RE: West 42nd Street, Manufactured Gas Plant, New York, New York

Dear Stu:

As directed, we are working to compile the support data necessary to dispose of the urban fill from the above referenced site at FDP Multimodel. Attached, please find a spreadsheet that shows the modifications that will be required for the laboratory reports prepared by York Labs. We have made contact with the laboratory director at the lab and anticipate that the changes will be completed by tomorrow. Upon receipt, they will be directed to the FDP staff for review and consideration.

The soil quality of the samples acquired from grid #6 is not suitable for disposal at the FDP site. I recommend that we forward the data to the Clean Earth Carteret, Philadelphia and New Cassell facilities for consideration of disposal. This may require the performance of additional tests to satisfy each facility's permit criteria. Soil from this grid will likely be excavated in the first ten days of the project to accommodate sheeting. If we have not gained an alternate approval for grid #6 material at that time, I can recommend stockpiling it until we have made proper arrangements. My staff will be on-site during said activities to insure that there is no commingling of wastes.

With respect to the soil in grid #3, the random sampling plan that was followed for this grid was biased to the eastern half (do to field considerations). The boring data and visual observations indicate that the western portion of the grid is highly contaminated. Consequently, I recommend that we limit the urban fill accepted at FDP from grid #3 to that within its eastern half. As we will be on-site to observe and direct disposal, we can insure that FDP does not receive inappropriate waste. Again, the material on the western half of grid #3 should be directed to Clean Earth Carteret, Philadelphia or New Cassell.

For future reference, this project has been identified in our files as project 05-115.

We will be attending a site meeting tomorrow morning at 8:00 a.m. I will advise you of scheduling issues and any requested modifications to the Remedial Action Work Plan in the afternoon.

Sincerely,
IMPACT ENVIRONMENTAL

Richard Parrish, P.G.
President

RE:

Silverstein
42nd Street and 11th Ave
NY, NY
Acceptance of Fill Material
FDP Enterprises Intermodal Container Facility Improvement Project
Approval No. 062405.01A

Clean Earth Dredging Technologies, Inc. (CEDTI) was in receipt of analytical reports for chemical samples collected from the above referenced fill material source. The fill material was sampled at the site of origin for Consolidated Edison/Blue Water Environmental/Impact and reported by York Laboratories. The results of these chemical analysis were submitted to CEDTI on 6-24-05.

Based upon review of the package, the sample locations, Grid #1 (Lab Id 05020147-18), Grid #2 (Lab Id 05020532-01), Grid #3 (Lab Id 05020398-01), Grid #4 (Lab Id 05020259-01) and Grid #5 (Lab Id 05020398-02) were determined to meet the chemical criteria for fill at the FDP site and are approved for acceptance as fill at the FDP Site under the approval number (062405.01A). The physical aspect shall meet the moisture criteria of 15% prior to shipment to the site.

| Sample # | Volume Approved |
|---|---|
| Grid #1 (Lab Id 05020147-18) | 3,000 tons |
| Grid #2 (Lab Id 05020532-01) | 3,000 tons |
| Grid #3 (Lab Id 05020398-01) | 1,500 tons |
| Grid #4 (Lab Id 05020259-01) | 3,000 tons |
| Grid #5 (Lab Id 05020398-02) | 3,000 tons |
| Total | 13,500 tons |

**Conditions:**

**1. The physical aspect shall meet the moisture criteria of less then 15% prior to shipment to the site.**

**2. This approval is for 13,500 tons.**

**3. The material shall not contain debris, this includes but not limited to plastic, wood and metal.**

**4. Each manifest shall indicate sample number and location of the source of the delivered material. No trucks will be allowed to enter the site without the approval number and sample location identified clearly on the manifest.**

**5. Original signed profile and Certifications sheets shall be provided.**

Sincerely,
CLEAN EARTH DREDGING TECHNOLOGIES, INC.

Jeff Graliff
Project Manager
