1.0 INTRODUCTION

1.1 General

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) prepared this Periodic Review Report (PRR) on behalf of CP VII 78th Street Owner, LLC (the Volunteer) for the NYSDEC Brownfield Cleanup Program (BCP) Site No. C231152 (BCP Site or Site) located at First Avenue between East 77th and East 78th Streets for the 27 December 2023 to 27 April 2025 certification period. Site remediation was completed in accordance with the 5 April 2023 Remedial Action Work Plan (RAWP). On 27 December 2023, NYSDEC issued the Certificate of Completion for the Site, which certifies that the applicable remediation requirements set forth in the New York State Environmental Conservation Law (ECL) have been achieved to the satisfaction of the NYSDEC Commissioner, pursuant to the 27 July 2022 Brownfield Cleanup Agreement (BCA) Index No. C231152-06-22. This PRR was prepared in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved 22 December 2023 Site Management Plan (SMP). A periodic review of all institutional controls and engineering controls (IC/ECs) and a site evaluation are required by the SMP. A 27 December 2023 Certificate of Completion was issued for the Site, which acknowledges that the applicable remediation requirements set forth in the New York State Environmental Conservation Law (ECL) have been achieved to the satisfaction of the NYSDEC Commissioner, pursuant to the 27 July 2022 Brownfield Cleanup Agreement (BCA) Index No. C231152-06-22.

1.2 Site Summary

According to the Phase I Environmental Site Assessment (ESA) completed by Langan in January 2022, historical operations on the subject site included dyeing and cleaning operations between 1920 and 2005 on former Lot 28 and former Lot 30. A solvent tank was identified on the Sanborn Maps from 1951 to 2005 on former Lot 30 in the northern portion of the Site. The Site was identified in the NY Spills database for a release reported to the NYSDEC on 4 November 2009 and assigned Spill No. 0908776. According to the case narrative, a supply line for two 275-gallon fuel oil aboveground storage tanks (ASTs) was suspected to have leaked. The supply line was replaced and the spill was administratively closed on 2 December 2009. Two former fuel oil ASTs have been documented at the Site: one was located in the basement of the vacant building in the northwestern corner of the Site and another was found buried in the debris of the building demolished by the previous owners. A

release was observed when the second AST was discovered and reported to NYSDEC on 25 January 2022 and assigned Spill No. 2109276; the spill case was administratively close on 28 November 2023.

These historical releases and historical uses of concern contributed to the contamination on the Site that was subsequently remediated. As discussed below in Section 2.2, all impacted soil above the NYSDEC Unrestricted Use Soil Cleanup Objectives (SCOs) was removed to bedrock, and the site achieved a Conditional Track 1 Unrestricted Use cleanup, provided that the remedial goals for soil vapor intrusion and groundwater are achieved within five years of the date of the Certificate of Completion. A Soil Vapor Intrusion Evaluation Memorandum (Appendix B) was submitted to NYSDEC on 7 March 2025 during this certification period and is discussed in Section 4.4 of this PRR. Groundwater performance monitoring reports (Appendix B) were also submitted during the certification period and are discussed in Section 4.2 of this PRR.

Langan conducted subsurface investigations between August 2022 and January 2023. The investigations were documented in the March 2023 Remedial Investigation Report (RIR). Based on the results of the investigations:

- Up to four feet of fill material was identified below an approximately 0.5- to 5-foot thick layer of remnant demolition debris surface cover prior to the remedial excavation. Fill was encountered to a maximum depth of 12 feet below street level (bsl) throughout the Site footprint. The fill was underlain by a layer of silty sand. Drilling refusal on presumed bedrock was encountered between approximately 17 and 22 feet bsl during the August 2022 RI and between 22 and 27 feet bsl during the geotechnical investigations. Contaminants in fill or soil included volatile organic compounds (VOCs) including acetone and tetrachloroethylene (PCE), metals, and pesticides, which were detected at concentrations above the NYSDEC Unrestricted SCOs and/or Restricted Residential Restricted Use SCOs (RUSCOs) within this layer. Perfluorooctanesulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) were also detected above the Unrestricted Use and/or Protection of Groundwater guidance values in two samples in this layer during the August 2022 RI.

- VOCs including chlorinated volatile organic compounds (CVOCs), semi-volatile organic compounds (SVOCs) including polycyclic aromatic hydrocarbons (PAHs), metals, PFOS were detected in perched groundwater at concentrations exceeding the NYSDEC Technical and Operation Guidance Series 1.1.1 Ambient Water Quality Standards and

Guidance Values (collectively referred to as SGVs). VOCs were also detected above the SGVs in bedrock groundwater.

- Results of the soil vapor evaluation completed as part of the previous investigations and the Remedial Investigation (RI) identified impacts of chlorinated VOCs including PCE, trichloroethylene (TCE), cis-1,2-dichloroethylene (cis-1,2-DCE), and 1,1-dichloroethylene (1,1-DCE) that would require monitoring and/or mitigation per the New York State Department of Health (NYSDOH) matrix guidance values in three samples. Additionally, concentrations of petroleum compounds including benzene, toluene, ethylbenzene, and xylenes (collectively referred to as BTEX) were identified above laboratory reporting limits in the sample results. Although concentrations of petroleum-related VOCs were not screened against the NYSDOH Soil Vapor Intrusion Matrices in the RIR, a review of the concentrations screened against Matrices D, E, and F dated February 2024 has since been completed. Petroleum-related VOCs cyclohexane, ethylbenzene, n-heptane, and o-xylene were all detected at concentrations exceeding the minimum threshold for which mitigation is required at RI location LSV-8. Additionally, n-hexane at LSV-14 and 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, benzene, and m,p-xylenes at LSV-8 were detected at concentrations exceeding the minimum threshold for which identification of sources and resampling or mitigation is recommended. As the presence of petroleum-related VOCs were not detected at elevated concentrations in soil or groundwater at the Site and no historical source of these impacts had been identified, the presence of these compounds in soil vapor was attributed to an off-Site source.

As discussed in Section 2.2, remediation was completed in 2023, and a Certification of Completion for the Site was issued in December 2023. Site Management has been conducted in accordance with the approved SMP and subsequent NYSDEC correspondence since that date.

1.3 Effectiveness of the Remedial Program

The remedial program was designed to eliminate and mitigate environmental and potential human health exposure to adverse environmental conditions still present in groundwater and soil vapor underlying the Site. The Institutional and Engineering Controls (IC/ECs) for the certification period achieved their remedial objectives.

1.4 Compliance with the Site Management Plan

All ICs and ECs remain fully in place for the certification period and continue to be effective.

1.5 Recommendations

A revised SMP reflecting an updated groundwater sampling plan has been prepared for the Site and will be submitted following this PRR for Department review and approval.

2.0 SITE OVERVIEW

2.1 Site Location

The Site is located in the Upper East Side section of Manhattan, New York and is identified as Block 1452, Lot 27 [formerly consisting of Lots 27, 28, 29, and 30] on the New York City Tax Map. The Site is an approximately 10,050-square foot parcel located in an urban area and is bounded by the four-story 354 East 78th Street building to the west, East 78th Street to the north, First Avenue to the east, and the nine-story 1485 First Avenue building to the south. A Site location map is shown on Figure 1. The Site consists of a 35-story mixed-use commercial and residential building with two full cellar levels.

2.2 Site Background

Remedial activities implemented in accordance with the NYSDEC-approved October 2022 Advance Notice of Site Change of Use, 4 January 2023 IRMWP, 5 April 2023 RAWP, and April 2023 Decision Document were completed between 10 March and 15 August 2023. Implementation of the remedy, in accordance with the Change of Use, IRMWP, RAWP, and Decision Document, included the following elements:

1. Development and implementation of a Construction Health and Safety Plan (CHASP) and Community Air Monitoring Plan (CAMP) for the protection of on-site workers, community/residents, and the environment during remediation and construction activities.

2. Completion of in-situ treatment of chlorinated VOC-impacted groundwater via injection of undiluted SRS-ZVI® reagent, followed by application of injection mix (calcium carbonate, alkaline buffer, yeast extract, DAP, and reducing reagent), and injection of undiluted bioaugmentation culture SDC-9TM between 10 March and 10 April 2023.

3. Removal of soil imported to facilitate the demolition of the former on-Site buildings.

4. Removal of 16 bedrock monitoring wells installed during the RI.

5. Re-installation of 10 bedrock monitoring wells in close proximity to the original well locations. Downhole geophysical evaluation of the bedrock wells to verify fracture depths, and performance monitoring well sampling following the completion of treatment injections in accordance with the Emulsified Zero Valent Iron (EZVI) Injection Remedial Design. (To be documented in a Groundwater Monitoring Report following the completion of installation and sampling activities.)

6. Design and construction of the support of excavation (SOE) system around the Site boundary to facilitate the remedial excavation up to a depth of 20 feet bsl (with development excavation generally being to 23 feet bsl and some deeper excavations to between 31 and 42 feet bsl for deeper foundation elements).

7. Dewatering in compliance with city, state, and federal laws and regulations. Extracted groundwater was treated in a settling tank prior to discharge to the NYC sewer system under a permit from NYCDEP (Permit No. C002018100). Further treatment of dewatering effluent to meet NYCDEP limitations was not required by the permit.

8. Implementation of soil erosion, pollution and sediment control measures in compliance with applicable laws and regulations.

9. Screening for indications of contamination (by visual means, odor, and monitoring with PIDs) of excavated material during intrusive Site work.

10. Excavation, stockpiling, and off-Site transport of contaminated fill and/or soil exceeding the Track 1 Unrestricted Use SCOs (shown in Table 1) as defined by 6 NYCRR Part 375-6.8(a), as described below:

    a. The entire Site footprint was excavated to between 12 and 20 feet for completion of the remedial excavation and the removal of contaminated fill and soil with concentrations of VOCs, pesticides, and metals exceeding the Unrestricted Use SCOs.

    b. Additional hotspot excavations were completed throughout the Site footprint as follows:

        i. One 20-by-30-foot hotspot was excavated to the top of bedrock (approximately 18.5 feet bsl) for the removal of chlorinated VOCs in saturated soil in the CVOC contamination source area during the IRM.

ii. One 12-by-15-foot hotspot was excavated the top of bedrock (between approximately 14 and 15.5 feet bsl) for the remediation of the petroleum-impacted hotspot identified during the remedial excavation.

11. Appropriate off-Site disposal of the following waste streams in accordance with federal, state, and local rules and regulations for handling, transport, and disposal:

    a. approximately 9,696.28 tons of non-hazardous contaminated soil/fill and native material with contaminant concentrations exceeding the Track 1 Unrestricted Use SCOs.

    b. approximately 2,548.7 tons of clean fill (previously imported to facilitate the demolition of the former Site buildings).

    c. approximately 1,519.7 tons of additional soil/fill meeting the Unrestricted Use SCOs to achieve redevelopment grades.

12. Decommissioning and removal of one previously known AST and disposal off-Site during Site redevelopment in accordance with DER-10, 6 NYCRR Part 613.9, NYSDEC CP-51, and other applicable NYSDEC AST closure requirements.

13. Collection and analysis of 24 confirmation soil samples from the excavation base, in accordance with DER-10, to confirm Track 1 Unrestricted Use SCOs were achieved. Except as noted below, all confirmation samples were collected from the native soil or weathered bedrock immediately above the bedrock interface to document the condition of the soil fully removed from the Site.

    a. 15 confirmation soil samples were collected from between 12 and 19.5 feet bsl from the excavation base.

        i. 10 of these were collected from immediately above the bedrock interface.

        ii. 5 of these were collected from the base of the remedial excavation between 12 and 14 feet bsl prior to the excavation encountering bedrock.

    b. 4 confirmation soil samples were collected from between 13.5 and 15.5 feet bsl from immediately above the bedrock interface and sidewalls of the petroleum-impacted hotspot.

c. 5 confirmation soil samples were collected from between 17.5 and 18.5 feet bsl from immediately above the bedrock interface and sidewalls of the chlorinated VOC-impacted source area excavation.

14. Importation of 121.81 tons of virgin stone for the construction of a temporary truck tracking pad.

15. Installation of a vapor barrier membrane below the slab of the proposed building and along sidewalls of any subgrade foundation elements beneath occupied spaces as a green remediation component.

16. Sub-slab soil vapor monitoring points would be installed as part of the final building construction for completion of a soil vapor intrusion evaluation provided that there is no groundwater intrusion which prevents the ability to collect soil vapor samples. The results of the soil vapor intrusion evaluation would be provided in the first Periodic Review Report.

17. Recording of an Environmental Easement (EE) to memorialize the institutional controls (ICs) and engineering controls (ECs) and require future owners of the Site to comply with certain land use restrictions and continue to maintain these controls.

18. Establishment of a NYSDEC-approved SMP to ensure appropriate management of the institutional controls, including the performance of periodic inspections and certification that the controls are performing as they were intended.

Remedial activities were completed as of August 2023. NYSDEC issued a Certificate of Completion on 26 December 2023.

Superstructure construction of the 35-story building was completed between August 2023 and April 2025. The New York City Department of Buildings (NYCDOB) has not yet issued a Temporary Certificate of Occupancy although one is anticipated in the next certification period.

3.0 IC/EC PLAN COMPLIANCE REPORT

IC/ECs are required to protect human health and the environment from remaining contaminated soil, groundwater, and soil vapor beneath the site. The Engineering and Institutional Control Plan included in the SMP describes the procedures for the implementation and management of the IC/ECs.

3.1 IC/EC Components

Consistent with the Final Engineering Report (FER) and SMP, the site-specific IC/ECs are summarized below.

3.1.1 Engineering Controls

The site has one Engineering Control.

Monitoring Wells Associated with EZVI Injections

As documented in the FER, the previously installed bedrock monitoring wells were removed during foundation construction for the new development. Remedial excavation of soil was completed to between 12 and 20 feet bsl; however, general excavation was completed across the majority of the Site footprint to approximately 23 feet bsl for construction of the cellar and sub-cellar, with excavation for deeper foundation elements advancing to between 31 and 42 feet bsl. The top of bedrock was encountered between 14 and 20 feet bsl across the Site footprint.

To implement performance monitoring at the Site, five shallow wells (LMW-6R-S through LMW-10R-S) and five deep wells (LMW-6R-D through LMW-10R-D) were re-installed throughout the Site footprint. The original well locations were selected based on proximity to the former chlorinated solvent tank and the highest concentrations of PCE and TCE detected during the initial bedrock groundwater sampling event competed via passive diffusion bags (PDBs) in September 2022 and the baseline bedrock groundwater sampling event collected via low-flow sampling from within a straddle packer assembly in December 2022 as reported in the March 2023 EZVI Injection Remedial Design.

Post-construction bedrock well re-installation was completed between November 2023 and February 2024. LMW-6R-S through LMW-10R-S were constructed during the certification period between November 2023 and February 2024 by installing five and a half-inch steel casing to a depth of 3.75 feet below top of slab (btos), corresponding to elevation (el) 11 feet North American Vertical Datum 1988 (NAVD88). The casing and open annulus were sealed with bentonite pellets that were allowed to expand prior to initiating coring of the four-inch open hole, which was completed to between 29.75 feet btos and 35.78 feet btos, corresponding to between el -15 feet and el -21 feet. LMW-6R-D through LMW-10R-D were constructed by installing five and a half-inch steel casing installed to a depth between 23 feet btos and 23.77 feet btos, corresponding to el -9 feet. The casing and open annulus were sealed with bentonite pellets that were allowed to expand prior to initiating coring, which was

completed to between 59.79 feet btos and 64.77 feet btos, corresponding to between el -45 feet and el -50 feet. All bedrock wells were constructed as four-inch open-hole wells below the steel casing. All ten bedrock monitoring wells were fitted with custom-designed Westbay System fixed multi-level monitoring equipment. Each well construction consists of a vertically separated series of hydraulically inflated packers connected with central access casing to provide engineered seals between discrete groundwater monitoring zones.

Groundwater monitoring activities to assess the effectiveness of the EZVI injections were completed during the 2023-2025 certification period in February, August, and November 2024 and March 2025. An additional remedial injection event was also completed in May 2024. Sampling and injection activities completed during this certification period are discussed in further detail in Section 4.2. Refer to Figure 2A of this PRR for the monitoring well locations and the well construction logs provided in Appendix I of the SMP.

3.1.2 Institutional Controls

The Site also has a series of ICs in the form of Site restrictions. Adherence to these ICs is required by the Environmental Easement included in Appendix A. Site restrictions that apply to the Controlled Property are:

- The Site may be used for: Restricted-Residential use as defined in 6 New York Codes, Rules and Regulations (NYCRR) Part 375-1.8(g)(2)(ii), Commercial use as defined in 6 NYCRR Part 375-1.8(g)(2)(iii), and Industrial use as defined in 6 NYCRR Part 375-1.8(g)(2)(iv), although land use is subject to local zoning laws;
- All ECs must be operated and maintained as specified in the SMP;
- All ECs must be inspected at a frequency and in a manner defined in the SMP;
- The use of groundwater underlying the Site is prohibited without necessary water quality treatment as determined by the NYSDOH or the New York City Department of Health and Mental Hygiene (NYCDOHMH) to render it safe for use as drinking water or for industrial purposes, and the user must first notify and obtain written approval to do so from the Department;
- Groundwater monitoring and a soil vapor intrusion evaluation consisting of collocated soil vapor and indoor air sample collection must be performed as defined in the SMP;

- Data and information pertinent to site management must be reported at the frequency and in a manner as defined in the SMP;
- All future activities that will disturb remaining contaminated material must be conducted in accordance with the SMP;
- Monitoring to assess the performance and effectiveness of the remedy must be performed as defined in the SMP;
- Operation, maintenance, monitoring, inspection, and reporting of any mechanical or physical component of the remedy shall be performed as defined in the SMP;
- Access to the Site must be provided to agents, employees or other representatives of the State of New York with reasonable prior notice to the property owner to assure compliance with the restrictions identified by the Environmental Easement;
- The potential for vapor intrusion must be evaluated for any buildings developed within the IC boundaries noted in the SMP, and any potential impacts that are identified must be monitored or mitigated;
- Vegetable gardens and farming on the Site are prohibited unless in raised containers; and,
- An evaluation shall be performed to determine the need for further investigation and remediation should large scale redevelopment occur, if any of the existing structures are demolished, or if the subsurface is otherwise made accessible.

3.2 Goal Status and Corrective Measures

No deviations of the IC/ECs have been documented during the certification period except for the initiation of the above-grade modifications to the monitoring wells to install permanent flushmount covers. This work began in February 2024 was ongoing at the end of the certification period and, as such, will be discussed in further detail in the next PRR.

3.3 Conclusions and Recommendations

The IC/ECs continue to function as designed and in compliance with the SMP. No changes to the SMP are recommended as related to the IC/ECs; however, a revised SMP reflecting an updated groundwater sampling plan was prepared for the Site and will be submitted following this PRR for Department review and approval.

4.0 MONITORING AND SAMPLING PLAN COMPLIANCE REPORT

4.1 Monitoring and Sampling Plan Components

Consistent with the FER and SMP, the components of the Monitoring and Sampling Plan during the 2023 to 2025 certification period are as follows:

- Post-remediation groundwater sampling at up to 10 post-construction monitoring wells;
- Soil vapor intrusion sampling; and,
- An annual Site-wide inspection.

4.2 Post-Remediation Groundwater Sampling and Injections

Following the monitoring well installation discussed in Section 3.1.1, performance monitoring groundwater samples were collected in February, August, and November 2024 and March 2025. An additional injection event was also completed in May 2024, as will be discussed in further detail below. The injection activities and performance monitoring groundwater sampling events completed during this certification period are discussed in detail in the following reports provided in Appendix B:

- Groundwater Performance Monitoring Report and Injection Design prepared by Langan, dated 24 April 2024.
- Emulsified Zero-Valent Iron Remedial Injection and Groundwater Performance Monitoring Report prepared by Langan, dated 15 October 2024.
- Groundwater Performance Monitoring Report prepared by Langan, dated March 2025.
- Groundwater Performance Monitoring Report prepared by Langan, dated May 2025.

Based on the performance groundwater monitoring analytical results from February, August, and November 2024 and March 2025, PCE and daughter products have been successfully reduced to non-detect, to concentrations below the SGVs, or to concentrations not detected above the elevated laboratory reporting limit. Table 1 provides all groundwater analytical results from the 2024 to 2025 performance monitoring events.

4.2.1 February 2024 Groundwater Monitoring

Performance monitoring groundwater samples were collected in February 2024, approximately 10 months following the first round of EZVI injections. Performance monitoring groundwater sample analytical results revealed the successful reduction of PCE and TCE by one order of magnitude in the wells that had previously contained the highest concentrations of these compounds during the initial and baseline sampling events, and elimination of PCE and TCE concentrations above the SGVs across the remainder of the treatment area. Concentrations of breakdown products including cis-1,2-DCE and vinyl chloride (VC) were detected during performance monitoring, confirming the ongoing degradation of PCE and TCE. Analytical results were reported in the April 2024 Groundwater Monitoring Report and Injection Design provided in Appendix B.

4.2.2 May 2024 Injections

Based on the February 2024 performance monitoring analytical results, an additional focused injection was proposed in the April 2024 Groundwater Performance Monitoring Report and Injection Design to further address the highest concentrations of PCE and breakdown products remaining in groundwater. The NYSDEC and NYSDOH approved the injection design on 26 April 2024; the approval is provided in Appendix C.

The additional injection was conducted at the four well intervals where COC concentrations greater than one order of magnitude above the SGV were detected during the February 2024 event. As shown in Figures 2A through 2C, these locations included:

- LMW-7R-S at el 8 to 3 NAVD88 and el -2 to -7 NAVD88 intervals,
- LMW-7R-D at el -9 to -14 NAVD88 interval, and
- LMW-8R-S at el 8 to 3 NAVD88 interval.

EZVI was also injected into LMW-9R-S, at injection interval el 1 to -5 NAVD88, to treat impacts in LMW-7R-S, as communication between these two wells was observed during the 2023 injection event.

In addition to EZVI injections, additional emulsified vegetable oil (EVO) was added at these five intervals (prior to and/or following the EZVI injection) and at the following well intervals where only cis-1,2-DCE and/or VC remained above the SGVs:

- LMW-6R-S at el -4 to -9 NAVD88, and
- LMW-8R-D at el -43 to -50 NAVD88.

The injection activities were summarized in the October 2024 EZVI Remedial Injection and Groundwater Performance Monitoring Report provided in Appendix B.

4.2.3 August 2024 Groundwater Monitoring

Performance monitoring groundwater samples were collected in August 2024. The analytical results revealed the elimination of PCE and TCE concentrations above the SGVs across the treatment area. Concentrations of breakdown products including cis-1,2-DCE and VC were detected during performance monitoring, confirming the continued degradation of PCE and TCE. Based on observations of reagent in some wells during the performance monitoring event, a small volume of reagent and groundwater was purged from LMW-7R-S at el 8 to 3 NAVD88 and additional anaerobic chase water was injected into LMW-7R-S at el 8 to 3 NAVD88 and el -2 to -7 NAVD88 in September 2024, in accordance with the April 2024 Groundwater Performance Monitoring Report and Injection Design. Analytical results were reported in the October 2024 EZVI Remedial Injection and Groundwater Performance Monitoring Report provided in Appendix B.

4.2.4 November 2024 Groundwater Monitoring

Sixteen performance monitoring groundwater samples were collected on 20, 21, 22 and 25 November 2024. The analytical results revealed that CVOCs were not detected at concentrations above the SGVs across the treatment area. CVOCs were either not detected or were detected below the SGVs at the following seven intervals/locations in four of the monitoring wells: all three intervals at LMW-6R-D, the only interval at LMW-9R-D, the only interval at LMW-10R-S, and both at LMW-10R-D. Elevated reporting limits were reported by the laboratory for PCE and/or breakdown products at nine well intervals in six of the monitoring wells (the only interval at LMW-6R-S, the two intervals at LMW-7R-S, the only interval at LMW-7R-D, both intervals at LMW-8R-S, both intervals at LMW-8R-D, and the only interval at LMW-9R-S).

Elevated concentrations of fermentation byproducts (acetone and methyl ethyl ketone) remain above the SGVs in nine well intervals at six of the monitoring wells (LMW-6R-D, LMW-7R-S/D, LMW-8R-S/D, and LMW-9R-S) although the concentrations of one or both byproducts decreased in November 2024 compared to peak concentrations detected in either February or August 2024 at LMW-6R-S/D, one of the intervals at LMW-8R-D, LMW-9R-D, and LMW-10R-S/D. Analytical results were reported in the March 2025 Groundwater Performance Monitoring Report provided in Appendix B.

Based on the August and November 2024 analytical results, which were submitted to NYSDEC via email on 14 December 2024 and discussed during a conference call with NYSDEC on 10 January 2025, Langan proposed the elimination of LMW-9R-D, LMW-10R-D, and two of the intervals at LMW-6R-D (el -18 to -23 and el -28 to -33) from the sampling program for all future sampling events. The rationale for the removal of each well or well interval is summarized below.

- LMW-9R-D (el -40.5 to -48.5), due to CVOCs, methyl ethyl ketone, and acetone being detected below the SGVs for two consecutive sampling events (August and November 2024);
- LMW-10R-D (el -12 to -21 and el -26 to -31), due to CVOCs, methyl ethyl ketone, and acetone being detected below the SGVs for two consecutive sampling events (August and November 2024); and,
- LMW-6R-D (el -18 to -23 and el -28 to -33), due to CVOCs, methyl ethyl ketone, and acetone being detected below the SGVs for two consecutive sampling events (August and November 2024).

In an email dated 17 January 2025, NYSDEC approved the modification to the sampling program. This revision to the Groundwater Sampling Plan (GSP) is reflected in the revised 2025 SMP that will be submitted following this PRR, and the modified sampling plan was implemented starting with the fourth quarterly performance monitoring sampling event in March 2025. The approval is included in Appendix C.

4.2.5 March 2025 Groundwater Monitoring

Eight performance monitoring groundwater samples were collected on 5 through 7 March 2025 from one interval at LMW-6R-S, one interval at LMW-7R-D, two intervals from LMW-8R-S, two intervals from LMW-8R-D, one interval from LMW-9R-S, and one interval from LMW-10R-S. Three performance monitoring groundwater samples could not be collected from the remaining interval at LMW-6R-D, and the two intervals at LMW-7R-S that were to be included in the sampling event could not be sampled, as discussed in further detail in Appendix B. The analytical results revealed that CVOCs were not detected at concentrations above the SGVs across the treatment area. CVOCs were either not detected or were detected below the SGVs at the following four intervals in four of the monitoring wells: the only interval at LMW-6R-S, one interval at LMW-8R-S, one interval at LMW-8R-D, and the only interval at LMW-10R-S. Elevated reporting limits were reported by the laboratory for PCE and/or breakdown products at four well intervals in four of the monitoring wells (the only interval at LMW-7R-D, one interval at LMW-8R-S, one interval at LMW 8R-D, and the only interval at LMW-9R-S).

Elevated concentrations of fermentation byproducts (acetone and methyl ethyl ketone) remain above the SGVs in four well intervals at four of the monitoring wells (LMW-7R-D, LMW-8R-S/D, and LMW-9R-S) although the concentrations of one or both byproducts decreased in March 2025 compared to peak concentrations detected in either February, August, or November 2024 at LMW 6R-S, one of the intervals at LMW-8R-S, LMW-8R-D, LMW-9R-S, and LMW-10R-S.

Analytical results were reported in the May 2025 Groundwater Performance Monitoring Report provided in Appendix B. These data were also transmitted to NYSDEC via email on 1 April 2025, along with recommendations that will be discussed in further detail in Section 4.7.

4.2.6 Groundwater and Injection Mix Disposal

As identified in the reports in Appendix B, 12 55-gallon drums of purge groundwater and injection mix were generated in 2024 from the well installation and injection activities completed that year. These drums were disposed of on 6 June 2024. The drummed material was transported to Dale Transfer Corporation by AARCO Environmental Services, Corp. The executed manifest is provided in Appendix D.

Documentation of the disposal of purge water generated during the ongoing well modification activities discussed in Section 3.1.1 will be provided in the 2025-2026 PRR.

4.2.7 Groundwater Monitoring Evaluation

The maximum concentrations of PCE, TCE, cis-1,2-DCE, VC, and chloroform detected during the initial September 2022 sampling event and December 2022 baseline sampling event were 900 µg/l (LMW-8R-S), 390 µg/l (LMW-8R-S), 710 µg/l (LMW-7R-S), 6.7 µg/l (LMW-8R-D), and 56 µg/l (LMW-6R-D), respectively. Maximum concentrations of PCE and TCE decreased by an order of magnitude following the 2023 EZVI injections and were not detected above laboratory reporting limits during the August 2024, November 2024, or March 2025 performance monitoring events following the May 2024 EZVI targeted injections. Breakdown products, including cis-1,2-DCE, VC, and chloroform, were detected at concentrations above the SGVs during the February and August 2024 performance monitoring events but were not detected above laboratory reporting limits or SGVs since the November 2024 performance monitoring event.

Elevated reporting limits were reported by the laboratory for CVOCs at several well locations; based on correspondence with the laboratory, elevated reporting limits are attributed to sample matrix interference and/or interferences from the elevated concentrations of methyl ethyl ketone and acetone. Concentrations of acetone and methyl ethyl ketone were detected below the SGVs at all well locations during the initial September 2022 sampling event and December 2022 baseline sampling event. Elevated concentrations of these compounds were detected above the SGVs during the initial performance monitoring sampling event in February 2024, and as of the March 2025 sampling event, are present in four well intervals at four of the monitoring wells (LMW-7R-D, LMW-8R-S/D, and LMW-9R-S). These compounds are fermentation byproducts that are typically formed as a result of the introduction of electron donors, including the soybean oil and sodium lactate components of EZVI and EVO. Increases in concentrations of these byproducts are typically observed to be temporary and limited to the treatment area. Decreased concentrations were detected in March 2025 at LMW-6R-S, one of the intervals at LMW-8R-S, LMW-8R-D, LMW-9R-S, and LMW-10R-S compared to previously detected peak concentrations. The presence of these ketone compounds is the result of fermentation byproducts, and concentrations are expected to continue to reduce over time.

Monitoring activities will continue, as determined by the NYSDEC project manager and in consultation with NYSDOH project manager, as follows:

- until residual groundwater concentrations of CVOCs are found to be consistently below ambient water quality standards or the site SGVs for two consecutive rounds of quarterly sampling, or until residual groundwater concentrations of CVOCs have become asymptotic at an acceptable level over a minimum of four rounds of quarterly sampling, and

- until groundwater concentrations of fermentation byproducts (acetone and methyl ethyl ketone) display a declining trend over a minimum of three rounds of quarterly sampling.

Additional conclusions and recommendations, including the removal of two additional intervals from the sampling program, are discussed in Section 4.7.

4.3 Soil Vapor Intrusion (SVI) Evaluation

As required in the decision document, a SVI evaluation was prepared and submitted to NYSDEC on 7 March 2025 (Appendix B) and is summarized below.

As discussed in Section 1.2, an historical solvent tank was identified on the Sanborn Fire Insurance Maps in the northern portion of the Site from 1951 to 2005. Subsequent testing of on-Site soil, groundwater, and soil vapor during the 2021/2022 Phase II Environmental Site Investigation (ESI) and 2022 RI revealed chlorinated VOC impacts to soil, groundwater, and soil vapor at concentrations exceeding NYSDEC and NYSDOH standards. As part of the site remediation, an approximately 30-foot-long-by-20-foot-wide area was excavated between 6 feet bsl to the top of bedrock (approximately 18.5 feet bsl) for the removal of CVOCs in saturated soil in the contamination source area where the historical solvent tank was formerly located. Based on the final confirmation sample analytical results, Track 1 Unrestricted Use SCOs were achieved at all excavation base and sidewall samples collected, with the exception of one sample. However, excavation for the entire Site was advanced to the bedrock interface, resulting in the removal of all soil with VOCs present at concentrations above Track 1 Unrestricted Use SCOs. As such, all soil related to the CVOC source area was removed from the Site.

As discussed in Section 4.2, an EZVI injection was performed in 2023 and a second, focused EZVI injection was performed in 2024 to support the abiotic and biological degradation of chlorinated VOCs in groundwater. As documented in Section 4.2.7, maximum concentrations of PCE and TCE decreased by an order of magnitude following the 2023 EZVI injections and were not detected above laboratory reporting limits during either the August or November 2024 or March 2025 performance monitoring events following the May 2024 EZVI targeted injections.

There are no known potential pathways for soil vapor intrusion into the building through the newly constructed 12-inch building slab and foundation walls, which were constructed with an exterior waterproofing membrane. The new building is constructed immediately above bedrock and no residual contaminated soil remains beneath the building, as all soil across the Site footprint was excavated as part of the completed remedial action and cellar construction advanced into bedrock. In addition, based on observations made during site visits in January and February 2025, groundwater is present immediately below the subcellar slab elevation, as shown in the photolog included with the memorandum in Appendix B. PVC sleeve penetrations were installed through the subcellar slab during foundation construction which were intended to be completed as soil vapor monitoring points. However, vapor monitoring points could not be installed at the Site as groundwater was observed immediately below the slab at four of the proposed locations. As

such, there is limited to no potential for the production or accumulation of soil vapor between the water table and the base of the subcellar slab. Based on the soil and groundwater remedies implemented at the Site and the 7 March 2025 soil vapor intrusion evaluation, engineering controls relating to soil vapor intrusion are not necessary, because on-site sources of contamination have been removed and the construction of the new building directly on top of rock and within the groundwater table limits the potential for soil vapor production and accumulation.

4.4 Annual Site-Wide Inspections

The annual site-wide inspection was conducted on 10 March 2024. This consisted of spot inspections of all ECs and verification of ICs. All IC/EC components inspected were functioning in compliance with the SMP, and the site use was consistent with, at minimum, restricted-residential requirements. The completed site-wide inspection form is included in Appendix E.

4.5 Comparisons with Remedial Objectives

Remedial action objectives (RAOs) were identified in the RAWP for the protection and public health and the environmental.

Regarding the soil RAOs, no soil contamination remains as the entire Site footprint was excavated into bedrock and a Track 1 Unrestricted Use remedy was achieved for the Site. Similarly for soil vapor, as discussed in Section 4.3, soil vapor intrusion is not considered a concern for the new development due to the source removal, groundwater treatment, and construction of the new building directly on top of rock and within the groundwater table.

As discussed in Sections 4.2.1 through 4.2.7, the groundwater monitoring analytical results across the four performance monitoring events completed during the certification period revealed that PCE and daughter products have been successfully reduced to either non-detect, concentrations below the SGVs, or not detected above the elevated laboratory reporting limit. The presence of elevated fermentation byproducts concentrations are expected to continue to reduce over time. Recommendations for continued monitoring in the 2025-2026 certification period are provided in Section 4.7. The need for continued groundwater monitoring beyond the 2025-2026 period will be evaluated as part of the 2025-2026 PRR.

4.6 Monitoring Deficiencies

No deficiencies were identified during the site-wide inspection or groundwater performance monitoring events.

4.7 Conclusions and Recommendations

Changes to the SMP are proposed in the revised, draft June 2025 (revised August 2025) SMP, that will be submitted following this PRR. In addition to the already-approved elimination of LMW-9R-D, LMW-10R-D, and two of the intervals at LMW-6R-D from the groundwater sampling program, the elimination of the following two additional sampling intervals from the sampling program is proposed for all future sampling events based on the March 2025 analytical results discussed in Section 4.2.5:

- LMW-6R-S (el -4 to -9), due to CVOCs, methyl ethyl ketone, and acetone either not being detected or being detected below the SGVs for two consecutive sampling events (November 2024 and March 2025); and,

- LMW-8R-D (el -13 to -20), due to CVOCs, methyl ethyl ketone, and acetone either not being detected or being detected below the SGVs for three consecutive sampling events (August and November 2024 and March 2025, with elevated reporting limits for three CVOCs in November).

LMW-6R-S is proposed to be removed from the monitoring plan as PCE, breakdown products, chloroform, and fermentation byproducts were not detected above the SGVs in the November 2024 or March 2025 performance monitoring events. Similarly, these compounds were not detected above the SGVs in August or November 2024 or March 2025 at the el -13 to -20 interval at LMW-8R-D. In an email dated 8 July 2025, NYSDEC approved this modification to the sampling program provided that a sentinel well remained in the program.

Downgradient monitoring well LMW-10R-S was initially proposed to NYSDEC to be removed from the program due to the reduction of PCE and breakdown products within the source area, the limited lateral extents of impacts at the Site, the limited impacts at this well during the baseline event, and the lack of CVOC or fermentation byproduct impacts detected above the SGVs during the November 2024 and March 2025 events. However, during a call with NYSDEC on 11 August 2025, it was determined that LMW-10R-S would remain in the program as the sentinel well.

In addition to the downgradient well LMW-10R-S, continued monitoring is proposed for the following eight intervals at the monitoring wells in the list below. As discussed above, the potential for these bedrock fractures to produce the necessary groundwater sample volume will continue to be evaluated during future sampling events.

- LMW-6R-D (el -38 to -45), due to elevated concentrations of acetone in November 2024 and an inability to collect sufficient sample volume for analysis in March 2025; groundwater sampling will continue for at least one additional quarterly round to monitor for continued reductions in the acetone concentrations.

- LMW-7R-S (el 8 to 3), due to elevated concentrations of CVOCs in August 2024 followed by elevated reporting limits for CVOCs in November 2024, elevated concentrations of acetone and methyl ethyl ketone detected in August and November 2024, and an inability to collect sufficient sample volume for analysis in March 2025; groundwater sampling will continue for at least two additional quarterly rounds to monitor for reductions in the CVOC, acetone, and methyl ethyl ketone concentrations.

- LMW-7R-S (el -2 to -7), due to elevated concentrations of PCE and breakdown products in February 2024, elevated reporting limits for CVOCs in August and November 2024, an elevated concentration of acetone in November 2024 following an elevated reporting limit for acetone in August 2024, and an inability to collect sufficient sample volume for analysis March 2025; groundwater sampling will continue for at least two additional quarterly rounds to monitor for reductions in CVOC and acetone concentrations.

- LMW-7R-D (el -9 to -14), LMW-8R-S (el 8 to 3), LMW-8R-D (el -43 to -50), and LMW-9R-S (el 1 to -5) due to elevated concentrations of acetone and/or methyl ethyl ketone detected in August and November 2024 and March 2025, and elevated reporting limits for CVOCs in November 2024 and March 2025; groundwater sampling will continue for at least two additional quarterly rounds to monitor for reductions in the CVOC, acetone, and methyl ethyl ketone concentrations.

- LMW-8R-S (el -2 to -9), due to an elevated concentration of methyl ethyl ketone in November 2024 that has since reduced to below the SGVs in March 2025; groundwater sampling will continue for at least one additional quarterly round to monitor for continued reductions in methyl ethyl ketone concentrations.

5.0 OVERALL CONCLUSIONS AND RECOMMENDATIONS

5.1 SMP Compliance

Each component of the SMP, including the IC/EC Plan and Monitoring and Sampling Plan, was in compliance for the certification period.

5.2 Remedy Performance Evaluation

5.2.1 Groundwater Monitoring

Groundwater monitoring was implemented per the NYSDECE-approved December 2023 SMP. Based on the groundwater sampling results for the 2023-2025 certification period, Langan proposes the revised sampling plan presented in Section 4.7 and in accordance with the revised, draft June 2025 SMP. The need for continued groundwater monitoring beyond the 2025-2026 reporting period will be evaluated as part of the 2025-2026 PRR.

5.2.2 IC Components

All ICs were maintained during the 2023-2025 certification period, and the environmental easement remains effective.

5.3 Future Submittals

Site-wide inspections and quarterly groundwater performance monitoring will continue to be conducted as specified in the Reporting Plan of the revised, draft June 2025 SMP. Forms and other information generated during regular monitoring events and inspections will be submitted at the time of the annual Periodic Review Report.

6.0 CERTIFICATION OF IC/ECS

6.1 IC/EC Certification Form

The completed IC/EC Certification Form is presented in Appendix F.

6.2 IC/EC Certification

I, Jessica Friscia, am currently a registered professional engineer licensed by the State of New York. I had primary direct responsibility for implementation of the remedial program for the 1487 1st Avenue Redevelopment Site (NYSDEC BCP Site No. C231152).

For each institutional or engineering control identified for the site, I certify that all of the following statements are true:

- The inspection of the site to confirm the effectiveness of the institutional and engineering controls required by the remedial program was performed under my direction;
- The institutional control and/or engineering control employed at this site is unchanged from the date the control was put in place, or last approved by the Department;
- Nothing has occurred that would impair the ability of the control to protect the public health and environment;
- Nothing has occurred that would constitute a violation or failure to comply with any site management plan for this control;
- Access to the site will continue to be provided to the Department to evaluate the remedy, including access to evaluate the continued maintenance of this control;
- If a financial assurance mechanism is required under the oversight document for the site, the mechanism remains valid and sufficient for the intended purpose under the document;
- Use of the site is compliant with the environmental easement;
- The engineering control systems are performing as designed and are effective;
- To the best of my knowledge and belief, the work and conclusions described in this certification are in accordance with the requirements of the site remedial program and generally accepted engineering practices; and,
- The information presented in this report is accurate and complete.

I certify that all information and statements in this certification form are true. I understand that a false statement made herein is punishable as a Class "A" misdemeanor, pursuant to Section 210.45 of the Penal Law. I, Jessica Friscia, of Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C., am certifying as the Remedial

Party's Designated Site Representative: I have been authorized and designated by all site owners/remedial parties to sign this certification for the site.

Table 1
Periodic Review Report
Combined Groundwater Analytical Results

1487 1st Avenue Redevelopment Site
New York, New York
NYSDEC BCP Site No.: C231152
Langan Project No.: 100963701

CAS - Chemical Abstract Service
NS - No standard
ug/l - microgram per liter
NA - Not analyzed
RL - Reporting limit
<RL - Not detected
The following groundwater samples and groundwater monitoring wells are not shown on Table 1 due to excavation for the basement construction: LMW-8R-S_14.5, LMW-8R-S_15, LMW-9R-S_15, LMW-10R-S_13, LMW-11R-S, LMW-11R-D, LMW-12R-S, LMW-12R-D, LMW-13R-S, and LMW-13R-D and overburden wells LMW-6, LMW-7, LMW-8, LMW-9, and LMW-10.
Groundwater sample analytical results are compared to the New York State Department of Environmental Conservation (NYSDEC) Title 6 Codes, Rules, and Regulations (NYCRR) Part 703.5 and the NYSDEC Technical and Operation Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values for Class GA Water and published addenda (herein collectively referenced as "NYSDEC SGVs").

Qualifiers:
J - The analyte was positively identified and the associated numerical value is the approximate concentration of the analyte in the sample.
UJ - The analyte was not detected at a level greater than or equal to the RL; however, the reported RL is approximate and may be inaccurate or imprecise.

U - The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the RL or the sample concentration for results impacted by blank contamination.

Exceedance Summary:
10 - Result exceeds NYSDEC SGVs

Re: Brownfield Cleanup Program,
1487 1st Avenue Redevelopment Site, Site No. C231152
Proofs of Recording and Mailing of Municipal Notice of Environmental Easement

Dear Sir or Madam,

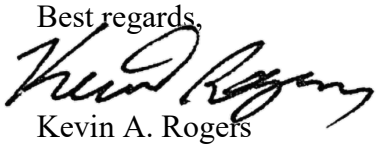
Enclosed please find the following documents that are being submitted to the Department as proofs that the environmental easement for the above-referenced BCP Site has been recorded in the New York City Register and that the Municipal Notice of Environmental Easement has been mailed to the affected local government:

1) Environmental Easement for 1487 1st Avenue, Manhattan, Block 1452, Lot 27, dated October 23, 2023, and recorded in the Office of the City Register of the City of New York ("City Register") on October 31, 2023, as City Register File Number ("CRFN") 2023000282567;
2) Copy of the Municipal Notice of Environmental Easement that was sent via United States Postal Service ("USPS") certified mail, return receipt requested, to New York City Mayor Eric Adams on November 1, 2023;
3) Scanned copy of the USPS certified mailing slip for the Municipal Notice of Environmental Easement sent to Mayor Adams.

Electronic (PDF) copies of the enclosed documents have also been uploaded to the Department's File Transfer Service ("FTS") portal and were directed to Ms. Cheryl Salem of the Office of General Counsel ("OGC"). Additional electronic copies were directly submitted to the Project Attorney, Mr. Kyle Pero, Esq., via email.

Please do not hesitate to contact me if there are any questions or concerns. Thank you for your time and attention to this matter.

Best regards,



Kevin A. Rogers

ENVIRONMENTAL EASEMENT GRANTED PURSUANT TO ARTICLE 71, TITLE 36 OF THE NEW YORK STATE ENVIRONMENTAL CONSERVATION LAW

THIS INDENTURE made this 23rd day of October, 2023 between Owner, CP VII 78th Street Owner, LLC, having an office at 510 Madison Avenue, 8th Floor, New York, NY 10022 (the "Grantor"), and The People of the State of New York (the "Grantee."), acting through their Commissioner of the Department of Environmental Conservation (the "Commissioner", or "NYSDEC" or "Department" as the context requires) with its headquarters located at 625 Broadway, Albany, New York 12233,

WHEREAS, the Legislature of the State of New York has declared that it is in the public interest to encourage the remediation of abandoned and likely contaminated properties ("sites") that threaten the health and vitality of the communities they burden while at the same time ensuring the protection of public health and the environment; and

WHEREAS, the Legislature of the State of New York has declared that it is in the public interest to establish within the Department a statutory environmental remediation program that includes the use of Environmental Easements as an enforceable means of ensuring the performance of operation, maintenance, and/or monitoring requirements and the restriction of future uses of the land, when an environmental remediation project leaves residual contamination at levels that have been determined to be safe for a specific use, but not all uses, or which includes engineered structures that must be maintained or protected against damage to perform properly and be effective, or which requires groundwater use or soil management restrictions; and

WHEREAS, the Legislature of the State of New York has declared that Environmental Easement shall mean an interest in real property, created under and subject to the provisions of Article 71, Title 36 of the New York State Environmental Conservation Law ("ECL") which contains a use restriction and/or a prohibition on the use of land in a manner inconsistent with engineering controls which are intended to ensure the long term effectiveness of a site remedial program or eliminate potential exposure pathways to hazardous waste or petroleum; and

WHEREAS, Grantor, is the owner of real property located at the address of 1487 1st Avenue, in the City of New York, County of New York and State of New York, known and designated on the tax map of the New York City Department of Finance as tax map parcel number: Block 1452 Lot 27, being the same as that property conveyed to Grantor by deed dated January 06, 2022, and recorded in the City Register of the City of New York as CRFN # 2022000029939. The property subject to this Environmental Easement (the "Controlled Property") comprises approximately 0.23 +/- acres, and is hereinafter more fully described in the Land Title Survey dated May 25, 2023 prepared by John J. Vida, License No. 050298, which will be attached to the Site Management Plan. The Controlled Property description is set forth in and attached hereto as Schedule A; and

WHEREAS, the Department accepts this Environmental Easement in order to ensure the protection of public health and the environment and to achieve the requirements for remediation established for the Controlled Property until such time as this Environmental Easement is

extinguished pursuant to ECL Article 71, Title 36; and

NOW THEREFORE, in consideration of the mutual covenants contained herein and the terms and conditions of Brownfield Cleanup Agreement Index Number: C231152-06-22, Grantor conveys to Grantee a permanent Environmental Easement pursuant to ECL Article 71, Title 36 in, on, over, under, and upon the Controlled Property as more fully described herein ("Environmental Easement").

1. Purposes. Grantor and Grantee acknowledge that the Purposes of this Environmental Easement are: to convey to Grantee real property rights and interests that will run with the land in perpetuity in order to provide an effective and enforceable means of encouraging the reuse and redevelopment of this Controlled Property at a level that has been determined to be safe for a specific use while ensuring the performance of operation, maintenance, and/or monitoring requirements; and to ensure the restriction of future uses of the land that are inconsistent with the above-stated purpose.

2. Institutional and Engineering Controls. The controls and requirements listed in the Department approved Site Management Plan ("SMP") including any and all Department approved amendments to the SMP are incorporated into and made part of this Environmental Easement. These controls and requirements apply to the use of the Controlled Property, run with the land, are binding on the Grantor and the Grantor's successors and assigns, and are enforceable in law or equity against any owner of the Controlled Property, any lessees and any person using the Controlled Property.

A. (1) The Controlled Property may be used for:

Restricted Residential as described in 6 NYCRR Part 375-1.8(g)(2)(ii), Commercial as described in 6 NYCRR Part 375-1.8(g)(2)(iii) and Industrial as described in 6 NYCRR Part 375-1.8(g)(2)(iv)

(2) All Engineering Controls must be operated and maintained as specified in the Site Management Plan (SMP);

(3) All Engineering Controls must be inspected at a frequency and in a manner defined in the SMP;

(4) The use of groundwater underlying the property is prohibited without necessary water quality treatment as determined by the NYSDOH or the New York City Department of Health and Mental Hygiene to render it safe for use as drinking water or for industrial purposes, and the user must first notify and obtain written approval to do so from the Department;

(5) Groundwater and other environmental or public health monitoring must be performed as defined in the SMP;

(6) Data and information pertinent to Site Management of the Controlled Property must be reported at the frequency and in a manner defined in the SMP;

(7) All future activities on the property that will disturb remaining contaminated material must be conducted in accordance with the SMP;

(8) Monitoring to assess the performance and effectiveness of the remedy must be performed as defined in the SMP;

(9) Operation, maintenance, monitoring, inspection, and reporting of any mechanical or physical components of the remedy shall be performed as defined in the SMP;

(10) Access to the site must be provided to agents, employees or other representatives of the State of New York with reasonable prior notice to the property owner to assure compliance with the restrictions identified by this Environmental Easement.

B. The Controlled Property shall not be used for Residential purposes as defined in 6NYCRR 375-1.8(g)(2)(i), and the above-stated engineering controls may not be discontinued without an amendment or extinguishment of this Environmental Easement.

C. The SMP describes obligations that the Grantor assumes on behalf of Grantor, its successors and assigns. The Grantor's assumption of the obligations contained in the SMP which may include sampling, monitoring, and/or operating a treatment system, and providing certified reports to the NYSDEC, is and remains a fundamental element of the Department's determination that the Controlled Property is safe for a specific use, but not all uses. The SMP may be modified in accordance with the Department's statutory and regulatory authority. The Grantor and all successors and assigns, assume the burden of complying with the SMP and obtaining an up-to-date version of the SMP from:

D. Grantor must provide all persons who acquire any interest in the Controlled Property a true and complete copy of the SMP that the Department approves for the Controlled Property and all Department-approved amendments to that SMP.

E. Grantor covenants and agrees that until such time as the Environmental Easement is extinguished in accordance with the requirements of ECL Article 71, Title 36 of the ECL, the property deed and all subsequent instruments of conveyance relating to the Controlled Property shall state in at least fifteen-point bold-faced type:

This property is subject to an Environmental Easement held by the New York State Department of Environmental Conservation

pursuant to Title 36 of Article 71 of the Environmental Conservation Law.

F. Grantor covenants and agrees that this Environmental Easement shall be incorporated in full or by reference in any leases, licenses, or other instruments granting a right to use the Controlled Property.

G. Grantor covenants and agrees that it shall, at such time as NYSDEC may require, submit to NYSDEC a written statement by an expert the NYSDEC may find acceptable certifying under penalty of perjury, in such form and manner as the Department may require, that:

(1) the inspection of the site to confirm the effectiveness of the institutional and engineering controls required by the remedial program was performed under the direction of the individual set forth at 6 NYCRR Part 375-1.8(h)(3).

(2) the institutional controls and/or engineering controls employed at such site:

(i) are in-place;

(ii) are unchanged from the previous certification, or that any identified changes to the controls employed were approved by the NYSDEC and that all controls are in the Department-approved format; and

(iii) that nothing has occurred that would impair the ability of such control to protect the public health and environment;

(3) the owner will continue to allow access to such real property to evaluate the continued maintenance of such controls;

(4) nothing has occurred that would constitute a violation or failure to comply with any site management plan for such controls;

(5) the report and all attachments were prepared under the direction of, and reviewed by, the party making the certification;

(6) to the best of his/her knowledge and belief, the work and conclusions described in this certification are in accordance with the requirements of the site remedial program, and generally accepted engineering practices; and

(7) the information presented is accurate and complete.

3. Right to Enter and Inspect. Grantee, its agents, employees, or other representatives of the State may enter and inspect the Controlled Property in a reasonable manner and at reasonable times to assure compliance with the above-stated restrictions.

4. Reserved Grantor's Rights. Grantor reserves for itself, its assigns, representatives, and successors in interest with respect to the Property, all rights as fee owner of the Property, including:

A. Use of the Controlled Property for all purposes not inconsistent with, or limited by the terms of this Environmental Easement;

B. The right to give, sell, assign, or otherwise transfer part or all of the underlying fee interest to the Controlled Property, subject and subordinate to this Environmental Easement;

5. Enforcement

A. This Environmental Easement is enforceable in law or equity in perpetuity by Grantor, Grantee, or any affected local government, as defined in ECL Section 71-3603, against the owner of the Property, any lessees, and any person using the land. Enforcement shall not be defeated because of any subsequent adverse possession, laches, estoppel, or waiver. It is not a defense in any action to enforce this Environmental Easement that: it is not appurtenant to an interest in real property; it is not of a character that has been recognized traditionally at common law; it imposes a negative burden; it imposes affirmative obligations upon the owner of any interest in the burdened property; the benefit does not touch or concern real property; there is no privity of estate or of contract; or it imposes an unreasonable restraint on alienation.

B. If any person violates this Environmental Easement, the Grantee may revoke the Certificate of Completion with respect to the Controlled Property.

C. Grantee shall notify Grantor of a breach or suspected breach of any of the terms of this Environmental Easement. Such notice shall set forth how Grantor can cure such breach or suspected breach and give Grantor a reasonable amount of time from the date of receipt of notice in which to cure. At the expiration of such period of time to cure, or any extensions granted by Grantee, the Grantee shall notify Grantor of any failure to adequately cure the breach or suspected breach, and Grantee may take any other appropriate action reasonably necessary to remedy any breach of this Environmental Easement, including the commencement of any proceedings in accordance with applicable law.

D. The failure of Grantee to enforce any of the terms contained herein shall not be deemed a waiver of any such term nor bar any enforcement rights.

6. Notice. Whenever notice to the Grantee (other than the annual certification) or approval from the Grantee is required, the Party providing such notice or seeking such approval shall identify the Controlled Property by referencing the following information:

County, NYSDEC Site Number, NYSDEC Brownfield Cleanup Agreement, State Assistance Contract or Order Number, and the County tax map number or the Liber and Page or computerized system identification number.

Parties shall address correspondence to:

Site Number: C231152
Office of General Counsel
NYSDEC
625 Broadway
Albany New York 12233-5500

With a copy to:

Site Control Section
Division of Environmental Remediation
NYSDEC
625 Broadway
Albany, NY 12233

All notices and correspondence shall be delivered by hand, by registered mail or by Certified mail and return receipt requested. The Parties may provide for other means of receiving and

communicating notices and responses to requests for approval.

7. Recordation. Grantor shall record this instrument, within thirty (30) days of execution of this instrument by the Commissioner or her/his authorized representative in the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

8. Amendment. Any amendment to this Environmental Easement may only be executed by the Commissioner of the New York State Department of Environmental Conservation or the Commissioner's Designee, and filed with the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

9. Extinguishment. This Environmental Easement may be extinguished only by a release by the Commissioner of the New York State Department of Environmental Conservation, or the Commissioner's Designee, and filed with the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

10. Joint Obligation. If there are two or more parties identified as Grantor herein, the obligations imposed by this instrument upon them shall be joint and several.

11. Consistency with the SMP. To the extent there is any conflict or inconsistency between the terms of this Environmental Easement and the SMP, regarding matters specifically addressed by the SMP, the terms of the SMP will control.

Remainder of Page Intentionally Left Blank

IN WITNESS WHEREOF, Grantor has caused this instrument to be signed in its name.

VIA CERTIFIED MAIL

Mayor Eric Adams
City Hall
New York, NY 10007

Re: Notice of Environmental Easement:
1487 1st Avenue Redevelopment Site,
1487 1st Avenue, Manhattan
Block 1452, Lot 27
DEC Site No. C231152

Dear Mayor Eric Adams,

Attached please find a copy of an Environmental Easement granted to the New York State Department of Environmental Conservation ("Department") on October 23, 2023 by CP VII 78th Street Owner, LLC ("Grantor") for property located at 1487 1st Avenue, Block 1452, Lot 27, known as DEC Site No. C231152 and by the DEC Site name, 1487 1st Avenue Redevelopment Site.

This Environmental Easement restricts future use of the above referenced property to restricted-residential, commercial, and industrial uses. Any on-site activity must be done in accordance with the Environmental Easement and Site Management Plan, which is incorporated into the Environmental Easement. Department approval is also required prior to any groundwater use. Article 71, Section 71-3607 of the New York State Environmental Conservation Law requires that:

1. Whenever the Department is granted an Environmental Easement, it shall provide each affected local government with a copy of such Easement and shall also provide a copy of any documents modifying or terminating such Environmental Easement.

2. Whenever an affected local government receives an application for a building permit or any other application affecting land use or development of land that is subject to an Environmental Easement and that may relate to or impact such Easement, the affected local government shall notify the Department and refer such application to the Department. The Department shall evaluate whether the application is consistent with the Environmental Easement, and shall notify the

affected local government of its determination in a timely fashion, considering the time frame for the local government's review of the application. The affected local government shall not approve the application until it receives formal approval from the Department.

An electronic version of every Environmental Easement that has been accepted by the Department is available to the public at: http://www.dec.ny.gov/chemical/36045.html. Please forward this notice to your Building and/or Planning Departments, as applicable, to ensure your compliance with the provisions of the New York State Environmental Conservation Law. If you have any questions or comments regarding this matter, please do not hesitate to contact me.

Best regards,

Kevin A. Rogers

1.0 BACKGROUND

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) has prepared this Groundwater Performance Monitoring Report & Injection Design for the 1487 1st Avenue Redevelopment Site, New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) Site No. C231152. The Site is an approximately 10,050-square-foot parcel identified as Block 1452, Lot 27 in the Upper East Side neighborhood of Manhattan, New York (the "Site"). A site location plan is provided as Figure 1. A Certificate of Completion for remediation through the BCP was issued on 26 December 2023 and is currently undergoing construction for redevelopment. Ongoing groundwater monitoring and remediation is being implemented under a NYSDEC-approved Site Management Plan (SMP) dated 22 December 2023.

Chlorinated volatile organic compounds (CVOCs), including the contaminants of concern (COCs) tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), vinyl chloride (VC), and chloroform were detected in groundwater samples collected from the eastern portion of the Site during the completion of the Remedial Investigation at concentrations exceeding the NYSDEC Ambient Water Quality Standards and Guidance Values (SGVs). The concentrations of PCE and associated breakdown compounds detected in groundwater are indicative of a release that had migrated into bedrock at the site from the former solvent tank. Analytical results from the initial and baseline sampling events are presented in Tables 1 and 2, respectively, and CVOC analytical results from these events are summarized on Figures 4A and 4B.

To address these exceedances, an emulsified zero valent iron (EZVI) injection was proposed in the NYSDEC-approved January 2023 Interim Remedial Measures Work Plan (IRMWP) to achieve reduction in groundwater concentrations of the chlorinated solvents, such that natural attenuation would be supported. The EZVI remedy objectives were to:

- Both chemically reduce, as well as anaerobically degrade the CVOCs;
- Further promote monitored natural attenuation (MNA); and,
- Mitigate potential for off-Site migration of on-Site CVOC-impacted groundwater.

The EZVI injection scope was presented in the 6 March 2023 EZVI Remedial Design prepared by Langan, the draft of which had been approved by NYSDEC via email correspondence on 27 February 2023. Completion of the EZVI injections in March and April 2023 was documented in the EZVI Remedial Injection Report dated 29 September 2023, which was included in the 18 December 2023 Final Engineering Report as Appendix E. A COC was issued for the Site on 26 December 2023.

A Bedrock Well Re-Installation and Performance Monitoring Groundwater Sampling Plan (GSP) dated 16 October 2023 proposed the re-installation of ten bedrock monitoring wells that were originally installed during the Remedial Investigation (RI) and subsequently removed as a result of foundation construction. The GSP also proposed Site-specific well construction and sampling methodology for the groundwater performance monitoring following the EZVI injection. NYSDEC approved the GSP on 18 October 2023.

Bedrock well re-installation was completed between November 2023 and February 2024 and performance monitoring groundwater samples were collected approximately 10 months following the EZVI injections in February 2024. Performance monitoring groundwater sample analytical results revealed the successful reduction in maximum concentrations of PCE and TCE by one order of magnitude in the wells that had previously contained the highest concentrations of these compounds during the initial and baseline sampling events, and the elimination of PCE and TCE concentrations above the SGVs across the rest of the treatment area. Concentrations of breakdown products including cis-1,2-DCE and VC were detected during performance monitoring, confirming the anticipated degradation of PCE and TCE. Based on the performance monitoring analytical results, a round of focused EZVI injections is proposed at three monitoring well locations to address remaining concentrations of PCE and TCE and one elevated detection of cis-1,2-DCE. Emulsified vegetable oil (EVO) only will also be injected at four monitoring well locations to promote further bioremediation of the residual degradation compound concentrations.

Bedrock well re-installation, performance monitoring groundwater sample collection and analytical results, and the design for the additional EZVI injections are discussed in detail below.

2.0 MONITORING WELL INSTALLATION

As proposed in the October 2023 GSP, rock cores for the reinstallation of ten bedrock monitoring wells were advanced at the Site between 15 and 28 November 2023. Well locations are shown on Figure 2. Re-installed wells were placed as close to the original well locations as practicable based on the design and location of deep foundation elements and interior architectural structures, and no greater than approximately 10 feet from the original installation locations.

The top of the sub-cellar slab was constructed at elevation 14.75 North American Vertical Datum 1988 (NAVD88). Rock coring and casing installation was completed by ECD NY Inc. of Astoria, New York. LMW-6R-S through LMW-10R-S were constructed by installing five-inch inner-diameter steel casing to a maximum depth of 3.75 feet below the top of the sub-cellar slab (btos) and coring to between approximately 29.75 and 35.78 feet btos. The well casing and open anulus was sealed with grout. LMW-6R-D through LMW-10R-D were constructed by installing five-inch

inner-diameter steel casing to a depth between 23 and 23.77 feet btos. The well casing and open annulus were sealed with bentonite pellets, which were allowed to expand prior to initiating coring to between 59.79 and 64.77 feet btos. All bedrock wells were constructed as 4-inch-diameter open-hole below the steel casing. Following installation, the bedrock monitoring wells were flushed until the purge water ran clear. Monitoring wells were installed with temporary stainless-steel stick-ups to contain pressurized bedrock groundwater and/or perched water within the open hole. A well cap was placed at each stickup following installation. Well construction logs are provided in Appendix A.

Pursuant to the 10 October 2023 NYSDEC email correspondence approving the October 2023 GSP, air monitoring was conducted for VOCs during rock coring for well installation. The air monitoring consisted of continuous upwind and downwind perimeter monitoring of organic vapor utilizing PIDs capable of recording data and calculating 15-minute averages. Site perimeters were also monitored for odors. CAMP exceedances of the 15-minute action levels were not observed at any time during the injection event.

Water generated during bedrock well installation and flushing was containerized in 55-gallon steel drums and staged in a designated area for future offsite disposal.

3.0 BEDROCK MONITORING WELL BOREHOLE GEOPHSYCAL ASSESSMENTS

Borehole geophysical logging was completed by Hager Richter Geoscience, Inc. of Fords, NJ (Hager-Richter) between 22 December 2023 and 8 January 2024 in all five pairs of bedrock monitoring wells to characterize the bedrock water-bearing fractures, verify the previously targeted sampling intervals, and finalize the well sampling system design (discussed below). The geophysical analysis included fluid temperature, fluid conductivity, fluid resistivity, caliper, natural gamma, single-point resistance, optical and acoustic televiewer, and heat pulse flow meter logs.

The geophysical observations were generally consistent with those reported in the RIR. Using the geophysical data, 10 of the sampling intervals identified in the October 2023 GSP were confirmed, six of the proposed sampling intervals were modified to better align with water bearing fractures either by moving them vertically up or down approximately 5 feet or horizontally shifting the interval to the other well in its pair, and the deepest sampling interval proposed to be installed at LMW-7R-D instead was installed at LMW-9R-D due to the location of the detected water-bearing fracture. The borehole geophysical logging report is provided as Appendix B.

4.0 MULTI-LEVEL MONITORING WELL SYSTEM CONSTRUCTION AND BEDROCK WELL SAMPLING METHDOLOGY

All ten bedrock monitoring wells were fitted with custom-designed Westbay System fixed multi-level monitoring equipment between 31 January and 5 February 2024. Installation was completed by a technician from Earth Data Northeast, Inc. of Exton, Pennsylvania who was trained to install Westbay Systems. Each well construction consists of a vertically separated series of hydraulically inflated packers connected with central access casing to provide engineered seals between discrete groundwater monitoring zones. Field quality control procedures for verification of the quality of the well installation included evaluating the central access casing for rising water levels as an indicator of potential leaks in the Westbay System construction, verifying operation and location of System components, and checking pressure in the measurement ports before and after packer inflation. Installation and quality review documentation provided by Earth Data Northeast, Inc. is provided in Appendix C.

Seventeen sampling zones ranging in length from five to seven feet were isolated between packers across the ten wells. Each sampling zone overlapped with a well interval or was within 5 feet of a well interval previously sampled as part of the initial September 2022 sampling event or December 2022 baseline sampling event. Based on the results of the borehole geophysical assessment 10 of the sampling intervals identified in the October 2023 GSP were installed as proposed, 6 of the proposed sampling intervals were modified to better align with water bearing fractures (either by moving them vertically up or down approximately 5 feet or horizontally shifting the interval to the other well in its pair), and the deepest sampling interval proposed to be installed at LMW-7R-D instead was installed at LMW-9R-D due to the location of the detected water-bearing fracture. A subsurface profile presenting the well construction, monitoring zones, and fracture intervals is provided as Figure 3. Deviations from the sampling intervals proposed in the October 2023 GSP are shown on Figure 3.

Langan groundwater samplers were trained in sample collection field techniques by the Earth Data Northeast, Inc. technician. Groundwater samples were collected in accordance with the NYSDEC-approved October 2023 GSP on 13 and 16 February 2024. Purging is not required with the Westbay System due to the isolated nature of each monitoring zone; however, one single volume of the respective interval was purged from each sampling interval to remove any water remaining from rock coring and/or well installation activities. Purge water was containerized in 55-gallon steel drums and staged in a designated area for future offsite disposal. Purging prior to sample collection is not anticipated to be implemented during future sampling events, as the Westbay Systems have already been installed and equilibrated. Valved ports within

each monitoring zone provided access to each sampling interval for discrete groundwater sample collection. Discrete groundwater samples were collected at each designated sampling zone in a container that was sealed before being brought to the surface.

Performance monitoring samples were collected by lowering between one and four 250 milliliter (ml) sample containers through the central access casing to the designated sampling zone. The number of sample containers lowered at one time depended on the length of the specific sampling zone. The sealed sample container(s) was then pulled to the surface and the collected sample placed in laboratory-provided bottleware. No notable field observations of impacts were identified during sample collection.

Seventeen groundwater samples were collected from the ten bedrock wells, plus quality assurance/quality control (QA/QC) samples including one duplicate sample, one field blank, and one trip blank. Samples were collected into laboratory-supplied containers and were sealed, labeled, and placed in an ice-chilled cooler (to maintain a temperature of about 4° C) for delivery to Alpha Analytical of Westborough, Massachusetts, a NYSDOH ELAP-certified laboratory. All groundwater samples were analyzed for volatile organic compounds (VOCs). Additional analytical parameters including metals (iron, calcium, manganese, and magnesium), anions (chloride, sulfate, and nitrate), total organic carbon, dissolved organic carbon, alkalinity, hardness, and microbial genes (for total bacteria and *Dehalococcoides*), were analyzed in five of the seventeen samples.

5.0 PERFORMANCE MONITORING RESULTS

Groundwater analytical results were compared to the NYSDEC SGVs and are summarized in Table 1 and on Figure 4. The laboratory data reports and data summary usability reports are provided in Appendix D and Appendix E, respectively.

Performance monitoring groundwater analytical results revealed the presence of CVOCs above the SGVs in six of the ten wells sampled, including all five shallow wells and one deep well, as summarized below.

- PCE was detected above the SGV of 5 µg/l in only one of the ten wells sampled: LMW-7R-S from 6.75 to 11.75 feet btos (el 8 to 3 NAVD88) (21 µg/l) and from 16.75 to 21.75 feet btos (el -2 to -7 NAVD88) (25 µg/l).

- TCE was detected above the SGV of 5 µg/l in only one of the ten wells sampled: LMW-7R-S from 6.75 to 11.75 feet btos (el 8 to 3 NAVD88) (21 µg/l) and from 16.75 to 21.75 feet btos (el -2 to -7 NAVD88) (25 µg/l).

- Cis-1,2-DCE was detected above the SGV of 5 µg/l in three of the five well pairs: LMW-7R-S from 6.75 to 11.75 btos (el 8 to 3 NAVD88) (500 µg/l) and from 16.75 to 21.75 feet btos (el -2 to -7 NAVD88) (560 µg/l), LMW-7R-D from 23.75 to 28.75 feet btos (el -9 to -14 NAVD88) (29 µg/l) and from 49.75 to 54.75 feet btos (el -35 to -40 NAVD88) (20 µg/l), LMW-8R-S from 6.75 to 11.75 feet btos (el 8 to 3 NAVD88) (14 µg/l), and LMW-10R-S from 24.75 to 29.75 feet btos (el -9 to -15 NAVD88) (7.5 µg/l).

- VC was detected above the SGV of 2 µg/l in four of the five well pairs: LMW-6R-S from 18.75 to 23.75 feet btos (el -4 to -9 NAVD88) (2.8 µg/l), LMW-7R-S from 6.75 to 11.75 feet btos (el 8 to 3 NAVD88) (46 µg/l) and from 16.75 to 21.75 feet btos (el -2 to -7 NAVD88) (70 µg/l), LMW-7R-D from 23.75 to 28.75 feet btos (el -9 to -14 NAVD88) (17 µg/l) and from 49.75 to 54.75 feet btos (el -35 to -40 NAVD88) (27 µg/l), LMW-8R-S from 6.75 to 11.75 feet btos (el 8 to 3 NAVD88)(4.4 µg/l), LMW-8R-D from 57.75 to 64.75 feet btos (el -43 to -50 NAVD88) (2.7 µg/l), and LMW-9R-S from 13.75 to 19.75 feet btos (el 1 to -5 NAVD88) (4.6 µg/l).

- Chloroform was detected above the SGV of 7 µg/l in only one of the ten wells sampled: LMW-10R-S from 23.75 to 29.75 feet btos (el -9 to -15 NAVD88) (13 µg/l).

Concentrations of acetone, benzene, methyl ethyl ketone, toluene, and trans-1,2-dichloroethene, were also detected above the SGVs in four of the five well pairs.

The maximum concentrations of PCE, TCE, Cis-1,2-DCE, VC, and chloroform detected during the initial September 2022 sampling event and December 2022 baseline sampling events were 900 µg/l (LMW-8R-S), 390 µg/l (LMW-8R-S), 710 µg/l (LMW-7R-S), 6.7 µg/l (LMW-8R-D), and 56 µg/l (LMW-6R-D), respectively. With the exception of chloroform, the maximum concentrations of these compounds were detected in LMW-7R-S during the performance monitoring event at concentrations of 25 µg/l (PCE), 25 µg/l (TCE), 560 µg/l (cis-1,2-DCE), and 70 µg/l (VC). The maximum detection of chloroform during the performance monitoring event was 13 µg/l detected at LMW-10R-S. Maximum concentrations of PCE and TCE decreased by an order of magnitude following the 2023 EZVI injections. As both compounds were detected in only one of the ten wells during performance monitoring, the analytical results also reveal a reduction in the horizontal and vertical extents of the detections of these compounds at concentrations exceeding the SGVs. Maximum concentrations of breakdown products including

cis-1,2-DCE and chloroform also decreased from those detected during the baseline sampling event, while the maximum concentration of vinyl chloride increased an order of magnitude. Elevated concentrations of breakdown products were expected due to the anticipated degradation of PCE and TCE.

On average, iron and total organic carbon (TOC) concentrations were similar to the baseline event. The iron concentrations ranged from 15,200 to 88,200 µg/l and TOC concentrations, where detected, ranged from 2,100 to 15,000 µg/l. It should be noted however that on an individual well basis, the iron concentrations increased at all locations except for LMW-8R-S.

Sulfate concentrations notably decreased compared to the baseline event (55,000 to 1,100,000 µg/l), with concentrations ranging from 3,500 to 150,000 µg/l. Sulfate reduction was anticipated, as the result of reducing conditions created by the EZVI injection.

Total bacteria (EBAC) concentrations increased, with concentrations ranging from $3.8x10^6$ to $5.57x10^8$ cell/ml. *Dehalococcoides* (DHC) concentrations increased, with concentrations ranging from 1.4 to $9.1x10^4$ cell/ml.

6.0 PERFORMANCE MONITORING CONCLUSIONS/RECOMMENDATIONS

The maximum concentrations of three COCs, PCE, TCE, and cis-1,2-DCE were successfully reduced, as compared to the baseline concentrations. Concentrations of PCE, TCE, and cis-1,2-DCE remain present at concentrations above the SGVs by an order of magnitude at only three wells: LMW-7R-S, LMW-7R-D, and LMW-8R-S. Vinyl chloride exceedances of the SGVs are still present at LMW-6R-S, LMW-7R-S, LMW-7R-D, LMW-8R-S, LMW-8R-D, and LMW-9R-S; the concentration of vinyl chloride exceeds the SGV by over one order of magnitude at LMW-7R-S and LMW-7R-D. A concentration of chloroform was detected above the SGV at LMW-10R-S.

Completion of an additional focused injection is proposed to be conducted at the four specific well intervals with COC concentrations greater than one order of magnitude above the SGV (LMW-7R-S at the el 8 to 3 NAVD88 and el -2 to -7 NAVD88 intervals, LMW-7R-D at the el -9 to -14 NAVD88 interval, and LMW-8R-S at the el 8 to 3 NAVD88 interval). The additional injection reagents and dosages will be generally consistent with the first injection at these locations, while accounting for specific geochemical conditions that may exist. In addition to the injections of EZVI, the injection of additional emulsified vegetable oil (EVO) is proposed at these four intervals (prior to the EZVI injection) and also at the following well intervals where only cis-1,2-DCE and/or vinyl chloride remain above the SGVs: LMW-6R-S from 18.75 to 23.75 feet (el -4 to -9 NAVD88); LMW-8R-D from 57.75 to 64.75 (el -43 to -50 NAVD88); LMW-9R-S at 13.75 to 19.75 feet

(el 1 to -5 NAVD88); and LMW-10R-S from 23.75 to 29.75 feet (-9 to -15 NAVD88). Due to the lack of PCE and TCE above SGVs at these four intervals and the daughter product concentrations, which are all below 10 ug/l, the more aggressive approach of injecting EZVI is not necessary to address these lingering concentrations. The addition of EVO at these intervals will increase the total organic carbon content to assist in the bioremediation of these residual daughter product concentrations. The additional injection is proposed to be completed within the existing well infrastructure. The design for the proposed additional injection event is provided in Section 7.0.

7.0 ADDITIONAL REMEDIAL INJECTION

The injection solution for the additional injection event will consist of similar reagents as the previous injection event. The reagents will consist of SRS®-ZVI (20%, 4 micron) emulsified vegetable oil (EVO), 60% SRS®-SD buffered EVO, TSI®-FSS ferrous sulfide solution, nutrients (yeast extract and diammonium phosphate [DAP]), and bioaugmentation culture TSI-DC®. The reagent demands and injection volumes for the additional injection event are summarized on Table 4.

The following tasks will be completed as a part of the additional EZVI injection implementation and are described herein.

- Health and Safety Requirements
- Permit and Notifications;
- Mobilization;
- Injection Event;
- Community Air Monitoring; and
- Post-Injection Groundwater Monitoring Events.

7.1 Health and Safety Requirements

A site-specific construction health and safety plan (CHASP) was developed as Appendix A of the January 2023 IRMWP and will be enforced to protect on-Site workers during the implementation of the EZVI remedy. This CHASP includes reagent and chemical substance handling and storage guidelines, first aid and spill control measures, and exposure limits for all additives to be used in the field. Supplemental Safety Data Sheets (SDS) were provided in Appendix C of the March 2023 EZVI Remedial Design. Personal protective equipment (PPE) to be used while handling reagents will include full-face respirators, as applicable, chemical resistant coveralls and booties, nitrite gloves, steel toed shoes, and hard hat. A job safety analysis will be prepared before all field activities.

Appropriate storage, handling, and spill cleanup guidelines will be followed to minimize the potential for accidental release and exposure to injection reagents. The injection area and surroundings will be continuously monitored for surfacing and leaks during the injection process. In the event of surfacing or leak, the injections will be immediately stopped, and the leaked or surfaced materials will be removed and contained in drums. At the end of each workday, once application of injection pressure is ceased, injection area and surroundings will be monitored for an additional half hour to identify any potential surfacing or leaks. During this time the pressure at the injection points is expected to subside to ambient conditions, reducing the potential for surfacing.

All injection reagents will be stored on-Site within a secured area with secondary containment and appropriate labeling and warning signs.

7.2 Permits and Notifications

An underground control notification letter along with Inventory of Injection Wells form (USEPA form 7520-16) and a copy of the approved design for the additional remedial injection event will be submitted to the USEPA before field activities for injections are started.

A permit for access to the New York City fire hydrant has been issued by the New York City Department of Environmental Protection (NYCDEP). Hydrant water will be used to provide dilution water for injection activities.

7.3 Mobilization

Prior to starting the injection activities, Langan and its subcontractors will mobilize the necessary equipment and reagents to the Site. Mobilization will be completed over the course of one to two days. Reagents and equipment mobilized to the Site will be staged adjacent to the treatment areas as shown on Figure 5A. Equipment needed for the injection includes the following: air compressor, generator (if on-site power is not available), injection mixing totes, electric mixer, injection hoses, injection pumps, injection manifold, well head fittings, groundwater sampling/monitoring equipment, work zone and perimeter air monitoring equipment, and 55-gallon steel drums. Reagents will be delivered to the Site. The remedial reagents (SRS-ZVI®, calcium bicarbonate, yeast extract, DAP, sodium ascorbate, and bioaugmentation culture TSI-DC®) will be sourced from Terra Systems, Inc. of Claymont, Delaware. The safety data sheets (SDS) for all remedial reagents were provided in Appendix C of the March 2023 EZVI Remedial Design. All mixing and injection equipment will be staged within secondary containment in the treatment areas. Water for dilution of injection reagents will be sourced

directly from a nearby fire hydrant. An inert chemical reducing agent may be added to the injection water to assure that it is anaerobic and reducing. The proposed injection locations are existing bedrock wells located in the sub-cellar of the building currently under construction.

7.4 Injections

The injection event will include preparation for the injection of undiluted SRS-ZVI® reagent, application of injection mix (calcium carbonate, yeast extract, DAP, and reducing reagent), and injection of undiluted bioaugmentation culture TSI-DC®, at the aforementioned intervals at the existing bedrock wells, LMW-7R-S, LMW-7R-D, and LMW-8R-S.

Injection of EVO: EVO will be diluted with anaerobic water to reach the target pore volume summarized in Table 4. The injection of EVO will occur before and after the application of the bioaugmentation culture.

Application of Injection Mixture: An injection mixture of calcium carbonate, yeast extract, and DAP, will be prepared in water that has been made anaerobic (<0.5 milligrams per liter dissolved oxygen and ~-75 millivolts oxidation reduction potential), using the reducing reagent as necessary. Injection mixture will be prepared in small batches of about 100-200 gallons, and will be continuously mixed to avoid settling of solids. Remedial reagents are provided in Table 4.

Application of Bioaugmentation culture TSI-DC®: The bioaugmentation culture will be injected without dilution and in-line before the injection point, to minimize the exposure of the oxygen sensitive microbial culture to air. Volume of bioaugmentation culture to be applied at each interval is provided in Table 4.

Injection of EZVI: Following the second injection of EVO, SRS-ZVI® will be injected without dilution and directly pumped from the reagent tote into the targeted injection intervals summarized in Table 4. Finally, an additional injection of anaerobic water will be completed following the injection of SRS-ZVI®.

Injections: The EZVI injection mix will be applied within the treatment zones using the existing shallow (LMW-7R-S and LMW-8R-S) and deep (LMW-7R-D) bedrock well intervals via the Westbay System. For the four aforementioned intervals at LMW-6R-S, LMW-8R-D, LMW-9R-S, and LMW-10R-S, the procedure shall be the same with exception that EZVI will not be injected at these locations. During the March/April 2023 EZVI injections, injection attempts at LMW-7R-S were unsuccessful as evidenced by immediate daylighting of the injection media. During the monitoring well re-installation, LMW-7R-S and LMW-7R-D were evaluated to verify the presence

of groundwater-producing fractures in the four performance monitoring sampling intervals. The presence of these fractures was confirmed in both intervals within LMW-7R-S and the shallow interval in LMW-7R-D; therefore, EZVI injection will be attempted at low pressure within these three fracture zones. If injections at LMW-7R-S are unsuccessful (i.e., all reagents daylight or otherwise do not enter the formation) then EZVI may also be injected at LMW-9R-S, which had communication with LMW-7R-S during the first injection event and enabled reductions in the PCE and TCE concentrations in LMW-7R-S.

Proposed injection locations are shown on Figure 5A and injection intervals are shown in Figure 5B and provided in Table 4. Injections at each location will be performed from top to bottom, opening only one interval at a time and utilizing the mechanical pumping port at each of the injection intervals isolated by the Westbay System packers. The injection reagents will be pumped from the mixing tank or directly from the reagent tote into the well head through an injection manifold. The injection manifold will be equipped with ball valves, gate valves, and flow totalizers to regulate and monitor the injection flow. Each injection location will be fitted with a well head that will be equipped with a pressure gauge and a threaded adaptor to connect to the injection location and Camlock fittings to connect with similarly fitted hoses. One bedrock well will be injected at a time. An injection process diagram is provided as Figure 6.

All reagents will be injected at the target injection interval followed by injection of up to 50 to 100 gallons of anaerobic chase water, to rinse the injection hoses and push out reagents within the fractures away from the injection location. Changes to the injections (e.g., reagent volume, treatment intervals, extent of dilution of reagents [calcium carbonate, alkaline buffer yeast extract, and DAP], and volume of chase water) will be made based on field observations. The injection event is estimated to be completed within one to two weeks.

7.5 Community Air Monitoring Plan (CAMP)

Pursuant to the NYSDEC-approved IRMWP dated January 2023, air monitoring is required for particulates (i.e., dust) and VOCs during intrusive activities. As no soil movement will occur during remedial injections, the CAMP will not be implemented.

As noted above, the reagents included in the proposed second injection event are SRS®-ZVI (20%, 4 micron) EVO, 60% SRS®-SD buffered EVO, TSI®-FSS ferrous sulfide solution, nutrients (yeast extract and DAP), and bioaugmentation culture TSI-DC®. SDS were provided in Appendix C of the March 2023 EZVI Remedial Design. The mixing and injection of these reagents through the Westbay system infrastructure is not anticipated to result in the release of VOCs, dust, or odors.

As such, the exposure potential for downwind communities and users is low. If odors or dust are observed to be migrating beyond the work zone, the CAMP will be implemented.

7.6 Injection Monitoring

Injection monitoring will consist of batch, field, and process monitoring. The injection monitoring plan is summarized in Table 5.

Batch Monitoring: During preparation of each batch of injection solution, the mixing ratios and volumes will be recorded.

Field Monitoring: Water quality parameters (e.g., pH, temperature, ORP, dissolved oxygen, turbidity, conductivity, and total dissolved solids) and head will be measured daily at the existing bedrock wells before the injections and daily after the injections. During injections at the bedrock monitoring well intervals, water quality will be monitored at other similar bedrock well intervals. Field monitoring will be used to monitor the injections. In addition, monitoring will be performed to identify leaks and surfacing of injection fluid at the injection wells heads, and within and around the treatment zone. Any injection fluid that surfaces will be contained in 55-gallon drums and disposed of off-Site.

Process Monitoring: During EZVI injections, process parameters (injection pressure, flow rate, and volume) will be monitored. The process monitoring will be performed to assess the injection process.

Preparation of batches of injection solutions, the injection process parameters, and field monitoring will be recorded in field logs.

7.7 Post-Injection Performance Monitoring

A post-injection groundwater monitoring event will be performed three months after the completion of injections and the need for additional monitoring will be determined following review of the performance monitoring analytical results. Seventeen groundwater samples will be collected from the same seventeen monitoring intervals that were sampled during the February 2024 performance monitoring event, in addition to quality assurance/quality control samples. Samples will be collected in laboratory-supplied containers and will be sealed, labeled, and placed in an ice-chilled cooler (to maintain a temperature of about 4° C) for delivery to a NYSDOH ELAP-certified laboratory. All groundwater samples will be analyzed for volatile organic compound (VOC) analysis. Additional analytical parameters including metals (iron, calcium, manganese, and magnesium), anions (chloride, sulfate, and nitrate), total organic carbon,

dissolved organic carbon, alkalinity, hardness, and microbial genes (for total bacteria and Dehalococcoides), will be analyzed in five of the seventeen samples including three locations where a second EZVI injection is proposed (LMW-7R-S, LMW-7R-D, and LMW-8R-S) and two locations where an EVO injection is proposed (LMW-8R-D and LMW-10R-S). Water pressure measurements and groundwater quality parameters (e.g., pH, temperature, ORP, DO, turbidity, and conductivity) will be collected during each groundwater monitoring event. Purged groundwater collected during the sampling event, if any, will be contained in 55-gallon drums and properly disposed of off-Site.

8.0 REPORTING

Category B deliverables will be requested from the laboratory and a DUSR will be prepared. VOC analytical results in groundwater will be reviewed to assess reductions from the initial September 2022 and baseline December 2022 pre-remediation concentrations and the February 2024 performance monitoring concentrations, and the additional parameters will be reviewed to assess the potential for ongoing reductions resulting from the second remedial injection event. In addition to the analytical results, the performance monitoring report will include injection volumes, reagent dosage, and injection and field monitoring data.

As the additional injection event will continue to reduce the concentrations of breakdown products in groundwater, Langan anticipates that a petition for well closure of LMW-6R-S/D, LMW-8R-D, LMW-9R-S/D, and LMW-10R-S/D will be included in the next performance monitoring report following the 3-month sampling event. Analytical results for LMW-7R-S/D and LMW-8R-S will be reviewed to confirm the efficacy of the second injection event and determine if closure of these wells can also be completed at these locations.

Table 4
Groundwater Monitoring Report and Injection Plan
Combined Groundwater Analytical Results

1487 1st Avenue Redevelopment Site
New York, New York
NYSDEC BCP Site No.: C231152
Langan Project No.: 100963701

Notes:
CAS - Chemical Abstract Service
NS - No standard
ug/l - microgram per liter
NA - Not analyzed
RL - Reporting limit
<RL - Not detected
The following groundwater samples and groundwater monitoring wells are not shown on Table 4 due to excavation for the basement construction: LMW-8R-S_14.5, LMW-8R-S_15, LMW-9R-S_15, LMW-10R-S_13, LMW-11R-S, LMW-11R-D, LMW-12R-S, LMW-12R-D, LMW-13R-S, and LMW-13R-D and overburden wells LMW-6, LMW-7, LMW-8, LMW-9, and LMW-10.
Groundwater sample analytical results are compared to the New York State Department of Environmental Conservation (NYSDEC) Title 6 Codes, Rules, and Regulations (NYCRR) Part 703.5 and the NYSDEC Technical and Operation Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values for Class GA Water and published addenda (herein collectively referenced as "NYSDEC SGVs").

Qualifiers:
J - The analyte was positively identified and the associated numerical value is the approximate concentration of the analyte in the sample.
UJ - The analyte was not detected at a level greater than or equal to the RL; however, the reported RL is approximate and may be inaccurate or imprecise.

U - The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the RL or the sample concentration for results impacted by blank contamination.

Exceedance Summary:
10 - Result exceeds NYSDEC SGVs

Sodium Ascorbate Demand	pounds	4	4	4	4	3	4	4	4	30

Notes:
btoc - below top of the casing
DAP - diammonium phosphate
EVO - emulsified vegetable oil
g/L - grams per liter
mg/L - milligrams per liter
lb/1000 gallon - pounds per 1000 gallons
ROI - radius of influence
ZVI - Zero valent iron (4 micron)
TOC - total organic carbon
NA - data is not available
Hydraulic gradient is an average of low and high gradient computed from September 14, 2022 groundwater monitoring data.
Hydraulic conductivity in a well is an average of hydraulic conductivity calculated for different packer intervals in the well. For wells where packer tests were not performed, data from adjacent wells is used.
A fracture porosity of 0.1 was used for injection calculations.
Based on field observations up to 15% of pore volume will be injected.
ZVI target levels in pore volume range from 0.5 to 3.5 g/L depending upon the concentration of chlorinated volatile organic compounds (CVOCs) in the well and the levels of total organic carbon that are reached in the pore volume using a EVO and ZVI emulsion.
EVO demand is calculated based on percentage of ZVI and EVO in the SRS®-Z emulsion and was adjusted to reach at least approximately 500 mg/L TOC levels in the design volume.
EVO demand meets or is in excess of EVO demand estimated using Environmental Security Technology Certification Program (ESTCP) substrate requirements for hydrogen demand calculation sheet.
SRS®-ZVI is a proprietary product, combined emulsified vegetable oil substrate and zero valent, formulated by Terra Systems, Inc. (Claymont, DE).
The density of SRS®-Z with 20% ZVI is 9.7 pounds/gallon and with 10% ZVI is 8.81 pounds/gallon.
SRS®-EVO is a proprietary emulsified vegetable oil substrate, formulated by Terra Systems, Inc. (Claymont, DE).
TSI-Ferrous Sulfide Activator (mix of ferrous sulfide and sodium sulfide solution) distributed by Terra Systems, Inc. will be added to the SRS®-Z to form the sulfidated ZVI.
The density of ferrous sulfide solution is 1.15 to 1.22 grams per milliliter or an average of 9.88 pounds per gallon.
TSI-DC® Bioaugmentation Culture® - *Dehalococcoides* containing microbial consortium for anaerobic bioremediation is cultured by Terra Systems, Inc. (Claymont, DE).
Approximately 0.3% yeast extract and 0.05% diammonium phosphate (DAP) are included in commercial SRS®-ZVI formulation. Additional dosage of yeast extract and diammonium phosphate will be added to facilitate microbial growth.

Table 6
Groundwater Monitoring Report and Injection Plan
Injection Monitoring

1487 1st Avenue Redevelopment Site
New York City, New York
Langan Project No. 100963701

Location	Matrix	Parameters	Frequency	Monitoring Instruments/Method
Monitoring Locations[a]	Groundwater[b]	Groundwater pressure	Before injection event begins and 2 to 3 times daily during injections	Transducer
		Field parameters	Before injection event begins and 2 to 3 times daily during injection	Horiba U-52 or YSI meter
	Well Field	Surfacing/Leaks	Before injection event begins and every 30 - 60 mins	Visual Inspection
Injection System including Skid, Distribution Manifold and Injection Well Heads[c]	Injection Mix	Flow-rate, volume injected and injection pressure	Every 30 - 60 mins	Pressure gauges, and totalizers
Anaerobic Water Tank	Water	Dissolved oxygen and pH	2 to 3 times daily during injection	Horiba U-52 or YSI meter

Notes:
Field parameters - dissolved oxygen, oxidation-reduction potential, conductivity, pH, temperature, turbidity, total dissolved solids and salinity

[a] - Wells for injection monitoring will include all wells identified for injections in Table 3.

[b] - In well water quality measurements will be performed.

NOTES:

1. ALL ELEVATIONS ARE REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988, NAVD88, WHICH IS 1.1 FEET ABOVE THE NATIONAL GEODETIC VERTICAL DATUM OF 1929, NGVD29, PER THE UNITED STATES GEOLOGIC SURVEY, USGS.
2. BOREHOLE WATER PRODUCING LOGGING INTERVALS DERIVED FROM THE BOREHOLE GEOPHYSICAL LOGGING DATA REPORTS PREPARED BY HAGER-RIGHTER GEOSCIENCE, INC. DATED NOVEMBER 2022 AND JANUARY 2024.
3. ALL CURRENT AND HISTORICAL DATA ARE PRESENTED AT THE CURRENT WELL REINSTALLATION LOCATION.
4. PROPOSED WELL CONSTRUCTION IS SHOWN AS PRESENTED IN THE 16 OCTOBER 2023 PERFORMANCE MONITORING GROUNDWATER SAMPLING PLAN.
5. BASED ON THE RESULTS OF THE JANUARY 2024 BOREHOLE GEOPHYSICAL ASSESSMENT 10 OF THE SAMPLING INTERVALS IDENTIFIED IN THE OCTOBER 2023 GSP WERE CONFIRMED, SIX OF THE PROPOSED SAMPLING INTERVALS WERE MODIFIED TO BETTER ALIGN WITH WATE BEARING FRACTURES EITHER BY MOVING THEM VERTICALLY UP OR DOWN APPROXIMATELY 5 FEET OR HORIZONTALLY SHIFTING THE INTERVAL TO THE OTHER WELL IN ITS PAIR, AND THE DEEPEST SAMPLING INTERVAL PROPOSED TO BE INSTALLED AT LMW-7R-D INSTEAD WAS INSTALLED AT LMW-9R-D DUE TO THE LOCATION OF THE DETECTED WATER-BEARING FRACTURE.

PROPOSED WELL CONSTRUCTION

1. THE ELEVATIONS FOR THE TOP OF SLAB IS TAKEN FROM FO-100.0 FOUNDATION PLAN BY MCNAMARA SALVIA, DATED 7 SEPTEMBER 2022.
2. ALL ELEVATIONS ARE REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988, NAVD88, WHICH IS 1.1 FEET ABOVE THE NATIONAL GEODETIC VERTICAL DATUM OF 1929, NGVD29, PER THE UNITED STATES GEOLOGIC SURVEY, USGS.
3. BOREHOLE WATER PRODUCING LOGGING INTERVALS DERIVED FROM THE BOREHOLE GEOPHYSICAL LOGGING DATA REPORT PREPARED BY HAGER-RIGHTER GEOSCIENCE, INC. DATED JANUARY 2024.
4. ALL CURRENT AND HISTORICAL DATA ARE PRESENTED AT THE CURRENT WELL REINSTALLATION LOCATION.
5. ANALYTICAL RESULTS IN GRAY ARE FROM THE 2022 RI AND WERE PRESENTED IN THE MARCH 2023 EMULSIFIED ZERO-VALENT IRON REMEDIAL DESIGN. ANALYTICAL RESULTS IN BLACK ARE FROM THE 2024 PERFORMANCE GROUNDWATER MONITORING EVENT.

APPENDIX A

Well Construction Logs

WELL CONSTRUCTION SUMMARY

Well No. LMW-6R-S

PROJECT 1487 1st Avenue	**PROJECT NO.** 100963701
LOCATION New York, NY	**ELEVATION AND DATUM** 14.75 NAVD 88 (Subcellar slab surface)
DRILLING AGENCY ECD NY	**DATE STARTED** 11/18/2023 **DATE FINISHED** 02/02/2024
DRILLING EQUIPMENT Comacchio MC 8D	**DRILLER** Willmer
SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-6R-S to a depth of 3.75-feet below top of slab (btos). 5-inch ID steel casing was grouted in place from 0-feet to 3.75-feet btos. Following casing installation, the borehole for LMW-6R-S was advanced with a 4-inch air hammer bit to a depth of 35.78-feet btos on 22 November 2023. Following drilling, the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 3.75-feet to 8.75-feet btos, 13.75-feet to 18.75-feet btos, and 23.75-feet to 28.75-feet btos, sampling ports at 8.75-feet, 18.75-feet, and 28.75-feet btos, and a pumping port at 23.75-feet btos on 2 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

WELL CONSTRUCTION SUMMARY

Well No. LMW-6R-D

PROJECT 1487 1st Avenue	**PROJECT NO.** 100963701
LOCATION New York, NY	**ELEVATION AND DATUM** 14.75 NAVD 88 (Subcellar slab surface)
DRILLING AGENCY ECD NY	**DATE STARTED** 11/20/23 **DATE FINISHED** 02/02/2024
DRILLING EQUIPMENT Comacchio MC 8D	**DRILLER** Willmer
SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-6R-D to a depth of 23.75-feet below top of slab (btos). 5-inch ID steel casing was installed to 23.75-feet btos, bentonite was placed from 3 to 23.75-feet btos followed by grout between 0-feet and 3-feet btos. Following casing installation, the borehole for LMW-6R-D was advanced with a 4-inch air hammer bit to a depth of 59.79-feet btos on 28 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 18.75-feet to 23.75-feet btos, 27.75-feet to 32.75-feet btos, 37.75-feet to 42.75-feet btos, and 47.75-feet to 52.75-feet btos, sampling ports at 23.75-feet, 32.75-feet, 42.75-feet, and 54.75-feet btos, and pumping ports at 37.75-feet, 47.75-feet, and 52.75-feet btos on 2 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

WELL CONSTRUCTION SUMMARY

Well No. LMW-7R-S

PROJECT 1487 1st Avenue	**PROJECT NO.** 100963701
LOCATION New York, NY	**ELEVATION AND DATUM** 14.75 NAVD 88 (Subcellar slab surface)
DRILLING AGENCY ECD NY	**DATE STARTED** 11/16/2023 **DATE FINISHED** 02/05/2024
DRILLING EQUIPMENT Comacchio MC 8D	**DRILLER** Willmer
SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-7R-S to a depth of 3.75-feet below top of slab (btos). 5-inch ID steel casing was grouted in place from 0-feet to 3.75-feet btos. Following casing installation, the borehole for LMW-7R-S was advanced with a 4-inch air hammer bit to a depth of 34.78-feet btos on 24 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 1.75-feet to 6.75-feet btos, 11.75-feet to 16.75-feet btos, and 21.75-feet to 26.75-feet btos, sampling ports at 6.75-feet, 11.75-feet, and 26.75-feet btos, and pumping ports at 11.75-feet and 21.75-feet btos on 5 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

WELL CONSTRUCTION SUMMARY

Well No. LMW-7R-D

PROJECT 1487 1st Avenue	**PROJECT NO.** 100963701
LOCATION New York, NY	**ELEVATION AND DATUM** 14.75 NAVD 88 (Subcellar slab surface)
DRILLING AGENCY ECD NY	**DATE STARTED** 11/16/2023 **DATE FINISHED** 02/01/2024
DRILLING EQUIPMENT Comacchio MC 8D	**DRILLER** Willmer
SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-7R-D to a depth of 23.75-feet below top of slab (btos). 5-inch ID steel casing was installed to 23.75-feet btos, bentonite was placed from 3 to 23.75-feet btos followed by grout between 0-feet and 3-feet btos. Following casing installation, the borehole for LMW-7R-D was advanced with a 4-inch air hammer bit to a depth of 63.81-feet btos on 27 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 18.75-feet to 23.75-feet btos, 28.75-feet to 33.75-feet btos, 44.75-feet to 49.75-feet btos, and 54.75-feet to 59.75-feet btos, sampling ports at 23.75-feet, 33.75-feet, 49.75-feet, and 59.75-feet btos, and pumping ports at 28.75-feet and 54.75-feet btos on 1 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-8R-D to a depth of 23.75-feet below top of slab (btos). The outer 7-inch steel casing was installed to a depth of 7-feet btos. The inner 5-inch ID steel casing was installed from 0-feet to 23.75-feet btos, bentonite was placed from 3 to 23.75-feet btos followed by grout between 0-feet and 3-feet btos. Following casing installation, the borehole for LMW-8R-D was advanced with a 4-inch air hammer bit to a depth of 64.77-feet btos on 25 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 22.75-feet to 27.75-feet btos, 34.75-feet to 39.75-feet btos, and 52.75-feet to 57.75-feet btos, sampling ports at 27.75-feet, 39.75-feet, and 59.75-feet btos, and pumping ports at 32.75-fee and 57.75-feet btos on 5 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-9R-S to a depth of 3.75-feet below top of slab (btos). 5-inch ID steel casing was grouted in place from 0-feet to 3.75-feet btos. Following casing installation, the borehole for LMW-9R-S was advanced with a 4-inch air hammer bit to a depth of 30.76-feet btos on 22 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 3.75-feet to 8.75-feet btos, 8.75-feet to 13.75-feet btos, and 19.75-feet to 24.75-feet btos, sampling ports at 8.75-feet, 13.75-feet, and 24.75-feet btos, and a pumping port at 18.75-feet btos on 6 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

WELL CONSTRUCTION SUMMARY

Well No. LMW-9R-D

PROJECT 1487 1st Avenue	**PROJECT NO.** 100963701
LOCATION New York, NY	**ELEVATION AND DATUM** 14.75 NAVD 88 (Subcellar slab surface)
DRILLING AGENCY ECD NY	**DATE STARTED** 11/20/23 **DATE FINISHED** 02/06/2024
DRILLING EQUIPMENT Comacchio MC 8D	**DRILLER** Willmer
SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-9R-D to a depth of 23.75-feet below top of slab (btos). The outer 7-inch steel casing was installed to a depth of 7-feet btos. The inner 5-inch ID steel casing was installed from 0-feet to 23.75-feet btos, bentonite was placed from 3 to 23.75-feet btos followed by grout between 0-feet and 3-feet btos. Following casing installation, the borehole for LMW-9R-D was advanced with a 4-inch air hammer bit to a depth of 63.75-feet btos on 27 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 23.25-feet to 28.25-feet btos, 33.25-feet to 38.25-feet btos, 40.25-feet to 45.25-feet btos, and 50.25-feet to 55.25-feet btos, sampling ports at 28.25-feet, 38.25-feet, 45.25-feet, and 58.25-feet btos, and pumping ports at 33.25-feet, 50.25-feet, and 55.25-feet btos on 6 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

WELL CONSTRUCTION SUMMARY

Well No. LMW-10R-S

PROJECT 1487 1st Avenue	**PROJECT NO.** 100963701
LOCATION New York, NY	**ELEVATION AND DATUM** 14.75 NAVD 88 (Subcellar slab surface)
DRILLING AGENCY ECD NY	**DATE STARTED** 11/15/2023 **DATE FINISHED** 02/07/2024
DRILLING EQUIPMENT Comacchio MC 8D	**DRILLER** Willmer
SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-10R-S to a depth of 3.75-feet below top of slab (btos). 5-inch ID steel casing was grouted in place from 0-feet to 3.75-feet btos. Following casing installation, the borehole for LMW-10R-S was advanced with a 4-inch air hammer bit to a depth of 29.75-feet btos on 22 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 3.75-feet to 8.75-feet btos and 18.75-feet to 23.75-feet btos, sampling ports at 8.75-feet and 24.75-feet btos, and a pumping port at 23.75-feet btos on 7 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

WELL CONSTRUCTION SUMMARY

Well No. LMW-10R-D

PROJECT 1487 1st Avenue	**PROJECT NO.** 100963701
LOCATION New York, NY	**ELEVATION AND DATUM** 14.75 NAVD 88 (Subcellar slab surface)
DRILLING AGENCY ECD NY	**DATE STARTED** 11/15/2023 **DATE FINISHED** 02/08/2024
DRILLING EQUIPMENT Comacchio MC 8D	**DRILLER** Willmer
SIZE AND TYPE OF BIT 4-inch Air Hammer	**INSPECTOR** Leo Thottumari

METHOD OF INSTALLATION

Drilling and Casing Installation: A Comacchio MC 8D track mounted air-rotary drill rig with a 5.75-inch air hammer bit was used to advance LMW-10R-D to a depth of 23.75-feet below top of slab (btos). 5-inch ID steel casing was installed to 23.75-feet btos, bentonite was placed from 3 to 23.75-feet btos followed by grout between 0-feet and 3-feet btos. Following casing installation, the borehole for LMW-10R-D was advanced with a 4-inch air hammer bit to a depth of 63.84-feet btos on 22 November 2023. Following drilling the borehole was flushed and capped until the Westbay System installation. All flushed water was containerized in a 55-gallon drum.

Westbay Installation: The Westbay System was installed with packers from 21.75-feet to 26.75-feet btos, 35.75-feet to 40.75-feet btos, and 45.75-feet to 50.75-feet btos, sampling ports at 30.75-feet, 40.75-feet, and 50.75-feet btos, and pumping ports at 35.75-feet and 45.75-feet btos on 8 February 2024.

SAMPLING INTERVAL PURGING

Each sampling interval was purged by opening the associated pumping port and removing one interval-volume with a D-25 foot valve connected to 0.5-inch-tubing. All water purged was containerized in a 55-gallon drum.

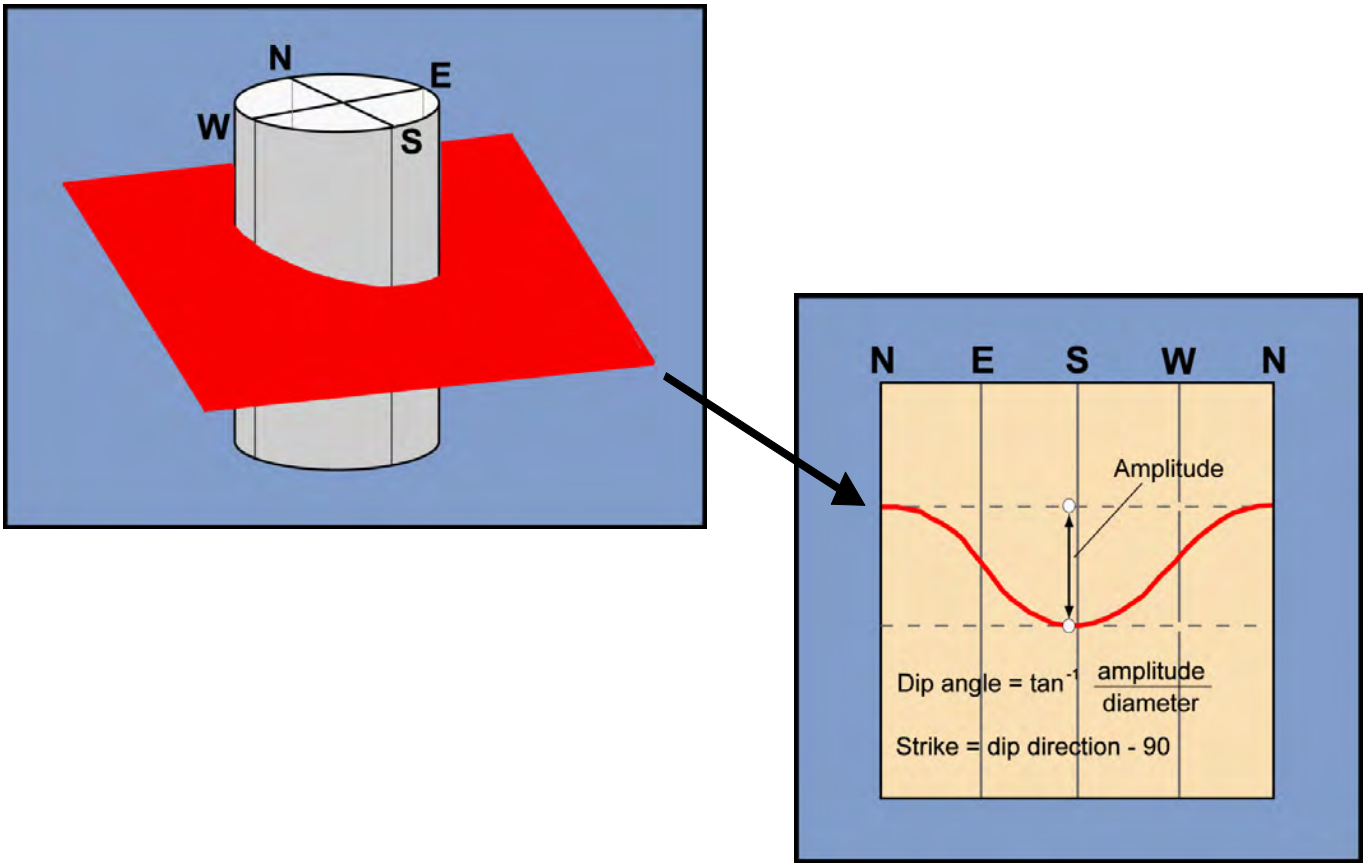

Figure 1. Televiewer explanation. The image on the left depicts a planar structure in red, such as a fracture or bedding plane, intersected by a borehole. The image on the right depicts the same structure unwrapped as it would be displayed in an optical televiewer (OTV) or acoustic televiewer (ATV) log.

Figure modified from: Garfield, R.L., Day-Lewis, F.D., Gray, M.B., Johnson, C.D., Williams, J.H. and Day-Lewis, A.D.F., 2003, Fractured-Rock Aquifer Characterization within a Regional Geologic Context: Results from the Bucknell University Hydrogeophysics Test Site, GSA Northeastern Section, 38th Annual Meeting, Paper No. 25-19.

1. Introduction

This report details the onsite technical services performed by Earth Data Northeast, Inc. (EDN) for Langan. Westbay System monitoring wells were installed in boreholes LMW-6R-S, LMW-6R-D, LMW-7R-S, LMW-7R-D, LMW-8R-S, LMW-8R-D, LMW-9R-S, LMW-9R-D, LMW-10R-S and LMW-10R-D at 1487 1st Ave., New York, NY.

EDN installation technician Mr. George Seidman was onsite to perform the installations from January 31, 2024 through February 8, 2024. The EDN technician was assisted onsite by Langan personnel. This report documents the installation tasks and related QA checks.

2. Previous Site Activities

The monitoring wells were completed as open bedrock boreholes, 4-inches in diameter. Surface casing was 5-inches in diameter an extended to various depths. Geophysical logging was performed in each of the boreholes prior to Westbay System installation.

Table 1. Summary of Westbay System Installations

Well-ID	Installation Date	Borehole Depth	MP Casing Depth	No. Monitoring Zones
LMW-6R-S	February 2, 2024	32.0’	31.75’	1
LMW-6R-D	February 2, 2024	60.0’	59.75’	3
LMW-7R-S	February 5, 2024	32.0’	31.75’	2
LMW-7R-D	February 1, 2024	63.0’	62.75’	2
LMW-8R-S	February 1, 2024	30.0’	29.75’	2
LMW-8R-D	February 5, 2024	65.0’	64.75’	2
LMW-9R-S	February 6, 2024	28.0’	27.75’	1
LMW-9R-D	February 6, 2024	64.0’	63.25’	3

LMW-10R-S	February 7, 2024	30.0’	29.75’	1
LMW-10R-D	February 8, 2024	56.0’	55.75’	2

All depths are with respect to ground surface.

3. Installation

3.1 Preparation of Monitoring Well Design

Well designs were completed by EDN based on requested packer locations provided by Langan. Westbay casing installation logs were produced from the well design, and were reviewed and approved in the field by Langan. Copies of the well designs and installation logs are included in the Appendices.

All of the wells were completed with MP38 Westbay Systems. The monitoring intervals contained Model 0205 measurement port couplings, used to collect fluid pressures and groundwater samples. Each monitoring zone also contained a Model 0224 mechanical pumping port, which can be used for purging and hydraulic conductivity testing.

Langan declined to have optional synthetic filters installed over the measurement port couplings in each well.

3.2 Layout of Westbay Casing Components

Prior to the installation, the Westbay System casing components were laid out near the wellhead of the borehole in the order in which they were to be installed, as indicated on the approved installation log. Each casing component was numbered in order, beginning with the deepest components and continuing to the shallowest. Once numbered, each component received the proper Westbay System coupling as indicated on the installation log.

Magnetic Locating Collars were attached approximately 2.0 feet below the shallowest measurement port in each interval, where possible. Each casing component was visually inspected for any damage or defect prior to installation. Serial numbers for each Westbay packer and Westbay measurement port couplings were recorded on the Casing Installation Log. Each well component and attached coupling was confirmed with the log prior to being lowered into the well.

3.3 Lowering of Westbay Components

The open-hole water level of each borehole was above ground surface at the time of installation, allowing the Westbay Systems to be lowered by hand. As the components were joined, each

casing joint was tested with a minimum internal hydraulic pressure of 150 psi for 1 minute to confirm hydraulic seals. Check marks on the casing installation log provide a record of the joint testing.

Clean water was added to the Westbay casing when necessary to compensate for buoyancy effects during lowering. All data presented in this report is based on the final, as-built position of the Westbay components

3.4 Positioning of Westbay Components

After the components were lowered in to the well, the Westbay casing string was positioned as shown on the Summary Casing Logs. The Westbay casing string was supported in this position while packer inflation was carried out.

The positioning of the Westbay casing components is based on the "nominal" lengths of Westbay casing components. The positioning calculations do not include allowances for borehole temperature or deviation effects, which are site dependant. The attached figure titled "MOSDAX Transducer Position" provides information to correlate the position of MOSDAX Transducer sensors to the reference position at the top of the Measurement Port. The attached figure titled "Dimensions of Packer Seals and Monitoring Zones" outlines the calculations used to determine the packer centerline depths and zone lengths.

3.5 Hydraulic Integrity Testing

After the Westbay casing was lowered into in the borehole and prior to packer inflation, the water pressure inside the Westbay casing was monitored to confirm the hydraulic integrity of the casing. The water pressure inside the casing was monitored for a period of 30 minutes and observed for changes. In each of the wells the groundwater elevation was above the ground surface, so any leaks would result in an increasing water pressure inside the Westbay casing. The integrity tests indicated that the Westbay Systems were water tight prior to packer inflation. The results of the tests can be seen in Tables 2-11.

Table 2. Integrity Test Results-LMW-6R-S

Borehole	Time	Water Pressure (psi) Inside Westbay Casing
LMW-6R-S	14:25	24.89

	10:46	31.90

3.6 Pre-inflation Profile

Prior to inflating the packers in each well, a pressure profile was performed. The goal of the pressure profile was to confirm the proper operation and location of the measurement ports and magnetic collars. A plot of the Pre-Inflation Piezometric levels in all zones in the wells is shown

on Figures 3, 5, 7, 9, 11, 13, 15, 17, 19 and 21 in the Appendices along with the field profile forms.

3.7 Inflation of MP System Packers

The Westbay packers were inflated sequentially beginning at the bottom of the well using clean water either brought to the Site by EDN or provided by Langan. Westbay model No. 6055 vented inflation tool was used for packer inflation. The data for inflation of each packer are provided on the Westbay Packer Inflation Records included in the Appendices.

4. Fluid Pressure Measurements

Following inflation of the packers, a post-inflation pressure profile was completed. At the time the measurements were taken, the isolated intervals may not have reached their final equilibrated fluid pressure levels. Longer term monitoring may be required to establish representative fluid pressures.

A plot of the Post –Inflation Piezometric levels is shown in Figure 4, 6, 8, 10, 12, 14, 16, 18, 20, and 22. The data was reviewed to confirm proper operation of the measurement ports and check the presence of the annulus seals between monitoring zones.

Discussion Points:

- The top of a coupling (Regular Coupling, Measurement Port or Pumping Port) is the reference point for describing nominal depths and nominal lengths. Actual positions of packer seals and zone lengths are determined with respect to the appropriate reference positions.
- Packer Position Example: A packer with a nominal depth of 50 ft (15.2m), will have a nominal packer seal position of 51.3 to 54.3 ft. (15.59 to 16.49m)
- Zone Length Example: A zone whose upper packer is at 50 ft (15.2m) and bottom packer is at 70 ft (21.3m) will have a nominal zone length of 15 ft (4.6m) and an actual zone length (between packer seals) of 15.0+1.3+0.7 = 17.0ft. (4.6 + 0.39 + 0.2 = 5.19m)
- Information on the position of Measurement Port Valve and MOSDAX Transducer sensor, used for detailed calculation of piezometric level measurements, are described separately.

Table 13. LMW-6R-D As-Built Packer and Port Summary

Port No.	Zone	Measurement Port Depth (ft)	Depth to Top of Packer (ft)	Top of Zone (ft)	Bottom of Zone (ft)	Comments
4	**Zone 3**	54.75	47.75	52.05	60.00	
3	**Zone 2**	42.75	37.75	42.05	49.05	
2	**Zone 1**	32.75	27.75	32.05	39.05	
1	QA1	23.75	18.75	23.05	29.05	

All depth measurements in feet below ground surface (bgs).

All depth measurements use 'Nominal' tubing lengths.

Not corrected for borehole deviation or borehole temperature effects.

All depth measurement to upper edge of Westbay System coupling item.

Table 14. LMW-7R-S As-Built Packer and Port Summary

Port No.	Zone	Measurement Port Depth (ft)	Depth to Top of Packer (ft)	Top of Zone (ft)	Bottom of Zone (ft)	Comments
3	QA1	26.75	21.75	26.05	32.00	
2	**Zone 2**	16.75	11.75	16.05	23.05	
1	**Zone 1**	6.75	1.75	6.05	13.05	

All depth measurements in feet below ground surface (bgs).

All depth measurements use 'Nominal' tubing lengths.

Not corrected for borehole deviation or borehole temperature effects.
All depth measurement to upper edge of Westbay System coupling item.

Summary Casing Log

Table 16. LMW-8R-S As-Built Packer and Port Summary

Port No.	Zone	Measurement Port Depth (ft)	Depth to Top of Packer (ft)	Top of Zone (ft)	Bottom of Zone (ft)	Comments
3	QA1	28.75	23.75	28.05	30.00	
2	**Zone 2**	18.75	11.75	16.05	25.05	
1	**Zone 1**	6.75	0.75	5.05	13.05	

All depth measurements in feet below ground surface (bgs).

All depth measurements use 'Nominal' tubing lengths.

Not corrected for borehole deviation or borehole temperature effects.
All depth measurement to upper edge of Westbay System coupling item.

Table 20. LMW-10R-S As-Built Packer and Port Summary

Port No.	Zone	Measurement Port Depth (ft)	Depth to Top of Packer (ft)	Top of Zone (ft)	Bottom of Zone (ft)	Comments
2	**Zone 1**	24.75	18.75	23.05	30.00	
1	QA1	8.75	3.75	8.05	20.05	

All depth measurements in feet below ground surface (bgs).

All depth measurements use 'Nominal' tubing lengths.

Not corrected for borehole deviation or borehole temperature effects.
All depth measurement to upper edge of Westbay System coupling item.

Summary Casing Log

Project Number:	100963701	**Report Date:**	02/16/24

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408247
Project Number:	100963701	**Report Date:**	02/16/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408247
Project Number:	100963701	**Report Date:**	02/16/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

February 27, 2024: This final report includes the results of all requested analyses.

February 26, 2024: This is a preliminary report.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

The analyses of Dehalococcoides and Total Eubacteria were subcontracted. A copy of the laboratory report is included as an addendum. Please note: This data is only available in PDF format and is not available on Data Merger.

Sample Receipt

The analyses performed were specified by the client.

L2408532-02, -03, and -05: Headspace was noted in the sample containers submitted for Total Alkalinity - SM 2320. The analysis was performed at the client's request.

Dissolved Organic Carbon

L2408532-02 through -05: The sample was filtered with the method required holding time exceeded.

L2408532-03: The DOC result is greater than the TOC result due to the filtering procedure required by the DOC method.

L2408532-04: The sample has an elevated detection limit due to the dilution required by the sample matrix.

Total Organic Carbon

L2408532-04: The sample has an elevated detection limit due to the dilution required by the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408532
Project Number:	100963701	**Report Date:**	02/27/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408532
Project Number:	100963701	**Report Date:**	02/27/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408532
Project Number:	100963701	**Report Date:**	02/27/24

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water
EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B, SM4500NO2-B**
EPA 524.2: THMs and VOCs; **EPA 504.1:** EDB, DBCP.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408838
Project Number:	100963701	**Report Date:**	02/26/24

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

The analyses of Dehalococcoides and Total Eubacteria were subcontracted. A copy of the laboratory report is included as an addendum. Please note: This data is only available in PDF format and is not available on Data Merger.

Sample Receipt

The analyses performed were specified by the client.

L2408838-02: Headspace was noted in the sample container submitted for Total Alkalinity - SM 2320. The analysis was performed at the client's request.

L2408838-03: A Trip Blank was received, but not listed on the Chain of Custody. At the client's request, this sample was not analyzed. The Client ID is reported as "TB03_02162024".

Dissolved Organic Carbon

L2408838-01 and -02: The sample was filtered with the method required holding time exceeded.

L2408838-02: The DOC result is greater than the TOC result due to the filtering procedure required by the DOC method.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408838
Project Number:	100963701	**Report Date:**	02/26/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	1487 FIRST AVE	**Lab Number:**	L2408838
Project Number:	100963701	**Report Date:**	02/26/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Data Summary Usability Reports

LANGAN

Technical Memorandum

To: Ashley Sandve, Langan Project Engineer

From: Joe Conboy, Langan Senior Staff Chemist

Date: March 4, 2024

Re: Data Usability Summary Report
For 1487 First Avenue Development
February 2024 Groundwater Samples
Langan Project No.: 100963701

This memorandum presents the findings of an analytical data validation from the analysis of groundwater samples collected in February 2024 by Langan Engineering and Environmental Services at 1487 First Avenue Development. The samples were analyzed by Alpha Analytical Laboratories, Inc. (NYSDOH NELAP registration # 11148) for volatile organic compounds (VOCs), metals & total hardness, sulfate, total organic carbon (TOC) & dissolved organic carbon (DOC), nitrate, total alkalinity and chloride by the methods specified below.

- VOCs by SW-846 Method 8260D
- Metals & Total Hardness by SW-846 Method 6020B
- Sulfate (as SO4) by SW-846 Method 9038
- TOC and DOC by SW-846 Method 9060
- Nitrate (as N) by SM Method 4500NO3F
- Total Alkalinity by SM Method 2320B
- Chloride (as Cl) by SM Method 4500-CL-E

Table 1, attached, summarizes the laboratory and client sample identification numbers, sample collection dates, level of data validation, and analytical parameters subject to review.

Validation Overview

This data validation was performed in accordance with the following guidelines, where applicable:

- USEPA Region II Standard Operating Procedures (SOPs) for Data Validation
- USEPA Contract Laboratory Program "National Functional Guidelines for Organic Superfund Methods Data Review" (EPA 540- R-20-005, November 2020)
- USEPA Contract Laboratory Program "National Functional Guidelines for Inorganic Superfund Methods Data Review" (EPA 540- R-20-005, November 2020), and
- published analytical methodologies.

The following acronyms may be used in the discussion of data-quality issues:

%D	Percent Difference	MB	Method Blank
CCV	Continuing Calibration Verification	MDL	Method Detection Limit
FB	Field Blank	MS	Matrix Spike
FD	Field Duplicate	MSD	Matrix Spike Duplicate
ICAL	Initial Calibration	RF	Response Factor
ICV	Initial Calibration Verification	RL	Reporting Limit
ISTD	Internal Standard	RPD	Relative Percent Difference
LCL	Lower Control Limit	RSD	Relative Standard Deviation
LCS	Laboratory Control Sample	TB	Trip Blank
LCSD	Laboratory Control Sample Duplicate	UCL	Upper Control Limit

Tier 1 data validation is based on completeness and compliance checks of sample-related QC results including: sample receipt documentation; analytical holding times; sample preservation; blank results (method, field, and trip); surrogate recoveries; MS/MSD recoveries and RPDs values; field duplicate RPDs, laboratory duplicate RPDs, and LCS/LCSD recoveries and RPDs. Three (3) SDGs underwent Tier 1 validation review.

As a result of the review process, the following qualifiers may be assigned to the data in accordance with the USEPA guidelines and our best professional judgment:

- **R –** The sample results are unusable because certain criteria were not met when generating the data. The analyte may or may not be present in the sample.
- **J –** The analyte was positively identified and the associated numerical value is the approximate concentration of the analyte in the sample.
- **UJ –** The analyte was not detected at a level greater than or equal to the reporting limit; however, the reported reporting limit is approximate and may be inaccurate or imprecise.
- **U –** The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the RL or the sample concentration for results impacted by blank contamination.
- **NJ –** The analysis indicates the presence of an analyte that has been "tentatively identified" and the associated numerical value represents its approximate concentration.

If any validation qualifiers are assigned, these qualifiers should supersede any laboratory-applied qualifiers. Data that is not qualified as a result of this data validation is considered acceptable on the basis of the items specified for review. Data that is qualified as "R" are considered invalid and are not technically usable for data interpretation. Data that is otherwise qualified because of minor data-quality anomalies are usable, as qualified in Table 2 (attached).

MAJOR DEFICIENCIES:

Major deficiencies include those that grossly impact data quality and necessitate the rejection of results. No major deficiencies were identified.

MINOR DEFICIENCIES:

Minor deficiencies include anomalies that directly impact data quality and necessitate qualification, but do not result in unusable data. The section below describes the minor deficiencies that were identified.

VOCs by SW-846 Method 8260D

L2408247

The LCS/LCSD for batch WG1885883 exhibited a RPD above the control limit for 4-methyl-2-pentanone (24%). The associated results in samples LMW-6R-D_54.75, LMW-6R-D_42.75, LMW-6R-D_32.75, LMW-9R-S_13.75, LMW-10R-D_40.75, LMW-10R-D_30.75, LMW-7R-S_6.75, LMW-7R-D_23.75, LMW-7R-D_49.75, LMW-9R-D_58.25, LMW-8R-D_27.75, and LMW-8R-D_59.75 are qualified as J or UJ because of potential indeterminate bias.

Sulfate (As SO4) by SW-846 Method 9038

L2408532

The FB (FB01_02152024) exhibited a detection of sulfate (1.7 mg/l). The associated results <10x blank concentration in samples LMW-8R-S_6.75, LMW-9R-D_58.25, and LMW-7R-S_16.75 are qualified as U at the reporting limit because of potential blank contamination.

The MB for batch WG1887773 exhibited a detection of sulfate (1.6 mg/l). The associated results <10x the blank concentration in samples LMW-8R-S_6.75, LMW-9R-D_58.25, and LMW-7R-S_16.75 are qualified as U at the reporting limit because of potential blank contamination.

TOC and DOC by SW-846 Method 9060

L2408532

The FB (FB01_02152024) exhibited detections of dissolved organic carbon (0.24 mg/l) and total organic carbon (0.17 mg/l). The associated results <10x blank concentrations in samples LMW-8R-S_6.75, LMW-9R-D_58.25, and LMW-7R-S_16.75 are qualified as U at the reporting limit because of potential blank contamination.

The MB for batch WG1887040 exhibited a detection of dissolved organic carbon (0.05 mg/l). The associated results <10x the blank concentration in samples LMW-8R-S_6.75, LMW-9R-D_58.25, and LMW-7R-S_16.75 are qualified as U at the reporting limit because of potential blank contamination.

OTHER DEFICIENCIES:

Other deficiencies include anomalies that do not directly impact data quality and do not necessitate qualification. The section below describes the other deficiencies that were identified.

VOCs by SW-846 Method 8260D

L2408247

The LCS and/or LCSD for batch WG1885883 exhibited percent recoveries above the UCL for chloromethane (140%) and vinyl acetate (140%, 160%). The associated results are non-detect. No qualification is necessary.

The MS/MSD performed on sample LMW-6R-S_18.75 exhibited percent recoveries above the UCL for 1,4-dioxane (166%, 178%) and 2-butanone (160%, 170%). Organic results are not qualified on the basis of MS/MSD recoveries alone. No qualification is necessary.

Metals & Total Hardness by SW-846 Method 6020B

L2408532

The FB (FB01_02152024) exhibited detections of total calcium (0.0970 mg/l) and total manganese (0.00066 mg/l). The associated results are >10X the contamination. No qualification is necessary.

TOC and DOC by SW-846 Method 9060

L2408838

The MB for batch WG1887040 exhibited a detection of dissolved organic carbon (0.05 mg/l). The associated results are >10X the contamination. No qualification is necessary.

FIELD DUPLICATES:

Zero field duplicate and parent sample pairs were collected and analyzed for all parameters. For results less than 5X the RL, analytes meet the precision criteria if the absolute difference is less than ±1X the RL. For results greater than 5X the RL, analytes meet the precision criteria if the

RPD is less than or equal to 30% for groundwater. The following field duplicate and parent sample pairs were compared to and met the precision criteria:

- DUP01_021424 and LMW-8R-S_6.75

CONCLUSION:

On the basis of this evaluation, the laboratory appears to have followed the specified analytical methods with the exception of errors discussed above. If a given fraction is not mentioned above, that means that all specified criteria were met for that parameter. All of the data packages met ASP Category B requirements.

All data are considered usable, as qualified. In addition, completeness, defined as the percentage of analytical results that are judged to be valid, is 100%.

Date

1.0 BACKGROUND

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) has prepared this Groundwater Performance Monitoring Report & Injection Design for the 1487 1st Avenue Redevelopment Site, New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) Site No. C231152. The Site is an approximately 10,050-square-foot parcel identified as Block 1452, Lot 27 in the Upper East Side neighborhood of Manhattan, New York (the "Site"). A site location plan is provided as Figure 1. A Certificate of Completion for remediation through the BCP was issued on 26 December 2023 and the site is currently undergoing construction for redevelopment as a 35-story mixed-use residential and commercial building with an affordable housing component that will occupy the entirety of the Site footprint. Ongoing groundwater monitoring and remediation is being implemented under the 22 December 2023 NYSDEC-approved Site Management Plan (SMP).

March/April 2023 Injections

Chlorinated volatile organic compounds (CVOCs), including the contaminants of concern (COCs) tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), vinyl chloride (VC), and chloroform were detected at concentrations exceeding the NYSDEC Ambient Water Quality Standards and Guidance Values (SGVs) in groundwater samples collected from the eastern portion of the Site during the completion of the Remedial Investigation. The concentrations of PCE and associated breakdown compounds detected in groundwater were indicative of a release that had migrated into bedrock at the site from a former solvent tank. Analytical results from the initial and baseline sampling events are presented in Tables 1 and 2, respectively, and CVOC analytical results from these events are summarized on Figures 2B and 3B.

To address these exceedances, an emulsified zero valent iron (EZVI) injection was proposed in the NYSDEC-approved January 2023 Interim Remedial Measures Work Plan (IRMWP) to achieve reduction in groundwater concentrations of the chlorinated solvents, such that natural attenuation would be supported. The EZVI remedy objectives were to:

- Both chemically reduce and anaerobically degrade the CVOCs;
- Further promote monitored natural attenuation (MNA); and,
- Mitigate potential for off-Site migration of on-Site CVOC-impacted groundwater.

The EZVI injection scope was presented in Langan's 6 March 2023 EZVI Remedial Design, the draft of which was approved by NYSDEC via email correspondence on 27 February 2023. Completion of the EZVI injections in March and April 2023 was documented in the 29 September 2023 EZVI Remedial Injection Report, which was included in the 18 December 2023 Final Engineering Report as Appendix E. A Certificate of Completion was issued for the Site on 26 December 2023.

Post construction bedrock well re-installation was completed between November 2023 and February 2024 and performance monitoring groundwater samples were collected in February 2024, approximately 10 months following the EZVI injections. Performance monitoring groundwater sample analytical results revealed the successful reduction of PCE and TCE by one order of magnitude in the wells that had previously contained the highest concentrations of these compounds during the initial and baseline sampling events, and elimination of PCE and TCE concentrations above the SGVs across the remainder of the treatment area. Concentrations of breakdown products including cis-1,2-DCE and VC were detected during performance monitoring, confirming the ongoing degradation of PCE and TCE.

May 2024 Injections

Based on the February 2024 performance monitoring analytical results, an additional focused injection was proposed in the April 2024 Groundwater Performance Monitoring Report and Injection Design to further address the highest concentrations of PCE and breakdown products remaining in groundwater. The additional injection was conducted at the four specific well intervals where COC concentrations greater than one order of magnitude above the SGV were detected during the February 2024 event. These locations included:

- LMW-7R-S at el 8 to 3 NAVD88 and el -2 to -7 NAVD88 intervals,
- LMW-7R-D at el -9 to -14 NAVD88 interval, and
- LMW-8R-S at el 8 to 3 NAVD88 interval.

EZVI was also injected into LMW-9R-S at el 1 to -5 NAVD88 to treat impacts in LMW-7R-S, as communication was observed between these two wells during the 2023 injection event.

In addition to EZVI injections, additional emulsified vegetable oil (EVO) was added at these five intervals (prior to and/or following the EZVI injection) and also at the following well intervals where only cis-1,2-DCE and/or VC remained above the SGVs:

- LMW-6R-S at el -4 to -9 NAVD88, and
- LMW-8R-D at el -43 to -50 NAVD88.

As shown in Table 3, EVO injection was also proposed at LMW-10R-S at el -9 to -15 NAVD88, but was not completed during the injection event, which will be discussed in further detail in Section 2.5.

Performance monitoring groundwater samples were collected on 12 to 16 August 2024. The analytical results revealed the elimination of PCE and TCE concentrations above the SGVs across the treatment area. Concentrations of breakdown products including cis-1,2-DCE and VC were detected during performance monitoring, confirming the continued degradation of PCE and TCE. Based on observations of reagent in some wells during the performance monitoring event, a small volume of reagent and groundwater was purged from LMW-7R-S at el 8 to 3 NAVD88 and additional anaerobic chase water was injected into LMW-7R-S at el 8 to 3 NAVD88 and el -2 to -7 NAVD88 in September 2024 in accordance with the April 2024 Groundwater Performance Monitoring Report and Injection Design.

The second round of injections, performance monitoring groundwater sample collection and analytical results, and the proposed next steps are discussed in detail below.

2.0 REMEDIAL IMPLEMENTATION

The following tasks were completed as a part of the additional EZVI injection implementation:

- Permit and Notifications;
- Pre-Injection Activities;
- Mobilization and Staging;
- Injection Reagents and Dosages;
- Reagent Mixing, Injections, and Monitoring;
- Health and Safety Requirements; and,
- Post-Injection Groundwater Performance Monitoring Events.

The EZVI reagents were delivered into the subsurface through four out of the ten on-site bedrock wells installed as proposed in the NYSDEC-approved April 2024 Groundwater Performance Monitoring Report and Injection Design. Field implementation modifications from the proposed plan included the final injection volumes and the use of Newman Zone OS™, sourced from RNAS Remediation Products Inc. (Brooklyn Center, MN), in lieu of sodium ascorbate as an oxygen scavenger. Following the post-injection performance monitoring event, additional

anaerobic chase water was injected into one of the on-site bedrock wells in September 2024. All remediation activities were completed between 1 May and 17 May 2024, and on 25 September 2024.

2.1 Permits and Notifications

An underground control notification letter, Inventory of Injection Wells form (USEPA form 7520-16), and a copy of the approved Emulsified Zero Valent Iron Remedial Design were submitted to the USEPA on 12 April 2024, prior to initiation of field activities.

2.2 Pre-Injection Activities

The reagent dosage and volume were calculated based on the February 2024 performance monitoring data. The table summarizing the proposed reagent dosage and volume along with the treatment interval at each injection location is provided in Table 3.

2.3 Mobilization and Staging

Prior to starting the injection activities, Langan and its subcontractors mobilized the necessary equipment and reagents to the Site. Mobilization was completed on 1 May 2024. Reagents and equipment were staged within the central portion of the Site. Remedial reagents including SRS®-ZVI (20%, 4 micron) emulsified vegetable oil (EVO) substrate, 60% SRS®-SD buffered EVO, TSI®-FSS ferrous sulfide solution, TSI-DC® *Dehalococcoides mccartyi*, diammonium phosphate (DAP), yeast extract, and calcium carbonate, sourced from Terra Systems, Inc. (Claymont, DE) were delivered to the site. All injection reagents were stored on-Site within a secured area with secondary containment and appropriate labeling and warning signs.

2.4 Injection Reagents and Dosages

The injection solution for the additional injection event consisted of similar reagents as the previous injection event. The reagents consisted of SRS®-ZVI (20%, 4 micron) emulsified vegetable oil (EVO), 60% SRS®-SD buffered EVO, TSI®-FSS ferrous sulfide solution, nutrients (yeast extract and DAP), and bioaugmentation culture TSI-DC®. Additionally, Newman Zone OS™ was used as an oxygen scavenger in lieu of the previously-proposed sodium ascorbate. Reagent dosages were estimated based upon field data collected during February 2024 groundwater performance sampling event in accordance with NYSDEC-approved October 2023 GSP. The proposed reagent dosages and volumes along with the treatment interval at each injection location is provided **in Table 3.**

2.5 Reagent Mixing, Injections, and Monitoring

The injection event included preparation for the injection of SRS-ZVI® and ferrous sulfide reagent, followed by application of injection mix (calcium carbonate, yeast extract, DAP, and Newman Zone OS™), and injection of undiluted bioaugmentation culture TSI-DC®, at three out of the ten bedrock wells and the application of injection mix and undiluted bioaugmentation culture in four out of the ten bedrock wells. Water sourced from the existing building's water main was used to provide dilution water for injection activities. Injections were completed by Cascade Environmental of Jackson, NJ. The field injection and monitoring logs are provided in Appendix A and the field services contractor report is provided by in Appendix B.

Anaerobic Water: Prior to the injection of remedial reagents, up to 10 gallons of anaerobic water were injected into the selected intervals as a test to confirm the injections through the Westbay system installed in the wells would be successful and to determine the minimum pressures necessary to inject the reagents.

EZVI: SRS-ZVI®, was initially injected without dilution and directly pumped from the reagent tote into the targeted injection intervals. However, multiple attempts were made at LMW-7R-D using this method and maximum pressures were reached without the pump being able to push SRS-ZVI® into the targeted interval. A 2-parts SRS-ZVI® to 1-part anaerobic water dilution was applied to the SRS-ZVI® using deoxygenated water for the remainder of the injection event. Even after the dilution, maximum pressures were reached at LMW-7R-S without the pump being able to push the full proposed volume of SRS-ZVI® into the targeted intervals. As such, a limited injection of SRS-ZVI® was also performed at LMW-9R-S to address LMW-7R-S, as these two wells had communication during the first injection event. SRS-ZVI® injections were thus performed at LMW-7R-S (41 gal), LMW-7R-D (27 gal), LMW-8R-S (37 gal), and LMW-9R-S (9 gal).

The reagent volume injected at each interval is provided is provided in Appendix A.

Application of Injection Mixture: An injection mixture of EVO, calcium carbonate, alkaline buffer, yeast extract, and DAP, was prepared in water that was treated with Newman Zone OS™ reducing reagent. The injection mixture was prepared in small batches and continuously mixed to avoid settling of solids. This mixture was injected prior to or following the EZVI injections at the targeted intervals at LMW-7R-S, LMW-7R-D, and LMW-8R-S, and was also injected at the targeted intervals at LMW-6R-S, LMW-8R-D, and LMW-9R-S. The water quality parameters of the anaerobic water and the volume of reagents injected at each interval are provided in Appendix A.

Application of Bioaugmentation culture TSI-DC®: The bioaugmentation culture was injected without dilution, in-line, before the injection point, to minimize the exposure of the oxygen sensitive microbial culture to air. The volume of bioaugmentation culture applied at each interval is provided in Appendix A.

Injections: The injection mix was applied within the treatment zones using the shallow and deep bedrock wells. The injection locations are shown on Figures 2A and 2B, the design injection intervals are provided in Table 3, and injection logs are provided in Appendix A. Injections at each location were performed through the Westbay systems. The Westbay system intervals include a pump port that can be opened with a specialty open/close tool to allow access to a specific injection interval. The targeted interval was opened with this tool, the tool removed, and the injection manifold attached. The injection reagents were then pumped from the mixing tank or directly from the reagent tote into the well head through the injection manifold. The injection manifold was equipped with ball valves, gate valves, and flow totalizers to regulate and monitor the injection flow. Each injection location was fitted with a well head that was equipped with a pressure gauge and a threaded adaptor to connect to the injection location and Camlock fittings to connect with similarly fitted hoses. One bedrock well was injected at a time.

All reagents were injected at the target injection interval followed by injection of anaerobic chase water, to rinse the injection hoses and push out reagents within the fractures away from the injection location. The volume of the anaerobic chase water used at each interval is provided in Appendix A. Once injections were complete at a treatment interval, the injection manifold was removed, and the Westbay open/close tool was used to close the targeted interval. Next, either the tool was used to open the next targeted interval in that monitoring well and the injection manifold was reattached for injecting regent into that second interval, or the open/close tool and injection manifold were then moved to the next targeted monitoring well. Changes to the injections (reagent volume, treatment intervals, extent of dilution of reagents, and volume of chase water) were made based on field observations. The injection system log provided in Appendix A summarizes the actual volumes of reagents injected and the injection pressures observed. Injection of reagents were not conducted at bedrock well LMW-10R-S due to observations of daylighted EVO at the well while injections were being performed at LMW-7R-S and LMW-8R-S. This observation suggests that well connectivity is present amongst the wells LMW-7R-S, LMW-8R-S, and LMW-10R-S. Similarly, as shown in Appendix A, daylighting of EVO was observed at LMW-9R-D during injections at LMW-9R-S.

Injection monitoring: Water quality parameters (pH, dissolved oxygen, oxidation reduction potential, turbidity, and temperature) were collected at the monitoring wells targeted for injections. Additional groundwater quality monitoring parameters were collected at monitoring wells during injections if the wells were accessible (not sealed to prevent short circuiting through the well casing). Periodically, Langan personnel also collected groundwater via the custom designed Westbay System fixed multi-level monitoring equipment to confirm the presence of injection media in bedrock monitoring wells included in the remedial injection scope. Water quality monitoring data is provided in Appendix A.

Based on field monitoring (Appendix A) and field services report (Appendix B), approximately 1,900 gallons of injection mixture (consisting of 114 gallons of SRS-ZVI, 24 pounds of DAP, 24 pounds of yeast extract, 360 pounds of calcium carbonate, 97 gallons of SRS-EVO, 22 liters of bioaugmentation culture TSI-DC®, 1,400 gallons of dilution water and 260 gallons of anaerobic chase water) were applied in the bedrock treatment zone. An average of 37 gallons of anaerobic chase water were injected into the targeted intervals. Once all injections were complete, excess reagent remaining within the Westbay casing was pumped into twelve 55-gallon steel drums and staged in a designated area for future offsite disposal. The non-hazardous drums (which included purge water from the Westbay well installation) were disposed of at Dale Transfer Corporation of West Babylon, NY on 6 June 2024.

Anaerobic Water: Based on observations of reagent during the performance monitoring event discussed in Section 6.0, additional anaerobic chase water was proposed to be injected into LMW-7R-S. Langan mobilized to the Site on 25 September 2024. A limited volume of reagent and groundwater (four gallons) was purged from LMW-7R-S at el 8 to 3 NAVD88 using a foot valve and stored in a 55-gallon drum for future off-site disposal. Langan mixed food-grade sodium ascorbate with water in a 55-gallon drum, and injected the anaerobic chase water into LMW-7R-S at el 8 to 3 NAVD88 (two gallons) and el -2 to -7 NAVD88 (13.5 gallons) in accordance with the April 2024 Groundwater Performance Monitoring Report and Injection Design.

3.0 HEALTH AND SAFETY REQUIREMENTS

A site-specific construction health and safety plan (CHASP) was developed as Appendix A of the January 2023 IRMWP and was enforced to protect on-Site workers during the implementation May 2024 remedial injection event. The CHASP includes reagent and chemical substance handling and storage guidelines, first aid and spill control measures, and exposure limits for all additives to be used in the field. Supplemental Safety Data Sheets (SDS) are provided in Appendix C. Personal protective equipment (PPE) was used while handling reagents included

full-face respirators, as applicable, chemical resistant coveralls and boots, nitrite gloves, steel toed shoes, and hard hat.

Appropriate storage, handling, and spill cleanup guidelines were followed to minimize the potential for accidental release and exposure to injection reagents. The injection area and surroundings were continuously monitored for surfacing and leaks during the injection process. In an event of surfacing or leak, the injections were immediately stopped, and the leaked or surfaced materials were removed, cleaned, and contained in drums. At the end of each workday, once application of injection pressure was ceased, the injection area and surroundings were monitored for an additional half-hour to identify any potential surfacing or leaks. During this time the pressure at the injection points would have subsided to ambient conditions, reducing potential for surfacing.

4.0 COMMUNITY AIR MONITORING

Pursuant to the NYSDEC-approved IRMWP dated January 2023, air monitoring was planned for particulates (i.e., dust) and VOCs during intrusive activities. As no soil movement occurred during the course of remedial injections and in accordance with the April 2024 Groundwater Performance Monitoring Report & Injection Design, CAMP was not implemented. The April 2024 Injection Design identified that the mixing and injection of the reagents through the Westbay system infrastructure was not anticipated to result in the release of VOCs, dust, or odors. As such, the exposure potential for downwind communities and users is low and during the injection activities, dust and odors were not observed to migrate from the work zone.

5.0 REPORTING

Qualified Langan field staff documented the implementation of remedial injections in daily field reports with photographs. The daily field reports were submitted to the NYSDEC for the agency's records. Copies of the daily field reports are included as Appendix D.

6.0 POST-INJECTION PERFORMANCE MONITORING AND BEDROCK WELL SAMPLING METHDOLOGY

A post-injection groundwater monitoring event was performed in August 2024, three months after the completion of second round of injections. Sixteen groundwater samples were collected from the same monitoring intervals that were sampled during the February 2024 performance monitoring event (with the exception of the lower interval at LMW-7R-D) in addition to quality

assurance/quality control samples including one field blank and three trip blanks. As discussed in the April 2024 Groundwater Performance Monitoring Report & Injection Design, during the monitoring well re-installation activities, LMW-7R-S and LMW-7R-D were evaluated for the presence of groundwater-producing fractures in the four performance monitoring sampling intervals that had been installed. A water-producing fracture was not detected in the deeper interval in LMW-7R-D and, as such, a sample was not collected from this interval during the August 2024 sampling.

Samples were collected in laboratory-supplied containers and were sealed, labeled, and placed in an ice-chilled cooler (to maintain a temperature of about 4° C) for delivery to Alpha Analytical of Westborough, Massachusetts, a NYSDOH ELAP-certified laboratory. All groundwater samples were analyzed for VOC analysis. Additional analytical parameters including metals (iron, calcium, manganese, and magnesium), anions (chloride, sulfate, and nitrate), total organic carbon, dissolved organic carbon, alkalinity, hardness, and microbial genes (for total bacteria and Dehalococcoides), were analyzed in five of the sixteen samples, including those collected at LMW-7R-S, LMW-8R-S, LMW-9R-S and LMW-10R-S. Water pressure measurements and groundwater quality parameters (e.g., pH, temperature, ORP, DO, turbidity, and conductivity) were collected during the groundwater monitoring event.

Groundwater samples were collected in accordance with the NYSDEC-approved October 2023 GSP on 12 through 16 August 2024. Purging is not required with the Westbay System due to the isolated nature of each monitoring zone. Valved ports within each monitoring zone provided access to each sampling interval for discrete groundwater sample collection. Discrete groundwater samples were collected at each designated sampling zone in a container that was sealed before being brought to the surface. As discussed below, the open/close tool was used to open the pump ports at the intervals at which the non-VOC samples were collected. Due to an excessive presence of reagent in the samples, approximately one to two gallons were purged from the two intervals at LMW-7R-S using a foot valve and/or peristaltic pump prior to sampling for the non-VOC parameters. Purged water was containerized in a 55-gallon steel drum and staged in a designated area for future offsite disposal.

Performance monitoring samples for VOC analysis were collected by lowering between one and four 250 milliliter (ml) sample containers through the central access casing to the designated sampling zone. The number of sample containers lowered at one time depended on the length of the specific sampling zone. The sealed sample container(s) was then pulled to the surface and the collected sample placed in laboratory-provided bottleware. Low sample recovery was observed at the locations where injections occurred in May 2024 and several rounds of lowering

and raising the sample containers was required to collect the full volume to submit to the laboratory. The low recovery is attributed to some permeability reduction at the fractures or sample ports as a result of the injections (discussed in more detail below) and/or the opening and closing of the pump port during the May 2024 injection activities, which may have created a void in the vicinity of the sample ports. As discussed in Section 2.5, injection of additional anaerobic chase water and purging excess reagent was completed to increase permeability in the fractures and sample ports noted above. . The potential void was addressed by leaving the sample port open with the container attached in order to purge the potential air void for an extended period (30 minutes to one hour) before again attempting to sample the groundwater.

No notable field observations of impacts were identified during sample collection. However, the presence of ZVI and EVO was observed at all intervals at LMW-7R-S and LMW-7R-D, and the presence of EVO was observed at the remaining injected locations (LMW-6R-S, LMW-8R-S, LMW-8R-D, LMW-9R-S, and LMW-10R-S) and at another monitoring well that was not injected into in May 2024 (LMW-6R-D).

7.0 PERFORMANCE MONITORING RESULTS

Groundwater analytical results were compared to the NYSDEC SGVs and are summarized in Table 2 and on Figures 3A through 3C. The laboratory data reports and data summary usability reports are provided in Appendix E and Appendix F, respectively.

Performance monitoring groundwater analytical results revealed the presence of CVOCs above the SGVs in only one of the ten wells sampled. Cis-1,2-DCE (42 µg/l) was detected above the SGV of 5 µg/l and VC (4 µg/l) was detected above the SGV of 2 µg/l in shallow well LMW-7R-S at el 8 to 3 NAVD88. PCE, trans-1,2-DCE, and chloroform were not detected in any of the monitoring wells, and TCE was not detected in any of the monitoring wells above the SGVs.

Concentrations of acetone, benzene, methyl ethyl ketone, and methylene chloride were also detected above the SGVs in all well pairs. It should be noted that acetone and methyl ethyl ketone concentrations were greater than their baseline or February 2024 performance monitoring concentrations. Elevated concentrations (3,400 to 4,000 µg/l) or reporting limits (10,000 µg/l) of methyl ethyl ketone were detected at the three well locations where SRS-ZVI® was injected, LMW-7R-S, LMW-7R-D, and LMW-9R-S, the latter of which likely has communication with LMW-7R-S. The presence of these compounds is attributed to temporary fermentation byproducts, and concentrations are expected to reduce over time.

The maximum concentrations of PCE, TCE, Cis-1,2-DCE, VC, and chloroform detected during the initial September 2022 sampling event and December 2022 baseline sampling events were 900 µg/l (LMW-8R-S), 390 µg/l (LMW-8R-S), 710 µg/l (LMW-7R-S), 6.7 µg/l (LMW-8R-D), and 56 µg/l (LMW-6R-D), respectively. With the exception of PCE, TCE, and chloroform (which did not exceed the SGVs in August 2024), the maximum concentrations of these compounds were detected in LMW-7R-S during the August 2024 performance monitoring event at concentrations of 42 µg/l (cis-1,2-DCE) and 4 µg/l (VC). These concentrations also represent an order of magnitude reduction from the February 2024 event (560 and 70 µg/l, respectively). Maximum concentrations of PCE and TCE decreased by an order of magnitude following the 2023 EZVI injections and were not detected following the 2024 EZVI targeted injections. Maximum concentrations of breakdown products including cis-1,2-DCE, VC, and chloroform also decreased from those detected during the baseline sampling event. Elevated concentrations of the breakdown products cis-1,2-DCE and VC in particular were detected at LMW-7R-S, which is expected due to the degradation of PCE and TCE following the two EZVI injections. Chloroform was not detected during the August 2024 performance monitoring event.

On average, iron and total organic carbon (TOC) concentrations were greater than the baseline event and the February 2024 performance monitoring event. The iron concentrations ranged from 36,800 to 1,860,000 µg/l and TOC concentrations, where detected, ranged from 120,000 to 8,600,000 µg/l. The continued elevated presence of TOC supports the continued bioremediation of the COCs where they remain.

Sulfate concentrations continued to show a decrease compared to the baseline event (55,000 to 1,100,000 µg/l), with concentrations ranging from non-detect to 34,000 µg/l. Sulfate reduction was anticipated, as the result of reducing conditions created by the EZVI injections.

Total bacteria (EBAC) concentrations increased compared to the baseline event, with concentrations ranging from $2.36x10^7$ to $2.26x10^8$ cell/ml. *Dehalococcoides* (DHC) concentrations increased, with concentrations ranging from 95 to $1.1x10^3$ cell/ml.

8.0 PERFORMANCE MONITORING CONCLUSIONS/RECOMMENDATIONS

The maximum concentrations of the COCs, PCE, TCE, cis-1,2-DCE, VC, and chloroform, were successfully reduced, as compared to the baseline concentrations and the February 2024 performance monitoring concentrations. Concentrations of cis-1,2-DCE and VC remain present at concentrations above the SGVs at only LMW-7R-S, and are expected to further reduce at this location with time.

Low recovery during sampling, visual observations of the reagents, and elevated concentrations of fermentation byproducts revealed that the reagents injected in May 2024 may not have fully entered the fractures. This is further supported by the maximum pressures achieved during injections and an inability to inject more than 260 gallons of anaerobic chase water during the May 2024 event. As such, an additional anaerobic chase water and purge excess reagent injection was conducted in September 2024, prior to the next performance monitoring event scheduled in November 2024.

Continued monitoring in November 2024 is proposed for monitoring wells LMW-7R-S/D, LMW-8R-S, and LMW-9R-S. Elevated concentrations of cis-1,2-DCE and VC remain at the shallow interval at LMW-7R-S, and elevated concentrations of fermentation products were detected and/or the presence of reagent was observed at the remaining intervals at LMW-7R-S/D, LMW-8R-S, and LMW-9R-S. Following the purging and anaerobic chase water injection at LMW-7R-S/D, an additional round of sampling is necessary to assess the effectiveness of the remedy. Langan proposes to remove the following wells from the monitoring program: LMW-10R-S/D, LMW-6R-S/D, LMW-8R-D, and LMW-9R-/D.

Abandonment of downgradient wells LMW-10R-S and LMW-10R-D is proposed, as sampling of these wells is no longer required due to the reduction of PCE and breakdown products within the source area, the limited lateral extents of impacts at the Site, the limited impacts at this well pair during the baseline event, and the lack of impacts detected above the SGVs during the August 2024 event. Monitoring wells LMW-6R-D and LMW-9R-D are also not included in the proposed monitoring plan as PCE, breakdown products, and chloroform were not detected above the SGVs in either the February or August 2024 performance monitoring events. Similarly, monitoring wells LMW-6R-S and LMW-8R-D are not included in the proposed monitoring plan because the only exceedance of the SGVs in February 2024 were for VC (2.8 and 2.7 µg/l, respectively) and, as of August 2024, VC was either below the SGVs or not detected at these locations.

Sodium Ascorbate Demand	pounds	4	4	4	4	3	4	4	4	30

Notes:
btoc - below top of the casing
DAP - diammonium phosphate
EVO - emulsified vegetable oil
g/L - grams per liter
mg/L - milligrams per liter
lb/1000 gallon - pounds per 1000 gallons
ROI - radius of influence
ZVI - Zero valent iron (4 micron)
TOC - total organic carbon
NA - data is not available
Hydraulic gradient is an average of low and high gradient computed from September 14, 2022 groundwater monitoring data.
Hydraulic conductivity in a well is an average of hydraulic conductivity calculated for different packer intervals in the well. For wells where packer tests were not performed, data from adjacent wells is used.
A fracture porosity of 0.1 was used for injection calculations.
Based on field observations up to 15% of pore volume will be injected.
ZVI target levels in pore volume range from 0.5 to 3.5 g/L depending upon the concentration of chlorinated volatile organic compounds (CVOCs) in the well and the levels of total organic carbon that are reached in the pore volume using a EVO and ZVI emulsion.
EVO demand is calculated based on percentage of ZVI and EVO in the SRS®-Z emulsion and was adjusted to reach at least approximately 500 mg/L TOC levels in the design volume.
EVO demand meets or is in excess of EVO demand estimated using Environmental Security Technology Certification Program (ESTCP) substrate requirements for hydrogen demand calculation sheet.
SRS®-ZVI is a proprietary product, combined emulsified vegetable oil substrate and zero valent, formulated by Terra Systems, Inc. (Claymont, DE).
The density of SRS®-Z with 20% ZVI is 9.7 pounds/gallon and with 10% ZVI is 8.81 pounds/gallon.
SRS®-EVO is a proprietary emulsified vegetable oil substrate, formulated by Terra Systems, Inc. (Claymont, DE).
TSI-Ferrous Sulfide Activator (mix of ferrous sulfide and sodium sulfide solution) distributed by Terra Systems, Inc. will be added to the SRS®-Z to form the sulfidated ZVI.
The density of ferrous sulfide solution is 1.15 to 1.22 grams per milliliter or an average of 9.88 pounds per gallon.
TSI-DC® Bioaugmentation Culture® - *Dehalococcoides* containing microbial consortium for anaerobic bioremediation is cultured by Terra Systems, Inc. (Claymont, DE).
Approximately 0.3% yeast extract and 0.05% diammonium phosphate (DAP) are included in commercial SRS®-ZVI formulation. Additional dosage of yeast extract and diammonium phosphate will be added to facilitate microbial growth.

Table 5
EZVI Remedial Injections and Groundwater Monitoring Report
Combined Analytical Results

1487 1st Avenue Redevelopment Site
New York, New York
NYSDEC BCP Site No.: C231152
Langan Project No.: 100963701

Notes:
CAS - Chemical Abstract Service
NS - No standard
ug/l - microgram per liter
NA - Not analyzed
RL - Reporting limit
<RL - Not detected
The following groundwater samples and groundwater monitoring wells are not shown on Table 4 due to excavation for the basement construction: LMW-8R-S_14.5, LMW-8R-S_15, LMW-9R-S_15, LMW-10R-S_13, LMW-11R-S, LMW-11R-D, LMW-12R-S, LMW-12R-D, LMW-13R-S, and LMW-13R-D and overburden wells LMW-6, LMW-7, LMW-8, LMW-9, and LMW-10.
Groundwater sample analytical results are compared to the New York State Department of Environmental Conservation (NYSDEC) Title 6 Codes, Rules, and Regulations (NYCRR) Part 703.5 and the NYSDEC Technical and Operation Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values for Class GA Water and published addenda (herein collectively referenced as "NYSDEC SGVs").

Qualifiers:
J - The analyte was positively identified and the associated numerical value is the approximate concentration of the analyte in the sample.
UJ - The analyte was not detected at a level greater than or equal to the RL; however, the reported RL is approximate and may be inaccurate or imprecise.

U - The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the RL or the sample concentration for results impacted by blank contamination.

Exceedance Summary:
10 - Result exceeds NYSDEC SGVs

APPENDIX A

Injection and Field Monitoring Logs

Appendix A
Field Visual Inspection Log

1487 First Avenue
New York City, New York
Langan Project No.:100963701

Langan Crew:	MJ

Checked the well field/treatment and surrounding areas for visual signs of daylighting and leaks before injection begins, and every 30 to 60 minutes during injection.

Date / Time	Injection Well	Injection Interval (ft btoc)	Observations + Location (surfacing, leaks, etc.)
5/7/2024 12:25	LMW-9R-S	13.75-19.75'	Daylighting occured near LMW-9R-D.
5/10/2024 9:01	LMW-7R-S	6.75-11.75'	Daylighting occured at LMW-10R-S.
5/10/2024 11:04	LMW-8R-S	6.75-11.75'	Daylighting occured at LMW-10R-S.
5/14/2024 12:50	LMW-7R-S	6.75-11.75'	Daylighting occured at LMW-10R-S and in the elevator shaft.

Notes:
ft - feet
btoc - below top of casing
Injection was not performed at well LMW-10R-S due to daylighting around the well while injecting at LMW-7R-S and LMW-8R-S.

5/16/2024	LMW-9R-S	16:41	16:50	0	0	0	0	90	-	0	Stopped due to end of day, no flow due to high pressure

Notes:
GPM - gallons per minute
psi - pounds per square inch
EZVI - emulsified zero-valent iron
FSS - ferrous sulfide
EVO - emulsified vegetable oil
L - liters
gal - gallons
hh:mm - hour:minute
Injection media is a mixture of anaerobic water+sodium ascorbate+diammonium phosphate (DAP)+yeast extract+calcium carbonate
Bioaugmentation culture used was TSI-DC®
Injection was not performed at well LMW-10R-S due to daylighting around the well while injecting at LMW-7R-S, and LMW-8R-S.

Subject: Remediation Field Services Report
Well Injections of SRS-Z and SRS-SD
1487 First Avenue
Manhattan, NY 10075

Dear Ms. Friscia,

In accordance with your request and authorization, Cascade Remediation Services (Cascade) has performed remediation field services for the subject site. The field services were performed in general accordance with Cascade's proposal dated March 22, 2024.

Cascade appreciates the opportunity to provide our services to you. If you have any questions or comments regarding this report, please contact the undersigned at your convenience.

Respectfully submitted,
Cascade Remediation Services

1 INTRODUCTION

Langan (client), subcontracted Cascade Remediation Services (Cascade) to perform remediation field services at the subject site located at 1487 First Avenue, Manhattan, NY. Field services were conducted in general accordance with Cascade's proposal dated March 22, 2024.

2 REMEDIATION APPROACH

The scope of this work was to inject SRS-Z®, an SRS-SD® mix, and a KB-1® bioaugmentation culture into previously installed Westbay multilevel system wells to reduce PCE concentrations and lingering daughter products. A well head was adapted to attach to the top of each well and used to deliver the amendment into the subsurface.

3 PROJECT ACTIVITIES

The following sections describe the field activities conducted at the site. The activities were conducted between May 1, and May 17, 2024.

3.1 PRE-MOBILIZATION ACTIVITIES

A site-specific health and safety plan was prepared to address worker and general public safety.

3.2 ONSITE ACTIVITIES

On May 1, 2024, Cascade mobilized all necessary injection equipment required to complete the scope of work. Prior to the commencement of field activities, a tailgate safety meeting was performed. The safety meeting was followed by a site walk to review the proposed injection wells marked by the client. The mixing platform was placed inside a containment berm located within the work area. The injection wells were located within the sub-cellar of a building within an active construction site. All equipment was carried into the work area via a lift in the loading dock area. Spill kits and portable vacuums were placed within the work area for immediate deployment. Langan provided a gas monitor to monitor air quality in the subcellar within the work area. Cascade provided fans and retractable ducts to circulate fresh air throughout the work area. Injection material transportation was coordinated by Langan. Unloading and handling of the injection material was coordinated and completed by Cascade.

The scope of work performed by Cascade included a 10-gallon anaerobic water injection test performed on injection well 9R-S. The injection test was done to determine if the Westbay well screen port was open. Once the flow rate was established, a batch of SRS-SD®, calcium carbonate, diammonium phosphate, yeast extract, and anaerobic water was mixed and injected into 9R-S. After the first ten minutes (approximately 30 gallons injected), a drop in pressure and increase in the flow rate was observed (40 PSI to 12 PSI). Daylighting was observed out of a hole in the concrete next to the well, as a result, the pressure and flow rate were reduced. Approximately 10 gallons of anaerobic "pillow" water was injected at a very low flow rate to minimize daylighting, then 2.2 Liters of KB-1® bioaugmentation culture, followed by an additional 10 gallons of pillow water. It was decided by Langan to move to the next location (8R-D) due to daylighting.

An initial water test was performed on injection well 8R-D before switching to the SRS-SD® mix. No issues were encountered while injecting on 8R-D at a low flow rate (approximately 1 GPM). Upon completion, 20 gallons of anaerobic chase water was pumped downhole to clear any residual amendment from the well. The injection line was then moved to injection well 7R-D.

SRS-Z® was intended to be injected undiluted into injection well 7R-D. After the initial water test, an attempt was made to inject the SRS-Z® neat, but no flow was achieved. As a result, the SRS-Z® was diluted with anaerobic water which allowed a low flow rate to be achieved, followed by 2.2 Liters of KB-1®, 20 gallons of pillow water, and more diluted SRS-Z®. Anaerobic water was not able to be injected following the SRS-Z®. The chase water intended for 7R-D was injected into injection well 9R-S instead.

After the initial water test on 7R-S-1, diluted SRS-Z® was injected until daylighting was observed around 10R-S. It was decided by Langan to move to the next location and revisit 7R-S-1 at another time. Upon revisiting, the remaining SRS-Z® was injected but no flow was achieved while trying to pump the anaerobic chase water. It was revisited the following day and received 2.2 Liters of KB-1® and the SRS-SD® mix. Injections were discontinued on this well after daylighting was observed in a nearby elevator shaft.

Daylighting was observed around injection well 10R-S after the initial water test on injection well 8R-S, and it was determined by Langan to revisit later. Upon revisiting, the SRS-SD® mix was injected, followed by 2.2 Liters of KB-1®, 10 gallons of pillow water, and additional SRS-SD® mix. Before achieving the target volume of the SRS-SD® mix, the pressure increased (30 PSI to 70 PSI) while the flow rate decreased until eventually coming to a stop. Undiluted SRS-Z® was injected the following day, but after 5 gallons, the flow rate ceased again, not allowing any flush water to be injected as well. This well was revisited again and received more SRS-Z® and an additional 6.6 Liters of KB-1®.

No issues were encountered while injecting on injection well 6R-S. It received the designed SRS-SD® mix, 2.2 Liters of KB-1®, 10 gallons of pillow water, the remaining SRS-SD® mix, and 10 gallons of chase water.

Both injection wells 7R-S-2 and 9R-S had issues establishing flow. Injection well 9R-S received a small amount of SRS-Z® before a decision was made by Langan to stop attempting to inject. SRS-Z® was manually cleared out of injection well 7R-S-2 by hand and helped to establish flow. It received a small amount of SRS-Z®, 2.2 Liters of KB-1®, and 10 gallons of pillow water before reclogging from additional SRS-Z®.

Total volume injected into the 7 Westbay injection wells was approximately 1,926 gallons (114 gallons of SRS-Z®, 94 gallons of SRS-SD®, 363 pounds of calcium carbonate, 24 pounds of diammonium phosphate, 24 pounds of yeast extract, 22 Liters of KB-1® bioaugmentation culture, 1,400 gallons of anaerobic dilution water, and 266 gallons of anaerobic flush water).

Remediation activities were completed on May 17, 2024 (see injection logs for details).

3.3 SITE RESTORATION

Upon completion of injection activities, the wells were relieved of pressure and the well heads were safely removed.

Investigation-derived waste generated during remediation activities was containerized in 55-gallon drums and staged onsite in an area marked by the client. Other waste (i.e. personal protective equipment, packaging material, etc.) was collected in large trash bags and disposed as municipal solid waste.

4 LIMITATIONS

The implementation of the scope of work was performed in accordance with the clients design specification as described above (Section 2) and supporting injection logs (Appendix A). Cascade bears no responsibility for remediation results or impact to existing conditions.

APPENDIX A

Safety Data Sheets and Technical Specifications

LANGAN

TSI DC *Dehalococcoides mccartyi* Bioaugmentation Culture®

Containing >1 x 10^{11} Dehalococcoides cells/L

Terra Systems TSI DC *Dehalococcoides mccartyi* Bioaugmentation Culture® is added to the groundwater at sites where the native microorganisms of Dehalococcoides are not present, are not in sufficient quantity, where the native population does not express all of the required functional genes for TCE and vinyl chloride reduction, or when the client wants to decrease the remediation time frame for the biodegradation of chlorinated solvents such as tetrachloroethene (PCE) and trichloroethene (TCE) to innocuous end products including ethene and ethane.

.

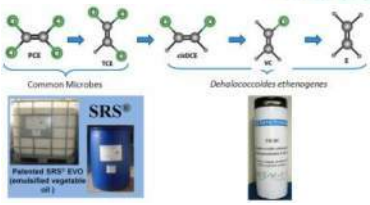
Key Communication Points

- TSI DC *Dehalococcoides mccartyi* Bioaugmentation Culture® is an enriched natural bacteria culture that contains *Dehalococcoides* species for bioaugmentation.
- TSI DC® contains >1 x 10^{11} *Dehalococcoides* cells/L
- This culture dechlorinates tetrachloroethene (PCE) and trichloroethene (TCE) to the non-toxic product ethene.
- The culture also biodegrades 1,1,1-trichloroethane to 1,1-dichloroethene, 1,1-dichloroethane, and chloroethane.
- It also can biodegrade carbon tetrachloride and chloroform to methylene chloride and innocuous products.
- It can be used at sites where bacteria capable of complete reductive dechlorination are not present or there is a need to decrease the remediation time frame. It is estimated that *Dehalococcoides* are not present in 10 to 40 percent of chlorinated solvent contaminated sites.

- **Key Benefits of TSI DC *Dehalococcoides mccartyi* Bioaugmentation Culture®**

- The TSI-DC® Bioaugmentation Culture has been proven to be effective with a growing body of laboratory and field data demonstrating that the *Dehalococcoides* group of microorganisms is primarily responsible for the complete dechlorination of PCE and TCE to ethene. Some *Dehalogenimonas* species can also biodegrade PCE and TCE.
- At sites where *Dehalococcoides* microorganisms are not present or are found at low numbers, the process will often "**stall**" at cis-1,2-dichloroethene (cDCE). Low pH or insufficient substrate can also contribute to the cDCE stall.

130 Hickman Road, Suite 1
Claymont, Delaware 19703
Phone: 302-798-9553 • Email: mfree@terrasystems.net
On the Web: www.terrasystems.net



- The TSI-DC® Bioaugmentation Culture will promote the complete dechlorination of PCE or TCE.
- The TSI-DC® Bioaugmentation Culture contains greater than **1 x 10^{11}** *Dehalococcoides*/L.

Terra Systems QA/QC

Terra Systems owns and operates a state-of-the-art US based "*just-in-time*" manufacturing plant with an in-house quality control laboratory for strict quality assurance of our products. With every shipment, we include a QA/QC sheet for the actual batch that the customer receives. Included are the date manufactured, batch#, DHC concentration (cells/L), PCE dechlorination activity and cDCE dechlorination activity.

Manufacturing Quality Control Checklist for TSI DC

SRS®-Z_{VI} (4 µm)
Combined Emulsified Vegetable Oil Substrate and 4 µm Zero Valent Iron
for DNAPL, Freon 113, and Biobarrier Applications

Terra Systems "*injection ready*" **SRS®-Z_{VI}** combines Terra Systems patented SRS® Emulsified Vegetable Oil Substrate with 4 µm zero valent iron (ZVI) and is added to the groundwater at complex and challenging remediation sites to rapidly generate reducing conditions. SRS®-Z_{VI} provides the necessary carbon and hydrogen to support native or introduced microorganisms (*Dehalococcoides*) for the biodegradation of dense non-aqueous phase liquids (DNAPLs) like tetrachloroethene (PCE) and trichloroethene (TCE) and to support abiotic degradation by the ZVI.

Key Communication Points

- The 4 µm ZVI should be injected via DPT for optimal distribution and because of the smaller particle size provides very good distribution and contact with the contaminants of concern (COC), easier injectability for the driller and fewer injection points for the consultant, thereby lowering costs.
- Provides both abiotic and biotic reductive dechlorination processes.
- SRS®-Z_{VI} is a combination of ZVI, biodegradable soybean oil, surfactants, sodium lactate, nutrients, and water that form a stable emulsion.
- SRS®-Z_{VI} contains a proprietary shear thinning agent, which under pressure thins the SRS®-Z_{VI} out for ease of injection and improved radius of influence.
- The exterior oil layer has similar hydrophobic properties as chlorinated compounds. Therefore, the emulsion attracts the contaminants for abiotic degradation.
- Terra Systems, Inc.'s manufacturing facility is configured to allow us to provide our customers with custom blended EVO/ZVI combinations without a cost premium.
- Includes sodium or potassium lactate to kick-start the anaerobic degradation process, nutrients and Vitamin B_{12}, a micronutrient, which *He et al. 2007* demonstrated is an important micronutrient to enhance dechlorination activity.
- It arrives at the site as a homogenous ***injection ready substrate*** and does not require mixing, which results in lower field labor costs from inefficient field mixing.
- Proven effective with high concentrations of chlorinated solvents, DNAPL, Biobarriers to prevent migration across property boundaries and Freon 113 treatment. Zero Valent Iron can promote the abiotic dechlorination of solvents including tetrachloroethene (PCE), trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA), and Freon 113 (1,1,2-trichloro-1,2,2-trifluoroethane).
- Proven effective at military installations, dry cleaners, semiconductor manufacturers, fabricators and manufacturing firms that use and clean metal parts (air conditioners, dishwashers, etc.).

Phone; 302-798-9553 – Email: mfree@terrasystems.net

Table I: SRS®- Z_{VI} Emulsified Vegetable Oil with 10-12.5% 4 µm zero valent iron (ZVI) Substrate Specifications

Ingredient	Percent by Weight/ Attributes	Description
Food Grade U.S. Grown Soybean Oil	52-54%	Terra Systems operates its own state-of-the-art manufacturing facility for SRS® production and can custom blend substrate packages as site conditions require.
Zero Valent Iron in suspension	10-12.5%	Microscale Iron (4 µm)
Sodium Lactate	4-5%	Quick Release Substrate
Proprietary Food Grade Emulsifiers and Nutrient Package Containing Nitrogen, Phosphorus and Vitamin B_{12}	6-7%	Food grade emulsifiers and nutrients are used.
pH	6.0 – 7.5	Neutral pH
Specific Gravity	8.81-9.03 pounds/ gallon	Denser than water
Viscosity	440 - 1,942 centipoises	Highly viscous

How it Works

ZVI is a strong reductant that reacts rapidly with a variety of constituents including chlorinated compounds, nitrate, and oxidized metals such as hexavalent chromium. ZVI reacts directly with the chlorinated compounds and typically generates little daughter products like cis-1,2-dichloroethene or vinyl chloride. In groundwater, iron metal (Fe^0) will consume oxygen and subsequently corrode to form dissolved hydrogen gas (H_2) and dissolved ferrous iron (Fe^{2+}). The hydrogen generated from the corrosion of ZVI has been shown to serve as an electron donor that stimulates biological reductive dechlorination of chlorinated solvents. The soybean oil is also biodegraded to generate hydrogen to support reductive dechlorination. SRS®-Z_{VI} supports both biological and abiotic degradation for the best of both worlds.

Terra Systems Flexible Manufacturing Capability

Terra Systems, Inc.'s manufacturing facility is configured to allow us to provide our customers with custom blended SRS®-Z_{VI} packages without a cost premium. In general, the smaller the average ZVI particle, the more expensive the product.

130 Hickman Road – Suite 1 – Claymont – Delaware – 19703
Phone; 302-798-9553 – Email: mfree@terrasystems.net

Terra Systems
INCORPORATED

Because of our manufacturing capability, Terra Systems has the broadest EVO/ZVI product line in the industry, which allows our customers to specify the percent and particle size of the ZVI based on their remediation goals.

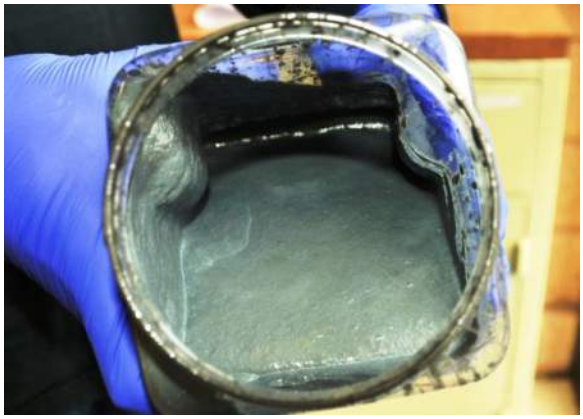
ZVI %/ZVI Average Particle Size	SRS®-Z_{VI} 2 µm	SRS®-Z_{VI} 4 µm	SRS®-Z_{VI} <44 µm	SRS®-Z_{VI} <125 µm
5 % ↓ 40%				
Customer Specified				

2 µm ZVI: Can be injected via wells or DPT. Easiest to inject with improved radius of influence.

4 µm ZVI: Can be injected via DPT.

<44 µm ZVI: Can be injected via DPT. Can incorporate higher percentage of ZVI with less impact on cost.

<125 µm ZVI: Can be injected via DPT. Can incorporate higher percentage of ZVI with less impact on cost.



Packaging: Terra Systems patented SRS® - Z_{VI} is shipped in 330-gallon IBC totes with 250 gallons in each tote.

Delivered Injection Ready: Terra Systems patented SRS® - Z_{VI} is shipped ready-to-inject.

130 Hickman Road – Suite 1 – Claymont – Delaware – 19703
Phone; 302-798-9553 – Email: mfree@terrasystems.net

The TSI-DC® Bioaugmentation Culture is cost effective and is typically a minor component of the total remediation project cost. At sites where the *Dehalococcoides* is present, but at low numbers or poorly distributed, bioaugmentation can be used to reduce the treatment time. Bioaugmentation can also reduce the time required to grow the *Dehalococcoides* population to effective cell densities. Therefore, future costs can be reduced.

- The TSI-DC® Bioaugmentation Culture works with all commonly used electron donors.
- The TSI-DC® Bioaugmentation Culture is not genetically modified or engineered.
- The TSI-DC® Bioaugmentation Culture is certified to be free of known human pathogens.
- Each purchase comes with free technical phone support from an experienced Terra Systems microbiologist.
- The TSI-DC® Bioaugmentation Culture has rigorous quality control procedures in place to ensure that each shipment is of the highest quality, stable, safe, effective and free of chlorinated volatile organic compounds.
- The TSI-DC® Bioaugmentation Culture is shipped overnight in specially designed stainless-steel containers that prevent exposure to air and are safe & easy to handle.
- A senior level microbiologist is also available to be on-site to support the successful application at $1,200 per day plus travel expenses

Safety Data Sheet

Lactic Acid, 85% ACS

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name: Lactic Acid, 85%, ACS

Synonyms/Generic Names: DL-Lactic acid; 2-Hydroxypropanoic Acid; 2-Hydroxypropionic acid; Racemic lactic acid; Ordinary lactic acid; Propanoic acid, 2-hydroxy-

Product Number: 2905

Product Use: Industrial, Manufacturing or Laboratory use

Manufacturer: Columbus Chemical Industries, Inc.
N4335 Temkin Rd.
Columbus, WI. 53925

For More Information: 920-623-2140 (Monday-Friday 8:00-4:30)
www.columbuschemical.com

In Case of Emergency Call: CHEMTREC - 800-424-9300 or 703-527-3887 (24 Hours/Day, 7 Days/Week)

2. HAZARDS IDENTIFICATION

Hazard Not Otherwise Classified (HNOC): None

Signal Words: Danger

Pictograms:

GHS Classification

Skin irritation	Category 2
Serious eye damage	Category 1

GHS Label Elements, including precautionary statements:

Hazard Statements:

H315	Causes skin irritation.
H318	Causes serious eye damage.

Precautionary Statements:

P264	Wash hands thoroughly after handling.
P280	Wear protective gloves/eye protection/face protection.
P302+P352	IF ON SKIN: Wash with plenty of water.
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor/physician.
P332+P313	If skin irritation occurs: Get medical advice/attention.

P362+P364	Take off contaminated clothing and wash it before reuse.

Potential Health Effects

Eyes	Causes eye burns.
Inhalation	Causes respiratory tract irritation.
Skin	Causes skin irritation.
Ingestion	May be harmful if swallowed.

NFPA Ratings

Health	2
Flammability	1
Reactivity	0
Specific hazard	Not Available

HMIS Ratings

Health	2
Fire	1
Reactivity	0

3. COMPOSITION/INFORMATION ON INGREDIENTS

Component	Weight %	CAS #	EINECS# / ELINCS#	Formula	Molecular Weight
Lactic Acid	85	50-21-5	200-018-0	$C_3H_6O_3$	90.08 g/mol
Water	Balance	7732-18-5	231-791-2	H_2O	18.00 g/mol

4. FIRST-AID MEASURES

Eyes	Rinse with plenty of water for at least 15 minutes and seek medical attention immediately.
Inhalation	Move casualty to fresh air and keep at rest. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get medical attention immediately.
Skin	Flush with plenty of water for at least 15 minutes while removing contaminated clothing and wash using soap. Get medical attention immediately.
Ingestion	**Do Not Induce Vomiting!** Never give anything by mouth to an unconscious person. If conscious, wash out mouth with water. Get medical attention immediately.

5. FIREFIGHTING MEASURES

Suitable (and unsuitable) extinguishing media	Product is flammable. Use water, dry chemical, foam, or carbon dioxide on fires involving this product. Use appropriate media for adjacent fire. Cool containers with water, keep away from common metals.
Special protective equipment and precautions for firefighters	Wear self-contained, approved breathing apparatus and full protective clothing, including eye protection and boots.
Specific hazards arising from the chemical	Emits toxic fumes (carbon oxides) under fire conditions. (See also Stability and Reactivity section)

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	See section 8 for recommendations on the use of personal protective equipment.
Environmental precautions	Prevent spillage from entering drains. Any release to the environment may be subject to a federal/national or local reporting requirements.

Methods and materials for containment and cleaning up	Neutralize spill with sodium bicarbonate or lime. Absorb spill with noncombustible absorbent material, then place in a suitable container for disposal. Clean surfaces thoroughly with water to remove residual contamination. Dispose of all waste and cleanup materials in accordance with regulations.

7. HANDLING AND STORAGE

Precautions for safe handling
See section 8 for recommendations on the use of personal protective equipment. Use with adequate ventilation. Wash thoroughly after using. Keep container closed when not in use.

Conditions for safe storage, including any incompatibilities
Store in cool, dry well ventilated area. Keep away from incompatible materials (see section 10 for incompatibilities).

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Occupational exposure controls: Contains no substances with occupational exposure limit values.

Personal Protection

Eyes	Wear chemical safety glasses or goggles, and face shield.
Inhalation	Provide local exhaust, preferably mechanical. If exposure levels are excessive, use an approved respirator.
Skin	Wear nitrile or rubber gloves, and full body covering. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.
Other	Not Available

Other Recommendations
Provide eyewash stations, quick-drench showers and washing facilities accessible to areas of use and handling. Have supplies and equipment for neutralization and running water available.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance (physical state, color, etc.)	White to slightly yellow liquid.
Odor	Acrid (Slight.)
Odor threshold	Not Available
pH	2
Melting point/freezing point	17 °C (63 °F)
Initial boiling point and boiling range	122 °C (252 °F) at 20 hPa (15 mmHg) - lit.
Flash point	113 °C (235 °F) - closed cup
Evaporation rate	Not Available
Flammability (solid, gas)	Class II Combustible liquid.
Upper/lower flammability or explosive limit	Not Explosive
Vapor pressure	0 kPa (@ 20°C)
Vapor density	>1 (air=1)
Density	1.209 g/cm^3 at 25 °C (77 °F)
Solubility (ies)	Soluble in cold water, hot water. Partially soluble in diethyl ether. Soluble in Furfurol, alcohol. Practically insoluble in chloroform, petroleum ether, carbon disulfide.
Partition coefficient: n-octanol/water	Log Pow: -0.7
Auto-ignition temperature	Not Available

Decomposition temperature	Not Available

10. STABILITY AND REACTIVITY

Chemical Stability	Stable
Possibility of Hazardous Reactions	Will not occur.
Conditions to Avoid	Extremes of temperature, open flames, sparks, sources of ignition.
Incompatible Materials	Moisture, bases, organic materials, metals, carbides, cyanides, chlorates, nitrates, picrates, permanganate, peroxides, zinc iodide, azides, perchlorates, phosphorus.
Hazardous Decomposition Products	Carbon oxides.

11. TOXICOLOGICAL INFORMATION

Acute Toxicity

Lactic Acid

Skin	LD50 Dermal- rabbit- >2,000 mg/kg
Eyes	Eyes- rabbit- Severe eye irritation- Draize test
Respiratory	Not Available
Ingestion	LD50 Oral – rat- 3,543 mg/kg

Carcinogenicity

IARC	No components of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
ACGIH	No components of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.
NTP	No components of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.
OSHA	No components of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.

Signs & Symptoms of Exposure

Skin	Burning, itching, redness, inflammation and/or swelling of exposed tissues.
Eyes	Eye burns, watering eyes.
Respiratory	Burning, choking, coughing, wheezing, laryngitis, shortness of breath, headache or nausea.
Ingestion	Burning, choking, nausea, vomiting and severe pain.

Chronic Toxicity	Not Available
Teratogenicity	Not Available
Mutagenicity	Not Available
Embryotoxicity	Not Available
Target Organ(s)	Not Available
Reproductive Toxicity	Not Available
Respiratory/Skin Sensitization	Not Available

12. ECOLOGICAL INFORMATION

Ecotoxicity

Lactic Acid

Aquatic Vertebrate	Not Available
Aquatic Invertebrate	EC50 Daphnia magna (Water flea)- 180-320 mg/l – 48 h

Terrestrial	Mortality NOEC- Pseudokirchneriella subcapitata- 320 mg/l -96 h EC50- Pseudokirchneriella subcapitata (green algae)- >2,800 mg/l- 84 h

Persistence and Degradability	Readily biodegradable
Bioaccumulative Potential	Not Available
Mobility in Soil	Completely soluble
PBT and vPvB Assessment	Not Available
Other Adverse Effects	Not Available

13. DISPOSAL CONSIDERATIONS

Waste Product or Residues	Users should review their operations in terms of the applicable federal/national or local regulations and consult with appropriate regulatory agencies if necessary before disposing of waste product or residue.
Product Containers	Users should review their operations in terms of the applicable federal/national or local regulations and consult with appropriate regulatory agencies if necessary before disposing of waste product container.

The information offered in section 13 is for the product as shipped. Use and/or alterations to the product may significantly change the characteristics of the material and alter the waste classification and proper disposal methods.

14. TRANSPORTATION INFORMATION

US DOT	UN3265, Corrosive liquid, acidic, organic, n.o.s., (lactic acid), 8, pg III
TDG	UN3265, CORROSIVE LIQUID, ACIDIC, ORGANIC, N.O.S., (LATIC ACID), 8, pg III
IMDG	UN3265, CORROSIVE LIQUID, ACIDIC, ORGANIC, N.O.S., (LATIC ACID), 8, pg III
Marine Pollutant	No
IATA/ICAO	UN3265, Corrosive liquid, acidic, organic, n.o.s., (lactic acid), 8, pg III

15. REGULATORY INFORMATION

TSCA Inventory Status	All ingredients are listed on the TSCA Active inventory.
DSL / NDSL	All ingredients are listed on the DSL inventory.
California Proposition 65	Not Listed
Rhode Island: Hazardous Substance List	Not Listed
Massachusetts: Toxic or Hazardous Substance List, Right to Know	Not Listed
Pennsylvania: Hazardous Substance List	Not Listed
New Jersey: Right to Know Hazardous Substance List	Not Listed
SARA 302	Not Listed
SARA 304	Not Listed
SARA 311	Acute Health Hazard
SARA 312	Acute Health Hazard
SARA 313	Not Listed
WHMIS Canada	Class D2B: Poisonous and infectious material – Other effects – Toxic. Class E: Corrosive material

16. OTHER INFORMATION

Revision	Date
Original	03/21/2013
Revision 1	08/27/2015
Revision 2	10/18/2021

Disclaimer: The information provided in this Safety Data Sheet (“SDS”) is correct to the best of our knowledge, information, and belief at the date of publication. The information in this SDS relates only to the specific Product identified under Section 1, and does not relate to its use in combination with other materials or products, or its use as to any particular process. Those handling, storing, or using the Product should satisfy themselves that they have current information regarding the particular way the Product is handled, stored or used and that the same is done in accordance with federal, state and local law. WE DO NOT MAKE ANY WARRANTY, EXPRESS OR IMPLIED, INCLUDING (WITHOUT LIMITATION) WARRANTIES WITH RESPECT TO THE COMPLETENESS OR CONTINUING ACCURACY OF THE INFORMATION CONTAINED HEREIN OR WITH RESPECT TO FITNESS FOR ANY PARTICULAR USE. WE DO NOT ASSUME RESPOSIBILITY AND EXPRESSLY DISCLAIM LIABILITY FOR LOSS, INJURY, DAMAGE OR EXPENSE ARISING OUT OF OR IN ANY WAY CONNECTED WITH THE HANDLING, STORAGE, USE OR DISPOSAL OF THIS PRODUCT.

TSI-Ferrous Sulfide Activator
SAFETY DATA SHEET

SECTION 1: Identification

1.1. Identification

Product form:	Mixture
Trade name:	TSI -FSA
CAS No:	1317-37-9
Formula:	FeS
Synonyms:	Ferrous sulfide / Iron sulfide / Iron sulphide / Iron(II) sulfide / Ferrous sulfide / Iron sulfide / Iron sulphide / Iron(II) sulfide

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the substance/mixture: Chemical used for the activation of persulfate.

1.3. Details of the supplier of the safety data sheet

Terra Systems, Inc.
130 Hickman Road, Suite 1
Claymont, DE 19703

Company Contact: Michael D. Lee, Ph.D.
Telephone Number: (302)798-9553

1.4. Emergency telephone number

CHEMTREC: (800) 424-9300

SECTION 2: Hazard(s) identification

2.1. Classification of the substance or mixture

GHS-US classification

Skin corrosion/irritation Category 2	H315
Serious eye damage/eye irritation Category 2A	H319
Full text of H statements:	see section 16

2.2. Label elements

GHS-US labeling

Hazard pictograms (GHS-US):

GHS07

Signal word (GHS-US): Warning

Hazard statements (GHS-US):	H315 - Causes skin irritation H319 - Causes serious eye irritation
Precautionary statements (GHS-US):	P264 - Wash hands thoroughly after handling P280 - Wear eye protection, protective clothing, protective gloves P302+P352 - If on skin: Wash with plenty of water P305+P351+P338 - If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing P321 - Specific treatment (see Consult a doctor/medical service if you feel unwell on this label) P332+P313 - If skin irritation occurs: Get medical advice/attention P337+P313 - If eye irritation persists: Get medical advice/attention P362+P364 - Take off contaminated clothing and wash it before reuse

2.3. Other hazards

HMIS Classification:

Health hazard: 0
Flammability: 0
Physical hazards: 0

NFPA Rating:

Health hazard: 1
Fire: 0
Reactivity Hazard: 0

Inhalation May be harmful if inhaled. May cause respiratory tract irritation.
Skin May be harmful if absorbed through skin. May cause skin irritation.
Eyes May cause eye irritation.
Ingestion May be harmful if swallowed.
Other Hazards not contributing to the classification: Generates toxic gas in contact with acid.

2.4. Unknown acute toxicity (GHSUS)

Not applicable

SECTION 3: Composition/Information on ingredients

3.1. Substance

Not applicable

3.2. Mixture

Name	Product Identifier	%	GHS-US classification
Iron sulfide (FeS)	(CAS No) 1317-37-9	7 -11	Not classified
Sodium Sulfide	(CAS No) 1313-82-2	0.1 - 1	Acute Tox. 3 (Oral), H301

Full text of hazard classes and H-statements : see section 16

SECTION 4: First aid measures

4.1. Descriptionoffirstaidmeasures

First-aid measures general: Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).

First-aid measures after inhalation: Remove person to fresh air and keep comfortable for breathing. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a poison center or doctor/physician.

First-aid measures after skin contact: Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. If skin irritation occurs: Get medical advice/attention.

First-aid measures after eye contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a doctor/physician. If eye irritation persists: Get medical advice/attention.

First-aid measures after ingestion: Rinse mouth. Do NOT induce vomiting. Immediately call a poison center or doctor/physician. Call a poison center/doctor/physician if you feel unwell.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms/injuries: Causes skin and eye irritation.

Symptoms/injuries after skin contact : Irritation.

Symptoms/injuries after eye contact: Causes serious eye damage. Eye irritation.

4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media: Foam. Dry powder. Carbon dioxide. Water spray. Sand.

Unsuitable extinguishing media: Do not use a heavy water stream.

5.2. Special hazards arising from the substance or mixture

Reactivity:	Corrosive vapors.

5.3. Advice for firefighters

Firefighting instructions:	Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire. Prevent fire-fighting water from entering environment.
Protection during firefighting:	Do not enter fire area without proper protective equipment, including respiratory protection. Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel

Emergency procedures:	Ventilate spillage area. Evacuate unnecessary personnel. Avoid contact with skin and eyes.

6.1.2. For emergency responders

Protective equipment:	Do not attempt to take action without suitable protective equipment. Equip cleanup crew with proper protection. For further information refer to section 8: "Exposure controls/personal protection".
Emergency procedures:	Ventilate area.

6.2. Environmental precautions

Avoid release to the environment. Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.

6.3. Methods and materials for containment and cleaning up

Methods for cleaning up:	Take up liquid spill into absorbent material. Soak up spills with inert solids, such as clay or diatomaceous earth as soon as possible. Collect spillage. Store away from other materials.
Other information:	Dispose of materials or solid residues at an authorized site.

6.4. Reference to other sections

See Heading 8. Exposure controls and personal protection. For further information refer to section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Precautions for safe handling:	Ensure good ventilation of the work station. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent

	formation of vapor. Do not breathe dust, fume, gas, mist, spray, vapors. Avoid contact during pregnancy/while nursing. Avoid contact with skin and eyes. Wear personal protective equipment.
Hygiene measures:	Wash hands thoroughly after handling. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Always wash hands after handling the product.

7.2. Conditions for safe storage, including any incompatibilities

Technical measures:	Comply with applicable regulations.
Storage conditions:	Keep only in the original container in a cool, well ventilated place away from : Ignition sources, Incompatible materials. Keep container closed when not in use. Store in a well-ventilated place. Keep cool.
Incompatible products:	Strong bases. Strong acids.
Incompatible materials:	Sources of ignition. Direct sunlight.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

TSI-FSA (1317-37-9)

ACGIH	ACGIH TWA (mg/m³)	1.4 mg/m³
ACGIH	ACGIH TWA (ppm)	1 ppm
ACGIH	ACGIH STEL (mg/m³)	7 mg/m³
ACGIH	ACGIH STEL (ppm)	5 ppm

Iron sulfide (FeS) (1317-37-9)

Not applicable

Sodium sulfide (1313-82-2)

Not applicable

8.2. Exposure controls

Appropriate engineering controls:	Ensure good ventilation of the work station.
Personal protective equipment:	Avoid all unnecessary exposure.
Hand protection:	Wear protective gloves.
Eye protection:	Chemical goggles or face shield. Safety glasses.
Skin and body protection:	Wear suitable protective clothing.
Respiratory protection:	Wear appropriate mask.
Environmental exposure controls:	Avoid release to the environment.
Other information:	Do not eat, drink or smoke during use.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Physical state:	Liquid
Appearance:	Black liquid with visible suspended solids.
Color:	Black
Odor:	Rotten eggs
Odor threshold:	No data available
pH:	11.5 - 12.8
Melting point:	Not applicable
Freezing point:	No data available
Boiling point:	No data available
Flash point:	No data available
Relative evaporation rate (butyl acetate=1):	No data available
Flammability (solid, gas):	Non-flammable
Vapor pressure:	No data available
Relative vapor density at 20 °C:	No data available
Relative density:	1.15 - 1.22
Solubility:	Minimally soluble in water.
Log Pow:	No data available
Auto-ignition temperature:	No data available
Decomposition temperature:	No data available
Viscosity, kinematic:	No data available
Viscosity, dynamic:	No data available
Explosion limits:	No data available
Explosive properties:	No data available
Oxidizing properties:	No data available

9.2. Other information

No additional information available

SECTION 10: Stability and reactivity

10.1. Reactivity

Acidic vapors.

10.2. Chemical stability

Not established.

10.3. Possibility of hazardous reactions

Contact with acids liberates toxic gas.

10.4. Conditions to avoid

Direct sunlight. Extremely high or low temperatures.

10.5. Incompatible materials

Acids will cause the release of highly toxic Hydrogen Sulfide. Reacts violently with diazonium salts. Ferrous sulfide(s) solution is not compatible with copper, zinc, aluminum or their **alloys** (i.e. bronze, brass, galvanized metals, etc.). Corrosive to steel above 150º F (65.5º C). These materials of construction should not be used in handling systems or storage containers for this product.

10.6. Hazardous decomposition products

Hazardous decomposition products formed under fire may include sulfur oxides, iron oxides.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Acute toxicity: Not classified

Sodium Sulfide (113-82-2)	
LD50 oral rat	208 mg/kg
ATE US (oral)	208.000 mg/kg body weight
LD50 dermal rabbit	< 340 mg/kg
ATE US (dermal)	300.000 mg/kg body weight

Skin corrosion/irritation: Causes skin irritation. pH: 11.5 - 12.8

Serious eye damage/irritation: Causes eye irritation. pH: 11.5 - 12.8

Respiratory or skin sensitization: Not classified

Germ cell mutagenicity: Not classified

Carcinogenicity: Not classified

Reproductive toxicity: Not classified

Specific target organ toxicity (single exposure): Not classified

Specific target organ toxicity (repeated exposure): Not classified

Aspiration hazard: Not classified

Potential Adverse human health effects and symptoms: Based on available data, the classification criteria are not met

Symptoms/injuries after skin contact : Irritation.

Symptoms/injuries after eye contact: Causes eye irritation.

SECTION 12: Ecological information

12.1. Toxicity

Ecology - general: The product is not considered harmful to aquatic organisms or to cause long-term adverse effects in the environment.

TSI-FSA (1317-37-9)

LC50 fish 1 > 10000 mg/l Mosquito fish

Sodium Sulfide (1313-82-2)	
LC50 fish 1	7.7 - 29.1 mg/l (Exposure time: 96 h - Species: Poecilia reticulata)
EC50 Daphnia 1	2.1 mg/l (Exposure time: 48 h - Species: Daphnia magna)

12.2. Persistence and degradability TSI-FSA (1317-37-9)

Persistence and degradability	Not established.

12.3. Bioaccumulative potential TSI-FSA (1317-37-9)

Bioaccumulative potential	Not established.
Sodium Sulfide (16721-80-5)	
Log Pow	-3.5 (at 25 °C)

12.4. Mobility in soil

No additional information available

12.5. Other adverse effects

Effect on the global warming: No known effects from this product.

GWPmix comment: No known effects from this product.

Other information: Avoid release to the environment.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Waste treatment methods: Dispose of contents/container in accordance with licensed collector's sorting instructions.

Waste disposal recommendations: Dispose of contents/container to hazardous or special waste collection point, in accordance with local, regional, national and/or international regulation.

Ecology - waste materials: Avoid release to the environment.

SECTION 14: Transport information

Department of Transportation (DOT)

In accordance with DOT Not Regulated

Transport by sea

Not Regulated

Air transport

Not Regulated

SECTION 15: Regulatory information

15.1.US Federal regulations

Iron sulfide (FeS) (1317-37-9)

Listed on the United States TSCA (Toxic Substances Control Act) inventory

Sodium Sulfide (1313-82-2)

Listed on the United States TSCA (Toxic Substances Control Act) inventory

15.2.International regulations

CANADA

Iron sulfide (FeS) (1317-37-9)

Listed on the Canadian DSL (Domestic Substances List)

WHMIS Classification	Uncontrolled product according to WHMIS classification criteria

Sodium Sulfide (1313-82-2)

Listed on the Canadian DSL (Domestic Substances List)

EU-Regulations

Iron sulfide (FeS) (1317-37-9)

Listed on the EEC inventory EINECS (European Inventory of Existing Commercial Chemical Substances)

Sodium Sulfide (1313-82-2)

Listed on the EEC inventory EINECS (European Inventory of Existing Commercial Chemical Substances)

National regulations

Iron sulfide (FeS) (1317-37-9)

Listed on the AICS (Australian Inventory of Chemical Substances)
Listed on IECSC (Inventory of Existing Chemical Substances Produced or Imported in China)
Listed on the Japanese ENCS (Existing & New Chemical Substances) inventory
Listed on the Korean ECL (Existing Chemicals List)
Listed on NZIoC (New Zealand Inventory of Chemicals)
Listed on PICCS (Philippines Inventory of Chemicals and Chemical Substances)

Sodium Sulfide (1313-82-2)

Listed on the AICS (Australian Inventory of Chemical Substances)

Listed on IECSC (Inventory of Existing Chemical Substances Produced or Imported in China)
Listed on the Japanese ENCS (Existing & New Chemical Substances) inventory
Listed on the Korean ECL (Existing Chemicals List)
Listed on NZIoC (New Zealand Inventory of Chemicals)
Listed on PICCS (Philippines Inventory of Chemicals and Chemical Substances)
Listed on INSQ (Mexican National Inventory of Chemical Substances)
Listed on CICR (Turkish Inventory and Control of Chemicals)

15.3.US State Regulations

Sodium Sulfide (1313-82-2)
U.S. - Massachusetts - Right To Know List
U.S. - New Jersey - Right to Know Hazardous Substance List

SECTION 16: Other information

Revision date: 06/14/2016

Other information: None.

Full text of H-phrases:

H301	Toxic if swallowed
H315	Causes skin irritation
H319	Causes serious eye irritation
H400	Very toxic to aquatic life

SDS US (GHS HazCom 2012)

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product

SRS®-Z_{VI} (4 μm)
Combined Emulsified Vegetable Oil Substrate and 4 μm Zero Valent Iron
SAFETY DATA SHEET

January 1st, 2020

1. Product Identification

Synonyms: Combined Emulsified Vegetable Oil Substrate and 4 μm Zero Valent Iron [SRS®-Z_{VI} (4 μm)]; Emulsified Vegetable Oil (EVO) and Zero Valent Iron (ZVI)

Recommended Use: Treatment of groundwater contaminated with DNAPL level concentrations of chlorinated solvents and other anaerobically degradable compounds.

Supplier:
Terra Systems, Inc.
130 Hickman Road, Suite 1
Claymont, Delaware 19703
Telephone (302) 798-9553
Fax (302) 798-9554
www.terrasystems.net

2. Hazards Identification

Emergency Overview

Caution: May cause eye irritation.
Health Rating: 1 - Slight
Flammability Rating: 1 - Slight
Reactivity Rating: 1 - Slight
Contact Rating: 1 - Slight
Protective Equipment: Goggles; Proper Gloves
Storage Color Code: Green (General Storage)

Potential Health Effects

Inhalation: Not expected to be a health hazard. May irritate lungs and mucous membranes and cause irritation, dizziness, and nausea. Remove to fresh air.

Ingestion: Not expected to be a health hazard via ingestion. Large doses may produce abdominal spasms, diarrhea.

Skin Contact: No adverse effects expected. May cause irritation or sensitization in sensitive individuals.

Eye Contact: May cause irritation, watering, and possible reddening.

Chronic Exposure: No information found.

Aggravation of Pre-existing Conditions: No information found.

3. Composition/Information on Ingredients

Ingredient	Synonyms	CAS #	Percent	Hazardous
Soybean oil	Soya oil	8001-22-7	52-54%	No
Iron suspension	ZVI	7439-89-6	10-12.5%	No
60% Sodium Lactate	2-hydroxpropionic acid sodium salt	72-17-3	4-5%	No
Emulsifiers and proprietary nutrient package containing nitrogen, phosphorus and vitamin B_{12}		Mixture	6-7%	No

The emulsifiers are a trade secret and consists of ingredients of unknown acute toxicity.

4. First Aid Measures

Inhalation: Not expected to require first aid measures. Remove to fresh air. Get medical attention for any breathing difficulty.

Ingestion: If large amounts were swallowed, give water to drink and get medical advice.

Skin Contact: Not expected to require first aid measures. Wash exposed area with soap and water. Get medical advice if irritation develops.

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Get medical attention if irritation persists.

5. Fire Fighting Measures

Fire: The zero valent iron powder, when dry, may self-combust and has the potential to catch paper towels, rags, etc. on fire. Avoid airborne dispersion of fine powder in an enclosed area to reduce potential dust ignition. Keep SRS®-EZVI wet and avoid contact with combustible materials.

Explosion: May generate hydrogen gas vapors that can cause explosion when exposed to a spark or flame. Closed containers may explode if exposed to extreme heat.

Fire Extinguishing Media: Dry chemical, sand, foam, graphite, or carbon dioxide. Water spray may be ineffective on fire but can protect fire-fighters and cool closed containers. Use fog nozzles if water is used.

Special Information: In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode.

6. Accidental Release Measures

Clean-up personnel may require protective clothing. Absorb in sand, paper towels, “Oil Dry”, or other inert material. Scoop up and containerize for disposal. Flush trace residues to sewer with soap and water. Containerized waste may be sent to an approved waste disposal facility.

7. Handling and Storage

Keep in a tightly closed container, stored in a cool, dry, ventilated area. Protect against physical damage. Containers of this material are not hazardous when empty since they do not contain vapors or harmful substances; observe all warnings and precautions listed for the product. Do not store above 49 C (120 F). Keep container tightly closed and upright when not in use to prevent leakage.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:	None established.
Ventilation System:	Not expected to require any special ventilation.
Personal Respirators (NIOSH Approved):	Not expected to require personal respirator usage.
Skin Protection:	Wear protective gloves and clean body-covering clothing.
Eye Protection:	Use chemical safety goggles and/or a full-face shield where splashing is possible. Provide readily accessible eye wash stations and safety showers.
Slips, Trips, and Falls:	Material is slippery when spilled. Clean up with sand, paper towels, “Oil Dry”, or other inert material.

9. Physical and Chemical Properties

Appearance:	Gray viscous liquid.
Odor:	Vegetable oil.
Solubility:	Not soluble in water.
Specific Gravity (water=1):	1.07 (8.93 pounds per gallon)
pH:	6-8
% Volatiles by volume @ 21C (70F):	Negligible.
Boiling Point:	≥ 100C (≥ 212F)
Melting Point:	No information found.
Flash Point (F):	No information found.
Autoignition Temperature:	No information found.
Decomposition Temperature:	No information found.
Vapor Density (Air=1):	No information found.
Vapor Pressure (mm Hg):	< 1.0 @ 20C (68F).
Evaporation Rate (BuAc=1):	No information found.
Viscosity @23 C (73 F):	440-1,942 centipoises
Partition Coefficient (octanol/water):	No information found.

10. Stability and Reactivity

Stability: Stable under ordinary conditions of use and storage. May generate hydrogen gas.

Reactivity: Not reactive under ordinary conditions.

Hazardous Decomposition Products: Carbon dioxide and carbon monoxide may form when heated to decomposition.

Hazardous Polymerization: Will not occur.

Incompatibilities: Strong oxidizers, acids.

Conditions to Avoid: Incompatibles. Isolate from heat and open flame.

11. Toxicological Information

Soybean Oil: No information found on toxicology. It is not a carcinogen listed by IARC, NTP, NIOSH, OSHA, or ACGIH.

Emulsifier/Nutrient Mixture: No information found on toxicology. It is not a carcinogen listed by IARC, NTP, NIOSH, OSHA, or ACGIH.

Sodium Lactate: Oral rat LD50: 2000 mg/kg. Irritation for sodium lactate: standard Draize 100 mg - mild. This compound is not listed as a carcinogen by IARC, NRP, NIOSH, OSHA, or ACGIM.

Zero Valent Iron: No information found on toxicology. It is not a carcinogen listed by IARC, NTP, NIOSH, OSHA, or ACGIH.

Glycerol: Practically non-toxic.

SRS-EZVI: The toxicity of the mixture has not been measured.

12. Ecological Information

Environmental Fate: No information found.

Environmental Toxicity: No information found.

Degradability: SRS is completely biodegradable under both aerobic and anaerobic conditions.

Soil Mobility: SRS will move with groundwater until the adsorbed onto the soil. Degradation products may be mobile. The ZVI portion will not be mobile.

Bioaccumulation Potential: No information found.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use, or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information

Not regulated.

15. Regulatory Information

OSHA STATUS: This product is not hazardous under the criteria of the Federal OSHA hazard Communication Standard 29 CFR 1910.1200. However, thermal processing and decomposition fumes from this product may be hazardous as noted in Section 10.

TSCA STATUS: No component of this product is listed on the TSCA inventory.

CERCLA (Comprehensive Response Compensation, and Liability Act): Not reportable.

SARA TITLE III (Superfund Amendments and Reauthorization Act)
Section 312 Extremely Hazardous Substances: None
Section 311/312 Hazard Categories: Non-hazardous Under Section 311/312
Section 313 Toxic Chemicals: None

RCRA STATUS: If discarded in its purchased form, this product would not be a hazardous waste either by listing or by characteristic. However, under RCRA, it is the responsibility of the product user to determine at the time of disposal, whether a material containing the product or derived from the product should be classified as a hazardous waste. (40 CFR 261.20-24)

CALIFORNIA PROPOSITION 65: The following statement is made in order to comply with the California safe Drinking Water and Toxic Enforcement Act of 1986. The product contains no chemicals known to the State of California to cause cancer.

16. Other Information

NFPA Ratings:	Health: **1** Flammability: **1** Reactivity: **1**
Date Revised:	January 1, 2018
Revision Information:	SDS Section(s) changed since last revision of document include: Added glycerol as component.

CALCIUM CARBONATE
SAFETY DATA SHEET

1. Product Identification

Synonyms: Precipitated chalk; powdered limestone

Recommended Use: Buffering of groundwater contaminated with chlorinated solvents and other anaerobically degradable compounds.

Supplier:
Terra Systems, Inc.
130 Hickman Road, Suite 1
Claymont, Delaware 19703
Telephone (302) 798-9553
Fax (302) 798-9554
www.terrasystems.net

2. Hazards Identification

Emergency Overview

Danger May causes irritation to skin, eyes, and respiratory tract

Health Rating: 1 - Slight
Flammability Rating: 0 - None
Reactivity Rating: 0 - None
Contact Rating: 1 - Slight
Lab Protective Equipment: Goggles; Lab Coat; Vent Hood; Proper Gloves
Storage Color Code: Orange (General Storage)

Potential Health Effects

Inhalation: May cause respiratory irritation.
Ingestion: No information found...
Skin Contact: Causes skin irritation.
Eye Contact: Causes eye irritation.
Chronic Exposure: No information found.
Aggravation of Pre-existing Conditions: No information found.

3. Composition

Ingredient	Synonym	CAS #	Percent	Hazardous
Calcium Carbonate $CaCO_3$	Carbonic acid, calcium salt; powdered limestone	471-34-1	100	No

4. First Aid Measures

Inhalation: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Ingestion: If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. Never give anything by mouth to an unconscious person. Get medical attention if adverse symptoms occur.

Skin Contact: Causes mechanical irritation. Wash affected area with plenty of soap and water. If irritation persists, seek medical attention.

Eye Contact: Immediately flush eyes with plenty of water for at least 5 minutes, lifting lower and upper eyelids occasionally. Get medical attention.

5. Fire Fighting Measures

Fire: Not considered to be a fire hazard.

Explosion: Not considered an explosion hazard.

Fire Extinguishing Media: Use any means suitable for extinguishing surrounding fire including foam, dry powder, carbon dioxide, water spray, or sand. .

Special Information: Use protective clothing and breathing equipment appropriate for the surrounding fire.

6. Accidental Release Measures

Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Avoid breathing dust. Spills: Sweep up and containerize for reclamation or disposal. Vacuuming or wet sweeping may be used to avoid dust dispersal. Wash the area clean with water and detergent.

7. Handling and Storage

Keep in a tightly closed container, stored in a cool, dry, ventilated area. Protect against physical damage. Isolate from incompatible substances including strong acids or oxidizers.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits: USA OSHA PEL (TWA) 5 mg/m^3.

Ventilation System: A system of local and/or general exhaust is recommended to keep employee exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document,

	Industrial Ventilation, A Manual of Recommended Practices, most recent edition, for details.
Personal Respirators (NIOSH Approved):	For conditions of use where exposure to the dust or mist is apparent, a half-face dust/mist respirator may be worn. For emergencies or instances where the exposure levels are not known, use a full-face positive-pressure, air-supplied respirator. WARNING: Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.
Skin Protection:	Wear protective gloves and clean body-covering clothing.
Eye Protection:	Use chemical safety goggles and/or full face shield where dusting or splashing of solutions is possible. Maintain eye wash fountain and quick-drench facilities in work area.

9. Physical and Chemical Properties

Appearance:	White powder or granules.
Molecular Weight:	100.09 g/mole
Odor:	Odorless.
Solubility:	Insoluble in water. Soluble in acids.
Specific Gravity:	2.7-2.9
pH:	No information found.
% Volatiles by volume @ 21C (70F):	0
Boiling Point:	825 C (1517 F)
Melting Point:	520 C (968 F)
Flash Point	No information found
Autoignition Temperature	No information found
Decomposition Temperature	No information found
Vapor Density (Air=1):	No information found
Vapor Pressure (mm Hg):	No information found
Evaporation Rate (BuAc=1):	No information found.

10. Stability and Reactivity

Stability:	Stable under ordinary conditions of use and storage.
Reactivity:	Slight
Hazardous Decomposition Products:	Carbon dioxide (CO_2)
Hazardous Polymerization:	Will not occur.
Incompatibilities:	Acids
Conditions to Avoid:	Direct sunlight, extremely high or low temperatures. Strong acids or strong oxidizers...

11. Toxicological Information

Calcium Carbonate	Oral rat LD50: 6450 mg/kg. Causes skin and eye irritation.		
Cancer Lists:	Not classified.		
Calcium Carbonate (471-34-1)	No	No	None

12. Ecological Information

Environmental Fate:	No information found.
Environmental Toxicity:	No information found.
Degradability	No information found
Soil Mobility	No information found
Bioaccumulation Potential	No information found

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information

Not regulated.

15. Regulatory Information

Listed on the United States TSCA (Toxic Substances Control Act) inventory.
Listed on the Canadian DSL (Domestic Substances List) inventory).
WHMIS Classification: Class D Davison 2 Subdivision B Toxic material causing other toxic effects.

16. Other Information

NFPA Ratings:	Health: **1** Flammability: **0** Reactivity: **0**
Label Hazard Warning:	Exposure could cause irritation, but only minor residual injury even if no treatment is given...
Label Precautions:	Eye, skin, and respiratory irritant
Label First Aid:	In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. Never give anything by mouth to an unconscious person. If inhaled, remove to

	fresh air. Get medical attention for any breathing difficulty. In all cases, get medical attention.
Product Use:	Laboratory Reagent.
Revision Information:	SDS Section(s) changed since last revision of document includes: None

SODIUM ASCORBATE
SAFETY DATA SHEET

1. Product Identification

Synonyms: Sodium Salt of Vitamin C
Recommended Use: Additive for treatment of water to remove dissolved oxygen.
CAS#: 134-03-2
Supplier: Terra Systems, Inc.
130 Hickman Road, Suite 1
Claymont, Delaware 19703
Telephone (302) 798-9553
Fax (302) 798-9554
www.terrasystems.net

2. Hazards Identification

Emergency Overview
Caution: May cause eye or skin irritation.
Health Rating: 2 - Moderate
Flammability Rating: 1 - Slight
Reactivity Rating: 0 - None
Contact Rating: 1 - Slight
Protective Equipment: Goggles; Proper Gloves
Storage Color Code: Green (General Storage)
Potential Health Effects
Inhalation: Not expected to be a health hazard.
Ingestion: Hazard via ingestion.
Skin Contact: May cause irritation or sensitization in sensitive individuals.
Eye Contact: May cause mild irritation.
Chronic Exposure: No information found.
Aggravation of Pre-existing Conditions: No information found.

3. Composition/Information on Ingredients

Ingredient	Synonyms	CAS #	Percent	Hazardous
Sodium Ascorbate	Sodium Salt of Vitamin C	134-03-2	100	No

4. First Aid Measures

Inhalation: Not expected to require first aid measures. Remove to fresh air. Get medical attention for any breathing difficulty.

Ingestion: If large amounts were swallowed, give water to drink and get medical advice.

Skin Contact: Not expected to require first aid measures. Wash exposed area with soap and water. Get medical advice if irritation develops.

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Get medical attention if irritation persists.

5. Fire Fighting Measures

Fire: Flash point and auto ignition: not available. May be combustible at high temperature. Isolate from heat and open flame.

Explosion: Slightly explosive in presence of open flames and sparks. Non-flammable in presence of shocks.

Fire Extinguishing Media: Dry chemical powder for small fires. Water spray, fog, or foam may be effective for large fires. Do not use water jet. .

Special Information: In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode. Fine dust dispersed in air at sufficient concentrations with an ignition source is a potential dust explosion hazard.

6. Accidental Release Measures

Clean-up personnel may require protective clothing. Scoop up and containerize for disposal. Flush trace residues to sewer with soap and water. Containerized waste may be sent to an approved waste disposal facility.

7. Handling and Storage

Keep in a tightly closed container, stored in a cool, dry, ventilated area away from sources of heat or ignition. Protect against physical damage. Containers of this material may pose a fire risk due to dusts. Keep container tightly closed and upright when not in use to prevent leakage. Sensitive to light. Store in light-resistant containers.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits: None established.

Ventilation System: Use ventilation to keep exposure below exposure limits.

Personal Respirators (NIOSH

Approved):	Use dust respirator usage.
Skin Protection:	Wear protective gloves and clean body-covering clothing.
Eye Protection:	Use chemical safety goggles and/or a full face shield where splashing is possible. Provide readily accessible eye wash stations and safety showers.

9. Physical and Chemical Properties

Appearance:	White to yellowish granular or crystalline solid
Molecular Weight:	198.11 g/mole
Odor:	Odorless.
Solubility:	620 g/L solubility in water at 25 C.
Specific Gravity (water=1):	1.66 (water = 1).
pH:	Not available
% Volatiles by volume @ 21C (70F):	Negligible.
Boiling Point:	No information found.
Melting Point:	No information found.
Flash Point (F):	No information found.
Autoignition Temperature:	No information found.
Decomposition Temperature:	Decomposition temperature 200 C (392 F)
Vapor Density (Air=1):	No information found.
Vapor Pressure (mm Hg):	Not applicable.
Evaporation Rate (BuAc=1):	Not applicable.
Partition Coefficient (octanol/water):	No information found.

10. Stability and Reactivity

Stability:	Stable under ordinary conditions of use and storage.
Reactivity:	Not reactive under ordinary conditions.
Hazardous Decomposition Products:	Carbon dioxide and carbon monoxide may form when heated to decomposition.
Hazardous Polymerization:	Will not occur.
Incompatibilities:	Strong oxidizers, reducing agents, acids, alkalis.
Conditions to Avoid:	Incompatibles. Isolate from heat and open flame.

11. Toxicological Information

Routes of Entry	Inhalation and ingestion.
Toxicity to Animals:	Acute oral toxicity (LD50): 16300 mg/kg Rat.
Chronic Effects on Humans:	Carcinogenic effects – classified 4 (no evidence) by NTP and none by OSHA. Mutagenic effects – mutagenic to mammalian somatic cells. May cause damage to kidneys, gastrointestinal tract, and upper respiratory tract. May affect genetic material (mutagenic) based on animal test data. No human data found

(Registry of Toxic Effects of Chemicals). May cause cancer based on animal test data. No human data found (Registry of Toxic Effects of Chemicals).

Other Toxic Effects: Hazardous in case of ingestion. Slightly hazardous in case of skin contact (irritant) or inhalation.

12. Ecological Information

Environmental Fate: No information found.
Environmental Toxicity: No information found.
Degradability: This product is inherently biodegradable under both aerobic and anaerobic conditions.
Soil Mobility: No information found.
Bioaccumulation Potential: Does not bioaccumulate.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information

Not regulated.

For non-emergency assistance, call: 1-281-441-4400

Section 2: Composition and Information on Ingredients

Composition:

Name	CAS #	% by Weight
Yeast extract	8013-01-2	100

Toxicological Data on Ingredients: Not applicable.

Section 3: Hazards Identification

Potential Acute Health Effects: Slightly hazardous in case of skin contact (irritant), of eye contact (irritant), of ingestion, of inhalation.

Potential Chronic Health Effects:
Slightly hazardous in case of skin contact (irritant), of eye contact (irritant), of ingestion, of inhalation. CARCINOGENIC EFFECTS: Not available. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Not available.

Section 4: First Aid Measures

Eye Contact: Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used.

Skin Contact:

After contact with skin, wash immediately with plenty of water. Gently and thoroughly wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Cold water may be used. Cover the irritated skin with an emollient. If irritation persists, seek medical attention. Wash contaminated clothing before reusing.

Serious Skin Contact: Not available.

Inhalation: Allow the victim to rest in a well ventilated area. Seek immediate medical attention.

Serious Inhalation: Not available.

Ingestion:
Do not induce vomiting. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek immediate medical attention.

Serious Ingestion: Not available.

Section 5: Fire and Explosion Data

Flammability of the Product: May be combustible at high temperature.

Auto-Ignition Temperature: Not available.

Flash Points: Not available.

Flammable Limits: Not available.

Products of Combustion: Not available.

Fire Hazards in Presence of Various Substances: Not available.

Explosion Hazards in Presence of Various Substances:
Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available.

Fire Fighting Media and Instructions:
SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use water spray, fog or foam. Do not use water jet.

Special Remarks on Fire Hazards: Not available.

Special Remarks on Explosion Hazards: Not available.

Section 6: Accidental Release Measures

Small Spill:
Use appropriate tools to put the spilled solid in a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements.

Large Spill:
Use a shovel to put the material into a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and allow to evacuate through the sanitary system.

Section 7: Handling and Storage

Precautions:
Keep away from heat. Keep away from sources of ignition. Empty containers pose a fire risk, evaporate the residue under a fume hood. Ground all equipment containing material. Do not breathe dust.

Storage:
Keep container dry. Keep in a cool place. Ground all equipment containing material. Keep container tightly closed. Keep in a cool, well-ventilated place. Combustible materials should be stored away from extreme heat and away from strong oxidizing agents.

Section 8: Exposure Controls/Personal Protection

Engineering Controls:
Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

Personal Protection: Safety glasses. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

Personal Protection in Case of a Large Spill:
Splash goggles. Full suit. Dust respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Exposure Limits: Not available.

Section 9: Physical and Chemical Properties

Physical state and appearance: Solid. (Granular solid.)

Odor: Characteristic.

Taste: Not available.

Molecular Weight: Not available.

Color: Yellowish.

pH (1% soln/water): Not available.

Boiling Point: Not available.

Melting Point: Decomposes.

Critical Temperature: Not available.

Specific Gravity: Not available.

Vapor Pressure: Not applicable.

Vapor Density: Not available.

Volatility: Not available.

Odor Threshold: Not available.

Water/Oil Dist. Coeff.: Not available.

Ionicity (in Water): Not available.

Dispersion Properties: See solubility in water.

Solubility: Easily soluble in cold water.

Section 10: Stability and Reactivity Data

Stability: The product is stable.

Instability Temperature: Not available.

Conditions of Instability: Not available.

Incompatibility with various substances: Not available.

Corrosivity: Non-corrosive in presence of glass.

Special Remarks on Reactivity: Not available.

Special Remarks on Corrosivity: Not available.

Polymerization: No.

Section 11: Toxicological Information

Routes of Entry: Not available.

Toxicity to Animals:
LD50: Not available. LC50: Not available.

Chronic Effects on Humans: Not available.

Other Toxic Effects on Humans: Slightly hazardous in case of skin contact (irritant), of ingestion, of inhalation.

Special Remarks on Toxicity to Animals: Not available.

Special Remarks on Chronic Effects on Humans: Not available.

Special Remarks on other Toxic Effects on Humans: Nuisance dust.

Section 12: Ecological Information

Ecotoxicity: Not available.

BOD5 and COD: Not available.

Products of Biodegradation:
Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

Toxicity of the Products of Biodegradation: The products of degradation are more toxic.

Special Remarks on the Products of Biodegradation: Not available.

Section 13: Disposal Considerations

Waste Disposal:

Section 14: Transport Information

DOT Classification: Not a DOT controlled material (United States).

Identification: Not applicable.

Special Provisions for Transport: Not applicable.

Section 15: Other Regulatory Information

Federal and State Regulations: TSCA 8(b) inventory: Yeast extract

Other Regulations: Not available..

Other Classifications:

WHMIS (Canada): Not controlled under WHMIS (Canada).

DSCL (EEC):

This product is not classified according to the EU regulations.

HMIS (U.S.A.):

Health Hazard: 1

Fire Hazard: 1

Reactivity: 0

Personal Protection: E

National Fire Protection Association (U.S.A.):

Health: 1

Flammability: 1

Reactivity: 0

Specific hazard:

Protective Equipment:
Gloves. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Safety glasses.

Diammonium Phosphate
SAFETY DATA SHEET

Effective Date: 01-01-2018

---

1. Product Identification

Synonyms:	Diammonium Phosphate, Ammonium Phosphate Dibasic
Recommended Use:	Treatment of groundwater contaminated with chlorinated solvents and other anaerobically degradable compounds.
Supplier:	Terra Systems, Inc. 130 Hickman Road, Suite 1 Claymont, Delaware 19703 Telephone (302) 798-9553 Fax (302) 798-9554 www.terrasystems.net

---

2. Hazards Identification

Emergency Overview	
Caution:	May cause eye and skin irritation. Acute aquatic toxicity.
Health Rating:	2 - Moderate
Flammability Rating:	0 - None
Reactivity Rating:	0 - None
Contact Rating:	2 - Moderate
Protective Equipment:	Goggles; Proper Gloves
Storage Color Code:	Orange (General Storage)
Potential Health Effects	
Inhalation:	May be harmful if inhaled. Causes respiratory tract irritation.
Ingestion:	May be harmful if swallowed.
Skin Contact:	Causes skin irritation.
Eye Contact:	Causes eye irritation.
Chronic Exposure:	No information found No adverse effects expected
Aggravation of Pre-existing Conditions:	No information found

3. Composition/Information on Ingredients

Ingredient	CAS#	Percent	Hazardous
Diammonium Phosphate	7783-28-0	100	Yes

Molecular Weight: 132.1
Chemical Formula: $(NH_4)_2PO_4$

4. First Aid Measures

Inhalation: Remove to fresh air. Get medical attention for any breathing difficulty.

Ingestion: If swallowed, give water to rinse mouth and get medical advice.

Skin Contact: Wash exposed area with soap and water. Get medical advice if irritation develops.

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Get medical attention if irritation persists.

5. Fire Fighting Measures

Fire: Not considered to be a fire hazard.

Explosion: Not considered to be an explosion hazard.

Fire Extinguishing Media: Use water spray, alcohol-resistant foam, dry chemical, or carbon dioxide.

Special Information: In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode.

Hazardous Combustion Products: Hazardous decomposition products formed under fire conditions – nitrogen oxides and phosphorus oxides.

6. Accidental Release Measures

Clean-up personnel should wear protective clothing and gloves. Avoid breathing vapors, mist, or gas. Ensure adequate ventilation. Scoop up and containerize for disposal. Discharge into environment should be avoided. Containerized waste may be sent to an approved waste disposal facility.

7. Handling and Storage

Keep in a tightly closed container, stored in a cool, dry, ventilated area. Protect against physical damage. Avoid long storage times. Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Provide adequate exhaust ventilation where dust is formed. Containers of this material may be hazardous when empty since they do retain product residues (vapors, liquid). Observe all warnings and precautions listed for the product.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:	None established.
Ventilation System:	Not expected to require any special ventilation.
Personal Respirators (NIOSH Approved):	For nuisance exposures, use type P95 particle respirator. For higher level protection use type OV/AG/P99 respirator cartridges.
Skin Protection:	Wear protective nitrile rubber gloves (at least 0.11 mm thick) and clean impervious body-covering clothing.
Eye Protection:	Use chemical safety goggles and/or a full face shield where splashing is possible. Provide readily accessible eye wash stations and safety showers.

9. Physical and Chemical Properties

Appearance:	White crystalline.
Odor:	Ammonia.
Solubility:	About 132 g/L at 20 C (68 F)
Specific Gravity (water=1):	1.62 g/cm^3
pH:	7.5-9.0 at 132 g/L at 25 C (77 F)
% Volatiles by volume @ 21C (70F):	No information found.
Boiling Point:	No data available
Melting Point:	155 C (311 F)
Flash Point (F):	No information found.
Autoignition Temperature:	No information found
Decomposition Temperature:	No information found.
Vapor Density (Air=1):	No information found.
Vapor Pressure (mm Hg):	No information found.
Evaporation Rate (BuAc=1):	No information found.
Viscosity @23 C (73 F):	No information found.
Partition Coefficient (octanol/water):	No information found

Terra Systems, Inc.
130 Hickman Road, Suite 1, Claymont, Delaware 19703
Contact: Michael Free, VP, Sales and Marketing
Office: 302-798-9553; Cell: 484-889-2214 Email: mfree@terrasystems.net

10. Stability and Reactivity

Stability:	Stable under ordinary conditions of use and storage.
Reactivity:	Not reactive under ordinary conditions.
Hazardous Decomposition Products:	Nitrogen oxides and oxides of phosphorus may form when heated to decomposition.
Hazardous Polymerization:	Will not occur.
Incompatibilities:	Avoid strong oxidizing agents, strong acids, strong bases, and magnesium.
Conditions to Avoid:	Incompatibles. Isolate from heat and open flame.

11. Toxicological Information

Acute Toxicity:	Oral LD50 rat 6,500 mg/lg Inhalation LC50 – no data available Dermal LD50 – rabbit 7,950 mg/kg
Chronic Toxicity:	Carcinogenicity – no component of this product present at levels greater than 0.1% is identified as probable, possible, or confirmed human carcinogen by IARC, ACGIH, NTP, or OSHA. Reproductive toxicity – no data available. Teratogenicity – no data available.

12. Ecological Information

Environmental Fate:	Mobile with water and biodegradable.
Environmental Toxicity:	Toxic to fish. LC50 *Oncorhynhus mykiss* (rainbow trout) 26.5 mg/L – 96 hr. LC50 *Pimephales promelas* (fathead minnow) 33 mg/L -96 hr.
Degradability:	No information is available.
Soil Mobility:	No information is available.
Bioaccumulation Potential:	No information found.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use, or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information

Non-hazardous - not regulated.

15. Regulatory Information

This product is considered an irritant by the U. S. Occupational Safety and Health Administration's Hazard Communication Standard.

16. Other Information

NFPA Ratings:	Health: **2** Flammability: **0** Reactivity: **0**
Date Prepared:	January 1, 2018
Revision Information:	SDS Section(s) changed since last revision of document include: None.

TERRA SYSTEMS, INC DECHLORINATING BIOAUGMENTATION CULTURE (TSI-DC) SAFETY DATA SHEET

1. Product Identification

Synonyms: *Dehalococcoides* or DHC Microbial Consortium (TSI-DC)

Recommended Use: Bioremediation of groundwater and soil contaminated with chlorinated solvents such as tetrachloroethene and trichloroethene.

Supplier:
Terra Systems, Inc.
130 Hickman Road, Suite 1
Claymont, Delaware 19703
Telephone (302) 798-9553
Fax (302) 798-9554
www.terrasystems.net

2. Hazards Identification

The available data indicates no known hazards associated with exposure to this product. Nevertheless, individuals who are allergic to enzymes or other related proteins should avoid exposure and handling. Health effects associated with exposure to similar organisms are listed below.

Emergency Overview

Caution: May cause eye irritation or discomfort if ingested or inhaled or allergic reaction to sensitive individuals.

Health Rating: 1 - Slight

Flammability Rating: 0 - None

Reactivity Rating: 0 - None

Contact Rating: 1 - Slight

Protective Equipment: Goggles; Proper Gloves

Storage Color Code: Green (General Storage)

Potential Health Effects

Inhalation: Not expected to be a health hazard. Hypersensitive individuals may experience breathing difficulties after inhalation of aerosols.

Ingestion: Not expected to be a health hazard via ingestion. Ingestion of large quantities may result in abdominal discomfort including nausea, vomiting, cramps, diarrhea, and fever.

Skin Contact: No adverse effects expected. May cause irritation or sensitization in sensitive individuals upon prolonged contact.

Eye Contact: May cause mild irritation, possible reddening unless immediately rinsed.

Chronic Exposure: No information found.
Aggravation of Pre-existing Conditions: No information found.

3. Composition/Information on Ingredients

Ingredient	Synonyms	CAS #	Percent	Hazardous
Non-hazardous ingredients	DHC	Not applicable	100%	No

4. First Aid Measures

Inhalation: Not expected to require first aid measures. Remove to fresh air. Get medical attention for any breathing difficulty or if allergic symptoms develop.

Ingestion: Thoroughly rinse mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Get immediate medical attention. Never give anything by mouth to an unconscious or convulsing person.

Skin Contact: Not expected to require first aid measures. Wash exposed area with soap and water. Get medical advice if irritation develops.

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Get medical attention if irritation persists.

Note to Physicians: All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this material may have occurred.

5. Fire Fighting Measures

Fire: Non-flammable. Flash point and flammable limits are not available.

Explosion: Not considered to be an explosion hazard.

Fire Extinguishing Media: Dry chemical, foam, carbon dioxide, or water.

Special Information: In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode.

6. Accidental Release Measures

Clean-up personnel may require protective clothing and avoid skin contact. Absorb in sand, paper towels, or other inert material. Scoop up and containerize for disposal. Flush trace residues to sewer with soap and water. Containerized waste may be sent to an approved waste disposal facility. After clean-up, disinfect all cleaning materials and storage containers that come in contact with the spilled liquid.

7. Handling and Storage

Avoid breathing breathe aerosol. Avoid contact with skin. Use personal protective equipment recommended in Section 8. Keep containers tightly closed in a cool, well-ventilated area. The DHC microbial consortium (TSI-DC) can be supplied in stainless steel kegs designed for maximum working pressure of 130 psi and equipped with pressure relief valves. The kegs are pressurized with nitrogen gas up to the pressure of 15 psi. Do not exceed pressure of 15 psi during transfer of DHC microbial consortium (TSI-DC) from kegs. Don't open keg if content of the keg is under pressure. DHC microbial consortium (TSI-DC) may be stored for up to 3 weeks at temperature 2-4°C without aeration. Avoid freezing.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:	None established.
Ventilation System:	Not expected to require any special ventilation. Provide adequate ventilation to remove odors.
Personal Respirators (NIOSH Approved):	Not expected to require personal respirator usage. If aerosols might be generated, use N95 respirator.
Skin Protection:	Wear protective rubber, nitrile, or vinyl gloves and clean body-covering clothing.
Eye Protection:	Use chemical safety goggles and/or a full face shield where splashing is possible. Provide readily accessible eye wash stations and safety showers.

9. Physical and Chemical Properties

Appearance:	Light greenish, murky liquid.
Odor:	Musty.
Solubility:	Soluble in water.
Specific Gravity (water=1):	1.0. 8.34 pounds per gallon.
pH:	6-8
% Volatiles by volume @ 21C (70F):	Negligible.
Boiling Point:	100C (212F)
Melting Point:	0C (32F)
Flash Point (F):	No information found.
Autoignition Temperature:	No information found.
Decomposition Temperature:	No information found.
Vapor Density (Air=1):	No information found.
Vapor Pressure (mm Hg):	24 mm @ 25C (77F).
Evaporation Rate (BuAc=1):	No information found.
Viscosity @23 C (73 F):	1 centipoises

Partition Coefficient (octanol/water): No information found.

10. Stability and Reactivity

Stability: Stable under ordinary conditions of use and storage.
Reactivity: Not reactive under ordinary conditions.
Hazardous Decomposition Products: None.
Hazardous Polymerization: Will not occur.
Incompatibilities: Strong oxidizers, acids, water reactive materials.
Conditions to Avoid: Incompatibles. Isolate from heat and open flame.

11. Toxicological Information

TSI-DC No information found on toxicology. It is not a carcinogen listed by IARC, NTP, NIOSH, OSHA, or ACGIH. It has tested negative for pathogenic microorganisms such as *Bacillus cereus, Listeria monocytogens, Salmonella* sp., *Pseudomonas* sp., fecal coliform, total coliform, yeast, and mold.

12. Ecological Information

Environmental Fate: No information found.
Environmental Toxicity: No information found.
Degradability: This product is completely biodegradable under both aerobic and anaerobic conditions.
Soil Mobility: This compound will move with groundwater until the adsorbed onto the soil.
Bioaccumulation Potential: No information found.

13. Disposal Considerations

Waste Disposal Method: No special disposal methods are required. The material is compatible with all known biological treatment methods. To reduce odors and permanently inactivate microorganisms, mix 100 parts (by volume) of TSI-DC consortium with 1 part (by volume) of bleach. Dispose of in accordance with local, state and federal regulations.

14. Transport Information

DOT Classification: N/A
Labeling: NA
Shipping Name: Not regulated

15. Regulatory Information

OSHA STATUS: This product is not hazardous under the criteria of the Federal OSHA hazard Communication Standard 29 CFR 1910.1200.

Patented *Injection Ready* 60% SRS®-SD Small Droplet Emulsified Vegetable Oil (EVO) Substrate for Maximum Radius of Influence

United States Patent #RE40,448

SAFETY DATA SHEET

1. Product Identification

Synonyms:	60% Small Droplet Slow Release Substrate (SRS®-SD) Emulsified Vegetable Oil Substrate (EVO)
Recommended Use:	Treatment of groundwater contaminated with chlorinated solvents and other anaerobically degradable compounds.
Supplier:	Terra Systems, Inc. 130 Hickman Road, Suite 1 Claymont, Delaware 19703 Telephone (302) 798-9553 Fax (302) 798-9554 www.terrasystems.net

2. Hazards Identification

Emergency Overview	
Caution:	May cause eye irritation.
Health Rating:	1 - Slight
Flammability Rating:	1 - Slight
Reactivity Rating:	1 - Slight
Contact Rating:	1 - Slight
Protective Equipment:	Goggles; Proper Gloves
Storage Color Code:	Green (General Storage)
Potential Health Effects	
Inhalation:	Not expected to be a health hazard. If heated, may produce vapors or mists that irritate the mucous membranes and cause irritation, dizziness, and nausea. Remove to fresh air.
Ingestion:	Not expected to be a health hazard via ingestion. Large doses may produce abdominal spasms or diarrhea.
Skin Contact:	No adverse effects expected. May cause irritation or sensitization in sensitive individuals.
Eye Contact:	May cause mild irritation, possible reddening.
Chronic Exposure:	No information found.
Aggravation of Pre-existing Conditions:	No information found.

3. Composition/Information on Ingredients

Ingredient	Synonyms	CAS #	Percent	Hazardous
Soy bean oil	Soya oil	8001-22-7	60%	No
Emulsifiers and proprietary nutrient package containing nitrogen, phosphorus and vitamin B_{12}		Mixture	7.5 - 10%	No
Sodium lactate	2-hydroxpropionic acid sodium salt	72-17-3	5.5%	Yes
Water		7732-18-5	Difference	No

The emulsifiers and nutrient package mixture is a trade secret and consists of ingredients of unknown acute toxicity.

4. First Aid Measures

Inhalation: Not expected to require first aid measures. Remove to fresh air. Get medical attention for any breathing difficulty.

Ingestion: If large amounts were swallowed, give water to drink and get medical advice.

Skin Contact: Not expected to require first aid measures. Wash exposed area with soap and water. Get medical advice if irritation develops.

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Get medical attention if irritation persists.

5. Fire Fighting Measures

Fire: Flash point: >200 C (>392 F). Not considered to be a fire hazard. Isolate from heat and open flame.

Explosion: Not considered to be an explosion hazard. Closed containers may explode if exposed to extreme heat.

Fire Extinguishing Media: Dry chemical, foam, or carbon dioxide. Water spray may be ineffective on fire but can protect fire-fighters and cool closed containers. Use fog nozzles if water is used.

Special Information: In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode.

6. Accidental Release Measures

Clean-up personnel may require protective clothing. Absorb in sand, paper towels, “Oil Dry”, or other inert material. Scoop up and containerize for disposal. Flush trace residues to sewer with soap and water. Containerized waste may be sent to an approved waste disposal facility.

7. Handling and Storage

Store in a cool, dry, ventilated area. Do not store in sunlight or above 32 C (90 F). Keep container tightly closed and upright when not in use to prevent leakage. Observe all warnings and precautions listed for the product. Protect against physical damage.

If container begins to bulge, open cap slowly to release carbon dioxide from biological activity on the SRS-SD and call TSI.

Containers of this material are not hazardous when empty since they do not contain vapors or harmful substances; if drum or tote is observed to bulge, keep cap off as pressurization can occur on empty container with caps in place unless container is thoroughly rinsed.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:	None established.
Ventilation System:	Not expected to require any special ventilation.
Personal Respirators (NIOSH Approved):	Not expected to require personal respirator usage.
Skin Protection:	Wear protective gloves and clean body-covering clothing.
Eye Protection:	Use chemical safety goggles and/or a full-face shield where splashing is possible. Provide readily accessible eye wash stations and safety showers.
Slips, Trips, and Falls:	Material is slippery when spilled. Clean up with sand, paper towels, “Oil Dry”, or other inert material.

9. Physical and Chemical Properties

Appearance:	White liquid.
Odor:	Vegetable oil.
Solubility:	Miscible in water.
Specific Gravity (water=1):	0.95-0.98. 8.09 pounds per gallon.
pH:	6-7 (40% aqueous solution)
% Volatiles by volume @ 21C (70F):	Negligible.
Boiling Point:	$\geq$ 100C ($\geq$ 212F)
Melting Point:	No information found.
Flash Point (F):	No information found.
Autoignition Temperature:	No information found.
Decomposition Temperature:	No information found.
Vapor Density (Air=1):	No information found.
Vapor Pressure (mm Hg):	< 1.0 @ 20C (68F).
Evaporation Rate (BuAc=1):	No information found.
Viscosity @23 C (73 F):	213 centipoises (1.2 centipoises diluted 1:10)
Partition Coefficient (octanol/water):	No information found.

10. Stability and Reactivity

Stability: Stable under ordinary conditions of use and storage.
Reactivity: Not reactive under ordinary conditions.
Hazardous Decomposition Products: Carbon dioxide and carbon monoxide may form when heated to decomposition.
Hazardous Polymerization: Will not occur.
Incompatibilities: Strong oxidizers, acids.
Conditions to Avoid: Incompatibles. Isolate from heat and open flame.

11. Toxicological Information

Soybean Oil: No information found on toxicology. It is not a carcinogen listed by IARC, NTP, NIOSH, OSHA, or ACGIH.
Emulsifier/Nutrient Mixture: No information found on toxicology. It is not a carcinogen listed by IARC, NTP, NIOSH, OSHA, or ACGIH.
Sodium Lactate: Oral rat LD50: 2,000 mg/kg. 100 mg caused mild irritation to rabbit eye in Draize test. This compound is not listed as a carcinogen by IARC, NRP, NIOSH, OSHA, or ACGIM.
SRS-SD: The toxicity of the mixture has not been measured.

12. Ecological Information

Environmental Fate: No information found.
Environmental Toxicity: No information found.
Degradability: This product is completely biodegradable under both aerobic and anaerobic conditions.
Soil Mobility: This compound will move with groundwater until the adsorbed onto the soil. Degradation products may be mobile.
Bioaccumulation Potential: No information found.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information

Not regulated.

15. Regulatory Information

OSHA STATUS: This product is not hazardous under the criteria of the Federal OSHA hazard Communication Standard 29 CFR 1910.1200. However, thermal processing and decomposition fumes from this product may be hazardous as noted in Section 10.

TSCA STATUS: No component of this product is listed on the TSCA inventory.

CERCLA (Comprehensive Response Compensation, and Liability Act): Not reportable.

SARA TITLE III (Superfund Amendments and Reauthorization Act)
Section 312 Extremely Hazardous Substances: None
Section 311/312 Hazard Categories: Non-hazardous Under Section 311/312
Section 313 Toxic Chemicals: None

RCRA STATUS: If discarded in its purchased form, this product would not be a hazardous waste either by listing or by characteristic. However, under RCRA, it is the responsibility of the product user to determine at the time of disposal, whether a material containing the product or derived from the product should be classified as a hazardous waste. (40 CFR 261.20-24)

CALIFORNIA PROPOSITION 65: The following statement is made in order to comply with the California safe Drinking Water and Toxic Enforcement Act of 1986. The product contains no chemicals known to the State of California to cause cancer.

EOS Remediation, LLC

CoBupH$_{Mg}$

SAFETY DATA SHEET

Section 1: Identification	
Product Name:	**CoBupH$_{Mg}$**
Chemical Description:	Mixture; colloidal buffer
Manufacturer:	EOS Remediation PO Box 14266 Reseacrh Triangle Park NC, 27709 (P): 919-873-2204
Recommended Use:	Groundwater pH adjustment (environmental applications)
Restricted Use:	Not for human consumption.
24-Hour Emergency Contact:	ChemTel: United States (P): 800-255-3924 ChemTel: International (P): 813-248-0585

Section 2: Hazard(s) Identification	
Hazard Classification:	Potential Respiratory Tract Irritant; irritant (skin and eye)
Signal Word:	Warning
Hazard Statement(s):	Potential eye and skin irritant; Inhalation may aggravate any preexisting respiratory disease.
Pictograms:	
Precautionary Statement(s):	Prolonged/frequent skin contact may lead to dermatitis; Ingestion generally causes purging of the bowels. Keep from freezing. Keep below 100 F to avoid evaporation of free water, which could lead to increased viscosity.

Section 3: Composition/Information on Ingredients		
Common Name(s)	**CAS NO.**	**% by Weight**
Alkaline Buffer Patent Pending Trade Secret[1]	Proprietary	45-50
Dispersant Trade Secret[1]	Proprietary	1-2
Stabilizer Trade Secret[1]	Proprietary	0.5-1
Water	7732-18-5	47-53.5

1 – The precise composition of this product is proprietary information. A more complete disclosure will be provided to a physician in the event of a medical emergency.

Section 4: First-Aid Measures	
Routes of Exposure	**Emergency First-Aid Procedures**
Inhalation	Remove to fresh air; as with exposure to any environment without adequate personal protection, inhalation may aggravate any preexisting respiratory disease.
Eye Contact	Flush with water for 15 minutes; if irritation persists see a physician.
Dermal	Wash with mild soap and water; prolonged/frequent skin contact may lead to dermatitis.
Ingestion	Product is non-toxic. If nausea occurs, induce vomiting and seek medical attention.

Section 5: Fire-Fighting Measures	
Extinguishing Media:	Use media appropriate to primary source of fire. Otherwise, use CO_2, foam, dry chemical. Note: Water, fog and foam may cause frothing and spattering.
Special Fire Fighting Procedures:	Wear self-contained breathing apparatus and chemical resistant clothing. Use water spray to cool fire exposed containers.
Fire Hazard(s):	None known.

Section 6: Accidental Release Measures	
Personal Precautions:	Avoid contact with eyes and skin. Do not consume.
Emergency Procedures:	N/A
Methods & Materials used for Containment:	Compatible granular absorbent
Cleanup Procedures:	Spread compatible granular absorbent over spill area and sweep using broom and pan; dispose in appropriate receptacle. Clean area with water.

Section 7: Handling and Storage	
Safe Handling & Storage:	Keep container closed when not in use. Avoid contact with eyes. Keep from freezing. Keep below 100 F to avoid evaporation of free water, which could lead to increased viscosity.
Other Precautions:	Consumption of food and beverages should be prevented in work area where product is being used. After handling product, always wash hands and face thoroughly with soap and water before eating, drinking, or smoking.

Section 8: Exposure Controls/Personal Protection		
Exposure Limits		
OSHA PEL:	NE	
ACGIH TLV:	NE	
NIOSH REL:	NE	

Personal Protective Measures	
Respiratory Protection:	Not normally required. N95 respirator if aerosols might be generated.
Hand Protection:	Protective gloves are recommended
Eye Protection:	Recommended
Engineering Measures:	Local exhaust ventilation if aerosols are generated
Hygiene Measures:	Wash promptly with soap & water following skin contact. After handling product, always wash hands and face thoroughly with soap and water before eating, drinking or smoking.
Other Protection:	Wear appropriate clothing to prevent skin contact

Section 9: Physical and Chemical Properties			
Appearance:	Milky white aqueous suspension	Explosive Limits:	NE
Odor:	None	Vapor Pressure:	NE
Odor Threshold:	NE	Vapor Density:	N/A
pH:	10.5-11.5	Relative Density:	1.6
Melting Point/Freezing Point:	32° F (0°C)	Solubility:	Slightly Soluble
Boiling Point:	N/A	Partition coefficient:	NE
Flash Point:	Not flammable or combustible	Auto-ignition Temperature:	N/A
Evaporation Rate:	NE	Decomposition Temperature:	100-110°F (38°-43° C) (water will evaporate)
Flammability (solid, gas):	NE	Viscosity:	100-200 cP

NE – Not Established
N/A - Not Applicable

Section 10: Stability and Reactivity	
Stability:	Stable
Incompatibility:	ACID (Strong) - vigorous reaction, heat generated; MALEIC ANHYDRIDE - Alkali and other alkaline earth compounds, including magnesium compounds will cause explosive decomposition. PHOSPHORUS - when boiled with alkaline hydroxides yields mixed phosphine that may ignite spontaneously in air.
Hazardous Decomposition Products:	If container is left open at 100-110 F, water will evaporate causing product to become extremely viscous.
Hazardous Reactions/Polymerization:	Will not occur
Conditions to Avoid:	None known

Section 11: Toxicological Information		
Likely Routes of Exposure:		Ingestion, dermal and eye contact
Signs and Symptoms of Exposure:		Eye Contact: redness, tearing, conjunctivitis Skin Contact: drying, chapping, dermatitis
Health Hazards		
	Acute:	Ingestion generally causes purging of the bowels; Swallowing large amounts may lead to bowel obstruction. Potential eye and skin irritant.
	Chronic:	None known
Carcinogenicity		
	NTP:	No
	IARC:	No
	OSHA:	No

Section 12: Ecological Information (non-mandatory)
There is no data on the ecotoxicity of this product.

Section 13: Disposal Considerations (non-mandatory)	
Waste Disposal Methods:	Dispose of according to Federal and local regulations for non-hazardous waste.

Section 14: Transport Information (non-mandatory)
The product is not covered by international regulation on the transport of dangerous goods.
No transport warning required.

Section 15: Regulatory Information (non-mandatory)
N/A

Section 16: Other Information	
Date of Preparation:	29 May 2014
Last Modified Date:	12 August 2019
The information contained herein is based on available data and is believed to be correct. However, EOS Remediation, LLC makes no warranty, expressed or implied, regarding the accuracy of this data or the results to be obtained thereof. This information and product are furnished on the condition that the person receiving them shall make his/her own determination as to the suitability of the product for his/her particular purpose.	

SAFETY DATA SHEET

Newman Zone OS

Prepared to U.S. OSHA, CMA, ANSI, Canadian WHMIS Standards, Australian WorkSafe, Japanese Industrial Standard JIS Z 7250:2000, and European Directives

1. PRODUCT IDENTIFICATION

TRADE NAME (AS LABELED):	**Newman Zone OS**
SYNONYMS:	Newman Zone Oxygen Scavenger
CAS#:	Mixture
PRODUCT USE:	This product is used to deoxygenate water for anaerobic subsurface injections.
CHEMICAL SHIPPING NAME/CLASS:	Non-Regulated Material
U.N. NUMBER:	None
MANUFACTURER'S NAME:	**RNAS Remediation Products**
ADDRESS:	6712 West River Road, Brooklyn Center, MN 55430
BUSINESS PHONE:	1-763-585-6191
EMERGENCY PHONE:	1-800-424-9300 (Chemtrec 24 Hr Service – Emergency Only)
DATE OF CURRENT REVISION:	July 19, 2016
DATE OF LAST REVISION:	New

2. HAZARD IDENTIFICATION

EMERGENCY OVERVIEW: This product is a white and brownish-yellow powder with a mild, sweet odor.
Health Hazards: Not expected to cause adverse health effects when used as intended. Prolonged or repeated exposure may cause irritation to skin. May cause irritation to eyes upon contact. Inhalation may cause respiratory irritation. Ingestion of large amounts of this product may cause gastrointestinal irritation.
Flammability Hazards: This product is a Non-Flammable powder.
Reactivity Hazards: None known
Environmental Hazards: The Environmental effects of this product have not been investigated. Release of this product is not anticipated to have significant adverse effects in the aquatic environment.

US DOT SYMBOLS	CANADA (WHMIS) SYMBOLS	EUROPEAN and (GHS) Hazard Symbols
		None
Non-Regulated Material	Complies with WHMIS 2015	Signal Word: **None**

GHS LABELING AND CLASSIFICATION:
This product does not meet the definition of a hazardous substance or preparation as defined by 29CFR 1910.1200 or the European Union Council Directives 67/548/EEC, 1999/45/EC, 1272/2008/EC and subsequent Directives.

EU HAZARD CLASSIFICATION OF INGREDIENTS PER DIRECTIVE 1272/2008/EC:
None of the ingredients are listed in Annex VI
Substances not listed either individually or in group entries must be self classified.

Component(s) Contributing to Classification(s):
All Ingredients

GHS Hazard Classification(s):
Not applicable

Hazard Statement(s):
Not applicable

Response Statement(s):
Not applicable

Prevention Statement(s):
Not applicable

Storage Statement(s):

Disposal Statement(s):
Not applicable

HEALTH HAZARDS OR RISKS FROM EXPOSURE:
SYMPTOMS OF OVEREXPOSURE BY ROUTE OF EXPOSURE: The most significant routes of overexposure for this product are by contact with skin or eyes, inhalation of vapors and ingestion. The symptoms of overexposure are described below.
ACUTE:
INHALATION: Not expected to cause adverse health effects when used as intended. Inhalation of vapors/mist/spray may cause respiratory irritation.
CONTACT WITH SKIN: Not expected to cause adverse health effects when used as intended. Prolonged and repeated contact may cause irritation to skin.
EYE CONTACT: Direct eye contact can cause irritation with redness, tearing and blurred vision.

INGESTION: Under normal conditions of intended use, this material is not expected to be an ingestion hazard. Ingestion of large quantities may cause gastrointestinal irritation, nausea and vomiting.
CHRONIC: None known
TARGET ORGANS: Acute: Skin, Respiratory System and Eyes **Chronic:** None known

3. COMPOSITION AND INFORMATION ON INGREDIENTS

Hazardous Ingredients:	WT%	CAS#	EINECS #	GHS Hazard Classification(s)
All ingredients are either nonhazardous or less than 1% in concentration (or 0.1% for carcinogens, reproductive toxins, or respiratory sensitizers).				

NOTE: This product has been classified in accordance with the hazard criteria of 29CFR1910.1200 and the SDS contains all the information required by the CPR, EU Directives and the Japanese Industrial Standard *JIS Z 7250: 2000*.

4. FIRST-AID MEASURES

EYE CONTACT: If product enters the eyes, open eyes while under gentle running water for at least 15 minutes. Seek medical attention if irritation persists.
SKIN CONTACT: Wash skin thoroughly with soap and water after handling. Seek medical attention if irritation develops and persists.
INHALATION: If breathing becomes difficult, remove victim to fresh air. If necessary, use artificial respiration to support vital functions. Seek medical attention.
INGESTION: If product is swallowed, call physician or poison control center for most current information. If professional advice is not available, do not induce vomiting. Never induce vomiting or give diluents (milk or water) to someone who is unconscious, having convulsions, or who cannot swallow. Seek medical advice. Take a copy of the label and/or SDS with the victim to the health professional.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: None known
RECOMMENDATIONS TO PHYSICIANS: Treat symptoms and eliminate overexposure.

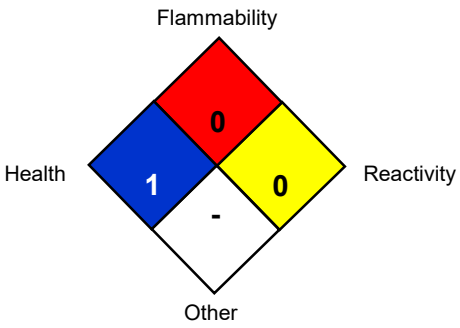
5. FIRE-FIGHTING MEASURES

FLASH POINT: Non-Flammable
AUTOIGNITION TEMPERATURE: Not Available
FLAMMABLE LIMITS (in air by volume, %): Lower NA Upper NA
FIRE EXTINGUISHING MATERIALS: Use fire extinguishing methods below:

Water Spray: Yes	Carbon Dioxide: Yes
Foam: Yes	Dry Chemical: Yes
Halon: Yes	Other: Any "C" Class

UNUSUAL FIRE AND EXPLOSION HAZARDS: Not considered a fire or explosion hazard.
Explosion Sensitivity to Mechanical Impact: No
Explosion Sensitivity to Static Discharge: No
SPECIAL FIRE-FIGHTING PROCEDURES: Incipient fire responders should wear eye protection. Structural firefighters must wear Self-Contained Breathing Apparatus and full protective equipment. Isolate materials not yet involved in the fire and protect personnel. Move containers from fire area if this can be done without risk; otherwise, cool with carefully applied water spray. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas.

NFPA RATING SYSTEM



HMIS RATING SYSTEM

HAZARDOUS MATERIAL IDENTIFICATION SYSTEM

HEALTH HAZARD (BLUE)	1
FLAMMABILITY HAZARD (RED)	0
PHYSICAL HAZARD (YELLOW)	0

PROTECTIVE EQUIPMENT

For Routine Industrial Use and Handling Applications

Hazard Scale: **0** = Minimal **1** = Slight **2** = Moderate **3** = Serious **4** = Severe * = Chronic hazard

6. ACCIDENTAL RELEASE MEASURES

SPILL AND LEAK RESPONSE: Personnel should be trained for spill response operations.

SPILLS: Contain spill if safe to do so. Sweep or vacuum up and place in an appropriate closed container. Clean up residual material by washing area with water and detergent. Dike or retain dilution water or water from firefighting for later disposal. Dispose of in accordance with applicable Federal, State, and local procedures (see Section 13, Disposal Considerations).

7. HANDLING and STORAGE

WORK PRACTICES AND HYGIENE PRACTICES: As with all chemicals, avoid getting this product ON YOU or IN YOU. Wash thoroughly after handling this product. Use good hygiene practices.

STORAGE AND HANDLING PRACTICES: Store in original container. Keep container closed when not in use. Store in a cool, dry location. Avoid freezing or extended storage in high temperatures and away from incompatible materials.

8. EXPOSURE CONTROLS - PERSONAL PROTECTION

PARTICULATES NOT OTHERWISE REGULATED RESPIRABLE FRACTION

	TWA	STEL
OSHA	5 mg/cu m	

PARTICULATES NOT OTHERWISE REGULATED TOTAL DUST

	TWA	STEL
OSHA	15 mg/cu m	

VENTILATION AND ENGINEERING CONTROLS: Use with adequate ventilation to ensure exposure levels are maintained below the limits provided above.

The following information on appropriate Personal Protective Equipment is provided to assist employers in complying with OSHA regulations found in 29 CFR Subpart I (beginning at 1910.132) or equivalent standard of Canada, or standards of EU member states (including EN 149 for respiratory PPE, and EN 166 for face/eye protection), and those of Japan. Please reference applicable regulations and standards for relevant details.

RESPIRATORY PROTECTION: Not required when using this product. Maintain airborne contaminant concentrations below guidelines listed above, if applicable. If necessary, use only respiratory protection authorized in the U.S. Federal OSHA Respiratory Protection Standard (29 CFR 1910.134), equivalent U.S. State standards, Canadian CSA Standard Z94.4-93, the European Standard EN149, or EU member states.

EYE PROTECTION: Safety glasses or goggles are recommended to avoid eye contact. If necessary, refer to U.S. OSHA 29 CFR 1910.133, Canadian Standards, and the European Standard EN166, Australian Standards, or relevant Japanese Standards.

SKIN PROTECTION: Wear impervious gloves for prolonged or repeated exposure as appropriate to task when using this product. If necessary, refer to U.S. OSHA 29 CFR 1910.138, the European Standard DIN EN 374, the appropriate Standards of Canada, Australian Standards, or relevant Japanese Standards.

BODY PROTECTION: Use body protection appropriate to task being performed. If necessary, refer to appropriate Standards of Canada, or appropriate Standards of the EU, Australian Standards, or relevant Japanese Standards.

9. PHYSICAL and CHEMICAL PROPERTIES

APPEARANCE (Physical State) and COLOR: This product is a white and brownish-yellow powder. **ODOR:** Mild, sweet odor
ODOR THRESHOLD: Not Available
pH (in solution at 1.0 g/L): 7.0 - 8.0
MELTING/FREEZING POINT: Not Available
BOILING POINT: Not Available
FLASH POINT: Not Available
EVAPORATION RATE (n-BuAc=1): Not Available
FLAMMABILITY (SOLID, GAS): Not Available
UPPER/LOWER FLAMMABILITY OR EXPLOSION LIMITS: Not Available
VAPOR PRESSURE (mm Hg @ 20°C (68°F)): Not Available
VAPOR DENSITY: Not Available
DENSITY: 1.0-1.2 g/cm^3
SOLUBILITY IN WATER: Soluble in water
PARTITION COEFFICENT (n-octanol/water): Not Available
AUTO-IGNITION TEMPERATURE: Not Available
DECOMPOSITION TEMPERATURE: Not Available
VISCOSITY: Not Available

10. STABILITY and REACTIVITY

STABILITY: Stable under conditions of normal storage and use.
HAZARDOUS DECOMPOSITION PRODUCTS: Carbon oxides (monoxide, dioxide), Metal oxide fumes, Sodium oxides.
MATERIALS WITH WHICH SUBSTANCE IS INCOMPATIBLE: Strong oxidizing agents, strong bases, strong acids, lime.
POSSIBILITY OF HAZARDOUS REACTIONS: Will not occur.
CONDITIONS TO AVOID: Extreme heat and humidity.

11. TOXICOLOGICAL INFORMATION

TOXICITY DATA:
No data available for this product.
SUSPECTED CANCER AGENT: Ingredients within this product are not found on the following lists: FEDERAL OSHA Z LIST, NTP, IARC, or CAL/OSHA and therefore are not considered to be, nor suspected to be, cancer-causing agents by these agencies.
IRRITANCY OF PRODUCT: No specific data available
SENSITIZATION TO THE PRODUCT: This product is not a skin and respiratory sensitizer.
REPRODUCTIVE TOXICITY INFORMATION: No information concerning the effects of this product and its components on the human reproductive system.

12. ECOLOGICAL INFORMATION

ALL WORK PRACTICES MUST BE AIMED AT ELIMINATING ENVIRONMENTAL CONTAMINATION.
TOXICITY DATA:
No data available for this product.
ENVIRONMENTAL STABILITY: This material will degrade in the environment.
CHEMICAL EFFECT ON PLANTS, ANIMALS AND AQUATIC LIFE: This product is not expected to cause significant harm to plants, animals or aquatic life.
WATER ENDANGERMENT CLASS: Water endangering in accordance with EU Guideline 91/155-EWG – Not Determined.
SPECIFIC AVAILABLE COMPONENT INFORMATION: No additional data available at this time.

13. DISPOSAL CONSIDERATIONS

PREPARING WASTES FOR DISPOSAL: Waste disposal must be in accordance with appropriate U.S. Federal, State, and local regulations, those of Canada, Australia, EU Member States and Japan.
EU Waste Code: Not determined

14. TRANSPORTATION INFORMATION

US DOT, IATA, IMO, ADR:

U.S. DEPARTMENT OF TRANSPORTATION (DOT) SHIPPING REGULATIONS: This product is classified (per 49 CFR 172.101) by the U.S. Department of Transportation, as follows:

PROPER SHIPPING NAME: Non-Regulated Material
HAZARD CLASS NUMBER and DESCRIPTION: None
UN IDENTIFICATION NUMBER: None
PACKING GROUP: NA
DOT LABEL(S) REQUIRED: None
NORTH AMERICAN EMERGENCY RESPONSE GUIDEBOOK NUMBER: None
RQ QUANTITY: None
MARINE POLLUTANT: The components of this product are not designated by the Department of Transportation to be Marine Pollutants (49 CFR 172.101, Appendix B).

INTERNATIONAL AIR TRANSPORT ASSOCIATION SHIPPING INFORMATION (IATA): This product is not considered as dangerous goods.

INTERNATIONAL MARITIME ORGANIZATION SHIPPING INFORMATION (IMO): This product is not considered as dangerous goods.

EUROPEAN AGREEMENT CONCERNING THE INTERNATIONAL CARRIAGE OF DANGEROUS GOODS BY ROAD (ADR): This product is not considered by the United Nations Economic Commission for Europe to be dangerous goods.

15. REGULATORY INFORMATION

UNITED STATES REGULATIONS:

U.S. SARA REPORTING REQUIREMENTS: The components of this product are subject to the reporting requirements of Sections 302, 304, and 313 of Title III of the Superfund Amendments and Reauthorization Act as follows: None

U.S. SARA THRESHOLD PLANNING QUANTITY: There are no specific Threshold Planning Quantities for the components of this product. The default Federal SDS submission and inventory requirement filing threshold of 10,000 lbs (4,540 kg) therefore applies, per 40 CFR 370.20.

U.S. CERCLA REPORTABLE QUANTITY (RQ): None

U.S. TSCA INVENTORY STATUS: The components of this product are listed on the TSCA Inventory or are exempted from listing.

OTHER U.S. FEDERAL REGULATIONS: None

CALIFORNIA SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT (PROPOSITION 65): Ingredients within this product are not on the Proposition 65 Lists.

CANADIAN REGULATIONS:

CANADIAN DSL/NDSL INVENTORY STATUS: The components of this product are on the DSL Inventory, or are exempted from listing.

OTHER CANADIAN REGULATIONS: Not applicable.

CANADIAN ENVIRONMENTAL PROTECTION ACT (CEPA) PRIORITIES SUBSTANCES LISTS:
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all of the information required by those regulations.

CANADIAN WHMIS CLASSIFICATION and SYMBOLS: Complies with WHMIS 2015.

EUROPEAN ECONOMIC COMMUNITY INFORMATION:
This product does not meet the definition of a hazardous substance or preparation as defined by the European Union Council Directives 67/548/EEC, 1999/45/EC, 1272/2008/EC and subsequent Directives.
See Section 2 for Details

AUSTRALIAN INFORMATION FOR PRODUCT: The components of this product are listed on the International Chemical Inventory list.

JAPANESE INFORMATION FOR PRODUCT:

JAPANESE MINISTER OF INTERNATIONAL TRADE AND INDUSTRY (MITI) STATUS: The components of this product are not listed as Class I Specified Chemical Substances, Class II Specified Chemical Substances, or Designated Chemical Substances by the Japanese MITI.

JAPANESE ENCS INVENTORY: The components of this product are on the ENCS Inventory as indicated in the section on International Chemical Inventories, below.

POISONOUS AND DELETERIOUS SUBSTANCES CONTROL LAW: No component of this product is a listed Specified Poisonous Substance under the Poisonous and Deleterious Substances Control Law.

INTERNATIONAL CHEMICAL INVENTORIES:

Listing of the components on individual country Chemical Inventories is as follows:
Asia-Pac: Listed or Exempt from listing
Australian Inventory of Chemical Substances (AICS): Listed or Exempt from listing
Korean Existing Chemicals List (ECL): Listed or Exempt from listing
Japanese Existing National Inventory of Chemical Substances (ENCS): Listed or Exempt from listing
Philippines Inventory of Chemicals and Chemical Substances (PICCS): Listed or Exempt from listing
Swiss Giftliste List of Toxic Substances: Listed or Exempt from listing
U.S. TSCA: Listed

16. OTHER INFORMATION

ABBREVIATIONS AND ACRONYMS:

EPA: United States Environmental Protection Agency
ARD: European Agreement concerning the International Carriage of Dangerous Goods by Road
IMDG: International Maritime Code for Dangerous Goods
DOT: US Department of Transportation
IATA: International Air Transport Association
ACGIH: American Conference of Governmental Industrial Hygienists
NFPA: National Fire Protection Association (USA)
HMIS: Hazardous Materials Identification System (USA)

PREPARED BY: Chris Eigbrett – (**MSDS to GHS Compliance)**
DATE OF PRINTING: July 19, 2016

The information contained herein is believed to be accurate but is not warranted to be so. Data and calculations are based on information furnished by the manufacturer of the product and manufacturers of the components of the product. Users are advised to confirm in advance of the need that information is current, applicable and suited to the circumstances of use. Remediation and Natural Attenuation Services Inc. assumes no responsibility for injury to vendee or third party person proximately caused by the material if reasonable safety procedures are not adhered to as stipulated in the data sheet. Furthermore, Remediation and Natural Attenuation Services Inc. assumes no responsibility for injury caused by abnormal use of this material even if reasonable safety procedures are followed.

NYSDEC BCP Site No:	C231152			Time:	07:00 - 17:00

Consultant:
Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C.

PERSONNEL ON SITE:
Langan: Mitchel Johnson (Environmental) and Rob Bandstra (Environmental)
Carmel: Esteban Alvarez (Foreman)
Cascade: Michael Lang and two laborers

EQUIPMENT ON SITE:
Pallet Jack

Pre-Mobilization Activities

- On Wednesday, May 1, 2024 Cascade Environmental (Cascade), the remedial contractor, mobilized to the Site in preparation for remedial injections for the treatment of chlorinated volatile organic compounds (CVOCs) within the bedrock throughout the Site in accordance with the April 2024 Groundwater Performance Monitoring Report & Injection Design. Equipment was staged within the central portion of the Site.
- On Wednesday, May 1, 2024 Cascade received a delivery of the injection reagents from Terra Systems, Inc. consisting of one tote of combined emulsified vegetable oil substrate and zero valent iron (SRS-ZVI) reagent, one tote of emulsified vegetable oil (SRS-SD EVO), 50 pounds of yeast extract, 1 bag of diammonium phosphate (DAP), one bucket of TSI ferrous sulfide solution, and 15 bags of calcium carbonate. All reagents delivered were staged within the sub-cellar of the Site.
- Between Wednesday, May 1 and Thursday, May 2, 2024 Langan collected baseline ground water parameters from the bedrock monitoring wells utilizing the Westbay System sampler tool before the injection event starts.
- On Monday, May 6, 2024, Langan and Cascade performed field tests by injecting deoxygenated water (i.e. potable water mixed with Newman Zone OS) into LMW-7R-S from 6.75 to 11.75 feet below top of casing (btoc), LMW-8R-S from 6.75 to 11.75 feet btoc, and LMW-8R-D from 57.75 to 64.75 feet btoc through the Westbay System.

Site Activities

- Cascade set up for remedial injections at bedrock monitoring wells LMW-9R-S and LMW-8R-D.
- Cascade began remedial injections in the northern portion of the Site. One remedial injection consisting of emulsified vegetable oil (EVO), diammonium phosphate, yeast extract, calcium carbonate, bioaugmentation cultures, and anaerobic chase water was partially completed within the treatment zone at bedrock monitoring well LMW-9R-S from 13.75 to 19.75 feet below top of casing (btoc). Surfacing of the amendment was monitored within the treatment zone.

Samples Collected

- None.

Problems Encountered

- None.

Community Air Monitoring Program (CAMP)

- None.

Activities Scheduled for Next Work Day

- Cascade and Langan will continue remedial injections for the treatment of CVOCs within the bedrock throughout the Site.

TEMP.	< 32		32-50		50-70	X	70-85		>85	

Langan Project No:	100963701	Project:	1487 1st Avenue Development Site	Date:	05/15/2024
NYSDEC BCP Site No:	C231152			Time:	07:00 – 18:00

Consultant:
Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C.

PERSONNEL ON SITE:
Langan: Mitchel Johnson (Environmental)
Carmel: Esteban Alvarez (Foreman)
Cascade: Mike Bono and one laborer

EQUIPMENT ON SITE:
Pallet Jack

Site Activities

- Cascade performed remedial injections in the northern portion of the Site. Three remedial injections consisting of emulsified zero valent iron (EZVI) reagent and anaerobic water were partially completed within the treatment zone at bedrock monitoring well LMW-7R-S from 16.75 to 21.75 feet below top of casing (btoc), at LMW-9R-S from 13.75 to 19.75 feet btoc, and at LMW-8R-S from 6.75 to 11.75 feet btoc.

Samples Collected

- None.

Problems Encountered

- None.

Community Air Monitoring Program (CAMP)

- None.

Activities Scheduled for Next Work Day

- Cascade and Langan will continue remedial injections for the treatment of CVOCs within the bedrock throughout the Site.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY
For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

The project number was specified by the client.

Volatile Organics

L2445487-01D: The pH was greater than two; however, the sample was analyzed within the method required holding time.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Cristen Walker Report Date: 08/13/24

Title: Technical Director/Representative

DATA PACKAGE GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where

Report Format: DU Report with 'J' Qualifiers

Data Qualifiers

the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

ND or U - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Concentrator: Tekmar Velocity / EST Encon	df: 1.40 um
Autosampler: Varian Archon / EST Centurion	ID: 0.25 mm
Purge time: 11 min	Desorb: 1 min

Volatile Organics: Dissolved Gas

Instrument: Agilent 7890 (or equivalent) with FID/TCD	
	Column Type: Haysep S Column
	Column Length: 2 Meters packed (100/200 mesh)
Autosampler: LEAP Headspace	Purge time: 0.6 min

Volatile Organics in Air Instruments

Volatile Organics in Air:

Instruments: Agilent 6890 GC / 5975 MSD Shimadzu QP2010-SE / QP2020

Concentrator: Entech 7100A or 7200	Column Type: Restek RTX-1
Autosampler: Entech 7016CA or 7016D	Column Length: 60 Meters
	df: 1.00 um
	ID: 0.25 mm or 0.32 mm

Trap 1: Glass Bead: manufacturer-Entech: 20 cm packing material
Trap 2: Tenax: manufacturer-Entech: 20 cm packing material

Semivolatile Organics Instruments - Westborough

Semivolatile Organics (Acid/Base/Neutral Extractables):

Instrument: Agilent 5973N MSD	Injection volume: 1 ul;2 uL LVI
Column Type: Restek RXI-5SILMS	df: 0.32 um
Column Length: 30 Meters	ID: 0.25 mm

Polynuclear Aromatic Hydrocarbons by 8270 SIM:

Instrument: Agilent 5973 MSD	Injection volume: 1 ul;2 uL LVI
Column Type: Restek RXI-5SILMS	df: 0.25 um
Column Length: 30 Meters	ID: 0.25 mm

Pesticides/PCB/Herbicides:

Instrument: Agilent 6890 w/Dual Micro ECDs	Injection Volume: 1uL
Column A: Restek RTX-CL/STX-CL	df: 0.32
Column B: Restek RTX/STX-CLPPesticide II	df: 0.25
Column Length: 30 Meters	ID: 0.32 mm

Petroleum/EPH:

Instrument: Agilent 6890 w/FID / HP 5890 w/ FID	Injection Volume: 1uL
Column: Restek RTX 5	df: 0.25
Column Length: 30 Meters	
ID: 0.32 mm	

Semivolatile Organic Instruments - Mansfield

Semivolatile Organics (ALK-PAH Extractables):

Instrument: Agilent 5973N / 5975 MSD	Injection volume: 1 ul
Column Type: ZB-5	df: 0.25 um
Column Length: 60 Meters	ID: 0.25 mm

Semivolatile Organics (8270):

Instrument: Agilent 5973N / 5975 MSD	Injection volume: 2 ul
Column Type: ZB-Semivolatiles	df: 0.25 um
Column Length: 30 Meters	ID: 0.25 mm

Semivolatile Organics (8270 SIM):

Instrument: Agilent 5973N / 5975 MSD	Injection volume: 3 ul
Column Type: ZB-5	df: 0.25 um
Column Length: 30 Meters	ID: 0.25 mm

Semivolatile Organics (1,4-Dioxane):

Instrument: Agilent 5973N / 5975 / 5977 MSD	Injection volume: 3 ul
Column Type: RTX-5	df: 0.25um, 0.18 um
Column Length: 30 Meters	ID: 0.25um, 0.18 mm

Semivolatile Organics (209 Congener):

Instrument: Agilent 5973N / 5975 MSD	Injection volume: 3 ul
Column Type: RTX-5, RTX-PCB	df: 0.25um, 0.18 um
Column Length: 60 Meters	ID: 0.25um, 0.18 mm

Semivolatile Organics (8081):

Instrument: Agilent 6890 / 7890	Injection volume: 1 ul
Column Type: RTX-5 / RTX-CLP II	df: 0.25 um
Column Length: 60 Meters	ID: 0.25 mm

Semivolatile Organics (8082):

Instrument: Agilent 6890 w/Dual Micro ECDs	Injection Volume: 1uL
Column A: Restek RTX-CL/STX-CL	df: 0.32
Column B: Restek RTX/STX-CLPPesticide II	df: 0.25
Column Length: 30 Meters	ID: 0.32 mm

Semivolatile Organics (SHC Extractables):

Instrument: Agilent 6890	Injection volume: 1 ul
Column Type: RTX-5	df: 0.25 um
Column Length: 60 Meters	ID: 0.25 mm

Sample Delivery Group Summary

Alpha Job Number : L2445487

Account Name : Langan Engineering & Environmental
Project Number : 100963701
Project Name : 1487 FIRST AVE

Received : 12-AUG-2024
Reviewer : Brendan Grady

Delivery Information

Samples Delivered By : Alpha Courier

Chain of Custody : Present

Cooler Information

Cooler	Seal/Seal#	Preservation	Temperature(°C)	Additional Information
A	Absent/	Ice	2.3	

Condition Information

1) All samples on COC received?	**YES**
2) Extra samples received?	**NO**
3) Are there any sample container discrepancies?	**NO**
4) Are there any discrepancies between COC & sample labels?	**NO**
5) Are samples in appropriate containers for requested analysis?	**YES**
6) Are samples properly preserved for requested analysis?	**YES**
7) Are samples within holding time for requested analysis?	**YES**
8) All sampling equipment returned?	**NA**

Volatile Organics/VPH

1) Reagent Water Vials Frozen by Client?	**NO**

Date Inj'd : 7/12/2024 10:32 pm Instrument : Gonzo
Sample : I8260STD0.5PPB Quant Date : 7/15/2024 9:37 am

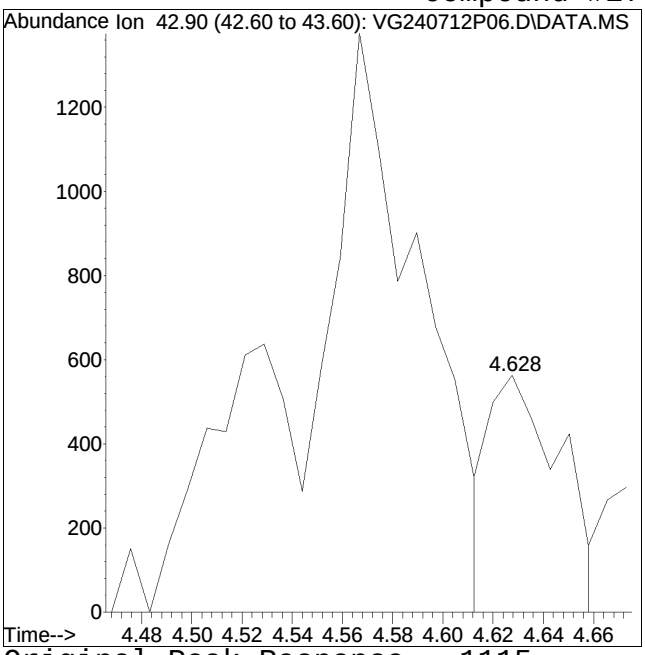
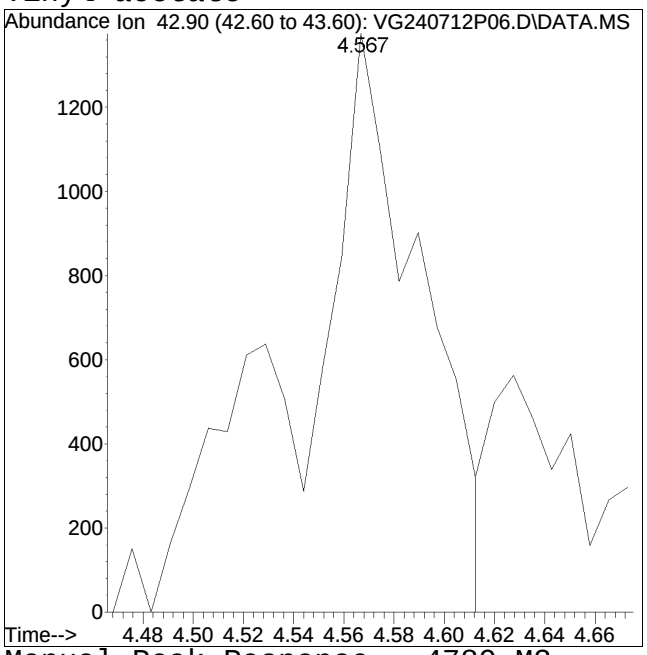
Compound #27: Vinyl acetate





Original Peak Response = 1115 Manual Peak Response = 4789 M3

M3 = Misidentification of the peak (i.e. 1,4-dichlorobenzene identified as 1,3-dichlorobenzene), or misidentification from 2 partially resolved peaks not being split.

Manual Integration Report

Compound #35: Tetrahydrofuran

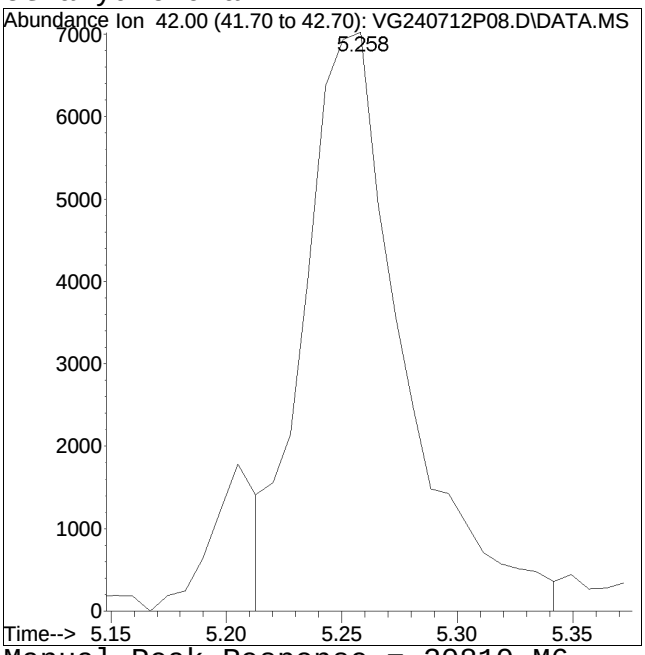
Original Peak Response = 23633



Manual Peak Response = 20810 M6

M6 = Misassignment of peak valley by automated integration (poor split of 2 peaks).

Compound #35: Tetrahydrofuran

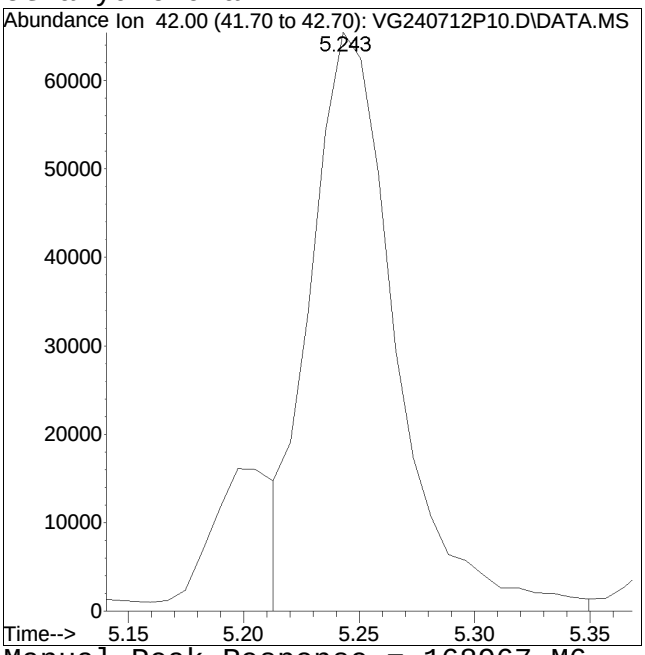
Original Peak Response = 193150



Manual Peak Response = 168967 M6

M6 = Misassignment of peak valley by automated integration (poor split of 2 peaks).

Manual Integration Report

Data Path : K:\VOA122\2024\240813A\
Data File : V22240813A02.D
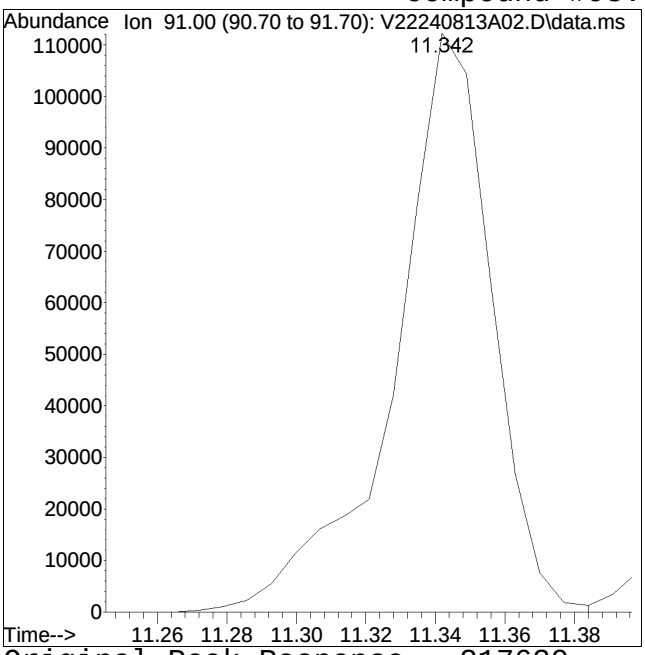
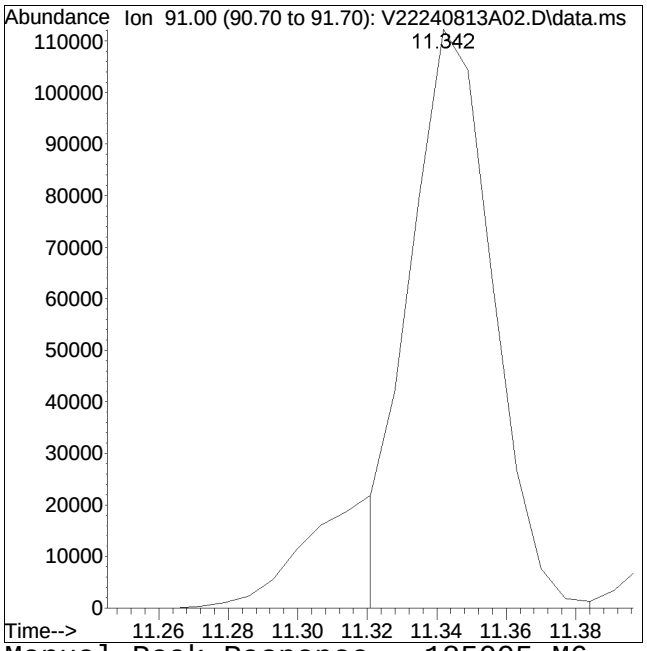
Date Inj'd : 8/13/2024 7:16 am
Sample : WG1958655-4,31,10,10

QMethod : V122_240729A_8260.m
Operator : VOA122:PID
Instrument : VOA 122
Quant Date : 8/13/2024 7:50 am

Compound #93: 2-Chlorotoluene



Original Peak Response = 217620



Manual Peak Response = 185005 M6

M6 = Misassignment of peak valley by automated integration (poor split of 2 peaks).

QMethod : G_240712P_8260.m
Operator : GONZO:PID
Instrument : Gonzo
Quant Date : 8/13/2024 9:09 am

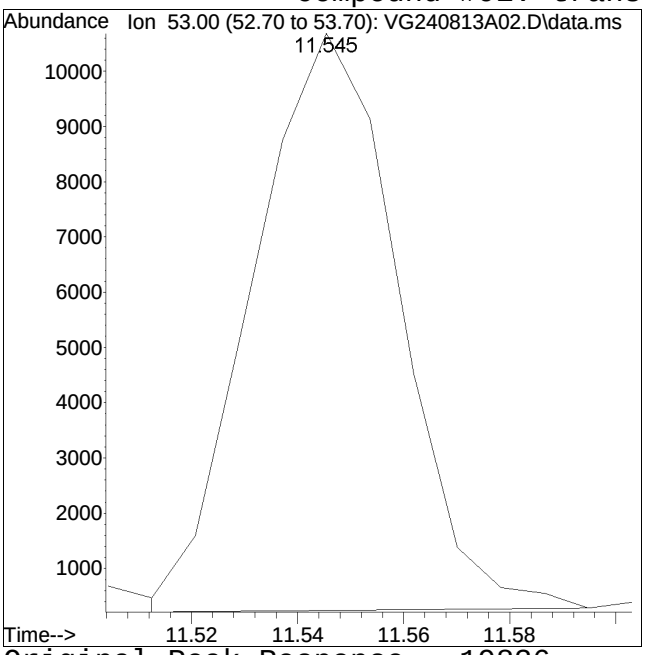
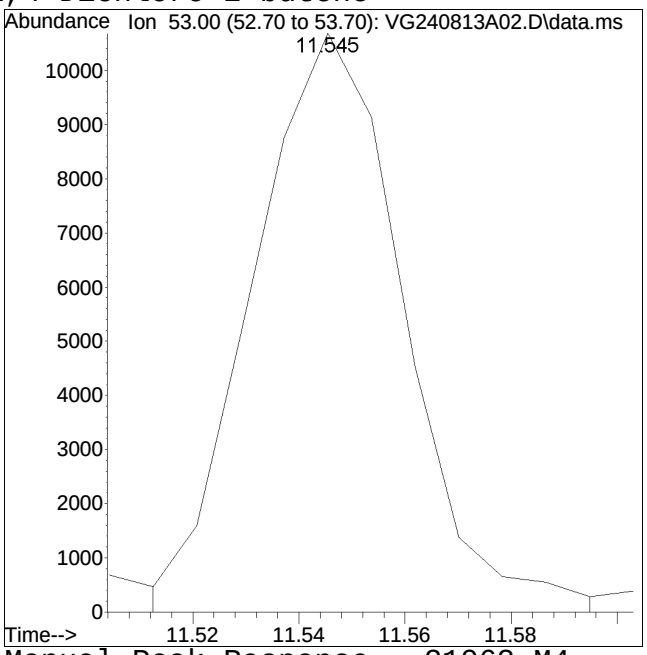
Compound #92: trans-1,4-Dichloro-2-butene



Original Peak Response = 19836



Manual Peak Response = 21062 M4

M4 = Poor automated baseline construction.

Calculation of Volatile Organic Compounds

Aqueous Concentration Formula: Amt * DF * Uf * (1/Vo)

Where:
DF = Dilution Factor
Vo = Sample Volume Purged (mL)
Uf = ng Unit Correction Factor (mL)

Soil Concentration Formula: Amt * DF * (1/Wt)

Where:
DF = Dilution Factor
Wt = Weight of Sample (g)

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY
For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L2445770-02D: The pH was greater than two; however, the sample was analyzed within the method required holding time.

L2445770-02D: The sample has elevated detection limits due to the dilution required by the sample matrix (white, thick, very cloudy).

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Melissa Sturgis Report Date: 08/14/24

Title: Technical Director/Representative

DATA PACKAGE GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where

Report Format: DU Report with 'J' Qualifiers

Data Qualifiers

the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

ND or U - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Volatile Organics Instruments

Volatile Organics:

Instrument: Agilent 7890 GC/5975C MSD	Columns (length x ID x df):
