DEC Memo:	1/20/15 TJD Spill reassigned from Sangesland to DeMeo. Neil Tomassetti from Eastmond submitted a closure letter and has requested a file review. 2/5/15 TJD File review. Two 20K USTs in a basement garage, Tank #1 passed tightness test on July 11, 2013 - Tank #2 failed. Investigation of tightness test failure for Tank #2 revealed several conditions including: a cracked elbow in aboveground fill line, a hidden (open)vent behind a wall and a corroded active vent line. Repairs were made to the tank system and Tank #2 passed a system test on 10/21/14. Following the passing test of Tank #2 the contractor reports the building management determined they had excess capacity as the building has been converted to dual fuel (primary fuel - natural gas). As such, Tank #2 was to be permanently closed - Eastmond then cut three holes in the bottom of Tank #2 along centerline and collected samples - additionally three holes were cut in the sidewall of Tank #2 facing Tank #2 and hand directional borings were advanced below Tank #1 to collect samples to assess the

APT BUILDING TTF (Continued) **S110490684**

condition of sub-surface soils beneath both tanks. Samples were submitted (6 total)to a NYS ELAP certified laboratory for analysis. All results were non-detect. Based upon above information no further action is required. All documentation has been uploaded to DECDOCS. Spill closed. DeMeo informed Neil from Eastmond that the facility's PBS registration must be updated to reflect change in status.

Remarks: 2 tanks on property - 1 failed - cleanup in progress

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 0210175-Vought-Spoke with Scott (Pioneer Mangement) who just received, and will approve of proposal to isolate and retest. Faxed and mailed tank test failure letter on 1/9/2003. 7/21/03 TJD Demeo contacted Pioneer Management to determine tank status as letter received from Pioneer (Addressed to Ben Conlon)reveals only tank test failure of 1/8/03. Letter to DEC dated 6/30/03 requests the Department cancel any and all civil penalties concerning this matter. 6/30/03 letter signed by Scott Alcheh. Demeo called Pioneer and asked for Scott Alcheh and was told no such person works for Pioneer and I must have wrong number. Upon further identifying myself and DEC the individual who answered phone (John Stein) now recognized name but states that individual is unavailable. Upon further questioning regarding tank status Mr. Stein states that Pioneer is in the process of obtaining permits to uncover tank. Mr. Stein is unable to provide information regarding tank status but he has stated tank probably still contains product. Demeo directed Mr. Stein to immediately empty tank and proceed with directives of 1/8/03 correspondence from DEC. 7/27/04 TJD Open spills on property being consolidated. Second TTF (0307640) closed and cross-referenced. 6/21/07 Matthew Klaas (Albany DER) -Drafted a letter to Pioneer management at 27 west 72nd street, New York, NY 10023, informing them they have only sent copies of failed tank tests, requesting further information. 9/29/09 - Austin - Transferred from Albany assignment to Piper, for further investigation. - end 11/2/09- Tank closed 11/03.in place. 2/11/11- DEC piper sent infor request to Mr. Leonard Franzblau Pioneer Management 345 West 35th Street New York, NY 10001-1706 1/3/17- DEC piper sent info request to Mr. Leonard Franzblau 4900 North Ocean Blvd Apt 1213 Ft. DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was K FOLEY 07/28/00 TIPPLE RESPONDED TO THE SPILL AT AN AMOCO STATION LOCATED AT 610 BROADWAY THE STATION HAS 4 UST'S BELOW BASEMENT OF PARKING GARAGE. PIPING FROM THE TANKS TO THE PUMPS ABOVE IS SITUATED

AMOCO (Continued) **S105135274**

IN A SERIES OF SOLID CONCRETE PILASTERS ON THE WALL OF EACH LEVEL OF THE PARKING GARAGE. GASOLINE WAS LEAKING OUT OF THE CONCRETE PILASTER IN THE LOWEST LEVEL OF THE PARKING GARAGE. THE ELECTRICITY TO THE PUMPS WAS TURNED OFF IMMEDIATELY, WHILE MONITORING THE LEL, AUTOS WERE REMOVED FROM THE GARAGE. TYREE ED WALDRON (516-790-2189) WAS ON THE SCENE. BIO-SOLVE WAS APPLIED TO THE GAS TO REDUCE THE VOLATLES, AND SPEEDY DRY WAS USED TO SOAK UP ANY FREE PRODUCT. WORK WOULD CONTINUE THROUGH SUNDAY TO FIND THE SOURCE. THE GAS STATION AND PARKING GARAGE WILL REMAIN OUT OF SERVICE UNTIL THE PROBLEM IS SOLVED. 07/30/01 A HOLE IN THE SUPPLY LINE BETWEEN THE TANKS AND THE PUMPS WAS LOCATED IN THE SECOND LEVEL OF THE PARKING GARAGE. REPAIRS ARE SCHEDULED FOR TUESDAY. 12/24/2003-Vought-Spill transferred from Rommel to Vought. Spill closed by Vought due to open spill #0102242 at same location. 12/31/03 Reassigned from Vought to Foley. 1/2/04 Delta closure request from 6/17/03: Leaking pipe section was repaired in August 2001. Tyree dismantles mid-grade suction piping system to isolate the leaking pipe. Pipes were encased in concrete. Tyree isolated the piping with the pinhole leak which was identified between the first and second levels of the garage. Tyree completed hydraulic integrity testing as directed by FDNY and all lines passed. Tyree reconstructed the concrete-filled pipe chase and restored to serivce. (KMF) 1/20/04 Sent NFA to Amoco for 0209761, 0102242, 0104555. (KMF)

Spill transferred from Vought to K Foley. 1/2/04 UST closure report reviewed (Delta, 7/23/03). Report summarizes the

excavation of four 4000gal fiberglass coated double-walled steel gasoline USTs and associated
piping. Service station is above a three-level underground parking garage. USTs were located
beneath the concrete floor on the third underground level of the parking garage. The piping
extended upwards through the concrete encasement along the interior wall of the garage. Delta
submitted a closure request letter for spill #0104555 which summarized maintenance activities
performed to repair the failed piping associated with this spill number and passing line test after
repairs were made. Tanks were observed to be in good condition. PID readings were generally less
than 10ppm with the highest reading at 75ppm. Due to the absence of petroluem-impacted soil, no
soil was removed from the site. Four post-ex soil samples were collected from outside the tank
excavation vault and did not identify any VOCs above TAGM. Spill #0102242 was called in upon
discovery of impacted soil at the location of the off-site former remote fill ports during
maintenance work. Four drums of petroleum contaminated soil were generated as a result of the
impacted soil discovery. During UST closure, approx 80ft of piping beneath the concrete floor of
the third level underground parking garage was removed. Six soil samples were taken from beneath
the piping(1.5'). No VOCs were detected above soil cleanup objectives. An additional 30' of piping
vertically rose in a concrete encasement along the interior parking garage wall to the remote fill
ports and pump islands. Of note, no soil was encountered along the piping and no soil was
encountered during removal of the pump islands (above a parking garage). 1/20/04 Sent NFA to Amoco
for 0209761, 0102242, 0104555. (KMF)

Remarks: THEY WAS A LEAK IN THE ROMOTE AREA OF THE FILL PUMP.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT SPILL TRANSFERRED FROM VOUGHT OBLIGADO 10/26/05 - Obligado - Site also known as 300 Lafayette Street under spill number 9408102. Close older spill number 9408102 and consolidate with new spill number 0230042. 11/21/05 - Obligado - Spoke with Steve Muller, well installation planned. 12/2/05 - Obligado - Review baseline assessment report, submitted by Delta, 10/02. At time of assessment, site had 3 active 4000 galon USTs, and was an active Gaseteria. Between Jan 01 and Dec 02, three soil borings advanced to 20 to 30 ft. Two more soil boroings advanced in Jan 02 to 48 ft. A total of 9 soil samples collected. Soil results in ppb: SB1 (13-15) - 1250 xylenes SB1 (18-20) - 2060 xylenes SB4 (45-47) - 198 MTBE SB5 (40-42) - 1850 xylenes, 62,350 total VOCs Two of the soil borings turned into wells. Ground water results in ppb: MW4 - 4.92 benzene, 171 ethylbenzene, 868 xylenes, 247 MTBE, 105 arsenic, 461 chromium, 728 lead MW5 - 220 nbutlybenzene, 253 124trimethlybenzene Sensitive receptors include 1 federal public supply well 1.1 miles northwest, church 750 ft southeast, St.Patrick elementary school 800 ft southeast. Depth to water is 41 ft. Ground water flow is westerly-southwesterly to Hudson River. Soil is predominantly sand. 12/7/05 - Obligado - Meeting with DEC, ASR, Gaseteria. Decide to postpone drilling at this locattion to advance other higher priority sites. 1/5/05 - Obligado - Spoke with Steve Muller. Drilling scheduled for 1/12 1/18/05 - Obligado - Spoke with Steve Muller. Drilling postponed. Drilling will occur this week. 3/2/06 - Obligado - Received Final Remedial Action Plan, submitted by ASR, dated 3/1/06. According to report, 3 wells installed by Air Rotary method to 70 ft bgs. Ground water at 45 ft bgs. 1 composite soil sample collected from each well at 40 - 50 ft bgs depth interval. Only one impact (300 ppb napthalene) at one soil boring. Three ground water samples show non detect. Request NFA. Call Steve MUller. Ask why air rotary drilling method was used to drill through silty sand. Also why wells were installed to 70 ft, and screening a 30 ft interval. He said he would have to look at the report and the field notes and he would get back to me. Told him from now on I would like to see workplans for all subsurface investigations before drilling. 3/7/06 - Obligado - Phone conversation with Steve Muller. He said there were some errors in the reporting, and that wells were installed by hollow stem auger to 50 ft. He said he would submit a revised report. 3/20/06 - Obligado - Review revised report, wells drilled to 50 ft with augers. Ground water analyticals show non detect for groundwater. Discuss with Joe Sunn, close spill number based on no ground water impacts. 1/4/08 - Obligado - Received well abandonment report.
Remarks:	Contaminated soil and groundwater found. Data reported to DEC by Delta despite knowledge by Gaseteria since 8/5/2002.

DEC is waiting for a report. 8/24/15: Mahat DEC Mahat sent an email inquiring about the progress on the spill case. 4/6/16: Mahat DEC Mahat received an email update on the spill case. Eamil: Good Morning Santosh, It was nice speaking to you this morning. As discussed, Impact Environmental has been contracted by the owner of 24 Second Avenue, Manhattan (Spill 14-09689) to remediate and attempt closure of the open spill case during site redevelopment activities. Currently, all existing buildings have been demolished and SOE/underpinning is underway. Redevelopment proposes the entire site to be excavated to approximately 18 -20 below grade for the construction of a residential building. We will prepare and submit a Spill Remedial Action Work Plan for this site within the next two weeks. In the meantime please contact me with any questions. Below please find my contact information. Thank You, Ben Hernandez Salazar Project Manager O: 631-269-8800 Ext. 142 C: 631-334-2354 IMPACT ENVIRONMENTAL A WRAP will submitted to the Department for a review. 7/27/16: Mahat A RAP on the spill case has been submitted to the Department. It has been uploaded on D2 for reference. The RAP is under review. 9/12/2016 - V. Brevdo Spill Case is transferred from Spill Prevention and Response to Remediation Section B due to project manager Santosh Mahat departure to the other DEC Program, as per 9/9/16 discussion between Randall Austin and Vadim Brevdo. VB 9/12/16 - Raphael Ketani. The spill case was transferred to me during a caseload realignment. 9/23/16 - Raphael Ketani. Alternative property location addresses are 20 to 24 2nd Avenue and 30 to 32 East 1st Street. According to ACRIS, the block and lot are 443 and 1. There is a deed dated 7/7/14. The address of the buyer is listed as 24 Second Avenue Owner, LLC, c/o Arthure J. Israel, Esq. A later owner address is AORE Second Avenue Partners, LLC, 53 Greene Street, 3rd Floor, NY, 10013. There is an additional Party 1 consisting of Porytko Porperties, LLC, 337 East 5th Street, NY, 10003. The latest address for the owner is 24 Second Avenue Owner, LLC, c/o AORE Holdings, LLC, 49 Bleeker Street, Ste. 301, NY, 10012. The earlier PBS registration is #2-032158. Three USTs were listed. These were two 4000 gal. tanks which were installed on 12/1/85 and one 3000 gal. tank which was installed on 12/1/81. All had gasoline. All 3 were closed on 1/1/98. A later PBS registration number #2-603153 was found. It listed the same three large gasoline USTs and a 240 gallon waste oil UST. The owner is the same, Westfield Second Associates. The RAP could

24 SECOND AVENUE OWNER LLC (Continued) **S117394134**

not be found. Therefore, I
sent Ben Hernandez Salazar (631-269-8800 Ext. 142/cell
631-334-2354/bhernandez@impactenvironmental.com) an email requesting
the document. Mr.
Hernandez-Salazar sent me a response email. He stated that the SOE and
underpinning operations have
been completed and deep excavation is under way. Excavation has not
yet reached the spill area
depth of 13 feet below grade but we anticipate this depth to be
reached within the next week or
two. He included a link to the 6/20/16 Impact Environmental Spill
Remedial Action Plan. On the
title page of the RAP, the Impact Environmental client is listed as
AORE Holdings, LLC at the 49
Bleeker Street address. I reviewed the RAP. The first part of the
document was the RAP itself. It
included the Island Pump and Tank 6/25/14 Subsurface Investigation
Report and the Island Pump and
Tank March 2015 Tank Excavation Assessment Report. I reviewed all 3
documents. It was stated in the
RAP that excavation will take place site wide down to 20 feet. After
this, endpoint soil samples
will be taken. A 20 MIL vapor barrier will be installed beneath all
foundation slabs and behind all
subgrade foundation walls. An engineered composite cover will be
installed over the entire site and
will consist of a 5 inch thick reinforced concrete foundation slab and
12 inch thick reinforced
foundation walls. The site was a gas station and a car repair shop
from the 1960s to 2014. It
became a BP station sometime during this period. There were 4 pumps, 3
large gasoline USTs and 1
small waste oil UST. Gasoline impacted soil was discovered on 12/29/14
during the removal of a UST.
The 4 USTs and the pumps were removed by Island Pump and Tank.
Impacted soil was found at 13 feet
below grade as a result of a series of exploratory borings. The soil
was excavated down to 13 feet,
but the pit was later backfilled with clean soil. Groundwater was
found at 35 to 40 feet below
grade. Impact Environmental does not expect it to be affected by the
spill. The proposed site
development will be mixed use with a commercial facility on the first
floor and 9 residential
levels above. A basement is included as part of the development. The
Subsurface Investigation
Report demonstrated that very elevated soil contamination was found at
an outside drain. However,
boring samples from 25 feet or below showed little or no VOC
contamination. Also, groundwater
impacts were very low. A review of the Tank Excavation Assessment
Report showed that very high (N1,
BE1, BE2, BW2) to extremely high (E1) total VOC contamination was
present at a number of locations.
The contamination was found in soil samples that were taken from 8 to
12 feet below grade. All of
these locations were situated within the footprint of excavation area

#1. I found the documents to
be acceptable and sent an approval email to Mr. Hernandez-Salazar.
2/21/17 - Raphael Ketani. As no
information has been forthcoming in many months regarding progress at
the site, I sent Mr.
Hernandez-Salazar (bhernandez@impactenvironmental.com) an email
requesting an update and the closer
report. 4/14/17 - Raphael Ketani. As no information has been
forthcoming in many months regarding
progress at the site, I sent Mr. Hernandez-Salazar
(bhernandez@impactenvironmental.com) an email
requesting an update and the closer report by 4/28/17. I added that
since we have no documentation
that the spill had been remediated, the site is still in violation of
the Department's
environmental laws and can and may be subject to legal action and
fines. 4/28/17 - Raphael Ketani.
Today I received the Impact Environment Spill Closure Report dated
4/28/17. The report was prepared
for AORE Holdings, LLC, 49 Bleecker Street, Ste 301, NY, NY, 10012.
The areal extent of the site is
about 7,715 square feet. Site elevation is 40 feet above mean sea
level. Boring took place down to
35 feet bgs. Bedrock was not encountered during the investigation or
the development of the site.
Previous investigations found the soil to consist of historical fill
(from 5 to 19 feet thick
according to the boring logs) over, in general, light to dark brown
fine to medium grained sand
with gravel. The previous investigations also encountered groundwater
at 35 to 40 feet bgs.
Groundwater flow is from west to east to the East River. The site
operated as a filling station and
auto repair shop from the 1960s to 2014. The NYS DEC PBS database
indicates that three 4000 gallon
gasoline USTs and one 240 gallon waste oil UST were below the site.
The current spill case was
opened when grossly contaminated soil was discovered below the site.
The proposed use is mixed
residential/retail commercial. A ten story building with a footprint
that occupies the entire
property is presently being constructed. The building will have a
subgrade cellar with 2483 square
feet of commercial space, tenant recreational space, tenant storage
facilities and building utility
rooms. The cellar foundation extends down to 18.5 feet bgs throughout
the site. The excavation
generated 9246.72 tons of soil and fill. The grossly contaminated soil
was excavated to 13 feet bgs
within the area of the former pump island. The total amount consisted
was 36.78 tons. Some of the
material was shipped to Bayshore Recycling Corp. in Keasbey, NJ. A
total of 1346.58 tons of soil
and fill was shipped as non-hazardous material to Impact Recovery &
Reuse Center in Lyndhurst, NJ.
Another 7863.36 tons of non-hazardous soil and fill was removed to the
Former NJ Zinc site in

24 SECOND AVENUE OWNER LLC (Continued) **S117394134**

Palmerton, PA. The Palmerton facility also received much of the soil from the spill area. All of the facilities were licensed and/or regulated to receive the material. A Stego Wrap brand 20mm thick vapor barrier system was installed below the entire foundation slab and behind sub-grade foundation walls. A composite cover system consisting of a 5 inch thick concrete foundation slab underlain by 12 inch to 55 inch thick concrete mat slabs and a 6 inch thick layer of clean 3/4 inch gravel and 12 inch thick concrete foundation walls were installed throughout the building footprint. Six post excavation bottom endpoint samples (EP-1 to EP-6) and seven sidewall samples (SW-1 to SW-7) were collected from the soil within the spill area excavation on 9/30/16 and on 10/5/16. One bottom endpoint sample was collected for every 900 square feet of area at a depth of 19 to 19.5 feet bgs (from 6 to 12 inches below the excavation floor). One sidewall sample was collected for every 30 linear feet of sidewall at a depth of 13 to 15 feet bgs. The results for all of the bottom and sidewall samples were almost entirely non-detect for VOCs, with the exception of some very low naphthalene hits. Soil sampling results were included for total metals and TCLP lead. However, both sets of data were low in concentration. Sampling results were also included for the drains from the former service station and were very high. However, as the facility had been removed and deep excavating had taken place to remove the soil down to the design grade, this information had no affect on the safe development of the site and was only historical. Tickets and manifests were included in the report. I had no comment about them. I found the Spill Closure Report to be acceptable. As the entire volume of contaminated soil had been removed and the end point sample results were almost entirely non-detect and as groundwater was unaffected, I determined that the spill had been remediated and that the incident no longer posed a threat to the public or the environment. I sent a Spill Closure Letter to 24 Second Avenue Owner, LLC, c/o AORE Holdings, LLC at the 49 Bleecker Street address. I closed the spill case effective today.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 5/28/2004 Sangesland spoke with Adam Smyth of Triumvirate Envir. He says NYU has a 4,000 gal UST under the sidewalk in front of it's building at 111 2nd Ave. Piping from this tank enters the basement of the building and runs an oil fired backup heating system when their interruptible natural gas gets cut off during extreme cold weather. NYU Maintenance people noticed staining on the wall around these pipes. The wall was opened and it was determined that the pipes were rotten. All pipes were replaced and the tank/pipes passed a pressure test. NYU would like to keep this tank in operation. Additional horizontal borings were taken through the bottom of the basement wall into the area under the buried tank. These soil samples came back quote hot unquote. Triumvirate Environmental is in the process of completing a delineation of the site. They will either propose some form of remediation in place, or they will propose excavating the tank, contamination & then replacing the tank. This report will be sent directly to Jake Krimgold. Contaminated soil letter sent to Louis Ortiz NYU 14 Waverly Place New York, NY 10003 6/24/2004 Sangesland called Stephanie Kung at NYU to ask for a status update. She said she has a draft copy of a work plan from Triumvirate Environmental. A hard copy of this plan should be submitted to the DEC within the next week or so. The plan outlines additional delineation and proposed remediation options. A decision has NOT yet been made if the tank needs to be pulled. 7/26/04. J.Krimgold talked to Justin Williams (Triumvirate Env.). He stated that drilling will be commenced on 7/30/04. 10/21/04. J.Krimgold has reviewed the Site Investigation Report submitted in August 2004 by Triumvirate Env. The report was not accepted for the following reasons: Boring logs with soil screening results are not included in the report. The drawing in the report is not up to scale and lacks compass orientation. Soil sampling results performed by ACE-ATLAS Corp. are not included in the report. Also , the location of this sample is not shown on the drawing. Even though it is stated that this sample was taken roughly 12 inches off the floor the floor elevation is not defined in the report. If, as stated in the report, no evidence of an oil leak was found during tank top excavation, than it is unclear what is the source of the oil on the basement wall and elevated levels of

NYU (Continued) **S106471773**

contaminants found in the ACE-ATLAS sample. Contaminant levels in boring number 1 seems to be increasing with depth, however, no explanations were given to this fact. Lateral and vertical delineation of a petroleum release has not been completed. The Summary statement that samples fall well under the cleanup objectives is incorrect. All soil samples presented in the report exhibit contaminant concentrations above NYS TAGM levels. Requested to correct these deficiencies and resubmit the report for Departmental review. 3/1/5/05. J.Krimgold reviewed the Site Investigation Report Addendum submitted by Triumvirate Env. on February 18, 2005. The report concludes that soil in the vicinity of UST and piping had been impacted. However, no recommendations were giving regarding remediation or further actions at this site. J.Krimgold contacted Triumvirate (Adam Smyth). He will submit recommendations in a week. 7/27/05. J.Krimgold reviewed a letter submitted by NYU dated May 27, 2005. In the letter NYU concludes that contamination found in soil borings GP-6 , GP-7 and GP-2 was not from UST's corroded fill line, but rather show a background contamination in the urban fill. NFA letter.

Remarks: Spill has not been cleaned up.

DEC Memo:	4/24/2009 TTF letter sent to: Mr. Louis Ortiz New York University 14 Waverly Place New York, NY 10003 5/7/2009 - Sangesland received a call from John Leddy to discuss the work schedule for this site. Apparently the city DOT office of sidewalk permits is moving and can not issue a sidewalk opening permit soon enough to meet the May 22nd deadline given in the TTF letter. Sangesland sent the following e-mail back to Mr. Leddy. ********** Mr. Leddy - The DEC has made a notation on this spill file that a 30 day extension has been approved due to the NYC DOT sidewalk permit issue. Please have the tank repair/retest work done at this site by June 22, 2009 ********** Protest requested another extension to July 22nd. Steve, We have experienced delays in getting sidewalk opening permits for the EIR of the 5000 gal. No. 2 fuel oil tank at that location. Our customer is understandably concerned with the present deadline of 6/22/09, which looks like it won t be met. We would greatly appreciate one last extension of 30 days to July 22. Thank you. John Leddy - Pro Test ********** 10/16/09. Pro Test Environmental emailed: The tank was excavated and tests of tank alone and lines were done. The tank, remote fill line and vent line failed. Contamination was seen. EIR of tank under city sidewalk on hold pending NYU getting bids for the job and complication of having to replace entire sidewalk before holiday moratorium starting on 11/17. Will keep you advised. JK. 7/6/10 received closure report dated 12/21/09 prepared by pro Test Environmental. Tank failed because of vent line. Soil samples taken. Most contaminants were non-detectable. Two exccedances found from Boring #2: benzo(a)pyrene [200 ppb vs. 60 ppb] and Boring #5: benzo(a)anthracene [270 ppb vs. 224 ppb]. Tank was closed in place. DEC Memo:	8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 03-31-2015 - V. Brevdo As per discussion with Chief of Spill Response Section, this Tank Test Failure Spill Case is transferred to Remediation Section B for management of the project. Spill Case is further assigned to Jonathan Kolleeny. VB 2/23/18 TJD Teleconference with Dave at Riteway - regarding investigative/remedial actions performed at this site. Spill reassigned back to DeMeo. Dave emailed closure report to DeMeo. As per report, RiteWay proceeded to trouble shoot the tank test failure and it was determined that fill line was the point of failure (please see enclosed line test report). The point of failure on the fill line was at the interior of the foundation wall. There was staining on the interior of the building wall at the point of the fill line penetration. No contamination was observed elsewhere. Rite Way core drilled along the path of the original fill line and retrieved 6 samples at an overall depth of 3' below grade (please see site map and photos). Please note: sample closest to the building wall was taken at an angle via hand auger to get specimen against the wall. The fill line was approximately 8 below grade. Samples were placed into approved jars onsite and sent to a certified lab via chain of custody for analysis. Samples returned clean and within NYSDEC CP-51 regulatory guidelines (please see enclosed analytical report). RiteWay installed a new fill with spill box, relocated to the building wall, adjacent to the vent. The entire tank and system was tested on November 13, 2017 and passed (please see enclosed tank test report). Based upon the documentation provided no further action is required at this time. All documentation, including lab report, site plan and tank testing reports, has been uploaded to DECDOCS. Spill closed.

DEC Memo: 3/30/15-Vought-Created spill number as need to maintain record of response to NYCEM EOC at the request of Regional Director. Spill notes best summarized by Vought's summary emails from NYC EM EOC to all supervisors as follows: Initial Update from 3/27/15: There have been a total of three building collapses associated with the explosion at the addresses of 119, 121 and 123 Second Avenue. There is also 8 other building vacate orders issued by NYCDOB. NYPD, FDNY and EM are currently determining if whether any seconday human remains searches are or may be necessary so that it may be determined whether the debris is staged or directly loaded and hauled to a disposal facility. EM has requested that DEC, DEP and themselves inspect the two possible staging locations, Randalls Island DPR lot being the primary, and the North end of the EDC South Brooklyn Marine Terminal being the secondary location. Staff has reached out to DEC Water Unit (Southwell) as per the Regional Director to facilitate the possible inspections with DEP and EM, if necessary. The debris will be hauled by private (and not city) contractors and there is currently no estimated time for when debris removal will start. Ongoing discussions of filter fabric use at the site for water filtration and hay bale use for water filtration at the disposal facilities are being held as well. Intial information is that the hay bales may be supplied by DEP and/or DPR. Another Debris Task Force meeting is scheduled for 4pm today. With respect to air monitoring, DEP will be performing monitoring at disposal facilities (if needed) and DEP and DOH have been conducting air monitoring (including asbestos) at the explosion site since yesterday. A thorough search of the PBS and Spills database of the site has been performed and no active tanks were registered at any of the collapse sites. PBS Registrations were however noted for both 125 Second Avenue and 41-43 7th Street and these buildings have been heavily impacted with smoke and water. PBS inspections and or tank tightness testing of these buildings may be necessary (pending discussion with RSE or RD) to ensure that the collapse did not compromise the integrity of the adjacent tank systems. Final Update from 3/27/15: There have been a total of three building collapses at the addresses of 119, 121 and 123 Second Avenue associated with the explosion. There are also 8 other building vacate orders issued by NYCDOB. NYPD, FDNY and EM continue to determine if any seconday human remains searches are or may be necessary which will determine whether the debris is staged at a transfer location for human remain searches or directly loaded/hauled to a

CON ED (Continued) **S117851663**

disposal facility after being
searched for human remains at the site. To ensure an effective waste stream, numerous agencies
including DEC, DEP, EM and HPD are working together to plan for both direct load and haul of debris
to a disposal facility (Cooper Tank and/or 110 Sand) and also taking the site to a transfer
location (Randalls island and/or South Brooklyn Marine Terminal). With respect to the direct load
and haul, DEC is reaching out to HPD's contractors disposal facility (Cooper Tank in Brooklyn) to
walk them through the approval process and determine if whether they are seeking an increase in
storage capacity or an increase in throughput capacity. The secondary direct load and haul location
(110 Sand in Long Island) that closes at 3pm was requested to contact DEC Region 1 (Syed Rahman) to
request an increase in operational hours. As the debris containers have begun to be loaded and
loading is expected to continue through the night, HPD will reach out to 110 Sand to have them
contact Syed Rahman directly to ask if they can take debris to 110 Sand also through the night.
With respect to possibly staging the debris at a transfer location for secondary inspection, NYEM
noted that an inspection of the Randall's Island DPR facility was not necessary due to its prior
use and approval by all agencies during the Park Avenue building collapse. Staff faciliated a site
inpsection to the secondary transfer location at South Brooklyn Marine Terminal that included DEP,
EM and DEC Division of Water Unit and it was agreed by all parties that this location would be
acceptable as well. With respect to air monitoring, DEP will be performing monitoring at disposal
facilities (if needed) and DEP and DOH have been conducting air monitoring (including asbestos) at
the explosion site since yesterday. Staff has sent an email request to DEP for more information on
the air monitoring including results, methods used and agencies that reviewed and approved the
results (eg-NYCDOH). A thorough search of the PBS and Spills database of the site has been
performed and no active tanks were registered at any of the collapse sites. PBS Registrations were
however noted for both 125 Second Avenue and 41-43 7th Street and these buildings have been heavily
impacted with smoke and water. After further discussion with the Regional Engineer and Regional
Spill Engineeer it was determined that PBS inspections of these adjacent facilities are not
warranted at this time. Daily Update from 3/28/15: On 3/27/15, debris removal and transport
operations continued overnight including the transport of a reported nine containers to Allocco
Recycling located in Brooklyn and one reported container taken to Cooper Tank also in Brooklyn.

CON ED (Continued) **S117851663**

Cooper Tank reached capacity with the one additional container and could not accept more debris. On 3/27/15, The Site Management Plan (SMP) for the South Brooklyn Marine Terminal (SBMT) was submitted to, and approved by, the Regional Director as this site was still being considered as an option for waste transfer, if needed. Allocco Recycling was no longer able to accept debris due to the type of waste (eg. debris mixed with household hazardous waste and putrescibles) and the fact that they closed at 2pm on Saturday. On 3/28/15, upon learning that the disposal locations were no longer viable, the Regional Director reached out to Waste Management and Action Environmental for their possible assistance and facilitated a call between HPD and Gateway (agency and their contractor performing the debris removal). Action Environmental after additional facilitation by both the Regional Director and EOC DEC Staff was the selected disposal facility due to: proximal location in the south Bronx, ability to accept all types of waste associated with the collapse, 24 hour/7day a week capabilities, and available capacity to receive the waste. It was a later learned that Action Environmental closes every Saturday at 6pm and reopens every Sunday at 12pm and as such the 12-16 trucks that will be loaded over the night will be stored at either Gateway or the truck rental facility until they can be brought to Action tomorrow at 12pm for disposal (which was approved by the Regional Director during the 4:30 Debris Task Force teleconference). Human remains searches are being performed at the site via removal of approximately 10 cubic yards of soil at a time, spreading it on Second Avenue and then placement into the container/trailer. It has been confirmed that for the majority of the debris, this will be the sole method of searching for remains. As the debris removal is expected to encounter the first floor and basement of 121 Second Avenue tomorrow where two missing persons were last seen, OCME, PD and FDNY requested that a separate area be used to store these materials for secondary human remain searches at a later date. EM, DEC, EDC and DEP agreed that SBMT was the best location due to increased security, privacy, capacity and having an approved SMP. The expected amount of debris taken to this location is 25 twenty cubic yard containers and it will be stored for up to a month. DEP is mobilizing a crew tonight to SDMT to vacuum, clear and protect the basins in expectation this debris will begin to arrive tomorrow.
NYCOEM is also working on acquiring additional bales of hay for additional basin protection at the site. As of 4pm today, 250 cubic yards have been removed from the site. Removal and search operations will continue throughout the night. DEC EOC Staff has sent

CON ED (Continued) **S117851663**

an email request to DEP for
more information on the air monitoring including results, methods used and agencies that reviewed
and approved the results (eg-NYCDOH) and had not yet received a response and will pursue the issue
further. The next Debris Task Force teleconference will be tomorrow, Sunday at 10:30am. Regional
Director attended Debris Task Force teleconference(s) on Sunday 3/29/15.
3/30/15-Vought-Participated in the 10:30am and 4:30pm teleconferences by EM and with all agencies.
Two additional bodies were recovered overnight and one has been identified and the second is in the
process of being identified. Second Avenue will be now open to bus traffic and steps are being
taken (including the installation of jersey barriers and construction fences) to faciliate
pedestrian traffic on the east side of Second Avenue. Four buildings still have vacate orders and
two of these orders lifted resulting in recoccupation as soon as today. To date 46 trailers and 10
containers have been removed from the site for a total of 3,515 cubic yards. Approximately half of
the total debris has been removed to date and debris removal operations will be supervised by HPD
and will continue throughout tonight. Since 3/28/15, all debris has been taken to Action Carting in
the Bronx and no debris has been taken to South Brooklyn Marine Terminal. An insurance company for
one of the property owners has requested to inspect the debris and as some of it has already been
taken to Action Carting, the request is being reviewed by the NYC Law Department. NYCDOH is posting
additional information regarding concerns to air quality on their website. To date no response has
been received from the request to DEP placed by the DEC at the EOC on 3/27/15 regarding methods,
parameters and reviewing agencies of air sampling. Debris removal operations may shut down tomorrow
at 7pm and restart the next day due to union constraints associated with the FDNY Bureau of Fire
Investigation and this will be further evaluated by EM. DEC Spills Staff will attend the 10:30am
and 4:30pm calls tomrrow as per the Regional Director.
3/31/15-Vought-Participated in the 10:30am
teleconference held by NYC EM and with all agencies. NYCT buses have been now allowed on Second
Avenue and debris removal continued throughout the night. Debris removal today, however, has been
slowed as the removal operations are reaching the point where the suspect gas line was located and
as such NYPD and FDNY Fire Marshall are performing additional investigation. To date 75 trailers
and 20 containers have been removed from the site for a total of 4,000 cubic yards. DEP will also
soon cut water service to the collapse sites as all remaining debris is at or below street level.

CON ED (Continued) **S117851663**

Debris removal operations may be suspended this coming weekend due to a holiday weekend (Easter)
and known services associated with a nearby church. As the bodies of the two missing persons were
located, the focus is changing from a search and recovery mode to an evidence collection and
investigation mode . Spotters are, however, still on-site examining debris as it is being removed
for any evidence of further unknown human remains. Two vacate orders remain for adjacent buildings
and one partial vacate order in in place for an adjacent commercial location. DEC Spills staff will
participate in the 4:30 conference call from the field and include in tomorrow's daily update.
3/31/15-Vought-Vought and Regional Director called in and due to limited number of parties, NYC EM
cancelled call. 4/1/15-Vought-Missed call at 10am and 4:30 interagency was cancelled. Received
forwarded Debris Task Force call at 10:30am notes from RD that noted Debris Task Force Call Notes
April 1, 2015 10:30 AM. FDNY and PD are still conducting investigations. 180 cubic yards of debris
has been removed from the site as of 0900. 4095 cubic yards have been removed from the site to the
transfer facility. Approximately 45 to 55 percent remains. Debris operations: Friday operations
will be suspended at 1600. Saturday operations will be from 0700 to 1600. Sunday operations for the
day will be suspended. HPD is still looking into service schedules of nearby houses of worship
which may change operation times. There will be no 4:30 debris call this afternoon.
4/2/14-Vought-Participated in 10am inter-agency call. Debris removal continues at a slower rate as
the site is being considered a crime scene and they are also reaching the basement levels of the
building where the gas connections lead into the former buildings. Another lane has been opened for
vehicle traffic on Second Avenue for a total of two open lanes so far (other lane is for NYCT
buses). Reception Center is being moved from Tompkins Square Library to Community Board 3. Six
businesses remain closed and only one more missing pet is being looked for. Two complete vacate
orders are still in place (for 125 Second Avenue and 41 East 7th Street). To date approximately
4,400 cubic yards of debris have been removed and taken to Action Carting in the Bronx. Excavations
of debris are now at basement levels in all three collapse sites and approximately 66% of the total
debris has been removed. Vought sent an email request on 3/27 to DEP at the EOC for methods,
parameters and reviewing agencies for air monitoring data and received no reply. Vought sent a
request for an update today to DEP and received a reply from DEP (with cc to DEP Commissioner
Licata) that all results are negative . Vought will follow up with

CON ED (Continued) **S117851663**

Regional Director on whether
more specific information is necessary with respect to the East
Village air monitoring or whether
the request can be used as an example during the next EM-DEC meeting
to discuss general response
planning and communcations. The frequency of the twice per day
inter-agency calls has been
decreasing due to scaling back of operations and restoration of
services. Vought discussed daily
updates with Regional Director and she noted that they were no longer
necessary and as such Vought
to send this update as last update to all. Vought will continue to
participate in inter-agency
calls as requested by Regional Director, who may also be continuing to
participate in Debris Task
Force calls. 4/2/15-Vought-Sent email to DEP Thomas Votta that Tom,
Any updates on the below email
regarding the air monitoring at the East Village Building collapse?
The DEC is eagerly awaiting the
information as there was a recent high level discussion between our
Regional Director and EM
Commissioner Esposito regarding air monitoring (including methods,
parameters measured and agencies
involved) during large scale events in New York City.Thanks. DEP Votta
replied that effrey, I'm not
sure I'm on vacation, but let me see what I can find out..Ryan find
out for Jeffrey what's going on
with the air samples. See below. DEP Votta forwarded email to DEC
Fanklyn Crowley who sent email to
DEP Commissioner Licata and DEC Carlstein Lutchmedial that Any updates
on air quality . DEC
Lutchmedial replied that All results are negative . Vought sent email
to Regional Director with cc
to DEC Austin, DEC Lieblich and DEC Flint that Venetia, As you can see
our request for an update on
the methods, parameters and reviewing agencies for the air monitoring
data resulted in a reply from
DEP below solely that All results are negative with a copy to DEP
Commissioner Licata. As per our
last meeting with EM Commissioner Esposito we noted that we would like
to enhance our communication
with all agencies regarding these measurements during large scale
events in NYC. Two questions for
you: Should I follow up to get more specific details for the air
monitoring for the East Village
building collapse, or is all results are negative acceptable for this
incident? Should we use this
as an example of difficulties associated with this topic during our
next EM/DEC meeting? Thanks.
The Regional Director then sent an email to Commissioner Licata that
Reaching out to you as I don't
recognize your staff members' names below. We're looking to understand
what parameters DEP measured
at the collapse site and if there is data you could share with us. Our
interest is purely
'academic' and we wouldn't distribute it any further. Response from
DEP staff is that all results

CON ED (Continued) **S117851663**

are negative, which is of course good news, but we'd appreciate the detail! Thanks. Regional
Director then received reply from DEP Commissioner Licata that Monitoring for asbestos since day
one. We also monitored for CO and VOCs on first night. We monitored during firefighting and debris
handling. We just cut back yesterday to (I think 5 from 10) monitoring sites. See attached, but
also trying to post daily to website. Vought added air monitoring data to D2.
4/3/15-Vought-Forwarded air monitoring data to DEC Austin, DEC John, DEC Lieblich and DEC Flint
with cc to RD. Spoke with DEC Austin and this spill closed as non-petroleum spill and no
involvement of Spills Unit besides Vought on debris issues.
4/6/15-Vought-Continued to participate
in 10am inter-agency calls. During call today following was noted: investigation by FDNY Fire
Marshall and NYPD has begun as excavation has reached location of suspect gas line that caused
explosin and collapse. Two lanes are still open on Second Avenue and site work will continue till
4pm. Electric service being restored to 125 Second Avenue and residents are being escorted for
discrete time periods into 125 Second Avenue and 41 East 7th street so that they may have access to
their personal possessions. Reception Center will be open at noon, 7 households are still in hotels
and to date 93 tractor trailers of debris have been removed for a total of 4800 cubic yards.
4/7/15-Vought-10am inter-agency call. FNDY Fire Marshalls doing pressure check on gas lines with
Con Edison which must occur before any further debris removal due to proximity of debris removal
operations to gas lines. No other site activity occurred as such other than door repair to 125
Second Avenue and 41 East 7th Street. Reception Center will be scaled down after approval of
Mayor's Office is provided and 5 households still in hotels.
4/8/15-Vought-Sent email request to RD
that due to upcoming vacation and reducing scope of work related to investigation and reducing
debris, that Vought no longer participate in 10am calls and RD replied with approval to no longer
participate and also to send email to EM Planning Section that DEC will no longer be on 10am
inter-agency calls and they could reach out to her for any additional information.

Remarks: DEC Regional Director and RSE received notification as part of an All Call from NYC Emergency Management(EM) that three buildings collapsed due to an explosion and fire. DEC Staff (Vought) requested to attend EM EOC as per Regional Director to faciliate debris disposal indoor air concerns and any potential petroleum issues.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
