<p>PROJECT No.: 170381202</p> <p>PROJECT: 250 Water Street</p> <p>LOCATION: New York, NY</p> <p>BCP SITE ID: C231127</p>	<p>CLIENT: 250 Seaport District, LLC c/o The Howard Hughes Corporation</p>	<p>DATE: Friday, November 3, 2023</p> <p>WEATHER: Sunny, 40 – 50 °F Wind: NE @ 0.2 – 2.1 mph</p> <p>TIME: 5:45am – 5:45pm</p> <p>MONITOR Sophia Misiakiewicz</p>
<p>EQUIPMENT: CAT 335 Excavator CAT 328 Excavator Komatsu PC210 Excavator Delmag Drill Rig Bauer RTG RG 27S Bauer BG 36H Drill Rig Bauer BG45 Drill Rig Casagrande M6A-1 Tieback Drill Rig Jerome J505 Mercury Vapor Analyzer RKI GX-6000 Photoionization Detector (PID) Aeroqual ASQ1 Air Monitoring Station</p>	<p>PRESENT AT SITE: Day 240 Langan (Environmental/Geotechnical) Sophia Misiakiewicz, Pradeep Pandey Suffolk Construction (Suffolk) (General Contractor) Anthony Galu, Wyatt Favia East Coast Drilling, Inc. (ECD) (Foundation Contractor) Daniel Rogers, Mike Brosnan New York State Department of Environmental Conservation (NYSDEC) Sydney Sobol</p>	
<p>OBSERVATIONS, DISCUSSIONS, TEST RESULTS, ETC.:</p> <p>Langan was present to document remediation activities in accordance with the NYSDEC-approved November 2021 Remedial Action Work Plan (RAWP) at the 250 Water Street site (NYSDEC Brownfield Cleanup Program [BCP] Site No C231127).</p> <p>Site Activities</p> <ul style="list-style-type: none"> • ECD used a Bauer RTG RG 27S drill rig to pre-drill two boreholes in the southern part of the site to loosen the underlying soil in preparation for soil mix column installation. • ECD used a Bauer BG45 drill rig to install two deep soil mix columns for support-of-excavation (SOE) system installation in the southern part of the site (along Water Street). ECD’s drill rig advanced a steel rod with two cutter blades at the bottom of the rod, while concurrently injecting grout through the cutting head and spinning and advancing the blades downward to depths of about 118 and 120 feet below grade surface (bgs), respectively. <ul style="list-style-type: none"> ○ No drilling spoils were generated during installation of the soil mix columns. ○ Excess grout was contained within a temporary containment area in the southern part of the site and will be managed as construction and demolition (C&D) debris at a later date. • ECD used a Bauer BG 36H drill rig to partially install two secant piles for the SOE system in the western part of the site (along Beekman Street). The secant piles were advanced to a depths of about 65 and 95 feet bgs, respectively. <ul style="list-style-type: none"> ○ Drilling spoils generated during installation of the secant piles were screened for odors, staining, organic vapors, and mercury vapor using a handheld photoionization detector (PID) and handheld Jerome® J505 mercury vapor analyzer, respectively. Evidence of impacts was not observed and the drilling spoils were temporarily graded into the adjacent area in preparation for future off-site disposal.

SITE OBSERVATION REPORT

- ECD installed a tieback for the SOE system in the northern part of the site (along Pearl Street).
- ECD excavated an about 30-foot-long by 10-foot-wide area to a maximum depth of about 5 feet bgs in the northern part of the site (waste characterization cell WC01) to install timber lagging for the SOE system.
 - Excavated soil/fill was screened for odors, staining, organic vapors, and mercury vapor using a handheld PID and handheld Jerome® J505 mercury vapor analyzer, respectively. Evidence of impacts was not observed and the excavated soil/fill was temporarily graded adjacent to the excavation area for future off-site disposal at a later date.
 - Mercon-X® mercury vapor suppressant was actively applied to the soil/fill during excavation as a precautionary measure.
- ECD graded soil/fill in an about 30-foot-long by 20-foot-wide area in the central part of the site and an about 50-foot-long by 20-foot-wide area in the northwest part of the site to stabilize the surface for SOE system installation.
 - Graded soil/fill was screened for odors, staining, organic vapors, and mercury vapor using a handheld PID and handheld Jerome® J505 mercury vapor analyzer, respectively. Evidence of impacts was not observed.

NYSDEC Approved:	1,800 tons*				720 tons*		19,500 tons*	

*0.75-inch, 1.5-inch, and 2.5-inch virgin stone from the Stone Industries, Inc. facility and 1.5-inch clean bluestone from the Impact Reuse & Recovery Center (IRRC) facility were approved for import of 1,000 cubic yards (CY) and 400 CY, respectively. Assuming a conversion factor of 1.8, each quantity was converted to tons in order to accurately compare with import weight tickets. General fill from the IRRC facility was approved for import of 13,000 CY and a conversion factor of 1.5 is applied.

SITE OBSERVATION REPORT

CAMP Activities

Langan performed air monitoring at the perimeter of the site, at the northern sidewalk of Pearl Street, at the western sidewalk of Beekman Street, at the eastern sidewalk of Peck Slip, and at the southern sidewalk of Water Street at eight total locations for mercury vapor, volatile organic compounds (VOCs), and particulate matter less than 10 microns in diameter (PM10) from about 7:05am to 4:42pm. There were no fifteen-minute average concentrations for mercury vapor, VOCs or PM10 that approached or exceeded the action levels established by the CAMP (1.00 $\mu\text{g}/\text{m}^3$, 5.0 ppm, or 0.100 mg/m^3 , respectively).

Background Concentrations

Prior to implementation of CAMP, instantaneous background concentrations of mercury vapor and VOCs were recorded using a handheld Jerome® J505 mercury vapor analyzer and a handheld PID, respectively.

- Background concentrations of mercury vapor at each CAMP station were recorded at 0.00 $\mu\text{g}/\text{m}^3$.
- Background concentrations of VOCs at each CAMP station were recorded at 0.0 ppm.

Perimeter and Work Zone Concentrations

Daily Average Concentrations

Station ID	Particulate (mg/m^3)	Organic Vapor (ppm)	Mercury Vapor ($\mu\text{g}/\text{m}^3$)
PM-1	0.008	0.01	0.02
PM-2	0.010	0.01	0.01
PM-3	0.005	0.00	0.00
PM-4	0.007	0.01	0.02
WZ-1	0.004	0.00	0.00
WZ-2	0.006	0.01	0.01
WZ-3	0.004	0.00	0.01
WZ-4	0.005	0.01	0.01

Maximum 15-Minute-Average Concentrations

Station ID	Particulate (mg/m^3)	Organic Vapor (ppm)	Mercury Vapor ($\mu\text{g}/\text{m}^3$)
PM-1	0.017	0.08	0.04
PM-2	0.021	0.08	0.03
PM-3	0.007	0.02	0.01
PM-4	0.013	0.09	0.05
WZ-1	0.006	0.01	0.02
WZ-2	0.016	0.05	0.25
WZ-3	0.005	0.02	0.02
WZ-4	0.010	0.07	0.03

• mg/m^3 = milligrams per cubic meter •ppm = parts per million • $\mu\text{g}/\text{m}^3$ = micrograms per cubic meter

			LANGAN

SITE OBSERVATION REPORT

Ambient Air (Handheld Jerome® J505 and Handheld PID)

- The dedicated mobile monitor (Langan) used a handheld Jerome® J505 mercury vapor analyzer to monitor ambient air conditions at various heights throughout the site. Instantaneous mercury vapor concentrations throughout the site ranged from 0.00 $\mu\text{g}/\text{m}^3$ to 0.12 g/m^3 .
- The dedicated mobile monitor (Langan) used a handheld PID to monitor VOC concentrations throughout the site. Instantaneous VOC concentrations were not detected above background concentrations throughout the workday.

Off-site CAMP Stations

- CAMP station WZ-1 was placed on the western sidewalk of Beekman Street from about 6:35am to 4:56pm.
- CAMP station WZ-2 was placed on the southern sidewalk of Water Street from about 6:27am to 4:57pm.
- CAMP station WZ-3 was placed on the eastern sidewalk of Peck Slip from about 6:48am to 4:46pm.
- CAMP station WZ-4 was placed on the northern sidewalk of Pearl Street from about 6:17am to 5:04pm.

Prior to CAMP Shutdown

Prior to discontinuing CAMP, mercury vapor and VOC concentrations were confirmed to return to background conditions at each perimeter station using the handheld Jerome® J505 mercury vapor analyzer and handheld PID, respectively. Perimeter CAMP stations were discontinued sequentially between 4:42pm and 4:50pm.

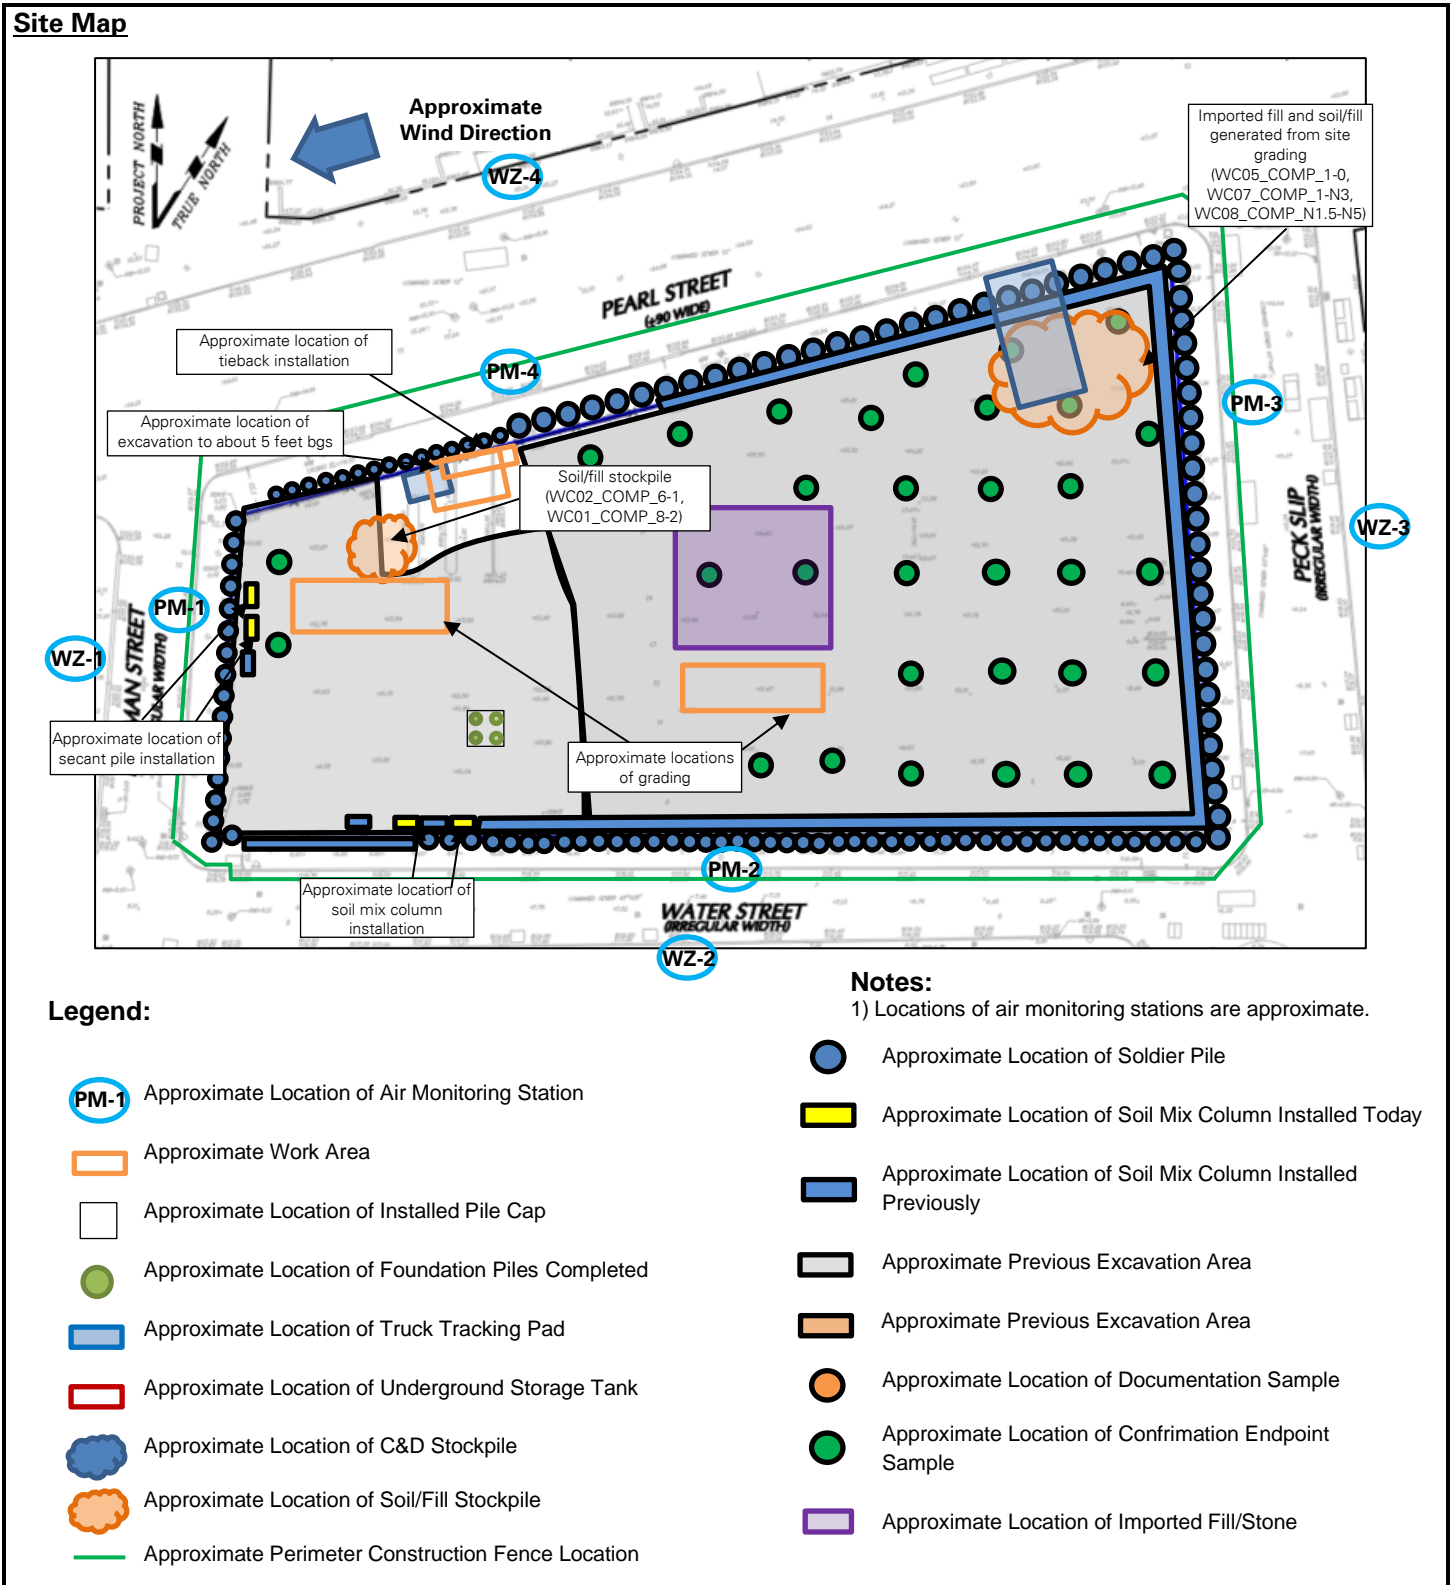

- Background concentrations of mercury vapor at each CAMP station were recorded at 0.00 $\mu\text{g}/\text{m}^3$.
- Background concentrations of VOCs at each CAMP station were recorded at 0.0 ppm.

Anticipated Activities

- ECD will continue exporting C&D and soil/fill from the western part of the site for off-site disposal.
- ECD will continue installing soil mix columns and/or secant piles for SOE system installation along Beekman and Water Streets.
- ECD will continue installing tiebacks for the SOE system along Beekman and Pearl Streets.
