Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D012
Waste Description:	Endrin (1,2,3,4,10,10-Hexachloro-1,7-Epoxy-1,4,4a,5,6,7,8,8a-Octahydro-1,4-Endo, Endo-5,8-Dimeth-Ano-Naphthalene)

WEGMANS FOOD MARKET 156 (Continued) **1031076127**

Waste Code: D013
Waste Description: Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)

Waste Code: D014
Waste Description: Methoxychlor (1,1,1-Trichloro-2,2-Bis [P-Methoxyphenyl] Ethane)

Waste Code: D015
Waste Description: Toxaphene (C10 H10 Cl8, Technical Chlorinated Camphene, 67-69 Percent Chlorine)

Waste Code: D016
Waste Description: 2,4-D (2,4-Dichlorophenoxyacetic Acid)

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D020
Waste Description: Chlordane

Waste Code: D022
Waste Description: Chloroform

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P004
Waste Description: 1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha,

WEGMANS FOOD MARKET 156 (Continued) **1031076127**

4abeta, 5alpha, 8alpha, 8abeta)- (Or) Aldrin

Waste Code: P018
Waste Description: Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P044
Waste Description: Dimethoate (Or) Phosphorodithioic Acid, O,O-Dimethyl S-[2-(Methylamino)-2-Oxoethyl] Ester

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P123
Waste Description: Toxaphene

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U019
Waste Description: Benzene (I,T)

Waste Code: U029
Waste Description: Methane, Bromo- (Or) Methyl Bromide

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U036
Waste Description: 4,7-Methano-1h-Indene, 1,2,4,5,6,7,8,8-Octachloro-2,3,3a,4,7,7a-Hexahydro- (Or) Chlordane, Alpha & Gamma Isomers

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

WEGMANS FOOD MARKET 156 (Continued) **1031076127**

Waste Code: U045
Waste Description: Methane, Chloro- (I,T) (Or) Methyl Chloride (I,T)

Waste Code: U048
Waste Description: O-Chlorophenol (Or) Phenol, 2-Chloro-

Waste Code: U052
Waste Description: Cresol (Cresylic Acid) (Or) Phenol, Methyl-

Waste Code: U057
Waste Description: Cyclohexanone (I)

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U061
Waste Description: Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Chloro- (Or) Ddt

Waste Code: U069
Waste Description: 1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U081
Waste Description: 2,4-Dichlorophenol (Or) Phenol, 2,4-Dichloro-

Waste Code: U082
Waste Description: 2,6-Dichlorophenol (Or) Phenol, 2,6-Dichloro-

Waste Code: U102
Waste Description: 1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U149
Waste Description: Malononitrile (Or) Propanedinitrile

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154

WEGMANS FOOD MARKET 156 (Continued) **1031076127**

Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U169
Waste Description: Benzene, Nitro- (Or) Nitrobenzene (I,T)

Waste Code: U170
Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U188
Waste Description: Phenol

Waste Code: U196
Waste Description: Pyridine

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U247
Waste Description: Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Methoxy- (Or) Methoxychlor

Waste Code: U248
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less

Waste Code: U353
Waste Description: Benzenamine, 4-Methyl- (Or) P-Toluidine

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

TANK TEST FAIL (Continued) **S116295860**

DEC Region: 2
DER Facility ID: 452396
Latitude: Not reported
Longitude: Not reported
DEC Memo: 7/7/14-Zhune spoke to Ray Lara from PTC. Ray said they emptied the tank and cleaned it and after they cleaned the tank they performed the tank system test and the test failed. They will do the isolation test. 9/25/14-Rene lewis from Alliance Mechanical Division sent the spill closure Report dated 9/23/14. The report stated that the board decides to go full gas instead of dual fuel, leading to decision to abandon the tank in place. Four hole were drilled in the bottom of the tank. Four soil samples were collected fromthe four holes and composite in two samples S1 and S2. The soil analytical results of the two samples indicate no VOCCs and no SVOCs detected. On 9/16/14-Rene Luis sent an email the email stated that the suction line and return line were complety aboveground lines and all but 4' of fill line is accesible. Entire vent line can be removed. Suction and Return has been removed and fill line filled with cement. Spill Closed.
Remarks: Tank test failure

Tank Info:

Tank Number:	001
Tank Id:	11494
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
H04 - Tank Leak Detection - Groundwater Well
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
K00 - Spill Prevention - None
L09 - Piping Leak Detection - Exempt Suction Piping
J02 - Dispenser - Suction Dispenser
I04 - Overfill - Product Level Gauge (A/G)

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - In Place
Pipe Model:	Not reported
Install Date:	06/01/1989
Capacity Gallons:	5000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	09/06/2014
Register:	True

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

PROCTER & GAMBLE - WELLA WORLD STUDIO (Continued) **1001203142**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	63317
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	E00 - Piping Secondary Containment - None
	F01 - Pipe External Protection - Painted/Asphalt Coating
	K00 - Spill Prevention - None
	H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
	I02 - Overfill - High Level Alarm
	G02 - Tank Secondary Containment - Vault (w/access)
	L00 - Piping Leak Detection - None
	H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
	J02 - Dispenser - Suction Dispenser
	C01 - Pipe Location - Aboveground
	I04 - Overfill - Product Level Gauge (A/G)
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	06/01/2001
Capacity Gallons:	3500
Tightness Test Method:	34
Date Test:	08/15/2023
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

DEC Memo:	09/17/15-Hiralkumar Patel. DEC Austin assigned this case on 06/24/15. alternate address: 39A E 1st Street no PBS record found. other spill # 9412743 was reported 12/22/1994 as 2 gal #2 fuel oil was spilled. case closed. 39 East 1 Realty LLC. **property owner** c/o Icon Realty Management 419 Lafayette Street, 5th Floor New York, NY 10003 Attn.: Terrence Lowenberg Ph. (212) 661-2700 email: terrence@iconrealtymgmt.com 09/18/15-Hiralkumar Patel. 10:05 AM:- visited site and met Arnold. site has one AST completely wrapped in cinder block/concrete. no signs of oil seepage noted from the weep holes in tank wrap. all lines run aboveground within building basement. the fill and vent line cross the concrete floor and run aboveground near northwest corner of the building. the active fill port is aboveground near the building wall. during visit, noted an abandoned fill port by the curb in northwest area of the site. Frank **building super** PH. (718) 913-1188 10:11 AM:- spoke with representative at ATS. as per their record, on-site building has 1,000 gal tank. there was no further work done at the site by ATS after initial test failure in Nov. 2012. 11:12 AM:- received message from Brett Gartenberg (646-362-8851). 11:47 AM:- spoke with Brett. informed him about the open spill case. he asked to send correspondence to Mr. Lowenberg. Brett Gartenberg JM Zoning 299 Broadway, Suite 1100 New York, NY 10007 Ph. (646) 362-8851 Fax (775) 628-3726 email: bgartenberg@jmzoning.com 12:08 PM:- sent letter to Mr. Lowenberg requiring submission of documents related to tank test failure investigation/cleanup by the end of 10/16/15. letter emailed to Mr. Lowenberg. 09/24/15-Hiralkumar Patel. 8:51 AM:- received call from Mr. Lowenberg. he has some documents related to the site and will email it. 9:27 AM:- received email from Brett including copy of tank test result dated 05/24/2013. PTC tested the tank system on 05/24/13 and it passed. no documents received regarding cause of the failure and actions taken. 1:44 PM:- left message for Mr. Lowenberg. 1:48 PM:- spoke with representative at PTC who confirmed that they only did tank system test on 05/24/13 and no other work was performed by PTC at the site. 1:58 PM:- sent email to Mr. Lowenberg and informed him to submit required documents as per letter dated

ABOVE GROUND TTF (Continued) **S112231298**

09/18/15. email copied to Brett. 3:17 PM:- received call from Mr. Lowenberg. he mentioned that the initial test on 11/12/2012 was conducted by a contractor working for potential buyer at that time. Mr. Lowneberg stated that the test in Nov. 2012 was inconclusive possibly due to vent pipe. he claimed that no repair work was performed on the tank system after failure report in Nov. 2012 and tank system was retested in 2013 when it passed. asked him when was the fill port at the curb was closed. he was not aware of the closed fill port at the curb. he will review files and call back. 11/03/15-Hiralkumar Patel. 2:38 PM:- sent email to Mr. Lowenberg and asked him to submit required report immediately. email copied to Brett and Melissa DiGiacomo (melissa@iconrealtymgmt.com). 11/17/15-Hiralkumar Patel. received email from Ms. DiGiacomo (at 12:36 PM on 11/09/15) including a letter with result of tank system test dated 05/24/13. in the letter, Mr. Lowenberg mentioned that Approved Oil inspected the tank system in Jan. 2013 and found leak in the tank system due to a failed vent port. Approved Oil replaced the vent and fill port on, or around 01/25/2013. after that, the tank system was retested on 05/24/13 and it was found tight. case closed based on available information. as per the tank system test result, the site has 1,500 gallon tank which requires to be registered. 2:37 PM:- sent email to Mr. Lowenberg including copy of PBS application and instructions. asked him to immediately register the 1,500 gallon tank system at the site. email copied to Melissa, Brett, Joey Goldzal (joey@jmzoning.com) and DEC Leszek. 2:44 PM:- sent spill closure letter to Mr. Lowenberg. letter emailed to Mr. Lowenberg, Melissa, Brett and Joey Goldzal. 2:45 PM:- received email from Mr. Lowneberg including copy of PBS certificate (# 2-329487).

BASEMENT (Continued) **S102560153**

Armstrong of Langon Engineering (212-479-5537). She indicated that Langon has been retained by the building owners to investigate the soil contamination from this tank test failure, and she wanted to know the process for getting our assistance in getting street and subway access permits for the boringsings (work would adjoin a subway, and one of the points wouldbe in a tree well, which would need NYC Parks approval...?). Referred her to NYCT and NYCDOT. I told her she needs to speak with the tank tester to get a better idea as to what the tank test showed, to assure this was not a dry leak . She replied that she was told that there is some evidence of oil seepage, no further info given. Informed her that any such investigatory work would need the approval from DEC before proceeding. Gave her the DEC project manager's name (Kumar Patel) and his direct phone #. - end 12/01/14-Hiralkumar Patel. 3:25 PM:- received message from Mike Burke from Langan Engineering. Mike Burke Langan Engineering Ph. (212) 479-5413 Jennifer Armstrong Langan Engineering PH. (212) 479-5537 12/02/14-Hiralkumar Patel. 8:16 AM:- left message for Jennifer at Langan. 8:43 AM:- received call from Mike and Jennifer from Langan. after grade conversion from #6 to #4 oil, an oil seepage was noted from area where the remote fill line enters the basement. currently, the leaking remote fill line is out of service. Langan is planning to open the sidewalk for removal of leaking fill line and any associated contamination. besides NYC DOT, they need permit from MTA (a subway line within 100 ft) and NYC Parks (remote fill port near a tree well). Mike will send email with work plan and schedule. 12/04/14-Hiralkumar Patel. received message from Jennifer (at 5:05 PM on 12/03/14). 9:44 AM:- spoke with Jennifer. she mentioned that the building needs an oil delivery and they are planning to install a new fill line near the building foundation wall, in area where the existing leaking fill line is located. owner is planning to remove sidewalk flags near the building wall for fill line installation. informed Jennifer that the Department requires a document, from the contractor, confirming condition of subsurface soil in the proposed excavation area, including color photographs of the excavation. informed her that any contamination must be removed/remediated. she mentioned that a permit package will be submitted to MTA today and to NYCDOT in near future. 12/12/14-Hiralkumar Patel. 2:58 PM:- received email from Jennifer including remediation work plan. Langan proposed to excavate and remove the leaking fill line and associated contamination, and to collect endpoint samples. they have submitted plans to MTA on 12/10/14 and waiting for response. 12/22/14-Hiralkumar Patel. received email from Jennifer (at 4:44 PM on 12/19/14) requesting deadline extension for report submission as approvals needed from various agencies. 12/26/14-Hiralkumar Patel. 1:28 PM:- left message for (and sent email to) Jennifer and asked her to call back to discuss deadline extension. 12/29/14-Hiralkumar Patel. 1:44 PM:- received call from Jennifer. they are waiting for approval from MTA and then submit permit application to NYC DOT. she believes that field work can begin in Feb. 2015. as the leaking line is not in use and requires approval from multiple agencies, approved Jennifer's request to submit report by the end of 03/13/15. 01/21/15-Hiralkumar Patel. 11:55 AM:- received email from Jennifer. they got OK from MTA and DOT. now they will apply permit application to NYC Parks. 02/04/15-Hiralkumar Patel. 1:28 PM:- received email from Jennifer. contractor has submitted permit application to NYC Parks. 03/26/15-Hiralkumar Patel. 12:09 PM:- received email from Jennifer. they received permit from parks dept. they are planning to

BASEMENT (Continued) **S102560153**

start excavation on 04/06/15. Jennifer requested time extention to end of April for report submission. 04/10/15-Hiralkumar Patel. 3:02 PM:- spoke with Jennifer. she mentioned that contractor has set up temporary pedestrian walkway today and will start soil excavation on 04/13/15. 04/14/15-Hiralkumar Patel. 10:36 AM:- received message from Jennifer. they finished excavation yesterday and has collected endpoint samples. she mentioned that the excavation was about 4 ft deep. 09/08/15-Hiralkumar Patel. 12:13 PM:- received email from Jennifer including link to cleanup report. - the leaking fill line was replaced - petroleum impacted soil was first observed approx. 18 inches below sidewalk grade adjacent to the building wall - impacts visibly extended to a depth of about 44 inches bg and upto approx. 24 inches away from the building - 0.9 tons of impacted soil was removed - four endpoint samples were collected: three from sidewalls (east, west and south) and one from bottom - north sidewall of the excavation was the building wall - no contamination noted in endpoint samples 09/10/15-Hiralkumar Patel. 1:30 PM:- sent email to Mr. Hollweg and asked him to submit immediately a letter confirming cause of initial test failure and result of tank system retest. email copied to Jennifer and Mike at Langan. 09/15/15-Hiralkumar Patel. received email from Jennifer (at 12:47 PM on 09/14/15) including result of tightness test of the newly installed fill line. the line was found tight during test on 04/14/15. 09/16/15-Hiralkumar Patel. 10:22 AM:- received message from Mike. 10:28 AM:- spoke with Mike. he mentioned that the tank system is aboveground, except portion of fill line and vent line. he inspected the site and had not observed any leak from tank bottom or supply/return/vent lines. the fill line was recently replaced and tested tight. he will submit revised report. 09/17/15-Hiralkumar Patel. 8:08 AM:- received email from Jennifer including link to revised report. case closed based on available information. 11:12 AM:- sent spill closure letter to Mr. Hollweg. letter emailed to Mr. Hollweg and Jennifer.

DEC Memo:	09/23/13-Hiralkumar Patel. alternate address: 584-590 Broadway, 116-122 Crosby Street PBS #: 2-605044. as per PBS record, the site has two 7,500 gal #6 oil ASTs in contact with soil. the tanks were installed in Feb. 1953. other spill # 0012623 was reported on 02/27/2001 due to 2 pint of unknown petroleum found in ConEd manhole at the site. case closed. 584 Broadway LLC. **property owner** c/o Olmstead Propoerties, Inc. 575 8th Avenue, Suite 2400 New York, NY 10018 Attn.: Cesar Vasquez **property manager** PH. (212) 334-8400 Ext. 12 NYC DOB permit approved on 08/22/13 for grade change from #6 to #2 oil. 10:40 AM:- spoke with Mark at PTC. they are working as sub-contractor. Mark mentioned that the tanks are aboveground and possibly sitting on floor. PTC will pump out tanks on 10/04/13. 12:27 PM:- received call from Tom, building super. informed him that the department requires isolation test of the system. Tom mentioned that both tanks are covered with cinder blocks. Tom Krasniqi **building super** Ph. (212) 334-8400 Ext. 23 Fax (212)925-4353 email:

OLMSTEAD PROPERTIES, LLC. (Continued) **S107783925**

tkrasniqi@olmsteadinc.com 10/10/13-Hiralkumar Patel. 4:00 PM:- visited site. its 12 story commercial building, with two level basement. met Tom, building super. inspected tanks located in sub-basement of the site. PTC crew was on-site, cleaning tank's interior. the two 7,500 gal tanks are located aboveground, completely wrapped in cinder blocks. no petroleum odors were noted in building, other than tank room where crew was working. Tom mentioned that isolation test will be done. 4:26 PM:- spoke with Mr. Vasquez. as tanks were installed in 1953 and not visible for inspection, strongly suggested him to remove these tanks and install a new tank completely aboveground. 10/15/13-Hiralkumar Patel. 10:35 AM:- received email from Tom. he mentioned that both tanks were tested and found tight. a small leak was found on the vent line for Tank #1 and a coupling needs to be replaced on the oil line. repair work has been scheduled for tomorrow. 12:39 PM:- sent email to Tom. informed him that both tank systems mus be retested after repairs and results must be submitted for review. email copied to Mr. Vasquez. 12/11/13-Hiralkumar Patel. 4:05 PM:- left message for Tom. 4:06 PM:- sent email to Tom inquiring about tank system test results. email copied to Mr. Vasquez. 12/12/13-Hiralkumar Patel. 10:04 AM:- spoke with PTC desk person. she mentioned that after tanks cleaning, both tank only passed. during retesting of tank systems, they found issue with vent and fill line on tank 1 and fill line on tank 2. building management did required repair and both tank systems were tested on 10/23/13, when it passed. tank test results will be submitted for review. 10:11 AM:- spoke with Mr. Vasquez. he mentioned that corrsion found on fill and vent line. they changed both fill and vent lines under the sidewalk and installed new lines in same location. he confirmed that no contamination was found. asked him to submit a report confirming this. he will talk to contractor who performed line work. 10:15 AM:- received email from PTC including tank system test results. both tank systems were tested on 10/23/13 and passed. 12/13/13-Hiralkumar Patel. 3:07 PM:- received email from Anthony Fischetti or Champion Combustion including a letter report. Anthony mentioned that they replaced both fill and vent lines and tested. 12/16/13-Hiralkumar Patel. 11:01 AM:- sent email to Anthony and asked to submit document confirming condition of subsurface soil where fill and vent lines were located. 12/17/13-Hiralkumar Patel. received email from Anthony (at 5:42 PM on 12/16/13). he stated that the sidewalk where the fill and vent are located is vaulted and the underside of the sidewalk is the basement of the building. he confirmed that all piping are visible from beneath. based on available information and documents, case closed.

DEC Memo:	7/13/15 TJD File review. Spill reassigned from AH Primary (Ahmed) to AH Secondary (DeMeo). 12/18/15 TJD File review. ABC Tank has submitted closure report stating: A tank tightness test was performed by others on (1) 1080 gallon aboveground vaulted fuel oil storage tank. The tank did not PASS the test and NYSDEC Spill Case #1501578 was assigned to this site. ABC Tank observed a precut on top of the tank that would cause the tank to fail a test. ABC Tank pumped out & cleaned the interior of the tank. All lines were disconnected from the top of the tank. Upon completion of the job, ABC Tank welded the pre-existing precut closed ABC Tank performed a pressure test on the isolated (1) I 080 gallon tank. The tank was able to hold the pressure for more than 24 hours. ABC Tank performed a pressure test on each lines. All lines, except the vent line, were able to hold the pressure. ABC Tank tightened the vent line and performed a second pressure test on the line. The vent line was able to hold the pressure. ABC Tank reconnected all the lines back to the top of the tank. A tightness test was performed on (I) 1080 gallon tank & tank system. The tank & system were deemed a PASS. A copy of the tightness test is attached for your review. Based upon above, initial tightness test failure was a dry leak. Repairs were made and system passed a subsequent test (report included with closure documentation). No further action is required. All documentation uploaded to DECDOCS. Spill closed.
Remarks:	Basement contained tank failed test. Investigate, repair and retest being planned.

88-03871. See also spill nos. 81-01485, 88-09786, 00-00286, 02-06308, 02-06369, and 04-08460. SEE PIN FILE SP1596.701 for additional information. 3/13/2000: DEC sent Stipulation Agreement for cleanup. Spill Reassigned from O'Dowd to Sigona in March 2000. (Sigona) 2/11/2003: Order On Consent No. D2-5001-02-12 is executed - Spill Nos. 81-01485, 88-03871, 88-09786, 00-00286, 02-06308 & 02-06369 & State Funded Project Identification No. 01596 - Former ExxonMobil S/S, 37-61 West Houston Street, New York, N.Y. Petroleum Bulk Storage (PBS) facility No. 02-157945 (the Site). (Sigona) 3/31/2003: DEC received Geologic Services Corporation (GSC) Supplemental Community Air Monitoring Plan (SCAMP) to address potential petroleum vapors and dust from impacting the adjoining properties, including, but not limited to, Via Verde Art School for Children, located at 143 Greene Street #3, New York, N.Y. (Sigona) 4/1/2003: The DEC along with the New York State Department of Health's Bureau of Toxic Substance Assessment (NYS DOH) have determined that the SCAMP provided by GSC is acceptable provided that conditions, which were outlined in a letter to ExxonMobil dated April 1, 2003, are met. (Sigona) 4/23/2004: Site was transferred from Rommel (Region 2) to Harrington (Central Office) for management. (Harrington) 5/25/2004: PM conducted a site visit. Construction of on-site building continues. (Harrington) 2/4/2005: Sent letter to Exxon Mobil requesting indoor air sampling in the basement of 152 Wooster Street. (Harrington) 7/14/2005: PM conducted a site visit with Exxon Mobil personnel and their consultant (GSC). Additional investigation along Greene Street and in the parking lot @ 146 Wooster Street to be completed before remedy selection. (Harrington) 9/27/2005: Access is granted to the 146 Wooster Street parking lot. GSC will be installing an additional monitoring well in the eastern end of this parking lot before the end of the year. (Harrington) 11/16/2005: The location for the proposed monitoring well in the 146 Wooster Street parking lot has been approved. (Harrington) 1/31/2006: The chemical inventory and preliminary interview for 152 Wooster Street has been scheduled with the building's president (board of directors, 152 Wooster Street Corp.) for February 1, 2006 @ 6PM. Indoor air sampling will be conducted primarily in the basement, and will be conducted on February 1, 2006 @ 9AM. (Harrington) 2/6/2006: Sent letter to Exxon Mobil approving request to discontinue bi-weekly LPH gauging and bailing at monitoring well GMW-15 located in the basement of 152 Wooster Street (bldg. immediately south of site). Free product in well GMW-15 has not been observed since March 16, 2005. Well will continue to be gauged and sampled as part of bi-monthly groundwater sampling events for the site. Accordingly, spill no. 04-08460 has been closed. (Harrington) 2/26/2006: Approved off-site SI report and supplemental off-site SI work plan. Two (2) additional wells will be installed in northwest corner of site. Monthly EFR events to commence in order to reduce dissolved levels of BTEX in groundwater. Sent letter for NYCDOT road-opening permits. (Harrington) 5/16/2006: Approved Indoor Air Quality Investigation Report for the work done at 152 Wooster Street. No further investigatory work regarding indoor air quality will be required at this location. (Harrington) 8/16/2006: Approved the revised RAP. RAP calls for the usage of chem-ox technology in order to address the dissolved BTEX beneath the on-site buildings. (Harrington) 8/31/2006: Sent an e-mail to Exxon Mobil approving the sensitive receptor survey report. (Harrington) 2/6/2007: Project transferred from Harrington to Smith (central office) for management. (Smith) 4/18/2007: Performed site visit. One

FORMER MOBIL S/S#17-KHB (Continued) **S104513528**

round of chemical oxidation injection was performed. However, due to exhaust fumes from the equipment a tenant of the 152 Wooster Street requested that work be stopped. These concerns will need to be addressed before work will be allowed to continue. (Smith) 7/20/2007: Second round of chemical oxidation performed. Tenents concerns addressed by moving truck and equipment as far away from building as possible (onto West Houston Street). No complaints from residents during this work. (Smith) 7/24/2007: Project transferred from Smith to Harrington (central office) for management. (Harrington) 8/3/2007: PM visited the site with Kleinfelder personnel (Mooney, Meyerhoefer). Follow-up groundwater sampling for the 2nd round of chem-ox injections will be conducted shortly. Work was delayed due to road-opening permit issues with NYCDOT. (Harrington) 3/25/2008: PM sent e-mail to Exxon Mobil approving the Supplemental Off-Site SI Report, the Remedial Activity Summary Report documenting the results of the 3rd round of chem-ox injections, and the latest quarterly report (October - December 2007). Access issues between Exxon Mobil and the residents of 152 Wooster Street have been brought to the attention of DEC legal counsel. (Harrington) 7/17/2008: PM sent e-mail to Exxon Mobil approving quarterly report for January - March 2008. E-mail required an update regarding negotiations between Exxon Mobil and 152 Wooster Street Corporation, as the 4th round of chem-ox injections has been delayed since June 24th due to another round of access issues. (Harrington) 12/4/08 - Haggerty: Assumed management from Dave Harrington 3/27/09 - Haggerty: approved Remedial Activities Summary Report prepared by Groundwater & Environmental Services (GES). GES provides technical services for Kleinfelder with ChemOx. This was Phase IV out of V phases detailed in the RAP and Consent Order. 11/11/08 - 11/13/08 Hydrogen Peroxide and Sodium Persulfate were injected. High BTEX concentrations (greater than 40ppm) remain in groundwater. It appears the ChemOx is remediating the groundwater but not the adsorbed contamination preventing the dissolved BTEX concentrations from decreasing. The last Phase of ChemOx is scheduled for June. After the last round, we will re-evaluate the technology and try to come up with a more effective remedy. Possibly surfactant enhanced ChemOx June 2009 - Phase V of chemOx injection completed in June September 2009 - Groundwater still heavily contaminated after 5 injection events. Up to 40ppm of BTEX in groundwater. PM sent email to Charles Kolb, Exxon PM, to have a conference call. Consent Order called for 5 injection events which are now exhausted. It appears the groundwater surrounding the injection wells is being remediated, but contaminants adsorbed to the soil particles remain. Drilling is this area is very difficult downtown Manhattan. April 2010 - PM met with Kevin Hale to discuss project. Kevin Hale, PM, EM, Kleinfelder had a conference call on 2/18/10. EM will be submitting a work plan by the end of April 10. EM requested a month extension. Due date May 19 May 2010 - Revised RAP under review July 2010 - Approved RRAP with some modifications. Site conditions limit what is possible. Site is now 7 story building so we have to design a remedial approach based on the current wells, Injection points under the building. We will extract groundwater at the site in conjunction with vapor extraction. Based on the contruction of all wells, vapor extraction of the unsaturated zone is possible and while the grondwater is depressed the heavily contaminated smear zone will be exposed allowing for vapor extraction of the saturated zone February 2011 - Feasability Report due next month March 2011 - Permitting issues delayed HIT events and gw sampling so Feasibility Report has been pushed back May 2011 -

FORMER MOBIL S/S#17-KHB (Continued) **S104513528**

Feasibility Report due in end of June June - Feability Report under review July 2011 - Approved Feasibility Report. Based on the results, PM required a 5 consecutive day HIT event. Based on that result, future HIT events will be scheduled accordingly August 2011 - 5 day HIT event completed December 2011 - Feasibility Study Report of review January 2012 - VTE events successful in reducing contaminant mass in the unsaturated zone to a point where GES is going to begin additional rounds of ChemOx, most likely persulfate February 2012 - GES now EM's consultant. RAP for sodium persulfate injections due 3/31/12 April 2012 - Approved RAP, already has a CO December 2012 - GES planning an additional injection once the holiday embargo is over May 2013 - Waiting on groundwater data to determine the success of the additional injection October 2013 - a spike in dissolved concentration in one well at 27,000ppb total BTEX. Agreed to wait until the next groundwater data set comes in before making a decision as to whether additional injections are required June 18-19, 2014 - additional hydrogen peroxide/ sodium persulfate/ air sparge/ SVE event conducted. ISCO injected directly into monitoring wells, rather than only into inject wells, to address areas of the groundwater impact. June 1, 2015 - Spill closed. ExxonMobil remediated contamination to the extent feasible. A multi-story residential building was built across the entire property in the early 2000's which limited ExxonMobil's consultant GES to fully remediate impact to the site. Under a consent order, the remedy included SVE events and 8 separate ISCO (hydrogen peroxide and sodium persulfate with chelated iron) injection events from 2006-2014. All on-site injection wells and monitoring wells (used for SVE) were installed before the building foundation and piped to a vault in the adjacent sidewalk. As of the last SVE data collected in June 2014, very little to no vapor mass was collected from the unsaturated zone confirming the remaining soil contamination resided in the smear zone. The Department beleives that further injections would have a minimal impact on the remaining groundwater contamination at this point. It appears that adsorbed contamination in the smear zone is the source of the remaining groundwater contamination and given the physical constraints of the property, the inability to access these limited pockets of remaining soil contamination makes further remediation unfeasible.

Remarks: LINE TEST FAILURE, LINE WAS CAPPED OFF; GAS SERVICE MAINTENANCE DID TEST.

DEC Memo:	tank had a fiberglass patch on it and during an overfill approx 1 cup of oil spilled. PTC removed the cement wrap around the tank, removed the fiberglass patch and welded a metal patch into place. The tank is now being re-wrapped in cement. Minor spill was cleaned up. There was a stain on the floor and PTC said the owner wanted over kill so part of the floor was pulled up.
Remarks:	2500 GALLON TANK- WAS FIBERGLASSED CLOSED ON TOP AND IS LEAKING: IT IS CEMENTED : THEY HAVE REMOVED CEMENT AND ONLY 1 55 GALLON DRUM WAS TAKEN FULL OF CONTAMINATED SOIL AND IS ALL CLEANED U P

DEC Memo:	4/4/05 Sawyer noted on fax report that PTC responded, 2 bags of speedy dry, 1 gallon///Tipple updating database//// Tipple called property owner Mike at 908-355-9270, his supers are currently on vacation, he has had no complaints of odors, the Supers will contact DEC once they return from vacation.... 10/27/05 - Raphael Ketani. I wanted to close out the case, but there were no notes indicating that the spill had been cleaned up - despite 1 gal. being listed above. I called up Diana Parker at PTC ((718) 624-4842) and she told me that the total cost of the spill cleanup was $15,000. She said oil spilled onto the floor of the building and 30 drums of material were taken away. She said Bridge Transportation did the removal of the drummed material and PTC did the cleanup and took end point samples. I asked Ms. Parker for the documents verifying the cleanup. She said she would FAX them to me by next week. 1/5/06 - Raphael Ketani. I called up Ms. Parker again and told her to send me the cleanup documentation as I had previously requested. She said she would FAX it. I received the FAXed documentation regarding soil removal and site cleanup. Based upon the documentation, I am closing the case.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 7/29/2003 Sent out old TTF ltr 1/23/2004 Sangesland received a copy of a letter from ProTest (John Leddy) dated Aug 20, 2003. Letter states that the tank failed because of a non-tight manhole cover and pinholes at the top of the tank. According to Protest the tank was in a vault, PTC pumped out the tank and then the tank was cut up by Cardinal Tank. No sign of contamination was found. A new 3,000 gal tank was installed in the vault. There was no contaminated soil for disposal. Unfortunately there are no records of the PTC cleaning or the scrap disposal records. Spill Closed
Remarks:	pinholes at top of tank - wrapped tank in basement

DEC Memo:	8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 03-31-2015 - V. Brevdo As per discussion with Chief of Spill Response Section, this Tank Test Failure Spill Case is transferred to Remediation Section B for management of the project. Spill Case is further assigned to Jonathan Kolleeny. VB 06-25-2020 - V. Brevdo Spill Case is reassigned from Jonathan Kolleeny to MD Hoque within Remediation Section B. The reassignment is to optimize work load within the program. VB 12/10/2020-M. Hoque: Tried to contact the contractor's office but the phone number is inactive.(MDH) 10/1/2021-M. Hoque: Spoke to Mr. Lukas(516-466-3333) of Citi-Urban Management who manages the property. As requested, I sent him spill incident report. I requested him to send a spill remediation completion report.(MDH)

BASEMENT - TTF (Continued) **S110762262**

7/12/2022-M. Hoque: Called Mr. Lukas and left voice message to call me back. (MDH) 3/28/2023-M. Hoque: Spoke to Chris Adams (603.845.6596), Scientist III, EBI Consulting and requested him to send me a spill remediation completion report. he will search the report and end me for review. (MDH)

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN SEE ALSO SPILL NUMBERS 9611157 AND 9611309. PIN JOB. tOMASELLO 5/9/2000 9/02 DEC/AG's office settled the case and have gotten a stip signed and costs recovered for this spill as well as 96-11309. The responsible parties have contracted with environmental firms to complete the remedial activities. 5/18/04 - AUSTIN -TRANSFERRED FROM TOMASELLO - CONSOLIDATED WITH SPILL # 9611309, WHICH IS A STATE FUNDED CLEANUP - END 1/12/05 Tipple reopened in Tipple's name///stipulation and cleanup ongoing with RP at 103 East 10th Street See also spill #9807065 9/16/05 - Raphael Ketani. The May 11, 2005 to August 24, 2005 Project Status Report was received on September 14, 2005 and is under review. I finished my review of the Project Status Report and I will send a letter to John Iannone at Day Engineering ((212) 986-8645) and to 3/10 Tenants Housing Corporation instructing them to proceed with the manual monitoring and product collection for the present monitoring period. Then, if

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

warranated, they can change their methodolgy for the foreseeable future to using absorbent socks in the two wells, MW-23 and MW-29. 10/20/05 - Raphael Ketani. I called John Iannone (i-a-known) at Day Engineering, but I could not reach him. I left a voice message regarding the submission of a report about the use of the absorbent socks in W23 and W29. 10/21/05 - Raphael Ketani. I received a call from John Iannone regarding the site. He said that W23 is in the sidewalk next to the building and is a 4 inch diameter screened well. He said that is has maybe 1/4 inch of product which is being removed manually. W29, he said, is in the back of a basement and was pounded into rubble below the basement. He said that product is present sporadically in this well. Mr. Iannone added that you can have nothing in the well one month, and two months later you will find 2 inches of product. He thinks the rain has something to do with the appearance of the oil. He has an environmental specialist from a consulting company coming over every so often to recover the product. She spends a couple of hours each time. He thinks that, at this time, manual recovery is the way to go. I told him to send me a letter regarding what had been spilled, what has been recovered so far, and what he would like to do (some sort of plan) regarding manual collection and the use of absorbent socks. He said he would get the letter out to me soon. 11/21/05 - Raphael Ketani. I received Mr. Iannone's letter dated 11/18/05, stating that he will request a closure of the spill case in 3 or 4 months if measureable amounts of product are not seen in the wells. 4/25/06 - Raphael Ketani. I received a progress report from John Iannone of Day Engineering. The report stated that the product thickness jumped up to as much as 2.82' after several months of product thickness measurements which were below 0.1'. He said that he will keep monitoring and collecting the oil. 4/28/06 - Raphael Ketani. I received a letter dated April 21, 2006 from Stephen DeNardo of AJClarke Real Estate Corp. ((212) 541-4477). Mr. DeNardo stated that he received a violation from the NYFD for the site for having unregistered holding tanks. He asked that DEC inform the NYFD that registration is not necessary. I left a message for Mr. DeNardo that he has to discuss the issue with the NYC Dept. of Buildings. 5/15/06 - Raphael Ketani. Mr. Koon Tang of the Div. of Environmental Remediation, Region 2, came over to me today and asked whether I can straighten out the issue of Mr. DeNardo getting repeated violations for tanks on his property at 107 E. 10 Street that are really for the building next door at 103 E. 10 Street. I talked to Mr. DeNardo and he said there are 2 tanks with DEC emblems on them and an oil water separator tank on his property. He said that he had already been to court once to fight the last violation and had received another violation. (At the top of the notes for this case it is indicated that there was a PIN job - which appears to have been reimbursed by the R.P.) I will send a letter to A.J. Clarke stating that the tanks were installed by DEC and that they are needed in order to contain fluids recovered from next door. 06/20/06-Vought-This spill transferred to DEC Vought due to exisiting PIN for spill #9611309. 06/20/06-Vought-File review by Vought. See also spill #9611309 for PIN at adjacent site 105-107 E 10th St. Letter from AG Riggi to 3/10THC. Demand letter for $422529.45 for cleanup costs. Letter from DEC Tipple to John Iannone (103E10th Street)-2/22/01. DEC ... continues to require the following work to be conducted if the owners of 103 East 10th Street intend to takeover the investigation/remediation efforts... . Requirements include installation of two upgradient delineation wells inside basement of 103E10th St. 2)installation of a 3rd Avenue delineation well 3)installation of downgradient (south-side) delineation wells 4)installation of an enhanced remediation system usch as automated EFR system. The Department is currently having a Multi-Phase Extraction System Pilot Test conducted on this site . Currently the Department's contractor is preparing to install the additional wells needed to fully delineate the plume resulting from the 103 East 10th Street release . Please inform the Department by March 31, 2001 as to your clients intention... . Letter from Ianone to DEC Tipple-04/30/01. Letter from Cody Ehlers Group(CEG)-(Iannone) consultant for 103E10th St. CEG hired Apex Envioronmental to perform additional well installation, perform baildown tests, initiate weekly multi-phase extraction (MPX) program for wells with free product for one year. Request DEC assistance to obtain sidewalk permits. Letter from DEC Tipple to CEG Ianone-5/1/01. DEC agrees with proposal for sequential installation of wells, reasons for well installation in basement of 103E10th, deadline for installation of additional wells is by 5/18/01, submission of baildown results for wells by 5/7/01, submission of RAP by 6/15/01 for installation of a permanent recovery system. Letter from AG Riggi to Debra Rothberg-5/1/01. ...Mr. Iannone continues to selectively eliminate certain portions of the work considered by DEC to be essential in investigation and remediation of this site. AG will proceed with litigation by end of month if settlement is not reached. Letter from AG Riggi to Debra Rothberg-5/2/01. DEC will facilitate the performance of this work by your clients only if they agree to perform the entire scope of work detailed previously in meetings and correspondence... . Letter from CEG Iannone to DEC Tipple-5/2/01. CEG is prepared to do delineation work and request DEC assistance in obtaining permits. Letter from Rothberg to AG Riggi-5/2/01. Your statement that NYSDEC requires all or nothing is deeply troubling . Rothberg asserts that past DEC expenditures were improper . Letter from AG Riggi to Rothberg-5/4/01. ...I share in your disappointment . Letter reiterates failure to delineate plume expeditiously. Due to the discovery of vapors in the building across the street, DEC has determined it cannot wait until later this month for wells to be installed, and it will proceed with the work needed early next week. Letter from DEC Tipple to CEG Iannone-7/5/01. Justification for rationale for installation of well in basement of 103E10th St. Letter from CEG Iannone to DEC Tipple-7/12/01. Request for monitoring data and well logs and quarterly progress reports. I must continue to confirm that 3/10 Tenants Housing Corporation, the owner of the cooperative building at 103 East 10th Street does not consent to the installation of this well . Affadavit (DEC Tipple)-8/23/01. Order to Permit Entry Upon Land. Letter from AG Riggi to Carole Ule (Esq.)-10/3/01. The stipulation looks fine to me. If you execute two originals, I will

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

sign both and return one to you for filing with the Court . Ule represents 103E10th St. 103E10th St will hook up to remediation system in basement of 105E10th due to lack of space in 103E10th for system. Quarterly Project Status Report (EAR) Jan 2002 to March 2002-9/20/01. Groundwater flow direction shifted from east-southeast to a more northerly then a north/northwest direction. Tanks in 107E10th St have recovered 416 gallons to date. Installation of a well in the northwest corner of 103E10th occurred. Baildown/recharge test of well in basement of 103E10th was performed but was inconclusive. Recovery system consists of four submersible pumps, 3 portable centrifugal well pumps for basement wells and 5 SpillBuster automatically adjusting pumps. Vapor extraction wells also occur in basement of 109E10th. Report recommends continuation of monitoring, cleaning oil water separators, investigate use of biorem beneath the buildings at 109 and 113E10th, delineate and recovery of product found in 1032E10th St. Meeting List-4/22/02. At meeting was EAR, DEC, CEG, John Crane, AG Riggi. Site Plan-7/21/02. Northwest-southeast oriented line separates responsibilities of 103E10th and 105-107E10th Street. Corrective Action Plan (CEG Iannone)-7/21/02. 3/10 THC intends to contract with EAR to continue work and maintenance. The prospective owners of the building at 105-107 East 10th Street and the current owners of the building at 103E10th Street (i.e, 3/10 Tenants Housing Corporation) have agreed on a division of work currently required by the NYSDEC to address these two spill sites . Document describes in detail reponsibilities of each party. CAP includes weekly well monitoring of wells (W1, W3, W8, W9, W11, W12, W13, W18, W19, W20, W24, W25, W27, W28, W29. Product recovery includes existing wells and recovery systems installed by DEC and collection of effluent samples. Vapor abatement system will be operated by 105-107E10th Street. 3/10 Tenants Housing Corporation would continue to operate the vapor abatement system until Spill #9913474 has been closed by the NYSDEC. Reports will be submitted to the Department quarterly. 10/16/07-Vought-File review continued by Vought: Corrective Action Plan (CEG Iannone)-8/5/02. New CAP submitted including DEC Tipple's requirements after review. 3/10 THC will perform the following tasks: 1)Weekly well monitoring and if product is encountered, bailing 2)Product recovery via use of previously installed submersible pumps, spill busters and MPX events 3)Biweekly maintenance of submersible pumps and sumbission of status reports 4)Biweekly maintenance of dual phase portable pumps and submission of stautus reports 5)Biweekly maintenance and adjustment of oil/water separator 6)Biweekly collection and analyses of groundwater treatment system effluent 7)Weekly maintenance of holding tanks 8)Operation of vapor abatement sytem if spill 9611309 is closed and DEC continues to require operation. 9)Submission of quarterly status reports. 10)Possible use of Bio-rem in Closure Plan upon no more free product. 11)Sampling of groundwater for dissolved parameters. Closure may be considered upon four rounds of asymptotic groundwater levels. Letter from DEC Tipple to CEG Iannone-8/5/02. DEC reviewed the CAP and required title to be changed to Remediation Plan and after ALL product is removed from wells the remediation of any other soil and or dissolved petroleum contamination will be addressed. STIPULATION AGREEMENT with due date of 8/20/02 sent by DEC Tipple to: Ms. Heather Verran Ramo 3/10 Tenants Housing Corporation 103E10 Street New York, NY 10003 Remediation Plan and Signed STIPULATION AGREEMENT (CEG Iannone)-8/16/02. Copy of remediation plan and signed Stip. 10/17/07-Vought-Continued File Review by Vought:

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

Email from CEG Iannone to DEC Tipple-10/1/02. This is to let you know that the EAR contract has been signed and they will be starting work tomorrow... Memorandum (CEG Iannone) to DEC Tipple-4/22/03. Attached please find the draft product thickness tables and maps for 103E10th Street... Project Status Report April-December 2002 (CEG Iannone)-6/19/03. ...only 17 gallons of product have been removed from the 5 sidewalk product recovery wells and an additional 9.5 gallons was removed from basement well. However, groundwater flow during this period has reversed direction due to last year's drought and some product has now probably moved to the subsurface soil beneath the building at 103 East 10th Street . Report recommends reduction to monthly monitoring and increase in frequency of manaul bailing as opposed to operation of product recovery system. EAR report shows groundwater flow to the north/northwest. Trace free product in W12 and W13 and .33'FP (W20), .46'FP(W28). Product levels of 1 to 3 feet have consistently accumulated in W29 which is bailed weekly. Operation of portable recovery pumps in basements of 109 and 111 E10th discontinued due to lack of free product (FP) and product now removed via and absorbent socks and no effluent samples being collected and system not on and no discharge. Spill Buster pumps still in operation and maintained biweekly and removed 17 gallons referred to above during this period. Report recommends reduction to biweekly well monitoring, temporary discontinuation of operation of pumps in W7, W21, W22, W23 and W26, manual recovery of product and more frequent manual recovery of product in W29. Email from CEG Iannone to DEC Tipple-7/30/03. Iannone no longer working for CEG and is working for Day Engineering. 10/18/07-Vought-File Review continued by Vought: Project Status Report (Day Engineering and EAR) Jan 2003 thru June2003. Groundwater flow direction reversed and assumed previous direction of south-southeast. Report recommend change to monthly well monitoring, discontinuation of product recovery system using portable wells, removal of product from recovery wells and W29 via peristaltic pump which was approved by DEC on 9/5/03. 8 week test program of manual product removal from wells via peristaltic pump will be initiated and report will be submitted to DEC. Proposed Revision to the Remediation Plan (DAY Iannone)-8/26/03. Report proposed use of manual bailing and discontinued use of the troubled automated product recovery system . Revisions include weekly product recovery, monthly monitoring for a period of three months, Letter from DEC Tipple to Iannone-9/5/03. DEC reviewed Proposed Revision and will allow a two month pilot study with a subsequent analysis of the effectiveness provided that product is removed from W29 and the recovery wells three times per week for the first four weeks of the study, removal of product from wells W7, W21, W22, W23 and W26 using peristaltic pump. Report to be submitted to DEC within ten days of the 8 week pilot study. If DEC does not recevie report within that time, product recovery system will be completely rehabiliated and reinstalled. Email from DAY Iannone to DEC Tipple-9/5/03. Iannone received 9/5/03 letter from DEC Tipple and all looks good to me . Email from DEC Tiplle DAY Iannone-10/15/03. DEC requires submission of bailing schedule with specific dates. Email from DAY Iannone to DEC Tipple-10/17/03. Product pumping will begin on 10/21/03 and subsequent specific schedule attached. Email from DAY Iannnone to DEC Tipple-10/29/03. Proposal to install socks in four recovery wells due to the absence of product that will be maintained weekly, discontinuation of three times bailing per week for these four wells. Socks to be placed in wells W7, W21, W22 and W26 this week. Email

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

from DEC Tipple to DAY Iannone-10/29/03. Request for amount of product recovered from wells, rate of recovery, proposal to check socks. Email from DAY Iannone to DEC Tipple-11/3/03. Only appreciable amounts of product recovered are from wells W23 and W29, recovery rates for W29 are between 1-1.5' of product every one to two days, and no need to check socks as no product in these wells for over one year. Proposed Changes to Revised Remediation Plan (DAY Iannone)-11/5/03. Four of five product recovery wells in sidewalk have no free product and proposal to install socks and monitor weekly. Revised Remediation Plan (DAY Iannone)-12/22/03. During 8 week program a total of 11.69 gallons of product removed from W23 and W29. Proposal for manual bailing of product 1 to 3 times per week for next 2-3 months, monthly monitoring of socks in former product recovery wells, quartertly monitoring of wells without free product. Letter from DEC Tipple to DAY Iannone-12/23/03. ...there was never an approved revision to the August 16, 2002 NYSDEC Stipulation . DEC allowed a two month pilot study with subsequent analysis. Complete report summarizing findings must be submitted to DEC Tipple within ten days. DEC awaits monthly groundwater elevations, status of all wells, and site map with groundwater flow direction. There is no revised remediation plan approved by the NYSDEC for the site, there is currently a two month pilot study being conducted . Letter from John J Grogan to DEC Tipple-2/13/04. We are writing to obtain a follow-up on the status of the above mentioned spill and the impact it has has on our property (109-119 East 10th Street). Request for definitive date when wells will be removed as well as all other monitoring equipment. Project Status Report (CEG Iannone) July 2003-March 2004. ...little or no product has been observed in 18 of the 20 Site monitoring wells during this reporting period. Two wells, W23 and W29 still have accumulating product. ...manual product removal methods equal and, for some periods, exceed the removal rate acheived by the automated product removal system . Groundwater flow to the north. Two wells with product are W23 and W29. 13.77 gallons of product removed from W23, 6.18 gallons removed from W29 and .16 gallons removed from other wells. Current product recovery methods will continue until no more measureable product in wells. Letter from DEC Tipple to 3/10 THC (Verran Ramo)-4/9/04. Please be advised that you are in violation of the Stipulation . DEC currently awaiting completed study of proposed future remedial strategies at the site. As per Section 3.3 of the August 7, 2002 Remediation Plan, the vapor abatement system will be the responsibility of the 3/10 Tenants Housing Corporation after spill 9611309 has been closed . I am currently awaiting the March 2004 Quarterly Report . Letter from DEC Tipple to 3/10THC Verran-Romano-8/19/04. Spill 9611309 has been closed. Operation and maintenance of vapor abatement system will be turned over to 3/10 THC. Email from DEC Tipple to DAY Iannone-12/28/04. I am awaiting acknowledgement that 103 is now responsible for both the remediation systm as well as the vapor abatement system... . Request for past due Nov 2004 report. Residents of 105-107 E10th complained about noise from vapor abatement system. 10/22/07-Vought-Continued File Review by Vought: Email from DAY Iannone to DEC Tipple-12/28/04. 3/10 THC has assumed responsibility for operation of the vapor abatement system related to this spill . The vapor abatement system is now operating and in good condition and is being maintained by EAR. Rubber isolation material installed to address noise complaints. Product still occasionally noted in W23 and W29 and ERM hired to perform groundwater monitoring and manual

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

product recovery and if present is 1 to 3 in thickness. Project Status Report (DAY Iannone) April 2004-Dec 2004. As discussed in the report, no product has been observed in 18 of the 20 site monitoring wells during this reporting period . 8 gallons of product removed from W23 and W29. Socks have no product. Average product thickness is .02'(W23) and .06'(W29). Groundwater flow to the north. Removal of product fromw wells W23 and W29 2 to 3 times per week via portable peristaltic pump. THC has assumed responsibility for that system since that time (vapor abatement system). Vapor abatement system is currently in operation. Exhaust fans installed in basements of 109 and 113 East 10th Street to remove stray petroleum odors and intake grills were installed. Vapor extraction blower is also in place in sump of 109 E10th to remove vapors and two dedicated SVE wells in same basement. Vapor phase treated using carbon canister. Report recommends manual bailing till product no longer present at which socks will be installed and groundwater sampling be proposed. Email from DAY Iannone to DEC Tipple-1/4/05. W29 had two feet of product. Project Status Report (DAY Iannone) Jan 2005 to May 2005-5/19/05. 2.4 gallons of product removed from W23 and W29. Enclosed email request to perform short-duration test of vapor abatement system (ie shut down system for 2 to 4 days). Groundwater flow to the north. OM&M includes semi-annual monitoring of all wells, monthly monitoring of recovery wells and weekly monitoring and recovery of W23 and W29. 2.35 gallons of product removed during period. Recommendation for further monitoring. Project Status Report (DAY Iannone) May 2005 to Aug 2005-5/19/05. One gallon of product total removed from W23 ane W29 during period. Groundwater flow to the north. Product recovery from W23 and W29 1 to 2 times per month. Recommendation for further monitoring. Letter from John G. Grogan to DEC Tipple-9/13/05. Letter requesting status and request to provide definitive date that wells will be removed from property as well as removal of all other monitoring equipment. Letter from DEC Ketani to Verran-Ramo and DAY Iannone-9/16/05. DEC agrees with current groundwater monitoring schedule. Written request must be submitted to use socks in place of manual product recovery. Letter from DAY Iannone to DEC Ketani-11/18/05. Approximately 407 gallons of product was removed from August 1999 through September 2003 using the automated product removal system... and 32 gallons have been removed manually. Absorbent socks will be placed and monitored in each of these wells . (W23 and W29). Spill #0511701 101E10th Street-1/10/06. Spill reported by Eric Telemaque (Emteque 212-631-9000) that tank was uncovered during excavation and discolored soil was noted from 14' to 20'bg. See this spill for continued file. Progress Report (DAY Iannone)-4/19/06. Only W29 still has product. As you can see, product levels in well W29 rose unexpectedly in February 2005 . Product levels up to 1'. No product or petroleum release was reported to the NYSDEC when the adjacent building including the basement of that building, was demolished and removed . Proposal to continue monitoring and removal until product no longer present for 3 months and upon then NFA will be proposed. Letter from AJ Clarke Real Estate Corp (Stephen DeNardo) to DEC Ketani-4/21/06. Letter from DAY Iannone to AJ Clarke Real Estate. Letter providing status of two ASTs at 105-107E10th St. Tanks still inservice. Included was copy of FDNY violation for fuel oil storage with out FDNY permit. Letter from DEC Ketani to Walden Pond Realty-5/16/06. I am writing to explain the status of the tanks which are of concern . The tanks and the oil/water separator will have to remain at 107 East 10th Street for

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

the forseeable future . Progress Report (April to August 2006) and Closure Request (Day Iannone)-9/6/06. W29 still contains product. Product levels in well W29 have diminished to low levels but occasionally there are still measurable levels of product accumulating in that well. We continue to remove this product during each of the Site visits but believe that we have no removed the petroleum related to this spill to the extent practicable . One half gallon of product removed since last report. With regards to adjacent excavation at 101E10th St, Photographs of that excavation demonstrate that the soil remaining at the bottom of the excavated area and the soil staged for off-site removal appears to be clean and does not appear to be impacted from petroluem from the adjacent building, i.e 103 East 10th Street . No Further Action requested on basis of absence of product. Letter from John J Grogan to DEC Vought-9/22/06. Request for status of spill and definitive date upon which all monitoring wells can be removed. Grogan received notice for cracks in sidewalk. Letter from DEC Vought to Michael Brandt (John G Grogan)-11/21/06. Continued monitoring is required... and as such request to remove monitoring wells is denied. 10/22/07-Vought-After complete file review DEC requires: 1)call to AG for status of PIN-PIN closure for 9611309 due to 8/19/04 NFA? or keep open due to ongoing cleanup by 103E10th? 2)recent round of groundwater monitoring data for all wells and adjustment of OM&M schedule to quarterly monitoring of all wells and monthly monitoring of wells with free product. 3)Boring to the north (downgradient) 4)cc or call to John G Grogan 5)dissolved groundwater sampling of all wells, confirmatory SUMMA sampling in 105/107/109/113 east 10th St,closure of monitoring wells, vapor abatement system, product recovery tanks, vapor extraction system upon request for spill closure as per STIP RAP 01/16/08-Vought-Called AG Riggi for status of PIN and discuss further scope of work. PIN was settled and RP did execute STIP and nothing further was billed to fund. AG Riggi requested to be cc'd on letter and informed if RP did not meet obligations and Spill Funds were needed. AG Riggi suggested that PIN remain open until RP meets DEC's current obligations and requirements above. DEC sent letter with cc to AG Riggi and M. Brandt and TWO MONTH DEADLINE requiring: 1)Increase in well monitoring frequency in wells with free product to a biweekly basis 2)quarterly groundwater monitoring and sampling for EPA Methods 8260/8270 3)Delineation of groundwater contamination via installation of downgradient well to the north 4)PID survey of adjacent residences of possible consideration of vapor abatement system removal. Vought called Iannone (Ph:212-986-8645 Fax:212-986-8657) to discuss scope of work. Vought spoke to Iannone regarding biweekly monitoring and above scope of work and Iannone suggested performing another round of groundwater monitoring to confirm groundwater flow prior to delineation.
04/16/08-Vought-Received call and email from John Iannone (212-986-8645 Fax:212-986-8657) and called Iannone and left message to return call to cell phone. 04/24/08-Vought-Received message from Iannone. Vought returned call and left message to return call. Vought received call and spoke to Iannone and he is working with co-op and he has been authorized scope of work. Iannone will send in well monitoring records that show less than 1 -1.7 inches in sidewalk and such he requested biweekly product recovery that was approved by DEC. Baseline groundwater monitoring will performed on all wells. Groundwater elevations will be surveyed and groundwater flow direction. Once groundwater flow direction is determined then

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

downgradient wells will be monitored and sampled. PID survey will be performed including ambient sample. Iannone will send in workplan. 5/9/08 - Raphael Ketani. Today I received a letter with NYFD violation attached from Stephen DeNardo of A J Clarke Real Estate Corp. The letter requested that I send an updated letter regarding the need for the holding tanks that were installed by DEC to aid in the recovery of product. The violation was issued because the building didn't have a permit from the NYC Dept. of Buildings for the holding tanks. A copy of the first letter from DEC dated 5/16/2006 explaining the need for the tanks was attached. Since I am not the case manager, I forwarded the letter to Mr. Vought. 06/4/08-Vought-DEC Ketani received fax from AJ Clarke dated 4/17/08 asking for return call for status of site. Fax included copy of letter from DEC Ketani to Walden Pond Realty stating that there were two 275-gallon tanks at 107 East 10th Street as a part of state funded cleanup. As per DEC Ketani one well at site was still being monitored as part of cleanup and that tanks have to remain at property for forseeable future . Vought also received letter dated 5/6/08 from AJ Clarke including copy of FDNY violation for third time due to tanks in the basement of 107 E10th st. Vought called Iannone and he is still using product holding tanks and no basement in 103E10th Street. Less than 2 of product in wells and during one week almost one foot of product. Iannone pays rent to 107E10th Street for tanks and Iannone will be submitting workplan. Vought called AJ Clarke (Stephen DeNardo 212-541-4477) and left message to return call to DEC. Vought discussed site with DEC Austin who said that no letter will be issued by DEC requesting tank does not have to be registered or no violations should be issued as tank is now privately owned and must conform with all applicable regulations. Vought called Iannone and summarized that DEC would not negotiate FDNY violations. Letter submitted to DEC Austin for approval and addressed to: Walden Pond Realty, LLC c/o Stephen Kaplan AJ Clarke Real Estate Co. 1881 Broadway New York, NY 10023 Fax:(212)541-4872 06/06/08-Vought-Vought forwarded copy of draft letter to AG Riggi for approval and AG provided edited draft and Vought sent and faxed out letter to Walden pond with cc to Iannone and DEC Austin. 04/20/2009-Vought-File review to date: Project Status Report (Day Engineering)-7/31/08. Report covers period from 9/07 thru 7/08. Groundwater flow to the North. Product only present in wells W23, W29 and W26. Product in well W29 can only be manually recovered from this well since building codes and space limitations preclude the use of an automated product recovery system for this well . Approximately five gallons of product have been removed in the past ten months with 48 gallons removed to date since manual product recovery began in 2003. In response to DEC request, recovery frequency was increased from 6/08 to 7/08 from biweekly to twice per week. ....manual product recovery has had little, if any effect on the relatively low levels of product remaining at the Site . Because of the physical constraints and limited product removal options at this site and on the inability of the existing product recovery methods to reduce the relatively low product levels in well W29, other approaches, such as monitoring, should be considered for this site . Product currently being removed twice per month. Final Investigation and Remdial Work Plan (ERM)-August 2008. Scope of work includes monitoring and sampling of all wells, possible downgradient well installation, determination of groundwater flow direction. Up to ten monitoring wells will be sampled for laboratory analysis , proposal for PID survey in

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

buildings including possible collection of draeger tubes and building inventories. Project Status Report (Day Engineering)-11/6/08. Site visit suggested by Iannone. BWeekly NAPL Removal Test Program (Day Engineering)-11/06/08. ...(Day) recommends that NAPL removal actions be discontinued at this Site and that future work at the Site be related to the presence of NAPL be limited to quarterly monitoring of NAPL thickness in affected wells . DAY recommends that these ineffective manual NAPL removal efforts be discontinued and replaced with a program to monitor the two affected Site wells 04/20/09-Vought-Called John Iannone and left message to return call to arrange site visit. DEC requires: 1)sock installation? 2)excavation of abandoned tank? 3)disapproval of proposed quarterly monitoring only method in Work Plan. 4)dissapproval of up to ten wells being sampled and inclusion of all wells to be sampled in Work Plan. 5)disapproval of necessity of draeger tubes and PID background surveys unless desire of consultant to perform in Work Plan and arrangement of NYCDOH site visit if PID surveys show no petroleum impact. 6)Approval of determination of groundwater flow and possible installation of downgradient well as per ERM report. 06/03/09-Vought-Received email reply from Iannone on 5/11/09 that ERM representative (Tiernan Smith) available for site visit. Vought also received a call from and spoke to Tim Grogan who requested that sidewalk structures be abandoned in front of 113 E10th as well as removal of PVC piping from rear of property. DEC requires: 1)call to AG for status of PIN-PIN closure for 9611309? or keep open due to ongoing cleanup by 103E10th? 2)close spill/PIN for 9611309 due to 8/19/04 Tipple NFA? 3)quarterly groundwater sampling from all wells. 4)Site inspection of 103W10th to determine feasibility of alternative recovery methods such as trenching or excavation of abandoned UST as free product still onsite after seven years. 5)Requirement letter after site visit with cc to Iannone, Grogan and Riggi and review of letter prior to transmission by NYSOAG Riggi. 06/03/09-Vought sent email to Iannone, Tim Grogan (tcgrogan@groganassoc.com) and John Grogan (john@groganassoc.com) providing free times for site visit to determine alternative remedial action (free product still present) and also that dissolved groundwater sampling needed prior to well abandonment as requested by Grogan. Vought called and spoke to Riggi and PIN/Spill will be left open for 9611309 in case RP (Iannone) fails to meet DEC requirements and NYSOAG assistance is needed. Riggi requested she be cc'd on all correspondence to Iannone. Vought called Iannone (212-986-8645) to discuss site visit and need of quarterly groundwater sampling and left message. 06/17/09-Vought-Site visit by Vought with: Marilyn Appleberg (111 E10th St Bd of Directors) Tim Grogan John Grogan John Ianone (Day Engineering) Tiernan Smith(ERM) Mario Sciacca (ETNA Contracting 718-858-4668 will replace sidewalk concrete for 111 E 10th St). Well W9 depth to water is 11.92' with sheen and no product and no product in MW8 with depth to water of 12.52'. Grogan and Appleberg and tenants of 111 E10th st want to replace sidewalk due to cosmetic reasons and inquiring if structures in sidewalk in front of their property can be abandoned (structures in sidewalk include monitoring well MW8 and well MW9 that is in square concrete pit with steel trap door with out of service remediation wiring. Vought required Ianone and Smith to perform dissolved groundwater sampling from wells before determination of abandonment or replacement in new sidewalk can be made. Iannone to perform dissolved groundwater sampling next week so that results will be back by Vought's return from vacation. Appleberg expressed

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

concerns over historical petroleum vapors Product recovery ongoing via peristaltic pump. Vought also received table of groundwater monitoring results and most recent monitoring from 5/28/09 shows .27'FP*W23), .01'FP(W26), .48'FP(W29). Next onsite meeting set for 7/1/09 at 10am. Ianone will also begin on obtaining estimate to remove aboveground SVE piping from 111E10th St. Vought inspected 103 E 10th St and abandoned UST is directly under basement apartment. Iannone currently using storage tanks in 107E10th st for oil however access and payment of rental for space is making recovery operations not feasible and Iannone will switch to using onsite storage tank at 103 E10th St. Vought sent email to all parties at meeting today and NYSDOH Hughes and NYCDOH Stallbohm requesting site visit at 111 East 10th ST by NYCDOH for vapor survey. Next meeting scheduled for 7/1. 7/03/09-Vought-7/1 meeting cancelled as groundwater results expected from Iannone on 7/6 and no product found in wells W8 amd W9.. NYCDOH site visit results received on 7/1/09 from NYCDOH Allan Friedman(212-442-3372). At the time of the visit, John Grogan was present. No odors of oil, no volatile organic compounds detected and no visible oil contamination noted at time of site visit. 07/06/09-Vought-As per CAP dated 8/5/02 and RAP dated 8/7/02, The closure plan will be prepared and submitted to the NYSDEC for approval when all product related to spill 9913474 has been removed from the wells associated with this spill. If necessary, closure activities may include the addition of nutrients and other NYSDEC approved agents to monitoring wells with limited amounts of product (e.g. a sheen or less than 0.01 feet of product) to enhance the natural biodegradation and removal of this material from the affected wells. In addition, closure activities will address the remediation of any soil and/or dissolved petroleum constituents in groundwater related to spill #9913474. Work to confirm that closure criteria is satisfied includes collection of dissolved groundwater samples. DEC prior approved product recovery method of handbailing being used for past five years with minimal reduction in product thickness. As such product levels are relatively stable and closure criteria have not been approached in past seven years. RAP included continual operation of automated and manual product recovery systems however due to relatively low product thickness, operations of these systems are not feasible and as such alternative remedial methods must be considered. Note that source excavation not possible as abandoned UST located directly under residential apartment at 103E10th St. Vought sent email to NYSOAG Riggi inquiring if RAP approval can be withdrawn so that dissolved groundwater samples may be collected and alternative remedial methods (such as injection of agents) may be considered to reduce free product thicknesses as they have remained relatively constant with hand bailing for past five years. Vought also to inquire of NYSOAG Riggi as to who is RP for SVE system removal along with monitoring well and recovery equipment. (Note that as per CAP and RAP, 3/10THC is responsible to operate and maintain system but no mention made of systems decommissioning. Site visit scheduled for 7/8/09. 7/8/09-Vought-Site visit by Vought with Iannone and John Grogan. Vought inspected basement of 107 E 10th St with super (John-cell(917)577-7341, fax:212-533-9538) and three 275-gallon ASTs still in place (two used for recovery tanks for hand bailed product) and one for out of service oil/water separator for old recovery system. Iannone using product recovery for hand bailed product however due to low recovery amounts he will place drum in basement of 103 E10th St to store recovered oil. Vought inspected AST in 107

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

E10th and noted 5000-gallon AST with weepholes and no sign of leakage. Vought also noted remnants of vapor recovery system also in boiler room of 107 E10th St that also needs to be removed by Iannone. No vapors or signs of oil seepage into basement of 107 E10th St. Owner rep for 107 E10th St is Steve Kaplan (Ph:212-541-4477x22 fax:212-541-4881). Iannone will send email with schedule of well decommissioning and SVE/Ejector piping removal. Vought sent email to Iannone, Grogan, Appleberg, Kaplan with requirement of removal of ejector piping and SVE piping and decomissioning of wells from buildings 105 E10th St thru 111 East 10th St. Email from Grogan to Iannone that super onsite and will accomodate whatever is needed (super is Juan Balandra 917-496-1602). Well abandonment scheduled for Friday of MW8 and MW9. 7/10/09-Vought-Received email from Iannone. As per the Stipulation and the NYSDEC approved Remediation Plan for 103 East 10th Street..... only wells W11, W12 (at 109 East 10th Street) and W13 (in 111 East 10th Street) had product recovery equipment and have been assigned to 103 East 10th Street. The responsibility for the remaining wells and associated product recovery equipment in 109 and 111 East 10th Street and all of the wells and associated product recovery equipment in 113 and 115 east 10th Street were assigned to the owners of 105-107 East 10th Street. Iannone will ask contractor for proposal to remove the vapor abatement equipment in 107, 109, 111 and 113 East 10th Street and the product recovery system equipment from wells W11 and W12 in 109 East 10th Street. Attached is a list of vapor abatement and product recovery equipment for which he is obtaining cost proposal to remove. Vought received call from and spoke to Riggi and will send Riggi copy of CAP and RAP and will also return call to her with DEC Tibbe who was involved in negotiation of CAP and RAP. Vought sent copy of RAP to NYSOAG Riggi. Vought later received email from Iannone that he thought that the wells and product removal systems that were assigned to 105-107 East 10th Street and that were in the basements of 109-113 have already been closed and/or removed. I think that John Grogan and I just need to meet at the site some time and go through it again. Vought copied on email from Grogan to Iannone requesting site walkthrough with Appelberg and Iannone will get back to Grogan with date. Vought received another email from Iannone that wells in front of 111 East 10th St (W8 and W9) was completed by Metro Environmental Contracting Corp. Vought also received email from Iannone with copy of DEC Tipples letter dated 8/19/04. Ianonne felt that letter explains that wells and remedial systems in 109-113 E 10th were 105-107's responsibility and that the systems had been removed and the wells closed. Letter stated system was removed and granted NFA with no mention of responsibility. 07/13/09-Vought-Received email from Grogan that The buildings 109,111,113,115,117&119 which are all one property were the innocent victims here. We had no spill this was all around us, all that is being asked is that what ever was put in wells, pumps or measuring devices be removed and things be put back to there original state. Your cooperation and understanding in this matter is greatly appreciated. 07/14/09-Vought-Called and spoke to Iannone and asked for clarification on emails of 7/10 as to whether remnants of the recovery system were still at 111 East 10th St. As per Iannone the only remaining piping is that for the venting system at 109-111 East 10th St and that product recovery system still present at 105-107 E 10th St and that he will have estimate to have both systems removed in two weeks and contractor will be selected within three weeks. Vought sent email to all parties with above information.

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

Vought also called John Grogan to explain update.
08/04/09-Vought-Received email scope of work from Iannone from Metro Environmental that included removal of only the two 275-gallon oil storage tanks, one 275 gallon oil/water separator and all associated piping and equipment. Carol Ule cc'd on email. Vought replied with cc to all and NYSOAG Riggi and DEC Austin that department approved scope of work pending inclusion of the removal of the vapor extraction equipment as well. 09/10/09-Vought-Received call from Grogan expressing fustration that the vapor extraction system and product recovery system have not been removed to date. Vought drafted drop dead letter to remove systems and requirement letter for submission of new RAP and sent to NYSOAG Riggi for approval prior to transmission to RP. Vought informed DEC Austin of same.
09/11/09-Vought-Spoke with NYSOAG and she will use 9/10 letter as template letter to send requirements directly to Carole Ule.
09/14/09-Vought-Reviewed Riggi template and editted.
09/16/09-Vought-Received email from Riggi that she was contacted by Ule. Vought called Riggi and Riggi to arrange either teleconference with Ule and Vought and/or meeting at Region 2 offices with participation of Riggi in person or via phone from Albany. Letter issued by NYSOAG Riggi to Carol Ule, Esq dated 9/16/09. Work notes that Department requires additional work including removal of vapor extraction equipment and product recovery equipment. 'It's DEC's position that failure to timely remove this equipment is a breach of the Stipulation Agreement from August 2002 and the associated Corrective Action Plan (CAP) and Remedial Action Plan(RAP)... . If you wish to discuss this matter, please call me .
9/17/09-Vought-NYSOAG Riggi discussion with Ule and Ule noted possible additional source of contamination to 103 E 10th St as from 101 East 10th Street (see closed spill notes 0511701 for updates).
09/18/09-Vought-Received email fro NYSOAG Riggi with additional inquires regarding spill notes and Ule will be approaching owners of 107 to work out agreement on equipment removal. Request to return call when reviewed spill 0511701. 9/22/09-Vought-Letter from Ule to NYSOAG Riggi-9/22/09. Response to NYSOAG letter dated 9/16/09. Request for a meeting. This letter id onthe subject of the removal of the product. I will be writing you separately on the subject of the removal of the vapor abatement and storage tank equipment in the buildings east of 3/10. ....our belief that the remediation of our spill sustained a setback when our neighbor immediately to the west, 101 East 10th Street, demolished its existing building and excavated its property preparatory to building a new, bigger building... .
Attached is product recovery showing a steady progression of dimunition until March 2006 when there was a big spike up from the prior reading of December 2005. This anamolous spike coincided with the excavation which unearthed Spill #05-11701 on the property immediately to our west, 101 East 10th Street, as set forth above. As you will see, although the amount of product recovered starting after December 2005 spiked, it has now been brought under control. See chart . In the opinion of our engineer, no additional recovery installations wouild serve any purpose . Request for meeting. VOUGHT PERSONAL NOTES on product spike in letter dated 9/22/09:The big product thickness spike that is after December 2005 shows an increase of 1.40'. A similar spike of 1.40' increase is observed in July 2006, a 1.0' spike is observed in Sept 2004 and a 1.20' increase is also observed in December 2006. The large number of additional spikes shows that the December event is not satistically significant as a

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

major event. Furthermore if 101 E 10th construction was source and 103 was succesfully remediated close to closure we should see STEADILY decreasing thicknesses from October 2003 thru Dec 2005 and constant high thicknesses after Dec 2005 not the fluctuating thicknesses which are observed. Note we see a decrease to almost 0' in 2006 after construction of the building and if the building construction caused an increase of product to 103 then this O' reading would not be there. Furthermore, product thicknesses alone cannot be used for source determination, they MUST be combined with hydrographs and groundwater contour maps with flow direction as product thicknesses are known to fluctuate with rising and lowering water table. Department feels the fluctuations in thickness are soley due to fluctuating groundwater levels caused by possible adjacent sump pits and or geology. Fluctuating groundwater conditions were also observed at spill 0511701. Futhermore to use product thicknesses only as a determination of source is not adequate, the pathway from the potential source to receptor MUST BE DEFINED via sampling (note no free product in groundwater at 101E 10th Street) and groundwater flow direction monitoring. Department also notes three steady monitoring events close to 0' in December 2007 (this is the same as observed prior to the big spike in December 2005) again suggesting that the three events close to 0' product thickness is not a one time event and is a function of groundwater fluctuations. ALSO to suggest that product thickness increases are a due to product migrating onsite also implies that product decreases are due to product flowing off-site and hence during the product decrease events in the same graph, 103 E 10th St THC was impacting 101 East 10th Street. Ule states in letter that product recovered has now been brought under control however note that the last two monitoring events had the same magnitude and fluctuation of product thickness as March 2005 indicating that product recovery via manual bailing is having no effect on product thickness and hence cleanup of the site.
9/22/09-Vought-Letter from Ule to Riggi dated 9/22/09. Letter regarding removal of vapor extraction and product recovery systems. To the extent that 3/10 is legally obligated to pay for the removal of any of this equipment, it is prepared to do so, but 3/10 believes that it is not obligated to pay for all that work, as is set forth below. We await only confirmation from our neighbor that it is satisfied with the insurance certificates which have been provided and to schedule the work for a date certain. .....since we query who has the obligation to pay for the removal. We did not install the two vapor abatement systems and we did not agree to pay for their removal. The DEC's present request that 3/10 Tenants Housing Corp pay for the removal of the two vapor abatement systems in the neighboring buildings is an attempt to rewrite the remediation plans which were accepted by the DEC and the property years ago and the DEC should not be able to rewrite those agreements, especially by imposing new obligations on neighboring properties. ...we have reached out to our neighbors at 105-107 East 10th Street to come to a resolution of the matter and are preapred to bring the issue to a fair and neighborly resolution. Request for a meeting. Request for extension of 9/23/09 until 10/2. Letter from Day Engineering (Iannone) to Ule-9/21/09. Enclosed is product recovery chart same as that with 9/22/09 letter.
I was not aware of the presence of an underground storage tank or the petroleum contaminated soil at 101 East 10th Street before receiving the attached information on Spill 0511701 from NYSDEC in July 2009. It is my opinion, based on information recently provided by the

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

NYSDEC regarding Spill 05-11701 and on the attached product thickness chart for well W29, that the petroleum identified in subsurface soil and groundwater at 101 East 10th Street has probably contributed to some or most of the increased product thickness levels observed in well W29 since January 2006. VOUGHTS PERSONAL NOTES on Day Engineering letter-As per Progress Report submitted by Day Engineering and written by John Iannone dated 9/6/06 In addition, the recent demolition and construction project on the adjacent property (i.e. western) property discussed above included the excavation of soil on that property to depths near the water table (i.e. approximately 10 feet below street level). This property is located directly west of and abuts the building at 103 East 10th Street. Photographs of the excavation demonstrate that the soil remaining at the bottom of the excavated area and the soil staged for offsite removal appears clean and does not appear to have been impacted by petroleum from the adjacent building, i.e 103 East 10th Street. John Iannone himself saw the excavation to depths near the water table and observed the soil remaining at the bottom of the excavated area and the soil staged for offsite removal appears clean and does not appear to have been impacted by petroleum. If 101 East 10th st was the source of free product to 103 East 10th than Iannone should have obseved grossly impacted soil and free product onsite. Futhermore, the Department had no obligation to report the spill to Iannone. See personal notes above as well for letter dated 9/22/09. 10/22/09-Vought-See closed spill 9611309 and open spill 9913474. Letter received from consultant for 103 East 10th St (spill 9913474) who states in letter that it is my opinion that based on the information recently provided by the NYSDEC regarding spill 0511701 and on the attached product thickness chart for well W29, that the petroleum indentified in subsurface soil and groundwater at 101 East 10th Street has probably contributed to some or most of the increased product thickness levels observed in well W29 since January 2006. Vought reviewed soil and groundwater data from the file and noted the following: Limited Subsurface Investigation Report (Emteque)-1/11/06. Six test pits were installed to a maximum depth of 23'bg; the whole property was previously excavated to approximately 13'bgs with collection of fourteen test pit soil samples. An approximately 6ft layer of discolored soil with old petroleum odors was encountered 14 feet bgs and extending to approximately 20 feet bgs throughout the site. In the entire six(6) test pits excavated, petroleum odors and several VOCs were identified from approximately 14 to 20 feet bgs... However no petroleum odors or VOCs identified in the sample collected from 23 feet bgs. At the time of the investigation, scattered ponds of standing water were observed in the excavation bed. The UST was partially filled with seepage water and its invert was at 14 feet bgs . Moist and wet soils were encountered in all six test pits near termination depth. Perched water was observed at various elevations above water table. Soil analyticals show:33000ppb 1,2,4-trimethylbenzene(TP3), 9900ppb 1,3,5-trimethylbenzene(TP3), 22000ppb napthalene(TP3), 12000ppb xylene(TP3), 40000ppb methylnapthalene(TP3), 3800ppb xylene(TP4 18'), 27000ppb 2-methylbenzene(TP4 18'bg), 15000ppb 1,2,4-trimethylbenzene(TP4 18'bg), 14000ppb napthalene(TP5), 5400ppb xylene(TP5), 53000ppb methylnapthalene(TP5), 1500ppb xylene(TP6), 23000ppb 2-methylnapthalene(TP6). SUGGESTION: Groundwater fluctuates between 14-20'bgs evidenced by the product staining and VOC's at same interval. Also suggests that no discolored soil encountered shallower

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

than 14'bgs indicating no onsite source to groundwater and as such offsite source combined with fluctuating groundwater table. No VOCs found in 23' soil sample suggesting that groundwater usually present above this level and as such it remains below water table at most times. Note also that depth to groundwater is from 13-15'bg in Well W23 as per spill #9913474 from 10/03-10/09. Ponds of standing water in excavation bed either due to fluctuating groundwater table and/or rain contributions to open excavation. Seepage in water in UST at 14'bgs from highpoint of fluctuating water table. Soil sample collected at 23'bgs suggests that groundwater at time of sample collection was greater than 23'bg. Perched water observed at various elevations suggests fluctuating water table and/or high infiltration from rain at excavation. Test pit analyticals show higher petroleum concentrations on north and east side of site and not adjacent to UST (which one would expect if UST was the source of contamination). Note that contamination exist from 14'-20'bg which is directly below invert. This contamination may be due to a leaking onsite UST and/or the spill from 103 East 10th Street but this cannot be proven due to removal of UST, fluctuating water table and construction of residential building over former tank location. Groundwater Sample Analyticals (Emteque)-2/8/06. Groundwater samples collected from the excavation at 101 East 10th Street and from two monitoring wells on the south and west side of the site. Groundwater samples collected from excavation and samples collected from monitoring wells on adjacent sidewalks. Groundwater analyticals show: 87ppb 1,2,4-trimethylbenzene(GW2), 190ppb napthalene(GW2), 250ppb napthalene(GW1), 32ppb n-butylbenzene(GW1), 74ppb sec-butylbenzene(GW1). No site plan included. SUGGESTION: Groundwater analyticals collected from excavation show no free product and hence site is most likely not a source of contamination to 103 E 10th St. Contaminated Soil Excavation Report (Emteque)-October 2006. Groundwater was encountered at a depth of 14'-16' below grade. Prior to the completion of excavation work, a NYSDEC site visit confirmed the location of groundwater at 14-16' depth. Six endpoint samples were collected from excavation. As viewed onsite, it appears that contamination extends below the depth of groundwater and further cleanup is not feasible at this time . Soil endpoint analyticals show no TAGM 4046 Required Soil Cleanup Objective exceedences. 10/29/09-Vought-Called Emteque (Telemaque 212-631-9000) and left message to return call. 11/3/09-Vought-Received and reviewed Project Status Report from Day Engineering dated 10/27/09. In response, the Remediation Plan for Spill #99-13474 (Cody Ehlers Group; August 7,2002) was submitted and approved by the NYSDEC. The NYSDEC approved this remedial approach based on the December 22, 2003 report and on additional information that was provided to the agency in January 2004 . VOUGHT PERSONAL NOTE:DEC never approved this approach as per notes from Tipple dated 4/9/04. Groundwater at depth of 12'bg. Free product in wells W7, W23, W26 and W29 and product being recovered using portable pump. Product in well W29 can only be manually recovered from this well since building codes and space limitations preculde the use of an automated product recovery system for this well. Approximately 4.3 gallons of product have been removed from all site wells in the last 13 months since the last progress report was submitted... . A total of 52 gallons of product have been removed since manual recovery began on 10/23/03. ...the excavation work conducted on the property adjacent to 103 E 10th Street (i.e. 101 East 10th Street) and the presence of an underground oil storage tank

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

(UST) and an 8-foot thick layer of petroleum contaminated soil at the property is probably the cause of the temporary increase in product thickness levels in these two wells that occurred over the past few years. VOUGHT PERSONAL NOTES: see 9/21 notes above. This indicates that petroleum contamination was present in the soil above the water tablee and that additional petroleum might still be present at that site . VOUGHT PERSONAL NOTES: See Iannone 9/6/06 letter where he states he saw no soil contamination onsite and furthermore Iannone states here groundwater is at 12'bg and hence soil contamination observed at 14-20'bg at 101 East 10th St is below the groundwater not above suggesting off-site source. Biweekly recovery was implemented as per DEC request in January 2008 and was compared against bi-monthly and overall the biweekly NAPL removal test program showed that this remedial approach provided little to no benefits but would significantly increase costs. NAPL recovery is performed bi-monthly now. VOUGHT PERSONAL NOTES: DEC still has not approved bi-monthly recovery. Note also that Remediation Plan does not identify the parties responsible for the removal of this vapor abatement system equipment. Dissolved groundwater samples collected from W8 and W9 and show no VOCs and wells were abandoned. Section also included on review of spill 0511701. Iannone notes that high VOC concentrations compared to SVOCs and this is an indication that petroleum release occurred relative recently since VOCs generally volatilize and are metablolized by natural microorganisms at a rate that is faster than SVOCs. VOUGHT PERSONAL NOTE: This cannot be determined without VOC soil samples from 103 East 10th to compare, furthermore VOCS are only subject to active metabolism in groundwater as water necessary for enhanced aerobic degradation. Iannone also notes that VOCs detected in groundwater samples from excavation at 101 East 10th Street. VOUGHT PERSONAL NOTE: If 101 E 10th was source of free product to 101 then we would see free product at this site and not dissolved VOCs only. DAY believes based on a a review of the information obtained from the NYSDEC regarding the petroleum release at 101 East 10th Street that the petroleum contaminated soil at 101 East 10th Street is the source of most if not all the product that has been accumulating in wells W23 and W29 since January 2006. Overall, most if not all the product related to Spill 9913474 that was released in 1999 has been removed and is no longer present.... VOUGHT PERSONAL NOTE: Without downgradient delineation over the years one cannot state that product was removed. Furthermore manual bailing is not a plume wide remedial method. That is, continued use of these product recovery methods are expected to remove product from the spill 9913474 wells (W23 and W29) to the extent practicalbe as required by the Remediation Plan... VOUGHT PERSONAL NOTE: DEC requires removal of all free product (not to the extent practicable) and the Remediation Plan was never approved by DEC. 11/13/09-Vought-Called Telemaque after receiving his message and discussed letter from Iannone. Telemaque sent pictures to vought of large test pit in center of property that is not impacted with free product. Telemaque also noted that water was observed seeping into test pits at 23'bg suggesting tight soils and low recharge rates. Telemaque will research his report further and get back to Vought with file search results for additional information. Telemaque also open to attending meeting between 3/10 THC and DEC. Received email from Grogan that had attached document from Appleberg that listed groundwater monitoring well abandonment procedures, remediation equipment removal procedures. Document however does not state who should perform

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

procedures. Vought sent reply asking for additional documentation as to responsibility. 11/24/09-Vought-Left message for Telemaque to see if he any any results of file research for additional information. Received email from Telemaque Prior photographs have also been forwarded to you subsequent to foundation installation and some of those photos document the infiltration of groundwater into the elevator pit under construction. This will provide an estimate as to the depth of groundwater encountered during the excavation. I had been at the site on several occasions and and never encountered free product in the standing water or the groundwater at the site. Our standard operating procedures on site of this nature, once free product is discovered, is to arrange for the recovery of free product and associated liquids and provide for the manifested disposal. These are services we normally subcontract and include as charges to our client. The absence of any liquid manifests would suggest that free product was not present. 12/14/09-Vought-Called and spoke to NYSOAG Riggi and Vought to send out letter in response noting that removal of remedial system past due as per Riggi letter dated 9/16/09 and also responding to Ule letters dated 9/22/09. Vought to address letter to Ule, owners of 103 and owners of 105 East 10th Street. Vought called and spoke to Kaplan and informed him of letter and current status. Vought drafted deadline letter requiring immediate meeting and submitted to NYSOAG Riggi for review. 12/16/09-Vought-Riggi and DEC Austin approved letter and Vought sent letter to 3/10 THC and Steve Kaplan. 12/17/09-Vought-Received call from and spoke to NYSOAG Riggi who received call from and spoke to Ule. Ule noted that money in escrow by the building and that 3/10 THC will be removing both systems via Metropolitan Heating and Plumbing. Metropolitan key staff however has had a heart problem. Vought to call Riggi on 1/3/10 for update on work. Tentative meeting date scheduled at DEC offices for 1/6/09 to discuss current remedial status and future work. 12/31/09-Vought-Received email from Grogan that he received email from Ule that stated As discussed, we are targeting the vent removal job for mid January. Please provide me with any insurance requirements so that we can get them in place as a part of the contract with Metro. I will be in touch re access, scheduling, etc. Thank you Carol Ule . Vought also receieved email from Grogan as well that stated I received the below message from Carol Ule and it appears that this issue will finally be addressed. I have provided Ms. Ule with the necessary insurance and building guidelines regarding access to the building and the building work rules. 2) I have not, maybe you have them but we have not received any description of exactly what will be removed and who will be supervising the removal and who will be signing off on the completion of the work. 3) I received the following message from Marilyn Appleberg and I want to make sure that her concerns are addressed: John - there are vents - literally vents -in the front garden area that are vents and they are not to go. The pvc piping in the back was never referred to as vents - I just want to make sure we are all talking about the same thing - I don’t think there will be a second shot at this and we should never assume. Could you please get a list of what is going and if there will be any odors associated with the removal. Thank you. Marilyn 4) I have informed Juan the Part Time Superintendent of the building of the up coming work and when the schedule is set he will be available to provide access to the necessary areas of the buildings that the removal team will need access to. Your attention and follow up to the above issues will be

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

greatly appreciated. Thank you and have a Happy New Year! JJG . Vought also may require PID monitoring during piping removal due to odor concerns by Appleberg. Vought replied to Grogan and all parties requesting a site visit to determine which pipes will be removed. Site visit tentatively scheduled for second week of January and Vought awaiting replies on availability. 1/11/10-Vought-Meeting at DEC including NYSOAG Riggi (via telephone), DEC Austin, DEC Vought, Ule, Iannone and: Andrew Hafter 3/10 THC Ph: (212)477-5345. Topics for dicussion included status of system removal from 111 East 10th and system removal to begin tomorrow. Ule indicated that she spoke to Grogan who indicated that PID monitoring was not necessary. DEC required that a PID be onsite during removal in case odors should arise. Also covered was site status and current monitoring/recovery schedule including that product recovery occuring placement of pump to water surface (not depressing water table). Vought also noted requirements of dissolved groundwater sample collection from all wells without free product as well as need for determination of groundwater flow direction and possibly additional delineation. Vought and Austin agreed to VOCs only for monitoring parameters. Vought sent email to EAR Edward Werner with cc to Ule, Austin and Riggi requesting well survey information. Iannone noted that no sump pits were present in the basement of 103 E 10th Street. 1/13/10-Vought-Site visit and meeting with Iannone and contractor to remove vapor abatement and groundwater extraction piping (Mathew Copeland-Metro Environmental-cell:516-216-0616). Also onsite was Marilyn Appleberg who noted piping to be removed, reviewed replacement of plywood, odor concerns. Method of piping removal will be mechanical only with no combustion or vapor generation. Vought however noted that windows should be kept open during removal of piping. Vought ensured that Appleberg, Copeland, Iannnone and super had eachothers contact information in case questions or concerns should arise during piping removal. Piping removal expected to occur for at least a minimum of two days. 1/14/10-Vought-Received EAR survey data for well elevation and forwarded to Iannone and Ule for review and determination of flow direction. Vought drafted review letter of Final Investigation and Remedial WorkPlan dated August 2010 and 10/27/09 Progress Report approving determination and installation of a downgradient (if necessary), not approving up to ten wells being sampled and requirement of all wells to be sampled, requirements of quarterly groundwater monitoring noting that Department would consider closure of individual pending submission of results, noting no further requirements of indoor air sampling, and no approval of manual NAPL removal as PERMANENT remedial method and as temporary only, and requiring implementation schedule. Vought submitted letter to Austin who reviewed and approved letter. Vought sent letter with deadline to submit revised Work Plan by 3/15/10 as per CAP. 5/20/10-Vought-Reviewed Revised Investigation and Remedial Work Plan (ERM unknown author) dated March 2010 and received on 3/18/10. Hand bailing of product in wells W29 and W23. Low NAPL thickness measurements are also occasionally recorded for wells W7 and W26 during these visits. One full round of groundwater elevation measurements will be collected for all 12 site wells to be used in flow determination. If it is determined that the direction of groundwater flow beneath the Site is north, then a new monitoring well MIGHT be installed on East 11th Street. If groundwater flow is determined to be to the north, a new 2-inch diameter monitoring well WILL be installed downgradient of the 3/10 THC property in the

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

sidewalk along East 11th Street. The new monitoring well will be installed to 20 feet below grade or to bedrock, whichever is shallower . Wells W8, W9, W3, W1, W11, W12 and W13 abandoned as they were in basement of 105-107 or showed recent low levels of dissolved groundwater contaminants comparable to TOGS Standards. The monitoring will be done quarterly for up to two years unless an alternate schedule is approved by NYSDEC. Report also proposes VEFR on a monthly basis for a period of six months. After six months its effectiveness will be evaluated and a determination will be made whether or not to continue the program . Report also proposes possible use of ORC socks but does not note groundwater monitoring parameters for monitoed natural attenuation. Work Plan also includes proposed implementation schedule with water level measurements in March, groundwater sampling in June, well installation in June, VEFR from June to Nov, installation of ORC socks in June. Quarterly groundwater sampling also proposed in schedule. VEFT removal of NAPL will commence within 2 to 3 weeks of NYSDEC approval of the use of this NAPL removal methods..... . Vought sent email to John Grogan to confirm satisfaction with with SVE and product recovery system removal. Vought drafted Work Plan review letter for editting and approval by DEC Austin and Riggi. Vought received email from Grogan that Jeffery, The best of luck too you in your next assignment. Haz-Mat sounds dangerous so please be careful. To the best of my knowledge we are finished I cannot speak for Marilyn I trust she will reply. Thank you again for all of your help. JJG 5/25/10-Vought-Sent letter to 3/10 THC requiring resubmission of Revised Investigation and Remedial Action Plan by 6/28/10. Plan to include clarification as to whether downgradient well MIGHT or WILL be installed if groundwater flow to the north, installation of monitoring well if groundwater to the north, to WATER and not 20’bg or bedrock, inclusion collection of deepest dry and highest PID soil sample collection if new well needed, Inclusion of sample collection from W21, performance of quarterly monitoring until spill is closed as opposed to for a period of up to two years , submission of a RAP upon completion of investigation and no ORC application without Department approval. Letter also approved implementation of VEFR and determination of groundwater flow direction. DEC requires: 1)cc to Iannone, Ule and Riggi. 2)Remediation Plan must contain an implementation schedule. 3)Replacement of historical flagstone sidewalk (flags may be stored in buildings as per DEC Tibbe)when wells are abandoned. 4)Resubmission of Work Plan by 6/28/10 including clarification as to whether downgradient well MIGHT or WILL be installed if groundwater flow to the north, installation of monitoring well if groundwater to the north, to WATER and not 20’bg or bedrock, inclusion collection of deepest dry and highest PID soil sample collection if new well needed, Inclusion of sample collection from W21, performance of quarterly monitoring until spill is closed as opposed to for a period of up to two years , submission of a RAP upon completion of investigation and no ORC application without Department approval. 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A. 6/29/10 - Raphael Ketani. Today, I received the Second Revised Investigation & Remedial Work Plan dated June 2010 from ERM. I reviewed the SRI & RWP and composed a letter with the following comments: 1) purge water is to be disposed of in drums and not returned to the respective wells. 2) all environmental samples are to be analyzed via methods 8260 and 8270. 3) VEFRing is acceptable. 4)

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

ORC is not to be used until all of the free product is recovered. 5) Socks are not to be used until the product thickness has reached such a limit that VEFRing is no longer effective. 6) All future groundwater monitoring reports are to contain groundwater flow maps and product thickness maps to the nearest hundredth of a foot. 7) New well development must not take place less than 24 hours after well construction in order to allow the grout time to cure, and care must be taken regarding the air pressure used for development. 8) New well sampling must not take place earlier than two weeks from the date of development. 9) The location of the proposed well (MW-30) is acceptable. 10) An additional new well (MW-31) must be installed along East 11th Street directly opposite 103 East 10th Street. The letter was sent to Randall Austin, Chief of the Spills Unit, for his approval. Interested party addresses: 3/10 Tenants Housing Corporation, 25 8th Avenue, Brooklyn, NY, 11217 Carol Ule, Esq., Hartman Ule Rose & Ratner, LLP, 305 Broadway, NY, 10007, (212) 437-9110 John Iannone, PE, Day Engineering, 60 East 42 Street, Ste 1641, NY, 10165, (212) 986-8645 Bonnie Riggi, Esq., Assistant Attorney General, Oil Spill Unit, State of New York, The Capitol, Albany, NY, 12224 7/1/10 - Raphael Ketani. The letter was approved by Mr. Austin and was sent out today to 3/10 Tenants Housing Corp., Mr. Iannone, Ms. Ule, and Ms. Riggi. 7/9/10 - Raphael Ketani. The letter to Mr. Iannone came back Not Deliverable As Addressed. I contacted Mr. Iannone (212) 986-8645 and obtained the correct address for Day Engineering. It is 274 Madison Avenue, Ste 1104, NY, 10016. I will send out a letter with the correct address. 7/12/10 - Raphael Ketani. The letter to Mr. Iannone was resent to Madison Avenue. 7/21/10 - Raphael Ketani. I met John Iannone, PE of Day Engineering (212) 986-8645 at 103 East 10th Street for a scheduled meeting. He showed me some of the wells that were still active. We discussed the site and what should happen next. He said that there was between 0.2 feet and 0.4 feet of oil in the well in the basement of 103 East 10th Street. Mr. Iannone commented that the oil was thickest at this well. He said that they have been doing vacuum events to collect the oil. He mentioned that groundwater had lately been determined to flow north, instead of south as it had been during most of the project. I told Mr. Iannone that wells should be installed along 11th Street (to the north) in order to see whether the groundwater and the oil are migrating in that direction. Mr. Iannone suggested doing geoprobe drilling first. He added that if the soil sampling shows that the oil is indeed moving north, then he will install a well or two. I told him to submit a proposal to DEC and I will take a look at it. He said that he will. Next, we discussed the handling of the purge water from the wells. Mr. Iannone said that it was expensive to get rid of it, and the co-op association at 103 East 10th Street was paying for everything out of their pockets. He asked whether he can reinject the purge water back into each respective well. I told him that once the water is out of the ground, then its chemistry changes and that reinjecting the water changes the chemistry of the groundwater. I added that we would never know the true groundwater chemistry after the injections. I suggested to Mr. Iannone that he should either have a drum on a truck which can be used to contain the purge water, or he can put a drum at the corner of 101 East 10th Street where it meets 103 East 10th Street, and put the purge water in there. I added that he should put the drum in an overpack drum so that it can be opened easily and to chain the drum to the railing of the garden area. Mr. Iannone said that this was a possibility. I asked Mr. Iannone for

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

regular progress reports for the site. He said that he will send them to me. After this, the conversation ended. Mr. Iannone handed me the July 2010 Project Status Report. I reviewed the report for spill case #9913474. Groundwater is contained within the overburden material that covers the bedrock. The water table is at 12 feet below grade. Oil and gas contaminated soil was found at 101 East 10th Street (the new building at the corner where a gas station used to be) at up to 20 feet below grade. Spill case #0511701 was initiated. The soil was excavated to about 22 feet below grade and removed. Digging could not continue further. Perched groundwater was encountered in the excavation at various levels. There was very little contamination in the groundwater. Soil end point samples came up at about TAGM. A passive venting system and vapor barrier were installed. The spill case was closed on 10/23/07. Product is still being recovered from W23 and W29, with sheen observed in W7 and W26 (product thickness below 0.01 feet). W29 is in a basement store room at 103 East 10th Street. During the reporting period, a total of 3.12 gals. of oil were removed from all of the active wells. Over the past 6 years, the product thickness has generally decreased to as low as 0.1 feet in W29. A total of 55 gals. of oil have been recovered since manual bailing began on October 23, 2003. The venting system was removed on 7/8/09 from 105 to 111 East 10th Street after a NYCDOH inspection failed to detect any vapors in the homes. 11/18/10 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. I told him that the DEC was missing the August, September, and October update reports. Mr Iannone explained that he will send the DEC an update report very soon. He added that they have been collecting oil with peristaltic pumps since they can't get a guzzler truck down the street (no one is obeying the alternate side of the street parking rules). He said that the oil in the one well is consistent at 2 to 4 inches. I asked him about the well that was supposed to be installed on 11th Street. Mr. Iannone said that they are still working on getting the permits for drilling through the sidewalk. I ended the conversation by telling Mr.Iannone that he must send the DEC an update report. 12/8/10 - Raphael Ketani. I received the December 2010 Project Status Report from Mr. Iannone. I reviewed the report. It gave a history of the oil recovery efforts from July 16, 2009 to November 23, 2010. only 3 wells have continued to collect oil. These wells are W-7, W-23, and W-29. Due to the difficulty of parking the guzzler truck on the street, a peristaltic pump has been used to recover the oil from the affected wells. A total of 0.57 gals. of oil was recovered during the past 5 months since July 2010. Another well will be installed to the north of the spill site on 11th Avenue. However, bid proposals are still being received. 1/28/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that his workers conducted three oil recoveries since 12/8/10. They collected about 1 pint of oil from the 2 inch well at W-29. Sometimes it takes a few weeks until any oil appears in the well. The other two wells have had only occasional sheens. Mr. Iannone said that the co-op doesn't understand why another well is being requested by the DEC. He said that they are very strapped for money and are having a hard time understanding what the plan is. He asked for a meeting between the co-op board, himself and the DEC. I told him that I was willing to have a meeting and I asked him to set it up. 2/3/11 - Raphael Ketani. A site meeting took place today between Mr. Iannone, Andy Hafter - co-op treasurer, Carol Ule - co-op attorney (212) 437-9110, and myself. Previously, Mr. Iannone had indicated that this was going to be a meeting with the co-op board,

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

him and myself. So the presence of Ms. Ule was a surprise. However, the meeting took place anyway. Both Ms. Ule and Mr. Hafter took active roles in the discussion. Mr. Hafter stated that the co-op was just about out of money and couldn't do more work. He said that some co-op owners were not paying their maintenance and that 1 dollar out of every three was going to the environmental work. Ms. Ule stated that the co-op had cooperated with the DEC and had paid back over $600,000 dollars of the State's money as part of the agreement. She said that she had talked to Bonnie Riggi, the State attorney general, and had worked out the settlement. Ms. Ule also stated that the special mortgage that was being used to pay for the present environmental work was going to run out soon. She added that the co-op couldn't get another special mortgage until after some time. I told both of them that the money issues were not the State's concern. I told them (Iannone, Ule, Hafter) the the DEC was insisting on having wells installed along East 11th Street as the groundwater was now flowing in that direction. I told them that it needed to be seen whether oil is flowing off site and whether there is more oil under East 11th Street from the spill. Both Ms. Ule and Mr. Hafter said that the oil may be from the 101 East 10th Street site where there used to be a commercial facility - a site that now has a high rise condominium building. Mr. Hafter said that there was a tremedous amount of contamination in the site. He said that he saw truck after truck taking out contaminated soil. Ms. Ule said that there was oil in the site and she said that I had closed the site anyway. I told her that I vaguely remembered the site and that I wouldn't have closed the spill case if oil contamination was present. Ms. Ule said that there may be oil under the sidewalks. I told her that I had inspected the site and I had seen oil floating on water in the bottom of the excavation pit. I had told the site manager to collect the oil. Mr. Hafter then said that the pit wreaked strongly of oil and everyone in the neighborhood was aware of this contaminated site. I told him that the contaminated soil was being taken away by the construction company. Mr. Hafter stated that he saw many trucks leaving the site with soil. I added that I had looked at the sidewalls of the site - under the sidewalks along East 11th Street and along East 10th Street and along the foundation of 103 East 10th Street - and I didn't see any seeping oil or oil staining. Ms. Ule asked Mr. Iannone whether there were any signs of oil in the wells along Third Avenue (the cross street to East 10th Street). Mr. Iannone said that there was nothing. I insisted that a series of wells be installed along East 11th Street. Ms. Ule stated that there just wasn't any money to do this. She added that the State wouldn't want to see another co-op go bankrupt. I again told her and Mr. Hafter that the groundwater had changed direction and that the DEC needed to know what was going on. Ms. Ule stated that we don't know that oil is there or heading in that direction. I responded by stating that we don't know that it isn't heading north and off-site. Ms. Ule countered that they could put in the wells and discover oil and it would be from a site along East 11th Street or from the new condominium. She added that any oil found would be pinned on 103 East 10th Street. I told her that, with a series of wells, the DEC would be able to determine who owns the spill along East 11th Street. Ms. Ule then asked Mr. Iannone (who had said almost nothing through the meeting) why the groundwater flow direction had changed from south to north. Mr. Iannone said that he had no idea. Mr. Hafter asked whether the installation of the high rise condo had changed the flow

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

direction. Mr. Iannone said that he didn't know. Ms. Ule asked whether the agreed upon plan to install one well along East 11th Street could be implemented. She added that if oil would be found there, then more wells could be put in. I told her that the DEC wanted a series of wells put in, not just one. Ms. Ule said that they didn't have the money. At this point in time, I tried to contact Jeff Vought, the previous case manager by cell phone in order to have him join the discussion. However, he informed Randy Austin, Chief of the Spills Unit, about my meeting and Mr. Austin told me to stop talking to the group. After this, I stopped talking to them. Ms. Ule ended the discussion by stating that nothing was agreed upon here and so this could still be discussed further. I told her that she needed to talk to the DEC counsel, John Urda, in order to arrange an investigation plan. I added that I couldn't talk to her anymore. With that, I left. 2/10/11 - Raphael Ketani. At the suggestion of Mr. Austin, I put together a Case Initiation package for legal action. The basis of the case is the violation of the STIP and a failure to perform further investigative action and remedial action. Mr. Austin and I signed the Case Initiation cover form and it was delivered by hand to the regional Office of General Counsel. 2/14/11 - Raphael Ketani. James Periconi (212) 213-5500, attorney for 3/10 Tenants, sent an e-mail to John Urda of the Region 2 Office of General Counsel. In the e-mail he protested the alleged change in the agreed upon work plan from one well on 11th Street to a series of wells along 11th Street. He also requested a meeting between staff from the Department and himself. 2/28/11 - Raphael Ketani. Mr. Periconi sent Mr. Urda an e-mail stating that they didn't understand where the DEC wanted the two wells. Mr. Urda asked me to talk to Mr. Iannone. I talked to Mr. Iannone and explained that one well should go in the backyard of 103 East 10th Street. He said that it's not a backyard, but a front yard to a church property. As this was the situation, I told Mr. Iannone that the well should be in the sidewalk in front of the church property. I added that the second well should be 30 feet to the east to possibly catch additional oil flow. Mr. Iannone said that the co-op doesn't have the money to install two wells. He stated that the DEC should ask for just the one well because the co-op is struggling. They can't even get the money to repair the roof. I told Mr. Iannone that I was calling just to clarify where the wells should go, not the issue of how many wells will be agreed upon. I added that the agreement is between Mr. Urda and Mr. Periconi. With that, the conversation ended. 3/11/11 - Raphael Ketani. I received an e-mail containing a letter Mr. Iannone had sent to Mr. Periconi. The letter was titled Evaluation of the NYS DEC Request for Additional Wells. I read the letter. Mr. Iannone seemed to understand the change in groundwater flow direction. he indicated that one well due north of the site would tell everyone whether oil was migrating towards 11th Street. However, he indicated that no more than this one well should be installed. Attached to the letter were flow direction maps showing the change in flow direction over the course of a number of years. 3/17/11 - Raphael Ketani. John Urda of Region 2 Office of General Counsel sent an e-mail to Jim Periconi, the attorney for 103 East 10th Street. In the the e-mail, Mr. Urda stated that Day Engineering needed to submit a work plan to the DEC for installing two groundwater monitoring wells and for doing weekly product recovery. If oil is found in the wells, then further groundwater contamination delineation would be required. The plan is due on March 25, 2011. Mr. Urda added that an investigation report would need to be submitted

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

after the work is done and then a remedial action work plan. The deadlines for submission of these plans would be agreed upon between Mr. Iannone and Mr. Ketani. Both work plans and the investigation report will become part of the STIP agreement. 3/23/11 - Raphael Ketani. Mr. Iannone (212) 986-8645 sent me an air photo showing the proposed locations of MW-31 and MW-30. I reviewed the photo and told him that the locations were acceptable and to start the work. 3/24/11 - Raphael Ketani. Mr. Iannone sent me an e-mail requesting permission to use the STARS methods for VOCs and the SVOCs. I told him that he can use these simpler methods. 3/25/11 - Raphael Ketani. Chuck Merritt (631) 617-6200 of Merritt Environmental called regarding what was taking place at 103 East 10th Street and why the associated spill (#9611309) for 105-107 East 10th Street was still open. I explained the issue to him, how 103 is related to 105 and 107, and that investigation work was proceeding with Day Engineering. Mr. Merritt said that his client was trying to refinance his mortgage for 105 East 10th Street and that the bank was asking what was the environmental situation. I told Mr. Merritt that he can talk to Mr. Iannone and get some information and then maybe he can put together a report for the bank that will explain everything. Mr. Merritt said that he had been to the site himself (105 East 10th Street) and he didn't find any problems. I added that until the situation at 103 East 10th Street is resolved, the spill case for 105-107 East 10th Street can not be closed. Mr. Merritt said that he understood. Later, Eric Weinstock of C A Rich Consultants called me. He asked why the spill case had been reopened when Michelle Tipple had closed it in 2004. I told him that I did see a case note indicating that Ms. Tipple had written an NFA letter dated 8/19/04. However, from reviewing the notes, I could not determine why the case had been reopened or when. I told him that there still was an ongoing spill case with 103 East 10th Street and that the cases for both sites were associated with a State PIN case, which was still open. I added that, maybe, the open PIN case was the reason, but I just wasn't sure and I couldn't find anything in the notes to clarify the matter. I told him to talk to Mr. Vought when he comes back from vacation order to find out the answer as to why the case is still open. Later, Miriam Villani of Sahn Ward Coschignano & Baker, PLLC (516) 228-1300 sent an e-mail to Jeff Vought (the former case manager) and John Urda, Assistant Regional Attorney for DEC, requesting that the spill case for 105-107 East 10th Street (#9611309) be closed. The reason for the request is that her client, Walden Pond Realty, LLC, is trying to refinance its mortgage. However, Mr. Vought wont return until 3/31/11, the day of the closing. 3/28/11 - Raphael Ketani. I received the Day Engineering Remedial Investigation and Remedial Action Work Plan dated 3/25/11. I reviewed the plan and found it to be acceptable. I sent a draft letter to Mr. Austin for his approval. In the letter I added that Day Engineering should: (1) perform two rounds of groundwater sampling, not just one, for MW-30 and MW-31; (2) that if the groundwater does not meet the State standards, then it should be VEFRed; (3) that the wells should be left in a useable condition for determing the groundwater flow direction, even if no oil is found; (4) when access to 10th Street for the VEFR truck is prevented by parked cars, Day Engineering should contact the local precinct; (5) product collection should be performed with an alternative mechanical means when use of the VEFR truck is prevented The letter was approved and sent out today. 3/29/11 - Raphael Ketani. Mr. Iannone (212) 986-8645 sent a letter in which he responded to the

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

DEC's 5 comments above. 103 East 10th Street and Day Engineering agreed to abide by the comments. 3/31/11 - Raphael Ketani. The associated spill case, #9611309, was closed today as the spill had been remediated. The Final ISR was signed by Mr. Austin and Mr. Oliva and sent to Albany DER today. 5/10/11 - Raphael Ketani. Mr. Iannone (212) 986-8645 sent me an e-mail stating that wells MW-30 and MW-31 would be installed on either May 24th or the 25th. He attached an air photo showing where the wells would be installed. This was the same photo as in the 3/25/11 work plan. I responded back by e-mail that the locations looked fine and that he should proceed as he had planned. 5/20/11 - Raphael Ketani. Mr. Iannone sent me the May 2011 status report dated 5/20/11. I reviewed the report. Wells W7, W21, W22, W23, W26, W29 were used as the monitoring array. Wells W7, W23, W26, and W29 are the wells that have product. Manual product recovery started on October 21, 2003. Product thickness varies from 0.001' to 0.005'. About 1.12 gals. of product were recovered during this reporting period. About 56 gals. of product have been recovered from October 21, 2003 to May 19, 2011. Two new monitoring wells, M30 and M31, will be installed on May 24, 2011 along 11th Avenue in a downgradient position. 5/24/11 - Raphael Ketani. I spoke to Mr. Iannone about the well installations. He said that they were at the locations all day and that he had just returned. He said that they hit refusal at the original locations for MW-30 and MW-31. The driller told him that they were constrained by NYC DOT regulations regarding how close to the street side of the sidewalk they could drill. So they didn't have much room to try and install the wells. They hits boulders at about 1 feet and 4 feet below grade. Finally, they were able to install MW-30 in front of the church and between the two original locations. They drilled with augers to 15 feet and then punched down to 18 feet. A one inch diameter well was installed. There was about 3 or 4 feet of water. The soil samples had PID hits of 9 ppm to 11 ppm. Mr. Iannone said that they will let MW-30 sit for awhile (about several weeks) and then sample it along with the other monitoring wells. I asked Mr. Iannone to send the DEC a full report regarding the well installation and sampling. He said that he will. Later, Mr. Iannone sent me a picture showing the drilling and a picture showing the final location of MW-30. 7/11/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that he had received the data for the latest round of groundwater sampling just last week. He is in the process of putting the report together and will send it to the DEC by July 22. I told him that sounded fine. 8/2/11 - Raphael Ketani. Mr. Iannone sent me the 2011 Remedial Investigation and Remedial Action Results Report dated 7/29/11. I reviewed the report. They hired ADT to install MW-30 and MW-31. However, ADT hit refusal at the locations for installing the two wells. So, only MW-30 was installed between these locations as a one inch diameter well. Soil samples were taken on 5/24/11 from MW-30 at 6.0 to 6.5 feet down, 9.0 to 9.5 feet down and at 15.0 to 15.5 feet down. The results showed toluene at less than 1 ppb and one hit of ethylbenzene at less than 1 ppb. The SVOCs were virtually all non-detect. Groundwater samples were taken on 6/9/11 from MW-18 to MW-21, MW-24 to MW-30. The VOCs were almost entirely non-detect, except for a few very low hits (typically below 17 ppb) in MW-24, MW-26, MW-28 and MW-30. The SVOCs were almost entirely non-detect. On 6/2/11, groundwater flow was to the northeast. In the Conclusions section, Mr. Iannone mentions that only 0.4 gals. of oil were collected in the past 6 months. Also, there was no product at MW-7,

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

MW-22 and MW-26 during the past year and product was less than 0.1 feet in MW-23 and MW-29. Product was usually a sheen in these wells. Considering the information in the Conclusions section, Mr. Iannone recommended closing wells MW-18 to MW-21, MW-24, MW-25 and MW-27 due to low product recovery. He also recommended quarterly monitoring and groundwater sampling at MW-7, MW-22, MW-23, MW-26, MW-28 to MW-30. Lastly, he recommended product monitoring and removal from MW-7, MW-22, MW-23, MW-28 to MW-30. I sent an e-mail to Mr. Iannone approving the RIRAR Report. I also stated that none of the wells should be plugged and abandoned as they have value for determining the groundwater flow direction. So those 7 wells should just be used for groundwater elevation measurements. I added that groundwater sampling should take place as recommended and that product recovery should take place as recommended. Lastly, I suggested that some more efficient means of product recovery should be used to collect oil from MW-23 and MW-29. Later, Mr. Iannone sent a response e-mail stating that MW-23 had 0.07 feet of oil and MW-29 had 0.03 feet of oil. 9/9/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that the next (second) round of groundwater sampling is scheduled to take place next week. He also mentioned that an oil sheen was occasionally seen in the new well, MW-30. I asked him whether Day Engineering had come up with an effective alternate means of collecting the oil. He said that they hadn't. However, he said, it was an easy task to have his staff come down to the site to collect the oil and do other work as their office is nearby. 10/18/11 - Raphael Ketani. I spoke to Mr. Iannone (212) 986-8645. He said that he had the groundwater results. He will put them together with the product collection data and submit a status report to the DEC sometime this week or next week. 10/31/11 - Raphael Ketani. Mr. Iannone called to say that the groundwater report will be sent to the DEC by wednesday. I told him that would be alright. 11/15/11 - Raphael Ketani. Mr. Iannone sent me the 11/15/11 September/October 2011 Day Engineering Groundwater Monitoring and Project Status Report. On 9/16/11, wells W7, W22, W23, W26 and W28 to W30 were sampled. Wells 7, 22, 23, 29 and 30 had oil from a sheen to 0.73 feet in W30. Well W30 has had product from 0' to 1.2' since installation in May 2011. Wells W29 and W30 which had the most oil also had the highest contamination. Analytes 1,2,4-trimethylbenzene, total xylenes and ethylbenzene were in the high double digits to the low triple digits. A total of 1.43 gals. of oil has been recovered from the wells in the past 14 months. I responded to Mr. Iannone's e-mail and told him not to sample the groundwater in wells that had even a sheen of product. 7/6/12 - Raphael Ketani. I reviewed the June 2012 Groundwater Monitoring and Project Status Report dated 6/6/12 and submitted by Day Engineering. Groundwater gauging and sampling took place at W7, W22, W23, W26, W28 to W30 on 2/7/12. Product or sheen was present in all of the wells except W22. W22 had two VOC exceedences of the groundwater standards in the low triple digits (no higher than 180 ppb), but the rest of the exceedences were much lower. About 1.47 gals. of product were collected during the past 13 months. Groundwater flow was to the north to W30. Mr. Iannone recommends curtailing groundwater sampling for the time being and instead injecting ORC into the wells with sheen or product in order to reduce the amount of oil in the subsurface. I approved the June 2012 report and wrote a draft letter stating the Department was approving the recommendation to end groundwater sampling. However, we were not going to approve the use of ORC in the affected wells until

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

Day Engineering submits a work plan describing the treatment program. I set a deadline of August 3, 2012 for receipt of the work plan. The draft letter was submitted to Hassan Hussein for his review. Mr. Iannone wrote that Day Engineering closed their New York office. All correspondences should go to John Iannone, P.E., Day Engineering, P.C., 2711 Henry Hudson Parkway, 7C, Bronx, NY, 10463. Mr. Hussein approved the letter and it was sent out today. 8/3/12 - Raphael Ketani. Mr. Iannone (347) 204-7852 sent me the 8/3/12 Oxygen Release Compound Treatment Work Plan. I reviewed the work plan. Treatment socks will be installed in wells W7, 22, 23 and 26. All of these wells have exhibited sheen. Product thickness will be monitored and product will be collected and the thickness will be included in a quarterly report. The great majority of the report consisted of appendices with the standard manufacturer literature. I drafted a letter for Mr. Hussein approving the work plan with the comments that Day Engineering must adhere to the service limits of 12 months for the ORC filter socks and 3 to 6 months for the EHC-O canisters. The letter was approved and was sent out. 3/14/2013 - Raphael Ketani. I sent Mr. Iannone an e-mail requesting an update regarding progress at the site. 3/21/13 - Raphael Ketani. I received and reviewed the March 2013 Project Status Report dated March 20, 2013. Product is still appearing and averages about 0.1 feet in W7, W23, W26 and W29. Well W30 has averaged 0.55 feet of product since its construction during May 2011. Recently, the product in the well has averaged 0.45 feet in thickness. Groundwater flow has continued to the north. On 9/7/12, ORC socks were installed in W7, W22, W23 and W26. On 2/23/13, the oil was 0.61 feet thick in W30. On this same day, the oil was 0.39 feet thick in W23 and 0.02 feet thick in W29. 12/13/13 - Raphael Ketani. I spoke to Mr. Iannone (347) 204-7852 regarding progress at the site and the lack of monthly reports. Mr. Iannone stated that he is presently working on the next progress report and that it will have all of the data from the past 9 months. He also said that more ORC had been put in the wells and that the thickness of the product is now down to a matter of a few inches at most. I commented that well W30 had a persistent thickness of product of half a foot. I asked him whether the oil was being removed from this well. He said that it was, but, sometimes, it has no water. Mr. Iannone said that I should expect the next report to be delivered next week. 1/21/14 - Raphael Ketani. I reviewed the December 2013 Project Status Report dated 12/31/13 and submitted by Day Engineering. Measureable amounts of product have not been accumulating in wells W7, W21, W22 and W26 during the past 9 months (April to December 2013). Product was found in W23, W29 and W30. The product thickness in averaged 0.1 feet in W23, only a sheen in W29 and 0.5 feet in W30. A total of 4.20 gals. of product were collected during the past 9 months. Groundwater flow is to the north towards W30. From April 6 to October, and on November 16, 2013 and during December, only product monitoring and removal took place. On November 1, 2013, the ORC socks were replaced on wells W7, W22, W23 and W26 and product monitoring and removal. I drafted a letter approving the December 2013 report and requesting that 3/10 Tenants Housing Corp. find a more efficient method for collecting the oil from well W30. The letter had a deadline of February 21, 2014 for submitting the alternative method work plan. The letter was submitted to Mr. Hussein for his approval. 1/22/14 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out. 2/17/14 - Raphael Ketani. Mr. Iannone sent me an e-mail requesting an extension of the deadline for submitting the alternative recovery work plan for W-30

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

(as was requested in the DEC 1/22/14 letter). The reason for the request was that Mr. Iannone is retiring and the new consultant will need to be transitioned once the new contract is in place. I granted the request for extending the submission deadline to 3/28/14. 4/1/14 - Raphael Ketani. Sean Clifford of Brockerhoff Environmental Services, LLC (908) 689-4300/seanc@brockerhoffllc.com called and left a message stating that he is the project manager for the spill. 4/3/14 - Raphael Ketani. I reviewed the Light Non-Aqueous Phase Liquid Interim Response Action Workplan dated 3/27/14 and submitted by Brockerhoff Environmental Services, LLC. The objective is to enhance LNAPL recovery through mass removal with subsequent monitoring. Product removal will take place 3 times per month for 6 months. Each removal event will last 3 hours, instead of the 1 hour that was previously spent. BES will measure the depth to water and the depth to product. A perstaltic pump will be used to remove the product. Product recovery will be done until the product thickness is 0.1 . ORC treatment will take place in the wells that have NAPL. Filter socks will be installed with ORC in wells W7, W22, W28 and W29. During each site visit, the socks will be inspected and their depth will be adjusted. At the end of 6 months BES will submit a report to the DEC. I found the work plan to be acceptable and sent an e-mail to Mr. Clifford stating so. 6/24/14 - Raphael Ketani. I sent an e-mail to Mr. Clifford (908) 689-4300/seanc@brockerhoffllc.com requesting a progress update. Later, I received and e-mail from Mr. Clifford. He stated that they have implemented the activities in accordance with the workplan (Light Non-aqueous Phase Liquid Interim Response Action Workplan dated March 27, 2014) which was approved in April 2014. A progress report will be submitted six months following implementation of the workplan which will summarize the groundwater and product level measurements and include a discussion of site observations and activities. They anticipate submitting this report in November 2014. 11/7/14 - Raphael Ketani. Mr. Clifford left me a voice message. He stated that they plan to pursue a more aggressive means of NAPL recovery. He will contact me later regarding the details of their plans. 11/25/14 - Raphael Ketani. I reviewed the Brockerhoff Environmental Services Progress Report: Remediation and Monitoring of LNAPL dated 11/14/14. From April to October 2014, 6 site visits took place to monitor the groundwater and collect product. Product was detected in only 3 wells during this period. These wells were W23, W29 and W30. A total of 0.36 gals. of product was recovered during this period. Since October 2013, a total of 61.5 gals. of product has been recovered. ORC socks were put into wells W7, W22, W23 and W29. The LNAPL thickness showed a decreasing trend and had reduced to a thickness of 0.02 feet in the respective wells. Brockerhoff recommends: reducing LNAPL monitoring and recovery to once a month; continue using ORC socks in W7, W22, W23 and W29 and inspect the socks monthly and replace them semi-annually; provide a summary report to the DEC at 3 months, 6 months and 9 months. The report did not include a plan for sampling the groundwater in the wells which didn't have product and didn't include monitoring W30. Also, I determined that reporting every 3 months for 3 quarters was not informative enough. Groundwater sampling for STARS VOCs and SVOCs must take place at wells W21, W24 and W26 to W28 twice a year. The reporting must be quarterly. I sent an e-mail to Mr. Clifford (908) 689-4300/ seanc@brockerhoffllc.com approving the report, but stating the above comments. 12/19/14 - Raphael Ketani. Mr. Clifford sent me the following email: Last night I spoke with the attorney

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

representing the association and she indicated that they are willing to move forward with the plan outlined in the approved workplan and the additional conditions noted below. There has been a little bit of a delay in authorizing the work however because they just had a re-shuffling of the association board so that has added a little bit of an administrative related delay. Based on my discussion, I expect the authorization to be wrapped up soon and that the new scope of work will be implemented starting in January. In the meantime, the association is committed to addressing the remaining impacts and have authorized the three recovery/monitoring events per month to continue. 12/24/14 - Raphael Ketani. Mr. Clifford (908) 689-4300 sent me the following email: The 3/10 Tennant Housing Corporation is ready to move forward with the scope of work detailed in the Progress Report dated 11/14/2014 and the additional comments summarized below. This scope of work will be initiated in January 2015 and will include the following: - Monthly LNAPL monitoring and recovery events at W23, W29, and W30. - Quarterly updates to NYSDEC regarding findings of investigation and progress made. These updates will be scheduled for March, June, September, and December 2015. - Semi-annual installation/replacement of ORC socks within W7, W22, W23, and W29. This work will be scheduled for January and June 2015. - Semi-annual ground water sampling at W21, W24 and W26 to W28 for NYSDEC STARS list VOCs and SVOCs. This work will be scheduled for February and August 2015. I found the proposed schedule/work plan to be acceptable and sent a response email to Mr. Clifford stating this. 2/11/15 - Raphael Ketani. Mr. Clifford sent me an email stating that groundwater sampling took place on 2/10/15. However, upgradient well MW-27 could not be accessed. He asked whether Brockerhoff should go back and try again to get to the well. I responded that they could skip the well this time and sample the well during the next round. 3/31/15 - Raphael Ketani. I reviewed the Brockerhoff Environmental Services, LLC 3/31/15 Progress Summary. The period covered was from January to March of 2015. The services performed were gauging, ORC sock installation and groundwater sampling. The wells were inspected during January, February and March. During the 1/20/15 inspection, product was found in W23 (0.03'), W29 (0.02') and W30 (0.01'). NAPL was not seen in the wells on 2/10/15 or 3/20/15. However, due to the thinness of the product there was no NAPL collection. ORC socks were installed in W7, 22, 23 and 29 on 1/29/15. Wells W21, 24, 26 and 28 were sampled on 2/10/15. The VOC results were either entirely non-detect or had non-detects with many hits either below the TOGS standards or just above. The SVOC results were either entirely non-detect or mostly non-detect with a small number of hits below the TOGS standards. 7/8/15 - Raphael Ketani. I reviewed the Brockerhoff Environmental Services, LLC 6/30/15 Progress Summary. The period covered was from April to June of 2015. The services performed were gauging and ORC sock replacement. During the 6/11/15 inspection, product was found in W7, W22, W23 and W29. The thickness of the product in each well was no greater than 0.01'. Due to the thinness of the product there was no NAPL collection. ORC socks were reinstalled in W7, 22, 23 and 29. Groundwater sampling will take place during August 2015 at W21, 24, 26, 27 and 28. While I found the report to be acceptable, there was no mention of MW-30. I sent an email requesting an update regarding its status (i.e. presence of oil and how thick). Mr. Clifford responded by email and stated that well MW-30 was gauged for product at the same time as the other wells, but nothing was found. 10/1/15 - Raphael Ketani. I reviewed the

3/10 TENANTS HOUSING CORPORATION (Continued) **S104620874**

Brockerhoff Environmental Services 10/1/15 Progress Summary - Remediation and Monitoring of LNAPL. The monitoring period was July to September 2015. During this time, monthly groundwater monitoring and semi-annual groundwater sampling took place. The wells were inspected for LNAPL during July, August and September. The LNAPL thickness was less than or equal to 0.02 feet at all of the wells during July and August. During September, W-29 was found to have 0.41 feet of product. A total of 0.08 gallons of oil was collected. The appearance of the thicker layer of product may have been due to the 0.98 feet drop in the water table during August. W-29 was revisited on 9/16/15 and only 0.11 feet of product was found. On this date, none of the wells had LNAPL. W-30 wasn't sampled because it had been cemented over when the sidewalk was refurbished. Brockerhoff will try to reopen the well. Groundwater sampling took place on 8/4/15 at W-21, 24, 26 and 28. There was insufficient water for sampling at W-27. The VOC results for all of the samples were mostly non-detects with a few low hits in each sample. One sample had a few low VOC exceedences. The SVOC results for all of the samples were mostly non-detect with several low hits in each sample and one sample with a few exceedences. I approved the report without comments. 12/15/15 - Raphael Ketani. I received an email from Mr. Clifford today. He stated that groundwater sampling was conducted during February and September 2015. He added that the residual NAPL is not affecting the groundwater quality. The spike in product thickness at well W-29 on 9/9/15 was just an anomaly, according to Mr. Clifford. Product thickness was measured in W-29 on 9/16/15, 10/5/15, 11/9/15 and on 12/2/15. The measured thickness on those dates was 0.11 feet, not measureable, 0.03 feet and not measureable, respectively. He stated that on these dates, product was not seen in any of the other wells. Mr. Clifford attached a figure showing the cumulative NAPL recovery amount from gauging round to gauging round. A higher synoptic plateau was depicted. He stated that he will write the fourth monitoring memo if the Department believes that the case is closeable. I responded that, given the product thickness results stated, the Department believes that the spill case is closeable. 12/23/15 - Raphael Ketani. Mr. Clifford sent me the Brockerhoff Environmental Services, LLC 12/21/15 Progress Summary Report: Remediation and Monitoring of LNAPL. I reviewed the report and found it to contain the same information as in his 12/15/15 email. He stated that Brockerhoff was requesting that the spill case be closed. Based upon the data in the case record, I determined that the residual contamination would not be a threat to the public or the environment. I sent a Spill Closure Letter to Heather Verran, Coop Board Treasurer, 3/10 Tenants Housing Corp., 25 8th Avenue, Brooklyn, NY, 11217. The spill case was closed effective today.

DEC Memo: 08/17/2006-Vought-Spill assigned to DEC Vought due to previous involvement with case (see spill #0604292). Vought received call from Ed Townsend(Environmental Management Solutions) (914-762-6333) that tank and fill line failed test and that isolate and retest will be performed possibly by 5/25/06. 08/29/06-Vought. Received message from Townsend that fill pipe failed test and that he will be replacing fill line. Vought returned call and Townsend will be faxing in failed tank test results and will be removing fill line and taking soil endpoints. 09/06/06-Vought-Received fax from Townsend. Tank Test Results (Advanced Testing Services-Mark Ricciardi)-8/15/06. Tank test showing failing of one (10000-gallon) #4 fuel oil UST tested via EZY3 Locator Plus test. Test results show dry portion leak (ullage).
Letter from ATS Ricciardi to Ed Townsend-8/16/06. The evaluation showed that a leak exists in the underground storage tank system that exceeds EPA and NYDEC standards for leak detection... We recommend that the responsible party isolate the tank from the piping by uncovering the top of the tank and removing the vent and product lines from the system . 09/06/06-Vought-Called Townsend and required that he contact DEC for site visit during excavation of fill line.
Tank Test Results (Advanced Testing Services-Mark Ricciardi)-8/25/06. Tank test showing tight tank. Letter from ATS Ricciardi to Ed Townsend-8/28/06. Advanced Tank Services Co. certifies that the 10,000 gallon underground #4 oil storage tank and distribution lines located at 85 4th Avenue did not contain any detectable leaks .
Letter from Ed Townsend to DEC Vought-8/3/06. This letter serves as an update to the activities surrounding the 10000-gallon #4 fuel oil tank... Subsequently the tank and fill pipe were tested separately on 8/25/06 at which point it was determined that it was the fill pipe that caused the tank failure on 8/16/06. Oil deliveries were ceased based on the tank failure . ...we have informed Jardan Property Management) that the fill pipe will have to be replaced as soon as possible. During replacement of the fill pipe, located under the sidewalk on 85th Street, soils directly adjacent to the fill pipe will be screened with a PID and soil samples will be taken and analyzed... 09/06/06-Vought-Called Townsend and required that he contact DEC for site visit during excavation of fill line. Townsend mentioned that they were looking for plumber to replace fill line and he will contact Vought as soon as date is set up.
12/12/06-Vought-Called Townsend for update and he is no longer working for realty. 12/13/06-Received call from Bob Friedl (Environmental Management Solutions 914-762-6333x16) and his cell is 914-906-4157. Vought called Friedl and left message to return call. Vought spoke to Friedl and sidewalked was opened and fill line was removed and quater size hole in fittings. Three drums of soil were excavated and fill pipe was replaced. New system passed tightness test. Unsure if endpoint samples were collected. Contamination did extend to a depth of 4 below grade at building. DEC will receive report by 12/22. Vought requested site plan with point of intrusion into NYCTA exit and fill port on same plan. 8/06/10 - Raphael Ketani. The PBS is #2-292192. There is one 10,000 gal. tank with #6 oil. The mail goes to Jardan Management Corp., 670 White Plains Road, #305, Scarsdale, NY, 10583. The contact is Robert Weiss at (914) 722-4400.

APARTMENT BUILDING (Continued) **S108131252**

The owner is 85 Fourth Partnership, c/o Jardan Management. I found only a FAX of the tank testing documentation package in the file and put it in the E-docs. I spoke to Mr. Friedl. He said that the spill was cleaned up in 2006. He said that the only problem was the leaking fill pipe. He added that they removed the old fill pipe and a bunch of soil, backfilled with fresh soil, and replaced the fill pipe. I asked him whether the oil had made its way into the NYCTA exit. He said that this was a report by the NYCTA that they had oil in their system, but the location of the oil was over 100 feet away. He added that the soil contamination below the fill pipe went down no more than a foot. I asked Mr. Friedo to send me the cleanup report for the site. He said that he will. 11/22/10 - Raphael Ketani. I spoke to Bob Friedl of Environmental Management Solutions (914)762-6333, ext 16/ cell (914) 906-4157 about the cleanup report. He said that he forgot to send it. However, he took my e-mail address and he said that he would send it shortly. 2/22/11 - Raphael Ketani. I tried to contact Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157, but I could only leave voice mail messages requesting the cleanup report. 2/24/11 - Raphael Ketani. I made contact with Mr. Friedl. I asked him where the cleanup report was. He said that it was in the archives in the basement. I asked him whether there was a problem getting the report. He said No, but that he just hadn't gotten around to it. I told him that if the DEC doesn't receive the report, then the spill will remain open. Then, if his client wants to do a refinance of the mortgage or get a loan, they will have trouble. Mr. Friedl said that he will get me the document. 5/25/11 - Raphael Ketani. I contacted Mr. Friedl regarding sending the DEC the cleanup report. I told him that we last talked in the latter part of March of this year about the need for the report. I told him that last March was the fourth time I had asked for it. Mr. Friedl sounded surprised. He apologized and said that he will dig it out and send it to me, but that he was extremely busy at work. So he needed me to remind him this wednesday. I said that I will call him. 6/1/11 - Raphael Ketani. I tried to reach Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157, but he was out in the field. I did contact him via his cell phone. He said that Mr. Pedone - one of the owners of Environmental Management Solutions - had contacted him regarding the cleanup report. Mr. Friedl said that he will be back in his office in an hour and will call me today. Mr. Friedl called me back. We discussed the spill, the fill pipe replacement and the soil excavation that took place on 12/13/06. Mr. Friedl commented that now that he knew when the work had been completed, he had a better idea of where to look in the hard files for the cleanup report. He said that I should call him tomorrow to see whether he found the report. 6/10/11 - Raphael Ketani. I spoke to Mr. Friedl about whether he had found the missing reports. He said that he had found several reports for the site from 2006 and 2009. They were behind a filing cabinet. The cabinet will be moved and the reports retrieved. He asked that I call him monday regarding the reports. I told him that I will and to have someone scan the reports and send them to the DEC. He said that this will be done. 6/14/11 - Raphael Ketani. I talked to Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157. He said that he was downstairs going through the file cabinets and the reports for the site. I told him to send me the documents as soon as possible. 6/21/11 - Raphael Ketani. I contacted Mr. Friedl (914)762-6333, ext 16/ cell (914) 906-4157. He said that he was still pulling files. I asked him when the DEC will receive the cleanup report. He said to give him more time. He added that he

APARTMENT BUILDING (Continued) **S108131252**

wanted to resolve this case, too. As the cleanup report has not been forthcoming, I sent a strongly worded letter to the property manager Rabina Properties, 670 White Plains Road, Scarsdale, NY, 10583, and to 85 Fourth Avenue Corp., itself. The latest name for the property is 85 Fourth Avenue Corporation and the block and lot are 556 and 1. I set a deadline of July 8 for receipt of the cleanup report. 6/22/11 - Raphael Ketani. Mr. Friedl tried to return my call, but I was out of the office. 6/27/11 - Raphael Ketani. Rob Weiss and Oein (Owen) Fitzgerald (914) 722-4400/cell (914) 649-7764 called on a conference call. They were responding to the DEC 6/21/11 letter. They said that they were surprised that the DEC has been trying to obtain the cleanup report for so long. They had no idea that the spill case was still open. They said that they will contact Mr. Friedl and either get the report from him or arrange to have a new investigation performed. Mr. Weiss added that if they find out that the report doesn't exist, then they will ask for an extension of the deadline so that they have enough time to do the investigation and submit a new report. I told them that sounded reasonable. Later, Mr. Weiss sent me an e-mail that the report can not be located. So, a new investigation will be conducted this week. The report will be submitted to the DEC in 2 or 3 weeks. I wrote back that this sounded reasonable. 7/1/11 - Raphael Ketani. Mr. Friedl of Environmental Management Solutions (914)762-6333, ext 16/ cell (914) 906-4157 called today. He said that soil samples were taken today and were sent off to the laboratory for analysis. He expected to receive the results sometime next week. 7/11/11 - Raphael Ketani. Mr. Weiss sent me the 7/7/11 Enviornmental Management Solutions soil sampling data report. I reviewed it and found that the results were almost entirely non-detect. The few analytes that had hits were very close to non-detect. Mr. Weiss requested an NFA letter and I sent him one. As the results in the 7/7/11 report indicated that there was almost no contamination in the vicinity of the fill pipe, I determined that there was no threat to the public or the environment. Therefore, I closed the spill case.

DEC Memo:	02/15/2013 Spoke with Mike Sepe at AARCO,631-714-9156. He told me that they performed tank system test, and it failed.He is unsure which part of the tank system failed.Tank is vaulted and no evidence of oil spill around it. TTF was sent out to NorthEastern Management 352 7th Avenue-12th Floor New York, NY 10001 (sr) ** Spoke with Rechard Fleisher at 212-972-2111 regarding the requirement on the letter.** 11/25/13 TJD File review. Contractor Al Eastmond removed 3K AST in vault - tank was surrounded with a sand pack which was described as contaminated from historical leaks and a weeping tank bottom. Contractor reports excavating a total of 26 tons of petroleum impacted sand/soil from tank vault to a concrete bottom. Following removal of tank and contaminated solids the entire vault structure including floor/walls were pressure washed. Contractor reports attempting to perform soil borings but was unable to penetrate thick concrete slab. Analytical report provide is for waste characterization only. Structure is currently being heated by 275 AST temporary tank until gas conversion is completed. T/C with contractor reveals following tank removal and pressure wash no petroleum odors interior or exterior to vault was evident. Based upon contractor findings and statements made by contractor regarding his findings during tank removal and vault cleaning - no significant environmental condition exists. No further action is required at this time - spill closed.

DEC Memo:	11/14/23 - Kim - Desk Duty - PBS 2-281190 1500gal AST in contact with soil. Approved Oil reported a tank test failure. Approved is going to pump out the tank and will set up a temporary tank while the tank test failure is investigated further. The Tank Test Method used was EZY 3. There was no free product observed but the test failure reportedly sounded like a wet leak. A Tank Test Failure letter was sent to the listed PBS owner via email to the attention of Compliance Department at compliance.ny@fsresidential.com. Spill case assigned to DEC Ye. 1/16/24 - Ye - Field Duty - On 1/13, Approved sent the following: The tank was pumped out 8 drums temp tanks were set up and all the oil 1210 gals were transferred to the active temp tanks(540 gals) the remaining 670 gals put into 13 drums. That oil was transferred into he the 2 x 275 as necessary. The tank jacketing was removed to find solid cement floor was solid cement below the tank. The tank was cleaned, washed, dismantled, and removed Photos show a jacketed AST and solid floor after the tank was removed, with no

RESIDENCE (Continued) **S131511733**

signs of staining. Asked for the original tank test results, the cause of the failure, whether there was any petroleum release, disposal manifest(s), the current tank setup for the building, and whether the PBS registration has been updated. 2/14/24 - Ye - On 1/17, the property manager asked what changes need to be made to the PBS application. Requested that they make corrections to their registration to reflect the tank removal and/or installation, and submit a tank closure report, in one PDF attachment, which includes the updated registration, the notarized tank closure affidavit, a cover letter with a summary of work, and supporting documentation (tank and sludge/rinse water disposal manifests/receipts, invoices, job tickets, photos, etc.), to me and our PBS Unit. On 2/10, received a PBS Application and tank removal affidavit. Discussed with PBS Francis, and sent the following on 2/14: The tank should ve been registered as an Underground Tank, since it was wrapped in concrete. Please see attached guidance and make the correction on the PBS application. In addition to the PBS Application, please provide the following: For Spill Closure: original tank test results the cause of the tank test failure whether there was any petroleum release the current tank setup for the building are there plans to get a new tank? Are the temporary tanks sufficiently heating the building? The building can provide this if known For the Tank Closure: supporting invoices job tickets tank sludge/rinse water disposal manifests scrap tickets/receipt for the tank 6/6/24 - Ye - Received a call from Approved asking whether I reviewed the spill. I had not received anything; was forwarded a file that had been sent to DEC Francis (PBS) on 5/6 which included: - A tank removal affidavit dated 1/11/24 for the 1500-gallon tank of #2 fuel oil. All piping had been removed and the fill line filled and cemented over - The PBS application for tank closure. It is unclear what the fields for tank location is (blurred out) - Work tickets for Renestank to remove the tank - Recycling tickets for 71 lbs copper and 10,960 lbs steel - Photos of the tank pit and boiler with some discoloration on the cement floor Approved had mentioned on the phone that the building has 2-275-gallon temporary tanks set up until they convert to gas. Still missing the original tank test results and cause of the tank test failure. Approved said that there was no petroleum release. 6/18/24 - Ye - On 6/17, spoke with Approved, who said that there were holes on top of the tank, but they did not have photos and there was no product outside the tank. Requested the original tank test results and a statement in writing from them. 6/21/24 - Ye - On 6/19, Approved provided the tank test report, dated 11/14/23, showing that the tank failed the tightness test in the ullage (dry) portion. The tank had 1210 gallons. On 6/21, they provided the following: The tank was pitted on top of the tank and that was the source for the failed test it was a dry leak. Spill closed.

Remarks: No spill to the environment.

DEC Memo: 1/22/07 notified that this was referred to me from V. Zhune. Called James Seiler of Sterling Equiies (516)773-3800. Left message to call me back. bf 2/1/07 bf: sent ttf letter to: James Seiler Clearwater Associates c/o Sterling Equities 111 Great Neck Road Great Neck, NY 11021 4/16/07 received tank test results on 3/13/07. Tank passed test on 1/18/07. bf 6/14/07 Left message for J. Seiler and requested a call back and a letter from 3rd party regarding repairs made to the tank. bf 6/22/07 Called Mr. Seiler. He told me the building was sold and they have not operated it since 2005. City Urban Management is now management company (516)466-3333. They told me they sent report and letter to me by certified mail in January 2007. I never received it. They will fax it to me today. bf 4/7/08 Site was issued a NOV on 1/30/07 as a result of a PBS inspection. DLA has been in contact with the attorney for the site, Jim Rigano. J. Urda and I called Mr. Rigano today and left a message with his sectertary for him to return the call. Staff called him to discuss violations found during the inspection and for closure of this spill both of which are part of a draft consent order. bf 04/12/11-Hiralkumar Patel. 10:00 AM:- visited site as part of investigation of spill #: 1013012. met building manager and super. inspected tank room. found some stained concrete, but tank room floor found in good condition and does not need any subsurface investigation. the old lines were running aboveground which were removed. manager mentioned that they started managing building in Aug. 2005 and since then they were using the fill port by the foundation wall and they never used fill line that was running under the sidewalk. saw old cut out fill line under the sidewalk. no sign of oil spill found by area where old fill line enters into building. based on observations during the site visit, case closed. refer to spill #:1013012 for more details.
Remarks: CALLER REPORTS TANK FAILURE TEST WITH NO LEAK.

DEC Memo:	03/30/11-Hiralkumar Patel. alternate address: 196-204 E 10th Street Other spill #: 0611420 PBS #: 2-240346. as per PBS, site has one 5,000 gal #2 oil AST in contact with soil. tank was installed in Jan. 1920. site had two 275 gal #2 oil ASTs on legs which were removed in Aug. 2010. spill 0611420 was reported on 01/15/07 due to tank test failure. TTF was sent on 02/01/07, but no response. a NOV was issued on 01/30/07 and a consent order was signed by RP. as per

UNDERGROUND (Continued) **S110769534**

the compliance schedule in the
consent order, a closure report for the spill #: 0611420 was due on 06/21/08, but the spill case is
still open. as per ACRIS: Second Avenue Village Partners LLC. **property owner** Nathan Halegua
property partner c/o Citi Urban Management Corp. 6 Grace Avenue, Suite 400 Great Neck, NY 11021
Attn.: Joe Mohan **property manager** Ph. (516) 466-3333 (O) (917) 335-4728 (C) email:
jmohan@citiurban.com Joseph Debono **super** Ph. (516) 903-9630 4:49 PM:- sent email to DEC Urda
informing that spill #: 0611420 is still open and possible violation of the consent order. 4:58
PM:- spoke with Mr. Debono, building super. he mentioned that they are converting from oil to gas.
he mentioned that there is no spill. he is not at the building and asked to call property manager
for access in building for inspection. 5:02 PM:- spoke with Mr. Mohna, property manager. asked him
to arrange access for site inspection. 03/31/11-Hiralkumar Patel. received email from Mr. Mohan (at
5:34 PM on 03/30/11) including a passing tank system test result from Jan. 2007 (result on PBS
e-docs). but no indication about type of work/repair done after initial failure. 9:36 AM:- spoke
with Mark at PTC regarding tank test failure reported on 01/15/07. Mark mentioned that they tested
tank system on 01/15/07 and it failed. they went back on 01/18/07 and system passed. Mark will look
for documents to see if any repair done by PTC after test failure on 01/15/07. tank system was
tested on 01/25/11 for refinance purpose and it passed. during conversation Mark mentioned that
they cleaned out tank on 03/25/11 and they pumped out #4 oil from tank. after cleaning tank,
property manager/super filled tank with #2 oil and observed oil leaked from tank. the tank is
aboveground wrapped with cinder blocks. Mark doesn't know if there is any spill inside the cinder
blocks. Mr. Mohan submitted passing tank test result dated 01/15/07, but as per Mark they tested
system again on 01/18/07 when it passed. also, as per PBS record, site is using #2 oil, but as per
PTC, they pumped out #4 oil from tank. 9:44 AM:- received fax from Mark including two invoice copy
for tank test work. invoices doesn't include any information about repair work. invoices stored on
e-doc for spill #: 0611420. 9:53 AM:- left message for Joe, property manager. 9:55 AM:- left
message for Joe at NYC DOH. 12:09 PM:- received call from Joe from DOH. he found about 57 ppm in
tank room, about 12 ppm in basement outside of tank room and 0 ppm in common area on first floor.
he also found some loose oil and some speedy dry on tank room floor. 12:13 PM:- left message for
Joe, building super. 12:14 PM:- left message for Joe, property manager. 12:39 PM:- received call

UNDERGROUND (Continued) **S110769534**

from Joe, super. he will meet at the site at 4:30 PM today. 4:15 PM:- visited site. met building
super. inspected tank room. site has one 5,000 gal aboveground tank sitting on floor. found oil
stain on floor along the side of the tank. could inspect only one side of the tank as other three
sides were close to tank room walls. found sign of recent leak (little wet) on side of the tank.
super mentioned that they were using #4 oil. the tank was cleaned on 03/25/11 and then they put
about 1200-1500 gal #2 oil in it. soon after they found oil leaking from side of the tank. super
tried to clean spill with water/soap that cause larger stain on floor. found solid floor in visible
areas. during inspection, found two concrete patches on E 10th street sidewalk. also found about 1
ft wide concrete patch from sidewalk to sidewalk entrance to basement. super doesn't know anything
about these patches as working for only 2.5 years. the most recent fill port was loacted on
building foundation wall, close to garbage conainer area. 4:51 PM:- spoke with Joe, building
manager. he mentioned that tank will be removed tomorrow and PTC will remove the tank. informed Joe
that as the department never got any documents regarding the cause of tank test failure in Jan.
2007, the department requires investigation. so asked him to call for re-inspection once the tank
is removed as need to inspect floor condition underneath the tank. informed him that the department
may require further investigation based on inspection. 5:28 PM:- received call from Mark from PTC.
they will submit a proposal for tank removal and will start tank removal once get approval.
04/05/11-Hiralkumar Patel. 9:08 AM:- spoke with Joe, building manager. he has sent signed proposal
to PTC and tank will be removed this week. Joe will meet at 10 AM, at the site, on 04/12/11.
04/07/11-Hiralkumar Patel. 12:43 PM:- received call from Mark from PTC. they removed the tank.
04/12/11-Hiralkumar Patel. 10:00 AM:- visited site. met building manager and super. inspected tank
room. found some stained concrete, but tank room floor found in good condition and does not need
any subsurface investigation. the old lines were running aboveground which were removed. manager
mentioned that they started managing building in Aug. 2005 and since then they were using the fill
port by the foundation wall and they never used fill line that was running under the sidewalk. saw
old cut out fill line under the sidewalk. no sign of oil spill found by area where old fill line
enters into building. based on observations during the site visit, case closed.

Remarks: Caller advised received a call advised of a smell of oil coming from the building he advised he has readings of 57.3 ppm. Caller advised that the building is possibly going through a conversion to natural

UNDERGROUND (Continued) **S110769534**

gas. Caller advised that the building houses commercial and residential. Oil is spilled onto the oil tank room floor.

DEC Memo:	ttf ltr sent to: Alan Tabak P.O. Box 1384 Summit, NJ 07902-1384 07/25/05-Sharif Rahman// Left a message for Alan to follow up about the tank. 10.14.05 Sharif Rahman//Sharif sent another violation letter to above address and faxed it to 908-273-5613. 02/23/06 Sharif Rahman- I left a messege and also sent another ttf letter to Tabak Family Realty Company 332 East 9th Street New York, NY 10003 03/17/06 Sharif Rahman- I called Alan Tabak,(908)273-7726 several times and he never picked up the phone. I left messege and never got any return call.TTF was sent to Tyron Hendix(212-228-9420) 329 East 6th Street New York, NY 10003 as per her suggestion. 03/24/06 Sharif Rahman- Mr. Mario from Petro Oil,(718)-333-8882 called to say the old tank was removed and 2 275 tanks were placed instead.There was a crack on top of the tank but there was no spill and no contamination observed. A report will be sent to DEC in a week. 04/27/06 Sharif Rahman- The 1500 gallon tank has been removed and two 275 ASTs have been installed.The 1500 gallon tank failed the test because of a crack at the manhole and no oil spill was observed out side of the tank area.Invoice of work was provided.NFA required.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT CALLED MARK SALAMACK,(PETROLEUM TANK CLEANERS), WHO CONFIRMED THAT SPILL IS ON CONCRETE FLOOR OF AN OFFICE BUILDING. SPILL IS CONTAINED AND CLEAN-UP IN PROGRESS. NO WATER OR SOIL WAS IMPACTED. E.R. 3/27/2003-Vought-spill transferred from Tipple to Vought. Site visit by Vought. Spill on brick with schist cobble wall containment area. Minor staining between bricks (brick removal not needed due to thorough grouting and hence lack of infiltration). Tank emptied by PTC. No sewers or drains affected. Spill cleaned using speedy dry. For spill closure NYSDEC requires copy of invoice of sealing of containment walls. 1/7/04-Vought-Received copy of invoice of sealing of containment walls. Spill closed by Vought.
Remarks:	TANK HAD BEEN CLEANED OUT EARLIER. OIL WAS BEING PUMPED INTO TANK AND TANK FAILED. CLEAN UP IN PROGRESS.

DEC Memo:	1/17/2020 - Feng - Duty Desk. Left a message to Tanknology for call back. Spoke to Tracey Lovette of Avis Budget. The spill bucket failed the test. It is a 2,500-gallon UST. They did a hydrostatic test, and the water drop and determined that it failed. No holes or visible damage has been observed. They will hire a contractor to retest and to find out the reason it failed and to repair. Tanknology 800-666-1215 Tracey Lovette 973-496-6942 ABGTanks-Env@JD2Env.com PBS 2-601834 1/23/2020 - Sent TTF letter to Tracey Lovette. Assigned the spill to Kumar Patel. 01/23/20-Hiralkumar Patel. 2:59 PM:- spoke with Robert Friedman, property owner and informed him about tank test failure. BF/RF Realty LLC. **property owner** c/o Robert Friedman Ph. (212) 744-9675 email: rgface@gmail.com 3:04 PM:- sent email to Mr. Friedman including copy of letter sent to AVIS. email copied to Ms. Lovette. AVIS Rent-A-Car System LLC. 6 Sylvan Way, Dept. 29-C93-36 Parsippany, NJ 07054 Attn.: Tracey Lovette PH. (973) 496-6942 email: ABGTanks-Env@JD2Env.com 01/24/20-Hiralkumar Patel. 12:55 PM:-

AVIS BUDGET (Continued) **S125868810**

received call from Sara from JD2 Env. she mentioned that the site has double wall fiberglass tank system (including piping) with a leak detection system. currently, there is no leak in the tank system, but a 15 gal spill bucket beneath the remote fill port has failed a hydrostatic test. AVIS has authorized to replace the failed spill bucket, but there is an existing scaffolding in the area. Sara will contact scaffolding contractor for temporary removal of the scaffolding so then can excavate sidewalk to replace the spill bucket. after consulting with PBS, informed Sara that the remote fill port can't be used until the spill bucket is repaired/replaced and tested tight. 01/30/20-Hiralkumar Patel. received email from Sara (at 1:02 PM on 01/29/20) including a passing hydrostatic test. she mentioned that during further investigation by Metro Env., it was discovered that the spill bucket had a faulty drain valve which was allowing any standing liquid to drain back to the tank via the remote fill line. on 01/29/20, Metro Env. removed the faulty drain valve and installed a drain valve plug in its place, and then performed a hydrostatic retest on the spill bucket which passed. case closed based on available information. 9:17 AM:- sent spill closure letter to Ms. Lovette. letter emailed to Ms. Lovette and Mr. Friedman.

Remarks: hydrostatic testing failure

DEC Memo:	3/16/15- 2-327425 DEC piper spoke with call jeff mcKenzie. AS per conversation, the 2K aboveground contact with soil tank failed a tightness test in the wet portion of the tank. I spoke with Andrew Bldg Corp Eric Martinez. I insturcted him to empty tank and set up temp tanks. Bldg is a residential bldg. He is in talks with Oil provider and will contqct Dept if needed. DEC Zhune's contact info provided. TTF Letter to be sent to 547 Browadway Realty Inc C/o Andrews Building Corp 666 Broadway, 12th FLoor New York, NY 10012 Assigned to DEC Zhune for followup and closure. 2/3/16-David Chan from Riteway sent the spill closure report. The letter stated that on November 23, 2015 Riteway Tank Maintenance Corp. was contracted by Andrews Building Corp. to address a tank test failure. The tank test failed with an ullage dry portion leak. There was no contamination neither found nor observe. The existing 2000 gallon AST was pumped out, cleaned, scraped and washed. Lines were isolated, tested ant the vent was found to be faulty. In addition, and old cut was found on the tank. Rite way proceeded to install a new vent and re-welded the old cut. Afterwards, another tank test was performed on the entire system which passed. Based on this information the spill is closed.
Remarks:	tank test fail

DEC Memo:	09/04/08-Hiralkumar Patel. visited site. met Mr. Isaacs, property owner. site has one 550 gal tank in square concrete box. found minor leak on top of tank. found some oil stains on floor around tank. no petroleum odors inside basement. all lines runs aboveground and no sign of leak under visible portion of line location. asked Mr. Isaacs to test tank to confirm no leak from it. left message for Mr. Palumbo at Petro. 09/11/08-Hiralkumar Patel. spoke with Don at Petro. he mentioned that they never did any tank test. spoke with Mr. Isaacs. asked him to do tank test. Max Isaacs 231 East 11th Street New York, NY 10003 PH. (212) 254-9177 sent TTF letter to Mr. Isaacs. 09/23/08-Hiralkumar Patel. received call from Mr. Palumbo from Petro. they performed tank test last week but due to some difficulty they could not reach to final result. will go back on 09/30/08 for

231 EAST 11TH ST (Continued) **S109207713**

tank only test. 12/03/08-Hiralkumar Patel. spoke with Mr. Isaacs. he mentioned that Petro has
installed two new tanks in Oct. 2008 as they were suspecting leak from tank. Mr. Isaacs asked to
contact Don at petro. Mr. Isaacs's account #: 2551790 Don Palumbo Petro Oil Ph. (718) 628-3324 Fax
(718) 628-3325 email: dpalumbo@petroheat.com left message for Don at Petro. 12/04/08-Hiralkumar
Patel. received call from Don from Petro. he mentioned that home owner hired Advanced Tank Services
for tank test and tank failed the test. then owner hired Petro to install new tanks. Petro hired
Milro for tank installation. Milro abandoned old tank. Don doesn't have any report regarding
abandonment method of old tank. Advanced tank services company Ph. (800) 440-8265 left message at
ATS for tank test result. received call from Cathy from ATS. she mentioned that they were hired by
Petro. during tank test they found dry leak in system. asked Kathy to submit tank test result. tank
test failure reported by ATS. spill #: 0807005. received email from Laura Capilli from Advanced
Tank Services with tank test result. according to the result, tank was empty during tank test and
found tank system leaking. ATS recommends for isolation test, but no isolation test performed.
Laura Capilli Advanced Tank Services Ph. (800) 440-8265 Fax (800) 303-5323 email:
lcapilli@atsenvironmental.com Cathy Burke ATS email: cathy@atsenvironmental.com spoke with Anthony
at Milro regarding abandonment of old tank. Anthony will call back with more information. spoke
with Mr. Isaacs. explained him that based on tank test result, the Department requires isolation
test and possible soil investigation, according to earlier letter dated 09/11/08. Mr. Isaacs will
contact previous tank testing company and ask them to call back. spoke with Don at Petro regarding
tank test result. white talking to Don, he mentioned that tank had about 40 inches of product in it
and they transferred oil from tank into new tanks after installed. they installed tanks after
findings failure. received call from Cathy from ATS. she mentioned that tank had oil in it when
they tested it, but not empty. but due to configuration of pipe, they could not measure via stick
and they didn't know whether petrometer was working or not. Cathy also mentioned that after
installing new tanks, Milro abandoned old tank with sand without isolation test.
12/08/08-Hiralkumar Patel. received email from Cathy Burke from ATS. Cathy mentioned that they
tested tank twice. at first time they tested tank system and tank system failed. then they tested
tank only and found leak in tank. could not decide whether dry or wet leak. after first test, petro
cut remote fill line and converted to direct fill. during second test,

231 EAST 11TH ST (Continued) **S109207713**

ATS measured product level
via a direct fill port and measured about 40 inches of product (about 500 gal) in it. summary: -
spill reported as found stain on concrete box on top (could be overfill) - tank system tested and
found leaking - amount of product was not measured during first tank test due to no access for that
- remote fill line removed and Petro installed new direct fill on tank
- ATS tested tank only
second time and found dry leak - ATS measures 40 inches of product (about 500 gal in 550 gal tank)
- tank was in concrete box and has been abandoned based on available information and absence of any
visible spill in basement during site visit, case closed.

Remarks: The owner of the building, Max Isaacs told caller he thought he had an overfill on his 550 gallon tank. Caller saw old residue from a possible overfill or minor equipment failure. Caller will contact a tank co. for further testing. Any dry residue is contained in the tank vault.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 3/17/2003-Vought-Called Ferrantino Oil and spoke with Roger Loughlin and crew is on-site who is cleaning spill with drysol. Spill came out top of tank. No sewers or drains affected and spill on concrete. Vought called Richard Saunders who is not at site today. Vought explained to Saunders that NYSDEC requires confirmation of cleanup from owner or manager. Saunders stated that he will call Tipple tommorrow with confirmation of cleanup. 05/18/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called to Richard Saunders at (212)253-2530 left message to call me back. Also talked to Mr. Danis

171 SULLIVAN ST (Continued) **S104877273**

(Ferrantino oil co.) at (718)832-6700. He said that site is already cleaned. He will fax me confirmation of cleanup letter. -QA 06/21/06: Called Mr. Danis (Ferantino oil Company)at(718)832-6700 reminded him to send confirmation of clean up letter. -QA 06/23/06: Called to Mr. Danis and talked to Mr. Mike Taylor (Service Manager), Ferrantino Oil Company regarding spill. He said that he will find out the spill record and he will fax it to me. -QA 07/06/06: Called Danis and talked to Mike he said that he will send report to me in a week. -QA 07/20/06: Called to Mr. Danis and talked to Ms. Ethel She said she will convey my message to Mr. Danis and Mr. Mike regarding clean up confirmation letter. -QA 07/24/06: Mr. Anthony Lara (718)624-4824 called me back and said spill is cleaned up. He will fax me confirmation of closing letter for the spill. -QA 09/11/06: Called Mike, Service Manager (Ferrantino Oil Company) at (718)832-6700 he said he will send report and a closing confirmation letter to close the spill as soon as possible. -QA 09/18/06: Called Mr. Mike he said as soon as hewill received papers . He will send it to me. -QA 10/11/06: Called Mr. Danis at (718)832-6700 he said he will find out from his Service Manager and he will call me back regarding spill. -QA 10/16/06: Called to Mr. Richard Saunders at (212)253-2530 and talked to owner Mrs. Maruska Saunders she said this spill is cleaned and she sold this property in February 2006. Received a closing confirmation letter from Mr. Mark Salamack (Petroleum Tank Cleaner)they emptied the tank and welded this opening closed. The oil dripped down the outside painted concrete surface of the tank jacket and onto the painted floor. This was cleaned up by the oil company (Ferrantino). The amount of resulting oil absorbent was a small amount and discarded with the household trash from the building.According to the information of Mr. Mark Salamack spill is cleaned. DEC staff closed the spill. -QA

Remarks: CALLER STATED A FILL PIPE LEAKED GOING INTO THE BUILDING, COMP SPOKE TO THE DRIVER, AND THE DRIVER REFUSED TO GIVE HIS NAME, BUT STATED THAT HE HAD CALLED FOR SOMEONE TO COME CLEAN UP THE SPILL, AND THEN TOOK OFF DOWN THE ROAD TO HIS NEXT STOP

DEC Memo:	04/24/17-Hiralkumar Patel. alternate address: none no PBS record found. other spill # 9811442 was reported on 12/11/1998 due to 40 gal #2 fuel oil spill. case closed. 2:55 PM:- spoke with TJ. he mentioned that they attempted to test a 1,500 gal AST encased in concrete, but could not build pressure. 2:56 PM:- spoke with Doug at Eastern Env. he mentioned that as per the owner's representative, site has 1,000 gal tank, but FDNY record shows 1,500 gal tank. he mentioned that leak is suspected in vent or remote fill line. informed Doug that isolation test must be conducted immediately to confirm tank's integrity for continuous use of remaining oil (no further deliveries until system is fixed and tested tight), otherwise tank system must

ON PROPERTY (Continued) **S120702926**

be pumped out immediately. 3:06 PM:- left message for Joshua Martin, property manager. 7 Rivington LLC. **property manager** c/o Veracity Real Estate Management 199 Lafayette Street, Suite # 5D New York, NY 10012 Attn.: Joshua Martin PH. (212) 966-6811 (646) 267-4065 email: Joshua@veracityrem.com 3:27 PM:- received message from Mr. Martin. 3:31 PM:- spoke with Mr. Martin. asked him not to deliver any more oil to the leaking tank system until it is fixed and tested tight. also asked him to pump out tank by the end of tomorrow unless dry leak in the system. 3:44 PM:- sent TTF letter to Mr. Martin and asked him to submit report by the end of 05/31/17. letter emailed to Mr. Martin and Doug. case assigned to DEC Zhune. 04/25/17-Hiralkumar Patel. 12:38 PM:- received call from Doug. he mentioned that the isolation test will be conducted tomorrow morning. 5/24/17-Louis J. Baselli from Eastern Environmental emailed the report. The letter stated that On behalf of GRS/Corteq, Eastern Environmental Solutions, Inc., (Eastern)has performed tank tightness testing in conformance with USEPA and 6NYCRR test criteria for 1,100 gallon capacity #2 fuel oil storage tank. On April 24, 2017, the New Yor State Department of Environmental Conservation (NYSDEC) was contacted regarding a tank tightness testing failure occurring at 7 Rivington Street, The testing was performed in order to determine a cause for the reported tank equipment failure. On April 24, 2017 a tank tightness test was performed on the fuel oil and oil delivery system. A tank testing failure was recorded. On April 26, 2017 a second tank tightness test was performed after a determination was made that leakage was coming from the tank vent line. The second test was perfomed with the oil tank isolated from the vent line. The tank passed the tank testing criteria. On May 3, 2017, a third tank test was performend for the entire tank delivey sytem including all lines after the leaking vent line was repaired by Eastern Technicians. The tank system passed the tank tightness test. Spill Closed.

Remarks: tank test failure

DEC Memo:	08/21/09- Zhune spoke to TJ from Dry as Bone. He said the tank failed the test with a dry leak. Probably the line that goes to the side walk is leaking he will come back next week to check it. He did not see any spill when test was done. 8/27/2009 Sangesland spoke to property manager Alana Barran - She has a hearing with John Urda on Friday Aug 28th. ***Is this a PBS Site?*** Dry As aBone says it's a 1080 gal tank??? TTF letter sent to: Alana Barran 109 Lafayette St - Suite 302 New York, NY 10013 8/27/09 - Raphael Ketani. This case is associated with the earlier spill case #0813565. The earlier case involved a fill box and fill pipe leak that was supposedly repaired. However, during an inspection made by me months ago with a PID meter, elevated total VOC detections were found at the bottom of the tank vault and at the top of a covered sump. This prompted a request by me to the owners to investigate the tank. They didn't respond for along time and so John Urda of the Office of General Counsel was asked to become involved. He sent correspondences to the owners. The owners hired Dry AS A Bone to test the tank system and that is when the leak was found. I am closing the spill case and referring it to the earlier one for the site, spill #0813565.
Remarks:	1080 gal vaulted tank

DEC Memo:	02/20/15-Hiralkumar Patel. alternate address: 65-77 East 12th Street, 120-130 4th Avenue PBS #: 2-320722. as per PBS record, the site has one (1) 12,000 gal #6 oil UST, in-service, installed in May 1964. no other spills found. 12:25 PM:- spoke with John at AARCO. they tested 15,000 gal out-of-service UST. at the time of the test, the tank had about 3,000 gal #6 oil in it. John mentioned that they could not confirm type of leak (dry or wet) as the system did not hold any pressure. 12:30 PM:- spoke with John, building super. he mentioned that a new gas boiler was installed about three years ago and the oil tank is out-of-service since then. the tank is located under the basement floor. now, as part of refinance process, building owner has decided to close the tank in-place. asked John to seal the fill port to prevent any misdelivery to the leaking tank system. John mentioned that AARCO Env. will do tank abandonment. 77 E. 12 Owners, Inc. **property owner** c/o Douglas Elliman Property Management 675 3rd Avenue, 5th Floor New York, NY 10017 Attn.: Lisa Moretti Ph. (212) 473-3813 (212) 370-9200 email: lisa.moretti@ellimanpm.com John **building super** PH. (914) 625-0994 Douglas Elliman after discussion, case assigned to DEC Mahat prior to issuing any letter. 3/9/15: Mahat DEC Mahat received a call from Ms. Hegginson (Project Manager - ARCO Environmental) mentioning that they will be taking three samples along the line of the tank for the process of abandonment. A complete closure reprot will be provided to the Department as it is ready. Lab reprot was provided, and based on the GW Lab analysis, no contmaination above the Guidance value was observed. Tank will be aboandon in place. 5/19/15: Mahat DEC Mahat received a closure report and it has been uploaded on D2 for reference. Based on the laboratory results and report, the Department does not warrant any further investiagation. Hence, the spillcase will be closed in DEC Spill Database.

DEC Memo:	10/05/04-Vought-Spoke with Jim Melnick and owner was not sure if he wanted to abandon, remove tank or leave it in place. If tank passes test he will leave it in place for possible future use. ProTest will reseal manhole, plug vent and retest. Vought sent out TTF letter to owner on PBS also requiring submission of updated PBS registration. 10/13/05-Vought-Received both copies of TTF returned to sender as attempted -not known unable to forward. Addresses on letters were: Noel Torsi 114 Waverly Place New York, NY 10011 and Chris Leahy 159 Prince Street New York, NY 10012. Vought called Leahy for correct address and received address from secretary and sent out new TTF letter to: Christopher Leahy 636 11th Avenue New York, NY 10036 10/21/05-Vought-Received message from Chris Leahy that source of failure was broken air release valve that will be replaced and tank will be retested. Report will be submitted to DEC. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/14/06 - Raphael Ketani. I tried to reach Mr. Leahy (lay-hee) at (212) 777-8838, but could only leave a voice message. There are 2 tanks on the property, but I could not find a PBS case. Mr. Melnick of Protest (631) 321-4670 had done the first tank test. 6/15/06 - Raphael Ketani. Mr. Leahy called me back. He said the PBS case is 2-339059. I checked the number and found both a 1500 and 2000 gallon tank listed. I told Mr. Leahy that I needed a revised PBS application, the successful test results for the 2000 gal. tank, a letter describing the removal of the 1500 gal. tank, and a cover letter from Protest stating that there was no oil spill, no impact to

APARTMENT BUILDING (Continued) **S107410739**

drains or the environment. He said he would get me these documents. 7/28/06 - Raphael Ketani. I spoke to Mr. Leahy and asked him for the revised PBS and the cover letter describing the incident, repairs, and that no drains or the environment were impacted. He said that he thought these documents were sent, but he will see to it that they are sent very shortly. 7/31/06 - Raphael Ketani. I received the FAXed 2000 gal. tank test report from Pro Test. The tank passed. However, I have not received the revised PBS. I left a message for Mr. Leddy of Pro Test and Mr. Leahy, the landlord. Mr. Leahy told me that a 1100 gal. tank was removed by Petroleum Tank Cleaners and that there is only a 2000 gal. on site, NOT a manifolded 2000/2200 gal. system. He said that even the Fire Department had the wrong tank size a while ago. He said the PBS form hasn't come back from the expediter, yet. He said he will send the revised PBS AND the report regarding the end point samples that were taken in the vicinity of the removed 1000 gal. tank. He said the end point samples were clean. 8/17/06 - Raphael Ketani. I tried to reach Mr. Leahy, but could only leave a message. 8/30/06 - Raphael Ketani. I tried to reach Mr. Leahy, but could only leave a message. 8/31/06 - Raphael Ketani. I received a call from Jessinia of Edgemont Realty (212) 228-6757 - the expeditor. She said that she had an affadavit for the removed tank (1080 gals.) and a check for renewal of the registration of the 2000 gal. tank. She asked who she should send it to. I told her to send it to me and I will walk it over to Nick Lombardo in the PBS Unit. She said she spoke to Mr. Lombardo and she said that he told her just to send the affadavit and the check for the renewal. I spoke to Mr. Lombardo and he said he recalled the conversation with Jessinia and he showed me a FAXed PBS registration form with the removal of the 1080 gal. tank and renewal of the 2000 gal. tank. He said he is just waiting for the originial PBS form, the affadavit and the check. 9/25/06 - Raphael Ketani. I received a call from Jessina inquiring whether the DEC had received all of the paperwork for the site. I told her I had the cover letter explaining what triggered the spill case. I told her I had to check with Mr. Lombardo of the PBS Unit to see whether he had received all of the necessary paperwork and the check. Mr. Lombardo told me that he must have received everything as Albany DER issued a certificate for the tank registration. I told her that the DEC had received all of the necessary paperwork. Based upon receipt of the revised PBS registration, the affadavit, the check, and the passing tank test results, I am closing the spill case.

DEC Memo:	11/28/12-Hiralkumar Patel. the spill report received yesterday afternoon. DEC Steve spoke with property manager yesterday evening and asked to hire contractor for cleanup. this morning, Steve received email from Mark (PTC) including pics of impacted basement floor. Mark mentioned in email

24 5TH AVENUE (Continued) **S105135133**

that PTC was hired to pump out leaking tank and to set up temporary tanks, but has not got
authorization for cleanup. so Steve asked to inspect the site. 10:06 AM:- spoke with Mark. he
mentioned that PTC was hired to pump out tank and install temporary tanks, but were not authorized
to do spill cleanup in basement. PTC crew at site right now. he will talk to his crew member and
will call back with update. 10:09 AM:- received call from Mark. he confirmed with his crew that no
cleanup in progress. after that he spoke with building super who was under the impression that PTC
was going to cleanup the spill also. as Mark did not got signed authorization, he asked super to
signed work proposal. Mark will call back with update. 10:31 AM:- spoke with Mark. he just got fax
authorizing cleanup. PTC crew will do cleanup. alternate addresses: 26 5th Ave, 1-9 West 9th Street
other spills: 9514312, 0106144, 0205706, 0610334 PBS #: 2-359041. as per PBS record, the site has
one 10,000 gal #6 oil AST and one 15,000 gal #6 oil AST. both tanks are in-service and are located
in subterranean vault with access. both tanks were installed in Jan. 1982. 24 Fifth Onwers Inc.
property owner c/o Douglas Elliman Property Management **management office** 675 3rd Avenue New
York, NY 10017 Attn.: Joanna Soto **property manager** Ph. (212) 473-6877 Robert Rodriguez
building super Ph. (212) 473-6877 (O) (917) 518-2272 (C) 10:55 AM:- spoke with Robert
Rodriguez, building super. he mentioned that the site has two tanks (one 10,000 gal and one 15,000
gal), but only 10,000 gal was in-service. the 15,000 gal tank is not in use for some time as
something wrong (oil freezes inside) with the tank. Mr. Rodriguez does not know when was the last
delivery to 15,000 gal tank. currently, the 10,000 gal tank is leaking from bottom. bottom of
10,000 gal tank touches the floor. he is not sure about location of 15,000 gal tank (either on
floor or saddles). 3:35 PM:- visited site. met Mr. Rodriguez. PTC crew was on-site installing
temporary #2 oil tank on street. vac truck also at the site. inspected boiler/tank room in
basement. the site has two tanks: one 10,000 gal (east-side tank) and one 15,000 gal (west-side
tank). both tanks are aboveground in separate vaults with access, located in the boiler room. the
tank vaults are located under the sidewalk. Mr. Rodriguez mentioned that the 15,000 gal tank is not
in service for at least last 7 years since he is working and it only contains sludge. there are
separate fill ports/vent pipes for both tanks. the fill ports are covered in fill boxes. fill box
for 15,000 gal tank is covered with dirt and the fill port was not visible. Mr. Rodriguez mentioned
that they check tank vault everyday. during inspection yesterday, they

24 5TH AVENUE (Continued) **S105135133**

noticed oil on tank room
floor. so they opened a small hole at the bottom of tank vault, in boiler room and oil started
flowing in boiler room. the 10,000 gal tank will be removed and a new #4 oil tank will be
installed. also, building engineers are working on natural gas heating system design. there are
total 420 residential units in building. Mr. Rodriguez mentioned that there is no odor complaint
from any resident. asked Mr. Rodriguez to secure both fill boxes to prevent any misdelivery.
11/29/12-Hiralkumar Patel. 11:44 AM:- left message for Mr.Rodriguez and asked him to call for site
inspection, once leaking tank removed from site. 11:46 AM:- spoke with Mark. asked him about tank
removal schedule. he mentioned that owner is working on inspecting tank for possible repair. asked
him to call for inspection, once tank room floor is cleaned.
11/30/12-Hiralkumar Patel. 9:45 AM:-
received message from Mark. they cleaned tank room.
12/04/12-Hiralkumar Patel. 10:00 AM:- visited
site. met Mr. Rodriguez. could not inspect tank room due to limited access. Mr. Rodriguez mentioned
that the 10,000 gal tank will be removed and property manager/owner are currently reviewing cost
estimate. asked him to call for site inspection, once tank removed.
12/12/12-Hiralkumar Patel. 2:20
PM:- received message from Mark. PTC got approval and currently they are removing the tank. they
will do further cleanup once tank steel is out of the room. DEC Sharif will visit site on 12/14/12,
if possible. 12/19/12 I stopped by the site as per a request from Kumar Patel on 12/14/2012 PM.The
10,000 gallon tank has been taken out, contaminated debris, metal plate left in the tank room.
Further clean up will be performed as the management told me.(sr)
12/27/12-Hiralkumar Patel. 11:53
AM:- spoke with Mr. Rodriguez. tank is completely removed. scheduled a site inspection tomorrow
morning. 12/28/12-Hiralkumar Patel. 9:15 AM:- went to site for tank room inspection, but tank room
is not completely cleaned. 01/07/13-Hiralkumar Patel. 11:20 AM:- left message for Mart at PTC.
11:22 AM:- left message for Mr. Rodriguez. 11:23 AM:- left message for Ms. Soto. 11:24 AM:-
received call from Mr. Rodriguez. he mentioned that PTC crew has removed remaining stuff from tank
room floor. 1:56 PM:- received call from Mark from site. he mentioned that all the debris have been
removed from the tank room floor and floor was found in good condition. he also mentioned that
portion of tank room floor, where the tank was located, is about 4 inches higher than remaining
floor. Mark confirmed some stains on the floor which will be powerwashed in couple of days. Mark
will call back once floor is powerwashed. 01/16/13-Hiralkumar Patel.
4:10 PM:- visited site.

24 5TH AVENUE (Continued) **S105135133**

inspected tank room. tank room floor found in good condition. found oil stains on floor that will
be powerwashed. 01/23/13-Hiralkumar Patel. 2:30 PM:- visited site. inspected tank room floor which
found in good condition. some oil stains on floor. based on available information, case closed.

DEC Memo:	Need to trace the owner and send a TTF letter. 09/13/06 a TTF letter was sent to: 14 Spring realty LLC 251 Mulberry Street New York, NY 10012 10/17/06- I got the tank tightness test results which showed that the ullage (dry) portion failed the test and a letter from Ferrantino fuel corporation saying that a temporary 275-gallon tank was placed to supply the building with oil. The 1500 gallons above ground tank will be closed-removed. A new 1080-gallon above ground oil tank will be put in the basement by January. They said that there is no any visible sign of oil in the basement by the tank. They also said they will have a better look to determine if there is an spill when the cemented vault of the tank is broken up to removed the old tank. June 8,2007 I got a letter from Ferrantino Fuel Corporation saying upon removing the vault of the tank, we found no contamination on bricks on the ground. This case is closed
Remarks:	THE OIL HAS BEEN PUMPED OUT.

DEC Memo:	04/04/17 - Lakhani Spoke to Ricky (9175932154) from Empire Environmental. He informed that a system test was performed on the AST tank system and failing results were obtained. There is no spill. They are unaware of where the system failed. The property is a commercial building using a 1080 gallon #2 fuel oil AST. TTF letter sent to owner: Tar Beach Club Inc. 119 Spring Street New York, NY 10012 and uploaded to D2. 04/12/17-Hiralkumar Patel. alternate address: none no PBS or other spills found. 04/27/17-Hiralkumar Patel. 11:33 AM:- received message from Soraya (917-445-5376), owner of building 119 Spring St. 12:06 PM:- spoke with Soraya. she mentioned that building 119 uses gas heating system and tank test failure may be related to neighboring property 121 Spring St. 12:09 PM:- spoke with Empire Env. who received site address from their client. after initial system test failure, Empire Env. conducted an isolation test and found leak in vent line. Empire has submitted work proposal to their client and waiting for approval. 12:11 PM:- spoke

ABOVE GROUND TANK (Continued) **S120702915**

with Bryan Shaw at EBI Consulting. during phase I investigation, EBI Consulting noted the oil tank system at the site and recommended system test. Bryan confirmed site address as 121 Spring St. based on available information, changed site address in spill report from 119 Spring St. to 121 Spring St. . alternate address: 90 Greene St {block #: 499 / lot #: 43 (or 7503 as per NYC DOB)} no PBS or other spills found. as per NYC DOB records, a permit application was approved on 12/12/2003 for replacement of boiler and oil burner, and installation of 1,080 gal oil tank wrapped in jacket. 1:34 PM:- spoke with Jaime Espinales at Milan/Quatrone Property Management and received property manager and building super's contact info. 1:41 PM:- left message for Worley, building super. 121 Spring Street Associates **property owner** c/o Milan/Quatrone Property Management 52A West 8th Street New York, NY 10011 Attn.: Robert Milan Ph. (212) 598-4888 Ext. 201 email: bob@mqmgt.com Worley **building super** Ph. (917) 327-8440 Bryan Shaw EBI Consulting Ph. (845) 893-1245 email: bshaw@ebiconsulting.com 1:55 PM:- spoke with Soraya and informed her about change in site address. asked her to disregard the letter from the Department dated 04/04/2017. 2:20 PM:- sent TTF letter to Mr. Milan and asked him to submit report by the end of 05/31/17. letter emailed to Mr. Milan, Bryan and Michael (Empire Env.). 06/20/17-Hiralkumar Patel. 2:03 PM:- spoke with Carol at management office. informed her about overdue report. she requested copy of letter dated 04/27/17 as Mr. Milan is out of office. 2:29 PM:- sent email to Carol (info@mqmgt.com) including letter dated 04/27/17. asked her to submit required report immediately to avoid enforcement. email copied to Mr. Milan, Bryan and Michael. 3:16 PM:- received email from Jennifer Perez from Empire Env. including tightness test results dated 04/04/17 and 05/03/17. as per tester, the vent riser piping was leaking. the faulty vent riser pipe was replaced and the tank system was tested tight on 05/03/17. 06/21/17-Hiralkumar Patel. 8:51 AM:- sent email to Jennifer inquiring about any contamination noted during repairs. 9:32 AM:- received email from Jennifer stating that no evidence of contamination noted during repairs. case closed. 9:49 AM:- sent spill closure letter to Mr. Milan. letter emailed to Mr. Milan, Carol and Jennifer.

Remarks: no spill tank test failure only

Record Added Date:	09/05/2023
Record Updated Date:	12/19/2023
Update By:	AMSERVIS
Site Description:	"Location: The 300 East 12th Street Site is in the East Village section of Manhattan, New York and is identified as a portion of Block 453, Lot 8. The site encompasses a portion of the building and is approximately 0.3-acre of the overall 0.9-acre parcel (Associated Property). According to the New York City Department of Buildings (NYCDOB), the Associated Property is identified with the following addresses: 188 Second Avenue and 300 East 12th Street, Manhattan. The site is in an urban area with a mix of commercial and residential buildings and is located at the southeast corner of the intersection of Second Avenue and East 12th Street. Site Features: The Associated Property is improved with a six-story building with a cellar. The Associated Property building pad encompasses approximately 19,299 square feet and was constructed in 1920. The Associated Property building s ground floor contains two vacant restaurant tenant spaces, both with access to separate cellar support areas. The cellar also houses various utility rooms. Floors two through six of the Associated Property building consist of 19 residential apartments. The building footprint covers the majority of the Associated Property, with two small, cellar-level, concrete-paved courtyards located on the central and eastern portions of the property, and concrete-paved public sidewalks to the northwest (along Second Avenue) and northeast (along East 12th Street). Current Zoning and Land Use: The site is currently active, and there are no proposed use changes for the site. Based on a review of the New York City Department of City Planning and Land Use Mapping program, the site is zoned R7A and C1-5 (commercial overlay). The R7 (residential) zoning is described as a medium-density apartment house district. The C1-5 (commercial) zoning is a Local Retail and Local Services Commercial Overlay Zoning District that is mapped in residential zoning districts but allows for commercial use. The zone is primarily residential with commercial uses on the street level (i.e., retail, restaurants, and services for day to day needs of the residential

300 EAST 12TH STREET SITE (Continued) **S131764055**

neighborhood). The neighboring properties are currently used for a combination of commercial and residential uses. Past Use of the Site: Based on a review of reasonably ascertainable historical information, the site was improved with two structures by at least 1903, which consisted of a residential building (188 2nd Avenue) and mixed-use residential and commercial structure (190 2nd Avenue and 300 East 12th Street). The eastern portion of the commercial space, identified as 300 East 12th Street, was noted as a Chinese laundry in 1903. The former buildings were razed in the early 1900s and in 1920, the current mixed-use residential and commercial structure was constructed. Prior to the 1950s, commercial tenants included a caf , a tailor, a hair products store, and a plumbing and heating supply store. From at least 1956 to 1984, a commercial tenant operated 300 East 12th Street as a dry-cleaning facility (R&S Cleaners & Dyers and Leather Master Cleaners & Tailor); the Applicant did not own the site during the term of the tenancy of the dry-cleaning facility. The site ground floor commercial tenant space was occupied by two restaurants from the late 1980s to approximately 2020 and is currently vacant. Site Geology and Hydrogeology: Based upon findings of the subsurface investigations completed, soils encountered below the footprint of the site and Associated Property consist of fill material (brown and gray silt with brick and gravel) to approximately four (4) feet below cellar slab. From approximately 4 to 12 feet below cellar slab, the soil consists of brown and gray silt with clay and trace angular gravel. Drilling refusal was generally encountered between 10 and 12 feet below cellar slab. Bedrock was not encountered during the investigations. Presumed perched groundwater was encountered at depths ranging from approximately 3.5 to 8.5 feet below the cellar slab in the monitoring wells installed at the Site and Associated Property. Based on surveyed groundwater elevations at the Site, groundwater flow at the Site is east-northeast. "

DEC Memo:	2-483036 1/16/2017- DEC Piper spoke with Protest. Leak was a gross dry leak at vent where it entered building. Protest has sent proposal to repair and retest system. Contact information for building is Brookie@skylinecapitalgrp.com DEC Piper sent TTF and PBS registration renewal to Representative. Assigned to DEC Patel for follow up and closure. 02/03/17-Hiralkumar Patel. alternate address: none PBS #: 2-483036. as per PBS record, the site has one (1) 1,500 gal #2 oil AST in contact with soil, in-service, installed in Jan. 1978. PBS expired on 11/16/2015. no other spills found. DEC Piper sent TTF letter to N & S Sassouni on 01/17/17 based on owner's information in PBS record, but property has been sold to 158 First Ave NYC LLC. on 01/22/16. on 01/17/17, DEC Piper emailed letter and PBS application to Ms. Milecki and asked her to renew PBS registration. Brookie Milecki Skyline Capital Group 1404 Coney Island Avenue Brooklyn, NY 11230 Ph. (718) 253-2020 Ext. 210 email: Brookie@skylinecapitalgrp.com 2:22 PM:- left message for Ms. Milecki. 02/06/17-Hiralkumar Patel. 2:55 PM:- received message from Sassan Sassouni. 02/07/17-Hiralkumar Patel. 12:47 PM:- spoke with Mr. Sassouni, property owner. he asked to send correspondences to below address. 158 First Ave NYC LLC. **property owner** c/o Sassan Sassouni 1 Sinclair Drive Great Neck, NY 11024 PH. (516) 662-4632 email: sassansassouni@gmail.com 12:51 PM:- spoke with Ms. Milecki. she mentioned that Skyline Capital Group is mortgage broker for the property. she asked to contact Mr. Sassouni regarding tank test failure investigation. 1:47 PM:- sent TTF letter to Mr. Sassouni with correct property owner's name and address. also included copy of PBS application requiring renewal of PBS registration. asked Mr. Sassouni

COMMERCIAL SASSAN SAAOUNI (Continued) **S119030008**

to immediately renew PBS registration and submit tank test failure investigation/spill cleanup report by the end of 03/24/17. letter emailed to Mr. Sassouni. 02/16/17-Hiralkumar Patel. 7:26 AM:- received email from Mr. Sassouni including tank system test result. the tank system was tested tight on 02/15/17 by Rene Lewis. 9:05 AM:- sent email to Mr. Sassouni and asked him to submit complete report as per the letter dated 02/06/17. 03/06/17-Hiralkumar Patel. 9:17 AM:- sent email to Mr. Sassouni and asked him to submit required report. also asked him to provide update on renewal of tank registration. email copied to Rene Lewis. 9:23 AM:- received email from Mr. Sassouni stating that documents were submitted a while ago. 9:24 AM:- spoke with Mr. Sassouni and informed him that documents have not received yet. he will talk to Rene. 04/04/17-Hiralkumar Patel. 11:17 AM:- spoke with Mr. Sassouni and informed him that the department has not received required report yet. asked him to submit report by the end of 04/07/17. 11:22 AM:- left message for Rene. 11:25 AM:- sent email to Mr. Sassouni including copy of letter dated 02/07/17. informed him that the report must be submitted by the end of 04/07/17 or else case will be referred for enforcement. email copied to Rene. 04/06/17-Hiralkumar Patel. 6:34 AM:- received email from Rene including spill closure letter. Rene mentioned that both fill and vent lines were found corroded, but leak was noted in vent line only. he replaced entire vent line and portion of fill line. after repairs, the tank system was tested tight on 02/15/17. case closed based on available information. 11:32 AM:- sent spill closure letter to Mr. Sassouni. letter emailed to Mr. Sassouni, including note to renew PBS registration immediately. email copied to Rene and DEC Leszek.

DEC Memo:	11/30/12- Zhune spoke to Jeff Mckenzey from Advanced Tank. He said the tank failed the test. He does not know who is goimg to do the repair and retest the tank. 3/6/15-David Vega from Eastmond & Son Boiler & Welding Services, Inc. emailed the spill closure report dated March, 6 2015. The letter stated: This is to inform you of the work that was done at 340 East 11th St. Magnum Mgmt. informed us of a failed tank test reported by another company. On January 3, 2013 we isolated oil lines, tested & passed tank tightness test (attached test report)at that time we found the oil vent line leaking at grade. On January 8, 2013 we replaced a 4' section of the vent line at grade. There was no discharge of oil from the vent line. At this time we are requesting that you close the spill. Spill Closed.
Remarks:	test failure. Repair & retest being scheduled.

DEC Memo:	12/11/18-Lin- Wet leak. The tightness test was performed on the tank only. Tank is pumped out and taken out of service. Put on temporary tank. Pending cleanup/investigation. TFF letter sent. 2-303682 5,000 gallon steel tank encased in a concrete vault. In contact with soil. Listed as #6 fuel oil on pbs but is running on #2 according to contractor. RP contact info: Mail@mackedge.com Jay Perilall 917-587-1273 12/13/18 - Lakhani Riteway was retained as the contractor for the case. 01/03/19 - Lakhani Spoke to Riteway Paul who informed that the concrete vault has been removed and tank was emptied and prepared for removal. The tank room is a tight space, so any visual contamination was removed. Samples will be collected once the tank is removed. The tank will not be removed until DOB permits are obtained. 03/07/19 - Lakhani The tank was removed and the concrete floor seems to have maintained its integrity. However as a precaution, DEC Lakhani had Riteway advance test borings a foot below grade to survey the soils since the walls and floor were heavily

EDGE MANAGEMENT LLC (Continued) **S123663772**

stained. Riteway found up to 250 ppm in the soils. 04/22/19 - Lakhani Riteway proceeded to demolish the tank's concrete vaulting and drum up all oil contaminated material underneath. The contamination was contained within the concrete vaulting. A total of 27 drums of contaminated material was generated through the remediation process. All contaminated material was drummed up and the tank was cut up and removed. The concrete floor underneath the tank was scrubbed and washed with bio-degradable degreaser. 200 gallons of liquids was generated from the cleaning of the floors and disposed of in a legal manner. Under the supervision of the NYSDEC, Riteway core drilled to retrieve samples from beneath the concrete at various locations and field screened via PID. Field screened specimen returned exceeded readings. However, due to the narrow space and concern for the foundation, DEC provided authorization to proceed with a new fuel oil tank installation.

Remarks: TEST FAILURE, TANK REMOVAL PENDING

DEC Memo: 6/8/05 - Project transferred to TLGibbons in Central Office, Albany 9/9/05 - Called Buchbinder & Warren Realty Group, Inc., 212-243-6722. Mr Halabov, contact on spill report, no longer with company. Left message. 9/12/05 - Received call from Neil Hellegers, 646-637-9033, who works for Jennifer , managing agent for 31 East 12th St. He will track down paperwork on spill. 10/26/05 - Tried to contact Mr. Hellegers but no longer with company. Julia Fergeson is new manager of building. She wanted copy of spill report so e-mailed her today. 10/31/05 - Received fax from Buchbinder & Warren which includes invoice (dated 5/18/00) from A.L. Eastmond for removal of old 5,000

31 E 12TH ST (Continued) **S104620865**

gal fuel oil tank and replace with new 7,500 gal fuel oil tank, including certification from the NY Department of Buildings, dated 6/7/00. Close spill.

Remarks: spill at this residence last week - spill taken care of then but tank was found today to have a hole in it - no further spilled product - tank was empty - air was introduced into tank to determine location of leak

DEC Memo:	10/21/2015: Rashad Duty Desk Called pro test and spoke to Victoria, she said it was a dry leak and no product was lost. The owner will be fixing tank and have it retested, she will be emailing me tank reports. 503-511 Broadway has alternate addresses of 503 Broadway and 74-82 Mercer Street. According to PBS# 2-611955 there is a 5,000 gallon #2 fuel oil AST with no last test date or next test date. There is a previous spill#9914496 at 511 Broadway that was closed in 2004 under Jane O'Connell, it was a con Ed spill that has 2.5 gallons of unknown oil into 20 gallons of water in service box in front of 511 Broadway, lab results indicated PCBs at less than 1 ppm. 10/30/2015: Rashad Victoria emailed tank test failure document: As per your request, I am attaching a copy of the failing test report for 503-511 Broadway. The customer will make arrangements for the repairs and then plans to have us conduct the retest. It has been uploaded to D2. Tightness test indicates a 5000 gallon tank with a dry leak (specifies gross dry leak in vent pipe). I responded: Thank you for the update. 11/17/2015: Rashad Received Email from Harvey Fung (hfung@hsrcorp.com) on 11/16: Please find close out letter and report attached for PBS#2-611955 #001, Spill#1507638. If you have any question please feel free to contact me .Thanks! Attached in email was passing tightness test on tank and system conducted on 11/10/2015 by Pro Test Environmental. Also attached in email is request for closure letter which included repairs made: installed 50 LF of 2 inch vent lines and installed a 2x2 vent alarm. Both documents have been uploaded to D2. Emailed Harvey: Attached is a standardized letter closing out spill# 1507638 for 503-511 Broadway. Please let me know if you have any questions. Closure letter has been uploaded to D2. Case will be closed due to repairs made on tank, passing tightness test, and aboveground tank.

DEC Memo:	9/25/07 bf: Called Michel de Konkoly Thege 212-477-5316. Left message to return my call. Sent ttf letter to: Michel de Konkoly Little Red School House 40 Charlton St. New York, NY 10014 9/28/07 Received message from Mr. Thege on 9/25/07. They have apptointment with contractor to have tank emtied and find source of failure on 10/5/07. He left his number which is same as above. His extension is 319. bf 11/16/07- Piper spoke w. Jason at Langan to perform borings through tank and undersidewalk. The will keep Dept in Loop. The school plans on converting to gas. 3/15/08- DEC Piper met contractors onsite to complete remainder of tank cleaning and sampling. odors were not present in hallways untill adjacent to work area. The school will be closed for the week and sampling will be performed and then the tank will be slurried. 5/29/08- DECPiper- I recieved and reviewed ust and spill closure report. Tank was cleaned and two enpoints were taken through tank bottom. No visible evidence of cont was discovered and laba analytical showed no exceedances. Tank was then slurried. Based on work to date, NFA granted. closed. See e-docs if warranted.
Remarks:	it was a dry portion leak;

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 7/24/2003-Vought-Conroy Environmental Consultants-631-423-1240 received NFA Request results dated April 30, 2003. Tank repair work included pumping existing fuel from tank, cleaning the tank interior and resealing tank manway. The tank ONLY passed the tightness test after repairs were made (tighness test results provided). Vent and fill line did not pass the test and as a result the fill line was immediately sealed an are scheduled to be replaced. FOr spill closure NYSDEC requires 1)Site Plan 2)borings or endpoints to investigate possiblity of fill pipe impact to subsurface. 1/7/04-Vought-Spill transferred from Vought to Austin. 01/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 11/28/05- DEC Piper sent out

LITTLE RED SCHOOL HOUSE (Continued) **S105997591**

another ttf letter in regards to fill and vent line failure to Michele Dekonkoly Thege at 272 6th Ave, NY, NY. Daphne no longer w/ little red school house. 12/28/05- DEC Piper has spoke w/ Steve Russo, rep for Little Red School house. regarding borings. He will look into it. 5/5/06- DEC Piper has left message w/ Steve Russo, rep for Little Red School house. regarding borings, requesting callback and info. 5/11/06- DEC Piper spoke w. Steve. A visit is scheduled for 5/15 at 3:30pm. 5/15/06- DEC Piper responded to site to determine additional work. The 2 x 2 vault to the manway of an UST contained contaminated soil. Once opened the vault eminated vapors. Trap door was sealed with duct tape to prevent vapors intruding into basement classrooms. There is no such evidence that any soil was removed when the fill line was replaced (manifests, analytical , not mentioned in report. DEC instructed LRSH to remediate top of tank and perform borings along fill line. CSL letter sent. 6/6/06- DEC Piper left maessage for John at langan requesting callback. Returning his call. 6/30/06- DEC Piper met w/ John Garvis of Langan and Hydrotech technicians. Contaminated Soil was excavated around manway with a shop vac approx, five gallons. Soil was clean under surface oil staining. Top of tank exposed w/ no indication of overfill to subsurface. Some concrete existed. Hydro tech to epoxy seal manway (2 coats) and concrete around manway. Fill and vent were replaced. No oil staining observed on old fill line entering basement. Closed. See e-docs if warranted.

Remarks: TANK TO BE INSPECTED AND RETESTED.

DEC Memo:	11/15/2005: Lead transferred to Joe White as part of the Spill Initiative Project. 12/08/2005: Mr. James Merlo, the coordinator for NYC School spills, called Joe White to indicate that the tank has been retested and passed. These passing results will be sent to the DEC for closure of failed tank test. 12/19/2005: Joe White received information from James Merlo documenting a subsequent tank test passing on 7/13/2005 and a certification printed on 12/9/2005. Tank number 2 at this location has been administratively closed. The PBS # associated with this location is 2-478318. This documentation is sufficient for closing the spill.

DEC Memo:	10/03/13-Zhune spoke to Donna from ABC tank. She indicated they performed a tightness test to the tank and failed the test with a dry leak. They can not say if there is oil spill because the tank is

APT BUILDING (Continued) **S114561765**

vaulted and they can not see the bottom of the tank. She sent the proposal to the owner to do the isolation test. A tightness test was performed on (1) 2,000 gallon tank located at the above referenced address. The tank did not pass the test. Spill # 1306972 was assigned. ABC Tank pumped out all product from the interior of the tank. The interior of the tank was cleaned. All lines were disconnected from the top of the tank to isolate the tank from the system. A pressure test was performed on the isolated tank. The tank did not hold the pressure. A visual inspection was performed on the interior of the tank. The top of the tank had numerous holes and the steel on top of the tank was in poor condition. ABC Tank obtained (3) soil samples along the bottom of the tank. Resluts indicated low level VOCs below CP-51 standards. SVOCs were observed slightly above. Possible due to fill material. 4//11/14- DEC Piper reviewed documentaiton of tank removal done by Don Carlo Env. Based on samples and removal of 2K AST, this spill is closed. Will notify ABC Tank to u[pdate status in PBS program.

DEC Memo:	8/04/2015: Rashad Spill transferred from Sangesland to Rashad as per RSE. As per NYC building records 65 Greene Street has alternate address of 65-65 Greene Street. Searched PBS and spills database, no other records found for property. 8/06/2015: Rashad No documents found in D2. Owners information: 67-65 Greene Street, LLC 349 West 37th Street New York, NY 10018 8/10/2015: Rashad Spoke to Marisol at Petroleum Tank Cleaners she indicated that she will send us any relevant documentation that she can find. Also spoke to Mark Salamack, he indiacted he would look into this site. Email to Mark: I am currently reviewing spill reports under Jeff s temporary supervision for 1712 Second Avenue, Manhattan NY spill #1203598 as well as 65 Greene Street, Manhattan NY spill#1203271. I would like to request the following information if possible for each site: Copy of failed tank test report. Supply/return and vent/fill test results. Current property owner and contact information. 8/11/2015: Rashad Mark replied to email: I have been in touch with Petroleum's office ..I know they have the information on the 65 Greene Street job...we tested a 1080 gallon tank and it failed...they never authorized us to continue with any other work...I can get the owner's contact information for you when I get back from vacation. On the 2nd Avenue job, they are having trouble finding the information on the job...do you have a date for it?. I responded The 1712 Second Ave spill was recorded on 7/13/2012. I appreciate your help. Marisol has indicated she will fax relevant information. 8/13/2015: Rashad Marisol faxed documents on 8/11/2015 - 3:08 pm. Failed tank test report indicates ullage (dry) portion leak. Document uploaded to D2. 8/17/2015: Rashad Mark Salamck emailed: Omar...the owner's contact info for 65 Greene Street: Makkos Equities 349 West 37th Street NY, NY10018 Ph# 212 736-8700 Thomas Makkos is owner per DOB job filling records email is thomasmakkos@aol.com 9/4/2015: Rashad Sent TTF letter to Makkos Equities. Letter uploaded to D2. 9/17/2015: Rashad Received letter from William Castoro, property manager for 65 Greene Street with Tank Abandonment Affidavit. Letter and affidavit have been uploaded to D2. 12/17/2015: Rashad Based on discussion with Tim due to tank closure affidavit and dry leak specified by ttf report which also indicates that tank was almost full, having 800 gallons in 1080 gallon tank case will be closed.

Updated By:	SMQUANDT

Site Description: "Location: The 0.15-acre site fronts the south side of Howard Street. Mercer Street is to the west to the site and Canal Street is to the south of the site. Site Features: The site is currently occupied by a five-story mixed use (18 apartment units and a retail store) building with a basement. The site is surrounded by mixed-use residential and commercial buildings. Current Zoning and Land Use: The site is zoned M1-5B, which is primarily light industrial use. Past Use of the Site: The existing five-story building was built in 1894 and was used for commercial and industrial purposes exclusively until 2011, when the upper 4 floors were converted to residential use. Former commercial/industrial uses include dress manufacture, brass and copper company, metal products manufacturing, radio panel manufacturing, and plastics companies. The site had one 3,000-gallon aboveground heating oil tank that had been located in a vault under the adjacent sidewalk. The tank was removed in June 2019 (PBS No. 2-607038). Site Geology and Hydrogeology: The site is underlain by

53 HOWARD STREET (Continued) **S127478109**

fill, sand and silt extending to the groundwater interface which is approximately 2.5 feet below the basement slab. Local groundwater generally flows west towards the Hudson River, which is located approximately 0.5 miles from the site."

Env Problem: "Nature and Extent of Contamination: A 3,000-gallon above ground storage tank (AST) and associated contaminated material were removed from an off-site, concrete vault beneath the sidewalk along Howard Street in June 2019. Subsequent to the tank removal activities, soil, groundwater and soil-vapor investigations were conducted at the site and under the vault. Soil Petroleum-related VOCs were identified in soil samples from borings in and around the tank location at the groundwater interface, including toluene at 1.4 parts per million (ppm) compared to the protection of groundwater soil cleanup objective (PGSCO) of 0.7 ppm, ethylbenzene at 1.8 ppm (PGSCO is 1 ppm), xylene at 29 ppm (PGSCO is 1.6 ppm), 1,2,4-trimethybenzene (TMB) at 44 ppm (PGSCO is 3.6 ppm), and 1,3,5-TMB at 12 ppm (PGSCO is 8.4 ppm. Chlorinated VOCs were detected, including tetrachloroethene (PCE), at a maximum concentration of 0.091 ppm, which is below the PGSCO of 1.3 ppm. Groundwater Two separate groundwater sampling events were conducted in 2019 and 2020. PCE was detected in three of the four wells with an elevated concentration in one off-site well under the AST vault The data show a significant decrease in the PCE concentration of 3,100 parts per million (ppm) November 2019 and 120 ppm in January 2020. The data and present and past uses of the site show no indication that the PCE in groundwater can be attributed to the site. Sub-slab soil vapor and indoor air A soil vapor intrusion investigation was conducted in March 2021. Within the building footprint, the investigation found no indoor air nor sub-slab vapor contaminant concentrations that would require either mitigation measures or continued monitoring as per the NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York (revised 2017). The highest concentration of PCE detected in indoor air was 0.617 micrograms per cubic meter (ug/M3) and 25 ug/M3 in sub-slab vapor. The PCE and trichloroethene detected beneath the off-site vault beneath the sidewalk do not pose a health concern. "

DEC Memo:	3/13/20 - Kim - Desk Duty - Spoke to Paul with Langan. The construction site spans the full city block; construction started 1.5 months ago; it is a NYC DEP E-Designated site. Langan previously did an investigation in accordance with their Remedial Action Plan for OER. Langan encountered odor, elevated PID readings, and signs of contaminated soil in the south east corner of the site. To date lab analysis results for all collected soil samples indicated there were no exceedances of NYSDEC Soil Cleanup Objectives for unrestricted use. Secant piles are being drilled, depending on the rock encountered, 50 to 100 ft below grade and 4 ft in diameter. Construction plans are to excavate the entire city block 50 ft below grade. The Remedial Action Plan calls for excavating 20 ft below sidewalk grade. Langan has discovered petroleum impacts limited to 20-30 ft below grade. Soil removed from the excavation are then subject to confirmation soil sampling before disposal. There are likely to be additional soil samples that will have to be collected. TSDF Bayshore has been accepting the material. Copies of the Remediation and Waste Characterization reports will be submitted to NYSDEC. Paul also noted that 2 days ago, 3 gals of hydraulic oil spilled onto the soil during construction activities. The spill was immediately cleaned up and impacted soil was removed

FRANK P CARLSON INC (Continued) **1000316660**

and placed on plastic sheeting for disposal. Paul was advised that this separate hydraulic oil
spill should have been reported to NYSDEC as a separate spill, in accordance with spill reporting
criteria requiring all spills that have or will reach the State's water or any land to be called
in. Originally from Spill 1911566 - Hydraulic oil spilled from a rig during SOE excavation. Spill
Case 1911566 is being consolidated with this spill: 3/18/20 - Obligado - Desk Duty - On-going
construction site. During SOE excavation, a rig leaked hydraulic oil. Spill pads put down. Will
excavate and segregate impacted soil. Once they move the rig, they will reassess soil conditions.
There is existing spill number 1911441 for the site managed by Eric Kim. This new spill assigned to
Eric Kim as well. 5/1/20 - Kim - Spill Cases 1911566 and 2000637 were consolidated with this spill.
1911566: hydraulic oil spilled from a rig during SOE excavation. 2000637: less than a gallon of
hydraulic oil was spilled. Updates provided below. 5/6/20 - Kim - Performed a site visit at 9:30AM
and met with Eirene Pavlakis with Langan. Confirmed that impacted soil stockpiles, from drilling
spoils and hydraulic fluid spills, were covered with polyethylene sheeting. 6/5/20 - Kim - Spill
case 2001642 was administratively closed and consolidated with this Spill Case 1911441. I received
the following via email from Elizabeth Adkins with Langan: On Wednesday afternoon at the Project
Galaxy construction site (137 Varick Street, Manhattan, NY), a hydraulic line of an excavator broke
during excavation in the southeastern part of the site. About 2 gallons of hydraulic fluid were
released from the excavator and impacted about 1 cubic yard of underlying soil/fill. Excavation
stopped and the spilled fluid was cleaned up within 3 hours of the spill. About 1 cubic yard of
hydraulic fluid impacted soil was excavated from the spill area and was temporarily stockpiled on
top of polyethylene sheeting in the south-central part of the site in preparation for future
off-site disposal with like hydraulic fluid-impacted material. 6/19/20 - Kim - Adkins with Langan
sent an email stating: The about ~14 cubic yard stockpile of hydraulic fluid-impacted soil
(SP061120B) associated with NYSDEC Spill No. 1911566 at Project Galaxy (137 Varick Street) is
proposed for off-site disposal to the Phase III Environmental/Former Zinc facility in Palmerton, PA
on Monday, June 22nd. An updated facility approval letter and sample analytical results were
uploaded to EPIC for your records. 7/14/20 - Kim - Spill 2002857 was consolidated with this spill.
Adkins with Langan : 2 gallons of hydraulic fluid spilled when a hydraulic line broke during
excavation at the 137 Varick Street site this morning. About 1-2 cubic

FRANK P CARLSON INC (Continued) **1000316660**

yards of underlying soil
will be excavated and stockpiled on top of polyethylene sheeting pending future off-site disposal.
8/21/20 - Kim - Documentation for this site have been uploaded to NYCOER's EPIC website. 9/1/20 -
Kim - Spill 2004258 was consolidated with this spill. 9/24/20 - Kim -
On 9/16, I received Spill
Closure Documentation from Adkins with Langan via email. Spill closure documentation associated
with hydraulic fluid releases from the Project Galaxy site, previously being managed under closed
Spill No. 1911566, can be downloaded from the below link. Documentation is provided for the
hydraulic fluid related spills currently being tracked under Spill No. 1911441. Following the full
removal of petroleum-impacted soil from below the groundwater table in the southeastern part of the
site, additional spill closure documentation will be provided to facilitate closure of Spill No.
1911441. Please note that the stockpile of hydraulic fluid-impacted soil from July 15, 2020 was
disposed off-site on July 29, 2020 to the Bayshore Soil Management facility with soil from waste
characterization grid WC18. Daily field reports, sample analytical results, disposal facility
permits, and disposal facility-signed manifests and scale tickets associated with the soil removal
are provided in the disposal package. All 31 facility-signed manifests and scale tickets for
material shipped to Bayshore on July 29, 2020 are included in the package for your records. 2/5/21
- Sekhon Spill 2009239 Due to equipment failure, an excavator leaked approximately 5 gallons of
hydraulic fluid on to the underlying soil and some pooled rainwater/snowmelt. Absorbent pads have
been applied to the surface of the water, and the contractor is in the process of excavating the
surficial soil that came into contact with the hydraulic fluid and stockpiling the material on top
of polyethylene sheeting for future off-site disposal. Once the impacted soil has been excavated
from the spill area, Contractor will screen the underlying soil for visual, olfactory, and
photoionization detector (PID) evidence of contamination to verify that impacted material has been
removed. This spill combined with Spill# 1911441. Following remediation of this Spill, Langan will
compile all spill-related manifests and provide project manager (Eric Kim) with a copy of the
confirmation endpoint samples to close this spill. Case discussed with DEC Kim & combined with
Spill # 1911441. 2/9/21 - Kim - I received a copy of approval letter from Bayshore Soil Management
in Keasbey, NJ to accept the hydraulic fluid-impacted soil (WC17 -20 to -30) for off-site disposal.
The daily field report from Langan for 2/6/2021 contained details on the spill and cleanup

FRANK P CARLSON INC (Continued) **1000316660**

information, and was available on EPIC. Langan stated that the contractor planned to dispose of the impacted material later this week. 11/16/21 - Kim - On 11/11/21, I received the Spill Closure Package prepared by Langan. The Spill Closure Package included daily field reports, off-site disposal documentation, and lab analysis reports for endpoint soil samples. Langan Daily Field Reports provide details on: discovery of petroleum impacted soil; hydraulic oil spills and cleanup activities; management, location, and on-site movement of impacted soil stockpiles; and off-site disposal of impacted soil. Langan Daily Field Reports: 2020-02-18,22,25, 03-02,12, 05-13,18,20,26,27,29, 06-01,02,03,04,05,06,08,09,10,17,18,23: Foundation contractor advanced secant piles and encountered petroleum-impacted soil; drilling spoils were stockpiled on polyethylene sheeting. 2020-07-31, 08-05,10: During excavation activities, petroleum-impacted soil was discovered and stockpiled on polyethylene sheeting. 2020-03-16, 05-22, 06-01: Soil sample collected from stockpile of secant spoils... 2020-05-28: 160 yards of non-hazardous, petroleum-impacted soil/fill was removed from the site and transported to TSDF Bayshore Soil Management in Keasbey, NJ. 2020-06-10: 17 truckloads of non-hazardous, petroleum-impacted soil was PID-screened, removed from the site, and transported to Kingsland Landfill Closure Project in Lyndhurst, NJ. 2020-06-23: 7 truckloads of non-hazardous, petroleum-impacted soil was PID-screened, removed from the site, and transported to Kingsland Landfill Closure Project in Lyndhurst, NJ. 2020-07-01: 11 truckloads of non-hazardous, petroleum-impacted soil was PID-screened, removed from the site, and transported to Kingsland Landfill Closure Project in Lyndhurst, NJ. 2020-03-12, 06-03, 2021-02-06: Hydraulic fluid spilled during construction activities had to be cleaned up; hydraulic oil impacted soil was stockpiled on polyethylene sheeting. 2021-02-23: 1 truckload of non-hazardous, hydraulic oil impacted soil/fill was removed from the site and transported to TSDF Bayshore Soil Management in Keasbey, NJ... Lab analysis results for endpoint soil samples indicated that CP-51 List VOCs and SVOCs were below NYSDEC Part 375 Unrestricted Use SCOs. Spill Closure Package was uploaded to DecDocs. Spill case closed.

DEC Memo: 8/11/20- DEC Piper- An about 2.5-foot-long and 16-inch-diameter (about 30-gallon) oil storage tank was encountered during excavation within the layer of concrete and demolition debris (C&D) above the former cellar slab in the west-central part of the Project Galaxy site (waste characterization grid WC04) on Thursday, August 6th. Soil surrounding the oil storage tank exhibited petroleum-like odors and PID readings of 0.0 parts per million (ppm). The oil storage tank and a connected fuel line also exhibited petroleum-like odors and a max PID reading of 0.0 ppm. The oil storage tank and surrounding impacted soil was excavated and stockpiled on top of polyethylene sheeting in the northeastern part of the site on Friday, August 7th pending future characterization and off-site disposal. The surrounding non-impacted C&D material in waste characterization grid WC04 (above the former cellar slab) has not yet been characterized for off-site disposal as of yet, and will be sampled in accordance with disposal facility criteria in the coming weeks. The tank will be cleaned and removed from the site, and petroleum-impacted soil will be sampled for off-site disposal. Case assigned to DEC Kim as he is familiar with site. 9/1/20 - Kim - Petroleum product spills, which includes hydraulic oil spills, at this site have occurred and been discovered during this remediation and construction project. This spill case is closed and is being consolidated under Spill 1911441.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	8/20/20 As discussed, the 55 Suffolk Street Site is in the NYSDEC Brownfield Cleanup Program, Site No. C231137. During excavation on Thursday 8/20/20 an historical 275-gallon tank was discovered. No petroleum impacts were observed or detected in the soil surrounding the tank and the tank was left in place for future removal. The case managers are Meghan Medwid (Meghan.Medwid@dec.ny.gov, 518-402-8610) and Heidi Dudek (heidi.dudek@dec.ny.gov, 518-402-0193). Heidi instructed me to report the tank to the Spills program Spill remediated as part of Brownfield Cleanup Program. Certificate of Completion granted for site 12/21/2022.
Remarks:	tank was found during excavation buried underground, tank empty and no impacts detected in the soil around the tank. Project is the Broome St Parking Lot Site #C231137; Meghan Medwid is the project manager who wanted a spill number for tracking purposes.

Updated By:	MJCRUDEN

Site Description: "Location: The 25,000 square foot (0.57 acre) site is located at 462 Hudson Street in the Borough of Manhattan in an urban area. The site is bordered by Hudson Street to the west, Barrow Street to the north, one and two-family brownstones to the east, and by Morton Street to the south. Site Features: The site is occupied by two 6-story apartment buildings with commercial uses on the first floor along Hudson St. The dry cleaner occupies the northwest corner of the first floor of the northern building. Current Zoning/Use(s): The site is zoned as C1-6/R6 for commercial and residential uses. Historical Use(s): The on-site building was constructed in 1925. A dry cleaner has operated at the site since at least 1986. The site is a RCRA large quantity generator (EPA ID # NYD981141948) of spent solvent, waste code F002. A monitoring well installed in Hudson Street, directly to the west of the dry cleaner during an evaluation of 75

HUDSON KIM'S CLEANERS (Continued) **S110246833**

Morton St by NYCSCA yielded a gw sample containing 2,900 ug/l PCE. Site Topography, Geology and Hydrogeology: The Site is generally level and is at an elevation of approximately 36 feet above mean sea level. The geology of New York County consists of unconsolidated glacial deposits overlying crystalline bedrock. Soil cores collected during investigation on a nearby site generally consisted of historic fill material containing brown sand and silt with fine gravel and brick fragments to a depth of 8 to 15 feet below ground surface (bgs). The Site is located 1300 feet east of the Hudson River. Groundwater in the vicinity of the site was encountered at approximately 27 feet bgs and is expected to flow to the west towards the Hudson River."

Env Problem: "Nature and Extent of Contamination: Information is based on the results of a site characterization investigation performed at the nearby property at 75 Morton Street by the NYC School Construction Authority. That investigation was triggered by the discovery of elevated levels of cVOCs in groundwater on that site. The subsequent Supplemental Site Investigation (SSI) indicated that elevated concentrations of cVOCs (namely PCE) existed along the adjacent sidewalk on the eastern side of Hudson Street. The SSI ascertained that the 75 Morton Street site was not a source of the contamination. Eleven temporary groundwater wells were installed on and upgradient from the Morton Street property and samples were collected for lab analysis. One well was installed immediately in front of and downgradient from the Hudson Cleaners site. Groundwater: Tetrachloroethylene (PCE) was detected at elevated concentrations in groundwater samples taken immediately in front of the Hudson Cleaners site. PCE was detected at a concentration of 2900 ppb at that location, with concentrations decreasing in the downgradient direction consistent with the inferred contaminant plume. The groundwater flow direction was confirmed to be from east to west based on surveyed groundwater elevation measurements collected during the 75 Morton St. SSI. Building owners' contractor completed Phase II scope of work at and around Hudson Dry Cleaners in the fall of 2016. The groundwater sample taken in front of this site had only 2.1 ppb PCE, versus 2900 ppb in May 2013. Soil Vapor & Indoor Air: The RP s consultant mobilized to the site on 27 November 2017 to collected six collocated sub-slab and indoor air samples (IA-01/SV-01 through IA-06/SV-06) and one ambient air sample (OA-01). According to the NYSDOH SVI Guidance Matrix the response actions for samples IA-01/SV-01 (1200 / 1300 ug/m3 PCE)and IA-02/SV-02 (120 / 140 ug/m3 PCE)are Mitigate . The Mitigate response action at these locations was triggered by the presence of PCE in the indoor air and soil vapor. Sample set IA-01/SV-01 was collected from the basement of Hudson Cleaners, and sample set IA-02/SV-02 was collected from just east Hudson Cleaners footprint. Significant Threat: Evaluation of significant threat will be made following completion of the Site Characterization."

Health Problem: "Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion sampling identified impacts in indoor air quality in one portion of the on-site building that represents a health concern. Further, environmental sampling is necessary to determine if soil vapor intrusion is a concern for off-site buildings."

DEC Memo:	3/21/17 TJD Teleconference with Patrick Farnham (212.479.5578) of Langan Engineering. He states that during site work at this redevelopment site a previously unknown 550 UST was encountered. An estimated 5 gallons of unknown petroleum was discharged to surrounding soils. The tank was secured and is scheduled for pump out on 3/22/17 by Brookside Environmental. Patrick states that this is a NYC VCP site being managed by NYC OER. DeMeo requested a short summary including OER site info. email received from Patrick with following information: Thank you for the follow-up call earlier. I have copied NYCOER Project Manager Amanda Duchesne on this email. As discussed, the following occurred during foundation construction today at the 111 Leroy Street site (OER Project Number 16RHA105M - NYC VCP Project Number 16CVCP027M) [http://www.nyc.gov/html/oer/html/repository/RManhattan.shtml]: At about 2:30 pm, a 550-gallon previously unknown underground storage tank (UST) filled with an unknown petroleum product was

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

encountered during excavation at about 10 feet below grade surface (bgs) near the southern border
of the site As the UST was exposed on the excavation sidewall, it changed position and released
about 5 gallons of liquid onto the surrounding historic fill Langan reported the spill to the
NYSDEC Spills hotline, which assigned it Spill No. 16-11386 The foundation contractor excavated and
stockpiled the impacted historic fill on polyethylene sheeting, without further disturbing the
tank. Tomorrow (3/22/2017), Brookside Environmental will visit the site to pump out the contents of
the UST and move it onto plastic sheeting in preparation for tank cleaning and disposal. Following
additional screening of the former tank area, and any over-excavation (if necessary based on field
screening), Langan will collect documentation soil samples per DER-10. Per your other request, any
NYSDEC letter correspondence concerning this spill can be sent to the property owner s
representative Timothy Eberle at the following address, with Langan on copy: PMG Leroy Street LLC
111 Fifth Avenue, Floor 6 New York, NY 10003 3/22/17 TJD SCL sent to above parties. Spill assigned
to Zhune. Letter uploaded to DECDOCS. 3/23/17-Vought-Copied on email from OER Chawla to Zhune that
Hi Veronica: Above Spill is called on 111 Leroy Street Site. This project already has one open
spill (#15-07406) that was being managed by Santosh. I guess, now you will be managing both of
these spills. Briefly, here is outline of activities on this site:
7/15/2016: update sent to DEC
Santosh RE: remedy for spills 7/19/2016: DEC closure letter Spill No. 06-11866 8/4/2016: DEC RAWP
Approval letter Spill No. 15-07406 (attached) 9/21/2016: NTP e-filed with DOB 10/19/2016:
pre-construction meeting 1/23/2017: Construction Start Factsheet #2 issued. Construction on going
currently. This new spill was called in on discovery of one leaking UST at 10 feet depth.
Contaminated soils from this spill has been excavated and stockpiled at site (waiting removal). See
attached daily reports. All project related documents (including RIR, DEC briefings, DEC approved
RAWP and development plans) were submitted previously to Santosh. You can access all these
documents from our website- EPIC . Amanda (OER Project Manager) will send you invite to EPIC. Site
remedy includes: Track 4 Excavation from 12 to 15 feet depths; Vapor Barrier Six SSDS systems, one
for each building Concrete slab. Please call me or Amanda for additional info. Thanks. Vought
repled to OER Chawla with cc to OER Duchesne, OER Walsh, DEC Zhune/Piper/Lakhani that Shaminder, I
read the below email and the note that two different spills at the same site were being managed by
two different Project Managers which of course struck me as possibly

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

quite inefficient. After
looking up the DEC Remarks for both spills, I noted that Ryan and Veronica had not made any entries
and as such have not taken any significant actions to date, assumedly as they both have upwards of
150 projects in their names. As such I am going to reassign both Spills to Pratik Lakhani, who has
a much lower caseload as he is new to the agency, so that he may review the above attachments as
well as handle both cases. Pratik review the reports, discuss the spills with me, and may also
consider administratively closing and consolidating the spill numbers to that there is only one
Spill Number for the site. We will certainly keep you and Amanda posted. Thanks! Spill reassigned
from Zhune to Lakhani by Vought. 04/06/17 - Lakhani 111 Leroy Street is an OER site. The Site is
identified as Lots 55, 83, and 85 of Block 602 in the West Village of Manhattan. The most recent
use of the Site is used as a an open-air parking lot with a one-story vacant slab-on-grade
building, which was demolished in March 2016 on Lot 55 and a two-story vacant slab-on-grade
building, which was demolished on April 2016 on Lot 85. Redevelopment plans of the Site involve
building five (5) 3-5 story townhouses and one (1) 10-story tower. The townhouses will be
single-family residential buildings each with their own cellar which includes a one (1) car garage.
Four of the five townhouses will also have sunken terraces. The tower will have a grade-level rear
yard and a cellar. Townhouse and tower cellars are anticipated to be used for parking, storage,
pool, mechanical equipment, and building services. Residential units in the tower will be located
on the first to the tenth floors. There was a 1,500 gallon #2 fuel oil UST on the property which
was removed in April 2016. Recently another 550 gallon UST filled with water and unknown petroleum
product was found and removed. There is potentially another UST on the Site. As part of the RIR,
soil samples and groundwater samples were also taken. Soil samples were taken at a maximum depth of
21 -23 bgs and were returned with some contamination. Groundwater is at a depth of 17 -20 bgs and
was contaminated with PCE and TCE. The soil vapor investigation on the Site detected several
gasoline and chlorinated compounds: 1,2,4-trimethylbenzene 14 ug/m3(SV01), benzene 13 ug/m3(SV01),
ethylbenzene 25 ug/m3(SV01), methylene chloride 69 ug/m3(SV01), o-xylene 27 ug/m3(SV01), p/m-xylene
75 ug/m3(SV01), toluene 28 ug/m3(SV01), trichlorofluoromethane 110 ug/m3(SV01),
1,2,4-trimethylbenzene 11 ug/m3(SV02), benzene 16 ug/m3(SV02), ethylbenzene 9.5 ug/m3(SV02),
o-xylene 12 ug/m3(SV02), p/m-xylene 32 ug/m3(SV02), toluene 45 ug/m3(SV02), 1,2,4-trimethylbenzene

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

23 ug/m3(SV03), 1,3,5-trimethylbenzene 6.7 ug/m3(SV03), ethylbenzene 11 ug/m3(SV03), o-xylene 17 ug/m3(SV03), p/m-xylene 43 ug/m3(SV03), PCE 45 ug/m3(SV03), toluene 42 ug/m3(SV03), TCE 230 ug/m3(SV03), 1,2,4-trimethylbenzene 18 ug/m3(SV04), 1,3,5-trimethylbenzene 5.1 ug/m3(SV04), ethylbenzene 0.8 ug/m3(SV04), o-xylene 12 ug/m3(SV04), p/m-xylene 29 ug/m3(SV04), PCE 76 ug/m3(SV04), TCE 86 ug/m3(SV04), 1,2,4-trimethylbenzene 23 ug/m3(SV05), ethylbenzene 11 ug/m3(SV05), o-xylene 18 ug/m3(SV05), p/m-xylene 44 ug/m3(SV05), PCE 150 ug/m3(SV05), toluene 42 ug/m3(SV05), TCE 460 ug/m3(SV05). From these findings, it was expected that an SMDS and vapor barrier system will be required for the proposed site redevelopment. The elevated soil vapors led the consultant, Langan, to develop plans to install six (6) active sub-membrane depressurization (SMD) systems at the Site along with a vapor barrier. The maximum TCE and PCE concentrations are 460 ug/m3 and 150 ug/m3 respectively. The DOH soil vapor/indoor air matrices call for mitigation for the TCE and either no further action needed or reasonable & practical action needed for the PCE, depending on the indoor air concentrations. The above information was emailed to NYSDOH Nathan Walz for his review of the sub-membrane depressurization system on 03/24/17. Nathan responded with the following email: After reviewing the documents I agree that sub-slab depressurization systems (SSDSs) will effectively mitigate the potential for soil vapor intrusion to occur. A Soil Vapor Intrusion (SVI) work plan will need to be submitted and accepted by the Departments, and depending on the SVI test results, if the SSDSs are made active they will need to be in finished in accordance with ASTM E2121 as well as the EPA guidance. The effectiveness of these systems needs to be verified through pressure differential testing, ports should be installed in all the development locations (see figure). Also, installation of SSDS Exhaust Vent Piping Twelve (12) Inches Above Roof and Ten (10) Feet Away from Openings/Windows/HVAC Intakes/HVAC Supply Lines. Nathan was also concerned about the Engineering Controls for the site because the RAWP stated that prior to installation of the active blowers and after installation of the building cores and shells, soil vapor indoor air sampling will be completed to determine if the system can be converted to a passive system. The decision to convert to a passive system, based on the sample results, will be made in coordination with the OER. A 550 gallon UST was discovered the week of 03/20 - 03/24. The UST was filled with an unknown oil and water. The contents of the tank were spilled and all contaminated soils were excavated and endpoints samples were taken and

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

are being analyzed. As for
the tank, DEC Lakhani informed OER PM Amanda Duchesne that the tank must be registered with PBS and
that the consultant must submit: 1) a tank affidavit after the tank is removed, 2) the deed proving
that the owner owns the property, and 3) the PBS registration application. 04/10/17 - Lakhani Spill
Closure Letter (Langan, 04/10/17) - A previously unknown 550-gallon UST filled with a mixture of
water and an unknown petroleum product was encountered on 03/21/17 during foundation excavation at
about 10’bg near the southern site border. About 5 gallons of oil water was released onto the
surrounding historic fill as the UST was exposed on the excavation sidewall. The foundation
contractor immediately excavated and stockpiled about 5 cu. yds. of petroleum -impacted historic
fill on plastic sheeting for disposal. Langan screened the tank grave and spill area with PID and
did not observe evidence of residual petroleum impacts. Groundwater was not observed within the
excavation. Brookside Environmental used a vacuum truck to remove about 467 gallons of oil water
from the UST. Langan collected six (6) UST endpoint soil samples from the sidewalls and bottom (4
sidewalls and 2 bottom) of the former tank grave and spill area. Soil analytical results indicated
no VOCs or SVOCs concentrations exceeding the CP-51 SCOs. Report uploaded to D2. DEC Lakhani asked
to be provided a site map with endpoint locations before the spill can be closed. 04/14/17 -
Lakhani Langan Patrick Farnham sent an email wit the endpoint samples locations attached. All the
endpoint samples were collected around 12’bg. Development excavation is continuing, and this area
will be further excavated to a final depth of between 13’ and 15’bg as part of the foundation
installation for Townhouse #3. Endpoint sample locations were uploaded to D2. Spill is closed.
06/05/19 - Lakhani Langan Elizabeth Adkins informed of the plans to abandon the 10,000 gallon UST
in-place due to the proximity of the UST to the Morton Street sidewalk and adjacent buildings. The
SOE required for removal of the UST is extensive and there are structural concerns with undermining
the adjacent buildings. DEC approved the plan to abandon the tank in-place. Residual contents were
removed from the UST via vacuum truck on 04/25/19. The abandonment-in-place approach would include
exposing the top of the UST, removing the fill and vent lines, and cutting holes cut in the tank
bottom to allow for soil screening and sampling beneath the tank. The tank was opened and a layer
of cement was discovered lining the inside. Langan drilled through the lining and tank and
collected three (3) bottom samples and sidewall samples. DEC authorized Langan to fill the tank

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

with cement. PID readings of the soil beneath the tank and sidewalls were between 15 ppm and 16
ppm. DEC Requires: 1) Soil Vapor Intrusion (SVI) work plan depending on the SVI test results 2) SMD
pressure differential testing

Remarks: hit tank during excavation and spill to soil - cleanup in progress

DEC Memo: spill was caused by ConEd and is being cleaned up by them. 204253. see eDocs. 4/13/07: Spill submitted for closure by Con Ed. Request denied, with comment: Was repair made to damaged fill line? Was contractor that installed vault working for Con Ed? (JHO) 5/15/07: spill submitted for closure by Con Ed. Response to above comment was: Safeway Construction Enterprises was working directly for Con Edison. Safeway repaired the oil fill line. Safeway also conducted the clean up and disposed of the non-haz oily debris. Request for closure denied, with comment: Following completion of repairs to fill line, a NYSDEC-approved precision test is required to confirm repair was successful. Was testing performed? What test method was used? (JHO) 12/19/07: e-mail from Con Ed (Brian Bellows) regarding testing of the line: As mentioned, there is no access to the tank system for line testing. In addition, approval from the property owner will be needed for work on their tank as mentioned below. Any guidance in resolving this issue would be appreciated. Attached to Con Ed (Bellows) e-mail was an e-mail from Con Ed's contractor (Robert M. Laga of The Franklin Company Contractors, Inc.), which states: Based upon my inspection, there is a buried tank located under the building. The tank has a fill line, vent line, suction and return. The only access to the tank is through a 24 x24 manhole to a round man-way cover, I noticed a few bolts missing in the cover. The cover has no openings on it to access the tank. The size of the tank is questionable. Testing the tank through approved methods by the DEC/EPA is not possible because there is no access to the tank. In the event you are required to test the tank, the DEC has allowed in the past, to test the tank through the vent line. This test would only be an indication of weather the tank was tight or non-tight. To perform a complete test, the water intrusion portion of the test must be performed. Water intrusion testing does not have to be completed if it can be demonstrated to the DEC that groundwater is well below the bottom of the tank. This could be determined suing a Geo-probe rig for an additional cost. Another option is to have us remove the man-way lid and weld on a 2 or 4 bung. This would allow us to test the tank the conventional method, but would require a few days to prepare and get the tank ready for testing. (JHO) 12/20/07: e-mail to Con Ed (Bellows): Please clarify the sequence of events for me. As I understand it, your contractor disconnected the fill line in order to install the vault. The fill line was re-connected but leaked (?) or did the leak happen during the disconnection period? At what point was the fill line re-connected? (JHO) 12/21/07: e-mail response from Con Ed (Bellows): On January 26, 2007,

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

a spill was cleaned up in the
area where the contractor had removed an oil fill line when constructing a vault. When the oil
company came to make a delivery, the oil leaked into the backfilled excavation. The contractor came
back and excavated soil then made the repairs to the oil fill line they removed. (JHO) 12/21/07:
E-mail to Con Ed (Bellows): Was the initial spill they cleaned up (on Jan 26) a result of the line
being disconnected? (JHO) 12/21/07: e-mail response from Con Ed (Bellows): According to the
inspector, the final clean up was completed on 1-26-07 at 1500 hrs. Clean up was completed by
Safeway construction. The affected 2 yards soil was dug up and replaced with clean soil. 1/16/08:
E-mail from Con Ed (Bellows): Just a quick follow-up on this spill event, I believe you were
checking to see if we would be required to have the entire tank system tested since the tank line
could not be isolated. As mentioned previously the tank system would need to be modified for
testing. Let me know if anything else is needed at this time or if a tank testing determination is
made. E-mail reply to Con Ed (Bellows): I spoke with our PBS staff [Jacob Krimgold], and they said
the line has to be tested. I checked the records for this building, and saw that the tank system
was tested in 2003 using the Horner EZ3 testing method, and is due for another test in June 2008.
Perhaps that method can be used again. (JHO) 10/16/2013 - spill re-assigned to O'Connell; received
closure request from Con Edison via email which includes: At this point in time, the building
located at 111 Leroy Street must be considered abandoned. All utilities (gas, electric, water) has
been shut off. ConEdison has conducted all reasonable Due diligence to gain legal access to 111
Leroy Street in order to conduct a pressure test on the fuel oil tank fill-line. ConEdison believes
that because of the foreclosure situation, 111 Leroy Street will not be occupied in the foreseeable
future. The original one quart spill that was discovered on 26Jan2007@12:05 was cleaned up within 3
hours of discovery...cleanup complete on 26Jan2007@15:00 by Safeway Construction; a ConEdison
approved contractor; all documented within the attached spill report (see PDF). We recommend that
the DEC tag the fuel oil fill port at 111 Leroy Street as 'DO NOT FILL' and place the onus of
pressure-testing the fuel oil tank fill-line onto the future owner(s) thus allowing this spill
incident to be closed via the DEC Spill Data Base. The following Chrono delineates ConEdison's Due
diligence associated with this one quart spill of #2 fuel oil from a leaking elbow at the sidewalk:
26Jan2007, 12:05 A ConEdison Construction Manager (M.Chionchio (18737)) reported that Stuyvesant

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

Fuel Company was at this location delivering home heating fuel and leaked 1 quart of #2 fuel oil to soil. The spill was caused when a loose elbow on the fuel oil line (leading to the basement fuel oil tank) was removed and improperly reinstalled by a ConEdison contractor during the installation of a new sidewalk electrical vault. 26Jan2007, 15:00 The 1 quart spill that was cleaned up within 3 hours...cleanup complete by Safeway Construction; a ConEdison approved contractor. Two cubic yards of oily debris was disposed of as non-haz industrial waste. 10Jun2007 A ConEdison EH&S Project Specialist (Brian Bellows) scheduled the Franklin Company (a subcontractor of Safeway Construction) to pressure test the fuel oil tank in the basement of 111 Leroy Street as per NYSDEC recommendations. A field visit at that time found the building vacant. Additionally, the building had a Disconnect Notice posted to the front door for termination of Power and Light service. According to the owner of the parking lot next door, 111 Leroy Street is scheduled for demolition per a Notice he received. 05Nov2008 Brian Bellows, Project Specialist with Construction EH&S tried to contact the owner of the building; without success. Mr. Bellows proceeded to call everyone identified as the owner on the Department of Buildings (DOB) website. There has been no activity and no permits issued for the address. 8Apr2010 ConEdison is unable to locate the owner for information since building was vacated. DOB website checked for issuance of new permits. 03Sep2013 David Duke of ConEdison's EH&S Response Team searched the Internet and found that the building is in foreclosure via the Royal Bank of Scotland-RBS Securities. A newspaper article described the situation as fallout from the 2008 real-estate crash. Con Edison's request is under review. Reviewed PBS registration for 111 Leroy Street, 2-608656. 1,500 gallon UST, #2 fuel oil, no installation date; no filing for temporarily out of service or closure; registration expired 3/26/2008; overdue for tank tightness report (6/17/2008). Based on information included in separate, prior spill report, the tank was re-lined in 2003. Based on-line NYC ACRIS database, the property changed ownership from that included with the PBS registration (per ACRIS, KMG PMA LEROY, LLC). Referred PBS case to PBS unit for follow-up on PBS compliance issues and tagging as recommended above by Con Edison. No information found for any foreclosure process as indicated above by Con Edison for this property. (JOC) 10/23/13 - based on information provided, the spill was promptly remediated, and the fill line was repaired. However, Con Edison did not conduct testing of the fill line as was previously requested by the

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

Department, due to an inability to get
access to the tank. In that the entire tank system, rather than just
the fill line, now needs
testing by the tank owner per PBS regulations, there is no reason at
this point to continue to
require Con Edison to test just the fill line. As noted above,
regional PBS staff are working on
resolving the PBS compliance issues. The facility PBS number has been
cross referenced into this
spill record. (JOC) 7/21/16 - was forwarded on 7/18 by DEC Vought
draft RAWP for project applying
to NYC Voluntary Cleanup Program which includes the property at 111
Leroy Street. Called and
discussed project briefly 7/19 with Shaminder Chawla, NYCOER, who
provided additional information.
Sent email 7/21 to Michael Burke, Langan, requesting to discuss the
PBS application sent under his
cover letter dated 5/12/16 to the Department. Was called by Michael
Burke and Patrick Farnham,
Langan and discussed the issue: that they were on location performing
unrelated tasks while a
demolition contractor was also on location on May 11, 2016 and while
working in the vicinity of the
underground storage tank, this contractor pulled the tank out of the
ground. Another company, as
included in the PBS application, came to the facility on May 14 and
emptied/cleaned and removed the
tank. They advised that they will review their records including daily
logs/notes and will provide
a narrative of their observations regarding the tank activities and
any comments they have
regarding this spill incident related to the fill line. (JOC) 7/22/16
- was called today by Jerry
Nichols, Langan, who was also on the call yesterday (not noted above)
to follow up and clarify some
of the points from yesterday's discussion. He expects they will send
me something by Monday 7/25.
(JOC) 7/28/16 - received letter from Gerald Nicholls, Langan dated
7/27/16 requesting spill
closure. The letter reports that a Langan field engineer was on site
at the time that the UST was
removed, and noted that no holes were observed in the tank and that no
petroleum was released from
the tank after its removal, but the tank grave was not observable
since the fill surrounding the
tank location sloughed into the tank pit; that the onsite portions of
the vent and fill lines were
removed at the same time as the tank. The letter adds that during an
investigation conducted by
Langan, a soil boring SB10 was advanced southwest of the UST near
linear concrete patching assumed
to overlay the area where the tank piping was restored and
petroleum-like odor, staining and PID
readings up to 33 ppm in the soil were detected in soils from 12 to 14
and 16 to 17 feet below
grade. Review of the investigation report (dated 1/6/16) for SB10 did
not identify any CP-51 Table

LOT 85,TAXBLOCK 602 (Continued) **S105998775**

3 fuel oil compounds in excess of soil cleanup objectives. The letter further adds that excavation
under the remedial action work plan with NYCOER will extend to about 15 feet below ground surface
in the former UST area; that any remaining portions of fill or vent piping associated with the
former tank will be removed during the upcoming work. Review of the reporting of the incident from
Con Edison emis report 204253, 9/3/13, includes that the estimate of the original release from the
fill line was 1 pint or 1 quart, as opposed to the 10 gallons reported by the fuel oil delivery
company; and that the cleanup action was completed within 3 hours of the time of the release,
including the removal of approximately 2 cubic yards of impacted soil. Based on the reported
information, the spill is closed. (JOC)

Remarks: CON ED DID THE DIGGING AND HIT THE OIL LINE :; CON ED WILL CLEAN UP: 204253.

DEC Memo:	Ref to old spill #0001092 - The old case was closed out (should not have been) The site is being sold and the purchaser did soil borings around the old tank and found contamination. (not sure if the old tank was removed or abandoned in place). There was no PBS on this tank. It should have been registered in 2000 prior to either closing it in place or removing it. Need site visit? 08/24/09 Rec'd phase II report from Langan Engineering.The site is improved with a one and three story brick and concrete building. The basement floor slab is approx 10 ft below sidewalk grade.A closed UST discovered by GPR survey near the north end of the basement.The UST was filled with concrete.Four soil borings were advanced around the UST.Petroleum impacted soil was observed on the north and east sides of the UST within the saturated zone.No petroleum related

(Continued) **S109827828**

impacts were observed in the
unsaturated zone above the ground water table.No free product was observed on the ground water
table.Langan recommended that the residual petroleum impacts in soil are minimal and are attributed
to the former closed in place UST and/or historic urban fill and there are no petroleum impacts to
ground water at the site,therefore, the case is requested to be closed.Report in edocs.(sr)

Remarks: HOLE IN A 2000 GALLON ABANDONDED TANK, WITH CONTAMINATED SOIL. CLEAN UP PENDING. PBS NUMBER NOT AVAIL.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN 5/10/04 - AUSTIN - SWITHCED FROM SACCACIO TO AUSTIN FOR REASSIGNMENT - END 06/13/2007 - Matthew Klaas (Albany DER) -Contacted Petroleum Tank Cleaners at 718-624-4842 and requested more information about this spill. They told me they cleaned the tank, ran a test on it, and it was a leaking tank so they filled it with sand. They performed this work for Glenn Partition Inc. located at 78 Morton Street New York, NY 10014-3724 -Wrote Glenn Partition Inc. (at above listed address) a letter requesting more information about this spill. 07/9/07 - Matthew Klaas (Albany DER) -Received a telephone call from Glenn Nilsen from Glenn Partition, inc. He faxed a copy of the certificate of affidavit regarding the tank. After reviewing the certificate and speaking to Mr. Nielson, it appears as though the site has been properly cleaned up and there remains no threat. There has been no recurring incident at this location, and the file is being closed as of 7/9/07.
Remarks:	caller reports that old fuel tank was removed and cont. soil was found. caller can be contacted for further info.

DEC Memo:	5/1/18 TJD Left message for notifier (Paul McManon - Langan Group 212-479-5451). Awaiting call back with update. Is there a Phase 2 Report available? 5/3/18 TJD Spill reassigned to Patel as site is in NYC OER program. 05/03/18-Hiralkumar Patel. downloaded documents from NYCOER EPIC database. as per project submission letter to NYCOER, site comprises lot # 42 and 48 on block # 598. alternate address: 551-561 Greenwich St, 111 Charlton St no PBS or other spills found. site has 'e' designation for 'hazmat/noise/air'. Myrna Hanna NYC OER PH. (212) 341-2077 email: mhanna@dep.nyc.gov Ilkay Cam-Spanos Langan Engineering Ph. (212) 479-5410 email: icam@Langan.com summary of Phase I report dated Jan. 2009: - currently, the subject site includes a single-story building (on lot # 42) and an open parking lot (on lot # 48) -

TRINITY CHURCH CORP (Continued) **S121985559**

building is used as a parking garage
with car lifts - staining was observed on concrete floor of the garage building - open parking lot
with car lifts on north side of the building - no staining was observed on asphalt-paved parking
lot - property lies at an elevation of approx. 18 ft above mean sea level - bedrock is likely
located approx. 70 to 90 ft bg - groundwater flow is likely toward the Hudson River, approx. 500 ft
west of the site - no evidence was observed to indicate that ASTs were located on-site either at
the time of inspection or in the past - Sanborn maps indicated that the site was developed with
factories and residential dwellings as early as 1894. the private garage at the site was
constructed between 1951 and 1968, and two 550 gal gasoline USTs were located beneath the building
between 1968 and 1994 summary of remedial investigation work plan: - proposed development project
is in the early planning stages, but it is anticipated to include a 10-story commercial office
building spanning both tax lots, retail at the ground floor, and one cellar level - based on
previously conducted geotechnical and environmental investigations in the area, the water table is
expected at approx. 20 ft bg - geophysical survey will be completed - five soil borings will be
advanced to a depth of about 15 ft bg, or 2 ft below the observed groundwater table, whichever is
deeper - four additional soil borings will be advanced to at least 5 ft below the observed
groundwater table (about 20 ft bg) and will be converted into 2-inch dia. monitoring wells - seven
soil vapor points will be installed and set at least 2 ft above the observed groundwater table -
two soil samples will be collected from each boring: one sample from 0-2 ft bg and one sample from
the groundwater interface or the development depth, whichever is shallower - additional soil
samples may be collected if PID readings above background and/or visual and olfactory indications
of a chemical or petroleum release are noted - wells will be surveyed to determine groundwater flow
direction - product sample will be collected, if noted in wells, for fingerprint analysis
05/04/18-Hiralkumar Patel. 2:11 PM:- sent email to OER Shaminder requesting property owner's
contact info. email copied to OER Myrna and Ilkay. 2:50 PM:- received email from OER Shaminder
including property owner's contact info. Trinity Church Corp. **property owner** c/o Trinity Real
Estate 120 Broadway, Floor 38 New York, NY 10271-3999 Attn.: Matthew Fox Ph. (212) 602-0809 email:
mfox@trinitywallstreet.org 08/06/18-Hiralkumar Patel. received email from OER Shaminder (at 10:56
PM on 08/05/18) including draft RIR report. 09/28/18-Hiralkumar Patel. reviewed draft RIR. summary:

TRINITY CHURCH CORP (Continued) **S121985559**

- a potential fill port was observed in the Greenwich Street sidewalk adjacent to the site - during
geophysical survey, an anomaly indicative of a UST, an associated fill port, and vent pipes were
identified inn the western port of lot # 42 adjacent to Greenwich Street sidewalk - evidence of
former gasoline dispenser islands was observed to the north and south of the anomaly - a second
fill port was identified in the southwest portion of lot 48 - due to presence of hydraulic lifts
associated with parking in the area, access to ground surface around the fill port on lot 48 was
limited - ten (10) soil borings (EB-01 through EB-10) were advanced to depths ranging from about 16
to 28 ft bg - boring EB-01 was advanced to a depth of 20 ft bg; no PID readings noted; groundwater
was encountered at 13 ft bg; soil samples were collected from 0-2 ft and 14-16 ft bg; borehole
EB-01 was backfilled to 6 ft depth to construct SV01 - boring EB-02 was advanced to a depth of 28
ft bg; PID readings (max. 3,600 ppm at 16.5 ft bg) and gasoline-like odors were noted below 8 ft
depth; groundwater was encountered at 13.8 ft bg; soil samples were collected from 1-3 ft, 14-16 ft
and 26-28 ft bg; well MW02 was installed in the borehole - boring EB-03 was advanced to a depth of
24 ft bg; 21 ppm recorded on PID and gasoline-like odors noted at 16.5 ft bg; groundwater was
encountered at 14 ft bg; soil samples were collected from 1-2 ft, 16-17 ft and 23-24 ft bg; well
MW03 was installed in the borehole - boring EB-04 was advanced to a depth of 20 ft bg; no PID
readings noted; groundwater was encountered at 13.5 ft bg; soil samples were collected from 0-1 ft
and 15-16 ft bg; well MW04 was installed in the borehole - boring EB-05 was advanced to a depth of
24 ft bg; PID readings (max. 590 ppm at 11 ft bg) and gasoline-like odors were noted below 9 ft
depth; groundwater was encountered at 12 ft bg; soil samples were collected from 0-2 ft, 11-12 ft
and 22-24 ft bg; borehole EB-05 was backfilled to 6 ft depth to construct SV05 - boring EB-06 was
advanced to a depth of 24 ft bg; PID readings (max. 1,550 ppm at 14.5 ft bg) and gasoline-like
odors were noted below 9 ft depth; groundwater was encountered at 13 ft bg; soil samples were
collected from 0-2 ft, 13-15 ft and 22-24 ft bg; well MW06 was installed in the borehole - boring
EB-07 was advanced to a depth of 16 ft bg; no PID readings were noted; groundwater was encountered
at 14.5 ft bg; soil samples were collected from 1-2 ft and 14-15 ft bg; borehole EB-07 was
backfilled to 12 ft depth to construct SV07 - boring EB-08 was advanced to a depth of 16 ft bg; no
PID readings were noted; groundwater was encountered at 13 ft bg; soil samples were collected from
0-2 ft and 13-15 ft bg - boring EB-09 was advanced to a depth of 16 ft

TRINITY CHURCH CORP (Continued) **S121985559**

bg; no PID readings were
noted; groundwater was encountered at 15 ft bg; soil samples were collected from 3-4 ft and 14-15
ft bg - boring EB-10 was advanced to a depth of 16 ft bg; PID readings (max. 3,500 ppm at 12 ft bg)
and gasoline-like odors were detected below 6 ft bg; groundwater was encountered at 12 ft bg; soil
samples was collected 14-16 ft bg - total of 25 soil samples (including 1 duplicate sample) were
collected for analysis - according to previous geotechnical investigation, bedrock was encountered
between about 105 and 118 ft bg - fill material was observed immediately below the existing surface
to depths ranging from about 7.5 to 13 ft bg - the fill layer was shallowest in the southern
portion of the site and deepest in the northern portion of the site - fill material generally
consists of light to dark brown and grey, medium sand with trace fine sand, fine gravel, silt, and
varying amounts of coal, brick and concrete fragments - slag and/or fly ash were observed within
fill layer in boring EB-04, EB-6 and EB-8 located in the northwestern portion of the site - native
sand layer consisting of brown fine sand with trace medium sand, clay and silt was observed below
the fill layer throughout the site - peat and organic clay layers were observed in the eastern and
southeastern portion of the site in boring EB-01 and EB-03 soil analyticals (in ppb):
----------EB-02---------EB-06 duplicate------EB-10
14-16 ft 13-15 ft 14-16 ft
Benzene----------49,000----------9,000----------22,000
Toluene----------220,000----------43,000----------150,000
Ethylbenzene----------95,000----------25,000----------64,000
Xylene----------700,000----------170,000----------480,000
1,2,4-Trimethylbenzene------290,000----------77,000----------160,000
1,3,5-Trimethylbenzene------100,000----------26,000----------67,000
Naphthalene----------66,000----------16,000----------35,000
- four (4) 2-inch dia.
permanent wells MW02, MW03, MW04 and MW06 were installed within soil boring locations EB-02, EB-03,
EB-04 and EB-06, respectively - groundwater was encountered from about 14.97 to 17.36 ft bg
---------- - headspace PID readings and gasoline-like odors were noted in wells MW02 (250 ppm),
MW03 (21.9 ppm) and MW06 (250 ppm) - no sheen was observed on groundwater during sampling - based
on groundwater measurement, site groundwater flows to the west
---------- - total of 5
groundwater samples (including 1 duplicate sample) were collected for analysis groundwater
analyticals (in ppb): ----------MW02
duplicate-------MW06
Benzene----------13,000----------4,400
Toluene----------16,000----------850
Ethylbenzene----------1,400----------480
Xylene----------11,000----------1,900

TRINITY CHURCH CORP (Continued) **S121985559**

1,2,4-Trimethylbenzene----------1,200----------740
1,3,5-Trimethylbenzene----------390----------210
Naphthalene----------550----------380 - seven (7) soil vapor points (SV01 through
SV07) were installed to a depth of about 12 ft bg - due to water intrusion into vapor sampling
tubes, SV01, SV03 and SV05 were removed and re-installed to a depth of 6 ft bg ------ - total of 7
soil-vapor samples and 1 outdoor air sample were collected for analysis soil-vapor analyticals (in
ug/m3):
----------SV01-----SV02-----SV03-----SV04-----SV05------SV06-----SV07
Benzene----------13--------7-------20-------25-----4,700

PCE----------8----------8--------7--------7-------198------5
cyclohexane----------268------534-----2,030
review of available draft RIR
indicates presence of heavy soil and groundwater contamination on north, east and south side of
former 550 gal gasoline UST located along western property line of lot # 42, and south side of
suspected former 550 gal gasoline UST located in southwest corner of lot # 48. based on available
information, following additional investigation is needed: - boring/well around previous boring
EB-05 (where PID readings noted) and EB-10 - borings/wells on east sidewalk of Greenwich Street
(corner to corner) to delineate contamination on west side of both suspected tank locations/along
former remote fill ports - groundwater sampling via permanent well installation along southern
property line along Charlton St and along eastern property line (to investigate any upgradient
source) 9:53 AM:- sent email to OER Shaminder inquiring about status of final signed RIR and RAWP.
10/10/18-Hiralkumar Patel. DEC Jane is meeting with property owner/consultant next week for BCP
pre-application. **e-designation.** reassigned to M. MacCabe to manage under 561 Greenwich Street
BCP site No. C231129. Remedied under BCP project C231129, 561 Greenwich Street.

Remarks: old tank discovered during sun service investigation. Records show that there are two 550 tanks are in the ground

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO August 16, 2005 As part of the Spills Backlog Reduction, Jason Pelton initially called Roy Rucci with Rucci Oil. Rucci Oil delivers #2 fuel oil to 627 Greenwich property and was listed on the Spill Report Form as a contact person. Rucci referred the property owner to Crown Leak Detection to complete the tank testing. Roy Rucci indicated that the tanks were repaired by Petroleum Tank Services. Rucci Oil continues to deliver oil to this property. Roy provided me with contact information for Ed Armstrong (212-741-2111). Ed Armstrong is the 627 Greenwich Street property Superintendent. I followed up with a phone call to Ed Armstrong. Ed Armstrong indicated that a vent line was broken and there was never any petroleum spill. Ed has documentation on the tank tightness testing and the tank repairs and faxed them to me on August 16, 2005. The testing and repair documents were scanned and placed in eDocs on 9/6/05. Based on the fact that no petroleum spill occurred and that repairs were made to the underground storage tank system, the status of the spill was changed to closed by Jason Pelton on September 6, 2005.
Remarks:	no pbs number but violation number is d2-5294-12-01 take 2 is in a tomb and tank 1 is underground both failed test property owner is aware tanks will beuncovered and cleaned then retested

Assessment of Health:	Direct contact with contaminants from manufacture gas plant activities is unlikely since they are located under pavement, the on-site buildings or soil brought in for cover from an unknown off-site location. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although there are elevated concentrations of potentially site related contaminants in soil vapor, indoor air samples from the on-site buildings indicate that soil vapor intrusion is not occurring.
Description:	Transitioning from VCP site V00542 Location: The 0.3 acre East 19th Street Station is adjacent to the Avenue C Loop Road on the south side of East 19th Street between Avenues A and B in the borough of Manhattan in New York City, New York. The site is a portion of the

CE - E. 19TH ST. STATION (Continued) **S121933883**

present-day residential campus of Stuyvesant Town, which comprises 61-acres from First Avenue to Avenue C and from East 14th Street to East 20th Street. Site Features: The general topography of the site is flat. The portion of the Stuyvesant Town campus associated with the East 19th Station site contains portions of a residential high-rise apartment building and a private underground parking garage. The remainder of the Stuyvesant Town apartment complex surrounds the East 17th Street Station Site. Con Edison facilities are located east of Stuyvesant Town between East 18th /East 14th Streets and Avenue C/FDR Drive. These facilities include the East River Generating Station, various substations, an administration building, ball fields, and parking areas. Current Zoning: The New York City Planning Commission designates the majority of the property as R7-2: Moderate to High-Density Residential District. Past Use of the Site: The 18-block area developed at Stuyvesant Town was formerly part of the East River and associated marshland well into the 1800s. The area has undergone extensive filling activities. Historic filling along waterfront areas was generally carried out unregulated, using a wide variety of materials including construction debris, organic soil matter, excavated material from adjacent construction sites, and miscellaneous debris. Therefore, the composition and condition of these materials are highly variable. This mix of material is still present in the subsurface today. Tenements were constructed on the property subsequent to the filling and prior to the development of the former MGP station sites as gas storage and/or gas plant facilities. The majority of the larger facility was located on the eastern side of Avenue C between East 14th and East 16th Streets. The East 19th Street Station reportedly began operations between 1863 and 1868 as a holder site and operated until approximately 1921. Based on the historic maps of the area, a single gas holder (approximately 500,000 cubic feet capacity) occupied the site. The holder station was replaced by an auto/truck garage and then sold to Improvement Garage, Inc. in 1943. Stuyvesant Town Corporation acquired the land in 1944 for the development of the Stuyvesant Town apartment complex. Site Geology and Hydrogeology: The surface topography of Stuyvesant Town was altered by land filling and ranges from approximately 4 to 22 feet (ft) above mean sea level. A dense network of private and public utilities (both active and inactive) are present beneath the site. These utilities are complex and not completely documented. The site geology consists of four units of varying thickness and distribution across the site. Starting at the ground surface these units consist of fill, organic deposits, glacial deposits and bedrock. In general, the fill thickness varies between 20 and 25 ft across the site. The fill most likely reflects man-made disturbances to pre-existing natural soils from historic building construction and eastern expansion of the shoreline. The fill consists of sand, silt, and gravel intermixed with varying amounts of brick, concrete, cinders, and other debris. Beneath the fill layer are organic deposits and then glacial deposits. Bedrock occurs at depths of approximately 60 to 80 ft below ground surface (bgs). Taken together, the soils and fill materials beneath the site constitute a single, unconfined aquifer. Groundwater is found at approximately 8 ft bgs and the overall flow direction is east-southeast toward the East River. The groundwater is not used as a source of potable water.

Region: 2
Class: Completed: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

The site is a portion of the present-day residential campus of Stuyvesant Town, which comprises 61-acres from First Avenue to Avenue C and from East 14th Street to East 20th Street. Site Features: The general topography of the site is flat. The portion of the Stuyvesant Town campus associated with the East 19th Station site contains portions of a residential high-rise apartment building and a private underground parking garage. The remainder of the Stuyvesant Town apartment complex surrounds the East 17th Street Station Site. Con Edison facilities are located east of Stuyvesant Town between East 18th /East 14th Streets and Avenue C/FDR Drive. These facilities include the East River Generating Station, various substations, an administration building, ball fields, and parking areas. Current Zoning: The New York City Planning Commission designates the majority of the property as R7-2: Moderate to High-Density Residential District. Past Use of the Site: The 18-block area developed at Stuyvesant Town was formerly part of the East River and associated marshland well into the 1800s. The area has undergone extensive filling activities. Historic filling along waterfront areas was generally carried out unregulated, using a wide variety of materials including construction debris, organic soil matter, excavated material from adjacent construction sites, and miscellaneous debris. Therefore, the composition and condition of these materials are highly variable. This mix of material is still present in the subsurface today. Tenements were constructed on the property

CE - E. 19TH ST. STATION (Continued) **S121933883**

subsequent to the filling and prior to the development of the former MGP station sites as gas storage and/or gas plant facilities. The majority of the larger facility was located on the eastern side of Avenue C between East 14th and East 16th Streets. The East 19th Street Station reportedly began operations between 1863 and 1868 as a holder site and operated until approximately 1921. Based on the historic maps of the area, a single gas holder (approximately 500,000 cubic feet capacity) occupied the site. The holder station was replaced by an auto/truck garage and then sold to Improvement Garage, Inc. in 1943. Stuyvesant Town Corporation acquired the land in 1944 for the development of the Stuyvesant Town apartment complex. Site Geology and Hydrogeology: The surface topography of Stuyvesant Town was altered by land filling and ranges from approximately 4 to 22 feet (ft) above mean sea level. A dense network of private and public utilities (both active and inactive) are present beneath the site. These utilities are complex and not completely documented. The site geology consists of four units of varying thickness and distribution across the site. Starting at the ground surface these units consist of fill, organic deposits, glacial deposits and bedrock. In general, the fill thickness varies between 20 and 25 ft across the site. The fill most likely reflects man-made disturbances to pre-existing natural soils from historic building construction and eastern expansion of the shoreline. The fill consists of sand, silt, and gravel intermixed with varying amounts of brick, concrete, cinders, and other debris. Beneath the fill layer are organic deposits and then glacial deposits. Bedrock occurs at depths of approximately 60 to 80 ft below ground surface (bgs). Taken together, the soils and fill materials beneath the site constitute a single, unconfined aquifer. Groundwater is found at approximately 8 ft bgs and the overall flow direction is east-southeast toward the East River. The groundwater is not used as a source of potable water.

Assess Env:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were BTEX and PAHs and coal tar in groundwater and subsurface soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.
Assess Doh:	Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

Groundwater is found at approximately 8 ft bgs and the overall flow direction is east-southeast toward the East River. The groundwater is not used as a source of potable water.

Assess Env: Nature and Extent of Contamination: Based upon investigations

CE - E. 19TH ST. STATION (Continued) **S121933883**

conducted to date, the primary contaminant of concern for the site is coal tar. Coal tar contains both volatile and semi-volatile organic compounds. Specific volatile organic compounds (VOCs) of concern are benzene, toluene, ethylbenzene and xylenes (BTEX). Specific semi-volatile organic compounds (SVOCs) of concern are Polycyclic Aromatic Hydrocarbons (PAHs). Concentrations of PAHs found in surface and subsurface soils slightly exceed the soil cleanup objectives (SCOs) for unrestricted use, but are generally consistent with background levels for Manhattan soils. One sample with concentrations exceeding background was found at a depth interval of 5-7 feet below ground surface (bgs) directly adjacent to the E. 19th St. gas holder station. No exceedences of BTEX in surface or subsurface soils were found. Visible MGP-related impacts are found in the subsurface including staining, sheens, and blebs. These impacts are limited to a few locations in the area directly adjacent to the site and did not appear related to any source areas. Coal tar contamination at the site has not caused an impact to the groundwater resource. Concentrations of BTEX and PAHs are in compliance with NYSDEC Ambient Water Quality Standards or Guidance Values in on-site and off-site groundwater wells. The groundwater is not used as a source of potable water. Concentrations of benzene within soil gas samples ranged from 14 to 17.2 ug/m3. Indoor air concentrations of VOCs (including BTEX) potentially associated with MGP residuals are consistent with background levels typically found in residential indoor air. When comparing soil gas and indoor air samples, it appears that the indoor air more closely resembles the ambient air in chemical constituents and concentrations than it does the subsurface soil gas.

Assess Doh: Direct contact with contaminants from manufacture gas plant activities is unlikely since they are located under pavement, the on-site buildings or soil brought in for cover from an unknown off-site location. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although there are elevated concentrations of potentially site related contaminants in soil vapor, indoor air samples from the on-site buildings indicate that soil vapor intrusion is not occurring.

Spiller Company: GLOBALSERV PROPERTY 1 LLC
Spiller Address: 1202 LEXINGTON AVE STE 255
Spiller Company: 999
Contact Name: EDWARD IAMICELI
Latitude: Not reported
Longitude: Not reported
DEC Memo: 3/30/16-Zhune spoke to Edward Iamicelli (845)567-6656. Edward said they were doing geotechnical borings. As they drilled they noticed odor and saw oil in a borehole. The existing building will be demolished and a new building will be developed. A CSL letter was sent to: Ms. Elaine Hsu GlovalServ Property One, LLC 1202 Lexington Avenue, Suite 255 New York, NY 10028 Spill referred to Rashad Omar (Runner). 3/31/2016: Rashad 264 East 7th Street does not have an alternate address. No additional spills or PBS registrations found for site. 5/2/2016: Rashad Receieved two voice messages from Alla about site, 212-665-4129 or 212-685-2715. Called Alla back, she said they discovered contamination when doing borings and remediation will take place once the demo and redevelopment begins in August (the final tenant leaves in August). Alla will keep me updated once redevelopment begins. She also gave me spill number for previous spill on site: 0608798. Spill 0608790 was called in for 260 East 7th Street which is adjacent property to 264 East 7th Street. During redevelopment on 260 East 7th Street contaminated soil was found, and it was found to be flowing from 262 East 7th Street spill number 0651463, contaminated soil was removed, and a further remediation plan was made to do treatment by injection by Langan Engineering. After the project manager reviewed groundwater analyticals and soil samples, the spill was closed, it should be noted that there was some contamination left behind, as the homeowners could not afford a more thorough investigation/cleanup. Spill 0651463 needs review as well. 7/19/2016: Rashad Received call from Charles of Manhattan Renovations (Charles@manhattanrenovations.com) he was calling to discuss remediation process. He will be taking additional soil sample this week and was wondering if he should send it to the lab. I let him know that if he is doing site wide excavation that the soil that he will encounter will likely be removed and that he should do site wide endpoint samples upon completion of excavation for foundation. I sent him a copy of contractor list to aid in selection. The demolition date is set to begin in Mid December. 11/22/2016: Rashad Received call from HydroTech, they will be doing preliminary investigation, involving soil borings, a few wells, and soil vapor samples to identify extent/any contamination. In addition they will be conducting GPR survey to see if their were any tanks. Site is also E-designated.

DRILL PIT (Continued) **S118637212**

1/13/2017 Austin This spill report is being transferred from Rashad Omar to Pratik Lakhani end. 01/31/17 - Lakhani Called HydroTech (6314625866) and found out that the PM is Rachel Ottoman. She is currently out on disability. DEC Lakhani left contact with HydroTech. 03/03/17 - Lakhani Sent the following email to Manhattan Renovation Charles: I am the new project manager for this spill case as Rashad Omar is no longer at the DEC. Before Rashad left, he noted that he spoke to you regarding the remediation process for the site. Have soil samples been taken from the site and sent to the lab? Is a site wide excavation taking place? Please provide me with any further updates on the site. I would like to be aware of all remediation activities. Has a consultant been hired to complete the remediation? If so, please share their contact with me. 03/06/17 - Lakhani Manhattan Renovation Charles Bagby responded informing that Manhattan Renovation was asked to halt this project last year, hence the remediation never started. The client/owner later sold the building. Charles was not in direct contact with the buyers or the agents and so he has no more information on this project. As per ACRIS, the property owner still is: GlobalServ Property One, LLC 1202 Lexington Avenue #255 New York, NY 10028 Managing Agent: Elaine Hsu Manhattan Renovations Barbara informed that the current owner is no longer GlobalServ Property One. 03/16/17 - Lakhani Called HydroTech. Rachel Ottoman is out on maternity leave and Erica Johnston has take responsibility of the site. She informed that HydroTech has not done any work at the site. 03/20/17 - Lakhani Sent CSL to the following address: 264 East 7th Holdings, LLC 555 Madison Avenue, 6th Floor New York, NY 10022 Attn.: Alan Cohen and required effective removal of contamination, installation of borings/wells, and delineation of soil and groundwater contamination. 04/17/17 - Lakhani Langan Joe Good (212-479-5448, Cell: 847-971-1972, jgood@langan.com) contacted DEC Lakhani regarding the site. They were recently hired by the new property owner. Joe informed that the site is E-designated and OER will be involved with the site. DEC Lakhani sent the following email to Joe: Great speaking with you today. Below is the information I have regarding the above site: Tectonic Engineering was installing geotechnical borings on 03/30/16 at the site. As they were drilling, they noticed an odor and saw oil in a borehole. There were plans to demolish the existing building and redevelop the site. There was a former spill on the property, reported on 10/31/06, which is now closed after receiving a Site Screening Report dated 12/17/07 from Langan Engineering. The report included the analytical results

DRILL PIT (Continued) **S118637212**

for the groundwater grab samples taken on 04/23/07 and 09/26/07. The 04/23/07 sample had six (6)
very low hits. The 09/26/07 sample had very slight TAGM groundwater. Manhattan Renovations
contacted the DEC in July 2016 informing us that they would be taking additional soil samples.
However, Manhattan Renovations was asked to halt this project due to the change in ownership of the
property. HydroTech was once involved with the site as well but completed no work. Given this
information, I sent a requirement letter requiring the removal of contamination from the site and
the installation of borings and wells to delineate the extent of the soil and groundwater
contamination. Depending on the redevelopment of the site, a soil vapor intrusion study may also be
necessary. Please share your report with me as soon as possible, so I could send you and updated
requirement letter. If you have any questions, please contact me at (718) 482-4038. 04/20/17 -
Lakhani File Review: Geotechnical Evaluation (Tectonic, 10/20/16) - The project site consists of a
three-story brick masonry building with a partially below grade basement. Based on the test pits,
the existing foundations are approx. 7' to 8' below the sidewalk elevation in front of the
building. The building id currently being used for residential space. The site is bound by similar
masonry buildings to east and west; a small courtyard and a single story brick building to the
south; and by 7th Street to the north. The proposed project will consist of demolition of the
existing building and construction of a six-story building with a full basement. Drilling,
sampling, and logging of two (2) additional test borings, at the rear of the existing building, to
depths of approx. 11.5' and 60'bg and excavation of two (2) test pits along the foundations of the
existing building were completed. Groundwater was encountered at a depths between 7.5'-8'bg.
Sampling Summary Report (Tectonic, 10/17/16) - The East River is approx. 1300' east of the site.
Historic mapping of this section of lower Manhattan indicates the area was a tidal marsh with small
streams flowing roughly west to east. On 03/25/16, Tectonic performed a geotechnical soil boring in
the sidewalk in front of the building. During the geotechnical investigation, petroleum sheen and
odor was encountered around 6'-8'bg. Tectonic reviewed spill cases for the neighborhood and found a
previous spill case number 0608798 reported for the private dwelling located at 260 East 7th
Street. The spill report indicated that unknown quantity of #2 fuel oil was released on 10/31/06.
The spill was closed on 12/18/07. 260 East 7th St is located approx. 23' to the east of the subject
property. Another fuel oil spill was reported on 07/03/14 at 243 East

DRILL PIT (Continued) **S118637212**

7th St, which is located
approx. 150' northwest of the project site. Tectonic mobilized to the site to collect environmental
soil samples from two (2) test pit locations. Soils in each test pit was screened with a PID. The
test pits were terminated when groundwater was encountered. Then a post hole digger was used to
excavate 1' below the water table and install a 2 PVC well screen, which was backfilled with well
sand. Tectonic mobilized to the site to inspect the performance of two (2) soil borings and collect
environmental soil samples. Boring B-2 was advanced to a depth of 62'bg, while boring B-3 was
advanced to 11.5'. One sample was retrieved within boring B-3 at a depth of 8' to 10'. For the
remaining analyses, one (1) composite sample per boring was created via the following methodology:
two (2) grab samples from each vertical interval within each boring were collected with a dedicated
plastic scoop and placed into a single flood-grade plastic bag. Groundwater was encountered in all
of the borings and test pits. Groundwater elevations indicate that there is no measureable gradient
across the site. PID readings above background were observed in borings B-2 and B-3 and in test pit
TP-1 and TP-2. Additionally, petroleum like odors were observed in all three (3) borings and two
(2) test pits and staining was observe in test pits TP-1 and TP-2, indicating the presence of
petroleum hydrocarbon compounds. No PID readings are available for B-1 was it was not part of the
original geotechnical investigation. BTEX in soil samples were below CP-51 unrestricted use SCOs.
n-butylbenzene 6700 ppm(TP-2, 3'bg), sec-butylbenzene 5600 ppm(TP-2, 3'bg), isopropylbenzene 2000
ppm(TP-2, 3'bg), n-propylbenzene 4400 ppm(TP-2, 3'bg). Groundwater: sec-butylbenzene 8 ug/L(TP-1),
isopropylbenzene 7.8 ug/L(TP-1), n-propylbenzene 8.4 ug/L(TP-1). The soils and groundwater on the
site have likely been impacted by a petroleum spill. The petroleum contamination is at least 2'
below the existing basement elevation, therefore, currently there is no exposure pathway for nearby
receptors. Tectonic inspected the basement areas of the subject building including the area around
the existing AST. No evidence of a spill source such as staining or odors on the subject property
was observed during their investigation. Tectonic recommends the following: 1) the historic fill
should be excavated down to at least the groundwater elevation 2) dewatering 08/15/17 - Lakhani
Langan Joe Good (212-479-5448) informed that the site will be applied to OER VCP program. 09/25/17
- Lakhani Langan has met with OER to discuss the anticipated site investigation to satisfy the
E-designation and spill delineation requirements at 264 East 7th Street. Langan anticipates sending

DRILL PIT (Continued) **S118637212**

the RIWP to OER this week for review (9/25 - 9/29). 10/30/17 - Lakhani The site was enrolled in the OER VCP program. OER Shaminder emailed DEC Lakhani and NYSDOH Nathan with the RIWP attached. Work is scheduled for next week and involves three (3) groundwater wells, four (4) soil boring and three (3) soil vapor points on the 25' x 100' site. Development is only restoration of existing structure and adding one(1) floor on top. Previously, elevated PID readings were observed in borings B-2 and B-3 and in test pits TP-1 and TP-2, and petroleum-like odors were observed in all three (3) borings and both test pits. Rememdial Investigation Work Plan (Langan, 10/27/17) - GPR will be performed at the site to locate utilities, USTs and subsurface structures or anomalies. A soil investigation will be performed to identify the nature of soil conditions at the site. Four (4) soil borings will be completed. Where possible, a minimum of two (2) discrete soil samples will be collected from all four (4) of the test borings (one from between 0'-2'bg and another from immediately above the groundwater interface. A groundwater investigation will be performed to evaluate groundwater quality at the site and identify potential off-site contamination that may be migrating on to the site. Up to three (3) groundwater monitoring wells will be installed. Approx. one (1) week after the monitoring wells are developed, three (3) groundwater samples will be collected. Soil vapor samples will be collected to evaluate the potential for infiltration of contaminated soil vapor into the proposed building. Three (3) soil vapor points will be installed at the site. An ambient air sample will be collected concurrently with the sub-slab soil vapor samples. 10/31/17 - Lakhani DEC Lakhani approved the RIWP. 11/14/17 - Lakhani OER #17TMP0176M 01/31/18 - Lakhani As per OER Shaminder, the site is not going through the City VCP. On 11/21/17, NAPL was observed in monitoring well MW01 during the Phase II Site Investigation. Langan collected a sample of the NAPL using a dedicated bailer for fingerprint analysis. Analytical results from the fingerprint analysis identified the product as potential weathered #2 fuel oil/diesel oil. TPH was detected at a concentration of 886,000 ppm in the product sample collected. Langan will be directly working with DEC for this site. The Langan contact is: Joseph Good 212-479-5448 jgood@langan.com Phase II Environmental Site Investigation Report (Langan, 01/25/18) - Site development will include renovation of the existing vacant 3-story development into a new 4-story multifamily residence with a full cellar. Work performed under the Phase II Environmental Site Investigation include: 1) conducted a geophysical survey, 2) completed an indoor air chemical

DRILL PIT (Continued) **S118637212**

inventory, 3) Advanced four
soil borings across the site, and collected nine (9) soil samples for chemical analysis, 4)
installed three (3) groundwater monitoring wells throughout the site to establish groundwater flow
and collected three (3) groundwater samples, and 5) installed two (2) soil vapor and one (1)
sub-slab soil vapor probes and collected two (2) soil vapor, one (1) sub-slab soil vapor, one (1)
indoor air, and one (1) ambient air samples for chemical analysis. Depth to groundwater ranges from
4.13' - 4.87' below the cellar slab. Groundwater flow is generally east-northeast. NAPL was
identified in off-site monitoring well MW01. Product thickness post well development was 4 .
Groundwater results are as follow: isopropylbenzene 7.3 ug/L(MW02), n-propylbenzene 8.9 ug/L(MW02),
sec-butylbenzene 7.6 ug/L(MW02). Soil results do not indicate VOCs above CP-51 standards. Soil
vapor results are as follow: acetone 65.8 ug/m3(SV03), carbon tetrachloride 0.484 ug/m3(AA01),
carbon tetrachloride 0.478 ug/m3(IA01), carbon tetrachloride 1.26U ug/m3(SV01), carbon
tetrachloride 2.52U ug/m3(SV02), carbon tetrachloride 2.52U ug/m3(SV03), m/p-xylene 12.3
ug/m3(SV01), m/p-xylene 6.47 ug/m3(SV03), o-xylene 5.08 ug/m3(SV01), PCE 2.71U ug/m3(SV02), PCE
2.71 ug/m3(SV03), PCE 1.36U ug/m3(SV01), TCE 1.07U ug/m3(SV01), TCE 2.15U ug/m3(SV02), TCE 2.15U
ug/m3(SV03), vinyl chloride 0.511U ug/m3(SV01), vinyl chloride 1.02U ug/m3(SV02), vinyl chloride
1.02U ug/m3(SV03). 03/14/18 - Lakhani Langan Joe Good sent the following email: Based on our prior
conversations regarding NYSDEC Spill No. 15-12347, we will begin bi-weekly NAPL recovery of
monitoring well MW01 at the 264 East 7th Street property this week. Purged NAPL and groundwater
will be containerized into a NYSDOT-approved 55-gallon drum prior to off-site disposal. If NAPL is
not observed in the well following the recovery events, Langan will collect one groundwater sample
from MW01 for VOC and SVOC analysis. We will prepare a sampling summary letter and laboratory
analytical results for review and consideration for closure of Spill No. 15-12347. 04/27/18 -
Lakhani Langan Joe Good informed that the product gauging has been going well with product
thickness decreasing from about 20 to about 7 over the past four (4) recovery events. 05/03/18 -
Lakhani Four (4) recovery events have taken place: 3/15, 3/28, 4/13, 4/26. LNAPL found in MW01.
Product thicknesses prior to recovery were 20 , 13 , 8 and 7 for 3/15, 3/28, 4/13, and 4/26
respectively. 06/18/18 - Lakhani The proposed development includes the proposed renovation of the
existing vacant three-story development into a four-story multi-family residence with a full

DRILL PIT (Continued) **S118637212**

cellar, which will require limited excavation below the existing cellar level for construction go a cellar expansion. Approx. 15 cu. yds. of material are anticipated to be excavated. A vapor barrier will be installed in the cellar as part of the general construction. SMMP uploaded to D2. 08/05/19 - Lakhani - Spill being transferred to Lin. 11/23/2020-Lin-Based based on Phase II report. The spill did not come from 264 E 7th Street, Manhattan. MW-1 in front of the site has 0.25' of product remaining based on the last gauging event that took place on 2/6/2020. 6/8/23-Lin-Spill closed due to small volume of product left in a isolated well. The oil is contained and not traveling downgradient.

Remarks: boring done on sidewalk in sidewalk, sheen discovered. Spill was reported at site in 2006

BROWNFIELDS:

Name:	601 WASHINGTON STREET
Address:	601 WASHINGTON STREET
City,State,Zip:	NEW YORK, NY 10014
Program:	BCP
Site Code:	503954
Acres:	0.205
HW Code:	C231091
SWIS:	3101
Town:	New York City
Record Added Date:	01/21/2015
Record Updated Date:	03/31/2021
Update By:	JCGRATHW
Site Description:	"Location: The 601 Washington Street site is located in an urban area in Manhattan. The site is bounded by Greenwich Street to the east, Leroy Street to the south, Washington Street to the west and multi-story residential buildings to the north. Site Features: The site encompasses approximately 0.205 acres (8,921 sq. ft.) and was previously covered by a vacant one- to two-story building on a concrete slab until it was demolished in 2016. A new 9-story apartment building is currently under construction on the site. Current Zoning and Land Use: The site is located in the Special Mixed Use District (MX) within Manhattan with zoning designation M1-5/R7X, which allows for residential, community facility, commercial and manufacturing uses. The site was last occupied by the Gavin Brown Art Gallery. Past Use of the Site: Historical use of the site includes a truck and auto repair shop; a brass foundry; a welding supply business; a truck garage, and; shipping and meat packing companies. Site Geology and Hydrogeology: The subsurface strata at the site consists of historic urban fill typically comprising brown sand with trace gravel and brick fragments. The depth of fill is variable with a maximum recorded depth of 17 feet below ground surface (bgs) in the southern portion of the site. Most or all of this fill was removed during site remediation and construction of the new building. Underlying the fill material is a typically brown fine to coarse sand with occasional discontinuous thin layers of sandy silt. Depth to top of bedrock at a nearby site varied from about 73 to 79 feet bgs. The bedrock was identified as gray mica schist, and about three feet of light-gray decomposed rock overlaid the bedrock. Groundwater is approximately 13 to 14 feet deep. Localized groundwater appears to flow towards the southeast, though regional flow should be towards the Hudson River which is one block west of the site."
Env Problem:	"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were TCE, PAHs and lead in soils, and TCE and PCE in groundwater and soil vapor."
Health Problem:	"Remedial actions are complete and have eliminated the potential for contact with site-related contaminants on-site. Additional evaluation is needed to determine whether actions are needed to address soil vapor intrusion off-site."

DEC Memo:	DEC Piper spoke with Jason at Langan. Langan hired by developement company. Project through OER as it was an E designated site. They executed the investigation work plan presented to OER. No odors. Soil seems fine. One corner of property. MW-1, TCE ~ 470 ppb in the groundwater in the southwest corner. Map and data tables will be sent and discussed with Remediation. Complete SIR will be sent when completed. 9/8/2015- DEC Piper spoke with DEC Greco. Site is in NYS Brownfields Program. C231091. Spill transferred to DEC Greco as per DEC Greco. This spill has been transferred to Durnin, Project Manager for this BCP site. This spill will be remediated through the cleanup efforts of the BCP program (site excavation to approximately 15 foot depth). (7/19/2017) This BCP site was remediated to a Track 2 clean up and a new building is being constructed. A COC was issued in December 2017. Since this is a Significant Threat Site, off-site investigation, in consultation with NYSDOH, is required. The DEC Project Manager, John Durnin, will retire in April 2018. The new Project Manager will be Javier Perez-Maldonado. (3/29/2018) 2/8/18 - BCP Project #C231091 received a COC for Track 2 cleanup. EE extinguished by the Department - Spill closed (Grathwol)
Remarks:	based on ground water sample

DEC Memo:	2/06/06 - Interviewed Mrs. Leguizamo as she responded to my February 1, 2006 letter. There is no longer a problem from a neighboring building or at this address . Her building has used gas heat for a long time. I apologized for the Department for taking so long to address this complaint. Spill closed. FAXed report to Mrs. Leguizamo. 6/15/05 - Spill Lead_DEC Field was changed to Grathwol. No spill file available. Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND
Remarks:	CALLER STATES THERE WAS AN OIL SPILL IN OCT OF 98 AT SPILLER'S ADDRESS - CALLER STATES HE WAS DOING INSPECTION ON APR 25 AND THERE IS A STRONG ODOR OF OIL IN 268 - THERE HAS BENN NO CLEAN UP CALLER HAS BEEN IN CONTACT WITH REG 2 OFFICE

DEC Memo:	10/29/14: Mahat t/c : A voice message was left to Mr. Diggins inquiring more information about the spill and its nature. 10/29/14: Mahat t/c: DEC Mahat asked Mr. Diigins to send daily monitoring information (log) for 10/29/14 including picture. The foundation of the site will be 30' bgl. The tank that was partially filled with gasoline was found 6 feet bleow the ground. All the possible contaminated soil will be removed from the site. Mr. Diggins was also asked to submit the manifest on the contaminated soil will be disposed off properly. DEC is waiting for the closure report. 11/18/14: Mahat t/c : DEC Mahat received a daily log for 10/29/14. The tank has been removed and end point sample will be taken at the bottom of the excavation. Mr. Chawla (OER) confirmed that the end point sample will be taken and will be submitted to the Department. Meant time the spill case will be closed. Spill case will repoen for further remediation investigation if collected end point sample are petroleum contaminated.
Remarks:	loss during excation of unk amount of gas, gw is mixed, c/u pending

DEC Memo: 12/27/19-Hiralkumar Patel. 12:27 PM:- OER Shaminder forwarded data from GZA including boring log
and figures summarizing soil and groundwater results at location GZA SB-01. - PID reading of 341
ppm was recorded at 2 ft bg with petroleum-like odor (no sample was collected at this depth even
with highest PID reading) - petroleum-like odor and PID readings of up to 141 ppm were recorded at
13 to 15 ft bgs - groundwater was noted at 13 ft bg - a soil sample from 13-15 ft bg (below water
table) was analyzed - groundwater sample was analyzed - no sheen was observed - some VOCs were
detected in soil sample - contamination noted in groundwater sample groundwater analyticals:
----------GZA-TW-1
Benzene----------100
Toluene----------320
Ethylbenzene----------320
Xylene----------2,300
1,2,4-Trimethylbenzene----------600
1,3,5-Trimethylbenzene----------140 2:24 PM:- sent email to OER Shaminder. based on review of
boring log and sample result summary map, suggested him to report a spill at the site.
12/30/19-Hiralkumar Patel. subject spill was reported by GZA based on findings in boring GZA-SB-1.
as per the log, this boring was installed on 07/30/19, but spill was not reported until today.
alternate address: 11-13 Hubert St, 8 Collister St no PBS or other spills found. as per NYC DOB
record, site has 'e' designation for 'hazmat' a DOB application was disapproved on 12/12/19 for
building of a new five (5) story building. RJP NY Property Holdco LLC. **property owner** c/o
Bernston Porter & Co. 11100 NE 8th Street, #400 Bellevue, WA 98004 Attn.: Joseph Abadi Ph. (917)
733-4800 email: joe.abadi@rjpc.com downloaded remedial investigation report from OER EPIC database.
RIR includes Phase I also. summary of RIR dated May 2014: - site was historically developed prior
to 1894 as a 6-story tin can manufacturing facility. the site was then developed between 1905 and
1928 with a one story warehouse. this structure existed until 1996 and also later served as a motor
freight station and a private garage. the site was renovated between 1996 and 2005 with a 3-story
mixed use commercial office and warehouse - in 2014, the site was used for commercial office space
and residential purposes and contained a 3-story building with a basement and a one car garage at
grade level at the northwest corner - elevation of the property ranges from 16.4 to 19.31 ft -
result of GPR survey did not identify any anomalies at the site - depth to groundwater ranges from
5.43 ft below basement slab to 8.68 ft below basement slab
---------- - groundwater flow is

(Continued) **S110670127**

generally from east to west ---------- - stratigraphy of the site, from the surface down, consists of a concrete slab followed by 8 ft of fine to medium coarse sand with traces of urban fill - installed five (5) soil borings (SP-1 through SP-5) and collected 10 soil samples - borings SP-1 through SP-4 were installed through basement slab to a depth of 8 ft below basement slab - boring SP-5 was installed in northwest corner (in car garage) to a depth of 12 ft bg - based on boring depth details, basement slab is about 10 ft bg - installed three (3) 1-inch dia. monitoring wells through basement slab and collected three groundwater samples - wells were installed to a depth of 13 ft below basement slab with 10 ft of screen - installed three (3) soil vapor probes and collected three soil-vapor samples - no contamination was noted in soil and groundwater samples, but petroleum/chlorinated solvent contamination was noted in soil-vapor samples soil-vapor analyticals (ug/m3):

----------SV-1--------SV-2--------SV-3
Toluene----------13----------61----------84
Ethylbenzene----------29----------37
Xylene----------42---------217---------258
1,2,4-Trimethylbenzene------38---------144---------109
1,3,5-Trimethylbenzene----------34----------31
PCE----------309----------12---------882
TCE----------23----------73 the supplemental remedial investigation summary report from GZA stated that observed impacts may be associated with a former gasoline UST identified in a 1964 certificate of occupancy when the property consisted of a private garage.

---------- 2:40 PM:- sent email to OER Alysha. informed her that results of Remedial Investigation conducted in May-2014 indicate presence of chlorinated solvent contamination in soil-vapor phase beneath the building slab, and recent investigation by GZA shows presence of petroleum contamination in shallow soil (high PID readings with petroleum odors around 2 ft bg) and groundwater in site s northwest corner. based on these, further investigation of soil, groundwater and soil-vapor contamination is needed including indoor/outdoor air samples, and site-specific groundwater flow direction using permanent monitoring wells. asked Alysha to submit an investigation work plan for review. email copied to OER Shaminder and Meredith (GZA).

01/06/20-Hiralkumar Patel. 3:08 PM:- received call from Meredith from GZA. she mentioned proposed site redevelopment includes excavation of soil in entire site to water table (may be little deeper in some areas which will remove all contaminated soil), dewatering (which will remove impacted groundwater), and new building slab at/near water table with vapor

(Continued) **S110670127**

barrier beneath/around new
foundation (no soil-vapor impact in future). RAWP will be submitted within 4-6 weeks and site
excavation may begin by summer of 2020. as such Meredith proposes not to conduct any additional
soil/groundwater/soil-vapor investigation. she also mentioned that property owner plans to apply
for NYC VCP. asked her to submit documents to the Department for review/approval until the site
accepted in city (or state) cleanup program (VCP/BCP).
01/31/20-Hiralkumar Patel. 10:12 AM:-
received email from OER Alysha including summary of proposed RAWP. downloaded RAWP from OER EPIC
database. summary; - proposed use of the site will consist of a new five-story, single-family
townhouse with a full basement - proposed development will involve the demolition of the existing
building including foundations - excavation will occur to below the water table - 3,372 sq. ft.
(approx.. 74% of the property) will be excavated to a depth of approx. 14 ft bg - 1,207 sq. ft. of
building area will be excavated to the depth of 16 ft bg - 88 sq. ft. of area of the building area
will be excavated to the depth of 18 ft bg for elevator pits - petroleum impacted material is
expected to be present from 12 to 16 ft bg underneath the existing garage - product sample, if
encountered, will be collected for anlaysis - dewatering will occur - endpoint samples will be
collected - if unrestricted use SCOs are not achieved, then a vapor barrier will be installed
beneath the building slab (46 mil) and outside the sub-grade foundation sidewalls (31 mil) remedial
action report will be submitted within 22 weeks from beginning of remedial action. 2:21 PM:- sent
email to Alysha. informed her that the RAWP looks good and asked her to submit copy of approval
letter. email copied to OER Shaminder. 01/26/21-Hiralkumar Patel. 9:30 AM:- sent email to OER
Alysha inquiring updates. email copied to OER Shaminder. 9:36 AM:- received email from OER Alysha
stating that a Notice to Proceed was issued in July 2020, but remedial work has not begun.
04/30/21-Hiralkumar Patel. 1:54 PM:- received email from Meredith including link to spill closure
letter. summary: - currently site development is on hold and reuse of the existing building for
commercial purpose is planned - additional evaluation of potential vapor intrusion was conducted -
GZA inspected the condition of the basement slab on 03/12/21 - several penetrations were noted
resulting from previously completed test pits and soil borings - basement slab was repaired by
owner’s contractor - basement was temporarily ventilated, and the heating ventilation and HVAC
system was turned on - approx. two weeks following the repairs, GZA collected samples on 04/02/21

(Continued) **S110670127**

to evaluate the current soil vapor, indoor and outdoor air conditions - total of two soil-vapor samples were collected: SV-4 from beneath the basement slab and SV-5 from beneath the garage slab - collected two indoor air samples (IA-4 and IA-5) co-located with the soil vapor samples - collected one outdoor air sample AA-1 - minute petroleum contamination noted in samples - CVOCs noted in soil-vapor sample SV-4 (34.3 ug/m3 of TCE and 387 ug/m3 of PCE) as chlorinated and petroleum VOCs are noted in soil-vapor sample below the building slab, but nothing noted in indoor air samples, GZA concluded that no further investigation of vapor intrusion pathways is warranted. GZA requested spill closure as building slab will remain in place mitigating exposure to impacted soil and groundwater. 05/17/21-Hiralkumar Patel. based on review of all available information, the subject spill case can't be closed as complete delineation of contamination is required. 1:16 PM:- sent email to Meredith. informed her that based on available data, the spill case can't be closed at this time and the department requires complete delineation of soil and groundwater contamination, including determination of site-specific groundwater flow direction using permanent wells. also informed her that additional soil-vapor investigation/mitigation may be required based on data review. email copied to OER Shaminder, OER Alysha, Mr. Abadi and David Winslow (david.winslow@gza.com). 05/26/21-Hiralkumar Patel. 10:45 AM:- received email form Meredith including a proposed scope of additional investigation: - the only exceedance detected in soil above commercial use SCOs is benzo(a)pyrene at 5 to 7 ft bgs in SP-5. this is likely associated with historic fill material at the Site as evidence of petroleum contamination (elevated PID readings, etc.) was not observed at this depth. as such, further collection and analysis of soil samples is not proposed. - groundwater flow direction to the west/southwest was determined by HydroTech as part of their 2014 remedial investigation - to delineate petroleum-related groundwater contamination at GZA-TW-01, one soil boring will be installed in the sidewalk on the southern side of Hubert Street and converted to a temporary well point (GZA-TW-02). groundwater contamination is delineated to the south by MW-2 and to the east by MW-3. a building is located to the west of GZA-TW-01 - the soil boring will be advanced to approximately 5 feet below the water table (estimated completion depth of ~20 ft bgs) and a temporary well point installed - if evidence of petroleum contamination is observed, a soil sample will be collected from the interval exhibiting the greatest evidence of contamination. if collected, the sample will

(Continued) **S110670127**

be analyzed for VOCs and
SVOCs - a groundwater sample will be collected and analyzed for VOCs and SVOCs 07/06/21-Hiralkumar
Patel. 1:51 PM:- spoke with Meredith and informed her that the proposed scope of work for
soil/groundwater investigation via installation of a monitoring well is acceptable. recommended her
to collect at least one soil sample (if no soil contamination noted) for lab analysis during well
installation to document soil quality. 2:00 PM:- sent email to Meredith. informed her that the
Department accepts the proposed scope of work for additional soil/groundwater investigation via
installation of a monitoring well, and recommends collection/analysis of at least one soil sample
(if no signs of contamination observed in soil column) during well installation to confirm soil
quality. also informed that upon receipt of this additional investigation data, all available
soil/groundwater/soil-gas sample results will be forwarded to appropriate parties for
review/comments (due to high CVOCs in soil-gas). asked her to provide schedule for additional
investigation/data submission. email copied to OER Shaminder, OER Alysha, Mr. Abadi and David
Winslow. 07/07/21-Hiralkumar Patel. 11:39 AM:- received message from Meredith. 11:43 AM:- spoke
with Meredith. she inquired reason for further investigation. informed her that the subject spill
case was reported based on findings of soil (via PID/olfactory evidence) and groundwater (via lab
analysis) contamination using temporary well TW-1. also, there is petroleum and CVOC contamination
in soil-gas samples. based on these data, the department requires further investigation to confirm
groundwater quality. informed Meredith that the department strongly recommends further
investigation via installation of permanent wells at former temporary well location TW-1 and the
proposed temporary well on sidewalk. also asked her to sample soil during well installation to
confirm soil quality above water table. due to CVOC presence in soil-gas and site's historical use
as tin can manufacturing, asked her to analyze samples for full list VOC/SVOC. 07/29/21-Hiralkumar
Patel. 10:43 AM:- received email from OER Shaminder stating that the project is stalled and not
moving forward. this email includes copy of email that OER Alysha sent to GZA earlier today stating
that if ownership is no longer going forward with redevelopment of the Site, they can request
termination of the VCP agreement. 12/31/21-Hiralkumar Patel. 1:20 PM:- sent email to Meredith
inquiring updates. 01/03/22-Hiralkumar Patel. 8:39 AM:- received email from Meredith stating that
they are no longer involved with this project. 01/04/22-Hiralkumar Patel. 12:53 PM:- left message

(Continued) **S110670127**

for Mr. Abadi. 12:59 PM:- sent email to Mr. Abadi and asked him to immediately submit investigation report (work plan approved via email on 07/06/21) for review. email copied to OER Shaminder and OER Alysha. 01/06/22-Hiralkumar Patel. 9:55 AM:- received email from David from GZA. he spoke with the client yesterday and their plans are to sell the property to a developer that will redevelop the property and implement the approved Remedial Action Work Plan. the redevelopment would consist of excavation of the contaminated soils to install the foundation elements, installation of a vapor mitigation system, construction dewatering and necessary treatment, and installation of a composite cover system (building foundation and 2 feet of clean fill over any landscaped portions of the Site.) David mentioned that the building will remain vacant until it is redeveloped. following remediation groundwater would be assessed to evaluate the effectiveness of the remedy. David Winslow GZA PH. (973) 774-3307 (347) 242-7107 fax (973) 774-3350 email: david.winslow@gza.com 01/11/22-Hiralkumar Patel. 10:24 AM:- spoke with Mr. Abadi, property owner's attorney. he claimed that the property is vacant for couple of years and the redevelopment plans were put on hold due to COVID-19 pandemic. due to loss of revenue, the property owner planned to rent the place for commercial use, but that plan was also canceled due to delineation requirements. Mr. Abadi stated that the property will stay vacant until sold in near future and the buyer will redevelop the site and implement OER approved RAWP. 10:38 AM:- received call from David. he stated that the property owner is asking for six months to sell the property, and will ask buyer to implement OER approved RAWP. 11:27 AM:- received email from David. he mentioned that the property owner has engaged a real estate brokerage firm (Compass) to sell the property along with the approved redevelopment plans. such plans include the removal of the existing soil below the site as described in the RAP approved by NYCOER. he also stated that any contamination that may exist occurred decades ago, long before the current owner acquired the property; furthermore, in addition to the investigations conducted by the prior owner, current owner conducted an additional remedial investigation and a spill investigation. David claimed that the results of such investigation did not suggest any immediate threat/concern that would need to be remediated prior to redevelopment especially considering the Site is vacant. David stated that their client is asking for another 6 months to complete the sales process before undertaking further investigation that may not be necessary when the buyer of the property excavates the contaminated soils in connection with the

(Continued) **S110670127**

redevelopment of the site.
discussed with DEC Austin. as NYC OER approved a RAWP (removal of contaminated materials during
site redevelopment), Austin asked to check with OER if site still enrolled in OER VCP and if so, is
there any agreement under VCP to ensure that a buyer will implement approved RAWP. 12:08 PM:- sent
email to OER Alysha and informed her about proposed property sell without redeveloping it. inquired
her if property owner has signed any agreement with NYC OER to ensure that a buyer will implement
an OER approved RAWP. email copied to OER Shaminder. 2:08 PM:- received email from OER Alysha
stating that the site has an E-designation for hazmat. this means that if the future ownership
decides to redevelop the property, they must work with OER to obtain any building permits. at that
time they will be obligated to follow the remedial actions described in the RAP.
01/21/22-Hiralkumar Patel. discussed with DEC Austin. based on available information and review of
available data, the department approves the property owner's request to wait for six months to
complete the sales process before undertaking further investigation (which may not be necessary
when the buyer of the property excavates the contaminated soils in connection with the
redevelopment of the site). 07/08/22-Hiralkumar Patel. 10:54 AM:- sent email to David inquiring
updates. email copied to Meredith Hayes (GZA). 07/26/22-Hiralkumar Patel. 10:19 AM:- sent email to
David inquiring updates. 10:21 AM:- spoke with Mr. Abadi. he mentioned that they have submitted
site redevelopment permit application to NYC DOB more than a year ago and waiting for approval. as
potential buyers like to have redevelopment plans approved prior to purchase, property transaction
will occur upon receipt of NYC DOB permit. asked Mr. Abdi to send email with this information and
DOB application number. as per NYC DOB record, a permit application to build a new six (6) story
building was submitted on 09/18/2019 and approval is pending. 11:14 AM:- received email from David
stating that most, but not all, of the objections raised in connection with the permit process have
been resolved (e.g., the team is still working through objections related to energy code
requirements, new sewer line connection, etc.). the team has been exercising reasonable efforts to
resolve the open objections but the DOB is very backed up, and things are moving incredibly slowly.
12/15/22-Hiralkumar Patel. 12:59 PM:- sent email to Mr. Winslow inquiring updates. email copied to
Mr. Abadi. 1:52 PM:- received email from Mr. Winslow stating that owner is actively working to get
all the permits and approval in place for the redevelopment. once the permits are in-place they

(Continued) **S110670127**

expect to have buyers take interest in the property.
11/13/23-Hiralkumar Patel. 10:59 AM:- received
email from Mr. Abadi responding to status update inquiry from NYC OER.
he mentioned that it took
long time to move through the DOB approval process. currently, the
building remains vacant, and is
listed for sale along with the redevelopment plans but finding a buyer
has been relatively
challenging due to higher interest rates. **follow up after June
2022.** **site map with sample
analytical on H drive**
Remarks: historical spill clean up is pending

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 8/2/05- temperary transferred lead to Woodward 10/26/05 sent letter to NYC Supreme Court requesting information on spill. 11/16/05 recieved phone call from Joe Desedaro (212-669-7242)of Con Ed. he said that the location of these tanks in now a federal court house. Tanks were removed in 1992 by the federal goverment. He will have a surperior send a letter giving more detail. 2/27/06 Sent letter requesting further information on spill. 3/1/06 recieved call in responce to lettter from a Dario Vascez saying that he will give the request to his leagal department to respond but he stated that the location of the tank along with fpart of a building was demolished at the time of the tank failure. The location is now a Federal Court House. 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo 1/2/13 AFrischeisen Dario Vazquez (Dir of Mechanical Ops and Maintenance) called. States a new court house was built there on top of the original tank location. Soil was excavated to create room for underground garage and machine room. Has no way of getting documentation. As per Kumar Patel, Dario needs only send an official letter stating that the above occurred. Awaiting this letter. 10/09/14-Hiralkumar Patel. reviewed available documents for DEC DeMeo. alternate address: 58-68 Centre Street, 500 Pearl Street no other spills found. PBS #: 2-216968. as per PBS record, the site had following tanks: - two (2) 25,000 gal #2 oil USTs, closed-in-place - one (1) 3,000 gal gasoline UST, removed in Mar. 1993 the subject spill was reported on 06/11/1992 due to tank test failure for #2 oil tank. as per previous notes, new court house was built above the former tank location. 10/27/14 TJD File review - based upon documentation provided, A new federal courthouse has been constructed over the previously removed UST's at this property. Work has been completed since 1992. No further action is warranted at this time. Spill is administratively closed.
Remarks:	E I R & R; 3K HORNER EZ-CHEK - GROSS

Site Description:	"The site is located on Centre Street in lower Manhattan and is currently occupied by the New York County Courthouse. Two gas holders were constructed in 1827 and were sold prior to 1865. Site Characterization field work will commence on January 12, 2008 and continue through February 2008. Site Characterization report was submitted in June 2008 and approved in July 2008. The SC report

CE - CROSS/LITTLE WATER ST. HS (Continued) **S105684685**

	indicates taht it does not appear that the site is impacted by contamination resulting from the former MGP operations. A letter of No Further Action was issued July 24, 2008 and a Project Completion and Recommendation to Issue Release was submitted to the OGC. Release letter issued September 15, 2008."
Env Problem:	"The Site Characterization identified no environmental impacts from the former MGP operations."
Health Problem:	"No evidence of manufactured gas plant waste material was found at the site, therefore, no exposure to manufactured gas plant waste is expected. "

Class:	Completed: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database
This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City?s Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

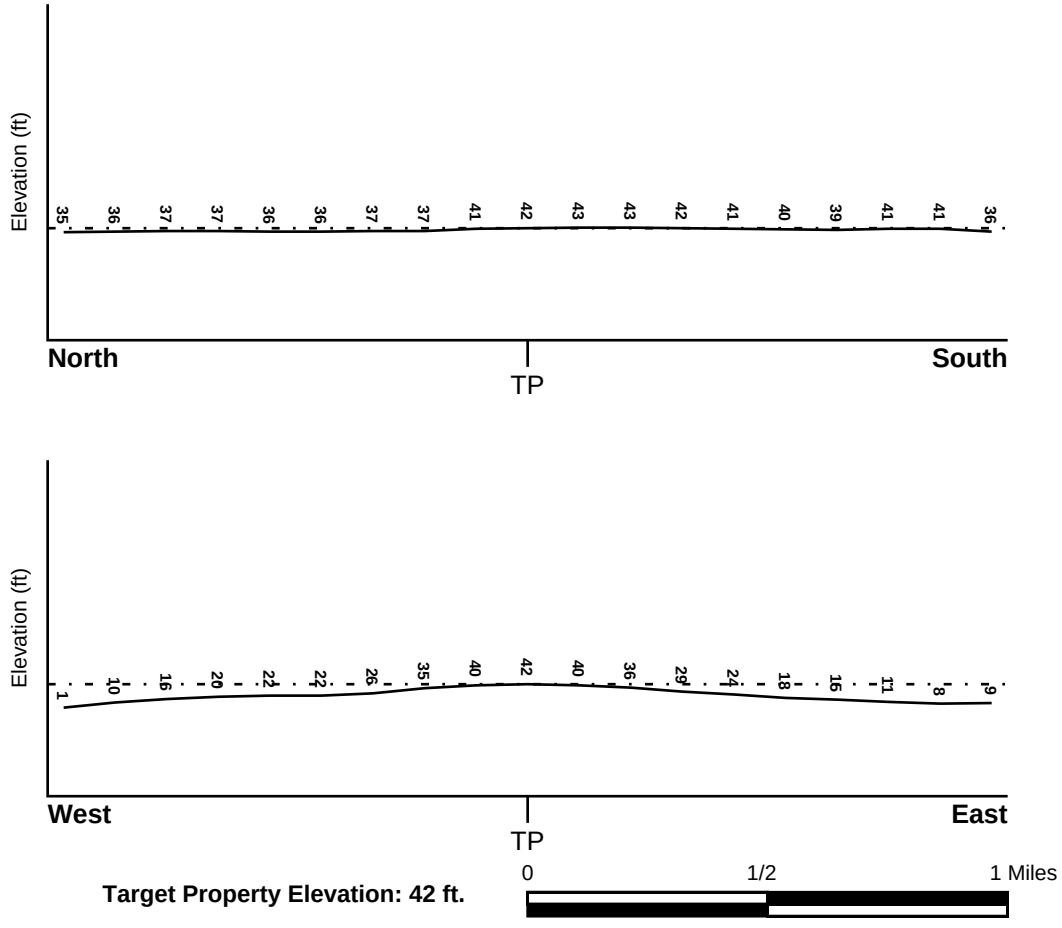
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile North
Site Name:	AMERICAN RADIUM INDUSTRIES
Site EPA ID Number:	NYD987001476
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovician		
Series:	Middle Ordovician (Mohawkian)		
Code:	O2 *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Appendix F Resumes of Environmental Professionals

BRIAN GOCHENAUR, QEP

ASSOCIATE PRINCIPAL

ENVIRONMENTAL SCIENTIST

Mr. Gochenaur is an environmental project manager with 20 years of experience in environmental due diligence, site investigation and remediation, fuel oil storage tank investigation and removal, soil vapor intrusion assessments, in-situ remedial technology, spill closure, vapor barrier and sub-slab depressurization system design and construction, emergency response, environmental and geotechnical site investigations, and health and safety monitoring. He has extensive experience with the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup, Voluntary Cleanup and Spill Programs and New York City Department of Environmental Protection (NYCDEP) "E" Designated and New York City Voluntary Cleanup Program (BCP) sites. His areas of expertise include Phase I Environmental Site Assessments, Phase II Site Investigations, and environmental consulting and oversight on large scale construction projects.

EDUCATION

B.S., Environmental Science
University of Florida

PROFESSIONAL REGISTRATION

Qualified Environmental Professional (QEP) certified by the Institute of Professional Environmental Practice

KAITLYN GIOIA

SENIOR STAFF SCIENTIST

ENVIRONMENTAL ENGINEERING

Ms. Gioia is an Environmental Scientist with the New York City team. Ms. Gioia graduated in 2016 from Adelphi University with a B.A. in Environmental Studies. Ms. Gioia's experiences include project management, leading field work, exposure to an assortment of environmental pollutants, remedial action procedures, & Phase I and Phase II Environmental Assessments. Ms. Gioia has performed Asbestos Hazard and Emergency Response Act (AHERA) inspections and evaluations in schools and State Pollutant Discharge Elimination System (SPDES) sampling for power plants and commercial facilities.

SELECTED PROJECTS

- 80-100 Flatbush Avenue, Brooklyn, NY
- 250 Water Street, New York, NY
- 35-01 & 35-09 Northern Boulevard, Long Island City, NY
- 23-15 44th Road, Long Island City, NY

OLIVIA MILLER

STAFF GEOLOGIST

ENVIRONMENTAL ENGINEERING

Ms. Miller is a staff geologist with over 4 years of experience in Phase I ESA's and due diligence. She has worked on various projects throughout Long Island, New York City, New Jersey, Connecticut, and Massachusetts. Ms. Miller is responsible for providing site exploration activities including, contaminated site investigation and remediation work; soil and groundwater sampling; vapor intrusion investigation; remedial investigation, design, implementation, and monitoring; pilot tests; data management, processing, and evaluation; and report preparation.
