	03/06/2020
Update By:	DJEATON
Site Description:	"Location: The site is located in an urban area along the Gowanus Canal, within the Borough of Brooklyn, on the northwest corner of Nevins Street and Degraw Street. Site Features: The site is currently improved with a two-story building, which occupies approximately 2,000 square feet of the parcel (242 Nevins Street) and a one-story building, which occupies approximately 16,000 square feet of the parcel (254 Nevins Street). The remainder of the parcel consists of parking, storage, and outdoor work areas associated with the buildings operations, to include vehicle and equipment storage and repair. Current Zoning and Land Use: The site is currently zoned for industrial and manufacturing use (M2-1 district). The buildings are occupied by an automobile repair facility, commercial hauler, automobile upholsterer, production studio, plumbing contractor and general contractors whose operations include vehicle and equipment repair. Adjoining parcels are used for industrial, parking, and open space/recreational purposes, with the surrounding area generally consisting of industrial/commercial uses. Past Uses of the Site: Past use of the site includes a coal company (approximately 1886 to 1950),

242 NEVINS STREET (Continued) **S105841715**

	automobile/vehicle repair (approximately 1938 to 1950, and 2013 to present), an unpermitted solid waste management facility (prior to 1994), a Resource Conservation and Recovery Act Large Quantity Generator (1988), and various trucking and contracting companies (approximately 1969 to present), including a petroleum transporter. Site Geology and Hydrogeology: The site is located in a developed area of Brooklyn, generally covered with paved roads, walkways and buildings. The subsurface strata at the site consists of historic fill material characterized by loose silty sand with varying amounts of silt, sand, gravel, ash, asphalt, brick, clinkers, cobblestone, concrete, glass fragments, metal, and wood extending to depths of as great as 15 feet below grade surface (bgs). The historic fill material is underlain by alluvial deposits consisting of poorly sorted sands with gravel and marsh deposits, referred to as meadow mat, which consists of interbedded sands, clays and silts. Bedrock (Fordham Gneiss) was encountered at a depth of about 159 feet bgs. Groundwater was encountered between 4.54 and 5.6 feet bgs and generally flows westward toward the Gowanus Canal."
Env Problem:	"US Environmental Protection Agency (EPA) has determined that the property is part of the Gowanus Canal Superfund Site that is listed on the National Priorities List. Additionally, under ECL 27-1405(2)(e), there is currently an EPA environmental enforcement action related to contamination at the property, therefore the site was denied entry to the NYS BCP."

Longitude: -73.9861970
DEC Memo: Ketani responded to the site. 7/6/11 - Raphael Ketani. I arrived at the site at about noon time.
The site was a large yard with a gray building on the back left corner that fronts on Nevins
Street. The address is 242 Nevins Street (near Degraw and Nevins), Brooklyn, 11217. Several
companies had their signs on the corrugated fence. These companies were Brooklyn Truck & Equipment,
Phoenix Services Corp. (718) 567-2023, and Cole Partners, Inc. (718) 875-8300. I entered the yard
and saw a red painted trailer (posssibly with a cement pump) on the left that had been leaking
hydraulic fluid. The floor of the front half of the yard appeared to be partially paved and
partially laid with paving stones. There was a steel plate in one location with holes in it.
Vehicles were parked on both sides of the front half of the yard, but I did not see any leaks.
Next, I went to the back half of the yard. The ground appeared to be only dirt. There were vehicles
and construction machines parked along the west side and north edges of the yard. The Gowanus Canal
bordered the west side of the yard and the water level was nearly even with the yard (maybe 3 feet
below ground level). Most of the trucks belonged to two different garbage carting companies, M&G
Carting, 303 5th Avenue, NY, 10016, (212) 689-0332, and Flash Recycling, 132 Ludlow Street, NY,
10002, (212) 673-6194 (Prince Street Station, P.O. Box 515, NY, 10012). Some of the trucks had
leaked either motor oil or hydraulic oil. There was oil on the ground near one of the Flash
Recycling trucks. One of the M&G Carting trucks looked like it hadn't been operational for a long
time. There was a rolling container near this truck with many plastic bottles that had contained
motor oil. I didn't see any leaking from the container, but this was not a proper container for
liquids of any kind. After my tour of the back half of the yard, I entered the gray building. In
many places, there was oil on the floor. I saw a zipper drain that looked like it may contain
sludge. I entered the office of Brooklyn Truck & Equipment and met ECO Jennifer Okonuk (718)
482-4885 and the owner of the business, Bob Hepplewhite (718) 237-7976. ECO Okonuk informed me that
she had called in the spill. She had been making inspections of garages when she came across
Brooklyn Truck & Equipment. She said that she had issued two tickets to Mr. Hepplewhite, for
noisome and unwholesome. Mr. Hepplewhite, ECO Okonuk and myself toured the garage. ECO Okonuk
pointed out the area with oil saturated Speedi Dri next to a 275 gal. waste oil tank and a 275 gal.
tank that Mr. Hepplewhite said contained fresh motor oil for the

242 NEVINS STREET (Continued) **S105841715**

trucks. One of the workers at the garage dug through the Speedi Dri and showed us that there was a concrete floor below. I pointed out to Mr. Hepplewhite that there were containers of motor oil on racks in the back of the oil contaminated area. He said that these weren't his and that they were empty and had been there since before he had moved his business in. Mr. Hepplewhite added that the oil tank next to them also wasn't his and he knew nothing about it. Next, we went outside to the yard. I asked Mr. Hepplewhite about the trucks. He said that he makes extra money by leasing space for parking the trucks. I pointed out the spilled oil, the rolling container with oil bottles, and the derelict truck. I told him that he had to inform M&G Carting and Flash Recycling and get them to clean up the site and remove the oil bottles and the derelict leaking truck (ECO Okonuk claimed it was leaking). He said that he will do this. ECO Okonuk and I asked about the steel plate in the back half of the yard and the perforated steel plate in the front half of the yard, and whether he leased both halves. Mr. Hepplewhite said that he leased only the gray building and the back half of the yard. He added that the plates covered sewer tanks. He went on to say that when it rains, the entire yard floods 8 to 10 inches because the sewers back up under the street. Mr. Hepplewhite added that even the Gowanus Canal floods during the rain storms and spills into his yard. The yard and the vicinity is a low area. ECO Okonuk told me that she has seen this happen, too. He also stated that the building to the south can not be sold because there is oil underground from the coal gasification that took place many years ago. Mr. Hepplewhite commented that the EPA and the NYC DEP did borings throughout the yard and elsewhere because of the underground contamination. While we were in the yard, Andrew Kelly, enforcement officer - Emergency Response Engineer with the ER Unit (718) 595-4761 of the NYC DEP arrived. We went back inside the shop and I went over what needed to be done to clean up the site. These items were: 1) clean up the saturated Speedi Dri and make sure fresh absorbent is kept at this location for any future spills that take place 2) hire an environmental company to do soil borings in the saturated area, along the sides of the zipper drains and in the back half of the yard - if contamination is found, then it will have to be cleaned up 3) call M&G and Flash and have them clean up their spills 4) clean up the floor of the garage and have someone keep on top of the spills with absorbent and power washing (Mr. Hepplewhite stated that the garage is powerwashed once a month) 5) hire a company to clean out the zipper drains (Mr. Hepplewhite said that there is a

242 NEVINS STREET (Continued) **S105841715**

plug at the end of the last zipper and that nothing can flow to the sewers) I told Mr. Hepplewhite
that the DEC will be sending a contaminated soil letter to him and to the owners of the property
with a C-c to ECO Okonuk. I added that we will want a clean up report after everything is done. Mr.
Hepplewhite said that he understood. There was one other spill case for the site. It was #0510846.
It involved a 200 gal. oil spill to the yard and the street and the sewer on 12/16/05. Bonafide
Energy was the responsible party. A valve had broken. The site was cleaned up by 4/21/06 and the
case was closed. 7/8/11 - Raphael Ketani. I tried contacting M&G Carting (212) 689-0332 to let them
know that they have to clean up the spilled oil around and under their trucks. However, I reached
the answering machine of Frank Mormando. I left a message for him to contact me. I contacted Billy
Huang, the owner of Flash Recycling (212) 673-6194. I told him that he had to clean up the spilled
oil from under and around his trucks and the pool of stinking leachate. He said that he will get
one of his crew to do this. I told him that the oil has to be put in an appropriate container for
oil disposal and that the DEC will do an inspection next week to see whether he has complied with
our request. I added that if the oil and leachate aren't cleaned up, then he could face fines and
penalties. Mr. Huang said that the oil and leachate will be removed. I looked up the property
ownership using ACRIS. The latest deed for block and lot 418 and 1 is held by 242 Nevins, Inc., 444
Third Avenue, Brklyn, 11215. The deed date is 7/27/05, it was prepared on 10/5/05, and filed on
1/12/06. The property manager is Marino Mazzei, Bonified Realty, 140 Portland Road, Highland, NJ,
07732, (718) 788-2222. I spoke to Mr. Mazzei and told him about the leaking red painted trailer,
the leaking trucks and the spills at Brooklyn Truck & Equipment. I told him that Mr. Hepplewhite
will take care of the spills in his garage and that the trucking companies have been notified about
the spills from their trucks. Mr. Mazzei said that he will visit the site and see to it that
everything is cleaned up. I sent a CSL to 242 Nevins, Inc. regarding the hydraulic fluid that is
leaking from the red trailer and the leaking trucks. Another CSL went to Mr. Mazzei regarding the
same issues. I also sent Mr. Hepplewhite (718) 237-7976 and Mr. Mazzei CSLs with the 5 items from
above. Later, Mr. Mormando, the owner of M&G Carting (212) 689-0332, called me back. He said that
he will clean up the spill under and around his trucks and he will have the rolling container
emptied. 7/12/11 - Raphael Ketani. Mr. Mazzei cell (347) 231-6440 called. He said that everything
that the DEC was concerned about in the garage and in the yard has

242 NEVINS STREET (Continued) **S105841715**

been cleaned up. He invited me
to check the place. I told him that I will this week. However, I added that Mr. Hepplewhite still
has to hire an environmental company to do soil borings in the former oil saturated area and along
the sides of the zipper drains. He said that he understood. 7/19/11 - Raphael Ketani. The CSL to
242 Nevins Inc. was returned in an unopened envelope as ATTEMPTED - NOT KNOWN. 8/5/11 - Raphael
Ketani. I made an unannounced site visit. The oil spill under the red trailer had been cleaned up.
The small oil spills next to and around the garbage trucks had also been cleaned up. The small
rolling trash dumpsters (about 1.5 cu. yds. each) had been emptied. I met Mr. Hepplewhite. He
showed me the area inside the garage that had been badly affected by spilled oil. He said that the
oil was actually on sheets of plywood, not on the garage floor. This appeared to be true as most of
this area of the garage floor was very clean as if there had never been oil tanks here. It was
cleaner than it could have been if someone had power washed the floor. All of the tanks and buckets
had been removed. However, I did see a darkened corner of this area next to the racks which used to
hold containers of oil. I knelt down at this corner, but didn't sense any oil odors. I assumed the
darkening to be the result of moisture as it had rained heavily earlier during the week and the
corrugated walls were not sealed to the floor. There still were mud puddles in the backyard where
the garbage trucks were. Next, he showed me the new location of the waste oil tank. It was now in a
larger tank which served as secondary containment - should any of his workers spill oil while
transfering it to the tank. The tank was in between the two back garage doors. Mr. Hepplewhite
showed me the zipper drains. They were now covered by steel plates which fit flush with the garage
floor. The plates had holes so that wash water can enter the drains. He lifted up one plate and I
could see the concrete bottom of the drain. There were no odors and the bottom of the drain looked
to be in good condition without any cracks. Lastly, he showed me the drums of sediment that had
been removed from the drains. The lids were securely attached to the drums and they looked to be
ready for pickup. Mr. Hepplewhite said that the person who runs the waste oil pickup company will
arrange for the drums to be picked up. I looked at the floor of the shop and it was very clean,
except for a small puddle under one engine. This engine had just been drained. I pointed this out
to Mr. Hepplewhite and he said that the spill will be cleaned up immediately. After this, I left.
As the former waste oil tank area was very clean and as the zipper drains didn't smell as if they

242 NEVINS STREET (Continued) **S105841715**

had oil and were in good condition, I decided that soil borings weren't necessary at the site. As the spills appeared to have been remediated, I have determined that there is no threat to the public or the environment. Therefore, I am closing the spill case. DLE had issued tickets. So their case will remain active.

Remarks: The whole ground of the garage is saturated. Been dumping there for 6 years. No clean up as of yet.

DEC Memo:	10/18/22 - Kim - Desk Duty - I called Andrea Carey with Bidwell Environmental (Bidwell) at (845)239-0004. The reported spill was at a Superfund site located on the Gowanus Canal. I checked the DER database and found that there were 2 BCP sites at C224273 242 Nevins St and C224261 234 Butler St reviewed by NYSDEC-CO PM John Miller. NYCDEP construction project: old buildings are being demolished and underground structures are being removed. An unknown tank, encased in concrete, containing an unknown amount of petroleum was discovered when the concrete slab was being broken up. The tanks at this site were scheduled to be removed under a UST removal plan that is under review by DEC. There was petroleum product and water that accumulated in the excavation approximately 4ft below grade. AB Oil responded and collected an oil

INDUSTRIAL (Continued) **S129115788**

sample for lab analysis but
did not bring equipment to recover the oil today. The excavation will be covered to protect it
overnight and the accumulated oil and water will be removed. I emailed NYSDEC-CO John Miller and
was informed that these sites C224273 242 Nevins St and C224261 234 Butler St were not admitted
into the NYSDEC BCP. 10/20/22 - Kim - I emailed Andrea Carey at acarey@bidwellenvironmental.com for
an update and further information on the property, its owner, and PBS 2-609478 at 234 Butler St.
10/24/22 - Kim - On 10/21, I received a call from Supy Singh, NYCDEP BEDC EHS Regional Manager for
the project, to discuss the questions I sent to Bidwell. On 10/24, I received a response from
Bidwell via email that the excavation was pumped out on Friday 10/21 and affected water/petroleum
was sampled and drummed for future offsite disposal. Additional groundwater (no product/sheen)
infiltrated the excavation following the pump out and remains in the excavation. The tank pull is
scheduled to commence following resubmittal of the Contractor s removal plan, which is currently
being revised to address the conditions encountered onsite. A Contaminated Soil Letter was sent to
Kevin Clarke with NYCDEP, the project Portfolio Manager
718-595-5995(w); 347-461-7400 (c);
kclarke@dep.nyc.gov. NYCDEP 96-05 Horace Harding Expressway Corona, NY 11368 Attn: Kevin Clarke
10/27/22 - Kim - Spill 2206171 transferred to NYSDEC DER-CO Fischer as PM for Fulton MGP Parcel 7
located at 266 Nevins St.

DEC Memo:	1/12/21 - Sekhon Case discussed with DEC Austin, DEC Piper dispatched to investigate. 1/12/21- DEC Piper reposnded to site with DEC Kim. Spill was from contractor yard and runs down street. I spok with rep of site and he will hire contractor first thing iin morning

RISE STONE AND SURFACE (Continued) **S127291589**

to clean pavement and storm
drain. DEP Castro arrived on site and inspected Gowanus Canal with us. No sheen/ oil found.
1/13/21- DEC Piper spoke with Lawrence. ?He hired All Boro. I drove by site and confirmed cleanup.
Spill satisfactory cleaned by AB. Based on size and location of spill, this spill is closed.

Remarks: total 50 gallons - into catchbasin - cleanup pending

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the

RYDER TRUCK RENTAL INC (Continued) **1004756768**

state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

11/21/2003 Reassigned from Rommel to
Sun. See also Spill # 95-06588 11/24/2003-Sun- File Review and Update
by Sun: On 11/24/2003, Sun of
NYSDEC sent a letter to Joseph Macchia, Jr. requiring Northland to
complete the work described in
DEC's letter of November 18, 1997 before December 24, 2003.
08/25/06-Sun-This spill will be
referred to the Legal Department and will be included in New Consent
Order. (Sun) [Upon further
review, DEC staff determined that this spill case was not included in
the Consent Order with Joseph
Macchia, but rather a spill case across the street from this site,
spill 9506588 at 169 3rd Avenue,
was included in that order; that spill case is being addressed under
the Consent Order. - J.
Kolleeny, 5/25/11] 11/13/06-Sun: Sun spoke to John Urda about
referring this case to Legal. Joe Sun
will submit a referral paper to Legal this week. (Sun) 06/14/07-Sun:
Joe Sun prepared and completed
a Case Initiation Form and referred to Legal on 06/14/07. (Sun)
07-29-08: Transferred from Sun to
Tibbe. 5/27/09 This spill case transferred from M. Tibbe to J.A.
Maisonave. - JAM 6/11/09 Reviewed
this case file. Site Summary: This property is across the street from
another gasoline station
operated by Joseph Macchia, Jr. at address 169 Third Avenue, Brooklyn.
This property was a service
station operated by Joseph Macchia, Jr. A building was recently
constructed on-site; however, there
is no record of any remedial activities performed after the Subsurface
Investigation performed in
early 1997 by Ecosystems Strategies, Inc. According to their report,
14 petroleum storage tanks (12
550-gallon USTs, one 4,000-gallon UST and one 2,200-gallon UST) were
known to be present at this
site; however, they were not located during the investigation. The
report states that there are
elevated levels of VOCs in the on-site soils and groundwater as a
result of the historic on-site
storage, handling and dispensing of gasoline. Soil and groundwater
samples were collected and
results are summarized in that report. Further investigation is
necessary. Based on this
information, a Stipulation Agreement was sent to Northland Marketing

FORMER GAS STATION (Continued) **S102402008**

Corp. at the address below:
Joseph Macchia, Jr. Northland Marketing Corp. 556 Central Avenue Bethpage, NY 11714 The signed
Stipulation Agreement is due back at the DEC Region 2 office by June 25, 2009. -JAM 7/20/09
Stipulation Agreement has not been returned. I called Mr. Joseph Macchia (516) 933-0700 today to
inquire. He said he is reviewing the case because he sold the property. He requested a copy of the
1997 Subsurface Investigaiton Report and the 1996 Environmental Audit. I emailed him a copy of each
report. - JAM 05/25/11: This spill case transferred from J. Maisonave to J. Kolleeny. After
researching file, sent email (in eDocs) to Joseph Macchia (jmacchiamdi@aol.com): I am writing to
inquire about status of this spill site. This site was being handled by Joseph Maisonave of our
office, but Mr. Maisonave is currently on an extended leave of absence, and I am now handling this
project. According to notes in our database (see attached spill rpt), a Stipulation Agreement was
sent to you in June 2009, but as of July 20, 2009, signed agreement had not been received by
NYSDEC. At that time, DEC case manager Mr. Maisonave contacted you and you requested copies of 2
envt'l rpts concerning property; Mr. Maisonave emailed you rpts. I have no record of any further
communication from you concerning this site since that time. I need to know if you are
acknowledging responsibility for this spill case and will move forward with investigation and
possible remediation of site. If I do not receive a positive response from you by June 3, 2011, I
will recommend that our Office of General Counsel proceed with an enforcement action. Feel free to
contact me if you have any questions. - J. Kolleeny 06/24/15: On 6/23/15, John Urda of Region 2
Office of General Counsel contacted me to ask about site status. I sent email to RP Joseph Macchia:
Dear Mr. Macchia: Today I received an inquiry from our Office of General Counsel regarding status
of this open spill case. Our records indicate that you are Responsible Party for this spill.
According to notes in our Spills Database (please see attached spill rpt form), a Stipulation
Agreement was sent to you for this site in June 2009. We never received back signed Agreement, and
when DEC Case Manager at that time, Mr. Joseph Maisonave, contacted you to follow up on this, you
asked that he send you two envt'l rpts which documented gasoline-related contamination atsite. Mr.
Maisonave sent you rpts, but we received no further correspondence from you. In May 2011, I sent
you an email outlining above sequence of events and asking that you send a response indicating your
willingness to take responsibility for this spill case, perform site investigation and possibly

FORMER GAS STATION (Continued) **S102402008**

remediation, as warranted by site conditions. I stated that if you did not respond, this case would be referred to our legal dept for initiation of an enforcement action. However, I did not receive any response from you. At this time, it is still necessary that a site investigation be performed to determine current site conditions. Please acknowledge your receipt of this email, and indicate your willingness to undertake necessary work at site. If we do not receive a response from you by June 26, 2015, our legal staff will proceed with enforcement. Received reply from Joseph Macchia: Jonathan, I acknowledge receipt of your email regarding 156-170 3rd Avenue, Brooklyn, NY. I will need some time to check record storage to see if we still have records for this property. I sent email reply: Joseph, According to our records, at time spill was reported property was owned by Baltic and Fourth Avenue Corp. Please complete your records review and let me know how you will proceed by July 10, 2015. - J. Kolleeny 08/17/16: On 8/16/16, reviewed Remedial Investigation Work Plan by Berninger Envt'l, dated 6/22/16 (in DecDocs). Work Plan proposes installing 4 wells around site perimeter, as site is completely covered by a building. Proposed well locations are as follows: 1 well in sidewalk along Baltic St to north of site, 2 wells in sidewalk along 3rd Ave to east of site, and 1 well in sidewalk along Butler St to south of site (there's another bldg. to west of site). I sent email to Walter Berninger: Walter, I m currently reviewing Remedial Investigation Work Plan for 156-170 3rd Avenue in Brooklyn, DEC Spill No. 9607280, and I have some comments. Work plan rpt should be revised to include a Background/Site History section, explaining how long site was operated as a gas station, when it ceased being a gas station, when current on-site building was constructed, etc. Rpt should also summarize past investigations performed at site, and perhaps you should modify number & locations of proposed borings/wells based on data from past investigations. I am in possession of a 1996 Envt'l Audit rpt and a 1997 Subsurface Investigation/Well Install'n summary rpt, both prepared by Ecosystems Strategies of Poughkeepsie, NY. These rpts document presence of soil & GW impacts on site, as well as providing a GW flow direction. As mentioned, your work plan should summarize those findings. You should revise proposed investigation as appropriate based on past data, and work plan should include another site plan showing site as it was before current bldg was constructed (if possible, showing former tank, dispenser and fill port locations). Please let me know if you have access to those two Ecosystems Strategies rpts; if not, I can provide them to you. On 8/17/16,

FORMER GAS STATION (Continued) **S102402008**

received reply from Berninger: Jon,
I was not made aware of any previous site history or investigations. I forwarded your e-mail to my
client and have been notified that he doesn t have any previous investig rpts. I would like to
request those two Ecosystem rpts you mention and will work on getting other site history you
mention below. Thanks for your help. I sent another email: Walter, I ve attached two rpts by
Ecosystems Strategies. Can you find out any construction details for building which currently
covers site? For instance, does it have a basement? Was a vapor barrier (or moisture barrier, if
bldg has a basement that extends into GW) installed during construction? Was site excavated during
redevelopment? If so, to what depth? Was any dewatering performed? Tanks encountered? If you have
or can obtain any of this info, please include it in revised work plan, along with history of site
s use as gas station (as mentioned in my previous email). Walter sent reply: Jon, We will do our
best to determine answers to your questions and include in our plan. - J. Kolleeny 08/18/16:
Received email from Walter Berninger of BEI: Jon, After forwarding your e-mail below and speaking
with my client, I was made aware that this site was sold in Nov. 1985 As Is, and my client does not
have any idea regarding any new buildings or basements, etc. We will make a site visit to see what
information we can gather to respond to your questions. I sent reply: Walter, Thanks, I would
appreciate that. I m concerned that if no remediation or excavation was performed before they put
up new building, there could be an issue with petroleum vapor intrusion, esp. if building has a
basement and/or if no vapor barrier was installed. If possible, please also let me know what
building is being used for. Walter sent reply: Jon, At this stage I will try to see if we can get
in touch with current owner and hope it s same as one sold to in 1985; may have to be through
lawyers. We can do a good checkout of building but if we can t interview anyone who constructed
building we may not be able to determine if a vapor barrier was installed. Let s first get some
more info, perform a site visit, see if a basement exists and then adjust Investigation Work Plan.
If we have to include sub-slab or indoor air testing we can. I sent reply: Okay, thanks. I don t
want to rush to do indoor air sampling if it s not necessary. Hopefully soil removal was performed
at time of redevelopment and a vapor barrier installed. You should go ahead & revise work plan with
whatever info you have (including two rpts I sent), and work on obtaining construction details for
building separately, so you can proceed with site investigation. Whatever info you find out about

FORMER GAS STATION (Continued) **S102402008**

construction details could be put in investigation summary rpt, with a recommendation for sub-slab
and/or indoor air sampling if you conclude that s necessary. - JK 09/16/16: Reviewed revised
Remedial Investigation Work Plan by Berninger Envt'l, Inc. (BEI), dated 9/12/16 (in DecDocs).
Revised RIWP includes site history/background section summarizing past investigations at site. Rpt
notes that details regarding construction of current on-site bldg. (e.g., any soil excavation
during construction; presence of vapor barrier, etc.) are not yet available but BEI will continue
to attempt to obtain this info. In light of GW flow direction determined to be to NW during 1997
investigation by EcoSystems Strategies, revised work plan proposes six borings, with 3 in sidewalk
along Baltic St., 2 in sidewalk along 3rd Ave., and 1 in sidewalk along Butler St. (no borings are
possible on site itself which is completely occupied by bldg). Soil samples will be collected from
borings, & GW samples will be collected from temporary well pts installed in borings. Rpt states
that BEI will implement work plan within two weeks of DEC approval, and will submit RIR within 30
days of receiving sample results from lab. I sent letter (in DecDocs) to RP Joseph Macchia, cc's to
Seth Friedland (RP's atty), Vadim Brevdo (DEC) and John Urda (DEC atty) approving work plan, but
noting that if soil impacts are found, addt'l borings may be needed to delineate soil impacts, and
if GW impacts are found, enough permanent wells to delineate GW impacts and determine GW flow
direction will need to be installed. - JK 06/12/17: Reviewed Remedial Investigation Rpt by
Berninger Envt'l, dated 3/22/17 (in DecDocs). Rpt summarizes Feb. 2017 investigation in which 6
borings were drilled in sidewalks on 3 sides of site, which is covered by a building. Soil samples
were collected and temporary wells were installed in borings to collect GW grab samples. Soil
sample results showed significant petroleum impacts at one boring location, B-5, which had PID
readings up to 2,700 ppm (interval 10-12.5 ft), and lab analysis showed 15,000 ug/kg total xylenes
(SCO is 260 ug/kg), and 8,900 ug/kg of 1,2,4-trimethylbenzene (SCO is 3,600 ug/kg). GW sample
results showed significant dissolved impacts at boring B-5 (sample GW-5), with 3,135.7 ug/L total
VOCs including 380 ug/L benzene; and minor dissolved impacts at boring B-6 (sample GW-6), which had
191.1 ug/L tVOCs. Rpt concludes that compounds detected in soil & GW are mainly breakdown
constituents of gasoline, so residual contam shows indications of degradation and will likely
undergo natural attenuation over time; however, rpt does not request spill closure or propose any
further actions. I sent letter (in DecDocs) to RP Joseph Macchia, cc's

FORMER GAS STATION (Continued) **S102402008**

to Seth Friedlander (RP's atty), Justin Halpin & Walter Berninger of BEI, stating that contam levels at B-5/GW-5 warrant further monitoring and possibly remediation. Letter requires install'n of one permanent well at that location, which should be surveyed and gauged/sampled as part of quarterly monitoring program at spill site across street at 169 3rd Ave (spill no. 9506588), for which Macchia is also RP. Letter states that data for this well can be submitted as part of quarterly rpts for 169 3rd Ave.; also states that DEC reserves right to require more wells for delineation and/or to better confirm local GW flow direction. - JK 02/01/17: Reviewed Sept. 2017 & Dec. 2017 quarterly monitoring rpts for 169 3rd Ave, spill no. 9506588 (across street from this site) by Berninger Envt'l, dated 9/30/17 & 12/31/17 (in DecDocs for both spills). Well gauging data table, site plan/water table map, & GW data table in Sept. 2017 rpt indicate that new well MW-1B was installed in sidewalk in front of site building at former boring B-5 locatio, as requested (see entry above), but rpt text makes no mention of well install'n or sampling result. Rpt title does not indicate it is a combined rpt for 2 spill sites. Gauging & sampling of MW-1B on 9/18/17 showed it had no LNAPL, but had 8,733 ug/L total VOCs. Dec. 2017 rpt text states that well MW-1B experienced a good decrease in VOCs since previous quarter. Gauging & sampling of MW-1B on 12/19/17 showed no LNAPL, and 7,547 ug/L tVOCs. Rpt makes no recommendation specific to this site/well. Again, rpt title does not indicate it's a combined rpt for 2 spill sites. I sent email to Justin Halpern of BEI, cc's to Walter Berninger of BEI & Joseph Macchia (RP), asking that future rpts make clear they are for both spill sites, and stating that impacts in MW-1B may require install'n of addt'l delineation wells & possibly remediation. - JK 04/17/18: Received email from Justin Halpin of Berninger Envt'l: Regarding 170 3rd ave, we are going to draft a delineation work plan in order to determine extent of contamination in area of current well, MW-1B. - J. Kolleeny 05/09/18: Reviewed quarterly monitoring rpt for March 2018 by Berninger Envt'l Inc. (BEI), dated 3/31/18 (in DecDocs). Rpt is for both 156-170 3rd Ave (sp 9607280) and 169 3rd Ave (sp 9506588) sites. Gauging & sampling of one on-site well MW-1B on 3/26/18 showed no LNAPL detected; sample result showed well MW-1B had 8,024 ug/L total VOCs (up from 7,547 ug/L in Dec. 2017). Rpt includes a well construction log for MW-1B. Rpt states that BEI will be requesting closure of spill 9506588 across street (169 3rd Ave) in order to focus remedial efforts on this site. Next quarterly event will be in June 2018. I sent

FORMER GAS STATION (Continued) **S102402008**

email to Justin Halpin of BEI: Justin, I wanted to follow up on a comment you made in an email sent
on April 17th, indicating that BEI would be preparing a work plan for delineation of GW impacts
observed at well MW-1B at 156-170 3rd Avenue. I agree that addt'l delineation in that area is a
good idea before proposing remedial actions to address impacts. Can you let me know status of that
work plan, when I can expect to receive it? - JK 05/18/18: Received email reply from Justin Halpin
of BEI: Jon, As per our last investigation at 170 there may be a small data gap (between GW-5 &
GW-6), but based on GW flow we calculated and given situation down gradient (169 spill 9506588)
would you object to us sampling or using data from MW-1 & MW-2 on 169 site in order to justify
completion of RI at 170? If we could move forward toward treatment in MW-1B area without having to
re-mobilize, pull permits, etc. and use our already installed down-gradient wells at 169 to zero
out 170, that would help us direct costs toward clean-up. Just a thought, as we are willing to do
whatever you think is best. - J. Kolleeny 05/21/18: On 5/18/18, I sent reply to Justin Halpin of
BEI: Justin, problem is that wells at 169 3rd Ave only delineate GW impacts. Remedial investigation
at 156-170 3rd Ave found petroleum impacts in soil above water table, from 5 ft below grade on
downward (see attached boring log). A remedial proposal targeting only GW impacts, based on data
you have, may be inadequate to clean up contam in well MW-1B, which is likely being fed by soil
impacts. Soil impacts may only be localized to area of that well, or they might extend in either
direction under sidewalk for some distance, or they could even extend underneath on-site building.
I believe that earlier investigations at this site, performed before building was constructed and
covered site, found petroleum impacts at some locations on property; these could be acting as
source areas for GWimpacts in well MW-1B. Probably best thing to do would be to drill borings on
either side of MW-1B in sidewalk, and to also drill an angled boring extending back under building,
to delineate soil impacts to extent feasible (i.e., in 3 directions). Seeing as you re already
trying to rein in costs for your client, I don t expect you ll want to do angled boring. But at
very least, borings on either side of MW-1B (perhaps installing temporary well points to grab GW
samples) would help determine how localized soil & GW impacts in MW-1B are, and thus help you
develop a remedial plan accordingly. Wells across 3rd Avenue are too far away to determine how
localized impacts are (especially for soil!). This may seem like an unnecessary expense, but if you
develop a remedial plan without a better idea of extent of impacts,

FORMER GAS STATION (Continued) **S102402008**

there s a good chance that
remedial efforts may not succeed and would not be money well spent. Spending more up front might
save money down road. Please feel free to call to discuss. On 5/21/18, Justin sent reply: Jon,
Agreed, we will develop a suppl'tl Remedial Investig Work Plan & send for your review & approval. -
JK 06/13/18: Reviewed Supplemental Remedial Investigation Work Plan by Berninger Envt'l (BEI) dated
6/13/18 (in DecDocs). Work Plan proposes drilling 3 borings in sidewalk along 3rd Ave to delineate
impacts found in former boring B-5/GW-5 (now permanent well MW-1B). Plan states that soil will be
screened continuously and samples collected from highest PID reading interval, or if no PID
readings, from deepest dry sample. Then temporary well points will be installed in borings to
collect GW grab samples. Results will be presented to DEC in rpt of findings. I sent letter (in
DecDocs) to RP Joseph Macchia, cc's to Walter Berninger, Justin Halpin & Kimberly Lotito of BEI
approving work plan but commenting that if impacts are found in borings, DEC may require install'n
of one or more permanent wells, and requiring that investigation results be used to help prepare a
RAP to address subsurface impacts at site. - J. Kolleeny 09/17/18: Reviewed Supplemental Remedial
Investigation Rpt by Berninger Envt'l (BEI) dated 7/16/18 (in DecDocs). In June 2018, a Geoprobe
was used to advance 3 borings to a depth of 20 ft; borings were in sidewalk along 4th Avenue to
north and south of existing well MW-1B. Soil samples were collected from all 3 borings; BEI tried
to collect GW samples from all 3 borings, but only one (B-7) had sufficient water for sampling.
Soil screening & sampling data showed a smear zone between 10-15 ft bgs; interval between 10-12 ft
(just above water table) had PID reading of 1,491 ppm in B-7, 1,250 ppm in B-8, and 1,500 ppm in
B-9. Soil samples from this interval had elevated levels of VOCs; e.g., sample from B-7 had 3,900
ug/kg of ethylbenzene, 18,000 ug/kg total xylenes, and 15,000 ug/kg of 1,2,4-trimethylbenzene;
sample from B-9 had 4,700 ug/kg of ethylbenzene, 15,000 ug/kg of total xylenes, and 23,000 ug/kg of
1,2,4-trimethlybenzene. GW sample from B-7 had ~17,000 ug/L total VOCs. Rpt recommends installing
permanent wells in all 3 borings (B-7, -8 & -9), and drilling an addt'l boring/well to south of B-8
for delineation. Findings will be used to evaluate remedial alternatives and develop a RAP. I sent
letter (in DecDocs) approving this proposal, but also requiring a well at former boring B-6
location (for better triangulation and determination of GW flow direction) to Joseph Macchia (RP),
cc's to Walter Berninger & Justin Halpin of BEI. - JK 10/02/18: Reviewed June 2018 quarterly GW

FORMER GAS STATION (Continued) **S102402008**

monitoring rpt by Berninger Envt'l for this site and site across street at 169 3rd Ave (sp 9506588), dated 6/30/18 (in DecDocs). Gauging & sampling of on-site well MW-1B in June 2018 showed no LNAPL in well and GW flow to S along 3rd Ave; GW sample had 11,814 ug/L total VOCs (up from 8,024 ug/L in March 2018). [As noted in above entry, BEI will perform a supplemental investigation to delineate impacts in well MW-1B.] Rpt states that BEI will be petitioning for closure of sp 9506588 across street at 169 3rd Ave, in order to focus efforts on this site. Next quarterly GW monitoring event is scheduled for Sept. 2018. - J. Kolleeny 12/06/18: Reviewed Sept. 2018 quarterly GW monitoring rpt by Berninger Envt'l for this site and site across street at 169 3rd Ave. (sp 9506588), dated 9/30/18 (in DecDocs). Gauging & sampling of on-site well MW-1B on 9/26/18 showed no LNAPL in well and GW flow to S along 3rd Ave. GW sample had 43,654 ug/L tVOCs, up from 11,814 ug/L in June 2018. Rpt states that BEI will continue to closely monitor well MW-1B due to recent dramatic increase in VOCs. Rpt states that BEI will be petitioning for closure of sp 9506588 across street at 169 3rd Ave., in order to focus efforts on this site. Next quarterly GW monitoring event is scheduled for December 2018. - J. Kolleeny 01/31/19: Received email from Justin Halpin of Berninger Envt'l: Jonathan, Just an update on our progress: We were able to install 4 addt'l wells (~18 DTB) labeled MW-2, 3, 4 and 5. We sampled south of B-8 location and it had petroleum odors from 10-15 ft (B-10), so we installed a well at this location too. We also installed wells at B-7, 8 and 9, all of which had petroleum odors, altho there is very little recovery in those wells. We were not able to get to B-6 area south of building as there was construction in area, and we could not get access. We don't want to have to re-mobilize just for this one well, especially since that area was clean . Can you accept this? If it is a matter of triangulation for GW flow, then I could use 169 3rd ave wells to triangulate. Please let me know your thoughts and if you would like a Well Completion Rpt/logs/figures with updated map? I could include it in quarterly Rpt, which I'm thinking now we should issue a separate Rpt for 156-170 with all these new wells. I sent reply: Justin, Glad you ve had some success installing new wells. As for well I requested at B-6, triangulation for determining GW flow was part of reason. Other reason (related to GW flow) is this site is listed as an Upland Site to Gowanus Canal EPA Superfund Site, i.e., it's a possible contributor of contam to Gowanus Canal. When I participate in conference calls with DEC staff in Albany about Upland spill sites, I was hoping to be able to state with

FORMER GAS STATION (Continued) **S102402008**

confidence that there is no
GW contam migrating from this site towards Gowanus. However, if there is no access to that sidewalk
area, then I will hold off on requesting well, and you can use some of wells across street at 169
3rd Ave to help determine local GW flow direction. (I know well gauging at that site has
consistently shown GW flowing to E or SE, rather than SW towards Gowanus, but this doesn t make
sense so I was hoping to have a well at B-6 to confirm on-site GW flow direction.) As for reporting
on current work, I will definitely want to receive well logs, updated figures, etc. It s up to you
if you want to prepare a separate investigation summary rpt or include a summary of this work in a
quarterly rpt. I agree tho that at this point it makes sense to prepare separate quarterly rpts for
156-170 3rd Ave and 169 3rd Ave. Thanks for update, please let me know if you want to discuss any
of this further. - JK 03/05/19: Reviewed Dec. 2018 quarterly GW monitoring rpt by Berninger Envt'l
for this site and site across street at 169 3rd Ave. (sp 9506588), dated 12/31/18 (in DecDocs).
Gauging of wells at both sites on 12/20/18 showed no LNAPL in any wells, and showed GW flow to SSE.
Sampling of on-site well MW-1B showed it had 46,579 ug/L tVOCs (up from 43,654 ug/L in Sept. 2018.
Rpt states BEI will continue to closely monitor well MW-1B due to increases in VOCs, and will be
requesting closure of sp. 9506588 across street at 169 3rd Ave. in order to focus efforts on this
site. Next quarterly GW monitoring event is scheduled for March 2019. - J. Kolleeny 03/12/19:
Received email from Justin Halpin of BEI: Jonathan, just an update on 170 3rd ave.: We are sampling
new wells (we now have 5 wells) today and will include results in quarterly Rpt this month under a
separate cover from 169 3rd ave. site. I will also include well completion logs for four wells
installed. I sent email reply: Justin, Thanks for this update, it definitely makes sense to
separate rpts for 156-170 3rd Ave. & 169 3rd Ave. spill sites at this point. - JK 05/16/19:
Reviewed quarterly monitoring rpt by Berninger Envt'l dated 3/31/19 (in DecDocs). Well gauging on
3/12-13/19 showed sheen in wells MW-1B, MW-2B and MW-3B, and GW flow to SE. GW sampling showed well
MW-1B had 25,558 ug/L total VOCs (down from 46,579 ug/L in Dec. 2018), well MW-2B had 30,158 ug/L
tVOCs (new well, 1st time sampled), well MW-3B had 6,014 ug/L tVOCs (new well), well MW-4B had
10,127 ug/L tVOCs (new well), well MW-5B had 3,161 ug/L tVOCs (new well). Rpt includes boring logs
for new wells. Rpt notes that well MW-1B showed a significant decrease in tVOCs after its dramatic
increase in Dec. 2018. Rpt states that BEI will continue to closely monitor VOC levels in MW-1B,

FORMER GAS STATION (Continued) **S102402008**

and will closely monitor VOC levels in wells MW-2B thru MW-5B due to elevated VOC levels in those
wells. BEI will perform a GW survey within next quarter and provide an updated GW gradient map.
Next quarterly event is scheduled for June 2019. - J. Kolleeny
08/05/19: Reviewed quarterly
monitoring rpt by Berninger Envt'l dated 6/30/19 (in DecDocs). Gauging of 5 site wells on 6/19/19
showed a sheen in well MW-2B (2 gals were bailed), and together with past data for well MW-1 across
street at 169 3rd Ave, suggested GW flow to SE. GW sampling showed well MW-1B had 673,790 ug/L
total VOCs (up from 25,558 ug/L in March 2019), well MW-2B had 37,387 ug/L tVOCs (up from 30,158
ug/L in March 2019), well MW-3B had 15,850 ug/L tVOCs (up from 6,014 ug/L in March 2019), well
MW-4B had 20,210 ug/L tVOCs (up from 10,127 ug/L in March 2019), well MW-5B had 5,420 ug/L tVOCs
(up from 3,161 ug/L in March 2019). Site plan figure showing both 156-170 3rd Ave and 169 3rd Ave
shows well MW-1 at 169 3rd Ave with red X over it, and shows well E-3 still existing. Rpt notes
that VOCs are elevated at all 5 site wells and that increases occurred this quarter, states that
BEI will closely monitor MW-1B due to dramatic increase in VOCs, and will closely monitor other 4
site wells due to VOC increases. Rpt states that BEI will perform an addt'l GW survey within next
quarter to include well E-3 and provide an updated GW gradient map. Next quarterly sampling event
is scheduled for Sept. 2019. - J. Kolleeny 08/05/19: I sent email to Justin Halpin of BEI, cc's to
Joseph Macchia (RP) and Alicia Patti of BEI: Justin, I just reviewed June 2019 monitoring rpt for
this site, and I m perplexed that rpt does not mention obvious need for remedial actions at site.
June 2019 GW sampling results show significant increases in total VOCs in all five wells sampled.
Increase in well MW-1B, from 25,558 ug/L total VOCs in March 2019 to 673,790 ug/L tVOCs in June
2019, is particularly alarming. This site is clearly highly contaminated. This is not a situation
that calls for continuing to closely monitor VOC concentrations; it s a situation that calls for
implementation of aggressive remedial actions as soon as possible to address contamination. I m
also confused by situation across street at 169 3rd Ave, where I recently closed spill 9506588. My
closure letter specified that well MW-1 at that site be kept open for gauging & sampling related to
spill 9607280. However, site plan in rpt shows a red X over well MW-1, suggesting it has been
destroyed or decommissioned. Text makes no mention of this, but states that well E-3 at 169 3rd Ave
will be included in an upcoming GW survey within next quarter to help determine GW gradient (there
s no mention of sampling well E-3). An off-site well at 169 3rd Ave

FORMER GAS STATION (Continued) **S102402008**

should be sampled to evaluate
if increasing VOCs at 156-170 3rd Ave are migrating across street. Well MW-1 at 169 3rd Ave was in
a better position for this than well E-3. At this point, I think a new well should be installed in
sidewalk in front of 169 3rd Ave to help determine GW flow direction and evaluate off-site
migration of contaminant plume at 156-170 3rd Ave. At this point I must also insist on install'n of
an addt'l monitoring well along Butler St, in vicinity of earlier boring B-6 (which was discussed
earlier but put on hold due to lack of access caused by construction work), to help confirm that
contamination is not flowing towards Gowanus Canal and help in calculating local GW flow direction.
Please begin preparation of a RAP proposing actions to address high levels of GW contamination at
156-170 3rd Ave and including a proposal for addt'l monitoring wells along Butler St and in front
of 169 3rd Ave, as discussed above. I also think an addt'l well is needed to north of well MW-2B,
which had second highest tVOC concentration in June 2019, to delineate those impacts. RAP and well
install'n plan should be submitted by 8/30/19. Feel free to call to discuss these issues. - J.
Kolleeny 08/06/19: Received email reply from Justin Halpin of BEI: There s not much we can do in
this area in sidewalk, and building occupies entire site footprint with no access. Wells produce
very little water, barely enough recovery to sample and high turbidity. Only options I see are
possibly SVE or direct biological treatment to wells in order to treat tight soils and perched
water. At 169 our techs accidently closed MW-1, so it s gone. I don t see need for it for
surveying, when we have E-3. Also, gradient does not really change. I believe we have down-gradient
data at B-6/GW-6 location sample from first investigation that we could use as Gowanus delineation
sample as there were very minimal detections (total VOCs less than 200 ppb). We will begin to
develop a RAP and well install'n plan by end of month. I sent reply: Justin, Thanks for getting
back to me. I understand that building occupies entire site. But it s possible to do angled
drilling to install a well or wells under building to see if there s free product there and to use
for remediation purposes. I have a couple of sites where this has been utilized. I recall that GW
sample from B-6/GW-6 was not that bad, but seeing as VOCs have increased pretty significantly in
all wells along 4th Ave, I believe it is worthwhile to install a permanent well there to monitor
any movement of contaminants in that direction, and to provide another data point to confirm GW
flow direction. I m confused by your reference to perched water at site do you believe that

FORMER GAS STATION (Continued) **S102402008**

existing wells are not installed into regional aquifer? I m assuming that regional GW is relatively
shallow in this area. Also, there may be other remedial options besides just SVE or adding
biological treatments to existing wells. For instance, if SE GW flow direction is correct, you
could install wells in sidewalk along Baltic St (angled wells extending under building, or even
just conventional wells, tho I think angled wells would be more effective) and do injections of a
surfactant and/or chemical oxidant, then use wells along 4th Ave to attempt to extract any
mobilized LNAPL, plus contaminated GW. There are a number or relatively new injectable remedial
products on market these days PlumeStop, PetroCleanze, etc. It might also be possible to perform
some sort of dual-phase extraction, to recover both soil vapors and small amounts of LNAPL/GW,
using wells installed underneath and/or around building & equipped with drop tubes. Feel free to
call to discuss. - JK 09/10/10: Reviewed draft Remedial Action Plan by Berninger Envt'l dated
August 2019. RAP proposes two phases of remedial activity, with Phase I involving performance of
VEFR on impacted wells. Plan states that one or two rounds of VEFR will help reduce severely high
VOC levels in well MW-1B and surrounding wells. Quarterly GW monitoring in Sept. & Dec. 2019 will
evaluate effectiveness. When significant decrease in VOCs is observed, BEI will proceed to Phase II
of plan: bio-remedial injections. Plan proposes to use existing monitoring wells to inject a
bacteria/nutrient solution, stating that this is most viable option given site conditions.
Injections would be performed into wells MW-1B, MW-3 & MW-4, with wells MW-2 & MW-5 used to monitor
injections. RAP lists quantities of M1000H (bac-t) and nutrient/H2O mix that will be applied to
each well. Nearby wells will be gauged during injections to make sure water levels don't rise too
quickly, and monitored for pH. Follow-up quarterly GW monitoring will evaluate effectiveness of
injections. I sent email to Justin Halpin of BEI: Justin, I ve looked over RAP, and have some
concerns. First, RAP mentions doing just one or two VEFR events to lower VOC levels in wells. In my
experience, one or two events will not be sufficient. I have a spill site where there were a number
of wells with total VOCs in 20-25 ppm range. Consultant performed VEFR weekly for more than a year,
and succeeded in lowering most wells to about 5-7 ppm total VOCs (not low enough for spill
closure). When they stopped doing VEFR, VOC levels rebounded. Other problem I see is that plan does
not target area I presume to be source of contamination, which is most likely underneath on-site
building. Existing wells all had soil impacts right at water table,

FORMER GAS STATION (Continued) **S102402008**

indicating they are not in
source area. Treating existing wells, which are down-gradient of presumed source, with bacteria &
nutrients is not likely to succeed (in my opinion) if source continues to feed contaminant plume.
Would you (and your client) be willing to install one angled well that extends beneath building,
up-gradient of well MW-1B? Such a well might encounter soil impacts above water table, or at least
get closer to presumed source, and could be used for VEFR and/or to deliver chemical or biological
treatments. Please let me know what you think, and feel free to call to discuss. - J. Kolleeny
09/11/19: I sent another email to Justin Halpin of BEI: Justin, I have a couple more comments on
RAP. In my comments on June 2019 monitoring rpt, in which I asked for preparation of RAP, I stated
that contaminant plume is not fully delineated by existing permanent wells, and I asked that RAP
include a proposal for install'n of addt'l permanent wells to more completely delineate (zero-out,
as we say here) plume. This RAP does not include a proposal for delineation wells. I think a
permanent well should be installed north of existing well MW-2, and another permanent well should
be installed south of well MW-5, to define edges of contaminant plume and evaluate any potential
migration of plume. Also, I find Fig. 3 Site Map confusing, showing designation numbers of past
soil borings / temporary wells, which differ from designation numbers of current permanent wells
(MW-1B thru MW-5) shown on Fig. 4 (Remedial Application Locations). Is there some way to clarify
this? Maybe Fig. 4 could include designation nos. of former borings/temporary wells in parentheses
next to current well numbers? Please let me know. As always, feel free to call to discuss these and
my earlier comments. Received reply from Justin: Jon, I will take a look at Fig. 3/4 discrepancy
and include delineation wells in RAP. I'm thinking for this project a conf. call or maybe we can
meet at site to discuss this further if you are available sometime, thank you. - JK 09/12/19: I
sent reply to Justin Halpin: Justin, a conference call would be easier for me to schedule, but if
you think it s important to meet at site I can arrange to meet you there next week. I do understand
that entire property is covered by a building, which limits ability to investigate and remediate
on-site contaminant source area. Earlier in this project, I provided some older documents to Walter
Berninger a 1996 Envt'l Audit and a 1997 Summary of Subsurface Investigation and Monitoring Well
Install'n, both prepared by Ecosystems Strategies, Inc. These rpts document presence of significant
gasoline-related impacts at various locations on property, which are now covered by building. This

FORMER GAS STATION (Continued) **S102402008**

is why I stated that treating wells in sidewalk along 3rd Ave is not likely to address source area(s) of spill or spills on this site, especially if GW flow is to SE. Let me know if you need copies of those rpts and I ll be happy to forward them. Also, I had asked Walter if he could obtain any info about whether or not soil excavation was performed during development of property with on-site building, or if any other remediation was performed. I also asked if building has a basement and if he could confirm whether a vapor barrier/membrane was installed beneath building, but Walter was not able to obtain any of this info. (Subsurface investigation rpt stated there were plans to excavate site from 5 ft bgs to 10-15 ft bgs, and also recommended install'n of an SVE system and GW extraction & treatment system.) At this point, I think it might be worthwhile if BEI and/or your client could make another attempt to obtain this info. Please let me know if you want to schedule a conference call or if you believe it would be more productive to meet at site, and let me know if you need those old rpts. - J. Kolleeny 09/30/19: Met Justin Halpin of BEI at site; afterwards, I sent follow-up email: Justin, It was nice meeting you today at site. As we discussed, I've attached a copy of April 1997 investigation summary rpt by Ecosystems Strategies, Inc. which has soil & GW data for property from before building was constructed and covered site. Having visited site and seen utility mark-outs, I understand how difficult it would be to install any addt'l wells in sidewalk along 3rd Avenue. However, I would still appreciate it if you could discuss with your client possibility of either installing an angled well under building (which has no basement) coming from Baltic St sidewalk, or perhaps installing a well or wells within building in area we observed with high ceiling. Either of these options might give you a better chance of treating some of contaminant source that must still be present under building. Also as we discussed, well you found along Baltic S should be surveyed and added to monitoring well network for gauging to help evaluate GW flow direction, and it should be sampled at least once to confirm absence of impacts in this area. I would also like to see a well installed along Butler St (in area of earlier Boring B-6) to further pin down GW flow direction and confirm that no impacts from site are migrating towards Gowanus Canal. Finally, Berninger Envt'l can proceed with first phase of draft RAP performing VEFR on impacted wells along 3rd Ave to attempt to reduce dissolved contaminant levels and help make any ensuing remedial actions (e.g., bacteria/nutrient or chemical oxidant injections) more effective. I want to repeat that without any

FORMER GAS STATION (Continued) **S102402008**

actions to treat source
area(s) underneath building, I believe that remedial actions
implemented using only wells along 3rd
Ave are unlikely to reduce contaminant concentrations to levels
suitable for spill closure within a
reasonable time frame. Please let me know when you have scheduled VEFR
events, and let me know
outcome of discussions regarding drilling along Baltic St side of
building for monitoring and
remediation purposes. - J. Kolleeny 11/08/19: I sent email to Justin
Halpin of BEI: Justin, I was
wondering if there s any update on this spill site? Have any VEFR
events been scheduled or
performed as an IRM? Is BEI in process of revising draft RAP? Has
there been any further
consideration of idea of installing an angled well to try to reach
presumed source area beneath
building? Please let me know if there s any update on this project.
Received email reply from
Justin: Working on getting disposal approval for liquids, and then
scheduling VEFR ASAP. We are
currently having a lot of issues at our office as we lost all of our
servers, so we are a little
behind, so please bear with any delays in short-term, thank you and
have a nice weekend. - J.
Kolleeny 11/12/19: Reviewed quarterly GW monitoring rpt by Berninger
Envt'l dated 9/30/19 (in
DecDocs). Gauging of 5 site wells on 9/19/19 showed a sheen in well
MW-1B; ~2 gals of product/water
mix were bailed from well. Rpt includes a water table contour map
using water table elevation
measurements from June 2019 for this site and from 169 3rd Ave site,
showing GW flow to SE. GW
sampling results showed well MW-1B had 36,663 ug/L total VOCs (down
from 673,790 ug/L in June
2019), well MW-2B had 29,000 ug/L tVOCs (down from 37,387 ug/L in June
2019), well MW-3B had 12,028
ug/L tVOCs (down from 15,850 ug/L in June 2019), well MW-4B had 24,923
ug/L tVOCs (up from 20,210
ug/L in June 2019), well MW-5B had 7,899 ug/L tVOCs (up from 5,420
ug/L in June 2019). Rpt notes
that tVOCs at all 5 wells remain elevated, but show both increases and
decreases from last quarter;
states that BEI will continue to closely monitor VOCs at well MW-1B
due to dramatic increase in
June 2019, and will closely monitor other 4 wells due to elevated
VOCs; rpt states that BEI will
perform an addt'l GW survey for site in next quarter, including well
E-3 at former spill site 169
3rd Ave., and will provide an updated GW gradient map. - J. Kolleeny
12/11/19: Received email from
Justin Halpin of BEI: Jon, Just an update on subject site: We have our
approval for disposal of
contaminated GW, so we can get VEFR on schedule. I'm looking at next
week, while also performing
quarterly sampling event that is due for this month. I sent email
reply: Justin, Thanks for this

FORMER GAS STATION (Continued) **S102402008**

project update, glad to hear you ll be scheduling VEFR event(s) at site. (Is intention to perform a single VEFR event, or multiple events, and if multiple events, at what frequency?) As a reminder, I believe that VEFR was proposed/approved as an interim remedial measure and was not intended to be complete remedial approach for site. I still need to receive a revised version of draft RAP you sent in August 2019, with a comprehensive remedial plan that hopefully will include some efforts to address presumed contaminant source area beneath on-site building. Please let me know if BEI is working on a revised RAP, and let me know when VEFR events have been scheduled. - J. Kolleeny
12/19/19: Received email from Justin Halpin of BEI: We performed VERF today and will return tomorrow to hopefully pull out several hundred gals of contaminated water. Today we were able to remove mostly free product, let wells re-charge and then we collected quarterly samples. Tomorrow we hope to get a lot more volume than today but either way it's progress moving forward. Also, I will issue a revised RAP from August 2019 version. We will see how VEFR goes tomorrow, but I was thinking of doing it monthly or even bi-weekly if we are seeing positive results. I sent email reply: Justin, Thanks for getting back to me, glad to hear you were able to pump out free product and will return tomorrow to pump out contaminated GW. A revised RAP proposing ongoing VEFR events sounds okay, tho I m concerned that you ll get diminishing returns if you can t access and address source area. But as you said, let s see how it goes and I m fine with VEFR as a remedial approach as long as you re seeing positive results. - J. Kolleeny 01/20/20: Received email from Justin Halpin of BEI with attached revised RAP; email stated; Jon, I attached final version of RAP. We are sticking with VEFR & bacteria applications for final RAP. I must say that after just 1 VEFR event, my sampling technician said water in wells cleared up pretty good with a much milder odor of gasoline than before VEFR. Will review revised RAP. - JK 02/05/20: Reviewed Remedial Action Plan by BEI dated January 2020 (Final). RAP proposes a two-phase approach using VEFR and then bacteria-nutrient injections to address GW impacts at site. Rpt proposes one or two VEFR events on wells MW-1B and other nearby wells prior to injections to reduce very high VOC levels.
Effectiveness of VEFR will be evaluated by Sept. and Dec. 2019 GW sampling events. When VOCs decrease below 100,000 ug/L tVOCs in MW-1B, injection phase will begin. Existing monitoring wells MW-1B, MW-3 & MW-4 will be used to inject a bacteria-nutrient solution, and injections will be monitored at wells MW-2 and MW-5. Solution will be pumped in by

FORMER GAS STATION (Continued) **S102402008**

GeoProbe, and BEI anticipates 15 ft
radius of influence. Rpt states that results of Sept. 2019 GW sampling event will be used as
pre-application data; post-application effectiveness will be evaluated with Dec. 2019 GW sampling
data to determine need for addt'l applications. Rpt states that BEI will mobilize to site to begin
Phase I of plan (VEFR) within 30 days of DEC approval. I checked quarterly monitoring rpt for Dec.
2019 (rcvd on 1/23/20) and noted that tVOCs in well MW-1B already decreased below 100,000 ug/L in
Sept. sampling event, and that a VEFR event has already been performed at site on Dec. 19-20, 2020,
recovering ~35 gals of product. I sent email to Justin Halpin of BEI: Justin, I m reviewing revised
RAP for this site and have questions. RAP, dated January 2020, references June 2019 GW sampling
data as though it s most recent data available. Rpt proposes only one or two VEFR events, and
states that GW monitoring in Sept. & Dec. 2019 will evaluate effectiveness of VEFR events. However,
it s my understanding that only one VEFR event has been performed, in Dec. 2019 (summarized in Dec.
2019 monitoring rpt). Has another VEFR event been performed? Is there an intention to perform
another VEFR event as part of remedial plan? In our email exchange below, you said (on 12/19/19)
you were thinking of proposing monthly, or even bi-weekly, VEFR events as part of revised RAP.
Doing just one or two VEFR events (as proposed in current RAP) does not seem to me to be aggressive
enough for this site, even if followed by bacteria-nutrient injections. Dec. 2019 monitoring rpt
states that during two days of VEFR, 35 gals of product were recovered. Was that pure product? Your
12/19/19 email stated that you would return to site next day to hopefully pull out several hundred
gals of GW. How many gals of GW (or total fluids) were actually recovered? Monitoring rpt should
provide this information, specifying how many gals of GW, product, or total fluids were recovered
from each well, and should also include a waste disposal manifest for recovered water. Plus, GW
samples were collected on Dec. 19th after first day of VEFR, so samples wouldn t really evaluate
effectiveness of VEFR performed next day on Dec. 20th. But my main issue is that January 2020 RAP
is already out of date in terms of actions already performed at site (i.e., Sept. and Dec. GW
sampling events, and Dec. VEFR event), and it s not clear that BEI is proposing any addt'l VEFR. I
think RAP needs to be written as though aware of events that have already taken place, i.e., Sept.
and Dec. 2019 quarterly sampling events and Dec. 2019 VEFR event. Please let me know your thoughts,
and feel free to call to discuss. - J. Kolleeny 02/06/20: I received email reply from Justin Halpin

FORMER GAS STATION (Continued) **S102402008**

of BEI, responding to my questions as follows: JK: Has another VEFR event been performed? JH: Not yet, we wanted to evaluate success of first event, which I was slightly apprehensive about due to geology, but we still recovered pure product. JK: Is there an intention to perform another VEFR event as part of remedial plan? JH: Yes, I would like to do at least monthly and an event in February. JK: In our email exchange on 12/19/19, you said you were thinking of proposing monthly, or even bi-weekly, VEFR events as part of revised RAP. Doing just one or two VEFR events (as proposed in current RAP) does not seem to me to be aggressive enough for this site, even if followed by bacteria-nutrient injections. JH: We will increase the frequency of events. JK: Dec. 2019 monitoring rpt states that during 2 days of VEFR, 35 gals of product were recovered. Was that pure product? Your 12/19/19 email stated that you would return to site next day to pull out several hundred gals of GW. How many gals of GW (or total fluids) were actually recovered?Monitoring rpt should provide this info, specifying how many gals of GW, product, or total fluids were recovered from each well, and should include a waste disposal manifest for recovered water. JH: Mostly pure product, which was positive but wells did not recover as planned. If we can continue to recover pure LNAPL I think we can significantly reduce source that's flowing at remedy zone. JK: Plus, GW samples were collected on Dec. 19th after first day of VEFR, so samples wouldn t really evaluate effectiveness of VEFR performed next day on Dec. 20th. JH: We concur and are confidant with field characteristics we observed. We will space out effectiveness sampling and remedy action. JK: My main issue is that Jan. 2020 RAP is already out of date in terms of actions already performed at site (i.e., Sept. & Dec. GW sampling events and Dec. VEFR event), and it s not clear that BEI is proposing any addt'l VEFR events. I think RAP needs to be written as though aware of Sept. and Dec. 2019 quarterly sampling events and VEFR event that has already taken place. JH: Agreed. We will prepare a revised version documenting all activities to date, and move forward about same plan with a more aggressive approach. - J. Kolleeny 02/18/20: Reviewed GW monitoring rpt for December 2019 by Berninger Envt'l dated 12/31/19. Well gauging on 12/19/119 showed GW flow to SE, consistent with earlier data. Rpt states that as previously indicated, VEFR was performed on wells MW-1B, MW-2B, MW-3B & MW-4B on 12/19/19 in an effort to remove floating product; VEFR was performed again on 12/20/19 and included well MW-5B; total of ~35 gals of product and substantial amount of petroleum vapors were recovered. GW sampling showed well MW-1B had 39,215 ug/L

FORMER GAS STATION (Continued) **S102402008**

total VOCs (up from 36,663
ug/L in Sept. 2019), well MW-2B had 4,284 ug/L tVOCs (down from 29,000 ug/L in Sept. 2019), well
MW-3B had 7,648 ug/L tVOCs (down from 12,028 ug/L in Sept. 2019), well MW-4B had 59,457 ug/L tVOCs
(up from 24,923 ug/L in Sept. 2019), well MW-5B had 4,470 ug/L tVOCs (down from 7,899 ug/L in Sept.
2019). Rpt notes that VOC levels increased in wells MW-1B & MW-4B, but decreased oin wells MW-2B,
MW-3B & MW-5B. Rpt states that BEI will continue to closely monitor elevated VOC concentrations in
site wells, with next quarterly sampling event scheduled for March 2020. - J. Kolleeny 03/13/20:
Reviewed Remedial Action Plan February 2020 Final Rev2 by Berninger Envt'l, in DecDocs with date
2/26/20. RAP proposes to address GW contamination at site in two phases. First, BEI will conduct 4
VEFR events (in addition to 2 VEFR events already been performed) to reduce high levels of GW
contam at site. When a significant decrease in contaminant levels is observed, BEI will proceed
with 2nd phase of plan, involving injections of Micro-Bac bacteria/nutrient solution to promote
biodegradation of petroleum compounds, further reducing contaminant levels. Quarterly GW monitoring
will continue to be conducted at site to evaluate effectiveness of remedial actions and determine
need for supplemental applications of Micro-Bac solution. RAP has a project schedule stating that
BEI will mobilize to site to begin 1st phase of plan within 30 days of DEC approval, with VEFR
events planned for March, April, May & June of 2020. I sent letter (in DecDocs) to RP Joseph
Macchia, cc's to Justin Halpin & Alicia Patti of BEI, approving plan but stating that if these
actions fail to achieve spill closure levels, addt'l actions will be required. - J. Kolleeny
07/24/20: Reviewed GW monitoring rpt for March 2020 by Berninger Envt'l dated 3/31/20. A VEFR event
on 2/18/20 removed ~75 gals of product (and water?) from site wells. Gauging of 4 out of 5 site
wells (access to well MW-5B was blocked) on 3/27/20 showed a trace of LNAPL in well MW-1B (0.005
ft), and water level measurements continued to show GW flow to SE. Rpt states that VEFR was not
performed on 3/27/20 site visit but will resume as soon as possible. GW sampling on 3/27/20 showed
well MW-1B had 14,864 ug/L total VOCs (down from 39,215 ug/L in Dec. 2019), well MW-2B had 3,717
ug/L tVOCs (down from 4,284 ug/L in Dec. 2019), well MW-3B had 4,535 ug/L tVOCs (down from 7,648
ug/L in Dec. 2019), well MW-4B had 3,569 ug/L tVOCs (down from 59,457 ug/L in Dec. 2019), well
MW-5B was blocked and could not be sampled (had 4,470 ug/L tVOCs in Dec. 2019). Rpt notes that VOC
levels decreased in all 4 wells sampled this quarter, with major decrease in well MW-4B. Rpt states

FORMER GAS STATION (Continued) **S102402008**

that changes in VOC levels may be due to fluctuations in GW levels. Next quarterly sampling event is scheduled for June 2020. - J. Kolleeny 09/22/20: Reviewed GW monitoring Rpt for June 2020 by Berninger Envt'l dated 6/30/20. Gauging of 5 wells on 6/23/20 showed no LNAPL detected and GW flow to SE, consistent with earlier data. VEFR events on 4/14/20 removed ~75 gals of contaminated liquids and on 6/23/20 removed ~100 gals of contam liquid from 4 of 5 site wells (MW-1B, MW-2B, MW-3B & MW-4B), bringing total removed to date by VEFR to 255 gals total fluids. GW sampling on 6/23/20 showed well MW-1B had 84,630 ug/L total VOCs (up from 14,864 ug/L in March 2020), well MW-2B had 10,807 ug/L tVOCs (up from 3,717 ug/L in March 2020), well MW-3B had 8,978 ug/L tVOCs (up from 4,535 ug/L in March 2020), well MW-4B had 11,449 ug/L tVOCs (up from 3,569 ug/L in March 2020), and well MW-5B had 4,544 ug/L tVOCs (not sampled in March 2020 due to blocked access; had 4,470 ug/L tVOCs in Dec. 2019). Rpt notes that tVOCs increased in 4 of 5 wells this quarter, states that increases/decreases in VOCs may be due to rise/fall of GW elevations. Next quarterly monitoring event will be in Sept. 2020. - JK 09/22/20: I sent email to Justin Halpin of Berninger Envt'l: Justin, I was wondering where we currently stand in terms of implementation of approved remedial plan for this spill site? RAP, which I approved in March 2020, called for performing four VEFR events (in addition to two which had already been performed prior to submission & approval of final revised RAP), and that when significant decreases are seen in GW contaminant levels, injections of a bacteria/nutrient mixture will be performed. I just reviewed GW sampling results for June 2020, which showed increases in total VOCs in 4 out of 5 site wells, including a major increase in MW-1B from 14,864 ug/L total VOCs in March to 84,630 ug/L tVOCs in June 2020. As I said early in this project, I am skeptical that treating existing wells at site, which are located in sidewalks around site perimeter and down-gradient of presumed source area, will be effective enough to achieve spill closure. I continue to maintain that it will be necessary to find some way to treat contaminant source more directly, for instance by installing one or more angled wells that extend beneath on-site building to remove LNAPL/GW and/or deliver remedial solutions (chemical oxidants, bacteria/nutrients, etc.) to source area. Please let me know your thoughts about current progress in implementation of remedial plan and your evaluation of its effectiveness. - J. Kolleeny 09/28/20: Received email reply from Justin Halpin of BEI: Jon, Thank you for your comments. In meantime we would just like to continue with VEFR events as I would

FORMER GAS STATION (Continued) **S102402008**

like to see a little less
fluctuation in concentrations. We are after all at least removing contamination emanating from
source area. I'm wondering if flushing wells with fresh water and washing soil back to source,
which can then be removed via VEFR, would be a strategy to consider prior to bacteria injections.
VEFR has been removing some contamination but recovery on wells is limited. I think flushing them
out could potentially help clean contamination sorbed to tight soil matrix. I sent reply: Justin, I
think flushing wells to encourage desorption of contaminants from soil prior to performing VEFR is
a good idea, but I would suggest adding a surfactant, such as Simple Green, to help with soil
washing, rather than just using fresh water. I believe Simple Green is non-toxic & biodegradable;
it s been used at other spill sites I manage for helping to enhance free product recovery, with
some success. Another surfactant often used in petroleum remediation is BioSolve. But if wells are
all located down-gradient of source area, this will only help with local smear zone around wells
and won t address soil contamination left up-gradient in unsaturated zone which may be acting as an
ongoing source of GW impacts, and would likely have a limited area of influence even on smear zone,
so I don t think it will wash soil back to source. Still, I think it s worth trying. - JK 12/07/20:
Reviewed quarterly GW monitoring rpt for Sept. 2020 by Berninger Envt'l Inc. (BEI), dated 9/30/20.
Well gauging on 9/17/20 showed no measurable LNAPL and GW flow to SE, consistent with earlier data.
VEFR was performed on 8/20/20, removing 45 gals of total fluids from all 5 site wells, bringing
total removed by VEFR to date to 300 gals. GW sampling showed well MW-1B had 25,640 ug/L total VOCs
(down from 84,630 ug/L in June 2020), well MW-2B had 9,702 ug/L tVOCs (down from 10,807 ug/L in
June 2020), well MW-3B had 9,582 ug/L tVOCs (up from 8,978 ug/L in June 2020), well MW-4B had
12,153 ug/L tVOCs (up from 11,449 ug/L in June 2020), well MW-5B had 3,490 ug/L tVOCs (down from
4,544 ug/L in June 2020). Rpt notes that tVOCs decreased significantly in well MW-1B, decreased
slightly in wells MW-2B & MW-5B, and increased slightly in wells MW-3B & MW-4B. Rpt states that BEI
will continue to closely monitor VOC concentrations in site wells, and that next quarterly
monitoring event is scheduled for December 2020. - J. Kolleeny
12/07/20: I sent email to Justin
Halpin of BEI, cc to Alicia Patti of BEI: Justin, I reviewed Sept 2020 quarterly monitoring rpt for
this site. Rpt states that a VEFR event was performed on 8/20/20, and 45 gals of fluid were removed
from 5 site monitoring wells. That s an average of ~9 galls per well little more than what would be

FORMER GAS STATION (Continued) **S102402008**

removed during purging of wells prior to sampling. As I think I ve mentioned before, this is a
trivial amount of GW being removed and I don t believe removing such small amounts of GW can have a
significant effect in reducing contaminant levels. Do you know why recovery numbers of gals are so
low? Can anything be done to increase recovery numbers? We also recently discussed possibility of
doing some sort of soil washing using a surfactant at this site; do you have any plans in works for
this? (I still believe BEI should investigate possibility of drilling angled wells to try to access
contaminant source area at this site, which is completely covered by a building.) Please let me
know. I received email reply from Justin: Yes you are correct, recovery is minimal. GW re-charge is
very slow in this area so that s why numbers are so low. This is why I thought maybe injecting
water into soil would help to obtain larger recovery. I want to see what numbers look like for Dec.
2020 and then hopefully we can devise a more aggressive approach for 2021. - J. Kolleeny 02/04/21:
Reviewed quarterly GW monitoring rpt for December 2020 by Berninger Envt'l Inc. (BEI), dated
12/31/20. Gauging of 5 site wells on 12/22/20 showed no LNAPL in any well and GW flow to ESE (i.e.,
more easterly and less southerly than in previous quarters). GW sampling showed well MW-1B had
34,739 ug/L total VOCs (up from 25,640 ug/L in Sept. 2020), well MW-2B had 10,738 ug/L tVOCs (up
from 9,702 ug/L in Sept. 2020), well MW-3B had 9,369 ug/L tVOCs (down from 9,582 ug/L in Sept.
2020), well MW-4B had 15,542 ug/L tVOCs (up from 12,153 ug/L in Sept. 2020), well MW-5B had 5,175
ug/L tVOCs (up from 3,490 ug/L in Sept. 2020). Rpt notes that 4 out of 5 wells showed increases
this quarter, states that wells may show increases/decreases in VOCs as a result of rise and fall
of GW level. Rpt states that next sampling event will be in March 2021. - J. Kolleeny 02/04/21: I
sent an email to Justin Halpin of BEI, cc's to Alicia Patti of BEI and Joseph Macchia, spill RP:
Justin, I just finished reviewing December 2020 monitoring rpt for this site. Rpt notes that 4 out
of 5 on-site wells showed increases in total VOCs this quarter compared with September 2020 data.
VOC concentrations in site wells are all significantly elevated: well MW-1B had 34,739 ug/L total
VOCs, well MW-2B had 10,738 ug/L tVOCs, well MW-3B had 9,369 ug/L tVOCs, well MW-4B had 15,542 ug/L
tVOCs, and well MW-5B had 5,175 ug/L tVOCs. Rpt does not include any recommendations for addt'l
remedial actions, only noting that VEFR events were performed in Dec. 2019, and in Feb., April,
June and Aug. 2020, and stating that quarterly GW sampling will be performed again in March 2021.
Approved RAP for this site stated that VEFR events would be performed

FORMER GAS STATION (Continued) **S102402008**

until VOC levels decrease
significantly, and then micro-bac injections would be performed. With elevated VOC concentrations
currently present in wells, Berninger Envt'l should be planning to perform addt'l remedial actions
either addt'l VEFR events, micro-bac injections, or a combination of two. Please formulate a plan
to perform remedial actions at site in immediate future, and let me know what actions will be
performed and when they will be scheduled. Please keep in mind some of options we had discussed for
this site, such as soil washing, and/or install'n of angled well(s) to attempt to address presumed
contaminant source area beneath on-site building. Feel free to contact me to discuss this site. -
J. Kolleeny 02/05/21: Received email reply from Justin Halpin of BEI: We will work up a plan and
provide a schedule for implementing further remedial actions. - J. Kolleeny 03/18/21: On 3/16/21, I
received an email from Justin Halpin of BEI: We are scheduling a VEFR event for tomorrow, and also
for end of month or first week of April. At this point I'm thinking soil washing could be a
feasible option. If we can utilize wells in place that would be great as I really don t want to
have to probe, but if we have to we will. On 3/18/21, I sent reply: Justin, Thanks for project
update, I m glad to hear that BEI is resuming VEFR events at site. As for soil washing, do you have
soil data from when borings & wells were installed showing impacts in unsaturated zone? Or were
soil impacts restricted to smear zone at/near water table? As I ve stated before, it s my belief
that there is a source zone of contamination beneath on-site building that needs to be addressed.
If soil sampling during install'n of existing wells only showed soil impacts at water table, then I
don t think soil washing is likely to accomplish much, tho you re welcome to try it. If you do plan
to attempt soil washing, please prepare a brief work plan for my review & approval. If soil washing
and addt'l VEFR events don t succeed in reducing GW contaminant levels, then it may be necessary to
devise a plan to address source area under bldg, perhaps by drilling angled wells to try to reach
that area. Thanks again, please continue to keep me posted. - JK 05/11/21: Reviewed quarterly GW
monitoring rpt for March 2021 by Berninger Envt'l Inc. (BEI), dated 3/31/21. Well gauging on
3/17/21 showed no LNAPL in any site wells, and GW flow to ESE. VEFR was performed on same date,
removing 220 gals of GW, for a total of 520 gals of GW removed by VEFR to date. GW sampling showed
well MW-1B had 27,124 ug/L total VOCs (down from 34,739 ug/L in Dec. 2020), well MW-2B had 5,345
ug/L tVOCs (down from 10,738 ug/L in Dec. 2020), well MW-3B had 6,099 ug/L tVOCs (down from 9,369

FORMER GAS STATION (Continued) **S102402008**

ug/L in Dec. 2020), well MW-4B had 12,861 ug/L tVOCs (down from 15,542 ug/L in Dec. 2020), well MW-5B had 3,600 ug/L tVOCs (down from 5,175 ug/L in Dec. 2020). Rpt notes that all wells showed decreases in VOCs this quarter compared with last sampling event. Rpt states that next sampling event is scheduled for June 2021. - J. Kolleeny 05/11/21: I sent an email to Justin Halpin of BEI, cc's to Alicia Patti of BEI and Joseph Macchia (RP): Justin, I ve reviewed March 2021 quarterly monitoring rpt for this spill site. Altho rpt notes that tVOCs decreased in all 5 site wells in March 2021 sampling event compared with sampling results for previous quarterly event in Dec. 2020, site contaminant levels remain very elevated: MW-1B 27,124 ug/L tVOCs MW-2B 5,345 ug/L tVOCs MW-3B 6,099 ug/L tVOCs MW-4B 12,861 ug/L tVOCs MW-5B 3,600 ug/L tVOCs Furthermore, while latest results showed a decrease from previous quarter, it s not clear that wells are showing an overall decreasing trend over time, from start of sampling. Can you add graphs to quarterly rpts for this site, showing sampling history over time of each well? That would help me evaluate trends in contaminant levels. Current rpt indicates that VEFR was performed at site on 3/17/21, removing 220 gals of impacted GW. Your email below dated 3/16/21 stated that another VEFR event would be performed in late March or early April was that event performed? You also stated that you re considering soil washing as a remedial approach for site; is a work plan for soil washing currently in development? Also, approved RAP stated that after reducing VOC levels with several VEFR events, bio-remedial injections would be performed as second phase of remediation. Do you have any plans to implement those injections? Contaminant levels at this site call for a much more aggressive remedial approach than has been implemented to date, and I really believe that there is a source area beneath building that must be treated in order to effectively clean up site and achieve spill closure. Please let me know what remedial plans BEI has for this site. - JK 08/10/21: Reviewed quarterly GW monitoring rpt for June 2021 by Berninger Envt'l dated 6/30/21. Gauging of 5 site wells on 6/2/21 showed no floating product in any wells, GW flow still to SE. GW sampling showed well MW-1B had 38,120 ug/L total VOCs (up from 27,124 ug/L in March 2021), well MW-2B had 9,588 ug/L tVOCs (up from 5,345 ug/L in March 2021), well MW-3B had 5,692 ug/L tVOCs (down from 6,099 ug/L in March 2021), well MW-4B had 3,132 ug/L tVOCs (down from 12,861 ug/L in March 2021), well MW-5B had 2,495 ug/L tVOCs (down from 3,600 ug/L in March 2021). VEFR performed on 6/2/21 removed 100 gals of total fluids from wells, bringing total removed by VEFR to

FORMER GAS STATION (Continued) **S102402008**

date to 620 gals. Rpt notes
that VOC levels increased in two wells and decreased in three wells, compared with previous
sampling event. Next quarterly sampling event is scheduled for Sept. 2021. - J. Kolleeny 09/28/21:
Reviewed Pilot Remedy Work Plan by Berninger Envt'l, dated 9/17/21. Work plan proposes injection of
PetroCleanze & RegenOx solution into well MW-1B (most contaminated site well), followed by VEFR in
2 to 4 weeks. Injection is intended to desorb contaminants from vadose zone and saturated zone soil
and break down and/or biodegrade contaminants in dissolved phase; VEFR is intended to physically
remove contaminated GW from this well. Work plan states that 200 lbs of RegenOx Part A will be
mixed with 200 lbs of PetroCleanze and ~318 gals of water, resulting in ~349 gals of a 7% solution.
Solution will be applied with an injection probe lowered into well, and then surged thru well
screen into surrounding formation using a 2 diameter surge block. Before, during & after injection,
nearby wells MW-3 & MW-4 will monitored for depth to water, dissolved O2 and pH. Quarterly GW
sampling in Sept. 2021 will provide pre-injection baseline data, and quarterly sampling in Dec.
2021 will provide post-injection GW data. Results will be evaluated to examine potential for
larger-scale application of this approach to site. Work plan states that BEI will mobilize to site
within 30 days of DEC approval, and will notify DEC at least 5 days prior to mobilization. I sent
letter approving pilot remedy plan to RP Joseph Macchia, with cc's to Justin Halpin & Alicia Patti
of BEI. Letter stated that if these actions fail to significantly reduced GW contaminant levels,
addt'l remedial actions will be required. - J. Kolleeny 10/22/21:
Reviewed quarterly GW monitoring
rpt for Sept. 2021 by Berninger Envt'l, dated 9/30/21. Gauging of 5 site wells on 9/29/21 showed no
free product in any wells, GW flow still to SE. GW sampling showed well MW-1B had 43,283 ug/L total
VOCs (up from 38,120 ug/L in June 2021), well MW-2B had 6,985 ug/L tVOCs (down from 9,588 ug/L in
June 2021), well MW-3B had 10,610 ug/L tVOCs (up from 5,692 ug/L in June 2021), well MW-4B had
8,801 ug/L tVOCs (up from 3,132 ug/L in June 2021), well MW-5B had 3,423 ug/L tVOCs (up from 2,495
ug/L in June 2021). Rpt notes that tVOCs increased at 4 wells this quarter, and decreased at one
well; also states that tVOCs in well MW-1B had decreased significantly since June 2019 spike
(673,790 ug/L tVOCs). Next quarterly sampling event is scheduled for December 2021. - J. Kolleeny
02/17/22: Reviewed quarterly GW monitoring rpt for Dec. 2021 by Berninger Envt'l, dated 12/31/21.
Gauging of 5 site wells on 12/27/21 showed 1/16 of an inch of LNAPL in well MW-4B and sheen in well

FORMER GAS STATION (Continued) **S102402008**

MW-3B. Water table measurements including well E-2 across street at 169 3rd Ave show GW flow to SE, across 3rd Ave. Rpt states that 50 gals of contaminated liquids were removed by VEFR on 11/9/21 and 10 gals were removed on 12/27/21, bringing total fluids recovery by VEFR to 942 gals. GW sampling showed well MW-1B had 16,996 ug/L total VOCs (down from 43,283 ug/L in Sept. 2021), well MW-2B had 8,420 ug/L tVOCs (up from 6,985 ug/L in Sept. 2021), well MW-3B had 8,261 ug/L tVOCs (down from 10,610 ug/L in Sept. 2021), well MW-4B had 26,319 ug/L tVOCs (up from 8,801 ug/L in Sept. 2021), well MW-5B had 1,696 ug/L tVOCs (down from 3,423 ug/L in Sept. 2021). Rpt notes that tVOCs decreased in 3 wells and increased in 2 wells compared to previous quarter; attributes changes to fluctuations in GW elevation. Next sampling event is scheduled for March 2022. - JK 02/17/22: I sent email to Justin Halpin of BEI: Justin, I ve reviewed Dec. 2021 monitoring rpt for this spill site, and have a few questions. Rpt mentions that 262 gals of fluids were recovered by VEFR on 713/21; why wasn t this info included in Sept. 2021 monitoring rpt, dated 9/30/21? Also, current Dec. 2021 rpt indicates in gauging data table for 12/27/21 that 1/16 inch of free product was detected in well MW-4B and a sheen was observed in well MW-3B; VEFR was performed on same day but recovered only 10 gals of fluid why such poor recovery? Finally, what is status of Pilot Remedy Work Plan I approved on 9/28/21, which proposed PetroCleanze and RegenOx application to well MW-1B? Has this work been performed? Please let me know about VEFR issues and status of pilot remedy work plan, thanks. Justin sent reply: I will look at Rpt's discrepancies but sometimes recovery, mainly all time wells run dry and we have to sit and wait for recharging. I'm sure we pumped more than 10 gals so maybe that s a mistake but as I mentioned recharge is very slow in tight silt and sand. I'm still trying to get a sidewalk permit from DOT and would honestly like to perform in better weather, so near future looks good so far so we will perform ASAP and then schedule a pump out after injection. - J. Kolleeny 04/14/22: Reviewed quarterly GW monitoring rpt for March 2022 by Berninger Envt'l, dated 3/31/22. Gauging of 5 site wells on 3/31/22 showed no measurable LNAPL in wells (altho wells MW-1B, MW-3B and MW-4B have pig socks (absorbent socks?) installed), and GW flow still to SE. GW sampling showed well MW-1B had 33,020 ug/L total VOCs (up from 16,996 ug/L in Dec. 2021), well MW-2B had 6,266 ug/L tVOCs (down from 8,420 ug/L in Dec. 2021), well MW-3B had 5,483 ug/L tVOCs (down from 8,261 ug/L in Dec. 2021), well MW-4B had 12,033 ug/L tVOCs (down from 26,319 ug/L in Dec. 2021), well MW-5B had 2,456 ug/L tVOCs (up from 1,696

FORMER GAS STATION (Continued) **S102402008**

ug/L in Dec. 2021). Rpt notes
that tVOCs decreased in 3 wells and increased in 2 wells. No addt'l VEFR has been performed since
Dec. 2021, and rpt does not mention implementation of Pilot Remedy Work Plan. Rpt states that next
quarterly sampling event is scheduled for June 2022. I sent email to Justin Halpin of BEI: Justin,
I ve looked over March 2022 quarterly monitoring rpt for this site and realized I never heard back
from you regarding issues I raised in Feb. about status of pilot remedy work plan and low reported
VEFR recovery of only 10 gals in Dec. 2021 (after product was detected in well MW-4B). March 2022
rpt makes no mention of these issues. Also, well gauging data table in rpt notes that pig socks
have been installed in wells MW-1B, MW-3B & MW-4B. I m assuming that pig socks are
petroleum-absorbent socks? How long have these socks been in wells? Are socks stained at all? Do
they need to be replaced? This is something that should be discussed in quarterly rpts. Has pilot
remedy work plan been implemented yet? If not, is there a scheduled date for this work? Was
reported 10-gal VEFR recovery in Dec. 2021 a typo as you speculated? Please let me know. - J.
Kolleeny 04/19/22: Received email reply from Justin Halpin of BEI:
Jon, We will make note of these
items in next rpt for June 2022. In Dec. 2021 we just bailed wells, so that s why low recovery. I'm
planning to have sidewalk closure permit hopefully this week, so we can inject next week. I will
keep you posted on schedule. - J. Kolleeny 08/09/22: Reviewed quarterly GW monitoring rpt for June
2022 by Berninger Envt'l, dated 6/30/22. Gauging of 5 site wells on 6/17/22 showed no floating
product in any wells, GW flow to SE across 3rd Ave., consistent with earlier determinations. Pig
socks (i.e., absorbent socks) are installed in wells MW-1B, MW-3B and MW-4B. June 2022 GW sampling
showed well MW-1B had 19,314 ug/L total VOCs (down from 33,020 ug/L in March 2022), well MW-2B had
5,987 ug/L tVOCs (down from 6,266 ug/L in March 2022), well MW-3B had 7,382 ug/L tVOCs (up from
5,483 ug/L in March 2022), well MW-4B had 11,372 ug/L tVOCs (down from 12,033 ug/L in March 2022),
well MW-5B had 1,710 ug/L tVOCs (down from 2,456 ug/L in March 2022). Rpt notes that 4 out of 5
wells showed decreases in tVOCs this quarter, states that wells may show increases/decreases in
VOCs as a result of rise and fall of water table. Next quarterly GW monitoring event is scheduled
for Sept. 2022. - J. Kolleeny 11/09/22: Received email from Justin Halpin of Berninger Envt'l: Jon
- Pilot study injection at 170 3rd avenue is completed and it went pretty good, we got all solution
in ground, ~340 gals. I'll issue a CCR for pilot work completed or include a summary in next

FORMER GAS STATION (Continued) **S102402008**

quarterly Rpt for December 2022. We still have to go back in 2 weeks and pump out/VEFR well and
sampling is set for December. (Also FYI gas station at 169 3rd ave is no longer in service and
there is no access to property as it is all boarded up so we can t get to down-gradient well across
street). I replied: Justin, Thanks for update on this project. I m glad injections went well, but
too bad you don have access to well across street at 169 3rd Ave., I think it would be useful to
know if injections will cause any contamination to migrate down-gradient across street. - J.
Kolleeny 11/17/22: Reviewed quarterly GW monitoring rpt for Sept. 2022 by Berninger Envt'l, dated
9/30/22. Gauging of 5 site wells on 9/30/33 showed no floating product in any wells. GW flow could
not be calculated this quarter, as well across street at 169 3rd Ave is no longer accessible. Pig
socks (i.e., absorbent socks) are installed in wells MW-1B, MW-3B and MW-4B. Rpt states that during
this visit socks were observed to have petroleum staining and odors, so they're doing their job,
but socks were not replaced. GW sampling showed well MW-1B had 19,864 ug/L total VOCs (up from
19,314 ug/L in June 2022), well MW-2B had 8,802 ug/L tVOCs (up from 5,987 ug/L in June 2022), well
MW-3B had 6,468 ug/L tVOCs (down from 7,382 ug/L in June 2022), well MW-4B had 7,944 ug/L tVOCs
(down from 11,372 ug/L in June 2022), well MW-5B had 2,328 ug/L tVOCs (up from 1,710 ug/L in June
2022). Rpt states that VEFR removed 118 gals of fluids from site wells on 7/25/22, bringing total
recovered to date by VEFR to 1,060 gals. Next quarterly sampling event is scheduled for December
2022. - JK 01/24/23: Reviewed quarterly GW monitoring rpt for Dec. 2022 by Berninger Envt'l, dated
12/31/22. Gauging of 5 site wells on 12/28/22 showed no floaring product in any wells. GW flow
could not be calculated this quarter, as well across street at 169 3rd Ave is no longer accessible
and existing on-site wells are arrayed in a straight line (i.e., no triangulation possible). Rpt
notes that absorbent pig socks were removed from wells MW-1B, MW-3B & MW-4B on previous site visit.
GW sampling showed well MW-1B had 27,914 ug/L total VOCs (up from 19,864 ug/L in Sept. 2022), well
MW-2B had 11,702 ug/L tVOCs (up from 8,802 ug/L in Sept. 2022), well MW-3B had 18,659 ug/L tVOCs
(up from 6,468 ug/L in Sept. 2022), well MW-4B had 11,318 ug/L tVOCs (up from 7,944 ug/L in Sept.
2022), well MW-5B had 1,833 ug/L tVOCs (down from 2,328 ug/L in Sept. 2022). Rpt includes a section
on Remedial Action Pilot Study, stating that on 11/04/22, RegenOx (Part A) and PetroCleanze
(surfactant) were applied at 2 temporary injection points, on either side of well MW-1B. Chemicals
were mixed with water in a 7% solution, and a total of ~350 gals were

FORMER GAS STATION (Continued) **S102402008**

injected. A follow-up VEFR
event was performed on 11/30/22, as per work plan, recovering ~103
gals of impacted GW from well
MW-1B. Rpt does not include any recommendation rgarding implementation
of this remedial approach on
a larger scale. Recommendations section simply states that next
quarterly GW monitoring & sampling
event is scheduled for March 2023. - J. Kolleeny 01/24/23: I sent an
email to Justin Halpin of
Berninger Envt'l: Justin, I ve reviewed December 2022 monitoring rpt
for 156-170 3rd Avenue,
Brooklyn, NYSDEC Spill No. 9607280. Rpt includes a brief section about
Remedial Pilot Study
conducted in November 2022. However, rpt does not include any
conclusions regarding whether or not
pilot study was a success, indicating that remedial approach of
injecting RegenOx and PetroCleanze,
followed by a VEFR event, would be effective at this site and whether
or not this approach should
be implemented at site on a larger scale? Will there be a separate rpt
on pilot study with a more
detailed discussion and a remedial recommendation? If BEI does not
believe remedial approach used
in pilot test will be effective at site, then a remedial plan for
another remedial approach should
be prepared and submitted (or a pilot test for another remedial
approach should be proposed). This
site definitely needs active remediation. Please let me know your
thoughts on this. - J. Kolleeny
01/26/23: On 1/25/23, Justin Halpin of BEI sent email reply: I don t
think its going to be possible
on a larger scale given Geology not being conducive to any kind of
injection. I wanted to see at
least 2 rounds of sampling and maybe another pump-out before we make a
determination on whether it
was effective or not. I sent reply: Justin, if you re going to do
another pump-out, I d suggest
doing it before addt'l rounds of GW sampling. Either way, if
injections and pump-out approach is
not effective in significantly reducing contaminant levels, BEI will
need to develop an alternative
remedial approach. On 1/26/23, Justin replied: Ok we will do that,
thanks Jon. - J. Kolleeny
05/08/23: Reviewed quarterly GW monitoring rpt for March 2023 by
Berninger Envt'l, dated 3/31/23.
On 3/16/23, site wells were gauged & sampled. No free product was
detected in wells; rpt states
that no site survey could be performed during this event, but based on
June 2022 survey data GW
flow continues to be to SE (across 3rd Ave). Rpt states that absorbent
pig socks were removed from
wells MW-1B, MW-3B, & MW-4B during previous site visit. Rpt notes that
VEFR removed 68.5 gals of
contaminated GW on 3/28/23, bringing total fluids recovered to date by
VEFR to 1,231.5 gals. GW
sample results show well MW-1B had 30,234 ug/L total VOCs (up from
27,914 ug/L in Dec. 2022), well

FORMER GAS STATION (Continued) **S102402008**

MW-2B had 10,657 ug/L tVOCs (down from 11,702 ug/L in Dec. 2022), well MW-3B had 16,888 ug/L tVOCs
(down from 18,659 ug/L in Dec. 2022), well MW-4B had 15,175 ug/L tVOCs (up from 11,318 ug/L in Dec.
2022), well MW-5B had 2,334 ug/L tVOCs (up from 1,833 ug/L in Dec. 2022). Rpt briefly summarizes
Remedial Action Pilot Study, injecting RegenOx Part A and PetroCleanze into 2 temporary injection
points near well MW-1B, noting that a follow-up VEFR event was performed on 11/30/2022 removing 103
gals of GW, but rpt does not state whether pilot test was successful or make any remedial
recommendation. Rpt states that next quarterly sampling event is scheduled for June 2023. - JK
05/08/23: I sent email to Justin Halpin of BEI, cc's to RP Joseph Macchia and Alicia Patti of BEI:
Justin, I ve reviewed March 2023 monitoring rpt for 156-170 3rd Ave in Brooklyn. Rpt still includes
same brief summary of remedial injection pilot test that was included in December 2022 monitoring
rpt, without any discussion of pilot test results i.e., whether or not test was successful or
whether this approach (injections of RegenOx and PetroCleanze) should be used as main remedial
approach for site. I d like to see this section expanded to include that discussion in future
quarterly rpts. More importantly, based on your comments in email exchange below from January 2023,
if you believe that remedial injections were not effective and that this is not recommended
approach for site, then BEI must develop and submit a proposal for another remedial approach to
address very elevated dissolved contaminant concentrations at site. Rpt also states that during
March 2023 site visit, no survey of site wells could be conducted to determine an up-to-date GW
flow direction. I m not sure I understand this, don t you already have surveyed top of casing
elevations for site wells? Up-to-date water table elevations should be calculated during each
quarterly monitoring event, and a water table contour map based on those water table elevations
should be included in each monitoring rpt. If problem is that site wells are all situated in a
line, and well across 3rd Avenue at 169 3rd Avenue site no longer exists or is no longer accessible
for gauging, then a new well or wells must be installed across 3rd Ave and/or on side streets
adjacent to site in order to triangulate and determine slope of local water table. Please let me
know if BEI is currently working on a new remedial approach for this site and provide a time frame
for when a new remedial proposal will be submitted (this should be done within 45 days of this
email). Also let me know why current GW flow direction is not being determined during each
quarterly site visit, and what steps BEI will take to rectify this.

FORMER GAS STATION (Continued) **S102402008**

Feel free to give me a call to
discuss this site. - J. Kolleeny 06/22/23: Received email from Justin Halpin of BEI, in reply to my
5/8/23 email: We will document pilot study within June 2023 quarterly and evaluate its
effectiveness. Will also provide updated GW flow map. I'm also thinking potential bio-injections,
bacteria and nutrients. What do you think of bio as potential remedy? I sent reply: Justin, thanks
for agreeing to include a discussion & evaluation of pilot study in June 2023 quarterly rpt, and
for agreeing to update GW flow map. As for possible remedial approaches for this site, I suggest
that you proceed carefully and think things through to avoid wasting time & money on a remedial
approach which is not likely to achieve spill closure in a reasonable period of time. My
experiences with injections of bacteria and nutrients to promote biodegradation of petroleum
contaminants have not convinced me that this is a very effective technology for dealing with high
levels of dissolved petroleum contaminants (and possibly traces of free product which have been
detected at this site). Also, remember it s likely there's a source area (or areas) beneath on-site
building, which will not be addressed by actions implemented in sidewalk along 3rd Avenue. I m
attaching two old rpts for this site (I may have sent them before), which provide info about
possible tank/dispenser locations and soil & GW data from before on-site building was constructed.
I continue to advocate for install'n of angled wells that could extend beneath current site
building to try to locate contaminant source area(s) and which could also perhaps be used to treat
source area(s). Some potential remedial approaches I suggest for your consideration include S-ISCO
surfactant-enhanced in-situ chemical oxidation (i.e., injections of chemical oxidant plus a
surfactant to help mobilize and break down small amounts of residual free product), injections of
remedial suspensions of colloidal carbon particles plus nutrients (e.g., PetroFix), and perhaps
use of a mobile in-well air sparge / soil vapor extraction system. I understand some or all of
these suggested technologies may not be optimal for subsurface conditions at this site, and I m
open to other suggestions. Please feel free to call to discuss. - J. Kolleeny 07/31/23: Reviewed
quarterly GW monitoring rpt for June 2023 by Berninger Envt'l (BEI), dated 6/30/23. Rpt notes that
GW flow has been determined to be to SE, but on most recent site visit (6/21/23), well E-3 located
across 3rd Ave, at 169 3rd Ave (former spill site) could not be accessed due to construction
activity, so up-to-date GW flow could not be calculated. Rpt states that a new GW flow map will be

FORMER GAS STATION (Continued) **S102402008**

generated from data collected during next quarterly monitoring event, if well E-3 can be accessed.
Gauging of on-site wells on 6/21/23 showed no floating product in any wells. GW sampling showed
well MW-1B had 27,669 ug/L total VOCs (down from 30,234 ug/L in March 2023), well MW-2B had 15,696
ug/L tVOCs (up from 10,657 ug/L in March 2023), well MW-3B had 14,400 ug/L tVOCs (down from 16,888
ug/L in March 2023), well MW-4B had 9,529 ug/L tVOCs (down from 15,175 ug/L in March 2023), well
MW-5B had 3,379 ug/L tVOCs (up from 2,334 ug/L in March 2023). Rpt notes that 3 out of 5 wells saw
decreases in tVOCs this quarter, while 2 wells saw increases. Rpt includes a summary of remedial
pilot test, stating that on 11/4/22, RegenOx Part A and PetroCleanze were applied via 2 temporary
injection points near well MW-1, using an injection probe advanced to ~15 ft bgs (GW is at ~12 ft).
Per approved work plan, a follow-up VEFR event was performed on 11/30/22, removing ~103 gals of
contaminated GW from MW-1, and another VEFR event was done on 3/28/23, removing ~68 gals of GW,
bringing total removed by VEFR to date to 1,231.5 gals. In 3 subsequent sampling events since
injections, tVOC levels in MW-1 were consistent with earlier data in Dec. 2022, rebounded upward
somewhat in March 2023, and returned to Dec. 2022 level in June 2023 sampling event. (Levels for
all 3 post-injection sampling events were significantly higher than last pre-injection sampling
event in Sept. 2022, when tVOCs were 19,864 ug/L.) BEI concludes that pilot test results were not
conclusive as to whether this remedial strategy would be successful on a larger scale, most likely
due to tight soils at site which limit both ability to inject remedial solutions and ability to
vacuum GW from wells. Rpt states that BEI is currently evaluating addt'l remedial strategies for
this site. Next quarterly monitoring event is scheduled for September 2023. - K 11/03/23: Reviewed
quarterly GW monitoring rpt for September 2023 by Berninger Envt'l Inc. (BEI) dated 9/30/23.
Gauging of 5 site wells on 9/28/23 showed no floating product in any wells, no update to GW flow
map since well E-3 across street at 169 3rd Ave is still not accessible; June 2022 data indicate GW
flow to SE. GW sampling showed well MW-1B had 24,996 ug/L total VOCs (down from 27,669 ug/L in June
2023), well MW-2B had 6,577 ug/L tVOCs (down from 15,696 ug/L in June 2023), well MW-3B had 5,469
ug/L tVOCs (down from 14,400 ug/L in June 2023), well MW-4B had 12,638 ug/L tVOCs (up from 9,529
ug/L in June 2023), well MW-5B had 1,205 ug/l tVOCs (down from 3,379 ug/L in June 2023). Rpt notes
that tVOCs decreased this quarter at all wells except MW-4B. Rpt recommends continuing with VEFR
events to remove contaminated GW from highest impacted monitoring

FORMER GAS STATION (Continued) **S102402008**

wells, and states that next
quarterly sampling event is scheduled for December 2023. - J. Kolleeny
11/03/23: I sent an email to
RP Joseph Macchia (joseph@themacchiagroup.net), cc to Justin Halpin of
BEI: Dear Mr. Macchia, I
hope you are well. I have reviewed September 2023 quarterly monitoring
rpt for this spill site,
prepared by Berninger Envt'l, Inc. (BEI). Rpt presents results of a
Sept. 2023 GW sampling event
showing highly elevated levels of petroleum-related compounds
persisting in GW at site. In previous
monitoring rpt, BEI summarized a chemical injection pilot test
performed at site, involving
application of RegenOx Part A and PetroCleanze to subsurface, followed
by 3 rounds of GW sampling.
Based on sampling results, BEI concluded it was unclear whether
large-scale implementation of this
approach would be effective in remediating site, most likely due to
tight subsurface soils. Rpt
stated that BEI is evaluating other remedial strategies. In current
September 2023 rpt, BEI notes
that they have conducted 13 VEFR events at site between Dec. 2019 and
March 2023 (about 4 events
per year) and recovered 1,231.5 gals of total fluids (mixture of free
petroleum product and GW), or
about 95 gals per VEFR event. BEI recommends continuing to perform
VEFR events to remove
contaminated GW from most impacted monitoring wells, but rpt does not
recommend a schedule for VEFR
events, list target wells, or state when next VEFR event will be
performed. DEC requires that a RAP
proposing actions to expedite cleanup of this spill site be prepared
and submitted under separate
cover. RAP should be submitted by no later than December 15, 2023. If
RAP proposes VEFR as remedial
approach for site, it should propose a much more aggressive schedule
of VEFR events than has been
followed in the past, and should list target wells. DEC suggests that
alternate remedial approaches
besides VEFR also be considered. Please feel free to contact me if you
have any questions. - JK
01/03/24: Reviewed Remedial Action Work Plan by Berninger Envt'l,
dated December 2023, submitted by
email on 12/15/23. Rpt summarizes site background/history, mentioning
Sanborn Maps and Fire Dept.
records of USTs and UST removals, but does not mention site
investigations in 1990s (before current
site bldg was constructed) which found significant soil & GW
contamination on property. Rpt
proposes install'n of two new wells in 3rd Ave sidewalk, on either
side of highly contaminated well
MW-1B, and once wells have been installed, performing VEFR on new
wells. RAWP Project Schedule
indicates that upon DEC approval of RAWP, Berninger Envt'l is prepared
to mobilize to site to
install new wells. Conclusions section states that VEFR events will
continue on a monthly basis,

FORMER GAS STATION (Continued) **S102402008**

with results documented during subsequent quarterly sampling events (presumably, this means in
quarterly monitoring rpts along with quarterly GW sampling data), and Conclusons section also says
that general objective of new wells is to achieve higher re-charge rates in monitoring wells,
enabling more recovery of contaminated GW. - J. Kolleeny 01/04/24: I sent email to Justin Halpin of
Berninger Envt'l: Justin, I m reviewing Berninger Envt'l's proposed RAP for this site, and I have
some problems with rpt itself and with remedial approach being proposed. First, I think Section 2.0
Site Background/History should mention that investigations performed in 1990s, before site building
was constructed, found significant soil and GW contamination. I.e., rpt should mention that there
is a contaminant source area (or source areas) underneath site building, up-gradient of existing
monitoring wells installed along 3rd Avenue. Next, Section 6.0 Health and Safety mentions oxidant
material, as tho RAP is proposing chemical oxidant injections, whereas RAP is only proposing VEFR
as remedial approach. (I assume this paragraph is a holdover from an earlier RAP for this site or
maybe for some other site?) More importantly, RAP only proposes install'n of two new wells in 3rd
Ave sidewalk, on either side of existing well MW-1B (Section 4.0), and performance of VEFR only on
two new wells (Section 5.0)! RAP does not mention performing VEFR on highly contaminated well
MW-1B, or on any other existing contaminated wells. (Conclusions section, Section 8.0, states that
VEFR events will continue on a monthly basis). I m skeptical that monthly VEFR events will be
effective as sole remedial action for this site, and I m disappointed that it seems you haven t
looked into any of my other remedial suggestions, such as install'n of angled wells to try to
find/reach source area, use of surfactant-enhanced chemical oxidant injections to try to mobilize
small pockets of residual LNAPL which likely continue to feed dissolved plume, or injection of
nano-scale activated carbon particle solutions such as PetroFix or PlumeStop. But if you re going
to go with VEFR, at very least I would suggest installing a third new well between existing wells
MW-2 & MW-3, and performing VEFR on all 3 new wells, plus on existing wells MW-1B, MW-2B, MW-3B, &
MW-4B (all of which had more than 5 ppm of total VOCs when sampled in Sept. 2023). One last thing,
we had talked about install'n of an addt'l well at a location that would allow for better
triangulation to determine current GW flow direction, such as along Butler St or Baltic St, since
well which had been gauged across 3rd Ave is no longer available for gauging. I think two addt'l
wells should be installed to determine GW flow direction and evaluate

FORMER GAS STATION (Continued) **S102402008**

potential off-site migration
of contaminant plume one well on either Baltic or Butler St, and another well across 3rd Ave from
wells MW-1B & MW-4B. RAP makes no mention of installing any addt'l wells for purpose of calculating
GW flow direction. Please let me know if RAP can be revised to address any or all of these issues,
and feel free to call to discuss. - JK 02/08/24: On 2/02/24, Justin Halpin of BEI submitted a
revised RAWP dated Feb. 2024. On 2/8/24, I received an email from Justin: Jon, I'm just thinking
about these well install'ns and think that before we go install 3 more wells, I think we should
just do one well and do a pump test on it. If test goes well, we can install 2 more. Whole idea is
to get more recovery, create drawdown, etc. If we install one well and don t get better recovery, I
don t want to waste time & money on 2 addt'l wells. Also, regarding your comment about needing
another well for determining GW flow, we found a well north along Baltic St we can add to survey.
Thanks, please let me know your thoughts. I reviewed revised RAWP. Site Background/History section
now includes statement that investigations performed prior to construction of current site bldg
found significant soil & GW contamination; there are no records of any soil excavation or
remediation after tank removals, so contaminant source areas are present beneath bldg, up-gradient
of existing monitoring wells installed along 3rd Ave in front of bldg. Revised RAWP now proposes
install'n of 3 new wells; two on either side of MW-1B, and another between MW-2 & MW-3. Then a
liquid pump truck will be mobilized to site to perform VEFR on new and existing wells (esp. MW-1B).
VEFR events will continue monthly, with data summarized in quarterly monitoring rpts. Health &
Safety section of RAWP no longer mentions oxidant material, but says field staff should wear level
D PPE during VEFR events. - J. Kolleeny 02/08/24: I sent email reply to Justin Halpin of BEI:
Justin, I thought idea was that more wells will provide more water recovery than fewer wells. You
already know recharge in any one well is low, so if you want to use VEFR as remedial approach,
having addt'l wells means you can recover that much more GW in each VEFR event. If you just install
one new well and your pumping test shows slow recharge (which is what you expect), then what will
be remedial alternative? And if idea is to do a pump test, why not just do that on existing wells?
I think all 3 proposed new wells should be installed, and VEFR should be performed monthly (at a
minimum!) on new wells and on all existing wells (MW-1B thru MW-5), to maximize amount of
contaminated GW recovered during each event. Unless you re having second thoughts about VEFR as

FORMER GAS STATION (Continued) **S102402008**

remedial approach, in which case you could consider some of alternatives I have mentioned, such as installing angled wells to reach under site building to find and address contaminant source area, use of surfactant-enhanced chemical oxidant injections, or injection of nano-scale activated carbon particles (e.g., PlumeStop or PetroFix). I recognize that effectiveness of any approach involving injections (and VEFR as well) is likely to be hampered by tightness and low permeability of site soils, but we have to try something to address persistent GW contamination! Please let me know if you want me to review revised RAWP as is, or if you want to change remedial approach for site. Justin sent reply: Proposed new wells will have different specs (i.e., deeper), which hopefully will be in looser, coarser soils, and will have longer well screens. Currently I think we are at about 18-20 if we can get to 25-30 , possibly better recharge. I replied: Okay, so how do you want to proceed? Do you want to install one of new deeper wells to see if soil is looser down there, and do a pump test, before proceeding with two other wells? Do you want me to review/approve current RAWP? Or hold off until you do a pump test? Or just go ahead with install'n of all three proposed wells, as I suggested? Justin replied: I think we should start with one well; I can revise plan or add a note to plan stating this approach. I replied, Okay, please either revise plan or add a note to plan stating that you ll install one recovery well to greater depth and perform a pump test before proceeding with rest of remedial plan. - J. Kolleeny 02/13/24: Reviewed quarterly GW monitoring rpt for December 2023 by Berninger Envt'l Inc. (BEI), dated 12/31/23 (rcvd 1/16/24). Gauging of 5 site wells on 12/28/23 showed no floating product in any wells; up-to-date GW flow direction cannot be calculated due to loss of well across 3rd Ave. GW sampling showed well MW-1B had 30,997 ug/L total VOCs (up from 24,996 ug/L in Sept. 2023), well MW-2B had 12,840 ug/L tVOCs (up from 6,577 ug/L in Sept. 2023), well MW-3B had 13,631 ug/L tVOCs (up from 5,469 ug/L in Sept. 2023), well MW-4B had 13,913 ug/L tVOCs (up from 12,638 ug/L in Sept. 2023), well MW-5B had 1,439 ug/L tVOCs (up from 1,205 ug/L in Sept. 2023). Rpt concludes that VOCs increased at all 5 site wells this quarter; recommends continuing VEFR events to remove impacted GW from wells. Rpt does not mention recent RAP proposing install'n of 3 deeper recovery wells to improve effectiveness of VEFR. Next quarterly sampling event is scheduled for March 2024. - JK 03/29/24: Reviewed revised Remedial Action Work Plan by Berninger Envt'l, dated March 2024. RAWP proposes install'n of 3 new GW recovery wells, 1 on either side of existing monitoring well MW-1B

FORMER GAS STATION (Continued) **S102402008**

and one between existing
wells MW-2 & MW-3, and performance of monthly VEFR events on new wells and on all existing wells
with significant dissolved petroleum impacts. New wells will be installed to a depth of 25 ft below
grade, with 20 ft of well screen, in an attempt to improve GW recovery during VEFR events. Because
previous efforts to perform VEFR on monitoring wells at this site have been unable to recover
significant quantities of GW, due to tight subsurface soils limiting recharge of GW into wells,
proposed new wells will be installed in a phased approach, starting with install'n of one new well
near MW-1B and performance of a pump test to determine if deeper well with a longer screened
interval is more effective for recovery of GW. If pump test indicates that new well facilitates
improved recovery of GW by VEFR, then remaining two proposed wells will be installed, and monthly
VEFR events will continue, with quarterly GW monitoring to evaluate effectiveness of this remedial
approach. I sent letter to RP Joseph Macchia, cc's to Justin Halpin & Alicia Baston of BEI,
approving RAWP but stating that if pump test doesn't show improved GW recovery by VEFR and BEI
decides not to proceed with install'n of two addt'l recovery wells, then BEI must develop & propose
an alternative approach to address GW contamination at site. - J. Kolleeny 05/07/24: Reviewed
quarterly GW monitoring rpt for March 2024 by Berninger Envt'l, Inc. (BEI), dated 3/31/24.
Monitoring was conducted on 3/20/24. Gauging of five wells showed no floating product in any well.
GW sample results showed well MW-1B had 34,925 ug/L total VOCs (up from 30,997 ug/L in Dec. 2023),
well MW-2B had 8,120 ug/L tVOCs (down from 12,840 ug/L in Dec. 2023), well MW-3B had 15,096 ug/L
tVOCs (up from 13,631 ug/L in Dec. 2023), well MW-4B had 15,680 ug/L tVOCs (up from 13,913 ug/L in
Dec. 2023), well MW-5B had 1,390 ug/L tVOCs (down from 1,439 ug/L in Dec. 2023). Rpt states that
last VEFR event at site was conducted on 3/28/2023, and that 1,231.5 gals of total fluids have been
recovered to date by VEFR. Rpt notes that a RAWP proposing install'n of 3 deep GW recovery wells
was approved by DEC on 3/29/24; RAWP proposed first installing one recovery well and performing a
pumping test on well, and if results are favorable, proceeding to install two more recovery wells.
If results are not positive, BEI may decide not to install two remaining recovery wells, and they
will propose alternative remedial measures. Rpt recommends continuing (?) with VEFR events to
remove impacted GW. Next quarterly sampling event is scheduled for June 2024. - JK 08/06/24:
Reviewed quarterly GW monitoring rpt for June 2024 by Berninger Envt'l, Inc. (BEI), dated 6/30/24.

FORMER GAS STATION (Continued) **S102402008**

Gauging of 6 site wells on 6/26/24 showed no floating product in any well. Rpt includes a water table contour map based on June gauging data, including well MW-1A in sidewalk along Baltic St, showing GW flow to SSW towards Butler St, instead of SE across 3rd Ave as usual, but this is not mentioned in text. Sampling of 5 wells (MW-1A was not sampled) showed well MW-1B had 44,823 ug/L total VOCs (up from 34,925 ug/L in March 2024), well MW-2B had 9,326 ug/L tVOCs (up from 8,120 ug/L in March 2024), well MW-3B had 11,966 ug/L tVOCs (down from 15,096 ug/L in March 2024), well MW-4B had 11,573 ug/L tVOCs (down from 15,680 ug/L in March 2024), well MW-5B had 1,841 ug/L tVOCs (up from 1,390 ug/L in March 2024). Rpt mentions that RAWP proposing install'n of 3 deeper wells for VEFR was submitted in March 2024 and approved by DEC, but provides no update on install'n of first test well to see if this approach gets better VEFR results. Rpt recommends continuing with VEFR events to remove impacted GW, and says next quarterly sampling event will be in Sept. '24. - JK
08/06/24: I sent an email to Justin Halpin of BEI: Justin, I just reviewed June 2024 quarterly monitoring rpt for this spill site, and there is no update regarding implementation of RAWP which was approved in March 2024. RAWP proposed install'n of 3 deeper wells to try to recover more GW during VEFR events, using a phased approach, starting with install'n of just 1 deep recovery well to see if this approach improves GW recovery by VEFR. Has first deep recovery well been installed yet? If not, what is holding things up? Future quarterly rpts should provide an update on status of RAWP implementation. I also noticed that water table contour map in June 2024 rpt now shows GW flow to south-southwest, towards Butler Street, instead of to southeast across 3rd Ave as usual, and I see that well MW-1A in sidewalk along Baltic Street was gauged (but not sampled); however, none of this is mentioned in rpt, as far as I can see. Usually, BEI s quarterly monitoring rpts mention and discuss changes in GW flow direction. June 2024 GW sample results still show high levels of contamination in all site wells. Please let me know status of implementation of RAWP. - J. Kolleeny
08/12/24: On 8/8/24, Justin Halpin of BEI sent reply email: Finally worked out insurance issues with DOT in order to get sidewalk closure permit to do work. Trying to get permit ASAP and at least get initial well in to see if we can get better recovery on VEFR. On 8/12/24, I replied, Justin, I m not sure why there is so much difficulty getting sidewalk permit, you ve drilled at this site before? Has DOT changed its requirements? Anyway, please let me know when you get permit and drilling of first deep well has been scheduled. - J. Kolleeny

FORMER GAS STATION (Continued) **S102402008**

08/21/24: Received email reply from
Justin Halpin of BEI: Jumping through hoops with DOT and insurance requirements and working out
issues with our new parent company. Should have approval with DOT hopefully soon and then we can
pull permit quickly and get first well in asap. - J. Kolleeny
9/16/2024 - Feng - As per Vadim
Brevdo, the spill is reassigned to June Feng. 3/10/2025 - Feng - Monitoring 4Q2024, 12/31/2024
(Received 1/31/2025). Monitoring on 12/27/2024. MW-1A, gauged for DTW. MW-1B, 21,280 BTEX, ND MTBE,
1.38 mg/L DO, pig socks installed. MW-2B, 3,694 BTEX, ND MTBE, 1.67 mg/L DO, pig socks installed.
MW-3B, 7,991 BTEX, ND MTBE, 2.09 mg/L DO. MW-4B, 5,921 BTEX, ND MTBE, 2.18 mg/L DO. MW-5B, 282
BTEX, ND MTBE, 2.23 mg/L DO. 4/25/2025 - Feng - Monitoring 1Q2025, 3/31/2025 (Received 4/18/2025).
Monitoring on 3/31/2025. MW-1A, No gauging. MW-1B, 25,808 BTEX, ND MTBE, 33,020 total VOCs, 1.44
mg/L DO, pig socks installed. MW-2B, 5,220 BTEX, ND MTBE, 6,266 total VOCs, 1.69 mg/L DO, pig socks
installed. MW-3B, 4,353 BTEX, ND MTBE, 5,483 total VOCs, 2.13 mg/L DO. MW-4B, 7,374 BTEX, ND MTBE,
12,033 total VOCs, 2.22 mg/L DO. MW-5B, 1,353 BTEX, ND MTBE, 2,456 total VOCs, 2.33 mg/L DO.

Remarks: lab samples came back with contaminated results

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SUN 11/21/2003 Reassigned from Rommel to Sun. See also Spill # 96-07280 at the same location. 11/26/2003-This spill (#95-06588) is closed on 11/26/2003. The spill is to be investigated and remediated

169 3RD AVENUE (Continued) **S102150706**

under Spill # 96-07280.
08/25/06-Sun-This spill is reopened since the site address for this spill is 169 Third Avenue,
while the site address for Spill #96-07280 is 156-170 Third Avenue. Two sites are across street
from each other and are separated by Third Avenue. (Sun) 08/28/06-Sun approves the Site
Investigation Work Plan. The Site Investigation Report is due 11/29/06. (Sun) 01/05/07-Sun approves
the Subsurface Investigation Report with the incorporation of the following recommended item:
1.Install monitoring wells hydraulically down-gradient of existing monitoring wells MW-3 and MW-4
to delineate the extent of groundwater contamination emanating from the site. However, the
Department disapproves the implementation of a Monitored Nature Attenuation (MNA) at this time due
to high concentrations of BTEX, including 1,600 g/L for Benzene in MW-3. A more aggressive remedial
action plan, including local treatment may be required. There is a typo in the Report on Page 18
under Section 6 Evaluation of Results. In the last paragraph, it states that presence of BTEX
concentrations ranging from non-detect to 1,740 g/L. It should be from non-detect to 4,410 g/L .
1,740 g/L is only for Total Xylenes per Table 3. Pursuant to the Stipulation Agreement signed and
dated effective December 30, 2005, the Department requires a Remedial Action Plan (RAP) and a
revised Subsurface Investigation Report with additional delineation as stated above be submitted by
February 21, 2007. (Sun) 02/21/07-Sun: The Department received an updated Subsurface Investigation
Report. Based on the result of this additional surface investigation, it is concluded that the
contaminant plume has not migrated beyond MW-5 and MW-6. (Sun) 02/23/07-Sun: The Department
approves the updated Subsuraface Investigation Report submitted by Impact Environmental, dated
February 21, 2007. The Department requires that the Remedial Action Plan be submitted by March 23,
2007. (Sun) 04/16/07-Sun: Sun received a Remedial Action Plan,submitted by Impact Environmental,
dated 04/16/07. An on-site enhanced bio-remediation using two combined technologies, Waterloo
Emitter and BioCritter is proposed to address the groundwater contamination on-site. (Sun)
05/18/07-Sun: The Department approves the Remedial Action Plan (RAP)submitted by Impact
Environmental, dated April 16, 2007. The Department requires that the Remedial Action Plan be
implemented by August 18, 2007. (Sun) 10/17/07-Sun: A Notice of Non-Compliance was sent from DEC
Attorney, John Urda to the RP (Joseph Macchia, Jr) and his Attorney, Howard D. Stave for failing to
commence the system startup as required on August 18, 2007 and therefore are in violation of the

169 3RD AVENUE (Continued) **S102150706**

Consent Order. Pursuant to Paragraph 1 A. of the Order, the Respondents have 14 days from today's date to either cure the violation or submit payment of the suspended portion of the civil penalty. (Sun) 10/29/07-Sun: DEC recreived an email from Walter Berninger of BEI that they are presently working on the installation of this remedial Action Plan submitted by Impact Environmental and approved a few months ago. Based on the limited time frame given BEI installed the four wells last week along with the pits and this morning we received the emitters. I am not asking for any more time as we expect to have everything operational by this Wednesday but, I felt I needed to to let you know it was moving forward. (Sun) 10/31/07-Sun:Sun visited the site today to witness the start-up of the remedial system. Sun confirms that the system startup has commenced within 14 days of John Urda's October 17 letter to Joe Macchia, Jr and his Attorney, Howard Stave. (Sun) 11/19/07-Sun: Sun received the following email from WAlter Berninger of BEI, Joe Sun, Today my Guy Butch will be installing the flow controller and needle valves at the 3rd Avenue site. We did find out that the picture in the approved plan was set up incorrectly. The Rotometer is used with the needle valve to set the flow from the emitter.The picture shows it connected after the regulator and that does nothing. After talking to Waterloo and testing here in our office we discovered it was backwards and will be making the changes.We have been going weekly and everything is working fine. (Sun) 11/19/07-Sun: Sun sent the following email to Walter Berniger, You are absolutely right that the position of needle valve was incorrect before. Please resubmit the revised construction diagram by November 30, 2007. (Sun) 07/09/08-Sun: Quarterly Monitoring Report dated May 2008 showed that total BTEX concentrations ranged from 1 ppb to 34 ppb and MTBE concentrations ranged from ND to 31 ppb. (Sun)

---------- 7/24/08:
Reassigned from Joe Sun to Chanda. 8/5/08: Chanda received a Monthly Monitoring Report, prepared by Berninger Environmental, Inc., dated July 2008. The Monitoring Report indicates that monitor Emitter wells (E-1 through E-4) on a monthly basis. No floating product was detected during this monitoring period. Site monitored, system operations and maintenance performed, and DO readings taken on July 17, 2008. (see eDocs) The Next Quarterly Report will be submitted in September 2008.
9/8/08: Chanda received a Quarterly Monitoring Report prepared by BEI, dated August 2008. (see eDocs) GW Monironing report indicated the groundwater at the site are contaminated. The next

169 3RD AVENUE (Continued) **S102150706**

Quarterly Report be submitted to DEC by 12/15/08 for review. 10/6/08: Chanda received a Monthly
Monitoring Report, prepared by Berninger Environmental, Inc., dated September 2008. 5/27/09 This
spill case transferred from K. Chanda to J.A. Maisonave. - JAM 7/21/09 Received Monitoring Report
for month of June 2009 submitted by Berninger Env., Inc. dated June 30, 2009. Ten wells were
gauged, no free product was detected during this monitoring period. I called Walter Berninger and
told him that monthly monitoring and quarterly groundwater sampling should continue; however,
report frequency can be reduced from monthly to quarterly. Reports should summarize all monitoring
and sampling events for the previous quarter. This includes all sites under the Northland Marketing
Consent Order. - JAM 9/14/09 Reviewed a Groundwater Monitoring Report for 3rd Qtr 2009 submitted by
Berninger Env., Inc. dated August 31, 2009. Ten monitoring wells were gauged and wells MW-1 thorugh
MW-6 were sampled for lab analysis. Wells EW-1 through EW-4 were not sampled. Free product was not
detected in any of the wells. Well MW-3 had a total BTEX concentration of 573ug/L. Well MW-1 had a
total BTEX concentrations of 38ug/L. The other wells were ND. The site map does not include
groundwater flow direction. This report is uploaded to eDocs. - JAM 1/7/10 Reviewed a Groundwater
Monitoring Report for 4th Qtr 2009 submitted by Berninger Env., Inc. dated December 31, 2009. Ten
monitoring wells were gauged and 6 sampled for lab analysis Free product was not detected in any of
the wells. Wells MW-1, MW-2 and MW-3 had a total BTEX concentrations of 20ug/L, 34ug/L, and 61ug/L,
respectively. Wells MW-4 through MW-6 were ND. This report is uploaded to eDocs. - JAM 2/4/10
Issued letter to Joseph Macchia regarding several spill cases managed under the Northland Marketing
Consent Order. The letter, with the excerpt regarding this spill is as follows: The New York State
Department of Environmental Conservation (NYSDEC) has reviewed several quarterly monitoring reports
for the above referenced spill cases, which are being managed under an Order on Consent between
NYSDEC and the Respondent. Our review has identified a number of problems with the reports and with
the way the spills are being addressed. To remedy these problems, the NYSDEC requires the
following: 1. Groundwater samples collected from all sites should be analyzed for the TAGM 4046
list of petroleum related VOCs (see attached). 2. Groundwater sample result summary tables must
indicate the proper units of concentration (e.g., g/L, mg/L, etc.) and should include a column
totaling the VOC concentrations for each well. 3. Groundwater gauging data, including water table
elevation, should be included in all reports along with an updated

169 3RD AVENUE (Continued) **S102150706**

water table contour map
indicating the groundwater flow direction determined during that monitoring event. 4. The reports
should include a discussion of data gathered during that monitoring event. If an active remedial
system is operating at a specific site, then a discussion of system performance should be included.
5. The monitoring reports should include an additional section presenting recommendations for
future work at the site based on the data gathered during that monitoring event. After reviewing
several quarterly reports, the NYSDEC has the following site-specific comments: 169 3rd Avenue,
Brooklyn NYSDEC Spill No. 9506588 Monitoring wells must be surveyed and gauged to accurately
determine groundwater flow direction. Wells EW-1 and EW-4 should be included in the quarterly
monitoring events. Letter uploaded to eDocs. - JAM 3/23/10 Meeting held today at DEC Region 2
Offices to discuss the status of sites included in the Northland Marketing Consent Order. Those in
attendance were as follows: Joseph Maisonave, NYSDEC Jon Kolleeny, NYSDEC Joseph Macchia, Northland
Marketing Walter Berninger, Berninger Environmental The discussion regarded items included in DEC's
letter issued to Joseph Macchia on Feb. 4, 2010. Items 1 thru 5 should be included in the next
quarterly GW monitoring rpts and all site-specific requirements will be addressed under separate
letters. DEC verbally approved reducing the groundwater gauging/monitoring and reporting
requirements from monthly to quarterly events. - JAM 7/1/10 Reviewed a Groundwater Monitoring
Report for the 1st Qtr 2010 submitted by Berninger Env., Inc. (BEI) dated March 31, 2010. Ten
monitoring wells were gauged and sampled for lab analysis on March 8, 2010. Free product was not
detected in any of the wells. Total VOC concentrations ranged from 2 ug/L in wells MW-5 and MW-6 to
441 ug/L in wells MW-3. Well MW-3 is the most down-gradient well. The iSOC vessels continue to
operate in 4 of the wells and dissolved oxygen levels show that they are working properly. BEI
recommends continuing quarterly groundwater monitoring and measuring dissolved oxygen in all the
wells. BEI also reommends collecting water samples to perform a bacteria plate count to determine
if there are bacteria present to reduce VOC contamination. Report uploaded to eDocs. - JAM
05/23/11: This spill transferred from J. Maisonave to J. Kolleeny. Reviewed quarterly mon rpts by
Berninger Envt'l Inc. dated 12/31/10 and 3/31/11 (both in eDocs). Dec. 2010 rpt gives GW results
for 12/3/10 which show significant dissolved contam remaining only in well MW-3, which had 210 ug/L
total VOCs (up from ND in Sept. 2010), including 130 ug/L benzene. Rpt recommends continued

169 3RD AVENUE (Continued) **S102150706**

maintenance of oxygen diffision vessel and quarterly monitoring until spill closure is approved;
next sampling scheduled for March 2011. March 2011 rpt gives GW results for 3/9/11 which show
significant contam remaining only in well MW-3, which had 1,429 ug/L total VOCs, big increase from
210 ug/L in Dec. 2010. Rpt recommends continued maintenance of oxygen diffision vessel & quarterly
monitoring until spill closure is approved; next sampling scheduled for June 2011. - J. Kolleeny
12/05/13: Reviewed Sept. 2013 Mon Rpt by Berninger Envt'l, dated 9/30/13 (in eDocs). Results of
gauging/sampling of 10 on-site wells on 9/3/13 showed no LNAPL detected; well MW-1 had 18 ug/L
total VOCs (up from ND in June 2013), well MW-3 had 67 ug/L tVOCs (up from 13 ug/L in June 2013);
other wells were ND or had negligible VOC levels. Based on data, BEI recommends spill closure, but
until closure is approved, they will continue monthly maintenance of iSOC oxygen emitters in four
wells (E-1 thru E-4) and quarterly GW sampling, with next sampling event scheduled for Dec. 2013. I
will meet with Berninger & RP on 12/6/13 to discuss this & other sites. - J. Kolleeny 12/06/13: At
meeting with Berninger Envt'l (Walter B.) and Joseph Macchia (RP), this site was discussed;
Berninger provided site plan and GW data table (in eDocs as brief) for reference during meeting.
Berninger presented this site as candidate for spill closure. I noted that site plan in Sept. 2013
Mon Rpt does not show four emitter wells E-1 thru E-4, and that GW flow map did not use most-recent
water table measurements. I asked that Berninger prepare a formal spill closure request summarizing
site history (tank removals, soil removal, remedial actions, whether or not RAP was
submitted/approved, etc.), with up-to-date GW flow map, and asked that it include discussion of
whether or not soil contam mentioned in Spill Caller Remarks was addressed (and how). Berninger
said he would put this together and submit. - J. Kolleeny 06/23/15: Reviewed monitoring rpt for
March 2015 by Berninger Env'tl, dated 3/31/15 (in DecDocs). Cover letter to rpt asks that I note
the conclusions & recommendations section of rpt, as BEI will be requesting closure of this site.
Results of GW sampling on 3/3/15 showed well MW-1 had 3 ug/L total VOCs (up from ND in Dec. 2014),
well MW-2 had 765 ug/L tVOCs (up from 188 ug/L in Dec. 2014), well MW-3 had 37 ug/L tVOCs (down
from 174 ug/L in Dec. 2014), well MW-4 had 1 ug/L tVOCs (same as in Dec. 2014), wells MW-5 and MW-6
were both ND (same as they were in Dec. 2014). Rpt includes table with depth to water measurements
for all site wells, but site plan figure showing water table contours only lists water table
elevations for wells MW-1, MW-2, MW-3, MW-4 & MW-6 (i.e., not for

169 3RD AVENUE (Continued) **S102150706**

MW-5). I checked eDocs and found
past rpt by Impact Envt'l which provides top of casing elevations for wells MW-1 thru MW-5, with
different elevations for most wells from BEI's numbers. BEI rpt's Conclusions section states that
VOCs and MTBE have decreased to zero or below stds in almost every well, detected levels are very
low and BEI has recommended closure ; there is some fluctuation due to rise and fall of GW. Rpt's
Recommendations section states that BEI recommends site closure as all wells have little to no
VOCs, and any remaining will naturally attenuate; BEI will continue to operate/maintain oxygen
emitters and conduct quarterly GW sampling until closure is approved.
I sent email to Walter
Berninger of BEI: Walter, I ve looked at BEI s March 2015 monitoring rpt for this site. Rpt s
Recommendations section states that BEI recommends spill closure, but 1st page cover letter states
Please note conclusions & recommendations section of rpt as BEI will be requesting closure of this
site. This is a little confusing; will there be a separate document requesting spill closure (as
there was for GMR site on Randall Ave. in Bronx and for Boston Road site), or is this rpt official
spill closure request? One other small detail I found a data table with Top of Casing Elevations
for all 6 monitoring wells at site in a rpt from Feb. 2007 by Impact Ent'l (see attached). TOC
numbers differ from those in your March 2015 rpt (which also doesn t include a TOC number for well
MW-5). If you plan to prepare a separate spill closure request rpt (or another quarterly monitoring
rpt), please revise site plan figure showing water table contours to include corrected water table
elevations (based on Impact s TOC data), unless BEI re-surveyed wells and got different numbers.
Also, please show tank locations (as well as pump islands) on site plan, and please include in text
of letter/rpt information you mentioned about fill ports being cleaned out. Feel free to call to
discuss any of this. - JK 07/27/15: Reviewed monitoring rpt for June 2015 by Berninger Envt'l,
dated 6/30/15 (in DecDocs). Gauging & sampling of 10 on-site wells (6 monitoring wells & 4 O2
emitter wells) on 6/1/15 showed no LNAPL detected in any wells; well MW-2 had 237 ug/L total VOCs
(down from 765 ug/L in March 2015), well MW-3 had 10 ug/L tVOCs (down from 37 ug/L in March 2015);
other wells were either ND or had very minor VOC detections. Rpt recommends spill closure, but
states that BEI will continue to conduct monthly maintenance on oxygen emitter vessels and
quarterly GW sampling events until spill closure is approved, with next GW sampling event in Sept.
2015. I sent email to Walter Berninger: Walter, On 7/17/15, I received another monitoring rpt for

169 3RD AVENUE (Continued) **S102150706**

this site, dated 6/30/15. Rpt again recommends spill closure (like March 2015 rpt), but in context of a quarterly monitoring rpt. June 2015 GW numbers in wells look good (total VOCs in well MW-2 went back down, from 765 ug/L in March to 237 ug/L in June 2015), but I d still like to resolve issue of different top of casing elevations provided in an earlier rpt by Impact Envt'l, compared with TOC elevations provided in your rpts for this site (which don t include any TOC elevation for well MW-5), and I d also like to obtain confirmation that contaminated material in tank fill port(s) has been cleaned out, before I close spill case. Finally, site plan should be revised to show tank locations, in addition to showing pump island locations. Please let me know if BEI will be preparing/submitting a separate spill closure request letter rpt which addresses these outstanding issues. - JK 11/23/15: Reviewed qtrly monitoring rpt for Sept. 2015 by Berninger Envt'l, dated 9/30/15 (in DecDocs). Gauging & sampling of 10 on-site wells (6 monitoring wells & 4 O2 emitter wells) on 9/17/15 showed no LNAPL detected in any wells; well MW-1 had 34 ug/L total VOCs (up from 2 ug/L in June 2015), well MW-2 had 10 ug/L tVOCs (down from 237 ug/L in June 2015), well MW-3 had 6 ug/L tVOCs (down from 10 ug/L in June 2015), well MW-4 had 1 ug/L tVOCs (same as in June 2015), well MW-5 was ND (same as in June 2015), well MW-6 was ND (same as in June 2015), well EW-2 had 9 ug/L tVOCs (up from 7 ug/L in June 2015), well EW-3 had 34 ug/L tVOCs (up from 1 ug/L in June 2015). Rpt states that DEC's comments about well TOC elevations have been addressed & corrected for Sept. 2015 revised site plan, and site plan has GW contours showing flow to East and includes inset table listing TOC elevations provided by Impact Envt'l. Rpt concludes that VOC concentrations have decreased to very low levels in most wells, and that D.O. readings in emitter wells show vessels are successfully enhancing O2 levels in GW. Rpt states that BEI will continue to operate O2 emitters in four EW wells, and that next GW sampling event is scheduled for Dec. 2015. - JK 01/12/16: Reviewed qtrly monitoring rpt for Dec. 2015 by Berninger Envt'l, dated 12/31/15 (in DecDocs). Gauging & sampling of 10 on-site wells (6 monitoring wells & 4 O2 emitter wells) on 12/01/15 showed no LNAPL detected in any wells; well MW-1 was ND for VOCs (down from 34 ug/L total VOCs in Sept. 2015), well MW-2 had 95 ug/L tVOCs (up from 10 ug/L in Sept. 2015), well MW-3 had 15 ug/L tVOCs (up from 6 ug/L in Sept. 2015), well MW-4 had 1 ug/L tVOCs (same as in Sept. 2015), well MW-5 was ND (same as in Sept. 2015), well MW-6 was ND (same as in Sept. 2015), well EW-2 had 10 ug/L tVOCs (had 9 ug/L in Sept. 2015), well EW-3 had 3,226 ug/L tVOCs

169 3RD AVENUE (Continued) **S102150706**

(up dramatically from 34 ug/L
in Sept. 2015). Rpt notes that well EW-3 showed a large spike in VOCs and stated that BEI will
continue to monitor this well. Nevertheless, rpt concludes that VOC levels have decreased to near
zero in most wells, and that D.O. readings in emitter wells show vessels are successfully enhancing
O2 levels in GW. Rpt states that BEI will continue to operate O2 emitters in four EW wells, and
that next GW sampling event is scheduled for March 2016. - J. Kolleeny
08/05/16: Reviewed quarterly
GW monitoring rpt for March 2016 by Berninger Envt'l, dated 3/31/16 (in DecDocs). Gauging &
sampling of 10 on-site wells (6 monitoring wells and 4 oxygen emitter wells) on 3/1/16 showed no
LNAPL detected in any wells; well MW-1 was ND for VOCs (same as in Dec. 2015), well MW-2 had 12
ug/L total VOCs (down from 95 ug/L in Dec. 2015), well MW-3 had 41 ug/L tVOCs (up from 15 ug/L in
Dec. 2015), well MW-4 was ND (had 1 ug/L tVOC in Dec. 2015), wells MW-5 & MW-6 were both ND (same
as in Dec. 2015), well EW-2 had 10 ug/L tVOCs (same as in Dec. 2015), well EW-3 had 9,240 ug/L
tVOCs (up dramatically from 3,226 ug/L in Dec. 2015), well EW-4 had 27 ug/L tVOCs (up from ND in
Dec. 2015). Rpt notes that EW-3 had very significant spike in VOCs, says BEI will continue to
monitor it and that source is most likely former tanks at site. Rpt states that BEI will continue
to infuse Oxygen using emitter wells, and that next quarterly sampling event will be in June 2016.
- J. Kolleeny 08/08/16: Reviewed quarterly GW monitoring rpt for June 2016 by Berninger Envt'l,
dated 6/30/16 (in DecDocs). Gauging & sampling of 10 on-site wells (6 mon wells & 4 oxygen emitter
wells) on 3/1/16 showed no LNAPL detected in any wells; well MW-1 had 11 ug/L total VOCs (up from
ND in March 2016), well MW-2 had 3,687 ug/L tVOCs (up dramatically from 12 ug/L in March 2016),
well MW-3 had 38 ug/L tVOCs (down from 41 ug/L in March 2016), well MW-4 had 2 ug/L tVOCs (up from
ND in March 2016), wells MW-5 & MW-6 were both ND (same as in March 2016), well EW-2 had 371 ug/L
tVOCs (up from 10 ug/L in March 2016), well EW-3 had 10 ug/L tVOCs (down dramatically from 9,240
ug/L in March 2016), well EW-4 was ND (down from 27 ug/L in March 2016). Rpt notes that well MW-2
had significant spike in VOCs, well EW-2 showed a moderate increase in VOCs, and well EW-3 showed a
very significant decrease in VOCs; rpt states that BEI will continue to monitor wells and that
source is likely former tanks at site. Rpt states that BEI will continue to infuse oxygen using
emitter wells, and that next quarterly sampling event will be in Sept. 2016. - J. Kolleeny
01/23/17: Reviewed quarterly GW mon rpt for December 2016 by Berninger Envt'l, dated 12/30/16 (in

169 3RD AVENUE (Continued) **S102150706**

DecDocs). Gauging & sampling of 10 on-site wells (6 mon wells & 4 oxygen emitter wells) on 3/1/16
showed no LNAPL detected in any wells; well MW-1 had 1 ug/L total VOCs (down from 23 ug/L in Sept.
2016), well MW-2 had 101 ug/L tVOCs (down from 377 ug/L in Sept. 2016), well MW-3 had 49 ug/L tVOCs
(up from 13 ug/L in Sept. 2016), well MW-4 had 1 ug/L tVOCs (same as in Sept. 2016), well MW-5 was
ND (same as in Sept. 2016), well MW-6 was ND (same as in Sept. 2016), well EW-1 had 1 ug/L tVOCs
(was ND in Sept. 2016), well EW-2 had 4 ug/L tVOCs (down from 8 ug/L in Sept. 2016), well EW-3 had
4 ug/L tVOCs (down from 34 ug/L in Sept. 2016), well EW-4 was ND (down from 1 ug/L in Sept. 2016).
Rpt notes that 8 of 10 wells sampled were either ND or had very low detections of VOCs, and other
two wells consistently show low VOC levels (?). Rpt states that BEI will continue to infuse oxygen
using emitter wells, and that next quarterly sampling event will be in March 2017. - JK 06/12/17:
Reviewed quarterly GW monitoring rpt for March 2017 by Berninger Envt'l, dated 3/31/17 (in
DecDocs). Gauging & sampling of 10 on-site wells (6 mon wells & 4 oxygen emitter wells) on 3/13/17
showed no LNAPL detected in any wells; well MW-1 had 8 ug/L total VOCs (up from 1 ug/L in Dec.
2016), well MW-2 had 1 ug/L tVOCs (down from 101 ug/L in Dec. 2016), well MW-3 had 4 ug/L tVOCs
(down from 49 ug/L in Dec. 2016), well MW-4 had 1 ug/L tVOCs (same as in Dec. 2016), well MW-5 was
ND (same as in Dec. 2016), well MW-6 was ND (same as in Dec. 2016), well EW-1 had 1 ug/L tVOCs
(same as in Dec. 2016), well EW-2 had 9 ug/L tVOCs (up from 4 ug/L in Dec. 2016), well EW-3 had 3
ug/L tVOCs (down from 4 ug/L in Dec. 2016), well EW-4 had 5 ug/L tVOCs (up from ND in Dec. 2016).
Based on data, BEI concludes that VOC & MTBE levels have decreased to nearly zero or below stds at
more than half of wells sampled (?), with some fluctuations due to rise & fall of GW; elevated D.O.
readings in EWs indicate emitter vessels are successfully enhancing O2 at those wells, & oxygen
tanks were replaced at EW-1 & EW-2 on this visit; 8 of 10 wells have very low VOC levels and most
wells have consistently low levels. BEI recommends continuing to infuse O2 with emitter vessels in
EWs. Next quarterly sampling event is scheduled for June 2017. - J. Kolleeny 08/07/17: Reviewed
quarterly GW mon rpt for June 2017 by Berninger Envt'l, dated 6/30/17 (in DecDocs). Gauging &
sampling of 10 on-site wells on 6/2/17 showed no LNAPL in any wells; dissolved VOC numbers in wells
were very low (worst was 38 ug/L total VOCs in MW-4). Rpt concludes VOCs have decreased to near
zero / low levels in most wells, and that D.O. readings in emitter wells show they are successfully
enhancing dissolved O2 levels. Rpt states that BEI will continue to

169 3RD AVENUE (Continued) **S102150706**

infuse O2 with four emitter
wells, with next quarterly sampling scheduled for Sept. 2017. - J. Kolleeny 11/20/17: Reviewed
quarterly GW monitoring rpt for Sept. 2017 by Berninger Envt'l, dated 9/30/17 (in DecDocs). Rpt
states that gauging of 10 wells on 9/18/17 showed no LNAPL in any wells; GW sampling showed no
significant VOC levels in any of on-site wells. However, well gauging data table and water table
contour map show that a new well, MW-1B was installed across street from site at 156-170 3rd Ave
(sp. no. 9607280) as required in my 6/12/17 letter for that site, and GW data table shows new well
MW-1B had 8,733 ug/L total VOCs. There is no mention in text of rpt of well install'n or sampling
results. Nor does rpt indicate it is now a combined monitoring rpt for both spill sites, as
requested in my 6/12/17 letter. Rpt states that VOCs & MTBE at monitoring and emitter wells have
decreased to low or ND levels, and that BEI will continue to infuse oxygen w/oxygen vessels in
emitter wells. Next quarterly sampling is scheduled for December 2017. - JK 02/01/18: Reviewed
quarterly GW monitoring rpt for Dec. 2017 by Berninger Envt'l, dated 12/31/17 (in DecDocs). Rpt
states that gauging of 10 wells on 12/19/17 showed no LNAPL in any wells. GW sampling showed well
MW-1 had 23 ug/L total VOCs (up from 3 ug/L in Sept. 2017), well MW-3 had 21 ug/L tVOCs (up from 5
ug/L in Sept. 2017), well EW-2 had 27 ug/L tVOCs (up from 9 ug/L in Sept. 2017); other on-site mon
& emitter wells had very low or ND VOC levels. However, text states that new well MW-1B installed
across street at spill site no. 9607280, 156-170 3rd Ave., experienced a good decrease in VOCs
since previous quarter. GW data show well MW-1B had 7,547 ug/L tVOCs (down from 8,733 ug/L in Sept.
2017). Rpt concludes that 7 of 11 wells sampled have very low detections of VOCs, and VOCs in most
wells have consistently remained low. BEI will continue to infuse oxygen with emitter vessels; next
quarterly sampling is schedule for March 2018. I sent email to Justin Halpin of BEI, cc's to Walter
Berninger of BEI, Joseph Macchia (RP) stating that mon rpts should indicate they are now for both
3rd Ave Bklyn spill sites, that impacts in new well MW-1B should be delineated with addt'l wells in
sidewalk and may require active remediation. Suggested that wells at 169 3rd Ave with consistent
low or ND results (e.g., MW-5, MW-6, EW-1) may be removed from quarterly monitoring program, and if
levels in wells remain low, BEI should consider requesting spill closure so they can focus efforts
on impacts across 3rd Ave. - J. Kolleeny 05/09/18: Reviewed quarterly GW monitoring rpt for March
2018 by BEI, dated 3/31/18 (in DecDocs). Rpt is combined for both 169 3rd Ave. (sp 9506588) and

169 3RD AVENUE (Continued) **S102150706**

156-170 3rd Ave. (sp 9607280) sites. Well gauging on 3/26/18 showed no LNAPL detected in any of 11
wells checked (including emitter wells and well MW-1B at 156-170 3rd Ave); GW flow direction
continues to be to ESE. GW sample results for 3/26/18 showed well MW-1 was ND (down from 23 ug/L
total VOCs in Dec. 2017), well MW-2 had 3 ug/L tVOCs (down from 7 ug/L in Dec. 2017), well MW-3 had
783 ug/L tVOCs (up from 21 ug/L in Dec. 2017), well MW-4 had 1 ug/L tVOCs (same as in Dec. 2017),
well MW-5 was ND (had 0.44 ug/L VOCs in Dec. 2017), well MW-6 was ND (had 0.49 ug/L VOCs in Dec.
2017), well EW-1 was ND (had 1 ug/L VOCs in Dec. 2017), well EW-2 had 38 ug/L tVOCs (up from 27
ug/L in Dec. 2017), well EW-3 had 19 ug/L tVOCs (up from 7 ug/L in Dec. 2017), well EW-4 was ND
(down from 3 ug/L VOCs in Dec. 2017), and well MW-1B (across street at 156-170 3rd Ave) had 8,024
ug/L tVOCs (up from 7,547 ug/L in Dec. 2017). Rpt notes that VOCs increased in wells MW-3, MW-1B,
EW-2 and EW-3, but does not mention significant increase in MW-3; states that VOCs have decrease to
or near ND in 7 wells. Rpt further states that iSOC emitters are successfully enhancing O2 in GW.
BEI will continue to infuse O2 via 4 emitter wells. Rpt states that BEI will be requesting closure
of sp. 9506588 at 169 3rd Ave in order to focus remedial efforts on sp. 9607280 across street; in
meantime, they will suspend sampling of some wells which have consistently shown little to no
contam, such as MW-5, MW-6 and EW-1. Next quarterly sampling event is scheduled for June 2018. - J.
Kolleeny 05/09/18: I sent email to Justin Halpin of BEI: Justin, I reviewed March 2018 quarterly
monitoring rpt for sites located across 3rd Ave in Brooklyn from each other. Rpt states that
Berninger Envt'l will be requesting closure of spill 9506588 (@169 3rd Ave) in order to focus
remedial efforts on spill 9607280 (@156-170 3rd Ave), and in meantime BEI will suspend sampling of
some wells at 169 3rd Ave which have consistently shown little or no contam, such as wells MW-5,
MW-6 & EW-1. I agree with suspending sampling of those wells, and you could even suspend sampling
of wells MW-2 & MW-4 for now, as those wells also have had very little contam for at least past 4
quarters of sampling. These wells should be kept open and not abandoned, for collection of a final
round of samples in support of spill closure. But I wanted to note that in March 2018, total VOCs
in well MW-3 increased to 783 ug/L, up from just 21 ug/L in Dec. 2017. This is something rpt text
should have made note of and discussed. (Rpt did state that VOCs increased in wells MW-3, EW-2 &
EW-3, but increase in MW-3 was much more significant than increases in other wells and was
deserving of some further mention or discussion.) In light of this

169 3RD AVENUE (Continued) **S102150706**

increase, I m not sure spill
9506588 is ready for a closure petition just yet. Let s see what happens with well MW-3 in next
round of GW sampling, scheduled for June 2018, to see if that increase was just a temporary
fluctuation or if it may be an indication of an increasing trend for that well. - J. Kolleeny
10/02/18: Reviewed June 2018 quarterly GW monitoring rpt for this site and 156-170 3rd Ave, across
street (sp9607280), by Berninger Envt'l dated 6/30/18 (in DecDocs). Well gauging & GW sampling in
June 2018 showed no LNAPL in any of 11 wells gauged and GW flow to S along 3rd Ave. Sample results
showed well MW-3 had 1,233 ug/L total VOCs (up from 783 ug/L in March 2018), well EW-2 had 19 ug/L
tVOCs (down from 38 ug/L in March 2018), well EW-3 had 112 ug/L tVOCs (up from 19 ug/L in March
2018); well MW-1B, located across street at 156-170 3rd Ave site, had 11,814 ug/L tVOCs (up from
8,024 ug/L in March 2018); other wells were either ND or had very low VOC detections. Rpt notes
that tVOCs well MW-3 have increased from 18 ug/L in June 2017 to 1,233 ug/L in June 2018, says this
is most likely due to increase in water table elevation. Rpt Conclusions state that GW levels
increased dramatically this quarter. Also state that D.O. levels were relatively low, and that 02
tanks were replaced in wells EW-2, EW-3 and EW-4. Recommendations state that BEI will continue to
infuse O2 into emitter wells, BEI will be requesting closure of sp. 9506588 in order to focus
efforts on sp. 9607280 across street, and BEI will suspend sampling of wells MW-2, MW-4, MW-5, MW-6
and EW-1 as per agreement with DEC. Next quarterly event is scheduled for Sept. 2018. - JK
12/06/18: Reviewed Sept. 2018 quarterly GW monitoring rpt for this site and 156-170 3rd Ave, across
street (sp 9607280) by Berninger Envt'l dated 9/30/18 (in DecDocs). Well gauging & sampling on
9/26/18 showed no LNAPL in any of 11 wells gauged, and showed GW flow to S along 3rd Ave. Sample
results showed well MW-3 had 171 ug/L total VOCs (down from 1,233 ug/L in June 2018), well EW-2 had
74 ug/L tVOCs (up from 19 ug/L in June 2018), well EW-3 was ND (down from 112 ug/L tVOCs in June
2018). Well MW-1B, located across street at 156-170 3rd Ave., had 43,654 ug/L tVOCs (up from 11,814
ug/L in June 2018). Other wells were either ND or had very low VOC detections, or could not be
sampled (rpt indicates wells MW-2 and MW-4 have been covered over with concrete). Rpt states that
BEI will continue to closely monitor well MW-1B across street due to recent dramatic increase in
VOCs, but notes that on-site wells are either ND or have very low VOC levels. BEI will continue to
infuse O2 into emitter wells, and will be requesting closure of sp. 9506588 in order to focus

169 3RD AVENUE (Continued) **S102150706**

efforts on sp. 9607280 across street. Next quarterly event scheduled for Dec. 2018. - JK 03/05/19:
Reviewed Dec. 2018 quarterly GW monitoring rpt for this site and 156-170 3rd Ave., across street
(sp 9607280) by Berninger Envt'l dated 12/31/18 (in DecDocs). Well gauging & sampling on 12/20/18
showed no LNAPL in any of 11 wells gauged, and showed GW flow to SSE. Sample results showed well
MW-3 had 213 ug/L total VOCs (up from 171 ug/L in Sept. 2018), well MW-1B (located across street at
156-170 3rd Ave.) had 46,579 ug/L tVOCs (up from 43,654 ug/L in Sept. 2018. Other wells were ND,
had very low tVOCs, or were inaccessible (e.g., wells MW-2 & MW-4 are listed as covered with new
concrete, well EW-2 is listed as blocked), or were not sampled due to history of ND or very low
VOC levels (e.g., MW-5, MW-6, EW-1). Rpt states BEI will continue to closely monitor well MW-1B
across street due to increases in VOCs; states incorrectly that MW-3 decreased again, but notes
that other wells are either ND or have very low VOC levels. BEI will continue to infuse O2 into
emitter wells, and will be requesting closure of sp. 9506588 in order to focus efforts on sp.
9607280 across street. Also, BEI will discontinued sampling of wells MW-2, MW-4, MW-5, MW-6 & EW-1,
per DEC. Next quarterly event scheduled for March 2019. - J. Kolleeny 05/14/19: Reviewed March 2019
quarterly GW monitoring Rpt by Berninger Envt'l dated 3/31/19 (in DecDocs). Gauging of 4 wells
remaining in monitoring program showed no LNAPL in any well, GW flow to SE. GW sampling on 3/12/19
showed well MW-1 was ND (had 1 ug/L tVOC in Dec. 2018), well MW-2 was covered with new concrete
sometime in summer of 2018, had 4 ug/L tVOCs when last sampled in June 2018, well MW-3 had 138 ug/L
tVOCs (down from 213 ug/L in Dec. 2018), well MW-4 was covered with new concrete sometime in summer
of 2018, had 2 ug/L tVOCs when last sampled in June 2018, wells MW-5, MW-6 & EW-1 have not been
sampled for past 3 quarterly events due to low/ND tVOCs, well EW-2 was blocked and could not be
sampled for past 2 events, had 74 ug/L tVOCs when last sampled in Sept. 2018, well EW-3 was ND (had
1 ug/L tVOC in Dec. 2018), well EW-4 was ND (same as past 4 events; last detection was 3 ug/L tVOCs
in Dec. 2017). Based on data, Berninger Envt'l concludes that few remaining minor VOC
concentrations in GW have continued a downward trend, with only 3 remaining wells exhibiting minor
detections above GW stds; remaining impacts are expected to naturally attenuate over time, and BEI
believes site does not pose any threat to human health or environment. Therefore, they request
spill closure. - J. Kolleeny 05/16/19: After discussion with Justin Halpin of Berninger Envt'l
regarding keeping open one or more wells at this site for monitoring

169 3RD AVENUE (Continued) **S102150706**

in relation to spill 9607280
at 156-170 3rd Ave (across street from this site), I closed spill case based on recent and
historical GW data indicating minimal and attenuating dissolved impacts. I sent closure letter (in
DecDocs) to RP Joseph Macchia, cc's to Justin Halpin, Alicia Patti and Walter Berninger of BEI.
Spill closure letter requested that well MW-1 remain open for gauging & sampling related to sp.
9607280, but stating that all other wells associated with this spill be properly decommissioned. -
J. Kolleeny

DEC Memo:	6/2/14 TJD Teleconfence with tank owner (Mr. Joseph Macchia) - he states tank has failed tighness test which vent piping is suspected cause. Original failing tighness test report was requested, Mr. Macchia states test report is not yet available. Cromco is scheduled to return to site on 6/3/14 to perform a helium isolation test. TTF letter has been prepared and sent via US Mail to correspondence address listed on PBS Facility Information Report. In addition leter has been e-mailed to Mr. Macchia at jmacchiamdi@aol.com. TTF letter could not be uploaded to DECDOCS as the file is not currently available. PM (Piper) has been provided an electronic copy of corespondence and will upload to DECDOCS when file location becomes available. Helium pinpoint service performed on failed Regular unleaded tank system. Through this pinpointing, crew Identified the leak source to be on the vent line back at vent stack. Alvin Petroleum was on site and made immediate repairs followed up by testing by Crornpco. System passed testing. Spill closed. Results and repair documentation in dec docs.

DEC Memo:	6/7/16: J.Kann - spoke with Shawn Kerrigan who indicated that the TTF was a dry leak. The manway gasket was audibly leaking air. Gemstar Construction 718-442-8200 will be at the site to do the repair tomorrow or Thursday. A followup TTT will be performed once the repair is done. 6/14/16: J.Kann - left a message for Shawn asking if the followup testing was done and to return my call. 6/16/16: J.Kann - did not receive a call back from Shawn so sent out a TTT letter and decdoced the letter. Spoke with Jon Kolleeny who agreed to take the site since he has an active open spill at this site (spill 9506588) 11/06/19: (J. Kolleeny) I sent email to Josepth Macchia, spill RP: Mr. Macchia: In reviewing my active spill files, I came across this spill case, a tank test failure of a gasoline UST at 151-169 3rd Avenue in Brooklyn. You are listed as contact for this spill, and I believe property is same gas station where I recently closed a spill case you were involved with (spill no. 9506588 at 169 3rd Avenue, Brooklyn). I have attached a copy of spill rpt for your reference.

ASTI HOLDING CORP (Continued) **S118707727**

Comments in DEC Remarks section indicate that tank test failure was likely caused by a dry leak (i.e., not involving a release to environment), and that repairs would be made and tank would be re-tested. Can you please confirm if repairs were ever made to this tank and if tank was subsequently re-tested? If so, do you have any documentation of this in your possession? I would like to be able to close out this spill case. Please feel free to contact me to discuss this case. - J. Kolleeny 11/08/19: Received email reply from Joseph Macchia: Jonathan, repairs were made immediately by Gemstar Construction Corp. Attached are tank re-test results after repair was completed. Please let me know if you need addt'l information. I hope this will allow you to close spill number. Based on attached tank test results for 6/10/16 by Cromco showing passing result (in DecDocs), and on above comments indicating earlier test failure was likely a dry leak, and on closure of spill no. 9506588 on 5/16/19 (for which GW monitoring continued into March 2019 showing ND or very minor and decreasing residual VOC levels), this spill case is closed. - J. Kolleeny

Updated By:	DKMACNEA
Site Description:	"Site Location The 556 Baltic Street Site s address is 151-169 Third Avenue, Brooklyn, NY 11217. The site is located in Kings County, and is labelled as Block 407, Lot 1 in the New York City tax map. It is approximately 0.27-acres in size (11,800 square feet). The site is bordered to the north by Baltic Street, to the east by multi-story residential buildings and a self-storage warehouse, to the south by

556 BALTIC STREET SITE (Continued) **S129112354**

Butler Street, and to the west by Third Avenue. The site is located within an urban area of Gowanus, Brooklyn and the Gowanus Canal is located approximately 1,500 feet southwest of the site. Site Features Construction for the new development is currently ongoing, and when completed, the Site will have an 11-story mixed-use commercial and residential building with a full cellar. The building encompasses approximately 100 percent of the lot footprint and extends 15 feet (ft) below ground surface (bgs) in the northern portion of the Site, 18 ft bgs in the southern portion of the Site. The residential portion of the building contains 92 dwelling units, of which about 23 units are designated as affordable housing. Current Zoning and Land Use The site is located within a residential and manufacturing zoning district (M1-4/R7X). As part of the Gowanus Rezoning, the site also has a Mandatory Inclusionary Housing (MIH) requirement. The proposed development of the property is consistent with the current zoning. The site was assigned an environmental E-Designation by New York City for hazardous materials, noise, and air quality effective March 2019 as part of the rezoning action. Past Use of the Site: The Site was initially developed with multiple four-story commercial stores in the 1920s. By 1978, a car wash was constructed on the northern portion of the site. The site operated as a gasoline service station, auto rental, and car wash from the 1970s until the cessation of operations in 2022. The two 4,000-gallon underground storage tanks (USTs) for gasoline storage have been emptied, but the tanks, installed in 1972, remain in place at the site. Additionally, a 550-gallon UST, installed in 1974, was reportedly closed and removed in 1997. Site Geology and Hydrogeology The site is underlain by fill predominantly consisting of brown to dark brown, coarse to medium sand with varying amounts of gravel, concrete, brick, and silt, from surface grade to depths of approximately 8 to 10 feet below ground surface (bgs). The fill is underlain by brown fine silty sand. The topography of the site and the surrounding area slopes gently downward from north to west southwest towards the Gowanus Canal. The ground level elevation on the property is approximately 21 feet above mean sea level. Groundwater is located at 14.49-15.69 feet bgs grade and groundwater contours indicate flow from northwest to southeast."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern include petroleum VOCs, SVOCs and metals in soil, and VOCs in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the groundwater and soil vapor is being managed under a Site Management Plan. "

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination."

Site Code:	640505
Site Description:	"Site Location The 556 Baltic Street Site s address is 151-169 Third Avenue, Brooklyn, NY 11217. The site is located in Kings County, and is labelled as Block 407, Lot 1 in the New York City tax map. It is approximately 0.27-acres in size (11,800 square feet). The site is bordered to the north by Baltic Street, to the east by multi-story residential buildings and a self-storage warehouse, to the south by Butler Street, and to the west by Third Avenue. The site is located within an urban area of Gowanus, Brooklyn and the Gowanus Canal is located approximately 1,500 feet southwest of the site. Site Features Construction for the new development is currently ongoing, and when completed, the Site will have an 11-story mixed-use commercial and residential building with a full cellar. The building encompasses

556 BALTIC STREET SITE (Continued) **S129112354**

approximately 100 percent of the lot footprint and extends 15 feet (ft) below ground surface (bgs) in the northern portion of the Site, 18 ft bgs in the southern portion of the Site. The residential portion of the building contains 92 dwelling units, of which about 23 units are designated as affordable housing. Current Zoning and Land Use The site is located within a residential and manufacturing zoning district (M1-4/R7X). As part of the Gowanus Rezoning, the site also has a Mandatory Inclusionary Housing (MIH) requirement. The proposed development of the property is consistent with the current zoning. The site was assigned an environmental E-Designation by New York City for hazardous materials, noise, and air quality effective March 2019 as part of the rezoning action. Past Use of the Site: The Site was initially developed with multiple four-story commercial stores in the 1920s. By 1978, a car wash was constructed on the northern portion of the site. The site operated as a gasoline service station, auto rental, and car wash from the 1970s until the cessation of operations in 2022. The two 4,000-gallon underground storage tanks (USTs) for gasoline storage have been emptied, but the tanks, installed in 1972, remain in place at the site. Additionally, a 550-gallon UST, installed in 1974, was reportedly closed and removed in 1997. Site Geology and Hydrogeology The site is underlain by fill predominantly consisting of brown to dark brown, coarse to medium sand with varying amounts of gravel, concrete, brick, and silt, from surface grade to depths of approximately 8 to 10 feet below ground surface (bgs). The fill is underlain by brown fine silty sand. The topography of the site and the surrounding area slopes gently downward from north to west southwest towards the Gowanus Canal. The ground level elevation on the property is approximately 21 feet above mean sea level. Groundwater is located at 14.49-15.69 feet bgs grade and groundwater contours indicate flow from northwest to southeast."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern include petroleum VOCs, SVOCs and metals in soil, and VOCs in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the groundwater and soil vapor is being managed under a Site Management Plan. "

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination."

Site Code: 640505
Site Description: "Site Location The 556 Baltic Street Site s address is 151-169 Third Avenue, Brooklyn, NY 11217. The site is located in Kings County, and is labelled as Block 407, Lot 1 in the New York City tax map. It is approximately 0.27-acres in size (11,800 square feet). The site is bordered to the north by Baltic Street, to the east by multi-story residential buildings and a self-storage warehouse, to the south by Butler Street, and to the west by Third Avenue. The site is located within an urban area of Gowanus, Brooklyn and the Gowanus Canal is located approximately 1,500 feet southwest of the site. Site Features Construction for the new development is currently ongoing, and when completed, the Site will have an 11-story mixed-use commercial and residential building with a full cellar. The building encompasses approximately 100 percent of the lot footprint and extends 15 feet (ft) below ground surface (bgs) in the northern portion of the Site, 18 ft bgs in the southern portion of the Site. The residential portion of the building contains 92 dwelling units, of which about 23 units are designated as affordable housing. Current Zoning and Land Use The site is located within a residential and manufacturing zoning district (M1-4/R7X). As part of the Gowanus Rezoning, the site also has a Mandatory Inclusionary Housing (MIH) requirement. The proposed development of the property is consistent with the current zoning. The site was assigned an environmental E-Designation by New York City for hazardous materials, noise, and air quality effective March 2019 as part of the rezoning action. Past Use of the Site: The Site was initially developed with multiple four-story commercial stores in the 1920s. By 1978, a car wash was constructed on the northern portion of the site. The site operated as a gasoline service station, auto rental, and car wash from the 1970s until the cessation of operations in 2022. The two 4,000-gallon underground storage tanks (USTs) for gasoline storage have been emptied, but the tanks, installed in 1972, remain in place at the site. Additionally, a 550-gallon UST, installed in 1974, was reportedly closed and removed in 1997. Site Geology and Hydrogeology The site is underlain by fill predominantly

556 BALTIC STREET SITE (Continued) **S129112354**

consisting of brown to dark brown, coarse to medium sand with varying amounts of gravel, concrete, brick, and silt, from surface grade to depths of approximately 8 to 10 feet below ground surface (bgs). The fill is underlain by brown fine silty sand. The topography of the site and the surrounding area slopes gently downward from north to west southwest towards the Gowanus Canal. The ground level elevation on the property is approximately 21 feet above mean sea level. Groundwater is located at 14.49-15.69 feet bgs grade and groundwater contours indicate flow from northwest to southeast."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern include petroleum VOCs, SVOCs and metals in soil, and VOCs in groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the groundwater and soil vapor is being managed under a Site Management Plan. "

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining site contamination."

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

BROWNFIELDS:
Name: 234 BUTLER STREET
Address: 234 BUTLER STREET
City,State,Zip: BROOKLYN, NY 11217
Program: BCP
Site Code: 550328
Acres: 1.190
HW Code: C224261
SWIS: 2401
Town: New York City
Record Added Date: 06/05/2017
Record Updated Date: 03/06/2020
Update By: DJEATON
Site Description: "BCP Denial letter sent on 9/19/17. Location The site is located at 234 Butler Street in the Gowanus neighborhood of Brooklyn, New York (Kings County) and is denoted on the New York City Tax Map as Block 411, Lot 24. Alternative addresses for the site include 226 Nevins Street and 228 240 Nevins Street. The site is located in an urban environment. Site Features The site occupies an area of about 52,000 square feet and consists of a two-story, brick and concrete masonry commercial building and adjoining one-story warehouse building along Butler Street, a brick and concrete masonry maintenance building containing eight contiguous vehicle garages along Nevins Street, and an exterior, concrete-paved parking and storage lot for sanitation trucks. According to a 1956 USGS Brooklyn N.Y Quadrangle 7.5-minute Series Topographic Map, the site sits at an elevation of about 12 feet above mean sea level (msl). The topography of the site is generally flat, and the surrounding area slopes to the west towards the Gowanus Canal, which adjoins the site to the southwest. The site is located on the northeastern portion of the city block bound by Butler Street to the north; Nevins Street to the east; Block 418, Lot 1, followed by DeGraw Street to the south; and Block 411, Lot 14 and the Gowanus Canal, followed by Bond Street to the west. Current Zoning and Land Use According to the New York City Planning Commission Zoning Map 16c, the site is located within a M2-1 manufacturing district. M2 districts occupy the middle ground between light and heavy industrial areas. The district has a maximum floor area ratio (FAR) of 2.0. The Department of City Planning is in the process of rezoning the Gowanus neighborhood to allow for more residential development; therefore, a mixed-use commercial and residential project is anticipated to be built at the site. The project will be consistent with the goals of the City Council as embodied in the NYC zoning districts. The New York City Department of Finance classifies the site buildings as G-1 garage/gas station . The site has been owned by 226 Nevins Street Corp. since 1978. Past Use of the Site The following historical site usage may have led to site

234 BUTLER STREET (Continued) **S121102082**

contamination: ? -City pipe yard (1904); ? -NYC water supply, gas and electricity department repair companies (1945 to 1949); ? -McNally Trucking Corp. (1969); ? -Truck and automotive maintenance Inc. (1976); ? -Sanitation Repairs (1976 to the present); ? -Truck parking and motor freight station (1977 to 1988); ? -Diesel Corp. (1985 to 1992); and ? -Truck parking and sanitation truck repair (1991 to 2007) Site Geology and Hydrogeology The site is located in a developed area of Brooklyn, New York that is generally covered with paved roads, walkways and buildings. The built environment is generally underlain by fill material used for construction and development since the mid-1800 s. The following description of the proposed brownfield site geology and hydrogeology is derived from the environmental reports referenced in the Environmental Assessment section below. The area surrounding the Gowanus Canal, including the proposed brownfield site, was originally part of the former Gowanus Creek and associated wetlands. In 1848, the State of New York authorized construction of the Gowanus Canal as well as the draining and filling of the wetlands of South Brooklyn. By 1869, the Gowanus Canal was completed with the current street configuration surrounding the canal. According to soil descriptions provided in previous environmental investigations (discussed in Attachment C), the subsurface strata at the proposed brownfield site consists of historic fill material characterized by fine to coarse sand with varying amounts of cobbles, gravel, coal ash, brick, wood, clinkers, glass and paper ranging from directly below the surface to depths of 8 to 20 feet. The fill layer is underlain by silt and sand with trace amounts of gravel. Weathered bedrock was encountered at about 151 feet below ground surface (bgs) and bedrock (Fordham Gneiss) was encountered at about 159 feet bgs. According to the Fulton Municipal Works Former Manufactured Gas Plant (MGP) remediation investigation, groundwater depths range from about 5.65 to 7.05 feet bgs. Groundwater elevation measurements recorded from monitoring wells in the area indicate that the shallow groundwater, on the east side of the Canal, generally flows westward toward the Gowanus Canal at high and low tide levels. Groundwater in this area of New York City is not used as a potable water source. Potable water is provided to the site by the City of New York and is derived from surface impoundments in the Croton, Catskill, and Delaware watersheds."

Env Problem: "US Environmental Protection Agency (EPA) has determined that the property is part of the Gowanus Canal Superfund Site that is listed on the National Priorities List. Additionally, under ECL 27-1405(2)(e), there is currently an EPA environmental enforcement action related to contamination at the property, therefore the site was denied entry to the NYS BCP."

Health Problem: "Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available."

DEC Memo:	DECPiper - AS per R Ketani directives, I reposnde dto site in evening. The site is a warehouse and no one was there at 5pm upon arrival. No signs of spillage. I got in cntact with caller, alex later and he informed me that soil borings revealed svoc's and report is being generated. He already spoke with DEC Austin who instructed Alex to call in spill. Report will besent th is week. DEC Piper spoke with Cosmos inc requiring additional investigation as subsurface investigation already conducted needed further investigation. Received message from

255 BUTLER LLC (Continued) **1000317855**

Alexandra Gineli 212- 967-2753
10/17/13-Vought-Received call from and spoke to Paul Stewart (Advanced Cleanup Technologies
Ph:516-840-8197) and Stewart inquiring about steps needed to work towards spill closure. Stewart
and owner called and left message for Piper but have not received call back to date. DECPiper
received limited phase II and closure rpeort. Based on findings and work to date, this spill is
closed. See edocs if warranted.

Remarks: 1503 The caller advised dispatch he has spoken with DEC Rep. Austin. The Rep. advised the caller to report the spill and clean up will be conducted after DEC has inspected the area. The amount of the spill is unknown.

DEC Memo:	5/8/23 - Ye - Spoke to the caller, from Roux Associates. Crews were excavating on an empty lot (Lot 49) and discovered a tank a few hours ago on the eastern border of the lot with sludge and staining around the tank. They put up caution tape and pumped out some sludge and put it in drums. PID readings were 89 ppm. They said this was an OER site, with Miranda Fatolitis as PM, and that next to the site, to the west, at 545 Sackett Street, is a BCP site for a former MGP managed under Aaron Fischer. They plan to build a high rise on the site. Requested photos, tank registration with PBS, and endpoint samples. Received a site diagram and photo showing a tank with two holes caused by the excavator. Looked online. OER Numbers are 22EHAN154K, 22CVCP044K for 553 Sackett Street, which is the same block as 545 Sackett Street. Found the following BCP projects: - C224222 at 563 Sackett Street, located east of 553 Sackett Street - C224051 - K - Fulton Municipal MGP at Nevins, DeGraw & Sackett Sts - C224080 - Gowanus Canal Northside at Union, Bond, Sackett and DeGraw Streets Asked whether they will sample the sludge. 6/9/23 - Ye - Have not heard back. Reached out to Roux Associates and DEP Fatolitis for an update and past ESAs. 1/23/24 - Ye - On 6/12/23, Roux Associates said that the UST and approximately 15 CY of impacted soil were relocated and stockpiled

EMPTY LOT (Continued) **S130464066**

at another location onsite, and that they were awaiting to schedule the UST cleaning and removal with the tank contractor. They collected bottom and sidewall samples and provided a report dated 6/1/23 of the soil samples, which included results for 4 sidewall samples, a bottom sample, an oil ID for the sludge, and trip blank. They said the hydrocarbon-impacted material was all removed and they are planning to prepare a Spill Closure report, but there are some urban fill impacts not associated with the UST. On 1/23/24, received a spill closure request. The 275-gallon UST was moved on 5/24 and stockpiled, and endpoint samples were collected on 5/25. A sample from the approximately 6-inches oil/water mixture found in the tank was taken and determined to most closely resemble used motor oil. The tank was emptied and cleaned on 10/24/23, and registered under PBS #2-613475. 3/7/24 - Ye - Reviewed the spill closure request. The site (Lot 49) is in the NYCOER VCP program, Project Number 21TMP1642K, and is being developed with 2 Fulton MGP Parcels (III and IV), located west of Lot 49. The 3 lots have been consolidated and is now part of Block 426, Lot 1. The remediation project for the MGP site is 224051. The tank was found on the eastern border with Block 426, Lot 17. From 10/24/23 activities, approximately 60 gallons of sludge oil/water were drummed into 2 55-gallon drums and transported for disposal at Tradebe T&R Northeast, LLC of Meriden, CT. The 660-lb UST was disposed at Standard Scrap Iron & Metal. On 11/15/23, a truck of 23.34 tons of non-hazardous petroleum impacted soil was transported for disposal to Clean Earth of Carteret. It was also noted that additional remedial excavation was completed in accordance with the RAWP and the July 13, 2023 email correspondence. Endpoint samples were collected and will be summarized in the Remedial Action Report. On 1/25, requested a photo log and the Remedial Action Report and/or details on the additional remedial excavation. On 1/30, Roux added a Photo Log to the Spill Closure Request report, the Remedial Action Work Plan finalized May 2022, and the email correspondence that updated the additional remedial excavation. Reviewed the files. Photos show the tank moved and laid on poly on 5/24, and the inside cleaned and removed 10/24 and 11/15, respectively. From the emails with NYCOER, it appears the site, for the most part, was originally expected to be excavated to a depth of at least 5 to 6 feet below grade, but because in-situ solidification will be performed elsewhere in the proposed building footprint, the foundation design has been altered and excavation will occur to approximately 10’ below existing grade, and 1 foot of clean fill will be placed. The bottom, north sidewall, and west sidewall soil samples from the tank

EMPTY LOT (Continued) **S130464066**

removal had a few SVOC RRSCO
exceedances (highest was 12 mg/kg benzo[b]fluoranthene for the bottom sample), but were below Track
4 Site-Specific SCOs (from the RAWP, less than 150 ppm). Other impacts are associated with
site-wide historic fill. The tank that was found was registered, and the tank and contamination
removed; spill closed.

Remarks: Digging and found the tank. Unknown how much or what it is. Only loss to soil. C/U is pending.

Site Description:	"Location: The original site is located at 563 Sackett Street in the Gowanus neighborhood of Brooklyn, Kings County, and is identified as Block 426 lot 44. The 563 Sackett Street site is approximately 0.229 acres in size. the site contains K-Fulton Works MGP Parcel IV (site 224051) An adjacent parcel of land located at 560 Degraw Street and approximately 0.88 acres in size is in the process of being added to the 563 Sackett Street site in the Brownfield Cleanup Program under a Major Amendment. This portion of the property is identified on the tax map as Block 426, part of (p/o) Lot 17 and p/o Lot 49. Site

563 SACKETT STREET (Continued) **S118141136**

Features: The 563 Sackett Street site is developed with a large open shed, which is divided into two portions. A two-story structure consisting of stacked metal shipping containers is present at the northeast side of the site and is used for storage and office space by the site occupants. The remainder of the site consists of an unpaved yard that is used for general storage by the occupants. The majority of the eastern portion of the yard is covered with metal plates and the remainder of the yard consists primarily of exposed soil and gravel cover. The 560 Degraw Street site occupies an area of about 38,500 square feet. The Lot 17 portion occupies an area of about 35,000 square feet and includes the following improvements and operations: Major Auto Show, a business consisting of a paved parking area and one-story commercial building used for auto sales; a vehicular entrance to the south-adjoining property at 563 Sackett Street; and a one-story office building for Rise Development Partners. The Lot 49 part of the proposed BCP site occupies an area of about 3,500 square feet, is unimproved, and is used for storage of out-of-service industrial vehicles. Current Zoning and Land Use: The current zoning of the 563 Sackett Street property is for commercial use. The eastern portion of the shed is occupied by Partner For You, a general commercial products (e.g., plastic bottles and aluminum cans) recycling facility, and the western portion of the shed is occupied by Brooklyn Truck & Equipment Repair, a vehicle and equipment repair operation. For the 560 Degraw Street site, the Lot 17 part of the site is located in a M1-4/R7X district and the Lot 49 part of the site is located in a M1-4/R6A district. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. Offices, hotels and most retail uses are also permitted. Historical Use: The 563 Sackett Street site and surrounding area have been developed for residential, commercial, and industrial uses since at least 1886. Historical site uses included Nolan Bro s Contractors (1904), a wagon builder (1915), a bottle storage facility (1938-1950), parking (1969 to 2007). The Fulton Municipal Gas Co. [Fulton Works, a former manufactured gas plant (MGP) site] is located to the west-northwest of the 563 Sackett Street site, which included the majority of Gas Holder IV, a lime shed, lime kilns, and a coal shed on the western portion of the 560 Degraw Street site from at least 1886 to 1938. After 1938, the 560 Degraw Street property was occupied by various auto-related facilities, including used truck storage, auto wrecking, auto repair and a filling station. By 1943, the former gasometers and holding tanks associated with the Fulton Works MGP appeared to have been demolished and abandoned below grade. The portion of 563 Sackett Street containing the majority of Gas Holder IV was previously referred to as Parcel IV of the Fulton Works MGP site Geology and Hydrogeology: The two sites lie at an average elevation of about 15 feet above mean sea level. The sites are generally covered with paved roads, walkways, and buildings. The built environment is generally underlain by fill material used for construction and development since the 1800's. The subsurface strata at the sites consists of historic fill material characterized by loose silty sand with varying amounts of brick and concrete fragments, rubber, metal wire and coal fragments extending to depths ranging from about 10 to 20 feet below grade surface. The historic fill material was underlain by alluvial deposits consisting of poorly sorted sands with gravel and marsh deposits, referred to as meadow mat, which consists of interbedded sands, clays, and silts. Depth of groundwater was measured at 13.84

563 SACKETT STREET (Continued) **S118141136**

feet below grade surface in a monitoring well located in the center of 560 Degraw Street and at 6.85 feet below grade surface in the southwestern corner of 560 Degraw Street. The depth to groundwater was measured at 9 feet bgs within the former gasholder footprint. Groundwater elevation measurements recorded from monitoring wells located near the former Fulton Works MGP site indicate that the shallow groundwater, on the east side of the Canal, generally flows westward toward the Gowanus Canal at high and low tide levels. "

Env Problem: "Nature and Extent of Contamination: The primary contaminants of concern at the site are Semi-Volatile Organic Compounds (SVOCs) and Metals. SVOCs include Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene and Chrysene. Metals include Arsenic, Barium, Cadmium, Copper, Lead and Mercury. The Volatile Organic Compound (VOC) Benzene was detected in one groundwater well. Soil: Contamination including SVOC and Metals were observed throughout the historic fill layer that exists at the site. The fill layer is generally present from grade to depths of approximately twenty feet below grade. The SVOCs Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene and Chrysene were detected at maximum concentrations of 22.7; 14.7; 16.1 and 14.5 parts per million (ppm), respectively. Their respective unrestricted use soil cleanup objectives are 1, 1, 0.8 and 1 ppm. The Metals Arsenic, Barium, Cadmium, Copper, Lead and Mercury were detected at maximum concentrations of 36.4; 679; 34.3; 1,240; 1,840; and 1.57 ppm respectively. Their respective unrestricted use soil cleanup objectives are 13; 350; 2.5; 50; 63 and 0.18 ppm. Groundwater: Limited groundwater contamination was observed. Benzene was detected in one on-site well at a concentration of 2.6 parts per billion (ppb). The ambient groundwater standard for Benzene is 1 ppb. The SVOC benzo(b)fluoranthene was detected in one well at 0.6 ppb, exceeding its ambient groundwater standard of 0.002 ppb. In addition, the Metals Manganese and Selenium were detected in groundwater at maximum concentrations of 1,000 and 13 ppb respectively. Their respective groundwater quality standards are 300 and 10 ppb. Soil and Sub-Slab Soil Vapor: Various petroleum related VOCs were detected in the soil vapor samples collected at the site. Tetrachloroethene was detected in a soil vapor sample at a concentration of 240 micrograms per cubic meter (ug/m^3). There is no standard for soil vapor concentrations. Special Resources Impacted or Threatened: None"

Health Problem: "Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available."

Updated By:	HMDUDEK
Site Description:	"This site has entered into the BCP Program (C224373)"
Env Problem:	"Nature and Extent of Contamination: Soil samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals. Based upon investigations conducted to date, the primary contaminants of concern include chlorinated volatile organic compounds (tetrachloroethene (PCE)), semi-volatile organic compounds (2-Methylphenol (o-cresol), Acenaphthene, Benz(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Chrysene, Dibenz(a,h)anthracene, Dibenzofuran, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, Naphthalene, Phenanthrene, Phenol, and Pyrene) and metals (arsenic, barium, cadmium, chromium, lead, and mercury). Groundwater samples were analyzed for volatile organic compounds (VOCs) and SVOCs. Based upon investigations conducted to date, the primary contaminants of concern include 1,2,4-trimethylbenzene, acetone, chloroform, naphthalene, tetrachloroethene, and toluene. Soil vapor samples were analyzed for VOCs. Elevated concentrations of PCE and trichloroethene (TCE) were detected on-site. "
Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

Name:	224 3RD AVENUE
Address:	224 3RD AVENUE

224 3RD AVENUE (Continued) **S129283546**

City,State,Zip:	BROOKLYN, NY 11217
Program:	BCP
Site Code:	646559
Acres:	0.194
HW Code:	C224373
SWIS:	2401
Town:	New York City
Record Added Date:	11/29/2022
Record Updated Date:	10/08/2025
Update By:	LAGORTON
Site Description:	"Location: The site is located at 224 3rd Avenue (Tax Block 426, Lot 36) in the Gowanus neighborhood of Brooklyn, New York. Block 426 is bordered by Degraw Street to the north, 3rd Avenue to the east, Sackett Street to the south, and Nevins Street to the west. According to the USGS 7.5-Minute Quadrangle Map, the proposed brownfield site is at an elevation of about 17 feet above mean sea level (msl). Site Features: The site occupies an area of 8,470 square feet (0.19 acres) and is improved with a one-story building with a partial cellar. The site is vacant, but was most recently occupied by A & A Brake Services Company Inc. (an automobile repair shop) and Mack Truck Parts (an automobile parts retailer). Current Zoning and Land Use: According to the New York City Planning Commission (NYCPC) Zoning Map 16c, dated November 23, 2021, the site is located partially in an M1-4/R7X/G district and partially in an M1-4/R6X/G district. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. Offices, hotels and most retail uses are also permitted. R7 districts are medium-density apartment house districts; and R6 districts are typically seen in built-up, medium density areas. The Special Gowanus Mixed Use District (G) surrounds the Gowanus Canal and promotes affordable housing growth and reinvestment in the neighborhood consistent with the existing mix of commercial, manufacturing, and cultural uses. The Final Environmental Impact Statement (FEIS) for the Gowanus Neighborhood Plan was released on September 10, 2021, and the proposed BCP site received an E-Designation (E-601) for hazardous materials, air quality, and noise. Any future development will require coordination with the New York City Office of Environmental Remediation (NYCOER) to satisfy requirements associated with the E-Designation program. The proposed use is consistent with applicable zoning laws and maps. Past Use of the Site: The site includes one tax parcel, Block 426, Lot 36. A review of historical data revealed that the site was located in a densely developed urban area, characterized by commercial and industrial uses, as early as 1886. Historical records indicate the site was improved with multiple dwellings by 1886. Around 1915, the dwellings appear to have been replaced by two buildings used for laundry and a Bottle Cleaning & Storage facility, and a portion of a third building is indicated as bottle storage. By 1938, the new buildings appear to have been removed and a new single structure (built circa 1930) is constructed for use as a garage with a 550-gallon underground storage tank (UST). The site use as a garage/auto repair facility appears unchanged between 1938 and present day. Site Geology and Hydrogeology: The site is located in a developed area of Brooklyn, New York that is generally covered with paved roads, public walkways and buildings. The built environment is generally underlain by uncontrolled fill used for construction and development since the 1800 s. The area surrounding the Gowanus Canal,

224 3RD AVENUE (Continued) **S129283546**

including the proposed brownfield site, was originally part of the former Gowanus Creek and associated wetlands. In 1848, the State of New York authorized construction of the Gowanus Canal as well as the draining and filling of the wetlands of South Brooklyn (New York City Department of City Planning, 1985). By 1869, the Gowanus Canal was completed with the current street configuration surrounding the Canal. According to soil descriptions provided in Langan s August 2021 Limited Subsurface Investigation (LSI) package, the proposed brownfield site cover (i.e., concrete slabs, asphalt pavement) is underlain by fill characterized by gray to brown sand with varying amounts of brick fragments, coal fragments, and coal ash extending to depths from about 16 to 18 feet below grade surface (bgs). The fill was underlain by alluvial deposits consisting of fine sand and silt. Bedrock was not encountered during the LSI, however, depth to bedrock is estimated to be greater than 100 feet bgs. Groundwater was observed between 13 and 15 feet bgs during the 2021 LSI. Based on the general topography of the surrounding area, inferred groundwater flow is generally to the west, towards the Gowanus Canal, located about 720 feet west of the site. "

Env Problem: "Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor, sub-slab soil vapor, and indoor air samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern are non-aqueous phase liquid (NAPL), grossly contaminated media (GCM), VOCs and SVOCs in soil and groundwater, and VOCs in soil vapor. Soil: Soil samples were analyzed from seventeen soil borings and exceedances of the restricted residential soil cleanup objectives (RRSCOs) and the protection of groundwater soil cleanup objective (PGSCOs) were found. For VOCs, the most notable exceedances included maximum concentrations of benzo(a)anthracene at 79.2 parts per million (ppm) (Protection of Groundwater Soil Cleanup Objectives (PGSCO): 1ppm), benzo(a)pyrene at 78.1 ppm (PGSCO: 22 ppm), benzo(b)fluoranthene at 90.7 ppm (PGSCO: 1.7 ppm), benzo(k)fluoranthene at 25.6 ppm (PGSCO: 1.7 ppm), chrysene at 75.1 ppm (PGSCO: 1 ppm), and indeno(1,2,3-cd)pyrene at 59 ppm (PGSCO: 8.2 ppm), Phenanthrene at 158 ppm (Restricted Residential Soil Cleanup Objective (RRSCO): 100 ppm), Pyrene at 145 ppm (RRSCO: 100 ppm), Arsenic at 40.4 ppm (RRSCO: 16 ppm), Barium at 495 ppm (RRSCO: 16 ppm), lead at 2,700 ppm (RRSCOs: 400 ppm). Data does not indicate there are off-site impacts in soil related to the site. Groundwater: Groundwater samples were collected from seven on-site locations and exceedances of the applicable NYS Ambient Water Quality Standards and Guidance Values (AWQSGVs) were found. Maximum concentrations of VOCs include Chloromethane at 20.5 parts per billion (ppb) (AWQSGV 5 ppb). Maximum concentrations of SVOCs include benzo(a)anthracene at 1.19 parts per billion (ppb) (AWQSGV 0.002 ppb), benzo(a)pyrene at 1.44 ppb *AWQSGV: .002 ppb), benzo(b)fluoranthene at 1.24 ppb (AWQSGV: 0.002 ppb), chrysene at 1.77 ppb (AWQSGV: 0.002 ppb), and indeno(1,2,3-cd)pyrene at 1.78 ppb (AWQSGV: 0.002 ppb). PFOS was detected at a maximum concentration of 9.88 parts per trillion (ppt) and PFOA was detected at a maximum concentration of 96.1 ppt (AWQSGV 2.7 and 6.7 ppt respectively). No metals or pesticides were detected above NYS Ambient Water Quality Standards and Guidance Values. Data does indicate the potential for off-site impacts in groundwater related to the site. Soil Vapor: The site is currently unoccupied.

224 3RD AVENUE (Continued) **S129283546**

	Seven sub-slab vapor/indoor air samples from the building on-site. Maximum concentrations for TCE were 61 micrograms per cubic meter (ug/m3) in sub-slab vapor, and 1.1 ug/m3 in indoor air. Maximum concentrations for tetrachloroethylene (PCE) were 13,000 ug/m3 in sub-slab vapor, and 23 ug/m3 in indoor air. "
Health Problem:	"People are not expected to come into contact with contaminated soil or groundwater since the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is vacant so inhalation of site contaminants in indoor air via vapor intrusion is not a current concern. However, the potential exists for inhalation of site contaminants due to soil vapor intrusion for any future on-site development. Environmental sampling indicates soil vapor intrusion from site contamination is not a concern for off-site buildings."

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	need to send TTF letter no PBS for this address. 4/28/05. J.Krimgold reviewed a letter report submitted by Mercury Tank & Pump dated April 25, 2005. According to the report a 550 gal #2 oil tank failed the test due to disconnected pipe fittings on the top of the tank. The tank was empty at the time of test. Tank top was excavated,tank was cleaned up and filled with concrete slurry. Before this a hole was drilled through the bottom of the tank to obtain a soil sample. All analytes were found below TAGMs objectives. NFA letter.
Remarks:	Doing a tank test on an old heating tank that no one knew was there. No contamination found or evidence of a leak. Ullage failure... unsure of any removal of tank.

A. WILLIAMS CONSTRUCTION (Continued) **S108466119**

DEC Memo: 2/20/07 - Raphael Ketani. I visited the site today. I met Dolly Williams ((718) 399-3508, the owner, and asked to see the spill. Her daughter took me to the truck yard next door. I saw snow that was covered with a light yellow green liquid. A little bit of the liquid was draining into a drain. I smelled oil, also. I went back upstairs and told Ms. Williams that she needed to get the spill cleaned up immediately as it was going down a drain. She said that she had been in contact with PTC, but they haven't done the cleanup. I called PTC and Big Anthony (Anthony Lara) said that they hadn't received a signed contract to do the cleanup. I explained this to Ms. Williams and she FAXed a signed contract to PTC. Mr. Lara said that they would be over today in the afternoon.
2/21/07 - Raphael Ketani. I spoke to Ray Lara of PTC (718) 624-4842 and he said that they took away 6 drums of contaminated snow. He said they cleaned an area of 20 feet by 25 feet and put down absorbent. 7/13/07 - Raphael Ketani. I tried to contact Mr. Lara, but could only get his assistant. She said that DEC hasn't received any paperwork because they haven't been paid for the work they did. I told his assistant that DEC will wait for the paperwork. 10/4/07 - Raphael Ketani. I tried to contact Mr. Lara, but he was out. So I spoke to the assistant. She said that A. Williams Construction still owes $3,000, but they did pay part of the bill in June. She said they have a reputation for being slow payers. I told her DEC will wait. 11/29/07 - Raphael Ketani. I spoke to the operator/assistant at PTC. She said that Ms. Williams still owes thousands of dollars and so PTC can't release the paperwork. I called up Ms. Williams at (718) 923-9600 and told her the spill case is still open and will not be closed until we get the necessary paperwork stating that the release has been cleaned up. She said that she hasn't been working and had to borrow some money. She said that she had given PTC $1,000 more since October. I told her that PTC still isn't releasing anything. She said she will talk to them to try and get some paperwork sent to DEC. 12/7/07 - Raphael Ketani. Ms. Williams called to say that she just got back to work after being sick. 12/10/07 - Raphael Ketani. Ms. Williams called to say that she can't pay PTC the remainder of the money she owes (about $2500) because she doesn't have it. She asked that I contact Bob Lamirata of PTC to find out if he is willing to release the original paperwork for the cleanup so that the case can be closed. I contacted Mr. Lamirata and he said he would prefer to get all of the money before releasing the paperwork. I told him that would be fine. 12/11/07 - Raphael Ketani. I contacted Ms. Williams and told her that DEC will wait until PTC is

A. WILLIAMS CONSTRUCTION (Continued) **S108466119**

completely paid and they send
us the original paperwork. She said she should be able to pay off the bill by January 2008. I told
her we will wait. 1/9/08 - Raphael Ketani. I spoke to Mr. Lamirata (718) 624-4842. He said that Ms.
Williams still owes PTC a lot of money. I told him I will not close the case. 2/12/08 - Raphael
Ketani. I spoke to Mr. Lamirata. He said that Ms. Williams still owes $1500. He said he doesn't
understand why she doesn't have the money to pay PTC the balance as her company is just 2 blocks
away and he sees her construction equipment leave the site everyday to do work. I told Mr. Lamirata
that I will have to close the case because this was not a significant spill, it happened a long
time ago, and it's sitting open in our database. Based upon the fact that the spill was
successfully cleaned up, the lack of human contact with the discharge, and the long amount of time
that has passed since the spill took place, I am closing the case.

Remarks: OUTSIDE, WENT INTO SEWER, AND THEY HAVE A SEPERATER AND IS IN A PRIVATE DRAIN: STILL INVESTIGATING:

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 07/24/02. Phone/Petro Oil/J.Krimgold. Spill due to a broken hose on truck. Oil spilled onto the parking lot area. Some oil went to the drywells (not into the sewer catch basins). Surface and wells were cleaned up by Milro. However, Milro observed that more oily substance was coming into the well from subsurface and install absorbent pads. J. Krimgold contacted Williams Trucking (Sally Williams @ 718-923-9600) and informed about findings. Ms. Williams refused to accept responsibility and suggested that this should be discussed with Keith Williams. J. Krimgold requested that Mr. Williams call back DEC to discuss this matter. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 10/30/06 Reassigned from Tang to Sun. (JS/MS) 11/28/06 Sun sent letter to Dolly Williams (property owner) at 225 3rd Ave, on 11/27/06 requiring that the following be submitted to the NYSDEC by 12/27/06: To rectify this problem, a letter report asserting a cause of the release and summarizing the cleanup activities, observations, post-excavation sampling results (if necessary), and also including contaminated material disposal manifests or any other documentation (i.e. invoices, bills, etc.) of cleanup activities must be submitted to this office by December 27th, 2006, referencing the spill case number (see above) and the site address. (JS/MS) 03/19/07: Mrs. Williams is going to contact Milro who performed the environmental investigation at her property to see if they have the additional documentation regarding clean-up that she says has been performed. (JS/MS) 6/6/07: Called Petro Oil at 718.628.3349. They stated that they have no documentation regarding this property. 8/6/07: Called Williams Trucking again 718.923.9600. Dolly will be in the office this afternoon and will return call. (JS/MS) 9/5/07: MS contacted Dolly Williams to check on status. She has faxed a receipt from Petroleum Tank Cleaners who cleaned spill to show DEC that clean up has

A. WILLIAMS CONSTRUCTION (Continued) **S108466119**

been performed. She has paid half of the bill and need time to pay the remainder. Her request for
an extension has been granted. (JS/MS) 12/4/07: As per RK: 11/29/07 - Raphael Ketani. I spoke to
the operator/assistant at PTC. She said that Ms. Williams still owes thousands of dollars and so
PTC can't release the paperwork. I called up Ms. Williams at (718) 923-9600 and told her the spill
case is still open and will not be closed until we get the necessary paperwork stating that the
release has been cleaned up. She said that she hasn't been working and had to borrow some money.
She said that she had given PTC $1,000 more since October. I told her that PTC still isn't
releasing anything. She said she will talk to them to try and get some paperwork sent to DEC.
4/15/08: Called and left message with receptionist for Dolly Williams. (JS/MM) 4/16/08: No call,
sending 2nd letter requesting clean up summary, or refer to Legal Affairs (JS/MM) 4/28/08: Sent
subsurface investigation letter due June 13, 2008 or goes to Legal (JS/MM) 6/20/80: Phone calls
have not been returned (JS/MM) 08/05/08: Transferred to Kolleeny/Mandac. - JK 10/27/08: Dolly
Williams has not submitted any documentation from Milro regarding the cleanup. Bill for what
materials was used is in files. A Williams Trucking is supposedly in financial trouble. Refer to
OGC. (JK/MM) 12/15/08: Paper file contains two faxes from Dolly Williams: The first one sent on
8/14/08 to MM contains a fax Ms. Williams received from Milro containing 2 waste manifest tickets
dated 7/24/02. One is for petroleum impacted soil, speedydry, and sediment and the other is for
petroleum contaminated water. The second fax was a letter to MM on 8/25/08. The letter is from Ms.
Williams and says, As per my conversation with you today we are hereby requesting additional time
to submit the report on the above referenced spill. Because this is an old case for Milro they need
additional time to research it. The manifest was forwarded to you last week and as per your
ackknowledgement you did receive them by fax. No report has been submitted to date. (JK/KG)
12/16/08: Spoke with Dolly Williams to check on status of report. She said she would have to call
Milro and PTC again and check to see if they had a report. She said last she spoke to them they
needed some time to look through archives. I told her the report needs to include results of soil
samples. If none were collected at the time of clean-up then she will have to have install a soil
boring and collect samples. (JK/KG) 01/15/09: Tried to call D. Williams - no answer. (JK/KG)
01/20/09: Rec'd voice message from D. Williams on 01/16/09. She has been in contact with Milro and
Petroleum Tank Cleaners and is still trying to get the reports from

A. WILLIAMS CONSTRUCTION (Continued) **S108466119**

them. She will be on vacation
and will call back on 1/22/09 to discuss the status of the reports.
(JK/KG) 01/26/09: Spoke with
Dolly and told her again that the report needs to have results of GW
and soil samples. If Milro
doesn't have the report she will need to perform a subsurface
investigation. (JK/KG) 02/27/09: Left
message for Dolly Williams. (JK/KG) 03/03/09: Rec'd voice message from
Dolly on 2/27/09, she will
call back with more information. (JK/KG) 03/11/09: Spoke to D.
Williams, she has some
reports/documents that she will send. (JK/KG) 03/12/09: D. Williams
called me from Petroleum Tank
Cleaners. Bob Lamirata of Petroleum Tank Cleaners requested copies of
letters sent to D. Williams
be faxed to him in order to see what DEC required to address this
spill (fax 718-624-1856). Letters
dated 11/27/06, 4/16/08, and 7/8/08 were faxed. Bob will call back on
3/16 or 3/17 with more
information. (JK/KG) 03/18/09: Rec'd call from D. Williams, B.
Lamirata is still working on case.
(JK/KG) 03/24/09: Rec'd call from Mark of Petroleum Tank Cleaners. He
will fax me a report today.
He said he went to the site to evaluate the conditions. He stated that
the concrete is 14 inches
thick in the area the discharge ocurred. Soil samples were not
collected. Report rec'd via fax;
under review. (JK/KG) 03/30/09: Based on the amount spilled and time
that has past since this spill
occurred, it does not appear that soil and groundwater would still be
affected/contaminated.
Therfore, this spill case is being closed. (JK/KG)

Remarks: spill is in a sewer on property - contacting milro for clean up

Record Added Date:	09/19/2022
Record Updated Date:	12/29/2025
Update By:	LAGORTON
Site Description:	"Site Location The A&A Brake Service Site is a 0.147-acre (6,400 square foot) site located in the urban area of the Borough of Brooklyn, Kings County, New York. The Gowanus Canal, a USEPA National Priorities List (NPL) site, is located approximately 300 feet west of the site. The site is located on the south side of Sackett Street, between Nevins Street (to the west) and 3rd Avenue (to the east) in the Gowanus area of Brooklyn, New York. Site Features Prior to remediation the site was 0.147 acres in size with a 2-story, slab-on-grade, brick warehouse/garage building and a 1-story brick warehouse building. The building was demolished in July 2023. Current Zoning and Land Use The site is located within a manufacturing and residential zoning district (M1-4 and R6A). Past Site Use The site was first developed as early as the late 1800s when the site was divided into three small tax parcels fronting along Sackett Street. Each of the parcels was developed with a low-rise residential or retail building occupying approximately half of their respective lots, with several small outbuildings also present. By the late 1930s, the eastern parcel was redeveloped with a one-story building occupying the entire parcel footprint and identified as a private garage. By 1950, the center parcel was developed with a two-story building occupying the entire parcel footprint and identified as a private garage. The eastern building was identified as an auto repair shop. The residence on the western lot was demolished in the mid- to late-1960s, with the center and eastern buildings both identified as auto repair shops. The lots were merged into the current single lot 14 during the 1960 s. Between the early and mid-1980s, the western and central parcels were redeveloped into a single two-story building identified as a warehouse. By 1988, this structure was identified as an auto repair shop. Site Geology and Hydrogeology The site is underlain by urban fill generally consisting of brown silty sand with

FORMER A&A BRAKE SERVICE SITE (Continued) **S129283535**

gravel and brick fragments from surface grade to approximately 10 feet below grade surface. The urban fill layer is underlain by a potential native layer consisting of brown to gray to black sand with varying amounts of gravel and silt sediments, an organic meadow mat/peat layer is observed at depths ranging from 10 to 14 ft bgs. The depth to groundwater is approximately 8-9 ft bgs. The groundwater flow direction at the Site is to the northwest toward the Gowanus Canal. "

Env Problem: "Post-Remediation: Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Prior to remediation, the primary contaminants of concern for OU 1 included petroleum related VOCs, SVOCs (primarily PAHs) in soil and groundwater, and chlorinated VOCs in soil vapor (tetrachloroethene (PCE) and trichloroethene (TCE)). Residual contamination in the soil and groundwater is being managed under a Site Management Plan. Prior to Completion of Remediation: Nature and Extent of Contamination identified prior to remediation: Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern include petroleum related VOCs, SVOCs in soil and groundwater, and chlorinated VOCs in soil vapor. Soil - VOCs, SVOCs, and metals were compared against the Restricted Residential Soil Cleanup Objectives (RRSCOs) and/or Protection of Groundwater Soil Cleanup Objective (PGSCOs). VOCs, primarily petroleum related, were found in soils across the site including 1,2,4-trimethylbenzene at 360 parts-per million (ppm) (RRSCO: 47 ppm & PGSCO: 3.6 ppm), 1,3,5-trimethylbenzene at 87 ppm (RRSCO: 47 ppm & PGSCO: 8.4 ppm), benzene at 0.23 ppm (PGSCOs: 0.06 ppm), ethylbenzene at 54 ppm (RRSCO: 4.8 ppm), n-propylbenzene at 100 ppm (RRSCO: 100 ppm, PGSCOs: 3.9 ppm), and xylenes at 130 ppm (RRSCO: 100 ppm). SVOCs were found in soils across the site including benzo(a)anthracene at 15 ppm (RRSCO/PGSCO: 1 ppm), benzo(a)pyrene at 14 ppm (RRSCO: 1 ppm), benzo(b)fluoranthene at 14 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), benzo(k)fluoranthene at 4.3 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), chrysene at 14 ppm (RRSCO & PGSCOs: 1 ppm), dibenz(a,h)anthracene at 1.7 ppm (RRSCO: 0.33 ppm), and indeno(1,2,3-cd)pyrene at 8.3 ppm (RRSCO/PGSCO: 0.5 ppm). Metals were detected in soils including arsenic at 26.5 ppm (RRSCO: 16 ppm), barium at 481 ppm (RRSCO: 400 ppm), copper at 3,080 ppm (RRSCO: 270 ppm), lead at 2,080 ppm (RRSCO: 400 ppm), mercury at 12.2 ppm (RRSCO: 0.81 ppm), and nickel at 423 ppm (RRSCO: 1 ppm), selenium at 4.67 ppm (PGSCO: 4 ppm). Perfluorooctanoic acid (PFOA) was found in soils above the protection of groundwater guidance value at 1.09 parts per billion (ppb) (PGSCO: 0.08 ppb) and perfluorooctanesulfonic acid (PFOS) at 1.04 ppb (PGSCO: 1.0 ppb). Data does not indicate any off-site impacts in soil related to the site. Groundwater - VOCs, SVOCs and metals compared against the NYSDEC Ambient Water Quality Standards and Guidance Values (AWQSGVs). VOCs, primarily petroleum related, were found in groundwater at the site including 1,2,4,5-tetramethylbenzene at 17 ppb(AWQSGV: 5 ppb), 1,3,5-trimethylbenzene at 620 ppb (AWQSGV: 5 ppb), 1,2-dichloroethane at 17 ppb (AWQSGV: 5 ppb), benzene at 8.8 ppb (AWQSGV : 1 ppb), isopropyl benzene at 15 ppb (AWQSGV: 5 ppb), and n-propylbenzene at 12 ppb (AWQSGV: 5 ppb). SVOCs were found in groundwater including benzo(a)anthracene at 0.02 ppb (AWQSGV: 0.002

FORMER A&A BRAKE SERVICE SITE (Continued) **S129283535**

ppb), benzo(b)fluoranthene at 0.02 ppb (AWQSGV: 0.002 ppb), benzo(k)fluoranthene at 0.02 ppb (AWQSGV: 0.002 ppb), chrysene at 0.01 ppb (AWQSGV: 0.002 ppb), and indeno(1,2,3-cd)pyrene at 0.05 ppb (AWQSGV: 0.002 ppb). PFOA was detected at a maximum concentration of 105 parts per trillion, or ppt (AWQSGV: 6.7 ppt). Data does not indicate any off-site impacts in groundwater related to the site.
Soil Vapor - Sub slab soil vapor had elevated chlorinated VOCs including cis-1,2-dichloroethene at 4.4 micrograms per cubic meter (ug/m3), trichloroethene at 145 ug/m3, methylene chloride at 69.5 ug/m3, tetrachloroethene at 313 ug/m3, and vinyl chloride at 82.6 ug/m3. Other VOCs detected in sub-slab and soil vapor include acetone at 969 ug/m3, 2,2,4-trimethylpentane at 2,220 ug/m3, cyclohexane at 70.2 ug/m3, ethylbenzene at 25.2 ug/m3, n-heptane at 82.8 ug/m3, and toluene at 77.6 ug/m3. Data does not indicate any off-site impacts in soil vapor related to the site."

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming into contact with remaining site contamination."

Site Description:	"Site Location The A&A Brake Service Site is a 0.147-acre (6,400 square foot) site located in the urban area of the Borough of Brooklyn, Kings County, New York. The Gowanus Canal, a USEPA National

FORMER A&A BRAKE SERVICE SITE (Continued) **S129283535**

Priorities List (NPL) site, is located approximately 300 feet west of the site. The site is located on the south side of Sackett Street, between Nevins Street (to the west) and 3rd Avenue (to the east) in the Gowanus area of Brooklyn, New York. Site Features Prior to remediation the site was 0.147 acres in size with a 2-story, slab-on-grade, brick warehouse/garage building and a 1-story brick warehouse building. The building was demolished in July 2023. Current Zoning and Land Use The site is located within a manufacturing and residential zoning district (M1-4 and R6A). Past Site Use The site was first developed as early as the late 1800s when the site was divided into three small tax parcels fronting along Sackett Street. Each of the parcels was developed with a low-rise residential or retail building occupying approximately half of their respective lots, with several small outbuildings also present. By the late 1930s, the eastern parcel was redeveloped with a one-story building occupying the entire parcel footprint and identified as a private garage. By 1950, the center parcel was developed with a two-story building occupying the entire parcel footprint and identified as a private garage. The eastern building was identified as an auto repair shop. The residence on the western lot was demolished in the mid- to late-1960s, with the center and eastern buildings both identified as auto repair shops. The lots were merged into the current single lot 14 during the 1960 s. Between the early and mid-1980s, the western and central parcels were redeveloped into a single two-story building identified as a warehouse. By 1988, this structure was identified as an auto repair shop. Site Geology and Hydrogeology The site is underlain by urban fill generally consisting of brown silty sand with gravel and brick fragments from surface grade to approximately 10 feet below grade surface. The urban fill layer is underlain by a potential native layer consisting of brown to gray to black sand with varying amounts of gravel and silt sediments, an organic meadow mat/peat layer is observed at depths ranging from 10 to 14 ft bgs. The depth to groundwater is approximately 8-9 ft bgs. The groundwater flow direction at the Site is to the northwest toward the Gowanus Canal. "

Summary: "Remedial actions are complete and measures are in place to prevent people from coming into contact with remaining site contamination."

Summary: "Post-Remediation: Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Prior to remediation, the primary contaminants of concern for OU 1 included petroleum related VOCs, SVOCs (primarily PAHs) in soil and groundwater, and chlorinated VOCs in soil vapor (tetrachloroethene (PCE) and trichloroethene (TCE)). Residual contamination in the soil and groundwater is being managed under a Site Management Plan. Prior to Completion of Remediation: Nature and Extent of Contamination identified prior to remediation: Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern include petroleum related VOCs, SVOCs in soil and groundwater, and chlorinated VOCs in soil vapor. Soil - VOCs, SVOCs, and metals were compared against the Restricted Residential Soil Cleanup Objectives (RRSCOs) and/or Protection of Groundwater Soil Cleanup Objective

FORMER A&A BRAKE SERVICE SITE (Continued) **S129283535**

(PGSCOs). VOCs, primarily petroleum related, were found in soils across the site including 1,2,4-trimethylbenzene at 360 parts-per million (ppm) (RRSCO: 47 ppm & PGSCO: 3.6 ppm), 1,3,5-trimethylbenzene at 87 ppm (RRSCO: 47 ppm & PGSCO: 8.4 ppm), benzene at 0.23 ppm (PGSCOs: 0.06 ppm), ethylbenzene at 54 ppm (RRSCO: 4.8 ppm), n-propylbenzene at 100 ppm (RRSCO: 100 ppm, PGSCOs: 3.9 ppm), and xylenes at 130 ppm (RRSCO: 100 ppm). SVOCs were found in soils across the site including benzo(a)anthracene at 15 ppm (RRSCO/PGSCO: 1 ppm), benzo(a)pyrene at 14 ppm (RRSCO: 1 ppm), benzo(b)fluoranthene at 14 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), benzo(k)fluoranthene at 4.3 ppm (RRSCO: 1 ppm & PGSCOs: 1.7 ppm), chrysene at 14 ppm (RRSCO & PGSCOs: 1 ppm), dibenz(a,h)anthracene at 1.7 ppm (RRSCO: 0.33 ppm), and indeno(1,2,3-cd)pyrene at 8.3 ppm (RRSCO/PGSCO: 0.5 ppm). Metals were detected in soils including arsenic at 26.5 ppm (RRSCO: 16 ppm), barium at 481 ppm (RRSCO: 400 ppm), copper at 3,080 ppm (RRSCO: 270 ppm), lead at 2,080 ppm (RRSCO: 400 ppm), mercury at 12.2 ppm (RRSCO: 0.81 ppm), and nickel at 423 ppm (RRSCO: 1 ppm), selenium at 4.67 ppm (PGSCO: 4 ppm). Perfluorooctanoic acid (PFOA) was found in soils above the protection of groundwater guidance value at 1.09 parts per billion (ppb) (PGSCO: 0.08 ppb) and perfluorooctanesulfonic acid (PFOS) at 1.04 ppb (PGSCO: 1.0 ppb). Data does not indicate any off-site impacts in soil related to the site. Groundwater - VOCs, SVOCs and metals compared against the NYSDEC Ambient Water Quality Standards and Guidance Values (AWQSGVs). VOCs, primarily petroleum related, were found in groundwater at the site including 1,2,4,5-tetramethylbenzene at 17 ppb(AWQSGV: 5 ppb), 1,3,5-trimethylbenzene at 620 ppb (AWQSGV: 5 ppb), 1,2-dichloroethane at 17 ppb (AWQSGV: 5 ppb), benzene at 8.8 ppb (AWQSGV : 1 ppb), isopropyl benzene at 15 ppb (AWQSGV: 5 ppb), and n-propylbenzene at 12 ppb (AWQSGV: 5 ppb). SVOCs were found in groundwater including benzo(a)anthracene at 0.02 ppb (AWQSGV: 0.002 ppb), benzo(b)fluoranthene at 0.02 ppb (AWQSGV: 0.002 ppb), benzo(k)fluoranthene at 0.02 ppb (AWQSGV: 0.002 ppb), chrysene at 0.01 ppb (AWQSGV: 0.002 ppb), and indeno(1,2,3-cd)pyrene at 0.05 ppb (AWQSGV: 0.002 ppb). PFOA was detected at a maximum concentration of 105 parts per trillion, or ppt (AWQSGV: 6.7 ppt). Data does not indicate any off-site impacts in groundwater related to the site. Soil Vapor - Sub slab soil vapor had elevated chlorinated VOCs including cis-1,2-dichloroethene at 4.4 micrograms per cubic meter (ug/m3), trichloroethene at 145 ug/m3, methylene chloride at 69.5 ug/m3, tetrachloroethene at 313 ug/m3, and vinyl chloride at 82.6 ug/m3. Other VOCs detected in sub-slab and soil vapor include acetone at 969 ug/m3, 2,2,4-trimethylpentane at 2,220 ug/m3, cyclohexane at 70.2 ug/m3, ethylbenzene at 25.2 ug/m3, n-heptane at 82.8 ug/m3, and toluene at 77.6 ug/m3. Data does not indicate any off-site impacts in soil vapor related to the site."

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Sangesland will send a CSL 4/24/06 - Raphael Ketani. Mr. Sangesland had been waiting for Matt Boeckel (bo-kell; (631) 767-0484, the potential buyer's representative, to call back with the name and phone number of the owner. However, he hasn't called. I tried to call Mr. Boeckel, but could only leave a voice mail message. 4/25/06 - Raphael Ketani. I tried calling Mr. Boeckel. He told me he is still trying to find out who the real owners are. I found 2 possible owners for the site and I will send CSLs to both of them: Royal Real Estate Co., 7024 18 Avenue, Brooklyn, NY, 11204 ((718) 236-7474???) Frank A. Puma, Puma Iron Works, 324 Butler Street, Brooklyn, NY, 11217 ((718) 643-1338???) 4/28/06 - Raphael Ketani. Mr. Boeckel called me back and said that the owners of the property are: Ari Dervich, 18 Leana Trading Co., 330 Butler Street, Brooklyn, NY, 11217, phone (718) 855-3388. I called up Mr. Dervich and he said that Royal Real Estate Co. is his company and he is the owner of the property. He said that the address is 324 Butler Street. I will send a new CSL to Mr. Dervich. 05/02/06-Vought-Received call from Mr Vincent Puma (917-599-6765). Vought called Puma and spoke to Puma. Borings were done at 330 Butler Avenue and Mr. Puma is owner of 326 and 324 Butler Street. As per Puma 324-330 used to be one building and now is two separate buildings (324/326 Butler and other building is 330 Butler). Contaminated soil was found at 330 Butler Street at Mr Puma is owner of building. 5/16/06 - Raphael Ketani. Mr. Dervich called me back to say he hired an environmental company to do the investigative work and that they will start July

COMMERIAL BUILDING (Continued) **S107787097**

1. When I asked him who the company is, he said he didn't recall the name of the company off the
top of his head. I told him to have the company send me an official letter telling me what their
plan of action is, and who the contact person is at the environmental company. He said he will do
this. 5/25/06 - Raphael Ketani. I received a call from Mr. Dervich (718) 855-3388 on 5/24 and I
returned his call. He said that the environmental company can't do the digging and cleanup work
with the tenant in the warehouse. That the tenant MUST move. He said he spoke to the tenant, but he
refuses to move. So he talked to his lawyer, and he said that he can get a court order to move the
tenant, but it will take 6 months. I told Mr. Dervich to do whatever is necessary to move the
tenant and to send me a letter explaining the situation in detail and requesting an extension for
the start time for the cleanup. He said he will do this. 6/1/06 - Raphael Ketani. Mr. Dervich sent
me a letter requesting an extension of the investigation and cleanup work deadline. He said he had
to move tenants out of the building and would need 6 months to find them similar accomodations. He
also added that the environmental company, Associated Environmental, said that they can't do their
work with the tenants in place. 6/2/06 - Raphael Ketani. I will write a letter and grant him a 6
month extension. 6/29/06 - Raphael Ketani. Jean Deserbean (646) 327-5711 called today. He is the
tenant at 330 Butler Street and runs a moving and storage business. He asked what was happening
with the building. I told him that oil was found in the soil below the slab and that it has to be
cleaned up. He asked when this will happen. I told him that Mr. Dervich asked me for a 6 month
extension to get everything ready for the soil investigation and cleanup. I told him that
everything has to be out of the building and the floor cleared of material in order for the soil to
be dug up and removed. He said he understood and will look for an alternate business site. He said
he still had 26 months on his lease. 12/11/06 - Raphael Ketani. Matt of Associated Environmental
called to say that his company pulled the tanks, took end point samples, and he will send me the
results when he gets them. 12/13/06 - Raphael Ketani. I received a closure report for the site from
Associated Environmental Services, Ltd. I reviewed the report and found it to be acceptable. Based
upon the analytical results, manifests, and other documentation in the report, I am closing the
spill case.

Remarks: during soil testing readings came back high:

Hazardous Waste Summary:

Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOWANUS PUMPING STATION (Continued) **A100407902**

Tank Info:

Tank Number:	GW-8502-14
Tank Id:	254298

Equipment Records:

C01 - Pipe Location - Aboveground
G12 - Tank Secondary Containment - Double-Walled (AG only)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
F01 - Pipe External Protection - Painted/Asphalt Coating
I02 - Overfill - High Level Alarm
K00 - Spill Prevention - None
L09 - Piping Leak Detection - Exempt Suction Piping

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	05/23/2014

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

DEC Memo:	12/14/05: This spill transferred from J.Kolleeny to S.Kraszewski. 03/14/06: This spill reassigned to K.Tang. - SK 12/3/07: J.Kann - spill reassigned to J.Kann. Investigative Work Plan submitted on 11/5/07. 5/25/12: J.kann - spill priority assigned as P0 as a part of monthly reporting. 7/22/14: J.Kann - reviewed work plan. 3 permanent wells should be installed. Comments sent to NYCHA in an email today. 12/30/14: J.Kann - part of multi site stip. SIR due 3/14/15 6/3/15: J.Kann - The SIR was submitted on 4/3/15. The SIR was reviewed. 6 borings were advanced and 12 soil samples collected. Minor exceedences of PAHs in 2 locations but attributable to historic fill. 3 groundwater wells were installed and water samples collected and analyzed. Groundwater concentrations were all below TOGS 1.1.1. Site visit made today. Wells were gauged. Water only in wells. Spill closed. NFA.
Remarks:	removing a 10,000 gallon heating oil tank. under the tank there was some trapped water that had a petroleum sheen on it. less than 10 gallons are visible.

HW Code: 224152
Record Add: 06/10/2011
Record Upd: 08/24/2012
Updated By: DPKAPLAN
Site Description: "LOCATION: The Site is located at 198 Douglass Street in Brooklyn, between Bond Street and the Gowanus Canal. SITE FEATURES: The property is 0.18 acres and features a one-story warehouse building which is currently used for the storage of art and antique goods and furniture. CURRENT USE/ZONING: The property is currently used for the storage of antique goods. It is zoned for manufacturing use. HISTORICAL USES: The Site has historically been used for a variety of industrial purposes. Prior to its current use, the Site was owned and operated by Paramount Plumbing (approx. 1995 to 1998) and O.Z. Electrical Manufacturing Company Inc. (approx. 1960 to 1995). O.Z. also formerly owned and operated on the adjacent property (196 Douglass) as well as three buildings to the west, across Bond Street (262 Bond Street). Earlier owners/operators include P.H. Hughes Lime, Brick and Lath Yard (approx. 1887 to 1900); a gravel/crushed stone yard (approx. 1900 to 1930); and the Knickerbockers Ice Company, which included a machine shop (1930?s). SITE GEOLOGY AND HYDROGEOLOGY: Fill material consisting of sand, silt, gravel, and construction/demolition debris has been encountered to approximately 10 feet below ground surface (fbgs). Beneath the fill material (10 to 36 fbgs) is a sequence of inter-bedded silt, clay, sand, and peat layers atop fine to coarse-grained sand to a depth of approximately 48 fbgs. Groundwater has been encountered at depths ranging from 1.5 fbgs to 9 fbgs, during various investigations. USEPA Superfund investigations in the area of the Gowanus Canal have found that shallow groundwater flows toward the canal at both low and high tide. Intermediate groundwater generally flows upward toward the canal. Based on water chemistry measurements in surface water and groundwater (collected during Superfund investigations of the Gowanus Canal), it was concluded that infiltration from the canal controls water quality in shallow wells adjacent to the canal, with decreasing influence with distance from the canal. The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites. "
Env Problem: "NATURE AND EXTENT OF CONTAMINATION: A Site Investigation performed in April/May 2012 confirmed that tetrachloroethene (PCE) previously detected in groundwater was limited and not indicative of a release of hazardous waste. GROUNDWATER: In 2006, PCE was detected in groundwater at a concentration of 1,600 parts per billion (ppb) and

FORMER O.Z. ELECTRICAL (Continued) **S108057803**

benzene at 14 ppb, from one grab groundwater sample collected from one boring. In the 2012 Site Investigation, groundwater was sampled from four groundwater monitoring wells. Groundwater samples were analyzed for volatile organic compounds (VOCs). Several VOCs were detected; however, the only contaminants detected at concentrations that exceed standards were isopropylbenzene (detected at 5.1 ppb compared to the standard of 5.0 ppb) and methyl tertiary butyl ether (MTBE) (detected at 10.7 ppb compared to the standard of 10 ppb). The standards cited for groundwater are the NYS Ambient Water Quality Standards and Guidance Values for Water Class GA from NYSDEC Technical & Operational Guidance Series (TOGS) 1.1.1. SOIL: The 2012 Site Investigation included soil sampling from 7 soil borings and analysis for VOCs. The only contaminant detected above standards was isopropylbenzene, detected at 3.91 parts per million (ppm) compared to the CP-51 Supplemental Soil Cleanup Objective for protection of groundwater of 2.3 ppm. A few VOCs were detected on site in the 2006 soil boring, but at very low concentrations. SOIL VAPOR: In soil vapor, trichloroethene (TCE) was detected in two samples at a maximum concentration of 200 micrograms per cubic meter (ug/m3); however TCE was not detected above reporting limits in concurrent indoor air samples. The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites. "

DEC Memo:	DEC Piper contacted Caller Jeff Flannigan. He will copy report and analytical and send to DEC. 9/8/06- DEC Piper reviewed subsurface investigation report. AS per report, investigaestigation was due to the presence of petroleum vaprs inside work area. 1 boring was completed. Groundwater was encountrered at 9 feet bgs. A water sample was collected at 34 feet which contained elevated levels of benzene, PCE and a variety of SVOCs were above standards. A soil sample was collected at 36 feet bgs which indicated trace levels of clorinated solvents. Indoor air samples revesaled elevated levels of petroleum and clorinated solvents were detected above standards. Due to the soil and gw samples not being collected at the gw interface, the concentrations observed where collected, and

FORMER O.Z. ELECTRICAL (Continued) **S108057803**

indoor air quality, additional investigation is warranted. Case referred to remediation. 9/20/06- DEC Piper . Spill transpferred to remediation as per Austin on 9/8/06. 11/13/06 - reviewed site assessment report, found PERC in GW. Need to contact consultant to get more delineation of the GW contamination. - KST 4/11/08 - This spill has been transferred to D. Kaplan. Since previous reports were missing the representative of the site was contacted and the subsurface investigation report was obtained from the environmental consultant. 5/7/08 - Met the environmental consultant (Djamel Lekmine, AMEC), architect Jeff Flannigan who was acting as representative of the owner (was in charge of construction at the time the spill was reported), and attorney for the owner at the site. The entire lot is covered with a building with slab on grade finished floor. The building serves as a storage facility for fine art. It was explained that additional investigation was necessary. 5/19/08 - Environmental consultant sent a proposed work plan for additional investigation which was very incomplete (see edocs). 5/27/08 - A letter was sent to the environmental consultant describing additional requirements for a subsurface investigation. 8/26/08 - Attorney for the owner has been trying to work out a site access agreement with the owner of the adjacent property (196 Douglass St). Representative for the owner of 196 indicated that they are unwilling to grant site access. 9/26/08 - After negotiations with the owner of 196 Douglass for site access proved unsuccessful, DEC attorney (John Urda) sent a letter to the owner siting statutory authority for site access for investigation work. See edocs. 5/11/09- The work was performed February 10th and 11th. The report has not yet been received. 6/18/10-Vought-Received inquiry from DEC Austin as to whether Site should be transferred to Vought as P-Site . Vought discussed with DEC O'Connell and spill reassigned from Kaplan to Vought and entered into P-Site Tracking Spreadsheet. 2/8/11-Vought-Spill transferred from DEC Vought to DEC Kaplan for further action. 6/10/11 - Transferred to hazardous waste program as potential hazardous waste site (P site 224152) 3/30/21 - closed - cross-reference site no 224152. (JHO)

Remarks: THERE WAS SOIL SAMPLE TESTING AND GROUND WATER TESTING. THERE WAS DIFFENENT MATERIAL THAT WAS FOUND AT THE SITE. THERE ARE TRACES OF VOLITALE ORGANIC COMPOUND, TETRACHLOROETHENE,ETHYLBENZENE, XYLENE WAS FOUND IN SOIL SAMPLE. THE WATER SAMPLE HAD BENZINE, TETRACHLOROETHENE. THEY WERE DIGGING AT THIS SITE.
