1.0 Executive Summary

ESPL Environmental Consultants Corp. (ESPL) prepared a Phase I Environmental Site Assessment (ESA) in accordance with the American Society of Testing Materials (ASTM) Standard E 1527-13 and EPA AAI Rule at 538-540 West 29th Street, Manhattan, NY. This ESA was carried out on behalf of Largo Investments LLC.

Site Inspection

On March 22, 2018, an inspection of the subject sites was conducted. The subject area is located in a Residential area of Manhattan, NY. The usage of the subject site is as follow:

Building Number	Blk.	Lot	Usage/Structure
538 West 29th Street	700	55	3 story building with basement
540 West 29th Street	700	56	3 story building with basement

538 West 29th Street

The lot size of the subject site is rectangular shaped, with 25.5 feet facing West 29th Street and 98.75 feet deep. The lot area is approximately 2,518 square feet. A three story building with a cellar is currently on the site. The building was vacant and indicated that the first floor was used as Elite Investigations and Skylight Gallery and the upper floors were used as retail, offices and other uses. The basement housed the utilities and storage room. Location map is listed in Appendix A and Photographs in Appendix B.

540 West 29th Street

The lot size of the subject site is rectangular shaped, with 25. feet facing West 29th Street. A three story building with a basement is currently on the site. The first floor was used as Arrt Gallery and the upper floors are used as apartments. The basement housed boiler room and utility meters and connections and sump pump. Location map is listed in Appendix A. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel boiler, see Appendix D.

Both lots are connected to the municipal water, sewer and electrical services. Con Edison provides electricity, and natural gas to the subject site. There was no evidence of stressed vegetation at the subject site.

There was no storage or use of raw chemicals or regulated materials at the time of inspection. There was no drinking water wells located on the subject sites or on any of the adjacent sites during the site inspection.

Photographs of the subject site and neighboring properties are included in Appendix B.

Site History Review

A review of the historical city directories indicated that 538-540 West 29th Street was used as a multi-story commercial building. A complete listing is located in Appendix C.

Historic records also indicate that the adjacent sites use included a auto body shop, retail and residential.

Review of Public Records
Location, topographical and aerial maps are listed in Appendix C.

A file search of the Sanborn Maps for 538-540 West 29th Street was conducted. There are 25 available Sanborn Maps for the subject site and based on these maps the site has been a 3-story building with a cellar since 1910.

Two Certificates of Occupancy (CO), were found for 538 West 29th Street and are located in Appendix D. The CO issued on October 20, 1970, Number 68630, indicated that the building was commercial for light manufacturing of steel products and miscellaneous fabrications and assembly. The cellar's listed use was heating plant and storage, the three stories was for assembly of metal pipe coat racks The CO dated July 22, 1987 No. 90642 indicated the usage as art reproductions, retail store and offices.

Six Certificates of Occupancy were found for 540 West 29th Street. The February 13, 1924 CO No. 1924 indicated that the building's use was as an auto repair shop (first floor) and factory on the second and third floors. Temporary CO's were issued on May 4, 2012 and August 5, 2013 and indicated that the site was a commercial building with an auto repair on the first floor and one residential apartment on the second and one on the third. A final Co No. 103580714F was issued on April 18, 2014 indicating that the first floor was an art gallery and one residential apartment on the second and one on the third. (See Appendix D).

The New York City Department of Buildings has listed the subject site under "E" Designation by the Environmental Quality Review for hazmat/noise and air.

Correspondence from the New York State Department of Environmental Conservation (NYSDEC), New York State Department of Health, New York City Fire Department and the New York City Department of Environmental Protection are listed in Appendix D.

Interviews

A Phase I Questionnaire was submitted to Michael Zampetti, for completion and is located in Appendix D.

The standard environmental record source of the subject site and the surrounding properties were reviewed (See Appendix C). The data search is summarized on the following table:

TP-Target Property
NR: Not Requested

Numerous off-site facilities within the radius specified under ASTM Standard E 1527-13 were identified through the Environmental Data Resources, Inc. database search.

Environmental Liens
No environmental liens were found for the property.

Conclusions and recommendations are submitted based on the careful consideration of the results of the site inspection and the scope of work. The information provided in this report has been obtained during interviews and field inspections, and database search, review of geographical location, geology and hydrogeology of the site including the physical evidence. This ESA does have evidence of Recognized Environmental Conditions (REC) in connection with 538-540 West 29th Street, Manhattan, NY.

It should be noted that when a Phase I ESA is completed without subsurface exploration of chemical screening of the soil and the groundwater beneath the site, no statement of certainty can be made regarding the subsurface conditions that may result from on-site or off-site sources. The possibility always exists for contamination to migrate through surface water, air and/or groundwater. However, ESPL believes that the assessment was sufficient to provide a reasonable characterization of the environmental condition of the property, and that the preliminary identification of potential environmental concerns/problems can be made on the information procured.

2.0 Introduction

ESPL Environmental Consultants Corp. (ESPL) prepared a Phase I Environmental Site Assessment (ESA) in accordance with the American Society of Testing Materials (ASTM) Standard E 1527-13 and EPA AAI Rule at 538-540 West 29th Street, Manhattan, NY. This ESA was carried out on behalf of Largo Investments LLC.

This report presents the findings of the ESA and makes conclusion and recommendations regarding the environmental condition of the property within the Limitations and Exceptions of Assessment (Section 2.4) and Limiting Conditions and Methodology Used (Section 2.7). It is generally not within the scope of this report to perform any testing or sampling but to compile information that are publicly available and obtainable within a reasonable time and cost constraints, and practically reviewable.

2.1 Purpose of Study

The purpose of this practice is to identify REC within the subject sites.

The term REC means the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or threat of a release into structures or into the ground, groundwater, or surface water of the property. The de-minimis conditions that generally do not present a material risk of harm to public health or the environment, which would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies, are excluded.

The ESA consists of a review of various sources of information concerning the previous ownership and uses of the real property. Among which, a historical review of the records of past use of sites and adjacent properties is conducted. Past and present owners are interviewed and investigated. An on-site walk–through inspection and evaluation of the property's current use is conducted, and areas of potential environmental concern are identified. In addition, records from federal, state and local government, as well as private agencies, are examined, and Sanborn maps are provided.

The report format of this ESA follows the ASTM Designation E 1527-13 that has been arranged to address general observations, conditions and concerns under the Superfund Amendments and Reauthorization Act (SARA 1986).

The most notable element included in the scope of this report is related to the fact that as a buyer of real property, it limits the amount of liability, resulting from preceding property activity; you might eventually have to face as a landowner. It clearly states that if the site assessment is conducted in due diligence, the new owner is entitled to be considered an "innocent land owner".

2.2 Detailed Scope-of-Services

The scope of work for this assessment was in general accordance with the ASTM Standard Practice for Environmental Site Assessment: Phase I ESA Process (ASTM Designation: E1527-13). These methodologies are described as representing good

commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions.

1.2.1 All Appropriate Inquiry
1.2.2 ASTM-1527-13

2.3 Significant Assumptions

While this report provides an overview of potential past and present environmental concerns, the environmental assessment is limited by the available information at the time of the assessment. The conclusion and recommendations that are presented in this report are based on a scope of work authorized by the client.

ESPL has made the following significant assumptions:

- The information provided by Environmental Data Resources, Inc. regarding the regulatory status of the facilities is complete, accurate and current.
- Information provided by the owner is complete, accurate and current.

2.4 Limitations and Exceptions

The purpose of this investigation was to identify potential sources of contamination at the subject sites, and to satisfy the all-appropriate inquiry standard set forth in Section 9601 (35)(b) of CERCLA. The findings and conclusions set forth in this report are based upon information that was available to ESPL during inspection of the properties and after review of acquired records and documents.

The presence or absence of any such condition can only be confirmed through the collection and analysis of air, soil and/or groundwater samples, which was beyond the scope of work for this investigation. In conformance with the scope and limitations of ASTM Practice E 1527-13 a Phase I ESA was performed at 538-540 West 29th Street, Manhattan, NY.

The use of ASTM practice E 1527-13 is strictly limited to the scope set forth in the ASTM standards on ESA for commercial real estate.

ESPL does not represent that the sites referred to herein contains hazardous or toxic substances or other latent conditions beyond those observed during the site assessment. ESPL does not assume responsibility for the discovery of any special resources, nor does it assume responsibility for the elimination of hazards or adverse conditions that may cause accidents, injuries, damage, client liabilities, or environmentally adverse conditions.

2.5 Special Terms and Conditions

The preceding ESA is subject to the following conditions and to such other conditions and limiting conditions as are set forth in the report:

1. ESPL assumes no responsibility for hidden or latent conditions or misrepresentation by the property owner, his representatives, public information officials or any authority consulted in connection with the

compilation of this report.

2. This report is prepared for the sole and explicit purpose of assessing the potential liability with respect to the suspected presence of hazardous substance or petroleum product on the property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. This report is not intended to have any direct bearing on the value of the property.

3. Any relevant information made available after this date, or change in use of the property other than what is identified in this report, future events and/or investigation could change the findings stated herein and require update and revision of the report. Should additional investigations encounter differing conditions, sections of this report may require updating.

4. The ESA is for the sole use of the principal parties. Sole ownership of this report is granted by ESPL to Largo Investments LLC. ESPL responsibility for the contents of this report remains with Trans World Equities and does not extend to future holders of the report or property owners. No disclosure or reproduction shall be made of the preceding report without the prior written consent of ESPL.

5. Although this investigation was performed in accordance with good commercial and customary practice and generally accepted protocols within the consulting industry, ESPL cannot guarantee that the property is completely free of hazardous substances or other materials or conditions that could subject Largo Investments LLC.

6. ESPL or their representatives are not required to give testimony with reference to the expressed herein without prior written arrangement.

7. This information contained in this report has been obtained from publicly available sources and other secondary sources of information produced by entities other than ESPL. Although great care has been taken by ESPL in compiling and checking the information contained in this report to insure that it is current and accurate, ESPL disclaims any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence or otherwise, and for consequences arising there from. The data provided hereunder neither purports to be nor constitutes legal or medical advice. It is further understood that ESPL make no representations or warranties of any kind, including, but not limited to, the warranties of fitness for a particular purpose of merchantability, nor any such representations or warranties to be implied with respect to the data furnished, and ESPL assume no responsibility with respect to customer's, its employees', clients', or customers' use thereof. ESPL shall not be liable for any special, consequential, or exemplary damages resulting, in whole or in part, from

customer's use of the data. Liability on the part of the ESPL is limited to the monetary value paid for this report. The report is valid only for the geographical parameters specified on the cover page of this report, and any alteration or deviation from this description will require a new report. This report does not constitute a legal opinion.

2.6 User Reliance

This report may be relied upon by Largo Investments LLC. This report has no other purpose and should not be relied upon by any other person or entity. ESPL declares that we meet the definition of a Qualified Environmental Professional as defined in 312.10 of 40 CFR 312. ESPL has the specific qualifications based on education, training, and experience to assess a property of the nature, history and of the subject property.

2.7 Limiting Conditions and Methodology Used

To perform the ESA, the following procedure and methodology was used within the listed limitations:

1) A detailed inspection of the subject site including the interior and exterior of the accessible existing buildings and the sites' perimeters for RECs.

2) A Phase I Questionnaire was submitted to and completed by Michael Zampetti, of Largo Investments LLC

3) Interviews and the site investigation were conducted with the Joe Cunettei of Largo Investments LLC.

4) Neighboring property utilization was evaluated to determine potential impact on the subject site.

5) Review the sites for PCB contaminated transformers.

6) Review of files and documents maintained by the federal, state and local regulatory agencies concerning environmental hazards associated with the subject site if such information exists.

7) Identification of surrounding property and their use.

8) Locate and review areas of possible contamination.

3.0 Current Site Characteristics

3.1 Site Location and Legal Description

The subject area is situated in a Commercial/Residential Chelsea Area of Manhattan. (See Appendix A, Fig. 1). The subject site is located south of West 29th Street

between 10th and 11th Avenues. According to the New York City Assessors Department the parcel number of the property is Block 700, Lot 55 and 56.

The subject site is listed in the tax map as follows:

Building Number	Blk.	Lot	Usage/Structure
538 West 29th Street	700	55	3 story building with basement
540 West 29th Street	700	56	3 story residential/commercial building with basement

3.2 Site and Vicinity General Characteristics

The site is in a developed residential/commercial area with a flat topography. The surrounding areas include 3-4 story residential buildings as well as high rise buildings.

3.3 Site Improvements, Utilities and Current Use of the Property

3.3.1 Site Improvements

538 West 29th Street	3 story building with basement
540 West 29th Street	3 story residentia/commerciall building with basement

3.3.2 Utilities

The subject site is connected to the municipal water, sewer, gas and electrical services.

3.3.3 Current Use of the Subject Site

538 West 29th Street

The lot size of the subject site is rectangular shaped, with 25.5 feet facing West 29th Street and 98.75 feet deep. The lot area is approximately 2,518 square feet. A three story building with a cellar is currently on the site. The building was vacant and indicated that the first floor was used as Elite Investigations and Skylight Gallery and the upper floors were used as retail, offices and other uses. The basement housed the utilities and storage room. Location map is listed in Appendix A and Photographs in Appendix B.

540 West 29th Street

The lot size of the subject site is rectangular shaped, with 25. feet facing West 29th Street. A three story building with a basement is currently on the site. The first floor was used as Arrt Gallery and the upper floors are used as apartments. The basement housed boiler room and utility meters and connections and sump pump. Location map is listed in Appendix A. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel

boiler, see Appendix D.

3.4 Ownership

The available deeds are located in Appendix D.

3.5 Site Reconnaissance and Interviews

The purpose of the interview process is to collect unrecorded information from present owners, operators and occupants of the site for the purpose of gathering information indicating recognized environmental conditions in connection with the property.

Interviews with neighboring property owners may be carried out if the property is abandoned and there is evidence of potential unauthorized uses of the abandoned property or uncontrolled access to the abandoned property. The neighboring properties were residential and/or commercial and the owners were not available.

ESPL performed on-site observations on March 22, 2018. The accessible areas of the subject site were thoroughly inspected and photographs taken (See Appendix B) and any indication of an environmental hazard noted.

3.5.1 Exterior Observations

3.5.1.a Indication of Underground Injection Control (UIC)

The EPA's Underground Injection Control (UIC) Program is mandated under the Safe Drinking Water Act (SDWA) OF 1974. The Program is designed to prevent contamination of underground sources of drinking water (USDWs) by injection wells.

EPA divides the types of injection wells into five (5) Classes. Class I wells inject fluid beneath the lower most USDW. Class II wells are utilized in enhanced oil or natural gas production operations and to dispose of produced water. Class III wells are used to inject fluids for the extraction of minerals. Class IV wells dispose of hazardous or radioactive waste into or above an aquifer. The EPA has subsequently banned this type of injection well. The final category is Class V. Class V is a catch all classification that includes all wells that are not included in the above categories.

Generally, Class V wells in New York State are shallow wells, such as cesspools, drywells and septic systems, used to inject fluids into or above a USDW.

There were no drywells observed at the subject site, but the basement of 540 West 29th Street had a sump pump and drain. See Appendix B for pictures.

3.5.1.b Indication of PCB

Polychlorinated biphenyls (PCBs), a hazardous group of chlorinated

aromatic hydrocarbons, were used in a wide range of products including hydraulic and electrical equipment. PCB-containing equipment has the potential to cause soil and groundwater contamination.

There were no transformers located on the subject site.

3.5.1.c Indication of Solid Waste

It is customary for solid waste to be carted away by the NYC Sanitation Department or a private hauler.

3.5.1.d Chemical Staining and Stressed Vegetation

A surface spill of petroleum hydrocarbon products or other chemicals may be absorbed into the soil particles and retained in the near-surface sediments. Plant life near a spill will often be killed or will suffer stress from the contamination of the soil with these products. The condition of vegetative growth can be an indicator of near-surface soil conditions.

There was no evidence of stressed vegetation or chemical/petroleum staining within the accessible areas of the subject property.

3.5.1.e AST and UST

During the site investigation of the accessible areas of both 538 and 540 West 29th Street, no USTs or ASTs were observed. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel boiler. See Appendix D.

3.5.2 Interior Observations

538 West 29th Street

The lot size of the subject site is rectangular shaped, with 25.5 feet facing West 29th Street and 98.75 feet deep. The lot area is approximately 2,518 square feet. A three story building with a cellar is currently on the site. The building was vacant and indicated that the first floor was used as Elite Investigations and Skylight Gallery and the upper floors were used as retail, offices and other uses. The basement housed the utilities and storage room. Location map is listed in Appendix A and Photographs in Appendix B.

540 West 29th Street

The lot size of the subject site is rectangular shaped, with 25. feet facing West 29th Street. A three story building with a basement is currently on the site. The first floor was used as Arrt Gallery and the upper floors are used as apartments. The basement housed boiler room and utility meters and connections and sump pump. Location map is listed in Appendix A. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel boiler, see Appendix D.

3.5.2.a Hazardous Substances Use, Storage, Handling and Disposal

The activities performed at the subject site would not have generated any hazardous waste. The subject site is not registered as a hazardous waste generator.

3.5.2.b Hazardous Substances / Unidentified Substance Containers (Storage, Handling and Disposal)

No unidentified containers were observed in the accessible areas of the subject site.

3.5.2.c Storage Tanks

The regulatory records indicate that the subject site did not have USTs or AST's. During the site investigation no USTs or ASTs were observed. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel boiler. See Appendix D.

3.5.3 Additional Observations

In addition to the ASTM Standard ESPL has included information and a limited visual inspection regarding asbestos containing material, lead based paint and radon.

3.5.3.a Suspect ACM

As part of ESPL's Phase I site investigation, visual surveys were undertaken to identify suspect material containing asbestos. No sampling or laboratory analysis of suspected ACM (SACM) was undertaken as part of ESPL's Phase I ESA. No obvious SACM was observed within accessible areas.

It should be noted that only a comprehensive asbestos inspection with sampling and laboratory analysis can determine asbestos content in any suspected asbestos-containing building material. Should demolition or renovation activities affecting these materials be planned, a full asbestos inspection with sampling and laboratory analysis should be undertaken.

3.5.3.b Lead Based Paint

ESPL did not conduct a survey for lead-based paint. However, due to the age of the buildings lead may be a concern. Otherwise, the paint was in generally good condition.

3.5.3.c Radon

Radon is a heavy colorless, odorless, radioactive gas formed by the radioactive decay of radium in rocks and soil. Radon is associated with specific geologic formations which contain granite, uranium minerals,

certain shales and phosphate related minerals. Radon, being a gas, can migrate to and accumulate in confined spaces such as building basements. Continued exposure of radon gas has been associated with increased lung cancer risk and possible genetic damage.

The New York State Department of Health, Bureau of Radiation Protection monitors radon levels throughout the state. According to this monitoring data, Nassau County and New York City have the lowest radon average (1.6-1.8 pci/l) within the state.

Given this information, Radon is not considered a significant environmental concern within the subject site. However, A Radon Zone should not be used to determine if individual buildings need to be tested for radon. The EPA's office of Radiation and Indoor Air recommends that all buildings be tested for radon, regardless of geographic location or the Radon Zone designation in which the property is located.

3.6 Physical Setting

The topographical conditions of the properties have been noted to the extent that was physically observed, or determined from interviews, as well as topography of the area surrounding the properties that is visually or physically observed from periphery of the sites.

The subject site is comprised of two lots.

538 West 29th Street
The lot size of the subject site is rectangular shaped, with 25.5 feet facing West 29th Street and 98.75 feet deep. The lot area is approximately 2,518 square feet. A three story building with a cellar is currently on the site. The building was vacant and indicated that the first floor was used as Elite Investigations and Skylight Gallery and the upper floors were used as retail, offices and other uses. The basement housed the utilities and storage room. Location map is listed in Appendix A and Photographs in Appendix B.

540 West 29th Street
The lot size of the subject site is rectangular shaped, with 25. feet facing West 29th Street. A three story building with a basement is currently on the site. The first floor was used as Arrt Gallery and the upper floors are used as apartments. The basement housed boiler room and utility meters and connections and sump pump. Location map is listed in Appendix A. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel boiler, see Appendix D.

3.6.1 USGS Map & Hydrogeology

The site is located on the USGS 7.5 minute map for Central Park, Brooklyn, Weehawken and Jersey City dated 2013 and 2014. The property lies at an approximate elevation of 13 feet above mean sea level and is generally level. Based on the general surface topography, the regional gradient is generally west southwest.

3.6.2 Site Geology

Geologic information can be used in forming an opinion about the relative speed at which contaminant migration, if any, may be occurring. Contaminant plumes move more quickly through sandy-gravelly types of soil than silty-clayey types. The rock stratigraphic unit at the site is the Lower Ordovician and Cambrian carbonate rocks series of the Ordovicias system from the Paleozoic era. The surface soil component is the Urban Land with a variable surface texture. Based on the US Soil Conservation Service, the subordinate soil types in the vicinity of the subject site include loam, loamy sand, sandy loam and fine sandy loam. Depth to bedrock is typically greater than 10 inches.

3.6.3 Groundwater Use

There are no drinking water wells located on the subject site or any observed on the adjacent sites during the site inspection. The subject site is served with municipal water.

4.0 Current Area Characteristics

4.1 Current Uses and Visual Inspection of Adjoining Properties

Properties surrounding the subject site are generally residential/commercial followings:

	Address	Usage
North	West 30th Street	Residential/Commercial
South	West 28th Street	Residential/Commercial
East	10th Avenue	Residential/Commercial
West	11th Avenue	Residential/Commercial

5.0 Historical Use Information

The historical site conditions have been assessed using the available information sources and examination of the following:

- Available Sanborn Fire Insurance Maps
- Available Historical Aerial Maps
- Available Historical Topographical Maps
- Available City Directories
- Certificates of Occupancy

5.1 Sanborn Fire Insurance Maps

A file search of the Sanborn Maps for 538-540 West 29th Street, Manhattan NY was conducted. There are 25 available Sanborn Maps for the subject site

dated, 1890, 1899, 1911, 1919, 1928, 1930, 1950, 1976, 1979, 1980, 1982, 1985, 1987, 1988, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, and 2005. Based on the Sanborn Maps, 538-540 West 29th Street, has been a 3-story building with basement.

5.2 Historical Aerial Photographs

Due to the extensive urban development history of the area that contains the property and the small scale of the available photographs, aerial photographs were not reviewed for this assessment since the developmental history and changes in the use of property would not be clearly visible on the photographs. The development history of the property is given fully other historic information resources such as Sanborn Fire Insurance Maps and City Directories reviewed as part of this ESA as described in Sections 5.1 and 5.4.

5.3 Historical USGS Topographic Maps

United States Geological Survey (USGS) topographic maps for Jersey City, Central Park, Weehawken and Brooklyn for the years 1888, 1891, 1897, 1898, 1900, 1903, 1905, 1925, 1935, 1940, 1943, 1947, 1955, 1956, 1966, 1967, 1979, 1981, 1995, 1997, 2013 and 2014 were reviewed. The maps indicate that the surrounding areas were being fully developed, but specific land uses cannot be identified.

5.4 Historical City Directories

City Directories were searched at approximately 5 year intervals from 1920 to 2014. The City Directory search typically looks at the history of residents and businesses occupying properties within a 200 foot radius of the subject site. When the source is a city directory that lists tenants in buildings, such as the directories compiled by NYNEX, New York Telephone Company, and Cole Information Services, the names and occupations of the residents typically are shown. When the source is a telephone directory, the available information may be limited to residents and businesses telephone listings. A review of the historical city directories indicated that 538 West 29th Street was listed as Elite Investigations, Hercules Steel Prods, and Weidhaas Studios. 540 West 29th Street was listed as Starr Auto Repair Shop, Labor Publications, Constant and Thor Inc. Displays, Alpine Auto Repair and Machine Shop. A complete listing is located in Appendix C.

5.5 Historical Certificates of Occupancy

Two Certificates of Occupancy (CO), were found for 538 West 29th Street and are located in Appendix D. The CO issued on October 20, 1970, Number 68630, indicated that the building was commercial for light manufacturing of steel products and miscellaneous fabrications and assembly. The cellar's listed use was heating plant and storage, the three stories was for assembly of metal pipe coat racks The CO dated July 22, 1987 No. 90642 indicated the usage as art reproductions, retail store and offices.

Six Certificates of Occupancy were found for 540 West 29th Street. The February 13, 1924 CO No. 1924 indicated that the building's use was as an auto repair shop (first floor) and factory on the second and third floors. Temporary CO's were issued on May 4, 2012 and August 5, 2013 and indicated

that the site was a commercial building with an auto repair on the first floor and one residential apartment on the second and one on the third. A final Co No. 103580714F was issued on April 18, 2014 indicating that the first floor was an art gallery and one residential apartment on the second and one on the third.

5.6 Title Records

Title records were found for the subject site and are in Appendix D.

6.0 Review of Regulatory Agency Records and Documents

FOIL correspondences requesting all available information being maintained concerning the subject site were sent to state and local regulatory agencies (See Appendix D). This would determine if the subject site is listed, known, or suspected of being a hazardous waste site, or if any hazardous releases have taken place at the site or its immediate surroundings.

6.1 Federal ASTM Standard Records

A. RCRIS

A review of the RCRIS-Large Quantity Generator (RCRIS-LQG) database has revealed that there is twenty-one (21) RCRIS-LQG site within a ¼ mile radius of the subject site. The subject sites are not listed as a RCRIS-LQG.

A review of the RCRIS-Small Quantity Generator (RCRIS-SQG) database has revealed that there is nine (9) RCRIS-SQG site within a ¼ mile radius of the subject site.

A review of the RCRIS-Conditionally Exempt Small Quantity Generator (RCRIS-CESQG) database has revealed that there are nine (9) RCRIS-CESQG site within a ¼ mile radius of the subject site.

6.2 New York State ASTM Standard Records

A. LTANKS

Leaking Storage Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

A review of the Leaking Storage Tanks Incidents Reports (LTANKS) has revealed that there are ninety-six (96) LTANKS sites within a ½ mile radius of the subject site. The subject site is not listed and none of the listed sites should have any impact to the site.

B. NY SPILLS

Data collected on spills reported to NYSDEC, is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS), or 6 NYCRR Section 595.2 (from CBS regulations). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list has revealed that there are seventy-nine (79) NY spills sites within a 1/8 mile radius of the subject site. The subject site is not a listed site.

A FOIL request was sent to the NYSDEC on April 2, 2018, requesting to review any records retained by the agency concerning the subject site.

C. EDR Vapor Encroachment Screen

A Vapor Encroachment Screen was conducted using the EDR VEC App™. A copy of the EDR Encroachment Screen Report is included in Appendix D. Spills were reported within the immediate area, but no spills were of significant volume or near the immediate area of the subject site.

D. EDR High Risk Historical Records

A review of EDR's High Risk Historical Records indicated that there are 13 Historical Auto Body within a 1/8 mile radius of the subject site. Eight of the historical auto body are at a higher elevation and 5 are at a lower elevation.

Historical Auto Body Shops/Gas Stations, at a higher elevation were located on

- 309 11th Avenue, Mickeys Service Station, from 1969-2014
- 30th Street and 11th Ave., United Mobil Service Station, from 1998-1999
- 327 10th Avenue, Hodes Theodore, from 1965-1975
- 333-335 10th Avenue, Kellys Taxi Group, from 1971-1974
- 516 West 27th Street, Steve Detailing, from 1991-2007
- 305 10th Avenue, Shlomi & Avi Auto Repair, from 1996-2008
- 330 10th Avenue, Kellys Taxi Group, from 1977-1983

Due to poor or inadequate address information, some sites were not mapped. A complete list is found in Appendix D.

6.3 New York State Local Records for FOIL Requests

A. New York State Department of Environmental Conservation

A FOIL request was sent to NYSDEC, on April 2, 2018 requesting to review any records retained by the agency concerning the subject site (See Appendix D). To date no response has been received.

B. New York State Department Health

A FOIL request was sent to NYSDOH, on April 2, 2018, requesting to review the records retained by the agency concerning the subject site. To date no response has been received.

C. New York City Fire Department

A FOIL request was sent to NYCFD, on April 2, 2018, requesting to review any records retained by the agency concerning the subject site (See Appendix D). To date no response has been received.

D. New York City Department of Environmental Protection

A FOIL request was sent to the NYCDEP on April 2, 2018 requesting to review any records retained by the agency concerning the subject site (See Appendix D). To date no response has been received.

E. New York City Department of Buildings.

538 West 29th Street

The lot size of the subject site is rectangular shaped, with 25.5 feet facing West 29th Street and 98.75 feet deep. The lot area is approximately 2,518 square feet. A three story building with a cellar is currently on the site. The building was vacant and indicated that the first floor was used as Elite Investigations and Skylight Gallery and the upper floors were used as retail, offices and other uses. The basement housed the utilities and storage room. Location map is listed in Appendix A and Photographs in Appendix B.

540 West 29th Street

The lot size of the subject site is rectangular shaped, with 25. feet facing West 29th Street. A three story building with a basement is currently on the site. The first floor was used as Arrt Gallery and the upper floors are used as apartments. The basement housed boiler room and utility meters and connections and sump pump. Location map is listed in Appendix A. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel boiler, see Appendix D.

7.0 Findings

ESPL has performed a Phase I ESA in conformance with the scope of work and the limitations of the ASTM Designation E-1527-13 at 538-540 West 29th Street, Manhattan, NY.

Site Inspection

On March 22, 2018, an inspection of the subject sites was conducted. The subject area is located in a Residential area of Manhattan, NY. The usage of the subject site is as follow:

Building Number	Blk.	Lot	Usage/Structure
538 West 29th Street	700	55	3 story building with basement
540 West 29th Street	700	56	3 story building with basement

538 West 29th Street

The lot size of the subject site is rectangular shaped, with 25.5 feet facing West 29th Street and 98.75 feet deep. The lot area is approximately 2,518 square feet. A three story building with a cellar is currently on the site. The building was vacant and indicated that the first floor was used as Elite Investigations and Skylight Gallery and the upper floors were used as retail, offices and other uses. The basement housed the utilities and storage room. Location map is listed in Appendix A and Photographs in Appendix B.

540 West 29th Street

The lot size of the subject site is rectangular shaped, with 25. feet facing West 29th Street. A three story building with a basement is currently on the site. The first floor was used as Arrt Gallery and the upper floors are used as apartments. The basement housed boiler room and utility meters and connections and sump pump. Location map is listed in Appendix A. The NYC DEP CATS Information system indicates that 540 West 29th Street has two separate applications numbers CB076700 and CA072488 indicating the registration of a No.2 fuel boiler, see Appendix D.

Both lots are connected to the municipal water, sewer and electrical services. Con Edison provides electricity, and natural gas to the subject site. There was no evidence of stressed vegetation at the subject site.

There was no storage or use of raw chemicals or regulated materials at the time of inspection. There was no drinking water wells located on the subject sites or on any of the adjacent sites during the site inspection.

Photographs of the subject site and neighboring properties are included in Appendix B.

Site History Review

A review of the historical city directories indicated that 538-540 West 29th Street was used as a multi-story commercial building. A complete listing is located in Appendix C.

Historic records also indicate that the adjacent sites use included a retail and residential.

Conclusions are submitted based on the careful consideration of the results of the site inspection and the scope of work. The information provided in this report has been obtained during interviews and field inspections, and database search, review of geographical location, geology and hydrogeology of the site including the physical evidence. This ESA has evidence of REC in connection with the subject site.

8.0 Opinion and Conclusion

ESPL has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E-1527-13 for the subject site and EPA AAI Rule. This report has revealed evidence of recognized environmental conditions in connection with the property, with regard to the site being list as an E-Designation.

1) Since the adjacent properties, are listed as historical auto body, as shown on the EDR Report and the Certificates of Occupancy indicate that 540 West 29th was utilized as an auto body repair shop and the NYC DEP CATS Information indicated that No 2 fuel oil was used, soil boring should be advanced and the soil analyzed for potential contamination. Additionally, soil vapor probes should be installed to ascertain if there is any vapor intrusion from the adjacent sites.

Opinions and conclusions are submitted based on the careful consideration of the results of the site inspection and the scope of work. The information provided in this report has been obtained during interviews and field inspections, and database search, review of geographical location, geology and hydrogeology of the site including the physical evidence.

However, ESPL believes that the assessment was sufficient to provide a reasonable characterization of the environmental condition of the property, and that the preliminary identification of potential environmental concerns/problems can be made on the information procured.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

538-540 WEST 29TH STREET
NEW YORK, NY 10001

COORDINATES

Latitude (North):	40.7520400 - 40˚ 45' 7.34''
Longitude (West):	74.0034250 - 74˚ 0' 12.33''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	584129.7
UTM Y (Meters):	4511498.0
Elevation:	13 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HUDSON RIVER PCBS	***NO STREET APPLICABLE***	***WNW 1/4 - 1/2 (0.289 mi.)***	***0***	***11***

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

US POSTAL SERVICE -	8'TH AVE AND 33'RD S	E 1/4 - 1/2 (0.498 mi.)	585	1419

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 21 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 9 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 11/13/2017 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

HUDSON RIVER PCBS	***NO STREET APPLICABLE***	***WNW 1/4 - 1/2 (0.289 mi.)***	***0***	***11***

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 11/13/2017 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/15/2017 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/08/2017 has revealed that there are 3 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/12/2018 has revealed that there are 96 NY LTANKS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there are 105 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

NY E DESIGNATION: Lots designation with an ?E? on the Zoning Maps of the City of New York for potential hazardous material contamination, air and/or noise quality impacts.

A review of the NY E DESIGNATION list, as provided by EDR, and dated 10/31/2017 has revealed that there are 48 NY E DESIGNATION sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 7 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 13 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EPA Region:	02
Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency:	02/26/2013
Site name:	CON EDISON SERVICE BOX: 5426
Classification:	Conditionally Exempt Small Quantity Generator
Violation Status:	No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

DEC Memo:	"09/23/13-Hiralkumar Patel. alternate address: 526-532 W 28th Street, 525-531 W 27th Street no PBS or other spills found. 10:50 AM:- spoke with Kevin. the site going to be redeveloped with at least 7 story mixed use building with full basement. Kevin mentioned that the existing structure will be demolished and the entire site will be excavated to a depth of 15 ft bg. during Phase I, they noted a 20,000 gal #4 oil tank which was abandoned in-place in late 1940s. during site inspection, they noted covered corner in basement and the tank might be in there. last week, during phase II investigation, they noted contaminated soil in area near the suspected tank location. Kevin mentioned that groundwater underneath the site fluctuates between 9 and 14 ft bg. bedrock found at 21 ft bt. NYC OER is also overseeing the investigation, under e designation. asked Kevin to submit previous environmental reports and property owner/developer's contact information. Kevin mentioned that Phase II report will be submitted by the end of 10/18/13. Kevin McGrath Chazen Companies Ph. (518) 266-7370 email: kmcgrath@chazencompanies.com 12:15 PM:- received email from Kevin including propert owner's contact information. WC 28 Realty LLC. c/o Centaur Properties LLC. 580 5th Avenue, 32nd Floor New York, NY 10036 Attn.: Larry Greenberg Ph. (212) 308-4443 (O) (917) 656-9321 (C) Fax (212) 308-8630 email: larry@centaurproperties.com Kevin mentinoed that based on visual observations, there appears to be a very old petroleum spill along the west side of the property extending from 9-11 feet below grade at the north end to 9-14 feet below grade at the south end. the soils are stained grey, have a faint odor, and register 10-100 ppm on the PID (north to south). water table was at 11 feet below grade at beginning of the investigation and at about 9.5 feet below grade at the end (very heavy rains for two consecutive days). the Remedial Action, which has already been discussed with OER, will consist of the removal of all soils to at least 14 feet below grade to prepare the site for new construction. extensive dewatering of the excavation with pretreatment and disposal to the sewer will be required during construction and should mitigate any residual groundwater impacts. Kevin also submitted Phase I and work plan for Phase II. abstract of Phase I: - propety was constructed as two individual buildings in the late 1800s to 1916 - site was originally built and occupied by E.R. Merrill Spring Company, a manufacturer of automobile sptrings/parts and parts for Sherman Tanks - historical site uses included a truck terminal garage, warehouse and foundary, warehouse for storage and construction of theatrical props and scenery and was reportedly used as a studio for filming - from 1998 to 2002 the building was used by the current owner as a warehouse for a packaging supply company -

UNOCCUPIED NIGHT CLUB / APT HOUSE (Continued) **S113916125**

Remarks: between 2002 and 2003, the owner renovated the structure for use as two night clubs 12/10/13-Hiralkumar Patel. 10:31 AM:- spoke with Kevin regarding Phase II report. he mentioned that a draft report has been submitted to NYC OER for review and comment. once finalized, he will submit copy to DEC also. asked Kevin to submit sample results and site map for review. 12:46 PM:- received email from Kevin including figures, boring logs and data tables. Kevin mentioned that the site has several ft of urban fill material, which is impacted with several heavy metals and PAHs. no evidence of significant petroleum release was detected in the soil, groundwater, or soil-vapor data. redevelopment plans include the excavation and removal of all soil within the property boundary to bedrock and dewatering. reviewed boring logs. found maximum PID of 101 ppm in boring B-8. but no contamination noted in soil samples. well MW-5 installed in boring B-8. no contamination noted in groundwater sample from MW-5 either. based on submitted sample result, no further investigation needed. case closed. 07/25/17-Hiralkumar Patel. 11:39 AM:- DEC Piper forwarded email from Kevin including a report. during site redevelopment, three previously unknown 550 gal USTs were found at the site. one of the former UST was found in poor condition with evidence of petroleum impact to subsurface soil. all soil, and approx. 3-6 ft of bedrock, within property footprint has been removed as part of site redevelopment. 08/09/17-Hiralkumar Patel. 10:56 AM:- received email from Kevin inquiring about PBS registration number. 12:24 PM:- spoke with Kevin. informed him that the Department has received report dated 07/25/17. asked him to submit PBS application, with original signature, to PBS unit for processing. 12:50 PM:- sent email to Kevin and asked him to submit PBS application to PBS unit for processing. email copied to OER Shaminder. **e designation**" "e designation on property - boring location had layer of 100ppm - cleanup pending"

DEC Memo:	"5/18/12 : Obligado - See also Open Spill Number 0700587. DER Staff inpsected this site after reviewing a Hydrogeologic and Forensic Report submitted by Fleming Lee Shue for Spill No. 0700587 282 11th Avenue. The report identifies a gasoline UST vent at 548 West 29th Street repair garage. The report concludes contamination in the soil and ground water on the north border of 282 11th Avenue is coming from off-site sources. Upon arriving at the site, I asked the mechanic there if they had any oil tanks. He showed me an oil tank in the back of the station. The 275 gallon waste oil tank had no lable and had secondary containment had about an inch of oil stained sand. There was evindence of multiple spills on the concrete as well as a fresh spill from a transmission removal. I spoke to the mechanic, who says the waste oil company comes once a month to empty the wate oil tank. During that process they lift up the tank and clean the oil soaked sand from the secondary containment. I pointed out the poor housekeeping issues to the manager, Zoar (718-869-4550, who showed up shortly after. They applied speedy dry sand to the spill areas. I also noticed an abandoned tank manhole. This tank coincides with the location of a 550 gallon gasoline UST from historical sanborn maps and the vent location on the roof. The manager did not know anything about the tank. Due to apparent PBS issues with waste oil tank and

MIDTOWN SERVICE CENTER (Continued) **S117851165**

abandoned tank, I contacted Moses Ajuko to perform a PBS inspection of the facility. Moses issued PBS violations. Due to poor housekeeping, stained concrete indicating historical spills,and abandoned gasoline tank it is a possible source. Additional investigation will be necessary. The facility owner is: 548 HIGH LINE LLC ONE PENN PLAZA, SUITE 3406 NEW YORK, NY 10019 Contact: MR. RABA H. ABRAMOV 5/25/12 - Obligado - Sent letter to owner requiring closure or removal of abandoned gasoline UST and a site assessment within 30 days of receipt of letter. Cetrified mail receipt #7005 0390 0005 8448 2432 6/1/12 - Obligado - From USPS website: Track & ConfirmYou entered: 70050390000584482432 6/25/12 - Obligado - Item returned undelivered. 6/27/12 - Obligado - The owner of this site came to the DEC for a PBS settlement conference. Mr. Abramov provided photodocumentation of the manhole which was identified as a potential aboandoned gasoline UST. He had opened it up and it was not a UST, but rather a manhole for a former piston lift. Since there is no gasoline UST this site is no longer considered a source for gasoline contamination in soil and groundwater behind the repair shop at 282 11th Ave, Spill Number 0700587. After discussion with DEC Hussein and Ketani, this spill is closed. "

Remarks: "Petroleum contamination in soil and groundwater behind property. During DEC inspection, DEC Staff found an abandoned gasoline UST, poor housekeeping, and petroleum spills on the concrete in repair shop."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/20/03. Contaminated soil letter sent to Walter Seelig (High Ridge Enterpr.). Also see spill # 9008960. YK. 11/21/03 Rommel Met Brian McCabe, senior geologist, on site. Soil samples collected from 8 to 16 feet below grade were contaminated. Groundwater (15 to 18 feet) was also sampled during the investigation and were impacted by

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

BTEX and MTBE. They will excavate what soil they can and install a minimum of three monitoring wells (one outside by remote fills). Spill 9008960 reported TTF of 4000 gallon gas UST 11/14/1990 STIPULATION SIGNED RD 2/18/04. 3/18/04-Vought-Spoke with Rob Ferguson (631-586-4900). Subsurface Investigation report sent to DEC on 2/3/2004. Ferguson will send small CAP upon receiving subsurface investigation report review. Ferguson requires review of subsurface investigation as per STIP. Vought requested that another copy of the Subsurface investigation be sent to DEC. 4/1/04-Vought-Spoke with Tom Melia (F&N) and he requested that he be point of contact. Spill transferred from Rommel to Vought. 4/6/04-Vought-File review by Vought: Contaminated soil letter sent form DEC Krimgold to High Ridge Enterprises. Site meeting minutes (Fenley & Nicol Brian McCabe)-11/25/03. Site meetin on 11/24/03. In attendance were DEC Rommel, F&N McCabe, F&N Melia and F&N Hole. The results of the sampling indicated that the contamination is located in the northern portion of the building. The effected area extended from the north end od the 4000 gallon tank excavation to the front of the building, approximately thirty five feet and from the center for the 550-gallon tank excavation west to the side of the building, approximately twenty feet. DEC recommended additional soil excavation without comprimising structural intergrity and required 1)installation of one well inside the building after backfilling completed 2)installation of two wells on sidewalk at the location of the former remote fills and twenty feet west of the bay door. Letter from Fenley & Nicol(Thomas Melia) to DEC(Rommel)-12/18/03. The new owner of the building indicated that his intended use for the building is as an art gallery . During building remodeling excavation was performed and tanks were discovered under floor. Two gasoline USTs (one 4000-gallon and one 550-gallon) were removed and were in separate lcoations fifteen to twenty feet apart. Upon removal of the bottom slab the soil encountered was saturated with liquid phase hydrocarbon . Depth to water expected to be 18’ below grade. F&N proposes delineation of soil and groundwater contamination, installation of wells and additional soil excavation. See also Spill #9008960 reported in 1990 for tank test failure and administratively closed on 3/4/03. Letter from DEC Rommel-12/4/03. Letter approving installation of wells on the sidewalk on the south side of West 29th Street between 10th and 11th Avenues and requesting expediting of sidewalk permits. Letter from F&N(Melia) to DEC Rommel-12/18/03. At this time we are continuing our efforts to delineate the extent of the contamination... . Three monitoring wells installed (one inside and two outside building). At this time the owener of ther property feels that it would be too far costly to excavate the contaminated soil without jeopardizing the structural integrity of the building, and would prefer that we install an air sparge/soil vapor extraction (As/SVE) system to remediate the hydrocarbon impact . Please indicate your approval below. No approval indicated by DEC Rommel. Stipulation Agreement-1/15/04. Stip with deadline of 2/13/04 sent to: Walter Seeling High Ridge Enterprises, Inc. P.O. Box 2542 York, Pa. 17405. Subsurface Investigation Report (F&N-Melia 631-586-4900x190) -3/19/04. Investigation consisted of six soil borings, six temporary groundwater monitoring points and three monitoring wells. The central and eastern units are currently vacant and undergoing renovations for use as an art gallery . Depth to groundwater is 8-9’ and flows northwest. Soil analyticals show 35ppb benzene(SP-1 at 12’), 882ppb benzene(SP-2 at 12’), 14ppb (SP-3 at 12’), 4900ppb benzene(SP-4 at

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

12'), 817ppb benzene(SP-5 at 12'). Groundwater analyticals show 2.5 ppb benzene(TW-1), 1459ppb benzene(TW-2), 45ppb benzene(YW-3), 2109ppb benzene(TW-4), 254ppb benzene(TW-5), 11ppb benzene(TW-6), 1200ppb benzene(FN-1), 206ppb benzene(FN-2), 4.2ppb benzene(FN-3). Report recommends Air Spage/Soil Vapor extraction system. NYSDEC requires: 1)signing of Stipulation before any further correspondence l 2)presence or absence of free product and interim remedial recovery if present 3)surrounding area site plan including property usage 4)additional wells east of FN-2 and well north of FN-2 to calculate required radius of influence for system design. 4/6/04-Vought called F&N(Milea) to repeat Stipulation requirement and left message to return call to DEC. 4/7/04-Vought-Received faxed copy of STIP already implemented by DEC Kunkel on 2/18/04 (Copy of original not in file). 4/8/04-Vought-Sent letter to High Ridge requiring well installation north of FN2 and east of FN2, submission of monitoring well data and surrounding property sketch. 4/16/04-Vought-Wells will be installed next week (tentatively). Wells for pilot test will also installed. Mailing address is: High Ridge Enterprises P.O. Box 2542 York, Pa. 17405 4/18/04-Vought-Received message from David Oloke (F&N-631-586-4900x144) that he is new project manager for site. Vought called David and two additional well installed (one north of FN2 and one east of FN2). All onsite wells were sampled. No free product in new wells. Four vapor wells installed and air sparge well will be installed. DEC will receive pilot test report by 7/15/04. 6/23/04-Vought-Spoke with David and initial results faxed on 6/9/04. .5 of free product in well in 1 vapor well sent for fingerprinting. EFR not effective. DEC requires recovery of free product and submission of pilot test. 9/2/04-Vought-File review by Vought: Groundwater results (F&N)-6/23/04. Groundwater analyticals show 1.2ppb benzene(FN5), 1.8ppb benzene(FN4), 14ppb benzene(FN3), 26ppb xylene(FN3), 474ppb benzene(FN2), 621ppb MTBE(FN2), 8ppb toluene(FN2), 2065ppb benzene(FN1), 47170ppb MTBE(FN1), 4106ppb toluene(FN1) and 2761ppb xylene(FN1). Addendum to the direction beneath the site was found to be toward the north. Property uSubsurface Investigation Report (F&N)-7/14/04. On 5/7/04 two additional monitoring wells were installed. On June 4, 2004 the AS/SVE pilot tests were conducted . One inch of floating product was detected in P2. The results of the AS pilot test indicated that the introduction of air pressure into the formation below the contaminant zone is a viable remediation technique . Report recommends commencement of an interim remedial measure to recover product from P-2 via weekly EFR. Report also recommends installation of another well to replace P2. Vought called David from F&N to approve of workplan. Well installation will be included with final remedial action plan. Vought sent letter approving of proposed workplan (installation of well at P2 and IRM) and included requirement of determination of groundwater flow direction and surrounding property sketch. 9/3/04-Vought-Received fax from Oloke (F&N). The groundwater flow sage of downgradient sites to the north are a parking garage and an art studio. Vought called Oloke and approved workplan as per 9/2/04 letter. Vought called Oloke and he will begin drafting RAP for submission to DEC. 9/29/04-Vought-Spoke to David F&N and he will be sending RAP in overnight. 10/1/04-Vought-Reviewed RAP received by DEC on 10/30/04. Site is currently occupied by a masonary block structure which is subdivided into three sections. An art gallery occupies the western unit. The central and eastern units are currently vacant and are undergoing renovations for use as an art gallery. RAP proposes

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

weekly recovery of free product from FN2 via a peristaltic pump until well is converted to a 2 product recovery well designated at FN6. Two additional wells will be installed in the interior of the building. Monthly groundwater monitoring and quarterly sampling. Five air sparge and four SVE wells will be installed in the interior of the building. Remedial system will be installed on the roof of the building. Daily monitoring for the first week, weekly monitoring for the first month, monthly maintenance visits and effluent sampling, quarterly effluent sampling and groundwater sampling. Vought sent letter approving of RAP. 10/28/04-Vought-Spoke to David(F&N) and FN1 must be reinstalled due to it was a bent well. Wells will be installed during the next few days. 9/27/05 - SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 11/9/05 - Obligado - Review System STartup Report. AS/SVE system consists of 5 HP compressor and 3.5 hp blower and 5 air sparge wells and four soil vapor extraction wells. Effluent air stack results show 31.4 ug/m3 for benzene. Operation and maintenance schedule proposes monthly SVE effluentmonitoring and Quarterly Status Reports. System started in May 2005. Due to noise generation, the system only runs from 9pm to 6am. Quarterly Status Report - Groundwater analyticals show 4.7 ppb benzene (FN3), 50.1 ppb MTBE (FN2), 78.3 ppb MTBE SVE5, 1.7 ppb MTBE SVE3. Benzene effluent show 46.74 ug/m3. 5/15/06 - Obligado - Called David Oloke. Asked that he send recent Quarterly Status Reports. 5/22/06 - Obligado - 2Q06 Quarterly Status Report, submitted by Fenley Nicol, Inc. Ground water analyticals show 9 ppb benzene 35 ppb MTBE in FN3 and and 3.7 ppb benzene in FN4. Benzene effluent below STIP limits. There is duplicated data on Table 2 Air Sampling Results, probably a cut and paste error, call Dave Oloke, he said he will look into it at send a new table with the electronic copy. Report recommends continuing system operation. 6/23/06 - Obligado - Called David Oloke. Asked for the corrected Table. He said he will email it to me. 10/23/06 - Obligado - Called David Oloke. Left message requesting most recent quarterly status report. David Oloke call me back and said he would send the report shortly and he would correct the typo on Table 2. 1/30/07 - Obligado - Review 3Q06 monitoring report. Typo in 2Q06 table has been fixed in cumulative table. AS/SVE system online and working at 100% maximum capacity. Air samples collected monthly. Benzene in gw exceeds standard at 4 ppb. in 2 wells. All effluent below STIP guidance. Benzene detected in VES/AS effluent at 4.86 ug/m3 in 6/06. Recommends continued operation of the system. Review 4Q06 monitoring report - AS/SVE system operating at 100% capacity 9 hours per day. All effluent samples below STIP guidance. BTEX effluent at 361.71 ug/m3 during 10/27/06 Report recommends continued operation of system. GW results show minor exceedences of Benzene - max concentration at 8 ppb in FN3. However gw monitoring does not include FN1 where highest contamination was found. 9/13/07 - Obligado - Review 1Q07 monitoring report. According to the report, the AS/SVE syste is running at 100% capacity. System is still pulling vapors, at a flow rate of 50 cfm and a concentration in March 07 of 111.30 ug/m3 BTEX. Benzene (12.8 ug/m3) was below the STIP limit. Recommends continued operation of AS/SVE system. 10/26/07 - Obligado - Review 2Q07/3Q07 monitoring report. Benzene detected during quarterly monitoring at MW3 adn MW4 slightly above standards. Analytical results of air stream were below the max benzene STIP Limit. Recommneds continued operation of the AS/SVE System. 9/3/08 - Obligado - Review 1Q08 monitoring report. AS/SVE running for 9 hours a day at 100% capacity. Effluent collected monthly. Benzene detected

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

slightly above standards in MW2,3,4,and5. System effluent ND for BTEX. 6/3/09 - Obligado - REview 1Q09 monitoring report. Requests to shut down system for a 1 year post remedial monitoring period to determine if system was effective and monitor for rebound. Sent a letter to Seeling cc to David Oloke approving system shut down temporarily but requiring sampling of monitoring wells MW1, MW6, adn MW7 beneath the building as required by approved RAWP. Required 90 days to submit an update report on system shutdown and additional sampling. 12/3/09 - Obligad - Met with David Oloke on site. The AS/SVE system was down as proposed. According to David they were unable to collect ground water samples from the three sampling points. According to David the water he collected was too silty. He recommended doing an exposure assessment to close the spill number or to install the well in an alternate location in the building entrance. I told him I would review the spill file to determine if that location was acceptable. 12/22/09 - Sent email to Mr. Oloke - The Department has determined that the proposed location is cross-gradient and outside the of the source area, and would not provide the necessary data to confirm the site remedation was successful. As such, the Department reiterates its requirement in the June 2, 2009 letter, to sample the 3 monitoring wells FN1, FN6, and FN7 (as originally proposed in the approved RAWP) and submit a Monitoring Report within 90 days of this notice. If sufficient ground water can not be obtained from these sampling points (after exhausting all available well sampling and well development techniques), than a Remedial Investigation Work Plan (RIWP) to install a new monitoring well in the gallery in between FN1, FN6, and FN7 must be submitted within 90 days of this notice. The RIWP should contain an implementation schedule. 10/9/10 - Obligado - Email from David Oloke I would like to inform you that we’re scheduled to be onsite to install one groundwater monitoring well on the sidewalk directionally towards the source area beneath the building in order to determine the current groundwater quality beneath the site. We scheduled for Monday 25 through Wednesday 27. 1/14/11 - Obligado - Email from David Oloke We are set to go back to High Ridge, 524 West 29th Street in Manhattan on Monday 1/17/11 to install the groundwater monitoring well for spill inactivation. The client is making plans to be onsite as well . 1/19/11 - Obligado Email from David Oloke We core drilled through the foundation wall and could not get the well rods to the desired depth due to refusal. So we back to square one. Our client spoke with the tenant again yesterday to see if he will allow us access into the building. 4/1/11 - Obligado - I sent email to David Oloke related to potential alternative methods for obtaining ground water samples at the site since the diagonal well method was not successful, such as snaking new tubing into the existing system wells, and high vaccuum extraction to obtain ground water samples from the sparge wells. I asked Mr. Oloke to look into these options, as well as any other methods and report back the findings to the DEC. 3/12/12 - Obligado - I reviewed a Site Status Report. They collected samples from MW1, MW6, and MW7 under the gallery slab using the vacuum extraction technicque. Samples were collected in June and November of 2011. During the most recent sampling event in NOvember, the maximum VOCs was 117.3 ug/L in MW-7. MW1 had 63.42 ug/L total VOCs, and MW6 had 59.75 ug/L VOCs. Several compounds were slightly above standards. The greatest exceedence was 36 ug/L napthalene in MW7, which is above the standard of 10 ug/L. In NOvember they turned on the AS/SVE system and allowed it to run for four weeks. At the end

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

of the four weeks , air samples were collected and all the targeted VOCs were ND. Based on the above, they requested closure. Ground water contamination has been greatly reduced. The AS/SVE system reached asymptotic recovery rates. Additional remediation is not warranted nor feasible. After discussion with DEC Hussein and Ketani, this spill is closed. A spill closure letter ahs been sent to Walter Seeling, cc to David Oloke."

Remarks: "caller was hired to remove a few tanks from the site - x-ref spill # 9008960 - they encountered contaminated soil - they are stockpiling soil now"

Spiller Address:	522 W29TH ST
Spiller Company:	999
Contact Name:	CLIFFORD BELL
DEC Memo:	"8/4/13-Vought-Received email from OER Chawla that Jeff: During remediation, a spill was called in at the above address. Please let me know who this spill is assigned to so that we can coordinate remedial efforts. Thanks, Shaminder. Email contains string from GZA Clifford Bell that The findings of stained soils immediately surrounding and underlying the approximate 2,000 gallon tank on July 7 were reported to the NYS DEC. The Spill # is 1404620. I will keep you informed on the case manager and path forward. Thank you. Clifford Bell C.P.G. LEED AP GZA GeoEnvironmental of New York 104 West 29th Street, 10th Floor New York, New York 10001 Office: 212-594-8140 x 8931 Direct: 646-929-8931 Cell: 646-483-6250 Email: clifford.bell@gza.com Vought sent email to OER Chawla with cc to Bell, Ahmed and RSE that Shaminder, Still catching up on emails. The project manager for the spill is Hasan Ahmed (copied above) and you or Clifford Bell (also copied above) can also call him at 718-482-6405. Please keep in mind that Hasan will be managing the case only if it a short term excavation or remedy. If the case is long term (eg submission of work plans and reports) then the case will be transferred to another Project Manager in the Spills Unit. Can you or Cliff provide a brief one paragraph email with the scope of work and current status so Hasan can best decide the Project Manager? Thanks. 8/5/14-Vought-Received reply from GZA Bell that Jeffrey: We do not intend for the tank closure to be long term. The previously abandoned-in-place tank filled with concrete was removed on July 8 by the excavation team assisted by an FDNY Certified UST firm. Soils immediately adjacent to the tank and impacted soils as defined by visual staining, olfactory conditions, and photoionization detector responses were removed, segregated and transported to an approved petroleum handling facility. The tank was resting on a concrete slab. Plastic was placed on top of the resulting excavation. Our intention is to step out and excavate additional soils beyond and at the depth of the underlying concrete slab to confirm removal of impacted soils as indicated by field observations. The slab will be removed. Additional endpoint samples will be collected for

CONSTRUCTION SITE (Continued) **S117268968**

confirmation. We plan to perform this work within the next 2 weeks. We will notify Hasan 2 days in advance of the excavation. Please do not hesitate to contact us as needed for further details. Thank you. Vought spoke with DEC Ahmed and he noted that he would reply to above 8/5/14 email from GZA Bell and that he will remain project manager. 8/6/14- Ahmed - Replied back to clifford today saying: Clifford As per conversation with you on 8/1/14 over the phone, you mentioned that as per the revised plan, the planned excavation depth for the foundation at the tank location is 15 ft and the depth of the concrete slab is 4 ft. You have the option to take end point samples at the final depth of excavation or at any depth you mentioned in the email. Please send me a site plan showing the location of the tank and planned excavation. What is the groundwater depth at this site? Thank you. "

Remarks: "Tank removal with soil impact. Prior historical closed-intact tank but impactsed soil discovered during removal. Cleanup is pending."

DEC Memo:	"7/27/15 TJD Left messages on both work and cell phones for the notifier requesting callback with additional information. Received a call back from Kevin McGrath at Chazen with updated information. Email (pasted below) provides historical information and direction to assigned responder (Piper). I received a call back from the notifier, this is a redevelopment site with an old closed spill number (1306369 - Patel) and is also a NYCOER E-designation parcel. With the above stated it appears the reported condition is unrelated to either of these known conditions. The notifier describes an open excavation approximately 28 feet deep (4 feet into bedrock) that the bottom is level and graded pending construction. Today product, believed to be a weathered #2 fuel oil is migrating into the open excavation (from

CONSTRUCTION SITE (Continued) **S118141456**

offsite parcel) from the seams on construction sheeting at an elevation of approximately 16 ft bgs. Product is accumulating at the bottom of the open excavation. The contractor has scheduled a vac truck for tomorrow morning to pump product (Atlas Disposal out of Dover NJ). Soil and product samples have been collected for product ID and 8260/8270 analysis. Your site contact is Eric Orlowski, his cell phone is 518.928.5823. Please perform a site inspection first thing tomorrow morning to investigate and document findings. THIS IS NOT A RECALL - however, if you want to modify your work hours and start your day early - please let me know. They are scheduled to start pumping at 8AM, but I have requested that they await your arrival estimated at before 9AM so you can take a look before there is nothing to see. 7/28/15- DEC Piper responded to site to inspect and meet Env coordinator. A seep of oil has entered the SW corner of the property. It appears that it was from the adjacent building. That building is now on gas though historical sandborns show tank. Unclear weather tank was AST or UST and / or fill line was buried and leaking. Contractor to pump out oil in bottom of excavation. 7/30/15- DEC Piper received email from contactor. A vac truck cleaned the oil of f the water in the bottom of the excavation that day. Since then, no other oil has been observed. They will pour wall in a couple days with appropriate vapor. moisture barrier. Based on work to date and no reoccurrence, this spill is closed. 10/21/15-Vought-Received email from OER Chawla with cc to RSE that Jeff and Randy:Please let me know who is managing this spill. thanks. Included in OER Chawla's email string was email from Integral (Kevin McGrath) to OER Alfieri dated 10/19/15 that Hi Alysha, Progress at the Site is still slow as the new CM transitions into the site. The construction contractor (Veritas) responsible for the excavation and removal of soil and bedrock has completed all of the removal action down to the bedrock final grade elevation. The last week was spent cutting the rock on the SE corner of the site and loading it out. The soil access ramp has been removed and the floor of the excavation is now ready for the final mud-slab, vapor barrier, floor slab installation. We had an issue last week with fuel oil leaking through the eastern barrier wall between the site and the adjacent Scores nightclub property next door. At least three of the seams in the barrier wall that were sealed back in July reopened. I inspected the site on Friday and it is clear to me that the oil is on the water table beneath the building next door. The CM was instructed to berm off and contain the leaking groundwater mixed with fuel and pump it to an oil-water separator so the free-product can be drained off and disposed of properly. They will also be mobilizing a team to the site to seal the leaking joints (again). At the moment they have less than 5-10 gallons of old fuel-oil, floating on the water in a pool in the SW corner of the site which should be cleaned up in the next couple days. I will speak to NYSDEC later this morning about the situation. We still have an open spill number for this issue so we do not need to report a new spill. I would like to get some understanding of what NYSDEC is doing with the adjacent property owner to help mitigate this issue so it stops being a problem for us. I also have a query in to the manufacturer of the pre-pruff vapor barrier material to assess the potential impact, if any, to the effectiveness of the vapor barrier layer from long-term exposure to free phase petroleum. You are of course welcome to visit the Site anytime. Thanks. As subject of spill was from OER Chawla was 1306369 (closed spill also at this site that was assigned to DEC Patel), Vought replied to all that

CONSTRUCTION SITE (Continued) **S118141456**

Shaminder, This spill was closed by Kumar Patel on 12/10/13. Due to the reports of new product infiltration as per the below email which was not known at the time of spill closure, the spill will likely be reopened by Kumar. I will follow up with him to ensure he responds to all. DEC Patel responded to all parties that Please note that the spill number 1306369 was reported based on field observations during installation of soil borings at the site and the case was closed based on results of soil and groundwater samples which shows presence of metals and PAHs. Another spill case (#1504458) was reported on 07/27/2015 due to findings of petroleum product on groundwater. Ryan Piper was the case manager. Spill reopened by Vought after discussion with DEC Demeo and RSE. Vought corrected spill address and city spelling on UIS in case of future searches by address and project manager for spill to be determined by DEC Demeo. 2/1/16- DEC Piper- additional seep was less than 2 gal. Based on extent of petroleum and work completed to date on both properties, this spill is closed."

Remarks: "historical spill - clean up pending"

DEC Memo:	"3/6/17-Vought-Received email from OER Chawla with cc to OER Walsh and OER Wong on 3/3/17 that I am reviewing RIR for a site at above address. The Site is located at 517 West 29th Street in the Hudson Yards section in Manhattan, New York and is identified as Block 701 and Lot 24 on the New York City Tax Map. Is there any spill at this property? Soil boring descriptions are: " Soil boring SB-01 was advanced in the basement. A 2-inch layer of unknown tar material and olfactory evidence of petroleum contamination was encountered under the concrete surface at the 1 to 2-foot interval. " Soil boring SB-01 was advanced in the basement. A 2-inch layer of unknown tar material and olfactory evidence of petroleum contamination was encountered under the concrete surface at the 1 to 2-foot interval. " Soil boring SB-03 was advanced in the basement. PID readings elevated to 69.2 ppm. " Soil boring SB-05 was advanced in the basement. A 2-inch layer of layer of unknown tar material and olfactory evidence of petroleum contamination was encountered under the concrete surface at the 1 to 2-foot interval. " Soil boring SB-06 was advanced in the basement. PID readings elevated to 22.4 ppm. A 2-inch layer of layer of unknown tar material and olfactory evidence of petroleum contamination was encountered under the concrete surface at the 1 to 2-foot interval. New consultant don t know if spill was called in. Thanks Vought

BLDG UNDER CONSTRUCTION (Continued) **S120700953**

replied to OER on 3/3/17 with cc to all that Shaminder, There are no listed spills at the above address range. The closest spill, albeit closed, was down the block at 522-526 West 29th Street. I also checked PBS database and there is no record of any tank at the above address range as well. The boring logs you sent below noted that an unknown tar material was under the concrete floor in all four borings at a 1-2 foot interval. This material may possibly from a foundation sealer and the site may also be in part of an MGP site (which I know is also down in the 20 s along 10th and 11th Avenue. I would suggest a spill be called in and we can make further decisions upon reviewing the soil sample data, assuming that soil samples were collected and analyzed, from the borings referenced in the email chain below. OER Chawla replied that Thanks Jeff: Not much detected in soils other than SVOCs. No VOCs detected. Here is more info: " Soil results showed no volatile organic compounds (VOCs) above Track 2 SCOs in any of the soil samples collected. Only xylenes (0.4 ppm) slightly exceeded Unrestricted Use SCOs. Several SVOCs were detected in the soil samples collected including 2-Methylnaphthalene (maximum 82.5 parts per million [ppm]), Benzo(a)anthracene (maximum 105 ppm), Benzo(a)pyrene (maximum 48.6 ppm), Benzo(b)fluoranthene (maximum 75.8 ppm), Benzo(k)fluoroanthene (maximum 15.1 ppm), Chrysene (maximum 105 ppm), Dibenzo(a,h)anthracene (maximum 9.63 ppm), and indeno(1,2,3-cd)pyrene (maximum 61.1 ppm), detected above Restricted Residential Use SCOs. Several metals including chromium, iron and lead exceeded Unrestricted Use SCOs and only Iron (maximum 21,500 ppm) detected above Track 2 SCOs. No pesticides were detected above Track 2 SCOs in any of the soil samples collected. PCBs detections in the soil samples collected. Overall, soil chemistry is similar to sites with urban historic fill in New York City. " Soil vapor sampling detected PCE and TCE were not detected in soil vapor. Vinyl Chloride in several samples (maximum 970 mcg/m3). Highest concentrations were detected for Xylenes (9,800 mcg/m3). Petroleum related compounds (BETX) were detected at elevated concentrations to a maximum of (28,900 mcg/m3). Concentrations of Vinyl Chloride are above the mitigation levels established by the NYSDOH guidance matrices. (mcg/m3)SV-01SV-02SV-03SV-04SV-05IA-06OA-07 Benzene17002400220015002200 1.91.1 Ethyl Benzene42008500310023003000 9.62.9 o-Xylene41002700130013001400 113.1 p-& m-Xylenes98007700360042004500 297.3 Toluene61007600480037004100 227.3 GW not sampled .We will ask consultant/developer to call in spill. 3/6/17-Vought-Received email from OER Chawla with cc to OER Walsh and RSE that Jeff: Per your instructions, Spill was called in. Spill #1610851 was assigned. Please let me know who is managing this spill. thanks Vought replied to OER Chawla and DEC Piper with cc to OER Walsh and RSE that Shaminder, That spill case is being managed by Ryan Piper as he was on duty after hours when the spill was received. He is copied above and you may also reach him at 718-482-4927. Ryan, Please see the data in the email below and respond to Shaminder accordingly. Thanks! "

Remarks: "now a self storage facility being renovated. samples came back; 2 inch layer of unknown tar and smell of petroleum."

FINDS:

Registry ID: 110055468630

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL APPENDIX B SITE NO. 78. 1/5/16 - based on meeting among Con Edison and DEC Region 2 management, Con Edison agreed it would revise the SIWP without getting specific comments but rather would use the general agreements reached for scoping such investigations; this was further discussed at meeting with Con Edison on 11/10/15; received email from Barry Cohen, Con Edison, on 11/24 requesting review of the spills included in the draft work plan and whether the Department believed there were any other open spills which should be included in the SIWP. The spills were reviewed along with review through the Department's records. Replied by email 12/2 that no additional spills were found to be included. (JOC) 10/26/2016 - V. Brevdo Due to Project Manager Joe O'Connell's promotion to the DMM, and per discussions between Chiefs of Spill Prevention and Response and Remediation Section B, this spill case is re-assigned to Remediation Section B. VB "
Remarks:	"Reported by Con Ed as required under Consent Order."

550 WEST 30TH STREET (Continued) **S104619635**

submitted soil boring results and a short writeup. DEC sent back a letter requesting test results compared to TAGM and justification for exceeding limits. 9/2/2003 PTC resubmitted their letter with the TAGM comparison information added. Results are just slightly above the standard and are consistent with old coal ash fill material. Spill Closed"

Remarks: "uncover repair and retest"

DEC Memo:	"According to the NYSDEC records, on August 5, 1998, the on-site 2,000 gallon UST failed a tank tightness test and was issued Spill #98-05607. After review of information received from the client, it

550 WEST 30TH STREET (Continued) **S104619635**

has been determined that after the UST failed tank tightness testing, the UST was cleaned, sandblasted, and relined with an epoxy lining, and the associated piping was replaced in September 1998. On July 10, 2003, the 2,000 gallon UST failed a tank tightness test wasissued Spill #03-03799. It appears that soil borings were performed to determine the extent of the UST leak/spill. Upon reviewing data received from the NYSDEC Spills Database, the NYSDEC notes section determined the soils were slightly above TAGM guidelines due to levels consistent with old coal ash fill materials and was granted closure status on September 2, 2003. The UST was emptied and taken out of service, and an 1,080 gallon steel registered AST was installed in a small cellar area near the north bay door area. On September 28, 2005, EnviroTrac contacted the NYSDEC regarding Spill #98-05607 to determine what isneeded to close the Spill. It was determined that since Spill #98-05607 was prior to Spill #03-03799 which is closed , and was the same tank and area, it should be closed as well. "

Remarks: "TANK TO BE EVACUATED, CLEANED, AND LINES TO BE TESTED."

Contact Name: MARK SALAMACK
DEC Memo: "5/12/2006 Sangesland spoke with Joe Ostrowski at PTC about this site. He said the tank is in a tank room and began to leak. The owner hired PTC to ONLY vac out the tank. Joe says approx. 25-30 gal of #6 oil remains under the tank along with oil soaked debris. Unknown who is doing the cleanup. Property Shark says the building has several alternate addresses: a/k/a 548-552 West 28th St & 547-553 West 27th St NO PBS records found for any of these addresses.... Probably in PBS Violation Property Shark Owner: Mariners Gate, LLC 548 West 28th St, NY, NY 11101 Property manager- Jim Pastreich, Pinetree Group 212-279-5600 Sangesland spoke to Mr. Pastreich's secretary. He'll call back. 5/12/06- DEC Piper responded to site. Oil soaked debris remains under tank. Tank was emptied and cleaned yesterday. Seam in tank was cracked. DEC Piper instructed Jim of Pinetree to contract cleanup co. ECO Kurt Bush responded to site and issued ticket for un registered tank. PTC issued proposal. PTC to cleanup on Monday and investigate presence of oil b/w tank and vault. 5/16/06- DEC Piper spoke w/ PTC. As per conversation, there is oil between the tank and the vault. A hole drilled through the vault revealed product. Piper issued CSL. 5/19/06- DEC Piper spoke w/ Jim. As per conversation, soil contamination removed. Repairs will be made to tank and retested. Jim did not mention contaminated material b/w tnak and vault as PTC described to DEC earlier. Jim will contract out another concractor as PTC services were not rendered/ nor wanted. Piper faxed list of contractors to Jim. This work needs to be completed. 10/4/06- DEC Piper left message for Jip P to call back w/ update and documentation. Piper searched PBS and the tank is now registered. 4/27/07- DEC Piper has not recieved any info on cleanup or repairs. Additionally, the PBS reg is expired. Referred to PBS for inspection. 9/24/07- DECP iper recieved disposal mainfests from work performed in 9/ 2006. Soil samples were recently collected. No VOC's over TAGM though there are a few SVOC's over. The tank has been repaired. PBS violations exist and has was referred to legal. This spill is closed. See edocs if warranted."
Remarks: "TANK IS LEAKING AND STILL INVESTIGATING CAUSE: IN PROCESS OF CLEANING AND IS IN A ENCLOSED TANK ROOM"

DEC Memo:	"04/17/07-Vought-Off hours responder. Vought called Carroll (212-675-3225 fax 212-675-3224) and soil boring was being performed for E designation. Unsure of tank size. DEP contact is Mohammed Ahmed (212-675-3225). Site is going to be mixed commercial and residential. Spill will be remdiated via excavation for building. Proposed development will include 400sq ft below grade parking spaces. No soil sample analyticals but strong gasoline odors and free phase product in soil. Sheen on groundwater in one boring. Groundwater depth at 11'. Dewatering will most likely take place and DEP sewer permit will be required. Report will submitted within two months. Buildings are still onsite. Carroll will call back Vought with current and former owner of USTs. Upon reception of owner information Vought will send out soil contamination letter with below requirements. DEC requires: 1)copies of everything 2)regular intermittent sampling of groundwater 3)moisture barrier or vapor barrier description 3)delineation soil and groundwater 4)updating of PBS registration to show that tanks are

AVALON WEST (Continued) **S108636200**

temporarily out of service 5)cc and call to DEP Ahmed. 8/3/07 - Austin - Transferred from Vought to Patel for further review and action - end 08/27/07-Hiralkumar Patel. visited site. site lot is divided into two different area. site area along 11th ave is occupied by parking lot and remaining half portion of site along W 28th Street is occupied by autobody shop. spoke with Moe (212-502-4236) at parking lot. he doesn't have any UST and doesn't have any knowledge of any tanks. spoke with Sam Garcia, owner of autobody shop who has sub-leased this property from Kaz Systems, Inc. as per Mr. Garcia, he is unaware of any underground tanks on-site. he is using two aboveground tanks for waste oil. Sam Garcia Complete Automotive Service Ph. (212) 691-0200 Fax 9212) 967-7383 Kaz Systems, Inc. 1683 Lexington Avenue, Suite # 101 New York, NY 10029 Ph. (212) 831-6905 Fax (212) 828-6373 spoke with Mr. Carroll. asked him to submit report and owner's information. found PBS record. PBS #: 2-350281. as per PBS record, site has eight 550 gal USTs, temporarily out of service. alternate site addresses: 282-292 11 AVe, 282-288 11 Ave, 298 11 Ave, 552 W 29 St, 553 W 28 ST, 560 W 29 St 09/05/07-Hiralkumar Patel. spoke with Mr. Carroll. he just got approval from his client to release the report. he will send report by end of this week. 09/11/07-Hiralkumar Patel. received email from Mr. Carroll containing copy of investigation report. he mentioned another spill # (0603351), which is assigned to DEC Tang in remediation, was reported as found groundwater contaminated during Phase II investigation in July 2006. ********** abstract of Phase II report, done in July 2006: - investigation done by Envirotrac - based on Phase I done in Dec. 2005, Envirotrac did Phase II - collected soil samples from six temporary boring locations and groundwater samples from three temporary boring locations - at each soil borings, continuous soil samples were collected from surface grade to maximum depth of approx. 12 ft bg less than ---------- (report doesn't include exact depth of each sample) - site has two UST fields: one consists 8 out-of-service USTs and another has 3 out-of-service USTs - all 11 tanks are 550 gal tanks - field screening shows site has fill material from grade to depth of 5 ft bg - found only Xylene (1,493 ppb) in GP-2 less than ---------- - found groundwater contaminated ----------GP-4--------GW-1 Ethylbenzene----------218 Xylene----------177 1,3,5-Trimethylbenzene---137 1,2,4-Trimethylbenzene---229 Naphthalene----------113 MTBE----------1,470 groundwater sample GP-4 was taken at 13 ft bg (groundwater table at 10 ft) and GP-5 was taken at 14 ft bg (groundwater table at 10 ft), both samples were taken deeper than water table. ********** abstract of investigation report, done in Sep. 2007: - Fleming-Lee Shue did investigation - site has e designation less than ---------- - site is currently developed with two parking lots and two buildings - both parking lots have aboveground hydraulic lift systems - a one-story building, located at the corner of 11th ave and 29th street, is used as an auto repair shop less than ---------- - another one-story building, located between two parking lots with an entrance on 28th street, is used for a combination of auto repair and finishing, including painting and detailing less than --------- - site would be developed as residential less than ---------- - based on topography and proximity to the Hudson river, anticipated groundwater flow is to the west - groundwater was observed to vary from 6 to 12.5 ft bg, with an average depth of approx. 10.25 ft bg - site has 11 550-gal gasoline USTs, all are out-of-service - eight 550

AVALON WEST (Continued) **S108636200**

gal gasoline tanks, which are located in northern portion of parking lot, are registered (PBS #: 2-350281) less than ---------- - three 550 gal gasoline tanks, which are located in southeatern portion of parking lot, are not registerd less than ---------- - soil samples were collected from total of 14 borings (SB-11 through SB-24) - groundwater samples were collected at 7 of 14 boring locations (SB-11,12,14,18,19,20 & 24) - soil borings were installed to depths ranging 12 to 16 ft bg - two soil samples were collected from each borings: one at the surface between grade and 2 ft bg and one based on field screening (highest PID or directly above groundwater interface or directly above depth of refusal) - most of the soil at the site is urban fill material, extending to depths ranging from 4 to 16 ft bg. fill consisted of mixtures of brick, concrete, ASH, cinders, wood and gravel in matrix of silty sand less than ---------- - found about four SVOC compounds in almost all soil samples (may be due to ash in fill material) - found xylene contamination (10,000 ppb) in soil sample from boring SB-16 at depth of 9-11 ft bg less than ---------- - found groundwater contaminated
----------SB-12------SB-14------SB-18-----SB-20------SB-24

AVALON WEST (Continued) **S108636200**

of four wells, where found groundwater contaminated, are located on property boundry and to define area of contamination, the department requires further delineation on-site as well as off-site. also the department requires delineation at fill ports, dispenser island and any other area of concern (hydraulic tank, drain etc.). he was mentioning that all this work will be done during construction at site. told Mr. Ahmed that investigation must be done, according to letter, in specified deadline. Mr. Ahmed wants to discuss further about sampling locations. he will send scaled site map with locations of all samples (current and previous), tanks, dispenser islands, remote fill ports, drains, hydraulic lifts etc. Mr. Ahmed will send site map next week. 09/27/07-Hiralkumar Patel. received email from Bill from Fleeming Lee Shue with proposed well locations. Mr. Ahmed proposed total of four wells on sidewalk (two on 11th ave, one on W 28th St and one on W 29th St). sent email with changes in proposed well locations. asked him to install wells in each area of concern (previous borings SB-12, SB-14, SB-18, SB-20 & SB-24), according to DER-10. also asked to include sampling points along old supply/return lines, fill lines, fill ports etc. asked Mr. Ahmed to submit work plan by Oct. 5, 2007. spoke with Mr. Ahmed. he mentioned that during development, entire site will be excavated down to 10 ft below water table, as part of sub-basement. 10/04/07-Hiralkumar Patel. received message from Mr. Ahmed. he has prepared work plan for further delineation and has sent to owner's consultant for review. he will send work plan by Tuesday 10/09/07. 10/09/07-Hiralkumar Patel. received work plan for groundwater delineation. will install six monitoring wells (three in each area of previous tanks) 10/16/07-Hiralkumar Patel. sent email to Mr. Ahmed with approval of submitted work plan. 11/21/07-Hiralkumar Patel. received message from Mr. Ahmed stating that they having some trouble getting access to property for well installation. spoke with Mr. Ahmed. they got permit to install well on sidewalk but having hard time getting access into site. asked him to provide tenant's contact info. 11/28/07-Hiralkumar Patel. received message from Mr. Ahmed. spoke with Mr. Ahmed. he asked to call Ali. spoke with Ali, tenant renting property from Mr. Bernstein. he is running parking lot in corner of 11th ave and W 28th street and has subleased corner at 11th ave and W 29th street to garage operator. Ali mentioned that he never used tanks which are in ground and didn't knew about it. as existing USTs belongs to site owner, Ali asked for compensation for a week as he need to close his business for week for monitoring well installation work. as Ali not getting any compensation, he refused access to site. Ali Yaghoubi **current tenant** Kaz Systems Inc. 1683 Lexington Avenue Suite # 101 New York, NY 10029 Ph. (212) 831-8300 (917) 217-4843 Fax (212) 828-6373 email: comprop3@aol.com Laurance Kalik **current tenant's attorney** Herzseld & Rubin Ph. (212) 471-8545 Fax (212) 232-6645 left message for Mr. Bernstein. received call from Mr. Berstein. he will talk to tenant and will schedule work. asked Mr. Bernstein to submit delineation report by Dec. 31, 2007. 12/05/07-Hiralkumar Patel. received call from Mr. Ahmed asking help getting access to site. also spoke with Roberta Gordos, attorney representing Avalon Bay. as per Ms. Gordos, Avalon Bay is now ground leasee and will do all required work. Ms. Gordos asked for help from the Department getting access to the site. Roberta Gordas **Avalon Bay's attorney** Ph. (212) 541-2076 discussed with DEC Urda. he spoke with Mr. Berstein. Mr. Berstein confirmed that Avalon Bay is ground leasee and now has right to enter. Urda will send letter to Mr. Yaghoubi.

AVALON WEST (Continued) **S108636200**

12/14/07-Hiralkumar Patel. DEC Urda sent letter to Ali requiring access to the site. 12/18/07-Hiralkumar Patel. received message from Jessica Tofi, attorney representing Mr. Yaghoubi. spoke with Jessica with DEC Urda. they are currently negotiating with property owner. she asked what needs to be done at site. explained her that without reviewing groundwater delineation report (as required), the department can't comment on possible remediation at site. asked her to submit groundwater delineation report by Jan. 15, 2008. Jessica Tofi **current tenant's attorney** Law office of Borah Goldstein PH. (212) 965-2614 (O) (646) 436-5996 (C) email: jtofi@borahgoldstein.com 12/19/07-Hiralkumar Patel. sent email to Ms. Tofi with copy of Phase I, Phase II and remedial investigation report. left message for Collista Nazaire at NYC DEP. asked her to provide project manager's information in DEP who is handling this e designated site. Collista Nazaire Ph. (718) 595-4401 Fax (718) 595-4479 email: cnazaire@dep.nyc.gov received call from Ms. Nazaire. she mentioned that DEP hasn't received any application for redevelopment, so not working on-site. sent email to Gary Heath with all available reports and copy of all correspondance, for their record, with information of all involved parties. 01/17/08-Hiralkumar Patel. spoke with Mr. Ahmed. currently owner and tenant are in court fighting for access. once access agreement get signed, Mr. Ahmed will apply for sidewalk permit and will submit work schedule. 02/08/08-Hiralkumar Patel. left message for Mr. Ahmed. received call from Mr. Ahmed. owner and tenant just reached an agreement and will sign agreement by end of Feb. 2008. Mr. Ahmed will do well installation after that in Mar. 2008. 03/06/08-Hiralkumar Patel. received message from Mr. Ahmed. they installed six monitoring wells at site. will do monitoring for free product. sent email to Mr. Ahmed. asked him for groundwater samples also alongwith soil samples during well installation. also asked for product sample, if found free product in any well. received call from Mr. Ahmed. he mentioned that as per their proposed work plan, they had only planned to monitor wells for any free product and not planned to collect any water samples. will monitor wells untill site remediation begins during proposed site development. after reviewing work plan, spoke with Mr. Ahmed. asked him to take one groundwater sample from each of upgradient well in two sets (one set in corner of 11th ave & W 28th st and second set in corner of 11th ave & W 29th st). Mr. Ahmed mentioned that after defining groundwater flow direction, will take water samples from upgradient wells. 03/31/08-Hiralkumar Patel. received well installation and gauging report. abstract: - six monitoring wells installed - soil sample with highest PID or just above water table were collected during each well installation - wells were installed to depths of between 16 to 18 ft bgs and were constructed with ten ft of 2 inch dia. PVC screen - during well installation, 10 ppm PID were observed in soil samples collected at 7 to 9 ft bgs - petroleum odors observed in soil samples collected at 7 to 9 ft bg - no free- phase product observed on groundwater surface in any well - will continue to monitor wells monthly for the presence and possible volume of free-phase product - will do well survey to define groundwater flow direction and based on flow direction, will collect groundwater sample from most upgradient well 04/23/08-Hiralkumar Patel. sent email to Mr. Ahmed requiring submission of schedule for well survey and groundwater sampling from upgradient wells. 05/14/08-Hiralkumar Patel. received monitoring well gauging/sampling report. during well gauging, found groundwater flowing into west direction. based on groundwater flow direction,

AVALON WEST (Continued) **S108636200**

they collected sample from one upgradient well MW-1 and found MTBE contamination (187 ppb) in groundwater. no sample collected from well MW-6 which is upgradient from second set of wells located in corner of 11th ave and W 29th street. during previous study, highest contamination was found in boring SB-20 which is located near tank field in corner of 11th ave and W 28th street and recent upgradient groundwater sample from that end showed little contamination. will gauge wells for any free product. based on submitted report, the department will wait for complete remediation that will occur during site redevelopment. 06/11/08-Hiralkumar Patel. received monitoring well gauging report. wells MW-1 through MW-6 were gauged on 05/12/08. no product found in any wells. 06/20/08-Hiralkumar Patel. received monitoring well gauging report. wells MW-1 through MW-6 were gauged on 06/12/08. no product found in any wells. 07/30/08-Hiralkumar Patel. received well gauging report for July 08. no free product measured in any wells. 09/11/08-Hiralkumar Patel. received well gauging report for Aug 08. no free product measured in any wells. spoke with Mr. Bernstein, property owner. he mentioned that tenants has left the site. and Avalon Bay is in process of redevelopment. left message for Mr. Javits at Avalon Bay, new leasee. 09/12/08-Hiralkumar Patel. received message from Mr. Javits. spoke with Mr. Javits. Mr. Javits mentioned that all tenants have left the site and they have applied for permit for demolition of existing building. they are expecting to demolish all building in Jan./Feb. 2009 and from spring 2009 they will start excavation of the site. asked Mr. Javits to submit updates monthly. 11/20/08-Hiralkumar Patel. received remedial action work plan from Flaming lee shue. abstract: - petroleum contaminated soil will be excavated down to the depth of the proposed building foundation which, at approx. 12 to 15 ft bg, is below the groundwater table - post excavation soil samples will be collected - vapor barrier will be installed beneath the foundation and along the below-grade portion of the foundation walls - building sub-grade will be below the groundwater table, consequently, waterproofing will be necessary and a sub-slab depressurizing system is infeasible - petroleum-contaminated groundwater will be treated by using the ORC - will submit remedial action report and alongwith it will include a work plan to sample the groundwater monitoring wells; groundwater will be sampled quarterly for two years and analyzed for VOCs (no SVOCs) and for natural attenuation parameters spoke with Mr. Ahmed at fleming lee-shue regarding ORC application and dewatering. Mr. Ahmed mentioned that during excavation for foundation, they will excavate below water table and will dewater the area. will collect contaminated water and treat on-site under dewatering permit from DEP (not received yet). once they reach to bottom of proposed excavation, then will apply ORC (dry or slurry) on soil and will install vapor barrier. asked Mr. Ahmed to submit dewatering plan. Dan Cole **DEP case manager for e-designation** NYC DEP Ph. (718) 595-4536 email: dcole@dep.nyc.gov 11/21/08-Hiralkumar Patel. received email from Fleming lee shue with copy of Nov. 2008 well monitoring well gauging report. no free product found in any wells. 12/22/08-Hiralkumar Patel. received monitoring well gauging report for Dec. 2008. no free product found in any wells during gauging on 12/19/08. 02/13/09-Hiralkumar Patel. received monitoring well gauging report for Feb. 2009. no free product found in any wells. 02/24/09-Hiralkumar Patel. spoke with Mr. Ahmed. he mentioned that due to financial problem, owner is planning to start project by end of 2009. Mr. Ahmed requested to decrease

AVALON WEST (Continued) **S108636200**

frequency of well gauging. based on earlier gauging reports, approved his request and asked him to gauge wells quarterly. spoke with Mr. Javits at Avalon Bay. informed him about quarterly monitoring. Mr. Javits asked to contact Ms. Loeb who is development manager at Avalon Bay. Rachael Loeb Developement Manager AvalonBay Communities, Inc. 275 7th Avenue, 25th Floor New York, NY 10001 Ph. (212) 309-1612 email: rloeb@avb.com 10/14/09-Hiralkumar Patel. 11:23 AM:- received well gauging report for Aug. 2009. no free product found on water. 04/01/10-Hiralkumar Patel. 3:38 PM:- spoke with Mr. Harris (as Ms. Loeb is on leave until Jul. 2010). they are waiting for permit which was applied in Jun 2009. Mr. Harris will call once gets permit. Fred Harris Ph. (212) 309-2984 email: fharris@avb.com 08/24/10-Hiralkumar Patel. received message from Mr. Ahmed (at 2:38 PM on 08/23/10). 5:27 PM:- spoke with Mr. Ahmed. he inquire about approval/disapproval for work plan submitted in Nov. 2008. 08/25/10-Hiralkumar Patel. 11:39 AM:- spoke with Mr. Ahmed. informed him that the department approves soil excavation and collection of endpoint soil and groundwater samples only and doesn't approve application of ORC yet as may require additional investigation after reviewing results of endpoint samples. 08/30/10-Hiralkumar Patel. 2:59 PM:- left message for Ms. Loeb at AvalonBay. 3:24 PM:- sent letter, approving soil excavation and collection of endpoint soil and groundwater samples, to Ms. Loeb and Mr. Bernstein. informed them that the endpoint sample results must be submitted prior to application of ORC and installation of vapor barrier as may require additional investigation. letter emailed to Mr. Bernstein, Ms. Loeb and Mr. Ahmed. 03/23/11-Hiralkumar Patel. 11:13 AM:- left message for (and sent email to) Ms. Loeb requesting updates. email copied to Mr. Ahmed. 2:20 PM:- received call from Ms. Loeb. she mentioned that they are ready for project but waiting for demolition permit which may take couple of months for entire process. Ms. Loeb will call once permit is issued. 06/06/11-Hiralkumar Patel. received email from Alana Brannon (at 11:32 AM on 06/02/11) from Fleming Lee Shue including well gauging report (dated 11/15/2010). no product found in any well. Alana mentioned that based on the commencement of construction/remediation phase activities, as well as the fact that LNAPL has consistently not been detected, all gauging activities should be discontinued. 06/15/11-Hiralkumar Patel. 12:25 PM:- received message from Arnie Fleming (212-675-3225) from Fleming Lee Shue. he mentioned that construction will begin soon and tank and associated contamination will be removed as proposed in work plan (dated 11/20/08). 3:14 PM:- left message for Arnie Fleming. 08/05/11-Hiralkumar Patel. 4:05 PM:- left message for Arnie Fleming. 4:15 PM:- received call from Arnie. he mentioned that contractor has submitted sheeting and shoring plan to NYC DOB and expect to get permit by 08/19/11. Arnie will send update once gets permit. 08/30/11-Hiralkumar Patel. 4:58 PM:- received email from Jesse Mausner from Fleming Lee Shue. he mentioned that AvalonBay will being uncovering the USTs on 09/06/11. Fleming Lee Shue will perform air monitoring during all intrusive activities. Jesse mentioned that tanks will not be removed for several more days, as sheeting needs to be installed before further excavation. Jesse Mausner, P.G. Fleming-Lee Shue, Inc. Ph. (212) 675-3225 Ext. 310 (646) 841-3099 (C) Fax (212) 675-3324 email: jesse@flemingleeshue.com 09/13/11-Hiralkumar Patel. 10:06 AM:- left message for Jesse. 10:53 AM:- received call from Jesse. he mentioned that contractor is installing sheeting for safe removal of all tanks. he mentioned that tank removal work will probably begin from 09/19/11. asked him to

AVALON WEST (Continued) **S108636200**

schedule a site inspection once tanks removed from ground. 09/14/11-Hiralkumar Patel. 11:17 AM:- received email from Jesse. he mentioned that contractor has started tank removal today. 09/16/11-Hiralkumar Patel. 2:03 PM:- received call from Jesse. he mentioned that some tanks are already removed and some will be removed on 09/19/11. scheduled a site visit at 9:30 AM on 09/19/11. during conversation, Jesse inquired about endpoint sidewall samples as all soil within piling area will be removed. informed him that as piling were installed to secure surrounding structure and as it may not be installed outside of contaminated zone, the department requires soil samples outside the piles. 09/19/11-Hiralkumar Patel. 9:20 AM:- visited site. met Bill Maniquez from Fleming Lee Shue and Margie Nesbitt from AvalonBay. they were removing tanks from area along the W 28th Street. while reviewing map in Bill's document, found that there were more lots included in the subject site (on W 28th Street) and soil/groundwater investigation performed on these additional lots. but that information was not submitted to the Department. asked Bill to submit results of recent investigation(s). found strong odors in tank excavation area. asked Bill to monitor air quality downgradient from the work area. Bill mentioned that currently they are removing all the tanks from the ground for disposal, but they are not excavating any contaminated soil as still waiting for approval from disposal facility. Bill Maniquez Fleming Lee Shue Ph. (212) 675-3225 (O) (646) 584-2319 (C) email: bill@flemingleeshue.com during site visit, Ms. Nesbitt mentioned that Ms. Loeb is no longer with company and Jon Vogel is the person-in-charge. Jon Vogel AvalonBay Communities, Inc. 275 7th Avenue, 25th Floor New York, NY 10001 Ph. (212) 309-1610 email: jon_vogel@avalonbay.com 09/21/11-Hiralkumar Patel. 2:01 PM:- received call from Jesse. he will submit any investigation reports done after March 2008. he mentioned that total of 17 tanks removed from the entire site (all lots). they are still waiting for approval from disposal facility. once they get approval, they will remove contaminated soil into trucks and transport it off-site, instead of stockpiling on the site. they will remove soil to water table. asked Jesse to collect endpoint soil samples and water sample from excavation. suggested him to leave tank excavation area open, if safe, until reviews the endpoint sample results. also asked him to delineate any soil contamination outside the piles installed at the tank areas. asked him to screen soil from surface to water table in all borings and collect soil sample from highest contaminated area (PID/staining/odors). informed him that if no indication of contamination in entire boring length, then soil sample must be collected from right above the water table. asked Jesse to provide update by 09/23/11. 10/12/11-Hiralkumar Patel. received copy of email sent to DEC Austin from Jesse (on 09/28/11). Jesse requested a site visit prior to backfilling excavation in day or two. 10/19/11-Hiralkumar Patel. 1:55 PM:- sent email to Jesse inquiring updates. 2:01 PM:- received email from Jesse. they finished UST removals and now waiting for endpoint sample results. 11/02/11-Hiralkumar Patel. 11:56 AM:- received email from Jesse including only result of endpoint soil samples and a site map showing tank location. no VOC contamination found in any samples except some minor contmaination found in sample C1-BS. some SVOC contamination found in samples. no other information included. no results of any water samples included. 11/14/11-Hiralkumar Patel. 4:09 PM:- sent email to Jesee and asked him to submit complete report for review.

AVALON WEST (Continued) **S108636200**

also asked him to submit reports regarding investigation on additional lots. 11/16/11-Hiarlkumar Patel. 1:51 PM:- received call from Jesee. asked him about results of water samples. he mentioned that excavations were done to a depth right above the water table and they collected bottom soil samples from excavation. as they did not extend the excavations into water, no water samples were collected. asked Jesee to submit report for excavation work and any investigation reports after Mar. 2008. 11/17/11-Hiralkumar Patel. 10:30 AM:- received email from Jesse including sample result table and site map. he mentioned that samples were collected from test pits for soil disposal characterization done in 2009 and 2011. found very high VOC contamination in samples from testpits TP-19, TP-20, TP-21 and TP-26. as per site map, these soil samples were collected between 10 and 13 ft depth. soil analyticals:
----------TP-19--------TP-20--------TP-21--------TP-26 10 ft 11 ft 12 ft 13 ft
Benzene----------118----------513----------3,820
Toluene----------2,110--------3,890----------5,110
Ethylbenzene----------1,880--------8,150-------13,000-------43,300
Xylene----------14,200-------52,300-------35,300------285,000 MTBE----------472
11/25/11-Hiralkumar Patel. 3:47 PM:- sent email to Jesse and asked him to submit complete report regarding test pit sampling. asked him to submit report by 11/30/11. email copied to Arnold Fleming at Fleming Lee Shue. 11/29/11-Hiralkumar Patel. 5:03 PM:- received email from Jesse. he mentioned that test pit sampling was performed for waste disposal purposes only for use by contractors. one 8-point composite sample was collected for each 800 cu. yard in a grid across the site. the data was not collected for the purposes of site characterization, and no report was generated for this data. 12/19/11-Hiralkumar Patel. 1:58 PM:- received report from Jesse. abstract: - site is located on Block 700, Lots 1, 9 and 18 - lot 1 is located along the majority of 11th Ave, forming rectangle with W 28th street - lots 9 and 18 are located farther east alnog W 28th St - removed total of sixteen (16) 550 gal gasoline USTs - all tanks were approx. 4 ft in diameter by 6 ft in length - tanks were found in four separate areas: Area A, Area B, Area C1 and C2 and Area D - Area A located on the northern portion of lot 1 - eight (8) USTs were found encased in concrete in Area A - Area B located on the southern portion of lot 1 - three (3) USTs were found in Area B - Area C1 and C2 located on the southwest portion of lot 18 - three (3) USTs were found encased in concrete in Area C1 and C2 - Area D located on the south portion of lot 9 - two (2) USTs were found in Area D - prior to excavation, shoring and sheeting were installed to support the sidewalks along 11th Ave and 28th street - in Area A, excavation area is approx. 48 ft by 36 ft and approx. 12 ft deep - in Area B, excavation area is approx. 30 ft by 35 ft and approx. 12 ft deep - in Area C1, excavation area is approx. 45 ft by 45 ft and approx. 12 ft deep - in Area C2, excavation area is approx. 20 ft by 15 ft and approx. 12 ft deep - in Area D, excavation area is approx. 10 ft by 10 ft and approx. 11 ft deep - total of 1,237.79 tons of petroleum contaminated soil was removed - excavation extended down to a depth of approx. 1 ft below the water table - water table was encountered between 10 and 12 ft bg in excavations - endpoint samples were

AVALON WEST (Continued) **S108636200**

collected from excavation sidewalls and bottoms - all samples found clean, except bottom sample from Area C1 where 514 ppb Xylene found less than ----- - recommends to sample existing monitoring wells along the 11th ave side of the site for four quarters groundwater samples were not collected from excavation. 12/20/11-Hiralkumar Patel. 3:45 PM:- spoke with Jesse about excavation of contaminated material found during test-pit investigation. he mentioned that there is a partial basement in the building and contaminated soil in the basement area will be removed. but there will be no excavation in other areas where contamination found. 3:55 PM:- spoke with Mr. Baranello at Avalonbay. Mr. Baranello is the construction manager at Avalonbay. informed him that based on results of test-pit investigation, the department requires further investigation/remediation at the site. he asked to send letter. Andrew Baranello **construction manager** AvalonBay Communities, Inc. 275 7th Avenue, 25th Floor New York, NY 10001 Ph. (212) 309-1611 email: andrew_baranello@avalonbay.com 12/21/11-Hiralkumar Patel. 1:27 PM:- left message for Jesse. 2:15 PM:- sent email to Jesse and asked him to submit following information/document: - whether shoring removed - # of previously installed wells still at the site - scaled map including existing monitoring wells on property, excavation area with endpoint sample locations (as included in USTs closure report), test-pit sample locations, area of proposed basement excavation and its depth and location of soil borings installed in sep. 2007 2:42 PM:- received email from Jesse. he mentioned that shoring was removed shortly after tanks were pulled. he believes that two monitoring wells remain in the sidewalk of 11th Ave and possibly one more on the northern end of the site along 29th street. he will send scaled site map soon. 12/30/11-Hiralkumar Patel. 1:24 PM:- received email from Jesse including a scaled site map. 01/03/12-Hiralkumar Patel. 2:03 PM:- sent letter to Mr. Bernstein and Mr. Baranello requiring soil/GW delineation at location where contamination found during test pit investigation and quarterly groundwater monitoring/sampling for minimum of one year. asked to submit investigation/first quarterly gw monitoring report by 02/29/12. letter emailed to Mr. Bernstein, Mr. Baranello and Jesse. 3:30 PM:- received email from Jesse requesting meeting to discuss the requirements. 3:35 PM:- spoke with Jesse. he mentioned that based on investigation done in 2007, soil delineation has been completed. informed him that in 2007, Fleming Lee Shue installed boring SB-11 to SB-24 and groundwater contamination was found in SB-24 which is in area between test pits TP-18 and TP-19, but there are no borings in area of TP-20 or TP-21. also, as composite soil samples were collected from a test pit, soil profile and exact location of contamination is not available. informed him that the Department is looking for vertical and horizontal profile of the contamination. informed him that an investigation will be required by upgradient properties, if contamination is coming from off-site. Jesse mentioned that a temporary well should be installed as the wells will be destroyed during construction. informed him that the department may require additional rounds of groundwater sampling, so if they can install temporary wells with proper screen depth which allows survey and resampling, the department may agree with that. Jesse will talk to their client and call back. while reviewing the scaled site map with all boring/well locations, that Jesse sent on 12/30/11, found that soil borings/well points SB-1 through SB-10 were installed on lot 9 and 18 during 2007 investigation. 3:57 PM:- spoke with Jesse again and asked him to submit complete data for

AVALON WEST (Continued) **S108636200**

investigation done on lot 9 and 18. 4:22 PM:- sent email to Jesse and asked him to submit results of all environmental investigations done at the site (including all lots). email copied to Mr. Bernstein and Mr. Baranello. 4:24 PM:- received email from Jesse including copy of Remedial Investigation Report which includes details about borings SB-1 through SB-10. abstract: - the site will be developed with two connected buildings: building 1 will be a 27-story tower along 11th Ave and building 2 will be a 13-story building on the northern side of W 28th Street - it will be residential buildings with 678 apartment homes - rentable retail space will be available on the first floor - upto 400 below-grade parking spaces will be present in the cellar - total of twenty-four (24) soil borings (SB-1 through SB-24) were installed to depths ranging from 3 ft bg to 20 ft bg - with exception of boring SB-8, two soil samples were collected from each boring: one sample at the surface between grade and 2 ft bg and one sample based on field observations (at the hight PID or directly above groundwater interface or at refusal) - refusal was encountered before groundwater in borings SB-2 (at 7 ft bg), SB-4 (at 8 ft bg) and SB-8 (within 1 ft bg) - groundwater samples were collected via installing a one-inch temporary wells at borings SB-3, SB-6, SB-7, SB-9, SB-10, SB-11, SB-12, SB-14, SB-18, SB-19, SB-20 and SB-24 - groundwater found between 6 and 14 ft bg - found strong petroleum odors and high PID readings found in borings SB-9 (155 ppm at 7 ft bg), SB-12 (250 ppm at 14 ft bg), SB-16 (from 5 to 8 ft bg) and SB-18 (from 4 to 8 ft bg) less than --------- - observed petroleum-contaminated soil and groundwater (slight to strong petroleum odors at water table; slight sheen on groundwater sample) associated with three 550 gal USTs that are located in the southeastern section of the parking lot fronting 11th ave - found only Xylene (465 ppb at 14-16 ft in SB-12 and 10,000 ppb at 9-11 ft in SB-16) and Ethylbenzene (3,440 ppb at 9-11 ft in SB-16) in soil samples less than --------- - found petroleum and chlorinated compounds in groundwater groundwater analyticals:

AVALON WEST (Continued) **S108636200**

Chloride----------10 discussed with DEC Jane regarding chlorinated compounds found in groundwater samples. DEC Jane will send email to DEC Cozzy. discussed with DEC Austin. after reviewing data, Austin asked for resampling of groundwater in the area where petroleum and chlorinated solvent contamination found. 3:51 PM:- spoke with Jesse and informed him that the department requires groundwater investigation in Lot 18 also due to chlorinated solvent contamiantion. Jesse mentioned that there will be an active SSDS and vapor barrier at the site. he will talk to his supervisor and will call back. 4:13 PM:- received call from Arnie Fleming and Jesse. Mr. Fleming mentioned that chlorinated solvent contamination has been found on other sites in neighbourhood, as they worked on multiple projects in area. Mr. Fleming suspects Evan Auto Inc. (located at 319 10th Ave, Manhattan) as the source of chlorinated solvent contamination. Mr. Fleming mentioned that construction at the site will start in approximately two weeks so permanent wells are not possible. Mr. Fleming proposed groundwater investigation via geoprobes. discussed with DEC Austin. he agreed with the proposal of groundwater sampling via geoprobes. 4:42 PM:- spoke with Jesse and Mr. Fleming and informed them that temporary well points are fine for required groundwater investigation along the northern and eastern property line (and also inside the property, if needed) where petroleum/chlorinated contamination was found. Jesse will send a site map with proposed geoprobe locations. 01/05/12-Hiralkumar Patel. 1:31 PM:- due to findings of chlorinated solvent contamination, sent email to DEC Jane with site history and a site map (including sampling results). email copied to DEC Austin and DEC Vought. 3:30 PM:- visited sites on Block 700. also reviewed available tax map, NYC DOB records, DEC PBS and Spills databases and found following: - there are total of 26 lots (1, 9, 18, 27, 29, 30, 31, 32, 34, 36, 38, 40, 42, 44, 45, 47, 48, 49, 53, 54, 55, 56, 57, 59, 60 and 61) on Block 700 - Lots 1, 9 and 18 will be developed by Avalon Bay - total of 15 lots (27, 42, 44, 45, 47, 48, 49, 53, 54, 55, 56, 57, 59, 60 and 61) have common boundaries with the lots that will be developed by Avalon Bay - total of seven open/close spill numbers found on Block 700: 9811167 for Lot 27, 0700172 for Lots 32/34, 0701228/0702824 for Lot 36 and 9008960/0307633/0408382 for Lots 48/49 - total of four PBS records found on Block 700: 2-350281 for Lots 1/9/18 (sixteen 550 gal USTs removed), 2-611326 for Lot 32 (three 275 gal waste oil ASTs in-service), 2-089559 for Lots 48/49 (one 4,000 gal gasoline UST removed in Oct. 2003, one 2,000 gal #2 oil UST closed-in-place in Feb. 2001, one 500 gal gasoline UST removed in Oct. 2003) and 2-611575 for Lot 60 (270 gal waste oil AST in-service) during subsurface investigation on Avalon Bay property in 2007, petroleum contamination was found in soil (at the groundwater interface in smear zone) and groundwater samples in the northeastern corner of Lot 1 and along northern line of western half of Lot 9. this contamination is southwest of the possible source at 524 W 29th Street (Lots 48/49) (spill #: 0307633, DEC Manager: Andre Obligado). Lots 48 and 49 are owned by same company. both lots are leased by Sean Kelly Gallary. spoke with Sean Kelly (212-239-1181) at Sean Kelly Gallary. he mentioned that after leasing both lots, they divided lot 49 in two sections and then sub-leased the eastern section of Lot 49 and entire lot 48 to Peter Blum Gallary. Mr. Kelly mentioned that the former gasoline tanks and associated excavation area was located under the eastern section of Lot 49. spoke with David Blum (212-244-6055) at Peter Blum Gallary. David mentioned that

AVALON WEST (Continued) **S108636200**

there are some monitoring wells installed on the property, but those wells are covered under the floor. there is an active remediation system on-site. during visit, found three monitoring wells on sidewalk, in front of Lots 48/49 (one to the west of entrance to Sean Kelly Gallary, one at the junction of two gallaries and one at the eastern end of Peter Blum Gallary). Victor At West 29, LLC. **owner of Lots 48/49** c/o Victor Homes 3349 Highway 138, Building C Wall, NJ 07719 during subsurface investigation on Avalon Bay property in 2007, chlorinated solvent contamination was found in groundwater samples collected from Lot 9 (eastern half) and Lot 18. while searching for possible source, found an open spill number (0700172, DEC Manager: Ryan Piper) for Lot 32 which is occupied by Evan Auto Inc. the spill #: 0700172 was reported on 04/05/2007 as contaminated soil and groundwater was found on four lots (27, 32, 34 and 38) during subsurface investigation as part of proposed redevelopment. during this investigation, heavy PCE contamination (40,100 ppb) was found in soil from 0-2 ft bg. also, chlorinated solvent contmaination found in groundwater samples. according to the site investigation report dated 12/27/2007: - Lot 27 (507-515 W 28th Street) is developed with a one-story (no basement) nightclub identified as Mystic - Lot 32 (319-321 10th Ave) is developed with a one-story (with basement) auto repair shop known as Evan Auto. basement used for storage - Lot 34 (323-325 10th Ave) is developed as a surface parking lot and is adjacent to the auto repair shop - Lot 38 (504-506 W 29th Street) is part of the auto repair shop and is located beneath the High Line (former elevated railroad tracks) Kadima Tenth Avenue SPE LLC. **owner of Lot 27** Maestro West Chelsea SPE LLC. **owner of Lots 32, 34 & 38** 319 10th Avenue New York, NY 10001 Attn.: Abraham Heby Ph. (212) 265-3088 (917) 597-5371 01/06/12-Hiralkumar Patel. 2:20 PM:- received email from Jesse including a map with location of three proposed temporary well points: one in the northeastern corner of Lot 18, one in southeastern corner of Lot 9 and one in northwestern corner of Lot 9. Jesse mentioned that they will screen soils from these locations and sample groundwater from six temporary well points and three permanent wells on-site. samples will be analysed for VOCs only. based on historical data, need another five temporary well points: one in the area of SB-12/TP-26, one in the area of SB-24, one closer to TP-21 along norther property line (right under the Lot 49), one in the area of TP-23 and one in the area of SB-7. also need to move one well point in the area of TP-20. 2:30 PM:- spoke with Jesse. informed him that based on findings of petroleum and chlorinated solvent contamination in 2007, the Department requires additional temporary wells. 2:36 PM:- sent email to Jesse including a map with changes in proposed temporary well point locations. 3:l4 PM:- received call from Jesse. as the area around SB-12/TP-26 will be excavated down to 12-13 ft bg as part of basement, Jesse asked to eliminate well point in that area. informed Jesse that if the Department receives written confirmation (email) from developer that basement area will be excavated down to 13 ft bg, then no need for well point in the area of SB-12/TP-26. Jesse also asked to remove one well point along the norther property line. informed him that the five well points along northern line is necessary to confirm the previous petroleum/chlorinated solvent data. also asked him to sample soil with high PID/odors/staining. he will talk to developer and will call back. informed him that all samples must be analyzed via 8260 full list. 3:42 PM:- sent email to DEC Jane including a site map with results of soil and groundwater samples

AVALON WEST (Continued) **S108636200**

from Evan Auto Inc. site. email copied to DEC Austin, DEC Vought and DEC Piper. 01/10/12-Hiralkumar Patel. 3:12 PM:- received email from Jesse including a work plan with proposed well locations. he proposed to install seven temporary well points on lot 9 and 18. groundwater samples from temporary well points and permemanent wells on 11th ave sidewalk will be analyzed for target compound list. well points will be installed tomorrow. 01/11/12-Hiralkumar Patel. 10:41 AM:- sent email to Jesse. informed him that analysis must include chlorinated compounds. also informed him that soil must be analyzed if shows any PID/odors/stains etc. email copied to Mr. Baranello, Jon Vogel (jon_vogel@AvalonBay.Com) and Marjorie Nesbitt (menesbitt@eightpointsam.com). 01/13/12-Hiralkumar Patel. 10:55 AM:- received email from Jesse. they installed temorary well points. they also sampled two wells MW-2 and MW-6. well MW-5 could not be located and may have been destroyed. contaminated soils were identified in two borings on north side of lot 9 at depth of 10-11 ft (most likely part of smear zone) and soil samples was collected from both borings. 01/26/12-Hiralkumar Patel. DEC Austin informed that DEC Mike MacCabe in Albany is handling a plume trackdown in area and will work on chlorinated solvent issue. 01/27/12-Hiralkumar Patel. 2:54 PM:- sent email to Jesse inquiring upates. 3:14 PM:- received email from Jesse. he received data this afternoon and will submit report soon. 02/13/12-Hiralkumar Patel. 2:08 PM:- spoke with Jesse. he will submit report in this week. 02/17/12-Hiralkumar Patel. received email from Jesse (at 12:00 PM on 02/16/12) including report. abstract: - installed seven 1-inch temporary monitoring wells on lots 9 an 18, with 10 ft of screen - soils were screened for evidence of impacts using visual or olfactory means and a PID - two borings/temporary well locations tMW-1 and tMW-3, exhibited evidence of petroleum impacts in soils from approx. 10 ft bg extending below the soil-water interface at approx. 12 ft bg - soil sample was collected from between 10 to 11 ft in both borings - groundwater samples were collected from all temporary wells and both existing permanent wells (MW-2 and MW-6) - samples were analyzed for VOCs only soil analyticals: ----------tMW-1----------tMW-3

02/22/12-Hiralkumar Patel. 3:24 PM:- received email from Jesse. they found another 550 gal UST. tank was filled with liquid and was encased in concrete. will collect endpoint samples after removing tank. 3:25 PM:- sent email to Jesse and asked to send site map with tank location. 3:43 PM:- received email from Jesse with site map. tank was found along southern property line on lot 9.
02/28/12-Hiralkumar Patel. discussed with DEC Austin. based on available information, he approved case transfer to remediation. informed him that DEC MacCabe is handling chlorinated solvent issue in area. 11:33 AM:- spoke with DEC MacCabe and informed him about the current sampling data. he has added this site into plume trackdown (# 231078). he asked to send lab data. 11:40 AM:- sent email to DEC MacCabe including site maps for the subject site and Evan Auto. 12:41 PM:- sent email to DEC Austin requesting case transfer.
03/13/12-Hiralkumar Patel. 3:57 PM:- received email from DEC Austin approving case transfer. 03/16/12-Hiralkumar Patel. case assigned to DEC Hussein. *-*-** e designation at site** 4/2/12 - Obligado - Spill transferred to Obligado from Patel. 4/3/12 - Obligado - I reviewed the ground water investigation report. According to the report, petroleum contamination on north portion of Block 9 and solventcontamination on Lot 18 is coming from off-site. However, no ground water contour map showing ground water flow direction was provided. I sent a letter disapproving of report and requiring a hydrogeologic investigation to confirm ground water flow direction and a geophysical investigaiton to investigate source of contamination on north side of lot 9. I also requried a new RAWP to address new contamination found on Lot 9 and Lot 18. (previous RAWP only covered Lot 1) I sent a Stipulation Agreement and CAP to the following to be signed and returned by April 24, 2012: Property owner: East Side 11th and 8th LLC, c/o Marjorie E. Nesbitt 445 Park Avenue 10th Floor New York, New York 10022 and developer: Mr. Marty Piazzola Avalon West Chelsea 275 Seventh Avenue, 25th Floor New York, NY 10001 Stips sent via certified mail, certified receipt #s7010 0290 0000 9758 2612 and 7010 0290 0000 9758 2585 4/16/12 - Obligado - DEC met with Avalon Bay, FLS, and AKRF. 4/17/12 - Obligado - Sent a meeting summary email to all parties: This email summarizes our discussions in yesterday's meeting: Participants: DEC: Andre Obligado, Hassan Hussein Avalon Bay - Steven Spiro, Jon Vogel Fleming Lee Shue - Arnie Fleming, Jesse Mausner AKRF - Mark Godick - Avalon Bay is holding a 99 year lease on the property. AKRF is the on-site consultant responsible for field oversight. Fleming Lee Shue provides general environmental consulting. - The Development plans were discussed. Development is progressing quite rapidly. Steel sheeting is being installed to depth of 15 to 20 ft to excavate for a basement on the south portion of the site. Depth of the basement floor will be about 12 feet. Contamination found in vicinity of test pit 26 will be removed during basement excavation. Excavation will require some dewatering and groundwater treatment. A water proofing barrier will be installed under basement. All other areas will have an SSDS system and vapor barrier. - DEC McCabe in Albany is the manager of the up-gradient chlorinated p-site. In my discussions with Mr. McCabe, the source has not been confirmed yet. - The Department is in receipt of the geophysical survey, so this item from the April 4th letter is no longer required by the Department. - Since there were multiple

AVALON WEST (Continued) **S108636200**

potential on-site sources (17 USTs removed), no off-site source has been positively identified, and ground water flow direction has not been confirmed, the Department at the present time considers Avalon to be responsible for the clean-up of north side of Lot 9. - A hydrogeologic investigation will be performed to confirm the groundwater flow direction. FLS/AKRF will gauge and survey one of the existing off-site monitoring wells along 29th ave and add it to the existing 2 wells to determine groundwater flow direction. FLS/AKRF may install one monitoring well on-site to aid in the hydrogeologic investigation. FLS/AKRF will proceed quickly due to the installation of the hydraulic sheeting which may influence the groundwater flow determination. FLS will inspect adjacent properties to north to try to identify evidence of potential sources such as vent pipes. - Potential remedies for contamination of the gasoline impacted soil and groundwater along the north side of Lot 9 were discussed. Due to structural concerns in this area, and short time frame before slab construction, chemical oxidation was the determined to be the most promising remedy. FLS suggested pulsed injection to aid in oxidant dispersion due to tight river sediments. - Avalon is considering proceeding remediation of north side of Lot 9 regardless of source determination. If it is determined the source is off-site, Avalon would seek reimbursement from the Spill Fund. If source is determined to be off-site and Avalon chooses not to remediate this area, than the Department will consider a state-funded cleanup in this portion of the site. - The Department will hold off on the requirement to sign the Stipulation Agreement while the hydrogeologic investigation proceeds. - DEC will schedule a site visit in near future. 4/24/12 - obligado - I emailed Jesse Mausner to inquire about the gw investigation. Response from Jesse Hi Andre - We have a letter report prepared that is being reviewed by the client. We hope to send it over within the next day or two. 5/8/12 - Obligado - Emailed Jesse Mausner to inquire about gw flow investigation. Still has not been submitted. 5/11/12 - Obligado - I received Hydrogeologic and forensic report. 5/14/12 - Obligado - The report includes a ground water contour map showing flow to the west/northwest. The report claims 282 11th avenue is not the source of contamination on the north side of Lot 9. They provided a forensic analysis using BTEX ratios and comparing the BTEX compounds in the source areas to those found on Lot 9. The report points to auto repair operations on 29th street as possible sources as well as the former remediation site at 524 w. 29th st. The report claims the Site didn’t have historic auto repair operations. 5/14/12 - Obligado - I emailed Steve Panter and requested historical sanborn maps of the block, which he provided. 5/15/12 - Obligado - I called Steve Panter of FLS and pointed out to him that the site did in fact have multiple auto repair operations. He revised the report and resubmitted it. Obligado - I emailed Steve requesting boring logs for TMW1, TMW3, TMW4, SB24 and SB9 in Lot 9 to see if there was any impact identified above the water table which could indicate an on-site source in the north side of Lot 9/18. I also asked for a revised contour map becuase the elevations in the table included in the map did not correspond with the elevations in the contour map. Jesse Mausner emailed me a new contour map. He explained the actual contour map was correct but the elevations in the table were not correct. The revised table had the correct elevations. I 5/18/12 - Obligado - I went to the site to look for potential off-site sources. I went to 548 W. 29th Street and asked the mechanic there if they had any oil tanks. He showed me an oil tank in the back

AVALON WEST (Continued) **S108636200**

of the station. The 275 gallon waste oil tank had no lable and had secondary containment had about an inch of oil stained sand. There was evindence of multiple spills on the concrete as well as a fresh spill from a transmission removal. I spoke to the menachic, who says the waste oil company comes once a month to empty the wate oil tank. During that process they lift up the tank and clean the oil soaked sand from the secondary containment. I pointed out the poor housekeeping issues to the manager, Zoar (718-869-4550, who showed up shortly after. They applied speedy dry sand to the spill areas. I also noticed manhole which may be an abandoned tank. This manhole coincides with the location of a 550 gallon gasoline UST from historical sanborn maps. The manhole also is in the vicinity of the vent pipe on the roof. The manager did not know anything about the manhole. Due to apparent PBS issues with waste oil tank and possible abandoned tank, I contacted Moses Ajuko to perform a PBS inspection of the facility. PBS #2-611575, owner: Raba H. Abramov (212) 596 3673. Moses issued PBS violations. It is not clear whether this site is a source for contamination on 282 11th ave. Due to poor housekeeping, stained concrete indicating historical spills,and abandoned gasoline tank it is a possible source. Additional investigation will be necessary. While waiting for Moses to arrive, I spoke to the owner of 542 west 29th Street, which is also listed as an auto repair facility on 1994 sanborn. The site is now a fish packing wharehouse. According to the property owner, John McGuire (212)-268-9169, they purchased the site in 1995. They don't have any oil storage since 1995 and he states there are no tanks on the site. He said prior to the purchase a site assessemnt was performed. I asked if I could get a copy of that assessment and he said the bank probably has it. I will follow up. He provided his contact information (212)-268-9169. I then when to visit the 282 11th avenue construction site. At the site I met Jeff of AKRF who is the on-site environmental consultant. We performed a site walk through. Development is in progress. Steel sheeting has been installed around the basement area of the future building. Concrete pile caps have been installed on east side of site. Jeff mentioned that a test pit was performed on 2/24/12 north of the sheeting and south of 542 West 29th street building. According to Jeff, contaminated soil with strong odors encountered at approximately 4 ft bgs. They continued excavating until 8 feet and very strong odors forced them to stop test pitting due to lack of air respirators and backfill. Jeff said odors were noticable from approximately 100 feet away. I asked him if they reached the water table during the test pit. He replied that they did not. I asked if they could open a shallow test pit in that area for me. He checked with site foreman. There was equipment in the vicinity of the test pit location that would need to be moved. We agreed to post pone until MOnday. 5/21/12 - Obligado - I received a call from FLS. Due to thunderstorms, test pitting postponed. 5/24/12 - Obligado - I went to the site for test pit. 2 test pits were dug behind the 548 west 29th street garage. In both test pits, no PID readings or visual evidence of petroleum contamination in the vadose zone. Strong gasoline odors were present in the saturated zone. This supports FLS assertion that contamination in the north portion of the site is from an off-site source and migrated to the site via ground water. I reviewed the ground water monitoring data for the 282 11th avenue site. No quarterly sampling was performed, only gauging. MW5 was installed but never sampled. I sent an email to Jesse Please perform another round of ground water sampling and collect a ground

AVALON WEST (Continued) **S108636200**

water sample from all existing monitoring wells including any newly installed wells for the hydrogeologic investigation and submit the results within 30 days. He responded back that they sampled MW6 and MW2 in January and they were ND for all compounds. He requested only to sample existing MW5 and newly installed MW7. I concurred. 6/26/12 - Obligado - I received an email from Jimit Shah at DEP OER. : As discussed earlier today, spill-like conditions were encountered at the above referenced site (staining, elevated PID hits, petroleum-like odor, etc) on March 2nd and March 13th 2012 within the south-central portion of the site (within the TP-21 and TP-36 regions: see the attached site map). These conditions are attributed by one of the project's two environmental consultant (Fleming-Lee Shue- FLS) to a 550 gallon UST encountered within the vicinity on February 22, 2012, and removed from the site on February 28, 2012. When clarification was requested from FLS as to whether or not a spill number was called in after the UST and surrounding petroleum-impacted soils were discovered, OER was informed that DEC was made aware of the situation, and that a new number was not called in as this finding is linked to current spill number(s) on-site (06-03351 and 07-00587). I responded that I was not aware of the spill like conditions associated with this tank. I requested the daily reports from OER. Jimit provided the daily reports. I sent an email to Jesse Mausner of FLS inquiring if they collected endpoint samples from the 2/28/12 tank removal and inquired as to the tank contents. Jesse responded they did collect endpoint samples and provided the analytical reports, which showed exeedences of CP51 soil clean-up levels in 3 of 5 soil samples. The UST bottom sample 7ft was the most contaminated with 7 exceednces of CP-51 in ug/kg: ethylbenzene: 19200 isopropybenzene : 4680 n-propylbenzene: 13100 1,2,4-trimethylbenzene: 87,100 1,3,5 trimethylbenzene: 21,300 m,p - xylene: 50,100 o-xylene: 6890 He also provided a tank removal affadavit which said the tank was filled with water and gas. I requested a site map with UST and sample locations, the AKRF field notes, and photographs as soon as possible. Jesse provided the site map and said they would provide additional information shortly. 6/28/12 - I sent a letter to Avalon Chelsea West cc to Fleming Lee Shue which can be summarized as follows 1) The presence of contaminated soil under UST #17 on Lot 9 signified a discharge from that tank and should have been reported to the DEC within 2 hours as per NYCRR Part 613.8. 2) This data should have been included and considered in the forensic analysis submitted 5/15/12 which investigate potential sources of the contamination found on north side of that lot. The Department rejects the Forensic Report as it was based on incomplete data. 3) The leaking UST on Lot 9 is the probable source for the contamination on norht side of Lot 9. A RAWP for the remediation of this area must be submitted prior to foundation slab construction. 4) A Stipulation Agreement is attached to the letter which must be signed by 7/6/12 or case would be referred for enforcement. 5) The Stip includes a CAP which requires submission of a RAWP within 30 days to remediate the entire site. Letter sent via email. 7/12/12 - Obligado - DER Staff met with the developer and consultants. The developer agreed to do a soil boring investigation to confirm whether on-site tanks are source of the petroleum contamination on the north side of the property. Fleming Lee Shue plans to submit a RAWP for chemical oxidation injection system beneath building on the north side of the property. The developer submitted geotechnical reports which they say support their

AVALON WEST (Continued) **S108636200**

claim that excavation in not feasible. DER Staff forwarded the reports to technical support staff in Central Office. DER stated no objection to continued construction on condition that contaminated area north of the sheeting is accessible for additional investigation and remediation. 7/17/12, - Obligado - DER Staff was involved in a conference call between OER, Fleming Lee Shue (FLS), and AKRF. FLS and AKRF will provide daily reports to the DEC and OER on site activities. DEC informed FLS that the Department is only to be notified of spill in case of discovery of new source such as a tank, leaking drum, etc. In the call, AKRF notifed DEC that a crushed drum was discovered during excavation which contained about 5 gallons of oil. DEC requested identification of product. 7/27/12 - Obligado - Excavation for the building basement is on-going at the site. Slab construction on the east and north portions of the site is on-going. Central Office Technical staff reviewed a Geotechnical Report submitted by Muesler Rutlidge regarding feasibility of excavation north of the sheeting adjacent to buildings. CO technical staff agreed with the conclusions in the report, that excavation north of the sheeting was not recommended. A letter report documenting soil sampling north of the basement sheeting was submitted by FLS to the Department. 8/22/12 - Obligado - DER Staff reviewed the results of soil and ground water investigation along the sheeting line outside the proposed area of excavation which revealed benzene concentrations in ground water in excees of 6000 ug/L down gradient of the former USTs. The investigation confirms the on-site USTs are a source of the petroleum contamination in ground water. DER sent another Stipulation Agreement to the RP for signature within 15 days with the requirement to submit a Remedial Action Plan to remediate the entire site. 9/17/12 - Obligado - DER Staff received a fully executed Stipulation Agreement. According to the Corrective Action Plan, the due date for an amended RAP is 9/24/12. 10/5/12 - Obligado - DER Staff completed its review of a Revised Remedial Action Work Plan. DER staff disapproved of the plan and sent a comment letter to Avalon Bay with the requirement to submit a revised plan within 15 days 10/15/12 - Obligado - DER Staff met with the RP and their consultants to discuss the Department concerns. Based on the discussions, Avalon will submit a revised RAWP. 11/5/12 - Obligado - DER approved a RAP for chemical oxidation. 1/30/13 - Obligado - DER Staff met contractors and consultants on-site to inspect the progress of remediation. The foundation slab on the south portion of the site is nearly complete. The midrise building is under construction and at the 4th story. We did a walk through of the remediation area. The consultants showed me the injection and monitoring wells that were installed. They are having difficulties due to congestion with all the construction. They need to reinstall wells that were destroyed and install one more well in a location that was not accessible. They anticipate injection in February. 9/12/13 - Obligado - Update from Steve Panter - As you know, we completed the chemical treatment on May 16 and were waitinguntil the oxidant fully reacted. Recent monitoring (no sampling, groundwater parameters only) has shown that the oxidation reaction is complete. Consequently, we plan to complete the post-treatment soil and groundwater sampling in the next one to three weeks. MW-7 and MW-3 were destroyed due to construction. We plan to sample groundwater and use one of the injection wells (IW-3 or IW-5) in lieu of MW-3. MW-7 and MW-3 will be re-installed (MW-3 if possible) and sampled during quarterly groundwater sampling. Please contact me if you have any questions or comments. 10/11/13 - Obligado

AVALON WEST (Continued) **S108636200**

- Update from Steve Panter: We are planning to collect the post-treatment groundwater samples next Tuesday and Wednesday of next week. On Thursday and Friday, we plan to re-install the two monitoring wells damaged during construction, MW-3 and MW-7. We will also collect the post-treatment soil samples at that time (in the two soil ports) and seal the three injection wells with leaders that extend to the bike room. We plan to re-install both wells with flush-mount casings. Re-installation of MW-7 requires a smaller rig that can fit between the corridor walls that now frame that location. This limits the drill rig's power, and means we may have difficulty getting to the desired depth. We will attempt a 1-inch-diameter well in this location with a 10-ft pre-pack well screen to increase the chance of getting to depth. If not successful, we may have to install a 1-inch-diameter well with no sand pack. The attached photo shows the location of MW-7 as it appears now. MW-7 will go near the cart in the back of the photo. Bear in mind the schedule is subject to change due to ongoing fireproofing. 1/16/14 - Obligado - I reviewed the Remedial Action Report, submitted by Steve Panter. The report documents the in situ chemical oxidation. Treatmetn began on May 9, 2013 and complete don May 16. In total 35,432 gallons of oxidant mixtrue as injected through 5 injection well. The oxidant mixture consisted of 72,732 lbs of sodium persulfate and 33,652 lbs of 100% sodium hydroxide solution to activate the persulfate. Following treatment, soil samples were collected from pre-installed sample ports. All soil samples met CP51 soil cleanup objectives. Following treatment, gw impacts above TOGs still remain. Maximum BTEX is 1185 ug/L in MW4. The report request spill closure. I called Steve Panter and requested continued ground water monitoring for at least 2 additional quarters. 4/7/14 - Obligado - I reviewed the Quarterly monitoring report. BTEX concentration continue to decrease as a result of remedial actions. According to the report, benzene concentration decreased more than 96 percent reduction within the treatment area. Groundwater conditions remain favorable for continued microbial degradation given the available sulfate, favorable ORP, pH, and increasing dissolved oxygen levels. The number of wells where concentrations reached non-detect levels increased by three in the current period. According to Steve Panter, the next sampling event is May 5. 6/18/20 - Obligado - I reviewed the May 29 2014 quarterly sampling report. Teh report documents post remedial groundwater conditions 12 months after oxidant injections. Significant BTEX reductions have occurred. Reductions in total BTEX in ug/L are as follows: MW4: Pre-treatemnt 3976, Post treatment - 371, MW3 : Pre-treatment 12,244, Post treatment 565 MW10: Pre-treatemtn 236, Post treatment 65 MW1: Pre-treatment 4794, Post treatment 46.3 According to the report, MNA monitoring parameters document dissolved oxygen levels have increased 7 fold in the treatment area. According to the report, the weight-of-evidence for geochemical parameters suggests a shift in favor of increasing aerobic degradation. This spill is closed based on: 1) Significant reductions in groundwater contamination 2) Following treatment, soil samples were collected from pre-installed sample ports. All soil samples met CP51 soil cleanup objectives. 3) Removal of 17 USTs 4) REmoval of 1,779.8 tons petroleum-contaminated soils. 5) Installation of a vapor barrier and SSDS as per NYC OER requirements. 6) MNA monitoring demonstrate conditions are favorable to continued attenuation, and decreasing trends are expected to continue 7) Spill has been remediated to the extent feasible 8) No apparent off-site migration"

DEC Memo:	"7/14/06 - Raphael Ketani. The contaminated soil was found on 6/27. I tried calling Jeff Bohlen of Envirotract (631) 471-1500, but could only leave a message. 7/18/06 - Raphael Ketani. I could only leave a voice message. 7/19/06 - Raphael Ketani. Jeff of Envirotrak called to say that they are preparing the phase I and II report for DEC. There is a tank field with 8 USTs and another with 3 USTs. There is soil and groundwater contamination. They are negotiating with the owner to remove the tanks. However, one set of tanks can't be removed and will be abandoned in place as it is under the lift that brings the cars to the upper floors of the garage. 8/7/06 - Raphael Ketani. Today, I received the July 21, 2006 Phase II Environmental Site Assessment Report from Envirotrac (631) 471-1500. Soil samples with exceedences of the TAGM are GP-1 (SVOCs only), and GP-2 (total xylenes). Groundwater samples with TAGM exceedences are GP-4 (many VOCs), GP-5 (many VOCs), and GW-1 (only MTBE). They recommend removing the 8 USTs, the soil, and the groundwater. The report didn't have a site map showing where the borings were done. They, also, don't mention whether they checked the areas of the remote fills or the pump islands for contamination. They need to do borings and sampling in these areas. They need to revise their PBS record if they remove or abandon in place the tanks. As the phase II investigation found gasoline contamination of groundwater, I am transfering the case to Koon Tang. 8/21/06 - Mr. Jeff Bohlen from Envirotra, 613-471-1500. They will tell the RP that DEC requires full delineation of contaminated soil and GW. The source of the spill has not been characterized. He mentioned that teh tanks are still in the ground, abandoned with water/oil mixture in them. Don't know if there is contaminated soil around the tank or pipings acting as a source to contaminate the GW. Told Envirotra to send in a RI report so I can prioritize the spill. - KST 10/18/06 - (KST) reviewed the Phase 2 and provided the following comments to ENvirotrac. Comments on the Phase 2 Report: 1) The write-up should provide more detailed discussion on the results. Need to know the depth of each soil samples, depth to groundwater, some discussion of the site geology. Are the USTs actively used? If not, what happened to the dispensers and fill port? 2) Data gap at the fuel dispensers and along the fill port and fill lines of the USTs. Should have taken soil and groundwater samples along these possible release points. 3) Detection limits (DL) should have been reported on the data summary table. Without the DL, DEC can not tell if the non-detected (ND) is below the regulatory guidance numbers or the lab instrument was masked to see the contamination. Looks like many of the soil samples could have VOCs over the TAGM numbers based on the lab reported DL. 4) Need boring logs describing the lithology as well as visible/olfactory observation. Based on the data in the report, the level of contamination is low and your

PARKING GARAGE (Continued) **S108057815**

recommendation of USTs removal and end-point samples is an acceptable means to ascertain if further remedial work is needed. Pls revise the report to address all the comments above and proceed with the tanks removal. 09/11/07-Hiralkumar Patel. another spill reported at site. case closed. will be investigated under new spill number. refer spill #: 0700587."

Remarks: "FOR A REAL ESTATE TRANSACTION DID BORINGS AND FOUND SOME CONTAMINATION:"

DEC Memo: "UNCOVERED 55 GALLON DRUM DURING EXCAVATION, CONTAINS MOSTLY SLUDGE, SOIL IMPACT IN AREA. 3/19/13 - Obligado - DER Section C Staff met to discuss a closure of Spill No. 1203735. After the internal discussion, the request for spill closure was approved based on the following: - An abandoned drum was discovered and removed during a excavation for a building construction. - The endpoint sample from below the drum met CP-51 unrestricted soil clean-up levels. - Based on the endpoint sample, the drum does not appear to have leaked petroleum. This spill is closed. "
Remarks: "UNCOVERED 55 GALLON DRUM DURING EXCAVATION, CONTAINS MOSTLY SLUDGE, SOIL IMPACT IN AREA."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 2/7/2012 - changed Lead DEC from Joe O'Connell to JFeng. Toni Watts is the NYCT case manager. Her phone is (646) 252-5939. Her e-mail is Toni.Watts@nyct.com. 2/28/13 - Raphael Ketani. The February 2013 NYCT monthly progress meeting took place today. As part of this meeting, Ms. Watts discussed the 28th Street and 11th Avenue spill. She stated that she tried to research this spill in the NYCT records, but could not find any documentation. So it is unclear where the contamination was found that generated the spill reporting. Later, I searched the UIS database and the paper files in storage downstairs, but I could not find any records. I tried to contact the person who had called in the spill back in 2003, Richard Wetherbee, but the phone number was not in service. 3/27/13 - Raphael Ketani. I investigated whether there had been any spills near the site in the past. I discovered that a Con Ed storage yard at 281 11th Avenue had over 24 spills. These were mostly hydraulic fluid spills. All of the cases had been closed. There is also another spill site, Avalon West Chelsea LLC at 282 11th Avenue. This was some type of taxi or other vehicle service station. It is still an active case and the site is being developed. The responsible parties are remediating the site. The spill that

NYCT (Continued) **S106017729**

caused the contaminated soil could have come from either of these two sites. However, the exact location of the soil boring is still unknown. As such, I am closing this spill case as there is active environmental monitoring taking place at the Avalon site. So there is oversight coverage. The closure will be effective today. "

Remarks: "Soil contamination discovered during boaring at above location."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT E2MIS 121751 THIS INCIDENT IS VOIDED BECAUSE IT IS IN THE WRONG SITE. IT IS REPLACED BY INCIDENT #121761 IN THE W 28 ST SITE. MAKE ALL UPDATES TO INCIDENT 121761. 12/06/98 08:00 HRS KENNETH SCHNORR #64555 REPORTS PALL UNIT ON THE BACK OF TRUCK #40751 LEAKED 2-GALLONS OF TRANSFORMER OIL ONTO FLOOR OF FLATBED OF TRUCK. NO WATERWAYS OR SEWER EFFECTED. SAMPLE TAKEN AND CLEAN UP IS IN PROGRESS. 12/06/98 12:30hrs - Update to spill - In accordance with I&A OS, K. Schnorr #64555, no sample was taken today. Oil spill is from PALL unit and therefore, from last unit (after recycling) that the PALL was used for. Paged ERT - no answer. 12/06/98 13:05hrs - Contacted ERT (Wallace #84274)- need more information about spill - Did oil spill only on truck or also on pavement? 12/06/98 13:10hrs I&A Splicer, M. Reiter #27277 reports spill was on truck 40751 (approx 1/2 gallon) and on pavement at tail gate of truck (approx 1 1/2 gallons). Only historical data available is hard copy displaying 182PPM from before last transformer was recycled - which is V5147 at 56 Hudson St. However, PCB count after recycling should be less. New sample was taken on 11/28/98 after V5147 was recycled. The PCB count on the Nov 28 sample should be the same as for today's spill as it is the same oil. The Nov 28, 1998 sample is waiting for results to be posted. 12/06/98 13:20hrs I&A OS K. Schnorr reports spill was cleaned up 12/06/98 @ 08:15hrs. I&A Cleanup crew was M. Reiter #27277 and J. Jones #48534. Area on truck and pavement was double washed with slix. Original hard copy of 182 PPM was used with 1 barrel of assumed >49PPM waste stream generated and stored in PCB temorary storage area at W. 28 St. Update to waste stream and this E2MIS report pending sample results of Nov 28, 1998 (from V5147 @ 56 Hudson) 12/06/98 13:25hrs ERT phone busy 12/06/98 13:35hrs ERT (Wallace #84274) updated. Cannot take additional sample from PALL unit as requested by ERT. 12/06/98 13:45hrs Chem lab contacted and requested to upgrade status of 11/28/98 sample of vault 5147 56 Hudson St to Emergency sample. Chem lab supervisor, J. Hendrick will look into matter 12/06/98 13:50hrs ERT (Wallace #84274) updated 12/06/98 14:20hrs Astoria Chem Lab supervisor, J. Hendricks reports 11/28/98 sample for V5147 @ 56 Hudson St cannot be found. 12/06/98 15:05 CIG, E. Rowland #43784 updated....A. Johnon #81226 12/10/98 18:00PM No sample results can be found by district I&A or Astoria Lab. Told information to ERT (W. Wallace #84274). PCB count of 182PPM as found on original hard copy (prior to recycling) is acceptable limits to close out job. Cleanup on 12/6/98 was in accordance with 182 PPM even though count is probably lower. Job can be closed out. E2MIS 121761 THIS INCIDENT REPLACES INCIDENT #121751 WHICH WAS ENTERED INTO THE WRONG SITE (MEDS) 12/06/98 08:00 HRS KENNETH SCHNORR #64555 REPORTS PALL UNIT ON BACK OF TRUCK#40751 LEAKED 2-GALLONS OF TRANSFORMER OIL ONTO FLOOR OF FLATBED. NO WATERWAYS OR SEWER EFFECTED . SAMPLE TAKEN AND CLEAN UP IS IN PROGRESS. JUAN MEJIAS JR. #44729 12/07/98 11:00 JUAN MEJIAS ENTERED INCIDENT AGAIN SEE INCIDENT#121571 FOR THE ORGINAL REPORT. JUAN MEJIAS JR #44729 12/06/98 12:30hrs - Update to spill - In accordance with I&A OS, K. Schnorr #64555, no sample was taken today. Oil spill is from PALL unit and therefore, from last unit (after recycling) that the PALL was used for. Paged ERT - no answer. 12/06/98 13:05hrs - Contacted ERT (Wallace #84274)- need more information about spill - Did oil spill only on truck or also on pavement? 12/06/98 13:10hrs I&A Splicer, M. Reiter #27277 reports

WEST 28TH ST YARD (Continued) **S103575143**

spill was on truck 40751 (approx 1/2 gallon) and on pavement at tail gate of truck (approx 1 1/2 gallons). Only historical data available is hard copy displaying 182PPM from before last transformer was recycled - which is V5147 at 56 Hudson St. However, PCB count after recycling should be less. New sample was taken on 11/28/98 after V5147 was recycled. The PCB count on the Nov 28 sample should be the same as for today's spill as it is the same oil. The Nov 28, 1998 sample is waiting for results to be posted. Environmental Detailed Incident Report 12/06/98 13:20hrs I&A OS K. Schnorr reports spill was cleaned up 12/06/98 @ 08:15hrs. I&A Cleanup crew was M. Reiter #27277 and J. Jones #48534. Area on truck and pavement was double washed with slix. Original hard copy of 182 PPM was used with 1 barrel of assumed >49PPM waste stream generated and stored in PCB temorary storage area at W. 28 St. Update to waste stream and this E2MIS report pending sample results of Nov 28, 1998 (from V5147 @ 56 Hudson) 12/06/98 13:25hrs ERT phone busy 12/06/98 13:35hrs ERT (Wallace #84274) updated. Cannot take additional sample from PALL unit as requested by ERT. 12/06/98 13:45hrs Chem lab contacted and requested to upgrade status of 11/28/98 sample of vault 5147 56 Hudson St to Emergency sample. Chem lab supervisor, J. Hendrick will look into matter 12/06/98 13:50hrs ERT (Wallace #84274) updated 12/06/98 14:20hrs Astoria Chem Lab supervisor, J. Hendricks reports 11/28/98 sample for V5147 @ 56 Hudson St cannot be found. 12/06/98 14:30hrs ERT (Wallace #84274) updated Logger: A. Johnson #81226, I&A South 12/06/98 15:05 CIG, E. Rowland #43784 updated....A. Johnon #81226 7/11/02 R. Colanero #26498: Added notification info. from voided incident #121751, MEDS "

Remarks: "A PALL UNIT ON THE FLAT BED OF TRUCK NUMBER 40751 FAILED CAUSING THE SPILL.CLEAN UP IS COMPLETE. CON ED 121-751"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 151323 On 12/1/03 at 17:25 W. Zuk # 85848 of W. 28 st transportation reports a spill of gasoline. He states that at 17:15 1 qt. of gasoline spilled from the back of a contractors vehicle (Transclean) onto the ground. This was near a 3' square drain that previously had a baricaides (a board with rubber seal that was provided by Transclean) around it. However about 8 oz has leaked past & into the drain. Additional diapers were put down around the drain. The spill has stopped at this time. He also says that in this 3' drain there is about 60 gallons of water. Wilson Renalds of Clean Harbors will have a truck & crew to drain & clean the liquid that is still in the drain. They should be on location at 8 pm. There was no fire or smoke involved. No private property was affected. No injuries were related to the spill. Weather conditions do not contribute to the hazard of the spill. Update 12/12/03 Cleanup completed by Clean Harbors on 12/01/03 @ 2230."
Remarks:	"8 oz of gasoline leaked from a box truck into the sewer but it is now contained and no more is leaking out."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #146784: 1/17/2003 @ 11:40 At 11:15 Reiter # 27277 of I&A reported to me that while doing switch repairs he discovered in V-853 approx 5 gallons of dieletric fluiid in the structure as the result of a Bottom Leak. He was working on Feeder 13M53. The location is at 628 W.28 st & 11 Av. No fire/smoke was involved, no injuries, weather did not contribute, No private property was affected. No substantial cracks observed, no sump verified, no sewer connection as per Conduit plate # 22-C-3. There is Dieletric filled equipment in the structure. The source of the spil is the Tranformer and the cause is a Bottom leak. Environmental tag # 18352 was hung. Two samples for PCB and ID will be taken and courier called for pickup. Chain of Custody # BB 04312 will be used for this incident. Baloneys and absorbent pads placed around the Transformer and contained the spill. The Feeder is being requested taken out of service OOE / 2 to schedule cleanup. Equipment is a Westinghouse year 1961 with Serial # 2200389 with a capacity of 290 gallons and 13 PPM as per Cindy . It is a Class v-4 and 500 KVa. 1/17/2003 @ 12:27 hrs I spoke to Shift Manager M Barry in the Manhattan Control Center and he informed me that as of now due to contingencies on this network, this Feeder 13M53 can not be scheduled at this time to be taken out of service. Analysis indicates the presence of a substance similar to a dielectric fluid. Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Program:	BCP
Site Code:	477443
Acres:	0.51
HW Code:	C231082
SWIS:	3101
Town:	New York City
Record Added Date:	01/02/2013
Record Updated Date:	12/31/2014
Update By:	BXANDERS
Site Description:	Location: The site is located at 514 - 520 West 28th Street in New York City, New York County and has an area of approximately 0.51 acres. It is between 10th and 11th Avenues and is bounded to the north by West 28th Street and the south by West 27th Street. Commercial structures are adjacent to the east and west boundaries. Site Features: Presently, the site is undergoing redevelopment. Prior to remediation and redevelopment, the two lots that made up the site contained a vehicle rental company and a scrap yard. Current Zoning and Land Use: The site is zoned commercial (C6-3) and is located in a commercial and residential area of the West Chelsea section of the Borough of Manhattan. Past Use of the Site: The site has been occupied by several residential structures, laundry cleaning, metal

514-520 WEST 28TH STREET (Continued) **S112818548**

works, manufacturing, motor freight storage, automobile repair and a scrap yard. Site Geology and Hydrogeology: Prior to remediation, subsurface material present below the site included historic fill from prior developments that may have been used to stabilize soil or to elevate the existing ground. The fill included concrete, brick, cinders, and other construction debris mixed, silt, sand and gravel and was generally present from 1-10 feet below ground. Below the fill the shallow subsurface soil at the site consists of sands and silts, glacial till intermixed with lean clay. Depth to bedrock ranged from 15 to 25 feet below grade. The surface geology of Manhattan generally includes very thin layers of unconsolidated glacial deposits underlain by bedrock. Groundwater at the site is encountered at approximately 8 to 11 feet below ground surface. Regional groundwater flow direction is westerly toward the Hudson

Env Problem: Soil: Investigations found no evidence of significant VOC contamination in soil. Trimethylbenzenes and xylenes were present in one of the 21 soil samples at concentrations above their unrestricted use SCOs, but well below residential use SCOs. PAHs were observed in about half of the samples at concentrations indicative of historic fill. Metals are also present in soil at concentrations typical of historic fill and urban background. However, mercury concentrations ranged from non-detect to 69.6 parts per million (ppm). The unrestricted use SCO for mercury is 0.18 ppm; restricted residential is 0.81 ppm. The entire site has been excavated beyond the site boundary on all side and and to bedrock over about two-thirds of the site. The remaining soil meets unrestricted SCOs for all constituents. Groundwater: Cis-1,2-dichloroethene (DCE) was found in groundwater samples from two wells near the north-west corner of the site at concentrations up to 260 ppb. DCE has been documented in up-gradient groundwater and is not due to an on-site source. Soil Vapor: The presence of chlorinated VOCs in soil vapor and groundwater presents the possibility of vapor intrusion to future on-site buildings. The maximum concentrations of tetrachloroethene (PCE) and trichloroethene (TCE) were detected along the west boundary at the respective concentrations of 308 micrograms per cubic meter (ug/m3) and 828 ug/m3. The site has been excavated to below the water table and the new on-site building will have a water vapor barrier USTs Two USTs were exhumed in August 2013 and disposed of off-site. Two more wells were removed during the site remediation activities.

Health Problem: The site is fenced and covered by concrete, people will not come into contact with site related soil and groundwater contamination unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains its water from a different source not affected by this contamination. Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air or buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site related contaminants due to soil vapor intrusion does not represent a concern for the site in its current condition.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no. 157318: Derwin L Rush 18319, Auto A Mech. Reports that in process of doing repairs to Veh60470 at the location of W 28 st vehicle repair center. Found that 60 gallons of hydraulic fluid was leaking from hydraulic system to concrete floor. He goes on to report that the reel boom had to be moved and that the only way to move it was to engage P.T.O (Power Take Off). He also states that up until this time was not able to find source of leak. And upon discovery of source vehicle was shut down and repairs are being made and a clean up is in progress at time of this report @20:50 hrs. Also take note that this vehicle was involved in an incident @13:30 hrs on 02/19/05 as well and that a Clean was done at this time also (Incident 157316) and complete @ 14:00 hrs. Hence making this a new spill. Clean up is complete, and repairs are being made."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT REFERRED TO SAM ARAKHAN OF HAZARDOUS MATERIALS UNIT. E-mail message from Lisa Lukshides, Con Ed ERT: The oil (approx 1 gal) came from an unknown source. Everything that was contaminated, flush truck and vault were all double washed. One of the ERTs visited the flush pit and it was determined that the oil remained in the pit and its holding tanks and no oil was discharged into the sewers. All material was disposed of as pcb contaminated. Clean up complete 2 Nov 97. CON ED E2MIS NOTES 10-26-97 21:25hrs. Approx. 1 gal of unknown oil and 100 gals.of water in MH #33860 The spill is contained, no waterways or sewers affected. Sample taken and tag installed #10071 11-01-97 19:35 Cleanup done as <1ppm. Astoria informed of possible contamination of foul oil truck. Astoria reported no liquid was picked up from this location but that cleanup was done by flush truck. This was confirmed and the flush truck reportedly quarantined in the W28th St Yard. Flush truck was dumped in Flush pit at approx. 09:00 on 10-3 -97 Control Center was directed to notify CIG of possible PCB spill into sewer. 11-02-97 19:48 Flush Pit closed off 11-02-97 20:25 ERT advises no need for chemist. All action should be based on lab results showing 75ppm 04:00 ERT was at Flush pit and has ruled oil is contained to Flush Pit "
Remarks:	"ORIG SPILL OCT 26TH-CON ED CALLED IN 1 GAL OIL TO 100 GAL WATER SPILL. GOT TEST RESULT OF LESS THAN 1 PPM PCB. CON ED THEN DUMPED MIXTURE IN A FLUSH PIT AT ABOVE ADRESS. GOT A SECOND TEST BACK SAYING IT HAD A 75 PPM PCB READING. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL site address in UIS was entered as 281 WEST 28TH STREET; changed this to 281 11TH AVENUE; Con Edison's Westside Service Center is located west of 11th Avenue and north of West 28th Street. 3/16/95: Soil samples collected from boil boring B-1 adjacent to tank by MEG. Results reported by EcoTest Labs on 3/30/95 indicate concentrations of lead above standards. Also flashpoint at 37 deg C (99 deg F). Additional results reported 4/19 for high BTEX cocnentrations. 1/24/97: Con Ed submits site investiagtion report. Four groundwater monitoring wells were installed. No free product in wells, but high concentrations of BTEX in soil and groundwater (exceeding groundwater standards). Con Ed proposes to continue quarterly groundwater monitoring/sampling to develop baseline data. 9/16/97: Con Ed submits copy of work plan dated 6/17/96 prepared by CEH/Jacques Whitford for the previous site investigation. 9/30/97:

WESTSIDE SERVICE CTR (Continued) **S104496019**

TRANSFERRED FROM KATZ TO O'CONNELL. 11/10/98: Site visit to observe tank removal. Soil on walls of excavation appeared dark - there was petrol odor in vicinity but pulled tank had been placed upwind of excavation. There is gw in hole. Slight sheen on water. Sidewall samples to be collected, but no bottom samples since concrete pad is to remain for new tanks. If soil results come back high, may required additional excavation. (CAE) 10/2/00: Con Ed submits UST closure report, which consists of Pre-Closure Assessment conducted by in 1996, and post-excavation sampling results (circa 11/98). 1/11/01: Letter to Con Edison - review of quarterly gw sampling results for last 3 years indicates dissolved oxygen and redox potential measured in gw does not support natural attenuation, as suggested by Con Ed. Request expanded well network and tidal influence study, as well as remedial alternative study. (KMF) 3/19/01: Con Ed submits work plan for supplemental investigation. Comment letter sent same day to Con Ed - monor comments related to sampling and analytical methods, etc. (KMF) 3/27/01: Con Ed submits work plan for tidal influence study. 3/29/01: E-mail comments to Con Ed on tidal influence study work plan. (KMF) 4/12/02: Supplemental investigation report and tidal influence study submitted for review. Newly installed well MW-5 was destroyed following collection of initial gw sample. The sample indicated concentrations of MTBE which exceeds groundwater standard. No other VOCs were detected. 4/3/03: Letter to Con Ed requesting well MW-5 be replaced. Also, requested Remedial Action Plan be submitted 30 days following receipt of sampling results. (KMF) 4/29/03: Letter work plan from Con Ed to replace MW-5, and add 2 additional wells. 5/7/03: E-mail from Con Ed indicating that MW-5 had been found undamaged beneath a pile of construction materials. Awaiting approval of work plan for other 2 wells. 5/28/03: Approval granted for installation of 2 additional monitoring wells. (KMF) 12/16/03: Meeting with Mariela Gonzalez. Additional wells have been installed and sampled - still high MTBE and benzene. JWC has submitted draft RAWP to Con Ed proposing ORC injection. She expects to get final to DEC by early January. (JHO) 8/27/12 - 2Q12 groundwater monitoring report saved to edocs 12/5/12 - 3Q12 groundwater monitoring report saved to edocs; did not have access to/could not sample MW-2; recommended continue to monitor (JOC) 1/31/13 - 4Q12 groundwater monitoring report recommends continued monitoring (JOC) 3/5/13 - followup from Con Edison project manager inquired about recommendations from consultant report for 1Q13 sampling - advised that DER has no objection to not performing 1Q13 groundwater monitoring event (JOC) 5/31/13 - received 1Q13 monitoring report; sampling conducted on March 18th for MW-1 and MW-2; VOCs are ND in MW-1, MTBE less than TOGS criteria in MW-2. Recommends continued monitoring of Mw-1 and Mw-2 (JOC) 7/8/13 - received 2Q13 monitoring report; sampling conducted on June 24th for MW-1 and MW-2; VOCs less than TOGs criteria in MW-1, 9.6 ppb isopropyl benzene in MW-2 and MTBE and n-propyl benzene less than TOGs; report recommends continued monitoring of MW-1 and MW-2 (JOC) 3/4/14 - received 4Q13 monitoring report; recommends continued monitoring of MW-1 and MW-2. Briefly discussed with Con Edison PM on 2/26. (JOC) 2/10/15 - received 4Q14 monitoring report; recommends discontinuing monitoring; report under review (JOC) 4/20/15 - file review/summary - Con Edison s Westside Service Center is a multi-purpose facility used to support the operation and maintenance of energy distribution systems throughout the area. Included is a vehicle fueling facility roughly in the middle of the property which historically had two 4,000 gallon

WESTSIDE SERVICE CTR (Continued) **S104496019**

gasoline and one 4,000 gallon diesel USTs. The tank area is roughly 600 feet to the east of the Hudson River. The area is zoned manufacturing according to publicly available NYC Department of City Planning information. In preparation for replacing the three motor fuel tanks to comply with 1998 regulatory changes, one soil boring was advanced in 1996 just to the east of the field to evaluate conditions, and impacted soil was identified. Based on the finding, a spill was reported and an investigation was subsequently completed with 8 Geoprobe soil borings around the tank field and the installation of 4 groundwater monitoring wells. Sample results for the two borings completed on the east side of the tank field had exceedances of the soil criteria, with the southern of these two borings showing the most impact including what was described as apparent free product in the soil samples. A well was installed at that location (MW-2). Soil criteria at the time were based on the Department s STARS Memorandum #1. As an additional note on the history, the three USTs in the tank field had successfully passed tightness testing in 1994/1995. The tanks were removed in 1998 along with 191 tons of petroleum impacted soil, and post-excavation sampling was completed. Three of four sidewall soil samples had exceedances of the criteria for VOCs (STARS Memo #1), again with most impacts evident on the east side of the tank field. Groundwater is relatively shallow at the location, and the tank excavation had standing water. Over the course of the site monitoring, ground water depth ranged roughly from 5 to 10 feet below ground surface, depending on the well. Approximately 21,000 gallons of water/groundwater was removed during the course of tank replacement. A light, spotty sheen was noted on the standing water surface at the time of tank removal. The tanks were evaluated and found to be in good condition with no holes. A specific route for release of petroleum from the tank system was not identified. Groundwater at MW-2 was contaminated with petroleum VOCs, initially at 3 to 4 ppm total petroleum VOCs, but no LNAPL was identified. The other wells had minor exceedances, within an order of magnitude of the groundwater standards. In the first few rounds of sampling MTBE was not detected in any of the wells, but then without any specific explanation it was then detected, initially at 7 ppm in MW-2 and at much lower concentrations in the other wells, including the upgradient well. Additional wells were installed to better delineate the area of contamination and monitoring continued. The groundwater flow direction was determined to be predominantly toward the southwest. There were periods when groundwater was lowest that the direction varied toward the southeast. In three wells, hydraulic conductivity was estimated through slug testing to range from 0.4 to 40.9 feet per day, confirming the variability of the subsurface materials, which consists of fill, some sands and clays, and some peat at depth. Subsequent to the tank and soil removal, groundwater contaminant levels showed some reduction at MW-2 but it was felt additional remedial work was warranted. After additional study, 2,200 pounds of ORC was injected in the area of the groundwater plume through 24 injection points. This showed to have some effect, but still petroleum VOC concentrations near MW-2 persisted in excess of standards. Additional soil sampling around the tank field in 2006 found exceedances of TAGM 4046 criteria, the guidance in place at the time, in one boring to the east of the tank field, in the vicinity and upgradient of MW-2, with total petroleum VOCs of approximately 1700 ppm. Since this concentration at this one location seemed

WESTSIDE SERVICE CTR (Continued) **S104496019**

inconsistent with the other nearby historic soil data, which was approximately an order of magnitude less, along with the relatively higher concentrations of benzene in nearby well MW-2 suggested a more recent release. As such, the tank system was tested for tightness and passed. The spill bucket at the fill ports was additionally checked and found to be tight. Pilot testing for a soil vapor extraction/air sparge system was conducted while groundwater monitoring continued. Well MW-2 was re-developed to ensure groundwater samples were representative. Soil samples were collected during boring completion for installation of sparge and extraction points. One point was put in (P-5/AS-1) at the location of the previously identified elevated soil concentrations (GP-13), with more vertical delineation; four samples were collected between 9 feet and 16 feet below grade. Soil exceedances were identified in P-5 in the 9-11 foot interval for benzene (212 ug/kg) and total xylenes (800 ug/kg) and in the 12 foot depth sample for benzene (591 ug/kg) and total xylenes (1692 ug/kg), which is much different from the results collected at GP-13. No explanation for the gross difference between the soil results of these two soils borings, taken in very close proximity to one another, was given. At the time of the latter soil sampling, groundwater samples taken at the same time for immediately downgradient well MW-2 and at P-5 showed very similar results, with most of the petroleum VOCs on the order of 10s of ppb or less. The AS/SVE pilot testing showed some short-circuiting of the system due to the proximity of the tank field (with coarser backfill) when using impacted well MW-2 as the extraction point. Subsequent to the initial pilot test, groundwater results showed a decrease in contaminant concentrations. A separate SVE only pilot test was completed using an extraction point further to the east, which showed a more typical radius of influence. However, based on the more recent soil data results and the groundwater plume being limited in area, and the attenuating groundwater concentrations in the source area, continued monitoring of groundwater was proposed and accepted. In early 2009, 0.2 feet of LNAPL was identified in well MW-2. It was removed and an absorbent sock was placed in the well. At the same time, groundwater results, even within that well, remained consistent with prior results and relatively low in concentration. As such, monitoring continued. It is not clear what was actually observed in the well, or if it was LNAPL, the type of material was not identified. It was not observed again and concentrations continued to decrease. All of the monitoring wells have had 8 quarters of sampling with no exceedances of groundwater standards for petroleum VOCs. Con Edison has requested to stop further monitoring and for closure of the spill. Based on the documentation provided to date, the spill is closed. A letter stating such was sent to Con Edison today, including that monitoring wells should be closed in accordance with the Commissioner s Policy on decommissioning monitoring wells. (JOC) "

Remarks: "DID GROUND SAMPLE TEST, FOUND TO BE CONTAMINATED - ALL SOIL WILL BE REMOVED"

ANTIFREEZE OF APPRX. 1 GAL..WAS CLEANED UP IMMEDIATELY COMPLETE IN 10 MINS...WAS FOUND AT 14:45...COMP....14:55...NO WATER ...WAS CONTAINED DID NOT ENTER WATERWAY OR SEWER SYSTEM.....DR #23349 Chronology: On Feb 11, 1997 at 1445 hrs A. Perez started vehicle 40630 to move it into a parking space. After parking the vehicle and turning off the engine, he got out and noticed anitfreeze leaking onto the pavement from the radiator hose. He put a pan under vehicle to catch any dripping antifreeze and cleaned up antifreeze from pavement with absorbent and pads. About one gallon of antifreeze was cleaned up. No impact on waterway or sewer. #9 notified and report was given to Mr. J. Carroll. Vehicle was turned into transportation for repair."

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 3353.5

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 916

Waste code: D008
Waste name: LEAD
Amount (Lbs): 13581

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 2543

Facility Has Received Notices of Violations:
Regulation violated: SR - 372.2(b)(2)(i),(ii)
Area of violation: Generators - General
Date violation determined: 07/01/2004
Date achieved compliance: 07/26/2004
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 07/26/2004
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 12/21/98: Oil/water separator overflow tank inside transportation garage store room. Excavation about 4' deep, no odor, no visible contamination in soil. Soil is very dry. Tank was 65 to 75 gal capacity. Told them to take endpoint samples. There will only be 2 sidewall samples since 2 walls are concrete. Both USTs for oil/water separator overfill are not being replaced. Pulled covers of oil/water separator - 2ndary containment full of oil. Can't tell how oil got there. Facility will block off all floor drains and remove product from o/w spearator vault. See spill file for site sketch. (CAE) ~~~~~~~~~~~~~~~~~~ E2MIS 122078 12/21/98 14:15HRS -- HOLDING AREA FOR SEPARATER -- TRANSPORTATION -- 281 11AV M.HARTE 95970, CONST-MGMT REPORTS FOUND APPOX 550GALS UNKNOWN FLUID IN ADJACENT CONTAINMENT AREA FOR OIL & WATER SEPARATER. LOCATION IS INSIDE TRANSPORTATION GARAGE (TIRE ROOM). SPILL WAS FOUND DURING INSPECTION BY DEC C. ENGLEHARDT AND R. FITZPATRICK (CON ED). IN PROCESS OF INSPECTING PREVIOUS REMOVAL OF OVERFLOW TANK OF OIL AND WATER SEPARATER THIS VAULTED AREA WAS FOUND CONTAINING UNKNOWN FLUID. THIS VAULTED AREA ACTS AS A SECONDARY CONTAINMENT FOR OIL/WATER SEPARATER. M.HARTE REPORTS UNABLE TO VERIFY CRACKS, SUMP, OR SEWER CONNECTION. CHEM LAB TO TAKE SAMPLE From: Romanelli, Anthony Sent: Tuesday, December 22, 1998 8:13 AM To: Zoeller, Richard Subject: W 28th RICHARD RECEIVED TEST RESULTS FOR PCB ON LIQUID DISCOVERED IN SEPARATOR VAULT AND SEPARATOR. STILL AWAITING RESULTS FOR BENZENE AND HALOGENS. WILL KEEP YOU POSTED ON PENDING RESULTS. TEST RESULTS WILL BE FORWARDED TO YOU. INCIDENT NUMBER 122078. Update 10/17/05, at this time the type of oil cannot be determined, however; it was determined that the separator was the source of the leakage and has been repaired and operating correctly to date. The entire area is cleaned and working. "
Remarks:	"DURING AN INSPECTION FROM DEC CHRIS ENGLEHART, UNDERGROUND SECONDARY CONTAINMENT AREA WAS FOUND TO HAVE THIS OIL/WATER MIX. "

DEC Memo:	"6/15/12-Vought-Daytime duty officer. Spill assigned to DEC Feroze as part of Con Edison minor spill portfolio review and possible closure. Initial EMIS #230053 added to Cross Reference Field, deleted from proxy and added to e-docs. As per EMIS, F. Walker #87547 reports that while moving cable, he discovered approximately 10 gallons of hydraulic fluid had leaked from the backhoe #f92134. 6 gallons leaked onto asphalt and 4 gallons were released into the catch basin. Cleanup is in progress and kitty litter and diapers are in place on the asphalt. G.Pertsas supv will inspect catch basin to verify whether there was a release to a sewer. Transportation, CIG and ERT were notified. Later remarks note, Corrective Action: On 6/15/12 @ 18:36, Supv. G. Pertsas (11653) reports O.S. B. Bamonte (16614) on location with Clean Ventures to perform Hydraulic Fluid Clean-Up in the catch basin at the West 28th Street yard. Approximately 30 gallons including wash water were removed and taken by Clean Ventures. Structure was double washed using 5 gallons of Bio-Gen 760. After Clean-up the structure was inspected and no oil was found. Supv. Pertsas used kitty litter and diapers to clean the asphalt. He generated 2 50 gallon drums of debri. The drums will be classified as Non-Hazardous Hydraulic Oil and turned in to stores @ West 28th Street Yard to have Transportation pick the drums up and ship them to Astoria. 3/26/13 - Austin - Con Ed contained and cleaned up the 10 gal. hydraulic oil spill - See eDocs for further information - Spill closed - end "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 132753: 8/8/00 Mr L. Faro, EH&S, #34079, reported a tar like substance spilled from a gas pipe inside W.28 st hazardous containment area onto a concrete pad. The substance is known to contain 137 ppm PCB's Samples were taken on 8/1/00 and results from Chem lab received on 8/7/00. Mr Faro has made area safe and is arranging clean up. Update 08-AUG-2000 09:50 am Pipe was brought in from field location at 301 West 38th pending analysis. Pipe ends were wrapped with plastic and duct tape and pipe was placed in hazardous waste storage area. Spill occurred when the tar residue inside pipe melted from the heat and leaked past plastic containment onto concrete pad. Spill cleanup overseen by Gary Windman, Manhattan Gas Environmental Coordinator. Spill occurred when the tar residue inside pipe melted from the heat and leaked past plastic containment onto concrete pad. Spill cleanup overseen by Gary Windman, Manhattan Gas Environmental Coordinator. Spill was triple washed and section of concrete with stain removed for proper disposal. Lab Sequence Number: 00-07434 OIL AROCLOR 1242 - 137 PPM UPDATE - August 8, 2000 09:45 Cleanup of spill is complete. The concrete has a small layer of tar still on the surface. Repeated scrubbings with wire brush and degreaser not removing tar. Crew setting up to breakout 18 x 18 square of concrete. On August 8th, gas construction crew broke out 18 x 18 concrete where spill occurred. Concrete was disposed of as PCB/Benzene hazardous waste. "
Remarks:	"TAR LIKE SUBSTANCE LEAKING FROM PIPE. PCB 137PPM. CLEANUP PENDING."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #144803: On 8/30 @ 16:26 HRS D Derasmo # 35379 of SSC reported to me that driver M Stewart # 16223 while in Boom truck # 60162 hit the yellow station by the gas tanks in the W.28 st yard and spilled approx 35 gallons of hydraulic fluid on the asphalt. Sewer/ waterways may be affected because the spill entered the metal boxes that may be connected to our drainage system. On further investigation by company forces, the metal boxes are not connected to the waterways. No sample was taken. The cleanup is in progress at this time. UPDATE 8/30 @ 17:20 HRS Derasmo informed me that the cleanup start was 16:05 and completion time was 17:05 on 8/30/2002"
Remarks:	"line broke on boom truck #60162. spill in process of cleanup by con ed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS NOTES 145512 At 22:45 hrs on Oct 09,200 Mr. Horace Davis #80496 Section Manager Cable Dept. At 28 st yard. 281 11 Ave. reports that on 10/07/09 @ 00:25 hrs That Joseph Napolitano #19711 Mech B of the cable dept. was doing an inspection on Veh60654 And found approx 1 oz of hydraulic oil dripping from under truck On to asphalt. At this point according to Mr. Davis, Mr. Napolitano failed to respond to this Incident. Mr. Davis did however observe that oil absorbent was spread over leak and that it was cleaned up on the same date, but he states it is unknown as to who did the clean up. No samples taken at this spill location No fire or smoke from Veh60654 No sewers or waterways affected from this spill from Veh60654 The clean up is complete, But clean up persons are unknown and furthermore It is unknown as to the time it took to do the clean up,according to Mr Davis."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 152716: w 28 st yard found an oil sheen all over yard appox 1 gal of unknown oil sheen. Went into storm drain. Substance: Unknown Source of spill: Unknown Cause of spill: Unknown Spill on: Asphalt Update: 4/2/04 @ 16:23 hrs. The following is a clarification of this incident based on a review of the audio tapes and the Manhattan Environmental Desk's notification to CIG. At 09:26 hrs. on 3/31/04 Bill Zuk of Transportation notified the Manhattan Environmental Desk (Wally Lee) of a sheen throughout the parking lot at the West 28th Street Work-out Facility. Mr. Zuk stated that he was notified of the spill by Facilities at approx. 09:20 hours. He was asked what the source of the spill was and replied that he didn't know. He was then asked what time the spill was discovered. Mr. Zuk didn't know but asked someone in the yard. He replied that the spill was discovered at 09:10 hours. He also stated that the sheen went into the catch basin. When we learned that the sheen went into the catch basin R. Pellegrino #38620 called CIG at 09:33 hrs. and spoke to Bill Murphy. When he explained the incident to CIG, Mr. Murphy stated that they (CIG) were already aware of the incident. Mr. Pellegrino asked how that could be since we were just notified of the incident from Transportation. Mr. Murphy turned to someone at his

W28TH ST YARD (Continued) **S104503650**

desk to inquire and stated that they were called by Bob Philips (Facilities) directly. Mr. Pellegrino stated that it was great that CIG got the call directly from the site (since the call to the Environmental Desk was 16 minutes after discovery into the catch basin). At 09:37 hrs. Mr. Lee spoke to Mr. Zuk again to get the remainder of the information for the e2MIS report. Mr. Zuk stated that the incident was a sheen and the substance (& source) was unknown. He also stated that the ERT just arrived on location. Based on an e-mail from Paula Jones to Ed Radtke dated 4/1/04 @ 09:52 hrs. the following is information regarding the cleanup: Facilities Management contacted Allstate Power (P.O. 2-22768) to perform the clean up. Allstate performed the clean up. A sample was taken. Chain of custody DD 02391. As soon as the results are in from the Chem. Lab the waste will be disposed of. It was determined the cause of the leak was diesel fuel from truck #40970 (I&A) which is in Transportation for repairs. Manhattan Environmental Desk contacted Bill Zuk of Transportation to get the details of the cleanup. Mr. Zuk stated that Facilities arranged for the cleanup by Allstate and Mr. Delahoz would have more information regarding the details of the cleanup. Closure of this incident is pending details of the cleanup from Mr. Delahoz. 05/21/04 @ 14:15 R Phillips # 78645 of Maintenence Facility reported about this incident that occured at W. 28 St. yard that the final cleanup was completed on 3/31/2004 at 09:00. No solid waste was removed and the type of liquid was removed by Outside Vendor - Allstate Power Vac. Approx 355 gallons was removed. The materials used to clean the strucutre were reported as unknown. Cleanup was done by the Vendor. The source of the spill was Con Edison truck # 40970."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 4/26/04: met on site with Dave Perez (CFS EH&S) - during pre-inspection for audit found old sump that was apparently used to drain former hydraulic lifts. Pit is approx. 4' x 4' x 20' deep. There is sump pump at bottom of trench which connects to the sewer. Dave told me that the oil ID came back as similar to dielectric fluid . I asked him to send copy of lab results, including chromatogram for sample and reference standards for both df and hydraulic oil. The pit was cleaned by Clean Harbors. I aked Dave to have sewer trap checked, cleaned and sealed (since this pit is no longer used). (JHO) 4/27/04: Lab report faxed from Chem Lab indicates results are hydraulic fluid, not dielectirc fluid. (JHO) 02/19/09. J.Krimgold reviewed the e2miss_153047(eDocs). Based on the info provided the release was cleaned up. NFA. ~~~~~~~~~~~~~~~~~~~~ e2mis no. 153047: D. Perez # 80578 of EH&S for central field services called to report that at 11:00 while making an inspecting for an audit at the W. 28 St. yard (281 11 Ave) he found 30 gallons of an unknown oil mixed with 20 gallons of water. He states that the oil is in a pit that was used to catch oil & water that came from an old lift that has been dismatled a few years ago. He does not know where the oil came from of what type it is. The pit use to be connected to piping out to a sanitary sewer, is is unknown if the piping is still intact. Spill in pit in garage at West 28th street. Clean Harbors will be here to clean up today by three o'clock. Chem. Lab to take samples for PCB and ID. "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Sangesland left a voice message asking for more information (what does In Field mean?). Received messsage from Jason Hayes (Ph:212-479-5427) case transferred from DEC Vought to DEC Patel. 03/30/16-Hiralkumar Patel. alternate address: 507-515 W 28th Street PBS #: 2-612265. as per PBS record, the site had following tanks: - one (1) 1,100 gal #2 oil UST, removed in Nov. 2013 - one (1) 250 gal #2 oil UST, removed in Nov. 2013 - one (1) 1,100 gal #2 oil UST, removed in Jan. 2014 other spill # 9811167 was reported on 12/05/1998 as 10 gal of #2 fuel spilled due to overfill. case closed. the subject spill case was reported by Langan Engineering as unknown petroleum observed in field. no other information available. on PBS record, found a letter dated 06/11/14 sent by Langan Engineering. as per the letter, three tanks (two 1,100 gal and one 250 gal) were removed from the site. PAL Env. removed one 1,100 gal and one 250 gal tanks, which were previously cleaned, on 11/01/13. PAL Env. removed the second 1,100 gal tank on 01/22/14, after cleaning it. case closed administratively based on review of available limited information regarding the spill and information on PBS record."
Remarks:	"Observed in field"

DEC Memo:	"1/18/06 - Performed site inspection. Difficulty finding the building as it is currently 261 11th Avenue (inclusive 271). Building sup't Ali provided access to the basement. He was employed by this building management and recalled the spill. He knows the spill amount is a gross overestimation. Noted 2 large aboveground petroleum storage tanks. No oil on floor or adjacent drain/sump. Former spill area clean and took photos. Spill closed. 6/15/05 - No file. DEC Lead changed to Grathwol. Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE "

DEC Memo:	"5/16/16- DEC piper spoke with ECS Eclipse. Spill was in spill pan. DEC directed AG to clean spill today rather than tomorrow. IP & T dispatched later in evening to clean. 5/18/18- DEC piper spoke with Star at ECS. She will provide info and email. DEC piper spoke with Matt S at IP & T. He will look into work and get back to me as well. 5/19/16- DEC Piper received email form ECS starting impact valve was replaced and gas was pumped out by IP & T. I spoke with Matt at IP & T and he confirmed pumpout and repairs were done. Spill closed. "

DEC Memo:	"Sangesland spoke with Carol Owings of Key Environmental. She said the site is an industrial building that had several buried tanks removed. There is contaminated soil on the site that can not be removed, so the area will be treated in place. Key Enviornmental will work on a plan to submit to the DEC for review. Sangesland wrote a

COMMERICAL PROPERTY (Continued) **S108467893**

CSL letter and listed Ryan Piper as the contact for the site. CSL sent to one of the owners: William Cirillo, 33 Tiers St, Apt F, Bronx, NY 10464 5-31-07- EWMA- new contractor. will contact me. 2/6/08- DEC Piper reivewed RAWP addendum and approves. 05/20/08-Hiralkumar Patel. another spill reported (Spill #: 0801913) as found more tanks from site. during excavation, found three approx. 1000 gal size tanks, in middle of property. one tank was found empty and has been removed from ground. multiple holes noted on that tank. another two tanks sitting next to each other and has product in it. contractor will remove tank properly and will take endpoint samples. 09/10/08-Hiralkumar Patel. another spill reported (spill #: 0806482) as found oil coming out from ground in excavated area. 11/14/11- DEC Piper psoke with consultant. Report has been generated and will be sent shortly. 12/20/11- DEC Piper reviewed UST closure report. 5 permanent mw's installed . The wells were set to a depth of 25 feet b.s.g. and constructed with 10 feet of screen and 15 feet of riser. however groundwater is at 7.5- 8 feet bgs. On February 13, 2008 a representative of EWMA sampled MW-1 through MW-5 and MW-27 for VO+10, BN+15 and lead. Sample MW-1 was obtained from MW-1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 471 ppb and in excess of the TOGS 1 ppb standard; and concentrations of toluene at 76.4 and in excess of the TOGS 5 ppb standard; and concentrations of ethylbenzene at 333 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 357 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 99 ppb and in excess of the TOGS 10 ppb standard; Sample MW-27 was obtained from MW-27 (located along 27th Street) and revealed concentrations of benzene at 13 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 11 ppb and in excess of the TOGS 5 ppb standard; Sample MW-2 was obtained from MW-2 (located along 27th Street) and revealed concentrations of benzene at 196 ppb and in excess of the TOGS 1 ppb standard; and concentrations of toluene at 27.7 and in excess of the TOGS 5 ppb standard; and concentrations of ethylbenzene at 243 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 578 ppb and in excess of the TOGS 5 ppb standard. The soil excavated that exhibited fill material type characteristics was transported by truck and delivered to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. The excavated soils, including the soil that exhibited evidence of petroleum impacts from the former USTs were also transported to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. Approximately 3,556 cubic yards of soil was excavated from the Property. In September 2008, and following the initial four foot soil removal additional soil was removed from the site. The additional soil was removed because the original design of the building was changed to include a basement which required the additional removal of soil. Specifically, from September 29th 2008 through February 30th. 2009, representatives of Impact and EWMA coordinated the direct soil load out an additional 22 feet of soil from the Property. This phase of the excavation was coordinated during the installation of steel sheeting, tie backs and foundation piles following the initial excavation of soil to four (4) feet b.s.g. The soil excavated that exhibited fill material type characteristics was transported by truck and delivered to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. The excavated soils, including the soil that exhibited evidence of petroleum impacts from the former USTs were also transported to Total Recycling

COMMERICAL PROPERTY (Continued) **S108467893**

Corporation (TRC) of Allentown, Pennsylvania. Approximately 19,556 cubic yards of soil was excavated from the Property. On May 20, 2008, during the Property redevelopment and the initial upper layer soil removal, three (3) additional unknown underground storage tanks (USTs) were encountered within the footprint and beneath the concrete floor of the former building. One (1) 1,000-gallon fuel oil and two (2) 550-gallon fuel oil USTs were observed during soil removal. The USTs were located in the footprint of the former building. Prior to the UST removal, Mr. Hiralkumar Patelof the (NYSDEC) visited the site, inspected the USTs, and approved the removal of the USTs.Mr. Patel requested that the USTs be properly removed, which included the pumping of liquids,cutting, cleaning and disposing of their contents. Soil samples were also requested by Mr. Patelin accordance with NYSDEC UST regulations and local and state guidelines. W.R.Grace Preprufe 300R/160R membrane was installed as a barrier between sub-grade soils and exterior surfaces of basement slab areas, and between vertical soil retention systems and exterior surfaces of sub-surface wall areas. These membranes are manufactured in accordance with ASTM Standards, demonstrate an ASTM E154 permeance of 0.010 Perms, and are comprised of multilayered composite high density polyethylene (HDPE) sheets. The 300R membrane has a thickness of 40 mils and the 160R membrane has a thickness of 32 mils. Ambient air venting systems are installed beneath the basement slab areas and the slab on grade areas. The basement sub-slab venting system consists of a 12-inch thick bed of -inch crushed stone beneath the slab, an embedded air inlet header with ambient air inlets at one end of the building, and an embedded vent header with venting outlets at the other end of the building. The slab-on-grade sub-slab venting system consists of a 6-inch thick bed of -inch crushed stone beneath the slab with a 6-mil polyethylene vapor barrier and a layer of geotextile fabric between the slab and the stone, an embedded air inlet header with ambient air inlets at one end of the building, and an embedded vent header with venting outlets at the other end of the building. the venting systems will be active, with radon fans and back draft dampers installed in the vent outlet piping at one end of the building at locations that can be inspected, monitored and maintained. The ambient air inlets will receive air from about two feet above ground surface at one end of the building, and the venting outlets will vent air from about twenty feet above ground surface at the other end of the building. The inlet and outlet locations can be inspected and monitored as needed. Together, the barriers and venting systems will provide two layers of vapor intrusion control and will provide a conservative and maintainable vapor intrusion control system that will be an integral component of the planned building. During the week of September 3, 2010, Zebra Environmental Corp. of Lynbrook, New York installed five (5) permanent 2-inch monitoring wells at the property under the direct supervision of a EWMA representative. The intent was to re-install the replacement wells in or near the previous locations. Ground water was generally encountered between 10.0 and 12.0 feet b.s.g. Soil cuttings during installation activities were screened using a PID and split spoon samples were collected every five feet. EWMA did not note visual signs of contamination during the installation of the wells and no elevated PID readings were recorded. The monitoring wells were constructed using two-inch diameter, 0.020-inch machine slot Schedule 40 PVC well screen intersecting ground water at the time of the well installation. Solid two inch diameter Schedule 40 PVC completed the

COMMERICAL PROPERTY (Continued) **S108467893**

upper portion of the well. The connection between the riser and well screen was flush-joint threading with no adhesive required. The wells were filter packed with clean, No. 2 sand from the bottom of the borehole to approximately two feet above the top of the screen. The remaining annular space around the upper portion of each well was grouted using Benseal and cement. The monitoring wells were completed as flush mount wells with concrete pads. On September 20, 2010 a representative of EWMA sampled MW-1R, MW-27R, MW-2R, MW- 3R, and MW-5R for VO+10, BN+15 and lead. The results of the ground water sampling event revealed volatile organic compounds above the NYSDEC NYSDEC TOGS 1.1.1 Groundwater Standards/Criteria in the groundwater samples of four (4) monitoring wells, MW-1R, MW-27R. MW-2R, and MW-3R. EWMA notes that the results of the sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. Laboratory analysis revealed the following: " Sample MW-1R was obtained from MW-R1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 9.88 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 83.9 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 352 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 16.1 ppb and in excess of the TOGS 10 ppb standard; " Sample MW-27R was obtained from MW-27R (located along 27th Street) and revealed concentrations of benzene at 5.11 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 54.3 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 227 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-2R was obtained from MW-2R (located along 27th Street) and revealed concentrations of benzene at 3.29 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 39.9 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 173 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 11.8 ppb and in excess of the TOGS 10 ppb standard; " Sample MW-3R was obtained from MW-3R (located along 28th Street) and revealed concentrations of benzene at 13.4 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 10.1 ppb and in excess of the TOGS 5 ppb standard; " EWMA notes that the results of the September 20, 2010 sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. On October 26, 2010 a representative of EWMA sampled MW-1R, MW-27R, MW-2R, MW-3R, and MW-5R for VO+10 and BN+15. The results of the ground water sampling event revealed volatile organic compounds above the NYSDEC NYSDEC TOGS 1.1.1 Groundwater Standards/Criteria in the groundwater samples of four (4) monitoring wells, MW-1R, MW-27R, MW-2R, and MW-3R. EWMA notes that the results of the sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. Ground water flow is relatively flat throughout the Property however, topographic grade is to the southwesterly direction. Laboratory analysis revealed the following: " Sample MW-1R was obtained from MW-R1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 4.99 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 186 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 808 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-27R was obtained from MW-27R (located along 27th Street) and revealed

COMMERICAL PROPERTY (Continued) **S108467893**

concentrations of benzene at 3.62 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 35.2 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 156 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-2R was obtained from MW-2R (located along 27th Street) and revealed concentrations of benzene at 3.60 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 19.3 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 85.8 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-3R was obtained from MW-3R (located along 28th Street) and revealed concentrations of benzene at 4.33 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 8.66 ppb and in excess of the TOGS 5 ppb standard; " EWMA notes that the results of the October 26, 2010 sampling event did not detect any exceedences in monitoring well MW-5R, which is topographically upgradient and located along West 28th Street. Two rounds of groundwater sample results from the wells indicate that the dissolved ground water contamination at the Property has been significantly reduced. However, groundwater contaminants continue to be present at low levels that exceed the GWQS in the perimeter ground water monitoring wells. Based on the presence of concentrations of contaminants above the GWQS in the upgradient wells, ground water contamination may be migrating on site from off site source(s). Due to the removal of site soils down to 25 feet and the water table, there are no source soils remaining at the site. Therefore, natural attenuation for the remaining residual ground water contaminants is proposed. EWMA recommend no further investigation and closure for NYSDEC Spill Case No. 0613440. The NYCDEP reviewed the Closure Report and the Property was provided with a Notice of Satisfaction. Based on work to date, this spill is closed. see edocs if warranted. "

DEC Memo:	"10/02/08-Hiralkumar Patel. spoke with dispatcher 258 at FDNY. he mentioned that large quantity of diesel spilled in open excavation at construction site. 10/02/08 - Raphael Ketani. Earlier cases are associated with this site and are listed under the Spills managers Ryan Piper and Hiralkumar Patel. They are 0613440-tank failure (active case), 0801913-discovered fuel tanks, 0806482-found oil in ground. The site is block and lot 699 and 9. The owner is 537 West 27 Street Owners, LLC, c/o RD Management, LLC, 810 7th Avenue, 28th Floor, NY, 10019. The site main address is 537 West 27 Street, but alternative addresses are 537-545 W. 27 Street and 538-546 W. 28 Street. The site had a one story garage/service station from old pictures in Property Shark. The site has an E-designation and the DEP contacts are Terrell Estesen (718) 595-4473 and Maurice Winter (718) 595-4514. PBS case #2-610856 lists 6 closed 550 gallon tanks. Two had diesel fuel and the rest had #2 oil. The owner is listed as 537 W. 27 Street Owners, LLC. I visited the site today. I met Leeron Tagger, Environmental Technician from Environmental Waste Management Associates (973) 560-1400/FAX (973) 560-0400. He said that the FDNY was here and left. He said that they showed up because a neighbor had complained about strong odors in the air in their ventilation system. He said that 3 tanks were discovered at the site, two in the center and one in the southeast corner. He said that all three had a hole or two and had leaked oil. Mr. Tagger said that the two tanks that were in the middle of the property were discovered with oil in them. I noticed that they had dug out the site to about 7 feet below grade. I asked him how much more soil was going to be dug out. The construction foreman said that they will dig out to about 12 feet below grade, but groundwater is 10 feet below grade. I asked the foreman where bedrock was. He said it varied between 20 feet to 40 feet below the site. Mr. Tagger stated that they will conduct site

CONSTRUCTION SITE (Continued) **S109372079**

dewatering and collect the contaminated water and filter it for the oil and other contaminants. I smelled a strong odor of diesel fuel. I asked him whether contaminated soil had been removed. He said that some had been removed and that he has a manifest for the soil. I asked him whether end-point samples were taken. He said that they had. I told him that I smelled strong diesel odors and that much more soil will need to be removed. He said that it will. I told him that EWMA will need to submit a report with a sit map showing the locations where the tanks were and where the oil contaminated soil is, manifests for the soil removed, and end point sample results. He said that a report is being prepared for the site right now. I asked him whether the tanks had been registered with DEC. He said that he thought they had been, and that two checks had been sent to DEC, but that I should talk to the project manager, Rob Edgar at (973) 560-1400, ext 159. I took 3 pictures of the site and left. Later, I tried to call Mr. Edgar regarding the need to remove more soil because the odors were strong and because there had been odor complaints from a neighbor. I could only leave a message. However, I did state that the matter was urgent and that EWMA had to institute an odor management/abatement program immediately and to call me back as soon as possible. Mr. Edgar called me back. He said that they already took out 55 truck loads of soil. He said that he has someone on site who is monitoring for fugitive dust and odors. He said that Mr. Tagger walks around with a PID meter and checks the vapor concentrations. He said that, so far, they have not been over the limits. I told Mr. Edgar that it's not just a matter of how high the vapor concentrations are, but also whether the odors are a nuisance. I told him that the vapors got into the ventilation system of a neighbor and there were complaints to DEC. He said that he was aware of this and that there's oil in the soil, so there are odors. He said that's the situation at the site. I told him that not only does he have to get the construction company to remove soil quickly, but that he has to come up with a method of controlling and abating the odors. He suggested covering the affected areas with plastic. I told him that plastic may not be the best method. I told him that I will talk to my supervisor, Randall Austin, Chief of the Spills Unit. Mr. Austin recommended that they use odor suppressing foam to control the vapors and that they come up with an odor management plan. However, he said that plastic can be used as a temporary measure. I called Mr. Edgar and told him that the plastic sheeting can be used as a temporary measure, but that foam should be put down to control the odors while they dig. He said that the construction company doesn't like using the foam. I told him that he will have to come up with some plan to take care of the odors and that the odor control has to begin immediately. He said that EWMA always complies with all environmental regulations and laws. I told him that his company will have to get control of the odors fast and abate this problem, otherwise there could be more complaints and more problems. With that the conversation ended. 10/3/08 - Raphael Ketani. I made an unannounced site visit today at about 2:11PM. I met Mr. Tagger of EWMA and Mark Trashaj of L&M Builders, LLC - foreman for the development company (914) 833-3000. I saw that no digging was taking place, but the crew was laying plastic sheeting over the site where the oil had spilled (see photos in E-docs). The odors at the site were slight, except where the backhoe was sitting. My PID meter registered up to 2100 ppb of vapors at one foot above the soil with a slight breeze blowing. I showed Mr. Tagger and Mr. Trashaj that my

CONSTRUCTION SITE (Continued) **S109372079**

PID meter was detecting up to 2100 ppb of total vapors. They said that the soil which comprises the platform for the excavator is contaminated with oil. I asked them when this soil will be removed and when the rest of the soil will be carted away. Mr. Trashaj said that they can't remove any more soil or else the steel sheet pilings will fall into the site. He said that the next step will be to install holdfasts for the steel pilings over the next two weeks. I told him that the contaminated soil has to be moved. He said that they will keep the contaminated areas covered with plastic at all times and if any gets ripped, then they will replace the damaged plastic. I told him that the contaminated soil which comprises the platform has to be removed next week. He said that this will be done as it doesn't affect the stability of the steel sheet pilings. Mr. Tagger assured me that when they dig, there are many trucks lined up to take loads of soil. He said that they will work hard to remove the rest of the soil after the holdfasts are installed and that they will maintain the plastic covering. After this, I left, but I told them that I will be back next week. 10/8/08 - Raphael Ketani. I spoke to the case manager for the site, Ryan Piper of DEC Region 2 Spills. I debriefed him on what when on at the site the two times I visited it and about the odor complaint. I told him about the installation of the plastic sheeting and that Randall Austin, Chief of the unit, had approved its use temporarily. I told Mr. Piper about the oil contaminated soil that was being used as a platform for the excavator and that no digging will take place over the next two weeks as tie backs need to be installed all around. I mentioned that I had informed Mr. Tagger, Mr. Trashaj, and Mr. Edgar that the contaminated platform soil had to go immediately. Mr. Piper told me to close out this case and refer it back to the active one, #0613440. Therefore, I am closing out this case today and referring it back to the initial spill case that is still active with Mr. Piper."

DEC Memo:	"09/09/08-Hiralkumar Patel. Visited site. Met Mark Trashaj, construction manager. Mark mentioned that as part of re-survey of the site, they need to excavate some soil to expose top of the some installed piles. After finishing excavation, found oil (similar to diesel or #2 fuel oil) coming out from ground. Observed free product and sheen on water collected inside excavation. Also found water in some piles (which are hollow round pipe) at about 25 ft bg and found sheen on water in pile. Heavy odors in the area. Spoke with consultant Environmental waste management associates. He mentioned that spill was reported earlier (spill : 0613440) and DEC Ryan Piper is a project manager. He also mentioned that they removed diesel USTs from the site. Site has e designation. Mark gave copy of DEP approval letter to proceed, dated Dec. 17, 2007 (forwarded to DEC Piper). Mark Trashaj L&M Builder LLC. 1865 Palmer Ave, Suite 107 Larchmont, NY 10538 Ph. Contact Name:	BRANDON NATHE
DEC Memo:	"9/15/15: J.Kann - contacted Brandon of Langan who indicated that a shallow trench was excavated and odors were noted in the soil. The excavation was 30'x2'x1' and were alongside a rail track. The soils were stockpiled on plastic and covered. Endpoints were collected and should be available in 5 days. A sample will also be collected from the stockpile for disposal analysis. No free product was present in the trench. The side is an OER site and the project manager is Shana Holberton. 10/01/15-Hiralkumar Patel. 2:59 PM:- left message for Brandon. 10/09/15-Hiralkumar Patel. 3:13 PM:- left message for Brandon. 10/13/15-Hiralkumar Patel. 1:10 PM:- spoke with Brandon. he mentioned that no contamination noted in endpoint samples. he will submit report once disposal manifests are available, which may take another 2-3 weeks. 12/11/15-Hiralkumar Patel. 12:26 PM:- left message for Brandon. 2:00 PM:- received call from Brandon. he mentioned that they are still waiting for disposal manifests from contractor. he mentioned that the property is owned by MTA and has been leased out. asked Brandon to submit report, except disposal manifest and contact information for the contractor/lease. 12/11/15-Hiralkumar Patel. 3:14 PM:- received email from Brandon including work summary. during excavation of an about 30 ft long, 2 ft wide and 1 ft deep utility trench, historic fill with apparent petroleum-like odors, staining and maximum PID reading of 237.6 ppm was observed. endpoint samples were collected and analyzed. no contamination noted in endpoint samples. Edgar Vidal Tutor Perini Corp. *contractor** PH. (646) 569-4211 email: EVidal@perini.com case closed based on available information."
Remarks:	"found during excavation, field observations. C/u complete, samples pending"

DEC Memo:	"CSL sent to property owner: (copy faxed to Mr Ray Kahn 212-330-7505) Mr. Peter J. Filiberto 327 10th Ave Corp. 45-54 61st Street Woodside, NY 11377 tanks will be pulled. 6/7/08- DEC Piper psoke w. Ray Kahn, They have found 6 ust's filled w. water. They are pumping them out today and will begin removal. endpoints will be collected. 10/1/07- DECP iper reived call from Ray Espo. The excavation has been open for some time now and is not covered. There is gross soil contaminaiton that is being washed down. Investigaiton.work needed letter sent to Mr. Peter J. Filiberto327 10th Ave Corp. 10/9/07- DEC Piper revied subsurface investigation of adjacent property, open spill 0700172. A high rise is going to be built on four lots which includes 321-325 10th Ave. Soil borings revealed no VOC's in soil though BTEX constituents and MtBE were found in GW. Some constituents were under TAGM and some were over, particularily MTBE at 471 ppb at 321 10th ave most downgradient well. The suspect source of the dissolved contaminants are the adjacent gasoline station at 327 10th ave.(This spill site) ********** ********** ********** 10/22/07- DEC Piper spoke with David Lent of IVI Env. They are putting together a work plan. The site will be redeveloped with a high rise. Excavation of the entire site will be part of the project. IVI will conduct a subsurface investigation to delineate the soils and gw. 2/23/16- DEC piper sent info req to 327th 10th Avenue Manhattan LLC 40-54 61st Street Woodside, NY 11377 3/9/16 - Obligado - Desk Duty - I received a call from Mr. Anthony Nicoletti, who works on behalf of the Estate of Peter Filiberto, (516-665-2659, tonick46@yahoo.com) inquiring why he received a letter. He was under the impression that the spill issue has been cleaned up and resolved. I told him the spill was still open and the Case Manager is Ryan Piper who was currently out of the office but

FORMER GAS STATION (Continued) **S108636696**

could be could be contacted directly with regard to DEC requirements. He requested prior violation notices. I emailed him a the prior two CSL letters and a copy of the Spill Report and advised him he could submit a FOIL request if he requested additional information.
2/22/17- DEC piper emailed Anthony Nicolertti requesting site status.
"

Spiller Company: 001
Contact Name: Not reported
DEC Memo: "letter to be sent Last update by JBMCCULL on 12/20/05 - transferred back to R-2 3/5/08 - Austin - Assigned to Ketani for further investigation - end 4/21/08 - Raphael Ketani. The spill occurred on 5/11/89. The UST was filled with water and the top of the tank and the cement were seeping oil. The tank holds #6 oil. Richard Breslow, 559 W. 45 Street, NY (212) 265-4023 was on the original spill report as the spiller. There is no file for the case. I checked Property Shark, NYC Property Tax listings, and ACRIS and found the owners as: 27th Street Property, LLC, c/o Centaur Properties, LLC, 35 E. 21 Street, 3rd Floor, NY, 10010; and Gaiety Investments, Ltd., c/o Hartman & Craven, LLP, 488 Madison Avenue, NY, 10022. The PBS registration is for 536 W. 27 Street. The number is #2-476560. It shows a 5000 gal. tank that was closed, but used to contain #6 oil. I sent CSLs to both 27th Street Property and Gaiety Investments, Ltd. 4/23/08 - Raphael Ketani. Joe Graceson of Centaur Properties (212) 308-4443 called and left his phone number in a voice mail message. I made contact with Mr. Graceson. He said that Centaur is the sole owner. He said that the building uses gas only. The building was bought from Gaiety a little while ago. Centaur has had little cooperation from Gaiety in obtaining old records. He asked for any records that DEC has. I told him we have nothing. He asked what the next step would be if he can't find any information regarding the cleanup. I told him that Centaur will have to hire an environmental company to do an investigation and cleanup. I told him that DEC will need to receive the investigation plan, the site investigation report, the remediation plan, and the remediation report. He said he understood. With that, the conversation ended. 4/28/08 - Raphael Ketani. Steve O'Connell of Hartman & Craven (212) 836-4933 called. He said he represents Gaiety. He said that his company was involved when Gaiety first purchased the property and when they recently sold it. He said that Gaiety has no involvement with the site. 5/28/08 - Raphael Ketani. Mohammed Ahmed of Fleming Lei Shue called and said that he can't find any records or plans showing where the fuel tank used to be. He asked whether DEC had any records. I told him No. He said he will try to put together an investigation plan. He said that he thinks he has a general idea of where the tank used to be. I told him that it may boil down to just doing some geoprobing all over the basement. He said that may be what will happen. 5/29/08 - Raphael Ketani. Mr. Ahmed called. He said that he found a 1 page document from the NYFD stating that the tank was removed. I told him to send the document to me. I also told him that this doesn't preclude doing a soil investigation. He said he understood and that he will send a proposal for the work to be done. I received the Fire Department document by FAX from Mr. Ahmed. 6/3/08 - Raphael Ketani. Today I received the site investigation plan dated 5/29/08 via e-mail from Mr. Ahmed. I reviewed the plan, found it acceptable and e-mail Mr. Ahmed to go ahead with the work. 8/15/08 - Raphael Ketani. In preparation for case transfer, I am annotating the database as regards what needs to be done at the site to resolve the alleged or known environmental contamination. Followup is needed to see whether Fleming Lei Shue conducted the investigation and to get a copy of the report. Mr. Ahmed (212) 675-3225 called me. He said that the report is complete. He said he will send it, but only a little contamination

530 WEST 27TH ST/MANH (Continued) **S104275540**

was found on the concrete slab that used to support the tank. He said the groundwater has a little benzene, but this is not from the tank as it had #6 oil. He said the benzene levels are in the single digits to about 19 ppb. 09/02/08-HRAHMED-Returned Mohamed of Flemming Lee Sue call and left a message to call back. 09/03/08-HRAHMED-Mohamed sent me Limited Site Assessment Report with end point sample analyticles. As per the report, New York City Fire Department (FDNY) records have indicated that the UST has been removed from the Site . 09/24/08-HRAHMED-Met with Mohamed of Flemming Lee Sue. No visual sign of affected drain or pit, no odor noticed. The openning of the basement is small. The base floor is a concrete finished basement. It used to be a club. this case is closed. "

Remarks: "BURIED UNDERGROUND TANK FILLED WITH WATER BUT SURFACE SOIL AROUND TANKTOP & CEMENT IS SEEPING WITH OIL, OIL WAS SAMPLED."

EPA Region:	02
Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency:	06/14/2012
Site name:	NYC DEPC
Classification:	Conditionally Exempt Small Quantity Generator

DEC Memo:	"DEC Piper reviewed the tank closure report. 11 550 tanks were removed in total along with all cont soil. Endpoints showed low level VOCs and SVOCs. Site is being redeveloped and will have a vapro barrier as the basement will be set in GW. Historically gw showed low level CVOCs from adjacent site though none in sopil and soil vapor. Based on work to date, no further action is warranted. A CVOC plume trackdown investigation is being conducted at the adjacent site and surrounding area. See edoc for report. "
Remarks:	"during excavation tank w/ water found, c/u pending"

DEC Memo:	"11/20/08 - Haggerty: Spill called in due to an Ethanol detection in 1 well of 700ppb. Crompco tested tank system. System tight. Spill closed managing the remediation of the property under Spill # 93-05598 1/31/17-Vought-Spill 9305598 previously closed by DEC Haggerty. Vought received email from OER Chawla that Closed Spill # 9305598, 0506979, 0807364 at 609 West 29th Street- Jeff and Randy: We have a developer coming for 609 West 29th Street property with three closed spills. Please let me know who is managing this. Thanks, . Vought replied to OER Chawla that Shaminder, Two of the three above spills were managed by Mike Haggerty, who is copied above. In a recent inquiry with respect to anther closed spill of his we were told he is no longer managing Spills cases. When we close spills, it is due to no further concern with respect to soil, groundwater, and

MOBIL STATION 17510 (Continued) **S107408798**

soil vapor. As future use has changed our only concerns would be with respect to a possible need for vapor mitigation. As such, I will be managing this and will track my work under Spill 0807364 which will remain closed for now. As groundwater is shallow in that area, hopefully the development will include excavation into the water table for total source removal, development into the water table to avoid complications associated with SSDS approval, or parking garage or mechanical spaces on the lowest levels. Thanks and I look forward to receiving more information on the development plans, . Vought received reply from OER Chawla that Thanks Jeff: We met developer today. This is going to be gig $500 million development that includes retail, parking and 950 apartments. Currently, they are in ULURP process. We are scoping investigation plan with them and will keep you in loop. They plan to enter State BCP in future. Vought replied with Thanks again for the info . DEC Possibly Requires: 1)Submission of OER development plans with possible need for vapor mitigation and possible spill reopening, if necessary. 2)No further concerns with respect to soil and groundwater, as of 1/31/17, due to spill closure by DEC Haggerty. 3)CC to OER Chawla and DEC Haggerty"

Remarks: "CALLER STATES THAT THEY GOT TEST RESULTS BACK TODAY SHOWING ETHANOL IN GROUND WATER. CLEAN UP IS PENDING FURTHER INVESTIGATION."

DEC Memo: "2/10/2004: This spill case was reassigned from Sigona to Rommel for management. (Sigona) 10/7/2004: Project management transferred to D. Harrington in Central Office. (Rommel) 10/7/2004: Sent letter to Exxon Mobil approving the site characterization work plan. (Harrington) 6/6/2005: Sent Exxon Mobil a letter approving the SI report and the supplemental SI work plan. Additional monitoring wells will be installed along West 30th Street. Quarterly sampling will be conducted for 1 year, then a remedial plan will be developed if necessary. (Harrington) 9/8/2005: Spill no. 05-06979 was assigned due free product being observed in MW-1. Nature of the product was unknown at the time spill was called in. (Harrington) 10/4/2005: Sent e-mail to Exxon Mobil approving the revised supplemental SI work plan, which changed the location of the proposed monitoring wells along the south side of West 30th Street due to utility clearance

MOBIL OIL CORP SS #510 (Continued) **1000553497**

issues. (Harrington) 2/1/2006: Approved the supplemental SI report. Station is currently scheduled for divestment in the first half of 2006. Exxon Mobil to submit documentation regarding decommissioning activities when they occur. RAP will be developed after receipt and review of decomission report and the analytical results of 4 additional rounds of quarterly groundwater sampling. (Harrington) 3/8/07 - DEC lead changed from Dave Harrington to Mike Haggerty 7/3/07 - Haggerty - approved Groundwater Characterization Work Plan dated 6/28/07. MW-1 along West 30th Street has had intermittent product over the past year. Kleinfelder didn t believe product to be petroleum based. Running parallel to the sidewalk are Oil-o-Static Electric lines. These underground lines are insulated by a di-electric. Kleinfelder believed PCB s could be the unknown product in the well. I was on-site July 26, 2007 when they sampled to see for myself. No free product. Analyticals proved no PCB s are present, only petroleum compounds detected. 7/26/07 - I was on-site while they sampled to see for myself. No free product. Analyticals eventually proved no PCB s are present, only petroleum compounds detected. 1/3/08 - Haggerty - spoke with Shan Zuidema from Kleinfelder concerning future remediation plans. EFR events were conducted monthly starting in September. Effectiveness will be determined after the January EFR event. Additional remedial strategies will be proposed. Also, groundwater isn't fully delineated. The placement of additional downgradient MWs is difficult due to the presence of underground utilities in the adjacent sidewalks. 6/2/08 - Haggerty - approved Remedial Investigation Work Plan dated May 20, 2008. Additional wells will be installed in the northern portion of the site to track down free product and get a sample for analysis. Kleinfelder proposed eliminating EFR events. Approved discontinuation of EFR events because BTEX dissolved concentrations low. EFRs originally intended to collect LPH but had limited success. Instead, LPH absorbent socks will be installed. 10/1/08 - Haggerty: Ethanol detected at 717ppb on groundwater. spill 08-07364 called in 11/20/08 - Haggerty: spill 08-07364 closed. Ethanol ND in groundwater. Not a new release. Due to the presence of sensitive utilities in the sidewalk of West 30th Street and the transit yard/depot across West 30th Street, the Department will not require further delineation at this time. The Department reserves the right to require further delineation on West 30th Street. 12/9/08 - Haggerty: Product found in 1 of the newly installed wells. PM re-initiated quarterly EFR events 4/1/09 - Haggerty: PM reduced reporting schedule to Bi-annual, still sampling quarterly 9/09 - Haggerty: 4 additional wells installed. 0.4ft of product encountered in 1 of the newly installed wells. PM re-instated quarterly EFR events. April '10 Absorbent LPH Socks will be installed in MW-1 and MW-5. PM approved RegenOx injection pilot test in April May '10 Installation of injection points scheduled for the 2nd week of June June 2010 - Pilot test completed 6/6 and 6/10. Results will be reported in subsequent QMR's November 2010 - EM has handed the project over to Liberty Petroleum Realty LLC. See 11/18/10 letter from Liberty. February 2011 - Feasibility Report under reivew March 2011 - Waiting for new data to determine effectiveness of ChemOx injection April 2011: reviewed Quarterly Report. Gw conditions have returned to pre-injection conditions. RegenOx appears to have had little to no effect after 3 rounds of quarterly sampling. Spoke with Jerome Oertling from Arcadis (new consultant), they are developing a new remedial plan, possibly a stronger oxidant or excavation or both. I sent email requiring a RAP/CAP be submitted

MOBIL OIL CORP SS #510 (Continued) **1000553497**

July July 2011: RAP/CAP submitted August 2011: Revised RAP/CAP under review per my comments on the original RAP/CAP Sept 2011 - approved Revised RAP/CAP November 2011 - Bolla has yet to sign the CO January 2012 - RAP/ CAP approved. Need CO to implement February 2012 - CO executed, injections can now proceed May 2012 - waiting on preliminary results August 2012 - Additional VTE events have been conducted to remove the product in MW-8 December 2012 - Arcadis still removing residual product using dual-phase extraction events. Injections will begin after the product has been removed May 2013 - 0.5ft of product in MW-8 remains after multiple attempts/ technologies to remove it, but heard the property is to be sold to someone purchasing much of the block. We have a Consent Order will the current owner, Liberty Petroleum (owned by Capital Petroleum) so OGC will need to be contacted if the property is sold. December 2013 - Arcadis overdrilled MW-8 hoping that larger diameter well will increase the product recovery November 26, 2014 - Spill closed does not meet standards based on the remedial action implemented to date and the fact that further remediation is not feasible. Contamination is limited to groundwater in one area (MW-8R) and does not appear to be migrating off-site. All reasonable remedial technologies have been attempted but due the geology, the only viable technology remaining is excavation. While excavation at MW-8R would remove the residual LPH in the pore space impacting groundwater, excavation is not feasible; depth is approximately 15fbg and is 10ft or less from (Con Edison and NYC sewer) utilities. Review the following Historical Remedial Activities: " Between January 16, 2006 and March 2010, twelve enhanced fluid recovery (EFR) events were conducted on monitoring wells MW-1, MW-5, MW-7 and MW-8, recovering approximately 2,442 gallons of groundwater/LPH mixture. " Between June 7, and June 10, 2010, a total of approximately 780 pounds of RegenOx was injected into wells IP-1 through IP-3 during a Feasibility Study completed by Kleinfelder. " On September 26, 2011, ARCADIS completed a vacuum enhanced recovery (VER) pilot test on MW-8. During the test, approximately 28 gallons of impacted groundwater were recovered and disposed of via vacuum truck. Additionally, 0.46 pounds (lbs) of vapor-phase volatile organic compounds (VOCs) were removed under vacuum and destroyed via an internal combustion engine (ICE) unit. " An EFR event was conducted on April 9, 2012. This event was in response to the LPH detection in wells MW-5 and MW-8 on April 4, 2012. Approximately 80 gallons of liquid was removed over 7.3 hours of operation. " LPH gauging and recovery events were conducted on April 4, April 12, May 8, June 20, July 16, and August 6, 2012. MW-5 and MW-8 were gauged with an interface probe for depth to LPH and depth to water. LPH was recovered with a polyethylene bailer and stored on site in a labeled Department of Transportation (DOT) 55-gallon drum for later disposal. " On August 6, 2012, MW-8 was redeveloped in an attempt to increase the yield from the formation. " On August 29, 2012, a High Vacuum Dual-Phase Extraction (HVDPE) event took place on monitoring well MW-8 to remove LPH and vapor-phase hydrocarbons from the well. Two 55-gallon granular activated carbon (GAC) drums were used to treat effluent vapor before exhausting to the atmosphere. Approximately 95 gallons of liquid was removed during this event. " On October 3, 2012, a High Vacuum Dual-Phase Extraction (HVDPE) event took place on monitoring well MW-8 to remove LPH and vapor-phase hydrocarbons from the well. Two 55-gallon granular activated carbon (GAC) drums were used to treat effluent vapor before exhausting to the atmosphere. Approximately 100 gallons of liquid was

MOBIL OIL CORP SS #510 (Continued) **1000553497**

removed during this event. " On March 19, 2013, A Data Acquisition and Processing Laboratory (DAPL) unit was used for liquid removal and soil vapor extraction (SVE) at MW-8. The object of this event was essentially a push/pull event to address impacts observed in vadose and smear zone soils. Air was introduced into IP-2 to aid in circulation through both the vadose and saturated zones. A total of 1.235 lbs of VOCs were removed via the vapor stream at MW-8. Approximately 100 gallons of liquid was recovered from MW-8. " MW-8R was installed on December 18, 2013. The original MW-8 was over drilled via hollow stem auger drilling. All original well material, well screen sand, and grout were removed and drummed for proper disposal. This well replacement was an attempt to remove LPH impacted soil and gravel pack from around the well screen as well as to create increased yield from the well. MW-8R was developed on December 26, 2013. A total of 15 gallons of liquid was removed during development. " LNAPL gauging and recovery events, including product absorbing sock change outs, occurred monthly in 2014 from February through August. The highest recorded product thickness was 0.23 ft in February and decreased to non-detect in both June and July and only 0.07 ft in August. "

Remarks: "CONTAMINATED SOIL IN U/G TANK EXCAVATION -"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 1/13/01: Tim DeMeo responded off-hours and called O'Connell for guidance. I advised him to remain on-site until temporary clamp was installed. Total leak amount 6500 gallons. (JHO) DeMeo's notes: Felix Industries, while performing contract work for Con Ed, cut into housing of 5-inch feeder cable. The work being performed was a saw-cut across 11th Avenue. Upon arrival Con Ed, NYPD and FDNY were on-scene. Material contained using sand dikes with minor impacts to sewers. Clean Harbors and S&D were retained by Con Ed for clean up. Street and sidewalk were to be pressure washed after absorbents

FEEDER M54 (Continued) **S104951212**

cleaned up. (TD) 1/17/01: Chem lab on-site collecting post-ex samples, as follows: 4 sidewalls, 2 floor for benzene, TPH df. On site were John Tranchina (Con Ed TO) and Joe Floryshak (Con Ed Remediation). (JHO) 2/13/01: lab results indicate no detectable levels of benzene. All TPH results all below 1000 ppm. Close out. (JHO)"

Remarks: "UNDERGROUND LINE STRUCK DURING CONSTRUCTION AT ABOVE LOCATION. LEAK IS STILL ACTIVE AT TIME OF CALL. CON ED ON SCENE AND MATERIAL HAS BEEN CONTAINED. CON ED # NOT AVAILABLE, NO CALL BACK REQUESTED. UNKNOWN AMOUNT OIL WENT INTO THE SEWER UPDATED AT 17:58 01/13"

Spiller Address:	303 10TH AVE
Spiller Company:	001
Contact Name:	DOUG HARM
DEC Memo:	"03/15/07-Vought-File review by Vought: Letter from American Environmental Solutions (AES)- Brain Pendergast (ph:631-475-0020 fax:631-475-0025) to DEC Falvey-12/19/06: Atlantic Development Group, LLC has retained Brinkerhoff Environmental Services, Inc. as the environmental consultant and American Enviornmental Solutions, Inc. (AES) as the remediation supervisor... . In 9/06, AES removed one (4000-gallon) diesel UST and three (4000-gallon) gasoline USTs from the site. The tanks were encased in concrete and there was no evidence of a petroleum release . A small amount of contaminated soil was located in the area east of the former pump island . Approximately 20 tons of soil was excavated in 11/06. Revised PBS application being submitted by AES. Five PBS violations found by DEC Falvey during inspection. Remedial Action Report (Brinkerhoff Environmental-732-223-2225). Site was formerly occupied by a gasoline station and auto repair facility. In 9/06 AES collected endpoint samples from waste oil UST excavation and endpoint sampling was not conducted in the gasoline and diesel UST excavation since the USTs had been encased in concrete. No evidence of discharge was observed in the field in either the gasoline/diesel UST excavation or in the waste oil excavation . In 11/06 Brinkerhoff directed excavation of soil in the area of the dispenser island and the former sample

FORMER GAS STATION (Continued) **S108058323**

location that reported VOCs. Report proposes No Further Action. Nine soil boring performed in 6/06. PID readings, petroleum staining and petroleum odors were encountered in Soil Boring SB-4 and SB-9 . Soil analyticals from boring show both samples were DILUTED: 260ppb benzene(SB9 3'bg),111000ppb xylene (SB9 3'bg), 70000ppb 1,2,4-trimethylbenzene(SB9 3'bg), 26000ppb 1,3,5-trimethylbenzene(SB9 3'bg), 370ppb MTBE(SB9 3'bg). SITE IS E DESIGNATED. Four endpoint samples collected from excavation of soils at SB9 show no TAGM 4046 Required Soil Cleanup Objective exceedences. SVOC exceedences attributed to urban fill material. Endpoint samples from excavation of SB9 collected at least ten feet away from initial soil boring location. Samples collected from 11'bg at SB9 show VOCs below TAGM. Tank Closure Report (American Environmental Solutions-January 2007. The site is currently being redeveloped for future use as a hotel. Five USTs were removed from 9/06-11/06 including one (1000-gallon)waste oil UST, three (4000-gallon) gasoline USTs and one (4000-gallon) diesel. All lines and piping associated with the tanks located on the site were removed . Thirty tons of soil was disposed from site. Soil was excavated from the area just east of the pump island. AES collected five endpoint soil samples from waste oil excavation in 9/06 and Brinkerhoff collected soil samples in 11/06. No endpoint samples collected from gasoline and diesel USTs because they were entirely cased in concrete and there were no holes in anay of these tanks and no evidence of a petroleum discharge was observed . Report recommends no further action. Waste oil samples show no TAGM exceedenced except for PAHs attributed to fill material. Endpoint soil samples collected from pump island excavations show no TAGM 4046 Soil Quality Objective exceedences except for PAHs attibutable to fill material. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. DEC requires: 1)collection of water sample at SB9 due to shallow groundwater table and historical video for spill #8302630 showing bailer from monitoring well adjacent to pump islands with free product 2)expected depth of foundation 2)vapor barrier/SSDS 3/26/07-Vought-Received call from Matt Snyder (212-318-1650x253 cell 914-522-0759) and returned call and spoke to Snyder. Contact at Brinkerhoff that Urda is using is Doug Harm. Vought referred Snyder to Doug Harm at Brinkerhoff. DEC sent Consent Order to Doug Harm. 04/04/07-Vought-Receied message from Doug Harm (732-223-2225) regarding site and returned call and left message to return call. 4/5/07-Vought-Received call from and spoke to Harm who received CAP for Consent Order. Brinkerhoff will collect groundwater samples on 4/10 and report will be submitted to DEC. Workplan submitted to DEP for their additional requirements and DEP will not approve plan until they receive plan for building. Building will not occur until Consent Order obligations are completed. ISR will be submitted to DEC. RAP may not be submitted for 90-120 days as owner not decided on how to develop property as of yet. 4/6/7-Vought-Vought

FORMER GAS STATION (Continued) **S108058323**

called Harm who proposed 60 days for ISR and 180 days for submission of RAP as owner still undecided on development plans. Harm assured DEC Vought that development will not take place as permits cannot currently be obtained from DEP due to outstanding E designation requirements. Vought approved of proposed changes to CAP and submitted to DEC Urda. Harm also sent in letter with request as per Vought. 4/13/07-Vought-Reviewed Corrective Action Plan Extension Request dated 4/5/07 submitted by Brinkerhoff (Harm). Groundwater sampling scheduled to be conducted on 4/10/07. An extension for submittal of the RAP of 180 days is requested . See above entry for 4/5/07 as 120 day extension for RAP is acceptable by Department. Vought sent email to DEP Naizaire requesting information on DEP project manager. 06/04/07-Vought-Received email from DEC Nazaire that DEP project manager is Tracy Goldman (718-595-6443) and left message to return call. 06/26/07-Vought-Received call from and spoke to Suman Khanna (718-349-0555) who put in foil request and he received detailed PDF report and was not aware of prior Attorney General action. 10/23/09-Vought-Received message from Harm (732-223-2225) on 9/28 that property being developed with residential apartments and that vapor barrier and SSD installed. Vought spoke to Harm and 3000 tons of soil was removed and post excavation samples were collected. Excavation occurred to water table. No sidewalk wells remain. DEC will receive closure and excavation report within the next couple of weeks (by 12/1/09). Vought called and spoke to NYSOAG John Nyhoff and informed him of property development. 8/6/10 - Raphael Ketani. I took over the case from Jeff Vought of Spills who transfered to Unit A, Superfund Sites and Brownfields, within DER. On 7/11/06, oil contaminated soil was discovered during a site investigation. The site was a former gas station. The address is 303 10th Avenue in Manhattan. The consultant was Doug Harm of Brinkerhoff Environmental (732-223-2225). The site is located at 303-309 10th Avenue, Manhattan. The block and lot are 699 and 33. According to ACRIS, the deed shows that 303 10th Avenue Hospitality, LLC is still the owner of the property. Their address is 20 West 46th Street, 2nd Floor, NY, 10036. There are two PBS registrations. The earlier one, #2-601361, shows four 4,000 gal. USTs with gasoline and diesel fuel. They were installed on 9/1/98 and removed on 2/1/77. The second registration is #2-604322. There is one 250 gal. lube oil UST. I left a message for Mr. Harm (732) 223-2225 requesting the closure report for the site along with the groundwater results. Also, I spoke Mr. Vought regarding the site. He said that they were putting in the foundation for a building when he had the case. 8/9/10 - Raphael Ketani. Mr. Harm called me back. He said that the last step in the investigation would be to install a monitoring well in front of the building. However, for a long time, there had been scaffolding in place which prevented any well installations. The scaffolding has finally come down and Brinkerhoff will install the well. The groundwater analytical results will be sent to the DEC in about 60 days. 10/26/10 - Raphael Ketani. Today I received the 10/5/10 Closure Report from Brinkerhoff Envirionmental Services, Inc. I began my review of the report. 10/27/10 - Raphael Ketani. I finished my review of the Closure Report. According to the information contained in the report, almost all of the soil within the footprint of the former gas station was removed down to 13 feet from 5/27/08 to 3/17/09. Eight (8) soil end point samples were taken from 8/27/08 to 3/19/09 and indicated that there was no BTEX contamination and generally low concentrations of SVOCs. The only SVOCs that exceeded the TAGM standards were the

FORMER GAS STATION (Continued) **S108058323**

benzo series and their associated combustion products. Given that only these analytes exceeded the TAGM standards, the soil results resemble those for historical fill. Groundwater samples were taken on 9/25/07, and 2/11/08 from wells MW-1 to MW-3. After 2/11/08, the wells were destroyed due to the foundation construction for the new apartment building. The results for MW-1 were in the thousands of parts per billion for samples that were taken during both rounds. The other two wells had non-detect or very low analytical results during the second round. A groundwater sample was taken on 03/19/09 from a test pit and the results indicated that the tested VOCs were non-detect, except for slightly elevated results for MTBE and TBA. A later well, MW-4, was installed on 8/12/10 downgradient to the former location of MW-1 after the construction was finished in order to check the groundwater analyte concentrations. The analytical results for the sample that was collected on 8/26/10 were almost entirely non-detect. According to the Closure Report, a sub-slab vapor barrier and a passive vapor ventilation system were installed. Based upon the information in the 10/5/10 Closure Report, I have determined that the petroleum contamination has been remediated. Also, as a vapor barrier and passive ventilation system were installed, I have determined that there is no threat to the public or the environment. Therefore, I am closing the spill case effective today."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

(Yau) 06/22/06: Prepared and sent an old spill letter to property owner through certified mail. A site investigation report (SIR) is expected to be due on 07/22/06. (Yau) 06/27/06: Owner called to inquire about the spill. Stated that he brought the property recently (around 2002) and had no idea where is the spill was. Told him that DEC will look into it and call him back with the exact location of the spill. (Yau) 08/02/06: Owner called to request an update to the site. Told him that a review is underway. Found that DEC had a PIN job for this site. Unsure whether the cleanup is complete. If the cleanup is incomplete, the owner might have to re-do the cleanup. Will call owner back as soon as review is completed. (Yau) 10/16/06 Reassign from Yau to Chanda (Chanda) 12/12/06-Vought-Spill reassigned from DEC Chanda to DEC Vought. 03/20/07-Vought-File review by Vought: See also open spill #0603967 at same location. Videotape-unknown date (circa 19884)-tape showing well being bailed with free product thickness of 1 . Registered CSL Letter sent by DEC Yau to Tenth Gas Inc (address as per Property

10TH AVE. W 27/W 28 ST. G (Continued) **S102671142**

Shark). FOIL request from Brinkerhoff-8/18/06. Vought called AG Bechard for status of PIN case. PIN case assigned to AG John Nyhoff. Vought called Nyhoff and left message to return call. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. 03/21/07-Vought-Left message for AG Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke with AG Nyoff and as per Nyoff default judgement was made against former owner of property resulting in lean of approximately 354K. 3/26/07-Vought-Received ISR from Nyoff. Vought left message for Nyoff to return call with which party was found responsible (Alex Goffman or Westside Tripple Auto Repair). 4/23/07-Final ISR submitted to DEC Austin for review and spill closed by Vought. DEC Memo:	"09/25/95: PIN-4169 - ASSIGNED TO CHRIS FOR TRACKING PURPOSES. 10/6/03 See also PIN 4169, spill #s 8605682, 8606807, 9410208, 9410209. 1/8/04 Reassigned from Tomasello to K Foley. 06/20/06: Re-assigned from Foley to Yau. (Yau) 06/22/06: Prepared and sent an old spill letter to property owner through certified mail. A site investigation report (SIR) is expected to be due on 07/22/06. (Yau) 06/27/06: Owner called to inquire about the spill. Stated that he brought the property recently (around 2002) and had no idea where is the spill was. Told him that DEC will look into it and call him back with the exact location of the spill. (Yau) 08/02/06: Owner called to request an update to the site. Told him that a review is underway. Found that DEC had a PIN job for this site. Unsure whether the cleanup is complete. If the cleanup is incomplete, the owner might have to re-do the cleanup. Will call owner back as soon as review is completed. (Yau) 10/16/06 Reassign from Yau to Chanda (Chanda) 12/12/06-Vought-Spill reassigned from DEC Chanda to DEC Vought. 03/20/07-Vought-File review by Vought: See also open spill #0603967 at same location. Videotape-unknown date (circa 19884)-tape showing well being bailed with free product thickness of 1 . Registered CSL Letter sent by DEC Yau to Tenth Gas Inc (address as per Property Shark). FOIL request from Brinkerhoff-8/18/06. Vought called AG Bechard for status of PIN case. PIN case assigned to AG John Nyhoff. Vought called Nyhoff and left message to return call. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. 03/21/07-Vought-Left message for AG Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke with AG Nyoff and as per Nyoff default judgement was made against former owner of property resulting in lean of approximately 354K. 3/26/07-Vought-Received ISR from Nyoff. Vought left message for Nyoff to return call with which party was found responsible (Alex Goffman or Westside Tripple Auto Repair). 4/23/07-Final ISR submitted to DEC Austin for review and spill closed by Vought. DEC Memo: "DEC Piper spoke w. Vic, as per conversation plans are for a high rise. The property is three separate lots and all had some type of contaminants. Vic will forward Phase I and II and a work plan is going to be drawn up. This site is a E-designated site and will be monitored by the NYC DEP. High Line Development Group. Michael Shananbrook 212-937-8861 As per GZA, funding was lost in 2008. 1/9/12- csl sent to High Line Development Group. Michael Shananbrook 550 W 29th St. NY, NY 10001 04/24/14 - The project has been reassigned to M. MacCabe in the central office. Staff is reviewing a remedial work plan intended to address the chlorinated VOCs in groundwater. 02/25/16 - The site was remediated under the oversight of the NYC Office of Environmental Remediation project No. 13EHAN009M and has been closed."
Remarks: "WHILE TESTING SOIL AT ABOVE LOCATIONS FOUND CONTAMINATED SOIL: ALL PROPERTIES WERE EFFECTED"

Contact Name:	DEBORAH BROWN
DEC Memo:	"Spoke with Deborah Brown at G&C, 631-206-3700.G&C doing Phase II investigation and found elevated level of SVOCs in soil samples. Propery Owner: G&R 11th Avenue Associates, LLC 60 Cutter Mill Road#303 Greatneck, NY 11021 Attn: William Bouton, 516-466-3100.(sr) 06/19/13-Hiralkumar Patel. 1:54 PM:- spoke with Debroah. she mentioned that some SVOCs found above cleanup standards. as Phase II report is not ready yet, asked her to submit lab data and boring location map for review. Deborah Brown GC Environmental Ph. (631) 206-3700 06/27/13-Hiralkumar Patel. 9:06 AM:- received limited Phase II report from Ravi from GC Env. abstract: - Phase I done in Apr. 2013 - site improved by two structures: five (5) story and seven (7) story buildings - seven (7) story building is located at 549 W 26th St, constructed circa 1911. building is occupied by NYC government offices - five (5) story building (Annex Building) is located at 547-557 W 26th St, constructed circa 1901 - ground level of Annex building is occupied by Chelsea Truck Rental - upper four floors of Annex building are connected to main building and are occupied by NYC government offices - property is located at an elevation of approx. 9 ft above mean sea level - historical Sanborn maps shows two (2) 550 gal gasoline USTs in the eastern portion of the garage of the annex building and two (2) 275 gal gasoline USTs along the eastern wall of

LAB RESULTS (Continued) **S113818130**

the main building in the area of current fire sprinkler room ---------- - three (3) former hydraulic lifts along the eastern wall of the Annex building - GPR survey revealed two anomalies on the southeastern portion of the garage. data collected indicate the possibility of two (2) 550 gal gasoline USTs on the southeastern portion of the garage. visual inspection revealed the presence of two (2) vent pipes in that area of the garage ---------- - GPR survey revealed an anomaly on the central western portion of the garage - traced anomalies for the product lines underneath the sidewalk along the W 26th St leading towards/inside the shop area of the garage from the southwestern wall, in the area of the concrete patch for the two (2) suspected 275 gal USTs where product line anomalies colimate - visual inspection revealed the presence of three (3) former hydraulic lifts inside the garage building, out of which two former lifts were identified on the northern portion and one former lift on the southeastern portion of the garage - lift still contains oil - two concrete patches were suspected to be former hydraulic lift locations were identified on the northeastern portion of the garage building - visual inspection also revealed the presence of one (1) former oil/water separator on the southwestern portion of the garage building - oil/water separator was concrete structure with solid base - found oil, grease and water in oil/water separator - floor drians connected to oil/water separator - advanced nine soil borings (B-1 through B-9) to approx. 10 ft bg - no indication (PID/visual/olfactory) of contamination noted in any soil boring - collected nine soil samples, each from 5-10 ft interval - submitted eight samples (S-1 through S-8) for VOCs and SVOCs analyses; samples from B-1 and B-2 were combined in S-1 - geology consists of approx. 2 to 3 ft of fill, represented by dark clay, underlain by approx. 7-8 ft of brown clay material with little gravel ---------- - depth to groundwater at the property is 7-10 ft bg ---------- - groundwater samples were collected from boring B-1 and B-3, but did not analyzed as no field indication of contamination noted in soil samples ---------- - no VOCs found in any sample - few SVOC compounds noted in sample S-1 (composite of boring B-1 and B-2; slightly above cleanup values) and S-7 (boring B-5; max. 8,400 ppb Benzo(a)anthracene) as per cover letter of the limited Phase II report, following work is planned: - excavation in area of boring locations B-1/2 and B-5, to a depth of 8 ft to remove impacted fill material - removal of existing hydraulic lift systems and associated contamination - collection of endpoint samples from excavations for VOC/SVOC/PCB analyses 06/28/13-Hiralkumar Patel. 1:41 PM:- spoke with Ravi and asked to submit previous Phase I and GPR reports for review. also asked him to submit property owner/manager’s contact information. 4:06 PM:- received call from Greg Collins from GC Env. he mentioned that as part of refinancing, bank asked for subsurface investigation due to tanks on Sanborn maps. as there was no indication of contamination noted, Bank refused to analyze groundwater samples. Greg mentioned that there is an existing monitoring well on sidewalk, possibly near former fillport for gasoline tanks. based on available information, informed Greg that groundwater sample must be collected and analyzed. 07/01/13-Hiralkumar Patel. received email from Ravi (at 6:52 PM on 06/28/13) including Phase I and GPR report. he also submitted their client’s contact information. G&R 11th Avenue Associates, LLC. / Gould 11th Avenue, LLC. **property owners** c/o Majestic Property Management Corp. 60 Cutter Mill Road, Suite 303 Great Neck, NY 11021

LAB RESULTS (Continued) **S113818130**

Attn.: William Bouton **property manager** Ph. (516) 466-3100 (516) 773-2740 email: billb@majprop.com Ravi inquired about analytical methods for groundwater samples. abstract of Phase I: - report dated 07/29/05 - address: 260 11th Ave. Block 698 / Lot 1 - site consists of irregularly-shaped parcel developed with two contiguous, interconnected office buidings - main buiding consists of seven (7) stories, and the attached annex building consists of five (5) stories - property also consits of a concrete paved surface parking lot located on the northeastern portion - property was developed with the existing improvements in the early 1900s - property is listed as a RCRA facility. NYC HRA, a former tenant at the site, is listed as a RCRA hazardous waste generator. NYC HRA previously conducted automobile maintenance activities and generated petroleum and hazardous waste ---------- - partial basement level below the main buiding in the northwest corner of the building consists of the boiler room, heating oil storage room and other utility meter rooms - observed groundwater seepage into the basement of the property building. discolored groundwater is appeared to be contaminated with rust and tar. source of water seepage was suspected to be a broken water main ---------- - historical sanborn maps (1930 to 1996) showed presence of two 550 gal gasoline USTs within the southeastern corner of the annex building, and two 275 gal gasoline tanks along the southeastern wall of the main building - observed the presence of three vent pipes (similar to those typically attached to gasoline USTs or oil-water separators) located on the southwest corner of the annex building - no other evidence of 550 gal or 275 gal tanks was observed - observed the presence of two (2) monitoring wells along the W 26th street sidewalk - historical use of the property included a wood and coal yard and a portion for an iron foundry, and a brass and bronze working operations in the late 1890s and early 1900s - property was also used as automobile garage in the early 1900s and as an elevator manufacturing and repair operation from the 1910s to the 1970s - property was used as an office and a grage from the late 1970s - building permit information dated 1955 reportedly identified an oil-water separator connected to the drainage system in the annex building ---------- - observed storage of paint and cleaning chemicals at various locations of the site --------- abstract of GPR survey: - GPR survey was unsuccessful in delineating the two 550 gal USTs in annex building or two 275 gal USTs in main building - traced two product lines from the wall to the center of the garage area in annex building (to area of suspected 550 gal USTs) - two of the vent pipes lead to the rear of the buildign were a concrete patch was present - third vent pipe was observed to run toward the center of the garage in the vicinity of where the product lines end alternate addresses: 244-260 11th Ave, 549-559 West 26th Street, 550-558 West 27th Street PBS #: 2-605932. as per PBS record, the site has/had following tanks: - one (1) 20,000 gal #6 oil AST on saddles removed in Sep. 2002 - one (1) 14,000 gal #6 oil AST on saddles installed in Sep. 2002 and removed in Dec. 2012 - one (1) 7,500 gal #2 oil AST on saddles installed in Dec. 2012, in-service as per NYC DOB record, a permit was approved on 01/22/2002 to replace 20,000 gal fuel oil tank with 14,000 gal tank in existing tank room. ---------- as per NYC DOB record, a permit was approved on 03/01/2013 to replace 14,000 gal fuel oil tank with 7,500 gal tank. other spill #: 0109855 was reported on 01/11/2002 due to #6 oil spill from leaking tank. spill closed based on invoice from PTC. as per invoice, 18.89 tons of contaminated soil removed during cleanup. 1:08 PM:- spoke with Ravi.

LAB RESULTS (Continued) **S113818130**

informed him that based on historical use of the site, department requires full list VOCs/SVOCs and filtere/unfiltered metal analyses for groundwater samples. asked him to check for anymore wells either on 11th ave or W 27th Street. informed him about discolored water seepage in basement. also asked him to submit appendices of Phase I report. 07/11/13-Hiralkumar Patel. 4:37 PM:- received email from Ravi including results of groundwater samples from two existing monitoring wells on W 26th street sidewalk. some metals found dissolved in groundwater. minor SVOC compounds noted in groundwater samples. reviewed site map submitted with limited Phase II report, which shows location of two wells. 07/12/13-Hiralkumar Patel. 10:46 AM:- spoke with Ravi. asked him about schedule of proposed excavation. informed him that during excavation, if they come across water table then groundwater sample must be collected for STARs 8260/8270 analyses. Ravi will send scope of work. reminded him to submit appendices of Phase I report. 11:58 AM:- received email from Ravi including scope of work.: - excavation in area of B-1/2 and B-5 - removal of underground lifts and associated tanks - collection and analysis of upto 5 fsamples for 8260/8270 (PAHs)/PCBs - removal of vent lines - oil/water separator to class V injection well - collection/analysis of water samples, if found in excavation scope of work is not accpetable and needs to be revised for following reasons: - it proposes to collect upto five endpoint samples. instead endpoint samples must be collected, as per DER-10, from each excavation and number of samples must not be limited to five - need more clarification about investigation of oil/water separator structure to confirm no discharge into sub-surface 4:12 PM:- received message from Ravi. he mentioned that owner does not have Phase I appendices. 07/15/13-Hiralkumar Patel. 10:05 AM:- spoke with Debra at GCE. informed her that endpoint samples must be collected, as per DER-10, from each excavation and sample number must not be limited to five. also asked her to clarify cleanup/investigation method for oil/water separator (confirmation about no discharge into subsurface). asked her to submit revised scope of work. 12:33 PM:- received email from Greg from GC Env. including scope of work. abstract: - will collect endpoint bottom and sidewall samples, as per DER-10, from excavation area around B-1/2 - will collect endpoint bottom sample only from lift excavation area, as lifts are only approx. 1 ft in diameter and based on the size of the excavation to reach the end point, the diameter will be at least five feet - excavation in lift area will be expanded, if needed - endpoint samples will be analyzed for 8260/8270 (PAHs)/PCBs - will do a die test of the oil/water separator system - if oil/water separator system discharges to any point other than city serwer, will collect samples from the discharge point 07/18/13-Hiralkumar Patel. 11:48 AM:- sent email to Greg approving scope of work (email dated 07/15/13), pending inclusion of collection and analysis of water sample(s) if present in any excavation. asked him to submit report by the end of 08/30/13. email copied to Ravi, Debra and Mr. Bouton. 08/30/13-Hiralkumar Patel. 11:09 AM:- received email from Ravi. they collected total 14 soil samples, from different excavations. he sent samples to lab to analyze for 8260/8270/8082. Ravi inquired if any change needed in analytical methods. 12:43 PM:- sent email to Ravi approving sample analyticals methods. email copied to Greg and Debra. 09/19/13-Hiralkumar Patel. 3:08 PM:- received email from Ravi including spill closure report. area around previous borings B1/B2, B3, B5, B6 and B7 excavated to a depth of 8-8.5 ft below surface. total 14 endpoint soil samples were collected for

LAB RESULTS (Continued) **S113818130**

analysis from four excavations. no contamination noted in endpoint samples. during excavation, no tanks or piping found in suspected UST area. based on available information, no further remediation needed in former tank/lift area. report is missing information about oil/water separator. 09/24/13-Hiralkumar Patel. 2:18 PM:- sent email to Ravi and inquired him about oil/water separator. email copied to Greg. 09/25/13-Hiralkumar Patel. received email from Ravi (at 4:46 PM on 09/24/13). they will schedule work with respect to oil/water separator this week and will send update. 09/27/13-Hiralkumar Patel. 10:50 AM:- received email from Ravi including result of oil/water separator investigation. they did dye test and confirmed that oil/water separator discharges into sewer system. based on available information, case closed."

Remarks: "soil samples are elevated"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 9/27/04 - AUSTIN - SPOKE WITH JOEL LANDES,LANGAN ENGINEERING (212-479-5404) WHO HAD CALLED THE RD'S OFFICE ON THIS MATTER TODAY. HE SAID THEY WERE DOING SOME PHASE 2 WORK WHEN THEY MADE THEIR DISCOVERY. WANTED TO KNOW WHO THE PROJECT MGR. WOULD BE FROM DEC. GAVE HIM TIM'S NUMBER - REPORTED BACK TO RD'S OFFICE ON RESULTS OF CALLBACK - END 9/28/04 TJD Received a call from Joel Landes from Langan Engineering regarding contamination identified during a Phase 2 investigation which is being performed at the site prior to the construction of a new sports arena over the existing rail yards. Contaminated soils and seperate phase petroleum were found in a boring adjacent to track 14. Langan/LIRR have requested a night meeting on site with DEC to perform a walk-thru. Tentatively scheduled for 9/30/04. Lew Wunderlick from LIRR was contacted in an effort to obtain additional information, he will be reviewing site plans in an effort to identify any possible sources of contamination. 3/23/05 - Austin - Transferred from DeMeo to Tibbe - end 04/06/06: Contamination discovered in a large void in a boring under tracks in the LIRR yard. Becuase of the fact that trains were using these tracks, the void could not be left unfilled. The void and boring were filled with grout. Soil and groundwater analysis from surrounding borings show minimal to nonexistant contamination. NFA signed by K. S. Tang. "
Remarks:	"DOING SOIL BORINGS AT TRAC K 14: AND HAD HIGH PID READINGS: AND SOMETHING ALSO FLOATING: WILL SEND SAMPLE TO LAB"

FINDS:

Registry ID: 110069646878

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Material Name:	#2 fuel oil (on-site consumption)

Tank Number:	002
Tank Id:	57277
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
G03 - Tank Secondary Containment - Vault (w/o access)
L09 - Piping Leak Detection - Exempt Suction Piping
I05 - Overfill - Vent Whistle
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)

Tank Location:	3
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	05/01/1999
Capacity Gallons:	3000

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL Formerly assigned to Tomasello 4/10/2002 - Someone from Penske Truck Leasing called looking for a closure letter on this site. Sangesland spoke to him. DeMeo was on duty for the day, therefore it was assigned to DeMeo. Sangesland suggested the rep from Penske should send a copy of the original closure report to DeMeo along with a request for closure. 8/29/03 TJD Work plan approved. 12/9/03 TJD

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

Transferred Demeo greater than greater than greater than Rommel. 1/7/04 Reviewed 12/31/03 report from GES proposing 5 additional delineation wells. Spoke to Tony Dellaria, GES, verbally approved additional well locations with the addition of one well downgradient of MW4. Letter to Penske, Route 10, Green Hills, PO Box 7635 Redding PA 19603-7635 Rommel 3/8/04 Spoke to Debra Kaplan,GES. Wells are scheduled for 3/22/04. Rommel. greater than greater than greater than 05/13/04 10:46AM greater than greater than greater than Ms. Rommel, Attached please find the Subsurface Investigation Report for the above-referenced site. The hard copy of the report was sent to you today. If you have any questions, please feel free to call Anthony Dellaria at (631) 420-5095. Thank you. greater than greater than greater than Jennifer Rommel 05/13/04 03:43PM greater than greater than greater than DEC approves the work proposed in the Subsurface Investigation Report dated 5/13/04. At the end of the three months of HIT events, please submit an evaluation of the need for a permanent recovery system. 5/17/04 Received summary, 4 mw installed. Total 8 wells. Product in MW1 and MW4 - quarterly bailing recommended. Rommel 10/14/04 Reassigned from Rommel to Sun. 10/31/04 File Update by Sun: - On 11/22/04, Sun sent a letter to Richard Saut of Penske requiring complete delineation of soil and groundwater contaminations, submittal of an Investigation Summary Report followed by a Remedial Action Plan. The Department set a deadline of 12/10/04 for signing the Stipulation Agreement. The Stipulation Agreement was signed by Penske on 12/10/04 and implemented by the Department on 12/27/04. -On 12/21/04, Sun sent a letter to Richard Saut of Penske informing him that the Department has approved the Remedial Action Plan (RAP)/HypeAir Work Plan prepared by his Consultant, Groundwater & Environmental Service (GES) for the subject site; specifically two in-situ chemical oxidation events at the site via HypeAir air and Hydrogen peroxide injection system. The Department requires that due to the proximity of existing utility corridors, temperature, pH, pressure, oxidation-redox potential (ORP), conductivity and dissolved oxygen (DO) shall be monitored on all the monitoring wells. Any potential accumulation of vapors during the injection activities shall be avoided. (Sun) 02/21/06: Sun received 4th Quarter 2005 Site Status Update Report. Review of this report is pending. (Sun) 02/27/06: The Department approves the GES s request for two (2) additional injection events to be completed in April and May 2006; specifically two in-situ chemical oxidation (Chem-Ox) events at the above referenced site utilizing a hydrogen peroxide, ozone, and persulfate injection system (HypeAir). (Sun) 07/23/07-Sun: On 07/23/07 the Department approves the GES s request for performing enhanced product recovery through the injection of surfactant into MW-5. The Department also approves a series of high intensity targeted (HIT) remediation events using high vacuum extraction at monitoring wells MW-3, MW-4, and MW-5 to reduce residual hydrocarbons impacts on-site for 8-hour events for approximately four (4) months. (Sun) 08/09/07-Sun: On 7/18/07 Joe Sun of DEC was informed by Kevin Heaphy of Parson Brinckerfoff Amercica (PB) that the MTA will be using this site (Lot 60) and the adjacent Fed Ex lot for a mocking pit to build the initial shaft for Tunnel boring machine to be used for the No. 7 subway extension project. In general, the site is slated to be used as a staging area for the project. A meeting was held on 8/9/07 to discuss project among all the key parties, including DEC, MTA, NYCT, Developer, Parson Brinckerfoff (PB), Penske, property owner (Michael Silvermintz)and Penske s consultant,

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

GES. The meeting concluded that PB will first review the GES s investigation and remediation reports and then will discuss with GES and MTA project team to assess if other viable remedial action plans (RAP) can be implemented to expedite the cleanup process. Any new proposed RAP will be submitted to DEC for review and approval. (Sun) 08/23/07-Sun: Sun received 2nd Quarter 2007 Site Status Update Report. Based on laboratory analytical results, a 64% reduction of disslved benzene, toluene, ethylbenze, and total xylenes (BTEX) concentrations has been observed on and off-site since initiating hydrogen peroxide and ozone injections at the site. (sun) 08/30/07: Sun received the following email from Heather Cloud of GES Joe, Penske and GES submitted all historical documents to Kevin Heaphy for his review. He reviewed the documents and we had a follow up call with him and the MTA this past Monday (8/27). During the call, Kevin brought up a suggestion of relocating the wells off-site or installing remote access points in the sidewalk. As discussed at the NYSDEC meeting, we told Kevin that that locating the wells offsite was not an option, and installing remote access points in the sidewalk could not be sufficient for our liquid level measurements and groundwater sampling activities. Additionally, there is a high pressure gas main in the sidewalk, so we would not be able to drill safely in this area. They did not have any additional suggestions or ideas beyond relocating the wells. (Sun) Since they did not have any additional suggestions, it was decided that GES is going to proceed with our approved work plan. We are actually scheduled to conduct our surfactant injection on September 5 and the high vacuum extraction events on the 6th and 7th. Once we get the data back from the first event, we will evaluate the effectiveness and move forward from there. (Sun) 11/19/07-Sun: Sun received the following email from Heather Cloud of GES, Hi Joe, We conducted the Surfactant Injection at MW-5 on September 5, 2007 followed by a high vacuum extraction event on September 7, 2007 to remove and recover residual product at MW-5. Since conducting the injection event, we have not seen any product at MW-5. Groundwater data at MW-5 prior to the injection (July 3, 2007) was 489 ppb BTEX (144 ppb benzene). Following the injection (October 12, 2007), groundwater data at MW-5 was 87 ppb BTEX (66 ppb benzene). Since the injection event, we have conducted 2 high vacuum extraction events on MW-3 and MW-4. These events were completed in September and October. Between the 2 high vacuum extraction events, we have recovered 5 pounds of mass and 1,300 gallons of water. We were at the site today and are at the site tomorrow to complete our 3rd high vacuum extraction event on MW-3, MW-4, and MW-5. The 3rd QTR Site Status Update Report is currently being reviewed by the client, so you should have it shortly. (Sun) 02/15/08-Sun: DEc received the following email from Andrew Cullen of Penske, All, After much review, we have come to the conclusion that we will make an attemp to meet the requirements of the contractor and complete the necessary remediation work required by the NY DEC on two Saturday’s per month. However, I need all the parties to understand that our agreement specifically states we need 2 to 3 days per month to perform the necessary remediation. Limiting us to only two days per month may cause the remedial efforts to go past our original estimates. Moreover, MTA also agreed to reimburse Penske for any premium costs assoicated with work that must be scheduled outside of normal working hours (i.e. Monday to Friday 8:00am to 5:00pm) . If at any time we find the contractor is not cooperating, our remedial efforts will require more than 2 days per month, or any invoices for

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

premium costs or damage by the contractor are not paid in accordance with our agreement, we will alert the appropriate parties. I do not anticpate this happening, but given the events that have lead us to this point, I feel compelled to remind everyone of the terms and conditions of our agreement. (Sun) 03/04/08-Sun: Sun sent the following email to all the parties invloved, Penske may have to conduct remedial efforts more often than 2-3 days a month if project demands. The required frequency and nature of remedial efforts will depend on results of on-going remediation to be received in future. If current extraction method does not produce acceptable (to the NYSDEC) results, DEC reserves its rights to require Penske to undertake more aggressive remedial efforts. NYSDEC is not a party to any of the agreements between Penske and MTA, and reserves all rights under the existing Laws and Regulations. (Sun) 03/25/08-Sun: Sun received the 4th Quarter 2007 Site Status Update Report. (Sun) 07/03/08-Sun: Sun received from Heather Cloud of GES on the current site status: We are currently conducting quarterly groundwater monitoring and sampling. Our next groundwater sampling event is scheduled for this month. - Based upon the recent groundwater data, we are not seeing a reduction in the BTEX concentrations. See attached groundwater analytical tables. Therefore, the high vacuum extraction events don't appear to be overly effective at this time. We are currently evaluating alternate options to address the dissolved phase impacts. We are looking at potentially injecting sodium percarbonate or other potential oxidizers. The total BTEX concentrations are primarily comprised of benzene. We have seen great success in reducing benzene levels with sodium percarbonate at other sites. Also, this type of technology is not intrusive at all. With the MTA project going on, we are limited with the technologies that we can go with. - The 1st QTR QMR is currently being reviewed by Penske. You should have this report within the next week or so. (Sun) 8/4/08 - Carlson: Case reassigned to Carlson. Reviewed 1st Quarterly 2008 report. Wells sampled on 1/3/08. Maximum BTEX concentration 5,425 ppb (MW3), maximum MTBE concentration 64 ppb (MW3). Report notes that VEFR is not effective. Sent letter requiring submission of a new RAP and additional delineation by 9/12/08. 9/11/08 - Carlson: Approved extension to 11/14/08 for submission of a new RAP. Scheduled site visit for 9/25/08 to discuss potential locations for an additional delineation well. 9/30/08 - Carlson: Performed site visit on 9/25/08. Met with Heather Cloud of GES, Richard Saut of Penske, Charles Stives of Liro Engineering, as well as representatives from MTA and NYCT. Five monitoring/remediation wells have be destroyed during recent activities. A location was identified for the installation of an additional monitoring well. RAP due 11/14/08. 10/6/08 - Carlson: Reviewed update report dated 9/23/08. Wells sampled on 4/26/08. Maximum BTEX concentration 3,537 ppb (MW3). They are pilot testing sodium percarbonate. 3/20/09 - Carlson: Reviewed Site Status Report dated 2/25/09. Delineation well discussed during 9/30/08 site visit was not installed. Destroyed wells were not replaced. Sodium percarbonate solution was injected into MW-1, MW-2, and MW-4 on 9/20/08. Wells were sampled on 10/25/08. Decreased concentrations were found in MW1 and MW2, but BTEX increased in MW4. Spoke to Heather Cloud at GES. She will submit workplan. Received Remediation and Delineation Work Plan dated 2/10/09. 4/16/09 - Carlson: Meeting held with Penske. Mark requested the addition of another boring. 4/23/09 - Carlson: Meeting held MTA. Access to most of the site not possible for 1 year because the TBM is in operation.

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

Access to the sidewalk can be arranged. MTA will submit a construction timeline. 5/4/09 - Carlson: Received phone message from Sal McCabe - construction timeline will be submitted. 5/7/09: Received update report. Received email from Christopher Ward - mw5 has been located and will be abandoned (under future muck bin). 5/15/09 - Carlson: Received email. MW5 will be abandoned tomorrow. 7/1/09 - Carlson: Received cc of penske access request to sample wells on 7/25 7/2/09 - Carlson: Paul matthews of mta responded - requested sampling be delayed for one month. 7/2/09 - Carlson: I replied saying one month delay is ok. Construction timeline was not submitted as requested at the last meeting. 7/6/09 - Carlson: Received cc of penske access request to sample wells on 8/22/09. 9/18/09 - Carlson: Left voice message for Chris Ward to followup on case status. 11/5/09 - Carlson: Received cc of letter requesting access from MTA to sampling wells. Left voice message for Chris Ward to see if they were given access - need to get phone number for MTA contact Paul Matthews. 11/10/09 - Carlson: GES received access from MTA to sample wells. 2/12/2010: Received cc of letter from GES to MTA - access requested to sample wells on 2/20/2010. Spoke to Chris Ward. Update report will be submitted. 5/26/2010 - Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. 6/25/2010 - Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. Left message for MTA Philip McGrade to followup on status of construction. 6/29/10 - Carlson: Spoke to Paul Matthews at MTA (212-616-4462). TBM is still in operation 5 days/wk 24hr/day. No construction on weekends when GES samples wells. Remedial work on Saturdays would be very difficult due to access on site. Project completion scheduled for 2013. 7/27/2010 - Carlson: Meeting held with Penske on 7/27. NYSDEC to organize meeting with MTA to discuss access/remedial plan. 8/24/2010 - Carlson: Meeting held with MTA and Penske on 8/24. Penske to reinstall wells on a weekend. Wells to be covered with roadplates. Contractor will remove roadplates prior to remedial activitiy at the site. Penske/MTA/NYSDEC to perform site visit to confirm locations of new wells. 9/22/2010 - Carlson: Site meeting held to discuss well installation locations and procedures. GES will prepared updated site plan. 3-11-11. - Breen: Consultant, GES, sent in Site Status Update Report on CD today. Heather Cloud is Operations Manager. Sarken Dressler is the Staff Hydrogeologist. Report for 9610811 is on the same CD. 6/6/12 - Carlson: Reviewed Site Status Update Report dated 4/30/12. Wells sampled on 2/25/12. Wells destroyed in 2008 were not replaced. Max BTEX only 588 in MW-4. Max MTBE only 3 ppb in MW-8. Called MTA Philip McGrade at number in file. Voice mail indicated this is not his number anymore. Left message at this number for help getting status of MTA 7-line extension project at this site. 6/8/12 - Carlson: Left message for Phil McGrade (646 252 8315) to follow up on 7 train extension project. 7/11/12 - Carlson: See new spill 1201147 at site - MTA found a diesel/#2 fuel oil in tank shaft location. Tank was removed. 9/14/12 - Carlson: Reviewed 2nd quarter 2012 update report. Existing wells show low concentrations. Destroyed wells were never replaced. Continue to followup on status of 1201147. Need to contact MTA to get status of MTA project. 11/19/12 - Carlson: Spoke to Paul Matthews at MTA - he isn't involved in project anymore. New contact is Steve Asquith 646-252-8326. Left message for Steve Asquith. 11/26/12 - Carlson: Spoke to Steve Asquith (917-217-4765). He is arranging access with Penske/GES. Send him my email address, he will cc me on correspondence with penske/GES; 11/27/12 - Carlson: Emailed Steve

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

Asquith (sasquith@mtacc.info) - please cc me on correspondence with Penske/GES as discussed during yesterdays phone conversation. 12/11/12 - Carlson: Site meeting with Healther Cloud (GES) and Dave Mariani (Skanska). Well locations were marked out. Wells will be installed in january. 9/17/2013 - Carlson: Received FOIL request from Michael Silvermintz (michaelsilvermintz@gmail.com, 646-831-1443). Forwarded to DEC Silva for processing. 9/23/13 - Carlson: Received phone call from Steve Cambruschini - new owner will purchase this property and redevelop. They intend to sign a new stip. They plan on excavating impacted soil. He will email me for a FOIL request of file. Need to get contact info of new owner to send new stip. 10/10/13: received phone call from Christopher McMahon requesting FOIL review. Sent email to email Gloria Silva for FOIL review. Also, I requested he send me contact info for new owner so I can send new stipulation agreement. 10/28/2013 - Carlson: Reviewed 3rd Quarter 2013 Site Status Report. Monitoring wells gauged and sampled on 9/28/2013. Sheen (0.04ft) in MW-3R. Maximum BTEX concentration 1,410 ppb (MW-3R). 10/29/2013 - Carlson: Issued new Stipulation Agreement to 293 Tenth Ave. Corp, c/o Michael Silvermintz. Signed Stip due by 11/12/2013. RAWP due 30 days after effective date of the Stipulation. 2/21/14 - Carlson: Reviewed RAWP dated January 2014. Site to be excavation, dewatered, and redeveloped. Site will be excavated in former tank area to 11 ft below grade (4 ft below gw table). Excavation will be dewatered in order to extend below groundwater table. Hotspots encountered will be overexcavated, to the extent feasible. Two downgradient wells will be reinstalled in southern portion of property that will not contain a basement. Endpoint samples will be collected as per DER-10. Issued approval letter. 3/31/14 - Raphael Ketani. As of today, I am taking over case management from Ms. Carlson. The contact person is Chris McMahon at Langan Engineering, River Drive Center 1, 619 River Drive, Elmwood, NJ, 07407, (201) 794-6900. The proposed development of the site is as a 7 story combined commercial and office building. 4/9/14 - Raphael Ketani. I made an unannounced site visit. The site contained triple stacked office trailers on the West 26th Street side of the site. Standing from the outside, I could see that there was a lot of activity and equipment on site from the MTA construction next door for the 7 Train tunnel construction. So, I didn't enter the bounds of the site. However, I did take pictures of the site from the outside. I could see that workers were still finishing the brick work outside the MTA building that had been constructed above the tunnel shaft. 4/10/14 - Raphael Ketani. I tried to contact Steve Asquith (917) 217-4765 of the MTA to let him know that I was the new DEC project manager, but I could only leave a message. Later, I contacted Mr. McMahon (201) 794-6900. He told me that the MTA plans to be done with their work and off of the site by the second week in May 2014. Mr. McMahon added that the new owner intended to first demolish the former Fed Ex building that is adjacent to the east of the site during July 2014. Excavation of the entire site will take place to 14 feet below grade. Endpoint samples will be taken as per the plan included in the approved RAWP. I told Mr. McMahon that Langan should follow the soil contamination as much as possible before taking endpoint samples. This way, the samples will be low or non-detect with regard to any analytes and the whole process will go smoothly. Mr. McMahon stated that groundwater was about 8 or 9 feet below grade and asked about sampling the groundwater after the MTA leaves. I told him that this wont be necessary as Langan will dig out all of the

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

contamination below the water table. Mr. McMahon stated that the beginning of redevelopment is planned for either September or October of 2014. I asked Mr. McMahon to send me the endpoint sampling map with a cover letter describing what will take place regarding the endpoint sampling and sample processing. I added that, later, the DEC will need the letter of acceptance from the facility that will receive the soil. Also, I stated, the DEC will need a letter from the facility that will accept the contaminated water that is collected. Mr. McMahon stated that once they know where everything will go, then he will send these letters. After this point, I said, the DEC will need a schedule describing the excavating, endpoint sampling, sample processing, foundation construction and so forth. Mr. McMahon said that he will send this to the DEC. At the end of our conversation, Mr. McMahon asked about the request by the owner for a change in the Stipulation Agreement whereby Penske is let off of the hook. I told Mr. McMahon that this is something Lou Oliva, Region 2 Chief Counsel, will have to work out with Penske. With that, the conversation ended. Mr. Asquith (917) 217-4765 called me back. He said that Skanska, the construction company building the ventilation shaft, is presently cleaning up the site. They told him that they expect to be off of the site by the end of April 2014. 5/2/14 - Raphael Ketani. I reviewed the First Quarter 2014 Site Status Update Report dated 4/29/14 that was submitted by GES. Groundwater sampling took place on 3/15/14 for wells MW-1, MW-2, MW-3R, MW-4, MW-6 to MW-8 and MW-10. MW-9R was not sampled as MTA equipment was over it. There was 0.02' of product in MW-3R. All of the analyses were for just BTEX. MW-1 had results from non-detect to just above the TOGS 1.1.1 standards. MW-3R had the results 660 ppb total xylenes, 913 ppb ethylbenzene, 95.5 ppb benzene, 13.1 ppb toluene. MW-4 results were 237 ppb ethylbenzene, 215 ppb benzene, 18.4 total xylenes, 10.7 ppb toluene. MW-10 had 2 non-detects and 2 very low hits. For MW-2, MW-6 to MW-8, the results were either entirely non-detect or mostly non-detect with one very low hit. MTBE varied in concentration from mostly non-detect to 8.98 ppb. Quarterly sampling is planned for June 2014. 5/19/14 - Raphael Ketani. Today I received a copy of the signed Stipulation Agreement from 293 Tenth Avenue Corporation. It was signed by Michael Silvermintz, President of the corporation, on 5/2/14. I hand delivered the Stip to the Region 2 legal division. According to the schedule in the approved Remedial Action Work Plan dated 1/24/14, the remedial activities are anticipated to take 4 months beginning in October 2014. Later, I was informed that the DEC needed the original signature page in order to make the executed Stipulation Agreement. I contacted Mr. McMahon (201) 794-6900 and asked him to have his client send the original signature page with Mr. Silvermintz' original signature as soon as possible by regular mail. Mr. McMahon agreed to do this. 6/13/14 - Raphael Ketani. The Stipulation Agreement with the original signature of the president of 293 Tenth Avenue Corporation, Mr. Silvermintz, was given to me today. 6/17/14 - Raphael Ketani. The Stipulation Agreement was submitted to the Region 2 legal division for processing. 6/23/14 - Raphael Ketani. The Stipulation Agreement was signed by Venetia Lannon, Region 2 Director, and the original was sent to Mr. Silvermintz. 8/1/14 - Raphael Ketani. I reviewed the second quarter 2014 groundwater monitoring report for the site. The document was titled Site Status Update Report and dated 7/31/14. On 6/21/14, groundwater sampling took place at 6 onsite wells. Groundwater elevations were from 6.04' bgs at MW-8 to 6.71' bgs at MW-6. Flow was to the south. The wells sampled were MW-1, 2, 4, 6, 7

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

and 8. Wells MW-3R, 9R and 10 were inaccessible at the time. Well MW-5 had been abandoned some time ago. The VOC results for wells MW-1, 2, 6 and 7 were entirely non-detect for BTEX and MTBE. The sample from MW-8 had hits just above and just below the TOGS 1.1.1 standards. The results for MW-4 had 260 ppb of benzene and 424 ppb of ethylbenzene. In addition, a sample was taken from IW-2R on 3/21/13 and had 3530 ppb of benzene. Why this well was not sampled again was not explained. The contamination in the groundwater at MW-4 needs to be addressed. IW-2R needs to be sampled again. Also, wells MW-3R, 9R and 10 need to be made available for sampling, given that their loss is significant as there are not many wells for sampling.
Additionally, I checked the property database ACRIS for the current ownership information. The property is still owned by 293 Tenth Avenue Corporation at 5 Rosewood Lane, Wesley Hills, NY, 10901. The property block and lot are 697 and 56. There is a UCC1 with 540 West 26th Street Property Debt Investors IIA, LLC at 10 East 53rd Street, 37th Floor, NY, NY, 10022. 8/4/14 - Raphael Ketani. A letter was sent today to Mr. Silvermintz of 293 10th Avenue Corporation. In the letter, I stated that the work plan was overdue and that 293 10th Ave was in violation of the Stip. I added that if the work plan is not received by August 22, 2014, then the Department will take legal action. 8/28/14 - Raphael Ketani. Mr. McMahon (201) 794-6900/cell (201) 218-2339 had called and left a message that he wanted to talk to me about the site. I tried to return his call, but could only leave a voice message. 9/8/14 - Raphael Ketani. I spoke to Mr. McMahon (201) 794-6900/cell (201) 218-2339 today about future monitoring work at the site. He said that, right now, the owner is having trouble with the tenant of the building on the other lot. He refuses to move. So, the excavating has been pushed back to March 2015. Mr. McMahon stated that the MTA had destroyed all but two wells on the truck leasing site. He proposed that groundwater sampling be stopped as all of the contamination will be removed by the excavating. The excavating will include the areas of MW-2 and IW-2R, the two most contaminated locations. I asked Mr. McMahon whether end point samples will be taken. He said that the sides of the pit and the bottom will be sampled as per the guidance in the DEC regulations. I told him that the DEC will need manifests for all of the material that is removed. He said that we will get copies of every manifest. I told Mr. McMahon that this will be the approved plan of action for the foreseeable future. With that, the conversation ended. Later, Mr. McMahon sent me an e-mail clarifying and memorializing the excavation plan in more detail. He included 3 figures with the e-mail. 7/9/15 - Raphael Ketani. As I hadn't received any information about the spill case in some time from Mr. McMahon, I sent him an email requesting an update. Mr. McMahon sent a response email today: Progress at the site has been advancing; however, our schedule may have been a bit aggressive when we last spoke. The existing building demolition is nearing completion and we are working with the NYC TA to clear up a couple of issues regarding the building plans and the influence with their neighboring building and subway tunnel. Those issues are supposed to be resolved within the next two weeks and the site will pull their building and start construction immediately thereafter. I actually had put it in my mind to give you a heads up today or tomorrow that construction was going to begin shortly to give you a little advance notice if you were interested in visiting during construction/remediation. My client is VERY eager to start the project and has already signed a lease for

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

80% of the building that carries very heavy penalties for not meeting certain deadlines that are driving the project forward at this point. I am certain that barring further issues with TA that we will be mobilizing to the site within weeks. 7/10/15 - Raphael Ketani. I responded today by email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] and stated that the Department requires a report showing the work that had taken place to demolish the building, copies of all manifests for all materials that are removed from the site, copies of manifests for asbestos and asbestos contaminated material disposal - the receiving facility must be permitted for asbestos and the Department needs a copy of this permit, pictures of the demolition and excavation work, end point sample results, groundwater grab sample results (if any samples are taken), manifests for all liquids, contaminated soil and clean soil removed from the site and maps showing where the end point samples were taken. 8/20/15 - Raphael Ketani. Mr. McMahon (201) 398-4535/cell (201) 218-2339 had called and left a message yesterday and I returned his call today. He stated that preliminary construction had begun at the site. However, he stated that the building that was going to be demolished was not on or part of the spill site. It was on an adjacent property. I told him that, in this situation, he didn't need to send the Department any manifests or information regarding the demolition. He added that the groundwater would be prevented from entering the site by the construction of a barrier wall around where the basement would be. A machine would be used which would auger down 10 feet below grade. The auger will have holes in it. Once the auger reaches the target depth, then concrete will be pumped down the auger and the auger withdrawn. This will leave a column of concrete. Mr. McMahon mentioned that this would be like creating a secant pile wall, except that there would be more soil left between the piles. They would auger all around the proposed basement area. Any contaminated soil and groundwater will be collected and sent to appropriate disposal sites which heat the materials as a means of disposal. I told Mr. McMahon that this sounded alright to the Department. 12/1/15 - Raphael Ketani. Melissa Ng, Senior Staff Engineer from Langan (212) 479-5490/mng@langan.com sent Ryan Piper of the Spills Unit an email requesting information regarding the site as she was writing a Phase I for another site nearby. I sent her a copy of the case notes. 12/2/15 - Raphael Ketani. Ms. Ng contacted me directly by email and requested the 1/29/14 Remedial Action Work Plan for the site. I sent her the plan. 12/11/15 - Raphael Ketani. As there have been no updates since 8/20/15, I sent an email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] requesting information regarding the demolition of the building and the excavating of the site. 6/23/16 - Raphael Ketani. As there have been no reports submitted or progress updates, I sent an email to Mr. McMahon requesting an update, soil and groundwater analytical data, disposal manifests and pictures. Mr. McMahon responded to my email. He stated the following: The majority of the material at the site has been removed in conjunction with the remedial efforts at the site associated with the foundation construction. To date, we have collected 29 post-excavation soil samples and have a single sample that remains to be collected. Of the 29 samples, we have results for 27 of them. Based on a preliminary review of the results, there have been no exceedances of the CP-51 criteria. As of today, trucking is still occurring occasionally at the site. All petroleum impacted material has been shipped to the Bayshore facility in Keasby, NJ for

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

treatment. We have yet to receive the manifests from the foundation contractor, but they were requested last week. I anticipate that it will take a few weeks to compile them. I have provided a link below for you to access recent pictures (6/17/16) of the site and I d be happy to speak with you regarding the project. http://clients.langan.com/lph/default.aspx?postTransaction=1231963216 Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] included a list of 15 pictures which were available at the internet link. Two pictures, 6801 and 6804, showed cylindrical objects sticking up in groups of 3 or 5 with some showing rebar sticking out of them. I sent an email to Mr. McMahon asking him what these structures were. He replied by email that they are concrete and steel filled caissons, which are drilled foundation elements that provide support to the building, several dozen were installed as part of the building foundation construction. The purpose of the picture is to show the waterproofing going beneath the pile caps and grade beams at the site. 9/19/2016 - Colton McPartland. Scanned paper file for DEC Raphael Ketani and placed on computer desktop for future bulk upload once naming convention is received from DEC Jane Obrecht. 9/22/16 - Raphael Ketani. I spoke to Mr. McMahon today by phone. He stated that the foundation has been constructed. Twenty three thousand cubic yards of soil was removed. The contaminated soil was taken to Bayshore for burning and recycling. Thirty post-excavation soil samples were taken. The results were non-detect for VOCs with only a small number of SVOCs. The last groundwater sample was completely non-detect. Samples taken from the dewatering system were clean. Another groundwater sample will be collected very soon. Two 550 gallon tanks were removed and will be registered. Two wells will be installed outside the foundation footprint. A private school will be constructed in the lower part of the building. 2/27/17 - Raphael Ketani. As no communications nor reports had been received in many months regarding the remediation of the site, I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] requesting the documents. A due date of 3/17/17 was set for the submission of the remediation report and the PBS registration. 4/12/17 - Raphael Ketani. I sent an email to Mr. McMahon informing him that the reports were overdue and requesting their immediate submission. Mr. McMahon called me today regarding my email today. He stated that the report was delayed because they wanted to collect a second round of groundwater samples. They did collect the samples and found that one sample had 230 ppb of benzene. So he will recommend quarterly sampling to the client. He added that he had most of the documentation for the report and that it is in draft form right now. I asked him when the DEC might receive the report. He stated that he believed Langan could send it by the end of next week. With that, the conversation ended. 6/16/17 - Raphael Ketani. As the analytical results report was never sent, I sent an email to Mr. McMahon stating that 293 Tenth Avenue Corporation was in violation of the Stipulation Agreement. I added that we required the submission of the report by June 30th, 2016 or else fines and legal action can and may be taken. 6/21/17 - Raphael Ketani. Mr. McMahon (973) 560-4900 called to apologize for not sending the analytical results report. He said that the DEC will receive the report next week. He added that the latest groundwater sample was taken on 6/6/17 from the one remaining well which is outside the secant/foundation wall. He sent me an email with the VOC and SVOC analytical results table. All of the analytical results had decreased significantly, except for benzene. It was 230

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

ppb in the previous sample and was now 240 ppb in the current sample. He said that he didn't understand why only benzene remained high. He added that the earlier low analytical results for benzene were due to groundwater being pumped from the site. The pumping system was turned off during late 2016 and after this the benzene concentration rose. I told Mr. McMahon that, as a result of the cessation of pumping, the water table at the well may have also risen into some more contaminated soil and, thus, more oil dissolved in the groundwater. However, I could not explain why benzene would be affected, but not the other analytes. Mr. McMahon stated that the well will be sampled 3 months from now in order to see what the long term concentration trend is. I told him that would be fine. With this, the conversation ended. 6/30/17 - Raphael Ketani. I reviewed the Langan Engineers June 2017 DRAFT Remedial Action Report. The site will be developed by constructing a 7 story tall building which will house various facilities, including a multifloor private school. Six USTs containing gasoline and diesel were removed from the site. As a deep foundation was required for the building, a deep pit was dug which included removing 219 tons of petroleum contaminated soil. Initially, a groundwater monitoring well array was installed and elevated concentrations of various analytes were detected in the samples. Site investigations took place during 2002, 2003 and 2004. Wells MW-1 to MW-10 were installed both on and off site. Vacuum extraction events and LNAPL recovery took place. This resulted in the collection of 174.63 gallons of product. Injection wells IW-1 to IW-4 were installed during December 2004. Hydrogen peroxidie, ozone, sodium persulfate, sodium percarbonate and surfactant were injected from 2005 to 2008. The vacuum events were completed during 2007 and 2008 and recovered 4,827 gallons of oil contaminated groundwater. Also, 8.80 lbs. of product were collected in the vapor phase. Quarterly monitoring took place from October 2003 to March 2013. During March 2013, 12 wells were sampled. About 0.01 feet of product was found in MW-3R. BTEX was present in all of the on site water samples and in the off site sample from MW-8. LNAPL thickness varied from 0.01 feet to 0.18 feet and historically appeared in MW-1, MW-4 and MW-5 during monitoring events which took place from 2004 to 2006. The site was remediated in accordance with the January 2014 RAP. Soil and fill were excavated to 11 feet below grade. A total of 364 tons of non-hazardous soil and fill and 11,378 tons of petroleum contaminated soil and fill were removed. The materials were sent to Capital Development in Bangor, Pennsylvania and Bayshore Soil Management in Keasbey, New Jersey. Grace Preprufe 300R, Grace Preprufe 160R and Grace Bituthene 4000 vapor barrier sheeting with a minimum thickness of 20 mil was installed as part of the foundation construction. Grace Preprufe 300R vapor barrier with a thickness of 46 mil was installed beneath the cellar slab, elevator pit slab, first floor slab and on the interior of the elevator pit sidewalls. Grace Prepruf 4000 vapor barrier with a thickness of 62 mil was installed on the exterior elevator pit sidewalls. Grace Preprufe 160R vapor barrier with a thickness of 32 mil was installed on the exterior of the western foundation sidewall and Grace Bituthene 4000 vapor barrier with a thickness of 62 mil was installed on the exterior of the northern, eastern and southern foundation sidewalls. A Health and Safety Plan (HASP), Community Air Monitoring Plan (CAMP), Soil Materials Management Plan (SMMP), Stormwater Pollution Prevention Plan (SPPP) and groundwater dewatering were conducted during the remediation of the site. Utilities and easements were located prior to any invasive

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

work. Excavated soil and fill were screened for contamination. Suspect contaminated soil was stockpiled on site and covered prior to delivery to the disposal facilities. Each dirt hauling truck was inspected for contaminated soil on the undercarriage and tires prior to leaving the site. If contaminated material was present, then it was removed before the truck entered the street. The USTs were encountered at about 7.5 feet below grade in the eastern part of the site. They were 42 inches in diameter and 87 inches long. AARCO removed the two 550 gallon gasoline USTs on 9/26/15. About 630 gallons of mixed liquid was collected and disposed of at Tyree Services Corp. in Farmingdale, NY. Residual sludge and water was drummed and taken to Triumvirate Environmental in Astoria, Queens. The USTs were cleaned and cut up and sent to TNT Scrap in Brooklyn, NY. Thirty soil end point samples (PE-1 to PE-30) were taken from the sidewalls and the bottom of the tank graves from 3/31/16 to 6/28/16. The samples were sent to York Analytical Labs for processing via methods 8260B and 8270C. The analytical results were compared to the CP-51 standards. Five groundwater dewatering samples were collected before treatment from 6/22/16 to 8/11/16 and sent to the lab. The samples were processed via methods 8260B and 8270C. On 7/27/16, two permanent monitoring wells were installed (LMW-1 and LMW-2) to the south of the southern cellar foundation and soilcrete walls. The borings were drilled to 15 and 16 feet below the ground surface. Each well was constructed with a 10 foot long 10 slot screen. Post remediation monitoring was conducted using 5 onsite wells. Wells MW-6 to MW-8 were situated upgradient and across West 26th Street from the site. LMW-1 and LMW-2 were sampled on 8/11/16, 3/16/17 and 6/6/17. MW-6 to MW-8 were sampled on 6/1/17. Table 1 indicated that the results for the PE series of soil end point samples were almost entirely non-detect for VOCs and SVOCs. Table 2 showed that the influent water sample results for Discharge 1, 2 and 5 were almost entirely non-detect for VOCs and SVOCs. The results for Discharge 3 and 4 were more limited, but still showed that there were no detections. The groundwater sample results for LMW-1, LMW-2, and MW-6 to MW-8 were displayed in Table 3. LMW-1 had consistent very low to high (max. 240 ppb) analyte exceedences, but, with the exception of a sample from LMW-2 (3/16/17) and one from MW-8 (6/1/17), the VOC results for the other samples and the SVOC results for all of the samples were almost entirely non-detect. 7/6/17 - Raphael Ketani. I reviewed the Langan Engineers FINAL Remedial Action Report dated 7/5/17. The contents of the FINAL report appeared to be the same as in the DRAFT report. I approved the report without comment. 10/25/17 - Raphael Ketani. I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com requesting the latest groundwater analytical data. 12/8/17 - Raphael Ketani. I sent an email to Mr. McMahon requesting the latest groundwater data. 12/14/17 - Raphael Ketani. Mr. McMahon sent me the 12/5/17 and 12/6/17 groundwater sample analytical data for the site. Samples were taken from MW-1, MW-2, MW-6, MW-7 and MW-8. Locations MW-6 to MW-8 were upgradient and across the street to the north. MW-2 was in the southwestern quarter of the site. MW-1 was in the southeastern quarter of the site, but almost in the center of the site. The VOC exceedences for the samples from MW-2 and MW-6 to MW-8 were either none or no more than 19.2 ppb. However, the MW-1 12/5/17 sample had 10 VOC exceedences. Most of the exceedences varied from 6.3 ppb to 73.1 ppb, but benzene was 238 ppb. Mr. McMahon called me on the phone and we discussed the results. We agreed that the benzene result for MW-1 stood out. I commented that

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

it was too high to close the case with. We looked at the historical trend for benzene from MW-1. The decreasing trend was noted. I asked Mr. McMahon whether any treatment solutions has been injected into MW-1. He stated that Langan had not done this. I told him that the Department will require that another round of groundwater sampling take place in order to see whether the decreasing trend continues and whether the benzene concentration has decreased further. He agreed to do more sampling. I also asked him to include a Kendall-Mann trend graph in the next monitoring report. With that, the conversation ended. "

Remarks: "CALLER RESPONDED TO ABOVE LOCATION TO REMOVE FUEL TANKS. UPON REMOVAL SOME SOIL CONTAMINATION DISCOVERED. TANKS REMOVED AND SOIL EXCAVATION IN PROGRESS. NO CALL BACK REQUESTED."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110009467406

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Cross ref #9304676 1/21/2004 Sangesland contacted several parties associated with the spill in this building. Apparently on 1/20/2004 a leak was discovered in an elbow of the fill line in the basement Tunnel Room of this address. Building Manager: Harold Brody - Responsible Party According to Paul at New York Combustion (718-763-6100), Mr. Brody called NY Comb. to ask them to come and fix the leaking pipe. Paul informed Mr. Brody that a spill would need to be reported. Neither Mr. Brody or Paul reported the spill. Romeo Santos at Don Carlo Environmental (718-857-2100) was hired either evening of 1/20 or morning of 1/21 to do the actual clean up of the oil. Mr. Santos says that he called in the Anonymous spill report #0311818 earlier this morning and then he sub contracted the cleanup work to Petroleum Tank Cleaners. All clean up work is complete. Paul from New York Combustion finished the pipe repair work. 1/23/2004 PTC called to say that they in fact DID NOT complete the clean up at the site. PTC was hired only to vac out the liquid portion of the spill. PTC was told by Don Carlo Enviornmental that they will be responsible for the final cleanup. Don Carlo says the clean up was done by PTC and DC will not be doing any further work. In frustration, Sangesland sent DEC Enironmental Control Officer Paul Blanton to visit the site. He asked why the owner or consultants failed to call in the spill within the 2 hours required by law. There was considerable finger pointing and no one took responsibility for the error. There was some discussion of how the oil went into a second unused tank. No ticket was issued. 3/31/2004 As of this date, the case is still open. No follow up documentation has been submitted to the DEC to close out this case. 10-06-05: NYCT performing borings for #7 line extension. Two boring performedin the area of this facility noted strong contamination (04-06966 & 04-07003). Boring logs and notes in eDocs. MCT 3/30/2006 Sangesland closed this case and referenced this to spill #9304676. All tanks on site were removed. Impacted Soil was excavated. Still some impacted GW as of 10/05 Consultant will take another round of GW samples in 4/06. This spill is closed "
Remarks:	"718-857-1800- DC Envirormental phone, this is the only info I could get out of caller. Might be a leak in the fill line."

Contact Name:	TODD HASSOLD
DEC Memo:	"08/28/11-Hiralkumar Patel. 9:45 PM:- visited site. met Todd from Recovery. inspected boiler room. found water and oil in boiler room. Todd mentioned that they could not inspect the entire boiler room as water in rear of the boiler room is deeper and water level was rising. spoke with Mario, building super. he mentioned that there are no drains in the boiler room floor and only one sump pit in entire boiler room. sump pit has four pumps inside it. they had 3,000 gal vacuum truck which can not hold all the water/oil in the boiler room. also, they were not sure about condition in rear of the boiler room. absorbent pads were on water. as water level was rising, Todd was worried about impact to electric panels which is about 10 higher than water level in boiler room. Todd requested to turn on sump pumps to throw water only from bottom into city sewer system. he mentioned that by lowering water level, oil may impact the wall and other structure, but that can be cleaned easily with power wash at later time. but he was worried about impacting electric panels and other part of basement as water level was rising. after discussing with DEC Austin, approved Todd's request to turn on sump pumps so they can

601 WEST 26TH STREET (Continued) **S104275653**

lower the water level in boiler room. after they remove most of the water (only), they will remove remaining water/oil into vacuum truck. asked Todd to secure sump area with absorbent pads and booms to prevent any oil get into city sewer system. also asked him to turn off pumps frequently to check boiler room for any unusual thing. asked Todd to call with update. Mario mentioned that the entire tank system is turned off. Mario Onichimiuk **building super** Ph. (917) 817-1927 Todd Hassold Recovery Environmental Services, Inc. PH. (973) 940-3144 (O) (973) 896-6185 (C) Fax (973) 940-3146 email: thassold@recoverysrvs.com 08/29/11-Hiralkumar Patel. 9:45 AM:- visited site. cleanup crew was still on-site removing oil. two sump pumps were still working. currently, contractor is skimming off oil from top of water. after water level dropped, super inspected the rear end of the boiler room and found two buckets were knocked down during flooding and caused spill. inspected tank room which is in garage area. site has two 20,000 gal #6 oil ASTs. no spill inside the tank room. boiler room is right underneath the tank room location. as per super, no leak noticed from any fuel piping. asked Mario to call back for re-inspection, once basement is dry. 5:09 PM:- received call from Tom from Recovery. he mentioned that during cleanup, they found oil/water separator in back of the boiler room. he requested a site inspection. 08/30/11-Hiralkumar Patel. 11:00 AM:- visited site. met Tom from Recovery. inspected boiler room. Tom mentioned that sump pumps were turned off yesterday night and when they left, area around sump was clean. but they found more oil this morning. during cleanup last night, they found oil/water separator in boiler room. inspected oil/water separator. found oil on top of oil/water separator, but no indication of any oil overflowed the separator. two pipes enters into oil/water separator. one pipe goes to a loading dock above the boiler room (contractor will find out where this pipe comes from) and second pipe goes into a tunnel located at the west end of the boiler room. there is an hatch boiler room ceiling in area where the oil/water separator inlet pipe crosses to loading dock. tunnel is located along the boiler room ceiling in west end of the boiler room. this tunnel runs east-west and then north-south. this tunnel structure is completely within building footprint and underneath the loading dock area. found oil leak from the northern most end of the tunnel. currently active tanks are located right above the northern end of the tunnel and currently active supply/return lines running aboveground in tunnel. no sign of leak found from currently active lines. found two sumps in the tunnel: first along the western wall of the north-south portion of the tunnel and another along the southern wall of the east-west portion of the tunnel. found a pipe coming out of the western wall of the tunnel in the area south of sump in north-south section. Tom closed the valve on this pipe and water flow into the separator was dropped. as purpose of this inlet pipe was unknown, asked Tom to leave valve open. Mario mentioned that there were three 20,000 gal #6 oil USTs abandoned-in-place behind the western wall of the tunnel (north-south section). found oil seepage from the northern wall of the ease-west section of the tunnel. as sump pumps in tunnel are connected to the oil/water separator, it looks like whatever oil seeped into the tunnel was thrown into oil/water separator. as there was no oil recovery from the separator, oil followed the water discharge pipe into the main sump. informed Mario that main sump pumps must not be used until the cleanup is completed as water coming into sump may be contaminated (dissolved phase). all water from basement must be disposed off as contaminated

601 WEST 26TH STREET (Continued) **S104275653**

material. as per Mario, the former 20,000 gal tanks were under the loading dock platform. Mario gave copy of tank abandonment documents. as per the documents: - Don Carlo Environmental abandoned three (3) 20,000 gal USTs on 07/10/2001. tanks were abandoned using foam and lines were discontinued and closed - Malbro Inc. abandoned three (3) 20,000 gal USTs in Aug. and Sep. of 2005. tanks and all associated piping were filled with lightweight cellular concrete slurry mixture during inspection, found a 3,000 gal diesel AST for emergency generator. Mario mentioned that emergency generator is located on first floor. during inspection, found a coned vault in boiler room containing high voltage lines. this coned vault is located on other side of boiler room, opposite of the main sump in the boiler room. met with Sandy Hahn, property manager. informed her that leak in the boiler room, could be left over spilled material inside the concrete vault (if any) around the former 20,000 gal USTs. due to heavy rain over the weekend (harricane Irene), water may have entered around the abandoned tanks and pushed oil into the tunnel which end up into main sump via oil/water separator. asked her to submit a scaled site map with old/current tanks, piping, tunnel, sumps (in passage as well as boiler room) and oil/water separator. asked her to find out purpose of the pipe that comes out from the old UST area. also asked her to investigate in the old tank area. RXR SL Owner LLC. **property owner** c/o RXR Realty 601 West 26th Street, Suite 1260 New York, NY 10001 Attn.: Sandra Hahn **property manager** Director of Operations PH. (212) 400-2440 (212) 924-3880 (917) 574-4085 (C) Fax (212) 727-3752 email: shahn@rxrrealty.com alternate addresses: 601-649 West 26th Street, 600-650 West 27th Street, 245-259 11th Ave, 198-218 12th Ave PBS #s: 2-600389, 2-604877, 2-607987, 2-611131 as per PBS #: 2-600389 (which is expired), site has/had following tanks: - three 20,000 gal ASTs in vault with access and currently active - three 20,000 gal #6 oil ASTs in vault with access and closed-in-place as per PBS #: 2-604877 (which is expired), site has one 10,000 gal diesel AST on legs. diesel tank installed in Apr. 2000. as per PBS #: 2-607987, site has one 275 gal waste oil AST on legs. as per PBS #: 2-611131, site has one 10,000 gal diesel AST in contact with imprevious barrier. tank was installed in Jan. 2000. other spills #: 9100519, 9106840, 9304676, 9412158, 0311818, 0406966, 0407003, 0911011 spill #: 9100519 was reported on 04/12/1991 as 150 gal #6 oil spilled onto basement floor. oil spilled as water entered into tank through fill line. case closed. spill #: 9106840 was reported on 09/25/1991 as #6 oil spilled into tnak room. case closed. spill #: 9304676 was reported on 07/14/1993 as 2,500 gal #6 oil spilled into tank and boiler room. case closed after investigation/remediation. spill #: 9412158 was reported on 12/12/1994 as 15 gal gasoline spilled onto road pavement. case closed. spill #: 0311818 was reported on 01/21/2004 as 4,000 gal #4 oil spill. spill was reported by anonynomous caller. spill was closed and merged with spill #: 9304676. spill #: 0406966 was reported on 09/23/2004 by NYC Transit. they found petroleum odors and contaminated soil in boring installed in front of 601 W 26th street. this boring was installed as part of 7 line extension project. case closed and merged with spill #: 0311818. spill #: 0407003 was reported on 09/24/2004 by NYC Transit. they found petroleum odors and contaminated soil in boring installed in front of 601 W 26th street. this boring was installed as part of 7 line extension project. case closed and merged with spill #: 0311818. spill #: 0911011 was reported on 01/12/2010 due to dielectric fluid spilled in vault (probably vault in boiler room). case closed. found

601 WEST 26TH STREET (Continued) **S104275653**

installing more monitoring wells) found around the western tank field - Emteque installed three (3) 4-inch monitoring well through the sidewalk equally spaced around the northeast corner of the intersection of 12th Ave and 26th street - three wells (MW-6, MW-7 and MW-8) were installed to a depth of 14 ft bg with 10 ft of screen - wells were set aprpox. 7 ft into the water table - no evidence of fuel oil contamination was identified in wells - soil samples collected at the water table during the well installation - no contamination found in soil samples collected during well installation - advanced five (5) soil borings (ETFSB-1 through ETFSB-5), to a depth of 12-16 ft bg, through the basement floor over the eastern tank field, collecting soil samples to a depth of approx. 4 ft below the groundwater table - soil samples collected at the water table during soil boring installation - no contmaination found in soil samples collected from soil boring in eastern tank field - 1 inch piezometers installed in three borings (ETFSB-1, ETFSB-2 and ETFSB-3) surrounding the tank field to the south and east - tunnel's wall contains groundwater on west side of eastern tank field - access was not provided to the north side of the eastern tank field - free phase product found on water in eastern tank field area - investigation revealed that contamination associated with leak from the house tank appears to be contained within the vicinity of the house tank between the south wall, the north adjacent tank, the western tank tunnel and has not migrated more than 10 ft east of the tank 4) 06/16/2003: Revised Proposed Petroleum Contamination Corrective Action Plan: - groundwater local to the western tank field is approx. 10 ft below the first floor slab, approx. 6 ft below surrounding grade and flowing predominantly westerly - groundwater lcoal to the eastern tank field is approx. 10 ft below the parking garage of the FBI unit and apparently not flowing, since the groundwater flow is restricted on its western margin by the tank tunnel and to the south and east by basement boiler room walls - a small local easterlly gradient in the vicinity of the plume around western tank field and also in eastern tank field is being induced by dewatering to prevent flooding of the building basement 5) Spill Closure Petition Report: <--------- missing 6) 05/12/2006: Spill Closure Petition Report - Update #1: - collected groundwater samples from well MW-1 and recovery wells RW-1, RW-2, RW-3 and RW-4 - found minor VOC contamination during second round (maximum 46 ppb Benzene in RW-1) - removed almost 53,000 gal of contaminated groundwater and 1,637 tons of soil from the site
- review of documents under spill #s: 0406966 and 0407003
+-/+-/+-/

601 WEST 26TH STREET (Continued) **S104275653**

petroleum odor and black staining were noted in the soil (PID: 83 ppm) at 6 ft bg. boring was extended to 11 ft bg. strong petroleum odors persisted in entire boring length (PID from 60 to 70 ppm). boring SB2-4 was temianted at 11 ft bg (due to obstruction) and was abandoned. based on notes from MTA, both borings were installed on eastern property line, but the #6 oil storage tanks (associated with spill #: 9304676) were located along the western side of the property. contamination found in borings under the west sidewalk of 11th ave, could be result of petroleum release from other tanks on property (owned by tenants).

601 WEST 26TH STREET (Continued) **S104275653**

(C) Fax (212) 867-9715 email: mborello@ebsllcnyc.com based on given information, a FBI rents building space on north side of eastern tank vault. 10:03 AM:- left message at FBI (212-384-5000). 09/01/11-Hiralkumar Patel. 8:00 AM:- received message from Mr. Borello. 12:25 PM:- spoke with Mr. Borello. he mentioned that based on available information, the new tanks are located right above the old western tank vault. they have collected water sample yesterday. he will submit scaled site map and water sample result by 09/08/11. 12:58 PM:- spoke with Eric at Emteque regarding missing initial spill closure report. Eric will check file and submit report, if available. Eric mentioned that they did Phase I report for Chase bank (lender) in 2010. Eric Telemaque Emteque PH. (212) 631-9000 email: eric@emteque.com 9/2/11-Vought-Received call from and spoke to Todd Hassold (Recovery Environmental Ph:973-896-6185) who noted that he had urgent issue on hand in that he was recovering approximately 25,000-gallons of oil/water mixture a day from the oil/water separator (source of water was seepage from adjacent Hudson River) and source of oil still undetermined. Hassold noted the liquid is mostly water with minor petroleum sheen. Hassold noted also that he was in the process of submitting a NYCDEP Discharge Permit Application to dispose of the water from the oil/water separator. Hassold noted that Clean Harbors was closed (disposal facility) and that he did not have the storage capacity for the 25,000-gallons per day over the weekend and such was requesting an emergency permit to discharge to the sewer. Vought spoke to DEC Elburn who noted that due to Hurricane (causing of flooding) that DEC had an emergency permit reqiuirement exemption and as such no permit was needed for DEC. DEC Elburn noted however that NYCDEP also needed to be contacted (NYCDEP Leslie Lipton Ph:718-595-4730). Hassold called Lipton and as per Hassold, Lipton did not respond but Hassold was told by another DEP employee to call 311. Vought suggested that Hassold send an email with a description of the issue to DEC Vought as soon as possible so that he may forward email to DEC Patel, Elburn and DEP Lipton. Vought received email from Thomas Domke (VP Operations Recovery Environmental) confirming phone conversation but not including any details of issue. Vought sent reply email with cc to DEC Patel, Elburn and DEC Lipton that a full description is needed and that Vought on vacation for next two weeks and as such all parties should be copied on full description. Vought and all parties received full description and Vought reviewed description with DEC Water Unit Elburn and sent reply email that DEC had no objections to discharge to sewers as long as NYCDEP requirements were met also. 09/07/11-Hiralkumar Patel. 10:41 AM:- received call from Todd. he mentioned that NYC DEP approved water discharge to city sewer. now the entire boiler room is dry. 10:50 AM:- received call from Mr. Borello. he mentioned that no dissolved contamination found in water sample collected from boiler room last week. asked him to submit result for review. he also mentioned that they are waiting for result of water sample that was collected to get DEP permit to discharge water from oil/water separator into city sewer system. currently, they are planning to drill some holes in tunnel walls for further investigation. Mr. Borello will submit scaled site map today. 12:21 PM:- received message from Eric. he did not found spill closure report prepared probably in Oct. 2005. 09/08/11-Hiralkumar Patel. 10:22 AM:- received email from Mr. Borello including site map (including oil tanks on property), desgin of oil/water separator system and groundwater sample result. no dissolved contmaination

601 WEST 26TH STREET (Continued) **S104275653**

found in water sample. as per the submitted site map, the entire site has total of fifteen (15) tanks: - one 5,000 gal tank at the end of garage ramp (from W 27th street), owned by property owner - two 20,000 gal tanks (currently in-service #6 oil tanks) in loading dock area, owned by property owner - one 10,000 gal tank in loading dock area, owned by Broadview - one 3,000 gal tank (diesel tank) in loading dock ramp, owned by Level III - four 275 gal tanks on 3rd floor, owned by property owner - four 275 gal tanks on 4th floor, owned by Broadview - two 250 gal tanks on 6th floor, owned by Level III reviewed PBS record again. PBS #: 2-600389 - three 20,000 gal in-service #6 oil ASTs in vault with access and three 20,000 gal closed-in-place #6 oil ASTs in vault with access. this PBS registration has expired in July 2006. as per PBS record, tanks owned by previous property owner. as per available information, the remaining three tanks were also closed-in-place in 2005. this PBS registration needs to be renewed/updated/closed with correct information (tanks closed/new property owner). PBS #: 2-604877 - one 10,000 gal diesel AST on legs/saddles. as per PBS record, tank owned by Wiltel Communications Group, Inc. this registration has expired in Dec. 2010. this registration needs to be renewed. PBS #: 2-607987 - one 275 gal waste oil AST on legs/saddles. as per PBS record, tank owned by Verizon. registration currently active. PBS #: 2-611131 - one 10,000 gal diesel AST in contact with imprevious barrier. tank was installed in Jan. 2000. as per PBS record, tank owned by Level III Communications LLC. registration currently active. this registration may need to be updated because as per Mr. Borello, Level III owns a 3,000 gal diesel AST (which is located in loading dock ramp). 2:27 PM:- spoke with Timothy Kimball at Level III Communications. he confirmed that Level III owns 10,000 gal diesel tank which is located in loading dock area and a generator is located next to the tank. he mentioned that they don't own 3,000 gal diesel tank. he also confirmed that they don't have any day tanks on 6th floor. during conversation, he mentioned that Level 3 Communication acquired Wiltel Communications Group in 2007-2008. informed him that the tank registration under Wiltel Communication (for 10,000 gal diesel tank) has not been closed out properly. asked him to close the PBS registration that is under Wiltel Communications's name. Timothy Kimball Level 3 Communications LLC. (also owns Wiltel Communications Group) Ph. (720) 888-4744 email: timothy.kimball@level3.com 2:51 PM:- left message Gregory Myka (315-432-8486) at Verizon to confirm that Verizon only owns one 275 gal waste oil tank at the site. 3:05 PM:- left message for Mr. Borello and informed him that tanks' information provided on map is not accurate. 4:36 PM:- received message from Mr. Myka from Verizon. he confirmed that they have only one 275 gal waste oil tank at the site. they don't have any other tanks. 4:42 PM:- received message from Mr. Borello. he mentioned that he got tank's information from chief engineer. but they will do site survey and talk to each tenant to find out exact number of tanks and its owners. 09/09/11-Hiralkumar Patel. 9:18 AM:- visited site. inspected boiler room. no oil or sheen found on water in entire boiler room. boiler room walls/floor and other oil impacted structures were cleaned. found clean water going into main sump from oil/water separator. frac tank was on W 27th street, but wasn't connected to main sump. 9:27 AM:- spoke with Mr. Borello. informed him that there are multiple PBS records for the subject site. he requested copy of PBS records. 3:49 PM:- sent email to Mr. Borello including PBS records. asked him to submit all on-site tank's information (location, size, owner etc.) by

601 WEST 26TH STREET (Continued) **S104275653**

the end of 09/16/11. informed him that PBS registrations must be updated/renewed immediately. email copied to Ms. Hahn. 09/14/11-Hiralkumar Patel. 10:43 AM:- spoke with Todd. he mentioned that insurance company requested an estimate for investigation. Todd is preparing the estimate and will submit to insurance company. 09/19/11-Hiralkumar Patel. received PBS application package in FedEx. as per submitted application, site has following tanks: - two 20,000 gal #6 oil ASTs in loading dock area; tank owned by property owner - one 5,000 gal #2 oil AST in basement (at end of garage ramp from W 27th street); tank owned by property owner - one 250 gal #2 oil AST in generator room on 3rd floor; tank being used to start up the generator; tank owned by property owner - one 250 gal #2 oil AST on 3rd floor along 12th Ave side by Verizon; tank being used to start up the generator; tank owed by property owner - two 250 gal ASTs on 3rd floor along 11th ave side; both tanks are closed-in-place; tanks owned by property owner - one 10,000 gal diesel tank in loading dock; tank owned by Broad View Network - one 250 gal #2 oil tank under the generator in central office on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank closed-in-place in central office on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank under the generator in data center on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank closed-in-place in data center on 4th floor; tank owned by Broad View Network - one 10,000 gal diesel tank in loading dock (PBS #: 2-611131); tank owned by Level 3 Communication - one 247 gal waste oil tank in basement (PBS #: 2-607987); tank owned by Verizon - one 1,000 gal waste oil tank in basement; tank owned by FBI - one 500 gal oil tank on 2nd floor; tank owned by FBI there is no information about 3,000 gal AST observed in loading dock area. 09/20/11-Hiralkumar Patel. 12:18 PM:- received message from Mr. Borello. 4:29 PM:- spoke with Mr. Borello. he mentioned that they drilled some holes in both side tank vaults and found oil pouring out from holes. as such they will break larger access to these vaults for further inspection/cleanup. he will send pics that he collected today. he will also schedule a site inspection, once larger holes made in wall. 4:31 PM:- receive email from Mr. Borello including a pic and a video showing oil pouring out of vault. 09/23/11-Hiralkumar Patel. 1:18 PM:- received call from Todd. he mentioned that they drilled small holes in both vaults and found product coming out from eastern vault only. only water came out through holes in western vault. based on that observations, they made 18 inches by 24 inches hole in western wall of the eastern vault (vault towards the boiler room). found free product in the vault. Todd mentioned that the hole is about 2 ft above the product level in vault, so they are not concerned about overflow through this hole. as there is heavy rain for today and tomorrow, asked Todd to secure the hole to prevent any spill in boiler room, if water level rise in vault. scheduled a site inspection at 3:30 PM on 09/26/11. 1:55 PM:- spoke with Mr. Borello. informed him about possibilty of oil overflow from hole in eastern vault due to heavy rain. Mr. Borello has already spoken with building management/super and they will inspect area frequently. if any spill noticed, they will call contractor for cleanup. also informed Mr. Borello about no information on PBS application about 3,000 gal tank observed in loading dock area. Mr. Borello will confirm that and will submit revised PBS application. 09/26/11-Hiralkumar Patel. 3:30 PM:- visited site. inspected hole made in eastern tank vault area. found free product and water in hole. the area behind the wall was filled with construction debris

601 WEST 26TH STREET (Continued) **S104275653**

and filled with large concrete/stone pieces. met Ms. Hahn, Todd, Tom and Mike. informed them that the department requires delineation of soil/groundwater contamination on north and east side of eastern tank vault. no investigation needed on west and south of the eastern tank vault (as it is in tunnel area). Tom mentioned that they only found some water from holes mades in western tank vault area. asked Mike to prepare a scaled site map for area around tank vaults. asked Ms. Hahn to submit an investigation work plan for delineation. during meeting, Mike confirmed that the 3,000 gal diesel AST observed in loading dock area is owned by Broad View Network and there is no 10,000 gal tank owned by Broad View Network. Mike will submit revised PBS application to DEC Nick. forwarded previously received (incorrect) PBS application (which includes a check) to DEC Nick. asked him not to process application as a new updated PBS application will be submitted. 10/12/11-Hiralkumar Patel. received email from Ms. Hahn (at 11:39 AM on 09/30/11) including copy of revised PBS application and letter describing tank owners. PBS application was sent to PBS unit. as per revised tank owner letter, Broad View Network owns 3,000 gal diesel tank in loading dock and not the 10,000 gal diesel tank as mentioned in earlier PBS application submitted on 09/19/11. all other tank info is the same. 10/26/11-Hiralkumar Patel. 4:18 PM:- received email from Joe Horowitz (Horow137@aol.com) including copy of letter from DEP with conditional authorization for water discharge. 11/02/11-Hiralkumar Patel. 3:21 PM:- received email from Mike including a draft work plan for review. he proposed to install nine soil borings which will be converted to monitoring wells. these borings/wells are proposed around two sets of abandoned USTs. draft work plan doesn't include a work schedule. also need a site map with structures in basement (tunnel, sumps in tunnel, main sump in boiler room, oil/water separator and boring/well locations). 11/14/11-Hiralkumar Patel. 9:45 AM:- spoke with Mike. informed him that the draft work plan looks fine except it is missing two things: work schedule and a site map with structures in cellar (tunnel, sumps in tunnel etc.). he will submit final work plan. 02/03/12-Hiralkumar Patel. 4:31 PM:- left message for Mike. 4:32 PM:- sent email to Mike, Ms. Hahn and Todd inquiring update. 5:08 PM:- received email from Mike. they are in process of obtaining bids from drilling companies and will start work once contractor is selected. he mentioned that oil/water separator is working fine and no additional oil observed in basement. 02/07/12-Hiralkumar Patel. 2:13 PM:- sent email to Mike and asked him about schedule for contractor selection. also asked him about the amount of oil recovered since the oil/water separator turned on. email copied to Ms. Hahn. 02/21/12-Hiralkumar Patel. 11:15 AM:- received email from Mike. they are in final stage of hiring drilling contractor and will schedule work shortly. till now, they recovered less than 55 gal of oil. 07/24/12-Hiralkumar Patel. 2:27 PM:- received email from Mike. they have installed numerous borings and wells at the site. they are having some logistical problems in few areas and requested a site visit. 07/26/12-Hiralkumar Patel. 3:42 PM:- left message for Mike. asked him to submit status report for work done till now, prior to any site visit. 3:47 PM:- sent email to Mike and asked to submit status report for work done till now. informed him that site visit can be done only after completing review of the additional information. email copied to Ms. Hahn. 07/27/12-Hiralkumar Patel. 9:51 AM:- received email from Mike including site map and field notes. as per field notes, four wells installed at the site: two wells (Point A and Point B) on the west

601 WEST 26TH STREET (Continued) **S104275653**

side and two wells (Point G and Point H) on the east side of the former tank field. fuel oil smell noted during installation of wells Point A and Point B. Mike mentioned that a third well could not be installed on east side (in the FBI space) due to refusal. he also mentioned that driller is hesitant to drill in the boiler room due to possible flooding. 11:28 AM:- spoke with Mike. he mentioned that installation of four wells was completed on 07/23/12. dark soil and petroleum odors were noted during installation of wells Point A and Point B on the west side of the tank field. no sign of contamination observed in wells on east side (Point G and Point H) in FBI parking space. he does not know about any product on water as wells are not developed yet. asked him to develope the four wells, define site-specific groundwater flow direction and collect groundwater samples for VOC/SVOC analysis. informed him that wells should not be installed in basement boiler room due to possible flooding issues. asked him to submit detailed boring/well logs for review. 11:47 AM:- sent email to Mike and asked to submit boring/well logs, results of groundwater samples and site-specific groundwater flow direction by the end of 08/20/12. email copied to Ms. Hahn. 09/07/12-Hiralkumar Patel. 11:53 AM:- received email from Mike including soil boring logs and soil/gw data. received boring logs for borings Point A, Point B, Point G and Point H. Point A and Point B were installed in RXR Parking Garage and fuel oil smell noted in both borings at 10 ft depth. wells were installed to 25-30 ft depth in Point A and Point B. borings Point G and Point H were installed in FBI parking space. in Point G, bedrock encountered at 16 ft depth. found PID readings in Point A and Point B, but PID unit is not included in logs. as per lab report, four soil samples collected. one soil sample from 10 ft depth from each of four borings. no VOC contamination found in soil samples, but some SVOC compounds were detected (below cleanup standard) in soil samples. as per lab report, four groundwater samples collected from borings. no contamination found in groundwater samples. the site map does not show location of Point H. needs revised boring logs (with PID unit) and site map (with boring locations). 10/03/12-Hiralkumar Patel. 2:28 PM:- sent email to Mike. asked him to submit revised boring logs and site map. also asked him about amount of product removed till date using on-site recovery system. email copied to Ms. Hahn. 11/26/12-Hiralkumar Patel. went to site for inspection to see impact after hurricane Sandy. met with Mario. he mentioned that the entire basement was full of water, but no more oil observed on water. the oil/water separator, as part of the on-going cleanup, was emptied out right before storm. as boilers were damaged during storm, they have temporary boilers on street. they are also in process of converting to #2 oil. 01/15/13-Hiralkumar Patel. received message from Mike (at 1:11 PM on 01/14/13). he mentioned that he is waiting for response for data he submitted on 09/07/12. 11:33 AM:- sent email to Mike and informed him that the department responded on 10/03/12 and asked for revised boring logs and product recovery data, which has not received yet. 11:37 AM:- received email from Mike including copy of email that he sent on 10/09/12. email included revised boring logs and site map. 12:14 PM:- received email from Mike. they recovered less than 55 gal oil since oil/water separator installed. reviewed available boring logs, site map and sample results. borings A, B, G and H were installed to a depth of 25-30 ft bg (except boring G which was installed at 16 ft bg). maximum PID reading of 2 ppm was recorded at 10 ft in boring B which is located southwest of the former tank rooms. soil and

601 WEST 26TH STREET (Continued) **S104275653**

groundwater samples were collected from these four borings. no contamination found in soil or groundwater samples. 12:23 PM:- spoke with Mike. asked him to submit depth of borings/wells and former tank room reference to single point. 3:14 PM:- received email from Mike. he mentioned that points G and H inside the FBI space were to a depth of 15 ft and would be below the 6 USTs that were closed in place. he also mentioned that points A and B were advanced to a depth of 20 ft but from street grade and are not below the USTs. 01/30/13-Hiralkumar Patel. discussed with DEC Austin. based on site history, available sampling data and observations during site visit after hurricane Sandy, Austin asked to close the case. 1:59 PM:- sent email to Mike. asked him to submit spill closure report. email copied to Ms. Hahn. 02/28/13-Hiralkumar Patel. 2:43 PM:- sent email to Mike inquiring about closure report. email copied to Ms. Hahn. 03/22/13-Hiralkumar Patel. 4:50 PM:- received email from Sharon Dyal (sdyal@ebsllcnyc.com) from Environmental Building Solutions, including spill closure report. 03/26/13-Hiralkumar Patel. based on available information, case closed. 2:45 PM:- sent spill closure letter to Ms. Hahn. letter emailed to Ms. Hahn and Mike."

Remarks: "weather related - cleanup starting"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 05/18/2001 Reassigned from Tomasello to Demeo 3/25/2004 Reassigned from Demeo to Sangesland 2/28/2005 Sangesland received a note from John Raguso stating that Emteque was going to begin it's remediation process at the site. The contractor will mobilize and then clean and close the remaining tanks onsite. Once the permits have been finalized, the contractor will then begin the major construction phase of the project to break ground, put in the required shoring and conduct the required remediation/soil removal activities. Contact: John Raguso 631-271-6622 7/7/05 Excavation has begun on the western tank field. When all soil is removed down to the water table (10-13 ft) the pit will be kept open and a vac truck will be on site for several days to vac out any petroleum floating on the water table. The site has several structural issues with surrounding buildings and a Security wall Several end points will be taken, but we already know that this whole area was coal ash fill from the late 1800's. We will expect to see SVOC's, but we do NOT want to see any VOC's. They will dig down to the water table, so that is as much soil removal as can be done. This work (on western tank field) should be finished by 7/15/05. Then similar work will be done on the eastern tank field John Raguso cell #646-529-6531 3/13/2006 Sangesland completed the review of a Spill Closure Petition Report prepared by Emteque Corp. (John Raguso - 631-774-9519) The report provides a history of the site including details of the 6 USTs on site. 3 were closed out several years ago and the other 3 were closed out in 2005 during this closure process. In additon, large soil excavations were made in the areas around these 6 tanks (3 eastern tanks & 3 western tanks) Due to structural issues, all of the contaminated soil could not be removed, but an overwhelming majority (over 95% according to Emteque) of the contaminated soil was removed. The end point sampling conducted in Oct 2005, show VOC and SVOC below TAGM and the GW samples were very good, with only some minor hits . The one item of some concern was Benzene. All 5 GW samples taken were above TAGM for benzene. The TAGM GW limit is 0.7ppb and the levels in all 5 GW samples ranged from 8.2ppb up to 43ppb. 3/30/2006 Sangesland confirmed with John Raguso at Emteque that another round of GW samples will be taken in April '06. If these numbers show a decline, the case may be closed due to natural attenuation. 5/22/2006 Sangesland reviewed a submittal from John Raguso of Emteque. As requested by the DEC, another round of groundwater samples were taken at the site. These samples showed the expected drop in contamination levels. While there are still some slight exceedences of the GW standards, the NYSDEC believes these levels will attenuate naturally over time. Based on the high commercial usage level of the area and the history of train yards, gas stations and historical fill the site is OK to close out as is with no further action Closure letter was sent to 601 West Associates c/o John Raguso with specific requirement to properly close out all monitoring wells on the site."

Tank Info:

Tank Number:	001
Tank Id:	42428
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser
C03 - Pipe Location - Aboveground/Underground Combination
F00 - Pipe External Protection - None
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping

STARRETT-LEHIGH BLDG (Continued) **A100343950**

E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
A01 - Tank Internal Protection - Epoxy Liner
I04 - Overfill - Product Level Gauge (A/G)
K00 - Spill Prevention - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron

Tank Location:	6
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - In Place
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	20000
Tightness Test Method:	NN

Tank Number:	022-FBI001
Tank Id:	242241
Material Code:	0022
Common Name of Substance:	Waste Oil/Used Oil

Equipment Records:

J02 - Dispenser - Suction Dispenser
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
E12 - Piping Secondary Containment - Double-Walled (AG only)
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)

STARRETT-LEHIGH BLDG (Continued) **A100343950**

C01 - Pipe Location - Aboveground
I01 - Overfill - Float Vent Valve
B01 - Tank External Protection - Painted/Asphalt Coating
G09 - Tank Secondary Containment - Modified Double-Walled (Aboveground)
A00 - Tank Internal Protection - None

Tank Location:	2
Tank Type:	Steel Tank in Concrete
Tank Status:	Closed - Removed

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Question on proper address of this building. Originally called in as 525 W 25th. Later called 543-545 West 25th St. 5/22/02 - Sangesland spoke with Mark Robbins of Hydro Tech (631-462-5866) cell # 516-996-5559 Property owner Jack Fuchs - Whitehall Business Archives, Inc. 40 Worth Street, NY, NY 10013 Hydro Tech was pulling a buried 3,000 gal #2 oil tank from a parking lot. 15 ft to nearest neighbor, south end of tank is at the sidewalk line. They discovered 10 large holes in the tank. The pit has product in it. Hydro will vac out the hole and will excavate out contaminated soil to clean endpoints. If all contamination can not be excavated a remediation plan will be prepared and submitted. 7/2/2002 - Mark Robbins of Hydro Tech submitted a report which outlines the removal of a UST and the over excavation of the tank pit area. Sidewall endpoint samples were all below TAGM levels for VOC and SVOC's except for a handful of slight exceedences. No bottom soil samples were taken because of the presence of ground water. Hydro Tech recommends the installation of a monitoring well in the north side of the excavation area. The well should be monitored for the presence of separate-phase and dissolved phase product. DEC instructs Hydro Tech to install a monitoring well on the site, develop the well and sample for VOC's and SVOC's. The DEC will require 2 rounds of Clean samples taken at least 3 months apart in order to close out. 10/29/2002 - Sangesland reviewed submittal from Hydro Tech Environmental. Water sample taken from monitoring well on site showed no product and sample was clean for everything except a minor hit 1.1 ug/l of Benzene. SVOC all below detect. 4/11/2003 - Sangesland reviewed a submittal from Hydro Tech dated Feb 28, 2003. This report shows the second round of GW sampling. All results were ND, therefore the spill can be closed out. Spill Closed."
Remarks:	"case when assigned call the notifier 516 996 5559 "

FINDS:

Registry ID: 110055462510

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110004510388

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Number: 007
Tank ID: 227389
Tank Status: In Service

DSNY MN BORO REPAIR SHOP (Continued) **U004078412**

Material Name:	In Service
Capacity Gallons:	1000
Install Date:	08/01/1994
Date Tank Closed:	Not reported
Registered:	True
Tank Location:	Underground
Tank Type:	Equivalent technology
Material Code:	0015
Common Name of Substance:	Motor Oil
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Pipe Model:	Not reported
Modified By:	MRBARROW
Last Modified:	04/14/2017

Equipment Records:

G04 - Tank Secondary Containment - Double-Walled (Underground)
J02 - Dispenser - Suction Dispenser
C03 - Pipe Location - Aboveground/Underground Combination
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
A00 - Tank Internal Protection - None
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
B04 - Tank External Protection - Fiberglass

DEC Region:	2
DER Facility ID:	232628
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO/DO 12/19/02 - AUSTIN, DDO - TTF LETTER SENT 1/11/06- DEC Piper spoke w/ Eugene Degan, (PRev. Owner Rep 845.294.7509) regarding tank test. He could not be sure though he thinks the tanks are still empty. He will look into this. Piper then contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and will have previous owner get info. Galden Frankel performed Phase I and II on property. Left message at GF requesting call back. 1/18/06- DEC Piper spoke w/ property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He will fax info. DEC Piper to review and inform Rob of additional work if warranted. 2/6/06- DEC Piper spoke w/ Rob S. I

STUART DEAN COMPANY (Continued) **S105997685**

explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed iin place. As per Rob, he will be sending in the new appplication this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to insicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MtBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation. 5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST"

Remarks: "they are going to abandoned the tank"
