SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity

generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 10 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 14 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/03/2025 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/02/2025 has revealed that there are 145 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY MOSF UST site within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 276 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

PFAS ECHO FIRE TRAIN: A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

A review of the PFAS ECHO FIRE TRAIN list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO FIRE TRAIN site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 37 UST FINDER sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 18 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

NY MGP: From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

A review of the NY MGP list, as provided by EDR, and dated 12/02/2024 has revealed that there are 2 NY MGP sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 6 EDR MGP sites within

approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

GE HUDSON RIVER SEDIMENT REMEDIATION PROCESSING AND TRANSPOR (Continued) **1000384273**

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 10/10/95: This is additional information about material spilled from the translation of the old spill file: TTF. 4/11/02 TRANSFERRED FROM O DOWD TO TIPPLE 5/1/02 SHAINDEL ENVIRONMENTAL KEN FRIEDMAN BEGINS DRILLING TO DO SITE ASSESSMENT, TIPLE WITNESSED FIRST BORING INSTALLATION. THERE WAS NO VISUAL OR OLFACTORY INDICATION OF PETROLEUM CONTAMINATION IN THE CONTINUOUSLY SAMPLED BORING. 5/2/02 KEN FRIEDMAN CALLED AT 7:45 AM TO INFORM ME THAT IN THE SECOND BORING A CLEAN SAND FILL(SIMILAR TO THAT USED AS BACKFILL MATERIAL IN SUBWAY CONSTRUCTION) WAS ENCOUNTERED AT 22 FOOT AND CONTINUED THROUGH TO 28 FOOT. WHEN THE DRILLERS PULLED THE SPOON FROM THE HOLE AT 28 FOOT THERE WAS AIR ESCAPING FROM THE BORING HOLE AS THE SUBWAY TRAIN APPROACHED THE SITE, AND THERE WAS A PROMINANT VIBRATION ON THE STEEL AS THE TRAINS PASSED. THE SITE IS ADJACENT TO THE SUBWAY, BOTH MR. FRIEDMAN AND I BELIEVE THAT THIS HOLE IS COMPLETED AND HE WILL ATTEMPT TO ATTAIN A GROUNDWATER SAMPLE FROM THE NEXT BORING. THE SITE IS NARROW AND AND THE SUBWAY IS PARTIALLY UNDER PART OF THE SITE. IF A WATER SAMPLE IS ATTAINABLE WITHOUT COMPRIMISING THE SUBWAY STRUCTUER IT WILL BE. MR.FRIEDMAN IS RESEARCHING THE POSSIBILITY OF A DEWATERING SUMP IN THE SUBWAY ALONG THE SITE TO POSSIBLY FIND ANOTHER WAY TO ATTAIN A GROUNDWATER SAMPLE REPRESENTATIVE OF THE SITE. 5/3/02 no sump associated with subway, apparently there is no dewatering necessary at this site. 5/16/02 left message for Kevin Hale to take a look at the report sent to him...concurs with no further action on this site

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and

CONCORD ELECTRONIC CORP (Continued) **1016199001**

compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	7/16/2013 - Feng - DEC J. Vought and J. Feng spoke to Ray Kahn of ESPL Environmental Services (212-330-7501, rkahn@espl.com). The site is under construction activities. They knew there were tanks. They found (5) 5,000-gallon tanks previously. They did more work and found (5) more tanks. These tanks are believed were used for gasoline. Gasoline related VOCs were detected in soil. No spill has been called in for the discovery of these tnaks. The site

WASTE OIL SPILL AT GREAT JONES LAFEYETTE LLC (Continued) **S113819127**

was formerly a gasoline
station. This site is an E-Designated site with NYC environmental
program and also a BCP project
with NYCOER. The site is developed into commercial and residential
use. Vapor barrier and passive
SSDS to be installed underneath the building. The NYCOER approved RAWP
which calls for excavation.
The waste oil tank was found during the excavation and spill was
called in. The excavation is 20-30
feet and endpoint will be taken. Contac information: Noam Shemel Great
Jones Lafeyette LLC 225 West
35th Street New York, NY 10001 (212) 631-0203 Called NYSOER Shaminder
Chawla and Hena. According to
them, the entire site will be excavated to 15 feet. They have
discussed this site with Bob Cozzy
and Jane O'Connell before they found those tanks. Hena will send us
the approve RAWP to see if DEC
has any concern and need something more. NYSDEC may need to deal with
the offsite issue. 7/29/2013
- conference call with Ray Kahn of ESPL, Hannah Moore and Shaminder
Chawla of NYCOER. The 11 tanks
were removed and the excavation was extended down to 8 feet. No
endpoint samples have been
collected due to the anticipated excavation for site development. The
site is now 3 feet below
street level. The piling is started but not completed yet. No vapor
complaint have been awared of
so far. DEC required further investigation, i.e. borings and endpoint
samples. 7/31/2013 -
conference call with Hannah Moore and Shaminder Chawla. DEC requires
at least 2 soil borings in the
former tank field area, register the tanks and will conduct site visit
upon the reach of expected
excavation depth. 8/1/2013 - sent letter requiring site investigation
to Great Jones Lafayette LLC
(the developer) and cc ESPL and OER. DEC requires soil boring in the
west side of southern tank
group and at former soil vapor SV-2 location, soil and groundwater
samples to be taken. DEC also
require the rest of the tanks to be registered and notification when
reach the limit of the
excavation. Work plan by the end of 8/2013. 10/2/2013 - reviewed Tank
Closure Report, dated
September 2013, by ESPL. On 7/12/2013, 5 tanks Tank 007-011,
550-gallon, were removed from the
southwest portion of the site. Tank 010 and 011 were observed to have
holes on bottom of the tanks.
The excavation was 30x30 and 8 feet deep. On 7/17/2013, a total of
527.87 tons (manifests dated
7/17/2013 and 7/22/2013)of impacted soil was removed from the site for
disposal at Clean Earth of
Carteret. email Ray Kahn of ESPL 1) Section 6, the excavated area for
each tank group (southwest
and middle of the site) was approximately 30x30 feet and approx. 8
feet deep. Any excavation in the
middle of the site? 2) How many tons of soil have been removed? 527.87
or 492 tons? While most of

WASTE OIL SPILL AT GREAT JONES LAFEYETTE LLC (Continued) **S113819127**

the soil were transported on 7/17/2013 as the manifests indicated, why there is one truck load on 7/22/2013? Is it from the same excavation? 3) When the previous found (6) 550-gallons USTs were removed other than the reported (5) 550-gallons USTs? Why not included these 6 tanks removal into this report? also required update for the required investigation work plan. 5/22/2015 - Reviewed spill history and discussed with J. Vought. Spill is closed based on: 1) All sources have been removed. (6) 550-gallon gasoline USTs were removed in March 2013. (5) 550-gallon gasoline USTs were removed in July 2013, and a total of 527.87 tons of impacted soil was excavated and disposed offsite. 2) Additional soil was excavated for site development under the NYCOER approved RAWP. The excavation depth was 13 feet for foundation and a cellar. Endpoint samples were collected at the terminus of the developmental excavation. No VOCs or SVOCs excceedances. 3) Soil sampling results indicated some SVOCs compounds and metals exceedances in the soil samples collected from the top 2 feet which will be excavated and removed as developmental excavation will be advanced to 13 feet. And the soil samples collected from depth of 34-38 feet show all non-detected of VOCs and SVOCs. 4) Groundwater sampling indicated there are still minor petroleum impacts. BTEX concentration, i.e. 16 ug/L ethylbenzene and 75 ug/L xylenes were detected which do not warranted further investigation and remediation. 5) Metal compounds in soil at 13 feet, i.e. 163 mg/kg lead and 1.03 mg/kg mercury. And metal dissolved in groundwater were detected, i.e. 0.043 mg/L lead. These levels of metals in soil and groundwater are not in a level that concerns shall be raised thus no further action is required. 6) Soil vapor samples were collected also. Low level of several VOCs were detected. The new building will require the removal of the USTs and excavation of 13 feet which will remove the source of the soil vapor contamination. 7) Vapor barrier and passive SSDS were installed for the new building that would protect occupants from exposure to the residual contaminants. 8) Inclusion of remaining contamination language in the spill closure letter in case site is redeveloped. Spill Closure letter to Great Jones Lafayette LLC and ESPL. Spill is closed.

Remarks: during excavation a tank was found, unk amt

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	4/18/2018 - Feng - Duty Desk. Spoke to DEP Solman. DEP was notified and responded to the reported spill. A contractor works for the NYC DDC is installing/replacing a pipe in front of 7 Great Jones Street to the end of the block. During excavation, contaminated soil was encountered. This is the 2nd time the DDC contractor encountered soil contamination during the pipe installation/replacement. They suspected the source of the contamination is from the building at 7 Great Jones Street. Solman saw the soil is contaminated. The contractor said they are not planning or are not trained to do the sampling. The will cover temporarily with metal sheeting before they permanently backfill. Solman did take some pictures and will send them over. Solman 347-415-5969 Management for 7 Grey Jones Street Carole Ferrara Associates 212-475-8811 DDC contact person Jean 646-508-1450 Talked to Ryan Piper. The DDC contractor need to dispose the generated contaminated soil properly. Spill is assigned to him. 6/25/18 Austin Con Ed also came across contaminated soil, on 4/18/18, while doing excavation work in front of this address (see spill # 1710777, closed and referenced to this spill event) See document files of that Con Ed spill for further information end DEC Piper received closure documentation from Aarco Env. Based on work to date, this spill is closed. See report in DEC Docs.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 4/12/04-Vought-Spill transferred from Tibbe to Rommel as per ROmmel. 10/14/04 Reassigned from Rommel to Sun. 10/22/04 Joe Sun called Penske's Environmental Engineer (Richard Saut) today and asked if they have ever submitted the Tank Closure Assessment Report for the seven (7)550-gallon underground storage tanks removed in 1994. He will check their record and get back to me next Monday. 10/28/04 Sun sent a letter to Richard Saut of Penske (previous owner) and two current owners, Michael Bogin of 23 BOnd Strret, and Ira Drukier of 40 Bond Strret, requiring them to submit the following documents by December 19, 2004: 1)Complete delineation of soil and groundwater contamination, 2) Investigation summary report, including a detailed description of a vapor mitigation efforts used in the construction of the residence including the installation of vapor barriers and/or sub-foundation venting systems, 3)Remedial action plan and Operation and Monitoring Plan (OMMP) and Surrounding property sketch. 11/12/04 Sun sent a letter to both Richard Saut of Penske and Michael bogin of current owner's Attorney and informed them that the Department approved that groundwater samples are not required for the property located at 23 Bond Street, Manhattan, NY based on the following subsurface investigations: 1)Tank Excavation Assessment by Handex, dated 11/18/03, and 3)Environmental Review by Environmental Compliance Inc., dated 12/24/03. 1/4/05 File Update by Sun:

FORMER PENSKE (Continued) **S106382647**

Since the concentrations of BTEX and Base Neutrals of soil samples taken from 23 Bond Street are all below NYS Recommended Soil Cleanup Objectives for Gasoline Contaminated Soils (TAGM 4046), the spill is now only applied to 40 Bond Strret. 10/05/05-File Update by Sun: On 10/05/05, Sun sent a letter to Joel Landes of Langan, the consultant for the property owner informing him that the New York State Department of Environmental Conservation (the Department) has received the Revised Phase II Site Investigation Report dated September 2, 2005 for this site. The Department has reviewed the report and contamination has been delineated to the extent possible. The Department requested that a Remedial Action Plan be submitted by October 31 2005 for review and approval. (Sun) 10/18/2005: Project reassigned from Sun to Andersen. 10/09/2005: RAP reviewed and approved. Recommended additions included 1) DER-10 method of soil sampling 2) 3 months of indoor air sampling after construction of the building. (S.Andersen) 1/27/06: Received a phone message from Joel Landes on Langan stating that excavation and implementation of the RAP has begun. The Project Manager of the project is John Gavras, phone: 212-479-5406. 2/27/06: Received a phone call from John Gavres. Will send excavation report and electronic copy of RAP. DEC Memo:	5/22/08 - Raphael Ketani. I spoke to Pete Lakotos of Terms Environmental (908) 464-0028. He said that the construction crew was digging and just uncovered the 1000 gal. tank. It used to contain heating oil. They did a tank test and it failed. The contaminated soil will be put on a plastic tarp and cover with plastic. A soil sample has been sent off for soil characterization. Once the analyticals come back, they will know where to send the soil and the soil will be removed from the site. They also found 3 more tanks. These tanks are encased in and filled with concrete. They will be pulled out and put on the side of the property for disposal. As far as he knows, they didn't leak. He will submit a PBS registration form to Albany DER. The site is owned by To Better Days, LLC, 155 Avenue of the Americas, NY, 10013. 5/27/08 - Raphael Ketani. I sent a CSL to the owners. 5/30/08 - Raphael Ketani. The CSL came back marked Insufficient Address. I called up Mr. Lakotos and asked him what the full address is. He stated that the owners were on the third floor. I changed the date, added 3rd Floor to the address, and resent the letter. 8/19/08 - Raphael Ketani. The case is being prepared for transfer due to a case realignment within the unit. The case manager

needs to make followup calls to see what progress has been made in the investigation. The owner
owes DEC an investigation report, and a new PBS registration.
12/04/08-Zhune spoke to Pete from
Term Environmental Service He said tanks were pull out contaminated soil was removed, samples were
taken everything is done. The report will be send within two days.
12/04/08-Zhune spoke to Jeff
Silverman he said a 15 story rental building will be build in these site. 04/16/09- Terms
Environmental Service Inc. sent the July 19,2008 UST Closure and Remedial Action Report. From May
20, to June 4, 2008, respresentatives from Term were present at the subject site to everdee the (4)
UST removals. The three (3) abandoned 500 gallon gasoline UST's were observed to have no holes and
no evidence of discharge were noted. Four soil samples were collected (S1,S2,S3 and S4) from
sidewalls of the pad at depths 13 to 13.5 fbg. Three base samples (S5,S6,S7) were collected at a
depth of 13.5 to 14 fbg. The results of these samples revealed that VOC's are well below the
RSCO's. Although levels of SVOc's were detected slightly exceeding the RSCO's standard in samples
S1, S2, S4, S5(Benzo(a)antracene, Chrysene, Benzo(a)pyrene, Dibenzo(a,h) anthracene), samples
S3-S6(Benzo(a)pyrene) and sample S7(Benzo(a)pyrene, Chrysene). The one (1) 1000 galoon #2 heating
oil UST was observed to have holes in the sidewalls and the soil were noted to be stained and
odiferous. Six post excavation samples were collected in total. S1,S2,S3,S4 were collected from the
sidewalls of the excavation at a depth of 14.5-15 fbg. S5 and S6 were collected at the base of the
excavation beneath the invert former UST at depths 15- 15.5 fbg. The analytical test results
revealed that all post excavation soil samples were below the RSCO's Standard for VOC's and SVOC's.
Water was no ecountered during remedial activities to a depth of 25 ftbg. Engineering core samples
collected at the site reported groundwater to be at approximately 33 fbg. Spill Closed.
12/08/11-Vought-Received call from Daniel Gabay (PH: 917-403-4554) representing Atlantic
Development Group) developer and he is requesting a formal closure letter as soon as possible.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was HALE VAPORS ENTERED BUILDING THROUGH LEAKS IN SEWERMAIN. SEWERMAIN WAS SEALED AND VAPORS NO LONGER A PROBLEM. Tank test and subsurface investigation concluded that tanks were not the source of the problem. No subsurface contamination was found. It was concluded that the bay system on the station, that was closed by the DEC, was the vapor pathway into the sewer and subsequently into the building.
Remarks:	GAS FUMES ARE ENTERING INTO THE BASMENT OF THE CALLERS BUILDING. UNKNOWN HOW, POSS FROM GAS STATION NEXT DOOR.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SUN 12/27/02 SPOKE WITH ROMEO SANTOS, THE PHASE 2 WITH A PROPOSED REMEDIAL ACTION PLAN WILL BE SENT TO THIS OFFICE WITHIN THE NEXT FEW WEEKS. DURING THE PHONE CONVERSATION WITH MR. SANTOS, I STATED THAT GROUNDWATER SAMPLES WILL BE REQUIRED IN ADDITION TO THE STANDARD CLEAN SOIL REQUIREMENTS. SEE PBS # 2-350575 1/23/2003 reviewed phase 2 , there was no remedial action plan, scaled site plan and lab results dated one day after report date original data not supplied, only transcribrd version. 6/18/03 TIPPLE'S RESPONSE TO SUBMITTAL1. Scaled Site Map -The Site Map must be a scaled plan indicating the location of all tanks and appurtenances. The tank locations, both horizontally and vertically (depth) are required. 2. Tank Registration- The Tanks must be Properly registered as per 6 NYCRR Registration of Petroleum Storage Facilities. Section1.5 of the June 13 submittal refers to the Extraction, transportation and disposal of tanks and related piping if tanks were removed please have this properly reflected on the PBS registration. The site plan indicates that there are 12 tanks total, one 4000gal.tank, and eleven 550gal. tanks, and one hydraulic lift located on this property, the registration indicates that there are 10 closed in place tanks, one 4000gal. gasoline, one 4000gal. diesel, eight 550 gal. gasoline tanks on this property. Please make sure all PBS records are updated and accurate for this facility. 3. Soil Samples -All samples will be analyzed for both VOC's and SVOC's due to the confusion concerning the product formerly contained in the tanks. The Department requires the analytical soil sample results from this tank excavation, the site plan/report must clearly identify the location of these endpoint results both horizontally and vertically, compare the excavation dimensions with the sample locations. Compare these levels to

PARKING GARAGE (Continued) **S106010294**

the NYSDEC Recommended Soil Cleanup Objective - TAGM Levels. 4. Groundwater Samples - As per our December 27, 2002 phone discussion, a minimum of one groundwater sample must be analyzed at this former refueling facility 12/03/03 DC env. Danny called//report arrived/no groundwater sample taken and elevated SVOC's in three seperate tank cluster locations. Awaiting recommendations for continued remedial strategies. 2/12/04 TRANSFERRED FROM TIPPLE TO ROMMEL. 03/15/04 Reassigned from Rommel to Sun. 05/04/04 Sun sent a Stipulation Agreement to Fred Spindler of ParK-It Management requiring complete delineation of the contamination, submittal of an Investigation Summary report followed by a submittal of a Remedial Action Plan. The Department also requires a PBS registration to be submitted immediately reflecting the former tanks and their subsequent decommissioning. The Department set a deadline of May 26, 2004 for signing of the Stipulation Agreement by the Respondent. 10/12/04 Sun sent a letter to Fred Spindler of Part-It Management requiring by 11/19/04 to submit the following: 1) collect one groundwater sample from each of four former tank fields, and groundwater flow direction must be established. All groundwater samples shall be analyzed via EPA 8260/8270. 2)one soil sample shall be taken for each remote fill location. The Department will evaluate the submitted information and determine if additional investigation is warranted. 1/11/06: Case reassigned to Andersen. Called consultant to ask if the excavation was completed on all sides of the tank, and to confirm that groundwater was not encountered during the excavation. He said he would review the file and call me back. 1/18/06: Called Romeo Santos (Consultant), spoke to secretary and she said he will call me back. 1/31/06: NFA issued.

Remarks: test results from a investigation - there is a old abandoned tank in the ground

case assigned to DEC Lakhani. 09/17/18 - Lakhani Metro Environmental Services performed a system
tank test on one (1) 1500 gallon heating oil tank. Test results were inconclusive. Further
investigation will be done. All piping has to be disconnected from the tank so the tank can be
tested alone. The tank top will have to be exposed and all piping will be disconnected. 09/24/18 -
Lakhani ABC hired to complete work. Renatus Group Duvi is handling the case at the address: Duvi
Bruman Realty LLC 390 Berry Street, Suite #200 Brooklyn, NY 11249 Ph: 718-302-2171 Fax:
718-302-2175 10/09/18 - Lakhani It was determined that the cause of the tank test failure was due
to a faulty manhole cover. The manhole cover was bent. After making the necessary repairs to the
existing manhole cover, the tank and the system were retested and passed. 10/10/18 - Lakhani
Closure Report (ABC Tank, 10/09/18) - ABC disconnected the line running through the existing
manhole cover, opened and removed the existing manhole cover for access into the interior of the
1500 gallon UST. All product was pumped out and the interior was cleaned. No visible corrosion was
observed. A pressure test was performed on the isolated tank and lines. The lines were able to hold
the pressure. The tank did not hold the pressure due to a bend in the manhole cover. ABC removed
the existing manhole and made the necessary repairs to the cover. The cover was replaced and all
the lines were reconnected. A tightness test was performed on the tank and system. The test yielded
passing results. ABC did not collected soil samples since there was no visible signs of
oil-impacted soil on the site. Spill is closed.

Remarks: unknown if line or tank - tank is in concrete clean up pending further investigation

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND/SACCACIO 9/5/2002 Transfer spill to Sangesland Sangesland spoke with Jeffery Doss of CEI (Certified Environment) at 212-717-7042. He asked what it would take to close this spill out. There was also some question on the address. Mr. Doss stated that one building is 16-20 Cooper Sq and the next building is 30 Cooper Sq. There does not appear to be a building listed as 20-30 Cooper Sq. Mr. Doss will look into the spill and address questions and will try to close out the case. 10/1/2002 Sangesland spoke with Michael Orlofsky (attorney for property manager). Mr. Orlofsky confirmed that the address of his client's building is 16-20 Cooper Sq and that it was this building which had the spill incident. Sangesland requested Mr. Orlofsky to have either Castle Oil

SPILL NUMBER 0004644 (Continued) **S104787360**

or the building's oil service company to prepare a letter which states the following: 1) Yes there was a spill at the site and it was traced back to a problem with XXXXXXXX line/pipe or valve. The problem was repaired and no longer leaks. All of the lines (street to tank and tank to boiler) were inspected and determined to be in good working condition. 2) This letter (with any back up info) should be forwarded to the DEC along with a request to close out the spill number. If such a letter comes to the DEC, the DEC will close out the spill and forward a copy of the closed spill report to the building owner or manager.
11/27/2002 - Sangesland received a letter from Michael Orlofsky requesting closure on the spill.
Attached to this letter was a statement from Jim Carey of Castle Oil (718-579-3400) that: 1) All of the oil lines associated with the tank, boiler (i.e. fill line, vent line, suction and return lines) are all in good working order. 2)The lines running from the fill port to the tank and from the tank to the burner are all visible. 3) There are no visible signs of contamination. Based on this letter from Castle, the spill has been closed out.

Remarks: OIL LINE FAILURE CAUSED SPILL ONTO FLOORING. CLEANED UP BY SUPER OF BUILDING.

VAULTED TANK (Continued) **S122479899**

DEC Memo: DEC Zhune responded to site. 6/18/18-Zhune responded to this spill. Spoke to Frank Burau(super). Frank said the building is a 12 floors building with 21 apartments. The tank is a 5000-gallons aboveground #2 fuel oil tank, located in the subbasement. Eastmond was empty the tank. There are oil outside the tank and oil on the floor of the boiler room. The owner of one of the stores (Stereo)located at ground floor discovered the spill when walked to the storage room located in the basement. Eastmond is cleaning the spill. Frank Burau 917-686-3433 7/3/18-Zhune spoke to Frank. Frank said Eastmond is going to remove the tank the next week. They will install a same size new tank and they will clean the spill. Andrews Management Geoffrey Hull 212-529-5688 ghull@andrewsBC.com John HPD 646-983-0461 9/8/20-Donna from ABC Tank Repair & Lining, Inc emailed the report. the closure letter stated that ABC Tank Repair & Lining, Inc (ABC Tank)was contracted to assist the owner in obtaining a spill closure from the NYSDEC for the spill incident case at 684 Broadway. Cause of Spill Case Incident : Oil spill Cause by (1)5,000 gallon AST located in tank room. ---------- . 12/16/19-1/14/2020-ABC tank cleaned & removed (1)5,000-gallon AST from the basement tank room. A pbs application & all required documents were submitted to the NYSDEC and the tank status was updated to closed-removed. . March 2020 -ABC Tank cleaned the oil stain on the cement pad under the tank area with soap/powder. The cement pad was in good condition with no visible sign of cracks. ABC drilled (3)holes in cement pad to obtain soil samples in the tank room which were submitted to a certified laboratory for analysis. A copy of soil samples results & site map is attached for your review. . August 27,2020-ABC Tank Drilled (2) holes in the cement floor of the boiler room and obtain (2) soil samples from the boiler room floor. A copy of the soil sample results and site map is attached for your review. The analytical results for all samples indicated VOCs and SVOCs not detected or below the NYSDEC CP-51 standards. Spill Closed

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo: Contact: CELESTE RUFER Safety Mgr @ NYU-212-998-1086 celeste.rufer@nyu.edu Hess is the delivery company. Under sidewalk fill line running into the sidewall of the basement. Break in the fill line spilling oil down the basement wall. Ms Rufer had the fill line cemented closed. Triumverite Environmental (Dan Ambrico 516-315-3877) is doing the quick cleanup . She will install a new fill line right away, and then put up for bid a sidewalk dig out of the old fill line to find out how much contamination there is in the soil under the sidewalk. 9/14/12 TJD CSL - line failure letter mailed and emailed to: New York University 740 Broadway 6th Floor New York, NY 10003 Attention: Celeste Rufer celeste.rufer@nyu.edu 7/2/13 TJD File review. Spill was due to a failed fill pipe associated with 8K AST which recently underwent a conversion from #6 to #2 FO. Spill discharge was

NY UNIV (Continued) **S107781589**

following initial fill following cleaning of tank - estimated 50
gallons of fuel was reported
discharged onto concrete basement floor. Closure report indicates that
following cleaning of tank
in preperation for coversion the curb fill pipe was tested and passed
- leak was from area of fill
pipe which penetrated building foundation - no information rearding
the tester was provided.
Triumvirate Environmental was retained for cleanup - granular
absorbents were utilized for cleanup
of conrete basement floor - a total of 5,700 lbs of contaminated
absorbents & oil soaked debris
were recovered, transported and properly disposed of during the
remedial process. NYU consultant
Langan Engineering retained the services of Nova Environmental
Services to perform a GPR survey
prior to a geoprobe investigation by Aquifer Drilling and Testing of
soils beneath the sidewalk in
vicinity of reported failure of underground single wall fill pipe - a
total of (4) soil samples
were collected for laboratory analysis. All target analytes are within
acceptable concentrations.
East Coast Mechanical Corp. was then retained to replace the failed
fill pipe with new piping in
secondary containment - followed by a reported passing test of new
piping. A reference to this work
is contained on an invoice but no tightness test report was provided.
Ilkay Cam-Spanos of Langan
Engineering was contacted via telephone today and was directed to
provide copies of tightness test
reports for (2) testing events which were referenced in Langan closure
report. Awaiting requested
documentation. 7/3/13 TJD Langan Engineering has provided requested
documentation. No further
action is required.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 11/26/97 mmm:GOT CALL FROM STEVE, WHO'S FATHER WAS THE OWNER OF THE PROPERTY 12 YEARS AGO, AND WANTED TO KNOW IF DEC GOT ANY KIND OF SITE ASSESSMENT REPORT. CALLED YELLOWSTONE AND LEFT MESSAGE. 4/12/04-Vought-Spill transferred from Mulqueen to Rommel as per Rommel. 1/18/2006 - Haggerty - Unable to reach Todd McIndoo from Yellowstone Industries. I believe his contact # (516-485-0000) is outdated. I also emailed him with no response Todd McIndoo . Keep open-site visit. 7/1/2008 Sangesland spoke to an attorney who represents one of the new owners in the new building that was built at the site. She will investigate what permitting was done with the city to build the building. The site was a gas station, now it is a 6 floor building with commercial condo units on the ground floor and condo apartment units above it. 7-30-2008- DECPiper Spoke to Don Middleton, consultant for bank. 631-321-4300. I Let him know we have no info on spill. He will look into it and report back. 9/22/2008 Sangesland spoke to Marie Precko(?) who is working for the owner trying to close out all open issues on the new building. Since it was once a gas station and the initial comments said there was soil/groundwater contamination, Sangesland said she would probably need: 1- Drawings/photos which show the area was dug out down to bedrock for construction. 2- Since the building is a corner unit (Bond St & Bowery) Sangesland suggested that soil borings (geoprobe) be taken on the sidewalk of each side of the building. 2/22/2010 - Sangesland spoke to Andy Robinson works for William Vitacco Assoc building expiditer for the building. violation. 212-791-4578 ext 206 8/16/11 - Austin - Received call from Allen Green (646-599-5869),
an expeditor who wanted to know how to get this spill report closed. I explained the basic
preliminary findings of the spill report, and the subsequent history showing many inquiries about
how to close this spill, with no submissions or additional info provided to the DEC on what has
actually been done since 1997. I referred Mr. Green to the current DEC project manager for this
spill (Ryan Piper) for more details on how to proceed. - end 1/18/17- DEC Piper received and
reviewed Subsurface investigation report. Based on results of soil, groundwater and soil vapor/
indoor air sampling, no further action is warranted. This spill is closed. Report in DEC Docs.

DEC Memo:	5/23/22-Lin-According to DEP industrial waste, a 55 gallon drum of waste oil wrapped in black garbage bag leaks oil when it rains. The parking lot worker was informed to properly secure the drum. There is only staining on the ground right now. DEC Harmandeep will inspect site to ensure that they secure the drum. The address is corrected to 410 lafayette St, manhattan. 5/24/22 - Sekhon On 5/23(PM) - spoke with notifier to get contact info for RP. Site inspected (PM). Met parking attendant (from 403 layfette st). 410 layfette st parking lot inspected, one 55 gallon drum filled with oil observed in the SW corner of parking lot. Attendant Eugenio told that management hired environmental contractor to pick this drum on Friday. At time of inspection drum was not leaking but wrapped with black plastic. VB 11/29/2013 - V. Brevdo No information, data, documents which would confirm tank test failure are available to the Department. No tank test results report from the alleged failed test are available. This is unconfirmed TTF spill case. Furthermore, PBS file 2-256277 for this address does not contain any documents which would confirm tank test failure in 1999, 2000, 2001 or 2002. To that effect, no any documents are in PBS file which would indicate any TTF at any time. The Department determined that there are no sufficient grounds / cause to pursue / enforce this unconfirmed case against site owner. PBS file shows valid PBS certificate dated 01/29/2013 expiring on 09/19/2017. Spill Case is closed effective 11/29/2013. VB

DEC Memo:	need to send CSL. 08/3/06-Zhune sent CSL to the owner Matthew Moss at: Peck Moss Hotel Group 250 Lafayette Street, Suite 38 New York, NY 10012 11/20/06-Vought-Review of Environmental Investigation and Remediation at 27 Cooper Square (Environmental Building Solutions, LLC. Mike Borello

COOPERS SQUARE HOTEL GROU (Continued) **S108129276**

646-290-5925). The site currently consists of a four (4) residential building surrounded on the
north, south and east sides by an open excavation that is associated with the construction of
future Cooper Square Hotel. Site formerly occupied by metal works, auto parts store, canal street
towing and tire store. Previous soil investigation by Eldon Environmental Management Corporation,
dated January 1990, for the propety located at 25 Cooper Square, a former gasoline service station
. As per investigation there were six (550-gallon) gasoline USTs and one 275-gallon waste oil tank.
Site investigation performed in July 2006 including the collection of two soil samples at depths of
3' and 6' below the basement floor joists. No groundwater was encountered during investigation.
Soil analyticals show 1200ppb benzo(a)anthracene, 8200ppb benzo(a)pyrene, 11000ppb
benzo(b)fluoranthene and 3900ppb benzo(k)fluoranthene, 12000ppb chrysene all from below floor
center sample. no upgradient samples were collected for comparison purposed as the area surrounding
the contamination has been excavated approximately 30 feet below ground surface for the Cooper
Square Hotel foundation. All contaminated soil that exceeds TAGM 4046 will be excavated and
disposed of... . If excavation reaches the water table before soil contamination guidance values
are met, a groundwater investigation will be conducted . Excavation of site performed from
8/06-10/06. ...approximately 250 cubics yards of contaminated soil and construction debris was
removed from the basement of the subject property . Four endpoint sidewall samples were collected
for analysis. Soil analyticals show relatively low concentrations of PAHs compared to above soil
investigation (highest concentration is 2950 benzo(a)anthracene, no VOCs. No additional soil was
removed due to construction constraints. ... a finished four inch concrete slab is to be poured to
further finish the basement . Report recommends no further action. DEC requires: 1)PBS registration
2)installation of vapor barrier due to SVOC exceedences under 27 Cooper Square.
11/20/06-Vought-Called Borello for above requirements and material was excavated from under
existing foundation of 27 Cooper Square. Gasoline tanks were formerly located in outdoor garden
portion on site plan. 27 Cooper had former auto repair operations on ground floor and residential
above. Outdoor garden is planned not to be excavated. No signs of pipes or dispenser island (are
covered by dirt). Samples collected were actually bottom as sidewalls of were composed of brick and
final excavation depth of hotel is 25-30' below grade. Hotel will not be located on top of former
gasoline UST location or contamination documented to be under 27

COOPERS SQUARE HOTEL GROU (Continued) **S108129276**

Cooper Square(which is to remain
in place). NYCDOB surveying 27 Cooper on a daily basis. Vought to send letter with above
requirements to: Peck Moss Hotel Group 250 Lafayette Street, Suite 38 New York, NY 10012 Attm:
Mathew Moss Vought received copy of Environmental Investigation Report dated January 1990 prepared
by Eldon Environmental Management. A total of six (550-gallon) gasoline USTs and one 275-gallon
waste oil UST which are located 6 to 8 feet below the surface . Work included installation of five
soil borings. The location of the borings was determined by the general vicinity of the six known
550 gallon gasoline tanks and the 250 gallon waste oil tank . PID survey showed no positive
readings. Borings ranged in depth from approximately 17 to 27 feet, where groundwater had not yet
been encountered . Site underlain by fill material which includes asphalt, ash, pebbles, concrete,
slag and wood . Soil analyticals showed no TAGM 4046 Required Soil Cleanup Objective exceedences.
Report concludes that it appears that there are no significant environmental concerns present at
the subject site . 12/12/06-Vought-Received fax from Environmental Building Solutions
(Borello)dated 12/6/06. Additionally the PBS Application was submitted to Nick Lombardo earlier
this week . Attached is letter from Sciame Construction Company (Michael Gordon 212-232-2200) that
soil bariier will be installed as per DEC and DOH requirements. Spill closed by Vought. Sent NFA as
per letter request.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #138160: 7/11/01 19:30 hrs. Sean Henihan #16850, Splicer Underground North, reported at 18:46 hrs. that he found at 18:40 hrs. approx. 15 gallons of green fluid and approx. 15 gallons of water in service box SB37911 located at the north west corner of Bleeker Street & Lafayette Street. The green fluid is possibly anti-freeze or the green dye that the water dept. uses to test for leaks in their pipes. Considering the amount of green fluid found (15 gallons) it is possibly the green dye used by the NY City Water Dept. He was at this location at the request of the Manhattan Environmental Desk and the ERT, Sean Mahoney. Stanley Baldwin of the DEP was at this location earlier in the day and reported to the ERT that a green substance was coming from a Con Edison structure. ERT, Sean Mahoney called the Manh. Environ. Desk at 14:45 hrs. and reported that Mr. Baldwin of the DEP is claiming that the green substance or fluid is coming from a Con Edison manhole. The ERT and Mr. Baldwin agreed that the fluid was either anti-freeze or the green dye used by the Water Dept. and was non-hazardous. The Environ. Desk called Mike Donahue & Dennis Romano of the Underground South to veify if there were any crews working in this area. They both stated that there were no crews working or assigned to this location. Sean Henihan reported that there was a trench approx. 2 feet north of this service biox which had a pipe running through it. The trench is approx. 12 inches deep x 4 feet long x 2 feet wide. The trench contained approx. 7 gallons mixture of the green fluid and water. It appears that the green fluid from the trench migrated into our service box. UPDATE 7/12/2001 @ 01:50 HRS Lab results for Lab Sequence 01-07266-001 Aroclor 1242 < 1.0 ppm 1.0 Aroclor 1254 < 1.0 ppm 1.0 Aroclor 1248 < 1.0 ppm 1.0 Aroclor 1260 < 1.0 ppm 1.0 UPDATE: 8/09/01 Jimmy Rodriguez, Underground South Supervisor, reported at 11:13 hrs. on 7/13/01 that the cleanup of this manhole has been completed. He reported that 20 gallons of fluid was removed on 7/12/01 and 10 gallons of fluid was removed on 7/13/01 for a total of 30 gallons. One drum of PPE (solid waste) was generated. The crew pumped the structure, washed it with one gallon of citrus cleaner and flushed the service box with the Vactor truck. The cleanup was completed at 11:00 hrs. 8/9/01 14:12 Received lab results lab sequence # 01-07267-001 Insufficient amount of sample extracted to perform

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 2/25/2003-Vought-Spoke with Fred Caputo (Bayside Fuel 718-333-8880) and fill goes under sidewalk and into building. Spill caused by leaking fill line. Line was replaced and sidewalk was backfilled. Last delivery made on 2/3/2003. 4/11/2003-Vought-Received message from Tony (212-226-6500) that Miller performed work. Vought called Tony and Miller removed approximnately 10 cubic yards of soil were removed and fill line broke releasing fuel into vault. NYSDEC requires Site Plan, photos, disposal manifest, work invoice. Vought will notify Tony if endpoint samples are necessary once report with above requirements is received. 5/21/2003-Vought-Recieved the following from Tony Poulter: authorization for contractor (miller Environmental) to proceed, Miller invoice (for disposal of ten yards of soil), daily job report and disposal manifest. Vought called Tony and told him that NYSDEC requires endpoint sampling from below depth of excavation and analyticals. 11/13/2003-Vought-Two soil cores performed by Miller on 5/29/03 from under former tank location. Soil analyzed for 8021/8270 analyses and show no TAGM 4046 Soil Cleanup Objectives exceedances. Spill closed by Vought.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	7/27/23 - Ye - DDO - PBS #2-601677. Spoke with the caller on 7/24. The facility is owned by the NYC Department of Homeless Services (DHS). MES was performing an annual tank tightness test when the test failed. They noticed a hole on the vent pipe in the exterior and notified DHS of their findings. Requested the contact for the facility and asked which tank failed the test. They said that Tank 1 and 2 are connected by a single vent line, and attached a photo of the compromised vent line. Sent a TTF letter and assigned the spill to DEC Lin. NYS DEPT. OF HOMELESS SERVICES 101-07 FARRAGUT RD Brooklyn, NY 11236 ATTN: Frank Garofalo / Sterling D. Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
