Spiller Company:	999
Contact Name:	JOE OSTROWSKI
DEC Memo:	"11/19/08-Vought-Daytime runner. Vought performed site visit and Petroleum Tank Cleaners on-site. Danny Mason (JR Mason Residential and Commerical Contracting 914-393-5392 cell:347-723-5591) also onsite. Spill caused by contractor onsite removing fill pipe in basement to two (275-gallon) manifolded #2 Fuel oil ASTs but not removing fill port. Approximately 150-gallons of #2 fuel oil was emptied into basement with concrete floor and #2 fuel oil also entered sump. Delivery by Castle Oil and PTC hired by Archdiocese. Speedy dry also put on floor but puddles of product still present morning after delivery (delivery was last evening) -suggesting lack of infiltration through concrete. JR Mason John Ryan (914-393-5392) also arrived onsite and would convey DEC requirments to Bram Hillegers (Archdiosece). Vought called PTC Joe Ostrowski for update on condition of concrete floor. Vought received call from Hilleger and explained below requirements and also required him to call 311 due to impact to sump. Note that sump was turned off during spill as liquid oil level above sump level and floor. Vought received callback from PTC Ostrowski that concrete was in good shape. Vought sent CSL to: Bram Hillegers Archdiocese of New York Bishop Fearns Building 201 Seminary Avenue, 2nd Floor Yonkers, NY 10704-1852 Fax: 914-376-0610 11/21/08-Vought-Received email from Hilleger that no cracks were present in concrete and that PTC completed cleanup. Pictures showed conrete floor in good condition and no remaining oil. Spill closed by Vought. 11/24/08-Vought-NFA sent to above address."
Remarks:	"CALLER STATES THAT THE FILL LINE WAS DISCONNECTED TO THE TANKS IN THE BASEMENT AND ABOUT 150 GALLONS OF PRODUCT SPILLED TO THE CONCRETE FLOOR IN THE BASEMENT. CLEAN UP IS PENDING."

DEC Memo:	"spill # 257123 5/1/17-On 4/29/17-Zhune spoke to ERT-Christ Muggio. Christ said they found 1500 gallons of water in the structure. There is no oil. They believe it's tidal water enter the structure. They collected a sample and found less than 1 ppm of PCBs. They are pumping now to see what they found. 5/16/16 - Austin - Sample results came back as insufficient to show any oil in the water, and PCB results were <1ppm - Con Ed contained and cleaned up the water in the vault - See document files for further information - Spill closed - end"
Remarks:	"large in flow of water mixed with oil into the structure, contained to the structure at this time 1,500 gal in structure"

DEC Memo:	"Sangesland left a voice message with Martin Wodka at Team Enviro asking for the name and mailing address for the property owner.... Need to send CSL Ask Mr. Wodka first what work has already been done on the site. Maybe they have already defined the problem and they can move directly to remediation? 10/26/07 - Raphael Ketani. I spoke to Ruthann Richert, the managing partner of the owners, 346 East 119 Street, LLC. She said her company's office is at 36 West 120 Street, apt #1, NY, 10027. She said her phone number is (646) 240-4626 and her cell is (917) 902-2641. She said that dark soil was found while digging. Soil samples were taken and sent off to the lab for analysis today. She said the digging will continue as soon as Martin Wodka of Team Environmental (845) 692-8124 gets the lined roll-off containers. She added that groundwater is about 13 feet below grade and they plan to go down about 12 feet. Right now, they are encountering rubble consisting of bricks and concrete. I told her that I will be sending out a Contaminated Soil Letter as part of our routine communication. She said that is fine. The letter went out today. 11/28/07 - Raphael Ketani. I spoke to Ms. Richert. She said that they have removed 250 tons of contaminated soil so far. She added that more contaminated soil will be removed as soon as the underpinning is done. I asked her whether the groundwater will be sampled. She said that RND Services will sample the groundwater. I told her that DEC needs copies of all of the manifests and the groundwater analyticals. She said that she will send me the copies. The site is located between First and Second avenues. 1/9/08 - Raphael Ketani. I tried to contact Ms. Richert (646) 240-4626 regarding the digging and soil and groundwater sampling at the site. However, I could only leave a message. 1/16/08 - Raphael Ketani. Bob Heyman of R&D Services (845) 348-6355 called me back. He said that progress is being made on the site. It is 25' by 61', essentially the dimensions of a brownstone building. He said his company is just handling the contaminated soil and water removal, nothing else. He said that they sent about 160 tons of soil to Carteret, NJ already and may have a little more in the elevator shaft

VACANT LOT (Continued) **S108956124**

area (they have to go 8' below the water table). Groundwater is at 13' below grade. He has already collected two truck loads of water. He said he will take a sample of the groundwater when all of the construction is finished and conditions are settled. I told him to collect another load of groundwater when everything is settled. Then, I said, wait for the water to return and take a groundwater sample. He said he will do this. I asked him whether he can get all of the contaminated soil. He said No as there are structural issues with the foundations of the buildings on either side. I told him to send DEC a letter to that effect and include it in the closure report. He said he will and that pictures and everything will be included in the closure report. 4/9/08 - Raphael Ketani. I spoke to Mr. Heyman. He said that things are at a standstill. They took some more soil out and a couple of loads of water. He said the water looks clean. However, no further work can take place at the site because they have water intrusion problems in the area where the elevator pit is supposed to go. The owners have been through 3 contractors already and nothing is moving. Unless they can get the water out of the area, construction can't take place. Mr. Heyman said that he will send me a spreadsheet with the loads of water collection and soil collection listed. Mr. Heyman sent me a FAX with a list of the vac truck load pickups and the contaminated soil load pickups. 9/22/08 - Raphael Ketani. Today I received the April 2008 Site Assessment Report (SAR). Two composite soil samples were taken. One sample was completely non-detect and the other had some naphthalene, but it was well below TAGM. Groundwater was not collected as they said it was really from precipitation and runoff. They will install a plastic vapor barrier and a vapor recovery system. Based upon the information in the SAR and the fact that they were installing the vapor recovery system, and that they will put in a vapor barrier, I am closing the spill case."

Remarks: "DIGGING AND CAME UPON CONTAMINATED SOIL"

DEC Memo:	"02/01/06: This spill transferred from J.Kolleeny to S.Kraszewski. This site is currently served by two 29K tanks installed in 1991 and one 35K tank installed in 1975. As a result of this spill, two previous 33K tanks installed in 1958 were removed in 1991. Two monitoring wells were installed in the vicinity of the new tanks to monitoring for any GW contamination linked to the seepage in the boiler room. For several years, no product was reported and oil seepage through the boiler room wall ceased. No documents on file for

WAGNER -NYCHA (Continued) **S121986278**

this spill since 1993. Need an update from NYCHA. - SK 03/22/06: This spill transferred to K.Tang - SK 01/15/09: Spill transferred to J.Kann. new spill called in by NYCHA after oil was observed seeping through the walls of the facilty by a PBS inspector (Falvey). Spill 0811336 was closed and consolidated with this spill. Immediate follow-up will be required by NYCHA to determine if seepage is weathered oil from this historic spill, or if it is a new problem. 1/15/09 - J.Kann - spoke with NYCHA's Ralph Trocchio. Indicated to him that he will need to determine if the oil seeping is weathered or new. If it is new, NYCHA will need to tightness test the tanks immediately, and put together a work plan. If it is weathered, the site should be moved up in schedule D and a work plan submitted this year. 4/28/15: J.Kann - spoke with NYCHA's Yelena Tkach and requested information on a well on the corner of 1st ave and 120th Street. The well was not NYCHA's, it is on another property. NYCHA checked the boiler room. Minor seepage was noted; it is not clear how old it is. They will clean it and check it in a month. 06/05/17: J.Kann - GSIP for investigation at this site was approved in an email 5/31/17. Contractor must provide sampling location diagram prior to work starting. SIR due 12/31/17. Spill reassigned to Andre Obligado. 10/1/18 - Obligado - 11 soil borings were advanced. 1 monitoring well was installed. 0.4 ft of LNAPL was detected in newly installed MW-3. Elevated SVOCs were detected in Sb4 and Sb9. The report concludes that soil and groundwater at the site has been impacted by petroleum, likely #2 fuel oil. Additional delineation is warranted. I sent a letter to Yelena requiring additional delineation work plan within 60 days. 8/30/21 - Obligado - I reviewed the Delienation Work plan which proposes to install 4 additional monitoring wells to delineate the extent of the contamination. I sent Ryan McPherson email approval of the work plan. I also requested this site be added to the monitoring schedule with semiannual reporting."

Remarks: "SUSPECT LEAKING UNDERGROUND FUEL LINE, 3 TANKS IN PLACE-TO DISCONTINUE USE OF TANKS 1 AND 2."

DEC Memo:	"4/30/10 - Raphael Ketani. An unknown vapor was reported as seeping through the walls by Mark Jusino (646) 409-5462 and affecting the breathing of the community. Mr. Jusino told the NRC that the incident originally occurred on 2/28/10 at 1700 hours. The NRC reported the incident today at 1400 hours. The location of the incident is the Wagner Houses at 2360 First Avenue, Manhattan. I investigated the incident and looked for other spills in the database with the same address. Spill #0811336 was called into the DEC as a result of an inspection by staff from the PBS Unit who noticed oil seeping through the boiler room wall. The notes in the case file state that the oil had been seeping through the wall since a tank was removed in 1989. This spill case was subsequently closed and referenced back to spill #8907784. This spill was opened on 11/6/89 and involved the release of oil from two tanks at the site. The case is still open and Jennifer Kann of DER Region 2, PBS Unit, is the case manager. Next, I tried to contact Mr. Jusino, but I could only leave a message. I contacted Ralph Troccio of the maintenance staff (718) 707-5725. I told him that DEC had a vapor complaint from a resident. I asked him whether there was oil seeping into the boiler room or the tank room,

WAGNER HOUSES (Continued) **S121981817**

or outside. He said that there wasn't and that, right now, there is a steam main repair project going on. He said that there is excavation taking place on both sides of First Avenue in order to repair an underground steam line. The steam main has been leaking for awhile. He said that he had walked around the building and didn't see anything else that could possibly be affecting the residents. I thanked him for his efforts and ended the conversation. As there is no evidence of any other source of vapors in the area, I have determined that there is no threat to the public or the environment. Therefore, I am closing the spill case."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	SISTER JANET
DEC Memo:	"This case will be managed by Ryan Piper (payback for Vought covering something for Piper earlier this week) Sangesland spoke to Sister Janet. She says Petro did some work on the oil fill line (trying to extend the line???) and discovered a hole in the line. The hole is underground and Petro gave Sister Janet the name & number for ABC Tank. Sangesland spoke to Donna at ABC Tank. They will send a rep out to look at the job on 11/17. If they take the job, they will follow up with Piper on what work they will do. 1/25/07- DEC Piper left message w. Sister Janet requesting callback and info. 2/23/2016- info req sent to Little Sisters of Assumption Church 310 East 120th St New York, NY 10035 Sister Annette- 917-696-5447. 6/23/16- DEC Piper received closure documentation. Based on work to date, this spill is closed. documents in DEC Docs. "
Remarks:	"A NEW BURNER WAS PUT IN AND THEIR IS A MALFUNCTION ON PIPE WHISTLE DID NOT GO OFF:"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 7/21/03 tipple sent request for documentation 11/28/05 - L. Alden - Sent latest owner letter requesting information. Dr. Georgina Falu, 333 E. 118th St., NY, NY 10035. 1/05/06 - L. Alden - Dr. Falu called, and reported that the spill had been cleaned up before she bought the building and that she has had no problems. I asked if she could get anything documenting the cleanup from the former owner. She will see what she can find and get back to me. In the absence of any documentation, this spill can still probably be closed. 4/10/06 - L. Alden - Close spill."
Remarks:	"CALLER STATES SOMEONE FROM BLDG WAS TO BE WATCHING FROM BASEMENT DURING DELIVERY TO LET DRIVER KNOW WHEN TO STOP FUELING - SUBJECT APPARENTLY LEFT BASEMENT AREA LEADING TO TANK OVERFILL - SPILL CLEANED UP"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	0001
Tank Id:	34418
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

G02 - Tank Secondary Containment - Vault (w/access)
L00 - Piping Leak Detection - None
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
I02 - Overfill - High Level Alarm

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	02/02/1967
Capacity Gallons:	10000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	06/19/2015
Register:	True

Tank Info:

Tank Number:	001
Tank Id:	22428
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	I04 - Overfill - Product Level Gauge (A/G)
	J02 - Dispenser - Suction Dispenser
	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN DRIVER FOR PACIFIC NOTIFIED APARTMENT OF SUPER THAT HE WAS GOING TO MAKE DELIVERY. NEPHEW OF SUPER TOLD DRIVER THAT THEY DIDN'T NEED OIL - HAD DELIVERY COUPLE OF WEEKS AGO. DRIVER HOOKED UP AND DELIVERED ANYHOW. DROPPED 700 GALLONS OF FUEL AND OVERFILLED TANK. OIL CAME OUT OF VENT PIPE, COVERED SIDEWALK, RAN DOWN E. 119 EASTWARD FOR APPROXIMATELY 100 FEET. DRIVER PUT SPEEDI DRY DOWN ON SIDEWALK AND LEFT. LARGE POOL OF OIL AT CURBLINE. CHECKED INSIDE OF BUILDING AND OBSERVED THAT OIL HAD BEEN DISCHARGED OUT OF 5K AST FROM THE MANWAY GASKET. PACIFIC SENT TWO MAN CREW (SANTO), AND SPEEDI DRY TO CLEAN UP SPILL. RESPONSE DID INITIAL CLEANUP. WILL NEED TO STEAM CLEAN SIDEWALK, WALL OF BUILDING, AND STREET TO REMOVE REMAINING OIL. CALLED 1/4/99 AND LEFT MESSAGE FOR OWNER. TANK NOT REGISTERED. GAVE TANK REGISTRATION FORMS TO BUILDING OWNER - GALIB. MR. MARTELL SAID OIL IS ON STREET. SAID ITS GALLONS PUDDLES ON STREET. HEADED TO SEWER. FAXED TO DEP."
Remarks:	"CALLER STATES SPEEDI DRY PUT IN PLACE BUT DID NOT CLEAN UP SPILL THAT HAS GONE INTO THE STREET."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	002
Tank Id:	236451
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
G03 - Tank Secondary Containment - Vault (w/o access)
L09 - Piping Leak Detection - Exempt Suction Piping
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
I05 - Overfill - Vent Whistle

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	05/01/2006
Capacity Gallons:	3000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	06/21/2019
Register:	True
Modified By:	JSMACRI

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	23898
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser
I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
L00 - Piping Leak Detection - None
K00 - Spill Prevention - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	05/17/1989
Capacity Gallons:	1080
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

C03 - Pipe Location - Aboveground/Underground Combination
G00 - Tank Secondary Containment - None
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1989
Capacity Gallons:	3000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	JAAVERSA
Last Modified:	07/25/2017
Material Name:	biodiesel (heating, on-site consumption)

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	3553
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

E01 - Piping Secondary Containment - Diking (AG only)
K00 - Spill Prevention - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
I04 - Overfill - Product Level Gauge (A/G)
L09 - Piping Leak Detection - Exempt Suction Piping
G03 - Tank Secondary Containment - Vault (w/o access)
F00 - Pipe External Protection - None
H04 - Tank Leak Detection - Groundwater Well

MMJ LEGACY LLC (Continued) **A100166423**

	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	05/22/2000
Capacity Gallons:	1500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DER Facility ID:	267698
DEC Memo:	"10/18/2004 Sangesland called RND Services. Problem with a valve joint on the top of the tank. Some leakage over the top of the tank onto the ground. RND will repair and submit closure paperwork. 04/12/06 - Hough - Next Step: Follow-up with RND Services on tank closure documentation. 10/11/06 - Austin - Reassigned from Central Office staff to Patel, for follow up and closure - end 11/14/06-Hiralkumar Patel. left message for Sharima Ryan at RND. received call from Ms. Ryan. she couldn't find record on subject site. she will check again and will call back. 11/20/06-Hiralkumar Patel. spoke with Ms. Ryan at RND. site had 2000 gal UST located at 447 E 115th Street address. spill case was report at office address. as per Ms. Ryan, they submitted proposal for further work and never heard back. spoke with Al Luongo, property owner/manager. as per Mr. Luongo, they have only one tank which is 1500 gal AST enclosed in concrete vault. Mr. Luongo believe this case doesn't belong to subject site. Al Luongo Ph. (212) 427-5900 FAX (212) 828-1922 11/20/06-Hiralkumar Patel. visited site. met Manny (212-534-0681), super at building. site has two tanks. one 1500 gal AST on legs and another 2000 gal UST in back of property at 447 E 115th Street. as per Manny, they never had any oil spill. he remember that after tank test, testing company recommended them to put concrete patch around stick line as that line was extended from ground and someone may get fall. as per Manny, no excavation was happened in 2004. Manny believes that tanks at site are registered. asked Manny to send tank registration number with last tank test result. 11/21/06-Hiralkumar Patel. searched PBS database. no PBS record. left message for Manny. received fax from Ms. Ryan containing copy of letter from RND about

LADY OF MOUNT CARMEL CHUR (Continued) **S106971370**

test result. as per letter from ATS, they did tank test in Feb. 2004 but this case was reported in Oct. 2004. during testing they found dry leak in tank system. sent out letter to Mr. Luongo requiring tank registration and tank testing, at following address. letter faxed to Mr. Luongo (FAX: 212-828-1922 & 212-534-0629). Al Luongo Our Lady of Mount Carmel Church 448 East 116th Street New York, NY 10029 Ph. (212) 534-0681 (church no.) (212) 427-5900 (management office no.) FAX (212) 534-0629 12/14/06-Hiralkumar Patel. spoke with Mr. Luongo. he will send documents soon. 06/04/07-Hiralkumar Patel. spoke with Mr. Luongo. he will send documents soon. received tank test result from Mr. Luongo. 2000 gal UST was tested on 01/24/07 and tank passed. based on available information, case closed. referred this site to PBS unit as tanks are not registered. "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Region: 2
Acres: 0.042
HW Code: 231126
Record Add: 11/14/2018
Record Upd: 06/03/2021
Updated By: GWBURKE
Site Description: "Location: The 2283 Second Avenue p-site is located in a generally residential and commercial area in the East Harlem section of Manhattan, New York. The site is bordered by a vacant lot to the west, multiple commercial establishments to the north, including a dry cleaner, E 117th Street to the south, and 2nd Avenue to the east. The site is approximately .042 acres (1,856 square-feet) in area. Site Features: The property is improved with a single four-story, residential/commercial building. Current Zoning and Land Use: The site is currently zoned for residential and commercial use and sits within an R9A zoning district with a C2-5 commercial overlay. The commercial portion of the building is vacant according to July 2018 imagery. Past Use of the Site: The on-site building is believed to

2283 SECOND AVENUE SITE - OER (Continued) **S123159109**

	have been constructed in the early 1900 s and was used for both residential (floors 2-4) and commercial (ground floor) purposes. As recently as 2014, the commercial portion of the building operated as a retail store. Historical use includes a dry-cleaning operation which is of environmental concern. Site Geology and Hydrogeology: This information will be provided as it becomes available. "
Env Problem:	"Nature and Extent of Contamination: Potential on-site contaminants of concern include tetrachloroethene (PCE) and its degradation products warranting further investigation due to elevated concentrations detected in off-site sampling."
Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE Original ttf letter sent April 3,2000 4/10/03 letter requiring report documenting work done associated with 2000 ttf describing proper removal/abandonment/ soil testing. both letters in file. 9/1/04 property sold//made contact with purchasers attorney//sending request for documentation to Telluride Realty and attorney's office. 6/15/05: Reassigned to Benjamin 10/28/05- Letter sent Telluride realty (owner)requesting information. No response. Followup needed with owner. 3/06 - File to be sent to Region 2 for followup 02/6/08. TTF letter has been sent to July Daoy LCS P.O.Box 406, Buffalo, NY 14205 -JK- 3/17/08. J.Krimgold reviewed a letter dated 02/14/08 submitted by Associated Environmental Services, Ltd. According to the letter the most probable cause of the t/t failure was a gasket at the man-way, which was subsequently replaced. Tank was retested and passed. NFA."
Remarks: "tank test failure from an u/g tank no leak to the environment no callback necessary"

Environmental Interest/Information System:

CON EDISON SERVICE BOX: 19009 (Continued) **1012185676**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"03/08/06 Feroze, PBS case of this spill is # 2-240680. TTF is sent to: Robert Algarin 2253 Third Ave New york, NY 10035 03/15/06. Spill is transferred from Feroze to Kumer Patel. 03/21/06-Hiralkumar Patel. Spoke with John Laddy at Protest. this site has three 20,000 gal USTs on location and they were transferring oil from one tank to another. during this transfer, tank overfilled and spill happened on concrete side walk and asphalt street (possible from vent pipe). Protest has cleaned the site. John doesn't know about concrete condition but nothing went down to sewer/drain. DEP has visited site already. 03/23/06-Hiralkumar Patel. Spoke with John at Protest. John will go on site to replace faulty valve on tank. he will call me with updates. 03/24/06-Hiralkumar Patel. called for Manny Dias (212-369-3755 Ext 11), but he will be in office on Monday Mar 27 2006. 03/28/06-Hiralkumar Patel. Spoke with Mr. Dias. as per him, oil came out from vent pipe and spilled on concrete side walk and then ran on asphlt street. there are no cracks in concrete on sidewalk. no soil/sewer/drain affected. the tank had faulty pressure gauge on it. tank is currently empty and out of service. they are working on replacing this faulty gauge. all cleaned up. no complaints. Spoke with Mr. Melnick at Protest and asked him to send me copy of invoice once he done changing faulty gauge. He told me that they are going to replace it soon once they find out problem with gauge. 04/21/06-Hiralkumar Patel. Spoke with Mr. Melnick. they got permission to do repair work, but they haven't got chance to do it. they will probably go in next week. he will call once he done with repair work. 05/05/06-Hiralkumar Patel. Spoke to Mr. Melnick at Protest. they will start work probably on May 15. 06/22/06-Hiralkumar Patel. visited site on 06/20/2006. spoke to William, super of building & to Maria Cruz, executive director. tank was still empty on time of visit. no work done yet. spoke with Mr. Dias and asked to call back with updates. Maria Cruz Executive Director ARCO 2253 3rd Ave, 5th Floor New York, NY 10035 PH. (212) 369-3755 Fax (212) 369-6215 Email: taino@acromgt.com mcruz@arcomgt.com spoke with John at Protest. he explained that oil spill happened due to overfill of tank. they have tested all three tanks and tank system passed test. asked John to fax me test results. John suggest Mr. Dias to repair/replace valve to prevent further spill. spoke with Mr. Dias. he explained that due to air pressure inside syphon , oil in one tank reached to top and overfilled. and piece of syphon was leaking and that why it created air pressure. Mr. Dias was planning to change that defected piece of pipe in September as winter season starts. asked him to submit work invoice once he done with such repair work.

CON EDISON SERVICE BOX: 45765 (Continued) **1000318008**

spoke with John at protest again. he explained that this site doesn't have syphon. instead these tanks are connected through valves in supply/return lines. so if they need, they can open/close valve to transfer oil from one tank to another. when John did test, he did test by isolating each tank system from another two. 06/26/06-Hiralkumar Patel. Left message for Mr. Dias. 06/29/06-Hiralkumar Patel. Spoke to John and asked to send tank test results for all three tanks. 07/05/06-Hiralkumar Patel. Spoke to John at Protest. he has misplaced tank test results, once he gets it, he will forward it to the Department. Left message for Mr. Dias. 07/10/06-Hiralkumar Patel. spoke with Mr. Dias and asked him to send tank test results for all tanks. 11/14/06-Hiralkumar Patel. left message for Mr. Dias. 12/01/06-Hiralkumar Patel. left message for Mr. Dias. 12/19/06-Hiralkumar Patel. spoke with Bob at Protest. he will check for tank test result and will fax if he finds it. spoke with Mr. Dias. they have repaired leaking valve. received tank test result from Bob from Protest. all three tanks were passed test. spoke with DEC Jacob about PBS registration. PBS registration expired on 10/23/1997. i gave tank test results to DEC Brian to update PBS record. sent email to Jacob with site address, manager's name and address. based on available tank test result and other informations, case closed. 12/22/06-Hiralkumar Patel. received work invoice copy, about repair of leaking valve, from Mr. Dias."

Remarks: "while doing product came out of another tank; clean up crew enroute"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 11/14/94: REASSIGNED FROM SIGONA TO ZHITOMIRSKY ON 11/14/94. TRANSFERED FROM HALE TO TIBBE ON 12/27/00. SEE ALSO 88-08930, 88-09111 & 90-07322. TANKS REPLACED/REPAIRED/UPGRADED. REMEDIATION ONGOING. 06-17-08: Spill # 0502231 has been closed and consolidated under this number. 0502231 was a release of #4 heating during a delievery from a disconnected fill line. 801 gallons were delievered before the problem was discovered. NYCT DOB determined that 439 gallons of fuel oil were recovered during immediate cleanup, 68 gallons were recovered from the facility s oil/water separator system, and at least 109 gallons and as much as 275 gallons of the remaining fuel oil spilled into the UST via the open fill pipe. Based on these volumes, between 19 and 185 gallons of fuel oil could have spilled into the pea gravel surrounding the USTs. The residual contamination will be addressed during the full site remediation. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 5/19/2011 The spill was reassigned from Joe O'Connell to Linda Ross 2/27/12 - Raphael Ketani. Spill reassigned to me during February 2012. The spill was called in due to the failure of the diesel USTs. Two thirds of the southern and eastern parts of the site were affected. An associated spill numbered 9007322 was called in, referred to spill #8808896 and closed. This later spill was the result of tank test failures for the diesel USTs. Monthly progress update meetings are taking place. 4/26/12 - Raphael Ketani. Monthly groundwater monitoring is being performed by URS. 12/18/12 - Raphael Ketani. There have been monthly to bimonthly (once every two months) update meetings with the NYCT regarding this and 17 other sites. The information for the sites is in the UIS under e-docs, multiple sites, DER, Region 2, Petroleum Spills, NYCT. 4/28/14 - Raphael Ketani. As of about this date, documents are no longer archivable via the e-docs system in the UIS. The succeeding archive system is DecDocs. 6/9/14 - Raphael Ketani. Gregory Mathelier (CONSTRUCTION ADMINISTRATOR, UST & ENVIRONMENTAL REMEDIATION PROGRAM, ON-CALL PROJECTS/ CAPITAL PROGRAM MANAGEMENT, MTA NEW YORK CITY TRANSIT, 300 CADMAN PLAZA, 6TH FL., 6376, BUS: 718-613-0029/ CELL: 646-879-1970, E-MAIL:

126TH ST DEPOT -NYCT (Continued) **S106702967**

GREGORY.MATHELIER@NYCT.CO) called me today to say that the Mother Clara Hale Depot at 146th Street will be rebuilt on top of the present site. Once it is rebuilt and ready for operation during January 2015, the buses from the 126th Street Depot will be transferred to there and the 126th Street Depot will be left empty. Once empty, the 126th Street Depot will be returned to the City. Mr. Mathelier said that he was surprised by this news and never knew that the 126th Street Depot was NOT owned by the NYCT. However, that is the plan he heard from administrative staff at the NYCT. I asked Mr. Mathelier what the future use of the site will be. He said that he didn't know. With that, the conversation ended. In a later e-mail, Mr. Mathelier also informed me that he found out from his superiors that the site was sitting on top of an old slave burial ground. So excavating what little contamination is still present was out of the question. Mr. Mathelier sent me the Petition for Spill Closure Report, June 2014 and dated 6/6/14. It was written that the amount of the release was unknown. The south and east parts of the site were affected. Depth to groundwater varies from 3.5 feet to 11 feet below grade. A pump and treat system was installed. During 1993, 27,400 gals. of product was recovered. The system was permanently shut down during February 2001 due to the loss of efficiency of this collection method. This was followed by bioremediation with bacteria and nutrients during the rest of 2001. Three rounds of surfactant injections took place with BioSolve from January to March of 2004. Groundwater monitoring is continuing. The report also described the 4 spill cases that were closed by the former DEC NYCT spill case manager, Mark Tibbe. These cases were: 9007322; 0502231; 0509617; and 0513919. Spill 9007322 concerned the diesel USTs at the southeast corner of the site. There were tank test failures. So the spill was called in. The amount of the release is unknown. It was not certain from the case record whether this spill is a duplicate of 8808896. There were no case notes. Spill 0502231 was opened up due to a #4 heating oil spill. A delivery took place to an out of service 8,000 gal. UST (tank #1), instead of the neighboring in service 8,000 gal. UST (tank #2) during May 2005. This was the result of tank #2 being tagged and locked out and not tank #1. Product came out of the piping sump to tank #1. The spill was contained to the concrete vault and an non-functioning zipper drain. About 801 gals. of oil spilled. The spill took place in the southwest part of the depot. Of the total spilled, 439 gals. was recovered during the initial clean up. Another 68 gals. was recovered by the oil water separator. It was estimated that 19 to 185 gallons of product was unaccounted for. The site investigation was completed during April 2008. Borings SB-7 to SB-10 were performed 15 feet bgs. The soils encountered were sand. No product was seen in soil samples from the 4 borings. Soil analytical results revealed minor VOC exceedences of TAGM standards. Benzo series SVOC exceedences were noted (case manager's note: the results looked like historical fill). There were no groundwater VOC exceedences and only 1 sample with 2 SVOC exceedences. Spill 0509617 involved the failure of the piston at hydraulic lift #3. About 270 gals. of hydraulic fluid were released during November 2005. The lift is in the southwest part of the site. During March 2006, soil excavating took place. A trench 5 feet deep, 12 feet wide and 14 feet long was cut. However, in the process of excavating the soil, the fill line to the #2 oil USTs was cut. Number 2 oil was released and spill number 0513919 was opened. Six soil samples were taken at the ground surface in the hydraulic fluid spill area on 3/10/06 and

126TH ST DEPOT -NYCT (Continued) **S106702967**

3/13/06. The results were almost entirely non-detect. Groundwater was not affected. Spill 0513919 was estimated as 240 gals. of product. About 180 gals. was recovered from the piston sump. Sixty gallons was unaccounted for. A trench 10 feet long, 2 feet wide and 2 feet deep was dug. On 3/21/06, five PLine soil samples were collected at the very top of the ground for the #2 oil spill. The results had very high exceedences for VOCs. The investigation for the #2 oil spill was conducted during November 2006. Borings MW-10 to MW-12 were conducted. At each boring, the soil samples had elevated PID readings and strong odors with many VOC exceedences. However, only the soil sample from MW-11 had many high VOC and naphthalene exceedences. The sample from MW-12 had 3 VOC exceedences. During January 2007, a thin layer of product was seen in each well. MW-11 had 0.02 feet of product. The rest of the wells had just sheens. During March 2007, MW-13 and MW-14 were installed. Again, there were elevated PID readings and strong oil odors. The NYCT believes that the 60 gals. of product is adsorbed to the soil. During a September 29, 2011 meeting between staff from the NYCT and DEC, it was agreed that no further action may be warranted and that the site is a candidate for spill closure. This agreement was based upon the lack of substantial impacts or the absence of substantial measureable product. Groundwater monitoring is taking place monthly. MW-04 has from 0.01 to 0.13 feet of product on 11/18/13. MW-01 had 0.01 to 0.03 feet of product on 1/14/14 and 2/14/14. RW-01 had 0.01 feet of product on 4/13/14 and 5/13/14. 6/26/14 - Raphael Ketani. A case review took place today regarding the site. After consideration of the information contained in the file, it was determined that the case could be closed. This was based upon the presence of very little product in only 3 wells, the lack of collectible product since January 2011, the inability to dig up the remaining contamination due to the slave burial ground and the successful remediation of the 4 previous spills. It was determined that the residual contamination was not a threat to the public or the environment. Therefore, the spill case was closed today. 1/8/15 - Raphael Ketani. Today I reviewed the Dvirka & Bartilucci October 10, 2014 Monitoring Well Decommissioning/Abandonment Summary Letter Report. The work was performed from August 20 to 22 and from August 25 to 26, 2014. Decommissioning/abandonment was not performed for wells MW-A2 and MW-09 as they had previously been paved over and destroyed. The wells which were abandoned were: MW-1 to 14, A1, A3, A4 and RW-1 and 2. A jackhammer and concrete saw were used to remove each well manhole and the surrounding concrete. A hollow stem auger rig was used to overdrill each well to 5 feet below grade, thereby exposing 5 feet of riser. This was not done for RW-2 as the riser was made of steel. This well was simply just grouted. Each well was grouted from the bottom up using a tremmie and the upper 5 feet of the riser was cut off. Any soil with petroleum odors was drummed. A 1 foot conrete patch was installed at each former well location. The wells in the sidewalks had their entire flags replaced. A total of one quarter cubic yard of petroleum contaminated soil was shipped out via AARCO for disposal at Clean Earth in Carteret, New Jersey. All USTs will be cleaned out and closed in place as per DEC regulations. 1/15/15 - Raphael Ketani. Today I received the COMPLETE October 10, 2014 Monitoring Well Decommissioning/Abandonment Summary Letter Report. I reviewed all of the attachments that had been missing. I accepted the report without comment. 7/27/15 - Raphael Ketani. I received a call today from Tracey Bell, Assistant Vice President of the NYC Economic

126TH ST DEPOT -NYCT (Continued) **S106702967**

Development Corporation [(212) 312-3752/(347) 672-6297/TBell@nycedc.com]. She wanted to know who had responsibility for the USTs as the EDC was considering having the site developed. I told her that it was whichever entity presently owns them. She asked whether the spill case would have to be reopened if they took out the USTs and found contamination or if they dug somewhere else and found contamination. I told her that the spill would have to be called in and the case would have to be reopened. However, I added, if circumstances prevented excavation (i.e. close to utilities, would endanger a road, etc.), then the contamination could be left in place. Ms. Bell stated that since the spill would be reopened, then the site might not be developed. 2/23/16 - Raphael Ketani. Today I received an email from Cadecia Josephs (718) 613-0296, Associate Project Manager I with NYCT and assistant to Mr. Mathelier. A letter work plan was attached which described the proposed investigation of the UST tank field at the former depot. Ms. Josephs described the plan in the text of her email. She wrote the following: In preparation for the closure in place of the UST tank farm located at the former 126th street Bus Depot (former Spill No. 8808896, closed on June 26, 2014), a soil and groundwater sampling program is being proposed to investigate any potential subsurface contamination. The attached letter details the work to be performed by a subcontractor to our Consultant (Dvirka and Bartilucci Consulting Engineers). The tank farm consists of eight 4,000 gallon USTs encased in a concrete vault which extends to 20 ft below grade, this vault is backfilled with approximately eleven feet of pea gravel. A total of 12 soil borings and 4 groundwater probes are proposed to be completed in the vicinity of the USTs and associated fuel lines. Each tank vault exterior soil borings (TCSB-01 through TCSB-04) will be advanced using a direct push drill rig to approximately 22 feet below grade and 5 to 7 feet in the vicinity of the below grade fuel lines (TCSB-05 through TCSB-12). One soil boring will be advanced inside the tank vault (TCPB-01) using a guzzler to a depth of approximately 13 feet below grade surface. A total of 4 groundwater probes (TCGP-01 through TCGP-04) are proposed to be installed in the vicinity outside the tank vault and the below grade lines to a depth of 2 feet below grade. One (1) groundwater probe will be installed inside the vault (TCGP-01) to where liquid is encountered within the tank vault. All samples will be analyzed for STARS VOCs and SVOCs via USEPA Methods 8260 and 8270, respectively. Groundwater samples will be compared to the Class GA Groundwater Standards and Guidance Values and soil samples will be compared to the Soil Cleanup Objectives provided on Table 3 of NYSDEC s CP-51 Soil Cleanup Guidance document. All field activities will be performed in accordance with the Consent Order negotiated between NYCT and the NYSDEC. Upon completion of the soil and groundwater investigation and the receipt of analytical results, a Soil and Groundwater Investigation Report will be submitted to the NYSDEC for its review. If the proposed investigation plan meets the NYSDEC s approval your written confirmation would be greatly appreciated. Feel free to contact Mr. Gregory Mathelier at (718) 613-0029 with any questions you may have regarding this matter. 2/25/16 - Raphael Ketani. I reviewed the Dvirka & Bartilucci 1/29/16 Technical Scope of Work and Estimated Cost Proposal letter. The subject eight 4,000 gallon USTs and associated piping were evacuated, cleaned out and filled with concrete on December 21, 2015. In the letter plan, Dvirka & Bartilucci (D&B) proposes to conduct a soil and groundwater investigation (as described above) of the vault area and

126TH ST DEPOT -NYCT (Continued) **S106702967**

the associated piping. The pea gravel inside the vault will be screened at one location within the vault by conducting a soil boring (TCPB-01) and an assessment will be made of any petroleum contamination that is found inside. If liquid is discovered in the vault, then groundwater probe TCGP-01 will be constructed. Twelve soil borings and four groundwater probes will be completed in the vicinity of the vault and next to the piping. The vault floor slab is 7 feet thick. So no borings will be conducted through the floor. Four borings will be drilled in the vicinity of the vault to a total depth of 22 feet, 2 feet below the vault floor. Soil borings adjacent to the piping will be drilled to 5 to 7 feet below grade (8 borings). Groundwater probes TCGP-01 to TCGP-04 will be installed at selected locations (see Figure 1 in the letter). Each boring location will be hand cleared to 6 feet below the depot floor. A geophysical survey will be completed in order to locate utilities in the area. One Call utility mark outs will also be conducted. Groundwater is expected to be found at 3 to 8 feet below grade in the vicinity of the vault. Each probe will be advanced to 2 feet below the water table. A burial ground exists under the southwest part of the site. Access to drill will be coordinated with the proper authorities. If archaeological materials are encountered while drilling, then work will stop and NYCT will be notified. On pages 7 and 8 of the letter plan, D&B describes a list of tasks and assumptions regarding the proposed work which form most of the basis for estimating the cost of the investigation. These tasks comprise Task 1 - the investigation. Task 2 will be to write the tank field investigation report, have it reviewed by D&B staff and submit it to the DEC. The total cost of the project is estimated to be $96,276. I found the letter plan to be acceptable and sent a written letter to Mr. Mathelier approving the Technical Scope of Work and Estimated Cost Proposal letter. In the DEC approval letter, I indicated that a groundwater flow map must also be included in the investigation report. Also, I stated that a schedule for the various tasks must be submitted to the Department once the start date for the investigation is confirmed. 4/18/16 - Raphael Ketani. A PBS Request for Waiver letter dated 4/18/16 was submitted by NYCT to Leszek Zielinski, EE II and head of the PBS Unit. In the letter, the NYCT requested that they be allowed to forego the soil investigation around the USTs, which is required by 6NYCRR 613-2.6(c) when tank systems are being abandoned. The reason for this request is that the NYCT doesn't want to potentially risk disturbing the human remains that may be adjacent to the UST pad. "

Remarks: "DISCONNECTED & EXCAVATED TANK."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY ALTHOUGH SPILL REPORT SAYS CAUSE OF SPILL WAS TANK OVERFILL, AND THAT CONTAM. SOIL WAS FOUND DURING TANK REMOVAL, IN TRUTH, CONTAM. SOIL WAS FOUND DURING DRILLING OF BORING (AT DISPENSER) AS PART OF TANK CLOSURE-IN-PLACE INVESTIGATION. TANKS WERE NOT REMOVED; CAUSE OF SPILL WAS NOT OVERFILL. CHESNER ENGINEERING AND THEN URS CORP. PERFORMED SITE INVESTIGATIONS, FOUND SOME SOIL CONTAMINATION AND MINOR GROUNDWATER CONTAMINATION. URS INSTALLED A BIOVENTING SYSTEM TO ADDRESS SOIL AND PERFORMED GROUNDWATER MONITORING, STARTED SYSTEM IN MARCH 2003. BY OCTOBER 2003, GROUNDWATER MET STATE STANDARDS IN ALL MONITORING WELLS. DEC APPROVED NO FURTHER ACTION FOR GROUNDWATER, AND MONITORING WAS DISCONTINUED. URS PLANS TO ADVANCE SOIL BORINGS TO EVALUATE PROGRESS OF SOIL CLEANUP. Reviewed System Performance Monitoring Reports for June-Aug. '04 and Sept.-Nov. '04 on March 14, 2005; system appears to be operating adequately. Soil confirmation sampling has been performed but awaiting report with results. - J. Kolleeny 3/14/05 Spill transferred from Kolleeny to A. Zhitomirsky on 4/4/05. - JK 5-15-2005 Reviewed Perfomance Monitoring Report received on 4/1/2005 and Results of Confirmation Soil Sampling/Request for NFA received on 4/27/2005. No VOCs were detected in any of the confirmation soil samples. Minor SVOC exceedances were collected from soil borings SB-09 and SB-10. For the approximately six SVOCs that exceeded TAGM #4046 cleanup concentrations there is no apparent exposure pathway according to URS report. NFA letter was issued. AZ"
Remarks:	"during tank removal caller found contaminated soil and today got test results back "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 5/18/04 - AUSTIN - TRANSFERRED FROM TOMASELLO FOR REASSIGNMENT - END 9/10/04 - Sawyer - Talked to new manager for building. He will call back with as much information as he can find. The information should consist of the repair receipts and other supporting documentation for the clean up, if needed. 11/26/2004 Sangesland reviewed a submittal from ProTest. On Sept 30, 2004 ProTest isolated the tank and it passed. the problem was found to be a defective vent pipe. A partial replacement of this line was performed and the tank system then passed a tightness test. There were no visible signs of contamination."

Remarks: "APARTMENT BUILDING. CUSTOMER NOTIFIED OF RESULTS."

SWIS:	3101
Town:	New York City
Record Added Date:	11/27/2017
Record Updated Date:	10/06/2020
Update By:	AMSERVIS
Site Description:	"Location: The site is located in the Borough of Manhattan, New York City. It is approximately 45,600-square-feet (1.04-acre) and is located in an urban area on the western half of the block bound by East 126th Street to the north, Second Avenue to the east, East 125th Street to the south, and Third Avenue to the west. Site Features: A new building is currently under construction. Current Zoning and Land Use: The entire site is located in the C6-3 mixed commercial and residential district primarily, which is consistent with the current land use. The surrounding area includes commercial, industrial, residential, institutional, and transportation/utility buildings, as well as vacant lots, construction sites, and open space. Past Use of the Site: The site was occupied by residential, commercial, and industrial facilities since the late 1800s. Historical site uses include a parking lot, a metal supply company, a dry cleaner, a laundry service, a parking garage, an automobile repair shop, and a tire repair shop. Site Geology and Hydrogeology: Historic fill, consisting of brown fine- to coarse-grained sand with varying amounts of gravel, silt, brick, concrete, ash and organic material, extends from the ground surface to depths ranging from about 2 to 17.5 feet below ground surface (bgs) across the site footprint. Native soil was observed directly below the fill layer and generally consists of brown and grey, fine- to coarse-grained sand with varying amounts of silt, clay, and gravel. The prominent rock type beneath the site is Inwood Marble containing white coarse-grained calcitic and dolomitic marble alternating with layers of silicate minerals. Bedrock is

PARCEL B WEST (Continued) **S127012989**

expected to be encountered at about 60 feet bgs. Groundwater was encountered during the RI at about 12 to 14 feet bgs and was determined to flow towards the northeast. "

Env Problem: "Nature and Extent of Contamination Post-Remediation: Remediation at the site is complete. Remedial actions have successfully achieved soil cleanup objectives for unrestricted use. Prior to Remediation: Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), metals, pesticides, herbicides and cyanide. Groundwater samples were also analyzed for the emerging contaminants 1,4-dioxane and per- and polyfluoroalkyl substances. Soil vapor, sub-slab vapor, and ambient air samples were analyzed for VOCs. Based on investigations conducted to date, the primary contaminants of concern include lead, mercury, tetrachloroethene (PCE) and trichloroethene (TCE). Soil - The VOCs 1,2,4-trimethylbenzene (maximum concentration of 7 parts per million, or ppm), toluene (maximum concentration of 1.2 ppm) and total xylenes (maximum concentration of 2.2 ppm) were detected at concentrations exceeding their respective unrestricted use soil cleanup objectives (UUSCOs). Several SVOCs were found at elevated concentrations above their UUSCOs, including naphthalene (120 ppm), anthracene (220 ppm), benzo(a)pyrene (330 ppm), chrysene (310 ppm) and fluoranthene (810 ppm). Metals, specifically lead (1,540 ppm) and mercury (2.3 ppm) were found in shallow soil at concentrations that exceed their respective UUSCOs. Data does not indicate any off-site impacts in soil related to this site. Groundwater - PCE exceeded the NYSDEC groundwater standards at a maximum concentration of 14 parts per billion (ppb). Naphthalene was detected in one sample at a concentration of 31 ppb, which exceeds the groundwater standard. Lead exceeded the groundwater standards at a maximum concentration of 156.2 ppb in an unfiltered groundwater sample. The filtered sample from the same location was non-detect for lead. No pesticides or PCBs were detected in groundwater. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor - PCE and TCE were detected at elevated concentrations throughout the site, but were most elevated in the vicinity of the former dry cleaner. The maximum concentration for PCE was 67,700 micrograms per cubic meter (ug/m3) and for TCE it was 709 ug/m3. Data collected off-site indicated additional actions are needed to further evaluate soil vapor intrusion off-site. The maximum concentration for PCE was 56,100 micrograms per cubic meter (ug/m3) and for TCE it was 2450 ug/m3 off-site. "

Health Problem: "Remedial actions are complete and have eliminated the potential for contact with site-related contaminants. Offsite soil vapor intrusion sampling has identified elevated contaminated levels in soil vapor. Additional investigation of soil vapor is recommended as part of the offsite portion of this project #C231108A."

DEC Memo:	"need to send ttf letter to Property Manager: Mr. Joe Berko (212-687-0777) Berko & Associates 501 Fifth Ave - Suite 1408 New York, NY 10017 Nov. 7, 2005 A Tank Test Failure Letter was sent to: Joe Berko Berko & Assoc. 501 Fifth Ave- Suite 1408 New York, NY 10017 11/16/05-Vought-Spoke with Maya Betesh (212-687-0777) and she will be faxing in repair invoices. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/14/06 - Raphael Ketani. I called up Berko & Associates and asked to speak to the case manager for the property. I spoke to Joseph Berko. He said that all of the documentation showing that the tank was abandoned in place and that everything was taken care of was sent some time ago. I told him I don't have anything to look at. He said he will send it again. 6/15/06 - Raphael Ketani. Mr. Berko called me back. He stated that the tank was abandoned in place. I looked up the PBS case #2-610163 and it showed the tank abandoned in place. I told Mr. Berko that I needed the failed tank test results, why the tank failed, and a letter report from Brookside Environmental, the company that abandoned the tank, stating that there were no impacts to drains or

STORE FRONT (Continued) **S107417004**

the environment. He said he would get these documents for me. 7/20/06 - Raphael Ketani. I left a message for Mr. Berko asking what was presently taking place at the site. 8/2/06 - Raphael Ketani. I spoke to Mr. Berko. He said he was just the mortgage broker at the time. He said that he has the information and will get me the documentation that I need. 8/4/06 - Raphael Ketani. I received the dry fail tank and system test results and the cover letter from Eastside Floors stating there was no environmental impact or impact to the sewer system or drainage system. Also the cover letter stated that no oil was spilled as it was a dry leak, that the tank was abandoned in place, and that they have converted to electric heat. Based upon the above listed documentation, I am closing the spill case."

Remarks: "Systems test failure. No product released."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 12/12/2003 Management company telephone 917-709-4887 Sangesland spoke with Vega in apt B. He said he came to visit his grandmother and the apartment building was filled with a heavy oil smell. Vega called NYFD. Mike Mulqueen was at the site(Sangesland did NOT speak with Mike) Mulqueen reported the spill and estimated 30 gallons. According to Vega, NYFD and City DEP were both on site and gave the management company several written orders to clean & repair the spill. Sangesland called the management company and left a message. No response yet. Unknown who is doing the cleanup. No contact made yet with either owner or management company. 12/15/03 Tipple responded to the scene, rang all bells and was buzzed in, located boiler and tank area, found the spill, no one was to be found. It was not apparent if the spill was caused by a slow drip or asingle event. Tipple then Called Management company, Owner as per PBS registration and Tenant in apt.B , got no response. Spoke with Mulqueen, FDNY had put speedy dry and biosolve to absorb the oil and reduce the vapors. FDNY stated that a cleanup company should be in route Tipple sent letter to repair/ test/tank and clean spill. 12/15/03 Ray from Petroleum Tank Cleaners will PROBABLY do the cleanup. He will look at the site and get a signed contract. 3/5/2004 Sangesland spoke to Ray at PTC. PTC records show 4 drums & a van for 4 hours. Spill Complete Closed"
Remarks:	"caller states that the tank looks like it is leaknig. it is an above ground 1000 gallon tank in the basement that has been leaking for about a week."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 5/1/03 Tipple updating/ Office of Mental Health replacing waterline hired Office of General Services to do work. Scott Bard lead environmental person for OMH Albany Capital Operations lead person in cleanup. Contaminated soil letter sent to A. Scott Bard---------phone 518-473-5823 CDPC Unit Q 75 New Scotland Ave Albany, NY 12208 1/17/03 TJD Work plan submitted to investigate sub-surface impacts fro spill. Consultant recommednding composite sampling of trench sidewalls and bottom. The consultant has been notified that composite samples will not be accepted, the appropriate sample type required are discreet or grab samples. 6/6/07-Matthew Klaas (Albany DER) -Called Brett Mongillo at 518-377-0875 who was the project manager with Earth Tech at the time of the spill for additional information. He no longer works for Earth Tech but has refered me to call Scott Bard with the CDPC or to Caroline Benedict at the Earth Tech Albany office. -He was able to tell me that when he arrived on the scene soil samples were taken post excavation of contaminated soil, and that there was no evidence of further impacted soil. The trench was considered a work hazard and was ordered to be filled in due to its clean status. -Attempted to call Scott Bard at 518-473-5823 and got no response -Called Caroline Benedict at 518-951-2200, she was unavailable. Left a message for her to call me back or send me an email with any information she would have. 6/14/07-Matthew Klaas (Albany DER) -Wrote a letter to manhattan Psychiatric Center at 600 East 125th Street, New York, NY 10035 asking for any documentation of the subsurface investigation that Earth Tech ordered them to complete. -Wrote a letter to Scott Bard of Capital District Psychiatric Center (CDPC) at 75 New Scotland Avenue, Albany, NY 12208 requesting any information he may have on this file. 8/20/07 - received letter report EarthTech. Report needs to be reviewed to determine appropriate action 10/3/08 - Austin - Project transferred back down to Regional Office for rassignment - Assigned to Raphael Ketani to both review and respond to the SAEA State Facility Audit that was submitted by Manhattan Psych. for this project, as well as resume dialog/review of this project, to bring it towards completion. - end 10/6/08 - Raphael Ketani. I attempted to

MANHATTAN PSYCH CENTER (Continued) **S103558207**

restart the case. There are no documents in the storage files downstairs. The only E-doc I could find was a copy of the letter that was sent to Scott Bard. I tried to contact Matthew Klaas by e-mail, but he is not listed in DEC's phone directory, nor in Group Wise. I tried contact the Manhattan Psychiatric Center at (646) 672-6556 and reached the Maintenance Office. The person answering the phone said that the head of Maintenance is Bob Billings. She took a message for him. I tried calling Caroline Benedict at Earth Tech (518) 951-2200. I reached an operator who told me that Earth Tech had been bought by AECom. She said that Ms. Benedict was out on leave, but her supervisor, Mark Cory - Head of Environmental Services, could help me. I spoke to Mr. Cory. I told him who had hired Earth Tech and that a letter report was generated and submitted on 8/20/07. He said he will try to help me and he will see whether he can find the report and send it to me. Mr. Cory e-mailed me the 8/20/07 Earth Tech Spill Incident and Response Summary report. I reviewed the report. The report stated that an abandoned oil pipe with #6 oil was accidently broken while trenching for a water main. The report went on to say that the spill was cleaned up and no additional impacts were seen. On 6/17/03, Earth Tech collected soil samples from the trench. The analytical results had hits of total SVOCs of 2.5 ppm to 27.3 ppm. These hits consisted of the benzo series of analytes. The site is next to a former power plant location and the writer refers to this as a suggestion for the high hits. Further investigation was deemed impractical due to the costs and need to disrupt a bike path, a bridal path, and a levee. Also, all contractors expressed concern with ground stability between at the river bulkhead. A geophysical survey was not conducted due to the belief that rusted metal objects below ground would disrupt the accuracy of the results. At the end, closure of the spill case was requested. Mr. Billings called me back. He said that he has been at the site for only a few years. He said that I should talk to Charlie Katona, cell(646) 739-5383, Head Maintenance Supervisor - Supervisor 4. He said that Mr. Katona has been at the site for decades. I tried calling Mr. Katona, but could only leave a message. 10/7/08 - Raphael Ketani. I spoke to Mr. Katona (646) 672-6553. He said that Howard Thompson of OGS and he observed the cleanup and he stated that Earth Tech removed the contamination that occurred as a result of breaking the fuel line. He added that it was unknown whether any other places nearby had historical contamination, but that this one location was finished. I asked him what type of fuel the former power plant used to burn. He said that it was a little before his time, but he is pretty sure that it was coal. Based upon the information in the 8/20/07 Earth Tech Spill Incident and Response Summary Report, and my conversation with Mr. Katona today, I believe there are no continuing threats to the public safety or the environment from the incident and so I am closing the spill case. "

Update By:	LSZINOMA
Site Description:	"LOCATION: The site is bounded by Park Avenue, East 119th Street to the south, East 120th Street to the north and residential apartments to the west. The site occupies Tax Lot 33 of Tax Block 1746 and encompasses approximately 0.46 acres. SITE FEATURES: The site is currently occupied by an asphalt-paved parking lot secured with wrought-iron fence. Other details of the site history are discussed in the Past Use of the site section below. CURRENT ZONING AND LAND USE: The planned development is consistent with its R10, EHC and C2-5 zoning districts. R10 districts are the highest density residential district. EHC is the Special East Harlem Corridors District that was created as part of the broader East Harlem Neighborhood Initiative to facilitate the development of affordable housing, among others. C2-5 districts are commercial overlays mapped within residence districts. The area surrounding the site is urban and developed with low to high-rise multi-family residential buildings, commercial and office buildings, and mixed use residential and commercial properties. Surrounding property usage to the north of the site, beyond East 120th Street, is an athletic field (Eugene McCabe Field) belonging to a public school (PS M079- Horan School). To the south, beyond East

CON EDISON SERVICE BOX: 42084 (Continued) **1016450837**

119th Street, is a mixed-use residential and commercial development and parking lot. To the east, beyond Park Avenue and the elevated tracks of the Metro North Railroad, are a parking lot, multi-family residential buildings, and mixed-use residential and commercial buildings. To the west, and adjacent to the site, are multi-family residential buildings. PAST USE OF THE SITE: Based upon a review of Sanborn Fire Insurance Maps, a City Directory Search and Toxic s Targeting Report for the site and nearby property at 1678 Park Avenue, past uses of the site included residential ands commercial (multi-story, mixed use) from the late 1800 s until the mid-1980 s. The Site appears to have been vacant or partially vacant, between the mid 1980 s and around 2004 when remaining structures were demolished and the site was redeveloped into asphalt-paved parking lot. The City Directory search identified two potential dry cleaning facilities, Rosenstein Chas laundry and Goldstein Max laundry, on the site in as early as 1920 and 1923, respectively and operating for an unknown time. SITE GEOLOGY & HYDROGEOLOGY: Based on the U.S Geological Survey (Central Park, NY Quadrangle), the site lies at an elevation of approximately 20 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). Groundwater was only present in the southern approximately one third of the site perched on bedrock andthe depth to groundwater ranged from 10 to 11 feet below grade surface (ft bgs). Refusal was encountered between 9 and 18 ft bgs. Urban fill material ranged from ground surface to seven to 11 ft bgs and was present directly above bedrock in several locations. Regional groundwater flow is anticipated to flow in an easterly direction towards the East River, located approximately 0.75 miles away. Actual groundwater flow direction may be influenced by stormwater inlets or impervious surface cover. Groundwater in Manhattan is not used as source of potable water. According to the New York City Department of Buildings (NYC DOB), the site is not located in an area that may be affected by Tidal Wetlands, Freshwater Wetlands, Coastal Erosion Hazard Area or Special Flood Hazard area."

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/25/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

PFAS: PFAS Contamination Site Location Listing

DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

PFAS 2: New York State Inactive Landfill Initiative

A solid waste site priority list of mitigation and remedial activities to address sites causing, or substantially contributing to, impairments of drinking water quality. The primary focus is inactive solid waste disposal sites, primarily landfills, and their potential impact on New York?s drinking water resources from site-related contaminants, with a focus on emerging contaminants, including per- and polyfluoroalkyl substances (PFAS) and 1,4-dioxane.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City?s Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA HWS: Recovered Government Archive State Hazardous Waste Facilities List

The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Conservation in New York.

Date of Government Version: N/A
Date Data Arrived at EDR: 07/01/2013
Date Made Active in Reports: 12/30/2013
Number of Days to Update: 182

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/03/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Longitude (West):	73.932644 - 73ˆ 55’ 57.52’’
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	590042.1
UTM Y (Meters):	4516738.5
Elevation:	9 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14115942 CENTRAL PARK, NY
Version Date:	2019

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

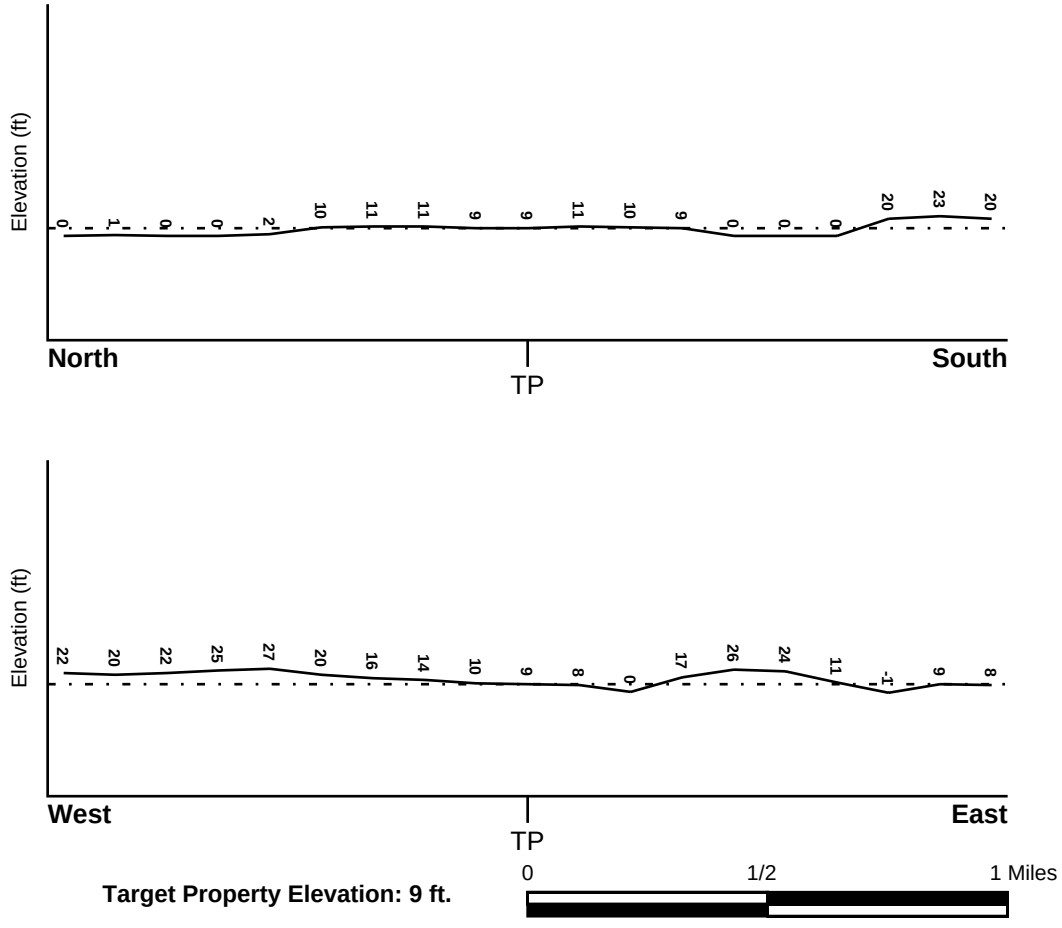
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970091F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970083F	FEMA FIRM Flood data

3604970087F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovician		
Series:	Middle Ordovician (Mohawkian)		
Code:	O2 *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 15 RCRA-LQG sites within approximately 0.25 miles of the target property.
