FINDS:

Registry ID: 110004523347

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CON EDISON SERVICE BOX: 26823 (Continued) **1016148834**

EPA Region: 02
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 10/19/2012
Site name: CON EDISON SERVICE BOX: 26823
Classification: Conditionally Exempt Small Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110055457045

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"4/11/08 bf: Called Ken Bonal (212)431-5751 of Newmark & Company. He no longer works there according to receptionist. She instructed me to call Anderson Santos, Superintendent of the building cell:(917)288-6195 office: (212)505-0756. Left message on machine for him to call me. Sent ttf letter to: Anderson Santos, Superintendent 436 Lafayette Street New York, NY 10003 5/12/08 On 5/8/08, received message from Mike Tartanella, consultant (914)740-1963. Called him back today. Tank is AST in a vault and all piping is exposed. No visible leak was found. Could not determine cause of failure yet. Wanted to know iof second tightness test is required. I told him yes and tank will be retested. He has to inform client of this. Letter on the way to me explaining failure. Received letter from Michael Tatanella of IVI Due Diligence Services, Inc. bf 9/30/08 Received fax from Ray Lara of PTC. Fax was of sampling results. bf 10/1/08 Called Ray Lara. PTC did tank cleaning and had sampling done around tank. Tank was removed. I requested that he send a site plan of sampling. He will send site plan. Called Joe Bortolussi of Newmark Knight Frank (212)431-5751. Told him he needs to send closure application. He told me new tank was installed. I told him he needs to update registration to reflect new changes. He will have contractor (Ace Atlas) contact me regaring this. bf 10/6/08 Received fax from Ray Lara. Letter from John of Ace-Atlas. Tank failed with dry leak. Two dead lines connected to the tank. Tank failed again. Concrete wrapping is removed No oil found on tank in enclosure material or on floor. NFA. bf"
Remarks:	"gross problem"

FINDS:

Registry ID: 110055463797

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110069658114

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"11/24/2004 Anthony from PTC said there was a leak in the fill line at this address. The fill pipe ran in an old coal chute from the curb into the basement. The leaking line dripped down this chute and into a sidewalk vault. PTC cleaned the vault and replaced the fill line. No soil was impacted, all spilling was confined to the chute and the vault. PTC will send in a package to confirm what was said. 12/24/2005 - PTC submitted a letter & waste manifest outlining the remediation and line repair work done to close out the spill. 03/17/05 - Sawyer - No further action is necessary for this spill. Closed."
Remarks:	"Clean up in progress."

FINDS:

Registry ID: 110067680879

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110069690098

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110069694218

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region:	2
DER Facility ID:	66809
DEC Memo:	"An environmental contractor noted that approxomately 100 gallons of heating fuel oil spilled in the basement of this private residence. the oil was removed. Cracks were observed in the concrete floor. Seventeen cubic yards of oil contaminated concrete and debris were removed from the site. Twenety-two cubic yards of contaminated soil were excavated and removed from the site. The excavation was backfilled, a vapor barrier was placed over the soil, a new concrete floor was constructed, and the floor was sealed. Later soil borings found low-level PAH contamination below or just above the recommended soil cleanup objectives in one location. The spill was closed on August 4, 2005."
Remarks:	"September 14, 2001 the resident smelled oil. Service man found AST leaking."

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 217

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN

CVS PHARMACY #10407 (Continued) **1016974653**

THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

EPA Region: 02
Land type: Private
Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 07/16/2008
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: EPA

Tank Info:

Tank Number:	001
Tank ID:	9703
Tank Status:	Closed - In Place
Material Name:	Closed - In Place
Capacity Gallons:	10000
Install Date:	12/01/1980
Date Tank Closed:	02/11/2015
Registered:	True
Tank Location:	Underground
Tank Type:	Steel/carbon steel
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Pipe Model:	Not reported
Modified By:	NRLOMBAR
Last Modified:	04/14/2017

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)
L09 - Piping Leak Detection - Exempt Suction Piping
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
J02 - Dispenser - Suction Dispenser
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
B00 - Tank External Protection - None

Tank Info:

Tank Number:	001
Tank Id:	4161
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
L09 - Piping Leak Detection - Exempt Suction Piping
I04 - Overfill - Product Level Gauge (A/G)
K00 - Spill Prevention - None
J02 - Dispenser - Suction Dispenser
E01 - Piping Secondary Containment - Diking (AG only)

Tank Location:	1
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	01/01/1901
Capacity Gallons:	1500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	05/29/2014
Register:	True

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110067709910

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110063769426

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN 5/18/04 - AUSTIN - SWITCHED FROM TOMASELLO - END Transferred to Rutland during the Spill Reduction Initiative 9/19/05 Spoke to Protest Enterprises (631) 321-4670. They will look up records and get back to me. - Rutland 9/22/05 Spoke to Jim Leddy from Protest. They had no further involvement in this. -Rutland 11/21/05 Spoke to Frank Nieves (212)533-1300 of Waverly Associates. Region 2 called him about this in Sept. 2004. He told them the tank is above ground and they said they would send someone out to verify but never did. Tank has always been above ground. No product leaked, failure came from cover. Closed. - Rutland"
Remarks:	"appears to be manhole cover"

FINDS:

Registry ID: 110060174449

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

CON EDISON VAULT: 9653 (Continued) **1000110318**

corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 0210175-Vought-Spoke with Scott (Pioneer Mangement) who just received, and will approve of proposal to isolate and retest. Faxed and mailed tank test failure letter on 1/9/2003. 7/21/03 TJD Demeo contacted Pioneer Management to determine tank status as letter received from Pioneer (Addressed to Ben Conlon)reveals only tank test failure of 1/8/03. Letter to DEC dated 6/30/03 requests the Department cancel any and all civil penalties concerning this matter. 6/30/03 letter signed by Scott Alcheh. Demeo called Pioneer and asked for Scott Alcheh and was told no such person works for Pioneer and I must have wrong number. Upon further identifying myself and DEC the individual who answered phone (John Stein) now recognized name but states that individual is unavailable. Upon further questioning regarding tank status Mr. Stein states that Pioneer is in the process of obtaining permits to uncover tank. Mr. Stein is unable to provide information regarding tank status but he has stated tank probably still contains product. Demeo directed Mr. Stein to immediately empty tank and proceed with directives of 1/8/03 correspondence from DEC. 7/27/04 TJD Open spills on property being consolidated. Second TTF (0307640) closed and cross-referenced. 6/21/07 Matthew Klaas (Albany

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was K FOLEY 07/28/00 TIPPLE RESPONDED TO THE SPILL AT AN AMOCO STATION LOCATED AT 610 BROADWAY THE STATION HAS 4 UST'S BELOW BASEMENT OF PARKING GARAGE. PIPING FROM THE TANKS TO THE PUMPS ABOVE IS SITUATED IN A SERIES OF SOLID CONCRETE PILASTERS ON THE WALL OF EACH LEVEL OF THE PARKING GARAGE. GASOLINE WAS LEAKING OUT OF THE CONCRETE PILASTER IN THE LOWEST LEVEL OF THE PARKING GARAGE. THE ELECTRICITY TO THE PUMPS WAS TURNED OFF IMMEDIATELY, WHILE MONITORING THE LEL, AUTOS WERE REMOVED FROM THE GARAGE. TYREE ED WALDRON (516-790-2189) WAS ON THE SCENE. BIO-SOLVE WAS APPLIED TO THE GAS TO REDUCE THE VOLATLES, AND SPEEDY DRY WAS USED TO SOAK UP ANY FREE PRODUCT. WORK WOULD CONTINUE THROUGH SUNDAY TO FIND THE SOURCE. THE GAS STATION AND PARKING GARAGE WILL REMAIN OUT OF SERVICE UNTIL THE PROBLEM IS SOLVED. 07/30/01 A HOLE IN THE SUPPLY LINE BETWEEN THE TANKS AND THE PUMPS WAS LOCATED IN THE SECOND LEVEL OF THE PARKING GARAGE. REPAIRS ARE SCHEDULED FOR TUESDAY. 12/24/2003-Vought-Spill transferred from Rommel to Vought. Spill closed by Vought due to open spill #0102242 at same location. 12/31/03 Reassigned from Vought to Foley. 1/2/04 Delta closure request from 6/17/03: Leaking pipe section was repaired in August 2001. Tyree dismantles mid-grade suction piping system to

AMOCO (Continued) **S105135274**

isolate the leaking pipe. Pipes were encased in concrete. Tyree isolated the piping with the pinhole leak which was identified between the first and second levels of the garage. Tyree completed hydraulic integrity testing as directed by FDNY and all lines passed. Tyree reconstructed the concrete-filled pipe chase and restored to serivce. (KMF) 1/20/04 Sent NFA to Amoco for 0209761, 0102242, 0104555. (KMF)"

Remarks: "underground tank undera parking garage failed spilling gasoline. has not been cleaned up yet. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was K FOLEY 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 12/24/2003-Vought-See closed spill #0104555 at same location. Spill transferred from Vought to K Foley. 1/2/04 UST closure report reviewed (Delta, 7/23/03). Report summarizes the excavation of four 4000gal fiberglass coated double-walled steel gasoline USTs and associated piping. Service station is above a three-level underground parking garage. USTs were located beneath the concrete floor on the third underground level of the parking garage. The piping extended upwards through the concrete encasement along the interior wall of the garage. Delta submitted a closure request letter for spill #0104555 which summarized maintenance activities performed to repair the failed piping associated with this spill number and passing line test after repairs were made. Tanks were observed to be in good condition. PID readings were generally less than 10ppm with the highest reading at 75ppm. Due to the absence of petroluem-impacted soil, no soil was removed from the site. Four post-ex soil samples were collected from outside the tank excavation vault and did not identify any VOCs above TAGM. Spill #0102242 was called in upon discovery of impacted soil at the location of the off-site former remote fill ports during maintenance work. Four drums of petroleum contaminated soil were generated as a result of the impacted soil discovery. During UST closure, approx 80ft of piping beneath the concrete floor of the third level underground parking garage was removed. Six soil samples were taken from beneath the piping(1.5'). No VOCs were detected above soil cleanup objectives. An additional 30' of piping vertically rose in a concrete encasement along the interior parking garage wall to the remote fill ports and pump islands. Of note, no soil was encountered along the piping and no soil was encountered during removal of the pump islands (above a parking garage). 1/20/04 Sent NFA to Amoco for 0209761, 0102242, 0104555. (KMF)"
Remarks:	"THEY WAS A LEAK IN THE ROMOTE AREA OF THE FILL PUMP. "

FINDS:

Registry ID: 110004483700

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	38997
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None

ISE REALTY GROUP, INC. (Continued) **U004077858**

I04 - Overfill - Product Level Gauge (A/G)
I05 - Overfill - Vent Whistle
G01 - Tank Secondary Containment - Diking (Aboveground)

Tank Location:	6
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	02/15/1895
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Region:	2
DER Facility ID:	392153
DEC Memo:	"1/20/15 TJD Spill reassigned from Sangesland to DeMeo. Neil Tomassetti from Eastmond submitted a closure letter and has requested a file review. 2/5/15 TJD File review. Two 20K USTs in a basement garage, Tank #1 passed tightness test on July 11, 2013 - Tank #2 failed. Investigation of tightness test failure for Tank #2 revealed several conditions including: a cracked elbow in aboveground fill line, a hidden (open)vent behind a wall and a corroded active vent line. Repairs were made to the tank system and Tank #2 passed a system test on 10/21/14. Following the passing test of Tank #2 the contractor reports the building management determined they had excess capacity as the building has been converted to dual fuel (primary fuel - natural gas). As such, Tank #2 was to be permanently closed - Eastmond then cut three holes in the bottom of Tank #2 along centerline and collected samples - additionally three holes were cut in the sidewall of Tank #2 facing Tank #2 and hand directional borings were advanced below Tank #1 to collect samples to assess the condition of sub-surface soils beneath both tanks. Samples were submitted (6 total)to a NYS ELAP certified laboratory for analysis. All results were non-detect. Based upon above information no further action is required. All documentation has been uploaded to DECDOCS. Spill closed. DeMeo informed Neil from Eastmond that the facility's PBS registration must be updated to reflect change in status."
Remarks:	"2 tanks on property - 1 failed - cleanup in progress"

Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	137186
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT SPILL TRANSFERRED FROM VOUGHT OBLIGADO 10/26/05 - Obligado - Site also known as 300 Lafayette Street under spill number 9408102. Close older spill number 9408102 and consolidate with new spill number 0230042. 11/21/05 - Obligado - Spoke with Steve Muller, well installation planned. 12/2/05 - Obligado - Review baseline assessment report, submitted by Delta, 10/02. At time of assessment, site had 3 active 4000 galon USTs, and was an active Gaseteria. Between Jan 01 and Dec 02, three soil borings advanced to 20 to 30 ft. Two more soil boroings advanced in Jan 02 to 48 ft. A total of 9 soil samples collected. Soil results in ppb: SB1 (13-15) - 1250 xylenes SB1 (18-20) - 2060 xylenes SB4 (45-47) - 198 MTBE SB5 (40-42) - 1850 xylenes, 62,350 total VOCs Two of the soil borings turned into wells. Ground water results in ppb: MW4 - 4.92 benzene, 171 ethylbenzene, 868 xylenes, 247 MTBE, 105 arsenic, 461 chromium, 728 lead MW5 - 220 nbutlybenzene, 253 124trimethlybenzene Sensitive receptors include 1 federal public supply well 1.1 miles northwest, church 750 ft southeast, St.Patrick elementary school 800 ft southeast. Depth to water is 41 ft. Ground water flow is westerly-southwesterly to Hudson River. Soil is predominantly sand. 12/7/05 - Obligado - Meeting with DEC, ASR, Gaseteria. Decide to postpone drilling at this locattion to advance other higher priority sites. 1/5/05 - Obligado - Spoke with Steve Muller. Drilling scheduled for 1/12 1/18/05 - Obligado - Spoke with Steve Muller. Drilling postponed. Drilling will occur this week. 3/2/06 - Obligado - Received Final Remedial Action Plan, submitted by ASR, dated 3/1/06. According to report, 3 wells installed by Air Rotary method to 70 ft bgs. Ground water at 45 ft bgs. 1 composite soil sample collected from each well at 40 - 50 ft bgs depth interval. Only one impact (300 ppb napthalene) at one soil boring. Three ground water samples show non detect. Request NFA. Call Steve MUller. Ask why air rotary drilling method was used to drill through silty sand. Also why wells were installed to 70 ft, and screening a 30 ft interval. He said he would have to look at the report and the field notes and he would get back to me. Told him from now on I would like to see workplans for all subsurface investigations before drilling. 3/7/06 - Obligado - Phone conversation with Steve Muller. He said there were some errors in the reporting, and that wells were installed by hollow stem auger to 50 ft. He said he would submit a revised report. 3/20/06 - Obligado - Review revised report, wells drilled to 50 ft with augers. Ground water analyticals show non detect for groundwater. Discuss with Joe Sunn, close spill number based on no ground water impacts. 1/4/08 - Obligado - Received well abandonment report."

GASETERIA (Continued) **S105995059**

Remarks: "Contaminated soil and groundwater found. Data reported to DEC by Delta despite knowledge by Gaseteria since 8/5/2002."

FINDS:

Registry ID: 110069682597

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110069697732

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spiller Address:	3225 GALLOWS ROAD
Spiller County:	001
Spiller Contact:	Not reported
Spiller Phone:	Not reported
Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	241778
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 02/10/2004. Reassigned from O'Dowd to Sigona on 10/25/00. Bureau B, unassigned, due to low priority. Transferred from R-2 on April 27, 2005. Formerly R-2, unassigned. 04/06/2006: Per report dated Dec 20, 1990 by GW Tech. This location is presently inactive. All UST system have been removed in Feb 1990. There were 12 nos 550 gal gasoline and 1 no 550 gal waste oil tank. The closest hydrocarbon storage facility, a Texaco S/S is located 300 ft to the west and independently owned gas S/S, Fighting oil co, is located 350 ft to the south west. There were no public well supply wells within 0.5 miles of the property. 3 MW s have installed during Oct 1990. GW flowing towards south. Depth of GW is 18 fbg, Analytical results for the samples collected on Nov 5, 1990 showed very high level of BTEX and MTBE in all 3 wells. BTEX 17200 to 122700 ppb and MTBE 11000 to 27000 ppb. Per last available data as of 11/28/05, highest BTEX concentration was 9632 ppb and MTBE was 2.8 ppb out of 7 nos. MW s. 4 more MW s installed during April 1991. GSC is currently monitoring and sampling quarterly of these 7 wells. Per PBS record, there were only 2 nos 550 gal and 1 no 4000 gal gasoline UST s were registered.

MOBIL S/S (Continued) **S102141711**

Registration should expire on 10/29/92. Did not find any other PBS record for this particular address during search. Talked to Jennifer Martin of GSC who is the project Hydro geologist for this site, she informed presently there is a running convenient store and no gas S/S. They are monitoring quarterly and last sampled on 02/28/06. Report expecting soon. Also talked to Mr. Rick Kaputo of GSC, he informed they are now preparing remediation working plan (ORC). (Sadique) 04/21/2006: Quarterly monitoring of gw for 7 MW s performed by GSC-Kleinfelder on 02/28/06. Site Status Update Report dated April 14, 2006 showed gradual attenuation but still presence of very high concentration of BTEX near MW-1 (8,670 ug/l). Total BTEX and MTBE concentrations for 7 MW's (MW's-1 through 7)were as follows: BTEX-8670, 5160, 3311, BRL, BRL, 451, 1326 and MTBE- less than 10, less than 5.0, 1.5J, 1.0, less than 5.0, 0.58J, less than 2.0 ug/l respectively. (Sadique) 07/07/2006: SSUR dated June 20, 2006 received on 6/23/06. Seven MW's sampled on 05/04/2006. Concentrations of BTEX and MTBE were found in MW-1 through 7 as 10912, 7058, 2416, BRL, BRL, 1354, 3162 ppb and less than 10, less than 5, less than 2.5, less than 1, less than 1, less than 2.5, less than 5 ppb respectively. (Sadique) 10/13/2006: Electronic copy of SSUR dated Oct 12, 2006 received and reviewed. Seven MW's were sampled on 08/30/2006. BTEX and MTBE concentrations for 7 MWs were 12422, 5022, 1214, BRL, BRL, 2920, 1964 ppb and less than 10, less than 2, less than 1, 0.52j, less than 1, less than 2, less than 1 ppb respectively. Though overall level of concentrations for both BTEX and MTBE decreaesd from last quarter, still present BTEX concentration is a concern. Need to issue letter for taking aggressive measure for remediation. (Sadique) 12/12/2006: Based on the review of latest SSUR, issued a letter requesting to submit RWP by Feb 28, 2007. (Sadique) 01/03/2007: SSUR dated December 29, 2006 received on 01/02/2007. Seven MW's sampled on 11/10/2006. Concentrations of BTEX and MTBE were found in MW-1 through 7 as 8176, 5513, 1347, BRL, BRL, 1223, 1828 ppb and less than 20, less than 10, less than 2, less than 1, less than 1, less than 2, less than 2.5 ppb respectively. Overall BTEX concentrations decreased from previous sampling event due to natural attenuation. (Sadique) 02/26/2007: Soil Vapor Extraction / Air Sparge Feasibility Study Work Plan dated 2/21/2007 received and now under review. (Sadique) 3/14/2007: Reviewed the WP. The SVE/AS feasibility study will be conducted to assess the integrity of the existing infrastructure at the site and to determine the effectiveness of the technology. Based on the review, I find the Work Plan to be acceptable as written. Approval letter issued. (Sadique) 04/05/2007: SSUR dated March 30, 2007 reviewed. Seven MW's sampled on 2/13/2007. BTEX and MTBE concentrations were found in MW-1 through 7 as 7228, 15534, 652, BRL, BRL, 3181, 5490 ppb and less than 5, less than 25, less than 1, 0.40j, less than 1, less than 2, less than 2 ppb respectively. SVE/AS feasibility study to assess the integrity of the existing infrastructure at the site will be conducted very soon. (Sadique) 07/06/2007: SSUR dated June 27, 2007 reviewed. Seven MW's sampled on 5/15/2007. Highest on-site BTEX concentration detected as 3425 ppb (MW-7). MTBE was not detected in any wells. SSUR is acceptable. The commencement of field work for SVE/AS feasibility study to assess the integrity of the existing infrastructure yet not started.(Sadique) 07/16/2007: SSUR June 07 approval email sent out today. Also requested provide update status for the commencement of SVE/AS feasibility study feild work by June 23rd, 2007. (Sadique) 07/17/2007: Per Jennifer's (Kleinfelder)email, field work for

MOBIL S/S (Continued) **S102141711**

feasibility study of SVE/AS will commence from August 06, 2007. (Sadique) 08/17/2007: Per Jennifer's email dated 8/10/07, site activities for feasibility study of SVE/AS have been rescheduled for September 11, 2007. (Sadique) 10/15/2007: Site Status Update Report dated 10/12/2007 is under review. (Sadique) 10/29/2007: Reviewed the October 12, 2007 Site Status Update Report . On August 27, 2007, kleinfelder gauged and sampled seven groundwater monitoring wells. On-site highest BTEX concentration was 10,127 ppb in MW-7. Last quarter, BTEX concentration in the sample from the same well was 3,425 ppb. Concentrations of MTBE were detected at below limits for all wells. As per approved SVE/AS Feasibility Study Work Plan, field activities were completed in early October, 2007 and the report is under preparation. I found the report to be acceptable. Approval email sent today. (Sadique) 01/29/2008: Reviewed the December 28, 2007 Site Status Update Report . On November 16, 2007, kleinfelder gauged and sampled seven groundwater monitoring wells. On-site highest BTEX concentration was 11,729 ppb in MW-7. Concentrations of MTBE were detected at below limits. Dissolved Oxygen content also measured from all samples. There appears to be an increasing level of contamination in MW-7. Please analyze and discuss in the next SSUR. Based on the review, I find the report to be acceptable as written. Also Talked to Jennifer M. Martin from Kleinfelder, she told report of the SVE/AS Feasibility Study is ready to review by Exxon and will be submitted to the Department very soon. I am looking forward to receive the Report. Based on the next SSUR, may ask to submit SSIWP. (Sadique) 02/29/2008: Reviewed the February 12, 2008 SVE/AS Feasibility Study Report for the above referenced site. During October 2007, Kleinfelder conducted a SVE/AS feasibility test using the existing SVE/AS infrastructure at the above site. An SVE pilot test was conducted on extraction wells VP-1 and VP-3. In addition, SVE/AS tests were conducted using extraction well VP-1 and sparge point AS-1. Test results confirm that application of SVE/AS is conducive at the site. The minimal mass recovery observed from the existing SVE wells during the test suggest that either the current SVE/AS wells need to be relocated to remediate residual adsorbed mass, or that there may be insufficient residual hydrocarbon mass remaining in the vadose zone. Investigation activities are proposed to characterize and delineate the horizontal and vertical extent of residual adsorbed phase hydrocarbons in soil beneath the site. Based on the review, I find the SVE/AS Feasibility Study Report to be acceptable as written. I am looking forward to receiving a work plan for horizontal and vertical delineation of residual adsorbed phase hydrocarbons. Approval letter issued today. (Sadique) 05/05/2008: Reviewed the April 23, 2008 Site Status Update Report. On February 29, 2008, kleinfelder gauged and sampled seven groundwater monitoring wells. LPH was not detected in any monitoring wells. Highest BTEX concentration of 7,979 ppb was detected in MW-7. Like the previous quarter, concentrations of MTBE were detected at below limits from all samples. Dissolved Oxygen content was also recorded from all samples. Based on the review, I find the report to be acceptable. Approval email sent today. (Sadique) 05/05/2008: Reviewed the April 28, 2008 Soil Assessment Work Plan (SAWP). The investigation activities are proposed to characterize and delineate the horizontal and vertical extent of residual adsorbed phase hydrocarbons in soils beneath the Site. Results will be used to aid in selecting a remedial strategy that will reduce subsurface hydrocarbon concentrations, volume, and mobility. Kleinfelder proposes a geophysical

MOBIL S/S (Continued) **S102141711**

investigation and advancement of six soil borings on and off-site (on the side walk). The geophysical investigation is proposed in the vicinity of the proposed soil boring locations. Soil borings will be advanced to a minimum of five feet into the saturated zone (approximately 24 fbg). A minimum of one soil sample will be collected from each soil boring for laboratory analysis. Based on the review, I find the Soil Assessment Work Plan to be acceptable contingent upon the inclusion of the following: 1.Per Petroleum Bulk Storage (PBS) report, two 500 gals and one 4000-gal UST s were previously closed. In the Figure 2, please, show their locations, if known. 2.Consider completing the geophysical investigation for the entire site, instead of only at the vicinity of the proposed soil boring locations, to check for any undocumented tanks or piping. 3.The designed depth of MW-4, 5 and 7 were 30 feet, with the screen extended down to the bottom. Consider advancing soil borings down to 30 feet instead of a minimum of five feet into the saturated zone (approximately 24 fbg). Approval letter issued today. (Sadique) 06/10/2008: Per email dated 6/9/08 from Kleinfelder, a letter is issued to obtain NYCDOT road opening permit for upcoming off-site investigation work. (Sadique) 07/16/2008: Reviewed the June 27, 2008 Site Status Update Report. On May 16, 2008, kleinfelder gauged and sampled seven groundwater monitoring wells. LPH was not detected in any monitoring wells. Highest BTEX concentration of 6,543 ppb was detected in MW-1. Concentrations of MTBE were below detection limits for all samples. Dissolved Oxygen content ranged from 0.57 to 1.75 g/L within the on-site wells. Kleinfelder will be conducting additional on-site delineation activities during the second quarter of 2008. Findings of the investigation will be included in a Subsurface Investigation Report and submitted to the Department. Based on the review, I find the report to be acceptable as written. Approval email sent on 7/16/2008. (Sadique) 11/17/2008: Cotacted Mr. Richard Caputo of Klienfelder today. Per his email (Dated 11/17/08), the Site Status Update Report dated June 27, 2008 is the most recent report. Consultant completed the additional assessment and repeated the feasibility testing at the site along with the groundwater sampling in August and the draft report is seding to the client tomorrow. Final copy of the next report will be submitted to the Department within about 2 weeks time. (Sadique) 12/29/2008: Reviewed the November 25, 2008 SIR/SSUR. The SI activities were initiated on June 16, 2008. The investigation included a geophysical survey throughout the entire site and advancement of seven soil borings to characterize and delineate the horizontal and vertical extent of residual adsorbed phase hydrocarbons in the soils beneath the Site. Soil boring depths ranged from 30 to 35 fbg. Three soil borings (SB-2, SB-4, and SB-7) were completed as air sparge wells (AS-7, AS-5, and AS-6). 18 soil samples were collected and analyzed for VOC s. 3 samples exhibited VOC concentrations above NYSDEC RSCOs for nine VOCs. These samples were collected from 20-25 fbg. GW samples were collected from all network monitoring wells, except MW-3 (inaccessible), on August 15, 2008. LPH was not detected in any wells. Highest BTEX concentration was detected as 1,564 ppb in MW-1 and MTBE concentrations were detected below NYSDEC guidance values from all samples. Additionally, during July 29 through 31, 2008, a SVE/AS feasibility test was conducted utilizing the recently installed air sparge wells to assess the feasibility of SVE/AS technology as a means to remediate the remaining residual hydrocarbons. The test indicated favorable VOC recovery in the vapor

MOBIL S/S (Continued) **S102141711**

samples collected and a marked decrease in dissolved hydrocarbons in groundwater, except in one well (MW-6). Due to the relatively low levels of dissolved concentrations of hydrocarbons observed in groundwater, instead of installation of permanent SVE/AS system, Kleinfelder proposes to manifold air sparge wells (AS-7, AS-5, and AS-6) to the existing subsurface system piping. Following connection of three new air sparge points, one SVE/AS event will be conducted per month for three consecutive months, in order to remediate adsorbed and dissolved phase impacts. Quarterly groundwater monitoring and sampling will continue for two additional quarters in order to monitor for rebound prior to requesting closure of this spill. Based on my review, I find the Subsurface Investigation Report / Site Status Update Report to be acceptable contingent upon the inclusion of the following: 1.During monthly SVE/AS events (less than 8.00 hrs), air sampling needs to be done at the extraction wells to demonstrate that the system is actually removing contamination. PID readings should be acceptable for the first run. 2.Monitoring of DO in groundwater both before and after the events, to demonstrate that the system is having an effect. 3.After completion of all three SVE/AS events, quarterly groundwater monitoring and sampling should continue for four additional quarters due to the impacts of seasonal variation of groundwater depths. Approval letter issued today. (Sadique) 02/02/2009: Reviewed the January 09, 2009 Quarterly sampling and report reduction request. Kleinfelder requested a reduction in the groundwater monitoring and sampling network and reporting frequency for the above spill site. They proposed to reduce the current quarterly monitoring and sampling program by eliminating up gradient monitoring well MW-4 and side gradient monitoring well MW-5. These two wells historically exhibited concentrations below NYSDEC water quality standards. Quarterly groundwater sampling will continue. However, a reporting frequency change to biannual was requested. Based on the review, MW-4 and MW-5 can be eliminated from the sampling program. However, quarterly reporting should continue, so I can assess the affect of the upcoming monthly SVE/AS events. Comments letter issued today. (Sadique) 02/10/2009: Reviewed the Site Status Update Report dated January 09, 2009 for the period of September through November 2008. On November 25, 2008, kleinfelder gauged and sampled six groundwater monitoring wells. LPH was not detected in any monitoring wells. Highest BTEX concentration of 3,255 ppb was detected in MW-2. Concentrations of MTBE were below detection limits for all samples. Dissolved Oxygen content ranged from 0.50 to 1.68 mg/L within the on-site wells. MW-3 was inaccessible and was not sampled. Based on my review, I find the report to be acceptable contingent up on the following: 1. Monitoring and reporting of network monitoring wells except MW-4 and 5 should continue on a quarterly basis. 2. MW-4 and 5 will not be abandoned now. 3. In the future reports, please, provide clarification and/or reasons if any well(s) is found inaccessible during groundwater sampling events Email issued today. (Sadique) 06/25/2009: Reviewed the SSUR dated April 13, 2009. On February 27, 2009, Kleinfelder gauged and sampled five groundwater monitoring wells. LPH was not detected in any monitoring wells. Highest BTEX concentration of 10,024 ppb was detected in MW-1. Concentrations of MTBE were below detection limits for all samples. Dissolved Oxygen content ranged from 0.64 to 0.96 mg/L within the on-site wells. The process has been initiated to conduct a series of mobile AS/SVE events as a remedial alternative at the site. I find the report to be acceptable as written. Email sent

MOBIL S/S (Continued) **S102141711**

out today. (Sadique) 07/23/2009: Reviewed the SSUR dated June 29, 2009. On May 22, 2009, Kleinfelder gauged 7 and sampled 5groundwater monitoring wells. LPH was not detected in any monitoring wells. Highest BTEX concentration of 6,038 ppb was detected in MW-7. Concentrations of MTBE were below detection limits for all samples. Dissolved Oxygen content ranged from 0.47 to 0.63 mg/L within the on-site wells. Decreasing BTEX and DO concentrations are noticed in all groundwater samples. Mobile air sparge and soil venting remedial events are scheduled for three consecutive months beginning in June 2009 to remediate adsorbed and dissolved phase impacts. As of today, June and July 2009 events, each lasting three days, were completed. Based on my review, I find the report to be acceptable as written. Approval email sent out today. (Sadique) 12/23/2009: Reviewed the SSSUR dated 10/30/09.Three separate SVE/AS mobile remediation events (MRE) conducted during June, July and August, 2009. GW analytical results showed BTEX concentration decreased in all samples except from MW-2. Decrease in DO concentrations are also noticed in all groundwater samples. Kleinfelder proposed to continue to monitor to determine if additional MREs should be proposed. I find the report to be acceptable as written. Approval email sent out today. (Sadique) 4/26/2010: Current status: Reviewed the report dated 1/25/10. LPH was not detected in any wells. 3 separate SVE/AS mobile remediation monthly events (MRE) conducted during June, July and August 09. Consultant will continue monitoring to determine if additional MRE events should be proposed. S.Ahmed 6/28/2010: Current status: Reviewed the report dated 4/30/10. LPH was not detected in any wells. 3 separate SVE/AS mobile remediation monthly events (MRE) conducted during June, July and August 09. Consultant proposed to schedule 3 more MRE s for the fourth quarter of 2010. S.Ahmed 7/28/2010: Current status: Reviewed the report dated 4/30/10. LPH was not detected in any wells. 3 separate SVE/AS mobile remediation monthly events (MRE) conducted during June, July and August 09. Based May 2010 gw data, consultant proposed to halt additional MRE s. S.Ahmed 8/26/2010: Current status: Reviewed the report dated 7/29/10. LPH was not detected in any wells. 3 separate SVE/AS mobile remediation monthly events (MRE) conducted during June, July and August 09. Based May 2010 gw data, consultant proposed to halt additional MRE s. S.Ahmed 11/23/2010: Current status: Reviewed the report dated 10/22/10. LPH was not detected in any wells. 3 separate SVE/AS mobile remediation monthly events (MRE) conducted during June, July and August 09. Need for additinal MRE will be determined after evaluation of Aug and Nov'10 results. S.Ahmed 01/19/2011: Current status: Reviewed the SSUR dated 1/3/11. LPH was not detected in any wells. Requested to analyze for DO and also consider other remedial options if during next gw monitoring (Feb 2011) the concentration remains at ppm level in any well sample. S.Ahmed 03/28/2011: Current status: Reviewed the 3/22/11 SSUR. LPH was not detected in any wells. Highest BTEX concentration detected as 1077 ppb. Overall concentration of dissolved phase hydrocarbon decreased. MTBE is BDL for all wells. DO ranged from 1.15 to 4.67 mg/L. S.Ahmed 06/23/2011: Current status: Reviewed the 6/17/11 SSUR. LPH was not detected in any wells. Highest BTEX concentration detected as 4,567 ppb. Overall concentration of BTEX decreased. Requested to evaluate the implementation of an appropriate remedial technology to expedite remediation. S.Ahmed 08/03/2011: Current status: Reviewed the 7/29/11 ORC socks pilot test WP. Proposed for installation of five nos 4 dia and one foot long ORC socks in three on-site well. The WP is approved contingent upon.

MOBIL S/S (Continued) **S102141711**

Based on the earlier SIR, requested ORC socks installation in MW-2 & 7. S.Ahmed 10/04/2011: Current status: Reviewed the SSUR dated 10/3/11. Per approved pilot test work plan, during September of 2011, ORC socks were installed in seven monitoring wells. Quarterly monitoring will continue. S.Ahmed 12/27/2011: Current status: Reviewed the SSUR dated 12/9/11. During September 2011 ORC socks were installed in 5 on-site monitoring wells. Remarkably increased concentrations of dissolved Oxygen contents in all monitored wells were evident. Quarterly monitoring will continue. S.Ahmed 03/20/2012: Current status: Reviewed the SSUR and Regenox injection WP dated 3/16/2012. To remediate the dissolved phase hydrocarbon consulatnt proposed to inject Regenox in the subsurface through six injection points. UIC notification required. Approval letter sent out. S.Ahmed 06/17/2012: Current status: Reviewed the SSUR dated 5/25/2012. Dissolved phase hydrocarbon concentration increased in one MW. RegenOx injection point installation expected to begin this month. UIC notification to EPA has been performed by the consultanrt. S.Ahmed 09/17/2012: Current status: Reviewed the SSUR dated 8/27/2012. Regenox was injected through 4 IP's during July 2012. LPH was not detected in MW's. The need for additional chemical injection events will be evaluated based on the quarterly monitoring results. S.Ahmed 11/16/2012: Current status: Reviewed the SSUR dated 11/13/2012. Regenox was injected through 4 IP's during July 2012. LPH was not detected in MW's. Overall BTEX concentrations are appeared to be declining. Quarterly gauging of 7 MW's and sampling of 4 MW's will continue. S. Ahmed. 03/18/2013: Current status: Reviewed the SSUR dated 3/7/13. LPH was not detected in MW's. Dissolved oxigen content have increased remarkably in all MW's after chemical oxidation injection event was completed in July 2012. S. Ahmed. 06/14/2013: Current status: Reviewed the SSUR dated 6/14/13. LPH was not detected in any MW's. A Regenox injection event was completed between April 30 and May 1, 2013. Dissolved oxigen content have increased remarkably in most MW's. BTEX concentration shows a decreasing trend. S. Ahmed. 09/13/2013: Current status: SSUR dated 9/14/13 reviewed. LPH was not detected in any MW's. Regenox injection conducted on April 30 and May 1, 2013. Per Jul25 2013 monitoring data the BTEX concentrations increased in most wells since last quarter. Quarterly monitoring will continue. S. Ahmed. 11/08/2013: SSUR dated 11/7/13 reviewed. LPH was not detected in any MW's. Regenox injection conducted on April 30 and May 1, 2013. Per Oct2, 2013 monitoring data the BTEX concentrations ranged from 1.94 to 2378 ppb. Elevated concentrations of DO on-site. Monitoring will continue. S. Ahmed. 03/12/2014: SSUR dated 3/5/14 reviewed. After Regenox injection in 2013 the dissolved oxygen (DO) content in all wells increased significantly and natural attenuation process has enhanced. Now the DO levels went down. Requested to installed ORC socks in MW-2. S. Ahmed. 06/19/2014: SSUR dated 6/4/14 reviewed. Groundwater samples from most sitewide monitoring wells detected very low concentrations of BTEX. Only MW-2 still have over 2 ppm of BTEX. Dissolv oxygen is only 0.52 mg/L at MW-2. Consultant will submit a work plan proposing injection to enhance DO concentrations. S. Ahmed. 12/18/2014: SSUR dated 12/18/14 reviewed. MW-2 still detected high BTEX concentrations (4,775) ppb. Dissolved oxygen concentration is very low in all MW's (less than 0.5 mg/L) lacking aerobic nutural attenuation. Requested to install ORC socks in 2 on-site MW's S. Ahmed. 02/04/2015: SSUR dated 2/4/15 reviewed. BTEX concentrations increased in MW-2 during last quarter (6,151 ppb). Moderate increase of dissolved oxygen observed in most wells.

MOBIL S/S (Continued) **S102141711**

Application of oxygen releasing compound (ORC) this quarter. Quarterly monitoring will continue. S. Ahmed. 06/08/2015: SSUR dated 5/12/15 reviewed. BTEX concentrations are below 1 ppm in all on-site monitoring wells. LPH was not detected in any wells. Quarterly monitoring will continue atleast for 3 consecutive quarters to observe the BTEX concentrations trend. S. Ahmed. 08/12/2015: SSUR dated 7/30/15 reviewed. BTEX concentrations are below 1 ppm in all on-site monitoring wells (highest 300 ppb). LPH was not detected in any wells. Quarterly monitoring will continue at least for 3 consecutive quarters to observe the BTEX concentrations trend. S. Ahmed. 02/08/2016: SSUR dated 10/27/15 reviewed. BTEX concentrations increases in MW-2 (2,946 ppb). LPH was not detected in any wells. Quarterly monitoring will continue at least for 2 consecutive quarters to observe the BTEX concentrations trend. S. Ahmed. 03/02/2016: SSUR and No Further Action Request dated 2/17/16 reviewed. BTEX concentrations increased in MW-2 (3,791 ppb). No LPH in any wells. Rebound of BTEX in MW-2 is evident. NFA request is not acceptable. Requested to conduct an additional RegenOx inject event and semiannual monitoring. S. Ahmed. 06/23/2016: Regenox Part A/B injection around the MW-2 will be conducted in July 2016 following submittal of the EPA UIC letter and obtaining the FDNY permit. Next semi annual groundwater monitoring would be conducted during September 2016. S. Ahmed. 09/21/2016: Regenox Part A/B injection around the MW-2 completed during July 2016. Details of the injection activities will be summarized in the next site status report which is due in September 2016. S. Ahmed. 10/26/2016: SSUR dated 10/19/16 reviewed. BTEX concentrations in MW-2 decreased from 3,791 to 656 ppb after RegenOx application. Dissolve oxygen concentrations also increased in all monitored wells. A year of rebound effect monitoring warrants. Email sent to consultant. S. Ahmed. 05/12/2017: The Department has reviewed the April 12, 2017 Site Status Update Report (SSUR) as well as request for No Further Action (NFA) submitted by Groundwater & Environmental Services, Inc. (GES) of New York, Inc. on behalf of the ExxonMobil Environmental Services Company (EMESC) regarding the above referenced spill site. Based on the documentation provided to date, no further investigation or response will be required concerning this site. Decision made based on followings: " Twelve 550-gallon gasoline USTs, and one 550-gallon used oil UST were removed in February and one 550-gallon fuel oil UST was removed in December of 1990. " Conducted three separate SVE/AS mobile remediation events in June, July, and August of 2009. " Chemical oxidation injection events utilizing RegenOx conducted three times during 2012, 2013 and 2016. " Overall, concentrations of BTEX and MTBE continue to decline and/or remain stable with exception of only MW-2. " Benzene and MTBE concentrations in MW-2 have remained below the laboratory reporting limits for four consecutive quarters. " The remaining residual impacts are localized to the central portion of the site (MW-2) with historical sampling of down-gradient monitoring wells (MW-3, MW-6, and MW-7) indicating decreasing and/or stable concentrations of VOCs. " Human exposure to remaining impacts is not likely or possible as a result of the presence of concrete/asphalt at grade which precludes the ability for direct contact; and the overall depth at which remaining impacts remain (greater than 18 feet below grade). Spill inactivation letter mailed on May 12, 2017. S. Ahmed "

Remarks: "(4) 550 GAL. TANKS, NO LEAK RATE AVAILABLE, WILL INVESTIGATE, EXCAVATE, AND RETEST. CONTACT: STEVE TRIFILITTI (516) 371-0739."

Contact Name: BRIAN FENLEY
DEC Memo: "12/29/14-Zhune spoke to Brian Fenley from Island Pump Tank. They are working on a tank removal project. They are in the process to remove four tanks two (4000) gallons, one (3000) gallons and one (275) gallon. They removed one of the two (4000) gallons and encountered soil contaminated underneath the bottom of the tank. They will continue removing the other three tanks. Brian Fenley Business Development Island Pump & Tank Corp. 40 Doyle Court East Northport, NY 11731 O 631.462.2226 X12 F 631.462.1301 C 516.446.2816 www.islandpumpandtank.com 12/31/14-Brian sent the following email. Hope you are well -- We are currently excavating the tanks and stockpiling any contaminated soil. If possible please have the case manager call me so we can determine what he wants. Most likely we will over excavate the soil 12/31/14: Mahat t/c: DEC Mahat contacted Mr. Fenly inquiring about the progress on the spill case. All the tank from the site has been removed and end point samples has been taken from the site. Further excavation will be performed on the site in order to achive clean end point. A clean sample collection is schedule on 1/5/15. A site visit will be organized depending on the time of the day. 1/5/15 : Mahat e/c: DEC Mahat received an email from Mr. Fenly mentioning that bottom slab is taking off today and sample for classification of the waste for proper disposal. Santosh, I will keep you updated. Today they are working on the bottom slabs and grabbing a waste classification for disposal. 02/11/15-Hiralkumar Patel. 11:53 AM:- received call from Paul from Island Pump and Tank. they excavated contaminated soil to 14 ft bg and collected endpoint sample prior to backfilling the hole as further excavation is not possible without shoring. Paul mentioned that there is more contamination beneath 14 ft depth, which will be removed during site development as developer is planning to excavate the entire site to 17 ft bg for new foundation. asked Paul to submit endpoint sample results for review. 5/28/15: Mahat T/c: Brian mentionded that the building is waiting on demolistion permits. Tanks are removed from the site. Samples and site map is due. Brian will provide upto date reprot as sson as he can. DEC is waiting for a report. 8/24/15: Mahat DEC Mahat sent an email inquiring about the progress on the spill case. 4/6/16: Mahat DEC Mahat received an email update on the spill case. Eamil: Good Morning Santosh, It was nice speaking to you this morning. As discussed, Impact Environmental has been contracted by the owner of 24 Second Avenue, Manhattan (Spill 14-09689) to remediate and attempt closure of the open spill case during site redevelopment activities. Currently, all existing buildings have been demolished and SOE/underpinning is underway. Redevelopment proposes the entire site to be excavated to approximately 18 -20 below grade for the construction of a residential building. We will prepare and submit a Spill Remedial Action Work Plan for this site within the next two weeks. In the meantime please contact me with any questions. Below please find my contact information. Thank You, Ben Hernandez Salazar Project Manager O: 631-269-8800 Ext. 142 C: 631-334-2354 IMPACT ENVIRONMENTAL A WRAP will submitted to the Department for a review. 7/27/16: Mahat A RAP on the spill case has been submitted to the Department. It has been uploaded on D2 for reference. The RAP is under review. 9/12/2016 - V. Brevdo Spill Case is transferred from Spill Prevention and Response to Remediation Section B due to project manager Santosh Mahat departure to the other DEC Program, as per 9/9/16 discussion between Randall Austin and Vadim Brevdo. VB 9/12/16

24 SECOND AVENUE OWNER LLC (Continued) **S117394134**

- Raphael Ketani. The spill case was transferred to me during a caseload realignment. 9/23/16 - Raphael Ketani. Alternative property location addresses are 20 to 24 2nd Avenue and 30 to 32 East 1st Street. According to ACRIS, the block and lot are 443 and 1. There is a deed dated 7/7/14. The address of the buyer is listed as 24 Second Avenue Owner, LLC, c/o Arthure J. Israel, Esq. A later owner address is AORE Second Avenue Partners, LLC, 53 Greene Street, 3rd Floor, NY, 10013. There is an additional Party 1 consisting of Porytko Porperties, LLC, 337 East 5th Street, NY, 10003. The latest address for the owner is 24 Second Avenue Owner, LLC, c/o AORE Holdings, LLC, 49 Bleeker Street, Ste. 301, NY, 10012. The earlier PBS registration is #2-032158. Three USTs were listed. These were two 4000 gal. tanks which were installed on 12/1/85 and one 3000 gal. tank which was installed on 12/1/81. All had gasoline. All 3 were closed on 1/1/98. A later PBS registration number #2-603153 was found. It listed the same three large gasoline USTs and a 240 gallon waste oil UST. The owner is the same, Westfield Second Associates. The RAP could not be found. Therefore, I sent Ben Hernandez Salazar (631-269-8800 Ext. 142/cell 631-334-2354/bhernandez@impactenvironmental.com) an email requesting the document. Mr. Hernandez-Salazar sent me a response email. He stated that the SOE and underpinning operations have been completed and deep excavation is under way. Excavation has not yet reached the spill area depth of 13 feet below grade but we anticipate this depth to be reached within the next week or two. He included a link to the 6/20/16 Impact Environmental Spill Remedial Action Plan. On the title page of the RAP, the Impact Environmental client is listed as AORE Holdings, LLC at the 49 Bleeker Street address. I reviewed the RAP. The first part of the document was the RAP itself. It included the Island Pump and Tank 6/25/14 Subsurface Investigation Report and the Island Pump and Tank March 2015 Tank Excavation Assessment Report. I reviewed all 3 documents. It was stated in the RAP that excavation will take place site wide down to 20 feet. After this, endpoint soil samples will be taken. A 20 MIL vapor barrier will be installed beneath all foundation slabs and behind all subgrade foundation walls. An engineered composite cover will be installed over the entire site and will consist of a 5 inch thick reinforced concrete foundation slab and 12 inch thick reinforced foundation walls. The site was a gas station and a car repair shop from the 1960s to 2014. It became a BP station sometime during this period. There were 4 pumps, 3 large gasoline USTs and 1 small waste oil UST. Gasoline impacted soil was discovered on 12/29/14 during the removal of a UST. The 4 USTs and the pumps were removed by Island Pump and Tank. Impacted soil was found at 13 feet below grade as a result of a series of exploratory borings. The soil was excavated down to 13 feet, but the pit was later backfilled with clean soil. Groundwater was found at 35 to 40 feet below grade. Impact Environmental does not expect it to be affected by the spill. The proposed site development will be mixed use with a commercial facility on the first floor and 9 residential levels above. A basement is included as part of the development. The Subsurface Investigation Report demonstrated that very elevated soil contamination was found at an outside drain. However, boring samples from 25 feet or below showed little or no VOC contamination. Also, groundwater impacts were very low. A review of the Tank Excavation Assessment Report showed that very high (N1, BE1, BE2, BW2) to extremely high (E1) total VOC contamination was present at a number of locations. The contamination was found in soil samples that were

24 SECOND AVENUE OWNER LLC (Continued) **S117394134**

taken from 8 to 12 feet below grade. All of these locations were situated within the footprint of excavation area #1. I found the documents to be acceptable and sent an approval email to Mr. Hernandez-Salazar. 2/21/17 - Raphael Ketani. As no information has been forthcoming in many months regarding progress at the site, I sent Mr. Hernandez-Salazar (bhernandez@impactenvironmental.com) an email requesting an update and the closer report. 4/14/17 - Raphael Ketani. As no information has been forthcoming in many months regarding progress at the site, I sent Mr. Hernandez-Salazar (bhernandez@impactenvironmental.com) an email requesting an update and the closer report by 4/28/17. I added that since we have no documentation that the spill had been remediated, the site is still in violation of the Department's environmental laws and can and may be subject to legal action and fines. 4/28/17 - Raphael Ketani. Today I received the Impact Environment Spill Closure Report dated 4/28/17. The report was prepared for AORE Holdings, LLC, 49 Bleecker Street, Ste 301, NY, NY, 10012. The areal extent of the site is about 7,715 square feet. Site elevation is 40 feet above mean sea level. Boring took place down to 35 feet bgs. Bedrock was not encountered during the investigation or the development of the site. Previous investigations found the soil to consist of historical fill (from 5 to 19 feet thick according to the boring logs) over, in general, light to dark brown fine to medium grained sand with gravel. The previous investigations also encountered groundwater at 35 to 40 feet bgs. Groundwater flow is from west to east to the East River. The site operated as a filling station and auto repair shop from the 1960s to 2014. The NYS DEC PBS database indicates that three 4000 gallon gasoline USTs and one 240 gallon waste oil UST were below the site. The current spill case was opened when grossly contaminated soil was discovered below the site. The proposed use is mixed residential/retail commercial. A ten story building with a footprint that occupies the entire property is presently being constructed. The building will have a subgrade cellar with 2483 square feet of commercial space, tenant recreational space, tenant storage facilities and building utility rooms. The cellar foundation extends down to 18.5 feet bgs throughout the site. The excavation generated 9246.72 tons of soil and fill. The grossly contaminated soil was excavated to 13 feet bgs within the area of the former pump island. The total amount consisted was 36.78 tons. Some of the material was shipped to Bayshore Recycling Corp. in Keasbey, NJ. A total of 1346.58 tons of soil and fill was shipped as non-hazardous material to Impact Recovery & Reuse Center in Lyndhurst, NJ. Another 7863.36 tons of non-hazardous soil and fill was removed to the Former NJ Zinc site in Palmerton, PA. The Palmerton facility also received much of the soil from the spill area. All of the facilities were licensed and/or regulated to receive the material. A Stego Wrap brand 20mm thick vapor barrier system was installed below the entire foundation slab and behind sub-grade foundation walls. A composite cover system consisting of a 5 inch thick concrete foundation slab underlain by 12 inch to 55 inch thick concrete mat slabs and a 6 inch thick layer of clean 3/4 inch gravel and 12 inch thick concrete foundation walls were installed throughout the building footprint. Six post excavation bottom endpoint samples (EP-1 to EP-6) and seven sidewall samples (SW-1 to SW-7) were collected from the soil within the spill area excavation on 9/30/16 and on 10/5/16. One bottom endpoint sample was collected for every 900 square feet of area at a depth of 19 to 19.5 feet bgs (from 6 to 12 inches below the excavation floor). One

24 SECOND AVENUE OWNER LLC (Continued) **S117394134**

sidewall sample was collected for every 30 linear feet of sidewall at a depth of 13 to 15 feet bgs. The results for all of the bottom and sidewall samples were almost entirely non-detect for VOCs, with the exception of some very low naphthalene hits. Soil sampling results were included for total metals and TCLP lead. However, both sets of data were low in concentration. Sampling results were also included for the drains from the former service station and were very high. However, as the facility had been removed and deep excavating had taken place to remove the soil down to the design grade, this information had no affect on the safe development of the site and was only historical. Tickets and manifests were included in the report. I had no comment about them. I found the Spill Closure Report to be acceptable. As the entire volume of contaminated soil had been removed and the end point sample results were almost entirely non-detect and as groundwater was unaffected, I determined that the spill had been remediated and that the incident no longer posed a threat to the public or the environment. I sent a Spill Closure Letter to 24 Second Avenue Owner, LLC, c/o AORE Holdings, LLC at the 49 Bleecker Street address. I closed the spill case effective today."

Remarks: "4 tanks pending removal, loss found under tank, c/u pending"

DEC Memo:	"4/24/2009 TTF letter sent to: Mr. Louis Ortiz New York University 14 Waverly Place New York, NY 10003 5/7/2009 - Sangesland received a call from John Leddy to discuss the work schedule for this site. Apparently the city DOT office of sidewalk permits is moving and can not issue a sidewalk opening permit soon enough to meet the May 22nd deadline given in the TTF letter. Sangesland sent the following e-mail back to Mr. Leddy. ********** Mr. Leddy - The DEC has made a notation on this spill file that a 30 day extension has been approved due to the NYC DOT sidewalk permit issue. Please have the tank repair/retest work done at this site by June 22, 2009 ********** Protest requested another extension to July 22nd. Steve, We have experienced delays in getting sidewalk opening permits for the EIR of the 5000 gal. No. 2 fuel oil tank at that location. Our customer is understandably concerned with the present deadline of 6/22/09, which looks like it won t be met. We would greatly appreciate one last extension of 30 days to July 22. Thank you. John Leddy - Pro Test ********** 10/16/09. Pro Test Environmental emailed: The tank was excavated and tests of tank alone and lines were done. The tank, remote fill line and vent line failed. Contamination was seen. EIR of tank under city sidewalk on hold pending NYU getting bids for the job and complication of having to replace entire sidewalk before holiday moratorium starting on 11/17. Will keep you advised. JK. 7/6/10 received closure report dated 12/21/09 prepared by pro Test Environmental. Tank failed because of vent line. Soil samples taken. Most contaminants were non-detectable. Two exccedances found from Boring #2: benzo(a)pyrene [200 ppb vs. 60 ppb] and Boring #5: benzo(a)anthracene [270 ppb vs. 224 ppb]. Tank was closed in place. NFA. bf "
Remarks:	"TANK TEST FAILURE ON A 5000 GALLON TANK UNK IF ANY PRODUCT SPILLED."

DEC Region:	2
DER Facility ID:	14358
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 5/28/2004 Sangesland spoke with Adam Smyth of Triumvirate Envir. He says NYU has a 4,000 gal UST under the sidewalk in front of it's building at 111 2nd Ave. Piping from this tank enters the basement of the building and runs an oil fired backup heating system when their interruptible natural gas gets cut off during extreme cold weather. NYU Maintenance people noticed staining on the wall around these pipes. The wall was opened and it was determined that the pipes were rotten. All pipes were replaced and the tank/pipes passed a pressure test. NYU would like to keep this tank in operation. Additional horizontal borings were taken through the bottom of the basement wall into the area under the buried tank. These soil samples came back quote hot unquote. Triumvirate Environmental is in the process of completing a delineation of the site. They will either propose some form of remediation in place, or they will propose excavating the tank, contamination & then replacing the tank. This report will be sent directly to Jake Krimgold. Contaminated soil letter sent to Louis Ortiz NYU 14 Waverly Place New York, NY 10003 6/24/2004 Sangesland called Stephanie Kung at NYU to ask for a status update. She said she has a draft copy of a work plan from Triumvirate

NYU (Continued) **S106471773**

Environmental. A hard copy of this plan should be submitted to the DEC within the next week or so. The plan outlines additional delineation and proposed remediation options. A decision has NOT yet been made if the tank needs to be pulled. 7/26/04. J.Krimgold talked to Justin Williams (Triumvirate Env.). He stated that drilling will be commenced on 7/30/04. 10/21/04. J.Krimgold has reviewed the Site Investigation Report submitted in August 2004 by Triumvirate Env. The report was not accepted for the following reasons: Boring logs with soil screening results are not included in the report. The drawing in the report is not up to scale and lacks compass orientation. Soil sampling results performed by ACE-ATLAS Corp. are not included in the report. Also , the location of this sample is not shown on the drawing. Even though it is stated that this sample was taken roughly 12 inches off the floor the floor elevation is not defined in the report. If, as stated in the report, no evidence of an oil leak was found during tank top excavation, than it is unclear what is the source of the oil on the basement wall and elevated levels of contaminants found in the ACE-ATLAS sample. Contaminant levels in boring number 1 seems to be increasing with depth, however, no explanations were given to this fact. Lateral and vertical delineation of a petroleum release has not been completed. The Summary statement that samples fall well under the cleanup objectives is incorrect. All soil samples presented in the report exhibit contaminant concentrations above NYS TAGM levels. Requested to correct these deficiencies and resubmit the report for Departmental review. 3/1/5/05. J.Krimgold reviewed the Site Investigation Report Addendum submitted by Triumvirate Env. on February 18, 2005. The report concludes that soil in the vicinity of UST and piping had been impacted. However, no recommendations were giving regarding remediation or further actions at this site. J.Krimgold contacted Triumvirate (Adam Smyth). He will submit recommendations in a week. 7/27/05. J.Krimgold reviewed a letter submitted by NYU dated May 27, 2005. In the letter NYU concludes that contamination found in soil borings GP-6 , GP-7 and GP-2 was not from UST's corroded fill line, but rather show a background contamination in the urban fill. NFA letter."

Remarks: "Spill has not been cleaned up. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"3/30/15-Vought-Created spill number as need to maintain record of response to NYCEM EOC at the request of Regional Director. Spill notes best summarized by Vought's summary emails from NYC EM EOC to all supervisors as follows: Initial Update from 3/27/15: There have been a total of three building collapses associated with the explosion at the addresses of 119, 121 and 123 Second Avenue. There is also 8 other building vacate orders issued by NYCDOB. NYPD, FDNY and EM are currently determining if whether any seconday human remains searches are or may be necessary so that it may be determined whether the debris is staged or directly loaded and hauled to a disposal facility. EM has requested that DEC, DEP and themselves inspect the two possible staging locations, Randalls Island DPR lot being the primary, and the North end of the EDC South Brooklyn Marine Terminal being the secondary location. Staff has reached out to DEC Water Unit (Southwell) as per the Regional Director to facilitate the possible inspections with DEP and EM, if necessary. The debris will be hauled by private (and not city) contractors and there is currently no estimated time for when debris removal will start. Ongoing discussions of filter fabric use at the site for water filtration and hay bale use for water filtration at the disposal facilities are being held as well. Intial information is that the hay bales may be supplied by DEP and/or DPR. Another Debris Task Force meeting is scheduled for 4pm today. With respect to air monitoring, DEP will be performing monitoring at disposal facilities (if needed) and DEP and DOH have been conducting air monitoring (including asbestos) at the explosion site since yesterday. A thorough search of the PBS and Spills database of the site has been performed and no active tanks were registered at any of the collapse sites. PBS Registrations were however noted for both 125 Second Avenue and 41-43 7th Street and these buildings have been heavily impacted with smoke and water. PBS inspections and or tank tightness testing of these buildings may be necessary (pending discussion with RSE or RD) to ensure that the collapse did not compromise the integrity of the adjacent tank systems. Final Update from 3/27/15: There have been a total of three building collapses at the addresses of 119, 121 and 123 Second Avenue associated with the explosion. There are also 8 other building vacate orders issued by NYCDOB. NYPD, FDNY and EM continue to determine if any seconday human remains searches are or may be necessary which will determine whether the debris is staged at a transfer location for human remain searches or directly loaded/hauled to a disposal facility after being searched for human remains at the site. To ensure an effective waste stream, numerous agencies including DEC, DEP, EM and HPD are working together to plan for both direct load and haul of debris to a disposal facility (Cooper Tank and/or 110 Sand) and also taking the site to a transfer location (Randalls island and/or South Brooklyn Marine Terminal). With respect to the direct load and haul, DEC is reaching out to HPD's contractors disposal facility (Cooper Tank in Brooklyn) to walk

CON ED (Continued) **S117851663**

them through the approval process and determine if whether they are seeking an increase in storage capacity or an increase in throughput capacity. The secondary direct load and haul location (110 Sand in Long Island) that closes at 3pm was requested to contact DEC Region 1 (Syed Rahman) to request an increase in operational hours. As the debris containers have begun to be loaded and loading is expected to continue through the night, HPD will reach out to 110 Sand to have them contact Syed Rahman directly to ask if they can take debris to 110 Sand also through the night. With respect to possibly staging the debris at a transfer location for secondary inspection, NYEM noted that an inspection of the Randall's Island DPR facility was not necessary due to its prior use and approval by all agencies during the Park Avenue building collapse. Staff faciliated a site inpsection to the secondary transfer location at South Brooklyn Marine Terminal that included DEP, EM and DEC Division of Water Unit and it was agreed by all parties that this location would be acceptable as well. With respect to air monitoring, DEP will be performing monitoring at disposal facilities (if needed) and DEP and DOH have been conducting air monitoring (including asbestos) at the explosion site since yesterday. Staff has sent an email request to DEP for more information on the air monitoring including results, methods used and agencies that reviewed and approved the results (eg-NYCDOH). A thorough search of the PBS and Spills database of the site has been performed and no active tanks were registered at any of the collapse sites. PBS Registrations were however noted for both 125 Second Avenue and 41-43 7th Street and these buildings have been heavily impacted with smoke and water. After further discussion with the Regional Engineer and Regional Spill Engineeer it was determined that PBS inspections of these adjacent facilities are not warranted at this time. Daily Update from 3/28/15: On 3/27/15, debris removal and transport operations continued overnight including the transport of a reported nine containers to Allocco Recycling located in Brooklyn and one reported container taken to Cooper Tank also in Brooklyn. Cooper Tank reached capacity with the one additional container and could not accept more debris. On 3/27/15, The Site Management Plan (SMP) for the South Brooklyn Marine Terminal (SBMT) was submitted to, and approved by, the Regional Director as this site was still being considered as an option for waste transfer, if needed. Allocco Recycling was no longer able to accept debris due to the type of waste (eg. debris mixed with household hazardous waste and putrescibles) and the fact that they closed at 2pm on Saturday. On 3/28/15, upon learning that the disposal locations were no longer viable, the Regional Director reached out to Waste Management and Action Environmental for their possible assistance and facilitated a call between HPD and Gateway (agency and their contractor performing the debris removal). Action Environmental after additional facilitation by both the Regional Director and EOC DEC Staff was the selected disposal facility due to: proximal location in the south Bronx, ability to accept all types of waste associated with the collapse, 24 hour/7day a week capabilities, and available capacity to receive the waste. It was a later learned that Action Environmental closes every Saturday at 6pm and reopens every Sunday at 12pm and as such the 12-16 trucks that will be loaded over the night will be stored at either Gateway or the truck rental facility until they can be brought to Action tomorrow at 12pm for disposal (which was approved by the Regional Director during the 4:30 Debris Task Force teleconference). Human remains searches are being performed at the

CON ED (Continued) **S117851663**

site via removal of approximately 10 cubic yards of soil at a time, spreading it on Second Avenue and then placement into the container/trailer. It has been confirmed that for the majority of the debris, this will be the sole method of searching for remains. As the debris removal is expected to encounter the first floor and basement of 121 Second Avenue tomorrow where two missing persons were last seen, OCME, PD and FDNY requested that a separate area be used to store these materials for secondary human remain searches at a later date. EM, DEC, EDC and DEP agreed that SBMT was the best location due to increased security, privacy, capacity and having an approved SMP. The expected amount of debris taken to this location is 25 twenty cubic yard containers and it will be stored for up to a month. DEP is mobilizing a crew tonight to SDMT to vacuum, clear and protect the basins in expectation this debris will begin to arrive tomorrow. NYCOEM is also working on acquiring additional bales of hay for additional basin protection at the site. As of 4pm today, 250 cubic yards have been removed from the site. Removal and search operations will continue throughout the night. DEC EOC Staff has sent an email request to DEP for more information on the air monitoring including results, methods used and agencies that reviewed and approved the results (eg-NYCDOH) and had not yet received a response and will pursue the issue further. The next Debris Task Force teleconference will be tomorrow, Sunday at 10:30am. Regional Director attended Debris Task Force teleconference(s) on Sunday 3/29/15.
3/30/15-Vought-Participated in the 10:30am and 4:30pm teleconferences by EM and with all agencies. Two additional bodies were recovered overnight and one has been identified and the second is in the process of being identified. Second Avenue will be now open to bus traffic and steps are being taken (including the installation of jersey barriers and construction fences) to faciliate pedestrian traffic on the east side of Second Avenue. Four buildings still have vacate orders and two of these orders lifted resulting in recoccupation as soon as today. To date 46 trailers and 10 containers have been removed from the site for a total of 3,515 cubic yards. Approximately half of the total debris has been removed to date and debris removal operations will be supervised by HPD and will continue throughout tonight. Since 3/28/15, all debris has been taken to Action Carting in the Bronx and no debris has been taken to South Brooklyn Marine Terminal. An insurance company for one of the property owners has requested to inspect the debris and as some of it has already been taken to Action Carting, the request is being reviewed by the NYC Law Department. NYCDOH is posting additional information regarding concerns to air quality on their website. To date no response has been received from the request to DEP placed by the DEC at the EOC on 3/27/15 regarding methods, parameters and reviewing agencies of air sampling. Debris removal operations may shut down tomorrow at 7pm and restart the next day due to union constraints associated with the FDNY Bureau of Fire Investigation and this will be further evaluated by EM. DEC Spills Staff will attend the 10:30am and 4:30pm calls tomrrow as per the Regional Director.
3/31/15-Vought-Participated in the 10:30am teleconference held by NYC EM and with all agencies. NYCT buses have been now allowed on Second Avenue and debris removal continued throughout the night. Debris removal today, however, has been slowed as the removal operations are reaching the point where the suspect gas line was located and as such NYPD and FDNY Fire Marshall are performing additional investigation. To date 75 trailers and 20 containers have been removed from the site

CON ED (Continued) **S117851663**

for a total of 4,000 cubic yards. DEP will also soon cut water service to the collapse sites as all remaining debris is at or below street level. Debris removal operations may be suspended this coming weekend due to a holiday weekend (Easter) and known services associated with a nearby church. As the bodies of the two missing persons were located, the focus is changing from a search and recovery mode to an evidence collection and investigation mode . Spotters are, however, still on-site examining debris as it is being removed for any evidence of further unknown human remains. Two vacate orders remain for adjacent buildings and one partial vacate order in in place for an adjacent commercial location. DEC Spills staff will participate in the 4:30 conference call from the field and include in tomorrow's daily update. 3/31/15-Vought-Vought and Regional Director called in and due to limited number of parties, NYC EM cancelled call. 4/1/15-Vought-Missed call at 10am and 4:30 interagency was cancelled. Received forwarded Debris Task Force call at 10:30am notes from RD that noted Debris Task Force Call Notes April 1, 2015 10:30 AM. FDNY and PD are still conducting investigations. 180 cubic yards of debris has been removed from the site as of 0900. 4095 cubic yards have been removed from the site to the transfer facility. Approximately 45 to 55 percent remains. Debris operations: Friday operations will be suspended at 1600. Saturday operations will be from 0700 to 1600. Sunday operations for the day will be suspended. HPD is still looking into service schedules of nearby houses of worship which may change operation times. There will be no 4:30 debris call this afternoon. 4/2/14-Vought-Participated in 10am inter-agency call. Debris removal continues at a slower rate as the site is being considered a crime scene and they are also reaching the basement levels of the building where the gas connections lead into the former buildings. Another lane has been opened for vehicle traffic on Second Avenue for a total of two open lanes so far (other lane is for NYCT buses). Reception Center is being moved from Tompkins Square Library to Community Board 3. Six businesses remain closed and only one more missing pet is being looked for. Two complete vacate orders are still in place (for 125 Second Avenue and 41 East 7th Street). To date approximately 4,400 cubic yards of debris have been removed and taken to Action Carting in the Bronx. Excavations of debris are now at basement levels in all three collapse sites and approximately 66% of the total debris has been removed. Vought sent an email request on 3/27 to DEP at the EOC for methods, parameters and reviewing agencies for air monitoring data and received no reply. Vought sent a request for an update today to DEP and received a reply from DEP (with cc to DEP Commissioner Licata) that all results are negative . Vought will follow up with Regional Director on whether more specific information is necessary with respect to the East Village air monitoring or whether the request can be used as an example during the next EM-DEC meeting to discuss general response planning and communcations. The frequency of the twice per day inter-agency calls has been decreasing due to scaling back of operations and restoration of services. Vought discussed daily updates with Regional Director and she noted that they were no longer necessary and as such Vought to send this update as last update to all. Vought will continue to participate in inter-agency calls as requested by Regional Director, who may also be continuing to participate in Debris Task Force calls. 4/2/15-Vought-Sent email to DEP Thomas Votta that Tom, Any updates on the below email regarding the air monitoring at the East Village

CON ED (Continued) **S117851663**

Building collapse? The DEC is eagerly awaiting the information as there was a recent high level discussion between our Regional Director and EM Commissioner Esposito regarding air monitoring (including methods, parameters measured and agencies involved) during large scale events in New York City.Thanks. DEP Votta replied that effrey, I'm not sure I'm on vacation, but let me see what I can find out..Ryan find out for Jeffrey what's going on with the air samples. See below. DEP Votta forwarded email to DEC Fanklyn Crowley who sent email to DEP Commissioner Licata and DEC Carlstein Lutchmedial that Any updates on air quality . DEC Lutchmedial replied that All results are negative . Vought sent email to Regional Director with cc to DEC Austin, DEC Lieblich and DEC Flint that Venetia, As you can see our request for an update on the methods, parameters and reviewing agencies for the air monitoring data resulted in a reply from DEP below solely that All results are negative with a copy to DEP Commissioner Licata. As per our last meeting with EM Commissioner Esposito we noted that we would like to enhance our communication with all agencies regarding these measurements during large scale events in NYC. Two questions for you: Should I follow up to get more specific details for the air monitoring for the East Village building collapse, or is all results are negative acceptable for this incident? Should we use this as an example of difficulties associated with this topic during our next EM/DEC meeting? Thanks. The Regional Director then sent an email to Commissioner Licata that Reaching out to you as I don't recognize your staff members' names below. We're looking to understand what parameters DEP measured at the collapse site and if there is data you could share with us. Our interest is purely 'academic' and we wouldn't distribute it any further. Response from DEP staff is that all results are negative, which is of course good news, but we'd appreciate the detail! Thanks. Regional Director then received reply from DEP Commissioner Licata that Monitoring for asbestos since day one. We also monitored for CO and VOCs on first night. We monitored during firefighting and debris handling. We just cut back yesterday to (I think 5 from 10) monitoring sites. See attached, but also trying to post daily to website. Vought added air monitoring data to D2. 4/3/15-Vought-Forwarded air monitoring data to DEC Austin, DEC John, DEC Lieblich and DEC Flint with cc to RD. Spoke with DEC Austin and this spill closed as non-petroleum spill and no involvement of Spills Unit besides Vought on debris issues. 4/6/15-Vought-Continued to participate in 10am inter-agency calls. During call today following was noted: investigation by FDNY Fire Marshall and NYPD has begun as excavation has reached location of suspect gas line that caused explosin and collapse. Two lanes are still open on Second Avenue and site work will continue till 4pm. Electric service being restored to 125 Second Avenue and residents are being escorted for discrete time periods into 125 Second Avenue and 41 East 7th street so that they may have access to their personal possessions. Reception Center will be open at noon, 7 households are still in hotels and to date 93 tractor trailers of debris have been removed for a total of 4800 cubic yards. 4/7/15-Vought-10am inter-agency call. FNDY Fire Marshalls doing pressure check on gas lines with Con Edison which must occur before any further debris removal due to proximity of debris removal operations to gas lines. No other site activity occurred as such other than door repair to 125 Second Avenue and 41 East 7th Street. Reception Center will be scaled down after approval of Mayor's Office is provided and 5 households still in hotels. 4/8/15-Vought-Sent email request to RD that due to

CON ED (Continued) **S117851663**

upcoming vacation and reducing scope of work related to investigation and reducing debris, that Vought no longer participate in 10am calls and RD replied with approval to no longer participate and also to send email to EM Planning Section that DEC will no longer be on 10am inter-agency calls and they could reach out to her for any additional information."

Remarks: "DEC Regional Director and RSE received notification as part of an All Call from NYC Emergency Management(EM) that three buildings collapsed due to an explosion and fire. DEC Staff (Vought) requested to attend EM EOC as per Regional Director to faciliate debris disposal indoor air concerns and any potential petroleum issues."

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

NEW YORK UNIVERSITY - BROWN BUILDING (Continued) **1000136879**

Amount (Lbs): 25752

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 10543

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

FINDS:

Registry ID: 110000882493

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 241969
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

H08 - Tank Leak Detection - Weep holes in Vaults with no access for inspection
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
B05 - Tank External Protection - Jacketed
I05 - Overfill - Vent Whistle
G01 - Tank Secondary Containment - Diking (Aboveground)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)

Tank Location: 2
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 04/01/1953
Capacity Gallons: 1500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MRBARROW

FINDS:

Registry ID: 110069688056

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004530053

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CON EDISON (Continued) **1018277780**

EPA Region: 02
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 02/04/2015
Site name: CON EDISON
Classification: Small Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110067693954

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110069661887

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"7/7/14-Zhune spoke to Ray Lara from PTC. Ray said they emptied the tank and cleaned it and after they cleaned the tank they performed the tank system test and the test failed. They will do the isolation test. 9/25/14-Rene lewis from Alliance Mechanical Division sent the spill closure Report dated 9/23/14. The report stated that the board decides to go full gas instead of dual fuel, leading to decision to abandon the tank in place. Four hole were drilled in the bottom of the tank. Four soil samples were collected fromthe four holes and composite in two samples S1 and S2. The soil analytical results of the two samples indicate no VOCCs and no SVOCs detected. On 9/16/14-Rene Luis sent an email the email stated that the suction line and return line were complety aboveground lines and all but 4' of fill line is accesible. Entire vent line can be removed. Suction and Return has been removed and fill line filled with cement. Spill

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

CON EDISON SERVICE BOX: 43505 (Continued) **1016148992**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110067044772

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"09/17/15-Hiralkumar Patel. DEC Austin assigned this case on 06/24/15. alternate address: 39A E 1st Street no PBS record found. other spill # 9412743 was reported 12/22/1994 as 2 gal #2 fuel oil was spilled. case closed. 39 East 1 Realty LLC. **property owner** c/o Icon Realty Management 419 Lafayette Street, 5th Floor New York, NY 10003 Attn.: Terrence Lowenberg Ph. (212) 661-2700 email: terrence@iconrealtymgmt.com 09/18/15-Hiralkumar Patel. 10:05 AM:- visited site and met Arnold. site has one AST completely wrapped in cinder block/concrete. no signs of oil seepage noted from the weep holes in tank wrap. all lines run aboveground within building basement. the fill and vent line cross the concrete floor and run aboveground near northwest corner of the building. the active fill port is aboveground near the building wall. during visit, noted an abandoned fill port by the curb in northwest area of the site. Frank **building super** PH. (718) 913-1188 10:11 AM:- spoke with representative at ATS. as per their record, on-site building has 1,000 gal tank. there was no further work done at the site by ATS after initial test failure in Nov. 2012. 11:12 AM:- received message from Brett Gartenberg (646-362-8851). 11:47 AM:- spoke with Brett. informed him about the open spill case. he asked to send correspondence to Mr. Lowenberg. Brett Gartenberg JM Zoning 299 Broadway, Suite 1100 New York, NY 10007 Ph. (646) 362-8851 Fax (775) 628-3726 email: bgartenberg@jmzoning.com 12:08 PM:- sent letter to Mr. Lowenberg requiring submission of documents related to tank test failure investigation/cleanup by the end of 10/16/15. letter emailed to Mr. Lowenberg. 09/24/15-Hiralkumar Patel. 8:51 AM:- received call from Mr. Lowenberg. he has some documents related to the site and will email it. 9:27 AM:- received email from Brett including copy of tank test result dated 05/24/2013. PTC tested the tank system on 05/24/13 and it passed. no documents received regarding cause of the failure and actions taken. 1:44 PM:- left message for Mr. Lowenberg.

ABOVE GROUND TTF (Continued) **S112231298**

1:48 PM:- spoke with representative at PTC who confirmed that they only did tank system test on 05/24/13 and no other work was performed by PTC at the site. 1:58 PM:- sent email to Mr. Lowenberg and informed him to submit required documents as per letter dated 09/18/15. email copied to Brett. 3:17 PM:- received call from Mr. Lowenberg. he mentioned that the initial test on 11/12/2012 was conducted by a contractor working for potential buyer at that time. Mr. Lowneberg stated that the test in Nov. 2012 was inconclusive possibly due to vent pipe. he claimed that no repair work was performed on the tank system after failure report in Nov. 2012 and tank system was retested in 2013 when it passed. asked him when was the fill port at the curb was closed. he was not aware of the closed fill port at the curb. he will review files and call back. 11/03/15-Hiralkumar Patel. 2:38 PM:- sent email to Mr. Lowenberg and asked him to submit required report immediately. email copied to Brett and Melissa DiGiacomo (melissa@iconrealtymgmt.com). 11/17/15-Hiralkumar Patel. received email from Ms. DiGiacomo (at 12:36 PM on 11/09/15) including a letter with result of tank system test dated 05/24/13. in the letter, Mr. Lowenberg mentioned that Approved Oil inspected the tank system in Jan. 2013 and found leak in the tank system due to a failed vent port. Approved Oil replaced the vent and fill port on, or around 01/25/2013. after that, the tank system was retested on 05/24/13 and it was found tight. case closed based on available information. as per the tank system test result, the site has 1,500 gallon tank which requires to be registered. 2:37 PM:- sent email to Mr. Lowenberg including copy of PBS application and instructions. asked him to immediately register the 1,500 gallon tank system at the site. email copied to Melissa, Brett, Joey Goldzal (joey@jmzoning.com) and DEC Leszek. 2:44 PM:- sent spill closure letter to Mr. Lowenberg. letter emailed to Mr. Lowenberg, Melissa, Brett and Joey Goldzal. 2:45 PM:- received email from Mr. Lowneberg including copy of PBS certificate (# 2-329487)."

Remarks: "apartment building - failed tank test repair and retest"

DEC Memo:	"09/23/13-Hiralkumar Patel. alternate address: 584-590 Broadway, 116-122 Crosby Street PBS #: 2-605044. as per PBS record, the site has two 7,500 gal #6 oil ASTs in contact with soil. the tanks were installed in Feb. 1953. other spill # 0012623 was reported on 02/27/2001 due to 2 pint of unknown petroleum found in ConEd manhole at the site. case closed. 584 Broadway LLC. **property owner** c/o Olmstead Propoerties, Inc. 575 8th Avenue, Suite 2400 New York, NY 10018 Attn.: Cesar Vasquez **property manager** PH. (212) 334-8400 Ext. 12 NYC DOB permit approved on 08/22/13 for grade change from #6 to #2 oil. 10:40 AM:- spoke with Mark at PTC. they are working as sub-contractor. Mark mentioned that the tanks are aboveground and possibly sitting on floor. PTC will pump out tanks on 10/04/13. 12:27 PM:- received call from Tom, building super. informed him that the department requires isolation test of the system. Tom mentioned that both tanks are covered with cinder blocks. Tom Krasniqi **building super** Ph. (212) 334-8400 Ext. 23 Fax (212)925-4353 email: tkrasniqi@olmsteadinc.com 10/10/13-Hiralkumar Patel. 4:00 PM:- visited site. its 12 story commercial building, with two level basement. met Tom, building super. inspected tanks located in sub-basement of the site. PTC crew was on-site, cleaning tank's interior. the two 7,500 gal tanks are located aboveground, completely wrapped in cinder blocks. no petroleum odors were noted in building, other than tank room where crew was working. Tom mentioned that isolation test will be done. 4:26 PM:- spoke with Mr. Vasquez. as tanks were installed in 1953 and not visible for inspection, strongly suggested him to remove these tanks and install a new tank completely aboveground. 10/15/13-Hiralkumar Patel. 10:35 AM:- received email from Tom. he mentioned that both tanks were tested and found tight. a small leak was found on the vent line for Tank #1 and a coupling needs to be replaced on the oil line. repair work has been scheduled for tomorrow. 12:39 PM:- sent email to Tom. informed him that both tank systems mus be retested after repairs and results must be submitted for review. email copied to Mr. Vasquez. 12/11/13-Hiralkumar Patel. 4:05 PM:- left message for Tom. 4:06 PM:-

OLMSTEAD PROPERTIES, LLC. (Continued) **S107783925**

sent email to Tom inquiring about tank system test results. email copied to Mr. Vasquez. 12/12/13-Hiralkumar Patel. 10:04 AM:- spoke with PTC desk person. she mentioned that after tanks cleaning, both tank only passed. during retesting of tank systems, they found issue with vent and fill line on tank 1 and fill line on tank 2. building management did required repair and both tank systems were tested on 10/23/13, when it passed. tank test results will be submitted for review. 10:11 AM:- spoke with Mr. Vasquez. he mentioned that corrsion found on fill and vent line. they changed both fill and vent lines under the sidewalk and installed new lines in same location. he confirmed that no contamination was found. asked him to submit a report confirming this. he will talk to contractor who performed line work. 10:15 AM:- received email from PTC including tank system test results. both tank systems were tested on 10/23/13 and passed. 12/13/13-Hiralkumar Patel. 3:07 PM:- received email from Anthony Fischetti or Champion Combustion including a letter report. Anthony mentioned that they replaced both fill and vent lines and tested. 12/16/13-Hiralkumar Patel. 11:01 AM:- sent email to Anthony and asked to submit document confirming condition of subsurface soil where fill and vent lines were located. 12/17/13-Hiralkumar Patel. received email from Anthony (at 5:42 PM on 12/16/13). he stated that the sidewalk where the fill and vent are located is vaulted and the underside of the sidewalk is the basement of the building. he confirmed that all piping are visible from beneath. based on available information and documents, case closed."

(212) 328-5539 email: mprovidente@rosenyc.com 12:36 PM:- left message for Matthew Providente, authorized representative listed in PBS. 09/02/14-Hiralkumar Patel. 1:30 PM:- spoke with Ray at PTC. he mentioned that no further work done by PTC at the site. he asked to contact George at Efficient Combustion. 1:33 PM:- spoke with Geore at Efficient Combustion. he mentioned that leak was found in vent line. asked him to submit documents including cause of failure, cleanup of any petroleum release and result of system retest. George Efficient Combustion PH. (516) 795-5828 09/29/14-Hiralkumar Patel. 2:29 PM:- left message for George. 11/12/14-Hiralkumar Patel. 1:46 PM:- left message for Mr. Hollweg, property manager. 60 East 9th Street Owners Corp. **property owner** c/o Rose Associates, Inc. 200 Madison Avenue, 5th Floor New York, NY 10016 Attn.: David Von Hollweg **property manager** Ph. (212) 210-6666/6686 email: dvonhollweg@rosenyc.com 1:55 PM:- sent TTF letter to Mr. Hollweg requiring report submission by the end of 12/31/14. letter emailed to Mr. Hollweg. 11/14/14 - Austin - Received call from Jennifer Armstrong of Langon Engineering (212-479-5537). She indicated that Langon has been retained by the building owners to investigate the soil contamination from this tank test failure, and she wanted to know the process for getting our assistance in getting street and subway access permits for the boringsings (work would adjoin a subway, and one of the points wouldbe in a tree well, which would need NYC Parks approval...?). Referred her to NYCT and NYCDOT. I told her she needs to speak with the tank tester to get a better idea as to what the tank test showed, to assure this was not a dry leak . She replied that she was told that there is some evidence of oil seepage, no further info given. Informed her that any such investigatory work would need the approval from DEC before proceeding. Gave her the DEC project manager's name (Kumar Patel) and his direct phone #. - end 12/01/14-Hiralkumar Patel. 3:25 PM:- received message from Mike Burke from Langan Engineering. Mike Burke Langan Engineering Ph. (212) 479-5413 Jennifer Armstrong Langan Engineering PH. (212) 479-5537 12/02/14-Hiralkumar Patel. 8:16 AM:- left message for Jennifer at Langan. 8:43 AM:- received call from Mike and Jennifer from Langan. after grade conversion from #6 to #4 oil, an oil seepage was noted from area where the remote fill line enters the basement. currently, the leaking remote fill line is out of service. Langan is planning to open the sidewalk for removal of leaking fill line and any associated contamination. besides NYC DOT, they need permit from MTA (a subway line within 100 ft) and NYC Parks (remote fill port near a tree well). Mike will send email with work plan and schedule. 12/04/14-Hiralkumar Patel. received message from Jennifer (at 5:05 PM on 12/03/14). 9:44 AM:- spoke with Jennifer. she mentioned that the building needs an oil delivery and they are planning to install a new fill line near the building foundation wall, in area where the existing leaking fill line is located. owner is planning to remove sidewalk flags near the building wall for fill line installation. informed Jennifer that the Department requires a document, from the contractor, confirming condition of subsurface soil in the proposed excavation area, including color photographs of the excavation. informed her that any contamination must be removed/remediated. she mentioned that a permit package will be submitted to MTA today and to NYCDOT in near future. 12/12/14-Hiralkumar Patel. 2:58 PM:- received email from Jennifer including remediation work plan. Langan proposed to excavate and remove the leaking fill line and associated

BASEMENT (Continued) **S102560153**

contamination, and to collect endpoint samples. they have submitted plans to MTA on 12/10/14 and waiting for response. 12/22/14-Hiralkumar Patel. received email from Jennifer (at 4:44 PM on 12/19/14) requesting deadline extension for report submission as approvals needed from various agencies. 12/26/14-Hiralkumar Patel. 1:28 PM:- left message for (and sent email to) Jennifer and asked her to call back to discuss deadline extension. 12/29/14-Hiralkumar Patel. 1:44 PM:- received call from Jennifer. they are waiting for approval from MTA and then submit permit application to NYC DOT. she believes that field work can begin in Feb. 2015. as the leaking line is not in use and requires approval from multiple agencies, approved Jennifer's request to submit report by the end of 03/13/15. 01/21/15-Hiralkumar Patel. 11:55 AM:- received email from Jennifer. they got OK from MTA and DOT. now they will apply permit application to NYC Parks. 02/04/15-Hiralkumar Patel. 1:28 PM:- received email from Jennifer. contractor has submitted permit application to NYC Parks. 03/26/15-Hiralkumar Patel. 12:09 PM:- received email from Jennifer. they received permit from parks dept. they are planning to start excavation on 04/06/15. Jennifer requested time extention to end of April for report submission. 04/10/15-Hiralkumar Patel. 3:02 PM:- spoke with Jennifer. she mentioned that contractor has set up temporary pedestrian walkway today and will start soil excavation on 04/13/15. 04/14/15-Hiralkumar Patel. 10:36 AM:- received message from Jennifer. they finished excavation yesterday and has collected endpoint samples. she mentioned that the excavation was about 4 ft deep. 09/08/15-Hiralkumar Patel. 12:13 PM:- received email from Jennifer including link to cleanup report. - the leaking fill line was replaced - petroleum impacted soil was first observed approx. 18 inches below sidewalk grade adjacent to the building wall - impacts visibly extended to a depth of about 44 inches bg and upto approx. 24 inches away from the building - 0.9 tons of impacted soil was removed - four endpoint samples were collected: three from sidewalls (east, west and south) and one from bottom - north sidewall of the excavation was the building wall - no contamination noted in endpoint samples 09/10/15-Hiralkumar Patel. 1:30 PM:- sent email to Mr. Hollweg and asked him to submit immediately a letter confirming cause of initial test failure and result of tank system retest. email copied to Jennifer and Mike at Langan. 09/15/15-Hiralkumar Patel. received email from Jennifer (at 12:47 PM on 09/14/15) including result of tightness test of the newly installed fill line. the line was found tight during test on 04/14/15. 09/16/15-Hiralkumar Patel. 10:22 AM:- received message from Mike. 10:28 AM:- spoke with Mike. he mentioned that the tank system is aboveground, except portion of fill line and vent line. he inspected the site and had not observed any leak from tank bottom or supply/return/vent lines. the fill line was recently replaced and tested tight. he will submit revised report. 09/17/15-Hiralkumar Patel. 8:08 AM:- received email from Jennifer including link to revised report. case closed based on available information. 11:12 AM:- sent spill closure letter to Mr. Hollweg. letter emailed to Mr. Hollweg and Jennifer."

DEC Memo:	"7/13/15 TJD File review. Spill reassigned from AH Primary (Ahmed) to AH Secondary (DeMeo). 12/18/15 TJD File review. ABC Tank has submitted closure report stating: " A tank tightness test was performed by others on (1) 1080 gallon aboveground vaulted fuel oil storage tank. The tank did not PASS the test and NYSDEC Spill Case #1501578 was assigned to this site. " ABC Tank observed a precut on top of the tank that would cause the tank to fail a test. ABC Tank pumped out & cleaned the interior of the tank. All lines were disconnected from the top of the tank. Upon completion of the job, ABC Tank welded the pre-existing precut closed " ABC Tank performed a pressure test on the isolated (1) I 080 gallon tank. The tank was able to hold the pressure for more than 24 hours. " ABC Tank performed a pressure test on each lines. All lines, except the vent line, were able to hold the pressure. " ABC Tank tightened the vent line and performed a second pressure test on the line. The vent line was able to hold the pressure. " ABC Tank reconnected all the lines back to the top of the tank. A tightness test was performed on (I) 1080 gallon tank & tank system. The tank & system were deemed a PASS. A copy of the tightness test is attached for your review. Based upon above, initial tightness test failure was a dry leak. Repairs were made and system passed a subsequent test (report included with closure documentation). No further action is required. All documentation uploaded to DECDOCS. Spill closed."
Remarks:	"Basement contained tank failed test. Investigate, repair and retest being planned."

DEC Memo:	"Site remediation for this spill has been consolidated under spill no. 88-03871. See also spill nos. 81-01485, 88-09786, 00-00286, 02-06308, 02-06369, and 04-08460. SEE PIN FILE SP1596.701 for additional information. 3/13/2000: DEC sent Stipulation Agreement for cleanup. Spill Reassigned from O'Dowd to Sigona in March 2000. (Sigona) 2/11/2003: Order On Consent No. D2-5001-02-12 is executed - Spill Nos. 81-01485, 88-03871, 88-09786, 00-00286, 02-06308 & 02-06369 & State Funded Project Identification No. 01596 - Former ExxonMobil S/S, 37-61 West Houston Street, New York, N.Y. Petroleum Bulk Storage (PBS) facility No. 02-157945 (the Site). (Sigona) 3/31/2003: DEC received Geologic Services Corporation (GSC) Supplemental Community Air Monitoring Plan (SCAMP) to address potential petroleum vapors and dust from impacting the adjoining properties, including, but not limited to, Via Verde Art School for Children, located at 143 Greene Street #3, New York, N.Y. (Sigona) 4/1/2003: The DEC along with the New York State Department of

FORMER MOBIL S/S#17-KHB (Continued) **S104513528**

Health's Bureau of Toxic Substance Assessment (NYS DOH) have determined that the SCAMP provided by GSC is acceptable provided that conditions, which were outlined in a letter to ExxonMobil dated April 1, 2003, are met. (Sigona) 4/23/2004: Site was transferred from Rommel (Region 2) to Harrington (Central Office) for management. (Harrington) 5/25/2004: PM conducted a site visit. Construction of on-site building continues. (Harrington) 2/4/2005: Sent letter to Exxon Mobil requesting indoor air sampling in the basement of 152 Wooster Street. (Harrington) 7/14/2005: PM conducted a site visit with Exxon Mobil personnel and their consultant (GSC). Additional investigation along Greene Street and in the parking lot @ 146 Wooster Street to be completed before remedy selection. (Harrington) 9/27/2005: Access is granted to the 146 Wooster Street parking lot. GSC will be installing an additional monitoring well in the eastern end of this parking lot before the end of the year. (Harrington) 11/16/2005: The location for the proposed monitoring well in the 146 Wooster Street parking lot has been approved. (Harrington) 1/31/2006: The chemical inventory and preliminary interview for 152 Wooster Street has been scheduled with the building's president (board of directors, 152 Wooster Street Corp.) for February 1, 2006 @ 6PM. Indoor air sampling will be conducted primarily in the basement, and will be conducted on February 1, 2006 @ 9AM. (Harrington) 2/6/2006: Sent letter to Exxon Mobil approving request to discontinue bi-weekly LPH gauging and bailing at monitoring well GMW-15 located in the basement of 152 Wooster Street (bldg. immediately south of site). Free product in well GMW-15 has not been observed since March 16, 2005. Well will continue to be gauged and sampled as part of bi-monthly groundwater sampling events for the site. Accordingly, spill no. 04-08460 has been closed. (Harrington) 2/26/2006: Approved off-site SI report and supplemental off-site SI work plan. Two (2) additional wells will be installed in northwest corner of site. Monthly EFR events to commence in order to reduce dissolved levels of BTEX in groundwater. Sent letter for NYCDOT road-opening permits. (Harrington) 5/16/2006: Approved Indoor Air Quality Investigation Report for the work done at 152 Wooster Street. No further investigatory work regarding indoor air quality will be required at this location. (Harrington) 8/16/2006: Approved the revised RAP. RAP calls for the usage of chem-ox technology in order to address the dissolved BTEX beneath the on-site buildings. (Harrington) 8/31/2006: Sent an e-mail to Exxon Mobil approving the sensitive receptor survey report. (Harrington) 2/6/2007: Project transferred from Harrington to Smith (central office) for management. (Smith) 4/18/2007: Performed site visit. One round of chemical oxidation injection was performed. However, due to exhaust fumes from the equipment a tenant of the 152 Wooster Street requested that work be stopped. These concerns will need to be addressed before work will be allowed to continue. (Smith) 7/20/2007: Second round of chemical oxidation performed. Tenents concerns addressed by moving truck and equipment as far away from building as possible (onto West Houston Street). No complaints from residents during this work. (Smith) 7/24/2007: Project transferred from Smith to Harrington (central office) for management. (Harrington) 8/3/2007: PM visited the site with Kleinfelder personnel (Mooney, Meyerhoefer). Follow-up groundwater sampling for the 2nd round of chem-ox injections will be conducted shortly. Work was delayed due to road-opening permit issues with NYCDOT. (Harrington) 3/25/2008: PM sent e-mail to Exxon Mobil approving the Supplemental Off-Site SI Report, the Remedial Activity Summary Report documenting

FORMER MOBIL S/S#17-KHB (Continued) **S104513528**

the results of the 3rd round of chem-ox injections, and the latest quarterly report (October - December 2007). Access issues between Exxon Mobil and the residents of 152 Wooster Street have been brought to the attention of DEC legal counsel. (Harrington) 7/17/2008: PM sent e-mail to Exxon Mobil approving quarterly report for January - March 2008. E-mail required an update regarding negotiations between Exxon Mobil and 152 Wooster Street Corporation, as the 4th round of chem-ox injections has been delayed since June 24th due to another round of access issues. (Harrington) 12/4/08 - Haggerty: Assumed management from Dave Harrington 3/27/09 - Haggerty: approved Remedial Activities Summary Report prepared by Groundwater & Environmental Services (GES). GES provides technical services for Kleinfelder with ChemOx. This was Phase IV out of V phases detailed in the RAP and Consent Order. 11/11/08 - 11/13/08 Hydrogen Peroxide and Sodium Persulfate were injected. High BTEX concentrations (greater than 40ppm) remain in groundwater. It appears the ChemOx is remediating the groundwater but not the adsorbed contamination preventing the dissolved BTEX concentrations from decreasing. The last Phase of ChemOx is scheduled for June. After the last round, we will re-evaluate the technology and try to come up with a more effective remedy. Possibly surfactant enhanced ChemOx June 2009 - Phase V of chemOx injection completed in June September 2009 - Groundwater still heavily contaminated after 5 injection events. Up to 40ppm of BTEX in groundwater. PM sent email to Charles Kolb, Exxon PM, to have a conference call. Consent Order called for 5 injection events which are now exhausted. It appears the groundwater surrounding the injection wells is being remediated, but contaminants adsorbed to the soil particles remain. Drilling is this area is very difficult downtown Manhattan. April 2010 - PM met with Kevin Hale to discuss project. Kevin Hale, PM, EM, Kleinfelder had a conference call on 2/18/10. EM will be submitting a work plan by the end of April 10. EM requested a month extension. Due date May 19 May 2010 - Revised RAP under review July 2010 - Approved RRAP with some modifications. Site conditions limit what is possible. Site is now 7 story building so we have to design a remedial approach based on the current wells, Injection points under the building. We will extract groundwater at the site in conjunction with vapor extraction. Based on the contruction of all wells, vapor extraction of the unsaturated zone is possible and while the grondwater is depressed the heavily contaminated smear zone will be exposed allowing for vapor extraction of the saturated zone February 2011 - Feasability Report due next month March 2011 - Permitting issues delayed HIT events and gw sampling so Feasibility Report has been pushed back May 2011 - Feasibility Report due in end of June June - Feabibility Report under review July 2011 - Approved Feasibility Report. Based on the results, PM required a 5 consecutive day HIT event. Based on that result, future HIT events will be scheduled accordingly August 2011 - 5 day HIT event completed December 2011 - Feasibility Study Report of review January 2012 - VTE events successful in reducing contaminant mass in the unsaturated zone to a point where GES is going to begin additional rounds of ChemOx, most likely persulfate February 2012 - GES now EM's consultant. RAP for sodium persulfate injections due 3/31/12 April 2012 - Approved RAP, already has a CO December 2012 - GES planning an additional injection once the holiday embargo is over May 2013 - Waiting on groundwater data to determine the success of the additional injection October 2013 - a spike in dissolved concentration in one well at 27,000ppb total BTEX. Agreed to wait

FORMER MOBIL S/S#17-KHB (Continued) **S104513528**

until the next groundwater data set comes in before making a decision as to whether additional injections are required June 18-19, 2014 - additional hydrogen peroxide/ sodium persulfate/ air sparge/ SVE event conducted. ISCO injected directly into monitoring wells, rather than only into inject wells, to address areas of the groundwater impact. June 1, 2015 - Spill closed. ExxonMobil remediated contamination to the extent feasible. A multi-story residential building was built across the entire property in the early 2000's which limited ExxonMobil's consultant GES to fully remediate impact to the site. Under a consent order, the remedy included SVE events and 8 separate ISCO (hydrogen peroxide and sodium persulfate with chelated iron) injection events from 2006-2014. All on-site injection wells and monitoring wells (used for SVE) were installed before the building foundation and piped to a vault in the adjacent sidewalk. As of the last SVE data collected in June 2014, very little to no vapor mass was collected from the unsaturated zone confirming the remaining soil contamination resided in the smear zone. The Department beleives that further injections would have a minimal impact on the remaining groundwater contamination at this point. It appears that adsorbed contamination in the smear zone is the source of the remaining groundwater contamination and given the physical constraints of the property, the inability to access these limited pockets of remaining soil contamination makes further remediation unfeasible."

Remarks: "LINE TEST FAILURE, LINE WAS CAPPED OFF; GAS SERVICE MAINTENANCE DID TEST."

DEC Memo:	"tank had a fiberglass patch on it and during an overfill approx 1 cup of oil spilled. PTC removed the cement wrap around the tank, removed the fiberglass patch and welded a metal patch into place. The tank is now being re-wrapped in cement. Minor spill was cleaned up. There was a stain on the floor and PTC said the owner wanted over kill so part of the floor was pulled up."
Remarks:	"2500 GALLON TANK- WAS FIBERGLASSED CLOSED ON TOP AND IS LEAKING: IT IS CEMENTED : THEY HAVE REMOVED CEMENT AND ONLY 1 55 GALLON DRUM WAS TAKEN FULL OF CONTAMINATED SOIL AND IS ALL CLEANED U P"

DEC Memo:	"4/4/05 Sawyer noted on fax report that PTC responded, 2 bags of speedy dry, 1 gallon///Tipple updating database//// Tipple called property owner Mike at 908-355-9270, his supers are currently on vacation, he has had no complaints of odors, the Supers will contact DEC once they return from vacation.... 10/27/05 - Raphael Ketani. I wanted to close out the case, but there were no notes indicating that the spill had been cleaned up - despite 1 gal. being listed above. I called up Diana Parker at PTC ((718) 624-4842) and she told me that the total cost of the spill cleanup was $15,000. She said oil spilled onto the floor of the building and 30 drums of material were taken away. She said Bridge Transportation did the removal of the drummed material and PTC did the cleanup and took end point samples. I asked

61 EAST 7TH ST (Continued) **S104503153**

Ms. Parker for the documents verifying the cleanup. She said she would FAX them to me by next week. 1/5/06 - Raphael Ketani. I called up Ms. Parker again and told her to send me the cleanup documentation as I had previously requested. She said she would FAX it. I received the FAXed documentation regarding soil removal and site cleanup. Based upon the documentation, I am closing the case."

SPILL NUMBER 0004317 (Continued) **S104781859**

SANGESLAND 7/29/2003 Sent out old TTF ltr 1/23/2004 Sangesland received a copy of a letter from ProTest (John Leddy) dated Aug 20, 2003. Letter states that the tank failed because of a non-tight manhole cover and pinholes at the top of the tank. According to Protest the tank was in a vault, PTC pumped out the tank and then the tank was cut up by Cardinal Tank. No sign of contamination was found. A new 3,000 gal tank was installed in the vault. There was no contaminated soil for disposal. Unfortunately there are no records of the PTC cleaning or the scrap disposal records. Spill Closed"

DEC Memo:	"08/17/2006-Vought-Spill assigned to DEC Vought due to previous involvement with case (see spill #0604292). Vought received call from Ed Townsend(Environmental Management Solutions) (914-762-6333) that tank and fill line failed test and that isolate and retest will be performed possibly by 5/25/06. 08/29/06-Vought. Received message from

APARTMENT BUILDING (Continued) **S108131252**

Townsend that fill pipe failed test and that he will be replacing fill line. Vought returned call and Townsend will be faxing in failed tank test results and will be removing fill line and taking soil endpoints. 09/06/06-Vought-Received fax from Townsend. Tank Test Results (Advanced Testing Services-Mark Ricciardi)-8/15/06. Tank test showing failing of one (10000-gallon) #4 fuel oil UST tested via EZY3 Locator Plus test. Test results show dry portion leak (ullage).
Letter from ATS Ricciardi to Ed Townsend-8/16/06. The evaluation showed that a leak exists in the underground storage tank system that exceeds EPA and NYDEC standards for leak detection... We recommend that the responsible party isolate the tank from the piping by uncovering the top of the tank and removing the vent and product lines from the system . 09/06/06-Vought-Called Townsend and required that he contact DEC for site visit during excavation of fill line.
Tank Test Results (Advanced Testing Services-Mark Ricciardi)-8/25/06. Tank test showing tight tank. Letter from ATS Ricciardi to Ed Townsend-8/28/06. Advanced Tank Services Co. certifies that the 10,000 gallon underground #4 oil storage tank and distribution lines located at 85 4th Avenue did not contain any detectable leaks .
Letter from Ed Townsend to DEC Vought-8/3/06. This letter serves as an update to the activities surrounding the 10000-gallon #4 fuel oil tank... Subsequently the tank and fill pipe were tested separately on 8/25/06 at which point it was determined that it was the fill pipe that caused the tank failure on 8/16/06. Oil deliveries were ceased based on the tank failure . ...we have informed Jardan Property Management) that the fill pipe will have to be replaced as soon as possible. During replacement of the fill pipe, located under the sidewalk on 85th Street, soils directly adjacent to the fill pipe will be screened with a PID and soil samples will be taken and analyzed... 09/06/06-Vought-Called Townsend and required that he contact DEC for site visit during excavation of fill line. Townsend mentioned that they were looking for plumber to replace fill line and he will contact Vought as soon as date is set up.
12/12/06-Vought-Called Townsend for update and he is no longer working for realty. 12/13/06-Received call from Bob Friedl (Environmental Management Solutions 914-762-6333x16) and his cell is 914-906-4157. Vought called Friedl and left message to return call. Vought spoke to Friedl and sidewalked was opened and fill line was removed and quater size hole in fittings. Three drums of soil were excavated and fill pipe was replaced. New system passed tightness test. Unsure if endpoint samples were collected. Contamination did extend to a depth of 4 below grade at building. DEC will receive report by 12/22. Vought requested site plan with point of intrusion into NYCTA exit and fill port on same plan. 8/06/10 - Raphael Ketani. The PBS is #2-292192. There is one 10,000 gal. tank with #6 oil. The mail goes to Jardan Management Corp., 670 White Plains Road, #305, Scarsdale, NY, 10583. The contact is Robert Weiss at (914) 722-4400. The owner is 85 Fourth Partnership, c/o Jardan Management. I found only a FAX of the tank testing documentation package in the file and put it in the E-docs. I spoke to Mr. Friedl. He said that the spill was cleaned up in 2006. He said that the only problem was the leaking fill pipe. He added that they removed the old fill pipe and a bunch of soil, backfilled with fresh soil, and replaced the fill pipe. I asked him whether the oil had made its way into the NYCTA exit. He said that this was a report by the NYCTA that they had oil in their system, but the location of the oil was over 100 feet away. He added that the soil contamination below the fill pipe went down no more

APARTMENT BUILDING (Continued) **S108131252**

than a foot. I asked Mr. Friedo to send me the cleanup report for the site. He said that he will. 11/22/10 - Raphael Ketani. I spoke to Bob Friedl of Environmental Management Solutions (914)762-6333, ext 16/ cell (914) 906-4157 about the cleanup report. He said that he forgot to send it. However, he took my e-mail address and he said that he would send it shortly. 2/22/11 - Raphael Ketani. I tried to contact Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157, but I could only leave voice mail messages requesting the cleanup report. 2/24/11 - Raphael Ketani. I made contact with Mr. Friedl. I asked him where the cleanup report was. He said that it was in the archives in the basement. I asked him whether there was a problem getting the report. He said No, but that he just hadn't gotten around to it. I told him that if the DEC doesn't receive the report, then the spill will remain open. Then, if his client wants to do a refinance of the mortgage or get a loan, they will have trouble. Mr. Friedl said that he will get me the document. 5/25/11 - Raphael Ketani. I contacted Mr. Friedl regarding sending the DEC the cleanup report. I told him that we last talked in the latter part of March of this year about the need for the report. I told him that last March was the fourth time I had asked for it. Mr. Friedl sounded surprised. He apologized and said that he will dig it out and send it to me, but that he was extremely busy at work. So he needed me to remind him this wednesday. I said that I will call him. 6/1/11 - Raphael Ketani. I tried to reach Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157, but he was out in the field. I did contact him via his cell phone. He said that Mr. Pedone - one of the owners of Environmental Management Solutions - had contacted him regarding the cleanup report. Mr. Friedl said that he will be back in his office in an hour and will call me today. Mr. Friedl called me back. We discussed the spill, the fill pipe replacement and the soil excavation that took place on 12/13/06. Mr. Friedl commented that now that he knew when the work had been completed, he had a better idea of where to look in the hard files for the cleanup report. He said that I should call him tomorrow to see whether he found the report. 6/10/11 - Raphael Ketani. I spoke to Mr. Friedl about whether he had found the missing reports. He said that he had found several reports for the site from 2006 and 2009. They were behind a filing cabinet. The cabinet will be moved and the reports retrieved. He asked that I call him monday regarding the reports. I told him that I will and to have someone scan the reports and send them to the DEC. He said that this will be done. 6/14/11 - Raphael Ketani. I talked to Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157. He said that he was downstairs going through the file cabinets and the reports for the site. I told him to send me the documents as soon as possible. 6/21/11 - Raphael Ketani. I contacted Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157. He said that he was still pulling files. I asked him when the DEC will receive the cleanup report. He said to give him more time. He added that he wanted to resolve this case, too. As the cleanup report has not been forthcoming, I sent a strongly worded letter to the property manager Rabina Properties, 670 White Plains Road, Scarsdale, NY, 10583, and to 85 Fourth Avenue Corp., itself. The latest name for the property is 85 Fourth Avenue Corporation and the block and lot are 556 and 1. I set a deadline of July 8 for receipt of the cleanup report. 6/22/11 - Raphael Ketani. Mr. Friedl tried to return my call, but I was out of the office. 6/27/11 - Raphael Ketani. Rob Weiss and Oein (Owen) Fitzgerald (914) 722-4400/cell (914) 649-7764 called on a conference call. They were responding to the DEC 6/21/11 letter. They said that

APARTMENT BUILDING (Continued) **S108131252**

they were surprised that the DEC has been trying to obtain the cleanup report for so long. They had no idea that the spill case was still open. They said that they will contact Mr. Friedl and either get the report from him or arrange to have a new investigation performed. Mr. Weiss added that if they find out that the report doesn't exist, then they will ask for an extension of the deadline so that they have enough time to do the investigation and submit a new report. I told them that sounded reasonable. Later, Mr. Weiss sent me an e-mail that the report can not be located. So, a new investigation will be conducted this week. The report will be submitted to the DEC in 2 or 3 weeks. I wrote back that this sounded reasonable. 7/1/11 - Raphael Ketani. Mr. Friedl of Environmental Management Solutions (914)762-6333, ext 16/ cell (914) 906-4157 called today. He said that soil samples were taken today and were sent off to the laboratory for analysis. He expected to receive the results sometime next week. 7/11/11 - Raphael Ketani. Mr. Weiss sent me the 7/7/11 Enviornmental Management Solutions soil sampling data report. I reviewed it and found that the results were almost entirely non-detect. The few analytes that had hits were very close to non-detect. Mr. Weiss requested an NFA letter and I sent him one. As the results in the 7/7/11 report indicated that there was almost no contamination in the vicinity of the fill pipe, I determined that there was no threat to the public or the environment. Therefore, I closed the spill case."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN SEE ALSO SPILL NUMBERS 9611157 AND 9611309. PIN JOB. tOMASELLO 5/9/2000 9/02 DEC/AG's office settled the case and have gotten a stip signed and costs recovered for this spill as well as 96-11309. The responsible parties have contracted with environmental firms to complete the remedial activities. 5/18/04 - AUSTIN -TRANSFERRED FROM TOMASELLO - CONSOLIDATED WITH SPILL # 9611309, WHICH IS A STATE FUNDED CLEANUP - END 1/12/05 Tipple reopened in Tipple's name///stipulation and cleanup ongoing with RP at 103 East 10th Street See also spill #9807065 9/16/05 - Raphael Ketani. The May 11, 2005 to August 24, 2005 Project Status Report was received on September 14, 2005 and is under review. I finished my review of the Project Status Report and I will send a letter to John Iannnone at Day Engineering ((212) 986-8645) and to 3/10 Tenants Housing Corporation instructing them to proceed with the manual monitoring and product collection for the present monitoring period. Then, if warranated, they can change their methodolgy for the foreseeable future to using absorbent socks in the two wells, MW-23 and MW-29. 10/20/05 - Raphael Ketani. I called John Iannone (i-a-known) at Day Engineering, but I could not reach him. I left a voice message regarding the submission of a report about the use of the absorbent socks in W23 and W29. 10/21/05 - Raphael Ketani. I received a call from John Iannone regarding the site. He said that W23 is in the sidewalk next to the building and is a 4 inch diameter screened well. He said that is has maybe 1/4 inch of product which is being removed manually. W29, he said, is in the back of a basement and was pounded into rubble below the basement. He said that product is present sporadically in this well. Mr. Iannone added that you can have nothing in the well one month, and two months later you will find 2 inches of product. He thinks the rain has something to do with the appearance of the oil. He has an environmental specialist from a consulting company coming over every so often to recover the product. She spends a couple of hours each time. He thinks that, at this time, manual recovery is the way to go. I told him to send me a letter regarding what had been spilled, what has been recovered so far, and what he would like to do (some sort of plan) regarding manual collection and the use of absorbent socks. He said he would get the letter out to me soon. 11/21/05 - Raphael Ketani. I received Mr. Iannone's letter dated 11/18/05, stating that he will request a closure of the spill case in 3 or 4 months if measureable amounts of

103 EAST 10TH STREET (Continued) **S104620874**

product are not seen in the wells. 4/25/06 - Raphael Ketani. I received a progress report from John Iannone of Day Engineering. The report stated that the product thickness jumped up to as much as 2.82' after several months of product thickness measurements which were below 0.1'. He said that he will keep monitoring and collecting the oil. 4/28/06 - Raphael Ketani. I received a letter dated April 21, 2006 from Stephen DeNardo of AJClarke Real Estate Corp. ((212) 541-4477). Mr. DeNardo stated that he received a violation from the NYFD for the site for having unregistered holding tanks. He asked that DEC inform the NYFD that registration is not necessary. I left a message for Mr. DeNardo that he has to discuss the issue with the NYC Dept. of Buildings. 5/15/06 - Raphael Ketani. Mr. Koon Tang of the Div. of Environmental Remediation, Region 2, came over to me today and asked whether I can straighten out the issue of Mr. DeNardo getting repeated violations for tanks on his property at 107 E. 10 Street that are really for the building next door at 103 E. 10 Street. I talked to Mr. DeNardo and he said there are 2 tanks with DEC emblems on them and an oil water separator tank on his property. He said that he had already been to court once to fight the last violation and had received another violation. (At the top of the notes for this case it is indicated that there was a PIN job - which appears to have been reimbursed by the R.P.) I will send a letter to A.J. Clarke stating that the tanks were installed by DEC and that they are needed in order to contain fluids recovered from next door. 06/20/06-Vought-This spill transferred to DEC Vought due to exisiting PIN for spill #9611309. 06/20/06-Vought-File review by Vought. See also spill #9611309 for PIN at adjacent site 105-107 E 10th St. Letter from AG Riggi to 3/10THC. Demand letter for $422529.45 for cleanup costs. Letter from DEC Tipple to John Iannone (103E10th Street)-2/22/01. DEC ... continues to require the following work to be conducted if the owners of 103 East 10th Street intend to takeover the investigation/remediation efforts... . Requirements include installation of two upgradient delineation wells inside basement of 103E10th St. 2)installation of a 3rd Avenue delineation well 3)installation of downgradient (south-side) delineation wells 4)installation of an enhanced remediation system usch as automated EFR system. The Department is currently having a Multi-Phase Extraction System Pilot Test conducted on this site . Currently the Department's contractor is preparing to install the additional wells needed to fully delineate the plume resulting from the 103 East 10th Street release . Please inform the Department by March 31, 2001 as to your clients intention... . Letter from Ianone to DEC Tipple-04/30/01. Letter from Cody Ehlers Group(CEG)-(Iannone) consultant for 103E10th St. CEG hired Apex Envioronmental to perform additional well installation, perform baildown tests, initiate weekly multi-phase extraction (MPX) program for wells with free product for

103 EAST 10TH STREET (Continued) **S104620874**

one year. Request DEC assistance to obtain sidewalk permits. Letter from DEC Tipple to CEG Ianone-5/1/01. DEC agrees with proposal for sequential installation of wells, reasons for well installation in basement of 103E10th, deadline for installation of additional wells is by 5/18/01, submission of baildown results for wells by 5/7/01, submission of RAP by 6/15/01 for installation of a permanent recovery system. Letter from AG Riggi to Debra Rothberg-5/1/01. ...Mr. Iannone continues to selectively eliminate certain portions of the work considered by DEC to be essential in investigation and remediation of this site. AG will proceed with litigation by end of month if settlement is not reached. Letter from AG Riggi to Debra Rothberg-5/2/01. DEC will facilitate the performance of this work by your clients only if they agree to perform the entire scope of work detailed previously in meetings and correspondence... . Letter from CEG Iannone to DEC Tipple-5/2/01. CEG is prepared to do delineation work and request DEC assistance in obtaining permits. Letter from Rothberg to AG Riggi-5/2/01. Your statement that NYSDEC requires all or nothing is deeply troubling . Rothberg asserts that past DEC expenditures were improper . Letter from AG Riggi to Rothberg-5/4/01. ...I share in your disappointment . Letter reiterates failure to delineate plume expeditiously. Due to the discovery of vapors in the building across the street, DEC has determined it cannot wait until later this month for wells to be installed, and it will proceed with the work needed early next week. Letter from DEC Tipple to CEG Iannone-7/5/01. Justification for rationale for installation of well in basement of 103E10th St. Letter from CEG Iannone to DEC Tipple-7/12/01. Request for monitoring data and well logs and quarterly progress reports. I must continue to confirm that 3/10 Tenants Housing Corporation, the owner of the cooperative building at 103 East 10th Street does not consent to the installation of this well . Affadavit (DEC Tipple)-8/23/01. Order to Permit Entry Upon Land. Letter from AG Riggi to Carole Ule (Esq.)-10/3/01. The stipulation looks fine to me. If you execute two originals, I will sign both and return one to you for filing with the Court . Ule represents 103E10th St. 103E10th St will hook up to remediation system in basement of 105E10th due to lack of space in 103E10th for system. Quarterly Project Status Report (EAR) Jan 2002 to March 2002-9/20/01. Groundwater flow direction shifted from east-southeast to a more northerly then a north/northwest direction. Tanks in 107E10th St have recovered 416 gallons to date. Installation of a well in the northwest corner of 103E10th occurred. Baildown/recharge test of well in basement of 103E10th was performed but was inconclusive. Recovery system consists of four submersible pumps, 3 portable centrifugal well pumps for basement wells and 5 SpillBuster automatically adjusting pumps. Vapor extraction wells also occur in basement of 109E10th. Report recommends continuation of monitoring, cleaning oil water separators, investigate use of biorem beneath the buildings at 109 and 113E10th, delineate and recovery of product found in 1032E10th St. Meeting List-4/22/02. At meeting was EAR, DEC, CEG, John Crane, AG Riggi. Site Plan-7/21/02. Northwest-southeast oriented line separates responsibilities of 103E10th and 105-107E10th Street. Corrective Action Plan (CEG Iannone)-7/21/02. 3/10 THC intends to contract with EAR to continue work and maintenance. The prospective owners of the building at 105-107 East 10th Street and the current owners of the building at 103E10th Street (i.e, 3/10 Tenants Housing Corporation) have agreed on a division of work currently required by the NYSDEC to address these two spill sites .

103 EAST 10TH STREET (Continued) **S104620874**

Document describes in detail reponsibilities of each party. CAP includes weekly well monitoring of wells (W1, W3, W8, W9, W11, W12, W13, W18, W19, W20, W24, W25, W27, W28, W29. Product recovery includes existing wells and recovery systems installed by DEC and collection of effluent samples. Vapor abatement system will be operated by 105-107E10th Street. 3/10 Tenants Housing Corporation would continue to operate the vapor abatement system until Spill #9913474 has been closed by the NYSDEC. Reports will be submitted to the Department quarterly. 10/16/07-Vought-File review continued by Vought: Corrective Action Plan (CEG Iannone)-8/5/02. New CAP submitted including DEC Tipple's requirements after review. 3/10 THC will perform the following tasks: 1)Weekly well monitoring and if product is encountered, bailing 2)Product recovery via use of previously installed submersible pumps, spill busters and MPX events 3)Biweekly maintenance of submersible pumps and sumbission of status reports 4)Biweekly maintenance of dual phase portable pumps and submission of stautus reports 5)Biweekly maintenance and adjustment of oil/water separator 6)Biweekly collection and analyses of groundwater treatment system effluent 7)Weekly maintenance of holding tanks 8)Operation of vapor abatement sytem if spill 9611309 is closed and DEC continues to require operation. 9)Submission of quarterly status reports. 10)Possible use of Bio-rem in Closure Plan upon no more free product. 11)Sampling of groundwater for dissolved parameters. Closure may be considered upon four rounds of asymptotic groundwater levels. Letter from DEC Tipple to CEG Iannone-8/5/02. DEC reviewed the CAP and required title to be changed to Remediation Plan and after ALL product is removed from wells the remediation of any other soil and or dissolved petroleum contamination will be addressed. STIPULATION AGREEMENT with due date of 8/20/02 sent by DEC Tipple to: Ms. Heather Verran Ramo 3/10 Tenants Housing Corporation 103E10 Street New York, NY 10003 Remediation Plan and Signed STIPULATION AGREEMENT (CEG Iannone)-8/16/02. Copy of remediation plan and signed Stip. 10/17/07-Vought-Continued File Review by Vought: Email from CEG Iannone to DEC Tipple-10/1/02. This is to let you know that the EAR contract has been signed and they will be starting work tomorrow... Memorandum (CEG Iannone) to DEC Tipple-4/22/03. Attached please find the draft product thickness tables and maps for 103E10th Street... Project Status Report April-December 2002 (CEG Iannone)-6/19/03. ...only 17 gallons of product have been removed from the 5 sidewalk product recovery wells and an additional 9.5 gallons was removed from basement well. However, groundwater flow during this period has reversed direction due to last year's drought and some product has now probably moved to the subsurface soil beneath the building at 103 East 10th Street . Report recommends reduction to monthly monitoring and increase in frequency of manaul bailing as opposed to operation of product recovery system. EAR report shows groundwater flow to the north/northwest. Trace free product in W12 and W13 and .33'FP (W20), .46'FP(W28). Product levels of 1 to 3 feet have consistently accumulated in W29 which is bailed weekly. Operation of portable recovery pumps in basements of 109 and 111 E10th discontinued due to lack of free product (FP) and product now removed via and absorbent socks and no effluent samples being collected and system not on and no discharge. Spill Buster pumps still in operation and maintained biweekly and removed 17 gallons referred to above during this period. Report recommends reduction to biweekly well monitoring, temporary discontinuation of operation of pumps in W7, W21, W22, W23 and W26, manual recovery of product and

103 EAST 10TH STREET (Continued) **S104620874**

more frequent manual recovery of product in W29. Email from CEG Iannone to DEC Tipple-7/30/03. Iannone no longer working for CEG and is working for Day Engineering. 10/18/07-Vought-File Review continued by Vought: Project Status Report (Day Engineering and EAR) Jan 2003 thru June2003. Groundwater flow direction reversed and assumed previous direction of south-southeast. Report recommend change to monthly well monitoring, discontinuation of product recovery system using portable wells, removal of product from recovery wells and W29 via peristaltic pump which was approved by DEC on 9/5/03. 8 week test program of manual product removal from wells via peristaltic pump will be initiated and report will be submitted to DEC. Proposed Revision to the Remediation Plan (DAY Iannone)-8/26/03. Report proposed use of manual bailing and discontinued use of the troubled automated product recovery system . Revisions include weekly product recovery, monthly monitoring for a period of three months, Letter from DEC Tipple to Iannone-9/5/03. DEC reviewed Proposed Revision and will allow a two month pilot study with a subsequent analysis of the effectiveness provided that product is removed from W29 and the recovery wells three times per week for the first four weeks of the study, removal of product from wells W7, W21, W22, W23 and W26 using peristaltic pump. Report to be submitted to DEC within ten days of the 8 week pilot study. If DEC does not recevie report within that time, product recovery system will be completely rehabiliated and reinstalled. Email from DAY Iannone to DEC Tipple-9/5/03. Iannone received 9/5/03 letter from DEC Tipple and all looks good to me . Email from DEC Tiplle DAY Iannone-10/15/03. DEC requires submission of bailing schedule with specific dates. Email from DAY Iannone to DEC Tipple-10/17/03. Product pumping will begin on 10/21/03 and subsequent specific schedule attached. Email from DAY Iannnone to DEC Tipple-10/29/03. Proposal to install socks in four recovery wells due to the absence of product that will be maintained weekly, discontinuation of three times bailing per week for these four wells. Socks to be placed in wells W7, W21, W22 and W26 this week. Email from DEC Tipple to DAY Iannone-10/29/03. Request for amount of product recovered from wells, rate of recovery, proposal to check socks. Email from DAY Iannone to DEC Tipple-11/3/03. Only appreciable amounts of product recovered are from wells W23 and W29, recovery rates for W29 are between 1-1.5' of product every one to two days, and no need to check socks as no product in these wells for over one year. Proposed Changes to Revised Remediation Plan (DAY Iannone)-11/5/03. Four of five product recovery wells in sidewalk have no free product and proposal to install socks and monitor weekly. Revised Remediation Plan (DAY Iannone)-12/22/03. During 8 week program a total of 11.69 gallons of product removed from W23 and W29. Proposal for manual bailing of product 1 to 3 times per week for next 2-3 months, monthly monitoring of socks in former product recovery wells, quartertly monitoring of wells without free product. Letter from DEC Tipple to DAY Iannone-12/23/03. ...there was never an approved revision to the August 16, 2002 NYSDEC Stipulation . DEC allowed a two month pilot study with subsequent analysis. Complete report summarizing findings must be submitted to DEC Tipple within ten days. DEC awaits monthly groundwater elevations, status of all wells, and site map with groundwater flow direction. There is no revised remediation plan approved by the NYSDEC for the site, there is currently a two month pilot study being conducted . Letter from John J Grogan to DEC Tipple-2/13/04. We are writing to obtain a follow-up on the status of the above mentioned spill and the impact

103 EAST 10TH STREET (Continued) **S104620874**

it has has on our property (109-119 East 10th Street). Request for definitive date when wells will be removed as well as all other monitoring equipment. Project Status Report (CEG Iannone) July 2003-March 2004. ...little or no product has been observed in 18 of the 20 Site monitoring wells during this reporting period. Two wells, W23 and W29 still have accumulating product. ...manual product removal methods equal and, for some periods, exceed the removal rate acheived by the automated product removal system . Groundwater flow to the north. Two wells with product are W23 and W29. 13.77 gallons of product removed from W23, 6.18 gallons removed from W29 and .16 gallons removed from other wells. Current product recovery methods will continue until no more measureable product in wells. Letter from DEC Tipple to 3/10 THC (Verran Ramo)-4/9/04. Please be advised that you are in violation of the Stipulation . DEC currently awaiting completed study of proposed future remedial strategies at the site. As per Section 3.3 of the August 7, 2002 Remediation Plan, the vapor abatement system will be the responsibility of the 3/10 Tenants Housing Corporation after spill 9611309 has been closed . I am currently awaiting the March 2004 Quarterly Report . Letter from DEC Tipple to 3/10THC Verran-Romano-8/19/04. Spill 9611309 has been closed. Operation and maintenance of vapor abatement system will be turned over to 3/10 THC. Email from DEC Tipple to DAY Iannone-12/28/04. I am awaiting acknowledgement that 103 is now responsible for both the remediation systm as well as the vapor abatement system... . Request for past due Nov 2004 report. Residents of 105-107 E10th complained about noise from vapor abatement system. 10/22/07-Vought-Continued File Review by Vought: Email from DAY Iannone to DEC Tipple-12/28/04. 3/10 THC has assumed responsibility for operation of the vapor abatement system related to this spill . The vapor abatement system is now operating and in good condition and is being maintained by EAR. Rubber isolation material installed to address noise complaints. Product still occasionally noted in W23 and W29 and ERM hired to perform groundwater monitoring and manual product recovery and if present is 1 to 3 in thickness. Project Status Report (DAY Iannone) April 2004-Dec 2004. As discussed in the report, no product has been observed in 18 of the 20 site monitoring wells during this reporting period . 8 gallons of product removed from W23 and W29. Socks have no product. Average product thickness is .02'(W23) and .06'(W29). Groundwater flow to the north. Removal of product fromw wells W23 and W29 2 to 3 times per week via portable peristaltic pump. THC has assumed responsibility for that system since that time (vapor abatement system). Vapor abatement system is currently in operation. Exhaust fans installed in basements of 109 and 113 East 10th Street to remove stray petroleum odors and intake grills were installed. Vapor extraction blower is also in place in sump of 109 E10th to remove vapors and two dedicated SVE wells in same basement. Vapor phase treated using carbon canister. Report recommends manual bailing till product no longer present at which socks will be installed and groundwater sampling be proposed. Email from DAY Iannone to DEC Tipple-1/4/05. W29 had two feet of product. Project Status Report (DAY Iannone) Jan 2005 to May 2005-5/19/05. 2.4 gallons of product removed from W23 and W29. Enclosed email request to perform short-duration test of vapor abatement system (ie shut down system for 2 to 4 days). Groundwater flow to the north. OM&M includes semi-annual monitoring of all wells, monthly monitoring of recovery wells and weekly monitoring and recovery of W23 and W29. 2.35 gallons of product removed during period. Recommendation for

103 EAST 10TH STREET (Continued) **S104620874**

further monitoring. Project Status Report (DAY Iannone) May 2005 to Aug 2005-5/19/05. One gallon of product total removed from W23 ane W29 during period. Groundwater flow to the north. Product recovery from W23 and W29 1 to 2 times per month. Recommendation for further monitoring. Letter from John G. Grogan to DEC Tipple-9/13/05. Letter requesting status and request to provide definitive date that wells will be removed from property as well as removal of all other monitoring equipment. Letter from DEC Ketani to Verran-Ramo and DAY Iannone-9/16/05. DEC agrees with current groundwater monitoring schedule. Written request must be submitted to use socks in place of manual product recovery. Letter from DAY Iannone to DEC Ketani-11/18/05. Approximately 407 gallons of product was removed from August 1999 through September 2003 using the automated product removal system... and 32 gallons have been removed manually. Absorbent socks will be placed and monitored in each of these wells . (W23 and W29). Spill #0511701 101E10th Street-1/10/06. Spill reported by Eric Telemaque (Emteque 212-631-9000) that tank was uncovered during excavation and discolored soil was noted from 14' to 20'bg. See this spill for continued file. Progress Report (DAY Iannone)-4/19/06. Only W29 still has product. As you can see, product levels in well W29 rose unexpectedly in February 2005 . Product levels up to 1'. No product or petroleum release was reported to the NYSDEC when the adjacent building including the basement of that building, was demolished and removed . Proposal to continue monitoring and removal until product no longer present for 3 months and upon then NFA will be proposed. Letter from AJ Clarke Real Estate Corp (Stephen DeNardo) to DEC Ketani-4/21/06. Letter from DAY Iannone to AJ Clarke Real Estate. Letter providing status of two ASTs at 105-107E10th St. Tanks still inservice. Included was copy of FDNY violation for fuel oil storage with out FDNY permit. Letter from DEC Ketani to Walden Pond Realty-5/16/06. I am writing to explain the status of the tanks which are of concern . The tanks and the oil/water separator will have to remain at 107 East 10th Street for the forseeable future . Progress Report (April to August 2006) and Closure Request (Day Iannone)-9/6/06. W29 still contains product. Product levels in well W29 have diminished to low levels but occasionally there are still measurable levels of product accumulating in that well. We continue to remove this product during each of the Site visits but believe that we have no removed the petroleum related to this spill to the extent practicable . One half gallon of product removed since last report. With regards to adjacent excavation at 101E10th St, Photographs of that excavation demonstrate that the soil remaining at the bottom of the excavated area and the soil staged for off-site removal appears to be clean and does not appear to be impacted from petroluem from the adjacent building, i.e 103 East 10th Street . No Further Action requested on basis of absence of product. Letter from John J Grogan to DEC Vought-9/22/06. Request for status of spill and definitive date upon which all monitoring wells can be removed. Grogan received notice for cracks in sidewalk. Letter from DEC Vought to Michael Brandt (John G Grogan)-11/21/06. Continued monitoring is required... and as such request to remove monitoring wells is denied. 10/22/07-Vought-After complete file review DEC requires: 1)call to AG for status of PIN-PIN closure for 9611309 due to 8/19/04 NFA? or keep open due to ongoing cleanup by 103E10th? 2)recent round of groundwater monitoring data for all wells and adjustment of OM&M schedule to quarterly monitoring of all wells and monthly monitoring of wells with free product.

103 EAST 10TH STREET (Continued) **S104620874**

3)Boring to the north (downgradient) 4)cc or call to John G Grogan 5)dissolved groundwater sampling of all wells, confirmatory SUMMA sampling in 105/107/109/113 east 10th St,closure of monitoring wells, vapor abatement system, product recovery tanks, vapor extraction system upon request for spill closure as per STIP RAP
01/16/08-Vought-Called AG Riggi for status of PIN and discuss further scope of work. PIN was settled and RP did execute STIP and nothing further was billed to fund. AG Riggi requested to be cc'd on letter and informed if RP did not meet obligations and Spill Funds were needed. AG Riggi suggested that PIN remain open until RP meets DEC's current obligations and requirements above. DEC sent letter with cc to AG Riggi and M. Brandt and TWO MONTH DEADLINE requiring: 1)Increase in well monitoring frequency in wells with free product to a biweekly basis 2)quarterly groundwater monitoring and sampling for EPA Methods 8260/8270 3)Delineation of groundwater contamination via installation of downgradient well to the north 4)PID survey of adjacent residences of possible consideration of vapor abatement system removal. Vought called Iannone (Ph:212-986-8645 Fax:212-986-8657) to discuss scope of work. Vought spoke to Iannone regarding biweekly monitoring and above scope of work and Iannone suggested performing another round of groundwater monitoring to confirm groundwater flow prior to delineation.
04/16/08-Vought-Received call and email from John Iannone (212-986-8645 Fax:212-986-8657) and called Iannone and left message to return call to cell phone. 04/24/08-Vought-Received message from Iannone. Vought returned call and left message to return call. Vought received call and spoke to Iannone and he is working with co-op and he has been authorized scope of work. Iannone will send in well monitoring records that show less than 1 -1.7 inches in sidewalk and such he requested biweekly product recovery that was approved by DEC. Baseline groundwater monitoring will performed on all wells. Groundwater elevations will be surveyed and groundwater flow direction. Once groundwater flow direction is determined then downgradient wells will be monitored and sampled. PID survey will be performed including ambient sample. Iannone will send in workplan.
5/9/08 - Raphael Ketani. Today I received a letter with NYFD violation attached from Stephen DeNardo of A J Clarke Real Estate Corp. The letter requested that I send an updated letter regarding the need for the holding tanks that were installed by DEC to aid in the recovery of product. The violation was issued because the building didn't have a permit from the NYC Dept. of Buildings for the holding tanks. A copy of the first letter from DEC dated 5/16/2006 explaining the need for the tanks was attached. Since I am not the case manager, I forwarded the letter to Mr. Vought.
06/4/08-Vought-DEC Ketani received fax from AJ Clarke dated 4/17/08 asking for return call for status of site. Fax included copy of letter from DEC Ketani to Walden Pond Realty stating that there were two 275-gallon tanks at 107 East 10th Street as a part of state funded cleanup. As per DEC Ketani one well at site was still being monitored as part of cleanup and that tanks have to remain at property for forseeable future . Vought also received letter dated 5/6/08 from AJ Clarke including copy of FDNY violation for third time due to tanks in the basement of 107 E10th st. Vought called Iannone and he is still using product holding tanks and no basement in 103E10th Street. Less than 2 of product in wells and during one week almost one foot of product. Iannone pays rent to 107E10th Street for tanks and Iannone will be submitting workplan. Vought called AJ

103 EAST 10TH STREET (Continued) **S104620874**

Clarke (Stephen DeNardo 212-541-4477) and left message to return call to DEC. Vought discussed site with DEC Austin who said that no letter will be issued by DEC requesting tank does not have to be registered or no violations should be issued as tank is now privately owned and must conform with all applicable regulations. Vought called Iannone and summarized that DEC would not negotiate FDNY violations. Letter submitted to DEC Austin for approval and addressed to: Walden Pond Realty, LLC c/o Stephen Kaplan AJ Clarke Real Estate Co. 1881 Broadway New York, NY 10023 Fax:(212)541-4872 06/06/08-Vought-Vought forwarded copy of draft letter to AG Riggi for approval and AG provided edited draft and Vought sent and faxed out letter to Walden pond with cc to Iannone and DEC Austin. 04/20/2009-Vought-File review to date: Project Status Report (Day Engineering)-7/31/08. Report covers period from 9/07 thru 7/08. Groundwater flow to the North. Product only present in wells W23, W29 and W26. Product in well W29 can only be manually recovered from this well since building codes and space limitations preclude the use of an automated product recovery system for this well . Approximately five gallons of product have been removed in the past ten months with 48 gallons removed to date since manual product recovery began in 2003. In response to DEC request, recovery frequency was increased from 6/08 to 7/08 from biweekly to twice per week. ....manual product recovery has had little, if any effect on the relatively low levels of product remaining at the Site . Because of the physical constraints and limited product removal options at this site and on the inability of the existing product recovery methods to reduce the relatively low product levels in well W29, other approaches, such as monitoring, should be considered for this site . Product currently being removed twice per month. Final Investigation and Remdial Work Plan (ERM)-August 2008. Scope of work includes monitoring and sampling of all wells, possible downgradient well installation, determination of groundwater flow direction. Up to ten monitoring wells will be sampled for laboratory analysis , proposal for PID survey in buildings including possible collection of draeger tubes and building inventories. Project Status Report (Day Engineering)-11/6/08. Site visit suggested by Iannone. BWeekly NAPL Removal Test Program (Day Engineering)-11/06/08. ...(Day) recommends that NAPL removal actions be discontinued at this Site and that future work at the Site be related to the presence of NAPL be limited to quarterly monitoring of NAPL thickness in affected wells . DAY recommends that these ineffective manual NAPL removal efforts be discontinued and replaced with a program to monitor the two affected Site wells 04/20/09-Vought-Called John Iannone and left message to return call to arrange site visit. DEC requires: 1)sock installation? 2)excavation of abandoned tank? 3)disapproval of proposed quarterly monitoring only method in Work Plan. 4)dissapproval of up to ten wells being sampled and inclusion of all wells to be sampled in Work Plan. 5)disapproval of necessity of draeger tubes and PID background surveys unless desire of consultant to perform in Work Plan and arrangement of NYCDOH site visit if PID surveys show no petroleum impact. 6)Approval of determination of groundwater flow and possible installation of downgradient well as per ERM report. 06/03/09-Vought-Received email reply from Iannone on 5/11/09 that ERM representative (Tiernan Smith) available for site visit. Vought also received a call from and spoke to Tim Grogan who requested that sidewalk structures be abandoned in front of 113 E10th as well as removal of PVC piping from rear of property. DEC requires: 1)call to

103 EAST 10TH STREET (Continued) **S104620874**

AG for status of PIN-PIN closure for 9611309? or keep open due to ongoing cleanup by 103E10th? 2)close spill/PIN for 9611309 due to 8/19/04 Tipple NFA? 3)quarterly groundwater sampling from all wells. 4)Site inspection of 103W10th to determine feasibility of alternative recovery methods such as trenching or excavation of abandoned UST as free product still onsite after seven years. 5)Requirement letter after site visit with cc to Iannone, Grogan and Riggi and review of letter prior to transmission by NYSOAG Riggi. 06/03/09-Vought sent email to Iannone, Tim Grogan (tcgrogan@groganassoc.com) and John Grogan (john@groganassoc.com) providing free times for site visit to determine alternative remedial action (free product still present) and also that dissolved groundwater sampling needed prior to well abandonment as requested by Grogan. Vought called and spoke to Riggi and PIN/Spill will be left open for 9611309 in case RP (Iannone) fails to meet DEC requirements and NYSOAG assistance is needed. Riggi requested she be cc'd on all correspondence to Iannone. Vought called Iannone (212-986-8645) to discuss site visit and need of quarterly groundwater sampling and left message. 06/17/09-Vought-Site visit by Vought with: Marilyn Appleberg (111 E10th St Bd of Directors) Tim Grogan John Grogan John Ianone (Day Engineering) Tiernan Smith(ERM) Mario Sciacca (ETNA Contracting 718-858-4668 will replace sidewalk concrete for 111 E 10th St). Well W9 depth to water is 11.92' with sheen and no product and no product in MW8 with depth to water of 12.52'. Grogan and Appleberg and tenants of 111 E10th st want to replace sidewalk due to cosmetic reasons and inquiring if structures in sidewalk in front of their property can be abandoned (structures in sidewalk include monitoring well MW8 and well MW9 that is in square concrete pit with steel trap door with out of service remediation wiring. Vought required Ianone and Smith to perform dissolved groundwater sampling from wells before determination of abandonment or replacement in new sidewalk can be made. Iannone to perform dissolved groundwater sampling next week so that results will be back by Vought's return from vacation. Appleberg expressed concerns over historical petroleum vapors Product recovery ongoing via peristaltic pump. Vought also received table of groundwater monitoring results and most recent monitoring from 5/28/09 shows .27'FP*W23), .01'FP(W26), .48'FP(W29). Next onsite meeting set for 7/1/09 at 10am. Ianone will also begin on obtaining estimate to remove aboveground SVE piping from 111E10th St. Vought inspected 103 E 10th St and abandoned UST is directly under basement apartment. Iannone currently using storage tanks in 107E10th st for oil however access and payment of rental for space is making recovery operations not feasible and Iannone will switch to using onsite storage tank at 103 E10th St. Vought sent email to all parties at meeting today and NYSDOH Hughes and NYCDOH Stallbohm requesting site visit at 111 East 10th ST by NYCDOH for vapor survey. Next meeting scheduled for 7/1. 7/03/09-Vought-7/1 meeting cancelled as groundwater results expected from Iannone on 7/6 and no product found in wells W8 amd W9.. NYCDOH site visit results received on 7/1/09 from NYCDOH Allan Friedman(212-442-3372). At the time of the visit, John Grogan was present. No odors of oil, no volatile organic compounds detected and no visible oil contamination noted at time of site visit. 07/06/09-Vought-As per CAP dated 8/5/02 and RAP dated 8/7/02, The closure plan will be prepared and submitted to the NYSDEC for approval when all product related to spill 9913474 has been removed from the wells associated with this spill. If necessary, closure activities may include the addition of nutrients and other NYSDEC

103 EAST 10TH STREET (Continued) **S104620874**

approved agents to monitoring wells with limited amounts of product (e.g. a sheen or less than 0.01 feet of product) to enhance the natural biodegradation and removal of this material from the affected wells. In addition, closure activities will address the remediation of any soil and/or dissolved petroleum constituents in groundwater related to spill #9913474. Work to confirm that closure criteria is satisfied includes collection of dissolved groundwater samples. DEC prior approved product recovery method of handbailing being used for past five years with minimal reduction in product thickness. As such product levels are relatively stable and closure criteria have not been approached in past seven years. RAP included continual operation of automated and manual product recovery systems however due to relatively low product thickness, operations of these systems are not feasible and as such alternative remedial methods must be considered. Note that source excavation not possible as abandoned UST located directly under residential apartment at 103E10th St. Vought sent email to NYSOAG Riggi inquiring if RAP approval can be withdrawn so that dissolved groundwater samples may be collected and alternative remedial methods (such as injection of agents) may be considered to reduce free product thicknesses as they have remained relatively constant with hand bailing for past five years. Vought also to inquire of NYSOAG Riggi as to who is RP for SVE system removal along with monitoring well and recovery equipment. (Note that as per CAP and RAP, 3/10THC is responsible to operate and maintain system but no mention made of systems decommissioning. Site visit scheduled for 7/8/09. 7/8/09-Vought-Site visit by Vought with Iannone and John Grogan. Vought inspected basement of 107 E 10th St with super (John-cell(917)577-7341, fax:212-533-9538) and three 275-gallon ASTs still in place (two used for recovery tanks for hand bailed product) and one for out of service oil/water separator for old recovery system. Iannone using product recovery for hand bailed product however due to low recovery amounts he will place drum in basement of 103 E10th St to store recovered oil. Vought inspected AST in 107 E10th and noted 5000-gallon AST with weepholes and no sign of leakage. Vought also noted remnants of vapor recovery system also in boiler room of 107 E10th St that also needs to be removed by Iannone. No vapors or signs of oil seepage into basement of 107 E10th St. Owner rep for 107 E10th St is Steve Kaplan (Ph:212-541-4477x22 fax:212-541-4881). Iannone will send email with schedule of well decommissioning and SVE/Ejector piping removal. Vought sent email to Iannone, Grogan, Appleberg, Kaplan with requirement of removal of ejector piping and SVE piping and decomissioning of wells from buildings 105 E10th St thru 111 East 10th St. Email from Grogan to Iannone that super onsite and will accomodate whatever is needed (super is Juan Balandra 917-496-1602). Well abandonment scheduled for Friday of MW8 and MW9. 7/10/09-Vought-Received email from Iannone. As per the Stipulation and the NYSDEC approved Remediation Plan for 103 East 10th Street..... only wells W11, W12 (at 109 East 10th Street) and W13 (in 111 East 10th Street) had product recovery equipment and have been assigned to 103 East 10th Street. The responsibility for the remaining wells and associated product recovery equipment in 109 and 111 East 10th Street and all of the wells and associated product recovery equipment in 113 and 115 east 10th Street were assigned to the owners of 105-107 East 10th Street. Iannone will ask contractor for proposal to remove the vapor abatement equipment in 107, 109, 111 and 113 East 10th Street and the product recovery system equipment from wells W11 and W12 in 109 East 10th Street. Attached is a list of

103 EAST 10TH STREET (Continued) **S104620874**

vapor abatement and product recovery equipment for which he is obtaining cost proposal to remove. Vought received call from and spoke to Riggi and will send Riggi copy of CAP and RAP and will also return call to her with DEC Tibbe who was involved in negotiation of CAP and RAP. Vought sent copy of RAP to NYSOAG Riggi. Vought later received email from Iannone that he thought that the wells and product removal systems that were assigned to 105-107 East 10th Street and that were in the basements of 109-113 have already been closed and/or removed. I think that John Grogan and I just need to meet at the site some time and go through it again. Vought copied on email from Grogan to Iannone requesting site walkthrough with Appelberg and Iannone will get back to Grogan with date. Vought received another email from Iannone that wells in front of 111 East 10th St (W8 and W9) was completed by Metro Environmental Contracting Corp. Vought also received email from Iannone with copy of DEC Tipples letter dated 8/19/04. Ianonne felt that letter explains that wells and remedial systems in 109-113 E 10th were 105-107's responsibility and that the systems had been removed and the wells closed. Letter stated system was removed and granted NFA with no mention of responsibility. 07/13/09-Vought-Received email from Grogan that The buildings 109,111,113,115,117&119 which are all one property were the innocent victims here. We had no spill this was all around us, all that is being asked is that what ever was put in wells, pumps or measuring devices be removed and things be put back to there original state. Your cooperation and understanding in this matter is greatly appreciated. 07/14/09-Vought-Called and spoke to Iannone and asked for clarification on emails of 7/10 as to whether remnants of the recovery system were still at 111 East 10th St. As per Iannone the only remaining piping is that for the venting system at 109-111 East 10th St and that product recovery system still present at 105-107 E 10th St and that he will have estimate to have both systems removed in two weeks and contractor will be selected within three weeks. Vought sent email to all parties with above information. Vought also called John Grogan to explain update.
08/04/09-Vought-Received email scope of work from Iannone from Metro Environmental that included removal of only the two 275-gallon oil storage tanks, one 275 gallon oil/water separator and all associated piping and equipment. Carol Ule cc'd on email. Vought replied with cc to all and NYSOAG Riggi and DEC Austin that department approved scope of work pending inclusion of the removal of the vapor extraction equipment as well. 09/10/09-Vought-Received call from Grogan expressing fustration that the vapor extraction system and product recovery system have not been removed to date. Vought drafted drop dead letter to remove systems and requirement letter for submission of new RAP and sent to NYSOAG Riggi for approval prior to transmission to RP. Vought informed DEC Austin of same.
09/11/09-Vought-Spoke with NYSOAG and she will use 9/10 letter as template letter to send requirements directly to Carole Ule.
09/14/09-Vought-Reviewed Riggi template and editted.
09/16/09-Vought-Received email from Riggi that she was contacted by Ule. Vought called Riggi and Riggi to arrange either teleconference with Ule and Vought and/or meeting at Region 2 offices with participation of Riggi in person or via phone from Albany. Letter issued by NYSOAG Riggi to Carol Ule, Esq dated 9/16/09. Work notes that Department requires additional work including removal of vapor extraction equipment and product recovery equipment. 'It's DEC's position that failure to timely remove this equipment is a breach of

103 EAST 10TH STREET (Continued) **S104620874**

the Stipulation Agreement from August 2002 and the associated Corrective Action Plan (CAP) and Remedial Action Plan(RAP)... . If you wish to discuss this matter, please call me . 9/17/09-Vought-NYSOAG Riggi discussion with Ule and Ule noted possible additional source of contamination to 103 E 10th St as from 101 East 10th Street (see closed spill notes 0511701 for updates). 09/18/09-Vought-Received email fro NYSOAG Riggi with additional inquires regarding spill notes and Ule will be approaching owners of 107 to work out agreement on equipment removal. Request to return call when reviewed spill 0511701. 9/22/09-Vought-Letter from Ule to NYSOAG Riggi-9/22/09. Response to NYSOAG letter dated 9/16/09. Request for a meeting. This letter id onthe subject of the removal of the product. I will be writing you separately on the subject of the removal of the vapor abatement and storage tank equipment in the buildings east of 3/10. ....our belief that the remediation of our spill sustained a setback when our neighbor immediately to the west, 101 East 10th Street, demolished its existing building and excavated its property preparatory to building a new, bigger building... . Attached is product recovery showing a steady progression of dimunition until March 2006 when there was a big spike up from the prior reading of December 2005. This anamolous spike coincided with the excavation which unearthed Spill #05-11701 on the property immediately to our west, 101 East 10th Street, as set forth above. As you will see, although the amount of product recovered starting after December 2005 spiked, it has now been brought under control. See chart . In the opinion of our engineer, no additional recovery installations wouild serve any purpose . Request for meeting. VOUGHT PERSONAL NOTES on product spike in letter dated 9/22/09:The big product thickness spike that is after December 2005 shows an increase of 1.40'. A similar spike of 1.40' increase is observed in July 2006, a 1.0' spike is observed in Sept 2004 and a 1.20' increase is also observed in December 2006. The large number of additional spikes shows that the December event is not satistically significant as a major event. Furthermore if 101 E 10th construction was source and 103 was succesfully remediated close to closure we should see STEADILY decreasing thicknesses from October 2003 thru Dec 2005 and constant high thicknesses after Dec 2005 not the fluctuating thicknesses which are observed. Note we see a decrease to almost 0' in 2006 after construction of the building and if the building construction caused an increase of product to 103 then this O' reading would not be there. Furthermore, product thicknesses alone cannot be used for source determination, they MUST be combined with hydrographs and groundwater contour maps with flow direction as product thicknesses are known to fluctuate with rising and lowering water table. Department feels the fluctuations in thickness are soley due to fluctuating groundwater levels caused by possible adjacent sump pits and or geology. Fluctuating groundwater conditions were also observed at spill 0511701. Futhermore to use product thicknesses only as a determination of source is not adequate, the pathway from the potential source to receptor MUST BE DEFINED via sampling (note no free product in groundwater at 101E 10th Street) and groundwater flow direction monitoring. Department also notes three steady monitoring events close to 0' in December 2007 (this is the same as observed prior to the big spike in December 2005) again suggesting that the three events close to 0' product thickness is not a one time event and is a function of groundwater fluctuations. ALSO to suggest that product thickness increases are a due to product migrating

103 EAST 10TH STREET (Continued) **S104620874**

onsite also implies that product decreases are due to product flowing off-site and hence during the product decrease events in the same graph, 103 E 10th St THC was impacting 101 East 10th Street. Ule states in letter that product recovered has now been brought under control however note that the last two monitoring events had the same magnitude and fluctuation of product thickness as March 2005 indicating that product recovery via manual bailing is having no effect on product thickness and hence cleanup of the site. 9/22/09-Vought-Letter from Ule to Riggi dated 9/22/09. Letter regarding removal of vapor extraction and product recovery systems. To the extent that 3/10 is legally obligated to pay for the removal of any of this equipment, it is prepared to do so, but 3/10 believes that it is not obligated to pay for all that work, as is set forth below. We await only confirmation from our neighbor that it is satisfied with the insurance certificates which have been provided and to schedule the work for a date certain. .....since we query who has the obligation to pay for the removal. We did not install the two vapor abatement systems and we did not agree to pay for their removal. The DEC's present request that 3/10 Tenants Housing Corp pay for the removal of the two vapor abatement systems in the neighboring buildings is an attempt to rewrite the remediation plans which were accepted by the DEC and the property years ago and the DEC should not be able to rewrite those agreements, especially by imposing new obligations on neighboring properties. ...we have reached out to our neighbors at 105-107 East 10th Street to come to a resolution of the matter and are preapred to bring the issue to a fair and neighborly resolution. Request for a meeting. Request for extension of 9/23/09 until 10/2. Letter from Day Engineering (Iannone) to Ule-9/21/09. Enclosed is product recovery chart same as that with 9/22/09 letter. I was not aware of the presence of an underground storage tank or the petroleum contaminated soil at 101 East 10th Street before receiving the attached information on Spill 0511701 from NYSDEC in July 2009. It is my opinion, based on information recently provided by the NYSDEC regarding Spill 05-11701 and on the attached product thickness chart for well W29, that the petroleum identified in subsurface soil and groundwater at 101 East 10th Street has probably contributed to some or most of the increased product thickness levels observed in well W29 since January 2006. VOUGHTS PERSONAL NOTES on Day Engineering letter-As per Progress Report submitted by Day Engineering and written by John Iannone dated 9/6/06 In addition, the recent demolition and construction project on the adjacent property (i.e. western) property discussed above included the excavation of soil on that property to depths near the water table (i.e. approximately 10 feet below street level). This property is located directly west of and abuts the building at 103 East 10th Street. Photographs of the excavation demonstrate that the soil remaining at the bottom of the excavated area and the soil staged for offsite removal appears clean and does not appear to have been impacted by petroleum from the adjacent building, i.e 103 East 10th Street. John Iannone himself saw the excavation to depths near the water table and observed the soil remaining at the bottom of the excavated area and the soil staged for offsite removal appears clean and does not appear to have been impacted by petroleum. If 101 East 10th st was the source of free product to 103 East 10th than Iannone should have obseved grossly impacted soil and free product onsite. Futhermore, the Department had no obligation to report the spill to Iannone. See personal notes above as well for letter dated 9/22/09.

103 EAST 10TH STREET (Continued) **S104620874**

10/22/09-Vought-See closed spill 9611309 and open spill 9913474. Letter received from consultant for 103 East 10th St (spill 9913474) who states in letter that it is my opinion that based on the information recently provided by the NYSDEC regarding spill 0511701 and on the attached product thickness chart for well W29, that the petroleum indentified in subsurface soil and groundwater at 101 East 10th Street has probably contributed to some or most of the increased product thickness levels observed in well W29 since January 2006. Vought reviewed soil and groundwater data from the file and noted the following: Limited Subsurface Investigation Report (Emteque)-1/11/06. Six test pits were installed to a maximum depth of 23'bg; the whole property was previously excavated to approximately 13'bgs with collection of fourteen test pit soil samples. An approximately 6ft layer of discolored soil with old petroleum odors was encountered 14 feet bgs and extending to approximately 20 feet bgs throughout the site. In the entire six(6) test pits excavated, petroleum odors and several VOCs were identified from approximately 14 to 20 feet bgs... However no petroleum odors or VOCs identified in the sample collected from 23 feet bgs. At the time of the investigation, scattered ponds of standing water were observed in the excavation bed. The UST was partially filled with seepage water and its invert was at 14 feet bgs . Moist and wet soils were encountered in all six test pits near termination depth. Perched water was observed at various elevations above water table. Soil analyticals show:33000ppb 1,2,4-trimethylbenzene(TP3), 9900ppb 1,3,5-trimethylbenzene(TP3), 22000ppb napthalene(TP3), 12000ppb xylene(TP3), 40000ppb methylnapthalene(TP3), 3800ppb xylene(TP4 18'), 27000ppb 2-methylbenzene(TP4 18'bg), 15000ppb 1,2,4-trimethylbenzene(TP4 18'bg), 14000ppb napthalene(TP5), 5400ppb xylene(TP5), 53000ppb methylnapthalene(TP5), 1500ppb xylene(TP6), 23000ppb 2-methylnapthalene(TP6). SUGGESTION: Groundwater fluctuates between 14-20'bgs evidenced by the product staining and VOC's at same interval. Also suggests that no discolored soil encountered shallower than 14'bgs indicating no onsite source to groundwater and as such offsite source combined with fluctuating groundwater table. No VOCs found in 23' soil sample suggesting that groundwater usually present above this level and as such it remains below water table at most times. Note also that depth to groundwater is from 13-15'bg in Well W23 as per spill #9913474 from 10/03-10/09. Ponds of standing water in excavation bed either due to fluctuating groundwater table and/or rain contributions to open excavation. Seepage in water in UST at 14'bgs from highpoint of fluctuating water table. Soil sample collected at 23'bgs suggests that groundwater at time of sample collection was greater than 23'bg. Perched water observed at various elevations suggests fluctuating water table and/or high infiltration from rain at excavation. Test pit analyticals show higher petroleum concentrations on north and east side of site and not adjacent to UST (which one would expect if UST was the source of contamination). Note that contamination exist from 14'-20'bg which is directly below invert. This contamination may be due to a leaking onsite UST and/or the spill from 103 East 10th Street but this cannot be proven due to removal of UST, fluctuating water table and construction of residential building over former tank location. Groundwater Sample Analyticals (Emteque)-2/8/06. Groundwater samples collected from the excavation at 101 East 10th Street and from two monitoring wells on the south and west side of the site. Groundwater samples collected from excavation and samples collected from monitoring wells on

103 EAST 10TH STREET (Continued) **S104620874**

adjacent sidewalks. Groundwater analyticals show: 87ppb 1,2,4-trimethylbenzene(GW2), 190ppb napthalene(GW2), 250ppb napthalene(GW1), 32ppb n-butylbenzene(GW1), 74ppb sec-butylbenzene(GW1). No site plan included. SUGGESTION: Groundwater analyticals collected from excavation show no free product and hence site is most likely not a source of contamination to 103 E 10th St. Contaminated Soil Excavation Report (Emteque)-October 2006. Groundwater was encountered at a depth of 14'-16' below grade. Prior to the completion of excavation work, a NYSDEC site visit confirmed the location of groundwater at 14-16' depth. Six endpoint samples were collected from excavation. As viewed onsite, it appears that contamination extends below the depth of groundwater and further cleanup is not feasible at this time . Soil endpoint analyticals show no TAGM 4046 Required Soil Cleanup Objective exceedences. 10/29/09-Vought-Called Emteque (Telemaque 212-631-9000) and left message to return call. 11/3/09-Vought-Received and reviewed Project Status Report from Day Engineering dated 10/27/09. In response, the Remediation Plan for Spill #99-13474 (Cody Ehlers Group; August 7,2002) was submitted and approved by the NYSDEC. The NYSDEC approved this remedial approach based on the December 22, 2003 report and on additional information that was provided to the agency in January 2004 . VOUGHT PERSONAL NOTE:DEC never approved this approach as per notes from Tipple dated 4/9/04. Groundwater at depth of 12'bg. Free product in wells W7, W23, W26 and W29 and product being recovered using portable pump. Product in well W29 can only be manually recovered from this well since building codes and space limitations preculde the use of an automated product recovery system for this well. Approximately 4.3 gallons of product have been removed from all site wells in the last 13 months since the last progress report was submitted... . A total of 52 gallons of product have been removed since manual recovery began on 10/23/03. ...the excavation work conducted on the property adjacent to 103 E 10th Street (i.e. 101 East 10th Street) and the presence of an underground oil storage tank (UST) and an 8-foot thick layer of petroleum contaminated soil at the property is probably the cause of the temporary increase in product thickness levels in these two wells that occurred over the past few years. VOUGHT PERSONAL NOTES: see 9/21 notes above. This indicates that petroleum contamination was present in the soil above the water tablee and that additional petroleum might still be present at that site . VOUGHT PERSONAL NOTES: See Iannone 9/6/06 letter where he states he saw no soil contamination onsite and furthermore Iannone states here groundwater is at 12'bg and hence soil contamination observed at 14-20'bg at 101 East 10th St is below the groundwater not above suggesting off-site source. Biweekly recovery was implemented as per DEC request in January 2008 and was compared against bi-monthly and overall the biweekly NAPL removal test program showed that this remedial approach provided little to no benefits but would significantly increase costs. NAPL recovery is performed bi-monthly now. VOUGHT PERSONAL NOTES: DEC still has not approved bi-monthly recovery. Note also that Remediation Plan does not identify the parties responsible for the removal of this vapor abatement system equipment. Dissolved groundwater samples collected from W8 and W9 and show no VOCs and wells were abandoned. Section also included on review of spill 0511701. Iannone notes that high VOC concentrations compared to SVOCs and this is an indication that petroleum release occurred relative recently since VOCs generally volatilize and are metablolized by natural microorganisms at a rate that is faster than

103 EAST 10TH STREET (Continued) **S104620874**

SVOCs. VOUGHT PERSONAL NOTE: This cannot be determined without VOC soil samples from 103 East 10th to compare, furthermore VOCS are only subject to active metabolism in groundwater as water necessary for enhanced aerobic degradation. Iannone also notes that VOCs detected in groundwater samples from excavation at 101 East 10th Street. VOUGHT PERSONAL NOTE: If 101 E 10th was source of free product to 101 then we would see free product at this site and not dissolved VOCs only. DAY believes based on a a review of the information obtained from the NYSDEC regarding the petroleum release at 101 East 10th Street that the petroleum contaminated soil at 101 East 10th Street is the source of most if not all the product that has been accumulating in wells W23 and W29 since January 2006. Overall, most if not all the product related to Spill 9913474 that was released in 1999 has been removed and is no longer present.... VOUGHT PERSONAL NOTE: Without downgradient delineation over the years one cannot state that product was removed. Furthermore manual bailing is not a plume wide remedial method. That is, continued use of these product recovery methods are expected to remove product from the spill 9913474 wells (W23 and W29) to the extent practicalbe as required by the Remediation Plan... VOUGHT PERSONAL NOTE: DEC requires removal of all free product (not to the extent practicable) and the Remediation Plan was never approved by DEC. 11/13/09-Vought-Called Telemaque after receiving his message and discussed letter from Iannone. Telemaque sent pictures to vought of large test pit in center of property that is not impacted with free product. Telemaque also noted that water was observed seeping into test pits at 23'bg suggesting tight soils and low recharge rates. Telemaque will research his report further and get back to Vought with file search results for additional information. Telemaque also open to attending meeting between 3/10 THC and DEC. Received email from Grogan that had attached document from Appleberg that listed groundwater monitoring well abandonment procedures, remediation equipment removal procedures. Document however does not state who should perform procedures. Vought sent reply asking for additional documentation as to responsibility. 11/24/09-Vought-Left message for Telemaque to see if he any any results of file research for additional information. Received email from Telemaque Prior photographs have also been forwarded to you subsequent to foundation installation and some of those photos document the infiltration of groundwater into the elevator pit under construction. This will provide an estimate as to the depth of groundwater encountered during the excavation. I had been at the site on several occasions and and never encountered free product in the standing water or the groundwater at the site. Our standard operating procedures on site of this nature, once free product is discovered, is to arrange for the recovery of free product and associated liquids and provide for the manifested disposal. These are services we normally subcontract and include as charges to our client. The absence of any liquid manifests would suggest that free product was not present. 12/14/09-Vought-Called and spoke to NYSOAG Riggi and Vought to send out letter in response noting that removal of remedial system past due as per Riggi letter dated 9/16/09 and also responding to Ule letters dated 9/22/09. Vought to address letter to Ule, owners of 103 and owners of 105 East 10th Street. Vought called and spoke to Kaplan and informed him of letter and current status. Vought drafted deadline letter requiring immediate meeting and submitted to NYSOAG Riggi for review. 12/16/09-Vought-Riggi and DEC Austin approved letter and Vought sent

103 EAST 10TH STREET (Continued) **S104620874**

letter to 3/10 THC and Steve Kaplan. 12/17/09-Vought-Received call from and spoke to NYSOAG Riggi who received call from and spoke to Ule. Ule noted that money in escrow by the building and that 3/10 THC will be removing both systems via Metropolitan Heating and Plumbing. Metropolitan key staff however has had a heart problem. Vought to call Riggi on 1/3/10 for update on work. Tentative meeting date scheduled at DEC offices for 1/6/09 to discuss current remedial status and future work. 12/31/09-Vought-Received email from Grogan that he received email from Ule that stated As discussed, we are targeting the vent removal job for mid January. Please provide me with any insurance requirements so that we can get them in place as a part of the contract with Metro. I will be in touch re access, scheduling, etc. Thank you Carol Ule . Vought also receieved email from Grogan as well that stated I received the below message from Carol Ule and it appears that this issue will finally be addressed. I have provided Ms. Ule with the necessary insurance and building guidelines regarding access to the building and the building work rules. 2) I have not, maybe you have them but we have not received any description of exactly what will be removed and who will be supervising the removal and who will be signing off on the completion of the work. 3) I received the following message from Marilyn Appleberg and I want to make sure that her concerns are addressed: John - there are vents - literally vents -in the front garden area that are vents and they are not to go. The pvc piping in the back was never referred to as vents - I just want to make sure we are all talking about the same thing - I don't think there will be a second shot at this and we should never assume. Could you please get a list of what is going and if there will be any odors associated with the removal. Thank you. Marilyn 4) I have informed Juan the Part Time Superintendent of the building of the up coming work and when the schedule is set he will be available to provide access to the necessary areas of the buildings that the removal team will need access to. Your attention and follow up to the above issues will be greatly appreciated. Thank you and have a Happy New Year! JJG . Vought also may require PID monitoring during piping removal due to odor concerns by Appleberg. Vought replied to Grogan and all parties requesting a site visit to determine which pipes will be removed. Site visit tentatively scheduled for second week of January and Vought awaiting replies on availability. 1/11/10-Vought-Meeting at DEC including NYSOAG Riggi (via telephone), DEC Austin, DEC Vought, Ule, Iannone and: Andrew Hafter 3/10 THC Ph: (212)477-5345. Topics for dicussion included status of system removal from 111 East 10th and system removal to begin tomorrow. Ule indicated that she spoke to Grogan who indicated that PID monitoring was not necessary. DEC required that a PID be onsite during removal in case odors should arise. Also covered was site status and current monitoring/recovery schedule including that product recovery occuring placement of pump to water surface (not depressing water table). Vought also noted requirements of dissolved groundwater sample collection from all wells without free product as well as need for determination of groundwater flow direction and possibly additional delineation. Vought and Austin agreed to VOCs only for monitoring parameters. Vought sent email to EAR Edward Werner with cc to Ule, Austin and Riggi requesting well survey information. Iannone noted that no sump pits were present in the basement of 103 E 10th Street. 1/13/10-Vought-Site visit and meeting with Iannone and contractor to remove vapor abatement and groundwater extraction piping (Mathew

103 EAST 10TH STREET (Continued) **S104620874**

Copeland-Metro Environmental-cell:516-216-0616). Also onsite was Marilyn Appleberg who noted piping to be removed, reviewed replacement of plywood, odor concerns. Method of piping removal will be mechanical only with no combustion or vapor generation. Vought however noted that windows should be kept open during removal of piping. Vought ensured that Appleberg, Copeland, Iannnone and super had eachothers contact information in case questions or concerns should arise during piping removal. Piping removal expected to occur for at least a minimum of two days. 1/14/10-Vought-Received EAR survey data for well elevation and forwarded to Iannone and Ule for review and determination of flow direction. Vought drafted review letter of Final Investigation and Remedial WorkPlan dated August 2010 and 10/27/09 Progress Report approving determination and installation of a downgradient (if necessary), not approving up to ten wells being sampled and requirement of all wells to be sampled, requirements of quarterly groundwater monitoring noting that Department would consider closure of individual pending submission of results, noting no further requirements of indoor air sampling, and no approval of manual NAPL removal as PERMANENT remedial method and as temporary only, and requiring implementation schedule. Vought submitted letter to Austin who reviewed and approved letter. Vought sent letter with deadline to submit revised Work Plan by 3/15/10 as per CAP. 5/20/10-Vought-Reviewed Revised Investigation and Remedial Work Plan (ERM unknown author) dated March 2010 and received on 3/18/10. Hand bailing of product in wells W29 and W23. Low NAPL thickness measurements are also occasionally recorded for wells W7 and W26 during these visits. One full round of groundwater elevation measurements will be collected for all 12 site wells to be used in flow determination. If it is determined that the direction of groundwater flow beneath the Site is north, then a new monitoring well MIGHT be installed on East 11th Street. If groundwater flow is determined to be to the north, a new 2-inch diameter monitoring well WILL be installed downgradient of the 3/10 THC property in the sidewalk along East 11th Street. The new monitoring well will be installed to 20 feet below grade or to bedrock, whichever is shallower . Wells W8, W9, W3, W1, W11, W12 and W13 abandoned as they were in basement of 105-107 or showed recent low levels of dissolved groundwater contaminants comparable to TOGS Standards. The monitoring will be done quarterly for up to two years unless an alternate schedule is approved by NYSDEC. Report also proposes VEFR on a monthly basis for a period of six months. After six months its effectiveness will be evaluated and a determination will be made whether or not to continue the program . Report also proposes possible use of ORC socks but does not note groundwater monitoring parameters for monitoed natural attenuation. Work Plan also includes proposed implementation schedule with water level measurements in March, groundwater sampling in June, well installation in June, VEFR from June to Nov, installation of ORC socks in June. Quarterly groundwater sampling also proposed in schedule. VEFT removal of NAPL will commence within 2 to 3 weeks of NYSDEC approval of the use of this NAPL removal methods..... . Vought sent email to John Grogan to confirm satisfaction with with SVE and product recovery system removal. Vought drafted Work Plan review letter for editting and approval by DEC Austin and Riggi. Vought received email from Grogan that Jeffery, The best of luck too you in your next assignment. Haz-Mat sounds dangerous so please be careful. To the best of my knowledge we are finished I cannot speak for Marilyn I trust she will

103 EAST 10TH STREET (Continued) **S104620874**

reply. Thank you again for all of your help. JJG 5/25/10-Vought-Sent letter to 3/10 THC requiring resubmission of Revised Investigation and Remedial Action Plan by 6/28/10. Plan to include clarification as to whether downgradient well MIGHT or WILL be installed if groundwater flow to the north, installation of monitoring well if groundwater to the north, to WATER and not 20'bg or bedrock, inclusion collection of deepest dry and highest PID soil sample collection if new well needed, Inclusion of sample collection from W21, performance of quarterly monitoring until spill is closed as opposed to for a period of up to two years , submission of a RAP upon completion of investigation and no ORC application without Department approval. Letter also approved implementation of VEFR and determination of groundwater flow direction. DEC requires: 1)cc to Iannone, Ule and Riggi. 2)Remediation Plan must contain an implementation schedule. 3)Replacement of historical flagstone sidewalk (flags may be stored in buildings as per DEC Tibbe)when wells are abandoned. 4)Resubmission of Work Plan by 6/28/10 including clarification as to whether downgradient well MIGHT or WILL be installed if groundwater flow to the north, installation of monitoring well if groundwater to the north, to WATER and not 20'bg or bedrock, inclusion collection of deepest dry and highest PID soil sample collection if new well needed, Inclusion of sample collection from W21, performance of quarterly monitoring until spill is closed as opposed to for a period of up to two years , submission of a RAP upon completion of investigation and no ORC application without Department approval. 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A. 6/29/10 - Raphael Ketani. Today, I received the Second Revised Investigation & Remedial Work Plan dated June 2010 from ERM. I reviewed the SRI & RWP and composed a letter with the following comments: 1) purge water is to be disposed of in drums and not returned to the respective wells. 2) all environmental samples are to be analyzed via methods 8260 and 8270. 3) VEFRing is acceptable. 4) ORC is not to be used until all of the free product is recovered. 5) Socks are not to be used until the product thickness has reached such a limit that VEFRing is no longer effective. 6) All future groundwater monitoring reports are to contain groundwater flow maps and product thickness maps to the nearest hundredth of a foot. 7) New well development must not take place less than 24 hours after well construction in order to allow the grout time to cure, and care must be taken regarding the air pressure used for development. 8) New well sampling must not take place earlier than two weeks from the date of development. 9) The location of the proposed well (MW-30) is acceptable. 10) An additional new well (MW-31) must be installed along East 11th Street directly opposite 103 East 10th Street. The letter was sent to Randall Austin, Chief of the Spills Unit, for his approval. Interested party addresses: 3/10 Tenants Housing Corporation, 25 8th Avenue, Brooklyn, NY, 11217 Carol Ule, Esq., Hartman Ule Rose & Ratner, LLP, 305 Broadway, NY, 10007, (212) 437-9110 John Iannone, PE, Day Engineering, 60 East 42 Street, Ste 1641, NY, 10165, (212) 986-8645 Bonnie Riggi, Esq., Assistant Attorney General, Oil Spill Unit, State of New York, The Capitol, Albany, NY, 12224 7/1/10 - Raphael Ketani. The letter was approved by Mr. Austin and was sent out today to 3/10 Tenants Housing Corp., Mr. Iannone, Ms. Ule, and Ms. Riggi. 7/9/10 - Raphael Ketani. The letter to Mr. Iannone came back Not Deliverable As Addressed. I contacted Mr. Iannone (212) 986-8645 and obtained the correct address for Day

103 EAST 10TH STREET (Continued) **S104620874**

Engineering. It is 274 Madison Avenue, Ste 1104, NY, 10016. I will send out a letter with the correct address. 7/12/10 - Raphael Ketani. The letter to Mr. Iannone was resent to Madison Avenue. 7/21/10 - Raphael Ketani. I met John Iannone, PE of Day Engineering (212) 986-8645 at 103 East 10th Street for a scheduled meeting. He showed me some of the wells that were still active. We discussed the site and what should happen next. He said that there was between 0.2 feet and 0.4 feet of oil in the well in the basement of 103 East 10th Street. Mr. Iannone commented that the oil was thickest at this well. He said that they have been doing vacuum events to collect the oil. He mentioned that groundwater had lately been determined to flow north, instead of south as it had been during most of the project. I told Mr. Iannone that wells should be installed along 11th Street (to the north) in order to see whether the groundwater and the oil are migrating in that direction. Mr. Iannone suggested doing geoprobe drilling first. He added that if the soil sampling shows that the oil is indeed moving north, then he will install a well or two. I told him to submit a proposal to DEC and I will take a look at it. He said that he will. Next, we discussed the handling of the purge water from the wells. Mr. Iannone said that it was expensive to get rid of it, and the co-op association at 103 East 10th Street was paying for everything out of their pockets. He asked whether he can reinject the purge water back into each respective well. I told him that once the water is out of the ground, then its chemistry changes and that reinjecting the water changes the chemistry of the groundwater. I added that we would never know the true groundwater chemistry after the injections. I suggested to Mr. Iannone that he should either have a drum on a truck which can be used to contain the purge water, or he can put a drum at the corner of 101 East 10th Street where it meets 103 East 10th Street, and put the purge water in there. I added that he should put the drum in an overpack drum so that it can be opened easily and to chain the drum to the railing of the garden area. Mr. Iannone said that this was a possibility. I asked Mr. Iannone for regular progress reports for the site. He said that he will send them to me. After this, the conversation ended. Mr. Iannone handed me the July 2010 Project Status Report. I reviewed the report for spill case #9913474. Groundwater is contained within the overburden material that covers the bedrock. The water table is at 12 feet below grade. Oil and gas contaminated soil was found at 101 East 10th Street (the new building at the corner where a gas station used to be) at up to 20 feet below grade. Spill case #0511701 was initiated. The soil was excavated to about 22 feet below grade and removed. Digging could not continue further. Perched groundwater was encountered in the excavation at various levels. There was very little contamination in the groundwater. Soil end point samples came up at about TAGM. A passive venting system and vapor barrier were installed. The spill case was closed on 10/23/07. Product is still being recovered from W23 and W29, with sheen observed in W7 and W26 (product thickness below 0.01 feet). W29 is in a basement store room at 103 East 10th Street. During the reporting period, a total of 3.12 gals. of oil were removed from all of the active wells. Over the past 6 years, the product thickness has generally decreased to as low as 0.1 feet in W29. A total of 55 gals. of oil have been recovered since manual bailing began on October 23, 2003. The venting system was removed on 7/8/09 from 105 to 111 East 10th Street after a NYCDOH inspection failed to detect any vapors in the homes. 11/18/10 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. I told him that the DEC was

103 EAST 10TH STREET (Continued) **S104620874**

missing the August, September, and October update reports. Mr Iannone explained that he will send the DEC an update report very soon. He added that they have been collecting oil with peristaltic pumps since they can't get a guzzler truck down the street (no one is obeying the alternate side of the street parking rules). He said that the oil in the one well is consistent at 2 to 4 inches. I asked him about the well that was supposed to be installed on 11th Street. Mr. Iannone said that they are still working on getting the permits for drilling through the sidewalk. I ended the conversation by telling Mr.Iannone that he must send the DEC an update report. 12/8/10 - Raphael Ketani. I received the December 2010 Project Status Report from Mr. Iannone. I reviewed the report. It gave a history of the oil recovery efforts from July 16, 2009 to November 23, 2010. only 3 wells have continued to collect oil. These wells are W-7, W-23, and W-29. Due to the difficulty of parking the guzzler truck on the street, a peristaltic pump has been used to recover the oil from the affected wells. A total of 0.57 gals. of oil was recovered during the past 5 months since July 2010. Another well will be installed to the north of the spill site on 11th Avenue. However, bid proposals are still being received. 1/28/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that his workers conducted three oil recoveries since 12/8/10. They collected about 1 pint of oil from the 2 inch well at W-29. Sometimes it takes a few weeks until any oil appears in the well. The other two wells have had only occasional sheens. Mr. Iannone said that the co-op doesn't understand why another well is being requested by the DEC. He said that they are very strapped for money and are having a hard time understanding what the plan is. He asked for a meeting between the co-op board, himself and the DEC. I told him that I was willing to have a meeting and I asked him to set it up. 2/3/11 - Raphael Ketani. A site meeting took place today between Mr. Iannone, Andy Hafter - co-op treasurer, Carol Ule - co-op attorney (212) 437-9110, and myself. Previously, Mr. Iannone had indicated that this was going to be a meeting with the co-op board, him and myself. So the presence of Ms. Ule was a surprise. However, the meeting took place anyway. Both Ms. Ule and Mr. Hafter took active roles in the discussion. Mr. Hafter stated that the co-op was just about out of money and couldn't do more work. He said that some co-op owners were not paying their maintenance and that 1 dollar out of every three was going to the environmental work. Ms. Ule stated that the co-op had cooperated with the DEC and had paid back over $600,000 dollars of the State's money as part of the agreement. She said that she had talked to Bonnie Riggi, the State attorney general, and had worked out the settlement. Ms. Ule also stated that the special mortgage that was being used to pay for the present environmental work was going to run out soon. She added that the co-op couldn't get another special mortgage until after some time. I told both of them that the money issues were not the State's concern. I told them (Iannone, Ule, Hafter) the the DEC was insisting on having wells installed along East 11th Street as the groundwater was now flowing in that direction. I told them that it needed to be seen whether oil is flowing off site and whether there is more oil under East 11th Street from the spill. Both Ms. Ule and Mr. Hafter said that the oil may be from the 101 East 10th Street site where there used to be a commercial facility - a site that now has a high rise condominium building. Mr. Hafter said that there was a tremedous amount of contamination in the site. He said that he saw truck after truck taking out contaminated soil. Ms. Ule said that there was oil

103 EAST 10TH STREET (Continued) **S104620874**

in the site and she said that I had closed the site anyway. I told her that I vaguely remembered the site and that I wouldn't have closed the spill case if oil contamination was present. Ms. Ule said that there may be oil under the sidewalks. I told her that I had inspected the site and I had seen oil floating on water in the bottom of the excavation pit. I had told the site manager to collect the oil. Mr. Hafter then said that the pit wreaked strongly of oil and everyone in the neighborhood was aware of this contaminated site. I told him that the contaminated soil was being taken away by the construction company. Mr. Hafter stated that he saw many trucks leaving the site with soil. I added that I had looked at the sidewalls of the site - under the sidewalks along East 11th Street and along East 10th Street and along the foundation of 103 East 10th Street - and I didn't see any seeping oil or oil staining. Ms. Ule asked Mr. Iannone whether there were any signs of oil in the wells along Third Avenue (the cross street to East 10th Street). Mr. Iannone said that there was nothing. I insisted that a series of wells be installed along East 11th Street. Ms. Ule stated that there just wasn't any money to do this. She added that the State wouldn't want to see another co-op go bankrupt. I again told her and Mr. Hafter that the groundwater had changed direction and that the DEC needed to know what was going on. Ms. Ule stated that we don't know that oil is there or heading in that direction. I responded by stating that we don't know that it isn't heading north and off-site. Ms. Ule countered that they could put in the wells and discover oil and it would be from a site along East 11th Street or from the new condominium. She added that any oil found would be pinned on 103 East 10th Street. I told her that, with a series of wells, the DEC would be able to determine who owns the spill along East 11th Street. Ms. Ule then asked Mr. Iannone (who had said almost nothing through the meeting) why the groundwater flow direction had changed from south to north. Mr. Iannone said that he had no idea. Mr. Hafter asked whether the installation of the high rise condo had changed the flow direction. Mr. Iannone said that he didn't know. Ms. Ule asked whether the agreed upon plan to install one well along East 11th Street could be implemented. She added that if oil would be found there, then more wells could be put in. I told her that the DEC wanted a series of wells put in, not just one. Ms. Ule said that they didn't have the money. At this point in time, I tried to contact Jeff Vought, the previous case manager by cell phone in order to have him join the discussion. However, he informed Randy Austin, Chief of the Spills Unit, about my meeting and Mr. Austin told me to stop talking to the group. After this, I stopped talking to them. Ms. Ule ended the discussion by stating that nothing was agreed upon here and so this could still be discussed further. I told her that she needed to talk to the DEC counsel, John Urda, in order to arrange an investigation plan. I added that I couldn't talk to her anymore. With that, I left. 2/10/11 - Raphael Ketani. At the suggestion of Mr. Austin, I put together a Case Initiation package for legal action. The basis of the case is the violation of the STIP and a failure to perform further investigative action and remedial action. Mr. Austin and I signed the Case Initiation cover form and it was delivered by hand to the regional Office of General Counsel. 2/14/11 - Raphael Ketani. James Periconi (212) 213-5500, attorney for 3/10 Tenants, sent an e-mail to John Urda of the Region 2 Office of General Counsel. In the e-mail he protested the alleged change in the agreed upon work plan from one well on 11th Street to a series of wells

103 EAST 10TH STREET (Continued) **S104620874**

along 11th Street. He also requested a meeting between staff from the Department and himself. 2/28/11 - Raphael Ketani. Mr. Periconi sent Mr. Urda an e-mail stating that they didn't understand where the DEC wanted the two wells. Mr. Urda asked me to talk to Mr. Iannone. I talked to Mr. Iannone and explained that one well should go in the backyard of 103 East 10th Street. He said that it's not a backyard, but a front yard to a church property. As this was the situation, I told Mr. Iannone that the well should be in the sidewalk in front of the church property. I added that the second well should be 30 feet to the east to possibly catch additional oil flow. Mr. Iannone said that the co-op doesn't have the money to install two wells. He stated that the DEC should ask for just the one well because the co-op is struggling. They can't even get the money to repair the roof. I told Mr. Iannone that I was calling just to clarify where the wells should go, not the issue of how many wells will be agreed upon. I added that the agreement is between Mr. Urda and Mr. Periconi. With that, the conversation ended. 3/11/11 - Raphael Ketani. I received an e-mail containing a letter Mr. Iannone had sent to Mr. Periconi. The letter was titled Evaluation of the NYS DEC Request for Additional Wells. I read the letter. Mr. Iannone seemed to understand the change in groundwater flow direction. he indicated that one well due north of the site would tell everyone whether oil was migrating towards 11th Street. However, he indicated that no more than this one well should be installed. Attached to the letter were flow direction maps showing the change in flow direction over the course of a number of years. 3/17/11 - Raphael Ketani. John Urda of Region 2 Office of General Counsel sent an e-mail to Jim Periconi, the attorney for 103 East 10th Street. In the the e-mail, Mr. Urda stated that Day Engineering needed to submit a work plan to the DEC for installing two groundwater monitoring wells and for doing weekly product recovery. If oil is found in the wells, then further groundwater contamination delineation would be required. The plan is due on March 25, 2011. Mr. Urda added that an investigation report would need to be submitted after the work is done and then a remedial action work plan. The deadlines for submission of these plans would be agreed upon between Mr. Iannone and Mr. Ketani. Both work plans and the investigation report will become part of the STIP agreement. 3/23/11 - Raphael Ketani. Mr. Iannone (212) 986-8645 sent me an air photo showing the proposed locations of MW-31 and MW-30. I reviewed the photo and told him that the locations were acceptable and to start the work. 3/24/11 - Raphael Ketani. Mr. Iannone sent me an e-mail requesting permission to use the STARS methods for VOCs and the SVOCs. I told him that he can use these simpler methods. 3/25/11 - Raphael Ketani. Chuck Merritt (631) 617-6200 of Merritt Environmental called regarding what was taking place at 103 East 10th Street and why the associated spill (#9611309) for 105-107 East 10th Street was still open. I explained the issue to him, how 103 is related to 105 and 107, and that investigation work was proceeding with Day Engineering. Mr. Merritt said that his client was trying to refinance his mortgage for 105 East 10th Street and that the bank was asking what was the environmental situation. I told Mr. Merritt that he can talk to Mr. Iannone and get some information and then maybe he can put together a report for the bank that will explain everything. Mr. Merritt said that he had been to the site himself (105 East 10th Street) and he didn't find any problems. I added that until the situation at 103 East 10th Street is resolved, the spill case for 105-107 East 10th Street can not be closed. Mr. Merritt said that he understood. Later,

103 EAST 10TH STREET (Continued) **S104620874**

Eric Weinstock of C A Rich Consultants called me. He asked why the spill case had been reopened when Michelle Tipple had closed it in 2004. I told him that I did see a case note indicating that Ms. Tipple had written an NFA letter dated 8/19/04. However, from reviewing the notes, I could not determine why the case had been reopened or when. I told him that there still was an ongoing spill case with 103 East 10th Street and that the cases for both sites were associated with a State PIN case, which was still open. I added that, maybe, the open PIN case was the reason, but I just wasn't sure and I couldn't find anything in the notes to clarify the matter. I told him to talk to Mr. Vought when he comes back from vacation order to find out the answer as to why the case is still open. Later, Miriam Villani of Sahn Ward Coschignano & Baker, PLLC (516) 228-1300 sent an e-mail to Jeff Vought (the former case manager) and John Urda, Assistant Regional Attorney for DEC, requesting that the spill case for 105-107 East 10th Street (#9611309) be closed. The reason for the request is that her client, Walden Pond Realty, LLC, is trying to refinance its mortgage. However, Mr. Vought wont return until 3/31/11, the day of the closing. 3/28/11 - Raphael Ketani. I received the Day Engineering Remedial Investigation and Remedial Action Work Plan dated 3/25/11. I reviewed the plan and found it to be acceptable. I sent a draft letter to Mr. Austin for his approval. In the letter I added that Day Engineering should: (1) perform two rounds of groundwater sampling, not just one, for MW-30 and MW-31; (2) that if the groundwater does not meet the State standards, then it should be VEFRed; (3) that the wells should be left in a useable condition for determing the groundwater flow direction, even if no oil is found; (4) when access to 10th Street for the VEFR truck is prevented by parked cars, Day Engineering should contact the local precinct; (5) product collection should be performed with an alternative mechanical means when use of the VEFR truck is prevented The letter was approved and sent out today. 3/29/11 - Raphael Ketani. Mr. Iannone (212) 986-8645 sent a letter in which he responded to the DEC's 5 comments above. 103 East 10th Street and Day Engineering agreed to abide by the comments. 3/31/11 - Raphael Ketani. The associated spill case, #9611309, was closed today as the spill had been remediated. The Final ISR was signed by Mr. Austin and Mr. Oliva and sent to Albany DER today. 5/10/11 - Raphael Ketani. Mr. Iannone (212) 986-8645 sent me an e-mail stating that wells MW-30 and MW-31 would be installed on either May 24th or the 25th. He attached an air photo showing where the wells would be installed. This was the same photo as in the 3/25/11 work plan. I responded back by e-mail that the locations looked fine and that he should proceed as he had planned. 5/20/11 - Raphael Ketani. Mr. Iannone sent me the May 2011 status report dated 5/20/11. I reviewed the report. Wells W7, W21, W22, W23, W26, W29 were used as the monitoring array. Wells W7, W23, W26, and W29 are the wells that have product. Manual product recovery started on October 21, 2003. Product thickness varies from 0.001' to 0.005'. About 1.12 gals. of product were recovered during this reporting period. About 56 gals. of product have been recovered from October 21, 2003 to May 19, 2011. Two new monitoring wells, M30 and M31, will be installed on May 24, 2011 along 11th Avenue in a downgradient position. 5/24/11 - Raphael Ketani. I spoke to Mr. Iannone about the well installations. He said that they were at the locations all day and that he had just returned. He said that they hit refusal at the original locations for MW-30 and MW-31. The driller told him that they were constrained by NYC DOT regulations

103 EAST 10TH STREET (Continued) **S104620874**

regarding how close to the street side of the sidewalk they could drill. So they didn't have much room to try and install the wells. They hits boulders at about 1 feet and 4 feet below grade. Finally, they were able to install MW-30 in front of the church and between the two original locations. They drilled with augers to 15 feet and then punched down to 18 feet. A one inch diameter well was installed. There was about 3 or 4 feet of water. The soil samples had PID hits of 9 ppm to 11 ppm. Mr. Iannone said that they will let MW-30 sit for awhile (about several weeks) and then sample it along with the other monitoring wells. I asked Mr. Iannone to send the DEC a full report regarding the well installation and sampling. He said that he will. Later, Mr. Iannone sent me a picture showing the drilling and a picture showing the final location of MW-30. 7/11/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that he had received the data for the latest round of groundwater sampling just last week. He is in the process of putting the report together and will send it to the DEC by July 22. I told him that sounded fine. 8/2/11 - Raphael Ketani. Mr. Iannone sent me the 2011 Remedial Investigation and Remedial Action Results Report dated 7/29/11. I reviewed the report. They hired ADT to install MW-30 and MW-31. However, ADT hit refusal at the locations for installing the two wells. So, only MW-30 was installed between these locations as a one inch diameter well. Soil samples were taken on 5/24/11 from MW-30 at 6.0 to 6.5 feet down, 9.0 to 9.5 feet down and at 15.0 to 15.5 feet down. The results showed toluene at less than 1 ppb and one hit of ethylbenzene at less than 1 ppb. The SVOCs were virtually all non-detect. Groundwater samples were taken on 6/9/11 from MW-18 to MW-21, MW-24 to MW-30. The VOCs were almost entirely non-detect, except for a few very low hits (typically below 17 ppb) in MW-24, MW-26, MW-28 and MW-30. The SVOCs were almost entirely non-detect. On 6/2/11, groundwater flow was to the northeast. In the Conclusions section, Mr. Iannone mentions that only 0.4 gals. of oil were collected in the past 6 months. Also, there was no product at MW-7, MW-22 and MW-26 during the past year and product was less than 0.1 feet in MW-23 and MW-29. Product was usually a sheen in these wells. Considering the information in the Conclusions section, Mr. Iannone recommended closing wells MW-18 to MW-21, MW-24, MW-25 and MW-27 due to low product recovery. He also recommended quarterly monitoring and groundwater sampling at MW-7, MW-22, MW-23, MW-26, MW-28 to MW-30. Lastly, he recommended product monitoring and removal from MW-7, MW-22, MW-23, MW-28 to MW-30. I sent an e-mail to Mr. Iannone approving the RIRAR Report. I also stated that none of the wells should be plugged and abandoned as they have value for determining the groundwater flow direction. So those 7 wells should just be used for groundwater elevation measurements. I added that groundwater sampling should take place as recommended and that product recovery should take place as recommended. Lastly, I suggested that some more efficient means of product recovery should be used to collect oil from MW-23 and MW-29. Later, Mr. Iannone sent a response e-mail stating that MW-23 had 0.07 feet of oil and MW-29 had 0.03 feet of oil. 9/9/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that the next (second) round of groundwater sampling is scheduled to take place next week. He also mentioned that an oil sheen was occasionally seen in the new well, MW-30. I asked him whether Day Engineering had come up with an effective alternate means of collecting the oil. He said that they hadn't. However, he said, it was an easy task to have his staff come down to the site to collect

103 EAST 10TH STREET (Continued) **S104620874**

the oil and do other work as their office is nearby. 10/18/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that he had the groundwater results. He will put them together with the product collection data and submit a status report to the DEC sometime this week or next week. 10/31/11 - Raphael Ketani. Mr. Iannone called to say that the groundwater report will be sent to the DEC by wednesday. I told him that would be alright. 11/15/11 - Raphael Ketani. Mr. Iannone sent me the 11/15/11 September/October 2011 Day Engineering Groundwater Monitoring and Project Status Report. On 9/16/11, wells W7, W22, W23, W26 and W28 to W30 were sampled. Wells 7, 22, 23, 29 and 30 had oil from a sheen to 0.73 feet in W30. Well W30 has had product from 0' to 1.2' since installation in May 2011. Wells W29 and W30 which had the most oil also had the highest contamination. Analytes 1,2,4-trimethylbenzene, total xylenes and ethylbenzene were in the high double digits to the low triple digits. A total of 1.43 gals. of oil has been recovered from the wells in the past 14 months. I responded to Mr. Iannone's e-mail and told him not to sample the groundwater in wells that had even a sheen of product. 7/6/12 - Raphael Ketani. I reviewed the June 2012 Groundwater Monitoring and Project Status Report dated 6/6/12 and submitted by Day Engineering. Groundwater gauging and sampling took place at W7, W22, W23, W26, W28 to W30 on 2/7/12. Product or sheen was present in all of the wells except W22. W22 had two VOC exceedences of the groundwater standards in the low triple digits (no higher than 180 ppb), but the rest of the exceedences were much lower. About 1.47 gals. of product were collected during the past 13 months. Groundwater flow was to the north to W30. Mr. Iannone recommends curtailing groundwater sampling for the time being and instead injecting ORC into the wells with sheen or product in order to reduce the amount of oil in the subsurface. I approved the June 2012 report and wrote a draft letter stating the Department was approving the recommendation to end groundwater sampling. However, we were not going to approve the use of ORC in the affected wells until Day Engineering submits a work plan describing the treatment program. I set a deadline of August 3, 2012 for receipt of the work plan. The draft letter was submitted to Hassan Hussein for his review. Mr. Iannone wrote that Day Engineering closed their New York office. All correspondences should go to John Iannone, P.E., Day Engineering, P.C., 2711 Henry Hudson Parkway, 7C, Bronx, NY, 10463. Mr. Hussein approved the letter and it was sent out today. 8/3/12 - Raphael Ketani. Mr. Iannone (347) 204-7852 sent me the 8/3/12 Oxygen Release Compound Treatment Work Plan. I reviewed the work plan. Treatment socks will be installed in wells W7, 22, 23 and 26. All of these wells have exhibited sheen. Product thickness will be monitored and product will be collected and the thickness will be included in a quarterly report. The great majority of the report consisted of appendices with the standard manufacturer literature. I drafted a letter for Mr. Hussein approving the work plan with the comments that Day Engineering must adhere to the service limits of 12 months for the ORC filter socks and 3 to 6 months for the EHC-O canisters. The letter was approved and was sent out. 3/14/2013 - Raphael Ketani. I sent Mr. Iannone an e-mail requesting an update regarding progress at the site. 3/21/13 - Raphael Ketani. I received and reviewed the March 2013 Project Status Report dated March 20, 2013. Product is still appearing and averages about 0.1 feet in W7, W23, W26 and W29. Well W30 has averaged 0.55 feet of product since its construction during May 2011. Recently, the product in the well has averaged 0.45 feet in

103 EAST 10TH STREET (Continued) **S104620874**

thickness. Groundwater flow has continued to the north. On 9/7/12, ORC socks were installed in W7, W22, W23 and W26. On 2/23/13, the oil was 0.61 feet thick in W30. On this same day, the oil was 0.39 feet thick in W23 and 0.02 feet thick in W29. 12/13/13 - Raphael Ketani. I spoke to Mr. Iannone (347) 204-7852 regarding progress at the site and the lack of monthly reports. Mr. Iannone stated that he is presently working on the next progress report and that it will have all of the data from the past 9 months. He also said that more ORC had been put in the wells and that the thickness of the product is now down to a matter of a few inches at most. I commented that well W30 had a persistent thickness of product of half a foot. I asked him whether the oil was being removed from this well. He said that it was, but, sometimes, it has no water. Mr. Iannone said that I should expect the next report to be delivered next week. 1/21/14 - Raphael Ketani. I reviewed the December 2013 Project Status Report dated 12/31/13 and submitted by Day Engineering. Measureable amounts of product have not been accumulating in wells W7, W21, W22 and W26 during the past 9 months (April to December 2013). Product was found in W23, W29 and W30. The product thickness in averaged 0.1 feet in W23, only a sheen in W29 and 0.5 feet in W30. A total of 4.20 gals. of product were collected during the past 9 months. Groundwater flow is to the north towards W30. From April 6 to October, and on November 16, 2013 and during December, only product monitoring and removal took place. On November 1, 2013, the ORC socks were replaced on wells W7, W22, W23 and W26 and product monitoring and removal. I drafted a letter approving the December 2013 report and requesting that 3/10 Tenants Housing Corp. find a more efficient method for collecting the oil from well W30. The letter had a deadline of February 21, 2014 for submitting the alternative method work plan. The letter was submitted to Mr. Hussein for his approval. 1/22/14 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out. 2/17/14 - Raphael Ketani. Mr. Iannone sent me an e-mail requesting an extension of the deadline for submitting the alternative recovery work plan for W-30 (as was requested in the DEC 1/22/14 letter). The reason for the request was that Mr. Iannone is retiring and the new consultant will need to be transitioned once the new contract is in place. I granted the request for extending the submission deadline to 3/28/14. 4/1/14 - Raphael Ketani. Sean Clifford of Brockerhoff Environmental Services, LLC (908) 689-4300/seanc@brockerhoffllc.com called and left a message stating that he is the project manager for the spill. 4/3/14 - Raphael Ketani. I reviewed the Light Non-Aqueous Phase Liquid Interim Response Action Workplan dated 3/27/14 and submitted by Brockerhoff Environmental Services, LLC. The objective is to enhance LNAPL recovery through mass removal with subsequent monitoring. Product removal will take place 3 times per month for 6 months. Each removal event will last 3 hours, instead of the 1 hour that was previously spent. BES will measure the depth to water and the depth to product. A perstaltic pump will be used to remove the product. Product recovery will be done until the product thickness is 0.1 . ORC treatment will take place in the wells that have NAPL. Filter socks will be installed with ORC in wells W7, W22, W28 and W29. During each site visit, the socks will be inspected and their depth will be adjusted. At the end of 6 months BES will submit a report to the DEC. I found the work plan to be acceptable and sent an e-mail to Mr. Clifford stating so. 6/24/14 - Raphael Ketani. I sent an e-mail to Mr. Clifford (908) 689-4300/seanc@brockerhoffllc.com requesting a progress update. Later, I received and e-mail from Mr.

103 EAST 10TH STREET (Continued) **S104620874**

Clifford. He stated that they have implemented the activities in accordance with the workplan (Light Non-aqueous Phase Liquid Interim Response Action Workplan dated March 27, 2014) which was approved in April 2014. A progress report will be submitted six months following implementation of the workplan which will summarize the groundwater and product level measurements and include a discussion of site observations and activities. They anticipate submitting this report in November 2014. 11/7/14 - Raphael Ketani. Mr. Clifford left me a voice message. He stated that they plan to pursue a more aggressive means of NAPL recovery. He will contact me later regarding the details of their plans. 11/25/14 - Raphael Ketani. I reviewed the Brockerhoff Environmental Services Progress Report: Remediation and Monitoring of LNAPL dated 11/14/14. From April to October 2014, 6 site visits took place to monitor the groundwater and collect product. Product was detected in only 3 wells during this period. These wells were W23, W29 and W30. A total of 0.36 gals. of product was recovered during this period. Since October 2013, a total of 61.5 gals. of product has been recovered. ORC socks were put into wells W7, W22, W23 and W29. The LNAPL thickness showed a decreasing trend and had reduced to a thickness of 0.02 feet in the respective wells. Brockerhoff recommends: reducing LNAPL monitoring and recovery to once a month; continue using ORC socks in W7, W22, W23 and W29 and inspect the socks monthly and replace them semi-annually; provide a summary report to the DEC at 3 months, 6 months and 9 months. The report did not include a plan for sampling the groundwater in the wells which didn't have product and didn't include monitoring W30. Also, I determined that reporting every 3 months for 3 quarters was not informative enough. Groundwater sampling for STARS VOCs and SVOCs must take place at wells W21, W24 and W26 to W28 twice a year. The reporting must be quarterly. I sent an e-mail to Mr. Clifford (908) 689-4300/ seanc@brockerhoffllc.com approving the report, but stating the above comments. 12/19/14 - Raphael Ketani. Mr. Clifford sent me the following email: Last night I spoke with the attorney representing the association and she indicated that they are willing to move forward with the plan outlined in the approved workplan and the additional conditions noted below. There has been a little bit of a delay in authorizing the work however because they just had a re-shuffling of the association board so that has added a little bit of an administrative related delay. Based on my discussion, I expect the authorization to be wrapped up soon and that the new scope of work will be implemented starting in January. In the meantime, the association is committed to addressing the remaining impacts and have authorized the three recovery/monitoring events per month to continue. 12/24/14 - Raphael Ketani. Mr. Clifford (908) 689-4300 sent me the following email: The 3/10 Tennant Housing Corporation is ready to move forward with the scope of work detailed in the Progress Report dated 11/14/2014 and the additional comments summarized below. This scope of work will be initiated in January 2015 and will include the following: -Monthly LNAPL monitoring and recovery events at W23, W29, and W30. -Quarterly updates to NYSDEC regarding findings of investigation and progress made. These updates will be scheduled for March, June, September, and December 2015. -Semi-annual installation/replacement of ORC socks within W7, W22, W23, and W29. This work will be scheduled for January and June 2015. -Semi-annual ground water sampling at W21, W24 and W26 to W28 for NYSDEC STARS list VOCs and SVOCs. This work will be scheduled for February and August 2015. I found the proposed schedule/work plan to be acceptable

103 EAST 10TH STREET (Continued) **S104620874**

and sent a response email to Mr. Clifford stating this. 2/11/15 - Raphael Ketani. Mr. Clifford sent me an email stating that groundwater sampling took place on 2/10/15. However, upgradient well MW-27 could not be accessed. He asked whether Brockerhoff should go back and try again to get to the well. I responded that they could skip the well this time and sample the well during the next round. 3/31/15 - Raphael Ketani. I reviewed the Brockerhoff Environmental Services, LLC 3/31/15 Progress Summary. The period covered was from January to March of 2015. The services performed were gauging, ORC sock installation and groundwater sampling. The wells were inspected during January, February and March. During the 1/20/15 inspection, product was found in W23 (0.03'), W29 (0.02') and W30 (0.01'). NAPL was not seen in the wells on 2/10/15 or 3/20/15. However, due to the thinness of the product there was no NAPL collection. ORC socks were installed in W7, 22, 23 and 29 on 1/29/15. Wells W21, 24, 26 and 28 were sampled on 2/10/15. The VOC results were either entirely non-detect or had non-detects with many hits either below the TOGS standards or just above. The SVOC results were either entirely non-detect or mostly non-detect with a small number of hits below the TOGS standards. 7/8/15 - Raphael Ketani. I reviewed the Brockerhoff Environmental Services, LLC 6/30/15 Progress Summary. The period covered was from April to June of 2015. The services performed were gauging and ORC sock replacement. During the 6/11/15 inspection, product was found in W7, W22, W23 and W29. The thickness of the product in each well was no greater than 0.01'. Due to the thinness of the product there was no NAPL collection. ORC socks were reinstalled in W7, 22, 23 and 29. Groundwater sampling will take place during August 2015 at W21, 24, 26, 27 and 28. While I found the report to be acceptable, there was no mention of MW-30. I sent an email requesting an update regarding its status (i.e. presence of oil and how thick). Mr. Clifford responded by email and stated that well MW-30 was gauged for product at the same time as the other wells, but nothing was found. 10/1/15 - Raphael Ketani. I reviewed the Brockerhoff Environmental Services 10/1/15 Progress Summary - Remediation and Monitoring of LNAPL. The monitoring period was July to September 2015. During this time, monthly groundwater monitoring and semi-annual groundwater sampling took place. The wells were inspected for LNAPL during July, August and September. The LNAPL thickness was less than or equal to 0.02 feet at all of the wells during July and August. During September, W-29 was found to have 0.41 feet of product. A total of 0.08 gallons of oil was collected. The appearance of the thicker layer of product may have been due to the 0.98 feet drop in the water table during August. W-29 was revisited on 9/16/15 and only 0.11 feet of product was found. On this date, none of the wells had LNAPL. W-30 wasn't sampled because it had been cemented over when the sidewalk was refurbished. Brockerhoff will try to reopen the well. Groundwater sampling took place on 8/4/15 at W-21, 24, 26 and 28. There was insufficient water for sampling at W-27. The VOC results for all of the samples were mostly non-detects with a few low hits in each sample. One sample had a few low VOC exceedences. The SVOC results for all of the samples were mostly non-detect with several low hits in each sample and one sample with a few exceedences. I approved the report without comments. 12/15/15 - Raphael Ketani. I received an email from Mr. Clifford today. He stated that groundwater sampling was conducted during February and September 2015. He added that the residual NAPL is not affecting the groundwater quality. The spike in product thickness at well W-29 on

103 EAST 10TH STREET (Continued) **S104620874**

9/9/15 was just an anomaly, according to Mr. Clifford. Product thickness was measured in W-29 on 9/16/15, 10/5/15, 11/9/15 and on 12/2/15. The measured thickness on those dates was 0.11 feet, not measureable, 0.03 feet and not measureable, respectively. He stated that on these dates, product was not seen in any of the other wells. Mr. Clifford attached a figure showing the cumulative NAPL recovery amount from gauging round to gauging round. A higher synoptic plateau was depicted. He stated that he will write the fourth monitoring memo if the Department believes that the case is closeable. I responded that, given the product thickness results stated, the Department believes that the spill case is closeable. 12/23/15 - Raphael Ketani. Mr. Clifford sent me the Brockerhoff Environmental Services, LLC 12/21/15 Progress Summary Report: Remediation and Monitoring of LNAPL. I reviewed the report and found it to contain the same information as in his 12/15/15 email. He stated that Brockerhoff was requesting that the spill case be closed. Based upon the data in the case record, I determined that the residual contamination would not be a threat to the public or the environment. I sent a Spill Closure Letter to Heather Verran, Coop Board Treasurer, 3/10 Tenants Housing Corp., 25 8th Avenue, Brooklyn, NY, 11217. The spill case was closed effective today. "

DEC Memo:	"1/22/07 notified that this was referred to me from V. Zhune. Called James Seiler of Sterling Equiies (516)773-3800. Left message to call me back. bf 2/1/07 bf: sent ttf letter to: James Seiler Clearwater Associates c/o Sterling Equities 111 Great Neck Road Great Neck, NY 11021 4/16/07 received tank test results on 3/13/07. Tank passed test on 1/18/07. bf 6/14/07 Left message for J. Seiler and requested a call back and a letter from 3rd party regarding repairs made to the tank. bf 6/22/07 Called Mr. Seiler. He told me the building was sold and they have not operated it since 2005. City Urban Management is now management company (516)466-3333. They told me they sent report and letter to me by certified mail in January 2007. I never received it. They will fax it to me today. bf 4/7/08 Site was issued a NOV on 1/30/07 as a result of a PBS inspection. DLA has been in contact with the attorney for the site, Jim Rigano. J. Urda and I called Mr. Rigano today and left a message with his sectertary for him to return the call. Staff called him to discuss violations found during the inspection and for closure of this spill both of which are part of a draft consent order. bf 04/12/11-Hiralkumar Patel. 10:00 AM:- visited site as part of investigation of spill #: 1013012. met building manager and super. inspected tank room. found some stained concrete, but tank room floor found in good condition and does not need any subsurface investigation. the old lines were running aboveground which were removed. manager mentioned that they started managing building in Aug. 2005 and since then they were using the fill port by the foundation wall and they never used fill line that was running under the sidewalk. saw old cut out fill line under the sidewalk. no sign of oil spill found by area where old fill line enters into building. based on observations during the site visit, case closed. refer to spill #:1013012 for more details."

DEC Memo: "03/30/11-Hiralkumar Patel. alternate address: 196-204 E 10th Street Other spill #: 0611420 PBS #: 2-240346. as per PBS, site has one 5,000 gal #2 oil AST in contact with soil. tank was installed in Jan. 1920. site had two 275 gal #2 oil ASTs on legs which were removed in Aug. 2010. spill 0611420 was reported on 01/15/07 due to tank test failure. TTF was sent on 02/01/07, but no response. a NOV was issued

UNDERGROUND (Continued) **S110769534**

on 01/30/07 and a consent order was signed by RP. as per the compliance schedule in the consent order, a closure report for the spill #: 0611420 was due on 06/21/08, but the spill case is still open. as per ACRIS: Second Avenue Village Partners LLC. **property owner** Nathan Halegua **property partner** c/o Citi Urban Management Corp. 6 Grace Avenue, Suite 400 Great Neck, NY 11021 Attn.: Joe Mohan **property manager** Ph. (516) 466-3333 (O) (917) 335-4728 (C) email: jmohan@citiurban.com Joseph Debono **super** Ph. (516) 903-9630 4:49 PM:- sent email to DEC Urda informing that spill #: 0611420 is still open and possible violation of the consent order. 4:58 PM:- spoke with Mr. Debono, building super. he mentioned that they are converting from oil to gas. he mentioned that there is no spill. he is not at the building and asked to call property manager for access in building for inspection. 5:02 PM:- spoke with Mr. Mohna, property manager. asked him to arrange access for site inspection. 03/31/11-Hiralkumar Patel. received email from Mr. Mohan (at 5:34 PM on 03/30/11) including a passing tank system test result from Jan. 2007 (result on PBS e-docs). but no indication about type of work/repair done after initial failure. 9:36 AM:- spoke with Mark at PTC regarding tank test failure reported on 01/15/07. Mark mentioned that they tested tank system on 01/15/07 and it failed. they went back on 01/18/07 and system passed. Mark will look for documents to see if any repair done by PTC after test failure on 01/15/07. tank system was tested on 01/25/11 for refinance purpose and it passed. during conversation Mark mentioned that they cleaned out tank on 03/25/11 and they pumped out #4 oil from tank. after cleaning tank, property manager/super filled tank with #2 oil and observed oil leaked from tank. the tank is aboveground wrapped with cinder blocks. Mark doesn't know if there is any spill inside the cinder blocks. Mr. Mohan submitted passing tank test result dated 01/15/07, but as per Mark they tested system again on 01/18/07 when it passed. also, as per PBS record, site is using #2 oil, but as per PTC, they pumped out #4 oil from tank. 9:44 AM:- received fax from Mark including two invoice copy for tank test work. invoices doesn't include any information about repair work. invoices stored on e-doc for spill #: 0611420. 9:53 AM:- left message for Joe, property manager. 9:55 AM:- left message for Joe at NYC DOH. 12:09 PM:- received call from Joe from DOH. he found about 57 ppm in tank room, about 12 ppm in basement outside of tank room and 0 ppm in common area on first floor. he also found some loose oil and some speedy dry on tank room floor. 12:13 PM:- left message for Joe, building super. 12:14 PM:- left message for Joe, property manager. 12:39 PM:- received call from Joe, super. he will meet at the site at 4:30 PM today. 4:15 PM:- visited site. met building super. inspected tank room. site has one 5,000 gal aboveground tank sitting on floor. found oil stain on floor along the side of the tank. could inspect only one side of the tank as other three sides were close to tank room walls. found sign of recent leak (little wet) on side of the tank. super mentioned that they were using #4 oil. the tank was cleaned on 03/25/11 and then they put about 1200-1500 gal #2 oil in it. soon after they found oil leaking from side of the tank. super tried to clean spill with water/soap that cause larger stain on floor. found solid floor in visible areas. during inspection, found two concrete patches on E 10th street sidewalk. also found about 1 ft wide concrete patch from sidewalk to sidewalk entrance to basement. super doesn't know anything about these patches as working for only 2.5 years. the most recent fill port was loacted on building foundation wall, close to

UNDERGROUND (Continued) **S110769534**

garbage conainer area. 4:51 PM:- spoke with Joe, building manager. he mentioned that tank will be removed tomorrow and PTC will remove the tank. informed Joe that as the department never got any documents regarding the cause of tank test failure in Jan. 2007, the department requires investigation. so asked him to call for re-inspection once the tank is removed as need to inspect floor condition underneath the tank. informed him that the department may require further investigation based on inspection. 5:28 PM:- received call from Mark from PTC. they will submit a proposal for tank removal and will start tank removal once get approval. 04/05/11-Hiralkumar Patel. 9:08 AM:- spoke with Joe, building manager. he has sent signed proposal to PTC and tank will be removed this week. Joe will meet at 10 AM, at the site, on 04/12/11. 04/07/11-Hiralkumar Patel. 12:43 PM:- received call from Mark from PTC. they removed the tank. 04/12/11-Hiralkumar Patel. 10:00 AM:- visited site. met building manager and super. inspected tank room. found some stained concrete, but tank room floor found in good condition and does not need any subsurface investigation. the old lines were running aboveground which were removed. manager mentioned that they started managing building in Aug. 2005 and since then they were using the fill port by the foundation wall and they never used fill line that was running under the sidewalk. saw old cut out fill line under the sidewalk. no sign of oil spill found by area where old fill line enters into building. based on observations during the site visit, case closed."

Remarks: "Caller advised received a call advised of a smell of oil coming from the building he advised he has readings of 57.3 ppm. Caller advised that the building is possibly going through a conversion to natural gas. Caller advised that the building houses commercial and residential. Oil is spilled onto the oil tank room floor."

DEC Memo:	"3/16/15- 2-327425 DEC piper spoke with call jeff mcKenzie. AS per conversation, the 2K aboveground contact with soil tank failed a tightness test in the wet portion of the tank. I spoke with Andrew Bldg Corp Eric Martinez. I insturcted him to empty tank and set up temp tanks. Bldg is a residential bldg. He is in talks with Oil provider and will contqct Dept if needed. DEC Zhune's contact info

TTF (Continued) **S117853746**

provided. TTF Letter to be sent to 547 Browadway Realty Inc C/o Andrews Building Corp 666 Broadway, 12th FLoor New York, NY 10012 Assigned to DEC Zhune for followup and closure. 2/3/16-David Chan from Riteway sent the spill closure report. The letter stated that on November 23, 2015 Riteway Tank Maintenance Corp. was contracted by Andrews Building Corp. to address a tank test failure. The tank test failed with an ullage dry portion leak. There was no contamination neither found nor observe. The existing 2000 gallon AST was pumped out, cleaned, scraped and washed. Lines were isolated, tested ant the vent was found to be faulty. In addition, and old cut was found on the tank. Rite way proceeded to install a new vent and re-welded the old cut. Afterwards, another tank test was performed on the entire system which passed. Based on this information the spill is closed."

Remarks: "tank test fail"

Contact Name:	MAX ISAACS
DEC Memo:	"09/04/08-Hiralkumar Patel. visited site. met Mr. Isaacs, property owner. site has one 550 gal tank in square concrete box. found minor leak on top of tank. found some oil stains on floor around tank. no petroleum odors inside basement. all lines runs aboveground and no sign of leak under visible portion of line location. asked Mr. Isaacs to test tank to confirm no leak from it. left message for Mr. Palumbo at Petro. 09/11/08-Hiralkumar Patel. spoke with Don at Petro. he mentioned that they never did any tank test. spoke with Mr. Isaacs. asked him to do tank test. Max Isaacs 231 East 11th Street New York, NY 10003 PH. (212) 254-9177 sent TTF letter to Mr. Isaacs. 09/23/08-Hiralkumar Patel. received call from Mr. Palumbo from Petro. they performed tank test last week but due to some difficulty they could not reach to final result. will go back on 09/30/08 for tank

231 EAST 11TH ST (Continued) **S109207713**

only test. 12/03/08-Hiralkumar Patel. spoke with Mr. Isaacs. he mentioned that Petro has installed two new tanks in Oct. 2008 as they were suspecting leak from tank. Mr. Isaacs asked to contact Don at petro. Mr. Isaacs's account #: 2551790 Don Palumbo Petro Oil Ph. (718) 628-3324 Fax (718) 628-3325 email: dpalumbo@petroheat.com left message for Don at Petro. 12/04/08-Hiralkumar Patel. received call from Don from Petro. he mentioned that home owner hired Advanced Tank Services for tank test and tank failed the test. then owner hired Petro to install new tanks. Petro hired Milro for tank installation. Milro abandoned old tank. Don doesn't have any report regarding abandonment method of old tank. Advanced tank services company Ph. (800) 440-8265 left message at ATS for tank test result. received call from Cathy from ATS. she mentioned that they were hired by Petro. during tank test they found dry leak in system. asked Kathy to submit tank test result. tank test failure reported by ATS. spill #: 0807005. received email from Laura Capilli from Advanced Tank Services with tank test result. according to the result, tank was empty during tank test and found tank system leaking. ATS recommends for isolation test, but no isolation test performed. Laura Capilli Advanced Tank Services Ph. (800) 440-8265 Fax (800) 303-5323 email: lcapilli@atsenvironmental.com Cathy Burke ATS email: cathy@atsenvironmental.com spoke with Anthony at Milro regarding abandonment of old tank. Anthony will call back with more information. spoke with Mr. Isaacs. explained him that based on tank test result, the Department requires isolation test and possible soil investigation, according to earlier letter dated 09/11/08. Mr. Isaacs will contact previous tank testing company and ask them to call back. spoke with Don at Petro regarding tank test result. white talking to Don, he mentioned that tank had about 40 inches of product in it and they transferred oil from tank into new tanks after installed. they installed tanks after findings failure. received call from Cathy from ATS. she mentioned that tank had oil in it when they tested it, but not empty. but due to configuration of pipe, they could not measure via stick and they didn't know whether petrometer was working or not. Cathy also mentioned that after installing new tanks, Milro abandoned old tank with sand without isolation test. 12/08/08-Hiralkumar Patel. received email from Cathy Burke from ATS. Cathy mentioned that they tested tank twice. at first time they tested tank system and tank system failed. then they tested tank only and found leak in tank. could not decide whether dry or wet leak. after first test, petro cut remote fill line and converted to direct fill. during second test, ATS measured product level via a direct fill port and measured about 40 inches of product (about 500 gal) in it. summary: - spill reported as found stain on concrete box on top (could be overfill) - tank system tested and found leaking - amount of product was not measured during first tank test due to no access for that - remote fill line removed and Petro installed new direct fill on tank - ATS tested tank only second time and found dry leak - ATS measures 40 inches of product (about 500 gal in 550 gal tank) - tank was in concrete box and has been abandoned based on available information and absence of any visible spill in basement during site visit, case closed."

Remarks: "The owner of the building, Max Isaacs told caller he thought he had an overfill on his 550 gallon tank. Caller saw old residue from a possible overfill or minor equipment failure. Caller will contact a tank co. for further testing. Any dry residue is contained in the tank vault."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 3/17/2003-Vought-Called Ferrantino Oil and spoke with Roger Loughlin and crew is on-site who is cleaning spill with drysol. Spill came out top of tank. No sewers or drains affected and spill on concrete. Vought called Richard Saunders who is not at site today. Vought explained to Saunders that NYSDEC requires confirmation of cleanup from owner or manager. Saunders stated that he will call Tipple tommorrow with confirmation of cleanup. 05/18/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called to Richard Saunders at (212)253-2530 left message to call me back. Also talked to Mr. Danis (Ferrantino oil co.) at (718)832-6700. He said that site is already cleaned. He will fax me confirmation of cleanup letter. -QA 06/21/06: Called Mr. Danis (Ferantino oil Company)at(718)832-6700 reminded him to send confirmation of clean up letter. -QA 06/23/06: Called to Mr. Danis and talked to Mr. Mike Taylor (Service Manager), Ferrantino Oil Company regarding spill. He said that he will find out the spill record and he will fax it to me. -QA 07/06/06: Called Danis and talked to Mike he said that he will send report to me in a week. -QA 07/20/06: Called to Mr. Danis and talked to Ms. Ethel She said she will convey my message to Mr. Danis and Mr. Mike regarding clean up confirmation letter. -QA 07/24/06: Mr. Anthony Lara (718)624-4824

171 SULLIVAN ST (Continued) **S104877273**

called me back and said spill is cleaned up. He will fax me confirmation of closing letter for the spill. -QA 09/11/06: Called Mike, Service Manager (Ferrantino Oil Company) at (718)832-6700 he said he will send report and a closing confirmation letter to close the spill as soon as possible. -QA 09/18/06: Called Mr. Mike he said as soon as hewill received papers . He will send it to me. -QA 10/11/06: Called Mr. Danis at (718)832-6700 he said he will find out from his Service Manager and he will call me back regarding spill. -QA 10/16/06: Called to Mr. Richard Saunders at (212)253-2530 and talked to owner Mrs. Maruska Saunders she said this spill is cleaned and she sold this property in February 2006. Received a closing confirmation letter from Mr. Mark Salamack (Petroleum Tank Cleaner)they emptied the tank and welded this opening closed. The oil dripped down the outside painted concrete surface of the tank jacket and onto the painted floor. This was cleaned up by the oil company (Ferrantino). The amount of resulting oil absorbent was a small amount and discarded with the household trash from the building.According to the information of Mr. Mark Salamack spill is cleaned. DEC staff closed the spill. -QA"

Remarks: "CALLER STATED A FILL PIPE LEAKED GOING INTO THE BUILDING, COMP SPOKE TO THE DRIVER, AND THE DRIVER REFUSED TO GIVE HIS NAME, BUT STATED THAT HE HAD CALLED FOR SOMEONE TO COME CLEAN UP THE SPILL, AND THEN TOOK OFF DOWN THE ROAD TO HIS NEXT STOP"

DEC Memo:	"04/24/17-Hiralkumar Patel. alternate address: none no PBS record found. other spill # 9811442 was reported on 12/11/1998 due to 40 gal #2 fuel oil spill. case closed. 2:55 PM:- spoke with TJ. he mentioned that they attempted to test a 1,500 gal AST encased in concrete, but could not build pressure. 2:56 PM:- spoke with Doug at Eastern Env. he mentioned that as per the owner's representative, site has 1,000 gal tank, but FDNY record shows 1,500 gal tank. he mentioned that leak is suspected in vent or remote fill line. informed Doug that isolation test must be conducted immediately to confirm tank's integrity for continuous use of remaining oil (no further deliveries until system is fixed and tested tight), otherwise tank system must be pumped out immediately. 3:06 PM:- left message for Joshua Martin, property manager. 7 Rivington LLC. **property manager** c/o Veracity Real Estate Management 199 Lafayette Street, Suite # 5D New York, NY 10012 Attn.: Joshua Martin PH. (212) 966-6811 (646) 267-4065 email: Joshua@veracityrem.com 3:27 PM:- received message from Mr. Martin. 3:31 PM:- spoke with Mr. Martin. asked him not to deliver any more oil to the leaking tank system until it is fixed and tested tight. also asked him to pump out tank by the end of tomorrow unless dry leak in the system. 3:44 PM:- sent TTF letter to Mr. Martin and asked him to submit report by the end of 05/31/17. letter emailed to Mr. Martin and Doug. case assigned to DEC Zhune. 04/25/17-Hiralkumar Patel. 12:38 PM:- received call from Doug. he mentioned that the isolation test will be conducted tomorrow morning. 5/24/17-Louis J. Baselli from Eastern Environmental emailed the report. The letter stated that On behalf of GRS/Corteq, Eastern Environmental Solutions, Inc., (Eastern)has performed tank tightness testing in conformance with USEPA and 6NYCRR test criteria for 1,100 gallon capacity #2 fuel oil storage tank. On April 24, 2017, the New Yor State Department of Environmental Conservation (NYSDEC) was contacted regarding a tank tightness testing failure occurring at 7 Rivington Street, The testing was performed in order to determine a cause for the reported tank equipment failure. On April 24, 2017 a tank tightness test was performed on the fuel oil and oil delivery system. A tank testing failure was recorded. On April 26, 2017 a second tank tightness test was performed after a determination was made that leakage was coming from the tank vent line. The second test was perfomed with the oil

ON PROPERTY (Continued) **S120702926**

tank isolated from the vent line. The tank passed the tank testing criteria. On May 3, 2017, a third tank test was performend for the entire tank delivey sytem including all lines after the leaking vent line was repaired by Eastern Technicians. The tank system passed the tank tightness test. Spill Closed."

DEC Memo:	"08/21/09- Zhune spoke to TJ from Dry as Bone. He said the tank failed the test with a dry leak. Probably the line that goes to the side walk is leaking he will come back next week to check it. He did not see any spill when test was done. 8/27/2009 Sangesland spoke to property manager Alana Barran - She has a hearing with John Urda on Friday Aug 28th. ***Is this a PBS Site?*** Dry As aBone says it's a 1080 gal tank??? TTF letter sent to: Alana Barran 109 Lafayette St - Suite 302 New York, NY 10013 8/27/09 - Raphael Ketani. This case is associated with the earlier spill case #0813565. The earlier case involved a fill box and fill pipe leak that was supposedly repaired. However, during an inspection made by me months ago with a PID meter, elevated total VOC detections were found at the bottom of the tank vault and at the top of a covered sump. This prompted a request by me to the owners to investigate the tank. They didn't respond for along time and so John Urda of the Office of General Counsel was asked to become involved. He sent correspondences to the owners. The owners

APT. BUILDING TTF (Continued) **S109829603**

hired Dry AS A Bone to test the tank system and that is when the leak was found. I am closing the spill case and referring it to the earlier one for the site, spill #0813565. "

Remarks: "1080 gal vaulted tank"

DEC Memo:	"11/28/12-Hiralkumar Patel. the spill report received yesterday afternoon. DEC Steve spoke with property manager yesterday evening and asked to hire contractor for cleanup. this morning, Steve received email from Mark (PTC) including pics of impacted basement floor. Mark mentioned in email that PTC was hired to pump out leaking tank and to set up temporary tanks, but has not got authorization for cleanup. so Steve asked to inspect the site. 10:06 AM:- spoke with Mark. he mentioned that PTC was hired to pump out tank and install temporary tanks, but were not authorized to do spill cleanup in basement. PTC crew at site right now. he will talk to his crew member and will call back with update. 10:09 AM:- received call from Mark. he confirmed with his crew that no cleanup in progress. after that he spoke with building super who was under the impression that PTC was going to cleanup the spill also. as Mark did not got signed authorization, he asked super to signed work proposal. Mark will call back with update. 10:31 AM:- spoke with Mark. he just got fax authorizing cleanup. PTC crew will do cleanup. alternate addresses: 26 5th Ave, 1-9 West 9th Street other spills: 9514312, 0106144, 0205706, 0610334 PBS #: 2-359041. as per PBS record, the site has one 10,000 gal #6 oil AST and one 15,000 gal #6 oil AST. both tanks are in-service and are located in subterranean vault with access. both tanks were installed in Jan. 1982. 24 Fifth Onwers Inc. **property owner** c/o Douglas Elliman Property Management **management office** 675 3rd Avenue New York, NY 10017 Attn.: Joanna Soto **property manager** Ph. (212) 473-6877 Robert Rodriguez **building super** Ph. (212) 473-6877 (O) (917) 518-2272 (C) 10:55 AM:- spoke with Robert Rodriguez, building super. he mentioned that the site has two tanks (one 10,000 gal and one 15,000 gal), but only 10,000 gal was in-service. the 15,000 gal tank is not in use for some time as something wrong (oil freezes inside) with the tank. Mr. Rodriguez does not know when was the last delivery to 15,000 gal tank. currently, the 10,000 gal tank is leaking from bottom. bottom of 10,000 gal tank touches the floor. he is not sure about location of 15,000 gal tank (either on floor or saddles). 3:35 PM:- visited site.

24 FIFTH AVE (Continued) **S105135133**

met Mr. Rodriguez. PTC crew was on-site installing temporary #2 oil tank on street. vac truck also at the site. inspected boiler/tank room in basement. the site has two tanks: one 10,000 gal (east-side tank) and one 15,000 gal (west-side tank). both tanks are aboveground in separate vaults with access, located in the boiler room. the tank vaults are located under the sidewalk. Mr. Rodriguez mentioned that the 15,000 gal tank is not in service for at least last 7 years since he is working and it only contains sludge. there are separate fill ports/vent pipes for both tanks. the fill ports are covered in fill boxes. fill box for 15,000 gal tank is covered with dirt and the fill port was not visible. Mr. Rodriguez mentioned that they check tank vault everyday. during inspection yesterday, they noticed oil on tank room floor. so they opened a small hole at the bottom of tank vault, in boiler room and oil started flowing in boiler room. the 10,000 gal tank will be removed and a new #4 oil tank will be installed. also, building engineers are working on natural gas heating system design. there are total 420 residential units in building. Mr. Rodriguez mentioned that there is no odor complaint from any resident. asked Mr. Rodriguez to secure both fill boxes to prevent any misdelivery. 11/29/12-Hiralkumar Patel. 11:44 AM:- left message for Mr.Rodriguez and asked him to call for site inspection, once leaking tank removed from site. 11:46 AM:- spoke with Mark. asked him about tank removal schedule. he mentioned that owner is working on inspecting tank for possible repair. asked him to call for inspection, once tank room floor is cleaned. 11/30/12-Hiralkumar Patel. 9:45 AM:- received message from Mark. they cleaned tank room. 12/04/12-Hiralkumar Patel. 10:00 AM:- visited site. met Mr. Rodriguez. could not inspect tank room due to limited access. Mr. Rodriguez mentioned that the 10,000 gal tank will be removed and property manager/owner are currently reviewing cost estimate. asked him to call for site inspection, once tank removed. 12/12/12-Hiralkumar Patel. 2:20 PM:- received message from Mark. PTC got approval and currently they are removing the tank. they will do further cleanup once tank steel is out of the room. DEC Sharif will visit site on 12/14/12, if possible. 12/19/12 I stopped by the site as per a request from Kumar Patel on 12/14/2012 PM.The 10,000 gallon tank has been taken out, contaminated debris, metal plate left in the tank room. Further clean up will be performed as the management told me.(sr) 12/27/12-Hiralkumar Patel. 11:53 AM:- spoke with Mr. Rodriguez. tank is completely removed. scheduled a site inspection tomorrow morning. 12/28/12-Hiralkumar Patel. 9:15 AM:- went to site for tank room inspection, but tank room is not completely cleaned. 01/07/13-Hiralkumar Patel. 11:20 AM:- left message for Mart at PTC. 11:22 AM:- left message for Mr. Rodriguez. 11:23 AM:- left message for Ms. Soto. 11:24 AM:- received call from Mr. Rodriguez. he mentioned that PTC crew has removed remaining stuff from tank room floor. 1:56 PM:- received call from Mark from site. he mentioned that all the debris have been removed from the tank room floor and floor was found in good condition. he also mentioned that portion of tank room floor, where the tank was located, is about 4 inches higher than remaining floor. Mark confirmed some stains on the floor which will be powerwashed in couple of days. Mark will call back once floor is powerwashed. 01/16/13-Hiralkumar Patel. 4:10 PM:- visited site. inspected tank room. tank room floor found in good condition. found oil stains on floor that will be powerwashed. 01/23/13-Hiralkumar Patel. 2:30 PM:- visited site. inspected tank room floor which found in good condition. some oil stains on floor. based on available

DEC Memo:	"10/05/04-Vought-Spoke with Jim Melnick and owner was not sure if he wanted to abandon, remove tank or leave it in place. If tank passes test he will leave it in place for possible future use. ProTest will reseal manhole, plug vent and retest. Vought sent out TTF letter to owner on PBS also requiring submission of updated PBS registration. 10/13/05-Vought-Received both copies of TTF returned to sender as attempted -not known unable to forward. Addresses on letters were: Noel Torsi 114 Waverly Place New York, NY 10011 and Chris Leahy 159 Prince Street New York, NY 10012. Vought called Leahy for correct address and received address from secretary and sent out new TTF letter to: Christopher Leahy 636 11th Avenue New York, NY 10036 10/21/05-Vought-Received message from Chris Leahy that source of failure was broken air release valve that will be replaced and tank will be retested. Report will be submitted to DEC. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/14/06 - Raphael Ketani. I tried to reach Mr. Leahy (lay-hee) at (212) 777-8838, but could only leave a voice message. There are 2 tanks on the property, but I could not find a PBS case. Mr. Melnick of Protest (631) 321-4670 had done the first tank test. 6/15/06 - Raphael Ketani. Mr. Leahy called me back. He said the PBS case is 2-339059. I checked the number and found both a 1500 and 2000 gallon tank listed. I told Mr. Leahy that I needed a revised PBS application, the successful test results for the 2000 gal. tank, a letter describing the removal of the 1500 gal. tank, and a cover letter from Protest stating that there was no oil spill, no impact to drains or the environment. He said he would get me these documents. 7/28/06 - Raphael Ketani. I spoke to Mr. Leahy and asked him for the revised PBS and the cover letter describing the incident, repairs, and that no drains or the environment were impacted. He said that he thought these documents were sent, but he will see to it that they are sent very shortly. 7/31/06 - Raphael Ketani. I received the FAXed 2000 gal. tank test report from Pro Test. The tank passed. However, I have not received the revised PBS. I left a message for Mr. Leddy of Pro Test and Mr. Leahy, the landlord. Mr. Leahy told me that a 1100 gal. tank was removed by Petroleum Tank Cleaners and that there is only a 2000 gal. on site, NOT a manifolded 2000/2200 gal. system. He said that even the Fire Department had the wrong tank size a while ago. He said the PBS form hasn't come back from the expediter, yet. He said he will send the revised PBS AND the report regarding the end point samples that were taken in the vicinity of the removed 1000 gal. tank. He said the end point samples were clean. 8/17/06 - Raphael Ketani. I tried to reach Mr. Leahy, but could only leave a message. 8/30/06 - Raphael Ketani. I tried to reach Mr. Leahy, but could only leave a message. 8/31/06 - Raphael Ketani. I received a call from Jessinia of Edgemont Realty (212) 228-6757 - the expeditor. She said that she had an affadavit for the removed tank (1080 gals.) and a check for renewal of the registration of the 2000 gal. tank. She asked who she should send it to. I told her to send it to me and I will walk it over to Nick Lombardo in the PBS Unit. She said she

APARTMENT BUILDING (Continued) **S107410739**

spoke to Mr. Lombardo and she said that he told her just to send the affadavit and the check for the renewal. I spoke to Mr. Lombardo and he said he recalled the conversation with Jessinia and he showed me a FAXed PBS registration form with the removal of the 1080 gal. tank and renewal of the 2000 gal. tank. He said he is just waiting for the originial PBS form, the affadavit and the check. 9/25/06 - Raphael Ketani. I received a call from Jessina inquiring whether the DEC had received all of the paperwork for the site. I told her I had the cover letter explaining what triggered the spill case. I told her I had to check with Mr. Lombardo of the PBS Unit to see whether he had received all of the necessary paperwork and the check. Mr. Lombardo told me that he must have received everything as Albany DER issued a certificate for the tank registration. I told her that the DEC had received all of the necessary paperwork. Based upon receipt of the revised PBS registration, the affadavit, the check, and the passing tank test results, I am closing the spill case. "

DEC Memo:	"04/04/17 - Lakhani Spoke to Ricky (9175932154) from Empire Environmental. He informed that a system test was performed on the AST tank system and failing results were obtained. There is no spill. They are unaware of where the system failed. The property is a commercial building using a 1080 gallon #2 fuel oil AST. TTF letter sent to owner: Tar Beach Club Inc. 119 Spring Street New York, NY 10012 and uploaded to D2. 04/12/17-Hiralkumar Patel. alternate address: none no PBS or other spills found. 04/27/17-Hiralkumar Patel. 11:33 AM:- received message from Soraya (917-445-5376), owner of building 119 Spring St. 12:06 PM:- spoke with Soraya. she mentioned that building 119 uses gas heating system and tank test failure may be related to neighboring property 121 Spring St. 12:09 PM:- spoke with Empire Env. who received site address from their client. after initial system test failure, Empire Env. conducted an isolation test and found leak in vent line. Empire has submitted work proposal to their client and waiting for approval. 12:11 PM:- spoke with Bryan Shaw at EBI Consulting. during phase I investigation, EBI Consulting noted the oil tank system at the site and recommended system test. Bryan confirmed site address as 121 Spring St. based on available information, changed site address in spill report from 119 Spring St. to 121 Spring St. . alternate address: 90 Greene St {block #: 499 / lot #: 43 (or 7503 as per NYC DOB)} no PBS or other spills found. as per NYC DOB records, a permit application was approved on 12/12/2003 for replacement of boiler and oil burner, and installation of 1,080 gal oil tank wrapped in jacket. 1:34 PM:- spoke with Jaime Espinales at Milan/Quatrone Property Management and received property manager and building super's contact info. 1:41 PM:- left message for Worley, building super. 121 Spring Street Associates **property owner** c/o Milan/Quatrone Property Management 52A West 8th Street New York, NY 10011 Attn.: Robert Milan Ph. (212) 598-4888 Ext. 201 email: bob@mqmgt.com Worley **building super** Ph. (917) 327-8440

ABOVE GROUND TANK (Continued) **S120702915**

Bryan Shaw EBI Consulting Ph. (845) 893-1245 email: bshaw@ebiconsulting.com 1:55 PM:- spoke with Soraya and informed her about change in site address. asked her to disregard the letter from the Department dated 04/04/2017. 2:20 PM:- sent TTF letter to Mr. Milan and asked him to submit report by the end of 05/31/17. letter emailed to Mr. Milan, Bryan and Michael (Empire Env.). 06/20/17-Hiralkumar Patel. 2:03 PM:- spoke with Carol at management office. informed her about overdue report. she requested copy of letter dated 04/27/17 as Mr. Milan is out of office. 2:29 PM:- sent email to Carol (info@mqmgt.com) including letter dated 04/27/17. asked her to submit required report immediately to avoid enforcement. email copied to Mr. Milan, Bryan and Michael. 3:16 PM:- received email from Jennifer Perez from Empire Env. including tightness test results dated 04/04/17 and 05/03/17. as per tester, the vent riser piping was leaking. the faulty vent riser pipe was replaced and the tank system was tested tight on 05/03/17. 06/21/17-Hiralkumar Patel. 8:51 AM:- sent email to Jennifer inquiring about any contamination noted during repairs. 9:32 AM:- received email from Jennifer stating that no evidence of contamination noted during repairs. case closed. 9:49 AM:- sent spill closure letter to Mr. Milan. letter emailed to Mr. Milan, Carol and Jennifer."

He does not know who is goimg to do the repair and retest the tank. 3/6/15-David Vega from Eastmond & Son Boiler & Welding Services, Inc. emailed the spill closure report dated March, 6 2015. The letter stated: This is to inform you of the work that was done at 340 East 11th St. Magnum Mgmt. informed us of a failed tank test reported by another company. On January 3, 2013 we isolated oil lines, tested & passed tank tightness test (attached test report)at that time we found the oil vent line leaking at grade. On January 8, 2013 we replaced a 4' section of the vent line at grade. There was no discharge of oil from the vent line. At this time we are requesting that you close the spill. Spill Closed."

The owner will be fixing tank and have it retested, she will be emailing me tank reports. 503-511 Broadway has alternate addresses of 503 Broadway and 74-82 Mercer Street. According to PBS# 2-611955 there is a 5,000 gallon #2 fuel oil AST with no last test date or next test date. There is a previous spill#9914496 at 511 Broadway that was closed in 2004 under Jane O'Connell, it was a con Ed spill that has 2.5 gallons of unknown oil into 20 gallons of water in service box in front of 511 Broadway, lab results indicated PCBs at less than 1 ppm. 10/30/2015: Rashad Victoria emailed tank test failure document: As per your request, I am attaching a copy of the failing test report for 503-511 Broadway. The customer will make arrangements for the repairs and then plans to have us conduct the retest. It has been uploaded to D2. Tightness test indicates a 5000 gallon tank with a dry leak (specifies gross dry leak in vent pipe). I responded: Thank you for the update. 11/17/2015: Rashad Received Email from Harvey Fung (hfung@hsrcorp.com) on 11/16: Please find close out letter and report attached for PBS#2-611955 #001, Spill#1507638. If you have any question please feel free to contact me& .Thanks! Attached in email was passing tightness test on tank and system conducted on 11/10/2015 by Pro Test Environmental. Also attached in email is request for closure letter which included repairs made: installed 50 LF of 2 inch vent lines and installed a 2x2 vent alarm. Both documents have been uploaded to D2. Emailed Harvey: Attached is a standardized letter closing out spill# 1507638 for 503-511 Broadway. Please let me know if you have any questions. Closure letter has been uploaded to D2. Case will be closed due to repairs made on tank, passing tightness test, and aboveground tank."
Remarks:	"5000 gal ast"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 7/24/2003-Vought-Conroy Environmental Consultants-631-423-1240 received NFA Request results dated April 30, 2003. Tank repair work included pumping existing fuel from tank, cleaning the tank interior and resealing tank manway. The tank ONLY passed the tightness test after repairs were made (tighness test results provided). Vent and fill line did not pass the test and as a result the fill line was immediately sealed an are scheduled to be replaced. FOr spill closure NYSDEC requires 1)Site Plan 2)borings or endpoints to investigate possiblity of fill pipe impact to subsurface. 1/7/04-Vought-Spill transferred from Vought to Austin. 01/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 11/28/05- DEC Piper sent out another ttf letter in regards to fill and vent line failure to Michele Dekonkoly Thege at 272 6th Ave, NY, NY. Daphne no longer w/ little red school house. 12/28/05- DEC Piper has spoke w/ Steve Russo, rep for Little Red School house. regarding borings. He will look into it. 5/5/06- DEC Piper has left message w/ Steve Russo, rep for Little Red School house. regarding borings, requesting callback and info. 5/11/06- DEC Piper spoke w. Steve. A visit is scheduled for 5/15 at 3:30pm. 5/15/06- DEC Piper responded to site to determine additional work. The 2 x 2 vault to the manway of an UST contained contaminated soil. Once opened the vault eminated vapors. Trap door was sealed with duct tape to prevent vapors intruding into basement classrooms. There is no such evidence that any soil was removed when the fill line was replaced (manifests, analytical , not mentioned in report. DEC instructed LRSH to remediate top of tank and perform borings along fill line. CSL letter sent. 6/6/06- DEC Piper left maessage for John at langan requesting callback. Returning his call. 6/30/06- DEC Piper met w/ John Garvis of Langan and Hydrotech technicians. Contaminated Soil was excavated around manway with a shop vac approx, five gallons. Soil was clean under surface oil staining. Top of tank exposed w/ no indication of overfill to subsurface. Some concrete existed. Hydro tech to epoxy seal manway (2 coats) and concrete around manway. Fill and vent were replaced. No oil staining observed on old fill line entering basement. Closed. See e-docs if warranted. "
Remarks:	"TANK TO BE INSPECTED AND RETESTED."

DEC Memo:	"9/25/07 bf: Called Michel de Konkoly Thege 212-477-5316. Left message to return my call. Sent ttf letter to: Michel de Konkoly Little Red School House 40 Charlton St. New York, NY 10014 9/28/07 Received message from Mr. Thege on 9/25/07. They have apptointment with contractor to have tank emtied and find source of failure on 10/5/07. He left his number which is same as above. His extension is 319. bf 11/16/07- Piper spoke w. Jason at Langan to perform borings through tank and undersidewalk. The will keep Dept in Loop. The school plans on converting to gas. 3/15/08- DEC Piper met contractors onsite to complete remainder of tank cleaning and sampling. odors were not present in hallways untill adjacent to work area. The school will be closed for the week and sampling will be performed and then the tank will be slurried. 5/29/08- DECPiper- I recieved and reviewed ust and spill closure report. Tank was cleaned and two enpoints were taken through tank bottom. No visible evidence of cont was discovered and laba analytical showed no exceedances. Tank was then slurried. Based on work to date, NFA granted. closed. See e-docs if warranted."
Remarks:	"it was a dry portion leak;"

Searched PBS and spills database, no other records found for property. 8/06/2015: Rashad No documents found in D2. Owners information: 67-65 Greene Street, LLC 349 West 37th Street New York, NY 10018 8/10/2015: Rashad Spoke to Marisol at Petroleum Tank Cleaners she indicated that she will send us any relevant documentation that she can find. Also spoke to Mark Salamack, he indiacted he would look into this site. Email to Mark: I am currently reviewing spill reports under Jeff s temporary supervision for 1712 Second Avenue, Manhattan NY spill #1203598 as well as 65 Greene Street, Manhattan NY spill#1203271. I would like to request the following information if possible for each site: Copy of

TTF (Continued) **S112148820**

failed tank test report. Supply/return and vent/fill test results. Current property owner and contact information. 8/11/2015: Rashad Mark replied to email: I have been in touch with Petroleum's office ..I know they have the information on the 65 Greene Street job...we tested a 1080 gallon tank and it failed...they never authorized us to continue with any other work...I can get the owner's contact information for you when I get back from vacation. On the 2nd Avenue job, they are having trouble finding the information on the job...do you have a date for it?. I responded The 1712 Second Ave spill was recorded on 7/13/2012. I appreciate your help. Marisol has indicated she will fax relevant information. 8/13/2015: Rashad Marisol faxed documents on 8/11/2015 - 3:08 pm. Failed tank test report indicates ullage (dry) portion leak. Document uploaded to D2. 8/17/2015: Rashad Mark Salamck emailed: Omar...the owner's contact info for 65 Greene Street: Makkos Equities 349 West 37th Street NY, NY10018 Ph# 212 736-8700 Thomas Makkos is owner per DOB job filling records email is thomasmakkos@aol.com 9/4/2015: Rashad Sent TTF letter to Makkos Equities. Letter uploaded to D2. 9/17/2015: Rashad Received letter from William Castoro, property manager for 65 Greene Street with Tank Abandonment Affidavit. Letter and affidavit have been uploaded to D2. 12/17/2015: Rashad Based on discussion with Tim due to tank closure affidavit and dry leak specified by ttf report which also indicates that tank was almost full, having 800 gallons in 1080 gallon tank case will be closed."

DEC Memo:	"10/03/13-Zhune spoke to Donna from ABC tank. She indicated they performed a tightness test to the tank and failed the test with a dry leak. They can not say if there is oil spill because the tank is vaulted and they can not see the bottom of the tank. She sent the proposal to the owner to do the isolation test. " A tightness test was performed on (1) 2,000 gallon tank located at the above referenced address. The tank did not pass the test. Spill # 1306972 was assigned. " ABC Tank pumped out all product from the interior of

APT BUILDING (Continued) **S114561765**

the tank. The interior of the tank was cleaned. All lines were disconnected from the top of the tank to isolate the tank from the system. " A pressure test was performed on the isolated tank. The tank did not hold the pressure. A visual inspection was performed on the interior of the tank. The top of the tank had numerous holes and the steel on top of the tank was in poor condition. " ABC Tank obtained (3) soil samples along the bottom of the tank. Resluts indicated low level VOCs below CP-51 standards. SVOCs were observed slightly above. Possible due to fill material. 4//11/14- DEC Piper reviewed documentaiton of tank removal done by Don Carlo Env. Based on samples and removal of 2K AST, this spill is closed. Will notify ABC Tank to u[pdate status in PBS program. "

Site Description: Location: The 25,000 square foot (0.57 acre) site is located at 462 Hudson Street in the Borough of Manhattan in an urban area. The site is bordered by Hudson Street to the west, Barrow Street to the north, one and two-family brownstones to the east, and by Morton Street to the south. Site Features: The site is occupied by a two 6-story apartment buildings with commercial uses on the first floor along Hudson St. The dry cleaner occupies the northwest corner of the first floor of the northern building. Current Zoning/Use(s): The site is zoned as C1-6/R6 for commercial and residential uses. Historical Use(s): The on-site building was constructed in 1925. A dry cleaner has operated at the site since at least 1986. The site is a RCRA large quantity generator (EPA ID # NYD981141948) of spent solvent, waste code F002. Site Topography, Geology and Hydrogeology: The Site is generally level and is at an elevation of approximately 36 feet

HUDSON DRY CLEANERS (Continued) **S110246833**

above mean sea level. The geology of New York County consists of unconsolidated glacial deposits overlying crystalline bedrock. Soil cores collected during investigation on a nearby site generally consisted of historic fill material containing brown sand and silt with fine gravel and brick fragments to a depth of 8 to 15 feet bgs. The Site is located 1300 feet east of the Hudson River. Groundwater in the vicinity of the site was encountered at approximately 27 feet bgs and is expected to flow to the west towards the Hudson River.

Env Problem: Nature and Extent of Contamination: Information is based on the results of a site characterization investigation performed at the nearby property at 75 Morton Street by the NYC School Construction Authority. That investigation was triggered by the discovery of elevated levels of cVOCs in groundwater on that site. The subsequent Supplemental Site Investigation (SSI) indicated that elevated concentrations of cVOCs (namely PCE) existed along the adjacent sidewalk on the eastern side of Hudson Street. The SSI ascertained that the 75 Morton Street site was not a source of the contamination. Eleven temporary groundwater wells were installed on and upgradient from the Morton Street property and samples were collected for lab analysis. One well was installed immediately in front of and downgradient from the Hudson Cleaners site. Groundwater: Tetrachloroethylene (PCE) was detected at elevated concentrations in groundwater samples taken immediately in front of the Hudson Cleaners site. PCE was detected at a concentration of 2900 ppb at that location, with concentrations decreasing in the downgradient direction consistent with the inferred contaminant plume. The groundwater flow direction was confirmed to be from east to west based on surveyed groundwater elevation measurements collected during the 75 Morton St. SSI. Building owners' contractor completed Phase II scope of work at and around Hudson Dry Cleaners in the fall of 2016. The groundwater sample taken in front of this site had only 2.1 ppb PCE, versus 2900 ppb in May 2013. Another round of sampling concentrating on VI evaluation is being done (spring 2017) at DOH's request. Significant Threat: Evaluation of significant threat will be made following completion of the Site Characterization.

Health Problem: As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database
This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

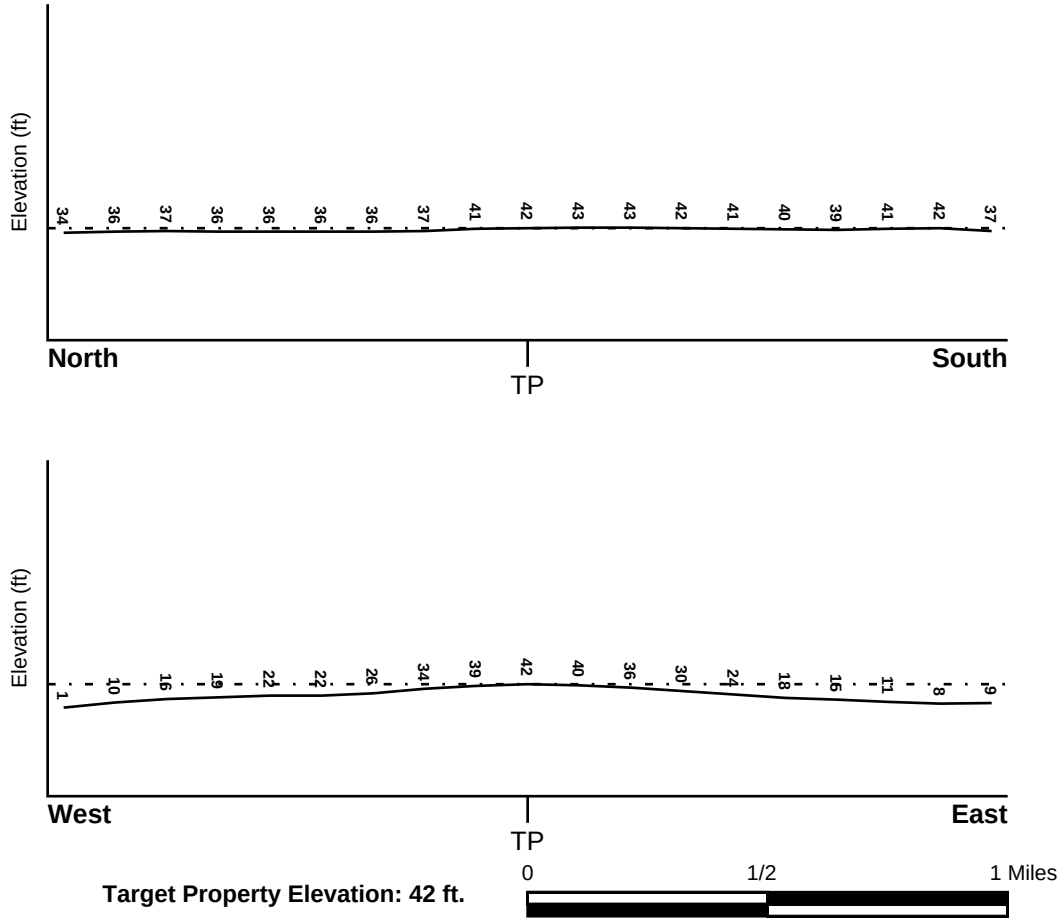
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 42 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970201F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile North
Site Name:	AMERICAN RADIUM INDUSTRIES
Site EPA ID Number:	NYD987001476
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovician		
Series:	Middle Ordovician (Mohawkian)		
Code:	O2 *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

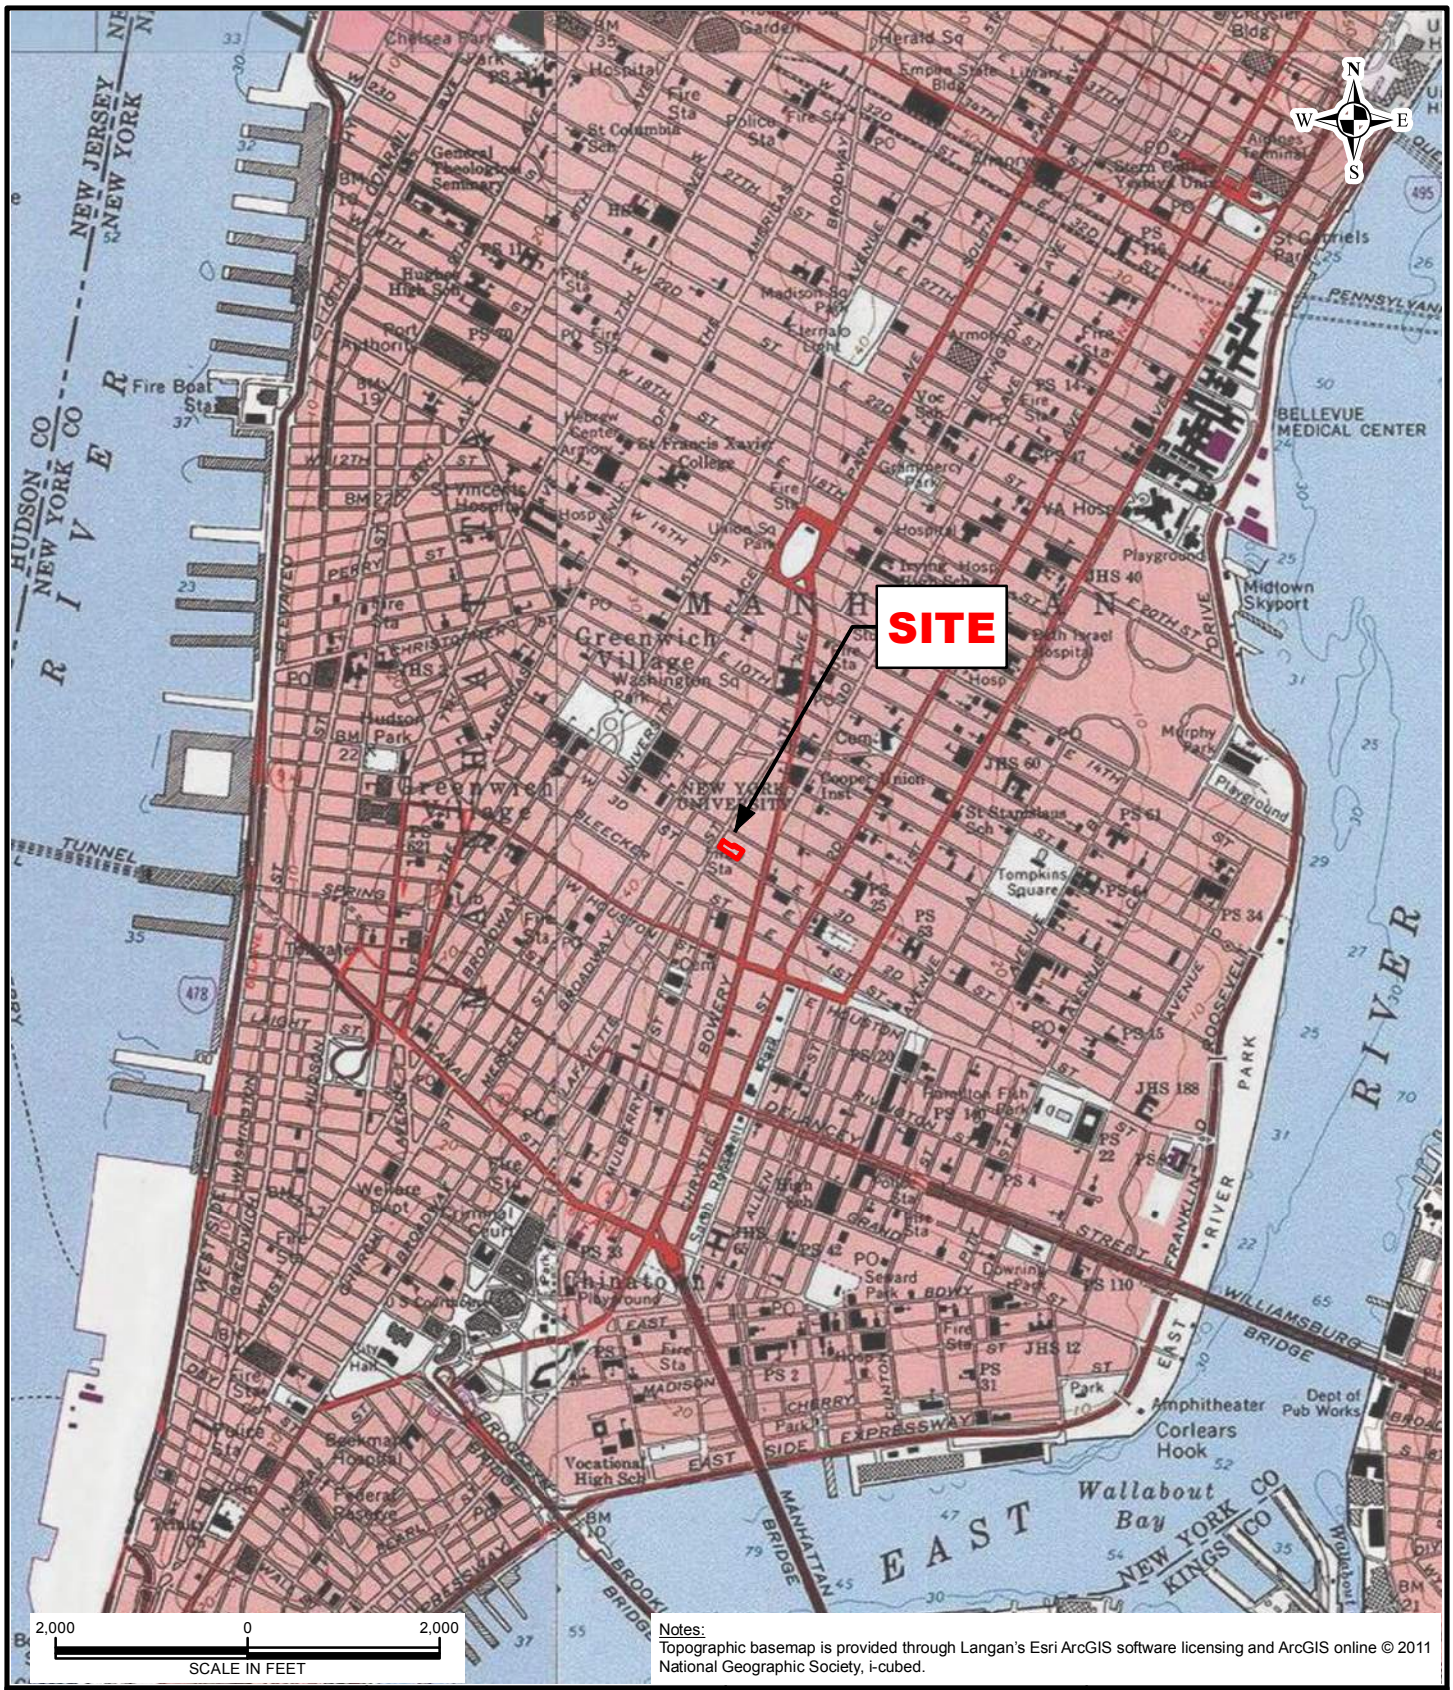
Re: Request for Review of Information
375 Lafayette Street
New York, New York
Block 531, Lots 17, 52, and 56
Langan Project No.: 100732801

Dear Ms. Ifill:

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the above-referenced property.



The site is an approximately 19,741-square-foot property located at the southeastern portion of Block 531 on Lafayette Street between Great Jones Street and East 4th Street Street in New York, New York. The site is currently occupied by an asphalt-paved parking lot at sidewalk grade and was historically occupied by a gasoline filling station with auto repair facilities between 1950 and 1972. This site is bound to the north by a five-story mixed-use commercial and office building, a four-story mixed-use commercial building affiliated with New York University, and an eight-story residential apartment building. The subject property is bound to the east by a seven-story residential building, to the south by Great Jones Street followed by mixed-use commercial and residential buildings and an active construction development site, and to the west by Lafayette Street followed by a six-story mixed-use commercial and office building. The property is zoned for manufacturing use (M1-5B) and is within the NoHo Historic District Extension (LP-02287).

If possible, please email moleske@langan.com or fax a response to (973) 560-4901 and/or send a hard-copy response to my attention. Please contact me at (973) 560-4273 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the above-referenced property.

The site is an approximately 19,741-square-foot property located at the southeastern portion of Block 531 on Lafayette Street between Great Jones Street and East 4th Street in New York, New York. The site is currently occupied by an asphalt-paved parking lot at sidewalk grade and was historically occupied by a gasoline filling station with auto repair facilities between 1950 and 1972. This site is bound to the north by a five-story mixed-use commercial and office building, a four-story mixed-use commercial building affiliated with New York University, and an eight-story residential apartment building. The subject property is bound to the east by a seven-story residential building, to the south by Great Jones Street followed by mixed-use commercial and residential buildings and an active construction development site, and to the west by Lafayette Street followed by a six-story mixed-use commercial and office building. The property is zoned for manufacturing use (M1-5B) and is within the NoHo Historic District Extension (LP-02287).

If possible, please email moleske@langan.com or fax a response to (973) 560-4901 and/or send a hard-copy response to my attention. Please contact me at (973) 560-4273 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,
Langan Engineering, Environmental, Surveying and Landscape Architecture, D

Matthew Oleske
Senior Staff Engineer

Subject: FOIL Request :: W037717-061118

Dear Matthew:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 6/11/2018 and given the reference number FOIL #W037717-061118 for tracking purposes. You may expect the Department's response to your request no later than **7/10/2018**.

Record Requested: **Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, groundwater sampling, asbestos abatement, radon, hazardous materials and any other documents that your department may have regarding the property with address ranging from 28-38 Great Jones Street, 375-379 Lafayette Street. Subject property identified as Block 531, Lots 17, 56, and 52).**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

LANGAN RESUMES

Matthew Oleske

Senior Staff Engineer

Environmental Oversight, Environmental Site Assessment, Remedial Investigation, Remedial Action

7 years in the industry ~ 2 year with Langan

Mr. Oleske has over 7 years of experience that includes working on environmental projects, particularly investigation and remediation of environmental contamination. He has assisted in remedial investigations and has been involved in the collection of field data and assisted in the preparation of reports and other environmental regulatory documents for projects in the New York area.

Mr. Oleske's experience includes collection of soil, groundwater, soil-vapor, sub-slab vapor and indoor air samples for environmental analysis, supervision of remedial excavation activities, and air monitoring to ensure compliance with Occupational Safety and Health Standards. Mr. Oleske has also provided oversight for sub-slab depressurization system, soil-vapor extraction system, and composite cover system installations as well as follow up operations and maintenance.

Selected Projects

250 South Street Development, New York, NY
101-111 Murray Street Development, New York, NY
225 East 39th Street Development, New York, NY
525 West 52nd Street Development, New York, NY
2350 Fifth Avenue, New York, NY
Sky View Parc Development, Flushing, NY
Carroll Gardens Development, Brooklyn, NY

Publications

Amanda Forsburg, CHMM

Project Scientist

Environmental Oversight, Remedial Investigation, Remedial Action

9 years in the industry ~ 9 years with Langan

Ms. Forsburg has over nine years of experience that includes working on environmental projects, particularly investigation and remediation of environmental contamination. She has assisted in remedial investigations and has been involved in the collection of field data and assisted in the preparation of reports and other environmental regulatory documents for projects in New Jersey and New York.

Ms. Forsburg's field experience includes investigation and remediation of contaminated sites including the collection of soil, groundwater, and air samples for environmental analysis, supervision of injections and remedial excavations, and the completion of air monitoring to ensure OSHA compliance on HAZWOPER sites. Office experience includes management of field investigation and remediation as well as completion of proposals, Phase I Environmental Site Assessments, remedial investigation reports, and remedial closure reports in support of these activities. Ms. Forsburg has worked on projects under regulatory oversight of the New Jersey Department of Environmental Protection (NJDEP), New York State Department of Environmental Conservation (NYSDEC), and New York City Office of Environmental Remediation (NYCOER).

Selected Projects

NYSDEC Brownfield Redevelopment, Remedial Investigation and Remediation Action – 363 and 365 Bond Street, Brooklyn, NY
NYSDEC Brownfield Redevelopment, Remedial Investigation – Fashion Outlets of Niagara Falls, NY
NYSDEC Spills Redevelopment, Remedial Action – 540 West 26th Street, New York, NY
NYSDEC Spills Redevelopment, Remedial Investigation and Remedial Action – 101 Murray Street, New York, NY
NYSDEC Spills Redevelopment, Remedial Investigation and Remedial Action – 110 University Place, New York, NY
NYSDEC Spills Redevelopment, Remedial Action, Lowe's Home Centers, Kings Plaza Site Redevelopment – Brooklyn, NY
NYSDEC Spills Remediation, Con Edison Soil Remediation - Bronx, NY
NYSDEC Spills Remediation, Con Edison NAPL Monitoring and Removal, Various Sites – Manhattan, NY
NYCOER E-Designation Remediation and Volunteer Cleanup Program Redevelopment, Remedial Investigation and Remedial Action – 400 Park Avenue South, New York, NY
NYCOER E-Designation Remediation and Volunteer Cleanup Program Redevelopment, Remedial Investigation and Remedial Action – 540 West 53rd Street, New York, NY
Remedial Action – 508 West 24th Street, New York, NY

Steven Ciambruschini, PG, LEP

Principal/Vice President
Environmental Site Assessments/Investigations, Brownfield Remediation, UST Management

32 years in the industry ~ 27 years with Langan

Mr. Ciambruschini has over 30 years of experience in hydrogeologic and environmental investigations including management of environmental and geotechnical investigations relating to petroleum and chlorinated solvent spill sites, underground storage tank sites, manufactured gas plant sites, landfills, wastewater treatment facilities and industrial/commercial sites. His experience includes managing environmental compliance audits, remedial investigation, pre-acquisition due diligence and permitting assessment, feasibility studies and design, construction and operation of complex innovative remediation systems to treat, contain and recover contaminated soil and groundwater. These projects are managed under various NJDEP, PADEP, NYDEC, NYCDEP and CTDEP programs. Mr. Ciambruschini provides consultation to a diverse group of clients including private developers, utilities, retail and industrial facilities and is expert in assessing remediation options and funding options under various state and federal grant, loan and tax reimbursement programs including Brownfield programs.

Selected Projects

- Brodson Property, Montville NJ, (RCRA, NJDEP ACO Cleanup)
- Carroll Gardens, Brooklyn, NY (NY Brownfield, EPA Superfund, OER E-designated Site)
- Con Edison Appendix B Spill Sites - Various Locations, NY
- Former MGP Site, Brooklyn, NY (VCP Site)
- Extell Development, Hudson Yards, New York, NY (NYC E-designated, NYS Brownfield Site)
- Pan Graphics, Bergen County, NJ (ISRA, LSRP)
- New Jersey Turnpike General Environmental Services Contract, Various Sites, NJ
- Liberty Science Center, Jersey City, NJ (EO 215)
- Blue Back Square, West Hartford, CT (UST, Transfer Act, Brownfield)
- Hershey, Act II Investigation (PA VCP)
- Hershey, Naugatuck, CT (CT Transfer Act)
- Halby Chemical Sites, Various Sites, DE (CERCLA)
- Unisys, Middletown CT, (CT Transfer Act, Brownfield)
- Ryder Rental, Various Sites in CT (CT Transfer Act)
- St. Marks Avenue, Brooklyn, NY (Vapor Mitigation)
- Pan Graphics, Lodi, NJ (Eco Risk Assessment, LSRP)
