Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004448679

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MILLER DEC SIGONA REASSIGNED TO MILLER ON 1/23/98 3/5/10 - Austin - Reassigned as TTF to Jake Krimgold for further investigation. - end 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo 8/24/12 TJD Spill cross-referenced to PBS#. 10/09/14-Hiralkumar Patel. reviewed available documents for DEC DeMeo. site name: West 30th Street Heliport PBS #: 2-342211. as per PBS record, the site has/had following tanks: - one (1) 8,000 gal other product AST on saddles, in-service, installed in Apr. 1997 - one (1) 8,000 gal other product AST on soil, converted to non-regulated use, installed in Apr. 1997 (this could be same tank as above) 10/27/14 TJD File review - based upon above information obtained from Patel. - eleven (11) 550 gal other product USTs, closed-in-place, in Apr. 1997 - five (5) 550 gal other product USTs, closed prior to Mar. 1991 other spills #: 8804707, 8901091, 9504121 spill # 8804707 was reported on 08/29/1988 by USCG due to petroleum patch. case closed. spill # 8901091 was reported on 05/04/1989 due to tank test failure for eight (8) 550 gal jet fuel tanks. case closed. spill # 9504121 was reported on 07/06/1995 by USCG due to 40 gal jet fuel spill result of collision between two helicopters. case closed. reviewed documents on e-docs for PBS: - 12/18/1988: tanks 9 to 16 (550 gal jet A fuel) were passed - 12/07/1991: tanks 1 to 8 (550 gal jet A fuel) were passed - 06/11/2007: N. D. Eryou sent letter to DEC Falvey. he mentioned that the eleven (11) 550 gal USTs owned by Port Authority and they were conveyed with the land lease to NYS DOT (Aviation Division). he was not present during tanks abandonment in 1997, but believed that NYSDOT was going to remove the USTs as part of the stormwater upgrades that were underway as part of the immeidate adjacent Route 9 upgrades. 10/27/14 TJD File review. Based upon summarized review discussed above - (8) 550 gallon UST's passed tightness tests (Tanks 9 to 16) prior to reported spill (1988). Remaining (8) 550 gallon UST's (Tanks 1 to 8) passed a tighness test subsequent to reported spill (1991). As per PBS inspection 1/9/07 (Falvey) all UST's have been permanently closed on site. New 8K AST's are currently in operation at this facility. A total of (3) spill reports have been reported and closed at this facility since initial TTF report. Unknown what tank # failed the tighness test, however, all UST's are reported out of service. Due to proximity of the failure to the Hudson River if a significant petroleum discharge had occurred impacts to the adjacent surface waters would have been observed. No further action is required at this time. Spill is administratively closed."
Remarks:	"550 GALLON TANK FAILED HORNER EZY CHECK WITH A LEAK RATE OF .179GPH, TANK #8, PARTIALLY PUMPED OUT TANK, WILL FINISH PUMPING TANK LATER TODAY."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

OTIS ELEVATOR (Continued) **1006810527**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region:	2
DER Facility ID:	272958
DEC Memo:	"Sangesland spoke with Roux Assoc. Tank excavation with some spillage around tanks. (Tanks had been previously abandoned in place). Now tanks are being pulled. Sangesland asked for several end point soil samples taken from tank grave after removal. Test for VOC & SVOC. 3/16/2005 Sangesland reviewed a report from Roux Assoc. dated 3/9/05 On 2/18/05 Roux collected 6 post-ex samples. One per each side & 2 bottom VOC's - All samples contained low levels of VOC's, but they were ALL BELOW RSCO Stds. SVOC's - Some minor Hits on PAHs consistant with historical fill levels. Results show some contaminants exceed regulatory standards. Samples taken on removed (waste) soils showed much higher VOC & SVOC levels. Roux conclusion says that the contamination source has been removed and the site should be closed out. Based on the soil sampling work performed on the site and the report prepared by Roux Assoc., the NYSDEC agrees with the conclusion and the spill case is closed with: No Further Action - Does Not Meet Standards "
Remarks:	"REMOVING TANK, JUST AN ODOR IN THE SOIL: NOT SURE HOW TO MOVE FORWARD WITH PROJECT:"

FINDS:

Registry ID: 110004386539

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL JOE LOCKWOOD AT SITE WANTS CALL BACK TO DISCUSS NEXT MOVE. HE WANTS TO CONTINUE WORKING. PLEASE CALL HIM AT SITE 212 330-4909. The contamination was reportedly discovered while excavating the piping for upgrading of PBS piping. DEC (sigona) spoke with Joe Lockwood several times regarding the cleanup. Requested that Apex collect soil samples every 25-50 feet along the piping system, and if possible install groundwater monitoring wells to determine the actual extent of contamination at the site. DEC (Sigona) called Joe Lockwood for an update on 5/7/99, left message. DEC (Sigona) inspected May 20th, 1999 at 2:30 P.M. met on-site w/Richard Papesca, USPS & John Hornak, Allstate Power Vac Replacing all 4K UST 10 years old w/new double wall FRP, with leak detection & new pipes. Cleaned all vaults pea gravel was removed and disposed. They will install new pump run outside concrete vault. Installing 3-4 MW's along pipe run outside vault. Installing new concrete pad. Area above tanks, piping and island under large canpy - roof. Originally, plan was to upgrade piping. Found the tanks were 10 years old, but did not meet all of the standards, decided to replace tanks. DEC Sigona spoke to Nick DeCarlo (212)330-3107 USPS Environmental Compliance, 421 8th Avenue, NY,NY 10199 Rm 5013 on August 28, 2001, indicated that MWs were installed in June 2001, and results of groundwater testing would be submitted to DEC with recomendations for closure of spill. On Sept 20, 2001, DEC Sigona received report from Apex Environmental, dated Sept 17, 2001. 4/12/04-Vought-Spill transferred from Sigona to Rommel as per Rommel. 9/16/2005 - Jacob- Base on report from Apex environmental, the depth to groundwater was measured using an electronic water level indicator. Depth for groundwater was 7.23'for MW-1, 8.72'for MW-2, and 8.56'for MW-3.Result for water analysis are on file."

DEC Memo:	"12/14/05: This spill transferred from J.Kolleeny to S.Kraszewski. 9/22/06: Spill transferred from Kraszewski to Kann. 1/19/10: J.Kann - revised work plan received 11/17/09. WP approved 1/19/10. 9/23/10: J.kann - Quarterly Report recieved 9/01/10. 5/11/12: J.Kann - quarterly report recieved on 5/9/12. 9/6/12: J.kann - quarterly report received on 8/21/12. 1/16/13 : J.kann - 10/24/12 QR rcvd on 1/16/13. 5/21/14: J.Kann - email sent to NYCHA today stating: The Department understands that a recovery system is operating, that monthly VEFR is being performed and that quarterly monitoring is currently being done at the following five sites: Amsterdam Houses Elliott Houses Manhattanville Houses Melrose Houses Baruch Houses Since wells at these five sites have consistently (based on quarterly reports received over the past year) had no product, a sheen or less than 0.08 inch of product in their wells, the Department would like NYCHA to temporarily cease operation of the systems and VEFR at these sites. For the next 4 months, the wells must be monitored to determine if any significant recharge of product occurs. Accurate readings of product thickness must be made, which may require using the gauging method used at South Jamaica Houses on May 19, 2014. In addition, during this 4 month time period, no absorbent socks should be placed in the wells. Data from this monitoring, along with recommendations, must be included in the 2014 3rd quarter monitoring report for these sites, which is due to the Department by October 1, 2014. In the event that a significant recharge is noticed in any of the wells during these 4 months, the Department must be contacted

ELLIOTT HOUSES -NYCHA (Continued) **S104495199**

immediately (within 72 hours of gauging). 1/24/17: J.Kann - based on review of Quarterly monitoring reports, The source of petroleum has been removed. The PRS was operated between 1998 and 2014 Free product has not been observed in the accessible monitoring wells since 2007. Since halting the PRS in 2014, free product has not been observed in the accessible monitoring wells and little free product (less than 0.25in) has been observed in the recovery wells. No petroleum related VOCs or SVOCs (listed in Table 3 of CP-51) were detected in groundwater samples collected in April 2015 from the accessible monitoring wells. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, spills can be closed. The Closure Letter should contain the contaminated soil clause. Spill closure email will be prepared with contaminated soil clause and sent to NYCHA "

FINDS:

Registry ID: 110069681696

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:

Program:	BCP
Site Code:	488150
Acres:	0.13
HW Code:	C231086
SWIS:	3101
Town:	New York City
Record Added Date:	10/21/2013
Record Updated Date:	01/13/2014
Update By:	BXANDERS
Site Description:	Location: The site is located at the northwest corner of the intersection of West 24th Street and 10th Avenue. The site is approximately 0.13 acres in size. Site Features: The site currently is occupied by a non-operating gasoline service station, including a recently vacated 1-story commercial building last used as a convenience store. Current Zoning and Land Use: The subject property is zoned as M1-5, which allows for commercial and mixed-use buildings. The intended use of the site is for residential and commercial. The site is bounded directly adjacent by an 11-story residential building to the north, a car wash and mixed-use (residential and commercial) building to the south, and across 10th Avenue 4- and 6-story mixed-use buildings and a 20 story residential building. The site is approximately 100 feet away from the High Line Park, which overlooks the site to the east, separated by a one-story art gallery. Past Use of the Site: The site was operated as a small portion of a gas light fixture manufacturing facility that occupied the eastern third of the block in the 1890s. The site then operated as a gasoline filling station from at least 1930 until recent decommissioning in 2013. Since 1988 the site had 8 spill numbers assigned to it, out of which one spill number still remains open. In 1998 twelve 550-gallon gasoline USTs, three 4,000-gallon gasoline USTs, one 275-gallon fuel oil UST, and two fueling pump islands were removed and 1,853 tons of impacted soil was removed. Post excavation soil sampling results identified concentrations of volatile organic compounds (VOCs) exceeding NYSDEC Recommended Soil Cleanup Objectives (RSCOs). Petroleum impacted groundwater was also detected on-site which still remains. Site Geology and Hydrogeology: The geologic conditions at the site consists mainly of fine to medium grained sands mixed with gravels, boulders, construction debris and interbedded layers of silt down to 25 feet below grade (fbg). The Site s topography is generally flat and the surface elevation is

FORMER GETTY SERVICE STATION (Continued) **S106703285**

	approximately 43 feet above mean sea level. Groundwater occurs within the unconsolidated soils at depths ranging from approximately 7 to 10 fbg; based on historical gauging data, there appears to be an appreciable degree of seasonal variation in the direction of groundwater flow at the site, periodically fluctuating between south, southwest and west.
Env Problem:	Nature and Extent of Contamination: Based upon investigations conducted to date, the primary contaminants of concern for the site include petroleum hydrocarbon related volatile organic compounds (VOCs) compounds. Soil: Per 1998 lab results for the end point soil samples collected from 10 feet below grade (SW-7) the highest benzene concentration was detected as 44.5 ppm which exceeded the soil cleanup objective (SCO) for commercial use (to 44 ppm). Other SCO exceedances were ethylbenzene at 198 ppm (restricted residential SCO = 41 ppm), xylene at 1,990 ppm (industrial SCO=1000 ppm), toluene at 479 ppm (resrricted residential SCO=100 ppm) and MTBE at 124 ppm (restricted residential SCO= 100 ppm). Groundwater: Since 2001 twelve (12) monitoring wells have been installed on and off-site (3 on site and 9 off-site) related to the current open spill. Per August 2012 (latest available) monitoring data the highest on-site concentrations detected were: benzene (32 ppb), ethylbenzene (139 ppb), xylene (80.5 ppb) and MTBE (18.3 ppb). Groundwater standards have been exceeded for all of the above analytes. Site related soil vapor and indoor air samples never been analyzed. Special Resources Impacted/Threatened: The site is located in the urban area and Fish and Wildlife Impact Analysis is not warranted.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"SEE ALSO 86-05564, 95-11782, 98-08740, 95-13588. 4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel. 4/19/04 Reassigned from Rommel to K Foley. 5/24/04 Tibbe received voicemail from Curt Schmidt, Fleming Lee Shue (212-675-3225). Replacing AKRF. 5/27/04 Added diesel and #2FO to material spilled to address spills #9808740 and 9511782. Spoke to C. Schmidt. Will set up a site meeting next week. 555 W 23th St(spill #0306399), the Tate building, is adjacent to Mendon property which has a system installed on the first floor (no basement). 6/3/04 Set up meeting with A. Fleming for Monday, 6/7. A. Fleming (office 212-675-3225, cell 917-885-1475). 6/7/04 Met with A. Fleming. System located inside Tate has not been in operation. Arnie needs to look into system manufacturer data to see if they can make changes to the system. Wells haven't been sampled since AKRF lost the job. Will arrange to have wells sampled. 7/15/04 Received call from C. Schmidt, FLS. Wells will be sampled 7/19-7/20. FLS still looking into making changes to existing system. 9/21/04 Spoke with Mohammed Ahmed, Fleming Lee Shue (917-612-6018). He was previously with AKRF. Would like to present all data and propose NFA. He will need to FOIL the file to get AKRF data. 10/13/04 Received summary from FLS proposing closure of site. Background: Site is currently a luxury apartment building with art galleries on the ground floor. The site was historically used for freight transportation and warehouse facilities. The Hudson River is approx 0.25mi to the west. Site was mainly used as a truck rental, fueling and maintenance yard. Hertz formerly occupied the site and built a two-story garage in 1963. Hertz installed six 550gal gas USTs in the adjacent parking area located along 24th Street. Hertz also installed a gas distribution system with 4 dispensers. In 1965, Hertz installed four additional 550gal diesel USTs and a separate dispenser. One 7500gal heating oil tank was installed in the SW portion of the building. CMCR, LTD acquired the site from Hertz and also used the site as a truck rental/leasing facility. In 1985, the site was leased to Mendon Leasing Corp. Mendon reported four spills, 9511782(diesel), 9513588(gas), 9605688(gas), 9808740(#2FO). Costco Wholesale purchased the site in 1998 in anticipation of zoning that would allow a retail development at the site and closed the fuel and gas tanks in place. In July 2000, the Related Companies purchased the property and built the current apartment building that covers the site. Tank testing: In July 1990, Mendon was issued an NOV from the FDNY for failing to do the 10yr tightness testing on the six gas tanks. In March 1991, Mendon has all the gas and diesel tanks tested. The gas tanks passed but the diesel tank failed. The diesel tank was repaired and passed retest. In 1993, the heating oil tank was tested and passed. In 1995, the diesel tanks were tested again and failed. The contents were emptied in 5/96 and filled with polyurethane foam. In Feb 1997, the gas tanks were also emptied and filled with water. Previous Investigations: Several invetigations were conducted between 1993 and 2001. ES Engineering did work on behalf of Greyhound Lines. ERM Northeast did work for DEC. AKRF did work for Costco and Related.

MENDON LEASING (Continued) **S104275477**

Soil and GW has been impcated by on-site releases of petroleum and possibly also off-site sources. Areas within the parking lot on the north side of the former two-story garage building and inside the building, in the vicinity of the heating oil tank, contained free product in soils and GW. Free product in the former parking lot ranged from 0.08 to 1.63'. Free product found inside the former garage building was as thick as 4'. Dissolved-phase VOCs were also detected in GW as high as 5408ppb. No SVOCs were detected. Soil/GW interface is located at approx 8'bgs, flowing west toward Hudson. GW is not tidal. Bedrock approx 63'bgs, sloping S-SW. Remedial Actions: In Dec 1999, four 550gal diesel USTs and six 550gal gas USTs were removed from beneath the open parking lot. The heating oil tank was removed in Oct 2000. Approx 1000 tons of grossly contaminated soils were excavated and disposed of. The free product appeared on the groundwater surface and removed with absorbant pads. The excavations were left open to monitor for free product. No additional free product was observed and excavations were backfilled. No post-ex sampling was completed. The Department issued a letter on 2/12/01 with comments. A remedial workplan consisting of an in-situ remediation for soil and GW using SVE and bioremediation was presented and approved by the Dept. In March-April 2001, six geoprobes were completed. NMW-1 showed total BTEX in GW at 275400ppb, NWM-2 at 156200ppb, and NMW-4 at 1330ppb. Insufficient GW was recovered from NMW-3 and NMW-5. NMW-6 was non-detect. In October 2000, an SVE pilot was performed. An underslab SVE system was designed and installed to remove residual VOCs and to add atmospheric oxygen to allow bioremediation to occur. Air extracted from below the slab was carbon treated before venting to the roof. A vapor barrier was installed beneath the slab. Operation of the system began August 2002 and operated thru August 2003 for 1615hrs. VOCs, carbon dioxide, oxygen and moisture levels were monitored before the input and at the output of the carbon canisters. System inspection and monitoring were conducted daily for the first two weeks and then weekly inspections were made. At startup, VOCs were measured at 20-50ppm. Concentrations dropped from the initiation in August 2002 thru November 2002 when the system was stopped for seven weeks due to equipment problems. Upon restarting the system in Jan 2003, a rebound was measured with VOCs rising to 60ppm. The system was operated for two weeks with a second 4 week idle period(1/7/03-2/25/03). After this rest period, the rebound did not occur. The system operated for a period of four weeks with a continual decrease of VOC concentration. Equipment failure again shut the system down for five weeks(3/27/03-5/1/03). A slight rebound to several ppm occured when the system restarted. The system continued to operate thru June 2003 with day-long shutdown for maintenance with no rebounds observed. Levels of VOCs in the extracted air in June 2003 were zero. Between July 2003 and July 2004, the SVE system was out of service due to major damage in the main section of the blower. In August 2004, the SVE blower and motor were downsized to a 10HP regenerative blower capable of 200 scfm at 80 inches of water. VOCs were measured two days after startup which detected levels of VOCs in extracted air between 2 and 5ppm, indicating that no significant VOCs are being extracted from beneath the building. A total of 10 MWs exist on site. Four(MW-3, ERM-4, MW-14, MW-15) are currently located on the sidewalk. The other six(NMW-1 to NMW-6) are inside the Tate building. Max total BTEX detected in MW-14 at 1990ppb(7/16/02). Max MTBE detected in NMW-2 at 410ppb(8/8/03). By the concentrations of MTBE detected in upgradient

MENDON LEASING (Continued) **S104275477**

wells, MW-14 and MW-15, there may be an off-site source. (There are two gas stations upgradient at 24th St and 10th Ave.) Concentrations of BTEX have been decreasing in source areas. It appears that removal of grossly contaminated soils and free product at the time of the UST removal in 2001 eliminated the primary source of GW contamination. Groundwater samples to be collected 10/16/04. 11/1/04 Spoke to Mohammed Ahmed, FLS (212-675-3225). Approx 3 of free product(gasoline) was detected in MW-14 (sidegradient of tank field) on 8/17/04. One week later, there was no product detected. Sampled again on 10/14/04, no product detected. He suspects that it is from an off-site source. There is a LukOil Station at 239 10th Avenue (open spills #9810383, 9707190). Oct 2004 monitoring report to be submitted this week. 11/16/04 Received status update (FLS, 11/11/04). GW sampling conducted 10/12-10/13/04. No samples were collected from MW-15 located on the sidewalk of 24th St and NMW-1 located inside the Buia Gallery on 23rd St. MW-15 was backfilled during construction of the Tate Bldg. NMW-1 was inaccessible due to an exhibit. BTEX ranged from ND to 1086ppb(MW-14). MTBE ranged from ND to 130ppb(NMW-2). Off-site sources of contamination may be contributing to site conditions. However, it is not clear that it is not from onsite sources. 12/7/04 Issued letter requiring additional delineation around MW-14 and at former upgradient well location MW-15. Report to be submitted by 3/15/05. 12/20/04 Spoke to M. Ahmed, FLS. Will propose re-installation of upgradient MW-15, one well further upgradient (to confirm possible off-site impacts), and one west of MW-14(sidegradient). 12/29/04 Received proposal from FLS to install three additional MWs. 12/30/04 Issued letter approving workplan. 2/18/05 Received report for the installation of MW-14, 15A and 17. According to the report, there appears to be an off-site source on the northwest portion of property along W24th St. Concentrations of BTEX increased from 1086ppb to 2067ppb in MW-14. Report also states that the LukOil station may be contributing to the MTBE concentrations across the site. 3/15/05 Spoke to Mohammed Ahmed, FLS. Requested two Geoprobes across W 24th St to eliminate the Motor Freight Station and Auto Repair Shop as potential sources. 8/15/05 Spoke to M. Ahmed. A. Fleming spoke to NYSDOH at K. Tang's recommendation. NYSDOH requested subslab and indoor air samples. Results expected next week. FLS proposes to use this data to support closure. Explained that there is still dissolved which remains on the corner of the property. Agreed to wait for results to decide next steps. 11/29/05 Email to A. Fleming and M. Ahmed, FLS, provided comments on the October 17th request for spill closure. Regarding the indoor air and soil gas sampling which was performed, it is unclear if the concentrations detected within the building are due to any background interferences within the building. Directed FLS to conduct a full inventory as directed by the NYSDOH guidance for evaluating soil vapor intrusion. An additional round of indoor air samples must be taken at least 24hrs following the removal of any possible VOC sources. Results will be forwarded to NYSDOH. The Departments will determine further action for vapor mitigation, if required, following review. The groundwater data collected to date has been sporadic with five sampling rounds completed within the last three years. Quarterly groundwater sampling and monthly gauging must be completed and results submitted to the Department. Groundwater direction must be confirmed. The groundwater concentrations at MW-14 were as high as 4340ppb total VOCs in the last sampling round in January and have historically been fluctuating. MW-17, which was recently installed

MENDON LEASING (Continued) **S104275477**

west of MW-14, also had readings of 2777ppb total VOCs. The Department requires additional wells be installed across W 24th street, north of MW-14 and MW-17, and west of MW-17. A proposal to remediate the contamination in this area will be required. It is expected that the additional delineation, groundwater and indoor air sampling results, with scaled site and contour maps, will be submitted by the beginning of February. 4/20/06 Requested update from M. Ahmed of FLS. 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 7/06/06 Requested update from A. Flemming of FLS. Mr. Flemming and I spoke about the history of the site. He still believes the impacts to groundwater at wells MW-14 and MW-17 are from off-site contamination (possibly Lukoil site on 10th Ave and 24th Street). These wells are supposedly up-gradient side of the site. I requested Arnie send me the latest data on the site including groundwater sampling and indoor air sampling data. - JAM 7/25/06 Spoke with A. Flemming a number of times. I do not believe a second round of indoor air sampling was conducted, however a vapor barrier is in place. They conducted site-wide groundwater sampling in May 06. Mr. Flemming believes the latest GW results show that off-site sources are contributing to the GW contamination along W24th Street. He will submit a report of the wells that were sampled (not all were sampled because they were inaccessable). I requested that he state his justification for spill closure in the groundwater sampling report. 10/16/06 Received a call from Steve Panter of Fleming Lee Shue (212) 675-3225. He said the report is ready and will be submitted this week. - JAM 11/14/06 Received the report dated October 20, 2006 via email. The report summarizes all the groundwater analytical data since April 2003. FLS makes the argument that off-site sources are contaminating the sidewalk wells. A summary of all the off-site sources is included as well as a two part technical explanation for the difference between groundwater contamination in the sidewalk MWs and on-site MWs. The first part is a multivariate analysis, and the second is a comparison between Benzene and MTBE. The report is uploaded into edocs. - JAM 11/22/06 Received SVE System Data and Indoor Air Quality Data Summary Report from FLS. Report uploaded to eDocs. 01/22/07 Issued a letter to Greg Gushee The Related Companies, Inc. 60 Columbus Circle New York, NY 10022 with the NYSDEC's position on the FLS report. Chris Magee in Central Office reviewed the report and based on the material presented he does not concur with FLS' conclusion that off-site sources are contributing to the contamination found in the sidewalk wells. The letter states that The Related Companies, Inc. is responsible to monitor and remediate the site. Groundwater must be gauged and sampled quarterly and based on the results the NYSDEC will determine if a remedial strategy is necessary. The letter is uploaded into edocs. - JAM 8/21/07 Reviewed FLS letter submitted to the DEC on April 13, 2007 in response to DEC comments sent on 1/22/07. FLS believes that contamination found in off-site wells on West 24th Street stems from a different source. I sent the letter to Chris Magee in Central Office for review. - JAM 9/06/07 Sent email to Steve Panter at FLS. The email states that, the data are inconclusive and do not prove that an off-site source is affecting the groundwater in the monitoring wells in the sidewalk... The Department cannot approve spill closure at this time. A round of groundwater samples should be collected from all wells to obtain up-to-date groundwater quality data. Results should be submitted with appropriate recommendations for further monitoring and/or remedial activities if necessary. - JAM

MENDON LEASING (Continued) **S104275477**

1/18/08 Received an email from Jim Harrington in Central Office. Steve Panter from FLS contacted Mr. Harrington stating that they will do another round of sampling but he wants assurance that after the next round of GW sampling the spill case will be closed. Mr. Harrington said he will review the spill case and material forwarded by Mr. Panter. Afterwards, he will contact Region 2 staff for further discussion before responding to Mr. Panter. - JAM 9/22/08 Reviewed the Groundwater Sampling Report/Spill Closure Request submitted by Flemming Lee Shue dated May 12, 2008. All on- and off-site monitoring wells were sampled in February 2008. Groundwater monitoring results show no signicant change in contaminant levels in any of the on-site or off-site wells. The sidewalk wells continue to show exceedences for VOCs in groundwater (i.e. 748ug/L total VOCs in well MW-14 and 829ug/L total VOCs in MW-16) however, the exposure risk from these contaminants is low. The groundwater monitoring report is uploaded to eDocs. Senior technical staff in Central Office supports closure of this spill without meeting recommended objectives because of the low risk of exposure. This spill case was closed and a NFA letter was issued. NFA uploaded to eDocs. - JAM"

Remarks: "CALLER FOUND .7 FEET OF GASOLINE IN A TWO INCH GROUNDWATER MONITORING WELL. LOCATION IS A TRUCK LEASING COMPANY. MARK TIBBE NOTIFIED OF RESULTS. ADDITIONAL MONITORING WELLS TO BE INSTALLED AND SIX TANKS ARE TO BE PULLED."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 4/22/03 SAMUEL- RCVD TANK CLOSURE & SITE ASSESSMENT REPORT. CONTACT PERSON:- HUGH J FREUND 212 705 7000- ATTORNEY FOR THE MARY BOONE GALLERY (R.P) 2/9/06- DEC Piper spoke w/ LEE WESTCHOTT at Whitman CO. As per conversation there was free floating product discovered at the property. There is a monitoring well network. It has been recently sampled and Lee will forward a summary status report to the dept. including analytical summaries within the next month. Case referred to Koon Tang. 06/08/06: This spill transferred to S.Kraszewski. - SK 08/14/06: Received a voicemail from Ira Whitman, concerning the status of the site. He gave no callback number. SK reviewed the Tank Closure Report from Fall 2001. It is evident that high levels of VOCs were detected around the fuel oil UST. Lower exceedances were also found around the gasoline USTs and the Oil/Water separator. No mention if GW was encountered; the site lies next tothe Hudson River so GW is probably shallow. No MWs were installed during the investigation. Must know the GW condition above all else at this point. - SK 08/15/06: Called Ira Whitman (732-553-4333) after he left a voicemail. He is no longer the consultant involved with this site, in fact he believes that no firm

MARY BOONE GALLERY (Continued) **S104782023**

is involved at all. He was involved on a site project adjacent from this one: Dynamic Delivery was the contractor involved with the clean-up. He said this site already received an NFA. I said, based on the report, the GW condition must be established. He said it might be worth-while to review the reports from the neighboring site, which is also downgradient from this one (closer to the Hudson.) He said to contact a John Houshmand, of Clark Construction, who discovered the tanks during renovation work on the property. - SK 08/18/06: Left a message for John Houshmand (917-553-4333). - SK 08/22/06: John Houshmand called back. He gave me the contact info for Mary Boone, owner of the gallery. Gallery: 212-753-2929, Cell: 917-861-2929. She is not the property owner of the site, she only rents the space. According to John, contractor for the building and several others nearby, after the abatement of the gasoline tanks, fuel oil tank and sump pit the entire area was covered in concrete and established as the Mary Boone Gallery. He also mentioned the adjacent site which supposedly has GW wells and may be useful in characterizing the GW condition for this site. I told John I would look into this other site and get back to him, since he regularly deals with the owner. - SK 08/29/06: I discussed the site situation with JK. The site needs a GW investigation, unfortunately their is no access to the interior so the MWs need to be placed on the sidewalk next to the former gasoline USTs and oil/water separator pit. Also, a soil boring next to the gasoline fill port will be needed. I called John Houshmand (917-553-4333) and explained what work would need to be done. I also asked him for the property owner's contact info since it is not on file. He will find out, plus he asked about other consultants to do the work since The Whitman company had a falling out with Mary Boone. I said to convince her that he seems like a reputable company based on the report. Letter was sent out asking for two MWs, a soil boring and sub-slab soilgas sampling. Property owner is a Samuel Weinberg. - SK 11/09/06: Reassigned from Stephen Kraszewski to Chanda. (Chanda) 01/02/07:Kartik Chnada of DEC sent a letter to Property Owner(Mr.Samuel Weinberg), requring that an additional investigation of GW and additional monitoring wells at the site. A work plan is mandated by 03/02/07 for approval. 01/10/07: Chanda received an e-mail from John Houshmand, Clark Construction Corp.He said that the RP will be retained Long Island Analytical Laboratories(LIAL), Inc. to perform this work. 2/27/07: Chanda received a limited subsurfsce investigstion work plan prepared by LIAL dated on 2/26/07. 2/28/07: Chnada reviewed the limited subsurface investigation work plan. on 2/28/07, the Department conditionaly approves this work plan. On 2/28/07, Chanda sent a letter to RP(Samuel Weingberg)and his consultant (John Hushmand), Michael Veraldi (LIAL), requiring that an investigation summary report be submitted to DEC for review by April 16, 2007. 4/19/07: Chnada received a phone call from Michael Veraldi, LIAL concerning the status of the site. He explained to me the cause of the delay on the investigation work report. 4/23/07: Chanda received a letter from Michael veraldi, LIAL regarding an extension to complete the approved work plan at the site. 4/24/07: Chanda sent a time extension approval letter to the RP(Samuel Weingberg) and his consultant (John Hushmand), Michael Veraldi (LIAL). An Investigation Summary Report must be submitted to the Department by May 4, 2007. (Chanda) 5/24/07: Chanda called John Hushmand (Clark Construction Corp.)and Micheael Veraldi (LIAL) regarding the investigation Summary Report and present site status. Micheal told me all work has been done and he is wating for analytical results. The report will be

MARY BOONE GALLERY (Continued) **S104782023**

submited to DEC for review by 5/31/07. 6/6/07: On 6/5/07, Chanda received a Limited sub-surface site investigation report prepared by LIAL dated May 30, 2007. 6/8/07:Kartik Chanda of DEC reviewed the imited sub-surface site investigation report regarding this spill. The soil samples, grondwater samples and soil vapor samples showed that results is not exceed our NYSDEC and NYSDOH guideline. Chanda discussed with Joe Sun (NYSDEC) regarding the results of soil, groundwater, and soil vapor samples. Based on the information presented to the Department DEC closed this spill case. 6/11/07: Chanda sent a NFA letter to Samual Weinberg, Weinberg Properties and his consultants (John Houshmand, and Miclael Vrraldi) regarding closed this spill case. "

Town:	New York City
Record Added Date:	02/01/2006
Record Updated Date:	12/20/2012
Update By:	JAQUINN
Site Description:	Location: The Site is located at 555 West 34th Street, also known as 400 Eleventh Avenue, between 10th and 11th Avenues in Manhattan, New York City, New York County. Site Features: The property is identified as Block 706, Lot 1 in New York City s tax records and consists of a 37,800 square-foot (1.020 acre) rectangular-shaped vacant parcel. The surrounding urban area consists primarily of retail and commercial business. The Amtrak Railroad tunnel (and easement) runs through the northwest corner of the site. Current Zoning/uses: This site was designated as C6-3 on the NYC Zoning Map 8b which is a general central commercial district. This site is also an e-designation requiring NYCDEP approval. In January 2005, this site was rezoned as part of the City-led Hudson Yards District to allow for commercial and residential uses. The NYC MTA constructed a permanent entrance in the middle of this BCP site for the 34th Street Station of the No.7 Subway Extension. Historic Use: From 1890 to 1962, the site was used for commercial, residential, and manufacturing including a wagon house, black smith shop, electrical supplies and a warehouse. In 1973, the most recent business that covered the entire site was a 2-story commercial communications facility including numerous petroleum underground storage tanks (USTs). Six petroleum spills have occurred at this site between 1990 and 2007. Site Geology and Hydrogeology: The site is approximately 25 feet above mean sea level. Groundwater is 17 feet to 32 feet below ground surface. Surface water and groundwater flow is towards the Hudson River which is approximately 1,500 feet to the west of the site. The subsurface soil profile consists of urban fill overlying sand and silt deposits. Bedrock is located between 15 and 25 feet below grade. Between 2007 and 2012, all soil above bedrock was removed and replaced with clean fill. 12/19/12-DEC signed the Certificate of Completion for this site.
	Not reported
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminant of concern was low level petroleum

WEST 34TH STREET DEVELOPMENT PROJECT (Continued) **S104495666**

	(diesel/gasoline) in soil and in shallow groundwater.
Health Problem:	No site-related contaminants of concern were identified beyond the boundaries of the site, therefore no exposure pathways exist.

Contact Name: JEROME KUNG
DEC Memo: "need to contact either jeff bohlen at envirotrack (631-471-1500) or Jerome Kung at verizon (212-338-6754) to determine what work is being done on the site. No letter has been sent yet. 06/21/05-SR// Spoke with jeff Bohlen(516-807-8983). He will forward all necessary documents to DEC. 10.07.05 Sharif is currently reviewing the subsurface investigation report submitted by Envirotrac. 3/20/06- DEC Piper reviewed tank closure report. As per report and database, there are two historic spills at the property, 9007995 and 9314833. In 1994, two 4K gasoline UST's were removed, and two 3K gasolne UST were installed. Samples collected from the limits of the excavation detected petroleum impacted soils in the vicinity of these USTs. Additonally, 8- 550 gal USTs are located in the basement of the property. These tanks were allegedly closed along w/ the two 4K gal USTs. SVOC's were detected exceeding NYSDEC TCLP guidance values. Spills 9007995 and 9314833 were closed on 8/6/96 after receipt of tank closure reports for the 2 4K USTs and 8- 550 USTs. In June-August 2005, seven (7) MWs were installed on site. Lab analytical revealed VOC's , SVOC's, and metals above TAGM 4046. Note: the groundwater was determined to be slightly to moderately saline. From Jan 6- 11, 2006, Envirotrac removed the two 3K gasoline USTs that were installed in 1994 and constructed of double wall fiberglass. A total of six (6) endpoint samples were collected from the excavation. With the exception of the West sidewall in which 226 ppb of benzene was detected, no other VOC's were detected above TAGM 4046. Additional excavation was performed in the area of the two- 4K UST remote fills and the two- 3K UST remote fills. Analytical results suggest that VOC's were not present above TAGM 4046, however SVOC's were. In additon to the sampling performed in reference to the UST's, soil samples were collected at the base of the Truck Elevator Shaft where it was determined that VOC's and SVOC's were detected above TAGM 4046, due to a bad seal. To minimize any future impact, the seals were replaced and vegetable oil was used in place of pet. based hydraulic oil. As per the report, the property is currently in negotiations to be sold. This party reportedly plans on razing the building and excavating to bedrock. ~45 feet bgs. In the meantime Envirotrac recommends quarterly sampling of the MW network. Referred to K. Tang 3/21/06 - reviewed the tank closure report. Soil and GW contamination is minimal, max GW VOCs is ~200 ppb and only one side wall sample is slight above TAGM 4046. Spill closed. - KST"

DEC Memo:	"Spill Case is part of a long term Brownfields project. March 2009: As part of the Site BCP Project, all the on-site soil was removed to bedrock during the fall of 2007. During this process, an unknown UST was discovered and reported as Spill No. 0706755. The UST was decommissioned and properly removed from the site during the soil removal activities and therefore this Spill is closed. J. durnin "

From: Seth D. Friedland Sent: Tuesday, June 07, 2011 12:46 PM To: 'bkfalvey@gw.dec.state..ny.us' Cc: Seth D. Friedland Subject: 521 West 23rd Street, NYC -- DEC Spill No. 1010869 - PBS No. 2-304158 Brian: Thanks for taking the time to discuss the above matte this morning. As mentioned, I represent the Steven Kasher Gallery which is the ground level tenant at the condominium building which is the subject of the above PBS case. Our client operates a gallery at the location, and the tank is suspected of being buried under the gallery floor. To accommodate our client s business requirements and to avoid undue disruption of our client s operations, as discussed, I would like to coordinate the proposed tank closure work to be performed during the month of July on a date or dates to be selected. You indicated that you would be amenable to the work being done in July. I will coordinate with the building manager and its consultant in order to propose the schedule of work and let you know. Should you have any questions, of course, please let me know. Thanks again for your assistance. Regards, Seth D. Friedland Friedland Laifer & Robbins, LLP 62 William Street, Third Floor New York, New York 10005 Tel. 212.344.1400 x. 202 Fax 212.344.8735 email: sfriedland@friedlandlaifer.com This message and any attachments are solely for the use of the intended recipient(s). to be used, and cannot be used, by any taxpayer for the purpose of (1) avoiding tax-related penalties under the U.S. Internal Revenue Code or (2) promoting, marketing or recommending to another party any tax-related matters addressed herein. 7/27/11 Received call from Rich Lovato of Advanced Site Restoration. Phone: (646)235-4800 and (212)809-1110. Contractor for gallery owner. Tank passed and lines failed ttt. I told him he needs to delineate contamination. He will send work plan. bf 8/14/12 PBS inspection today. Tank is still in use based on the petrometer which shows that there are approximately 1400 gallons of fuel in the tank. NOV issued and sent to William Harra at the above address. PBS settlement conference scheduled for 9/19/12. bf 9/19/12 Nopbody appeared for the PBS conference scheduled for today. bf 9/25/12 Today, received e-mail response from Riteway, contractor for the facility: Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. From: David Chan [mailto:david@petroleumtek.com] Sent: Tuesday, September 27, 2011 3:34 PM To: 'Brian Falvey' Subject: spill 1010869 Hi Brian, Please find the closure report and supporting documentation for spill # 1010869. If you have any questions please do not hesitate to ask. Best regards, Dave Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718-855-7272 phone 718-855-7244 fax david@petroleumtek.com ----------end---------- 10/1/12 On 9/25/12 received the following e-mail from David Chan of rite-way that also included attachments: site sketch, analytical sample results, closure requerst letter, and ttt tank only test report. ----------start---------- Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. ----------end---------- On 9/28/12, received the following e-mail from David Chan which included the same attachments as the 9/25/12 e-mail: ----------start---------- Hi Brian.... ----------end---------- Tank failed because of hole in vent line. Submitted photos show the vent line with a corrosion hole and no visual contamination. Four samples were taken and were below DER- 10 allowances. A tank system test is required to close the spill case. today, responded to Mr. Chan's e-mail with the following: ----------start---------- David, The spill case can not be closed until the Department receives a passing tightness test for the whole system. The owner needs to correct the following registration information: 1. The product stored is #4 oil not #2 oil. 2.The tank overfill prevention is registered as a gauge. A gauge used for overfill prevention is only applicable to aboveground tanks. 3. The tank spill prevention is a catch basin. It is registered as none. 4. Pipe secondary containment is blank. The information correction application is attached. There is no fee for this application transaction and an original copy must be submitted (fax or e-mail copies will be returned unprocessed). Brian ----------end---------- bf 11/13/12 received the following e-mail from David Chan: Dear Brian, Please find the final tank and system test verifying the integrity of the system for the spill closure. I am following up with the owner with regards to their PBS. Please let me know if you need anything else for the closure. Thank you in advance. Best regards, David Chan Riteway Tank

DER Facility ID: 296101
DEC Memo: "Sangesland sent contaminated soil letter Curt Schmidt said that Mark Tibbe knows about a major spill site just upgradient from this site. 2/5/03 - TRANSFERRED FROM SAWYER TO ROMMEL 3/1/04 Reassigned from Rommel to K Foley. Spill Remediation Plan received 12/22/03 for removal of four 260gal gas USTs, one 500gal gas UST, and one 500gal no. 2 fuel oil UST. Site under development but once contained three buildings. A former auto service and plastic manufacturing existed on site. Five USTs from NW corner were removed 9/29/03 (four 260gal gas USTs and one 500gal gas UST). Soil excavation was postponed due to safety concerns. Will excavate and direct load for disposal. A minimum of four post-ex samples will be collected at PID hot spots on each sidewall. DTW is 6'bgs and therefore a bottom sample will probably not be feasible. If there is potential for structural damage to the adjacent building, two soil samples will be collected from that sidewall. Two samples will be collected from sidewalls greater than 20' in length. Analysis by VOCs (8021) and SVOCs (8270). Spill #9704542 was previously reported for a fuel oil release from UST. Scaled site map with former tank locations/hot spots and Phase I and II reports. There have been site investigations and proposed remediation plans submitted for 543-547 West 23rd St (spill #8605848). There is documented fuel oil and gasoline contamination of groundwater associated with sites to the east that have encroached upon the site. Mendon Leasing, 527 W 23rd file(#9605688,9808740,9511782, 9513588). 3/22/06 Reassigned from Foley to Tang. (KMF) 4/3/06: Reassigned to Andersen. Three sources of contamination: Fuel oil leak from a UST in northeast corner. Gasoline leak from five USTs in northwest corner. Gasoline groundwater contamination from adjacent Mendon Leasing site. All six tanks were removed by Fleming Lee Shue (FLS). The tank closure report was not received. Spoke with FLS and they will resend a report that was sent to Albany. 4/7/06: Received and reviewed tank closure report. Soil was excavated from three areas of contamination. Residual SVOC contamination from urban fill and VOC contamination from the adjacent spill site is present. The site will be redeveloped with a vapor barrier. NFA letter sent. "

Update By:	JEBROWN
Site Description:	Location: The site is located at 509-527 West 34th Street, 435 Tenth Avenue and 510 West 35th Street in the Borough of Manhattan, City of New York in New York County. The site is comprised of three separate lots (i.e., lots 17, 20 and 29 of Block 706) and is approximately 1.43 acres in size. Site Features: Lot 17 is approximately .07 acres and is vacant land. Lot 20 is approximately .49 acres and is entirely covered by a four-story structure, with a partial basement. The building is utilized as a parking garage, photography studio, artist studio, elevator services and mixed office and warehouse space. Lot 29 is approximately 0.87 acres in which the entire lot is a paved parking lot utilized for commercial truck rental and parking. Current Zoning and Land Use: The site is currently used for commercial purposes, and is zoned C6-4. C6 districts permit a wide range of high-bulk commercial uses requiring a central location. The C6-4 district, typically mapped within a major business district, has a maximum floor area ratio (FAR) of 10.0 or 15.0, exclusive of any bonus. Past Use of the Site: Historical uses include an iron and brass foundry, and then a parking garage (Lot 20), a hatter s fur cutting company (Lot 29), and an electrical conduit company (Lot 17). Site Geology and Hydrogeology: Bedrock is present beneath the site at depths ranging from three to 18 feet below grade. A fill layer comprised of sand, gravel, boulder, concrete, and brick fragments is present from grade to bedrock and is underlain by a 3 to 6 foot thick native glacial silty sand in the western portion of the Site. Groundwater was encountered at a depth of approximately 12 feet.
Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE/SANGESLAND 12/10/2002 Sangesland reviewed a report prepared by David Winslow of ATC Associates Inc (212-353-8280). Report states that contamination was found around a buried 1000 gal tank under the floor of the building. The tank was cleaned out and excavated around. Because of foundation issues, the tank could not be removed and not all of the contaminated soil could be removed. Based on the soil conditions, Sangesland requested goundwater samples from the area. ATC took four groundwater samples in the area of this tank. GW is at approx 8 ft below the cement floor level. 3 of 4 samples are clean. One has some VOC hits just over 8020. Based on the location and the inability to excavate further, and that the surrounding water samples were clean, we can conclude that the contamination is localized and not spreading. Spill closed "

Site Description: Location: The LIRR West Side Yard Site (site) is located at the southeast corner of 12th Ave and W 33rd St in midtown Manhattan. This is the northwest corner of the Long Island Railroad's West Side Yard (WSY), where commuter trains which have discharged at Penn Station are stored for their next outbound trip. The West Side Highway lies immediately to the west. The northern end of the High Line Park traverses part of the site. Site Features: The site is largely flat, and is almost completely filled with railroad tracks. Small maintenance buildings are present along the western ends of the storage tracks. Current Zoning and Land Use: The WSY is currently used for the storage of passenger trains. Periodic and routine cleaning and washing of the interior of the passenger train cars is performed. The site is zoned for commercial use. Past Use of the Site: The WSY has been utilized for railroad operations for over 100 years. Currently and historically, the LIRR has not stored any petroleum products in tanks or bulk containers in the western portion of the WSY, nor has maintenance activities involved the use of petroleum products. This site was previously reported to and investigated under the Spills program as spill no. 0407411, beginning late 2004. Contamination was discovered in a soil boring on the site during a Phase II Environmental Site Investigation of the WSY for the NY Jets organization, which was then reported to the DEC. Site Geology and Hydrogeology: The northwest corner of the WSY is immediately underlain by a layer of historic fill, approximately 20 to 30 feet thick. Site contamination appears to have been co-deposited with this fill, which was used to extend the Hudson

LIRR WEST SIDE YARD (Continued) **S113916804**

River shoreline westward circa 1900. Below the historic fill exists a native low permeable silty clay to clay unit. Groundwater is present beneath the WSY within the urban fill at a depth of approximately 5 to 7 ft bgs, flowing in a northwesterly direction .

Env Problem: Nature and Extent of Contamination: Prior to Completion of Remediation Based upon investigations conducted to date, the primary contaminant of concern is coal tar. Soil- The most significant visual evidence of contamination, including staining, hydrocarbon and naphthalene-like odors and elevated PID readings, was observed within the fill deposits in soil borings SB-05 through SB-08, between 15 and 40 feet below grade, and starting at least 10 to 20 feet below the water table. Seventeen of the 20 subsurface soil samples exhibited detectable concentrations of PAHs, with total PAH concentrations ranging from 0.3 ppm in SB-03 (20.5 - 22.5 feet) to a maximum of 1,818 ppm in SB-05 (25 - 27 feet), adjacent to the West Side Yard along the east side of 12th Avenue in the vicinity of the historic observed area of contamination. This sample had visual evidence of contamination, which also exhibited the highest BTEX concentration, but were below the Industrial Use SCOs. Soil samples from SB-06 (21 - 23 feet) and SB-08 (30 - 33 feet) were sent for forensic fingerprint analysis. The analysis suggests that the sample contained pyrogenic material derived from coal and not petroleum, and the PAH distribution was very similar to tars formed from MGPs utilizing carbureted water gas processes. Groundwater- NAPL was not identified in any of the groundwater monitoring wells. However, six of the 17 groundwater samples identified BTEX and PAH compounds at concentrations above Class GA standards. These samples were collected at or in the vicinity of soil borings which exhibited soil contamination and were screened at a depth intercepting the zone of soil contamination observed at 15 to 40 feet below grade. Off-site wells demonstrate that this contamination is not migrated farther off-site. Soil Vapor and Indoor Air- Soil vapor and indoor air have not been evaluated.

Health Problem: As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

Update By:	SXDEWES
Site Description:	Location: The Site is located in an urban area, in a mixed use area of the West Chelsea section of the Borough of Manhattan. The site is comprised of four tax lots (0.73 acres and approx. 31,820 SF) identified on New York City tax maps as Block 694, Lots 5, 60, 61 and 65. In addition to 555 West 22nd Street, the site is also known as 548 West 23rd Street (Lot 60), 552 West 23rd Street (Lot 61) and 170 11th Avenue (Lot 65). The Site is bounded to the north by West 23rd Street, to the east by commercial/residential buildings and 10th Avenue, to the south by West 22nd Street, and to the west by 11th

555 WEST 22ND STREET (Continued) **S118950495**

Avenue. Site Features: The Site is improved with multiple connected one-to-three-story brick buildings used entirely by U-Haul as a retail and commercial U-Haul facility which consist of the following uses: vehicle rental, vehicle washing (hand), parking, moving supply retail, and mini-storage unit rental. An asphalt paved lot, facing 11th Avenue, is used for truck storage. Current Zoning and Land Use The site is zoned C6-3, C6-3A (Commercial) and M1-5 (Manufacturing) as part of the Special West Chelsea District. Per the NYC Planning website, "The Special West Chelsea District (WCh) provides a regulatory framework for the continued development of a dynamic mixed residential and commercial area centered around the public open space created by reuse of the High Line, a former elevated rail line running north-south through the length of the district." The site is currently an active U-Haul facility. Adjacent properties include mixed use commercial/residential to the north, industrial/manufacturing and commercial/residential to the east, office space and commercial/residential to the south and the West Side Highway to the west. Past Use of the Site: Historic Site uses included: lumber yard, iron works, garage, automotive repair services, chemical storage and storage and dispensing of petroleum products. It is unknown whether U-Haul continued to dispense gasoline after taking title to the property in the late 1970 s/early 1980 s. Currently, no vehicle repair or fueling takes place onsite. Site Geology and Hydrogeology: The Site consists of fairly level land and is located approximately 7 feet above sea level (NAVD 88). The subsurface consists of an approximate 8-9 foot thick layer of historic fill material, followed by sand and gravel deposits. Depth to water is approximately 8-9 ft below ground surface. Based on the proximity to the Hudson River groundwater is expected to flow to the west.

Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 8/2001-Tank closure report prepared by Franklin Company Contractors. 6/29/2001-Franklin implemented bioremediation by mixing 240lbs of ORC with surrounding soils and filling in excavation. 500 gallons of Waste stream technologies W-4 bio-blend mixture also injected.. Site was bakcfilled with 3 to 6 feet of clean fill, 6 inches of crushed stone and an 8-mil polyethylene vapor barrier. Area was then covered with 6 inch reinforced concrete slab. Soil VOC pass TAGM, soil SVOC exceed TAGM but are due to fill composition. Site visit by Jacob Krimgold showed no visual evidence of contamination. Groundwater VOC and SVOC also pass TAGM. 12/13/2001 Spill closed as

ENG CONTROLS:

Site Code: 475372
HW Code: C231080
Control Code: 15
Control Type: ENG
Date Record Added: 10/03/2016
Date Rec Updated: 12/21/2016
Updated By: RXSCHICK
Site Description: Location: The site is located at 511 West 21st Street in Manhattan, NY. The property is bounded by West 21st Street to the south and West 22nd Street to the north between 10th Avenue and 11th Avenue in Manhattan. The property has frontage on the north side of West 21st Street and the south side of West 22nd Street. Site Features: The site is approximately 0.45 acres in size, is currently an active construction site and there are no site occupants. The property is flat with average elevation approximately 10 feet above mean sea level and the elevated High Line Park runs along the eastern property boundary. Current Zoning and Land Use: The area is zoned for manufacturing and commercial use, and the City's zoning code for the site is M1-5. Past Use of the Site: The site has been used for manufacturing by a gas meter company and also as a service station.

TIME WARNER CABLE (Continued) **U003074535**

	Most recently it has been used by a television cable company for vehicle parking and maintenance, storage and offices. Site Geology and Hydrogeology: The site is underlain by 13 to 17 feet of man-made/historic fill. Native soils beneath the fill layer consist of organic silty clay of estuarine origin as well as sand and silt of glacial origin. The depth-to-bedrock varies from approximately 33 feet below grade at the northern end of the site to 65 feet below grade at the southern end of the site. The depth-to-groundwater at the site is approximately 6 to 7 feet below sidewalk grade and the local groundwater flow direction is to the southwest.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included metals, semi-volatile organic compounds (SVOCs), and volatile organic compounds (VOCs)in soil and /or groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan (SMP) will be implemented to manage remaining contamination in the future. An environmental easement will limit the future use of property, restrict the use of groundwater and require compliance with the SMP. All engineering controls (e.g., soil cover/cap) of the remedy will be operated and maintained under the SMP.
Health Problem:	Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination that remains on-site.

Site Code: 475372
Site Description: Location: The site is located at 511 West 21st Street in Manhattan, NY. The property is bounded by West 21st Street to the south and West 22nd Street to the north between 10th Avenue and 11th Avenue in Manhattan. The property has frontage on the north side of West 21st Street and the south side of West 22nd Street. Site Features: The site is approximately 0.45 acres in size, is currently an active construction site and there are no site occupants. The property is flat with average elevation approximately 10 feet above mean sea level and the elevated High Line Park runs along the eastern property boundary. Current Zoning and Land Use: The area is zoned for manufacturing and commercial use, and the City’s zoning code for the site is M1-5. Past Use of the Site: The site has been used for manufacturing by a gas meter company and also as a service station. Most recently it has been used by a television cable company for vehicle parking and maintenance, storage and offices. Site Geology and Hydrogeology: The site is underlain by 13 to 17 feet of man-made/historic fill. Native soils beneath the fill layer consist

TIME WARNER CABLE (Continued) **U003074535**

of organic silty clay of estuarine origin as well as sand and silt of glacial origin. The depth-to-bedrock varies from approximately 33 feet below grade at the northern end of the site to 65 feet below grade at the southern end of the site. The depth-to-groundwater at the site is approximately 6 to 7 feet below sidewalk grade and the local groundwater flow direction is to the southwest.

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included metals, semi-volatile organic compounds (SVOCs), and volatile organic compounds (VOCs)in soil and /or groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan (SMP) will be implemented to manage remaining contamination in the future. An environmental easement will limit the future use of property, restrict the use of groundwater and require compliance with the SMP. All engineering controls (e.g., soil cover/cap) of the remedy will be operated and maintained under the SMP.
Health Problem: Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination that remains on-site.

Site Code: 475372
Site Description: Location: The site is located at 511 West 21st Street in Manhattan, NY. The property is bounded by West 21st Street to the south and West 22nd Street to the north between 10th Avenue and 11th Avenue in Manhattan. The property has frontage on the north side of West 21st Street and the south side of West 22nd Street. Site Features: The site is approximately 0.45 acres in size, is currently an active construction site and there are no site occupants. The property is flat with average elevation approximately 10 feet above mean sea level and the elevated High Line Park runs along the eastern property boundary. Current Zoning and Land Use: The area is zoned for manufacturing and commercial use, and the City's zoning code for the site is M1-5. Past Use of the Site: The site has been used for manufacturing by a gas meter company and also as a service station. Most recently it has been used by a television cable company for vehicle parking and maintenance, storage and offices. Site Geology and Hydrogeology: The site is underlain by 13 to 17 feet of man-made/historic fill. Native soils beneath the fill layer consist of organic silty clay of estuarine origin as well as sand and silt of glacial origin. The depth-to-bedrock varies from approximately 33 feet below grade at the northern end of the site to 65 feet below grade at the southern end of the site. The depth-to-groundwater at the site is approximately 6 to 7 feet below sidewalk grade and the local groundwater flow direction is to the southwest.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included metals, semi-volatile organic compounds (SVOCs), and volatile organic compounds (VOCs)in soil and /or groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan (SMP) will be implemented to manage remaining contamination in the future. An environmental easement will limit the future use of property, restrict the use of groundwater and require compliance with the SMP. All engineering controls (e.g., soil cover/cap) of the remedy will be operated and maintained under the SMP.
Health Problem: Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination that remains on-site.
Dump: False

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 12/9/03 TJD Reassigned Demeo greater than greater than greater than Rommel. 11/23/05- Obligado - Spill transferred from Tang to Obligado 11/29/05 - Obligado - From Caller Remarks: UNDER GROUND PRODUCT LINE WAS FOUND TO BE LEAKING. CONTACT PERSON WAS NOTIFIED OF THIS WITH THE RECOMMENDATION TO EXCAVATE AND REPAIR . No files were found to document repairs or tests. Review PBS records - PBS# 2-285919 listed for site. Site has one 2000 gallon #2 fuel oil AST, two 4000 gallon gasoline USTs, one 550 gallon and two 275 gallon other ASTs. Time Warner Facility Manager Phone # (212) 598-7357 11/30/05 - Obligado - call Time Warner at number listed above. No answer. 12/15/05 - Obligado - called again, no answer. Called Dave Greffinius (consultant for neighboring property) to see if he was able to get any facility information for Time Warner building. 12/19/05 - Obligado - voice mail from Greffinius (12/15). Gave contact names and a phone number for Time Warner Facility: Frank Soto, Barry Rosenblume, and Tom Lonst (212) 379-2852 12/20/05 - Obligado - tried calling above listed number, appears to be a wrong number. 12/28/05 - Obligado - Site visit. Contact information for manager - Terrence Charlton (212) 598-7358. Called, spoke with secretary, Terrence Charlton on vacation, will call back next Tuesday. 1/3/05 - Obligado - Called Terrence Charlton. He does not know anything about spill. He will contact the Operations Manager - Britt Wenzel. Tell him the DEC requires information regarding the tank failure, if repairs were made, if soil/gw was impacted, if tanks were retested. 1/4/05 - Obligado - Received phone call from Abbas - engineer from Time Warner. Gave him my contanct info with instructions to send/fax any files he had regarding this spill number. 1/19/05 - Obigado - Call Abbas Family (718-474-3400) to inquire about documents. Left message. Abbas called back, he will send the information the beginning of next week. 3/31/06 - Obligado - Review documents sent by Abbas, received by Department on 1/25/06. Documents installation of new fill box in 1999 and 2002, and passing tightness tests in 2004 adn 2005. Documents do not shed any light on

TIME WARNER CABLE (Continued) **U003074535**

spill incident reported by Crompco on 12/15/00. Call Mr. Abbas and he said he will research the file for more information. He requested a spill report. I will email the spill report so he can find pertanent information. 5/5/06 - Obligado - Received additional documents. 5/11/06 - Reviewed documents. Corrosion in fill port pipe, caused leak to soil, soil excavated to 2 ft bgs. No mention of endpoint soil sampling. Send letter to Time Warner requiring soil boring investigation and collection of gw sample from below line where leak occured. 5/16/06 - Obligado - Delivery confirmation on 5/13/06 6/6/06 - Obligado - Received Limited Subsurface Investigation Report, submitted by Fenley and Nicol Environmental. Three soil borings advanced. Refusat at SB1. Soil impacts above TAGM at SP-2@10 ft, SP-3@5 ft, and SP-3@10 ft. Greates contamination at SP3 with 93,000 ppb MTBE and 2,242 ppb benzene. Recommends lateral and vertical extent of impact be delineated including offsite sampling. After delineation a Remedial Action Workplan will be submitted. 6/20/06 - Obligado - Phone conversation with Kristin Dillner 631-586-4900. She will email a workplan for additional delineation. Obligado - received workplan approved with minor changes. Required one soil boring to be moved closer to former remote fill area and collection of 3 ground water samples. One from previous soil boring area above, one from remote fill area, and one inbetween the dispensers. 8/7/06 - Obligado - Received Limited Subsurface Investigation Report, submitted by Fenley and Nicol Enviornmental. Six soil borings, 3 ground water samples collected from temporary well points. Ground water impacts detected at all 3 gw samplng points. Greatest soil and ground water impacts detected west of dispensers and southwest of UST field (TW1/SB4). GW results in ppb from TW1 show 7327 benzene, 41,697 toluene, 2783 ethlybenzene, ~23500 total xylenes, 321,467 MTBE. 8/21/06 - Obligado - Phone conversation with Kristin Dilner from F&N. Told her that permanent monitoring wells needed to be installed, the plume would need to be delineated, and a RAP submitted. I told her I would send Abbas a Stipulation agreement this week. 8/28/06 - Obligado - Sent STIP to Azzaro. Due date for signature is 9/25/06. CC to Dilner and Abbas Family. 90 days for ISR and 60 days for RAP. 8/31/06 - Obligado - Received delivery confirmaiton of Stip Agreeement. 10/10/06 - Obligado - Signed STIP received by Department on 9/26/06. CAP has been modified and signed by RP. Called Abbas to schedule a meeting to discuss. 11/1/06 - Obligado - Had a meeting with Sal Azarro, Manfred Bohms, Abbas Family. Discussed scope of work. UST excavation will probably take place in May 2007. They can proceed with monitoring well installation in meanwhile. I will send them another CAP with modifications based on discussions. 11/22/06 - Obligado - Email from Abbas with another revised CAP. After review the CAP looked acceptable. I attached it to the STIP and and emailed it as a final version back to Abbas requesting signature by 12/2/06. 11/27/06 - Obligado - Signed STIP received by Department. 12/4/06 - Obligado - Stipulation Agreement executed by Oliva 1/17/07 - Obligado - Called Manfred Bohms to discuss the status of project. He said 4 wells were installed, 2 onsite and 2 in the sidewalk. He is trying to gain access to the other sidewalk wells to sample. He will need a 2 week extension and will send an email request. 2/27/07 - Obligado - Received a letter from Abbas Family of Water Gorman engineers. The letter documents ground water results from 4 monitoring wells that were installed. Requests to collect samples from sidewalks in front of adjacent buildings. Upon the sampling and testing of the groundwater from the neighboring premises they will submit

TIME WARNER CABLE (Continued) **U003074535**

investigation report. 3/16/07 - Obligado - Abbas Family asked to get access to wells in sidewalks infront of 521 and 510 w. 21st street to do ground water sampling and guaging. Since this would help to allow a more accurate picture of ground water conditions in the area I sent a letter to Guy Roberts and to the owner of Sorage USA and asked for them to grant access to Time Warner to do the work. 4/17/07 - Obligado - Email from Greffinius from Delta stating they would grant access but asked to be copied on analytical results. 4/18/07 - Obligado - Spoke with Jessica from Gannette Fleming. She said they will be doing a tidals study on using the wells in the sidewalk and they would not be collecting samples. I forwarded this information to Greffinius. Additioanlly, Jessica said I should expect a report by May 31 and UST excavation in June. 5/9/07 - Obligado - Recevied a phone call from Andy Rudko of AKRF, 646-388-9526, who is working for a party looking to purchase the site from Time Warner and had some questions. I didn't give him any details, but that Time Warner signed a Stipulation agreement and I am waiting for an investigation for well installations. 5/14/07 - Obligado - Spoke with Abbas Family. He said project has been delayed because the new facility where Time Warner Cable will be moving to in Brooklyn is not ready yet. He will send a letter stating the same. They surveyed all the wells to get a ground water flow map. 5/18/07 - Obligado - Received a progress reprot letter. Delays have been incurred at new Time Warner facility in Brooklyn. So Time Warner will vacate the 21st street faciliity by the end of August. At that time the USTS and piping will be removed. Called Abbas, asking him when I will receive a report of all the investigation activities. He said 3-4 weeks. I told him I needed the report sooner than that. He will talk to Time Warner to expedite the report. 7/19/07 - Obligado - Reviewed documents entitled Investigation Summary Report , dated February 27, 2007, Update on CAP s Milestone and Monitoring Well Survey Report , dated June 11, 2007, and Monitoring Well Survey and Tidal Study , dated June 8, 2007. The documents summarize investigation activities performed to delineate soil and ground water contamination. After review of documents sent a letter to Time Warner requiring the following by Nov 1, 2007. 1) Quarterly Ground Water Monitoring - Collection of ground water samples for laboratory analysis from monitoring wells GF-MW1 through GF-MW4 and monitoring wells R-MW-1, R-MW-3, and either R-MW2 or R-MW-9. 2) Additional Delineation - Due to the extremely high concentrations of BTEX and MTBE in ground water, the Department requires installation and sampling of 3 additional monitoring wells to delineate the areal extent of the contaminant plume. One monitoring well must be installed in the north sidewalk of 21st street approximately 45 ft west of GFMW-2 to determine the down-gradient extent of plume and the extent to which the plume from Time Warner site is impacting other properties. One monitoring well must be installed north of GFMW-1 to delineate the areal extent of plume in the cross-gradient direction. One monitoring well must be installed northeast of GF-MW-4 to establish up-gradient background ground water conditions. 3) Summary of UST Removal - Documentation of the UST system and contaminated soil removal and endpoint sampling results must be submitted to the Department. 4) Remedial Action Plan - A Remedial Action Plan (RAP) should be submitted to the Department. The RAP must contain a plan to remediate residual soil and ground water contamination subsequent to source removal. The RAP must also include an Operation, Maintenance, and Monitoring Plan. If the property is to be redeveloped for a different use, the RAP must state

TIME WARNER CABLE (Continued) **U003074535**

the future intended use of the site and include a Vapor Intrusion Mitigation Plan. 7/19/07 - Obligado - Received call from Abbas Family. He received the letter and he said they would do the work. He asked if they need to do ground water remediation. I told him yes. He said the deadline might be hard to meet but he would let me know later. 10/19/07 - Obligado - PBS Violation hearing with DEC Urda and Falvey, Scott Furman (Time Warner attorney), Tradewinds Contractors, and Abass Family. During removal of USTs Brian Falvey visited the site for a PBS Inspection and found several PBS violations. Tank removal was put on hold due to violations, however they did continue to move some contaminated soil found in area of dispenser product lines. They found 2 additional USTs, that will be properly closed. Prior to any excavation, I will visit the site to inspect. A site visit is tentatively scheduled for Thursday November 1. The 4000 gallon USTs were encased in concrete and according to the attorney the tank vault is clean, but I will inspect. They will also core through the dispenser island concrete vaults. 12/4/07 - Obligado - Met on site with Scott Furman and Paul Woodel. The gasoline USTs have been removed as well as some contaminated soil. Endpoint samples only showed one hit for MTBE on eastern sidewall. Bottom was a concrete slab, but I couldn't see it because when they previously cored through the bottom the gw infiltrated up the whole and filled the bottom of the excavation. According to Scott Furman, at no time during work did they notice any sheen or petroleum smell from the water. And the tanks were in good condition. He said they would excavate a little more on the east to try and get clean side walls, then back fill. They showed me two additional excavations in the back of the building, one for a 550 UST of unknown contents, and the other was a suspected UST location which they didn't find any USt. From the 550 USt they took sidewall samples and only found several PAHs, but it appeared to be levels similar to urban fill. After looking at the data I approved backfilling those 2 excavations. The major contamination is in the area around the dispenser and the vent lines, with elevated MTBE and BTEX, in the southwestern corner of the site and the sidewalk. Moving forward they will 1) excavate a little more on eastern sidewall of tank excavation then backfill, 2) install 2 additional wells to delineate the southwest gw plume area, 2) additional excavation to remove as much contaminated soil as site constraints allow around vents and dispensers 3) propose a plan for gw water treatment they may due treatment at time of excavation since soils and gw will be exposed. Since the new tenant plans to build a hotel in 1 years time, timely remediation is required, so we agreed that chem ox might be the best strategy for ground water. They will submit a memo summarizing our discussions. 12/17/07 - Obligado - Received Memo from Woodell via email, detailing above meeting minutes. The memo proposes excavation and chemical injection with regenox. I sent an email to Paul concurring the planned course of action. 1/8/08 - Obligado - Conference call with Paul Woodel and Mark Furman. They are planning to use regenox as chemical oxidant followed by injection of advanced ORC to enhance bioremediation subsequent to chemical oxidation. They will submit a formal RAP today. 1/11/08 - Obligado - Approved RAP. Sent email with RAP approval letter. 1/15/08 - Obligado - Email from Woodel : We have begun the tasks described in the work plan. The holes in the north room have been backfilled. Today I was on site to scrape back the east wall of the gasoline UST excavation in the south room. We took it back an additional 2-3 feet and I collected another sidewall sample. This excavation is also

TIME WARNER CABLE (Continued) **U003074535**

being backfilled. We anticipate that the first test pit between the 2 former dispenser islands will be dug on Friday. 1/28/08 - Obligado - Email update from Woodel - LBG has supervised the excavation of the 2 test pits described in the workplan. Impacted soil and pockets of free-phase product were encountered in the western pit and were removed. The eastern pit contained impacted soil at the water table but there was no free product and no apparent source zone above the water table. Both pits have been extended to their practical limit (interior walls, sewer lines, column footers, etc.). We plan to backfill the level at the water table with stone on Tuesday and apply the chemical-oxidation product Tuesday and Wednesday. 5/14/08 - Obligado - Review UST Closure Report. 2 3000 gallon gasoline USTs, 1 550 gallon 2ASTs, 2 product dispensers, associated piping and 1 oil water separator were removed. Endpoint samples were collected from UST excavations. East wall of gasline UST excavation had MTBE above TAGM. The waste oil UST excavation idicated residual SVOCs adn chromium typical of urban fill thorughout the city. Test pits TP1 adn TP2 were excavated adn 78 tons of contaminated soil was removed and disposed off-site and waste manifests were included. End point sampling from test pits show that gross contamination present at and below the water table. No evidence of the specific source of the contamination was obvious. Contamination above TAGM and limited free-phase product appears to have accumulated around the buried concrete and structural components of th ebuildings. Test pits were backfilled with gravel and chemical oxidation products were applied to the subsurface to promote remediation. Three treatment sumps were installed with 4 diameter slotted screen set 3 ft into water. 1120 lbs of RegenOx adn 150 lbs of ORC were mixed and applied to the gravel backfill on January 31, 2008. On Feb 29, 180 lbs of RegenOx and 75 lbs of ORC were applied. 3 borings and 2 wells were installed at the site. 1st round of smapling will be completed March 10, 2008. Review 1Q08 MOnitoring Report - 5 wells were guaged and sampled. Based on most recent results Max contamination at S3 (former GFMW4) with 2570 ug/L BTEX and 33,000 ug/L MTBE. According to the report, the whole building will be torn down in the summerof 2008. When this occurs LBG will supervise additional soil removal. LBG will inform the NYSDEC of future remedial activities. 9/25/08 - Obligado - review 2Q08 report. Elevated concentration still present in wells. Effectiveness of REgenOx not yet apparent. Max MTBE at 48,000 ug/L. According to report building is still scheduled to be demolished. LBG will inform the DEC of any redevelopment or additional remediation 7/7/09 - Obligado - Review 1Q09 Update Report - S3 and GFMW4 have been destroyed, so there is no monitoring wells in the source area. Downgradient well GFW-1 still has significant impacts. S3 and GFMW4 before destroyed had the max concentrations. Send a letter requiring the installation of additional monitoring wells. Require work plan submission within 30 days. 10/29/09 - Obligado - Review Investigation Work Plan, submitted 8/13/09. The workplan proposes 3 additional wells as requested, however, one of the upgradient is over 100 feet away and to far north. This well won't provide and meaningfull data. SEnt letter requiring relocation of well to the east of the tanks and also revise soil sampling plan so soil sampling begins above the water table. Also requested that they revise the implementation schedule. 6/7/10 - Obligado - I reviewed the revised Investigation Work Plan. The soil sampling plan was modified and the location of the upgradient well was moved to a more appropriate location. I sent a letter via email for approval of the three wells. 8/12/2010 -

TIME WARNER CABLE (Continued) **U003074535**

Obligado - I reviewed the July 2010 Update Report. The report documented the installation of 3 additional monitoring wells and quarterly sampling. Only one soil sample, MW8, had soil impacts with 980 ug/kg MTBE. Maximum BTEX concentrations were found at MW8 with 4100 BTEX. Maximum MTBE also detected at MW8 with 3400 ug/L. the report recommends continued monitoring. I emailed Paul Woodell at LBG and requested a BTEX plume map on future reports. 10/11/11 - Obligado - I emailed Paul Woodell to inquire about the status of the monitoring. I received a phone call from Sean Groszkowski of LBG ((914) 694-5711) who is now managing the project. He said they are planning to do another chemox event using REgenOx. I asked him to send me a work plan as well as any monitoring reports since July 2010. 11/9/11 - Obligado - I reviewed a plan to do additional chemical injections at the site. They plan to do injections via geoprobe. They proposed 10 injection points using Regenox and ORC advanced. I gave approval to proceed with the additional injections. I also had a conference call with Sean Groszkowski (LBG), Scott Furman (time Warner attorney), and repsensentatives of a potential purchaser, Arnie Fleming (consultant) and Karen of Kramer LEvin (attorney). We discussed the pending injections and the planned purchase and redevlopment. A purchaser plans to redevelop the property as an office building. They will use and reinforce the existing structure, as well as add several floors. The building will not have basement. They will install a vapor barrier and SSDS. The planned start for the work is 6 to 9 months. I recommended Time Warner to try and treat the soil and ground water as aggressively as possible prior to starting the development. They concurred. The injections are scheduled to begin tomorrow (11/10/11). 11/16/11 - Obligado - I spoke with Sean. The injections went well. All the material was accepted. They plan to sample again in December. According to Sean I will receive a report documenting baseline sampling in early December. 1/17/12 - Obligado - Meeting with Time Warner, LBG, FLS, DEC, and the site developer. They will continue with current strategy but DEC will require additionl remedial actions if not effective. 1/19/12 - Obligado - DEC, LBG, Albanese, meet on site to go over injection locations. We discussed potential remedial options for soil under footings. We also discussed installation of a well immediatley down gradient of footers in TP2 to monitor effects of residaul source on gw concentrations. According to LBG, multiple refusals were encountered in downgradient plume area. DEC recommended evaluating alternate injection approaches. 1/27/12 - Obligado - I sent a letter to Time Warner ccing all parties in meetings describing DEC requirements: 1) additional well downgradient of footer area 2)evaluate alternate remedies for residual source 3) alternate injection strategy in plume area due to refusals. 3/5/12 - Obligado - I received 4th Quarter 2011 report. The report documents baseline sampling on October 28, 2011, 1st chemical injection on November 10 and 11, 2011, fourth quarter sampling on December 27, 2011, and the 2nd chemical injection on December 28 and Jan 3 2012. The report documents a spike in BTEX concentrations following the 1st chemical injection, which may represent release of adsorbed contaminants from the soil. They will continue monitoring. 5/8/12 - Obligado - I emailed Sean Growzkowski to inquire when I would receive 1st Quarter sampling results. He indicated 1 to 2 weeks. 7/16/12 - Obligado - I received the 1st Quarter Sampling report. MW10 was installed downgradient of the excavated area. Gross contamination was present in soil. 38000 ug/L BTEX and 53,000 ug/L MTBE found in MW10

TIME WARNER CABLE (Continued) **U003074535**

groundwater. 42 ppm BTEX and 27 ppm MTBE was found in soil. I sent an email to LBG with a cc to FLS and Albanese requiring a remediation plan within 30 days to indicate whether they plan to continue with chemox or try alternate methods. 7/17/12 - Obligado - recieved an email from LBG Sean Groqzkowski including 2nd Quarter 2012 data which showed significant ground water improvement in MW10. BTEX reduced 98%. LBG requesting determination on need for new plan to be delayed until review of 3rd Quarter 2012 data. 7/24/12 - Obligado - sent an email deffering requirement for new plan until review of the 3rd quarter data. 12/17/12 - Obligado - received and and reviewed 3rd Quarter results. BTEX concentrations rebounded to over 15,000 ug/L, including 5,400 ug/L benzene. I sent a letter to Time Warner requiring a new RAP within 60 days. 12/24/12 - Obligado - DEC receives notification letter of BCP application from Sive Paget. BCP Site No. C231080. 04/29/2013 - Spill transferred from Obligado to Perez-Maldonado. Property Owner applied to the BCP (Site #C231080) to address environmental issues at the site. Spill administrative closure pending to implementation of a remedial program to address contamination in connection with this spill. 11/15/2013 - Remedial Investigation Work Plan have been approved. Remedial investigation ongoing under the BCP program(511 West 21st Street Site, Site ID C231080). (Perez) 03/31/2015 - BCP Site (511 West 21st Street Site, Site ID C231080) Remedial Action Work Plan (RAWP) have been approved. 04/03/2016 - Field work in connection the approved RAWP ongoing. (Perez) 03/30/2017 - Construction of the on-site BCP remedy completed on October 2016 and CoC issued on December 2016. Post-remedy groundwater sampling event scheduled for the first quarter of 2017. (Perez) ** Note: The Department will keep this spill case open until BCP site post-remedy groundwater monitoring program confirm that there are no off-site groundwater impacts. (Perez)"

DEC Memo:	"11/05/14-Hiralkumar Patel. alternate address: 314-322 West 30th Street no other spills found. PBS #: 2-332607. as per PBS record, the site has one 6,000 gal #6 oil AST in vault, in-service, installed in Jan. 1965. as per NYC DOB record, a permit application was approved on 01/23/14 for replacement of oil burner with gas/oil burner and change of fuel oil grade from #6 to #2 oil. Chelsea Town LLC. **property owner** c/o Hoffman Management 300 West 55th Street, Suite 2S New York, NY 10019 Attn.: Mark Hoffman PH. (212) 247-4975 email: mhoffman@hoffmgt.com 11/06/14-Hiralkumar Patel. 9:20 AM:- spoke with Chris at All Boro. the tank was emptied out and cleaned as part of grade conversion from #6 to #2 oil. prior to filling up the tank with #2 oil, tank system was tested which failed. immediately, technician conducted an isolation test of tank only and it failed. technician found crack in epoxy coating inside the tank. All Boro will do further investigation. Chris mentioned that 15% of the tank is in contact with surface. 9:42 AM:- sent TTF letter to Mr. Hoffman requiring report submission by the end of 12/19/14. letter emailed to Mr. Hoffman and Chris. 12/18/14-Hiralkumar Patel. 2:18 PM:- spoke with Chris. he will call back. 3:22 PM:- received call from Chris. currently the tank is empty and owner has decided to remove the tank system once a new natural gas heating system is installed. the new gas system may be installed by the end of Jan. 2015. 3:50 PM:- received email from Chris including above discussion about gas system installation and tank system removal. 04/16/15-Hiralkumar Patel. 10:09 AM:- left message for Mr. Hoffman inquiring update. 12:57 PM:- received call from Chris. he mentioned that a new gas line was installed two weeks ago and he got approval to remove the tank. he will provide work schedule soon. 10/26/15-Hiralkumar Patel. 1:22 PM:- received email from Chris including pics of tank room. he mentioned that tank has been removed. he will remove residual contamination noted underneath the tank and will collect endpoint samples.

TANK TEST FAIL (Continued) **S117364572**

12/28/15-Hiralkumar Patel. 10:49 AM:- received email from Chris including result of three soil samples. based on chain-of-custody, three soil samples were collected. found VOC contamination in all three samples. Chris asked if further remediation needed. soil sample results: ----------2 ft Front Head----2 ft Rear Head-----Center
Ethylbenzene----------210
Xylene----------410----------2,110----------400
1,2,4-Trimethylbenzene----------1,000----------12,000----------2,800
1,3,5-Trimethylbenzene----------380----------3,400----------760
Naphthalene----------440----------4,000----------1,200 10:58 AM:- sent email to Chris. informed him that based on submitted lab report, the department requires further remediation, if practical. 12/30/15-Hiralkumar Patel. received email from Chris (at 6:00 PM on 12/29/15). they will begin remediation on 01/04/16. 01/08/16-Hiralkumar Patel. 2:25 PM:- spoke with Chris at All Boro. they started remediation of remaining contamination on 01/04/16 and will finish work by next week. 01/20/16-Hialkumar Patel. 10:57 AM:- received email from Chris including some site pics. 02/16/16-Hiralkumar Patel. 11:17 AM:- received email from Chris including some site pics. 03/01/16-Hiralkumar Patel. received email from Chris (at 10:31 PM on 02/29/16) including results of five soil samples. out of five samples, minor VOC contamination noted in samples #1 (Head 36 inches deep) and #3 (60 inches deep center). found higher VOC contamination in sample # 5. soil analyticals: ----------# 5 Head 85 inches deep
Toluene----------530
Ethylbenzene----------2,200
Xylene----------19,500
1,2,4-Trimethylbenzene--------38,000
1,3,5-Trimethylbenzene--------11,000
Naphthalene----------6,400 10:11 AM:- sent email to Chris and asked him to submit scaled site map with sample locations. 10:18 AM:- received call from Chris. he is going for site meeting at 11 AM today and get measurements to prepare scaled site map. he mentioned that sample # 5 was taken from bottom of the excavation, towards north end (towards W 30th St) near the building foundation wall. he stated that the most recent tank was located on 12 inches thick concrete pad, so contamination noted below the concrete pad is possibly a result of historical spill at the site which was confirmed by one of the board member. Chris confirmed there are no odor complaints from on-site occupants as tank location is in garage area. as excavation is inside the building and closer to the foundation wall, asked him not to conduct any further excavation. asked him to delineate remaining contamination prior to finalizing remediation action plan. also suggested him to have an inspection by a structural engineer prior to any further excavation. 10:29 AM:- spoke with John at Hoffman Management. informed him that based on available information, the department requires further delineation of contaminated material prior to finalizing a remediation action work plan. suggested him to have a structural engineer inspect the site prior to any further remediation via excavation. John Throumoulos Hoffman Management email: johnt@hoffmgt.com 10:56 AM:- sent email to John and informed him that the department requires further

TANK TEST FAIL (Continued) **S117364572**

delineation prior to finalizing a remedial action plan. suggested him to have a site inspection done by a structural engineer prior to any further excavation. asked him to submit schedule for further investigation and submission of results. email copied to Mr. Hoffman and Chris. 04/06/16-Hiralkumar Patel. received email from Chris (at 10:40 PM on 04/05/16) including result of two soil and one groundwater sample. no contamination noted in samples. 12:06 PM:- received call from Chris inquiring about comments on sample results. he mentioned that boring was installed in area of former endpoint sample location B5. sample B5 was taken at 7 ft below basement level. during boring, they found groundwater at 6 ft below base of excavation (approx. 13 ft below basement floor and approx. 26 ft below street level). asked him to submit a boring log and sketch with location of endpoint samples and recent boring, prior to commenting on sampling results. 04/08/16-Hiralkuamr Patel. received email from Tom (at 4:09 PM on 04/07/16) including site sketch, boring logs and some pics. as per the sketch, five borings were installed through excavation, but two soil samples were collected only from one boring (B5). the submitted sketch is missing location of endpoint samples collected previously. 2:27 PM:- sent email to Chris and Tom and asked them to submit site sketch with location of endpoint samples and recent borings. 04/27/16-Hiralkumar Patel. received email from Tom (at 5:48 PM on 04/26/16) including report for delineation work conducted through tank excavation pit. abstract: - All Boro excavated accessible gross petroleum impacted soils from beneath the tank - the basement floor elevation is 10 ft below the exterior street level grade - excavation divided in three sections: southern most section is 3 ft deep, middle section is 5 ft deep and northern most section (towards 30th St) is 7 ft deep - five soil borings (B1 through B5) were installed through the base of the completed excavation - boring B1 was installed in northern most section of the excavation, to a final depth of 23 ft below exterior grade (13 ft below basement floor and 6 ft below excavation bottom) - borings B2 through B5 were installed in middle section of the excavation - borings B2, B3 and B4 were installed to a final depth of 16.5 ft below exterior grade (6.5 ft below basement floor and 1.5 ft below excavation bottom) where refusal encountered - boring B5 was installed to a final depth of 22 ft below exterior grade (12 ft below basement floor and 7 ft below excavation bottom) - evidence of petroleum impact (elevated field screening readings and petroleum odors) was encountered in borings B2 through B5 - maximum of 57 ppm recorded on PID at 17-19 ft below exterior grade in boring B5 - two soil samples were collected from boring B5: 5 ft below excavation floor (20 ft below exterior grade) and 7 ft below excavation floor (22 ft below exterior grade) - due to refusal, no samples collected from B2, B3 and B4 - one temporary groundwater sampling well was installed in soil boring location B1 and collected one groundwater sample - groundwater was measured at 11 ft below basement floor (21 ft below the exterior grade) - found slight petroleum sheen and odors in groundwater sample - minor VOCs noted in soil samples (max. 340 ppb 1,3,5-Trimethylbenzene) - only Naphthalene (23 ppb) noted in groundwater sample above cleanup standard 10:05 AM:- sent email to Chris and asked to submit a detailed report for work performed at the site in referenced to the subject spill case. asked him to submit report no later than 05/06/16. email copied to Mr. Hoffman. 06/02/16-Hiralkumar Patel. met Chris in office. asked him about spill closure report. he mentioned that the report has not been submitted yet as they have not restored

TANK TEST FAIL (Continued) **S117364572**

the site. asked him to submit report without waiting for site restoration. he will submit cleanup report by 06/17/16. 07/15/16-Hiralkumar Patel. 1:49 PM:- sent email to Chris and asked him to submit required documents by 07/20/16. 08/04/16-Hiralkumar Patel. received report from Chris including cause of release, summary of cleanup activities, samples result and disposal manifests. 08/12/16-Hiralkumar Patel. case closed based on review of all available information. 3:16 PM:- sent spill closure letter to Mr. Hoffman. letter emailed to Mr. Hoffman and Chris."

Remarks: "tank test fail"

Update By:	JAMORAS

Site Description: Location: The Former NY Central Rail Yard site is located in an urban area in the Hell's Kitchen neighborhood of the Borough of Manhattan. The site is on the east side of 11th Avenue, north side of West 36th Street and south side of West 37th Street. The eastern boundary of the site is defined by a railroad easement. Site Features: The majority of the site is 20 feet below street level. The lower portion is used as a construction material staging area and the upper parking lot is used to park cars and horse-drawn vehicles. Current Zoning and Land Use: The site is zoned C6-4 (Commercial and Mixed Uses) and is currently being used as a construction staging area for structural steel, wood and roll off containers. Past Use of the Site: Former buildings on the site were built sometime prior to 1890 and utilized as a mix of numerous industrial facilities, warehouses, garages, stores and residential dwellings. Between 1930 and 1950, the buildings were demolished to make way for a NY Central Railroad rail line/yard. The rail line was present from 1951 through sometime prior

438 11TH AVENUE (Continued) **S117851122**

	to 1996. Site Geology and Hydrogeology: Soil at the site is described as historic fill material to a depth of approximately 5 feet below the surface followed by brown fine sand with silt which may or may not be native material. Bedrock is present directly below the fine sand/silt approximately 6 to 9 feet below the surface. The bedrock is a high-grade metamorphic rock consisting of a sequence of Cambrian and Ordovician age gneiss, schistose-gneiss, and marble. The bedrock is characterized by numerous faults and fractures, many of which contain groundwater. Groundwater at the site is present under perched conditions at a depth of approximately 7 feet below grade and is expected to flow west toward the Hudson River.
Env Problem:	Generally, the PAH and metals contamination is indicative of historic fill. Benzo(a)anthracene (5.7 ppm), benzo(a)pyrene (6.1 ppm), benzo(b)fluorathene (8.3 ppm), chrysene (6.0 ppm) and indeo(1,2,3-cd)pyrene (2.8 ppm) are present above restricted residential SCOs in up to 7 of the 12 soil samples collected. Mercury was observed at two locations above its restricted residential SCO and the protection of groundwater SCO at a maximum concentration of 1.23 ppm. PCB-1260 was detected in six of 12 locations above unrestricted SCOs. PCB-1260 was detected above its groundwater SCG at 0.16 ppb in one of the two groundwater samples obtained. Otherwise, the available data indicate that there were no exceedences in groundwater.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. On December 22, 2000, DEC (Sigona) observed the excavation and removal of 4 x 550 gallon USTs. The contents of 3 x 550 gallon USTs was found to contain a mixture of gasoline and water. 1 x 550 gallon UST contained water only. The excavation was being performed by Fenely & Nicol for Public Parking, Inc. The project was also supervised by DEC contractor EAR under PIN project for New York Auto Service which was impacting the Jacob Javits Center. Does not appear to be related to New York Auto Service spill or have an impact on the Javits Center. 2/24/05-Vought-Spoke with Phillip Rizzuto (973-470-25510) who is agent for property owners. Rizutto asked for status of Tank Closure Report review and Vought required that a copy be sent to DEC for review. Spill transferred from Rommel to Vought. 3/16/05-Vought-Reviewed Tank Closure Report(Fenley & Nicol - Angel Ramirez) dated 1/18/01 and received on 3/2/05. Project was prepared for: Mr. Phil Rizzuto Classic Sanitation Corporation 99 Route 3 Clifton, NJ 07014 Removal and closure of one (275-gallon) fuel oil AST and four (550-gallon) gasoline USTs. Subject site is used as a public parking garage. Three (550-gallon) gasoline USTs were removed from the north-east front of the interior of the building(Tank Area 1) and one (550-gallon) gasoline UST was removed from southwest of Tank Area 1. Depth to groundwater at site estimated to be 20 feet below grade and flow to the west. Inspector Anthony Sigona of the NYSDEC was present at the time of the excavcation to inspect the tanks and excavated area . The bottom and sidewalls of the excavation consisted of Manhattan Schist and bedrock . ...it was discovered that soil above the tanks exhibited evidence of gasoline contamination . All product lines were removed and disposed. Soil were analyzed for 8260/8270 TCLP as per Sigona. Soil analyticals only showed on minor exceedence of napthalene at 11ug/L (Guidance value is 10ug/L). No PID readings were detected. Report recommends No Further Action. Spill closed by Vought due to one minor TAGM 4046 Soil Cleanup Objective exceedence."
Remarks:	"DURING TANK REMOVAL SOIL CONTAMINATION HAS BEEN DISCOVERED. CONTAMINATION IS ON TOP OF TANKS. AREA TO BE EXCAVATED AND FURTHER

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was

GASETERIA (Continued) **S100167794**

VOUGHT 5/5/2003-Vought-Called Paula Skryja and spill occurred on 5/3 am. Ten gallons came out of fill port and onto concrete surface. No sewers or drains affected due to immediate placement of spill boom. Spill cleaned using speedy dry which was recovered.
12/17/2003-Vought-See spill 8909614 at same location. This spill closed due to existing gasoline contamination remediated under 8909614."

Remarks: "Tank overfill during delivery at above location. Cleanup is in progress and further investigation into cause is pending."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 01/05/90: (6) MONITORING WELLS INSTALLED,OIL TANKS BEING TESTED BY CONTRACTORS(TRINITY & FENLEY & NICOL), ALL TANKS PUMPED & CLEANED, REPAIRING WATER MAIN. 10/10/2003-Vought-Spoke with LaJuana Smith (works for Clinton Housing-212-967-1644) and she is looking to resolve spill). In Nov 1996 DEC required further work from DEC. Ms Smith will call back on Wed for current site status and will possibly submit FOIL request upon her discussion with bank. 10/17/2003-Vought-File review by Vought: Community Board 4 Meeting Notice-2/21/90-Meeting held with DEC, NYFD, NYPD, DCA and NYCDEP to discuss current status and plans of site. Fax to DEC from

GASETERIA (Continued) **S100167794**

Gaseteria-2/22/90-Pedneault Associates (516-467-8477)-Groundwater analyticals from six monitoring wells and two soil disposal piles (no site plan in file). Groundwater analyticals show 275ppb benzene(W1), 341ppb benzene(W2), 327ppb benzene(W3), 448ppb benzene(W4), 158ppb benzene(W5) and 128ppb benzene(w6). Disposal samples show 1433ppb benzene(east pile) and 188ppb benzene(west pile). Groundwater analyticals-5/21/90-Pedneault Associates-Groundwater analyticals from six monitoring wells (no site plan in file). Groundwater analyticals show 2308ppb benzene(W1), 1091ppb benzene(W2), 680ppb benzene(W3), 385ppb benzene(W4), 736ppb benzene(W5) and 810ppb benzene(w6). Subsurface Investigation-7/90-Environmental Management Services. In Jan 1990 a subsurface water line broke beneath 10th avenue near the northwest side of the site. Water entered the basement of the adjoining building along with some gasoline. DEC required installation of six monitoring wells on Gaseteria property. Gasoline vapors detected in sewers in building across 10th Avenue. This subsurface investigation consisted of eight soil borings and installation of two additional monitoring wells. Three pump islands serviced by 12 (550-gallon) gasoline USTs and one (2000-gallon) diesel UST. Local topography slopes to the north. Groundwater at depth of 7-9' below grade. Bedrock is 7-11' below grade and slopes downward toward the northwest and southwest corners of site. Groundwater suspected to flow northward . All wells onsite were set firmly on bedrock and there is not sufficient information available to determine specific groundwater flow . No free product detected in wells. Groundwater appears to flow from 10th Ave towards the USTs. Report recommends groundwater monitoring with possible additional delineation. No soil samples submitted for analysis nor were screened via PID. Letter from DEC to Gaseteria-7/12/90. Letter from DEC (Sigona) to Gaseteria (Oscar Porcelli) requesting subsurface investigation work plan to be apporoved by the DEC to investigate the presence of gasoline vapors. Plan must be received by the DEC by 7/17/90. Odor complaints in January 1990 and again in July 1990. Sigona performed site visit on 7/13/90. Fax to DEC-7/17/90. Letter from Environmental Management Services to DEC (Sigona) proposing: 1)investigation of subsurface utilities as potential pathways 2)determination of groundwater flow direction 3)groundwater monitoring 4)installation of six soil borings along western margin of station and installation of two additional monitoring wells. Letter from DEC to Gaseteria-1/5/95. Letter from DEC (Sigona) to Gaseteria (Angel Chang) requiring cleanup and removal of discharge . Letter also required immediate steps to abate seepage into basement of 403 W 40th Street. Response from Gaseteria required to DEC by 1/15/95. Letter from Gaseteria to DEC-1/20/95. Letter from Gaseteria (Chang) to DEC (Sigona) stating that Gaseteria will: 1) divert the flow of surface water away from the south wall of the building 2)install a SVE system in the basement alonside of the south wall between the concrete floor and the building foundation. Gaseteria does not believe there is a need to install new groundwater monitoring wells or to further develop existing wells.....since the problem appears to be surface related . Sample analyticals from basement of 480 10th Ave-8/96. Soil analyticals show 20664ppb ethylbenzene(sample 48334), 59164ppb xylene(sample 48334), 11000ppb napthalene(sample 48334). Letter from DEC to Gaseteria-9/10/96. Letter from DEC(Rommel) to Gaseteria(George Esayan). DEC in possession of analyticals from Clinton Housing(403 W. 40th Street) . Gasteria required to sample two of the onsite monitoring wells for 8021/8270/lead. Letter from

GASETERIA (Continued) **S100167794**

Clinton Housing Development Company-9/11/96. Letter from Clinton(Joseph Tuana) to DEC(Rommel) with copies of analyticals discussed above. Letter from Carl Sulfaro (attorney for Gaseteria) to DEC (Rommel)-9/20/96. Letter stating that Sulfaro authorized EMS Environmental Services to take two samples of the onsite monitoring wells . Samples will be taken 9/27/96. Groundwater analyticals-10/10/96. Analyticals from MW5 by EMS showing 42.56ppb methylene chloride, 5549ppb benzene, 107.33ppb toluene, 1024.75ppb ethylbenzene, 393.15ppb xylene and 0ppb MTBE. Letter from Clinton(Kathy Prioleau) to DEC(Rommel)-11/11/96. On 10/27/96 strong fumes entered basement of 480 10th Ave . NYFD onsite. Letter requests that DEC relay information on testing done at Gaseteria and UST inspection of Gaseteria . Letter from DEC(Rommel) to Gaseteria(Sulfaro)-11/25/96. Letter stating that requirements of fax dated 9/10/96 were not met because only one well was sampled and 8270/Lead analyses were not performed. Letter requires:1)submittal of an investigation plan to delienate soil and groundwater contamination 2)source determination 3)installation of three additional monitoring wells 4)installation of an air sampling port on the exhaust line of the venting system and monthly sampling for benzene and THC. Letter states that action must be taken within 45 days . Letter from DEC(Rommel) to Prioleau(Clinton)-11/26/96. Letter stated that DEC was never notified of odor complaints as 11/11/96 letter stated. Also attached to letter was copy of 11/25/96 letter from DEC to Gaseteria. Letter from Gaseteria(Sulfaro) to DEC(Rommel)-1/15/97. Letter stating that Gaseteria would prefer to perform site investigation, soil removal and/or remediation as needed concurrent with excavation anticipated as part of Federal EPA UST upgrade mandate and the work is expected to take place in Spring 1997 . Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-7/29/98. Letter serving as final notification of obligations regarding petroleum contamination and vapor incidents . On 6/28/03 petroleum contaminated groundwater infiltrated basement of 480 10th Ave due to heavy rains. This is the seventh vapor complaint associated with Gaseteria since Jan 1990 . Letter states that the Department is alotting 30 days for Gaseteria to statisfy all requirements in DEC letter dated 11/25/96 . Deadline of 8/31/98 given by DEC. Letter from Gaseteria(Seth Friedland) to DEC(Rommel)-8/13/98. Letter stating that the June 1998 episode was caused by heavy rains and appears to be an isolated event and that Gaseteria does not agree with Departments conclusions . Letter stated that the station will be taken out of service on 9/15/98,permanently close the USTs and reinstall upgraded USTs on the northern boundary of the site. Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-8/28/98. Letter serving as a reminder of 8/31/98 deadline . Letter from Gaseteria(Oscar Porcelli) to DEC(Rommel)-8/28/98. Letter stating that new USTs were ordered and that work will start the second week of September. Gaseteria intends to install four monitoring wells to replace those destroyed by station upgrade and will retain Environmental Management services to develop remedial plan. Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-8/31/98. Letter confirming phone conversation where an agreement was reached that Gaseteria will comply with following requirements and complete the tank upgrade prior to 9/30/98. Letter also required that a workplan be submitted prior to 9/4/03 which included 1)complete delineation 2)soil and groundwater sampling plan for use during excavation activities 3)sampling of SVE emmissions 4)installation of three monitoring wells into bedrock and 5)cleaning and proper

GASETERIA (Continued) **S100167794**

disposal of oil in the building floor drains and all associated discharge points. Letter from Camin Cargo Control(Gaseteria's Enviro consultant) to Gaseteria-10/5/98. Letter from Camin(Patricia Badding) stating that a site investigation and report shall be prepared. Investigation with Geoprobe and subsquent insallation of monitoring wells scheduled for 10/16/98. Soil samples will also be collected during excavation for new USTs. Venting system emissions will also be sampled. Cleaning and proper disposal of any oil in the building floor drains and all associated discharge points is the responsibility of Gaseteria . Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-10/8/03. Letter acknowledging receipt of Camin 10/5/98 proposal and requiring the following by 10/13/98: 1)Site plan with proposed boring locations 2)discussion of locations 3)discussion of endpoint sampling locations from UST excavation 4)discussion of delineation procedure 5)include MTBE with analyticals 6)collect groundwater samples from Geoprobe locations. Letter from Camin(Badding) to DEC(Rommel)-10/13/03. Submission of 1)site plan with ten boring locations 2)Collection of six endpoint soil samples from UST excavation 3)excavation and disposal of contaminated soil encountered during tank installation 4)Inclusion of MTBE analyticals 5)collection of groundwater samples(if encountered). Investigation Results from Camin(Badding) to DEC(Rommel)-11/6/98. Results of eight soil borings peformed. Soil analyticals show 2149ppb MTBE(SB1), 526ppb benzene(SB2), 188ppb benzene(SB4), 212ppb benzene(SB5), 4576ppb MTBE(SB6), 1458ppb benzene(SB7), 29114ppb napthalene(SB7), 187ppb benzene(SB8). Groundwater analyticals show 1239ppb benzene(SB4), 1975ppb benzene(SB5), 5360ppb benzene(SB6). Subsurface Investigation Report Camin Badding 908-523-0616 10/16/98). Investigation report including results above of eight soil borings performed. There is approximately 2-4 inches of contaminated soil at the soil/bedrock interface in soil boring locations SB2, SB4, SB5, SB7 and SB8. Bedrock at depths of 6-11.5' below grade . A sheen was detected on all samples (groundwater). Venting system was samples on 12/11/98 via a vacuum canister attachment to vent. Removed dispenser island is the proposed location of new USTs. See analyticals above. Venting analyticals show 264ppm TPH and no other volatiles. Baseline Acquisition Assessment Report-10/10/02 Delta Environmental (Brad Fisher). Purpose was to establish baseline conditions prior to proposed lease and raze and rebuild of site by BP. One soil borings peformed in 4/02 to depth of 11.5'. Two borings drilled to 24.5 via air rotary and converted to temporary monitoring wells (MW1 and MW2). Delta recommends 1)gaseteria install permanent monitoring wells to delineate contamination. It is Delta's understanding that Gaseteria will retain the environmental liability of the subject site until spill closure has been obtained . At time of assessment three USTs on site (two 6000-gallon gasoline USTs and one 6000-gallon diesel UST) and four pump islands with six dispensers. Surrounding area is multiple story apartment buildings. Groundwater is located within bedrock fractures at depths between approximately 12.5 and 13.5 ft bgs . Former USTS onsite which were CLOSED IN PLACE include two (6000-gallon) gasoline USTs in 1998 , one 6000-gallon diesel in 1999, ten 550-gallon gasoline USTs in 1998, one 550-gallon waste oil in 1998 and one 550-gallon fuel oil in 1996. Soil analyticals show 4570ppb xylenes(SB1) and 3970ppb isopropylbenzene(SB1) from depths of 10-11.5'. Groundwater analyticals show 148ppb benzene(MW1), 24800ppb MTBE(MW1) and 30.7ppb benzene(MW2). 10/21/2003-Vought-Reviewed site with DEC(Rommel). Sent Stipulation Agreeement with the following

GASETERIA (Continued) **S100167794**

requirements: 1)Groundwater delineation via installation of bedrock monitoring wells at former boring locations SB1, SB4, SB5, SB6, SB7 2)Monitoring of vapors and groundwater intrusion 480 10th Ave 3)current status of SVE system and submittal of historic and current SVE effluent samples for benzene analysis or collection of indoor air samples from 480 10th Ave. 10/24/2003-Vought-Called LuJuana Smith (212-967-1644) and left message and explained requirements of 10/21/03 letter. 10/27/2003-Vought-Received message from Steve Muller will be taking indoor air samples from 480 10th Avenue. Vought returned call to Muller (516-395-5957). 10/28/2003-Vought-returned call to Steve Muller to discuss indoor air samples. Left message to return call to DEC. Left message for LuJuana Smith to call DEC. Vought spoke with Muller and okayed PID and stated that SUMA sample as per NYSDOH guidance was not necessary until 1)closure of SVE system or 2)PID indications of petroleum vapors followed by subsequent remediation. Vought also instructed Muller to check sumps. Vought spoke to LuJuana Smith who will be sending in FOIL Request for continuous updates on site. Vought also called Muller and gave him LuJuana's phone (212-967-1644) for access arrangements. 11/6/2003-Vought-Spoke with Steve Muller who was onsite. No PID readings and no olfactory evidence of petroleum and no groundwater infiltration into basement and no product in sump. Muller will produce summary letter and send to DEC. 11/7/2003-Vought-Received Summary Letter from Applied Geosolutions(Muller). Site visit performed on 11/6/03 and inspection of basement at 480 10th Ave. AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline . PID readings of 4.8ppm were attributed to moisture in basement. Small amount of standing water present near leaking hose. No signs of product in sump. Vapor abatement system unoperational during site visit. Photos of basement submitted with report show no free product or petroleum impact. 11/24/2003-Vought-Received signed STIP from Adam Good(Gaseteria) with revised Corrective Action Plan. 11/26/2003-Vought-Spill transferred from Rommel to Vought. Vought received call from LuJuana Smith and she requested update. Vought faxed her copy of 11/7/03 report and letter sent to Gaseteria on 10/21/03. Vought submitted STIP for implementation to DEC Kunkel. 12/2/03-Vought-STIP implemented by Kunkel. Copy sent and faxed to Good and Muller. 12/17/2003-Vought-See closed spill 0301220 at same location. 9/14/04-Vought-New file review by Vought: Letter from Applied Geosolutions (Steven Muller 516-395-5957). On November 6, 2003 Applied Geosolutions inspected the basement of 480 10th Avenue to perform vapor monitoring and to identify the presence of groundwater . During the inspection AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline. The air space was monitored with a portable PID indicating a measurement of 4.8 ppm... This detection is likely the result of low atmosheric pressure followed from periods of rain causing the basement to be damp. The basement floor did not indicate the presence of groundwater... . Line and Dispenser Upgrade Report (Delta Environmental Brad Fisher 914-765-8180). This Line and Dispenser Report summarizes the results of pump island and product piping upgrade assessment activities conducted by Delta Environmental and Gasoline Installations on behalf of BP Products North America . Work performed included the removing and installing new spill containment boxes beneath each dispenser, removal and replacement of propduct piping and installation of electronic line leak detection systems. Soil analyticals onlly show minor TAGM 4046 SVOC exceedences

GASETERIA (Continued) **S100167794**

attributable to fill. Subusurface Investigation Workplan (Applied Geosolutions)-July 2004. Bedrock at depth of 10' below grade and groundwater at depth of 12.5-13.5' below grade. Report proposes installation of four wells via air rotary followed by groundwater sampling. Groundwater flow direction not determined as of yet. 9/14/04-Vought-Sent letter to Gaseteria approving of Subsurface Investigation Workplan. Vought received message from Lujuanna Smith (212-967-1644) and returned call. Vought spoke to Smith and no indication of vapors was noted. Ms. Smith requested info on the applicability of the BCP program for 480 10th Avenue and Vought replied that was only available if HPD was willing to take responsiblity of the spill and that she should call Albany for futher information. Vought also suggested that she return the call to DEC on 11/14/04 which is when the workplan results are due to DEC. 9/17/04-Vought-Received fax from Applied Geosolutions (Muller). 466 10th Avenue-AGS is currently getting drilling quotes and will complete the Workplan within the 60 day time frame . 1/6/05-Vought-Reviewed Subsurface Investigation Summary Report (Applied Geosolutions) dated December 2004 and received on 1/3/05. Location north of USTs not possible due to concrete with rebar. Installation of three monitoring wells. Groundwater from 7-11' bgs and flow to the west. Groundwater analyticals show 48ppb xylene(MW1), 13ppb 1,2,4-trimethylbenzene(MW1), 17ppb 1,3,5-trimethylbenzene(MW1), 26ppb napthalene(MW1), 1400ppb MTBE(MW1), 23ppb MTBE(MW2), and 20ppb MTBE(MW3). The existing groundwater monitoring wells should be monitored on a monthly schedule and sampled on a quarterly schedule to document changes in groundwater elevation and contaminate concentration trends in order to develop and appropriate remedial strategy . DEC requires: 1)installation of monitoring wells on West 37th Street north northeast of site and downgradient from abandoned tankfield along 10th Avenue. 1/19/05-Vought-Meeting at DEC with ASR Tomasello. Will examine possibility of borings across 10th Avenue (may not be possible due to utilities) and also onsite adjacent to 480 10th Avenue. If onsite boring adjacent to 480 10th Avenue is not possible then boring will be installed on 37th Street. 2/17/05-Vought-Spoke to Muller and site visit scheduled for 2/24 at 10am to discuss possible well installation locations. 2/24/05-Vought-Site meeting with ASR Tomasello and no borings possible across 10th Avenue. Well will be installed onsite under canopy downgradient of abandoned tankfield. Well will also be installe on West 37th Street north northeast of site. Obligado- SITE TRANSFERRED FROM VOUGHT TO OBLIGADO 10/12/05 - Spoke with Tomasello ASR, requests to talk about closure for sp0206783. 10/17/05- Obligado - File Review: Final Subsurface Investigation Report, dated June 2005. 4 monitoring wells installed at the site. Wells were installed into Bedrock down to 25 ft bgs. 3 wells installed in December 2004, one additional well installed in March 2005. Groundwater encountered at approximately 7 to 11 feet. No product encountered. Initial gw samples in Dec. 2004 show ND for Benzene in all wells, 1400 ppb MTBE (MW-1), 23 ppb MTBE (MW@), 20 ppb MTBE (MW-3), 48 ppb Xylene (MW-1). March 2005 gw results show 140 ppb benzene (MW1), 2100 ppb MTBE (MW-1), 26 ppb benzene (MW-3), 16 ppb MTBE (MW-3). June 2005 results show 45 ppb benzene (MW-1), 11 ppb Ethylbenene (MW-1), 750 ppb MTBE (MW-1), 52 ppb benzene (MW4), 10 ppb toluene (MW-4), 170 ppb Napthalene (MW4), 55 ppb MTBE (MW4), 193 ppb xylenes (MW-4). 4Q05 Monitoring Report, dated 10/15/05. Ground water analyticals at show 20 ppb benzene (MW-1), 580 ppb MTBE (MW1), 23 ppb MTBE (MW-2), 21 ppb

GASETERIA (Continued) **S100167794**

benzene (MW-3), 15 ppb MTBE (MW-3), 16 ppb benzene (MW-4), 52 ppb ethylbenzene (MW-4), 140 ppb MTBE (MW-4). 11/14/05 - Obligado - Site visit with ASR Tomasello. Request to see at least 2 more quarters of monitoring at a minimum. 12/8/05 - Obligado - Will do a sensitive receptor survey. Continue monitoring. Only 2 quarters of data at MW4. 3/1/06 - Obligado - PHone call with Chris/STeve, ask that site be monitored quarterly not monthly. 4/12/06 - Obligado - review 1Q06 monitoring report. BTEX ND to 33 ppb, MTBE ND to 800 ppb. 11/21/06 - Obligado - Reviewed Closure Petition/Sensitive Receptor Survey. Sent email to ASR denying NFA stating the following: Due to historical vapor issues in the adjacent apartment, and the presence of benzene above guidance levels in ground water, the Department requires laboratory analyzed vapor samples from either the slub slab system (if operational) or indoor air samples to confirm no vapor intrusion. The Department also requires an additional round of ground water monitoring to confirm benzene and MTBE levels are still decreasing. NYSDOH Vapor Intrusion Guidance should be followed when collecting air samples available at http://www.health.state.ny.us/environmental/investigations/soil_gas/svi_guidance/index.html. Please submit the results of the additional investigation by January 21, 2007. 12/1/06 - Obligado - Steve Muller will be onsite today to collect addtional data. 5/19/09 - Obligado - Meeting with DEC, ASR, GAseteria. They conducted a groundwater monitoring event and a vapor intrusion investigation in the adjacent residential building. According to report no Vapor intrusion was occuring. Ground water results found low levels of BTEX in GW, max 23 ppb and MTBE is continuing to decrease from 1400 ppb in 2004 to 250 ppb in 1Q09. They will submit a workplan for a confirmatory soil boring investigation by 7/31/09. 11/20/09 - Obligado - Reviewed a revised Investigation Work Plan. The plan proposes to install 3 montioring wells at the site. 2 wells are proposed in the area of the former abandoned 550 USTs and one is downgradient of the dispenser island. I sent a letter to Gaseteria approving the plan. 3/22/10 - Obligado - Review the 4th quarter 2009 monitoring report. Max BTEX is 8 ug/L. Max MTBE is 140 ug/L. No LNAPl present. 6/14/10 - Obligado - I reviewed the Remedial Investigation Report. 2 Additional soil boring/monitoring wells were installed. 1 soil boring/well location was not completed due utilities in that area. Soil samples were collected from one of the 2 locations, but the other location had shallow bed rock so no soil sample was collected. No soil impacts were detected at the one location where soil was collected. Ground water results showed 13 ppb total BTEX at newly installed MW5. MW6 had no exceedences of TOGs The existing monitoring wells were sampled as well. MW4 had max MTBE at 150 ppb, and BTEX at 14 ppb, and total VOCs were 174 ppb. MW2 had 15.3 ppb BTEX and 11 ppb MTBE. This site has minimal ground water impacts the 6 wells on the site, and lack of evidence of contaminated source soils. Also a VI investigation was previously performed at the adjacent apartment building and no vapor intrusion was determined to be occuring. After discussion with DEC Tibbe, this spill has been closed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 6/8/05 - Project transferred to TLGibbons in Central Office, Albany 8/16/05 - Spoke with Brenden Keany, Mutual Redevelopment Houses, Inc., (212) 675-3200. Spill reported 5/23/96 by CDM during removal of twelve (12) 20,000 gal. #2 and #6 fuel oil USTs. The large fuel usage was for a cogen plant which generates electricity for ~3,000 people. After removing tanks and cleaning, went to dual fuel system, reinstalling only six 20,000 gal. #2 fuel oil USTs. Spoke with David Marabello (732-225-7000), CDM project manager during spill. He said that they excavated to the lateral and vertical limits possible, using shoring, without compromising structure of building.

MUTUAL REDEVELOPMENT HOUSES (Continued) **U003127184**

Southern portion of excavation encountered bedrock. Sixteen post-excavation samples were collected and evaluated for VOCs and SVOCs. All samples greater than 10 feet bgs. Elevated levels of VOCs and SVOCs were encountered in several samples, hovever, according to 10/2/98 CDM tank closure report, levels not indicative of gross tank failure, rather indicative of chronic spills over time. While some sporadic elevated levels of petroleum remain, everything that was reasonable to be done, was done. Close spill. "

Remarks: "OLD TANK APPEARED TO HAVE FAILED. TANK IS BEING REMOVED, CONTAMINATED SOIL WAS FOUND DURING REMOVAL PROCESS. INVESTIGATION IS UNDERWAY AT THIS TIME."

DEC Memo:	"ttf ltr sent 1/14/2005 2/14/2005 Received a letter from Morton Usdan (212-564-2006) saying that he hired a company to work on the tank. If it can be fixed, it will be. If not, it will be abandoned. 5/2/2005 Sangesland spoke to Mr. Usdan. He said PTC found a dry leak in the vent line and replaced the line. Tank was retested and passed, no contamination was visible. Sangesland asked Mr. Usdan to submit all of this in writing to DEC. 5/5/2005 Sangesland received a letter from Mark Salamack at Petroleum Tank Cleaners. Tank was originally tested and failed by another company. PTC emptied the 1500 gal tank, isolated the lines and the stickline and vent line were found to leak. The gasket was replaced and then the tank was tested alone and passed. All necessary piping was replaced and no contamination was found. Spill Closed "

DER Facility ID:	284732
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Sent TTF letter to consultant: Maria Ramirez, GZA, 65 Willowbrook Blvd, Wayne, NJ 07470 11/5/2003 Sangesland spoke with Maria Ramirez at GZA. She says the building is converting to natural gas and the 10,000 gal tank will be abandoned in place. Tank is below the basement floor under an electrical utility room. They cleaned out

BASEMENT OF (Continued) **S104502515**

the tank and found holes in the top 1/3 of the tank. They will take borings through the bottom of the tank to determine if the area is contaminated. 12/4/2003 e-mail message from Maria Ramirez said the soil borings through the bottom of the tank would take place around 12/12/03. 12/11/2003 Sangesland reviewed a submittal from Maria Ramirez of GZA dated Nov 19, 2003. This outlined the the work discussed above and stated that 4 holes will be drilled through the bottom of the tank and samples will be collected for testing (if possible-it may be in cement). If the samples are clean, the tank will be abandoned in place with foam. 12/22/2003 Sangesland spoke with Fran Schultz of GZA about this site. They made 4 holes in the bottom and sides of this tank and hit cement. Water is entering the tank. To date approx 700 gal of water has entered the tank. They believe the water is from a broken water main. Sangesland asked GZA to test the water for VOC and SVOC. GZA said they would also test for Floride and Clorine to determine if this water is city tap water or groundwater. If the water samples come back clean, then GZA will prepare an arguement that the tank is in a subbasement vault. All records of the building (blueprints) are gone (they were in 7 World Trade Center). There are lots of utilities nearby. The tank is being abandoned in place. GZA will request closure of the spill number. 3/15/2004 Sangesland reviewed a report from Maria Ramirez of GZA. Based on the description of the tank location (below ConEd electrical equipment), the drilling of holes through the bottom and sides of the tank (all into cement), results of water tests on the water that came into the tank after drilling (no petroleum but did have Floride & Chlorine). Based on all of this information, the DEC will allow GZA to go ahead with abandonment of the tank. After proper abandonment is complete, GZA will submit a final report with a request for spill closure. 11/14/05 - Larry Alden - Reviewed file and concur with assessment of Sangesland (3/15/04). Reviewed PBS# 2-606121, which showed that 10,000-gallon tank was closed in-place on 7/8/04. With absence of any contamination, and tank subsequently closed, this spill can be closed."

Remarks: "failed a tighteness test but could not isolate a specific pipe - test was performed as part of a closure."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TYREE REMOVED A 550-GALLON STEEL SINGLE-WALLED EMERGENCY GENERATOR DIESEL TANK. SOIL HAD PETROLEUM ODOR AND SHEEN. CONTAMINATED SOIL WAS OVER-EXCAVATED AND STOCKPILED; POST-EXCAVATION SAMPLES WERE TAKEN. J. KOLLEENY OF DEC SPOKE WITH LAURIE JODICE OF TYREE ON 4/12/01; SHE WILL FORWARD COPY OF CLOSURE REPORT WHEN AVAILABLE. ACCORDING TO LJ, MOST CONTAMINATION WAS REMOVED AND THE SOIL LEFT IN THE PIT WAS RELATIVELY CLEAN. THE TANK LOCATION WAS VERY CLOSE TO WHERE O'BRIEN-KREITZBERG IS INSTALLING AN SVE SYSTEM TO REMEDIATE GASOLINE CONTAMINATION. KOLLEENY WILL FOLLOW UP TO ENSURE THAT RESIDUAL CONTAMINATION FROM THE EMERG. GEN. TANK (IF ANY) IS ADDRESSED, EITHER BY THE SVE SYSTEM OR IN SOME OTHER WAY. This spill is referred to spill # 9512583 and is closed today by II (01/10/05)."
Remarks: "WHEN TANK WAS REMOVED THERE WAS AN ODOR OF PETROLEUM. [SEE DEC NOTES.]"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY URS did site investigations and initially proposed installing a dual-phase extraction system to address soil and GW contamination. However, site facility had inadequate electrical service to support a high-vacuum DPE system, so in early 2000 they proposed installing an SVE system for soil and ORC injection for dissolved-phase GW contamination. DEC approved plan in May 2000; work begun on SVE system in late 2000. However, when ORC injection wells were installed in Feb. 2001, free product was found in injection wells (under building, which is on pillars). URS performed IRM on wells. SVE system started up in Oct. 2001 and operated until June 2002, when it was shut down due to break in conveyance piping. URS did addt'l investigation to delineate free product, and in April 2003 they proposed installing a GW recovery system to address free product and dissolved-phase GW contamination, and expanding SVE system. DEC approved this plan in July 2003. URS submitted a Design Analysis Rpt for remedial plan in Feb. 2004; DEC approved DAR in June 2004. 7/21/05: DEC reviewed Documentation for Letter of Agreement submitted by URS with SVE/Air Stripper Data Sheets and supporting calculations, and issued a letter on 7/21/05 authorizing discharges of treated vapors from the expanded SVE system and treated air stripper off-gas from the groundwater recovery system. - J. Kolleeny 03/14/07: Reviewed System Performance Monitoring Report for October 2006 through January 2007 by URS Corp., dated Feb. 12, 2007. Soil vapor extraction (SVE) and groundwater extraction & treatment (GWET) systems were started up on Oct. 25, 2006. SVE system consists of one horizontal extraction well and two horizontal ventilation trenches; GWET consists of 3 groundwater extraction wells. Franklin Co. is contractor operating/maintaining the systems. Performance monitoring data indicate that contaminants are being extracted from soil and groundwater and the systems should continue to operate. GW monitoring event in June 2006 showed free product in two wells (injection wells IW-6 and IW-12), and dissolved-phase contamination in two wells (IW-10, with 8,843 ppb, and IW-13, with 5,872 ppb total VOCs, resp.). In Jan. 2007 GW event, only two wells were sampled, BW-4 and MW-4, both ND; other wells were dry or inaccessible. Changed spill priority status to P2. - J. Kolleeny On 3/14/07, new gasoline spill was reported (#0613411). Delivery overfill event, 4 ft. of product found in well (extraction well GEW-01, according to Jane Staten of URS), and UST manway was full of gasoline also. Franklin Co., who reported spill, have arranged for vac truck to pump out manway and well. Any residual impacts will be addressed by remedial systems and tracked under this spill number. - J. Kolleeny 07/23/07: Reviewed System Performance Monitoring Report for Feb. thru April '07 by URS, dated 6/8/07 (in eDocs). Report summarizes performance data for on-site SVE and GW treatment systems, plus GW monitoring data. PID monitoring of SVE vapor effluent gave reading of 621 ppm on 4/18/07, corresponding to benzene concentration of 12.4 ppm - above discharge limit in Stip Agreement. System was shut down and carbon was changed out, system

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

re-started on 5/4/07. Vapor effluent sampling of GW system air stripper was in compliance. GW was sampled on Jan. 4, 2007; only two wells in sampling program were sampled, others were either inaccessible or dry. Results showed were ND for two wells sampled, however, this was before result spill 0613411, which report states was caused by a break in gasoline fill line; Franklin Co. installed a direct fill on tank, by-passing damaged fill line. Sampling of GW extractions wells in Feb. and March '07 showed big increased in recovered contaminants in March: GEW-1 went from 210 ug/L total VOCs to 30,900 ug/L; GEW-2 went from 20 ug/L to 800 ug/L, and GEW-3 went from 985 ug/L to 32,070 ug/L total VOCs, suggesting impacts from fill line break, and indicating system is recovering elevated levels of contaminants from GW. Report concludes SVE and GWE systems must continue to operate. - J. Kolleeny 08/17/07: Reviewed System Performance Monitoring Report for May-July '07 by URS, dated 8/7/07 (in eDocs). Report notes that benzene concentrations in SVE system effluent have increased, due to recent spill(s) of fresh gasoline from damaged fill line to active UST; even though benzene level has not exceeded discharge limit, as precaution Franklin Co. will change out the vapor phase carbon. Report also notes that due to presence of free product in GW recovery wells, they've had to shut down GWET system so product doesn't foul carbon. I sent email to Afsar Samani of DDC, cc's to Jerry Aliberti of DDC, Jane Staten & Harvey Roberts of URS, stating: I have reviewed System Performance Monitoring Report for May-July 2007, dated August 7, 2007. Report notes that, due to presence of large quantities of free product in on-site groundwater extraction wells (from recent spills related to damaged fill line to active gasoline UST), groundwater extraction and treatment (GWET) system has been shut down. I am concerned that without GWET system operating to exert hydraulic control over local groundwater flow, dissolved-phase groundwater contaminant plume, and perhaps free product as well, may migrate off-site, potentially impacting neighboring property. Therefore, I request that DDC and URS take whatever steps are feasible to expedite recovery of free product at site, so that GWET system can be re-activated as soon as possible. Also, discussed this in email exchange with Jane Staten, who stated: URS is scheduled to visit site with vac truck this coming Tuesday. If we feel effort is successful, we will continue with weekly visits until it is determined they are no longer necessary or effective. - J. Kolleeny 11/19/07: Reviewed URS's System Performance Monitoring Report for August-October 2007, dated 11/12/07 (in eDocs). Report states that GWET system had been shut down because free product was getting into system and causing discharge to sewer to exceed NYCDEP standards, but now they've restarted system just using GEW-2 and GEW-3, since GEW-1 seems to be well that's pulling in product. Report states that benzene vapor discharge from SVE system is in compliance, but effluent had high PID reading on 10/30/07, so they changed out carbon. GW samples were collected from several monitoring, vent & injection wells on 8/2/07, and from GWET wells on 8/31/07; results show high levels of VOCs in several wells, including extraction wells and MW-6. Well gauging consistently shows 3+ feet of product in MW-7, small amts. of product in several other wells. URS is conducting vac truck visits every 2 weeks to recover product. I called Jane Staten of URS and asked why wells MW-3 & MW-5 weren't sampled, she thinks one or both are under an emergency generator; she'll look into it and get back to me. I asked if MW-6 can be used as a GW extraction well; she said it's only a 1-inch diameter well because it was installed by

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

Geoprobe, under elevated part of building. I asked if spill buster pump could be installed in MW-7, she said she would look into it. Also asked if URS field personnel could check sump on top of new UST to see if it's still collecting product during fuel deliveries, Jane said she'd ask them to check. - J. Kolleeny 12/26/07: On 12/19/07, sent email to Jane Staten of URS asking if their field personnel had checked tank top sump for presence of product; on 12/26/07 Jane replied: Our field technician checked tank sumps at Midtown South on 11/29/07. One sump was dry and other contained a little water. There was no evidence of gasoline. Based on this, I closed spill case 0705553. - J. Kolleeny 03/20/08: Reviewed System Performance Monitoring Report for Nov. '07 through Jan. '08 by URS, dated 2/8/08 (in eDocs). Report presents O&M data for SVE & GWET systems, concluding that systems are removing elevated levels of contaminants from soil and GW, and will continue operating. Also notes that product levels from spill involving new UST's sump and/or fill port in March '07 (sp. nos. 0705553, 0702185, 0702402) are decreasing, showing effectiveness of GWET and periodic vac truck visits. However, report was submitted prior to new reported spill 0712091 (2/15/08), where large product thicknesses were suddenly and inexplicably observed in well GEW-01 and several monitoring wells, which caused temp. disruption in operation of GWET system, since product was getting into air stripper. (Tracking of that spill is ongoing.) Report states that SVE system was shut down for 2 weeks during monitoring period to change out vapor phase carbon. GW sampling was performed on 11/5/07, but samples were only collected from BW-5, MW-3, MW-4, VW-2 and VW-4; VW-4 had total VOCs of 737 ug/L, up from 44 ug/L in Aug. '07; some wells with hi TVOCs in Aug. weren't sampled in Nov. (like (IW-13); plume fig. for Nov. '07 shows free product in GEW-01, MW-7 and MW-8, not clear why MW-6 wasn't sampled (gauging table indicates it had 0.05 ft. of product on 11/15/07, but wasn't gauged on 11/05/07. All product data is made irrelevant by spill 0712091. - J. Kolleeny 03/28/08: Received email from Jane Staten of URS on 3/27/08, with attached table showing well gauging data from 1/17/08 to 3/14/08 (in eDocs). Data show product in GEW-01 has decreased, from 3.18 ft. on 2/25/08 to 0.0 ft. on 3/3/08, to 0/15 ft. on 3/14/08; however, product in MW-6 seems not to be going away, with 3.75 ft. on 3/14/08; MW-7 went from 0.30 ft. on 2/25/08 to 0.07 ft. on 3/3/08 to 0.44 ft. on 3/14/08. Jane also reported that spill buster pump in GEW-01 is operating and URS has instructed contractor to restart GW extraction pumps. - J. Kolleeny 06/11/08: At direction of my supervisor Vadim Brevdo, closed spill 0712091 at this site (for free product [gasoline] detected in GW extraction well and monitoring wells) to consolidate with this spill (9512583), under which remediation of subsurface petroleum contamination at this site is being tracked. See Caller Remarks, DEC Remarks and documents in eDocs in spill no. 0712091 for further info about that spill and response actions. - J. Kolleeny 09/11/08: Reviewed System Performance Monitoring Reports for Feb.-April '08 and May-July '08 (both in eDocs). Both reports state that SVE and GWET systems at site are removing elevated levels of contaminants from soil and GW, and that free product thickness msmts continue to decrease, showing effectiveness of GWET system and periodic vac truck visits. Worst wells for free product have been GWE-1, MW-6 and MW-7; as of last gauging event on 7/22/08, GWET had no measurable product, MW-6 had 0.04 ft., and MW-7 had 0.18 ft. As of 7/29/08 GW sampling event, worst wells for dissolved phase contam are GEW-2 with 960 ug/L total

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

VOCs (mostly BTEX)and VW-04 with 936 ug/L total VOCs (mostly MTBE). - J. Kolleeny 01/20/09: Reviewed System Performance Monitoring Report for Aug. - Oct. 2008, dated 12/5/08 (in eDocs). Rpt states that SVE and GWET systems at site are removing elevated levels of contaminants from soil & GW. As of Oct. '08 sampling event, worst dissolved-phase well was GEW-1, which had 14,455 ug/L total VOCs (last reporting period, had free product); 2nd worst dissolved-phase in GEW-2, with 634 ug/L total VOCs. Rpt also states that product thickness msmts continue to decrease, showing effectiveness of GWET system and vac truck visits, but data do not support this. Six wells had free product in Oct. '08, with worst wells being MW-6 and MW-7; those wells started August with almost no product (0.04 ft. and 0.13 ft., resp.) but on 8/29/08 jumped up to 1.96 ft. and 1.06 ft., resp., and stayed around these thicknesses for rest of reporting period, ending with 1.96 ft. and 1.44 ft., resp., on 10/20/08. Rpt states that URS visited site 8 times during period to recover free product with peristaltic pump, recovering about 12.5 gallons of product. I sent email to Jane Staten of URS: I've been looking through Midtown South monitoring report for Aug.-Oct. '08 (dated 12/5/08), and noticed that Table 9 - GW Elevation/Product Thickness Measurements seems to show significant rebound of product thicknesses in MW-6 and MW-7 starting on 8/29/08. Do you have any thoughts or ideas about what could have caused this? Were thicknesses in these two wells steadily decreasing before this reporting period, or do these appear to be typical fluctuations for these wells? Also, have we already discussed why URS is using peristaltic pump to recover product rather than vac truck - is it primarily for cost considerations, or does it have to do with recharge rates for wells or something along those lines? - J. Kolleeny 01/22/09: Received email from Jane Staten of URS responding to my email of 1/20/09: Based on water/product levels we have recorded, product thickness appears to be affected by water levels, i.e., lower the water, greater the product thickness. We are using peristaltic pump for couple of reasons. First, there is access problem at site. Vac truck is too big to use driveway so it sits on street and hose runs up driveway. According to our field personnel, it is difficult for truck to find spot to 'sit' and when hose runs up driveway, it causes police grief because they have to drive around it. Second, wells are only 1-inch in diameter. Vac truck uses small hose which is lowered into well and well is almost immediately evacuated. Same process occurs with peristaltic pump, i.e., small tube is lowered into well and well is evacuated, so vac truck really provides no advantages. Cost was not a consideration. - JK 03/24/09: Reviewed System Perf Monitoring Rpt for Nov.'08 - Jan.'09 by URS, dated 3/4/09 (in eDocs). Rpt states that effluent of GWET system exceeded NYCDEP limits for discharge to sanitary sewer, system was shut down. Franklin Co. will install liquid-phase carbon unit to polish GW prior to discharge to sewer, sometime in 2nd Quarter '09. Rpt further states that GW and SVE systems removed elevated contam concentrations from soil and GW, and that approx. 6 gals of product was recovered from 5 on-site wells using peristaltic pump. GW samples were collected from wells VW-04, GEW-01, GEW-02 and GEW-03 on Jan. 5, '09; remaining wells were not sampled because they were dry or exhibited free product or had an obstruction. Of wells sampled, worst contam was in GEW-01 with 17,140 ug/L total VOCs (up from 14,455 ug/L in Oct.'08) and GEW-03 with 12,244 ug/L total VOCs (had free product in Oct.'08). Free product thickness continued to increase in MW-7, with 2.73 ft. on 1/5/09 and 2.64 ft. on 11609.- JK 08/11/09: Reviewed

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

Syst Perf Mon Rpt for Feb.-April '09 by URS, dated 5/27/09 (in eDocs). Rpt states GWET system was shut down during rpt period due to effluent exceeding NYCDEP discharge stds; rpt says Franklin Co. has installed activated carbon units to polish GW prior to discharge, and GWET system will be re-started in June '09. SVE system operated without interruption during rpt period, removing elevated contam concentrations from vadose zone. Approx. 7 gals of free product were recovered via peristaltic pump. GW samples were collected from 14 wells in April '09; hottest wells were GEW-1 with 24,980 ug/L total VOCs, MW-8 with 24,454 ug/L TVOCs, GEW-3 with 7,735 ug/L TVOCs, and IW-15 with 3,334 ug/L TVOCs. Free product thickness fluctuated ranging from 0 to 0.56 ft in MW-06, from 0.91 to 3.53 ft in MW-07, and from 0.01 to 0.68 ft in MW-09. Four other wells showed traces of product. - JK 12/16/09: Reviewed Syst Perf Mon Rpt for May-July '09 by URS, dated 9/9/09 (in eDocs). Rpt states GWET system was re-started on 6/3/09 and removed elevated levels of contaminants. SVE system operated without interruption during rpt period, but removed fewer contaminants from vadose zone during this rpt period. URS attributes this to construction activities related to removal/replacement of 4,000-gal gasoline UST. System's vapor discharge was in compliance. Approx. 5 gals of free product were recovered via peristaltic pump. GW sample was collected from GWET-1 on 7/9/09, result showed 151 ug/L total VOCs; other wells either had product or were obstructed by construction activities, so were not sampled. Wells MW-6 and MW-7 had most free product, averaging 0.28 ft and 0.69 ft, resp. during rpt period. - J. Kolleeny 12/17/09: Reviewed Syst Perf Mon Rpt for Aug.-Oct.'09 by URS, dated 11/24/09 (in eDocs). Rpt states SVE system operated throughout rpt period, removing more contaminants from vadose zone since construction activities associated with removal/replacement of 4k gasoline UST were completed. Vapor discharge was in compliance. GWET system removed elevated contam levels during this rpt period. Approx. 3 gals of free product were recovered via peristaltic pump from wells MW-7 and MW-9; overall product levels seem to be decreasing. GW samples were collected from 3 wells on 10/19/09; other wells either had product or were dry, so were not sampled. Well MW-6 had 38,573 ug/L total VOCs, and IW-15 had 25,628 ug/L TVOCs. - J. Kolleeny 04/13/10: Reviewed Syst Perf Mon Rpt for Nov.'09 - Jan.'10 by URS, dated 3/3/10 (in eDocs). Rpt states SVE and GWET systems operated throughout rpt period, removing contaminants from subsurface and GW. Vapor discharges were in compliance. GWET system removed elevated contam levels during this rpt period. Approx. 2.4 gals of free product were recovered by peristaltic pump from wells MW-7 and MW-9; MW-7 had 0.19 ft of product on 1/6/10 and 0.22 ft product on 1/19/10. Influent to GWET system from 3 extraction wells was sampled on Nov. 4 & Dec. 2, 2009 and on Jan. 16, 2010: GEW-01 had total VOCs of 8,946 ug/L, 5,537 ug/L and 54,490 ug/L, resp; GEW-02 had tVOCs of 130 ug/L, 122 ug/L and 1,530 ug/L, resp.; and GEW-03 had 7,263 ug/L, 5,710 ug/L and 2,729 ug/L, resp. GW sample taken from IW-15 on 1/6/10 had 12,885 ug/L tVOCs (down from 25,628 ug/L in Oct.'09) and sample from MW-6 had 29,410 ug/L tVOCs (down from 38,645 ug/L in Oct.'09). Other wells either had product or were dry, so weren't sampled. - JK 09/23/10: Reviewed Syst Perf Mon Rpt for Feb.-April 2010 by URS, dated 6/23/10 (in eDocs). Rpt states that SVE system operated thoughout rpt period; GWET system was off briefly on two occasions but restarted immediately during maintenance visits. Both systems removed elevated levels of VOCs from subsurface, and vapor discharges were in

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

compliance. Well gauging showed only traces of product (0.01 ft) in wells GEW-01 and GEW-03; no measurable product was collected by system. GW samples collected in April 2010 showed decreases in extraction wells vs. Jan. 2010 event (tho still elevated, in 1,000-2,000 ug/L total VOC range), but 2 mon wells that haven't been sampled in a while had high levels of VOCs: MW-6 had 9,051 ug/L tVOCs, MW-8 had 5,731 ug/L tVOCs. System operation and GW Mon will continue. - J. Kolleeny 01/10/11: Reviewed Syst Perf Mon Rpt for May-July 2010 by URS, dated 9/1/10 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated water and vapor discharges were in compliance with stds. Well MW-07 saw rebound in free product thickness, with 0.94 ft on 6/10/10 and 0.32 ft on 7/26/10; well MW-09 had trace of product in early May 2010, no product detected in June or July. About 2 gals of free product were removed from wells MW-07 and MW-09 using a peristaltic pump. GW sampling on 8/10/10 showed worst dissolved contam in well MW-06, which had 46,126 ug/L total VOCs (up from 9,051 ug/L in April 2010, extraction well GEW-1, which had 4,168.5 ug/L tVOCs (up from 1,634 ug/L in April 2010), and extraction well GEW-3, which had 1,399 ug/L tVOCs (down from 1,533 ug/L in April 2010); well MW-08 was obstructed and was not sampled. System operation and GW monitoring will continue. - J. Kolleeny 05/30/11: Reviewed Syst Perf Mon Rpt for August-October 2010 by URS, dated 2/16/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated water and vapor discharges were in compliance with stds. Rpt also states that URS is implementing several system modifications to improve performance, including conversion of existing horizontal ventilation well (VW-10 thru VW-13) to also function as an extraction well, and conversion of existing extraction well SVE-01A to also function as a ventilation well, to allow for increased flexibility in configuring system to extract from one or both sides of contaminated area. Well MW-07 had less free product during August & September, but rebounded to 1.63 ft on 10/21/10; well MW-09 had no measurable product during most of monitoring period but had 0.01 ft on 10/21/10. About 1.5 gals of free product were removed from wells MW-07 and MW-09 using a peristaltic pump. GW sampling on 10/21/10 showed worst contam in well MW-06 with 23,516 ug/L total VOCs (down from 46,126 ug/L in Aug. 2010) and well MW-08 with 2,677 ug/L tVOCs (was not sampled in Aug. 2010, but had 5,731 ug/L in April 2010); extraction wells GEW-1 had 870 ug/L tVOCs (down from 4,169 ug/L in Aug. 2010) and GEW-3 had 329 ug/L tVOCs (down from 1,399 ug/L in Aug. 2010). System operation and GW monitoring will continue. - J. Kolleeny 08/25/11: Reviewed Syst Perf Mon Rpt for November 2010 thru January 2011 by URS, dated 6/18/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface, and that URS has completed several system modifications to improve contaminant recovery and system operation. Treated GW and recovered soil vapor discharges were in compliance with stds. Only well MW-07 had measurable free product, with 1.62 ft on 1/5/11 and 0.12 ft on 1/19/11; approx 1.5 gals of product were removed by peristaltic pump. GW sampling on 1/5/11 showed worst wells were MW-06 with 23,062 ug/L total VOCs (down a little from 23,516 ug/L in Oct. 2010), MW-8 with 5,083 ug/L tVOCs (up from 2,677 ug/L in Oct. 2010) and IW-10 with 3,368 ug/L tVOCs (was not sampled in Oct. 2010). System operation and GW monitoring will continue. - J. Kolleeny 12/02/11: Reviewed Syst Perf Mon Rpt for Feb.-April 2011 by URS, dated 9/7/11 (in eDocs). Rpt states that

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated GW and recovered vapor discharges were in compliance with stds. Only well MW-07 had measurable LNAPL, with 0.60 ft on 4/4/11 and 0.21 ft on 4/27/11; approx 1.75 gals of product were removed by peristaltic pump. GW sampling on 4/4/11 showed decreases in contam in worst wells: MW-06 had 9,198 ug/L total VOCs (down from 23,062 ug/L in Jan. 2011), MW-8 had 2,923 ug/L tVOCs (down from 5,083 ug/L in Jan. 2011); however, GEW-1 had 1,591 ug/L tVOCs (was not sampled in Jan. 2011 but had 870 ug/L in Oct. 2010). Rpt includes tank inventory / comparison with DEC PBS records; these show that four 550-gal gasoline USTs were removed in mid-1990s or earlier, but location of these USTs is unknown. URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation and GW mon will continue. - JK 03/14/12: Reviewed Syst Perf Mon Rpt for 3rd Quarter 2011 by URS, dated 12/20/11 (in eDocs). Rpt states that on-site GWET & SVE systems continue to remove contam from subsurface. Only well had measurable LNAPL, but levels increased, with 0.78 ft on 6/6/11 and 0.65 ft on 7/18/11; approx 1.5 gals of product were removed by peristaltic pump. GW sampling on 7/18/12 showed worst contam in MW-6 with 12,569 ug/L total VOCs (up from 9,198 ug/L in April 2011), and MW-8 with 3,513 ug/L tVOCs (up from 2,923 ug/L in April 2012); well GEW-1 had 107 ug/L tVOCS, down significantly from 1,591 ug/L in April 2011. Rpt includes tank inventory and states that URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation and GW mon will continue. - J. Kolleeny 07/06/12: Received email from Kevin Shanahan of URS Corp: Jon, Next week we will be sending you/posting a rpt for Midtown South site which contains a work plan to collect soil samples at site. Purpose of soil sampling is to determine if SVE system was successful in remediating unsaturated soil. When you review rpt you may want to look at photo DSC05412 (attached) [in eDocs image folder as UST_AreaAfterBackfilling] to better understand limitations with drilling near new tank system. We are calling for 12 boring locations beneath building and one south of tank (foreground). - J. Kolleeny 07/12/12: Reviewed Syst Perf Mon Rpt for 4th Quarter 2011 by URS, dated 3/22/12 (in eDocs). Rpt states that treated GW and recovered soil vapor discharges were in compliance with stds. Free product was detected in well MW-7 at thicknesses ranging from 0.15 ft to 0.24 ft, and on one occasion in well MW-9 at 0.01 ft; approx 1.25 gals of product were removed by peristaltic pump. GW sampling on 10/10/11 showed worst contam in MW-6 with 7,294 ug/L total VOCs (down from 12,569 ug/L in July 2011), and MW-8 with 3,822 ug/L tVOCs (up a little from 3,513 ug/L in July 2011); injection well IW-15 had 932 ug/L tVOCS (had not been sampled since Jan. 2011, when it had 156 ug/L tVOCs), and GEW-1 had 114 ug/L tVOCs (up slightly from 107 ug/L in July 2011). Rpt includes UST inventory, states that URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation & GW mon will continue. Rpt seems to be missing several data tables (e.g., GW data table, well gauging data table). I sent email to Kevin Shanahan of URS requesting that rpt be re-issued with missing tables. - JK 07/17/12: Received email from Leng Ung of URS with attached pdf of revised 4th Quarter 2011 system performance monitoring rpt, with all data tables included (in eDocs). - J. Kolleeny 07/17/12: Reviewed Syst Perf Mon Rpt - 1st Quarter 2012 by URS, dated 7/11/12 (in eDocs). Rpt states that vapor and water discharges from SVE and GWET systems were in compliance with discharge limits. Free product was

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

detected in one well, MW-7, at thicknesses up to 0.36 ft; 1.25 gals of product were recovered by peristaltic pump. GW sampling on 1/9/12 showed worst dissolved contam in wells MW-6, with 7,160 ug/L total VOCs (down a little from 7,294 ug/L in Oct. 2011) and MW-8, with 2,060 ug/L tVOCs (down from 3,822 ug/L in Oct. 2011). Rpt states that URS will continue to operate SVE and GWET systems, but that systems are starting to show reduced benefit, with contam concentrations in recovered media reaching asymptotic conditions. Based on low vapor recovery by SVE system, URS recommends collecting confirmation soil samples from treatment area to determine if further soil remediation is needed. Rpt includes work plan for confirmation soil borings, proposing 13 borings laid out in a grid. I contacted Kevin Shanahan of URS and asked that work plan be revised to include historical soil data and that boring locations be modified to target specific areas where soil contam was detected in past; asked that confirmation soil boring work plan be revised and re-submitted as brief, separate document (rather than revising and re-submitting as part of 1st quarter 2012 monitoring rpt). He agreed to revise and re-submit work plan as requested. - JK 08/06/12: On 8/3/12, received revised Proposed Work Plan for Confirmation Soil Sampling by URS, dated 7/31/12 (in eDocs). Plan proposes 7 soil borings in area of known vadose zone soil impacts, to evaluate remedial progress by SVE system and need for continued operation of SVE system. I sent letter (in eDocs) to Afsar Samani of DDC, cc's to Mehrzad Asbagh of DDC, Kevin Shanahan & Harvey Roberts of URS, approving plan but requesting two addt'l soil borings and drilling of one proposed boring as close as possible to former boring SB-10. - J. Kolleeny 09/10/12: Reviewed System Performance Monitoring Rpt - 2nd Quarter 2012 by URS, dated 8/30/12 (in eDocs). Rpt states that SVE and GWET systems operated continuously thru quarter, and that vapor & water discharges from SVE and GWET systems were in compliance with discharge limits. Free product was detected in well MW-7, at thicknesses up to 0.34 ft; 1.5 gals of product were recovered by peristaltic pump. GW sampling on 4/23/12 showed MW-6 had 6,835 ug/L total VOCs (down from 7,160 ug/L in Jan. 2012), MW-8 had 2,497 ug/L tVOCs (up from 2,060 ug/L in Jan. 2012), GEW-1 had 133 ug/L tVOCs (up from 60 ug/L in Jan. 2012). Rpt concludes that URS will continue to operate remedial systems; however, systems are showing indications of reduced benefit, with concentrations of recovered soil vapors and GW sampling results reaching asymptotic conditions. Rpt notes that DEC approved confirmation soil sampling plan in Aug. 2012 and that sampling is scheduled for 3rd quarter 2012. - J. Kolleeny 06/06/13: Reviewed System Performance Monitoring Rpt - 3rd & 4th Quarters 2012 by URS, dated 1/16/13 (in eDocs). Rpt states that SVE system was found off on arrival on 7/6/12 because the electrical switch had been turned off; system was restarted during same visit; and GWET system was off on arrival on 8/29/12 due to an air stripper alarm; air stripper was cleaned, alarm re-set and system re-started. Vapor discharges from both systems were in compliance with discharge limits. Free product was detected in well MW-7, from 0.05 ft to 0.42 ft; product was recovered with peristaltic pump on 12 visits, URS will continue product recovery at least monthly. GW sampling on 7/16/12 and 10/10/12 showed significant dissolved impacts persist in wells MW-6 and MW-8: MW-6 had 8,675 ug/L total VOCs in July 2012 (up from 6,835 ug/L in April 2012) and increased to 9,795 ug/L in Oct. 2012; MW-8 had 4,007 ug/L tVOCs in July 2012 (up from 2,497 ug/L in April 2012) and increased to 6,944 ug/L in Oct. 2012. Soil sampling in Oct. 2012

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

showed significant residual vadose zone soil contam in boring S-09 near north end of easternmost horizontal SVE well, with 151,920 ug/kg total VOCs; two other borings had significant contam in saturated zone (S-04 with 218,380 ug/kg tVOCs and S-05 with 194,330 ug/kg tVOCs). Rpt states that URS will investigate whether SVE system can be modified to more effectively target remaining area of soil contam. URS will continue to operate both SVE and GWET systems, and will evaluate options to improve systems' effectiveness; twice monthly product recovery and quarterly GW sampling will continue. - J. Kolleeny 09/25/13: Reviewed System Performance Monitoring Rpt - 1st & 2nd Quarters 2013 by URS, dated 7/17/13 (in eDocs). SVE and GWET systems operated throughout rpt period, and vapor discharges were in compliance with discharge limits. Free product was detected in well MW-7 from 0.04 to 0.6 ft; product was recovered with peristaltic pump on 8 visits. GW sampling on 1/8/13 and 4/3/13 showed MW-6 had 58 ug/L total VOCs in Jan. 2013 (anomalous decrease from 9,795 ug/L in Oct. 2012) and rebounded to 7,156 ug/L in April 2013, while MW-8 had 6,656 ug/L tVOCs in Jan. 2013 (down from 6,944 ug/L in Oct. 2012), and decreased to 1,025 ug/L tVOCs in April 2013. Rpt concludes that soil & GW impacts at site are decreasing but remain high enough to warrant further remedial actions. URS will continue quarterly GW sampling, manual product recovery and operation of SVE & GWET systems, and will continue to evaluate options to improve and/or replace remedial systems to more effectively address remaining areas of contam. - J. Kolleeny 01/30/14: Reviewed System Performance Monitoring Rpt for 3rd & 4th Quarter 2013 by URS, dated 1/17/14, rcvd on 1/28/14. SVE & GWET systems operated throughout rpt period; vapor discharges were in compliance with discharge limits. Well gauging on 8 visits during rpt period showed up to 0.21 ft of LNAPL in well MW-7 and up to 0.04 ft in MW-9; ~1.75 gals of product were recovered from MW-7 and ~1.25 gals were recovered from MW-9, using a peristaltic pump. GW sampling in July 2013 showed well MW-6 had 10,623 ug/L total VOCs (up from 7,156 in April 2013) and well MW-8 had 6,044 ug/L tVOCs (up from 1,025 ug/L in April 2013). GW sampling in Oct. 2013 showed well MW-6 had 4,621 ug/L tVOCs and well MW-8 had 1,708 ug/L tVOCs. Based on persistence of product and high VOC levels at site, rpt makes proposals to better evaluate site conditions and improve effectiveness of on-site remedial systems. Specifically, URS recommends: (1) advance 3 new soil borings to evaluate current soil conditions, (2) over-drill existing monitoring wells MW-6, MW-7, MW-8 and MW-9 (1 diameter wells) and replace with 4 diameter wells for improved product recovery and to allow for future remedial actions (e.g., placement of absorbent or ORC socks, extraction by vac truck, and/or surfactant injections to desorb contaminants from soil), (3) install 5 new 4 diameter mon wells to better delineate areas of product and dissolved contam, (4) install addt'l 6 diameter GW extraction well in area of greatest contam, (5) redevelop 3 existing extraction wells to improve GW recovery, and (6) possibly inject surfactants to enhance soil remediation. Based on results of 3 new soil borings, URS may implement proposed modifications to on-site SVE system. Once product in wells MW-7 & MW-9 has been addressed, URS proposes to shut down existing GW extraction wells GEW-1, GEW-2 & GEW-3 and operate only new extraction well GEW-4 to determine its radius of influence; after review of resulting data, addt'l extraction wells will be brought on-line. After speaking with Kevin Shanahan of URS about proposals, I sent letter (in eDocs) approving proposals to Afsar Samani of DDC, cc's to Marcy Asbagh of DDC, Kevin

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

Shanahan and Harvey Roberts of URS, noting that before doing any surfactant injections, work plan must be submitted for DEC review/approval. - J. Kolleeny 09/29/14: Reviewed System Performance Mon Rpt for 1st & 2nd Quarter 2014 by URS, dated 6/25/14 (in DecDocs). Rpt states that SVE system vapor discharge and air stripper off-gas were in compliance during mon period, based on both PID screening and sample analysis by lab. GW recovery wells GEW-1, GEW-2 & GEW-3 continue to operate and recover GW. In addition, URS visited site 10 times during rpt period to gauge wells and recover LNAPL; well MW-7 had product every visit except 4/23/14, with thicknesses up to 0.21 ft, and they recovered ~2.25 gals during period. Rpt states that, as proposed by URS and approved by DEC, URS will overdrill existing one-inch wells MW-6, MW-7, MW-8 & MW-9 and replace with 4-inch wells, plus they will install five addt'l wells in this area to better delineate product plume. GW sampling was performed in January and April 2014. Jan. 2014 results showed well MW-6 had 5,142 ug/L total VOCs (up from 4,621 ug/L in Oct. 2013) and MW-8 had 5,908 ug/L tVOCs (up from 1,708 ug/L in Oct. 2014). April 2014 results showed well MW-6 declined to 4,453 ug/L tVOCs; MW-8 was not sampled due to vehicle parked over well. Operation of SVE and GWET systems, GW sampling and LNAPL recovery will continue at site. - J. Kolleeny 09/30/14: Reviewed Request for Soil Vapor Extraction System Shutdown by URS, dated 9/10/14 (in DecDocs). Rpt notes that monitoring of on-site SVE system s vapor influent indicates that system has reached limit of effectiveness and is no longer recovering measurable quantities of HC vapors. Rpt also notes that soil data indicate system has effectively treated vadose zone soil contamination and that remaining soil impacts at site are located mainly in saturated soil zone, which is not targeted by SVE system. Ergo, URS requests approval to suspend operation of SVE system and prepare system for long-term shutdown. System will remain on-site and URS will evaluate future site data to determine if resuming system operation is warranted. In meantime, other remedial activities at site operation & modification of GWET system, product recovery, GWET system performance monitoring, and quarterly GW sampling will continue. I sent letter (in DecDocs) approving system shutdown to Afsar Samani of DDC, cc's to Merhzad Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS. - J. Kolleeny 03/12/15: Reviewed System Performance Monitoring Rpt for 3rd & 4th Quarter 2014 by URS, dated 1/9/15 (in DecDocs). Rpt states that operation of on-site SVE system terminated on 10/1/14. As for GWET system, results of PID monitoring of air-stripper vapor effluent were ND during rpt period, and lab analysis of effluent air sample was ND for benzene, so system vapor discharge was in compliance. Sampling of GWET system GW influent showed system is recovering low levels of dissolved VOCs (up to 90 ug/L total VOCs). Well gauging and product recovery were performed 8 times during rpt period; product was detected in well MW-7 each time, with greatest thickness of 0.36 ft; about 2 gals total product recovered. GW sampling was performed in July and Oct. 2014; results showed well MW-6 had 3,234 ug/L tVOCs in July 2014 (down from 4,453 ug/L in April 2014) and increased to 4,406 ug/L tVOCs in Oct. 2014; well MW-8 had 4,264 ug/L tVOCs in July 2014 (not sampled in April 2014; had 5,908 ug/L tVOCs in Jan. 2014) and decreased to 1,046 ug/L tVOCs in Oct. 2014. Rpt states that URS will over-drill existing 1-inch wells MW-6, MW-7, MW-8 & MW-9 and replace with 4-inch wells, and will install 5 addt'l mon wells in this area to better delineate LNAPL plume. Also, an addt'l GW extraction well will be installed

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

within dissolved-phase plume, existing extraction wells will be re-developed, and URS may apply surfactants to subsurface to enhance soil remediation. Qtrly GW monitoring, GWET system operation and manual product recovery efforts will continue, and URS will evaluate need for surfactant applications or other remedial actions; they will prepare/submit work plan prior to doing any addt'l remedial actions. - JK 03/12/15: I emailed Kevin Shanahan of AECOM to note that 3rd & 4th quarter 2014 rpt does not include any SVE system monitoring data for 3rd quarter (system was permanently shut down on Oct. 1st, 2014). He sent table with SVE monitoring data for Aug.-Sept. 2014 (July 2014 data were included in System Shutdown Request Letter rpt). Table in DecDocs as brief. - JK 05/21/15: Reviewed System Performance Monitoring Rpt for First Quarter 2015 by URS, dated 4/10/15 (in DecDocs). Rpt states that URS is planning to add a 4th GW extraction well to GWET system, install addt'l monitoring wells, and re-install some wells with larger diameter casings to enhance remediation and monitoring at site. PID screening and lab sampling of GWET system's air stripper vapor effluent showed air discharge is in compliance. Recovery of free product from well MW-7 with peristaltic pump was performed 4 times during quarter, for total of ~1 gal removed; highest product thickness measured was 0.18 ft. During GW sampling in Jan. 2015, well MW-8 was not sampled because access to well was obstructed. Sampling results for 1/13/15 showed well MW-6 had 2,665 ug/L total VOCs (down from 4,406 ug/L in Oct. 2014), well MW-9 had 11,316 ug/L tVOCs (not sampled in April, July or Oct. 2014), and extraction well GEW-1 had 148 ug/L tVOCs (up from 47 ug/L in Oct. 2014). Sampling of influent to GW treatment system on 1/7/15 showed influent from GEW-1 had 165 ug/L tVOCs, GEW-2 had 6 ug/L tVOCs, and GEW-3 had 56 ug/L tVOCs. Rpt states that URS will continue quarterly GW monitoring/sampling, continue manual LNAPL recovery, continue operation of GWET system & proceed with enhancements to system (install'n of new extraction well and re-development of existing extraction wells), proceed with installing new mon wells and replacing several narrow-diameter wells, and continue to evaluate need for surfactant injections or other remedial actions to address residual free product and saturated soil zone contamination. - J. Kolleeny 07/23/15: Reviewed System Performance Monitoring Rpt for 2nd Quarter 2015 by URS dated 6/2/15 (in DecDocs). Rpt covers period 1/29/15 to 4/29/15 as 2nd qtr 2015. Rpt states that URS plans to add a 4th GW extraction well to GWET system, install addt'l monitoring wells, and re-install some wells with larger diameter casings to enhance remediation & monitoring at site. PID screening and lab sampling of GWET system's air stripper vapor effluent showed air discharge is in compliance. LNAPL was removed from well MW-7 3 times during quarter using a peristaltic pump; well had up to 0.32 ft of LNAPL; ~0.75 gals were recovered. GW influent samples from GWET system extraction wells show system is recovering low levels of VOCs. GW sampling in April 2015 showed well MW-6 had 3,445 ug/L total VOCs (up from 2,665 ug/L in Jan. 2015), well MW-8 had 248 ug/L tVOCs (up from 148 ug/L in Jan. 2015), well MW-9 had only 0.8 ug/L tVOCs (down from 11,316 ug/L in Jan. 2015; this well has periodically had LNAPL, most recently in March 2014). URS will continue quarterly GW monitoring & sampling, manual LNAPL recovery, and operation of GWET system (proceeding with system enhancements in 3rd quarter 2015); in addition, URS will proceed with installing new mon wells and replacing several narrow wells, and will continue to evaluate need for surfactant injections or other remedial actions to address

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

residual free product and saturated soil zone contamination. - J. Kolleeny 10/30/15: Received email from Kevin Shanahan of URS/AECOM: Jon, Envirotrac is performing routine O&M for existing GW pump & treat system. They are also constructing system enhancements over next few months. Today we were informed that GW extraction pump in GEW-02 is broken. GEW-02 is lowest producing well at site, is located outside of plume and is being replaced by new extraction well GEW-04 in November. We wanted to make you aware that GW extraction at GEW-02 in no longer happening and that new extraction well should be drilled and functional by end of year. I sent email reply: Kevin, Thanks for letting me know. I agree it doesn t make sense to try to repair or replace pump in GEW-02, considering its location outside plume and its historically low yield. Please continue to keep me posted and let me know when new extraction well GEW-04 has been installed. - J. Kolleeny 11/23/15: During quarterly DDC Consent Order Status Meeting on 11/19/15, Harvey Roberts of URS related that a local citizen had contacted NYPD and URS to complain about noise generated by on-site GW recovery system. URS had modifications made to system, resulting in decrease of ~15 decibels (a significant noise decrease); however, citizen continued to make complaints. Mr. Roberts conducted a test in which he turned off system and asked citizen if there was any difference in noise, citizen said no difference, suggesting system may not be source of noise perceived as bothersome. When Roberts pointed out that system had been off when he had asked for noise evaluation, citizen remained skeptical and continued to maintain that system is source of noise problem. At meeting, I asked if system GW influent contains significant levels of dissolved contaminants. Kevin Shannahan of URS/AECOM responded that VOC levels in system influent are very low. I suggested shutting down GWET system until new recovery well is installed in heart of plume, since system is currently recovering minimal hydrocarbons and shutting it temporarily might resolve noise complaints. URS/AECOM said they would look into shutting down system. On 11/23/15, I received email from Harvey Roberts: Jon, Per your suggestion at last week s Quarterly Status Meeting, URS has instructed Envirotrac, Midtown South Pct remediation system operator, to shut treatment system while they modify system. Envirotrac plans to shut system tomorrow during its regularly scheduled O&M visit. System operation will resume in late Jan. 2016 when modifications have been completed. I sent email reply: Harvey, Thanks for letting me know. I m assuming that latest GW data show contaminant plume confined to site. If there is a sampling event before system modifications have been completed in Jan. 2016 and GW data show that plume is migrating off site, it may be necessary to re-start system before mods are completed, to re-establish hydraulic control. - JK 12/10/15: Reviewed System Performance Monitoring Rpt for 3rd Quarter 2015 by URS, dated 9/1/15 (in DecDocs). Rpt seems to cover period from 4/29/15 thru 7/29/15 as 3rd qtr of 2015. Rpt states that URS will add a 4th GW extraction well to GWET system, install addt'l monitoring wells, reinstall several existing wells with larger diameter casings, and take steps to reduce noise emanating from system. PID screening & lab sampling of system's vapor discharge showed compliance with DEC stds. URS visited site 4 times during rpt period, detecting LNAPL in well MW-7 each time, at thicknesses up to 0.83 ft. ~1 gal of LNAPl was recovered. GW sampling on 7/20/15 showed well MW-6 had 3,178 ug/L total VOCs (down from 3,445 ug/L in April 2015), well MW-8 had 1,665 ug/L tVOCs (up from 248 ug/L in April 2015), well MW-9 had 2,398 ug/L tVOCs (up from 0.8 ug/L in April

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

2015). Rpt notes that well MW-9 last had LNAPL in March 2014, and that GW samples from MW-9 have shown highly fluctuating tVOCs. Rpt states that, in addition to system mods & well install'ns mentioned above, URS will continue to evaluate need for surfactant injections or other remedial actions to address saturated soil contam. URS will continue quarterly GW monitoring & LNAPL recovery efforts. - JK 03/21/16: Reviewed System Performance Monitoring Rpt for 4th Quarter 2015 by URS, dated 12/2/15 (in DecDocs). Rpt covers period from 7/30/15 to 10/28/15 as 4th qtr 2015. PID screening & lab sampling of GWET system's vapor discharge showed compliance with DEC stds. URS visited site 3 times during rpt period, detecting LNAPL in well MW-7 each time, up to 0.94 ft in thickness; ~1 gal of LNAPL was recovered. GW sampling on 10/7/15 showed well MW-6 had 3,378 ug/L total VOCs (up from 3,178 ug/L in July 2015), well MW-8 had 1,222 ug/L tVOCs (down from 1,665 ug/L in July 2015), well MW-9 had 5,541 ug/L tVOCs (up from 2,398 ug/L in July 2015). Rpt states that on 10/28/15, GW pump in extraction well GEW-02 malfunctioned; URS contacted DEC and it was agreed that since well is outside main plume and has historically had low yield, it would not be worth repairing or replacing pump; system continues to operate with two recovery wells, GEW-01 and GEW-03, until new recovery well GEW-04 is installed and brought on line. URS will install 4th recovery well, install addt'l monitoring wells and replace several existing 1-inch wells with 4-inch wells (according to approved plan). They will also continue to evaluate need for surfactant injections, and will continue quarterly GW monitoring & LNAPL recovery efforts. - J. Kolleeny 05/31/16: Reviewed System Performance Monitoring Rpt for 1st Quarter 2016 by URS, dated 4/7/16 (in DecDocs). Rpt covers period from 10/29/15 to 1/18/16 as 1st qtr 2016. Based on PID screening of GWET system's vapor influent/effluent, it appears system discharge complied with DEC stds (system was shut down on 11/24/15, prior to quarterly air sampling, in prep for reinstall'n of wells and modifications to GWET system). In Nov. 2015, well MW-7 had 0.28 ft of LNAPL; during Dec. 2015 & Jan. 2016, well was not gauged as access to well was obstructed at those times. Approx 0.25 gal of LNAPl was recovered from MW-7. GW sampling was performed on 1/18/16; wells MW-6, MW-7 & MW-8 were not sampled because they were in process of being reinstalled as larger wells. Well MW-9 had 3,988 ug/L total VOCs (down from 5,541 ug/L in Oct. 2015); well GEW-1 had 53 ug/L tVOCs (up from 40 ug/L in Oct. 2015). Rpt states that subcontractor EnviroTrac is in process of implementing remedial system modifications approved by DEC, including install'n of addt'l delin wells and an addt'l GW extraction well; this work is expected to be completed in early 2016, at which point operation of GWET system will resume. URS will continue quarterly GW sampling and manual product recovery. - J. Kolleeny 09/07/16: Reviewed System Performance Monitoring Rpt for 2nd & 3rd Quarters 2016 by URS, dated 8/11/16 (in DecDocs). Rpt covers period from Jan. 19 thru July 22, 2016 as 2nd & 3rd quarters of 2016.) Rpt summarizes recent modifications at site that were proposed by URS and approved by DEC in Jan. 2014 - they over-drilled & replaced 1-inch wells MW-6, MW-7 & MW-8 with 4-inch wells (MW-9 could not be over-drilled as planned, so new well MW-15 was installed nearby), installed four new wells MW-10, MW-11, MW-13 & MW-14 (proposed well MW-12 was not installed due to subsurface obstruction, MW-13 was moved to west to compensate), installed addt'l extraction well GEW-4; in addition, they plan to redevelop extraction wells GEW-1 and GEW-3 to ensure proper functioning (GEW-2 consistently show no contam, so it won't be

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

redeveloped.) GWET, shut down since 11/24/15, was re-started with new extraction well on 8/3/16. During rpt period, free product was detected in well MW-7/7R (0.03 ft in MW-7 in March, 0.08 ft in MW-7R in April 2016) and in well MW-15 (0.02 ft in April 2016). Absorbent socks were placed in MW-7R and MW-15 in April, and were replaced in June 2016 as both socks were 100% saturated. GW sampling in April 2016 showed well MW-6R had 18,434 ug/L total VOCs, well MW-8R had 1,981 ug/L tVOCs, well MW-10 had 1,410 ug/L tVOCs, and well MW-11 had 8,359 ug/L tVOCs. GW sampling in July 2016 showed MW-6R decreased to 7,150 ug/L tVOCs, MW-8R decreased to 1,591 ug/L tVOCs, MW-10 increased to 1,959 ug/L tVOCs, and MW-11 decreased to 2,892 ug/L tVOCs. URS will continue manual product recovery, quarterly GW sampling, and operation/monitoring of GWET system; they'll also continue to evaluate need for surfactant injections or other actions to address residual LNAPL and saturated soil contam, and will submit a work plan for DEC approval before implementing any addt'l remedial actions. - JK 03/24/17: Reviewed System Performance Monitoring Rpt for 4th Quarter 2016 by URS, dated 12/22/16 (in DecDocs). Rpt discusses 2016 modifications to GW extraction & treatment system at site (mainly install'n & operation of addt'l extraction well GEW-4). URS estimates total gals of GW collected by each well during rpt period as: GEW-1 ~9,233 gals, GEW-3 182 gals, GEW-4 3,840 gals. Extraction wells GEW-1 and GEW-3 operated from 9/27 thru 10/6, and were then shut off to determine influence of GEW-4 when pumping on its own. GW samples from extraction wells taken by EnviroTrac (subcontractor) on 10/11/16 showed GEW-1 had 240 ug/L total VOCs, GEW-3 had 5,725 ug/L tVOCs, GEW-4 had 5,917 ug/L tVOCs. Samples collected by URS on 10/5/16 showed GEW-1 had 224 ug/L tVOCs, GEW-3 had 60 ug/L tVOCs, and GEW-4 had 23,293 ug/L tVOCs. Rpt states these data indicate that new well GEW-4 was installed in area with highest dissolved impacts as intended. Samples of vapor effluent from air stripper and GW discharge to NYC sewer were in compliance. No free product was detected in 3 site visits this quarter, but absorbent socks in wells MW-7R & MW-15 were replaced on each visit. GW sampling on 10/5/16 showed well MW-6R had 4,581 ug/L tVOCs (down from 7,150 ug/L in July 2016), well MW-8R had 1,201 ug/L tVOCs (down from 1,591 ug/L in July 2016), well MW-10 had 2,819 ug/L tVOCs (up from 1,959 ug/L in July 2016), well MW-11 had 348 ug/L tVOCs (down from 2,892 ug/L in July 2016). Rpt states that GW & soil contam in saturated & smear zones remain high enough to warrant continued remediation, and small amts of free product remain in a small area of site. URS concludes that data from newly installed wells have better delineated GW impacts, showing plume is limited to 40 ft by 50 ft area. URS will continue quarterly GW monitoring, continue manual product recovery, optimize GWET system ops, and continue to evaluate need for surfactant injections or other remedial action. They also propose to remove wells that are consistently dry from GW monitoring program (IW-3, IW-10, IW-13, IW-15, VW-02 & VW-04), and to decommission a number of 1-inch injection wells (IW-1 thru IW-5A, IW-11, IW-12, IW-14, IW-16 thru IW-18), which are often dry and/or are located near existing monitoring wells. I sent email (in DecDocs) to Jerry Aliberti of DDC, cc's to March Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS/AECOM, approving these recommendation. - J. Kolleeny 06/15/17: Reviewed System Performance Monitoring Rpt for First Quarter 2017 by URS, dated 3/30/17 (in DecDocs). Rpt covers period from Oct. 2016 thru Jan. 2017. During this period, extraction wells GEW-1 & GEW-3 were not operating & did not recovery any GW;

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

GEW-4 recovered 15,320 gals (155 gpd). Sampling of influent to GWET system in Nov. & Dec. 2016 and Jan. 2017 showed total VOCs ranged from 726 ug/L to 2,3339 ug/L in GEW-1, from 1,029 ug/L to 3,285 ug/L in GEW-3, and from 1,441 ug/L to 3,282 ug/L in GEW-4. Sampling of system discharge to NYC sewer system showed effluent was in compliance with NYCDEP discharge criteria. GW samples collected from extraction wells on 1/17/17 showed no VOCs in GEW-1 or GEW-2, GEW-3 had 9.5 ug/L of MTBE, and GEW-4 had 8,147 ug/L tVOCs. URS visited site 3 times during quarter to gauge wells & recover LNAPL, but no LNAPL was detected in any wells; however, absorbent socks in MW-7R & MW-15 continue to collect LNAPL. Socks were replaced in Nov. 2016. GW sampling on 1/17/17 showed well GEW-4 had 8,147 ug/L tVOCs (down from 23,293 ug/L in Oct. 2016), well MW-6R had 104 ug/L tVOCs (down from 4,581 ug/L in Oct. 2016), well MW-10 had 289 ug/L tVOCs (down from 2,819 ug/L in Oct. 2016), well MW-11 had 257 ug/L tVOCs (down from 348 ug/L in Oct. 2016); wells MW-8R & MW-15 were not sampled due to vehicles parked over wells. URS will continue quarterly GW monitoring, product recovery by absorbent socks (or other methods as appropriate), operation of GWET system, evaluation of need for surfactant injections or other remedial actions to address residual LNAPL and saturated zone soil impacts, and will decommission 11 injection wells DEC approved for removal from GW monitoring program. - JK 07/24/17: Reviewed System Performance Monitoring Rpt for Second Quarter 2017 by URS, dated 6/13/17 (in DecDocs). Rpt covers period from 1/19/17 thru 4/27/17. Rpt states that GWET system operated in compliance with benzene air emission limit, based on weekly PID screening of sir stripper influent & effluent showing no detections and on quarterly samples of vapor influent & effluent showing no VOCs detected. During this quarter, system operated using only new extraction well GEW-4, which recovered 14,130 gals of GW (143 gpd). Monthly GW samples from extraction wells showed that on Feb. 23, 2017, GEW-1 had 924 ug/L total VOCs, GEW-3 had 1,621 ug/L tVOCs, GEW-4 had 1,862 ug/L tVOCs; on March 29, 2017, GEW-1 had 852 ug/L tVOCs, GEW-3 had 1,517 ug/L tVOCs, GEW-4 had 1,906 ug/L tVOCs; on April 27, 2017, GEW-1 had 698 ug/L tVOCs, GEW-3 had 1,458 ug/L tVOCs, GEW-4 had 1,929 ug/L tVOCs. Monthly samples of effluent from GWET showed system discharge was in compliance with NYCDEP criteria. Quarterly GW sampling on 4/13/17 showed well GEW-4 had 9,799 ug/L tVOCs (up from 8,147 ug/L in Jan. 2017), well MW-6R had 130 ug/L tVOCs (up from 104 ug/L in Jan. 2017), well MW-10 had 115 ug/L tVOCs (down from 289 ug/L in Jan. 2017), well MW-11 had 509 ug/L tVOCs (up from 257 ug/L in Jan. 2017). No measurable LNAPL was reported for this quarter, but LNAPL continued to be recovered by absorbent socks installed in wells MW-7R and MW-15; socks in MW-15 were replaced each month during this quarter. URS will: continue quarterly GW monitoring, continue product recovery by absorbent socks and/or other methods as appropriate, optimize GWET system for more continuous pumping to maintain/increase GW capture zone, evaluate need for surfactant injections or other actions to address residual LNAPL & saturated zone soil impacts, decommission eleven injection wells, repair leak in carbon vessel T-501 or replace unit, heat trace & insulate exposed section of discharge pipe from GWET to DEP sewer system. - J. Kolleeny 01/08/18: Reviewed System Performance Monitoring Rpt for Third Quarter 2017 by URS, dated 9/15/17 (in DecDocs). Rpt covers period from 4/28/17 to 7/26/17. Based on PID readings and air sampling data, on-site GWET system operated in compliancde with benzene air discharge limit. During quarter,

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

extraction well GEW-1 recovered 5 gals, GEW-3 recovered 0 gals, GEW-4 recovered 10,523 gals (117 gpd). GW influent samples from extraction wells showed that on 5/26/17, GEW-1 had 94 ug/L total VOCs, GEW-3 had 349 ug/L tVOCs, GEW-4 had 1,770 ug/L tVOCs; on 6/30/17, GEW-1 had 77 ug/L tVOCs, GEW-3 had 857 ug/L tVOCs, GEW-4 had 1,835 ug/L tVOCs; on 7/26/17, GEW-1 had 164 ug/L tVOCs, GEW-3 had 672 ug/L tVOCs, GEW-4 had 1,452 ug/L tVOCs. Treated GW discharge from GWET system complied with NYCDEP criteria. There were no system shutdowns this quarter. Three well gauging events showed no LNAPL detected in any wells this quarter (absorbent socks were removed from MW-7R & MW-15 on 5/24/17 to see if LNAPL would collect, but no measurable product was observed). GW sampling on 7/26/17 showed well GEW-4 had 11,327 ug/L tVOCs (up from 9,799 ug/L in April 2017), well MW-6R had 384 ug/L tVOCs (up from 131 ug/L in April 2017), well MW-7R had 16,886 ug/L tVOCs (not sampled in April 2017, Jan. 2017 or Oct. 2016 due to LNAPL in well), well MW-9 had 2,540 ug/L tVOCs (not sampled previous 3 quarters), well MW-10 had 151 ug/L tVOCs (up from 115 ug/L in April 2017), well MW-11 had 316 ug/L tVOCs (down from 509 ug/L in April 2017), well MW-15 had 65,257 ug/L tVOCs (not sampled due to LNAPL in Jan. & April 2017, or Oct. 2016), well GEW-1 had 92 ug/L tVOCs (up from 10 ug/L in April 2017). URS will continue quarterly GW monitoring, use absorbent socks for LNAPL recovery from affected wells, optimize GWET system, evaluate need for surfactant injections, turn on pump in well GEW-1, decommission 11 injection wells, replace liquid-phase carbon adsorbers, insulate exposed section of discharge pipe from GWET to DEP sewer system. - JK "

DEC Memo:	"This site is already an active longterm remediation site - Spill #9512583 As part of this remediation effort, there are exisiting monitoring wells on the site that are tested periodically. Today, the geologist found 4 ft of gasoline product floating on the water table in a well that previously had nothing. The manway was checked and found to be full of gasoline as well. This was clearly an overfill from a recent delivery. Franklin and/or URS is working the long term cleanup of the site and has arranged for a vac truck to clear out whatever is possible right now. On a long term basis, the existing remediation system will be used to skim the free product from the water table and remove it from the site. This problem will now be addressed by the contractor through the existing long term spill number on file."
Remarks:	"MATERIAL IS CONTAINED IN SUMP: POSSIBLY DUE TO OVERFILL, BUT UNCONFIRMED AT THIS TIME:"

DEC Memo:	"Part of a long term recovery operation at the site. See also spill nos. 0702185 and 0702402. 08/16/07: Notified of this spill by Ryan Piper of spill response staff on 8/15/07; sent email to Jane Staten and Harvey Roberts of URS (DDC consultant handling long-term remediation of this site under DDC consent order), with cc to Afsar Samani of DDC, stating: I've been informed by our Spill Response staff that spills are continuing to occur related to damaged fill line to gasoline UST at Midtown South. Intitial spill (0613411) occurred in March '07 when gasoline was found in tank sump and nearby monitoring well. According to URS's system performance reports, Franklin Co. determined that tank's fill line was damaged, and they installed direct fill to tank to bypass damaged line. Do you know if Franklin plugged up old fill port when they installed direct fill? It appears that fuel deliveries continue to be made to old fill line, and product keeps showing up in tank sump and monitoring wells. On May 23rd, spill 0702185 was reported by NYPD because sump was filled with gasoline and Veeder Root alarm was going off. Today, another spill was called in (0705553) because of product in sump. Please take necessary steps to have old fill port blocked so it cannot be used anymore (or repaired so it won't leak) as soon as possible, and please also check out entire tank system to make certain it is damaged fill line that's problem, and that there are no other leaks in system. Please get back to me on this and let me know what actions have been taken to address this situation. Afterwards, spoke again with Ryan Piper, who suggested tank be taken out of service and emptied until problem is solved. Sent email to Afsar Samani of DDC, cc's to Jane Staten & Harvey Roberts of URS: In light of ongoing problems with gasoline UST at Midtown South Precinct, I strongly suggest that tank be taken out of service and emptied until problem(s) with tank and piping has/have been addressed. If this is not practical because police have no alternative location to fuel their vehicles, then please take whatever steps are necessary to immediately rectify problem(s) with tank system. NYCDDC is conducting remediation at this site using SVE and groundwater extraction & treatment systems, and these ongoing spills of fresh gasoline to subsurface will set back remedial efforts for months, or more likely, years, so it is in DDC's interest to resolve this situation promptly. In addition, these releases are a violation of Environmental Conservation Law, as you are aware, and if they continue to occur, our spill responders may be inclined to call Environmental Conservation Officers to site to issue summons. On 8/16/07, received email from Afsar Samani of DDC: Harvey informed me that vac-truck is scheduled to remove product from sump today. Also, NYPD subcontractor is going to be scheduled to repair fill line. URS is looking into

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

this and will make all necessary action to make sure tank and fill port is tight. Then, received email from Jane Staten of URS: I just spoke with Lt. Pete Polanco for an update on problems with gasoline tank at Midtown South Precinct. According to Lt. Polanco, NYPD tank contractor inspected fuel fill line this morning and found no problems with integrity of line. Therefore, Lt. Polanco believes that product in tank sump was caused by fuel delivery vendor. NYPD are expecting fuel delivery vendor at site this afternoon to discuss problem and also to remove gasoline currently in sump. I will keep you posted. I then sent email to Afsar Samani, with cc's to Jane Staten & Harvey Roberts of URS, Jerry Aliberti of DDC and Lt. Peter Polanco of NYPD: Thank you for your response. Please be advised that no fuel deliveries should be made to gasoline tank at Midtown South until tank system has been tested to insure integrity of all elements of system. Documentation of tightness test results, and of any repairs made to fill line since problem was discovered in March 2007, must be submitted to NYSDEC before fuel deliveries can resume. This situation is high priority and NYPD should arrange for tightness testing immediately. Then, received phone call from Lt. Polanco of NYPD, who said repairs to damaged fill line were done in June and fill line was tightness tested and passed, and he believes current problem is due to fuel delivery vendor not hooking up vapor recovery line (truck is parked in street long distance from fill port, so there's long length of delivery hose). He said product will be removed from sump and fill line will be tested again. I asked him to submit documentation of repair work and tightness testing, and sent him email with my address. Then, I was cc'd on email from Afsar Samani of DDC to Lt. Polanco of NYPD: We were informed by following correspondence from NYSDEC that gasoline tank over at Midtown South Police Precinct should not receive any more deliveries until a tightness test has been scheduled. Please let DDC know when you can arrange for your subcontractor to perform a tightness test on this tank. This is very crucial to remedial effort that URS is performing to clean up site on behalf of DDC. - J. Kolleeny 08/21/07: Received fax on 8/20/07 from Lt. Polanco of NYPD fuel control unit, with letter from Energy Tank & Environmental Services dated 7/16/07 describing repairs to and pressure testing of fill line to gasoline UST (in eDocs). Sent same-day email response to Lt. Polanco, cc's to Afsar Samani & Jerry Aliberti (DDC), Jane Staten & Harvey Roberts (URS): Thank you for faxed description of repair work to fill line of gasoline UST at Midtown South and diagram of site, tank and fill port, provided by Energy Tank & Environmental Services, Inc. However, these items do not completely satisfy my request for documentation of tank repairs and testing of fill line, and they raise additional questions. Page that describes repairs and subsequent pressure testing of line is dated 7/16/07. Is that date when repairs were done? I would like to see dated invoice for repair work in addition to this description. Description states that problem was with primary fill line, and that secondary line was intact, which allowed product to go into containment sump and not into ground. However, in March when this problem was first discovered, URS field personnel reported 5 feet of fresh gasoline in groundwater extraction well that had never had gasoline in it before, so somehow product did get into ground. If repairs were done on 7/16/07, why was gasoline again reported in containment sump on top of tank on August 15th (spill number 0705553)? You mentioned that this was caused by delivery person not hooking up vapor recovery line, yet our Petroleum Bulk

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

Storage staff say this would not result in product appearing in sump. I would greatly appreciate it if you could provide additional documentation of repair work, and if NYPD would schedule a tightness test of all lines going into and out of tank, as well as a hydrostatic test of tank's containment sump. I would like to be informed in advance when these tests have been scheduled, so that I can attend. - J. Kolleeny 09/14/07: Visited site 9/10/07 to observe hydrostatic test of tank sump and tightness test of fill line. Mike Suppe of Fenley & Nichol on hand, said sump held water, more or less (slight drip along electric conduit extending from this sump to next sump at end of tank), for over 2 hours. He said no way to test fill line (it's about 2-3 feet long from remote fill port) without physically removing it, but he will test entire tank system. In discussions of how product could turn up in sump, I mentioned that Lt. Polanco said it had to do with delivery person not hooking up vapor recovery line. Mike wasn't clear on how that would cause product to appear in sump. I called Lt. Polanco, who said by not hooking up vapor recovery during delivery, excessive back pressure was created, so when delivery hose was disconnected, product would back up and spill into overfill bucket, then drain to sump. Mike Suppe said this isn't possible, since any fuel spilled into spill bucket would drain back into fill line, then into tank (not sump). Mike suggested that temporary fill, which was used while remote fill line was awaiting repair, had not been properly capped once NYPD switched back to using remote fill, and poor threading on top of direct fill extension cylinder and improperly screwed-on cap for this extension, may have resulted in product spilling out capped off temporary fill, again related to back pressure from not hooking up vapor recovery (see photos in eDocs image folder). NYPD now has on-site a long hose to be used for vapor recovery, and reportedly there have not been any more problems with product appearing in sump after deliveries. Spoke with Mike Suppe on 9/11/07, who said tank system passed test. I discussed whole situation with Jane Staten of URS, who forwarded to me email from Harvey Roberts of URS (in eDocs) indicating temporary direct fill was installed by NYPD, not Franklin Co. as stated in URS's system performance reports for site. While this may explain why product was appearing in sump, none of this adequately explains how product escaped into ground and turned up in groundwater extraction wells and monitoring wells (for site cleanup under spill no. 9512583). Mike Suppe indicated if damaged fill line was unknown for a long time, sump could've filled up with gas during deliveries and overtopped inner rim of sump, and from there it could seep into ground. URS will continue to gauge nearby wells for product levels, and see if they continue to decrease. Harvey Roberts email also calls into question when exactly NYPD had repairs done to fill line. I contact Lt. Polanco again and asked for more detailed documentation of repair work, indicating date(s) and nature of work done. He said he would work on getting me that info. - J. Kolleeny 09/17/07: Received fax from Lt. Polanco, a revised version of earlier fax with statement by Energy Tank & Environmental Services regarding repair work on fuel fill line. Statement is still dated 7/16/07; it now states that they uncovered line on 7/5/07, reconnected and tested line on 7/6/07, reporting that line held pressure during backfilling, they then witnessed a fuel delivery on 7/9/07 with no leaks observed, so they re-surfaced area. - J. Kolleeny 01/04/08: On 12/19/07, sent email to Jane Staten of URS: I recently asked you to ask your field personnel to check if gasoline is still showing up in tank-top sump

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

after fuel deliveries at this site. Do you know if they've checked on this? On 12/26/07, received email reply from Jane: Our field technician checked tank sumps at Midtown South on 11/29/07. One sump was dry and other contained a little water. There was no evidence of gasoline. Based on no new reports of gasoline appearing in tank top sump, it appears problem(s) that caused this and related spills has (have) been addressed; OK to close spill. - J. Kolleeny "

DEC Memo:	"05/23/07-Vought-Duty desk officer. Vought spoke to Bob Laga(Fax 718-359-7865) and SVE and three groundwater wells onsite with SpillBusters installed and Franklin geologist performing weekly inspections of well and system. Franklin was contacted by NYPD that sump of UST was full of product and alarm for Veeder Root was going off. Franklin performed site visit and approximately 20-50 gallons of gasoline present in sump. Vacuum truck estimated time of arrival in two hours to recover gasoline. As per Franklin field geologist level of product in sump has remained constant (may indicate no loss to subsurface). No product in groundwater monitoring well immmediately adjacent to tank with product in sump. Vought discussed site with DEC

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

Krimgold and tightness test letter prepared by Vought and submitted to DEC Falvey for signature. Letter sent with one month due date to owner on PBS and cc to Franklin: NYCPD Building Maintenance Section 59-06 Brooklyn Queens Expressway Queens, NY 11377 05/29/07-Vought-See also new closed spill #0702402 for spill caused by delivery to broken fill despite instructions by Franklin to not deliver until fill was repaired. Vought called Franklin and spoke to Bill. Franklin reiterated requirement for no more deliveries. Klein still seeking bids for work. 07/08/08: This spill case transferred from J. Vought to J. Kolleeny. Problems with fill port and fuel deliveries have been rectified, any product released to environment will be addressed by remedial system on-site, as there is ongoing remediation under DDC consent order spill 9512583. This spill is closed, see also remarks for spill 0705553. - J. Kolleeny "

Spiller Company:	001
Contact Name:	JANE STATEN
DEC Memo:	"02/19/08: This spill case transferred from V. Zhune of Spill Response staff to J. Kolleeny. On Feb. 13, URS (Franklin?) personnel at site noted 10 ft. of fresh free product in a groundwater extraction well (GEW-1), and several ft. of product in nearby monitoring wells. Product was bailed down to less than a foot. On Feb. 15th, URS returned to site and measured 5 ft. of product in GEW-1, and noted that spill buster in well was not operating. Nearby well MW-6 had 3 ft. of product. I instructed Jane Staten of URS to call in a new spill. Contacted Lt. Pete Polanco of NYPD who said they had arranged for Fenley & Nicol to perform a tank system tightness test on saturday, Feb. 16th. I asked that the results be faxed to me when available. On tuesday Feb. 19th, received test results by fax from Lt. Polanco, tank system tested tight (results in eDocs). Contacted Jane Staten of URS, who said their field staff visited site on monday Feb. 18th, found no product in GEW-1, 3 ft. of product in MW-6, and 0.02 ft. in MW-7. She suggested I ask NYPD to look into their inventory records, especially delivery versus tank volume records, for deliveries between Feb. 6 and Feb. 13. I sent email to Lt. Polanco asking him to look into these records and let me know. - J. Kolleeny 02/21/08: Received email reply from Lt. Polanco of NYPD: We did an analysis with the last few deliveries. We determined that during the period of Feb 6 through Feb 13, 3167 gallons was used and we were able to account for 3146 gallons. Therefore we have an unaccounted loss of less than 1%. We passed the tank tightness test. So the question still remains where is this product coming from? Obviously it is not from my fuel site. As of today MTS Precinct is empty and will not be having a delivery for 1 week. Can URS check their wells tomorrow and see if any product appears in the next 7 days? Let me know what you want us to do. I also received email from Jane Staten of URS with detailed timeline of events, in response to my request: Following is a timeline of events concerning the new spill at Midtown South: Feb 13 (Wednesday) Franklin visits site to perform weekly O&M and verbally reports that there is 10 feet of product in well GEW-01; there was a reported kink in the GEW-01 Spill Buster discharge line and when it was fixed, the pump evacuated the product in the well URS visits site to perform monthly product recovery using a vacuum truck and records free product in MW-06 (3 ft), MW-07 (2 ft), and IW-15 (couple of inches); all product evacuated from wells Feb 15 (Friday) URS visits site to gauge wells and finds product in GEW-01 (4.2 ft), MW-06 (2.6 ft), and MW-07 (0.3 ft) URS calls in spill to NYSDEC Spill Hotline; assigned #0712091 Received email from Franklin that product storage tank in GW treatment shed is full and that they scheduled a vacuum truck to remove product Feb 16 (Saturday) NYPD performs tightness test on tank system Feb 18 (Monday) URS visits site with vacuum truck and measures product in MW-06 (3 ft) and MW-07 (0.02 ft); no product detected in GEW wells; all product evacuated from wells; 35 gal product removed from product storage drum in GW treatment shed I do not understand what happened to the 4 feet of product in GEW-01 between Friday and Monday. I asked Franklin if they sent a vacuum truck to the site during that time to remove product from the product storage drum and the answer was 'no.' So that means that the Spill Buster pump in

MIDTOWN SOUTH PRECINCT NYPD -DDC (Continued) **S105054624**

GEW-01 would have remained idle over the weekend. While that is a mystery, the bigger mystery is the source of the gasoline since the tank system tested tight and NYPD records indicate less than a 1% discrepancy in fuel inventory records. - J. Kolleeny 03/20/08: On 2/26/08, sent email to Jane Staten of URS, asking if their field personnel have been back to site and gauged wells for product levels? Jane wrote back: We were at site on Monday with vacuum truck and there was 2.4 feet of product in MW-06, 0.3 feet in MW-07, 0.03 feet in MW-08, and 3.18 feet in GEW-01. Spill buster pump in GEW-01 did not appear to be working so we contacted Franklin. Franklin's regular O&M day for Midtown South is Wednesday, so I'll probably receive their report tomorrow or Thursday. URS will continue to bring vacuum truck to site to remove product until it appears that situation is under control. I'll keep you posted. On 3/20/08, I sent email to Jane Staten asking for updated info on product in wells and status of spill buster pump in GEW-01. - J. Kolleeny 03/28/08: Received email from Jane Staten of URS on 3/27/08, with attached table showing well gauging data from 1/17/08 to 3/14/08 (in eDocs). Data show product in GEW-01 has decreased, from 3.18 ft. on 2/25/08 to 0.0 ft. on 3/3/08, to 0/15 ft. on 3/14/08; however, product in MW-6 seems not to be going away, with 3.75 ft. on 3/14/08; MW-7 went from 0.30 ft. on 2/25/08 to 0.07 ft. on 3/3/08 to 0.44 ft. on 3/14/08. Jane also reported that spill buster pump in GEW-01 is operating and URS has instructed contractor to restart GW extraction pumps. - J. Kolleeny 06/11/08: At direction of my supervisor, Vadim Brevdo, I closed this spill to consolidate with open spill no. 9512583, under which remediation of subsurface petroleum contamination at this site is being tracked. - J. Kolleeny "

Remarks: "unknown amount spilled; released from an underground tank; released into the ground; it is an on going remediating site"

Town:	New York City
Record Added Date:	07/08/2009
Record Updated Date:	08/08/2017
Update By:	SXDEWES
Site Description:	Location: The site is located at 403 West 37th Street and 501-505 9th Avenue which is between 37th and 38th Streets in the Borough of Manhattan. Site Features: Currently, the site is vacant. An entrance roadway to the Lincoln Tunnel beyond the retaining wall shared with the site, is to the west. Current Zoning: The site is zoned C1-7A, a commercial district that is predominantly residential in character. Typical retail uses include grocery stores, drug stores, restaurants and local clothing stores that cater to the daily needs of the immediate neighborhood. Past Use of the Site: Historically the site use included residential, commercial, industrial and manufacturing. As early as 1911, the site was occupied with an iron works (southwest portion of the Site), a carpenter s shop, five 5-story, two 4-story and two 3-story residential dwellings with basements and commercial space on the lower levels. By 1968, the Lincoln Tunnel approach retaining wall was installed along the western border of the site, and the site had been redeveloped with four 5-story buildings, one 4-story building and a 1- or 2-story building which were all demolished by 2005. Site Geology and Hydrogeology: Groundwater beneath the Site ranges from approximately 11 to 15 ft below the current site grade based on gauging of four site wells during the investigation. Based on the regional topography, the anticipated groundwater flow direction beneath the Site is believed to be in a westerly direction towards the Hudson River, however, the presence of a retaining wall for the Lincoln Tunnel approach along the western Site boundary appears to disrupt that flow pattern. Groundwater elevation data collected during the investigation indicated that the groundwater flow at the Site is generally in a northwesterly direction, likely following the slope of bedrock. The generalized stratigraphy underlying the site is composed of a surficial layer of historic fill overlying natural sand, gravel and silt deposits followed by bedrock. In the southern portion of the site, the fill layer was found directly overlying bedrock. Bedrock was generally highest in the southern portion of the site and slopes to the north. Bedrock was found between approximately 8 and 24 feet below ground surface.
Env Problem:	Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil: Investigations performed in 2006 and 2012 showed site soils contain elevated semi-volatile organic compounds (SVOCs) and metals indicative of historic fill. The depth of the historic fill varies across the site from three to 15 feet deep. SVOCs exceeding restricted residential soil cleanup objectives (RRSCOs) include benzo-a-anthracene, RRSCO of 1 part per million (ppm)(7 out of 16 samples)) with a maximum detection of 26 ppm, benzo-a-pyrene, RRSCO of 1 ppm (7 out of 16 samples)with a maximum detection of 22 ppm, benzo-b-fluoranthene, RRSCO of 1 ppm (7 out of 16 samples)with a maximum detection of 28 ppm, and indeno(1,2,3-cd)pyrene, RRSCO of 0.5 ppm (7 out of 16 samples)with a maximum detection of 15 ppm. Metals exceeding RRSCOs include lead, (9 out of 16 samples)with a maximum detection 9,050 parts per million (ppm) vs. RRSCO of 400 ppm and barium, (2 out of 16 samples) with a maximum detection of 5310 ppm vs. RRSCO of 400 ppm. Data does not indicate any off-site impacts in

HUDSON MEWS PROPERTY - MARTY FINE PARCEL (Continued) **S110487608**

	soil related to this site. Groundwater: Groundwater sampling in 2006 showed one volatile organic compounds (VOC) in an on-site well near the upgradient property line; chlorobenzene was detected at 29 parts per billion (ppb) vs a standard of 5 ppb. More recent sampling in 2011 in the same area showed no chlorobenzene. Several metals were noted in groundwater samples (e.g., iron, manganese, magnesium and sodium). These metals appear to be naturally occurring and typical of groundwater in this area. Soil vapor: During the Remedial Investigation, four soil gas points were installed. Several VOCs, including benzene were detected in soil vapor. The compounds were found at low levels and are not of concern
Health Problem:	People may come into contact with site-related contaminants in the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. However, the potential for soil vapor intrusion to occur on-site needs to be evaluated in the event that the site becomes occupied. Sampling indicates soil vapor intrusion as a result of this site is not a concern for off-site properties.

DEC Region:	2
DER Facility ID:	120725
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 3/9/04-Vought-File review by Vought: Letter from DEC(O'Dowd) to Getty(Ochoterena)-12/10/97. Letter sent requiring installation of three monitoring wells in response to tank test failure on 12/3/92. Report due to DEC by close of business 1/30/98. Site notes by DEC O'Dowd-meeting held on 11/12/97. Site planned for construction of new residential building. Tank Closure Report (Tyree Organization William Conroy)-April 1998. Reason for tank closure is property divestment. One pump island located adjacent to 10th Avenue. Removal of twelve (550-gallon) gasoline USTs and one (550-gallon) waste oil from 3/23-3/25/98. Multistory commercial and apartment buildings located across 10th Avenue to the west, church with a school and playground lcoated across West 20th Street to the north of the subject property . Six endpoint samples were collected including five from the gasoline excavation and one composite sample from the waste oil excavation. Soil analytials show 9990ppb toluene(south wall), 10600ppb napthalene(south wall), 10000ppb toulene(west wall), 15900ppb napthalene(west wall), 156ppb MTBE (Bottom). Waste oil soil endpoint shows 427ppb benzo(a)anthracene and 411ppb benzo(b)fluoranthene. Addendum to the Tank Closure Report (Tyree Org)-5/25/98. The additional work consisted of further excavation of th west wall and the south wall of the gasoline tankfield excavation. The additional excavation resulted in clean(STARS Memo) endpoint soil samples from the two walls. Excavation indicated the presence of a former basement filled with demolition debris. Depth to groundwater estimated at 9 below grade. Two additional soil endpoints were collected for analysis. Soil endpoint analyticals show not TAGM 4046 Soil Cleanup Objective exceedances after second excavation event. Project Summary Report (Tyree Org)-5/25/98. One groundwater sampling event prior to the destruction of the wells during removal of underground storage tanks. Groundwater analyticals show 173ppb MTBE(W-1), 1200ppb MTBE(W-2) and 1890ppb MTBE(W-3). Groundwater flow direction not determined. Closure Request (Tyree Org)-7/8/99. The property was sold by Tyree's client to the 20th Street Association, LLC. The owner has excavated the property for construction purposes . These three wells were destroyed in March 1998 when the gasoline tanks were removed . A total of 305.11 tons of soil were removed from teh tankfield excavation. The entire lot (approximately 114' x 100') has been excavated to the property lines and to a depth of approximately 15'. Tyree requests closure based on 1)only ethylbenzene in one well at 6.1ppb 2)the levels of MTBE were probably significantly reduced by removal of approximately 9 feet of unsaturated and 6' of saturated soil 3)approximately 8550 tons of soil were removed. Tyree requests no further action. Vought reviewed site with DEC Rommel which resulted in spill closure."
Remarks:	"ORIGINAL SPILL ASSIGNED TO O'DOWD."

DEC Memo:	"Need to trace owner of site and then send Contaminated Soil Letter. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/21/06 - Raphael Ketani. I reached Nathan Epler of Roux Associates (631) 232-2600. He said that he had sent in all of the paperwork some time ago. I told him that DEC had nothing for the case. He said he will get back to me. The 3 550 gal. tanks mentioned in the spill report are not on any PBS record. Mr. Epler and an associate called me back. They said that the tanks had already been removed, along with the liquids they contained and the soil that was found to be contaminated. I asked them for the manifests, pictures, a site plan, clean end point sample results, and a PBS registration form. They said they had all of that and that they will send it to me by the beginning of next week. 7/5/06 - Raphael Ketani. Chris Batista of Roux called to say that he has the manifests, soil analytical results, and soon the signed PBS registration form. He said he will send them very soon. 7/17/06 - Raphael Ketani. I received the closure report today. 7/18/06 - Raphael Ketani. I reviewed the closure report and found it to be acceptable. Based upon the analytical results, pictures, manifests, and narrative in the 7/13/06 closure report from Roux Associates, I am closing the spill case. 8/17/06 - Raphael Ketani. I received a cover letter from ROUX Associates date 7/14/06. The letter was given to me by Nick Lombardo of the PBS Unit. He said that PBS application was alright and that he received a check with the application. I will have the document E-DOCed."
Remarks:	"DURING A PHASE TWO INVESTIGATION FOUND CONTAMINATED AND FOUND THREE 550 GALLON TANKS: DID NOT REMOVE AS OF YET:"

Acres:	0.3
Date Record Added:	03/05/2002
Date Record Updated:	09/15/2016
Updated By:	GWCROSS
Site Description:	Location: The 0.3 acre East 19th Street Station is adjacent to the Avenue C Loop Road on the south side of East 19th Street between Avenues A and B in the borough of Manhattan in New York City, New York. The site is a portion of the present-day residential campus of Stuyvesant Town, which comprises 61-acres from First Avenue to Avenue C and from East 14th Street to East 20th Street. Site Features: The general topography of the site is flat. The portion of the Stuyvesant Town campus associated with the East 19th Station site contains portions of a residential high-rise apartment building and a private underground parking garage. The remainder of the Stuyvesant Town apartment complex surrounds the East 17th Street Station Site. Con Edison facilities are located east of Stuyvesant Town between East 18th /East 14th Streets and Avenue C/FDR Drive. These facilities include the East River Generating Station, various substations, an administration building, ball fields, and parking areas. Current Zoning: The New York City Planning Commission designates the majority of the property as R7-2: Moderate to High-Density Residential District. Past Use of the Site: The 18-block area developed at Stuyvesant Town was formerly part of the East River and associated marshland well into the 1800s. The area has undergone extensive filling activities. Historic filling along waterfront areas was generally carried out unregulated, using a wide variety of materials including construction debris, organic soil matter, excavated material from adjacent construction sites, and miscellaneous debris. Therefore, the composition and condition of these materials are highly variable. This mix of material is still present in the subsurface today. Tenements were constructed on the property subsequent to the filling and prior to the development of the former MGP station sites as gas storage and/or gas plant facilities. The majority of the larger facility was located on the eastern side of Avenue C between East 14th and East 16th Streets. The East 19th

CE - E. 19TH ST. STATION (Continued) **S108667363**

Street Station reportedly began operations between 1863 and 1868 as a holder site and operated until approximately 1921. Based on the historic maps of the area, a single gas holder (approximately 500,000 cubic feet capacity) occupied the site. The holder station was replaced by an auto/truck garage and then sold to Improvement Garage, Inc. in 1943. Stuyvesant Town Corporation acquired the land in 1944 for the development of the Stuyvesant Town apartment complex. Site Geology and Hydrogeology: The surface topography of Stuyvesant Town was altered by land filling and ranges from approximately 4 to 22 feet (ft) above mean sea level. A dense network of private and public utilities (both active and inactive) are present beneath the site. These utilities are complex and not completely documented. The site geology consists of four units of varying thickness and distribution across the site. Starting at the ground surface these units consist of fill, organic deposits, glacial deposits and bedrock. In general, the fill thickness varies between 20 and 25 ft across the site. The fill most likely reflects man-made disturbances to pre-existing natural soils from historic building construction and eastern expansion of the shoreline. The fill consists of sand, silt, and gravel intermixed with varying amounts of brick, concrete, cinders, and other debris. Beneath the fill layer are organic deposits and then glacial deposits. Bedrock occurs at depths of approximately 60 to 80 ft below ground surface (bgs). Taken together, the soils and fill materials beneath the site constitute a single, unconfined aquifer. Groundwater is found at approximately 8 ft bgs and the overall flow direction is east-southeast toward the East River. The groundwater is not used as a source of potable water.

Env Problem:

Based upon investigations conducted to date, the primary contaminant of concern for the site is coal tar. Coal tar contains both volatile and semi-volatile organic compounds. Specific volatile organic compounds (VOCs) of concern are benzene, toluene, ethylbenzene and xylenes (BTEX). Specific semi-volatile organic compounds (SVOCs) of concern are Polycyclic Aromatic Hydrocarbons (PAHs). Concentrations of PAHs found in surface and subsurface soils slightly exceed the soil cleanup objectives (SCOs) for unrestricted use, but are generally consistent with background levels for Manhattan soils. One sample with concentrations exceeding background was found at a depth interval of 5-7 feet below ground surface (bgs) directly adjacent to the E. 19th St. gas holder station. No exceedences of BTEX in surface or subsurface soils were found. Visible MGP-related impacts are found in the subsurface including staining, sheens, and blebs. These impacts are limited to a few locations in the area directly adjacent to the site and did not appear related to any source areas. Coal tar contamination at the site has not caused an impact to the groundwater resource. Concentrations of BTEX and PAHs are in compliance with NYSDEC Ambient Water Quality Standards or Guidance Values in on-site and off-site groundwater wells. The groundwater is not used as a source of potable water. Concentrations of benzene within soil gas samples ranged from 14 to 17.2 ug/m3. Indoor air concentrations of VOCs (including BTEX) potentially associated with MGP residuals are consistent with levels typically found in fuel oil heated homes. When comparing soil gas and indoor air samples, it appears that the indoor air more closely resembles the ambient air in chemical constituents and concentrations than it does the subsurface soil gas. The site is currently operating under an Interim Site Management Plan (ISMP). The ISMP details procedures for the management of invasive subsurface activities by utility and maintenance workers and their contractors,

CE - E. 19TH ST. STATION (Continued) **S108667363**

	who could encounter MGP-contaminated materials at depth.
Health Problem:	Direct contact with contaminants from manufacture gas plant activities is unlikely since they are located under pavement, the on-site buildings or soil brought in for cover from an unknown off-site location. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although there are elevated concentrations of potentially site related contaminants in soil vapor, indoor air samples from the on-site buildings indicate that soil vapor intrusion is not occurring.

Site Description: Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows

FORMER GUARDIAN CLEANERS (Continued) **S113916768**

	industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit.
Env Problem:	Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.
Health Problem:	Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure.

Site Code:	440109
Site Description:	Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to

FORMER GUARDIAN CLEANERS (Continued) **S113916768**

consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit.

Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

Health Problem: Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure.

The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit.
Env Problem:	Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.
Health Problem:	Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

NJ LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharged occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

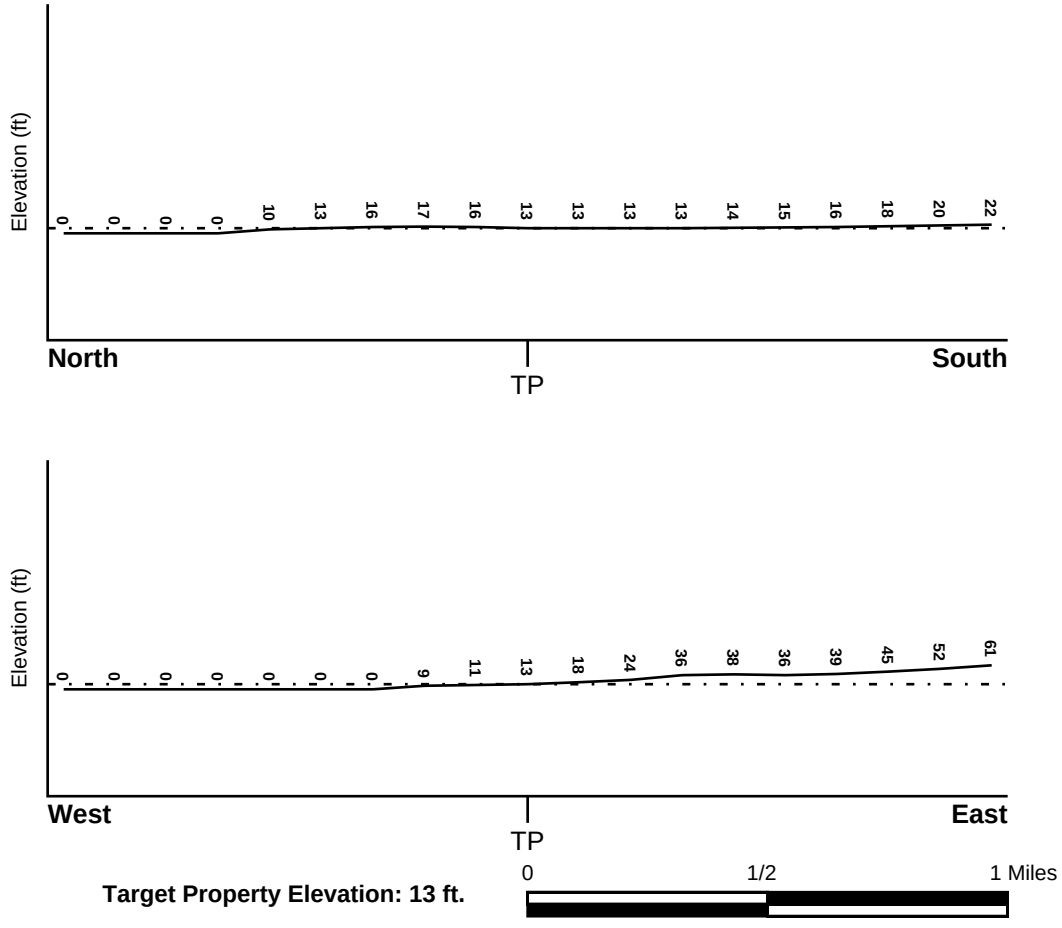
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 13 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970069F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970088F	FEMA FIRM Flood data
3604970182F	FEMA FIRM Flood data
3604970201F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
WEEHAWKEN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile ESE
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT—THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.

(2)135 NYNY 1733

THIS INDENTURE, made the 29th day of August, nineteen hundred and ninety-six

BETWEEN

ALVIN SHER, c/o GLCA, 305 West 29th Street, New York, New York 10001
-and-
LYNNE STONE a/k/a LYNNE SHER, residing at 62 Hicks Street, Apt. 1, Brooklyn, New York 11201

party of the first part, and

ELITE 29 REALTY LLC, c/o Joseph Saparano, 141 Fifth Avenue, New York, New York 10016

party of the second part,

WITNESSETH, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Manhattan, City, County and State of New York, bound and described as follows:

BEGINNING at a point on the southerly side of 29th Street distant 249 feet 6 inches easterly from the corner formed by the intersection of the easterly side of 11th Avenue and the southerly side of 29th Street running

thence southerly parallel with 11th Avenue and part of the way through a party wall, 60 feet;

thence easterly parallel with 29th Street, 6 inches;

thence southerly parallel with 11th Avenue, 38 feet 9 inches to the center line of the block;

thence easterly along same parallel with 29th Street, 25 feet;

thence northerly parallel with 11th Avenue and part of the way through another party wall, 98 feet 9 inches to the said southerly side of 29th Street; and

thence westerly along same, 25 feet 6 inches to the point or place of BEGINNING.

Said premises being known as 538 West 29th Street, N.Y., N.Y. 10001.

SUBJECT to covenants, easements, restrictions and agreements of record.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

Warranty Deed

THIS INDENTURE, made the 30 day of March, 2006.

BETWEEN STEPHEN KURSH, an individual, with an address at P.O. Box 48, Route 23A Haines Falls, New York 12436, grantor

and **Kursh 29th Street Holdings LLC** having an address at 540 W. 29th Street, New York, New York 10001, grantee.

WITNESSETH, that the grantor, in consideration of One and 00/100 Dollar ($1.00) and other good and valuable consideration paid by the grantee, receipt of which is hereby acknowledged, hereby grants and releases unto the grantee, the heirs or successors and assigns of the grantee forever,

ALL THAT TRACT OR PARCEL OF LAND, situate in the City of New York, County of New York and State of New York, as more particularly bounded and described in Schedule A attached hereto and made a part hereof (the "Premises").

This conveyance is made in the regular course of business of the grantor and does not constitute all or substantially all of the assets of the grantor.

SUBJECT to any and all covenants, easements and restrictions of record affecting the premises.
BEING and hereby intending to convey the same premises conveyed to Stephen Kursh by Deed dated January 7, 1983 and recorded in the New York County Clerk's Office in Liber 662 of Deeds, at page 172.

Tax Map No.: 100.700-0056-000.0000000
Tax Mailing Address: 540 West 29th Street, New York, New York 10001

TOGETHER with the appurtenances and all the estate and rights of the grantor in and to said premises.
TO HAVE AND TO HOLD the premises herein granted unto the grantee, the heirs or successors and assigns of the grantee forever.
AND the grantor covenants as follows:
FIRST. The grantee shall quietly enjoy the said premises;
SECOND. The grantor will forever warrant the title to said premises;
This deed is subject to the trust provisions of Section 13 of the Lien Law. The words "grantor" and "grantee" shall be construed to read in the plural whenever the sense of this deed so requires.

IN WITNESS WHEREOF, the grantor has executed this deed the day and year first above written.

In presence of:

Stephen Kursh

STATE OF NEW YORK)
) SS.:
COUNTY OF NEW YORK)

On the 29 day of March, in the year 2006 before me, the undersigned, personally appeared Stephen Kursh, personally known to me or proved to me on the basis of satisfactory evidence to be the individual whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity, and that by his signature on the instrument, the individual, or the person upon behalf of which the individual acted, executed the instrument.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Appendix D

Phase I Questionnaire

PHASE I ENVIRONMENTAL QUESTIONNAIRE

ENVIRONMENTAL QUESTIONNAIRE

Persons to be Questioned – The following questions should be asked of

- the current owner of the property
- any commercial occupant of the property (residential occupants do not need to be asked the questions)
- any other occupant likely to be using, treating, generating, storing or disposing of hazardous substances or petroleum products on or from the property.

The preparer should ask each person to answer all questions to the best of the respondent's actual knowledge and in good faith. When completing the site visit portion of the questionnaire the preparer should be sure to observe the property and the buildings and other structures on the property. All questions should be answered as indicated in the form. The 5-50[SM] Manual provides further details on the appropriate use of this questionnaire.

	QUESTION	LENDER/SERVICER OR OBSERVED DURING SITE VISIT	OWNER	OCCUPANTS
1.	Is the *property* or any *adjoining property* used for an industrial use?	Yes _____ No _____ Unknown ✓	Yes _____ No _____ Unknown ____	Yes _____ No _____ Unknown ____
2.	To the best of your knowledge, has the *property* or any *adjoining property* been used for an industrial use in the past?	Yes _____ No _____ Unknown ✓	Yes _____ No _____ Unknown ____	Yes _____ No _____ Unknown ____
3.	Is the *property* or any *adjoining property* used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Yes _____ No _____ Unknown ✓	Yes _____ No _____ Unknown ____	Yes _____ No _____ Unknown ____
4.	To the best of your knowledge has the *property* or any *adjoining property*	Yes _____ No _____	Yes _____ No _____	Yes _____ No _____

23.	Based upon a review of *fire insurance maps* or consultation with the local fire department serving the *property*, all as specified in the guide, are there any buildings or other improvements on the *property* or on an *adjoining property* identified as having been used for an industrial use or uses likely to lead to contamination of the *property*?	Yes _____ No _____ Unknown ✓____	Yes _____ No _____ Unknown ____	

The **preparer** of this form must complete the following required information.

This questionnaire was completed by:

Name:	Michael Zampetti
Title:	Principal
Firm:	LARGO
Address:	148 Madison Avenue, 16th Floor, New York, N.Y. 10016
Phone Number:	646-330-5005
Date:	4/3/2018

If the preparer is different than the user, complete the following:

Name of User:	
Address of User:	
Phone Number of User:	
Relationship of Preparer to Site:	
Relationship of Preparer to User	_____ Principal _____ Employee _____ Agent _____ Consultant _____ Other: _____

Preparer represents that to the best of his/her knowledge the above statements and facts are true and correct and to the best of his/her actual knowledge no material facts have been suppressed or misstated.

Date: 4/3/2018

Name: Michael Zampetti
Title: Principal

Results Summary & Recommendation

1. Phase II Assessment Results: (Check results for each applicable hazard. Put "N/A" for those hazards not requiring a Phase II Assessment)

Hazard	Acceptable	Acceptable Requires O&M	Fail	Fail, Possibly Remedy
Asbestos	_____	_____	___	_____
PCB	_____	_____	___	_____
Radon	_____	_____	___	_____
UST	_____	_____	___	_____
Waste Sites	_____	_____	___	_____
Lead-Based Paint	_____	_____	___	_____
Other	_____	_____	___	_____

2. Attach a brief explanation for each hazard that is acceptable but requires O&M actions. What actions are required and how should they be performed?

3. Attach a brief explanation for each hazard that failed but could be corrected with remedial actions. What actions are required and how should they be performed?

4. Comments:

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No.** 192 4

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Feb. 13 1924

THIS CERTIFIES that the building located on Block 700, Lot 56

known as 540 West 29th Street 24'6" front,

under a permit, Application No. 3089 Alt of 1921, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of non-fireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
1st Floor	120	5		5	Auto repair shop
2nd "	120	10		10	Factory
3rd "	120	10		10	Factory

This certificate is issued to S.C.Sterne & Company, Lessees
540 West 29th Street, City, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

C.B.

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million.

HUDSON RIVER PCBS, NO STREET APPLICABLE, HUDSON RIVER, NY 12801 (Continued)

EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The FINDS: database contains 0 additional records for this site. Please contact your EDR Account Executive for more information.

Spiller Company:	HIGH RIDGE ENTERPRISES
Spiller Address:	P.O. BOX 2542
Spiller Company:	001
Contact Name:	WALTER SEELIG
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/20/03. Contaminated soil letter sent to Walter Seelig (High Ridge Enterpr.). Also see spill # 9008960. YK. 11/21/03 Rommel Met Brian McCabe, senior geologist, on site. Soil samples collected from 8 to 16 feet below grade were contaminated. Groundwater (15 to 18 feet) was also sampled during the investigation and were impacted by BTEX and MTBE. They will excavate what soil they can and install a minimum of three monitoring wells (one outside by remote fills). Spill 9008960 reported TTF of 4000 gallon gas UST 11/14/1990 STIPULATION SIGNED RD 2/18/04. 3/18/04-Vought-Spoke with Rob Ferguson (631-586-4900). Subsurface Investigation report sent to DEC on 2/3/2004. Ferguson will send small CAP upon receiving subsurface investigation report review. Ferguson requires review of subsurface investigation as per STIP. Vought requested that another copy of the Subsurface investigation be sent to DEC. 4/1/04-Vought-Spoke with Tom Melia (F&N) and he requested that he be point of contact. Spill transferred from Rommel to Vought. 4/6/04-Vought-File review by Vought: Contaminated soil letter sent form DEC Krimgold to High Ridge Enterprises. Site meeting minutes (Fenley & Nicol Brian McCabe)-11/25/03. Site meetin on 11/24/03. In attendance were DEC Rommel, F&N McCabe, F&N Melia and F&N Hole. The results of the sampling indicated that the contamination is located in the northern portion of the building. The effected area extended from the north end od the 4000 gallon tank excavation to the front of the building, approximately thirty five feet and from the center for the 550-gallon tank excavation west to the side of the building, approximately twenty feet. DEC recommended additional soil excavation without comprimising structural intergrity and required 1)installation of one well inside the building after backfilling completed 2)installation of two wells on sidewalk at the location of the former remote fills and twenty feet west of the bay door. Letter from Fenley & Nicol(Thomas Melia) to DEC(Rommel)-12/18/03. The new owner of the

HIGH RIDGE ENTERPRISES, 524 WEST 29TH STREET, MANHATTAN, NY (Continued)

building indicated that his intended use for the building is as an art gallery . During building remodeling excavation was performed and tanks were discovered under floor. Two gasoline USTs (one 4000-gallon and one 550-gallon) were removed and were in separate lcoations fifteen to twenty feet apart. Upon removal of the bottom slab the soil encountered was saturated with liquid phase hydrocarbon . Depth to water expected to be 18' below grade. F&N proposes delineation of soil and groundwater contamination, installation of wells and additional soil excavation. See also Spill #9008960 reported in 1990 for tank test failure and administratively closed on 3/4/03. Letter from DEC Rommel-12/4/03. Letter approving installation of wells on the sidewalk on the south side of West 29th Street between 10th and 11th Avenues and requesting expediting of sidewalk permits. Letter from F&N(Melia) to DEC Rommel-12/18/03. At this time we are continuing our efforts to delineate the extent of the contamination... . Three monitoring wells installed (one inside and two outside building). At this time the owener of ther property feels that it would be too far costly to excavate the contaminated soil without jeopardizing the structural integrity of the building, and would prefer that we install an air sparge/soil vapor extraction (As/SVE) system to remediate the hydrocarbon impact . Please indicate your approval below. No approval indicated by DEC Rommel. Stipulation Agreement-1/15/04. Stip with deadline of 2/13/04 sent to: Walter Seeling High Ridge Enterprises, Inc. P.O. Box 2542 York, Pa. 17405. Subsurface Investigation Report (F&N-Melia 631-586-4900x190) -3/19/04. Investigation consisted of six soil borings, six temporary groundwater monitoring points and three monitoring wells. The central and eastern units are currently vacant and undergoing renovations for use as an art gallery . Depth to groundwater is 8-9' and flows northwest. Soil analyticals show 35ppb benzene(SP-1 at 12'), 882ppb benzene(SP-2 at 12'), 14ppb (SP-3 at 12'), 4900ppb benzene(SP-4 at 12'), 817ppb benzene(SP-5 at 12'). Groundwater analyticals show 2.5 ppb benzene(TW-1), 1459ppb benzene(TW-2), 45ppb benzene(YW-3), 2109ppb benzene(TW-4), 254ppb benzene(TW-5), 11ppb benzene(TW-6), 1200ppb benzene(FN-1), 206ppb benzene(FN-2), 4.2ppb benzene(FN-3). Report recommends Air Spage/Soil Vapor extraction system. NYSDEC requires: 1)signing of Stipulation before any further correspondence

HIGH RIDGE ENTERPRISES, 524 WEST 29TH STREET, MANHATTAN, NY (Continued)

l 2)presence or absence of free product and interim remedial recovery if present 3)surrounding area site plan including property usage 4)additional wells east of FN-2 and well north of FN-2 to calculate required radius of influence for system design. 4/6/04-Vought called F&N(Milea) to repeat Stipulation requirement and left message to return call to DEC. 4/7/04-Vought-Received faxed copy of STIP already implemented by DEC Kunkel on 2/18/04 (Copy of original not in file). 4/8/04-Vought-Sent letter to High Ridge requiring well installation north of FN2 and east of FN2, submission of monitoring well data and surrounding property sketch. 4/16/04-Vought-Wells will be installed next week (tentatively). Wells for pilot test will also installed. Mailing address is: High Ridge Enterprises P.O. Box 2542 York, Pa. 17405 4/18/04-Vought-Received message from David Oloke (F&N-631-586-4900x144) that he is new project manager for site. Vought called David and two additional well installed (one north of FN2 and one east of FN2). All onsite wells were sampled. No free product in new wells. Four vapor wells installed and air sparge well will be installed. DEC will receive pilot test report by 7/15/04. 6/23/04-Vought-Spoke with David and initial results faxed on 6/9/04. .5 of free product in well in 1 vapor well sent for fingerprinting. EFR not effective. DEC requires recovery of free product and submission of pilot test. 9/2/04-Vought-File review by Vought: Groundwater results (F&N)-6/23/04. Groundwater analyticals show 1.2ppb benzene(FN5), 1.8ppb benzene(FN4), 14ppb benzene(FN3), 26ppb xylene(FN3), 474ppb benzene(FN2), 621ppb MTBE(FN2), 8ppb toluene(FN2), 2065ppb benzene(FN1), 47170ppb MTBE(FN1), 4106ppb toluene(FN1) and 2761ppb xylene(FN1). Addendum to the direction beneath the site was found to be toward the north. Property uSubsurface Investigation Report (F&N)-7/14/04. On 5/7/04 two additional monitoring wells were installed. On June 4, 2004 the AS/SVE pilot tests were conducted . One inch of floating product was detected in P2. The results of the AS pilot test indicated that the introduction of air pressure into the formation below the contaminant zone is a viable remediation technique . Report recommends commencement of an interim remedial measure to recover product from P-2 via weekly EFR. Report also recommends installation of another well to replace P2. Vought called David from F&N to approve of

HIGH RIDGE ENTERPRISES, 524 WEST 29TH STREET, MANHATTAN, NY (Continued)

workplan. Well installation will be included with final remedial action plan. Vought sent letter approving of proposed workplan (installation of well at P2 and IRM) and included requirement of determination of groundwater flow direction and surrounding property sketch. 9/3/04-Vought-Received fax from Oloke (F&N). The groundwater flow sage of downgradient sites to the north are a parking garage and an art studio. Vought called Oloke and approved workplan as per 9/2/04 letter. Vought called Oloke and he will begin drafting RAP for submission to DEC. 9/29/04-Vought-Spoke to David F&N and he will be sending RAP in overnight. 10/1/04-Vought-Reviewed RAP received by DEC on 10/30/04. Site is currently occupied by a masonary block structure which is subdivided into three sections. An art gallery occupies the western unit. The central and eastern units are currently vacant and are undergoing renovations for use as an art gallery. RAP proposes weekly recovery of free product from FN2 via a peristaltic pump until well is converted to a 2 product recovery well designated at FN6. Two additional wells will be installed in the interior of the building. Monthly groundwater monitoring and quarterly sampling. Five air sparge and four SVE wells will be installed in the interior of the building. Remedial system will be installed on the roof of the building. Daily monitoring for the first week, weekly monitoring for the first month, monthly maintenance visits and effluent sampling, quarterly effluent sampling and groundwater sampling. Vought sent letter approving of RAP. 10/28/04-Vought-Spoke to David(F&N) and FN1 must be reinstalled due to it was a bent well. Wells will be installed during the next few days. 9/27/05 - SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 11/9/05 - Obligado - Review System STartup Report. AS/SVE system consists of 5 HP compressor and 3.5 hp blower and 5 air sparge wells and four soil vapor extraction wells. Effluent air stack results show 31.4 ug/m3 for benzene. Operation and maintenance schedule proposes monthly SVE effluentmonitoring and Quarterly Status Reports. System started in May 2005. Due to noise generation, the system only runs from 9pm to 6am. Quarterly Status Report - Groundwater analyticals show 4.7 ppb benzene (FN3), 50.1 ppb MTBE (FN2), 78.3 ppb MTBE SVE5, 1.7 ppb MTBE SVE3. Benzene effluent show 46.74 ug/m3. 5/15/06 - Obligado - Called David Oloke. Asked that he send recent Quarterly Status Reports. 5/22/06 - Obligado - 2Q06

HIGH RIDGE ENTERPRISES, 524 WEST 29TH STREET, MANHATTAN, NY (Continued)

Quarterly Status Report, submitted by Fenley Nicol, Inc. Ground water analyticals show 9 ppb benzene 35 ppb MTBE in FN3 and and 3.7 ppb benzene in FN4. Benzene effluent below STIP limits. There is duplicated data on Table 2 Air Sampling Results, probably a cut and paste error, call Dave Oloke, he said he will look into it at send a new table with the electronic copy. Report recommends continuing system operation. 6/23/06 - Obligado - Called David Oloke. Asked for the corrected Table. He said he will email it to me. 10/23/06 - Obligado - Called David Oloke. Left message requesting most recent quarterly status report. David Oloke call me back and said he would send the report shortly and he would correct the typo on Table 2. 1/30/07 - Obligado - Review 3Q06 monitoring report. Typo in 2Q06 table has been fixed in cumulative table. AS/SVE system online and working at 100% maximum capacity. Air samples collected monthly. Benzene in gw exceeds standard at 4 ppb. in 2 wells. All effluent below STIP guidance. Benzene detected in VES/AS effluent at 4.86 ug/m3 in 6/06. Recommends continued operation of the system. Review 4Q06 monitoring report - AS/SVE system operating at 100% capacity 9 hours per day. All effluent samples below STIP guidance. BTEX effluent at 361.71 ug/m3 during 10/27/06 Report recommends continued operation of system. GW results show minor exceedences of Benzene - max concentration at 8 ppb in FN3. However gw monitoring does not include FN1 where highest contamination was found. 9/13/07 - Obligado - Review 1Q07 monitoring report. According to the report, the AS/SVE syste is running at 100% capacity. System is still pulling vapors, at a flow rate of 50 cfm and a concentration in March 07 of 111.30 ug/m3 BTEX. Benzene (12.8 ug/m3) was below the STIP limit. Recommends continued operation of AS/SVE system. 10/26/07 - Obligado - Review 2Q07/3Q07 monitoring report. Benzene detected during quarterly monitoring at MW3 adn MW4 slightly above standards. Analytical results of air stream were below the max benzene STIP Limit. Recommneds continued operation of the AS/SVE System. 9/3/08 - Obligado - Review 1Q08 monitoring report. AS/SVE running for 9 hours a day at 100% capacity. Effluent collected monthly. Benzene detected slightly above standards in MW2,3,4,and5. System effluent ND for BTEX. 6/3/09 - Obligado - REview 1Q09 monitoring report. Requests to shut down system for a 1 year post remedial monitoring period to

HIGH RIDGE ENTERPRISES, 524 WEST 29TH STREET, MANHATTAN, NY (Continued)

determine if system was effective and monitor for rebound. Sent a letter to Seeling cc to David Oloke approving system shut down temporarily but requiring sampling of monitoring wells MW1, MW6, adn MW7 beneath the building as required by approved RAWP. Required 90 days to submit an update report on system shutdown and additional sampling. 12/3/09 - Obligad - Met with David Oloke on site. The AS/SVE system was down as proposed. According to David they were unable to collect ground water samples from the three sampling points. According to David the water he collected was too silty. He recommended doing an exposure assessment to close the spill number or to install the well in an alternate location in the building entrance. I told him I would review the spill file to determine if that location was acceptable. 12/22/09 - Sent email to Mr. Oloke - The Department has determined that the proposed location is cross-gradient and outside the of the source area, and would not provide the necessary data to confirm the site remedation was successful. As such, the Department reiterates its requirement in the June 2, 2009 letter, to sample the 3 monitoring wells FN1, FN6, and FN7 (as originally proposed in the approved RAWP) and submit a Monitoring Report within 90 days of this notice. If sufficient ground water can not be obtained from these sampling points (after exhausting all available well sampling and well development techniques), than a Remedial Investigation Work Plan (RIWP) to install a new monitoring well in the gallery in between FN1, FN6, and FN7 must be submitted within 90 days of this notice. The RIWP should contain an implementation schedule. 10/9/10 - Obligado - Email from David Oloke I would like to inform you that we're scheduled to be onsite to install one groundwater monitoring well on the sidewalk directionally towards the source area beneath the building in order to determine the current groundwater quality beneath the site. We scheduled for Monday 25 through Wednesday 27. 1/14/11 - Obligado - Email from David Oloke We are set to go back to High Ridge, 524 West 29th Street in Manhattan on Monday 1/17/11 to install the groundwater monitoring well for spill inactivation. The client is making plans to be onsite as well . 1/19/11 - Obligado Email from David Oloke We core drilled through the foundation wall and could not get the well rods to the desired depth due to refusal. So we back to square one. Our

HIGH RIDGE ENTERPRISES, 524 WEST 29TH STREET, MANHATTAN, NY (Continued)

client spoke with the tenant again yesterday to see if he will allow us access into the building. 4/1/11 - Obligado - I sent email to David Oloke related to potential alternative methods for obtaining ground water samples at the site since the diagonal well method was not successful, such as snaking new tubing into the existing system wells, and high vaccuum extraction to obtain ground water samples from the sparge wells. I asked Mr. Oloke to look into these options, as well as any other methods and report back the findings to the DEC. 3/12/12 - Obligado - I reviewed a Site Status Report. They collected samples from MW1, MW6, and MW7 under the gallery slab using the vacuum extraction technicque. Samples were collected in June and November of 2011. During the most recent sampling event in NOvember, the maximum VOCs was 117.3 ug/L in MW-7. MW1 had 63.42 ug/L total VOCs, and MW6 had 59.75 ug/L VOCs. Several compounds were slightly above standards. The greatest exceedence was 36 ug/L napthalene in MW7, which is above the standard of 10 ug/L. In NOvember they turned on the AS/SVE system and allowed it to run for four weeks. At the end of the four weeks , air samples were collected and all the targeted VOCs were ND. Based on the above, they requested closure. Ground water contamination has been greatly reduced. The AS/SVE system reached asymptotic recovery rates. Additional remediation is not warranted nor feasible. After discussion with DEC Hussein and Ketani, this spill is closed. A spill closure letter ahs been sent to Walter Seeling, cc to David Oloke."

Remarks: "caller was hired to remove a few tanks from the site - x-ref spill # 9008960 - they encountered contaminated soil - they are stockpiling soil now"

DER Facility ID:	75604
DEC Memo:	"According to the NYSDEC records, on August 5, 1998, the on-site 2,000 gallon UST failed a tank tightness test and was issued Spill #98-05607. After review of information received from the client, it has been determined that after the UST failed tank tightness testing, the UST was cleaned, sandblasted, and relined with an epoxy lining, and the associated piping was replaced in September 1998. On July 10, 2003, the 2,000 gallon UST failed a tank tightness test wasissued Spill #03-03799. It appears that soil borings were performed to

550 WEST 30TH STREET, 550 WEST 30TH STREET, MANHATTAN, NY (Continued)

determine the extent of the UST leak/spill. Upon reviewing data received from the NYSDEC Spills Database, the NYSDEC notes section determined the soils were slightly above TAGM guidelines due to levels consistent with old coal ash fill materials and was granted closure status on September 2, 2003. The UST was emptied and taken out of service, and an 1,080 gallon steel registered AST was installed in a small cellar area near the north bay door area. On September 28, 2005, EnviroTrac contacted the NYSDEC regarding Spill #98-05607 to determine what isneeded to close the Spill. It was determined that since Spill #98-05607 was prior to Spill #03-03799 which is closed , and was the same tank and area, it should be closed as well. "

Remarks: "TANK TO BE EVACUATED, CLEANED, AND LINES TO BE TESTED."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO/DO 12/19/02 - AUSTIN, DDO - TTF LETTER SENT 1/11/06- DEC Piper spoke w/ Eugene Degan, (PRev. Owner Rep 845.294.7509) regarding tank test. He could not be sure though he thinks the tanks are still empty. He will look into this. Piper then contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and will have previous owner get info. Galden Frankel performed Phase I and II on property. Left message at GF requesting call back. 1/18/06- DEC Piper spoke w/ property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He will fax info. DEC Piper to review and inform Rob of additional work if warranted. 2/6/06- DEC Piper spoke w/ Rob S. I explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed iin place. As per Rob, he will be sending in the new appplication this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to insicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MtBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation. 5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST"
Remarks:	"they are going to abandoned the tank"

DEC Memo:	"TTF was sent out to BROADWAY REAL ESTATE SERVICES 450-460 WEST 33RD STREET NEW YORK, NY 10043 ATTN: JAVIER CORRIPIO ** PBS 2-456721 ** 2/26/13 TJD File review. Tank failed tightness test on 9/8/12 - intially reported as a wet leak. Tank was uncovered and corrosion was identified at tank top fittings and associated piping. Repairs were performed and a tank only (isolation test) was performed on 10/2/12 which passed. A complete system tightness test was then permformed on 10/11/12, also with passing results. Contractor has provided the following statement in their closure report, Throughout excavation operations, close inspections indicated neither visual nor olfactory evidence of petroleum contamination, confirming that there was no loss of product into the subsurface. all required closure documentation has been submitted and uploaded to EDOCS. No further action is required at this time."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MILLER DEC SIGONA REASSIGNED TO MILLER ON 1/23/98 3/5/10 - Austin - Reassigned as TTF to Jake Krimgold for further investigation. - end 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo 8/24/12 TJD Spill cross-referenced to PBS#. 10/09/14-Hiralkumar Patel. reviewed available documents for DEC DeMeo. site name: West 30th Street Heliport PBS #: 2-342211. as per PBS record, the site has/had following tanks: - one (1) 8,000 gal other product AST on saddles, in-service, installed in Apr. 1997 - one (1) 8,000 gal other product AST on soil, converted to non-regulated use, installed in Apr. 1997 (this could be same tank as above) 10/27/14 TJD File review - based upon above information obtained from Patel. - eleven (11) 550 gal other product USTs, closed-in-place, in Apr. 1997 - five (5) 550 gal other product USTs, closed prior to Mar. 1991 other spills #: 8804707, 8901091, 9504121 spill # 8804707 was reported on 08/29/1988 by USCG due to petroleum patch. case closed. spill # 8901091 was reported on 05/04/1989 due to tank test failure for eight (8) 550 gal jet fuel tanks. case closed. spill # 9504121 was reported on 07/06/1995 by USCG due to 40 gal jet fuel spill result of collision between two helicopters. case closed. reviewed documents on e-docs for PBS: - 12/18/1988: tanks 9 to 16 (550 gal jet A fuel) were passed - 12/07/1991: tanks 1 to 8 (550 gal jet A fuel) were passed - 06/11/2007: N. D. Eryou sent letter to DEC Falvey. he mentioned that the eleven (11) 550 gal USTs owned by Port Authority and they were conveyed with the land lease to NYS DOT (Aviation Division). he was not present during tanks abandonment in 1997, but believed that NYSDOT was going to remove the USTs as part of the stormwater upgrades that were underway as part of the immeidate adjacent Route 9 upgrades. 10/27/14 TJD File review. Based upon summarized review discussed above - (8) 550 gallon UST's passed tightness tests (Tanks 9 to 16) prior to reported spill (1988). Remaining (8) 550 gallon UST's (Tanks 1 to 8) passed a tighness test subsequent to reported spill (1991). As per PBS inspection 1/9/07 (Falvey) all UST's have been permanently closed on site. New 8K AST's are currently in operation at this facility. A total of (3) spill

HELIPORT W 30TH ST/MANH - TTF, HELIPORT/W.30TH ST & 12TH, NEW YORK CITY, NY (Continued)

reports have been reported and closed at this facility since initial TTF report. Unknown what tank # failed the tighness test, however, all UST's are reported out of service. Due to proximity of the failure to the Hudson River if a significant petroleum discharge had occurred impacts to the adjacent surface waters would have been observed. No further action is required at this time. Spill is administratively closed."

Remarks: "550 GALLON TANK FAILED HORNER EZY CHECK WITH A LEAK RATE OF .179GPH, TANK #8, PARTIALLY PUMPED OUT TANK, WILL FINISH PUMPING TANK LATER TODAY."

Update By:	JEBROWN
Site Description:	Location: The site is located at 509-527 West 34th Street, 435 Tenth Avenue and 510 West 35th Street in the Borough of Manhattan, City of New York in New York County. The site is comprised of three separate lots (i.e., lots 17, 20 and 29 of Block 706) and is approximately 1.43 acres in size. Site Features: Lot 17 is approximately .07 acres and is vacant land. Lot 20 is approximately .49 acres and is entirely covered by a four-story structure, with a partial basement. The building is utilized as a parking garage, photography studio, artist studio, elevator services and mixed office and warehouse space. Lot 29 is approximately 0.87 acres in which the entire lot is a paved parking lot utilized for commercial truck rental and parking. Current Zoning and Land Use: The site is currently used for commercial purposes, and is zoned C6-4. C6 districts permit a wide range of high-bulk commercial uses requiring a central location. The C6-4 district, typically mapped within a major business district, has a maximum floor area ratio (FAR) of 10.0 or 15.0, exclusive of any bonus. Past Use of the Site: Historical uses include an iron and brass foundry, and then a parking garage (Lot 20), a hatter s fur cutting company (Lot 29), and an electrical conduit company (Lot 17). Site Geology and Hydrogeology: Bedrock is present beneath the site at

509 WEST 34TH STREET, 509 WEST 34TH STREET, NEW YORK, NY 10001 (Continued)

	depths ranging from three to 18 feet below grade. A fill layer comprised of sand, gravel, boulder, concrete, and brick fragments is present from grade to bedrock and is underlain by a 3 to 6 foot thick native glacial silty sand in the western portion of the Site. Groundwater was encountered at a depth of approximately 12 feet.
Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"DEC Piper spoke w/ Charles Rose. Assistant to the principal. As per conversation, they were getting ready for winter and noticed a leak. When the janitor inspected found approx 200 gal in vaulted area. Spill is contained and in vault. PTC to respond today and pump out remaining oil and oil on floor. No drains, sewers effected. PTC to contact DEC upon completion of emergency cleanup. School is not in session and no children are present. Odors present in basement only and not in school. 9/11/06- DEC Piper spoke w/ Sister Katheleen, PTC had cleaned up emergency spill. Piper spoke w/ PTC, tank was above ground on concrete. Concrete was in good shape. School is going to replace tank. 6 drums of oil soaked speedy dry removed. CLosed."
Remarks:	"TANK IS LEAKING IN THE TANK ROOM OF SCHOOL: CREW ENROUTE TO PUMP OUT TANK AND CLEAN UP SPILL: NO DRAINS EFFECTED:"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 8/2001-Tank closure report prepared by Franklin Company Contractors. 6/29/2001-Franklin implemented bioremediation by mixing 240lbs of ORC with surrounding soils and filling in excavation. 500 gallons of Waste stream technologies W-4 bio-blend mixture also injected.. Site was bakcfilled with 3 to 6 feet of clean fill, 6 inches of crushed stone and an 8-mil polyethylene vapor barrier. Area was then covered with 6 inch reinforced concrete slab. Soil VOC pass TAGM, soil SVOC exceed TAGM but are due to fill composition. Site visit by Jacob Krimgold showed no visual evidence of contamination. Groundwater VOC and SVOC also pass TAGM. 12/13/2001 Spill closed as per Mark Tibbe, Jacob Krimgold and myself (all NYSDEC personnel). "
Remarks:	"SOIL SAMPLE RESULTS FROM REMOVAL OF 3 TANKS AT LOCATION. NO VISABLE SIGNS OF CONTAMINATION."

Record and Return to:
GOETZ FITZPATRICK LLP
One Penn Plaza, Suite 3100
New York, New York 10119
Attention: Aaron Boyajian, Esq.

THIS MORTGAGE, made the 31st day of May, 2016, between **ELITE 29 REALTY LLC**, a New York limited liability company, having an address at 538 West 29th Street, New York, New York 10001 (the "Mortgagor") and **SIGNATURE BANK**, having an address at 565 Fifth Avenue, New York, New York 10017 (the "Mortgagee").

WITNESSETH, that to secure the payment of an indebtedness in the sum of **THIRTY THOUSAND AND 00/100 DOLLARS ($30,000.00)**, lawful money of the United States, to be paid according to a certain bond, note or obligation bearing even date herewith (such instrument, as the same may be hereafter amended, modified or extended, being hereinafter called the "Note"), and to secure the payment of interest and any other sums payable pursuant to the Note or this Mortgage and the performance and observance of all the provisions of the Note and this Mortgage, the Mortgagor hereby mortgages to the Mortgagee:

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected or to be erected (hereinafter called the "Premises"), more particularly bounded and described in Schedule A annexed hereto and made a part hereof;

TOGETHER with all right, title and interest, if any, of the Mortgagor of, in and to the land lying in the streets, roads or avenues, open or proposed, in front of and adjoining the Premises and of, in and to any strips or gores of land adjoining the Premises;

TOGETHER, ALSO, with all fixtures, chattels and articles of personal property now or hereafter attached to or located in or upon the Premises, including but not limited to furnaces, boilers, oil burners, radiators and piping, coal stokers, plumbing and bathroom fixtures, refrigeration, air conditioning and sprinkler systems, wash-tubs, sinks, gas and electric fixtures, stoves, ranges, awnings, screens, window shades, elevators, motors, dynamos, refrigerators, kitchen, cabinets, incinerators, plants and shrubbery and all other machinery, appliances, fittings, and fixtures of every kind in or used in the operation of the buildings standing on the Premises, together with any and all replacements thereof and additions thereto;

TOGETHER, ALSO, with any and all awards, including interest thereon, heretofore and hereafter made to the Mortgagor for the taking by eminent domain of the whole or any part of the Premises or any easement therein, including any awards for changes of grade of streets, which said awards are hereby assigned to the Mortgagee, who is hereby authorized to collect and receive the proceeds of such awards and to give proper receipts and acquittances therefor, and to apply the same toward the payment of the mortgage debt, notwithstanding the fact that the amount owing thereon may not then be due and payable; and the Mortgagor hereby agrees, upon request, to make, execute and deliver any and all instruments sufficient for the purpose of assigning said awards to the Mortgagee, free, clear and discharged of any encumbrances of any kind or nature whatsoever;

AND the Mortgagor covenants with the Mortgagee as follows:

1. That the Mortgagor will pay the indebtedness as hereinbefore provided.

Title No. 3020-772776

SCHEDULE "A"

ALL THAT CERTAIN PLOT, PIECE OR PARCEL OF LAND, SITUATE, LYING AND BEING IN THE CITY, COUNTY AND STATE OF NEW YORK, BOUNDED AND DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE SOUTHERLY SIDE OF 29TH STREET, DISTANT 249 FEET 6 INCHES EASTERLY FROM THE CORNER FORMED BY THE INTERSECTION OF THE EASTERLY SIDE OF 11TH AVENUE AND THE SOUTHERLY SIDE OF 29TH STREET;

RUNNING THENCE SOUTHERLY PARALLEL WITH 11TH AVENUE AND PART OF THE WAY THROUGH A PARTY WALL, 60 FEET;

THENCE EASTERLY PARALLEL WITH 29TH STREET, 6 INCHES;

THENCE SOUTHERLY PARALLEL WITH 11TH AVENUE, 38 FEET 9 INCHES TO THE CENTER LINE OF THE BLOCK;

THENCE EASTERLY ALONG SAME PARALLEL WITH 29TH STREET, 25 FEET;

THENCE NORTHERLY PARALLEL WITH 11TH AVENUE AND PART OF THE WAY THROUGH ANOTHER PARTY WALL, 98 FEET 9 INCHES TO THE SAID SOUTHERLY SIDE OF 29TH STREET; AND

THENCE WESTERLY ALONG SAME, 25 FEET 6 INCHES TO THE POINT OR PLACE OF BEGINNING.

THE policy to be issued under this report will insure the title to such buildings and improvements erected on the premises, which by law constitute real property.

FOR CONVEYANCING ONLY: TOGETHER with all the right, title and interest of the party of the first part, of in and to the land lying in the street in front of and adjoining said premises.

2. That the Mortgagor will keep the buildings on the Premises insured against loss by fire for the benefit of the Mortgagee; that he will assign and deliver the policies to the Mortgagee; and that he will reimburse the Mortgagee for any premiums paid for insurance made by the mortgagee on the Mortgagor's default in so insuring the buildings or in so assigning and delivering the policies.

3. That no building on the Premises shall be altered, removed, or demolished without the consent of the Mortgagee.

4. That the whole of said principal sum and interest shall become due at the option of the Mortgagee after default in the payment of any installment of principal or of interest for Fifteen (15) days; or after default in the payment of any tax, water rate, sewer rent or assessment for thirty (30) days after notice and demand; or after default after notice and demand either in assigning and delivering the policies insuring the buildings against loss by fire or in reimbursing the Mortgagee for premiums paid on such insurance, as hereinbefore provided; or after default upon request in furnishing a statement of the amount due on the Mortgage and whether any offsets or defenses exist against the mortgage debt, as hereinafter provided. An assessment which has been made payable in installments at the application of the Mortgagor or lessee of the Premises shall nevertheless, for the purpose of this paragraph, be deemed due and payable in its entirety on the day the first installment becomes due or payable or a lien.

5. That the holder of this Mortgage, in any action to foreclose it, shall be entitled to the appointment of a receiver.

6. That the Mortgagor will pay all taxes, assessments, sewer rents or water rates, and in default thereof, the Mortgagee may pay the same.

7. That the Mortgagor within five (5) days upon request in person or within ten (10) days upon request by mail will furnish a written statement duly acknowledged of the amount due on this Mortgage and whether any offsets or defenses exist against the mortgage debt.

8. That notice and demand or request may be in writing and may be served in person or by mail.

9. That the Mortgagor warrants the title to the Premises.

10. That the fire insurance policies required by Paragraph 2 above shall contain the usual extended coverage endorsement; that in addition thereto the Mortgagor, within thirty (30) days after notice and demand, will keep the Premises insured against war risk and any other hazard that may reasonably be required by the Mortgagee. All of the provisions of Paragraphs 2 and 4 above relating to fire insurance and the provisions of Section 254 of the Real Property Law construing the same shall apply to the additional insurance required by this paragraph.

11. That in case of a foreclosure sale, the Premises, or so much thereof as may be affected by this Mortgage, may be sold in one parcel.

12. That if any action or proceeding be commenced (including an action to foreclose this Mortgage or to collect the debt secured hereby), to which action or proceeding the Mortgagee becomes a party, or in which it becomes necessary to defend or uphold the lien of this mortgage, all sums paid by the Mortgagee for the expense of any litigation to prosecute or defend the rights and lien created by this mortgage (including reasonable counsel fees), shall be paid by the Mortgagor, together with interest thereon at the rate of six percent per annum, and any such sum and the interest thereon shall be a lien on said Premises, prior to any right or title to, interest in or claim upon said Premises attaching or accruing subsequent to the lien of this Mortgage, and shall be deemed to be secured by this Mortgage. In any action or proceeding to foreclose this Mortgage, or to recover or collect the debt secured hereby, the provisions of law respecting the recovering of costs, disbursements and allowances shall prevail unaffected by this covenant.

13. That the Mortgagor hereby assigns to the Mortgagee the rents, issues and profits of the Premises as further security for the payment of said indebtedness, and the Mortgagor grants to the Mortgagee the right to enter upon and take possession of the Premises for the purpose of collecting the same and to let the Premises or any part thereof, and to apply the rents, issues and profits, after payment of all necessary charges and expenses, on account of said indebtedness. This assignment and grant shall continue in effect until this Mortgage is paid. The Mortgagee hereby waives the right to enter upon and to take possession of said Premises for the purpose of collecting said rents, issues and profits, and the Mortgagor shall be entitled to collect and receive said rents, issues, and profits, until default under any of the covenants, conditions or agreements contained in this Mortgage, and agrees to use such rents, issues and profits in payment of principal and interest becoming due on this Mortgage and in payment of taxes, assessments, sewer rents, water rates and carrying charges becoming due against said Premises, but such right of the Mortgagor may be. revoked by the Mortgagee upon any default, upon five days' written notice. The Mortgagor will not, without the written consent of the Mortgagee, receive or collect rent from any tenant of said Premises or any part thereof for a period of more than one month in advance, and in the event of any default under this Mortgage will pay monthly in advance to the Mortgagee, or to any receiver appointed to collect said rents, issues and profits, the fair and reasonable rental value for the use and occupation of said Premises or of such part thereof as may be in the possession of the Mortgagor, and upon default in any such payment will vacate and surrender the possession of said Premise to the Mortgagee or to such receiver, and in default thereof may be evicted by summary proceedings.

14. That the whole of said principal sum and the interest shall become due at the option of the Mortgagee: (a) after failure to exhibit to the Mortgagee, within ten days after demand, receipts showing payment of all taxes, water rates, sewer rents and assessments; or (b) after the actual or threatened alteration, demolition or removal of any building on the Premises or any part thereof without the written consent of the Mortgagee; or (c) after the assignment of the rents of the Premises or any part thereof without the written consent of the Mortgagee; or (d) if the buildings on said Premises are not maintained in reasonably good repair; or (e) after failure to comply with any requirement or order or notice of violation of law or ordinance issued by any governmental department claiming jurisdiction over the Premises within three months from the issuance thereof; or (f) if on application of the mortgagee two or more fire insurance companies lawfully doing business in the State of New York refuse to issue policies insuring the buildings

on the Premises; or (g) in the event of the removal, demolition or destruction in whole or in part of any of the fixtures, chattels or articles of personal property covered hereby, unless the same are promptly replaced by similar fixtures, chattels and articles of personal property at least equal in quality and condition to those replaced, free from chattel mortgages or other encumbrances thereon and free from any reservation of title thereto; or (h) after thirty days' notice to the Mortgagor, in the event of the passage of any law deducting from the value of land for the purposes of taxation any lien thereon, or changing in any way the taxation of mortgages or debts secured thereby for state or local purposes; or (i) if the Mortgagor fails to keep, observe and perform any of the other covenants, conditions or agreements contained in this Mortgage.

15. The Mortgagor will receive the advances hereunder subject to the trust fund provisions of Section 13 of the Lien Law of the State of New York.

16. That the execution of this Mortgage has been duly authorized by the board of directors of the Mortgagor, if a corporation.

17. That this Mortgage may not be changed or terminated orally. The covenants contained in this Mortgage shall run with the land and bind the Mortgagor, the heirs, personal representatives, successors and assigns of the Mortgagor and all subsequent owners, encumbrancers, tenants and subtenants of the Premises; and shall inure to the benefit of the\ Mortgagee, the personal representatives, successors and assigns of the Mortgagee, and all subsequent holders of this Mortgage. The word "Mortgagor" shall be construed as if it read "Mortgagors," and the word "Mortgagee" shall be construed as if it read "Mortgagees" whenever the sense of this Mortgage so requires.

18. THAT THE MORTGAGOR HEREBY IRREVOCABLY AND UNCONDITIONALLY WAIVES, AND THE MORTGAGEE BY ITS ACCEPTANCE OF THE NOTE AND THIS MORTGAGE IRREVOCABLY AND UNCONDITIONALLY WAIVES, ANY AND ALL RIGHTS TO TRIAL BY JURY IN ANY ACTION, SUIT OR COUNTERCLAIM ARISING IN CONNECTION WITH, OUT OF OR OTHER WISE RELATING TO THE NOTE, THIS MORTGAGE OR ANY OTHER DOCUMENT OR AGREEMENT RELATED TO THE LOAN SECURED BY THIS MORTGAGE.

19. THE ATTACHED MORTGAGE DOES NOT COVER REAL PROPERTY PRINCIPALLY IMPROVED OR TO BE IMPROVED BY ONE OR MORE STRUCTURES CONTAINING IN THE AGGREGATE NOT MORE THAN SIX RESIDENTIAL DWELLING UNITS, EACH HAVING THEIR OWN SEPARATE COOKING FACILITIES.

20. This Mortgage may be executed in any number of counterparts, each of which shall be an original and all of which taken together shall constitute one agreement.

[SIGNATURE PAGE FOLLOWS IMMEDIATELY]

IN WITNESS WHEREOF, the Mortgagor and the Mortgagee have executed this Mortgage as of the date first written above.

MORTGAGE CONSOLIDATION, EXTENSION, MODIFICATION AND SECURITY AGREEMENT

THIS MORTGAGE CONSOLIDATION, EXTENSION, MODIFICATION AND SECURITY AGREEMENT is made as of this 31st day of May 2016, by ELITE 29 REALTY LLC, a New York Limited Liability Company, having an address at 538 West 29th Street, New York, New York 10001 ("**Mortgagor**"), and SIGNATURE BANK, a Bank organized under the Laws of New York State having an office at 565 Fifth Avenue, New York, New York 10017, as mortgagee ("**Mortgagee**").

WITNESSETH

WHEREAS, Mortgagee is the holder of those certain mortgages described on **Exhibit "A"** attached hereto and made a part hereof (the "**Existing Mortgages**"), and the promissory notes secured thereby (the "**Existing Notes**") which evidence an outstanding principal indebtedness of FOUR MILLION ONE HUNDRED SIXTY TWO THOUSAND EIGHT HUNDRED SIXTY FOUR AND 97/100 DOLLARS ($4,162,864.97), on the date hereof (the "**Existing Indebtedness**").

WHEREAS, Mortgagor delivered to Mortgagee that certain Restated Promissory Note, dated as of the date hereof, made by Mortgagor in favor of Mortgagee (as the same may be amended, restated, replaced, supplemented or otherwise modified from time to time, the "**Note**"), which Note (a) evidences the Existing Indebtedness and the new and additional indebtedness of THIRTY THOUSAND AND 00/100 DOLLARS ($30,000.00) (the "**New Indebtedness**") and (b) consolidates the Existing Indebtedness and the New Indebtedness into a single indebtedness in the consolidated principal sum of **FOUR MILLION ONE HUNDRED NINETY TWO THOUSAND EIGHT HUNDRED SIXTY FOUR AND 97/100 DOLLARS ($4,192,864.97);**

WHEREAS, this Mortgage consolidates, amends and restates in their entirety the Existing Mortgages to form a single lien in the consolidated principal sum of the Loan made to Mortgagor pursuant to the Note (as the same may be amended, restated, replaced, supplemented or otherwise modified from time to time); and

WHEREAS, Mortgagor desires to secure the payment of the Indebtedness and the performance of all of its obligations under the Note and the other Loan Documents (as defined below); and

WHEREAS, this Mortgage is given pursuant to the Note, and payment, fulfillment, and performance by Mortgagor of its obligations thereunder and under the other Loan Documents are secured hereby, and each and every term and provision of the Note, including the rights, remedies, obligations, covenants, conditions, agreements, indemnities, representations and warranties of the parties therein, are hereby incorporated by reference herein as though set forth in full and shall be considered a part of this Mortgage.

RESTATEMENT OF MORTGAGE

NOW THEREFORE, in consideration of the making of the Loan by Mortgagee and the covenants, agreements, representations and warranties set forth in this Mortgage:

The Existing Mortgages and the lien thereof are hereby modified, amended and restated in their entirety so that henceforth the terms, covenants, conditions and provisions of the Existing Mortgages shall read and be as set forth in this Mortgage and Mortgagor agrees to comply with and be subject to all of the terms, covenants and conditions of this Mortgage (it being understood and agreed that the execution of this Mortgage shall not impair the lien of the Existing Mortgages).

Mortgagor hereby certifies that this Mortgage secures the Existing Indebtedness evidenced by the Existing Notes, as modified pursuant to the immediately preceding paragraph, and secures no further or other indebtedness or obligation. Neither this Mortgage nor anything contained herein shall be construed as a substitution or novation of the Existing Indebtedness or of the Existing Mortgages, which shall remain in full force and effect as hereby confirmed, modified, restated and superseded.

This Mortgage is an extension and continuation of the same indebtedness evidenced by the Existing Notes and secured by the Existing Mortgages, as amended, restated and extended by this Mortgage.

NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THIS MORTGAGE, THE MAXIMUM PRINCIPAL AMOUNT OF INDEBTEDNESS SECURED BY THIS MORTGAGE AT EXECUTION OR WHICH UNDER ANY CONTINGENCY MAY BE SECURED HEREBY AT ANY TIME HEREAFTER IS FOUR MILLION ONE HUNDRED NINETY TWO THOUSAND EIGHT HUNDRED SIXTY FOUR AND 97/100 DOLLARS ($4,192,864.97).

The Existing Mortgages, as amended and restated in their entirety pursuant to this Mortgage, and the obligations of Mortgagor hereunder, are hereby ratified and confirmed, and shall remain in full force and effect until the full performance and satisfaction of all obligations of Mortgagor hereunder and under the Note and the other Loan Documents.

AND the parties further agree as follows:

PROPERTY MORTGAGED

Mortgagor does hereby irrevocably mortgage, grant, bargain, sell, pledge, assign, warrant, transfer and convey and grant a security interest to Mortgagee and its successors and assigns the following property, rights, interests and estates now owned, or hereafter acquired by Mortgagor (collectively, the "**Property**"):

ALL that certain land, with the buildings and improvements thereon erected, more particularly described in **Schedule "A"** annexed hereto and by this reference made a part hereof (hereinafter referred to as the **"said premises"**)

TOGETHER with the appurtenances and all the estate and rights of the Mortgagor in and to said premises, and all the right, title and interest of the Mortgagor in and to all land lying in the bed of all streets, roads, and public places, opened or proposed, in front of and adjoining the said premises and all easements and rights of way, public or private, now or hereafter used in connection with the said premises; all buildings, improvements, fixtures, equipment, inventory, computer software and hardware and other articles of personal property now or hereafter affixed to, placed upon or used in connection with the operation of the said premises, and the proceeds thereof, including the proceeds of hazard and title insurance relating thereto; all awards heretofore and hereafter made by reason of the taking of eminent domain of the whole or any part of the said premises or of any right appurtenant thereto, including any awards or payment for use and occupation and for change of grade of streets; all rents, issues and profits, general intangibles, chattel paper, accounts (including all accounts receivables, credit card receivables and reserve accounts), inventory, revenues, income and other benefits due or to become due to the Mortgagor for the use, operation or occupancy of the said premises and all franchises, trade names, trademarks, symbols, service marks, books, records, plans, specifications, designs, drawings, permits, consents, licenses, management agreements, franchise agreements, contract rights (including, without limitation, any contract with any architect or engineer or with any other provider of goods or services for or in connection with any construction, repair, or other work upon the said premises), approvals, actions and causes of action that now or hereafter relate to, are derived from or are used in connection with the said premises, or the use, operation, maintenance, occupancy or enjoyment thereof or the conduct of any business or activities thereon or any of the items covered hereby; all amounts refunded, or to be refunded, by taxing authorities from amounts paid for real estate taxes, water and sewer rental charges affecting the said premises and any amounts refunded, or to be refunded, by any insurer from amounts paid for insurance premiums for insurance affecting the said premises; all leases of the said premises or any part thereof now or hereafter entered into, including, without limitation, cash or securities deposited thereunder to secure performance by the lessees of their obligations thereunder (whether such cash or securities are to be held until the expiration of the terms of such leases or applied to one or more of the installments of rent coming due immediately prior to the expiration of such terms) and guarantees thereof; all certificates of deposit of Mortgagor in the possession of Mortgagee and the proceeds therefrom; all other rights and easements of Mortgagor or hereafter existing pertaining to the use and enjoyment of the said premises, including, without limitation, all declarations of covenants, conditions and restrictions as may affect or otherwise relate to the said premises; and all proceeds and products of the foregoing; all of which are covered by this Mortgage, which mortgage, shall also constitute a security agreement. This

provision shall be self operative, but the Mortgagor will execute and deliver to the Mortgagee on demand, and hereby irrevocably appoints the Mortgagee the attorney-in-fact of the Mortgagor to execute, deliver and file, such financing statements and other instruments as the Mortgagee may require in order to impose the lien of this Mortgage upon said fixtures and personal property. If the lien of this Mortgage on any fixtures or personal property is subject to a security interest covering such fixtures or personal property, then in the event of any default under this Mortgage, beyond the expiration of any applicable notice, grace or cure period, all the right, title and interest of the Mortgagor in and to any and all deposits being held by the holder of such security interest are hereby assigned to the Mortgagee, together with the benefit of any payments now or hereafter made thereon.

TOGETHER with all awards heretofore and hereafter made by reason of the taking by eminent domain of the whole or any part of said premises or of any right appurtenant thereto, including any awards or payments for use and occupation and for change of grade of streets, which awards are hereby assigned to the Mortgagee, which is hereby irrevocably authorized and appointed attorney-in-fact of the Mortgagor to collect and receive any such awards from the authorities making the same, to appear in any proceeding therefore, to give receipts and acquaintances therefore, and to apply the same to payment on account of the indebtedness secured hereby, whether then matured or not, and the Mortgagor will execute and deliver to the Mortgagee on demand such assignments and other instruments as the Mortgagee may require for said purposes and will reimburse the Mortgagee for its costs (including counsel fees) in the collection of such awards. In the event of any such taking, the Mortgagor agrees to pay, and agrees that any award shall be apportioned so that there shall first be paid therefrom in the order below named, to the Mortgagee, accrued interest at the rate herein specified on all principal amounts from time to time outstanding thereunder to the date of receipt of such payment by the Mortgagee, plus the entire principal balance secured hereby, notwithstanding any lesser interest rate required to be paid by the authorities making the awards, plus any other amounts due from Mortgagor to Mortgagee under this Mortgage.

TOGETHER with any and all air rights, development rights, zoning rights or other similar rights or interest that benefit or are appurtenant to the mortgaged premises and any proceeds arising therefrom, including, among other things, the Mortgagor's right to initiate, join in or consent to any change in any zoning ordinance, restrictive covenant, zoning lot merger agreement or other public or private restriction limiting or defining the uses which may be made of the premises or any part thereof.

This Mortgage and the grants, assignments and transfers made herein are given for the purpose of securing the indebtedness.

This Mortgage shall sometimes hereinafter be referred to as **"this Mortgage"** and the obligations evidenced by the bond or note secured hereby shall hereinafter be referred to as **"said obligation"** or the **"Loan"** and the term **"Indebtedness"** when used herein shall mean said obligation together with all other amounts due and owing under this Mortgage and all other documents and instruments delivered in connection herewith and with the Loan. This Mortgage and all of the other documents executed in connection therewith shall hereinafter be referred to as the **"Loan Documents"**).

AND the Mortgagor covenants with the Mortgagee as follows:

1. **Payment of the Indebtedness.** This Mortgage and the grants, assignments and transfers made herein are given for the purpose of securing the Indebtedness. Mortgagor will pay the Indebtedness at the time and in the manner provided in this Mortgage and the Loan Documents.

2. **Insurance.** The Mortgagor will keep the buildings and improvements now or hereafter erected on said premises and all fixtures and articles of personal property covered by this Mortgage insured against loss and damage (including law and ordinance coverage) by fire, by flood if said premises are located in an area identified by the Secretary of Housing and Urban Development as an area having special flood hazards and in which flood insurance has been made available under the National Flood Insurance Act of Nineteen Hundred Sixty-Eight, as amended from time to time or is available from private insurers, and by such other hazards as the Mortgagee may require, in amounts, with insurers and under forms of policies (including a standard mortgagee clause unless otherwise required) satisfactory to the Mortgagee; will deliver all such policies and, at least 15 days prior to their expiration dates, all renewals thereof to the Mortgagee; and will pay all premiums thereon. The amount of insurance coverage for loss and damage by fire shall be equal to the greater of (A) the replacement cost of the structure erected on said premises and (B) the amount required to avoid coinsurance. The Mortgagor shall also maintain a public liability policy or policies in such coverage amounts, including deductible provisions, covering such risks, issued by such companies and in such form, all as the Mortgagee may require from time to time. Upon any default under this Mortgage beyond the expiration of any applicable notice, grace or cure period, all of the Mortgagor's right, title and interest in and to all such policies are hereby assigned to the Mortgagee, including unearned premiums on such policies. The Mortgagor will not permit any condition to exist on said premises which would wholly or partially invalidate the insurance thereon. The Mortgagee may on behalf of the Mortgagor adjust and compromise any claims under such insurance and collect and receive the proceeds thereof and is hereby irrevocably appointed attorney-in-fact of the Mortgagor for such purposes, and may deduct from such proceeds any expense so incurred by it. Mortgagee may at its option either apply such proceeds in reduction of the Indebtedness secured by this Mortgage, whether then matured or not, or release such proceeds to the Mortgagor in whole or in part upon conditions satisfactory to the Mortgagee.

Mortgagor covenants and agrees that in case of damage to or destruction of any building or the building service equipment on said premises by fire or otherwise, or in the case of the taking by a condemning authority (other than by a temporary taking) it will promptly, at its sole cost and expense, restore, repair, replace, rebuild or alter the same as nearly as possible to the condition they were in immediately prior to such damage or destruction. Such restoration, repairs, replacements, rebuilding or alterations shall be commenced promptly and prosecuted with reasonable diligence.

Notwithstanding anything to the contrary contained herein, upon the foreclosure of this Mortgage, and whether or not the Mortgagee seeks or obtains a deficiency judgment in such foreclosure proceedings, all of the Mortgagor's right title and interest in and to the insurance

policies covering said premises then in force are hereby assigned to and shall pass to the purchaser of said premises at the foreclosure sale.

3. **Maintenance of Mortgaged Premises.** The Mortgagor will not cause or permit any building or improvement upon said premises to be erected, removed, demolished or structurally altered, in whole or in part, or any fixture or article of personal property covered by this Mortgage to be removed or destroyed, without the prior written consent of the Mortgagee. The Mortgagor will not abandon said premises or cause or permit any waste to the buildings, improvements, fixtures or articles of personal property covered by this Mortgage and will at all times maintain them in a reasonably good condition, and will comply, and cause all occupants of said premises to comply, with all laws and ordinances relating to the maintenance or use of said premises and with all requirements, orders and notices of violation thereof issued by any governmental department. The Mortgagor will pay all license fees and similar municipal charges for the use of vaults or other areas now or hereafter used in connection with said premises and will not, unless so required by any governmental agency having jurisdiction, discontinue such use without the prior written consent of the Mortgagee. Mortgagor covenants and agrees that in case of damage to or destruction of any building or the building service equipment on said premises by fire or otherwise, or in the case of the taking by a condemning authority (other than by a temporary taking) it will promptly, at its sole cost and expense, restore, repair, replace, rebuild or alter the same as nearly possible to the condition they were in immediately prior to such damage or destruction. Such restoration, repairs, replacements, rebuilding or alterations shall be commenced promptly and prosecuted with reasonable diligence. Within 60 days after notice and demand by the Mortgagee as to Mortgagor's failure to perform the foregoing, the Mortgagor will restore or repair said buildings, improvements, fixtures and articles of personal property as specified in such notice and demand. The Mortgagor will permit the Mortgagee and its representatives to enter said premises at reasonable times to inspect the same, and in case of any default under this paragraph, to enter said premises to protect, restore or repair any part thereof. The Mortgagee may, at any time, cause a survey to be made of said premises to determine the nature and estimated cost of the maintenance required hereunder and not performed, and a written report thereof shall be furnished to the Mortgagor. The Mortgagor hereby admits that the security of this Mortgage is impaired if such estimated cost shall exceed 10% of the principal Indebtedness secured by this Mortgage as hereinabove set forth, and in such event, without limiting Mortgagee's other remedies hereunder, and without relieving Mortgagor from its obligation to perform such maintenance, (i) an amount of the Indebtedness secured by this Mortgage equal to the amount of such estimated cost shall at the option of the Mortgagee become due and payable upon 30 days' written notice to the Mortgagor, and (ii) the cost of the aforementioned survey shall be paid by the Mortgagor to the Mortgagee on demand and be secured by this Mortgage. The Mortgagor covenants and agrees to discharge (by bond or otherwise) any mechanic's lien or claim therefore filed against the said premises within sixty (60) days after notice that a mechanic's lien or such claim has been filed.

4. **Receiver**. The Mortgagee, in any action to foreclose this Mortgage, shall be entitled (without notice, without regard to the adequacy of any security for the Indebtedness and without regard to the solvency of any person, firm or corporation liable for the payment thereof) to the appointment of a receiver of the rents and profits of said premises.

5. **Real Estate Taxes**. The Mortgagor will, except to the extent the same are covered by amounts actually paid to the Mortgagee pursuant to Section 23 hereof, pay all taxes, assessments and water charges and sewer rents upon said premises and articles of personal property covered by this Mortgage prior to the date penalties accrue for failure to pay said charges. The Mortgagor will pay any installments of any assessment made against said premises for local improvements within 60 days after notice and demand by the Mortgagee notwithstanding the same may not be due and payable at the time of such notice and demand. The Mortgagor will exhibit to the Mortgagee within 10 days after demand, receipted bills or satisfactory proofs of all such payments. After any default hereunder beyond the expiration of any applicable notice, grace or cure period, the Mortgagee shall be entitled to any refunds made or to be made by any taxing authority to be applied in reduction of the Indebtedness.

6. **Estoppel**. The Mortgagor within 3 days upon request in person or within 10 days upon request by mail will furnish a duly acknowledged written statement setting forth the amount of the Indebtedness secured by this Mortgage, and stating either that no offsets or defenses exist against the mortgage Indebtedness, or, if such offsets or defenses are alleged to exist, the nature thereof. Notice and demand or request may be made in writing and may be served in person or by mail.

7. **Ownership of Premises**. Mortgagor shall not, without Mortgagee's prior written consent, sell, convey or transfer the Premises or any portion thereof or any interest therein or contract to do so. If any Mortgagor, or any endorser or guarantor of the Indebtedness (collectively, the "Guarantor") is a corporation, or if any other person liable with respect to the Indebtedness or any portion thereof other than Mortgagor or any general partner of Mortgagor, Debtor or any Guarantor, is a corporation, any direct or indirect change in the beneficial ownership or number of issued and outstanding shares of any class of stock of such Mortgagor, Debtor, Guarantor or general partner, whether by operation of law or otherwise, after which the percentage of such shares beneficially owned by any person or group of persons having beneficial ownership of any such shares has changed by at least ten percent (10%) more or less than it was on the date of this Mortgage shall be deemed a sale, conveyance or transfer of the Premises within the meaning of this Section 7. If any Mortgagor, Debtor or Guarantor is a partnership, including a limited liability partnership, any change in the partnership interests of the general partners of such Mortgagor, Debtor or Guarantor or in the composition of the general partners of such Mortgagor, Debtor or Guarantor, whether by operation of law or otherwise, shall be deemed a sale, conveyance or transfer of the Premises within the meaning of this Section 7. If any Mortgagor, Debtor or Guarantor is a limited liability company, any change in the direct or indirect membership interest of any member or class of members of such Mortgagor, Debtor or Guarantor, whether by operation of law or otherwise, after which the percentage of such membership interest owned by any such member or class has changed by at least ten percent (10%) more or less than it was on the date of this Mortgage shall be deemed a sale, conveyance or transfer of the Premises within the meaning of this Section. The Mortgagor covenants and agrees for itself and any subsequent owner of said premises that the Mortgagee shall have the right to declare the entire mortgage Indebtedness due and payable in the event of sale, conveyance, transfer or disposition of the premises or any interest therein in violation of this Section.

8. **Warranty of Title**. The Mortgagor warrants the title of said premises and to the fixtures and personal property covered by this Mortgage, subject to the exceptions to title contained in the policy of title insurance insuring the Loan dated the date hereof.

9. **Sale in one Parcel**. In case of sale under foreclosure, said premises, including the improvements, fixtures and articles of personal property covered by this Mortgage, may be sold in one parcel.

10. **Corporate Authority.** If the Mortgagor is a corporation, the Mortgagor represents that it is duly organized and presently existing and this Mortgage has been executed by authority of its board of directors and with such consent of its stockholders as is required by its certificate of incorporation.

11. **Use and Occupancy.** If at any time the then existing use or occupancy of said premises shall, pursuant to any zoning or other law, ordinance or regulation, be permitted only so long as such use or occupancy shall continue, the Mortgagor will not cause or permit such use or occupancy to be discontinued without the prior written consent of the Mortgagee.

12. **Litigation.** If any action or proceeding be commenced by or against the Mortgagee, or the Mortgagor, including an action to foreclose this Mortgage, affecting said premises or the lien of this Mortgage, or if any action or proceeding be commenced which would affect any of the Mortgagee's rights in said premises, the Mortgagee may appear, defend, prosecute, retain counsel, and take such action as the Mortgagee shall deem advisable, and the costs thereof (including all counsel fees and all applicable statutory costs, allowances and disbursements) together with interest thereon at the rate equal to 400 basis points (4%) per annum in excess of the interest rate from time to time in effect hereunder but in no event in excess of the maximum rate permitted by law, shall be paid by the Mortgagor to the Mortgagee on demand and shall be secured by this Mortgage. The costs incurred by Mortgagee in connection with a foreclosure of this Mortgage shall also include the costs of obtaining any engineering, appraisal or environmental audit reports which Mortgagee deems necessary, in its sole discretion; which costs shall also be secured by this Mortgage.

13. **Lien Law.** The Mortgagor will receive the advances hereunder subject to the trust fund provisions of any applicable lien law, including Section 13 of the Lien Law of the State of New York.

14. **Assignment of Leases and Rents.** The Mortgagor hereby assigns to the Mortgagee, effective irrespective of any default hereunder, the rents and profits, including use and occupancy payments, from said premises and all leases now or hereafter affecting said premises as further security for the payment of the Indebtedness to the Mortgagee, provided, however, that until the Mortgagor defaults hereunder which continues beyond the expiration of any applicable notice, grace or cure period the Mortgagee may collect and apply all rents and other such payments, and the Mortgagor hereby appoints the Mortgagee its attorney-in-fact for such purpose. The Mortgagee shall have the right forthwith after any default hereunder which continues beyond the expiration of any applicable notice, grace or cure period, with or without notice or demand, with or without the commencement of any action to foreclose this Mortgage

and without the appointment of a receiver, to enter upon said premises, let the same, collect all rents therefrom and apply the rents, after payment of all charges and expenses, on account of the Indebtedness secured hereby, whether then matured or not, and the Mortgagor hereby irrevocably appoints the Mortgagee its attorney-in-fact to institute summary proceedings against any tenant of said premises who fails to comply with any lease provisions. In the event that the Mortgagor is an occupant of said premises, the Mortgagor agrees to surrender the possession of said premises to the Mortgagee immediately upon any default hereunder which continues beyond the expiration of any applicable notice, grace or cure period upon demand by the Mortgagee and if the Mortgagor remains in possession after such demand, such possession shall be as tenant of the Mortgagee, and the Mortgagor agrees to pay monthly in advance to the Mortgagee such rent for said premises so occupied as the Mortgagee may demand, and in default of so doing, the Mortgagor may also be dispossessed by summary proceedings or otherwise. In case of the appointment of a receiver of rents and profits of said premises, the covenants of this paragraph may be enforced by such receiver. The Mortgagee may, but shall not be obligated to make any tenant, licensee or other person in possession or occupancy under a written lease or otherwise, a party defendant to any foreclosure proceeding, and the Mortgagor, for itself and any subsequent owner of said premises, hereby waives any right it may have to require that any such tenant, licensee or person be made a party defendant in such proceeding. If any provision hereof is inconsistent with any separate assignment of leases and/or rents delivered to Mortgagee by Mortgagor, the provisions of such separate assignment shall control.

15. **Foreign Governments; Leases.** The Mortgagor covenants and agrees not to lease the whole or any part of the mortgaged premises to the United States of America, any state, any political subdivision thereof or any of their respective agencies, or to any person or entity having diplomatic or sovereign immunity, without the prior written consent of the Mortgagee. With regard to future tenants (or purchasers of apartments, if the premises have been converted to cooperative ownership), mortgagor covenants and agrees that no accredited representative or employee of a foreign government or international organization shall become a tenant under a lease (or proprietary lease, as the case may be) unless the appropriate representative of such foreign government or international organization shall, in writing to the lessor (or proprietary landlord as the case may be), either expressly waives diplomatic immunity or certifies that such employee or representative would not enjoy diplomatic immunity with regard to any action brought under the lease (or proprietary lease, as the case may be) and the person so certifying states that he is authorized to do so, except to the extent that the lessor or proprietary landlord as the case may be), is required by law to lease to such a person.

The Mortgagor will not, without the prior written consent of the Mortgagee, assign the rents or any part thereof, from said premises; nor consent to the cancellation or surrender of, or accept prepayment of rents under, any lease now or hereafter covering said premises or any part thereof nor modify any such lease so as to shorten the term, decrease the rent, accelerate the payment of rent or change the terms of any renewal option, and any such purported assignment, cancellation, surrender, prepayment or modification made without the written consent of the Mortgagee shall be void as against the Mortgagee. The Mortgagee shall be entitled to enforce the foregoing in any manner permitted by law or equity. The Mortgagor will upon demand of the Mortgagee enter into an agreement with the Mortgagee with respect to any lease hereafter executed covering said premises or any part thereof, and the Mortgagor hereby appoints the

Mortgagee attorney-in-fact of the Mortgagor to execute and deliver any such agreement on behalf of the Mortgagor and to deliver to the tenant to whose lease such agreement relates the written notice. The Mortgagor will perform and comply with the terms of all leases covering said premises or any part thereof on its part to be performed or complied with. If any provision hereof is inconsistent with any separate assignment of leases and/or rents delivered to Mortgagee by Mortgagor, the provisions of such separate assignment shall control. If said premises have been converted with the consent of Mortgagee to cooperative ownership and in connection with the sale of individual apartment units, the Mortgagor may join in the cancellation of the proprietary lease affecting such apartment unit in order to replace same with a proprietary lease to an approved transferee.

After the date of this Mortgage, Mortgagor will not rent any space in the said premises without the prior written consent of the Mortgagee. Any such new leases shall, among other things, be fully subordinate to the lien of all mortgages now or hereafter a lien on the said premises and to all extensions, modifications, renewals, replacements or increases thereof. If such subordination is to be conditioned upon receipt of a non-disturbance agreement (**"SNDA"**) from Mortgagee, such SNDA, if approved by Mortgagee, shall be prepared on Mortgagee's standard forms.

All leases entered into after the date of this Mortgage for the whole or any part of the Premises shall contain the following provision:

"Tenant hereby agrees not to look to the Mortgagee of the Premises as mortgagee, mortgagee in possession, or successor in title to the Premises, for accountability for any security deposit required by landlord hereunder, unless said sums have actually been received by said Mortgagee as security for tenant's performance of this Lease".

16. **Mortgage or Other Taxes.** If it shall be determined by the governmental authority having jurisdiction that mortgage or other taxes are due on this Mortgage or on the note or obligation secured by this Mortgage, the Mortgagor will pay the same.

17. **Performance of Other Agreements**. Mortgagor shall observe and perform each and every term, covenant and provision to be observed or performed by Mortgagor pursuant to the Note, any other Loan Document and any other agreement or recorded instrument affecting or pertaining to the Property and any amendments, modifications or changes thereto.

18. **Change of Name, Identity or Structure**. Mortgagor shall not change Mortgagor's name, identity (including its trade name or names) or, if not a individual, Mortgagor's corporate, partnership or other structure without first (a) notifying Mortgagee of such change in writing at least thirty (30) days prior to the effective date of such change, (b) taking all action required by Mortgagee for the purpose of perfecting or protecting the lien and security interest of Mortgagee and (c) in the case of a change in Mortgagor's structure, without first obtaining the prior written consent of Mortgagee. Mortgagor shall promptly notify Mortgagee in writing of any change in its organizational identification number. If Mortgagor does not now have an organizational identification number and later obtains one, Mortgagor shall promptly notify Mortgagee in writing of such organizational identification number. Mortgagor

shall execute and deliver to Mortgagee, prior to or contemporaneously with the effective date of any such change, any financing statement or financing statement change required by Mortgagee to establish or maintain the validity, perfection and priority of the security interest granted herein. At the request of Mortgagee, Mortgagor shall execute a certificate in form satisfactory to Mortgagee listing the trade names under which Mortgagor intends to operate the Property, and representing and warranting that Mortgagor does business under no other trade name with respect to the Property.

19. **Security Agreement; Cross Collateralization; Cross Default.**

(a) Security Agreement. This Mortgage is both a real property mortgage and a "security agreement" within the meaning of the Uniform Commercial Code. The Property includes both real and personal property and all other rights and interests, whether tangible or intangible in nature, of Mortgagor in the Property. By executing and delivering this Mortgage, Mortgagor hereby grants to Mortgagee, as security for the Obligations (hereinafter defined), a security interest in the Fixtures, the Equipment, the Personal Property and other property constituting the Property to the full extent that the Fixtures, the Equipment, the Personal Property and such other property may be subject to the Uniform Commercial Code (said portion of the Property so subject to the Uniform Commercial Code being called the "**Collateral**"). If an Event of Default shall occur and be continuing, Mortgagee, in addition to any other rights and remedies which it may have, shall have and may exercise immediately and without demand, any and all rights and remedies granted to a secured party upon default under the Uniform Commercial Code, including, without limiting the generality of the foregoing, the right to take possession of the Collateral or any part thereof, and to take such other measures as Mortgagee may deem necessary for the care, protection and preservation of the Collateral. Upon request or demand of Mortgagee after the occurrence and during the continuance of an Event of Default, Mortgagor shall, at its expense, assemble the Collateral and make it available to Mortgagee at a convenient place (at the Land if tangible property) reasonably acceptable to Mortgagee. Mortgagor shall pay to Mortgagee on demand any and all expenses, including reasonable legal expenses and attorneys' fees, incurred or paid by Mortgagee in protecting its interest in the Collateral and in enforcing its rights hereunder with respect to the Collateral after the occurrence and during the continuance of an Event of Default. Any notice of sale, disposition or other intended action by Mortgagee with respect to the Collateral sent to Mortgagor in accordance with the provisions hereof at least ten (10) business days prior to such action, shall, except as otherwise provided by applicable law, constitute reasonable notice to Mortgagor. The proceeds of any disposition of the Collateral, or any part thereof, may, except as otherwise required by applicable law, be applied by Mortgagee to the payment of the Indebtedness in such priority and proportions as Mortgagee in its discretion shall deem proper. The principal place of business of Mortgagor (Debtor) is as set forth on page one hereof and the address of Mortgagee (Secured Party) is as set forth on page one hereof.

Certain of the Property is or will become "fixtures" (as that term is defined in the Uniform Commercial Code) on the Land, described or referred to in this Mortgage, and this Mortgage, upon being filed for record in the real estate records of the city or county wherein such fixtures are situated, shall operate also as a financing statement filed as a fixture filing in accordance with the applicable provisions of said Uniform Commercial Code upon such of the Property that is or may become fixtures.

Mortgagor hereby pledges to Mortgagee any and all monies now or hereafter held by Mortgagee or on behalf of Mortgagee in connection with the Loan, including, without limitation, any reserve funds, any sums deposited in any account with the Mortgagee, as additional security for the Obligations until expended or applied as provided in this Mortgage.

(b) Cross-Collateralization and Cross-Default. Simultaneously with the execution and delivery of this Mortgage, Elite Investigations Ltd., a New York corporation, is entering into a certain line of credit (the "Line of Credit") pursuant to which the Mortgagee is making a loan to Elite Investigations Ltd. in the principal amount of $750,000.00 for short-term loans for working capital purposes. Such loan is evidenced by a certain Revolving Line of Credit Promissory Note (the "Line Note"), of even date herewith, which Line Note is secured by a certain Security Agreement (the "Line Security Agreement"), of even date herewith and the performance of such Line Security Agreement is guaranteed by the Mortgagor. It is the intention of the Mortgagor and the Mortgagee that this Mortgage and such Line Security Agreement each constitute a coordinated security interest in said premises. In the Event of a Default by Elite Investigations Ltd. under the Line Note or Line Security Agreement, such default shall constitute an Event of Default under this Agreement.

The Mortgagor agrees that the lien and interest of this Mortgage shall be absolute and unconditional and shall not in any manner be affected or impaired by any acts or omissions whatsoever of the Mortgagee and, without limiting the generality of the foregoing, the lien and interest hereof shall not be impaired by any acceptance by the Mortgagee of any other security for any of the Indebtedness, or by any failure, neglect or omission on the part of the Mortgagee to realize upon or protect any of the Indebtedness or any collateral security therefor including, without limitation, the Line Security Agreement. The lien and interest of this Mortgage shall not in any manner be impaired or affected by any release (except as to the property released), sale, pledge, surrender, compromise, settlement, renewal, extension, indulgence, alteration, changing, modification or disposition of any of the Indebtedness or of any of the collateral security therefor, including, without limitation, the Line Security Agreement, and the Mortgagee may exercise any other remedy available to the Mortgagee under the Line Security Agreement without first exercising or enforcing any of its remedies under this Mortgage and any exercise of the rights or remedies of the Mortgagee hereunder shall not in any manner impair the Indebtedness or the lien and interest of this Mortgage or the liens and interests of the Line Security Agreement or any of the Mortgagee's rights and remedies thereunder.

The Mortgagor specifically consents and agrees that the Mortgagee may exercise its rights and remedies hereunder and under the Line Note or Line Security Agreement separately or concurrently and in any order that it may deem appropriate and the Mortgagor waives any rights of subrogation. Without limiting the generality of the foregoing, the Mortgagor agrees that if an Event of Default is continuing (i) the Mortgagee shall have the right to pursue all of its rights and remedies in one proceeding, or separately and independently in separate proceedings from time to time, as the Mortgagee, in its sole and absolute discretion, shall determine from time to time, (ii) the Mortgagee is not required to either marshall assets, sell said premises or collateral encumbered by the Line Security Agreement in any inverse order of alienation, or be subject to any "one action" or "election of remedies" law or rule, (iii) the exercise by the

Mortgagee of any remedies against said premises or collateral encumbered by the Line Security Agreement will not impede the Mortgagee from subsequently or simultaneously exercising remedies against any other properties encumbered by the Security Agreement, and (iv) all liens and other rights, remedies or privileges provided to the Mortgagee shall remain in full force and effect until the Mortgagee has exhausted all of its remedies against said premises and all of the properties encumbered by the Line Security Agreement have been foreclosed, sold and/or otherwise realized upon in satisfaction of the Indebtedness or the Indebtedness has been paid in full.

20. **Financial Statements.** The Mortgagor will maintain full and correct books and records showing in detail the earnings and expenses of said premises; will permit the Mortgagee and its representatives to examine said books and records and all supporting vouchers and data at any time and from time to time upon request by the Mortgagee at said premises or at such other place in the city and county in which said premises are located as such books and records are customarily kept; and the Mortgagor at any time and from time to time will furnish to the Mortgagee at its request a statement showing in detail all such earnings and expenses since the last such statement, verified by the affidavit of the Mortgagor or then owner, or if the owner is a corporation by an affidavit of its principal executive officer. The Mortgagor shall furnish the following statements and/or reports (collectively, the "**Financial Statements**") to the Mortgagee:

(a) annually, as soon as available, but not more than one hundred fifty (150) days after the end of each applicable fiscal period, reviewed financial statements of the Mortgagor and each corporate or limited liability company Guarantor prepared by a certified public accountant, and signed annual Federal Tax Returns (and all schedules annexed thereto) of the Mortgagor and each corporate or limited liability company Guarantor when filed. The aforementioned financial statements shall be prepared on a consolidated and consolidating basis and in accordance with generally accepted accounting principles;

(b) copies of all Leases for said premises;

(c) such other information with respect to the financial condition, business, property, assets, revenues, and operations of the Mortgagor and the Premises, as the Mortgagee may from time to time reasonably request;

(d) annually, and no later than thirty (30) days after filing their personal tax returns, all personal Guarantors shall submit copies of such personal tax returns (including K-1 statements, if applicable);

(e) annually, and no later than thirty (30) days after filing their personal tax returns, (including K-1 statements, if applicable) all personal Guarantors shall submit copies of personal financial statements on forms acceptable to Mortgagee; and

(f) semi-annually, as soon as available, but not more than sixty (60) days after the end of the six (6) month semi-annual period, compiled financial statements of the Mortgagor and each corporate or limited liability company Guarantor prepared by a certified public

accountant, and signed annual Federal Tax Returns (and all schedules annexed thereto) of the Mortgagor and each corporate or limited liability company Guarantor when filed. The aforementioned financial statements shall be prepared on a consolidated and consolidating basis and in accordance with generally accepted accounting principles.

Each such statement shall be in scope and detail reasonably satisfactory to the Mortgagee and shall be certified by a principal officer of Mortgagor, if a corporation, or a general partner of the Mortgagor, if a partnership, or by a managing member, if a limited liability company, or by each individual Mortgagor, if individuals; provided, however, the annual Financial Statements shall be prepared by and certified by an independent certified public accountant of recognized standing and satisfactory to the Mortgagee and provided, further, however, that the Mortgagee may request such Financial Statements more often upon the occurrence of a default hereunder which continues beyond the expiration of any applicable notice, grace or cure period, or if the said premises shall not, in the sole determination of the Mortgagee, be performing satisfactorily and, upon such request, the Mortgagor shall provide same within thirty (30) days thereafter.

If requested by the Mortgagee, the Mortgagor further agrees that within ten (10) days after such request, it shall furnish a written statement containing the names of all tenants of the said premises, the terms of their respective tenancies, the spaces occupied, the rentals paid therefore and any defaults with respect thereto, which statement shall be certified by the Mortgagor in the same manner as is required in the preceding sentence.

The Mortgagor shall cause any Guarantor of the said obligation and any indemnitor under any indemnity given in connection herewith or with the said obligation to furnish (each, an "Indemnitor"), to the Mortgagee, within 30 days after the end of each fiscal year of such Guarantor and such Indemnitor, as the case may be, the annual Financial Statements referred to above of such Guarantor and such Indemnitor. All such Financial Statements shall be certified in the same manner as the annual Financial Statements required from Mortgagor as set forth above, provided, however, that the Mortgagee may request such statements more often upon the occurrence of a default hereunder or if the said premises shall not, in the sole determination of the Mortgagee, be performing satisfactorily and, upon such request, the Mortgagor shall provide same within thirty (30) days thereafter.

21. **Default Rate.** Upon any default of the Mortgagor in complying with or performing any warranty or covenant of this Mortgage beyond the expiration of any applicable notice, grace or cure period, the Mortgagee may, at the Mortgagee's option, comply with or perform the same, and the cost thereof, together with interest thereon at a rate equal to twenty four percent (24%) per annum ("Default Rate"), but in no event in excess of the maximum rate permitted by law, shall be paid by the Mortgagor to the Mortgagee on demand and shall be secured by this Mortgage. Notwithstanding that the Indebtedness secured by this Mortgage shall not have been declared due and payable upon any such default, said Indebtedness shall bear interest at the rate specified in the preceding sentence from the date of notice and demand therefore by Mortgagee until said default shall have been completely cured and removed to the satisfaction of the Mortgagee. On and after the maturity of the Indebtedness secured by this Mortgage, or upon the exercise by the Mortgagee of any option to declare the Indebtedness due and payable as provided in this Mortgage, said Indebtedness shall, without any notice or demand

by Mortgagee, bear interest at the rate specified in the first sentence of this paragraph, but nothing herein contained shall be deemed to extend the maturity of the Indebtedness.

22. **Partial Foreclosure.** The Mortgagee may, at the Mortgagee's option, foreclose this Mortgage for any portion of the Indebtedness or any other sums secured thereby which are then due and payable, subject to the continuing lien of this Mortgage for the balance of the mortgage Indebtedness not then due.

23. **Late Charge.** In the event that any payment herein provided for shall become overdue for a period in excess of ten (10) days, a "late charge" of five percent (5%) of the amount overdue shall become immediately due to the holder of this Mortgage as liquidated damages for failure to make prompt payment, and the same shall be secured by this Mortgage. Said charge shall be payable in any event not later than the due date of the next subsequent installment due hereunder.

24. **Defaults.**

(a) The whole of the Indebtedness secured by this Mortgage shall immediately become due and payable at the option of the Mortgagee, and thereupon the Mortgagee shall have the right, among others, to foreclose this Mortgage or may sell said premises in accordance with applicable law, upon the happening or any one or more of the following (each, an "Event of Default"):

(i) Failure of the Mortgagor to pay any installment of principal or interest or any other obligation owed to the Mortgagee, within ten (10) days after the due date thereof;

(ii) Failure of the Mortgagor to pay within ten (10) days of demand the amount of any costs of the Mortgagee, with interest thereon, secured by this Mortgage;

(iii) Failure of the Mortgagor to comply with or perform any other warranty or covenant of this Mortgage as hereby amended or in the obligation secured thereby, within any applicable grace period, if any, herein specified;

(iv) Refusal by two or more fire insurance companies lawfully doing business in the State of New York and issuing policies of fire insurance on buildings in the locality of said premises, upon application by the Mortgagee, to issue such policies on the buildings and improvements on said premises;

(v) Passage of any law deducting from the value of land for the purposes of taxation any lien thereon or changing in any way the taxation of mortgages or debts secured thereby for federal, state or local purposes;

(vi) Commencement of any action to foreclose any lien upon said premises or any part thereof including the improvements, fixtures and articles of personal property covered by this Mortgage;

(vii) The execution of any instrument or the taking of any action which results or may result in the use or transfer of air, development or zoning rights appurtenant to any part of the premises to or for the benefit of any other premises or in the imposition of any restriction on the future development of any part of the premises, the Mortgagor hereby agreeing that such sale or lease or other instrument or action shall be deemed conclusively to impair the security interest of the Mortgagee;

(viii) Conveyance or other transfer of said premises or any portion thereof or interest therein;

(ix) Failure to discharge (by bond or otherwise) any mechanic's or other lien filed against the said premises within sixty (60) days after Mortgagor obtains knowledge that a mechanic's lien has been filed;

(x) The (a) execution and delivery of any mortgages encumbering said premises without the prior written consent of the Mortgagee, except to the extent, if any, that same is expressly permitted by the terms of this Mortgage, or (b) the financing or sale and/or use of air rights or development rights without the prior written consent of the Mortgagee, the Mortgagor agreeing that any or all of said events shall significantly impair the security of the Mortgagee, or (c) incurring of any Indebtedness whether from another financial institution, donor, or any other party, without the prior written consent of the Mortgagee;

(xi) The occurrence of an event which would, pursuant to the terms hereof, entitle the Mortgagee to advance sums which would, when advanced, be secured by this Mortgage pursuant to the terms hereof;

(xii) Any default beyond the expiration of any applicable notice, grace or cure period contained therein under any assignment of leases and/or rents or under any other document executed by the Mortgagor and delivered to the Mortgagee in connection with this Mortgage;

(xiii) The discovery by the Mortgagee of any material misrepresentation made by the Mortgagor, or any principal of the Mortgagor, to the Mortgagee prior to or at the closing of the Loan secured by this Mortgage;

(xiv) The occurrence of any default, beyond the expiration of any applicable notice, grace or cure period, under any other mortgage covering the said premises, or under any loans made by Mortgagee to Mortgagor, giving rise to a right to accelerate payment thereof including, without limitation, any secured or unsecured loans;

(xv) Any improvement on said premises is substantially damaged or destroyed by a casualty which is partly or totally uninsured and Mortgagor fails to provide satisfactory evidence to Mortgagee within twenty days of such casualty that the necessary funds for satisfactory restoration of the improvement will be available at the time of restoration;

(xvi) The institution against Mortgagor or any person or entity with an interest in Mortgagor of criminal proceedings for which the forfeiture of assets is a potential penalty, if the assets potentially subject to such forfeiture could include any of the said premises;

(xvii) If a receiver, liquidator or trustee of Mortgagor or any Indemnitor or Guarantor shall be appointed or if Mortgagor or any Indemnitor or Guarantor shall be adjudicated a bankrupt or insolvent, or if any petition for bankruptcy, reorganization or arrangement pursuant to federal bankruptcy law, or any similar federal or state law, shall be filed by or against, consented to, or acquiesced in by, Mortgagor or any Indemnitor or Guarantor or if any proceeding for the dissolution or liquidation of Mortgagor or any Indemnitor or Guarantor shall be instituted; however, if such appointment, adjudication, petition or proceeding was involuntary and not consented to by Mortgagor or any Indemnitor or Guarantor, upon the same not being discharged, stayed or dismissed within sixty (60) days;

(xviii) Mortgagee in good faith reasonably believes that the prospect of payment of all or any part of the Indebtedness or performance of Mortgagor's or Debtor's obligations under this Mortgage or any other agreement now or hereafter in effect between Mortgagor, Debtor or Guarantor and Mortgagee or its Affiliates is impaired;

(xix) Failure of the Mortgagor and each corporate or limited liability company Guarantor to annually, as soon as available, but not more than one hundred fifty (150) days after the end of each applicable fiscal period, submit reviewed financial statements of the Mortgagor and each corporate or limited liability company Guarantor prepared by a certified public accountant, and signed annual Federal Tax Returns (and all schedules annexed thereto) of the Mortgagor and each corporate or limited liability company Guarantor when filed. The aforementioned financial statements shall be prepared on a consolidated and consolidating basis and in accordance with generally accepted accounting principles;

(xx) Failure of the Mortgagor and each corporate or limited liability company Guarantor to semi-annually, as soon as available, but not more than sixty (60) days after the end of the six (6) month semi-annual period, submit compiled financial statements prepared by a certified public accountant, and signed annual Federal Tax Returns (and all schedules annexed thereto) of the Mortgagor and each corporate or limited liability company Guarantor when filed. The aforementioned financial statements shall be prepared on a consolidated and consolidating basis and in accordance with generally accepted accounting principles;

(xxi) Failure of the individual Guarantors to submit to the Mortgagee signed annual personal financial statements (on the Mortgagee-approved form for same) and signed Federal Tax Returns (and all schedules annexed thereto) not more than thirty (30) days after the filing of such Federal Tax Returns;

(xxii) Failure by Mortgagor or Elite Investigations Ltd. or any corporate or limited liability company Guarantor to maintain a Debt Service Coverage (defined as EBITDA divided by Interest Expense plus CPLTD) of not less than 1.25x at any fiscal year end;

(xxiii) Failure of Elite Investigations Ltd. to have, at fiscal year end ending December 31, an Adjusted Tangible Net Worth defined as Shareholder's Equity (Deficit) plus Subordinated Debt plus 75% of the Appraised Value of said premises minus Due From Affiliates or any related party (i.e. Owners or Employees) minus Intangible Assets minus Book Value of said premises of not less than $750,000.00; or

(xxiv) Failure by Mortgagor or any of its affiliates to maintain a primary account relationship with Mortgagee.

(b) Remedies Upon Default. Upon the occurrence and during the continuance of any Event of Default, Mortgagor agrees that Mortgagee may take such action, without notice or demand, as it deems advisable to protect and enforce its rights against Mortgagor and in and to the Property, including, but not limited to, the following actions, each of which may be pursued concurrently or otherwise, at such time and in such order as Mortgagee may determine, in its sole discretion, without impairing or otherwise affecting the other rights and remedies of Mortgagee:

(i) declare the entire unpaid Indebtedness to be immediately due and payable;

(ii) institute proceedings, judicial or otherwise, for the complete foreclosure of this Mortgage under any applicable provision of law, in which case the Property or any interest therein may be sold for cash or upon credit in one or more parcels or in several interests or portions and in any order or manner;

(iii) with or without entry, to the extent permitted and pursuant to the procedures provided by applicable law, institute proceedings for the partial foreclosure of this Mortgage for the portion of the Indebtedness then due and payable, subject to the continuing lien and security interest of this Mortgage for the balance of the Indebtedness not then due, unimpaired and without loss of priority;

(iv) sell for cash or upon credit the Property or any part thereof and all estate, claim, demand, right, title and interest of Mortgagor therein and rights of redemption thereof, pursuant to power of sale or otherwise, at one or more sales, as an entirety or in parcels, at such time and place, upon such terms and after such notice thereof as may be required or permitted by law;

(v) institute an action, suit or proceeding in equity for the specific performance of any covenant, condition or agreement contained herein, in the Note, or in the other Loan Documents;

(vi) recover judgment on the Note either before, during or after any proceedings for the enforcement of this Mortgage or the other Loan Documents;

(vii) apply for the appointment of a receiver, trustee, liquidator or conservator of the Property, without notice and without regard for the adequacy of the security for the Indebtedness and without regard for the solvency of Mortgagor, any Guarantor, Indemnitor with respect to the Loan or of any Person liable for the payment of the Indebtedness;

(viii) the license granted to Mortgagor under Section 14 hereof shall automatically be revoked and Mortgagee may enter into or upon the Property, either personally or by its agents, nominees or attorneys and dispossess Mortgagor and its agents and servants therefrom, without liability for trespass, damages or otherwise and exclude Mortgagor and its agents or servants wholly therefrom, and take possession of all books, records and accounts

relating thereto and Mortgagor agrees to surrender possession of the Property and of such books, records and accounts to Mortgagee upon demand, and thereupon Mortgagee may (i) use, operate, manage, control, insure, maintain, repair, restore and otherwise deal with all and every part of the Property and conduct the business thereat; (ii) complete any construction on the Property in such manner and form as Mortgagee deems advisable; (iii) make alterations, additions, renewals, replacements and improvements to or on the Property; (iv) exercise all rights and powers of Mortgagor with respect to the Property, whether in the name of Mortgagor or otherwise, including, without limitation, the right to make, cancel, enforce or modify leases, obtain and evict tenants, and demand, sue for, collect and receive all rents of the Property and every part thereof; (v) require Mortgagor to pay monthly in advance to Mortgagee, or any receiver appointed to collect the rents, the fair and reasonable rental value for the use and occupation of such part of the Property as may be occupied by Mortgagor; (vi) require Mortgagor to vacate and surrender possession of the Property to Mortgagee or to such receiver and, in default thereof, Mortgagor may be evicted by summary proceedings or otherwise; and (vii) apply the receipts from the Property to the payment of the Indebtedness, in such order, priority and proportions as Mortgagee shall deem appropriate in its sole discretion after deducting therefrom all expenses (including reasonable attorneys' fees) incurred in connection with the aforesaid operations and all amounts necessary to pay the taxes, other charges, insurance and other expenses in connection with the Property, as well as just and reasonable compensation for the services of Mortgagee, its counsel, agents and employees;

(ix) exercise any and all rights and remedies granted to a secured party upon default under the Uniform Commercial Code, including, without limiting the generality of the foregoing:

(a) the right to take possession of the fixtures, the equipment and the personal property, or any part thereof, and to take such other measures as Mortgagee may deem necessary for the care, protection and preservation of the fixtures, the equipment and the personal property; and

(b) request Mortgagor at its expense to assemble the fixtures, the equipment and the personal property and make it available to Mortgagee at a convenient place acceptable to Mortgagee. Any notice of sale, disposition or other intended action by Mortgagee with respect to the fixtures, the equipment and/or the personal property sent to Mortgagor in accordance with the provisions hereof at least five (5) days prior to such action, shall constitute commercially reasonable notice to Mortgagor;

(xii) any sums then deposited or held in escrow or otherwise by or on behalf of Mortgagee in accordance with the terms of this Mortgage or any other Loan Document to the payment of the following items in any order in its uncontrolled discretion:

(a) Taxes and other charges;

(b) Insurance premiums;

(c) Interest on the unpaid principal balance of the Note;

(d) Amortization of the unpaid principal balance of the Note;

(e) All other sums payable pursuant to the Note, this Mortgage and the other Loan Documents, including without limitation advances made by Mortgagee pursuant to the terms of this Mortgage;

(f) pursue such other remedies as Mortgagee may have under applicable law.

In the event of a sale, by foreclosure, power of sale or otherwise, of less than all of Property, this Mortgage shall continue as a lien and security interest on the remaining portion of the Property unimpaired and without loss of priority.

(c) Mortgagee May Act. Upon the occurrence and during the continuance of any Event of Default or if Mortgagor fails to make any payment or to do any act as herein provided, Mortgagee may, but without any obligation to do so and without notice to or demand on Mortgagor and without releasing Mortgagor from any obligation hereunder, make or do the same in such manner and to such extent as Mortgagee may deem necessary to protect the security hereof. Mortgagee is authorized to enter upon the Property for such purposes, or appear in, defend, or bring any action or proceeding to protect its interest in the Property or to foreclose this Mortgage or collect the Indebtedness, and the cost and expense thereof (including reasonable attorneys' fees to the extent permitted by law), with interest as provided in this Section 24, shall constitute a portion of the Indebtedness and shall be due and payable to Mortgagee upon demand. All such costs and expenses incurred by Mortgagee in remedying such Event of Default or such failed payment or act or in appearing in, defending, or bringing any such action or proceeding shall bear interest at the Default Rate, for the period after notice from Mortgagee that such cost or expense was incurred to the date of payment to Mortgagee. All such costs and expenses incurred by Mortgagee together with interest thereon calculated at the Default Rate shall be deemed to constitute a portion of the Indebtedness and be secured by this Mortgage and the other Loan Documents and shall be immediately due and payable upon demand by Mortgagee therefor.

(d) Mortgagee Right to Defend and Take Action. Mortgagee has the right to appear in and defend any action or proceeding brought with respect to the Property and to bring any action or proceeding, in the name and on behalf of Mortgagor, which Mortgagee, in its discretion, decides should be brought to protect its interest in the Property. Mortgagee shall have the right from time to time to take action to recover any sum or sums which constitute a part of the Indebtedness as the same become due, without regard to whether or not the balance of the Indebtedness shall be due, and without prejudice to the right of Mortgagee thereafter to bring an action of foreclosure, or any other action, for a default or defaults by Mortgagor existing at the time such earlier action was commenced.

(e) Right to Cure. Anything to the contrary herein notwithstanding, before exercising its rights under Section 24(b) hereof, the Mortgagee shall give to Mortgagor notice in writing with respect to any non-monetary defaults (other than those defaults covered by the other provisions of Section 24) and Mortgagor shall have fifteen (15) days from the date of such notice to cure the default, except that, with respect to such defaults which are curable but which are incapable of being cured in said fifteen (15) day period, the Mortgagor shall commence to cure such default within fifteen (15) days, shall proceed promptly and diligently to cure the same and shall complete such cure within thirty (30) days after such notice date. Notwithstanding the foregoing, the provisions of this paragraph will not be applicable to any default which pursuant to the terms hereof or any other Loan Document has a specifically stated notice requirement and/or grace period. Failure to obtain and maintain the casualty and liability insurance required under this Mortgage shall be deemed a monetary default for the purposes of this paragraph.

25. **Deposits for Real Estate Taxes, etc.** If during the term of this Mortgage, the Mortgagee in its sole discretion deems it necessary in order to more fully protect the security of this Mortgage, together with, and in addition to, the monthly payments of principal and interest payable under the terms hereof, the Mortgagor will pay to the Mortgagee on the first day of the calendar month next succeeding the date hereof and on the first day of each month thereafter until the Indebtedness secured by this Mortgage shall have been paid in full, a sum equal to the real estate taxes next due on the mortgaged premises (as estimated by the Mortgagee) less all sums already paid therefore divided by the number of the monthly installments of principal and interest due hereunder before one month prior to the date on which such real estate taxes shall be due and payable, which sums to the extent received are to be held not as a trust fund and without interest or other payment of any kind but to be applied by the Mortgagee to the payment of such real estate taxes, as the same become due and payable. If such monthly payments become due at a time when the tax rate shall not have been fixed the monthly payment shall be estimated on the basis of the tax for the preceding year applied to the most recent assessed valuation. If the tax when paid varies from the tax as estimated in accordance with the preceding sentence, (i) any excess arising from said monthly payments shall be retained by the Mortgagee to be applied in reduction of subsequent monthly payments and (ii) any deficiency in the amount of such monthly payments below the tax as fixed shall be paid to the Mortgagee on demand. Upon any default hereunder beyond the expiration of any applicable notice, grace or cure period, the Mortgagee is authorized, at its option, to apply any sums held under this paragraph towards the elimination of any default of principal, interest or any covenant hereunder. "Real estate taxes", as used in this paragraph, shall be deemed to include assessments, water charges and sewer rentals.

26. **Impairment of Security.** The Mortgagor acknowledges that the security of the Mortgagee for the Indebtedness will be materially impaired, and the rights of the Mortgagee will not be adequately protected, if, at anytime the remaining principle Indebtedness hereunder exceeds the percent of the appraised value of said premises on which the Mortgagee relied in making this Mortgage. This acknowledgment in itself does not give the Mortgagee any right to accelerate the payment of the Indebtedness.

27. **No Waiver.** The acceptance by the Mortgagee of any sum after the same is due shall not constitute a waiver of the right either to require prompt payment, when due, of all other sums hereby secured or to declare a default as herein provided. The acceptance by the Mortgagee of any sum in an amount less than the sum then due shall be deemed an acceptance on account only and upon the condition that it shall not constitute a waiver of the obligations of the Mortgagor to pay the entire sun then due, and the Mortgagor's failure to pay said entire sum then due shall be and continue to be a default notwithstanding such acceptance or such amount on account, as aforesaid, and the Mortgagee shall be, at all times thereafter and until the entire sum then due shall have been paid, and notwithstanding the acceptance by the Mortgagee thereafter of further sums on account, or otherwise, entitled to exercise all rights hereunder conferred upon the Mortgagee, upon the occurrence of a default.

28. **Severability.** Should any term, provision, covenant or condition hereof be held to be void or invalid the same shall not affect any other term, provision, covenant or condition of this Mortgage, but the remainder hereof shall be effective as though such void or invalid term, provision, covenant or condition had not been contained herein.

29. **Due on Sale.** The Mortgagor hereby covenants and agrees that the commitment issued to Mortgagor by the Mortgagee for the Loan on the said premises was predicated on the continuation of the present ownership and management of the said premises, the same being a material inducement to the Mortgagee in the granting of the Loan and the Mortgagor agrees that the Mortgagee shall have the right and is hereby granted the right to call for the immediate payment of the entire mortgage Indebtedness, together with interest thereon and together with all other sums secured hereby, in the event that the said premises shall cease, without Mortgagee's prior written consent, to be owned and managed by the present owners, or in the event title to or any interest in the said premises and/or the air rights relating thereto and/or any other development rights relating thereto and/or the Mortgagor is directly or indirectly transferred, conveyed, assigned, mortgaged, encumbered or leased whether by deed, assignment, lease, transfer of stocks, security agreement, transfer of any partnership interest or by operation of law, without the Mortgagee's prior written consent. It is also agreed that the Mortgagor, or any successors in interest, will not, without the prior written consent of the Mortgagee execute, deliver and record any subordinate mortgage or other instrument encumbering the said premises including a purchase money wraparound mortgage, assignment of rents or of the Mortgagor's interest in leases. In the event of a default under the provisions of this paragraph, the Mortgagor agrees that the Mortgagee shall have the right and is hereby granted the right to declare the entire Indebtedness due and payable and to avail itself of all provisions set forth in this Mortgage, including Section 24 herein, for the collection of same including, without limitation, the right of foreclosure and the appointment of a receiver.

30. **Notices.** All notices to be given hereunder shall be delivered by hand, or sent to the party to be notified, via certified mail, return receipt requested or sent by recognized overnight courier which provides evidence of receipt and shall be deemed given when delivered by hand or one (1) business day after delivery to such recognized overnight courier or three (3) days after being posted with the United States Postal Service addressed to the parties as follows:

If to the Mortgagee:
SIGNATURE BANK
565 Fifth Avenue
New York, New York 10017
Attn.: Edwin Sirlin, Senior Vice-President

If to the Mortgagor:
Elite 29 Realty LLC
538 West 29th Street
New York, New York 10001
Attn.: Joseph Saponaro, President

31. **Undertaking to Cure Violations.** The Mortgagor covenants and undertakes (i) to cure all currently outstanding notices of violations with any municipal department having jurisdiction over said premises, and file all applications for the removal of violations and to furnish Mortgagee with evidence of such cure and the filing of such applications within six (6) months from the date hereof and (ii) to continue to make diligent efforts to have such violations removed of record thereafter. Failure to comply with the above shall constitute a default under this Mortgage as if such default were specifically contained in Section 24 and the Mortgagor

agrees to indemnify and hold Mortgagee harmless from and against any loss, liability, damage or expense suffered or incurred by Mortgagee arising out of or by reason of Mortgagor's failure to comply with the above.

32. **Hazardous Substance.** (a) The Mortgagor represents, covenants and warrants that: (i) to the best of Mortgagor's knowledge, the said premises encumbered hereby, have been at all times during Mortgagor's ownership thereof, and presently are, except as shown in any environment audit report prepared by Mortgagee's consultant in connection herewith, free of contamination arising out of or resulting from: (x) any petroleum or petroleum derivatives; (y) any substance or material presently identified or deemed to be toxic or hazardous under or pursuant to 42 U.S.C. §§9601-9675 or any other applicable federal, state or local statute, rule or regulation (any and all federal, state or local statutes, rules, orders or regulations, now or hereafter in effect, dealing with matters involving toxic or hazardous substances, the use, discharge or release of same, the environment or health or safety, are hereinafter collectively, referred to as the "**Law**"), including, without limitation, whether or not defined as such by the Law, any asbestos, polychlorinated biphenyls ("**PCBs**"), radioactive substance, methane, volatile hydrocarbons, industrial solvents, lead or lead based paint; or (z) any other material or substance which has in the past or could presently cause or constitute a health, safety or other environmental hazard to any person or property (all of the foregoing described in (x), (y) or (z) above and any other material which in the future could cause or constitute a health, safety or other environmental hazard to any person or property shall hereinafter be referred to as "**Hazardous Substances**" and any one of same as a "**Hazardous Substance**"); (ii) the Mortgagor has not caused or, to the best of the Mortgagor's knowledge, suffered to occur, and the Mortgagor will not hereafter cause or suffer to occur, a disposal or release of any Hazardous Substance in violation of the Law at, upon, under or within the said premises or any contiguous or adjacent real estate; (iii) neither the Mortgagor nor, to the best of the Mortgagor's knowledge, any other party has been, is or will be involved in operations or activities at or near the said premises that could result in, give rise to, or lead to the imposition of liability upon Mortgagor or any other owner of the said premises or the creation of a lien on the said premises, under the Law; (iv) the Mortgagor has not, to the best of Mortgagor's knowledge, permitted, and will not knowingly permit, any tenant or occupant of the said premises to engage in any operation or activity that could result in, give rise to, or lead to the imposition of liability on such tenant or occupant, Mortgagor or any other owner of any of the said premises, or the creation of a lien on the said premises, under the Law; (v) neither the Mortgagor nor, to the best of the Mortgagor's knowledge, any other party, has received any notice or inquiry pursuant to the Law pertaining to Hazardous Substances either at said premises or, with respect to the disposal of same, off said premises, or any notice from any party of any violation of the Law, and (vi) except as previously disclosed to the Mortgagee, to the best of the Mortgagor's knowledge, no authority, including, without limitation, the Federal Environmental Protection Agency ("**EPA**") has ever cited the premises for violation of the Law. The "**Mortgagor's knowledge**", as such term is used herein, shall include, if the Mortgagor is not actively involved in the day to day operations of said premises, the actual knowledge of the individuals who, in a management or supervisory capacity, are actively involved in such day to day operations.

(b) The Mortgagor further represents that the Mortgagor shall: (1) comply strictly and in all respects with the requirements of the Law; (2) notify Mortgagee promptly

following receipt of knowledge by the Mortgagor in the event of any disposal, release or threatened release of any Hazardous Substance at, upon, under or within the said premises; and (3) promptly forward to Mortgagee copies of all orders, notices, permits, applications, and other communications and reports in connection with any such disposal, release or threatened release of any Hazardous Substance or any other matters relating to the Law, as they may affect the said premises.

(c) The Mortgagor, promptly upon the written request of the Mortgagee, from time to time, shall, at the Mortgagor's expense, provide the Mortgagee with an environmental site assessment or environmental audit report, or an update of such an assessment or report, all in scope, form and content satisfactory to the Mortgagee; such notice from the Mortgagee shall be based upon reasonable cause and shall set forth the Mortgagee's reason for requesting such assessment.

(d) The Mortgagor hereby indemnifies the Mortgagee and agrees to hold the Mortgagee harmless from and against all loss, liability, damage and expense, including attorney's fee and expenses suffered or incurred by the Mortgagee, including but not limited to any and all costs and expenses incurred by Mortgagee (including but not limited, the cost of any investigation to determine whether a cleanup of said premises is necessary, the cost of cleanup, payment of fines or penalties and payment of damages to third parties) whether as holder of this Mortgage, as mortgagee in possession or as successor in interest to the Mortgagor or as owner of the said premises by virtue of foreclosure or acceptance of a deed in lieu of foreclosure or in any other capacity, (i) under or on account of the Law or related regulations or any similar applicable laws or regulations, including the assertion of any lien against the said premises thereunder (ii) with respect to the existence of, or any disposal, release or threatened release of, any Hazardous Substance affecting the said premises whether or not the same originates or emanates from the said premises or any other source, including any loss of value of the said premises as a result of such existence, disposal, release or threatened release of any Hazardous Substance, (iii) with respect to any other matter affecting the said premises within the jurisdiction of the Environmental Protection Agency of the United States of America or the agencies having authority for environmental protection or conservation in the State in which said premises are situated; and (iv) with respect to Mortgagee's reliance on any representation or warranty of the Mortgagor herein. This indemnification shall not cover any loss occasioned solely by acts committed (i) after the Mortgagor or any subsequent owner is no longer the owner of the said premises by reason of a sale pursuant to a foreclosure of this Mortgage or a deed in lieu of foreclosure of this Mortgage or (ii) during the period Mortgagee has actual physical possession of the said premises, but it will cover a loss occasioned by acts committed or matters arising prior to or during any period in which a court appointed receiver is in possession of the said premises. The term "**loss**" shall include any amounts paid by Mortgagee in connection with any settlement or compromise made by Mortgagee in good faith, upon giving the undersigned ten (10) days prior notice, of any claim, demand, loss, liability, cost, charge, suit, order, judgment or adjudication, in connection with the foregoing, under the belief that it is liable therefor, whether liable or not, without the consent or approval of the Mortgagor unless the Mortgagor within such ten (10) day period shall protest in writing and simultaneously with such protest deposit with Mortgagee collateral satisfactory to Mortgagee sufficient to pay and satisfy in Mortgagee's opinion any damages, penalty and interest which may accrue as a result of such claim, demand,

loss, liability, cost, charge, attorney's fee, expense, suit, order, judgment or adjudication and any judgment or judgments as may result. The term "**Mortgagee**" shall include any successor, assignee or designee of Mortgagee, which becomes the owner of this Mortgage or the owner of the said premises through foreclosure or acceptance of a deed in lieu thereof and shall include any directors, officers, employees, partners or agents or Mortgagee and any of the foregoing. All representations, covenants and indemnifications herein shall survive the repayment of the Indebtedness hereby secured and the satisfaction of this Mortgage.

(e) In the event of any existence, disposal, release or threatened release of any Hazardous Substance affecting the said premises, whether or not the same originates or emanates from the said premises or any other source, and/or if the Mortgagor shall fail to comply with any of the requirements of the Law or related regulations or any other environmental law or regulation, the Mortgagee may at its election, but without the obligation so to do, give such notices and/or cause such work to be performed at the said premises and/or take any and all other actions as the Mortgagee shall deem necessary or advisable in order to remedy said existence, disposal, release or threatened release of any Hazardous Substance or cure said failure of compliance and any amounts paid as a result thereof, together with interest thereon at the default interest rate provided in Section 21 hereof from the date of payment by the Mortgagee, shall be immediately due and payable by the Mortgagor to the Mortgagee and until paid shall be secured by this Mortgage and shall have the benefit of the lien hereby created as a part thereof.

(f) Nothing herein contained shall be construed to limit the effectiveness of the representations, covenants warranties and indemnification provisions contained in (a) through (e) above to the period during which any amounts due and payable under the Loan Documents remain outstanding and they shall survive the repayment of such amounts or the extinguishment of the Mortgage and shall continue in full force and effect so long as any matters shall exist against which Mortgagor has indemnified Mortgagee pursuant thereto and such representations, covenants, warranties and indemnity shall be in addition to, and not in lieu of, any rights granted to Mortgagee in this Mortgage or any of the other Loan Documents.

33. **Recording of Mortgage; Replacement Documents.** At any time, and from time to time, upon request of Mortgagee, Mortgagor will make, execute and deliver, or will cause to be made, executed or delivered, to Mortgagee or to Mortgagee's designee, and when requested by Mortgagee, cause to be filed, recorded, refiled, or rerecorded, as the case may be, at such times and in such offices and places as Mortgagee may deem appropriate, any and all such mortgages, deeds of trust, security deeds, security agreements, financing statements, continuation statements, instruments of further assurance, certificates, and other documents as may, in the sole opinion of Mortgagee, be necessary or desirable in order to effectuate, complete, perfect, continue, or preserve (a) the obligations of Mortgagor under the Note, this Mortgage, and the related documents, and (b) the liens and security interests created by this Mortgage as first and prior liens on the Property, whether now owned or hereafter acquired by Mortgagor. Unless prohibited by law or agreed to the contrary by Mortgagee in writing, Mortgagor shall reimburse Mortgagee for all costs and expenses incurred in connection with the matters referred to in this paragraph.

Upon receipt of an affidavit of an officer of Mortgagee as to the loss, theft, destruction or mutilation of the Note or any other Loan Document which is not of public record, and, in the case of any such mutilation, upon surrender and cancellation of such Note or other Loan Document, Mortgagor will issue, in lieu thereof, a replacement Note or other Loan Document, dated the date of such lost, stolen, destroyed or mutilated Note or other Loan Document in the same principal amount thereof and otherwise of like tenor.

34. **Indemnification**. Mortgagor shall, at its sole cost and expense, protect, defend, indemnify, release and hold harmless the Indemnified Parties from and against any and all claims, suits, liabilities (including, without limitation, strict liabilities), actions, proceedings, obligations, debts, damages, losses, costs, expenses, diminutions in value, fines, penalties, charges, fees, expenses, judgments, awards, amounts ·paid in settlement, of whatever kind or nature, but excluding consequential, special or punitive damages (including but not limited to reasonable attorneys' fees and other costs of defense) (collectively, the "Losses") imposed upon or incurred by or asserted against any Indemnified Parties· and directly or indirectly arising out of or in any way relating to anyone or more of the following: (a) ownership of this Mortgage, the Property or any interest therein or receipt of any Rents; (b) any amendment to, or restructuring of, the Indebtedness, and the Note, this Mortgage, or any other Loan Documents; (c) any and all lawful action that may be taken by Mortgagee in connection with the enforcement of the provisions of this Mortgage or the Note or any of the other Loan Documents, whether or not suit is filed in connection with same, or in connection with Mortgagor, any Guarantor or Indemnitor and/or any partner, joint venturer or shareholder thereof becoming a party to a voluntary or involuntary federal or state bankruptcy, insolvency or similar proceeding; (d) any accident, injury to or death of persons or loss of or damage to property occurring in, on or about the Property or any part thereof or on the adjoining sidewalks, curbs, adjacent property or adjacent parking areas, streets or ways; (e) any use, nonuse or condition in, on or about the Property or any part thereof or on the adjoining sidewalks, curbs, adjacent property or adjacent parking areas, streets or ways; (f) any failure on the part of Mortgagor to perform or be in compliance with any of the terms of this Mortgage; (g) performance of any labor or services or the furnishing of any materials or other property in respect of the Property or any part thereof; (h) the failure of any person to file timely with the Internal Revenue Service an accurate Form 1099-B, Statement for Recipients of Proceeds from Real Estate, Broker and Barter Exchange Transactions, which may be required in connection with this Mortgage, or to supply a copy thereof in a timely fashion to the recipient of the proceeds of the transaction in connection with which this Mortgage is made; (i) any failure of the Property to be in compliance with any Legal Requirements; CD the enforcement by any Indemnified Party of the provisions of this Article 9; (k) any and all claims and demands whatsoever which may be asserted against Mortgagee by reason of any alleged obligations or undertakings on its part to perform or discharge any of the terms, covenants, or agreements contained in any Lease; (1) the payment of any commission, charge or brokerage fee to anyone claiming through Mortgagor which may be payable in connection with the funding of the Loan; or (m)any misrepresentation made by Mortgagor in this Mortgage or any other Loan Document. Any amounts payable to Mortgagee by reason of the application of this Section 34 shall become immediately due and payable and shall bear interest at the Default Rate from the date loss or damage is sustained by Mortgagee until paid. For purposes of this Article 9, the term **"Indemnified Parties"** means Mortgagee and any Person who is or will have been involve in the origination of the Loan, any Person who is or will have been involved in the servicing of the

Loan secured hereby, any Person in whose name the encumbrance created by this Mortgage is or will have been recorded, persons and entities who may hold or acquire or will have held a full or partial interest in the Loan secured hereby (including, but not limited to, investors in the Securities, as well as custodians, trustees and other fiduciaries who hold or have held a full or partial interest in the Loan secured hereby for the benefit of third parties) as well as the respective directors, officers, shareholders, partners, employees, agents, servants, representatives, contractors, subcontractors, affiliates, subsidiaries, participants, successors and assigns of any and all of the foregoing (including but not limited to any other Person who holds or acquires or will have held a participation or other full or partial interest in the Loan, whether during the term of the Loan or as a part of or following a foreclosure of the Loan and including, but not limited to, any successors by merger, consolidation or acquisition of all or a substantial portion of Mortgagee's assets and business).

35. **Satisfaction.** Upon the payment in full of the amounts due under, evidenced or secured by this Mortgage, the Mortgagee will surrender this Mortgage or any other evidence of the obligation for which this Mortgage is given as security, to Mortgagor, or any other person entitled to it, and will execute and deliver to Mortgagor or other person entitled to it, a full and sufficient satisfaction piece or assignment, as Mortgagor or other person entitled to it may request.

36. **Satisfaction of Other Loans.** Upon the maturity of this Mortgage or if the Mortgagor elects to prepay the mortgage loan, the Mortgagor shall also be required to prepay all outstanding loans owed by Mortgagor to Mortgagee.

37. **No Secondary Financing or Other Liens**. Mortgagor shall not, without Mortgagee's prior written consent, mortgage, pledge, assign, grant a security interest in or cause any other lien or encumbrance to be made or permit any other lien or encumbrance to exist upon the premises or any portion thereof except for (a) taxes and assessments not yet delinquent and (b) any mortgage, pledge, security interest, assignment or other lien or encumbrance to Mortgagee or any affiliate of Mortgagee (an "Affiliate").

38. **Reserve Account.** The Mortgagor covenants and agrees that it shall deposit with Mortgagee all its monies, whether tenant security deposits, if any, or reserve funds or operating accounts, which funds shall be maintained in accounts with the Mortgagee or invested at the direction of the Mortgagor through the Mortgagee or its affiliates in U.S. Treasury obligations, municipal bonds or other financial investments typically held by cooperative corporations; provided, however, notwithstanding the foregoing, if any such money cannot now be withdrawn from their current accounts or investments without incurring an early withdrawal penalty, Mortgagor shall certify as to the amount of same and the date or dates they can be withdrawn without penalty and shall agree to so deposit such money 14 days after such date or dates. Failure to deposit all reserve monies and maintain accounts and/or invest as aforesaid shall be deemed a default under the terms of this Mortgage.

39. **Governing Law**.

(a) THIS MORTGAGE WAS NEGOTIATED IN THE STATE OF NEW YORK, AND MADE BY MORTGAGOR AND ACCEPTED BY MORTGAGEE IN THE

STATE OF NEW YORK, AND THE PROCEEDS OF THE NOTE SECURED HEREBY WERE DISBURSED FROM THE STATE OF NEW YORK, WHICH STATE THE PARTIES AGREE HAS A SUBSTANTIAL RELATIONSHIP TO THE PARTIES AND TO THE UNDERLYING TRANSACTION EMBODIED HEREBY, AND IN ALL RESPECTS, INCLUDING, WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, MATTERS OF CONSTRUCTION, VALIDITY AND PERFORMANCE, THIS MORTGAGE AND THE OBLIGATIONS ARISING HEREUNDER SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK APPLICABLE TO CONTRACTS MADE AND PERFORMED IN SUCH STATE (WITHOUT REGARD TO PRINCIPLES OF CONFLICT LAWS) AND ANY APPLICABLE LAW OF THE UNITED STATES OF: AMERICA, EXCEPT THAT AT ALL TIMES THE PROVISIONS FOR THE CREATION, PERFECTION, AND ENFORCEMENT OF THE LIENS AND SECURITY INTERESTS CREATED PURSUANT HERETO AND PURSUANT TO THE OTHER LOAN DOCUMENTS WITH RESPECT TO THE PROPERTY SHALL BE GOVERNED BY AND CONSTRUED ACCORDING TO THE LAW OF THE STATE IN WHICH THE PROPERTY IS LOCATED, IT BEING UNDERSTOOD THAT, TO THE FULLEST EXTENT PERMITTED BY THE LAW OF SUCH STATE, THE LAW OF THE STATE OF NEW YORK SHALL GOVERN THE CONSTRUCTION, VALIDITY AND ENFORCEABILITY OF ALL LOAN DOCUMENTS AND ALL OF THE OBLIGATIONS ARISING HEREUNDER OR THEREUNDER. TO THE FULLEST EXTENT PERMITTED BY LAW, MORTGAGOR HEREBY UNCONDITIONALLY AND IRREVOCABLY WAIVES ANY CLAIM TO ASSERT THAT THE LAW OF ANY OTHER JURISDICTION GOVERNS THIS MORTGAGE OR THE OTHER LOAN DOCUMENTS, AND THIS MORTGAGE AND THE OTHER LOAN DOCUMENTS SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK PURSUANT TO SECTION 5-1401 OF THE NEW YORK GENERAL OBLIGATIONS LAW.

(b) ANY LEGAL SUIT, ACTION OR PROCEEDING AGAINST MORTGAGEE OR MORTGAGOR ARISING OUT OF OR RELATING TO THIS MORTGAGE MAY AT MORTGAGEE'S OPTION BE INSTITUTED IN ANY FEDERAL OR STATE COURT IN THE CITY OF NEW YORK, COUNTY OF NEW YORK, PURSUANT TO SECTION 5-1402 OF THE NEW YORK GENERAL OBLIGATIONS LAW, AND MORTGAGOR WAIVES ANY OBJECTIONS WHICH IT MAY NOW OR HEREAFTER HAVE BASED ON VENUE AND/OR FORUM NON CONVENIENS OF ANY SUCH SUIT, ACTION OR PROCEEDING, AND MORTGAGOR HEREBY IRREVOCABLY SUBMITS TO THE JURISDICTION OF ANY SUCH COURT IN ANY SUIT, ACTION OR PROCEEDING.

40. **Usury Laws**. Notwithstanding anything to the contrary, (a) all agreements and communications between Mortgagor and Mortgagee are hereby and shall automatically be limited so that, after taking into account all amounts deemed interest, the interest contracted for, charged or received by Mortgagee shall never exceed the maximum lawful rate or amount, (b) in calculating whether any interest exceeds the lawful maximum, all such interest shall be amortized, prorated, allocated and spread over the full amount and term of all principal Indebtedness of Mortgagor to Mortgagee, and (c) if through any contingency or event, Mortgagee receives or is deemed to receive interest in excess of the lawful maximum, any such excess shall be deemed to have been applied toward payment of the principal of any and all then

outstanding Indebtedness of Mortgagor to Mortgagee, or if there is no such Indebtedness, shall immediately be returned to Mortgagor.

41. **Provisions Subject to Applicable Law**. All rights, powers and remedies provided in this Mortgage may be exercised only to the extent that the exercise thereof does not violate any applicable provisions of law and are intended to be limited to the extent necessary so that they will not render this Mortgage invalid, unenforceable or not entitled to be recorded, registered or filed under the provisions of any applicable law. If any term of this Mortgage or any application thereof shall be invalid or unenforceable, the remainder of this Mortgage and any other application of the term shall not be affected thereby.

42. **Miscellaneous Provisions**.

(a) No Oral Change. This Mortgage, and any provisions hereof, may not be modified, amended, waived, extended, changed, discharged or terminated orally or by any act or failure to act on the part of Mortgagor or Mortgagee, but only by an agreement in writing signed by the party against whom enforcement of any modification, amendment, waiver, extension, change, discharge or termination is sought.

(b) Successors and Assigns. This Mortgage shall be binding upon and inure to the benefit of Mortgagor and Mortgagee and their respective successors and assigns forever.

(c) Inapplicable Provisions. If any term, covenant or condition of the Note or this Mortgage is held to be invalid, illegal or unenforceable in any respect, the Note and this Mortgage shall be construed without such provision.

(d) Headings. The headings and captions of various Sections of this Mortgage are for convenience of reference only and are not to be construed as defining or limiting, in any way, the scope or intent of the provisions hereof.

(e) Number and Gender. Whenever the context may require, any pronouns used herein shall include the corresponding masculine, feminine or neuter forms, and the singular form of nouns and pronouns shall include the plural and vice versa.

(f) Subrogation. If any or all of the proceeds of the Note have been used to extinguish, extend or renew any Indebtedness heretofore existing against the Property, then, to the extent of the funds so used, Mortgagee shall be subrogated to all of the rights, claims, liens, titles, and interests existing against the Property heretofore held by, or in favor of, the holder of such Indebtedness and such former rights, claims, liens, titles, and interests, if any, are not waived but rather are continued in full force and effect in favor of Mortgagee and are merged with the lien and security interest created herein as cumulative security for the repayment of the Indebtedness, the performance and discharge of Mortgagor's obligations hereunder, under the Note and the other Loan Documents and the performance and discharge of the Other Obligations.

(g) Entire Agreement. The Note, this Mortgage and the other Loan Documents constitute the entire understanding and agreement between Mortgagor and Mortgagee with respect to the transactions arising in connection with the Indebtedness and supersede all prior written or oral understandings and agreements between Mortgagor and Mortgagee with respect thereto. Mortgagor hereby acknowledges that, except as incorporated in writing in the Note, this Mortgage and the other Loan Documents, there are not, and were not, and no persons are or were authorized by Mortgagee to make, any representations,

understandings, stipulations, agreements or promises, oral or written, with respect to the transaction which is the subject of the Note, this Mortgage and the other Loan Documents.

(h) Limitations on Mortgagee's Responsibility. No provision of this Mortgage shall operate to place any obligation or liability for the control, care, management or repair of the Property upon Mortgagee, nor shall it operate to make Mortgagee responsible or liable for any waste committed on the Property by the tenants or any other Person, or for any dangerous or defective condition of the Property, or for any negligence in the management, upkeep, repair or control of the Property resulting in loss or injury or death to any tenant, licensee, employee or stranger. Nothing herein contained shall be construed as constituting Mortgagee a "mortgagee in possession."

43. State Specific Provisions.

(a) Principles of Construction. In the event of any inconsistencies between the terms and conditions of this Section 43 and the other terms and conditions of this Mortgage, the terms and conditions of this Section 43 shall control and be binding.

(b) Maximum Principal Sum. THE PARTIES HERETO INTEND THAT THIS MORTGAGE SHALL SECURE UNPAID BALANCES OF THE INDEBTEDNESS SECURED HEREBY WHETHER INCURRED BY MORTGAGOR AT THE DATE HEREOF OR AFTER THIS MORTGAGE IS DELIVERED FOR RECORDATION IN THE OFFICIAL RECORDS OF THE COUNTY IN WHICH THE PROPERTY IS LOCATED. THE MAXIMUM PRINCIPAL AMOUNT OF INDEBTEDNESS WHICH IS OR UNDER ANY CONTINGENCY MAY BE SECURED AT THE DATE OF EXECUTION HEREOF OR A T ANY TIME THEREAFTER BY THIS MORTGAGE IS **FOUR MILLION ONE HUNDRED NINETY TWO THOUSAND EIGHT HUNDRED SIXTY FOUR AND 97/100 DOLLARS ($4,192,864.97).**

(c) Trust Fund for Advances. In compliance with Section 13 of the Lien Law of the State of New York, Mortgagor will receive the advances secured by this Mortgage and will hold the right to receive such advances as a trust fund to be applied first for the purpose of paying the cost of the building(s) and other improvements located on the Property before using any part of the total of the same for any other purpose. Mortgagor will indemnify and hold Mortgagee harmless against any loss, liability, cost or expense, including any judgments, attorneys' fees, costs of appeal bonds or printing costs, arising out of or relating to any proceedings instituted by any claimant alleging a violation by Mortgagor of Article 3-A of the New York Lien Law.

(d) New York Real Property law Article 4-A. If this Mortgage shall be deemed to constitute a "mortgage investment" as defined by New York Real Property Law § 125, then this Mortgage shall and hereby does (i) confer upon Mortgagee the powers, and (ii) impose upon Mortgagee the duties of trustees set forth in New York Real Property Law § 126.

(e) Statement in Accordance with Section 253 of the New York Tax Law. This Mortgage does not cover real property principally improved or to be improved by one or more structures containing in the aggregate not more than six (6) residential dwelling units, each having separate cooking facilities.

(f) Statement in Accordance with Section 274-a of the New York State Real Property Law. Mortgagee shall, within fifteen (15) days after written request, provide Mortgagor with the statement required by Section 274-a of the New York Real Property Law.

(g) Section 291-f of the New York State Real Property Law. Mortgagee shall have all of the rights set forth in Section 291-f of the Real Property Law of New York. For purposes of Section 291-f of the New York Real Property Law, all existing tenants and every tenant or subtenant who after the recording of this Mortgage, enters into a Lease upon the premises of any of the Property or who acquires by instrument of assignment or by operation of law a leasehold estate upon the Property is hereby notified that Mortgagor shall not, without obtaining Mortgagee's prior consent in each instance, cancel, abridge or otherwise modify any Leases or accept prepayments for more than thirty (30) days of installments of rent to become due with respect to any Lease thereof having an unexpired term on the date of this Mortgage of five (5) years or more, and that any such cancellation, abridgement, modification or prepayment made by any such tenant or subtenant without either being expressly permitted under this Mortgage or receiving Mortgagee's prior consent shall be voidable by Mortgagee at its option.

(h) Sections 254, 271, 272 and 291-f. All covenants of Mortgagor herein contained shall be construed as affording to Mortgagee rights additional to and not exclusive of the rights conferred under the provisions of Sections 254, 271, 272 and 291-f of the Real Property Law of New York.

(i) RPAPL. If an Event of Default shall occur and be continuing, Mortgagee may elect to sell (and, in the case of any default of any purchaser, resell) the Property or any part thereof by exercise of the power of foreclosure or of sale granted to Mortgagee by Articles 13 or 14 of the New York Real Property Actions and Proceedings Law (the "RPAPL"). In such case, Mortgagee may commence a civil action to foreclose this Mortgage pursuant to Article 13 of the RPAPL, or it may proceed and sell the Property pursuant to Article 14 of the RPAPL to satisfy the Note and all other amounts secured hereby.

IN WITNESS WHEREOF this Mortgage has been duly executed by the parties hereto as of the date first written above.

AFFIDAVIT UNDER SECTION 255 TAX LAW
(CEMA)

STATE OF NEW YORK)
) ss.:
COUNTY OF NEW YORK)

The undersigned ("Deponent"), being duly sworn, solely in his capacity as President and Member of ELITE 29 REALTY LLC, a New York limited liability company ("Mortgagor"), deposes and says, as of May 31, 2016, that:

1. Deponent is an authorized signatory of Mortgagor and has knowledge of the facts concerning this transaction.

2. Mortgagor is the owner of certain premises encumbered by the mortgages described on Exhibit "A" attached hereto (the "**Existing Mortgages**"), which evidence an outstanding principal indebtedness of **FOUR MILLION ONE HUNDRED SIXTY TWO THOUSAND EIGHT HUNDRED SIXTY FOUR AND 97/100 DOLLARS ($4,162,864.97)**, as of the date hereof (the "**Existing Indebtedness**"). The maximum amount of principal indebtedness secured by the Existing Mortgage was the face amount thereof and the mortgage recording tax was duly paid at the time of recording of said Existing Mortgage, as set forth on Exhibit A attached hereto.

3. That certain Consolidation Extension and Modification Agreement (the "Consolidated Mortgage"), dated as of the date hereof, by and between Mortgagor and Signature Bank, as mortgagee ("Mortgagee"), which is being presented for recording simultaneously herewith (i) was given as further security for the payment of the Existing Indebtedness (ii) secures additional indebtedness in the amount of **THIRTY THOUSAND AND 00/100 DOLLARS ($30,000.00)**, upon which mortgage recording tax is being paid simultaneously with the recording of such Consolidated Mortgage in the amount of **$615.00** and amends, restates and consolidates the Existing Mortgage in the consolidated amount of **FOUR MILLION ONE HUNDRED NINETY TWO THOUSAND EIGHT HUNDRED SIXTY FOUR AND 97/100 DOLLARS ($4,192,864.97)**;

4. That there have been no reloans or readvances on the Existing Mortgage or the Consolidated Mortgage.

5. That the Consolidated Mortgage does not create or secure any new or further principal indebtedness or obligation other than the principal indebtedness which is, or under any contingency may be, secured by the Existing Mortgage.

[NO FURTHER TEXT ON THIS PAGE]

WHEREFORE, Deponent respectfully requests that the Consolidated Mortgage tendered herewith for recording be declared exempt from further taxation pursuant to the provisions of Section 255 of Article 11 of the Tax Law of the State of New York.

Joseph Saponaro, President and Member

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.
