CONSULTING

April 21, 2022

Mr. Jamar Adams
Elliott Fulton LLC c/o Essence Development
30 Hudson Yards
New York, NY 10001

RE: Phase I Environmental Site Assessment
Fulton
401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street
New York, New York 10011
Hillmann Project No: Z34898

Dear Mr. Adams:

Hillmann Consulting LLC has completed a Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in conformance with our contract agreement and the scope and limitations of ASTM Practice E 1527-21, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 908-688-7800.

Sincerely,

Hillmann Consulting, LLC

Chris Hirschmann
Environmental Services Director

Etan Hindin
Senior Project Manager

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CEA	– Classification Exception Area
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DEC	– Department of Environmental Conservation
DEP	– Department of Environmental Protection
DHS	– Department of Health Services
DNPL	– Delisted National Priority List
DOB	– Department of Buildings
DOH	– Department of Health
DOT	– Department of Transportation
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
EPA	– Environmental Protection Agency
ERNS	– Emergency Response Notification System
FD	– Fire Department
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LCP	– Lead-Containing Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
OER	– Office of Environmental Remediation
OPRA	– Open Public Records Act
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of 401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street, New York, New York (the Subject Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Primary Street Address:		401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street			
City:	New York	**County:**	New York	**State:**	New York
Tax ID/Parcel Number:		401W19th: Block 717, Lot 19; 401W18th: Block 716, Lot 17; 427W17th: Block 715, Lot 10; 430W17th: Block 714, Lot 31			
Property Owner:		New York City Housing Authority (NYCHA)			
Zoning Designation:		R8-C2-5 (Residential with Commercial Overlay)			
Approx. Property Area:		6.21-acres (combined)			
Buildings:		Eleven residential apartment buildings: B2, B6, B9 are high-rise 25-story plus basement; B1, B3, B4, B5, B7, B8, B10, B11 each 6-story with no basement except B1 and B3 which have a basement; and B12 - freestanding garage (1-story / 2-bay) NOTE: See Appendix A for building numbering/locations			
Approx. Building Size:		974-units (combined)			
Approx. Year Built:		1963-1965			
Commercial Occupants:		Primarily residential with senior center, development/management office and computer lab			
Current Use:		Multifamily residential			
Inspected By:		Mr. Etan Hindin and Mr. Dominick Aponte			
Site Contact/Company:		Mr. Patrick Chan / Property Manager (NYCHA)			
Site Escort/Company:		Rico / Site Caretaker (NYCHA)			
Inspection Date:		April 19, 2022			
Weather Conditions:		Overcast 42 degrees Fahrenheit

1.3 Findings, Opinions and Conclusions

Recognized Environmental Conditions & Significant Data Gaps

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed the following *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs) and/or *significant data gaps* (SDGs) in connection with the Subject Property:

RECOGNIZED ENVIRONMENTAL CONDITIONS

Multiple historic uses of potential environmental concern occurred at the Property prior to the 1963-1965 construction of the present Property buildings, per review of Sanborn Fire Insurance Maps, as follows:

- Vinegar Factory at 424-426 West 17th Street (off the east side of the present Property Building 4) in 1895;
- "Chinese Laundry" at 101 and 119 9th Avenue (near present Property Buildings 2 and 7) in 1904;
- 165-car garage with auto-repair operations in the basement and a 1,500-gallon gasoline buried tank (in the vicinity of the present asphalt surface parking south of Building 2) and a 15-car private garage with a buried gasoline tank (capacity indecipherable) at 409 West 17th Avenue (off the west side of the present Property Building 7), and iron works 434-436 West 17th Avenue and 414 19th Avenue in 1921;
- Filling station (gas station), taxi garage and auto repair with multiple gasoline tanks depicted along ninth avenue between West 16th and West 17th Avenue and along West 16th and West 17th Avenue (see Appendix A figure), and an additional auto filling/service station with multiple gasoline tanks depicted at the northwest corner of 9th Avenue and West 17th Street (near the southern edge of the present Building 7) and auto painting (431-433 West 17th) and repair (443-445 West 17th), a motor freight terminal (410-412 West 19th) in 1950.

The aforementioned historic uses including a factory, laundry, iron works, motor freight station, auto filling/service stations with multiple gasoline tanks is considered a REC. Two (2) groundwater monitoring wells were observed within the Property north of B12 (two-bay Property garage) and northwest of B4 on the south side of West 18th and West 17th Streets respectively. The trigger for the installation of these wells and their use for sampling/monitoring if any was unknown by the site escort/contact. Hillmann recommends obtaining records of a subsurface investigation (if already performed) or performing a subsurface investigation to determine the presence/absence of impact to underlying environmental media from aforementioned uses and the presence/absence of abandoned underground storage tanks (USTs) in areas not excavated in the 1960's for the construction of the present Property buildings. If the onsite groundwater monitoring wells observed during the site reconnaissance are no longer in use, said wells should be decommissioned in accordance with applicable regulations.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)
No CRECs were identified.
SIGNIFICANT DATA GAPS (SDGs)
No SDGs were identified.

Historical Recognized Environmental Conditions (HRECs)

This assessment has revealed the following *historical recognized environmental conditions* (HRECs) in connection with the Subject Property:

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS	
	An NY SPILLS database listing for the "Excavation Site - Front of 413 West 16th Street" details the discovery of a fuel odor during an unrelated excavation (infrastructure work on a sewer line and transformer vault) leading to the removal of approximately 40 cubic yards of soil on May 27, 2005. Given the impact identified and subsequent remediation (soil removal) and regulatory closure, listed as closed on December 27, 2005, the NY SPILLS listing is considered an HREC. Hillmann notes that given the nature of the discovery of the impact (unrelated excavation likely along the sidewalk in front of 413 West 16th Street) and title of the listing "Front of…" the investigation/soil removal was likely not comprehensive enough to determine the presence/absence of impact from historical uses to the rest of the 430 West 17th Street Parcel (Block 714, Lot 31), a parcel noted above with historic uses including multiple gasoline tanks and an auto filling/service station.

De Minimis and Other Environmental Conditions

The following *de minimis* and other environmental conditions were identified:

OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS
401-411 West 18th Street (Building 8) is listed on the UST database for a 1,500-gallon UST removed on June 5, 2017. The listing does not indicate any release was identified during the UST removal and is not considered a REC.
400 West 17th Street (Building 7) is listed on the NY SPILLS database due to an incident involving wastewater in June 2020. The case obtained regulatory closure and due to the nature of the spill and regulatory status is not considered a REC.
Multiple Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) associated with Property addresses were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC.

427-431 West 17th Street / NYCHA-Fulton Houses is listed on the RCRA-NonGen, FINDS and ECHO databases likely associated with the removal of regulated waste. The listings are regulatory in nature, not indicative of a release and not considered a REC.
West 17th Street and 10th Avenue is listed on the Brownfields database. The site is located to the adjacent west of Property building 4. In 2004 during a Phase I and II, contaminants of concern were identified associated with past uses of petroleum and historic fill. Soils and groundwater were identified to be contaminated with VOCs, petroleum related and chlorinated solvents and SVOCs. The listings details the subsequent remediation as follows: "*A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008.* *Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building.*" Given the above, a vapor encroachment condition to the Property cannot be ruled out.

Environmental Professional Statement

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of *Environmental professional* as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the *subject property*. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Chris Hirschmann
Environmental Professional

1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as "Non-ASTM Scope concerns", in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E1527-21 as *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."* The following is a summary of findings for the limited review of potential BERs, where applicable, as per the contracted scope of work and limitations outlined in Section 2. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE			
Subject	**Findings**	**Not Appl.**	**Rpt. Ref.**
Asbestos	Given the 1963-1965 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis. Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-of insulation and roofing materials		7.1
Lead Paint	Given the 1963-1965 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis. Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 mg/cm^2 (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann.		7.2
Radon	The Property is located in the USEPA radon designation Zone 3 or 'low risk' area for radon.		7.3
Mold / Microbial Damage	The basement of Building 1 was observed to have standing water on the concrete surface with some discoloration. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed.		7.4
NWI Wetlands	No NWI Wetlands were depicted within the Property.		7.5
Lead in Drinking Water	Potable water service at the Subject Property is provided by the City of New York. The water purveyor water supply is within acceptable standards. Property building specific lead-in-drinking water sampling was not performed.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-21. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E1527-21 as *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The term *controlled recognized environmental condition* is a type of recognized environmental condition and defined by ASTM E1527-21 as a *"recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."*

The term *historical recognized environmental condition* is defined as a *"previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."* The ASTM E1527-21 standard has clarified that a *historical recognized environmental condition* (HREC) is not a *recognized environmental condition* (REC).

The term *de minimis condition* is defined by the ASTM, *"…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."* A condition determined to be a *de minimis condition* is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-21 standard:

- Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥1990 should not be interpreted to suggest that any such buildings are free of ACM or would not warrant evaluation of building materials for ACM prior to disturbance. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

- Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Subject Property. If the Property contains buildings built in 1980 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect

LPB; however, the scope of work exclusion for building built ≥1980 should not be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

- USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

- Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

- NWI Wetlands: The Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory Wetland Mapper (http://wetlandsfws.er.usgs.gov/NWI/download.html) to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work. It is also emphasized that a field delineation of regulated wetlands by a qualified professional would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

- Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street				
City:	New York	**County:**	New York	**State:**	New York
Tax ID/Parcel Number:	401W19th: Block 717, Lot 19; 401W18th: Block 716, Lot 17; 427W17th: Block 715, Lot 10; 430W17th: Block 714, Lot 31				
Approx. Land Area:	6.21-acres (combined)				
Apprx. Latitude/Longitude:	North 40.7436330 degrees/West 74.0043040 degrees				
Additional Details (if appl.):	Secondary address range: 89-157 9th Avenue; 401-433 West 19th;				

	400-426 West 19th; 401-423 West 18th; 400-434 West 18th; 401-445 West 17th; 400-438 West 17th; 401-429 West 16th;
Property Owner:	New York City Housing Authority (NYCHA)
Zoning Designation:	R8-C2-5 (Residential with Commercial Overlay)

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 ESA Report Component Dates/Viability

The ASTM E1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarizes the component completion dates:

ESA Component	Completion Date
Interviews	April 19, 2022
Env Lien Search	(excluded from scope)
Government Records Review	March 31
Visual Inspections	April 19, 2022
Env. Professional Declaration	April 21, 2022

2.5 User Reliance

This report is for the exclusive use of Elliott Fulton LLC c/o Essence Development and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be

permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of Elliott Fulton LLC c/o Essence Development; and without obtaining written consent from Hillmann in the form of a reliance agreement/letter.

Hillmann may, in its sole discretion, withhold its consent to additional reliance and/or Hillmann may condition consent for reliance upon payment of a fee or other conditions.

2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

2.7 General Limitations and Exceptions

Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-21 are reported.

Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Hillmann to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s) taken. Hillmann advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Hillmann. Hillmann shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

3.1 Environmental Lien and Activity and Use Limitation (AUL) Search

The User did not provide Hillmann with the results of an environmental lien and AUL search for the Subject Property.

3.2 Prior Environmental Reports/Documentation

No prior environmental reports/documentation were provided.

3.3 User Responsibilities

Section 6 of the ASTM E1527-21 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-21 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	NR	
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	NR	
Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	NR	
Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower	NR	

Question:	Yes/No:	Detail:
purchase price is because contamination is known or believed to be present at the property?		
Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,		
-Do you know the past uses of the property?	NR	
-Do you know of specific chemicals that are present or were once present at the property?	NR	
-Do you know of spills or other chemical releases that have taken place at the property?	NR	
-Do you know of any environmental cleanups that have taken place at the property?	NR	
The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	NR	
Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	NR	

NR-no response

3.4 User's Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-21, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Environmental Information

Physical Setting

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 14 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the west-northwest. The closest down gradient water body is the Hudson River, located approximately 850-ft to the west-northwest.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Subject Property is classified as "Urban Land". The Urban Land designation indicates that a majority of the original soils on the site have been disturbed by development or covered with impervious surfaces, such as buildings or pavement.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The Geologic Age Identification Category for the Property is Stratified Sequence, and the Rock Stratigraphic Unit is the Paleozoic Eta, Ordovicias System and Lower Orodovician and Cambrian carbonate rocks Series.
Prior Env. Reports: (Section 3.2)	None provided.
Additional Sources/ Data:	An eastern adjacent Property listed on the Brownfields database, 10th Avenue between West 16th and 17th Streets is listed as having groundwater at 10-14 feet below ground surface (bgs).
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the west-northwest.

Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report in Appendix E. Hillmann has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby

Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the Subject Property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix E.

Property Listings

The following listings of the Subject Property were identified:

- An NY SPILLS database listing for the "Excavation Site - Front of 413 West 16th Street" details the discovery of a fuel odor during an unrelated excavation (sewer line to transformer vault) leading to the removal of approximately 40 cubic yards of soil on May 27, 2005. Given the impact identified and subsequent remediation (soil removal) and regulatory closure – listed as closed on December 27, 2005, the NY SPILLS listing is considered an HREC.

  Hillmann notes that given the nature of the discovery of the impact (unrelated excavation likely along the sidewalk in front of 413 West 16th Street) and title of the listing "Front of…" the investigation/soil removal was likely not comprehensive enough to determine the presence/absence of impact to the rest of the 430 West 17th Street Parcel (Block 714, Lot 31), a parcel noted above with historic uses including multiple gasoline tanks and an auto filling/service station.

- 401-411 West 18th Street (Building 8) is listed on the UST database for a 1,500-gallon UST removed on June 5, 2017. The listing does not indicate any release was identified during the UST removal and is not considered a REC.

- 400 West 17th Street (Building 7) is listed on the NY SPILLS database due to an incident involving wastewater in June 2020. The case obtained regulatory closure and due to the nature of the spill and regulatory status is not considered a REC.

- Multiple Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) associated with Property addresses were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC.

- 427-431 West 17th Street / NYCHA-Fulton Houses is listed on the RCRA-NonGen, FINDS and ECHO databases likely associated with the removal of regulated waste. The listings are regulatory in nature, not indicative of a release and not considered a REC.

Adjoining Property Listings

The following adjoining property listings were identified.

- Multiple adjacent Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC in connection with the Property.

- Multiple adjacent sites are listed on the NY SPILLS and LTANKS databases. Each of the adjacent listings obtained regulatory closure and are not considered a REC in connection with the Property.

- West 17th Street and 10th Avenue is listed on the Brownfields database. The site is located to the adjacent west of Property building 4. In 2004 during a Phase I and II, contaminants of concern were identified associated with past uses of petroleum and historic fill. Soils and groundwater were identified to be contaminated with VOCs petroleum related and chlorinated solvents and SVOCs. The listings details the subsequent remediation as follows:

  "*A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008.*

  Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building."

  Given the above, a vapor encroachment condition to the Property cannot be ruled out.

Surrounding Area Findings

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

Federal NPL				**# of sites:**	1	**Search Distance:**	1-mile
Notable Listing:	Hudson River PCBs						
Distance in feet:	850	**Direction:**	WNW	**Gradient:**	Down		
Data Discussion:	Given the location and nature of the NPL case – PCBs in the Hudson River sediment, the listing is not considered a REC to the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal Delisted NPL				**# of sites:**	0	**Search Distance:**	1-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal SEMS				**# of sites:**	1	**Search Distance:**	½-mile
Notable Listing:	Hudson River PCBs						
Distance in feet:	850	**Direction:**	WNW	**Gradient:**	Down		
Data Discussion:	Given the location and nature of the SEMS case (also listed on the NPL database) – PCBs in the Hudson River sediment, the listing is not considered a REC to the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal SEMS-ARCHIVE				**# of sites:**	2	**Search Distance:**	½-mile
Notable Listing:	Federal Building / 252 7th Avenue						
Distance in feet:	2,216	**Direction:**	E	**Gradient:**	Up/Cross		
Data Discussion:	Given the distance the SEMS-ARCHIVE sites are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal CORRACTS				**# of sites:**	0	**Search Distance:**	1-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal RCRA-TSD				**# of sites:**	0	**Search Distance:**	½-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

State/Tribal SUPERFUND & HAZARDOUS WASTE	**# of sites:**	7	**Search Distance:**	1-mile

Notable Listing:	Bayview Correctional Facility / 550 West 20th Street				
Distance in feet:	987	**Direction:**	NW	**Gradient:**	Down
Data Discussion:	Given the distance, gradient and/or regulatory status the SHWS listing are not considered a REC in connection with the Property.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

State/Tribal LANDFILL/SOLID WASTE DISPOSAL				**# of sites:**	1	**Search Distance:**	½-mile
Notable Listing:	NYCDOS Ganesvoort MTS (near 14th Street)						
Distance in feet:	1,718	**Direction:**	SSW	**Gradient:**	Down		
Data Discussion:	Given the distance and downgradient location, the NYCDOS transfer station is not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal LEAKING STORAGE TANKS				**# of sites:**	132	**Search Distance:**	½-mile
Notable Listing:	Auto Care West / 464 West 18th Street						
Distance in feet:	145	**Direction:**	W	**Gradient:**	Down		
Data Discussion:	Given the distance, gradient and/or regulatory status, the LTANKS listings are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal VOLUNTARY CLEANUP SITES				**# of sites:**	20	**Search Distance:**	½-mile
Notable Listing:	118 10th Avenue / Hudson Yards-Chelsea-Flatiron Union Square						
Distance in feet:	209	**Direction:**	NW	**Gradient:**	Down		
Data Discussion:	Given the nature of the listings and/or distance/gradient the VCP sites are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal BROWNFIELD SITES				**# of sites:**	11	**Search Distance:**	½-mile
Notable Listing:	515 West 18th Street						
Distance in feet:	575	**Direction:**	W	**Gradient:**	Down		
Data Discussion:	Given the distance and gradient, the Brownfields listings are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

UNMAPPED/ORPHAN LIST SITES	
	Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below:

Notable Listings:	None

Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
NYCFD-Public Records Unit / Tank Section	FOI request	No response was received prior to report issuance.
NYS DEC	FOI request	A response was received stating that no records were found.
NYCDEP	FOI request	No response was received prior to report issuance.
NY DOB	Online search	Records corroborating historic filling station within the Property identified.
USEPA	Online search	No records indicative of a REC identified.
Internet	Online Search	No records indicative of a REC identified.

Pertinent records referenced in the above table have been included in Appendix F.

4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the Subject Property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the Subject Property.

The historical record sources listed below have been sought with the objective to document past uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural use, placement of fill dirt and other uses that do not involve structures. Hillmann has sought to review historical records in minimum intervals of five years.

Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

430 West 17th Street (Block 714, Lot 31)

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
1895, 1904, 1919, 1921, 1928	**Property:**	Multiple multi-story dwellings and commercial occupants including of potential environmental concern.	Vinegar Factory (1895); Chinese Laundry (101 9th Avenue – 1904); 165-car garage with auto repair operation in basement and 1,500-gallon gasoline UST in basement (415-425 West 16th Street – 1921-1950); Iron works (1921).
	Adjoining:	National Biscuit Company factory/warehouse noted to the south.	
1950	**Property:**	Dwellings have been cleared and replaced with a filling station and a taxi garage.	Taxi garage and filling station each with multiple gasoline tanks along West 16th Street, 9th Avenue and West 17th Street (1950).
	Adjoining:	Warehouse to the south, residential and commercial in other directions.	Auto repair and freight terminal to the west.
1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005	**Property:**	Four Property buildings corresponding to the present configuration are depicted.	
	Adjoining:	Manhattan Industrial Center to the south, residential and commercial in other directions.	

427 West 17th Street (Block 715, Lot 10)

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
1895, 1904, 1919, 1921, 1928	**Property:**	Multiple multi-story dwellings and commercial occupants including of potential environmental concern.	Chinese Laundry (119 9th Avenue in 1904)
	Adjoining:	Consolidated Gas Company Gas Holders to the west; residential and commercial in other directions. In	Gas holding silos depicted to the west (1895-1904);
1950	**Property:**	An auto service and filling station with three gasoline tanks with multiple gasoline tanks is noted at 109 9th Avenue. Auto painting and repair are noted along West 17th. A cheese dealer, lumber yard and waste paper are depicted in addition to multiple mixed-use store/dwelling buildings.	Auto painting, repair and filling with multiple gasoline tanks.
	Adjoining:	Garage with gasoline tanks noted to the adjacent west.	Gasoline tanks depicted to the adjacent west.
1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005	**Property:**	Three Property buildings corresponding to the present configuration are depicted. The apartment complex is listed as "Fulton Houses Apartments" with 944 units and parking.	
	Adjoining:	Beginning in 2002 the western adjacent building is listed as a Verizon site.	

401 West 18th Street (Block 716, Lot 17)

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
1895, 1904, 1919, 1921, 1928	**Property:**	Multiple multi-story dwellings and commercial occupants including a pharmacy and bakery.	
	Adjoining:	Residential/commercial buildings.	
1950	**Property:**	Motor freight terminal noted at 410-412 West 19th Street.	Motor freight terminal

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
	Adjoining:	Auto body shop noted to the adjacent west.	
1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005	**Property:**	Three Property buildings corresponding to the present configuration are depicted.	
	Adjoining:	No significant changes noted.	

401 West 19th Street (Block 717, Lot 19)

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
1895, 1904, 1919, 1921, 1928	**Property:**	Multiple multi-story dwellings and a convent.	
	Adjoining:	Residential/commercial buildings.	
1950	**Property:**	The dwellings are not listed as mixed-use (store/dwelling) buildings.	
	Adjoining:	Primarily mixed-use buildings.	
1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005	**Property:**	One Property building corresponding to the present configuration is depicted.	
	Adjoining:	No significant changes noted.	

A copy of the Certified Sanborn Map Report is attached in Appendix D.

City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

Property	
Use(s) / Occupant(s):	**Years**
Residential and mixed-use listings	1920-2017
403 West 18th Street – Cleveland Automotive Prod Co, Unit Auto Parts Co	1950
424 West 18th Street – Drayer scrap metal, Dry Lee Plastic Co Inc.	1956-1958

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties	
Use and/or Occupant(s)	**Years**
Mix of residential and commercial occupants.	1920-2017

A copy of the EDR City Directory report is attached in Appendix D.

Historical Topographic Maps

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

Historical Aerial Photographs

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix E, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
Historic Cleaners: (on-site/adjoining only)	None	322 Franklin Street, Indigo Cleaners and Dyers, listed for the years 1957 to 1972
Historic Auto: (on-site/adjoining only)	None	None
MGP: (1-mile distance)	None	ConEdison-West 58th St. Station MGP 11th Ave Between W. 58th – W. 59th Sts, was incorrectly plotted by EDR, and is actually located over a mile to the west-northwest.

Petroleum/Natural Gas Well Review

The historical record sources were reviewed for records of historic petroleum and/or natural gas wells at the Subject Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	The following additional pertinent historical data was obtained: NYC DOB records corroborate Sanborn depictions of gasoline tanks/fillings stations historically within the Property.

Prior Env. Reports: (Section 3.2)	Not applicable; no prior reports were provided.
Site Observations:	Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance.
Other Sources:	No additional pertinent historical data was obtained.

Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

Property	
Date Range	**Use**
Late 1800's to 1963	Residential and auto repair / fillings station among other commercial uses.
1963-Present	Fulton apartment buildings

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Date Range	**Use**
Unk to Present	Residential, commercial and auto repair, industrial warehouses (south), Chelsea Market (south)

Historical Records Data Failure

The ASTM E1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions were sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

Objective	Met?	Detail	Significant?
First developed use/date determined?	Yes	The first developed use of the Property was for dwellings in the late 1800's.	No
Record sources at 5-year intervals back to 1940 or first developed use?	Yes	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Summary of Identified Past Uses of this section.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

Historic Uses REC Discussion

The review of historical records indicated evidence of the following potential RECs in connection with the Property:

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1960's as follows:

- Vinegar Factory at 424-426 West 17th Street (off the east side of the present Property Building 4) in 1895;
- "Chinese Laundry" at 101 and 119 9th Avenue (near present Property Buildings 2 and 7) in 1904;
- 165-car garage with auto-repair operations in the basement and a 1,500-gallon gasoline buried tank (in the vicinity of the present asphalt surface parking south of Building 2) and a 15-car private garage with a buried gasoline tank (capacity indecipherable) at 409 West 17th Avenue (off the west side of the present Property Building 7), and iron works 434-436 West 17th Avenue and 414 19th Avenue in 1921;
- Filling station (gas station), taxi garage and auto repair with multiple gasoline tanks depicted along ninth avenue between West 16th and West 17th Avenue and along West 16th and West 17th Avenue (see Appendix A figure), and an additional auto filling/service station with multiple gasoline tanks depicted at the northwest corner of 9th Avenue and West 17th Street (near the southern edge of the present Building 7) and auto painting (431-433 West 17th) and repair (443-445 West 17th), a motor freight terminal (410-412 West 19th) in 1950.

The aforementioned historic uses including a factory, laundry, iron works, motor freight station, auto filling/service stations with multiple gasoline tanks is considered a REC.

5.0 INTERVIEWS

5.1 Interviews with Owners, Operators and Occupants

Current Owner / Key Site Operator

Property Owner	**Contact Name**	**Affiliation**	**Interview Type**
New York City Housing Authority (NYCHA) representative	Patrick Chan	Property Manager with NYCHA	In person
Interview Date:	April 19, 2022		
Interview Outcome/Findings:			
An interview for information pertinent to the assessment was conducted in person at the time of the site visit. The following pertinent information was indicated: The Property was reportedly always supplied with high pressure steam and no heating oil is or was present to Mr. Chan's knowledge.			

Prior Owners/Operators/Occupants

Name	**Company/Title**	**Yrs @ Site**	**Interview Type**
Interview Date:			
Interview Outcome/Findings:			
No prior owners, operators or occupants were interviewed.			

Neighboring Property Owner/Occupants

Name	**Company/Title**	**Yrs at site**	**Interview Type**
Interview Date:			
Interview Outcome/Findings:			
The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.			

5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the Subject Property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may

have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

Name	**Agency Name/Title**	**Interview Type**
Interview Outcome/Findings:		
No additional local/state government officials were interviewed.		

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the Subject Property. This included visual and/or physical observations of the Subject Property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed Subject Property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Mr. Etan Hindin and Mr. Dominick Aponte
Property Escort/Company:	Rico / Property Caretaker
Inspection Date:	April 19, 2022
Weather Conditions:	Overcast 45 degrees Fahrenheit

Significant Inaccessible Areas

Due to the pandemic occupied units were inaccessible. The inability to access these units is not considered a Significant Data Gap.

Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

6.2 General Site Setting

Site and Vicinity Characteristics

Abutting Roadways:	9th Avenue to the east; West 16th Street to the south; West 17th, 18th and 19th divide the Property parcels.
Current Property Use:	Multifamily residential
Evidence of Past Property Uses:	None observed.
Evidence of Past Adjoining Property Uses:	None observed.
Surrounding Area Uses:	Commercial, residential

Current Adjoining Property Uses

Dir	Street Address	Description
N	Multiple West 20th addresses	Primarily residential
W	Multiple West 16th-20th addresses	Residential and commercial
E	Multiple 9th Avenue addresses	Commercial and residential
S	75 9th Avenue	Commercial

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

Topographic Characteristics

Terrain:	Flat to gently sloping
Direction of Downward Slope:	Towards the northwest
On-site Water Bodies:	None observed
Other Significant Features:	None observed

General Description of Structures and Improvements

Buildings:	Twelve
Approx. Building Size:	974-units (combined)
Approx. Year Built:	1963-1965
Number of Stories:	B12 – 1; B2, B6, B9 – 25-story plus basement; B1, B3 6-story plus basement; B4, B5, B7, B8, B10, B11 – 6-story
Basement/Subgrade Levels:	See above
Exterior Ground Cover:	Asphalt, cement and landscaped areas,
Ancillary Structures:	B12 as noted above
Sources of Heating & Cooling:	High pressure steam supplied by Con Edison for heat and tenant-owned optional electric window units for cooling.
Potable Water/Sewage Disposal:	Municipal utility connections

6.3 Site Features and Conditions

Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the Subject Property:

Occupant	Substance	Qty/Container Type	Storage Conditions
NYCHA	Maintenance and cleaning materials (including paint)	1-30-gallon	All stored indoors on intact concrete. No storage concerns noted. Paint storage within western side of B4.

Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
None observed						

One UST noted to have been removed from the Property, specifically, 401-411 West 18th Street (Building 8) is listed on the UST database for a 1,500-gallon UST removed on June 5, 2017.

While no visual evidence of a UST was noted, considering the history of development, the potential presence of abandoned USTs and/or associated buried piping at the Subject Property cannot be ruled out.

Strong, Pungent or Noxious Odors and their Sources

No strong, pungent or noxious odors were noted at the Subject Property.

Standing Surface Water/Pools & Sumps

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

Drums, Totes and Intermediate Bulk Containers

No hazardous substance or petroleum product drums were noted.

Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

PCBs in Oil Filled Electrical/Hydraulic Equipment

No oil-filled electrical or hydraulic equipment was identified at the Subject Property.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM

E1527-21 standard and this assessment.

Stains or Corrosion on Floors, Walls or Ceilings

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

Drains and Sumps

Floor drains and a basement sump designed for the purpose of managing sanitary sewage were noted. No conditions indicative of a REC were observed.

Pits/Ponds/Lagoons

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed.

On-Site Solid Waste Disposal/Fill Material

No evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed.

Based on the history of previous site development, historical fill material may be present in the subsurface at areas of previous site grading or building structures.

Waste Water

Sanitary sewage generated at the Subject Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Subject Property is discharged via roof drains into the municipal sewer system.

Septic Systems/Cesspools

No septic systems/cesspools identified.

Wells

The following wells were identified at the Subject Property:

Two (2) groundwater monitoring wells were observed within the Property north of B12 (two-bay Property garage) and northwest of B4 on the south side of West 18th and West 17th Streets respectively. The trigger for the installation of these wells and their use for sampling/monitoring, if any, was unknown by the site escort/contact.

Railroad Spurs

No railroad spurs were identified on the Subject Property.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E1527-21 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Given the 1963-1965 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis.

Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-of insulation and roofing materials.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

Given the 1963-1965 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis.

Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 mg/cm^2 (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth.

The following evidence of significant moisture intrusion or mold/microbial growth was noted:

The basement of Building 1 was observed to have standing water on the concrete surface with some discoloration. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed.

7.5 NWI Mapped Wetlands

The National Wetlands Inventory online Wetland Mapper (https://www.fws.gov/wetlands/data/mapper.html) was reviewed for indications of jurisdictional wetlands at or immediately adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

The review did not indicate regulated wetland areas on the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

Potable water service at the Property is provided by a utility connection with the City of New York. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F. Note – no site-specific lead-in-water sampling was performed within the context of the Phase I.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2022 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 36 RCRA-LQG sites within approximately 0.25 miles of the target property.

EPA ID:: NYD980763841				

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 11/19/2021 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 01/06/2022 has revealed that there are 4 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 03/15/2022 has revealed that there are 132 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 61 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 241 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 01/01/2019 has revealed that there are 371 NY MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID: NYP004289088

NJ MANIFEST: Hazardous waste manifest information.

A review of the NJ MANIFEST list, as provided by EDR, and dated 12/31/2018 has revealed that there are 77 NJ MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past

sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

DEC Memo:	"8/5/2020 - Feng - Desk Duty. Spoke to Roberto Garcia. On 6/2/2020, there was backup wastewater into the building. The building management hired a company to pump out the wastewater. The hose leaked wastewater to the lobby, sidewalk and street (about 12 feet long puddle). At the end, they cleaned up with the absorbent pads and left it in the corner. He complained that they had to walk on the wastewater and the super ignored him. I Recommended him to report to NYCDEP since it is related to wastewater/sewer water discharge. Roberto Garcia 917-558-6819 The wastewater has been cleaned up. No spill of any oil related product. No further action is required by NYSDEC. Spill is closed. "
Remarks:	"UNKNOWN AMOUNT CLEAN UP PENDING"

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Date Record Added:	10/15/2008
Date Rec Updated:	12/31/2021
Updated By:	SNBOLLER
Site Description:	"Location: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.). Site Features: The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. Past Uses: The most recent uses of the Site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line , an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. Operable Units: For remedial purposes, the site was divided into two Operable Units (OUs). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. Site Geology and Hydrogeology: The generalized subsurface profile consists of urban fill overlying sand, with bedrock at depths between 40 and 70 feet below grade (ft-bg). The fill consisted of brown and grey, coarse to fine sand, some silt, gravel and brick fragments. Fill thickness ranged from about four to twelve feet. The thickness of the lower coarse to fine sand and gravelly sand ranges from 31 to 47 feet. The upper medium to fine sand extends typically to depths of about 20 ft-bg. Bedrock was encountered below the sand and consists of moderately fractured, medium-hard mica schist and moderately fractured, hard pegmatite. Bedrock was found at depths ranging from about 21 to 77 ft-bg. Bedrock is shallowest at the east end of the Site and slopes downward to the west toward the Hudson River. The net groundwater flow is to the west, toward the Hudson River. Depth to groundwater is 10 to 14 ft-bgs. "

WEST 17TH STREET AND 10TH AVENUE (Continued) **S109321176**

Env Problem: "Nature and Extent of Contamination Prior to Remediation: Soil - Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for soil were identified. Groundwater - Petroleum-related volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were present at elevated levels of concentration in groundwater throughout the Site. Concentrations of VOCs above Class GA Standards included chloroform, BTEX compounds and methyl-tert butyl ether (MTBE). SVOCs were prevalent at concentrations above NYSDEC regulatory levels in the groundwater in the southern and western portions of the Site and included dibenzofuran, 2-methylnaphthalene and naphthalene. The VOCs and SVOCs appear to be related to the prior use of the Site for vehicle fueling and repair. Iron, magnesium, manganese and sodium, common earth minerals, were detected in concentrations exceeding groundwater standards in all of the filtered groundwater samples. Soil Vapor - During the remedial investigation, VOCs were detected across the Site in subsurface soil gas samples, as well as in the one ambient air sample. The highest concentration of VOCs was found at soil gas sample location FLS-4, collected at soil boring FLS-4. PID readings in boring FLS-4 peaked at 1,684 parts per million (ppm) at a depth of 16 ft-bg. Post Remediation: Remediation at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs in soil and groundwater. Remedial actions have successfully achieved the site specific soil cleanup objectives. Residual contamination in the soil, groundwater and sub-slab vapor are being managed under a Site Management Plan. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk’s office. The Certificate of Completion was issued on October 6, 2008. "

Health Problem: "Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building."

Site Code:	59118
Site Description:	"Location: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.). Site Features: The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. Past Uses: The most recent uses of the Site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line , an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. Operable Units: For remedial purposes, the site was divided into two Operable Units (OUs). An operable unit

WEST 17TH STREET AND 10TH AVENUE (Continued) **S109321176**

represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. Site Geology and Hydrogeology: The generalized subsurface profile consists of urban fill overlying sand, with bedrock at depths between 40 and 70 feet below grade (ft-bg). The fill consisted of brown and grey, coarse to fine sand, some silt, gravel and brick fragments. Fill thickness ranged from about four to twelve feet. The thickness of the lower coarse to fine sand and gravelly sand ranges from 31 to 47 feet. The upper medium to fine sand extends typically to depths of about 20 ft-bg. Bedrock was encountered below the sand and consists of moderately fractured, medium-hard mica schist and moderately fractured, hard pegmatite. Bedrock was found at depths ranging from about 21 to 77 ft-bg. Bedrock is shallowest at the east end of the Site and slopes downward to the west toward the Hudson River. The net groundwater flow is to the west, toward the Hudson River. Depth to groundwater is 10 to 14 ft-bgs. "

Env Problem: "Nature and Extent of Contamination Prior to Remediation: Soil - Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for soil were identified.
Groundwater - Petroleum-related volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were present at elevated levels of concentration in groundwater throughout the Site. Concentrations of VOCs above Class GA Standards included chloroform, BTEX compounds and methyl-tert butyl ether (MTBE). SVOCs were prevalent at concentrations above NYSDEC regulatory levels in the groundwater in the southern and western portions of the Site and included dibenzofuran, 2-methylnaphthalene and naphthalene. The VOCs and SVOCs appear to be related to the prior use of the Site for vehicle fueling and repair. Iron, magnesium, manganese and sodium, common earth minerals, were detected in concentrations exceeding groundwater standards in all of the filtered groundwater samples.
Soil Vapor - During the remedial investigation, VOCs were detected across the Site in subsurface soil gas samples, as well as in the one ambient air sample. The highest concentration of VOCs was found at soil gas sample location FLS-4, collected at soil boring FLS-4. PID readings in boring FLS-4 peaked at 1,684 parts per million (ppm) at a depth of 16 ft-bg. Post Remediation: Remediation at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs in soil and groundwater. Remedial actions have successfully achieved the site specific soil cleanup objectives. Residual contamination in the soil, groundwater and sub-slab vapor are being managed under a Site Management Plan. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was

WEST 17TH STREET AND 10TH AVENUE (Continued) **S109321176**

discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008. "

Health Problem: "Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building."

Updated By: SNBOLLER
Site Code: 59118
Site Description: "Location: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.). Site Features: The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. Past Uses: The most recent uses of the Site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line , an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. Operable Units: For remedial purposes, the site was divided into two Operable Units (OUs). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. Site Geology and Hydrogeology: The generalized subsurface profile consists of urban fill overlying sand, with bedrock at depths between 40 and 70 feet below grade (ft-bg). The fill consisted of brown and grey, coarse to fine sand, some silt, gravel and brick fragments. Fill thickness ranged from about four to twelve feet. The thickness of the lower coarse to fine sand and gravelly sand ranges from 31 to 47 feet. The upper medium to fine sand extends typically to depths of about 20 ft-bg. Bedrock was encountered below the sand and consists of moderately fractured, medium-hard mica schist and moderately fractured, hard pegmatite. Bedrock was found at depths ranging from about 21 to 77 ft-bg. Bedrock is shallowest at the east end of the Site and slopes downward to the west toward the Hudson River. The net groundwater flow is to the west, toward the Hudson River. Depth to groundwater is 10 to 14 ft-bgs. "
Env Problem: "Nature and Extent of Contamination Prior to Remediation: Soil - Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum,

WEST 17TH STREET AND 10TH AVENUE (Continued) **S109321176**

and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for soil were identified.
Groundwater - Petroleum-related volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were present at elevated levels of concentration in groundwater throughout the Site. Concentrations of VOCs above Class GA Standards included chloroform, BTEX compounds and methyl-tert butyl ether (MTBE). SVOCs were prevalent at concentrations above NYSDEC regulatory levels in the groundwater in the southern and western portions of the Site and included dibenzofuran, 2-methylnaphthalene and naphthalene. The VOCs and SVOCs appear to be related to the prior use of the Site for vehicle fueling and repair. Iron, magnesium, manganese and sodium, common earth minerals, were detected in concentrations exceeding groundwater standards in all of the filtered groundwater samples.
Soil Vapor - During the remedial investigation, VOCs were detected across the Site in subsurface soil gas samples, as well as in the one ambient air sample. The highest concentration of VOCs was found at soil gas sample location FLS-4, collected at soil boring FLS-4. PID readings in boring FLS-4 peaked at 1,684 parts per million (ppm) at a depth of 16 ft-bg. Post Remediation: Remediation at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs in soil and groundwater. Remedial actions have successfully achieved the site specific soil cleanup objectives. Residual contamination in the soil, groundwater and sub-slab vapor are being managed under a Site Management Plan. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk’s office. The Certificate of Completion was issued on October 6, 2008. "

Health Problem: "Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SUN 09/02/03 Reassigned from Tibbe to Rommel. 8/26/03 David Lorthioir e-mail 08/26/03 10:02AM It is currently owned by Retaco Holding Corp., which is affiliated with Mendon Leasing. The spill happened when construction was being performed on the building in 2001. While excavating near a former tank pit (tanks removed in 1993) contamination was encountered. Wells were installed and one of the wells on the sidewalk did show a small amount of product. Tibbe wanted the site investigated due to the possibility that the source of the floating product could have been an old coal-gas plant. The results show the product is gasoline. A short summary of this site, with maps and the lab analysis that Tibbe requested, is being sent to you today. We are requesting that we monitor the well in the sidewalk for a period of time and if no floating product is observed we be given a closure. Please call myself or John about this. David Lorthioir, Project Manager, EnviroTrac Ltd. 80B Air Park Dr. Ronkonkoma, NY 11779 p 631.471.1500 f 631.471.6363 For more information regarding our company's services, please visit our website at http://www.envirotrac.com. 11/17/03 Reassigned from Rommel

VERIZON (Continued) **S105058434**

to Sun. 01/30/04-Sun-File Update by Sun: On January 8, 2004, Sun sent a Stipulation Agreement to Patrick Veechione of Retaco Holding Corporation requiring the complete delineation of the contamination, including the installation of borings /wells at west of MW-8, east of MW-8 and north of MW-8, and submittal of Remedial Action Plan and Operation, Maintenance and Monitoring Plan. The Department set a deadline of February 9, 2004 for the Respondent to return the signed Stipulation Agreement. (WJS) 03/09/05-File Update by Sun: The investigation report submitted by the consultant, EnviroTrac, dated 06/02/04 summarizes the results of groundwater sampling performed on 04/13/04 at this site. The report indicated that groundwater samples secured from all the monitoring wells had BTEX and MTBE concentrations in excess of NYSDEC TAGM groundwater criteria., except MW-10, where MTBE was not detected. In particular, MW-8 had the highestBTEX concentration of 23,870 ug/L, which is higher than the BTEX concentrations of 13,870 ug/L sampled on January 17, 2004. On 10/28/04, Joe Sun conducted a site visit and had a site meeting with the consultant, David Lorthioir of EnviroTrac on the location for the additional off-site monitoring wells. After inspecting the site and discussing the current monitoring results, the Department requested the following three off-site wells be installed: 1)in the sidewalk outside the building, approximately 60 feet east of MW-8. Best location is just east of the roll-up door; 2) in the sidewalk outside the building, approximately 60 feet west of MW-8; and 3)in the sidewalk across the street from the building, approximately 30 feet west of MW-8. The above three off-site wells were installed on February 10, 2005. The results of the groundwater samples will be submitted in the next quarterly status report. The Department will request a remedial action plan be submitted after reviewing the next investigation summary report. (WJS) 03/14/05-File Update by Sun: On 03/11/05, Leonard Morrow (Phone # 212-964-4140 x303), Attorney representing the Property owner of this site (Retaco),informing Joe Sun by an e-mail that Con Ed and the DEC have entered into a Voluntary Cleanup Agreement (VCA) in regard to the site. The VCA number is D2-0003-02-08, dated August 15, 2002. Mr.Morrow requested in his e-mail that the DEC not require the owner to sign the Stipulation Agreement and not pursue enforcement of its remedies against Retaco. On 03/14/04, Joe Sun caled Mr. Morrow informing him that ConEd's VCA is to treat the MGP residuals, such as coal tar and purifier waste, not the petroleum related contaminations. Therefore, Retaco still has to sign the Stipulation Agreement and to perform the site characterization investigation followed by the submittal of a remedial action plan as required by the Corrective Action Plan attached to the Stipulation Agreement.(WJS) 12/13/05: Reviewed RAP dated 10/25/05. Bioremediation proposed to treat contamination. it will be impossible to remediate the site as petroleum contamination from off-site sources will constantly migrate onto the site. Therefore, it is EnviroTrac's plan to remediate groundwater at the site until background conditions, as defined by the upgradient wells . RAP approved. Many wells not sampled on 2/15/05. Max BTEX 19,410ppb (MW11) and max MTBE 520ppb (MW11). 3/23/06: Biorem application scheduled for 3/28/06 8:30am. 4/13/06: Received letter stating that biorem was applied. 7/26/06: Emailed David Lorthior for update on site. 7/31/06: Received email from David Lorthior. Wells will be sampled in August and a report submitted to the Department. 10/6/06: Emailed David Lorthior to followup on monitoring report submission. 10/13/06: Received email from David Lorthior: wells will be sampled

VERIZON (Continued) **S105058434**

on Friday, October 20. 10/25/06: Received email from David Lorthior: Just to update you on the above site, we went there to sample on Monday and discovered a drastic change in site conditions. Historically, all of the wells in the sidewalk and one well in the building (Wells MW-8, 9, 11, 12 & 13) all exhibited depth to water (DTW) that were about 4 to 5 feet lower than the other wells. This was attributed to some type of perched water condition or bedrock ledge beneath the building. On Monday we discovered that Wells MW-8, 9, 11, 12 & 13 are dry, or only have a slight amount of water in them. The interior wells are all at the expected DTWs. I do not know why the wells are dry. There is some major construction going on 1.5 blocks downgradient of the site. They could be de-watering. The building across the street has been demolished in the last few months. Other than that, I do not know. We sampled the interior wells. Results will be sent to you when we receive them. 12/11/06: Spoke to David Lorthior. He will submit report. 1/2/06: Emailed David Lorthior to followup on report submission. 1/11/07: Received and reviewed update report. Groundwater samples collected on 10/23/06. Four wells dry, including three on the sidewalk with high concentrations. Bioremediation parameters not monitored because many of the wells that were injected with bioremediation solution were dry. Sent letter requiring the following by 3/12/07: 1) new wells on the sidewalk to replace the mw that were dry, 2) bioremediation parameter monitoring, and 3) triannual monitoring and reporting instead of sem-annual. 2/15/07: Meeting scheduled on Thursday 2/22/07 at 10am with Retaco and EnviroTrac to discuss progress of remediation. 3/1/07: Meeting on 2/22/07 to discuss site progress. A FOIL request will be submitted for the CONED spills (BCP C231017, and Voluntary Cleanup site V00530). An upgradient well may be installed on W 18th Street. Wells will be sampled and a monitoring report submitted. 4/2/07: Emailed Dave Lorthior to followup on groundwater sampling, FOIL requests, and upgradient well installation. Received email from Dave Lorthior: Wells were sampled last week, results pending from Lab. We have been trying to obtain a copy of Keyspan's subsurface investigation report from Keyspan, but still waiting on that. Some interesting verbal information from Neil O'Hallaran of Keyspan. He said that two large foundations for the gas holders are present beneath the building. These foundations are 21 feet deep, and were simply filled in when the current building was constructed. Most of the wells in the building are located within these foundations. These foundations are not waterproof, but are resistant . This would explain why water beneath the building behaves separately from the water beneath 18th Street. Retaco and EnviroTrac are meeting with Keyspan on April 10 to try to hammer out some details regarding this matter. I will forward the laboratory results to you upon receipt. 5/2/07: Received email from Dave Lorthior. There are MGP foundations under the bldg that affect gw flow. Monitoring wells were sampled on 3/19/07. High BTEX concentrations in sidewalk wells. Bioremediation parameters weren't sampled? Off site source is still suspect in sidewalk wells. A formal report will be submitted in a few weeks . 7/9/07: Received report from EnviroTrac. Wells sampled on 3/17/07. Max BTEX 150,000 ppb (MW9), max MTBE 390 ppb (MW11). Eight MW's and former tanks are located within two holders that are relics of former MGP activity at this site. These holders extend into the groundwater, preventing any significant groundwater movement. Impact present in sidewalk wells may be migrating from off-site. MGP soil impact (VOC and sVOC) is present at 19-21 ft bg, well below the gw table (6 ft).

VERIZON (Continued) **S105058434**

Report states: It is EnviroTrac's opinion that any petroleum hydrocarbons found in the soil at that depth could not have migrated down through the groundwater, especially lighter hydrocarbons such as VOCs. However, MTBE present in the on-site wells within the holders contains low levels of MTBE, indicating gasoline impact. Called Dave Lorthior of EnviroTrac to discuss report. Spoke to Bill Ottaway (518-402-9564) in Central Office regarding ConEd MGP BCP C231017. 7/25/07: Con Ed. Contact is Neil O'Hallaran (718) 204-4145 or o'hallorann@coned.com. 7/30/07: Left voice message for Neil O'Hallaran. 8/9/07: Emailed Neil O'Hallaran and requested that he call to discuss site status. 8/15/07: Meeting on 8/14/07 with Neil O'Hallaran (Coned), DEC Region 2 Brevdo, Sun, Carlson and DEC CO Attaway (518-402-9686). Coned borings indicate that MGP and gasoline are vertically separated. Coned supplied boring logs and sampling data. The Department requested a site plan for the soil boring locations. CO has approved a Coned workplan to additionally delineate MGP waste. This property is Area 1 of a larger MGP cleanup extending over a number of properties. A remedial action plan will not be proprosed until after additional delineation. The site will probably not be excavated. Possible remedial options consist of chemox, SVE, and a SSDS. 9/24/07: Sent letter to Retaco and EnviroTrac indicating that an upgradient well, a RAP for impacted groundwater in the mgp foundations, and triannual groundwater sampling is required by November 2, 2007. 4/28/08 - Carlson: Reviewed a letter from 11/2/07 proposing two install two off-site wells and one on-site cluster well to delineate the vertical extent of the gasoline and MGP plumes. Emailed Dave Lorthior requesting a site plan with well locations. 5/7/08 - Carlson: Reviewed site plan with proposed well locations. 5/12/08 - Carlson: Approved investigation plan for installation of two on-site cluster wells and two off-site sidewalk wells. Cluster wells will four 1 wells each screened at : 20-21', 16-17', 12-13', 8-9'. The cluster wells will be located adjacent to MW5 (inside the MGP foundation), and MW9 (outside the MGP foundation). Remedial investigation report due 8/12/08. 7/24/08 - Carlson: Spoke to Dave Lorthior. Coned is planning on installing cluster wells in the building on August 10th. Envirotrac will install the off-site wells. He will call to confirm well installation date. 8/21/08 - Carlson: Witnessed well installation by Coned. Dave Lorthior of Envirotrac said he is going to install sidewalk wells tomorrow. 12/10/08 - Carlson: Called Dave Lorthior to check on status of investigation report. He has not received sampling data from Coned. He will check with Coned. 12/11/08 - Carlson: Received email from Dave Lorthior: I just spoke to Craig Massaro of Arcadis. He said that the data should be tabulated and sent to EnviroTrac in the next week or so. After I receive it we will generate a report. 1/16/09 - Carlson: Spoke to Dave Lorthior - he is waiting for Coned's data to finish report. Spoke to Neil O'Halloran - he will send boring logs to Dave Lorthior early next week. 5/13/09 - Carlson: Received letter from Neil O'Halloran, Coned report was sent to Central Office. Spoke to Dave Lorthior - his report will be submitted next week. 6/3/09 - Carlson: Received inquiry's from DEC Ottaway (Central Office), and Neil O'Halloran (Coned) regarding Retaco's report. Spoke to Dave Lorthior, report will be submitted by Monday. 6/4/09 - Carlson: Received Envirotrac report; 7/14/09 - Carlson: Spoke to Bill Ottaway in central office - he will draft letter in response to report.; 8/20/09 - Carlson: Received email from bill ottaway - albany will have meeting with coned before issuing letter; 3/1/2010 - Carlson: DEC

VERIZON (Continued) **S105058434**

Ottaway issued letter regarding Con Ed report. 2/25/15 - Raphael Ketani. I restarted the spill case. The spill was called in on 6/27/01. Contaminated soil was discovered while excavating for an elevator pit. An elevator never existed before at this specific location of the site. During an investigation, gasoline contamination was discovered. MGP waste was also discovered under the same location. The site used to be part of the location of two gas holders. The MGP site extends from West 16th Street to West 20th Street. The foundations for the gas holders go down 22 feet. In some places, the gasoline contamination and the MGP waste are colocated. In other places they are at different horizons. The MGP waste case is being managed as a voluntary cleanup project through an agreement between Con Ed and the DEC. The voluntary cleanup case number is V00530. The MGP waste case manager is Richard Dana in Albany Remediation (richard.dana@dec.ny.gov). The PBS case is #2-032298. The owner is Retaco Holding Corp at 362 Kingsland Avenue, Brooklyn, 11222. The contact is listed as Jim McElhinney at (718) 389-2100. There were 6 gasoline USTs (though one is depicted in the reports as a 550 gal. diesel UST). Five were 550 gals. each and one was 4,000 gals. All were closed on 12/1/93. I contacted the former consultant for Retaco Holding Corporation, Dave Lorthioir of EnviroTrac (631) 924-3001/cell (631) 872-0231, regarding the site. He said that Retaco was owned by Mendon Truck Leasing. Verizon was a tenant. EnviroTrac excavated lots of impacted soil around the tanks. So, the soil was cleaned up, but the problem was then the groundwater. EnviroTrac couldn't cleanup the groundwater due to the MGP waste always being present. Mr. Lorthioir stated that the amount of gasoline contamination was very small compared to the huge amount of MGP waste that was being recovered. 3/4/15 - Raphael Ketani. I finished my review of the EnviroTrac 6/4/09 Status Report. The investigation was perfomred during 2008 and gauging and sampling took place during January 2009. The site is block 715 and lot 59. The West 18th Street gas works were bounded by West 16th Street and West 20th Street and by the Hudson River and 10th Avenue. The parcel of land between West 17th Street and West 18th Street and West 10th Avenue was also part of the MGP area. The parcel is 438 West 18th Street (the Site). The diameter of the two gas holders reached from the northern boundary of the existing building footprint to the southern boundary. The former gas holder foundations went down to 21 feet below grade. The site was occupied by VERIZON as a parking garage and office space. Six USTs were removed on 12/12/93 from under the east side of the garage in the northeast corner. One was a 4,000 gal. diesel UST and the others were 550 gal. gasoline USTs. There was no evidence of soil contamination. When VERIZON installed an elevator pit in 2001, they found soil contamination. From June to September 2001, 120 cu. yds. of soil were removed and wells were installed. EnviroTrac installed 13 wells. Initially, the groundwater elevations in MW-1 to 7 and MW-10 were 4 to 5 feet higher than the interior well MW-09 and the exterior wells MW-8 and 11 to 13. EnviroTrac gauged and sampled all of the wells on 10/23/06. The exterior wells MW-8, 9, and 11 to 13 were either dry or had just 1 foot of water. Interior wells MW-1 to 7 and MW-10 had groundwater elevations comparable to the historic norms. The 11/17/06 gauging event showed that the exterior wells were still dry. Later, it was found that the interior wells, except MW-9, were within the footprints of the gas holder foundations. Wells MW-3 to 5 and MW-7 were within the eastern holder and MW-1, 2 and 10 were within the western holder. MW-9 was outside the holders. During March

VERIZON (Continued) **S105058434**

2007, all of the wells were sampled. The groundwater elevations in MW-8, 9 and 11 to 13 had dropped 6 to 7 feet in the wells in the former gas holders. This indicated that the holder foundations impeded groundwater migration. Con Ed investigated the site and determined that all of the BTEX was the result of the gasoline spill. However, MGP waste can contain BTEX (a lot of benzene). EnviroTrac contends that the migration of the BTEX to the groundwater 14 down inside of the holders was not plausible. EnviroTrac contends that the MGP waste in the western holder contributes to the VOC impacts to the groundwater in the western holder. EnviroTrac contends that the VOCs in the groundwater in MW-9 are from offsite as they appear in the groundwater at MW-12, which is upgradient of the USTs. Con Ed referred to the Retaco property as Area 1. The Con Ed January 2006 investigation report stated that they did test pits and found the gas holder foundations. The reports noted that soil samples from 15 feet down and deeper within the holders had MGP waste odors. Soil samples that were taken at SB-2 at 19 to 20.5 feet down and that were taken at SB-4 at 19 to 21 feet down had VOC exceedences. A fingerpint analysis showed that the soil had coal tar. Coal tar was not found in the borings outside of the gas holder foundations. Con Ed did an additional set of borings and wells on 8/21, 22 and 28/08 and on 9/5/08. Con Ed did 6 borings at the site. Boring SB-A was installed in the east holder. Boring SB-D was installed in the west holder. Boring SB-C was installed outside the holders near MW-9. Con Ed stated that no MGP sludge nor coal tar was encountered in any of the borings. However, some samples did have MGP waste odors. Soil samples above and below the water table had elevated PID readings. The soil samples consisted of fill. Well clusters A, B and C were installed by Con Ed in August and September 2008. Clusters A and C were installed in the west holder and B was installed in the east holder. The screens were set at 7 to 11 feet below grade as groundwater in the holders was 6 to 8 feet below grade. Intermediate screens were set at 13 to 15 feet below grade and deep screens were set at 18 to 20 feet below grade. On 8/21/08, EnviroTrac isntalled 2 borings, B-14 and B-15. The MW-14 well was installed 15 feet west of the property line between the site and the Midtown Chelsea Auto Center. The borings went to 15 feet below grade. All of the material encountered was fill. In boring B-14, the soil from grade to 7 feet below had petroleum odors. From 7 to 13 feet below grade there were slight odors. B-15 did not have petroleum odors nor stains and was made into well MW-15. Groundwater was monitored on 1/15/09 by EnviroTrac. The shallow wells at clusters A-1, B-1 and C-1 were all dry. The measured groundwater elevations indicated that the wells in the gas holder foundations and the wells outside the foundations now were at the same elevation. The difference of 7 feet between outside and inside the foundations no longer existed. Groundwater flow had been to the west and was now to the south. Shallow soil samples from SB-A at 2 and 8 feet below grade had minor or no VOCs, SVOCs or cyanide. The sample from 21 feet below grade had 1700 ppb benzene, 24,000 ppb naphthalene and 58,000 ppb cyanide. The soil sample from SB-B at 1 and 10 feet had minor to moderate VOCs, SVOCs and cyanide. The 20 foot sample from SB-B had 800 ppb benzene, 16,000 ppb naphthalene and 17,400 ppb cyanide. Soil samples were collected from well cluster A, well cluster C and boring SB-D in the former west holder foundation. Well cluster A had moderate benzene in the 12 foot, 17 foot and 20 foot samples. Naphthalene was 10,000 ppb in the 12 foot sample and 760 ppb in the 20 foot sample. Cyanide was present only in the 20

VERIZON (Continued) **S105058434**

foot sample at 1100 ppb. Well cluster C did not have benzene in the shallow samples. The 21 foot sample had 600,000 ppb of benzene and 640,000 ppb of naphthalene. Cyanide was 2200 ppb in the 11 foot sample and 27,700 ppb in the 21 foot sample. SB-D was non-detect for benzene and had minor hits of other VOCs in the 21 foot sample and the 24 foot sample. There was no naphthalene nor cyanide in the 12 foot sample, but minor naphthalene and cyanide in the 24 foot sample. For SB-C, there were no detectable target VOCs. The 14 foot sample and the 22 foot sample had 22,000 ppb naphthalene and 47,000 ppb napthalene, respectively. Cyanide was at a minor concentration. The 36 foot sample did not have naphthalene nor cyanide. EnviroTrac had soil samples from SB-B (20 feet down), B-14 (5-7 feet down), B-14 (11-13 feet down) and B-15 (11-13 feet down) analyzed. SB-B had 1500 ppb benzene, 3800 ppb total xylenes and 14,000 ppb naphthalene. B-14 in the 5-7 foot sample had 50,000 ppb naphthalene, 10,000 ppb 1,2,4-trimethylbenzene and 29,000 ppb naphthalene as an SVOC. The 11-13 foot sample from B-14 had 18,000 ppb naphthalene. The 11-13 foot sample from B-15 had SVOCs with slight exceedences of the benzo series of analytes. Con Ed and EnviroTrac performed joint groundwater sampling on 9/30, 10/1 and 10/2/08. Wells MW-1 to 5, 5A, 5B, 7, 8, 10 to 12 and cluster wells A-2, A-3, B-2, B-3, C-2 and C-3 were sampled. EnviroTrac by itself sampled MW-9, 14 and 15. The Con Ed data shows that all of the wells except 5A had exceedences of VOCs above the TAGM standards. All of the wells except 5A had elevated benzene - above what would have been expectde if gasoline was the sole source. The deeper cluster wells A-3, B-3 and C-3 had higher benzene concentrations than shallow wells A-2, B-2 and C-2. All of the samples except 5A, 8, 9, 14 and 15 had low to moderate MTBE. MW-8 and MW-9 had 4800ppb and 85,000 ppb of naphthalene, respectively. A comparison of the EnviroTrac lab results to the draft Con Ed data supports the VOC results obtained by EnviroTrac. EnviroTrac sampled groundwater on 1/15/09. All of the samples except MW-7, 14 and 15 had elevated VOCs above the standards. All of the samples except MW-7, 14 and 15 had elevated benzene - more than would be expected with gasoline as a source. The samples from the deeper cluster wells A-3, B-3 and C-3 had greater benzene than the samples from the shallow wells A-2 , B-2 and C-2. Several wells had low to moderate MTBE concentrations. EnviroTrac discussion in report: EnviroTrac notes that though no coal tar was found in the deep soil samples, there were coal tar odors. They also state that the deepest soil samples from within the eastern former gas holder foundation (21 feet at SB-A, 20 feet at SB-B) had elevated benzene, naphthalene and cyanide. The 20 foot sample from cluster C had extremely high conentrations of benzene, naphthalene and cyanide. The sample from SB-D did not exhibit elevated benzene, naphthalene and cyanide. The deep soil sample from cluster A had moderate concentrations. In EnviroTrac's opinion, the petroleum VOCs could not have moved down through the water table. The VOC contamination at depth is not related to the petroleum spill. The 14 to 22 foot samples from SB-C had elevated naphthalene. This sample was 10 feet below the water table. EnviroTrac believes that the contamination is due to the MGP waste. The impacted soil at B-14 was impacted down to the water table. This area is not near the USTs or any remote fills. The source may be the Midtown Chelsea Auto Center. The data from the September to October 2008 and January 2009 sampling events show that benzene concentrations were higher in the deep cluster wells than the shallow cluster wells. There were elevated benzene concentrations in the soil

VERIZON (Continued) **S105058434**

samples from just above the bottom of the former gas holder foundations indicating that benzene was diffusing from the MGP impacted fill and was becoming soluble in the groundwater. The former USTs were in the eastern former gas holder foundation. The former gas holder foundations are not hydraulically connected. In EnviroTrac's opinion, the VOC contamination in the western former gas holder foundation is not related to the former USTs. As MTBE is low, gasoline is not the primary contaminant. 3/26/15 - Raphael Ketani. I drafted a letter to Mendy Taffel, Chief Executive Officer, Retaco Holding Corp., 362 Kingsland Avenue, Brklyn., NY, 11222-1905. In the letter, I stated that Retaco had to do additional delineation of the gasoline contamination on the north side of the site. I added that wells must be installed in a series along the sidewalk on the north side of West 18th Street. These wells must be part of the well monitoring array and sampled at the same time as the other wells during the quarterly monitoring events. Lastly, quarterly groundwater analytical reports must be submitted to the Department. 3/30/15 - Raphael Ketani. The letter was approved by Hassan Hussein, EE III and head of Unit C. I sent the letter out today. 4/14/15 - Raphael Ketani. I received an email from Ronald Tramposch of Core Environmental that he is the new consultant for Retaco (rpt@coreenv.com). 4/15/15 - Raphael Ketani. Richard Dana of Albany DEC Remediation (518) 402-9662 sent an email to Barry at Mendon Leasing informing him that he will be handling both the MGP waste remediation and the gasoline spill remediation. As the gasoline spill will be managed by Mr. Dana as part of the remediation of the entire site, I am closing spill case effective today."

Remarks: "cont. soil found during excavation for new elevator pit. no elevator existed prior."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER Sangesland spoke to Mr. Williamson. Appears to be a neighborhood fight. Next door is a construction site and Mr. Williamson's building has been hit by construction equipment from next door. Fire Dept was called to the site. Mr. Williamson says the problem site address is probably 438 West 19th St (anything below 446 west 19th). He says the site is going to be a new highrise apartment building. Site is already dug 30 ft down with a basement/sub-basement level. Sidewalls have been poured and the foundation walls now rise to street level. Strong smell of diesel at the site. spill closed Ref to #0311002"
Remarks:	"Smell of diesel fuel possible spill. The resource is in the air right now unsure if there is actually a spill. All other info is unknown."

Contact Name:	LABIB NADER
DEC Memo:	"12/26/03 11:30 Hrs - Sawyer - Responded to the site to check a minor spill of 35 gallon tank and a larger spill from the removal of the 1500 gallon tank. The project manager who I had spoken to on the phone before I left was not at the site when I arrived. His name is Labib Nader,the superintendent (cell) 201-532-9302 and he would arrive later on after lunch. When he arrived I notified him that the excavator had uncovered two more tanks and they should also be registered before removal. From the latest PBS registration, the two 550 gallon tanks are registered and classified as removed per 1/20/04. 01/26/04 0929 Hrs - Sawyer - Received a call from Richard Parrish of Impact Environmental (631)269-8800, (516)805-8900 who has been retained by the contractor, Breeze International. He was giving the background to a spill reported this morning from the same site. He explained that when the two 550 gallon tanks were removed major petroleum contamination was found. They will remove as much of the contaminated soil as they can and get ground water samples to see the extent of its pollution. 2/17/04 Investigation Plan received. 2/26/04 Investigation report prepared by Impact Env. Gasoline release from the two 550gal USTs has impacted soil and groundwater. 4/19/04 RAP dated 4/7/04 received. 06/24/04 Transferred from Sawyer to Foley. Reference spills #0311976, 0313332. 6/30/04 Rich Parrish hand-delivered RAP dated 4/15/04. Explained that construction has already begun for the Chelsea Club. Vapor barrier, resistant to petroleum, will be installed. Proposing an SVE/AS system which will be horizontal on the west side of building with two vertical points on north side. They were planning on horizontal piping on north side but changed due to a change in construction details. 7/6/04 Reviewed and conditionally approved RAP. Faxed to R. Parrish. 5/6/05 Update from Hal Benjamin, Impact. Wells installed early in the project were destroyed during construction activities, so the following wells are

BETW. 9TH/10TH AVE. (Continued) **S106127254**

in place at this time: Horizontal SVE-1, MW-1, and AS-1. Hit refusal on several tries at the location of MW-2. Location is now inside a parking garage with a seven foot ceiling.(requested that we skip this install) Scheduled to drill MW/SVE-2, AS-2, MW/SVE-3, and AS-3 next week(5/9/05). Pilot testing has been completed & equipment has been installed. Piping is in place except to MW/SVE-3, AS-3. Those lines will be connected during drilling event. Looking to start up the system within a month. 5/19/05 Update from H. Benjamin, Impact. MW-1, SVE/MW-2, SVE/MW-3 installed. Gave approval to not install MW-4. Horizontal SVE also already in. Electric to be installed followed by startup. Will notify of startup and send in the data with first report. 5/24/05 System start-up. 9/9/05 Update from H. Benjamin. They started the system at the end of May and just performed the first quarterly sampling. Will send a startup/quarterly report when the lab data comes back. 10/31/05 Start-up procedures and 1Q05 report received.Effluent concentrations were monitored to verify compliance with discharge limits. Once SVE effluent stabilized, sparge was started. Effluent was measured weekly for first five weeks and at least monthly thereafter. Estimated 96lbs of total hydrocarbons removed from 5/24-10/17/05. Groundwater concentrations decreased from 5/19 to 10/6. 1/18/06 Quarterly dated 1/11/06 received. GW concentrations have decreased. Sampling from 12/7/05 showed no VOCs detected in MW-2. Two VOCs were detected in MW-1 but below GWQS. Two VOCs were detected in MW-3 marginally exceeding GWQS. SVE effluent is approaching asymptotic. 4/3/06 3Q06- MW-1 and MW-2/SVE-2 are ND for BTEX and MTBE. MW-3/SVE-3 shows exceedances for xylenes, ethylbenzene, napthalene and 1,2,4-trimethylbenzene with total BTEX at 330ppb. 4/19/06 NFA issued. "

Remarks: "CALLER FOUND TwO TANKS IN GROUND ONE THEY RUPTURED WITH MACHINE. UKNOWN MATERIAL SEEPKING OUT."

Environmental Interest/Information System:

CON EDISON (Continued) **1018278250**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 6/8/2004 Sangesland spoke with Johnathan Hacker. He said the property was sold and the new owner is: 17th & 10th Associates LLC c/o Taconic Investment Properties 111 Eighth Ave - 15th Flr New York, NY 10011 Attn: Charles Bendit 212-220-9945 A new contaminated soil letter was sent out 6/8/2004 6/24/2004 Sangesland spoke with Mr. Bendit asking for an update on the cleanup of the site. He said he has a meeting scheduled with Dan Walsh and Vadim Brevdo of DEC Brownfields on July 21st. At that time the owners will probably bring the property into the Brownfields program for a redevelopment/cleanup. 12/12/05- DEC Piper determined that this site has entered into the BCP. Re-Assigned to Joe O'Connell. 1/27/2005 - BCA fully executed 10/6/2008 - COC issued END. "
Remarks: "SOIL IMPACTED WITH PETROLEUM: THERE WAS ALSO A PREVIOUSE SPILL

Tank Info:

Tank Number: 001
Tank Id: 65864
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

C01 - Pipe Location - Aboveground
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
I01 - Overfill - Float Vent Valve
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
J02 - Dispenser - Suction Dispenser

THE GENERAL THEOLOGICAL SEMINARY (Continued) **A100296313**

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number:	1
Tank Id:	228004
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	G02 - Tank Secondary Containment - Vault (w/access)
	F00 - Pipe External Protection - None
	J00 - Dispenser - None
	H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
	L00 - Piping Leak Detection - None
	I02 - Overfill - High Level Alarm
	B04 - Tank External Protection - Fiberglass
	E00 - Piping Secondary Containment - None
	C03 - Pipe Location - Aboveground/Underground Combination
	K00 - Spill Prevention - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	A00 - Tank Internal Protection - None
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	11/01/2007
Capacity Gallons:	15000

Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping

400 WEST 20TH STREET (Continued) **U004078466**

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
I05 - Overfill - Vent Whistle

Tank Location:	Aboveground in subterranean vault with access for inspections..... Tank in subterranean vault but accessible for inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	2500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	06/06/2012
Register:	True
Modified By:	NTFREEMA

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Region:	2
DER Facility ID:	188548
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 11/17/99 Call from Mark Turoff - Environmental consultant hired to work this job. pager 917-525-3087 cell 917-750-1843 Mr. Turoff requested an extension in time until late December. Sangesland asked several specific questions about what was being done on the site now (new tenent moving in?) Are there any other tanks on the site? will the tank be removed or abandoned in place? Mr. Turoff knew nothing. Sangesland asked him to answer these questions and plan what needed to be done. Submit that in writing and then PERHAPS the actual work could be postponed until late Dec. '99 11/26/99 - Mr. Turoff sent a letter dated 11/22/99 requesting an extension of deadline date. NONE of the information requested in 11/17/99 telephone conversation was submitted in this letter. Mr. Turoff requested a written extension of the deadline, but since he did not submit what was requested, no such letter will be sent out. 12/6/99 - Call from owner saying Trinity Consulting was on site chopping open the floor .... (no notification was made to DEC about this work).... Sampling will be done 12/7/99 early AM 12/7/99 - Six GeoProbe borings were pushed down to 10' - 12' to bedrock. Sangesland was on site for the first 4 borings - all appeared clean. Borings will be sent in for testing. If the results come back clean, the site will be closed out. 12/29/99 - Trinity sent in data from several soil borings. After Sangesland left the site on 11/7/99 another tank was found in the garage. This new tank was a clean motor oil storage tank used to put into cars during service. Borings were done around this one also. All borings were tested to EPA 8270. All results were below detection limits except for 1 taken near the fill line of the used motor oil tank. The one high sample had the following values: (Eco Test Lab) all below 300 ug/kg except: Fluoranthese = 420 Pyrene = 380 Benzo(a)anthracene = 440 Chrysene = 440 Benzo(b)fluoranthene = 500 Benzo(k)fluoranthene = 500 DEC status on this site is NOT closed, but it will be listed as inactive with no further action required. Since the source is gone and the contamination was just around the fill line and not wide spread, DEC direction is to have the tanks filled and taken out of service. Over time natural attenuation should remediate the site. In it's expected use as an art gallery with a concrete floor, this should have no impact on either health or environment. In the future if the use of the property changes, this issue may need to be addressed again. 1/11/2000 - Vinnie Lovari from Island Tank (718-967-9424) was given permission to open up the tanks, recheck size and then closed them out in place. PBS Registration

AUTO CARE WEST (Continued) **S106719717**

paperwork will be sent after the work is done. 1/26/2000 - Spill event is closed out."

Remarks: "TANK IN GROUND FOUND TO BE LEAKING-NO FURTHER INFO AT THIS TIME. "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"09/19/11-Hiralkumar Patel. 2:49 PM:- left message for Greg at GC Environmental. 2:52 PM:- spoke with Scott at Lawrence Environmental and Greg at GC Environmental. GC environmental performed a tightness test as part of potential property sale. site has one 4,000 gal #6 oil AST which is about 10% underground. supply/return lines runs aboveground in building. fill line runs underground below the sidewalk and then runs aboveground in the building. during test, Greg observed a tell-tale line from tank, but they could not find other open end of tell-tale line. Scott Smith Lawrence Environmental Group LLC. Ph. (212) 682-2001 09/21/11-Hiralkumar Patel. 1:51 PM:- left message for Scott. 2:29 PM:- received message from Scott. 09/23/11-Hiralkumar Patel. 12:53 PM:- spoke with Scott. he mentioned that Lawrence environmental was hired by James Bush. he asked to contact James for property owner's contact information. 1:03 PM:- left message for James. James Bush Ph. (212) 977-5000 09/23/11-Hiralkumar Patel. 11:31 AM:- spoke with James. James mentioned that his company is planning to buy this property and they are dealing with broker. as part of possible property transcation, they did Phase I report and found some issues. so they hired Lawrence environmental, who did soil borings and tank test. James asked to contact Paul at Eastern Consolidated. Paul Nigido **broker** Eastern Consolidated Ph. (212) 499-7700 alternate addresses: 364-370 W 18th Street, 112-126 9th Ave PBS #: 2-256552. as per PBS record, site has one 4,000 gal #6 oil AST in contact with soil. tank was installed in Apr. 1940. other spill: 0905371. spill was reported by tenant due to petroleum odors in building. DEC Vought inspected site and found no problem. case closed. 1:07 PM:- spoke with Ben Haghani, property owner. informed him about tank test failure. he mentioned that they already corrected the problem. he doesn't know much but will send update after talking to person who is handling this issue. FRG 9th Avenue LLC. **property owner** 380 Madison Avenue, Suite 2401 New York, NY 10017 Attn.: Ben Haghani Ph. (212) 922-1220 Ext. 303 email:

LAWRENCE ENVIRONMENTAL GROUP LLC (Continued) **S109828460**

ben@fortunarealtygroup.com 1:47 PM:- sent TTF to Mr. Haghani. letter emailed to Mr. Haghani. case assigned to DEC Falvey. 10/13/11-Hiralkumar Patel. 3:42 PM:- received call from Mark Cherchio (212-922-1220 Ext. 303) from management. he mentioned that the tank failed the tightness test because of old tell-tale line. they have cut that line and now system is tight. asked Mark to submit letter from contractor confirming reason for tank test failure and passing test result. 10/31/11-Hiralkumar Patel. received letter report from Mr. Cherchio including tank test results. based on submitted information, case closed."

Remarks: "1555 THE CALLER ADVISED DISPATCH OF A TANK TEST FAILURE. FAILURE IS UNDER INVESTIGATION."

Spiller Name: Not reported
Spiller Company: REM RESIDENTIAL
Spiller Address: Not reported
Spiller Company: 999
Contact Name: RICK ELEZI
DEC Memo: "08/10/09-Vought-Off hours responder. DEC Ahmed (primary off hours responder called caller Rick Elezi (212-260-8060) who was contact for REM Residential (management company for building) and left message to return call immediately. Due to no call back Vought responded to site and called and left second urgent message for emergency hotline at REM Residential (left message with Victoria). Onsite Vought met with building super Jose Lopez (ph:914-490-0806) who when informed of the odor complaint, immediately referred that the call most likely came from Apt 3K (Rick) who was repeatedly calling various city agencies with numerous complaints. Lopez also mentioned that Rick was in current litigation with landlords of building. Vought noticed no odors in lobby of building. Vought inspected basement and found minor spill (12 patch of stained concrete) by oil burners and noted speedy dry was already applied to spill. No odors in basement. Also no observable spills or odors in secondary containment room of 4000-gallon #2 fuel oil AST (registered as in contact with soil). Spill closed by Vought due to no odors, very minor spill on concrete. 11/16/09-Vought-Received call from Richard Saler(917-414-7379) who was inquiring as to status of above spill. Rick mentioned numerous toxic hazards to his building including illegal venting from new sandwich shop, mold, fire hazard from stored oil and adjacent electrical supply (note that fuel oil has very high flashpoint and presents minor explosion hazards). Rick noted that three large of drums of oil were formerly stored in a room with a half door and there was a large oil spill there and suggested that Vought missed room during last site visit. Rick also mentioned that NYCDOH was onsite but would not provide Vought contact information for NYCDOH representative despite repeated requests and said that he would only provide it to Vought if additional site visit was performed. Vought discussed that if source of initial complaint was known than Department would have responded immediately back in August to have NYCDOH site visit to ensure health and safety of residents. Rick mentioned that he was made report to NYC Department of Investigations due to his lack of satisfaction with NYCDOH. Vought informed DEC Austin of second complaint. Rick will send pictures to Vought with spill and stated that door was closed at time of DEC Site visit. Vought arranged site visit for 11/17 at 10am during which NYCDEP rep would be onsite also arranged by Rick. Rick mentioned that there were presently no odors in his apartment. Vought called Jose and informed him of DEC site visit and requested that he leave room with half door open. Jose noted that room with half door was room that Vought inspected on 8/10/09. 11/17/09-Vought-Site visit by Vought with Richard and NYCDOH Eric Joseph (212-442-3372)from unit of P. Stallbohm. Joseph indicated that this was his second time responding to site and meeting with Richard. Richard indicated that building was being impacted by food odors from Subway sandwich shop. NYCDOH Joseph inspected Subway sandwich shop and inquired as to ventilation system. No sources of petroleum in Subway Sandwich shop. Vought requested to inspect residence of Richard for vapors and Richard declined request and said that there were no petroleum odors in his apartment . Vought inquired as to pictures of spill he said yesterday he had and he stated that he could not find them . Vought noted no odors in hallway

LAWRENCE ENVIRONMENTAL GROUP LLC (Continued) **S109828460**

of building or in basement hallway. Vought requested that Richard show Vought specific room where spill was because he stated Vought missed room on last inspection. Vought inspected room with Richard and NYCDOH Joseph and room was same room that was subject of inspection (and 12 oil stain on poured concrete floor) as last site visit on 8/7/09. No additional signs of spillage from last site visit and no petroleum vapors. NYCDOH Joseph confirmed that during his prior visit he performed PID survey of basement and found no odors. No additional cracks or routes of entry to subsurface. Vought explained results of inspection to Richard and spill will remain closed. See edocs for photos of site visit. "

Remarks: "caller lives at this address...claims that there are open containers of what looks like oil in the basement of building, containers have overflowed onto the basement floor...Odor of petro in apartment"

DEC Memo:	"3/20/15- Ahmed - Spoke to Karyn marsh (202 887 3679). Her client is renovating the basement. During the renovation they found 4 vaulted above ground tanks. they retained environmental consultant, Partner Engineering and Science to do investigation. They collected soil samples and received the results. asked her to email me the sample results. Assigned it to Mahat for follow up. 3/27/15: Mahat DEC Mahat leaft a voice message to Ms. Marsh to call back for a touch base. 6/1/15: Mahat DEC Mahat received an email from Mr. Karyn B. Marsh: Dear Santosh, As we discussed on Friday, please find the Draft Remedial Investigation Report, prepared by Partner Engineering and

OXYGEN MEDIA (Continued) **S117851371**

Science (April 2015) attached. The Draft RIR was recently prepared by the consultant who has been investigating the basement contamination and includes a description of the circumstances leading up to the discovery of the soil staining and abandoned tanks, the investigation procedures and protocol, findings and recommendations for addressing the contamination, as well as the laboratory reports. I will also send you the Phase I Environmental Site Assessment for Chelsea Market, 75 Ninth Avenue, prepared by ATC (2011). The Phase I ESA discusses the property s use history, among other things. However, it is 17 MB and after attempting to send both these files to you, I received a message from the post master stating that the email was too large. I will explore options for reducing the file size. I may need to send it in pieces. Please let me know if you have any questions regarding the attached or need further information. After you have reviewed the attached, feel free to contact me to set up a site visit. Thank you, Karyn B. Marsh GIBSON DUNN Gibson, Dunn & Crutcher LLP 1050 Connecticut Avenue, N.W., Washington, DC 20036-5306 Tel +1 202.887.3679 " Fax +1 202.530.9544 KMarsh@gibsondunn.com " www.gibsondunn.com RIR Final Draft has been uploaded on D2 for reference. 8/21/15: Mahat e/c: RAP has been submitted to the Department. It has been uploaded to D2 for reference. DEC Mahat will get back to the contractor once the review is done. 9/15/15: Mahat RAP has been approved. DEC Mahat is waiting for a final report for the closure of the spill case. 12/2/15: Mahat A letter approving RAP has been sent to the property owner and retained contractor. It has been uploaded on D2 for reference. 9/12/2016 - V. Brevdo Spill Case is transferred from Spill Prevention and Response to Remediation Section B due to project manager Santosh Mahat departure to the other DEC Program, as per 9/9/16 discussion between Randall Austin and Vadim Brevdo. VB 9/13/2016 Transferred to Alex Zhitomirsky, as per Vadim Brevdo. 6/26/2018 I have contacted Chris Batista (Roux ph.516-250-0382). The site was sold to a new owner a few months ago. A recovery system was restarted about two weeks ago. It doesn't recover any product. Roux will submit a Summary Report and a Work Plan. AZ+ 9-20-2018 Contacted Chris Batista. The recovery system is not recovering any product for about ten months. No free-phase product is encountered by the existing wells. Oil is seeping through the walls of the building into the pit between the two vaults. Minor amount of oil seeping through the bottom of the wall in the boiler room. Roux proposed to advance four soil borings near the tank vaults. I have reviewed the Site Status update report, dated August 28, 2018. The report proposed advancement of four borings and installation of test pits. Roux also proposed opening the sidewalk and top slab above each vault to expose the vault contents and to complete test pits/cores within the vaults. I requested the following; 1. All borings must be finished as wells 2. Two soil samples should taken and analyzed from each boring. One soil sample should be collected from each test pit. 3. Groundwater samples should be taken from all wells. 4. All soil and groundwater samples should be analyzed for VOCs and SVOCs A revised Work Plan should be submitted to DEC for approval. Also, instead of well installation Roux might first open the vaults and investigate using the test pits. They will try to expose the top of the tanks. There are presumably four tanks. AZ 10-15-2018 Conference call with Chis Batista (Roux) and John Soden (Taconic, owner's managing company ph. 212-243-5060). According to Roux, neither recovery system nor recovery wells are recovering any product. There are currently two recovery wells, a

OXYGEN MEDIA (Continued) **S117851371**

sump pump and a monitoring well at the site. The tanks are old tanks, probably belonged to Nabisco. The tanks were not used for years. Probably, in 2015 product was evacuated from the tanks. The tanks are not registered and not closed. Roux doesn't know the location of the piping and fill ports. Roux plans to open the sidewalks and investigate the tanks. GWT is about 15-20' bgs, about 4' below the tank slab. Roux will submit a report summarizing the findings and the investigation plan. The owner will register the tanks. AZ 12-17-2019: An email from Roux: Alex, We had discussed this project a last year and have since been working on a strategy to remove the USTs from beneath the Sidewalk and clean out the vaults the USTs are contained within. The project is extremely difficult due to the logistics and layers of concrete, etc. overlying the USTs. It has been a complicated process to evaluate the situation and select a contractor to perform the work. The attached document details our plans to remove these USTs and clean the vaults, etc. I am also sending you a paper copy via Fed Ex. Based on the timing for acquiring permits from NYC DOT and NYC DOB, we anticipate starting this work around March 2020. We will notify you and NYSDEC PBS at least 30 days in advance. Can you please review the attached summary and let us know if you have any questions, concerns or objections to this work proceeding. Please feel free to contact me any time via phone, cell or email to discuss. Thanks, Chris. Christopher Battista, P.G. NY - Senior Construction Manager 209 Shafter Street - Islandia, New York 11749 Main: (631) 232-2600 - Direct: (631) 630-2391 - Mobile: (516) 250-0382 Email: cbattista@rouxinc.com - Website: http://www.rouxinc.com 2-4-2020 I have reviewed a proposed UST Removal Work Plan dated 12-16-2019. As part of the former bakery operations, four underground storage tanks (USTs) were used to store heating oil (likely used historically for heating the bakery ovens) and are located in concrete vaults below the north sidewalk of West 15th Street immediately adjacent to the Site. Roux recommends cleaning and removing the USTs and cleaning the inside of the tank vaults. The utility pit located between the UST vaults will also be steam cleaned, as necessary. All piping and injection lines running through the current boiler room will also be removed and disposed. Three, four-inch diameter holes will be cored through the floor slab of each vault for collection of soil samples. Samples will be collected from the zero to one-foot interval immediately below the vault slab. I have contacted Chris Batista, Roux, and asked him to include in the report tank registration information. I also requested that Roux attempts to collect samples down to groundwater level, locate and, if feasible, excavate the fill ports and associated piping. Roux will revise the report and send it back to DEC. AZ 2-21-2020 The following e-mail was sent to C. Batista and V. Brevdo: Dear Chris, I have reviewed the revised Site Status Update and Proposed UST Removal Work Plan received on February 20, 2020. I concur with this plan. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the

OXYGEN MEDIA (Continued) **S117851371**

implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alex Zhitomirsky 10-26-2020 The following email was received from Christopher Battista (cbattista@rouxinc.com): Alex, We hope that you, your collegues and your families are well. We wanted to update you regarding this Site. Jones Lang Lasalle has taken over as the Property Manager for the Chelsea Market Site. The Market was essentially closed for much of 2020 Due to the COVID-19 Pandemic. The Market has reopened, with restrictions and outdoor dining is now established on the Sidewalk of West 15th Street. Obviously, the pandemic has had a very significant impact on the Market and its tenants. The Owner still intends to move forward with the UST removal and vault cleaning work, but the work will likely occur in the First Quarter of 2022 when/if unrestricted operations of the tenants resume and the work can be performed with less significant additional impacts on their businesses. Please feel free to contact me anytime, if you have any questions. Thanks, Chris. 6-15-2021 The following email was sent to Chris Battista (Christopher Battista cbattista@rouxinc.com):Re: Spill No. 1411925 - Chelsea Market Site - 75 Ninth Avenue, New York, New York Zhitomirsky, Alexander (DEC) Tue 6/15/2021 8:35 AM Chris, Could you provide me with the mailing address for the current owner? I believe it is Taconic Management Company. Thank you, Alex Alexander Zhitomirsky Professional Geologist I, Division of Environmental Remediation"

Remarks: "Soil samples taken after the discovery of 4 tanks that were is a vault that no one knew about. Sample results received were about exceptable limits. Further investigation and cleanup is pending."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Corry Cust #87113 calls at 12:31 to report that at 12:25 he found approx 1/2 pint of oil on some soil in MH 43054 located at the S.W.C. of W.17 ST & 10th Ave. The spill is contained at this time is coming from a feeder cable located in the structure. Mr. Cust was there to do repairs and was working under acct 42228. There were no sewers or waterways affected. No fire or smoke involved. There were no injuries and weather conditions did not contribute to the spill. No private property was affected. There is no water present and no sumps or pumps running. Mr. Cust has installed an environmental tag in the structure # 42790. At this time no lab samples will be taken due to the fact the feeder needs to be D-Faulted by #9 and will be put in as a regular spill. Edgar Rios # 85938"
Remarks:	"1/2 pint, unable to clean it up because there is a default in the hole. no to five questions. con ed#163902 "

Took a sample. A partial cleanup is in progress, full cleanup will be pending deenergizing and removal of unit. The count as per cinde records are 33 ppm. No smoke, no fire, no sump pump running, no sewer connection, and it did not enter sewer. PCB count 21.ppm Unit was denergized as OOE cat 1. Partial cleanup completed at 17:00. Generated 2 55-gallons split ring drums of <50ppm solid waste. Transported same to W. 28 St. WOL. applied oil absorbant to vault floor. Found weephole to adjacent Vault (V6052) plugged. Boomed same. Also, disconnected and boomed pump in V6052. Final cleanup pending transformer removal. Unit is drained by Astoria <50 ppm tanker truck. 300 gallons of oil was drained. Max capacity of transformer is 330 gallons in accordance with nameplate data. Transformer was also disconnected. The clean up was completed by M.Prystup #02394; K.Christiansen time 0800 to 1130, removed 3 drums of solid waste transported to west 28 St. Industrial waste pit. Double washed floor with slix and oil free, re-rinsed with flush truck. Removed oil tag, reported by J.Gnall O.S. Logger R. Smith."
Remarks:	"leak from a transformer - contained in vault & mixed with dirt -partial clean up has been done already - con ed #127012- full clean up will be done pending deenergization of transfromer history shows 30ppm"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"06/21/13-Zhune spoke to Daniel Carrus from Langan Engineering 646-434-8211. He said client is doing real state transaction. As part of due diligence langan conducted investigation at this site. During investigation they found staining, elevated PID and odors in the soil. They installed four borings arround the tank and three borings downgradient the tank. They collected samples of soil and groundwater. The analytical results indicated no exceedance in the soil. Groundwater indicated elevated VOCs in couple of locations. Once they completed the investigation report they will send a copy to DEC. 08/05/13- Zhune received and reviewed the Phase II Report dated 07/25/13. The site building will be renovated for commercial usage as retail and office space. Proposed site redevelopment will consist of converting the basement area for usage as a restaurant or retail space, and converting of the above -grade parking areas to office space. Seven soil borings were installed. Two borings SB-1(MW) and SB-2(MW) were installed along West 15th steert near Anomaly 1. The remaining borings SB-3 through SB-7 were installed in the basement of the building near to anamaly 2. The soil analitycal result detected four VOCs at concentrations exceeding the limit: 1,2,3 -trimethyl benzene (5.1 mg /kg) in SB-3 6-8')and TPO1 (54 mg/kg) (4 0; 1,3,5 -trimethyl benzene (56 mg/kg)in TP01 (4); Ethylbenzene (2.1 mg/kg) and n-propylbenzene (6.2 mg/kg) in SB-4(MW)(5-9') The Groundwater analitycal result detected concentrations of VOCs exceeeding the limit in groundwater samples collected from SB-2(MW) and SB-4(MW): 1,2,4,5 tetramethylbenzene (7 ug/l) in sample SB-2(MW) and (49 ug/l) in sample SB-4(MW) 1,2.4-trimethybenzene (33 ug/l) in sample SB-4(MW) and (8.9 ug/l) in sample SB-2(MW). 1,3,5-trimethybenzene(33 mg/kr), Ethylbenzen(480 mg/kg), Isopropylbenzene(58 ug/l), n-ptopylbenzene(120 ug/l), P/m-xylene(49 ug/l)and tricloroethene in sample SB-4(MW) Langan recommended to expose the area of anomaly 1 (removal of the oncrete floor and soil as necessary to confirm the presence and conditons of USTS. 08/05/13-Zhune spoke to Daniel Carro. He said Langan is going to send the work plan. Work activities at

FORMER PARKING GARAGE/FUTURE OFFICES (Continued) **S113818221**

this site are going to star in February. 12/18/13-Zhune received and reviewed the work plan dated 12/18/13. The plan includes 1. Removal of the concrete slab in anomaly 1, exposing suspected tank and evaluating 2.Decommission, closure and the removal of the suspected USTs identified inthevacinity of anolay 1 3.Removal of soil with concnetration s of petroleum-related contaminants above the NYSDEC CP-51 4. Dewatering and disposal of groundwater, where necessary, to complete the removal od USTs and remedial excavation. 5.collection and analysis of endpoint samples soil and groundwater samples. 6. Bench-scale pilot study for determining ISCO parameters (If required, based on the endpoint sampling results) 7. Site restoration-backfilling of remedial excavation area to development grade with certified fill. Submission of a Remedial Action Report (RAR). 01/15/14-In a letter dated January 15, 2014 the Department approved the Remedial Action Plan. 02/26/14- Ilka sent the following email dated 02/26/14 As discussed last week and earlier today, the tank closure activities started on 2/14/2013. Based on the site observations, there are four 550-gallon tanks onsite. After the basement slab and the soil between the slab and concrete encasement were removed, we found that the concrete encasement of the tanks is placed in very close proximity to the building foundation elements (see attached cross section). In particular, the northernmost tank (Tank #1) is abutting the northern building foundation and exterior wall, and the portion of the southernmost tank (Tank #4) is situated adjacent and below the two column footings. Continuous dewatering requirement and location of tanks and encasement raised questions and concerns over the removal of the tanks and the stability of the building foundation elements. We consulted with our in-house geotechnical engineer and the client's structural engineer. Although our approved Remedial Action Plan proposed the removal of the tanks, based on the findings, the geotechnical and structural engineers recommended that the tanks be closed in place and not to be removed in order not to compromise the structural integrity and stability of the building. The closure activities will still include removal of all piping and contents of the tanks and cleaning of the tanks. After the tanks are cleaned, they will be filled with concrete, and impacted soil around the tanks (to the east and south) will be excavated to an extent practical and feasible. Following completion of the tank closure and soil removal activities, we will collect endpoint soil samples from the eastern and southern part of the tank excavation. Groundwater samples will be collected from the existing monitoring wells located on the sidewalk. We also collected soil and groundwater samples from the excavation for treatability study. When we have the results of endpoint soil and groundwater and treatability study results, we will present them to you for further discussions. The details of the tank closure activities and all associated data, documentation, and manifest will be included in our tank/spill closure report. 02/27/14-Ilka sent the following email: The site activities are still ongoing and tanks will be filled with concrete tomorrow and the site will be restored on Monday. Today, we removed some impacted soil from south and east sides of the tanks to an extent possible. Because the groundwater table is at about 6 inches below the basement slab, all soil around the tank encasement is saturated. As you know, we can only do small amounts of dewatering because of the location of the tanks and building foundation elements. Therefore, we will not be collecting any soils samples. We will collect groundwater samples from the two existing monitoring

FORMER PARKING GARAGE/FUTURE OFFICES (Continued) **S113818221**

wells on West 15th Street (see the site plan for well locations). The monitoring well, SB4(MW) was destroyed during the tank closure activities. We will reinstall and sample this well also. 3/11/14- Ilkay sent the following email. the email stated the following As discussed, we install the monitoring well on the south side of the tank excavation last week. The well was developed on Friday, March 7, 2014. We would like to sample the new well and also the other two wells on the sidewalk, tomorrow. 3/11/14- Ilkay sent the following email. As discussed on our phone conversation, we will be conducting the groundwater sampling tomorrow 4/24/14-Vought-DEC Zhune out of office on extended vacation. Vought received email from Langan (Spanos) on 4/17 that Jeff,I understand from Veronica s voice message recording that she is out of the office until May 7th. Based on my earlier conversations with her, and since you are already aware of this project; I would like to give you an update and discuss the results of our tank closure activities and groundwater sampling results early next week. Below is the summary of the tank closure activities conducted at the site in February and March 2014: Langan contracted Brookside Environmental (Brookside) for the closure of four 550-gallon underground storage tanks (USTs). After removal of the cellar slab on top of the tank area in the cellar level of the building on site, Brookside excavated the soil between the cellar slab and tanks concrete encasement. The excavated material exhibited evidence of petroleum impacts, odor, staining, and photoionization detector (PID) readings of up to 200 parts per million (ppm). During soil removal, groundwater was encountered within a foot below the cellar level. Therefore, dewatering was necessary during soil removal and tank closure activities. Due to structural concerns arising from the tanks proximity to column footings and foundation walls, we were not able to remove the tanks. This was discussed with Veronica, and following her approval, the tanks were closed in place after cutting them open and cleaning. Following is the summary of the material removed offsite: o Two drums of residual sludge derived from tank cleaning was disposed of at the Clean Water of New York facility in Staten Island, New York. Tanks were found to be intact and no holes were observed at the bottom of the tanks. o Petroleum-impacted soil was stockpiled on and covered with poly onsite until the waste characterization sampling results were received, reviewed and approved by a disposal facility. Stockpiled material was loaded onto approximately 20 cubic yard dump truck approved under New York State Department of Environmental Conservation (NYSDEC) Part 364 permit No. PA-263 for off-site disposal at the Clean Earth of Carteret facility in Carteret, New Jersey. o Petroleum-impacted concrete was loaded into one approximately 20 cubic yard truck-mounted roll-off container approved under NYSDEC Part 364 permit No. PA-263 for off-site disposal at the Clean Earth of New Jersey facility in Kearny, New Jersey. o A total of approximately 42,650 gallons of groundwater derived from excavation dewatering was pumped into holding tanks on site than it was disposed of at the Clean Water of New York facility in Staten Island, New York by vacuum trucks. Following our discussions with the case manager, tanks were backfilled with concrete and the remainder of the excavation was backfilled with -inch gravel followed by replacement of the concrete floor slab. Because of the shallow groundwater table, soil around the tank was saturated; therefore, no soil samples were collected for laboratory analysis, as per our discussions with the case manager. During tank closure activities, monitoring well SB-4(MW) located south of the

FORMER PARKING GARAGE/FUTURE OFFICES (Continued) **S113818221**

USTs in the cellar level was destroyed. Under Langan oversight, Eastern Environmental installed a new 1-inch groundwater monitoring well, SB-4R(MW), to replace destroyed monitoring well MW-4. Following development of the new monitoring well, Langan collected groundwater samples from monitoring wells SB-1(MW) and SB-2(MW) which are located on West 15th Street sidewalk, and SB-4R(MW) on 3/12/2014 (see attached figure for well locations). o Groundwater analytical results from the 3/12/2014 sampling event were significantly lower compared to the samples collected on 6/14/2013. There were no concentrations above TOGS AWQS except for cis-1,2-dichloroethene (offsite well SB-2[MW]), sodium, and iron. The attached figure shows the results from both sampling events, and the groundwater analytical results are summarized in the attached table. The source of the spill was identified as the USTs/associated piping which were removed in accordance with city, state and federal regulations. The NYSDEC PBS registration was updated accordingly, and post excavation/tank closure groundwater sampling indicated no impacts. Based on these conclusions, we are recommending that the spill No. 1303087 be closed. We will compile the details of site activities, soil and groundwater disposal, and analytical data into a report and submit it to you in couple of weeks. Copies of all the manifests, truck permits, tank closure affidavit, and facility approval letter will be included in the closure report. Please let me know if Tuesday or Wednesday of next week (April 22 or 23) 10AM is convenient for your to discuss the above information. Thanks, Ilkay.
4/24/14-Vought-Called and spoke to Langan (Spanos) and based on above and as well as discussion had with Spanos that noted new groundwater samples at MW4R that are non-detect for petroleum related VOCS, that she should submit a Closure Report to DEC Zhune. Vought replied to Spanos email dated 4/22 that Ilkay, As per our telephone discussion today, the Department has reviewed the below and if no new information is noted apart from the below in the report (once received and reviewed) the Department will close the Spill Case. We look forward to receiving the Closure Report you noted below, Thanks.
9/30/14- Spill closure Report received. Spill Closed."

Remarks: "5-7 UST on site suspected of leaking. Further action and cleanup is pending investigation."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 12:00pm called John Brennan requested to call back for inf. update. 12:28pm affected area 15 x 12'. 2 lift removed hoses are still there. contaminated soil found. RP willing to spend up the clean up process. dirty soil letter sent to owner and faxed to contractor. faxed 973-781-1804 x 15. 12/17/2002-Vought-Spoke with Kevin Ziegler (973-781-1801, Brennan Environmental Inc.) who was hired by property owner (Prince Lumber, Guy Appicello). Brennan will excavate impacted area and analyze 5 endpoint soil samples for STARS 8270. Will send closure report by 2/15/02. 12/31/2002-Vought-Spoke with Kevin Ziegler. They encountered 275 UST waste oil tank. Tank was removed and PBS registration will be ammended. Tank was in poor condition (holes). Will add STARS 8260 to analyses. Will send report by 2/15/2003. 1/23/2004-Vought-Spill transferred from Vought to Austin. 1/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 4/27/04 - Sawyer - Called Kevin Ziegler of Brennan and requested closure documentation for this site. There was a final report, which the Department did not have a copy. Kevin is mailing the report as soon as possible. I will review the report upon receipt. 5/03/04 - Sawyer - I received the report from Brennan Environmental. I am presently reviewing the report. 6/15/04 - Sawyer - Though there are some semi-volatiles which are barely above TAGM levels for clean up most of the samples analyzed did not detect any other contatmination. No further action required. Closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO 10/28/02 10:00am - Tipple and Zhao inspected the site this morning. It was found that oil evidence at the boilor room at 345 W 16 Street. It might seeped to backyard. No evidence on the surface of backyard. Clean up the boilor room and investigation of subsurface contamination is required. jz 4/30/2005 jz: No investigation has been

345-347 WEST 16TH STREET (Continued) **S106008685**

conducted by owner. Spill closed based on that there is no other impact reported for the past 2 yaers."

Remarks: "TENANT'S ASSOC DISCOVERED OIL IN SOIL OF BACKYARD WHEN THEY STARTED RESTRUCTURING THE BACK YARD - THEY DID THEIR OWN TESTS BY PLANTING IN THE AREA - NOTHING WOULD GROW - WHEN YOU DIG, YOU CAN SEE THE OIL. SUPERINTENDENT STATED THAT NOTHING WOULD GROW DUE TO SOMEONE DUMPING WASTE OIL IN THE YARD."

DEC Memo:	"9/19/16- DEC Piper spoke with William from WCD Group. The site is being redeveloped and they encountered free phase hydraulic Oil in one well. There is a previous closed spill on this site dealing with the removal of hydraulic lifts. Spill 0208837. They are planning to further delineate via test pit. GW is 17 feet bgs. Once they have plume defined, they will excavate. Email summary of findings will be sent to DEC Piper and will be reviewed and forwarded. Assigned to DEC Omar for follow up. 9/26/2016: Rashad Received email from WCD Group: In accordance with our phone conversation earlier this week, WCD performed an investigation to delineate the extent of the above-referenced petroleum spill. Evidence of a petroleum release was observed on groundwater during installation of well points for future de-watering, and fingerprint analysis of the oil indicated that its source was hydraulic oil. As previously reported, the Site is undergoing construction, and soils across most of the Site have been excavated to 15 feet below ground surface (bgs), which is two feet above the groundwater table (17 feet bgs). WCD s investigation consisted of installing four test pits to delineate the extent of petroleum-impacted groundwater at the Site. The attached figure shows the estimated extent of petroleum-impacted groundwater based on field observations of the groundwater conditions within test pits as well as prior temporary groundwater wells installed during a previous investigation. WCD also collected soil samples for waste classification and end-points and will forward such results when they become available. Proposed remedial actions for the Site will include: " As part of Site-wide development (see next bulleted item), soils across the entire Site will be excavated to approximately 22 feet below ground surface (bgs), which corresponds to 5 feet below the water table, " Petroleum-impacted soils within the planned depth of excavation will be disposed at an appropriate off-site disposal facility, " Installation of a waterproof/vapor barrier beneath the floor slab and behind foundation walls of the new building, and " On-site treatment for discharge to New York City sewer via a discharge permit or off-site disposal of de-watered fluids at off-site facility (Note: this an option) Please let me know if you

FORMER PRINCE LUMBER (Continued) **S118951782**

have any questions or require additional information figure was received in email and uploaded to D2. Figure has 4 test pits down to a depth of 22 feet to delineate groundwater contamination. Test pit 4 did not show contamination. The proposed remedy is to excavate to about 22 ftbgs which is 5 feet below the water table, and installation of a waterproof/vapor barrier beneath the floor slab of the new building. The remedial actions for this site are adequate as it will remove all impacted soil and extend to soils below the water table, building will also include installation of waterproof/vapor barrier. 9/28/2016: Rashad 61 9th Avenue has an alternate address of 61-67 9th Avenue. Additional spill found #1407795 spill was closed in 2015 after a tank was found during a phase 2 investigation. 10/5/2016: Rashad Sent email to Bill (bsilveri@wcdgroup.com) approving remedial measures and asking him to keep me updated as remediation continues. 12/5/2016: Rashad Received email from Bill: In accordance with your prior email of October 5th, I m providing you with a brief update of the project status. For the past two months, Site work has consisted of completing necessary Support of Excavation (SOE) work to allow for site-wide excavation of soils to 22 feet bgs. This depth is approximately 5 feet below the water table. Due to this fact, installation of SOE work (i.e. underpinning of adjacent buildings) has required de-watering and treatment of de-watered fluids by on-site treatment plant in accordance with a New York City Sewer discharge permit. It is now anticipated that the SOE work will be completed within next two weeks and removal and off-site disposal of petroleum-impacted soils will commence shortly thereafter. At the Site, excavation will proceed from east (closest to 9th Avenue) to west. This approach for excavation offers the advantage of first removing the source of petroleum-impacted soils, thereby minimizing cross-contamination with uncontaminated soils towards the west of portion of the Site. As an additional remedial measure, an oxygen releasing compound (ORC advanced) will be placed in the excavation bottom for treatment of any residual contamination. Finally, an appropriate waterproofing and vapor barrier membrane system by Carlisle Coatings & Waterproofing Incorporated (MiraPLY) has been selected and will be installed beneath the basement slab and lower floor slab elements (elevator pit, sump pits, etc.) and behind foundation walls. We will update you on the start date of soil excavation when this date becomes better understood. Please feel free to call us if you have any questions. 12/14/2016: Rashad Received email from Bill: I m writing to let you know that removal and off-site disposal of petroleum-impacted soils at the Site is anticipated to start this Friday. 12/19/2016: Rashad Received email from Sarah Vitro of CBRE Inc: I was reviewing an email chain that was sent to me regarding the proposed remedial actions for the referenced site. CBRE conducted a Phase I Environmental Assessment during the time this Spill was assigned. At this point where does this spill stand? Has the remaining contamination been removed? I responded: I received an update last week from WCD Group that the removal of contaminated soil has commenced, and is ongoing. Sarah responded asking if dewatering has taken place on this site. I emailed Bill from WCD Group to obtain information. 12/20/2016: Rashad Received email from Danielle of CBRE: I was wondering if you could also give us some clarification on what is considered reportable to the NYSDEC in regarding to concentrations of VOCs, SVOCs, metals, pesticides, and PCBs exceeding regulatory criteria. The Phase II from 2014 for this property prepared by WCD identified the following: 7

FORMER PRINCE LUMBER (Continued) **S118951782**

SVOCs[benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, and indeno(1,2,3-cd)pyrene] including polycyclic aromatic hydrocarbons (PAHs) were detected at concentrations above the Unrestricted Use SCOs. Metals, Pesticides, and PCBs were also detected at concentrations exceeding regulatory criteria. 4 groundwater samples were analyzed. No SVOCs, metals, pesticides, or PCBs above GQS were identified, however three VOCs (1,2,4-trimethylbenzene (13 g/L), o-xylene (10 g/L) and p/m-Xylene (9.5 g/L) were detected above their respective GQS in one sample. Soil vapor revealed elevated petroleum and chlorinated solvent related concentrations. Methylene chloride was not detected in any of the samples collected. Trichloroethene (TCE) was detected in four soil vapor samples at concentrations ranging from 12.1 g/m3 to 166 g/m3 above the corresponding Air Guidance Value (AGV) of 5 g/m3. Tetrachloroethene (PCE) was detected in all four soil vapor samples at concentrations ranging from 107 ?g/m3 to 319 ?g/m3 above the corresponding AGV of 100 g/m3. It doesn t appear that any of the above exceedances were reported to the NYSDEC and based on our review of the Spill Guidance Manual, it doesn t appear that it would have been required as the contamination was not a result of a confirmed petroleum release. Can you confirm if this is accurate? In regards to the exceedance in groundwater, is this also the case and would the fact that it was contained to the property boundary also be a reason why it would not be considered reportable? Just trying to get some clarification for our Client. Thanks for your help. Consulted DEC Vought and replied: How is CBRE involved in this site? In general with respect to spill reporting, as per Navigation Law, The Department considers a discharge to be an exceedance of Soil Cleanup Levels for Gasoline Contaminated Soils and Fuel Oil Contaminated Soils (Table 2 and Table 3) of the Soil Cleanup Guidance CP-51, available on our website. With respect to other contaminates including chlorinated solvents, metals, pesticides, and PCBs there are no requirements as per Navigation Law for reporting. However there is an obligation to report exceedances of these contaminants via ECL, NYCRR, and CFR to our Hazardous Waste Section so that they may provide appropriate oversight and guidance. In lieu of a report being made to our Hazardous Waste Section, a report to the Spill Hotline is acceptable. Groundwater exceedances of TOGS 1.1.1 of petroleum compounds are considered a discharge and are reportable regardless of where they occur in reference to property boundaries. See section 1.1.1 Notification Requirements for Oil Spills and Hazardous Material Spills as per the Spill Response Guidance Manuel, in particular Exhibit 1.1-1 for more information. Please let me know if you have any other questions. Thanks. Bill responded: De-watering has occurred for the past several months in order to perform necessary underpinning of adjacent buildings. Danielle responded: Thanks for clarifying. We recently conducted a Phase I Environmental Site Assessment on this property. 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Timothy DeMeo end. 3/23/17 TJD File review. WCD has submitted a closure report pertaining to this open spill file. As per report, the entire site has been excavated to a depth of 22 ft bgs, which is 5 feet below the water table. The scope of the remedial action as presented in closure report is as follows: 1. Removal and treatment of petroleum-impacted dewatering effluent generated by site-wide development activities. The treated effluent was discharged to the New York City sewer system; 2. Mass removal of petroleum-impacted soils and

FORMER PRINCE LUMBER (Continued) **S118951782**

uncontaminated soils across the entire Site to a depth of 22 feet bgs, a depth that corresponded to 5 feet below the water table; 3. Applying oxygen-releasing compound (ORC Advanced"!) to the excavation bottom at the eastern portion of the Site; 4. Installing a waterproofing/vapor barrier beneath the new building floor slab and behind new foundation walls; and 5. Collecting and analyzing post-remediation end-point soil and post-remediation groundwater samples. Report contains further discussion of each of the above listed remedial action items. Removal and Treatment of Petroleum-Impacted Dewatering Effluent The discharge of dewatering effluent was conducted in accordance with the New York City Department of Environmental Protection (NYCDEP) permit number 781234 that allowed for the discharge of up to 6,408,000 gallons of groundwater from the Site. The on-site treatment plant consisted of a 9,000-gallon settling tank, an oil-water separator, two bag filters for removal of suspended particulates, and two liquid phase activated carbon units. Contaminant Mass Removal On December 20, December 21, and December 22, 2016, 56 truckloads containing 2,046 tons of petroleum-contaminated soil were removed from the eastern portion of Site and disposed of at Soil Safe Inc. s Metro 12 Facility, located at 300 Salt Meadow Road in Carteret, New Jersey 07008. Application of Oxygen Release Compound During our oversight of soil excavation and off-site disposal activities, WCD observed the application of ORC Advanced"! to the excavation bottom. A total of 1,488 pounds of ORC Advanced"! was applied directly to the excavation throughout the eastern portion of the Site in the area containing petroleum impacted groundwater (Figure 2). This work was completed following removal of petroleum-impacted soils on December 23, 2016. Waterproofing/Vapor Barrier A waterproofing/vapor barrier system with the capability of functioning as a vapor retardant was installed beneath the basement floor slab and behind foundation walls, and this work was overseen by others. Carlisle Coatings and Waterproofing (CCW) 70-mil MiraPLY-H was installed beneath footings, grade beams, elevator pit bases, and slab on grade. CCW 47-mil MiraPLY- V was installed on blindside foundation walls, and CCW MiraDRI 860/861 was installed on 2-sided foundation walls and pit walls. Both CCW-MiraPLY and CCW-MiraDRI conform to ASTM standards for specifications of water vapor retarders (ASTM E1643, ASTM E1993, and ASTM E1745). Post-Remediation Sampling Post remediation sampling was performed to verify the completeness of the remediation and consisted of collecting and analyzing 9 discrete, end-point soil samples and 3 discrete groundwater samples from dewatering points at the Site. The location of post-remediation soil and groundwater samples are shown on Figure 3. The post-remediation end-point soil samples were collected on December 22, 2016 and January 5, 2017 and submitted to York Analytical Laboratories of Stratford, Connecticut for analysis for CP-51 VOCs by United States Environmental Protection Agency (EPA) method 8260, CP-51 SVOCs by EPA method 8270, and TPH DRO by EPA method 8015. The soil sampling results for VOCs and SVOCs were compared to the CP-51 soil cleanup objectives (SCOs) for gasoline and fuel oil-contaminated soils to assess the need for further action. The soil samples were analyzed for TPH DRO for information purposes only, and were evaluated based on prior experience on similar projects and consideration of guidance values established for other states. Post-remediation groundwater samples were collected on January 16, 2017 utilizing dedicated bailers and were submitted to York Analytical Laboratories for analysis for CP-51 VOCs and CP-51 SVOCs by the aforementioned EPA

FORMER PRINCE LUMBER (Continued) **S118951782**

methods. Groundwater samples were compared to Class GA groundwater standards, as presented in the document titled Technical Operational Guidance Series 1.1.1 (TOGs). During sample collection, soil and groundwater samples were evaluated for the presence of gross petroleum contamination utilizing appropriate field observations (odor, staining, instrument readings, etc.). None of the soil and groundwater samples exhibited evidence of field contamination. As discussed further in the following section, post-remediation soil and groundwater sampling results were below the evaluation criteria for CP-51 VOCs and CP-51 SVOCs. Significant findings and results of the remedial action are as follows: 1. After completion of remediation, soils at the base of the excavation and groundwater from dewatering points exhibited no field evidence of residual petroleum contamination (e.g., odors, staining, PID readings, sheen on soil or groundwater); 2. No VOCs or SVOCs were detected above their respective DEC CP-51 Soil Cleanup Guidance evaluation criteria in the post-excavation endpoint soil samples; and 3. Other than Methyl tert-butyl ether (MTBE), no detectable concentrations of VOCs and SVOCs were found in the groundwater samples. Low concentrations of MTBE were found in 2 of the 3 groundwater samples and were well below their Class GA Groundwater Standard/Guidance value (10 micrograms per liter). Based upon the documentation provided the residual contamination has been removed from the site as part of the remedial actions described above. A review of the laboratory data collected post-remediation reveals all target analytes are within acceptable concentrations. No further remedial action is required at this time. All documentation has been uploaded to DECDOCS. Spill closed."

Remarks: "contamination based on sample results"

DEC Memo:	"10/28/14- Ahmed - Spoke to Wes at WCD (212-631-9000). As per him there while doing a phase II investigation, the drill hit an unknown tank (tank top was 1 ft below ground) and spilled some gasolene. The site used to be a taxi repair and filling station in 1940s. The site was last used for lumber yard. They want to demo and develop the site. They are in a process to e-designate the site under City's OER program. The consultant are putting together a plan to propose tank removal to the owners. Asked him to contact Santosh for future correspondance. 11/7/14: Mahat e/c: An email was sent to Wes to keep DEC informed about the progess on the case. 11/18/14: Mahat t/c: DEC Mahat is receiving a proposal to pump/remove the tank from the site. WES will provide the phase II investigation to prove the tank was never leaking and the vicinity of the tank is clean (soil boring). 11/18/14: Mahat Email Correspondace from Bryan: Mr. Mahat, Ref: 1407795 As discussed earlier this morning, with your approval we would like to go ahead and pump out the contents of an underground storage tank (UST) uncovered during WCD Group's Phase II Site Investigation of the property. If you have any questions please do not hesitate to contact me at: Work: (212) 505-4926 Cell: (917) 545-9226 Thank you for time! Brian. Brian will provide a report on pumping out the tank. 12/09/14: Mahat A voice message was left for Brian to call back with a report. 2/11/15: Mahat A closure report was submitted to DEC via dropbox application. The closure report has been uploaded on D2 for reference. 3/26/15: Mahat DEC Mahat reviewed the closure reprot: Following are the key items from the closure reprot : Summary and Environmental Findings # 8, 9, 10 and 11 verify that futher remediation is not required on the site. Hence, the spill case will be closed in DEC Spill Database. "
Remarks:	"Caller advised during the phase 2 boring of soil they hit a tank under the soil that they didnt know was there and aprx 2 gal of gas spilled ontop of the soil unknown is any more spilled out of the

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT E2MIS 121251 THIS INCIDENT HAS TWO LAB RESULTS: ONE FOR M3794 AND ONE FOR M3800 THERE IS NO INDICATION WHY THE LAB RESULT FOR M3800 IS ASSOCIATED WITH THIS SPILL If this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis. If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil was released. Sludge found in a vault, through historical analysis, has been determined not to contain lead. 11/14/98 12:39 R. MAHONEY #97417 (FOD) WORKING ON TROUBLE FEEDER 13M55 IN M-3794 S/S W.21 ST. 275' E/O 9 AVE. FOUND APPROX. 1 GAL OF UNKNOWN OIL ON APPROX. 300 GALS OF WATER. OIL IS CONTAINED TO THE MANHOLE DIDN'T ENTER ANY WATERWAYS OR SEWER SYSTEMS. TOOK SAMPLE AND HUNG SIGN #18115. MANHOLE HAS NO CRACKS WAS UNABLE TO VARIFY IF MANHOLE HAS A SUMP OR SEWER CONNECTION..... 11/14/98 22:02 HRS. LAB SEQ.#98-12572 11/14/98 21:25 AROCLOR #1260 PCB <1.0 PPM 11/16/98 O.S. P. Reidmiller #52281 reports clean up complete in MH 03794 W 21 St. 275' E/O 9th Ave on 11/15/98 @ 19:30 hrs. <1. ppm PCB Removed sheen from water with absorbent pads Pumped 535 gals. Water to sewer Used flush truck to clean & rinse structure Generated 2 drums PPE Removed Spill Tag # 18115 upon completion Crews: O.S. (UG) P. Reidmiller # 52281 P. Mullholland # 18565, J. Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	272857
DEC Memo:	"See duplicate spill #0412147. 2/14/2005 - Sangesland spoke to Quilvio who manages the Chelsea Car Wash/Gas Station. Station is only about 5 years old - all new equipment & alarms - Also the site is right next to the West Side Hwy and the water table is quite high. A water sump pump under the station runs constantly at a very high rate. Any groundwater which may have been under the station around the time of the spill is long gone at this point. Quilvio said he got a gasoline delivery about 3 or 4 weeks ago from Island Transportation. Island overfilled the tanks and the alarms went off. The Island delivery man left without doing any remediation. Quilvio says there was gasoline in 3 manholes around on the site. He called American Resource Technology (Chelsea's regular test & repair company). They came and cleaned the overfill buckets and checked the system. ExxonMobil is somehow involved as a distributer??? Exxon environmental people came to the site to test the air in 2 nearby basements. There continues to be a problem with gasoline smell in the basement next door. Quilvio is now going to hire a contractor to run a couple of test borings in the area to determine if any of the

CHELSEA CAR WASH (Continued) **S106868684**

gasoline went into the ground, or if it was all contained in the overfill buckets. 2/14/05 Spoke to Frank Messina, ExxonMobil Global Remediation (908-730-2055). ExxonMobil only supplies the station with fuel. He stated that ExxonMobil may have initially sent someone to test the air if they did not realize the station was independent. Filed spill report #1016151 with DEP. (KMF) 2/15/05 Changed address from 62-76 10th Ave to 450 W 15th St. Spoke to Quilvio Monoz, operator of Tenth Avenue Car Wash (PBS 2-604379). Quilvio called ExxonMobil territory manager, Mike Romano. ExxonMobil sent Geologic Services Corp., Michael Meyerhofer, with PID. He tested basements which returned negative. Q. Monoz hired American Resource Technology (Bob Arcaro, 718-234-0024) to test the lines. They will also be doing borings around the tanks. Q. Monoz stated he will be taking responsibility for now but feels Island Transportation is responsible for the overfill. (KMF) 2/15/05 Spoke to Bob Arcaro, American Resource Technology. Will be testing fill lines since Q. Monoz stated there was product in the sumps during delivery. The drain plugs in the spill containment boxes would not open. They will probably change these first and then test fill lines. He stated he wasn't sure that there was product lost to the subsurface or that borings were necessary. I requested he do the line tests and speak further with the operator to determine how much product was lost. If borings are necessary, Bill Klein from Franklin will probably do the work. (KMF) 07/28/05 A limited subsurface investigation report by Fenley & Nicol dated 4-13-05 (See File) was reveiwed. Report recommends an extended subsurface investigation to determine the extent of hydrocarbon impact. Attempted to contact Fenley & Nicol- unsuccessful. 2:00pm Called Bob Arcaro (718-234-0024). No answer. LNK. 08/19/05 Bob Arcaro never returned call. Next step- recontact either Fenley & Nicol or Bob Arcaro to determine if a subsurface investigation was completed and if there is a report available. LNK. 04/12/06 - Hough - Received additional documents from Fenley & Nicol concerning limited subsurface investigation. Report concludes that there was no significant impact from the overfill event. Spill should be closed. However there is another open spill on the site 01-03052. Next Step: Regional follow-up on older open spill and verification of finding of report from the most recent spill. Activities may include site visit and obtaining documentation of other remedial activities related to residual impacts from older spill. 02/22/10-Hiralkumar Patel. while investigating spill #: 0911962, came across this spill number. this spill was reported as 500 gal gasoline spilled during delivery at the gas station which is located at 70 10th Avenue. Mr. Shternlicht owned two properties during spill event: 450 W 15th STreet (address in spill report) and 70 10th AVenue (where gas tanks located and actual spill occured). then Mr. Shternlicht sold property at 450 W 15th Street and new owner Mr. Randberg baught it in late 2006. Mulnick LLC. **owner of car wash/gas station property** c/o Milk Studios 450 W 15th Street, 8th Floor New York, NY 10011 Attn.: Erez Shternlicht PH. (212) 645-2797 email: erez@milkstudios.com base on available information, spill was happened on 70 10th AVenue (aka 461-469 W 14th STreet and 58-76 10th Ave). refer to spill #: 0911962 for further details."

Remarks: "The delivery guy pumped 72 inches of material into the tank. The alarms went off and the delivery man just drove off. 200 gallons have been recovered and lost 200-300 gallons into the ground. (OFF TEH WESTSIDE HIGHWAY)"

DEC Memo:	"01/19/06: This spill transferred from J.Kolleeny to S.Kraszewski. 5K tank installed in 1974, two known TTFs. Has passed all subsquent tank tests since this one. Needs a site investigation to determine the impact to soil and GW. - SK 09/01/06: DEC Lead for this spill changed from unassigned to S. Kraszewski. - J. Kolleeny 02/09/07 - J.Kann - Spill reassigned from S.Kraszewski to J.Kann. 07/16/07 - J.Kann - recvd a call from Tara Kam (609-548-1318) requesting information on the spill - specifically if it was still open. I told her it was still open and that it was related to a tank test failure and that I have very little information in my file. She was doing a site assessment for an adjacent property. 07/17/2008- J.Kann - Based on information provided by NYCHA, after manway nuts and bolts were replaced, the tank passed subsequent tightness testing. The latest test was performed on 4/28/08. Based on this information, soil impacts should not have occurred and the spill was closed. NFA."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Region:	2
DER Facility ID:	120725
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 3/9/04-Vought-File review by Vought: Letter from DEC(O'Dowd) to Getty(Ochoterena)-12/10/97. Letter sent requiring installation of three monitoring wells in response to tank test failure on 12/3/92. Report due to DEC by close of business 1/30/98. Site notes by DEC O'Dowd-meeting held on 11/12/97. Site planned for construction of new residential building. Tank Closure Report (Tyree Organization William Conroy)-April 1998. Reason for tank closure is property divestment.

GETTY 58542 (Continued) **U001839223**

One pump island located adjacent to 10th Avenue. Removal of twelve (550-gallon) gasoline USTs and one (550-gallon) waste oil from 3/23-3/25/98. Multistory commercial and apartment buildings located across 10th Avenue to the west, church with a school and playground lcoated across West 20th Street to the north of the subject property . Six endpoint samples were collected including five from the gasoline excavation and one composite sample from the waste oil excavation. Soil analytials show 9990ppb toluene(south wall), 10600ppb napthalene(south wall), 10000ppb toulene(west wall), 15900ppb napthalene(west wall), 156ppb MTBE (Bottom). Waste oil soil endpoint shows 427ppb benzo(a)anthracene and 411ppb benzo(b)fluoranthene. Addendum to the Tank Closure Report (Tyree Org)-5/25/98. The additional work consisted of further excavation of th west wall and the south wall of the gasoline tankfield excavation. The additional excavation resulted in clean(STARS Memo) endpoint soil samples from the two walls. Excavation indicated the presence of a former basement filled with demolition debris. Depth to groundwater estimated at 9 below grade. Two additional soil endpoints were collected for analysis. Soil endpoint analyticals show not TAGM 4046 Soil Cleanup Objective exceedances after second excavation event. Project Summary Report (Tyree Org)-5/25/98. One groundwater sampling event prior to the destruction of the wells during removal of underground storage tanks. Groundwater analyticals show 173ppb MTBE(W-1), 1200ppb MTBE(W-2) and 1890ppb MTBE(W-3). Groundwater flow direction not determined. Closure Request (Tyree Org)-7/8/99. The property was sold by Tyree's client to the 20th Street Association, LLC. The owner has excavated the property for construction purposes . These three wells were destroyed in March 1998 when the gasoline tanks were removed . A total of 305.11 tons of soil were removed from teh tankfield excavation. The entire lot (approximately 114' x 100') has been excavated to the property lines and to a depth of approximately 15'. Tyree requests closure based on 1)only ethylbenzene in one well at 6.1ppb 2)the levels of MTBE were probably significantly reduced by removal of approximately 9 feet of unsaturated and 6' of saturated soil 3)approximately 8550 tons of soil were removed. Tyree requests no further action. Vought reviewed site with DEC Rommel which resulted in spill closure."

Remarks: "ORIGINAL SPILL ASSIGNED TO O'DOWD."

DEC Memo:	"SEPTEMBER, 2004 Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE June, 2005 As part of Spills Backlog Reduction Initiative, petroleum spill #9707247 was transferred to Jason Pelton. August 16, 2005 Jason Pelton contacted the current property owner at 56 9th Avenue where the spill was reported. The current owner is Greg Cherry. Greg and his brother Mark own the Old Homestead Restaurant. The petroleum spill was reported when the

OLD HOMESTEAD REST (Continued) **S102663644**

kitchen-area of the restaurant was being expanded and a 500-gallon underground storage tank was closed in-place. The tank closure involved removal of the remaining oil, cutting open the tank, and the backfilling of the tank with sand. The underground storage tank was replaced with an above ground liquid propane tank. During the restaurant expansion, there was no evidence of a petroleum spill. The restaurant expansion and tank closure were completed by Quality General Contractors ((917)494-9103). The contact person for Quality General Contractors is Patsy and he was contacted to provide documentation on the underground storage tank closure. Patsy confirmed the information provided by Greg Cherry and indicated that the closure included removal of residual oil from 500-gallon tank, opening of the the tank, and backfilling with sand. Patsy indicated that there was no evidence of a petroleum spill. December 21, 2005 Based on information provided by contractor and current property owner that the tank was closed in-place, there was no evidence of a petroleum spill during the building construction work, no quantity of petroleum was actually spilled, and the tank was closed out over eight years ago, Spill #9707247 was closed by Jason Pelton on December 21, 2005."

Remarks: "CALLER STATES THAT THE ABOVE LOCATION REPLACED THE UNDERGROUND TANK WITH AN AB0VE GROUND TANK AND LEFT THE UNDERGROUND TANK IN THE GROUND TANK IS A 500 GALLONS TANK TANK IS UNDERGROUND NEXT TO BEER BOX AND UNDER THE SPRINKLER PIPES WHERE YOU OPEN AND CLOSE THE SPRINKLERS"

Spiller Address:	335 WEST 16 ST.
Spiller Company:	001
Contact Name:	JOHN RAGUSO
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN 5/5/99 - Saccacio - On 4/28/99 DEC (Saccacio) responded to the spill location after several attempts to contact the parties involved. On scene the building was closed up hindering any entry or further investigation. Called the contacts (John Raguso) home telephone and spoke w/ his wife. She said that he was on the train home and she would have him call me when he got in. I stood by until John called. He said that they never saw any spilled oil but they suspect oil is spilling because strong odors are detected when the tank(s) are being filled. The odors are coming from the under the

BTWN 8TH & 9TH AVE (Continued) **S104507153**

sidewalk vault that is currently inaccessible. On 4/29/30, I spoke with John and told him I wanted him to set up a tightness test for the line. Instead we agreed to visually inspect the site line on 5/7/99. He asked that the state send him a letter detailing its requirements. He asked if I could fax it to 212-631-8066. On 5/5/99 I called to get the owners name and PBS # so I could send him the letter he requested. The bricked in stairwell window was removed, there was lots of old contaminated soil behind it. The contractor uncovered the fill line and confirmed it was the source of the leak. The consultant Dave Pelletier of Jade Environmental estimates that the fill line had been leaking for approx. 50 years and that the total amount of product in the window vault is in excess of 100 gallons. He said that the oil appears to have decomposed and aged further confirming his suspicion the fill line leak was created when the window vault was filled in some 50 years ago. I have requested that they install a monitoring well in the sidewalk south of the window vault and two soil borings east and west of the vault. They agreed. John Raguso of Emteque the lead consultant on the job said that they were going to close the tank and do 4 Goeprober samples around the outside. I asked him to cut a hole in the bottom of the tank and sample and he agreed. They are also bringing in a structural consultant to assess the structural integrity of the sidewalk. As per my request, they are also going to do a horizontal boring through the wall to sample the soil underneath the window vault. I have looked into the tightness test report because the site conditions indicate the pipe has been leaking for some time. I gave a copy of the report to Peter Huang and asked him to look into it. On the surface the report it appears that the water level outside the tank was not measured and that the water in the tank was reported as 0 once and 0.5 in another section. The report also says that the tester used a water sensor but I have not seen any signs that one was actually used because the there was not place to put the sensor. Dave reported that groundwater is 2 feet above the tank bottom. Turned over false tank test report to Peter Chao. He is investigating John and Dave will be submitting a work plan for DEC approval. 5/27/99 - Saccacio - Workplan was received and conditionally accepted by DEC. Letter went out requesting further investigation. 5/10/04 - AUSTIN - TRANSFERRED FROM SACCACIO TO AUSTIN FOR REASSIGNMENT - END 8/25/05 - Austin - Reassigned to Rahman, to investigate status of this matter. 10.06.05 SR// Steven P. Saccacio closed this spill on 02.09.2000. NFA letter is in file."

Remarks: "APPEARS TO BE A PROBLEM WITH THE FILL LINE THAT GOES INTO A STORAGE AREA - ALL EQUIPMENT HAS NOT BEEN CHECKED AS OF YET - APPEARS TO HAVE BEEN A CRONIC PROBLEM"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	1
Tank Id:	64601
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

	I05 - Overfill - Vent Whistle
	F06 - Pipe External Protection - Wrapped
	H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
	J03 - Dispenser - Gravity
	L00 - Piping Leak Detection - None
	E02 - Piping Secondary Containment - Vault (with Access)
	G03 - Tank Secondary Containment - Vault (w/o access)
	K01 - Spill Prevention - Catch Basin
	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	C01 - Pipe Location - Aboveground
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	03/01/1965
Capacity Gallons:	3000

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"10/24/06: This spill case transferred from Shariff Rahman to Jon Kolleeny, since JK is already managing another spill case at this location (9908159) which is being addressed by a remedial system (dual-phase extraction) and is under a Stipulation Agreement. On Oct. 6, during installation of telecommunications equipment/cables beneath floor of on-site building, a 4' x 4' concrete vault was discovered, partly filled with soil and containing an 18 pipe with valve of unknown use. Strong odors were noted, and Fire Dept. and NYCDEP responded. LEL measured up to 30%. On Oct.7, consultant working on other spill at this site, Groundwater Environmental Services, Inc. (GES) was called to site. They had PID reading in vault of 1,100 ppm, and 8.5 ppm in the room. They called in a spill, and NYSDEC responded (S. Rahman). They dug soil from vault and cleaned vault interior. PID in vault went down to 2 ppm, but after half hour, went back up to 300 ppm. They closed and sealed vault. Heather Cloud of GES provided information and updates on the situation by email: 10/11/06, 1:19 PM email: As requested, please find attached Site Map showing location of vault and 18 pipe [see eDocs image folder]. Also, I have attached a proposed well location map depicting 5 soil borings in vicinity of vault. As soon as I get photos, I will forward them to you. We are scheduled to advance soil borings tomorrow and Friday (10/12 & 10/13). At a minimum, we will advance 5 soil borings (1 in vault and 1 in all principal directions surrounding vault) to identify source and delineate. If any of 4 borings surrounding vault come back impacted, we will step off and delineate horizontally. All soil borings will be advanced until soil is vertically delineated or until we can't go any farther with hand tools (hand auger), whichever comes first. We will screen soils from each boring in 6-inch intervals. Additionally, we will submit select samples for laboratory analysis. The analysis will be dependent on results of most recent samples submitted [i.e., waste characterization samples]. If we encounter groundwater while advancing soil borings, we will also collect groundwater samples. As an interim remedial plan, we are currently onsite installing an XP blower and duct to properly vent room. At this point, we will utilize this setup until we have identified source and defined extent of impact. As soon as we have identified source and extent of impact, we will design/install a more permanent system to address impacted area. We are also currently monitoring air space within room as well as in vault. As soon as I hear back from my crew, I will provide you with most recent PID & LEL readings.

COMMERCIAL BUILDING (Continued) **S108294794**

10/11/06, 5:21 Heather Cloud email: I wanted to give you an update on the PID/LEL readings, interim remedial plan, and plans for investigation - PID/LEL Readings: - When we arrived onsite, PID/LEL readings in breathing space were 0ppm/0% LEL - We opened vault and PID/LEL readings inside vault were 1,100 ppm/38% LEL; PID/LEL readings in breathing space after opening vault were 25 ppm/0% LEL - Currently vault is closed, and PID/LEL readings in breathing space are 18 ppm/0% LEL and PID/LEL readings next to vault at floor are 50-60 ppm/30% LEL Interim Remedial Plan: We have decided to pipe vault to one of our recovery wells (RW-1) that is tied in to system. We will then have influent air go through carbon unit and discharge through existing vapor exhaust stack. We will complete this work this week. Once we get this all piped, we will collect influent and effluent air samples and submit them for TO-15 analysis. In meantime, we are still venting room and have area secured without access. Soil boring Investigation: - We have to use a core drill to break through concrete within vault and outside of vault before we can use hand auger. Since LEL level within vault is 38% and core drill can create a spark, we will not be able to advance a soil boring within vault until LEL level is below 10%. We will continue to monitor this area and advance a soil boring as soon as LEL level is within an acceptable range. Also, we will advance soil borings as close to vault as possible. If levels outside of vault continue to be above 10%, we will have to step off until we are within an acceptable LEL range. - To answer your question regarding soil boring proposed to south of vault, that boring is actually in basement in a walkway located beneath sidewalk. Since it is not outside, we will have to advance it by hand as well. I will continue to update you as we progress. 10/20/06 Heather Cloud email: Below is an update on spill #06-07761. Soil Analytical Results: We just received soil analytical results [waste classification] from lab (see attached [in eDocs document folder]). Based upon results, it appears that impact is leaded gasoline. Lead came back hazardous. With exception of Bis(2-ethylhexyl)phthalate (a common lab contaminant), SVOCs were non-detect. Fingerprint ID came back as diesel. Since SVOCs were non-detect, we have a call in to lab to see how this was determined. Based upon recent analytical results, we anticipate submitting future samples for VOCs-STARS list and RCRA Metals. Interim Remedial Plan: Last Friday, we completed piping from vault to our existing remedial system at site (I have attached a couple of photos [in eDocs image folder]). As discussed below, we have piping tied into RW-1, which is tied into system. Influent air goes into air stripper and then to 1,000-pound vapor phase carbon unit. Following completion of piping, we started system and collected influent and effluent air samples [see PID screening of air samples in eDocs document folder]. Both samples were submitted for TO-15 analysis (standard turnaround). I anticipate receiving samples either late next week or early following week. As soon as I have results, I will forward them to you. As a follow-up, we conducted site visits on Monday and Tuesday of this week to monitor background air space in telecommunications room (vault room) as well as influent and effluent to system. On Monday, LEL readings were 0 and PID readings were <5 ppm. Background readings and O&M data from Tuesday visit are attached. Soil boring Investigation: We advanced 4 soil borings surrounding vault (as indicated on previously submitted proposed boring location map). All soil borings were advanced to refusal. Concrete and construction debris was encountered in all borings; therefore, hand borings could

COMMERCIAL BUILDING (Continued) **S108294794**

not be advanced past concrete/construction debris. Additionally, water was not encountered in any borings, so groundwater samples were not collected. - Soil boring B-1 was advanced approximately 6 inches off of pipe to south of vault. We encountered refusal (concrete/construction debris) at 6.5 feet and could not advance hand auger any farther. Impact was noted between 4.5 and 6 feet below surface. Highest PID reading was encountered at 5.5 feet (181 ppm). Based upon recent soil analytical results, we will submit sample with highest PID reading (5.5 feet) and bottom sample (6.5 feet) for VOCs-STARS list and RCRA Metals. - Soil boring B-2 was advanced approximately 6 inches off eastern edge of concrete vault. We encountered refusal (concrete/construction debris) at 4 feet and could not advance hand auger any farther. Highest PID reading (8.8 ppm) was noted at 2 feet below surface. Because all samples were <10 ppm PID, we are planning on submitting sample collected at bottom of boring for laboratory analysis. - Soil boring B-3 was advanced 1 foot off northern edge of concrete vault. We encountered refusal (concrete/construction debris) at 1.5 feet and could not advance hand auger any farther. Highest PID reading (9.6 ppm) was noted at 1 foot below surface. Because all samples were <10 ppm PID, we are planning on submitting sample collected at bottom of boring for laboratory analysis. - Soil boring B-4 was advanced 6 inches off western edge of concrete vault. We encountered refusal (concrete/construction debris) at 2.5 feet and could not advance hand auger any farther. Highest PID reading (0.6 ppm) was noted at 2.5 feet below surface. We are planning on submitting sample collected at bottom of boring for laboratory analysis. We should receive analytical results back within 10 days. Based upon initial results, we will evaluate plan of action for further investigation and remediation. JK 11/12/06: Received email from Heather Cloud of GES on 11/20/06 with results of soil borings around vault, weekly PID monitoring of recovered vapors, and lab analyses of influent/effluent vapor samples for October 2006. Soil results showed all VOCs either non-detect or below TAGM 4046. PID monitoring shows decreasing VOC levels at vault. Lab analyses of influent/effluent show some hydrocarbons detected, but benzene in discharge is in compliance (non-detect). I sent email back on 11/20/06 asking if these data, and summaries of associated activities, can be incorporated into quarterly monitoring reports for spill 9908159 at this site, which is under stipulation agreement. I also asked if vapors were being extracted only from vault area, or from recovery wells for groundwater extraction system at site in addition to vault area, pointing out that recent drop in water table afforded opportunity to treat contaminated soil that was formerly under water. Heather sent reply on 11/21/06 saying data and discussion for vault area will be incorporated into quarterly reports for site, which will reference both spill numbers, and that vapors are currently only being extracted from vault area. She stated: In order to extract vapors from existing recovery wells, we would have to make modifications to existing GW extraction piping configuration. With existing setup, we just have flexible hosing that extracts groundwater. Considering that GW concentrations in recovery wells are close to NYSDEC Groundwater Standards, we would not anticipate there being a lot of vapors to extract. For further discussion of this issue, see remarks for spill no. 9908157. - J. Kolleeny 12/08/06: Received email from Heather Cloud of GES reporting that vapors have been detected in building basement. GES sent a field tech, who got PID readings of 70 ppm in vault room, and 120 ppm adjacent to vault.

COMMERCIAL BUILDING (Continued) **S108294794**

They believe a portion of vault may not be properly sealed; they are making sure vault is completely sealed, monitoring for vapors in breathing space of vault room, and keeping people out of room. I sent email reply expressing surprise that after weeks of SVE on vault, and presumably negative pressure exerted on vault, vapors would escape from an improperly sealed portion of vault. I suggested that a more aggressive approach be taken, asked if vault and pipe within are active, have any current use, and if not, suggested that entire vault be removed to access contaminated source material below/around vault. Asked that Heather get back to me with her opinion on this. - J. Kolleeny 02/01/07: Received email update on 1/24/07 from Heather Cloud of GES: Vault is still tied into system and we are conducting weekly visits to monitor vapors. During last 2 O&M visits, PID readings at vault sample port were 10.2 ppm and 5.1 ppm. All activities conducted for Spill #06-07761 between October and December 2006 will be included in Site Status Update Report we are currently preparing. [Report will be archived in eDocs folder for spill 9908159.] - J. Kolleeny 03/16/07: Reviewed hard copy of GES 4th Quarter '06 site status report (in eDocs for spill no. 9908159). Report provides details of vapor problems in Level 3 telecommunications room associated with spill 0607761, when vault with contaminated soil was found. Also notes that no groundwater was present in monitoring wells and that DEC therefore approved a waiver of requirement to start up and operate groundwater recovery & treatment system. Information regarding return of groundwater to wells and collection/analysis of GW samples will appear in 1st Quarter '07 report. - J. Kolleeny 06/22/07: Reviewed 1st & 2nd Quarter 2007 Site Status Update Report / Spill Closure Request dated 6/7/07, by Groundwater & Environmental Services, Inc. (GES). Report (in eDocs) presents groundwater data for Jan. and Apr. '07 events, as well as historical data, showing no significant residual groundwater contamination, and SVE system monitoring data (related to spill no. 0607761, reported when vault beneath floor of on-site bldg's telecom room was found and emitting petroleum odors) showing vapors from vault appear to have abated and system is no longer recovering significant hydrocarbons. Based on data, GES requests closure of spills 9908159 and 0607761. I sent letter (in eDocs) to Ms. Jessica Chiamulera of 85 Tenth Avenue Associates, LLC (new property owner, replacing Kerrie Breslin of GVA Williams), copies to Heather Cloud and Matthew Schiefferstein of GES, approving closure of spill 9908159, related to groundwater contamination, saying NFA letter will be sent separately, but asking that for spill 0607761, SVE system be pulsed by shutting down for 2 weeks and re-starting, to see if vapors are detected in telecom room while system is off and if there is a spike in vapor recovery when system is re-started. - J. Kolleeny 09/21/07: Reviewed GES report, Spill Closure Request dated Sept. 7, 2007 (in eDocs). Report presents PID and lab data for vapor influent and effluent of SVE system operating to address vapor problem emanating from vault discovered beneath floor of telecommunications room in on-site building. PID results show no positive readings since June 2007 (last screening 8/14/07), lab results show very low levels of a few VOC compounds in SVE influent. Based on data, GES requested closure of spill case. I contacted Heather Cloud of GES on 9/20/07 and asked about ultimate disposition of vault. She sent email reply stating: As discussed on phone, vault in Level 3 Communications room will be properly abandoned upon receipt of spill closure. Specifically, vault lid will be removed, vault will be filled with

COMMERCIAL BUILDING (Continued) **S108294794**

bentonite, and vault will be capped with concrete. Based on data in report and Ms. Cloud's statement regarding vault, I closed spill and issued NFA letter (in eDocs). - J. Kolleeny "

Remarks: "Odor eminating from concrete vault in basement. PID readings went down, now starting to come back up. ~300. Soil has been cleaned out that was in vault. Will caulk/seal cover. Reg. #2 is already addressing spill @ this location."

Due to the recent renovations to this building, RW-5 is located directly within the catering hall that has been constructed in the basement of the building, and would prove to be detrimental to the tenants in the course of their business.From a technical standpoint, RW-5 does not seem to be a critical monitoring/sampling point. It has not shown any floating product since GES began monitoring the site in 2003,but the current level of contaminants require remedial works to be continued.Recovery piping has already been installed in RW-5 (and runs within the floor and walls), so this well would still be utilized for remedial purposes. A Total Phase/Vacuum Enhanced Groundwater Extraction system is currently installed at the site, and RW-5 is connected into the system. When this spill is considered to be inactivated, RW-5 would be accessed and properly abandoned at that time.I received reports/maps/most recent data for this site. GES is currently in the process of completing the 2nd and 3rd Quarter Status reports for this site, which will be sent to DEC shortly. However, they request a determination on the acceptability of covering RW-5 with floor tile in the mean time, as construction in this area should be completed within the next few days/week. Project Manager's decision on this matter is requested as soon as possible. This case has been transferred from Sharif Rahman to Koon Tang for reassignment to his staff. 12/07/05: This spill case transferred from S. Rahman to J. Kolleeny. 12/07/05: Spoke with Dawn Ruffini of GES about the site, which has a high-vac. extraction system installed but not yet started up, and also reviewed Dawn's email to Sharif about covering over recovery well RW-5 with floor tile. Sent email to Dawn requesting additional information (most recent gw data for other wells) and asking about feasibility of installing a monitoring well somewhere to the east of RW-5. Also, Dawn said that GES is behind in their quarterly report submissions, but they will submit combined 2nd & 3rd Quarter 2005 report within two weeks. I pointed out that they must complete SVE data sheets and have a monitoring & maintenance plan before system can be activated. - J. Kolleeny 01/04/06: Received Site Status Update Report for 2nd & 3rd Quarters 2005; will review. - J. Kolleeny 03/28/06: Spoke with Matt Schieferststein of GES on phone,

COMMERCIAL BUILDING (Continued) **S108294794**

he said they plan to start-up remedial system soon but asked about air permitting requirement. I told him that the RP must sign a stipulation agreement and SVE/air stripper data sheets must be completed for system's vapor discharge before start-up. I emailed him a link to DEC's Guidance for Petroleum Spill Stipulation Agreements, and told him I would prepare a stip for his client, GVA Williams (it was formerly ATC Management). - J. Kolleeny 04/14/06: Reviewed Site Status Update Reports for 2nd & 3rd Quarters 2005, 4th Quarter 2005, and 1st Quarter 2006. Groundwater monitoring results show decreasing trend in dissolved contaminant levels. GES emailed pdf copies of a Corrective Action Plan prepared by Impact Environmental in October 2001, and a DEC approval letter of CAP signed by Kevin Hale. I prepared a Stipulation Agreement with cover letter and CAP (implementation schedule), requesting remedial design plans and completed air stripper data sheets within 30 days of effective date of STIP, and mailed it to Kerri Breslin of GVA Williams on 4/14/06. Requested signed Stip back by May 5, 2006. - J. Kolleeny 5/17/06: Received signed stip from RP (Kerri Breslin) in early May, had it counter-signed by Acting Regional Director Lou Oliva on 5/15/06. Sent copies of fully executed Stip to RP and GES. - J. Kolleeny 6/23/06: Received Remedial Design Plan on 6/20/06, requested by STIP Corrective Action Plan. On 6/23/06, sent email requesting modifications: 1. In discussion of Monitoring & Maintenance Plan, paragraph describing monthly collection of air samples from air stripper should explicitly state that both influent (untreated) and effluent (treated) air samples will be collected for analysis. Also, laboratory analysis should include a number for Total VOCs or TPH or an equivalent, to better evaluate nature of contaminants being stripped from recovered groundwater. 2. Monitoring & Maintenance Plan states that five accessible groundwater recovery wells will be gauged, purged and sampled on a quarterly basis and analyzed for BTEX and MTBE. However, to better evaluate impacts to groundwater and progress of remediation, I request that samples be analyzed for full range of petroleum-related VOCs and SVOCs, at least for a baseline sampling event which should be conducted prior to system activation (unless a quarterly sampling event has been performed since January '06 First Quarter sampling event), and for first round of quarterly sampling after system start-up. If these requested changes are acceptable to you and your client, please revise Remedial Design Plan accordingly and submit revised page(s) to my attention. - J. Kolleeny 07/25/06: Having received no response to my 6/23/06 email, sent another email to Heather Cloud of GES, asking her to respond to my request for modifications to the Remedial Design Plan, and for revised hard and electronic copies of the report. - J. Kolleeny 07/26/06: Received revised version of Remedial Design Plan via email from Heather Cloud of GES. Will review. - J. Kolleeny 8/17/06: Reviewed revised Remedial Design Plan, called Heather Cloud and pointed out possible error in air stripper data sheet calculations, asked for corrected data sheets with supporting calculations, and also asked for monitoring and maintenance requirements to be summarized in an O&M table. She said no problem, will get these items to me soon. - J. Kolleeny 8/21/06: Reviewed 2nd Quarter 2006 Site Status Update Report by GES, dated 8/14/06. Groundwater sampling in May '06 indicated huge, anomalous increase in toluene in recovery well RW-1 (from 1.5 ppb in January '06 to 4,720 ppb in May '06). Other recovery wells sampled showed relatively low levels of BTEX & MTBE. Upcoming sampling rounds will be analyzed for full list of VOCs

COMMERCIAL BUILDING (Continued) **S108294794**

and SVOCs. GES plans to connect RW-1 to the installed pump & treat system, and will start up system upon receipt of NYCDEP sewer discharge permit, hopefully before end of August '06. No response needed. - J. Kolleeny 08/28/06: Received 2nd revised remedial design plan from GES, with corrected air stripper data sheets and relevant text, plus table with monitoring and maintenance requirements (in eDocs). Mailed approval letter (also in eDocs) to Kerri Breslin of GVA Williams; emailed pdf of letter to Heather Cloud and Matthew Schieferstein of GES. - J. Kolleeny 10/31/06: Received email on 10/13/06 from Heather Cloud of GES with electronic copy of letter report Project Status Update (in eDocs) summarizing baseline groundwater sampling event on Aug. 18, 2006, noting that only benzene exceeds limit in two wells, at 5.7 ppb in RW-2 and 4.0 ppb in RW-3. In light of this, GES requested waiver of requirement to activate and operate groundwater extraction portion of on-site remedial system. They also requested reducing groundwater analytical parameters from full list of VOCs to BTEX plus MTBE. Subsequently spoke with Heather who said recent well gauging at site found there has been a drop in water table so there is currently no water in any recovery wells. On Oct. 23, I emailed Heather asking for documentation of water table drop. On Oct. 24th, she sent email with groundwater gauging and sampling data table showing all wells were dry on 9/22/06, and stating: On August 18, 2006, GES conducted 3rd quarter groundwater sampling event. During event, all recovery wells had approximately 8-9 feet of water column except RW-1 which was dry. Since RW-1 was dry during August event, GES visited site again on September 22 to sample RW-1. During this visit, it was noted that RW-1 as well as other on-site recovery wells (RW-2 through RW-4 and RW-6) were dry. Total depth of recovery wells ranges from 9-10 feet below grade. Historically, depth to water on-site has ranged from 0.21 to 3.85 feet below top of casing. During additional site visits on September 29, October 7, October 12-13, and October 16, all on-site recovery wells were dry. During September 22 visit, it was noted that 2 dewatering projects are currently taking place northwest of site approximately 3 blocks away and northeast of site approximately 2 blocks away. Specifics regarding dewatering projects is unknown; however, these activities could explain sudden drop in water table. Received hard copy of Project Status Update report on Oct. 30th. On Oct. 31, 2006, I issued a letter (in eDocs) to Kerrie Breslin of GVA Williams (copied Heather Cloud and Matt Schieferstein of GES) approving request to waive system startup requirement, on condition that vapor extraction portion of system continue to operate to address soil contamination recently discovered in and around small vault under floor (see spill no. 0607761), and noting that DEC may require activation of system if groundwater monitoring shows increase in contaminant levels, so system should be maintained in state of readiness. My letter requested one more round of groundwater sampling with samples analyzed for full range of VOCs, then reconsidering request to reduce parameters to BTEX + MTBE. - JK 11/24/06: Received electronic copy of 3rd Quarter '06 monitoring report by email from Heather Cloud of GES on 11/21/06 (in eDocs). Sent email to Heather saying: I have two comments: First, report states that a waiver will be requested. Actually, waiver was requested and request was approved in a letter I sent on October 31, 2006. Since this report is dated Nov. 21st, this should be reflected in it. Second, in your recent email responding to my suggestion that drop in water table afforded an oppportunity to treat soil contamination that was formerly in

COMMERCIAL BUILDING (Continued) **S108294794**

saturated zone, you said that system at site was designed to recover groundwater not vapors, and that since latest groundwater results were so low, little or nothing would be gained by modifying system to recover soil vapors. [See remarks for spill 0607761, for contaminated vault area which is being treated by vapor extraction.] I'm not sure I agree. Last time well RW-1 was sampled (May '06), groundwater had 4,720 ppb toluene, and only BTEX + MtBE were analyzed for. Last time RW-5 was sampled (October '05), it had 23.6 ppb benzene and 228 ppb MTBE. I think it's likely, or at least possible, that there was a smear zone of soil contamination that's been left high and dry (and thus accessible to vapor extraction). If and when water table rises again, this smear zone may contribute to groundwater contamination and necessitate operation of groundwater recovery system. What difficulties would be involved in modifying system to recover soil vapors? If recovery wells had tubing in them, those tubes must now terminate in vadose zone rather than saturated zone; can tubes be hooked up to a vacuum blower? At least, could a pilot test be done with one recovery well and a sample of recovered vapor be screened with a PID and analyzed at a lab for petroleum hydrocarbons? Please let me know what you think. Have not yet received response. - J. Kolleeny 11/27/06: Received email response from Heather Cloud of GES: In response to your questions: 1) 3rd QTR Report covers activities from July 1 to September 30, 2006; therefore, we did not incorporate any activities or requests conducted/made in October. These will be incorporated in 4th QTR Report. 2) In terms of RW-1, we had a sudden increase in toluene between 1st QTR (1.5 ppb toluene) and 2nd QTR (4,720 ppb toluene) sampling events. Historically, toluene concentrations in this well have been relatively low and depth to groundwater did not fluctuate. As we previously discussed, we believe that this was possibly an anomalous reading; however, since water table dropped significantly we could not verify with another round of sampling. To modify system, we will have to hard pipe wells to pull vapors from smear zone. We will not be able to just hook up vacuum blower to existing tubing. It's not that difficult of a task, so we can make modifications if this is something you would like us to proceed with. If so, can you please give me something in writing saying so? I spoke with Heather on 11/28/06 and asked if it would be possible to modify one recovery well to extract vapors, and perform a pilot test? She said she thought it could be done with a portable blower. I agreed to send corresponce to RP Kerry Breslin requesting that this be done. - J. Kolleeny 11/29/06: Received hard copy of 3rd Quarter Site Status Report by GES dated 11/21/06; as noted above, report was already reviewed as electronic document. Put report in file cabinet. - JK 12/04/06: Sent letter (in eDocs) to Kerrie Breslin of GVA Williams by email (with cc to Heather Cloud and Matthew Schieferstein of GES) and by regular mail requesting that one of on-site groundwater recovery wells be modified to perform a SVE pilot test, to see if residual soil contamination left in unsaturated zone because of recent drop in water table can be addressed by SVE. - J. Kolleeny 12/18/06: Received email from Heather Cloud of GES saying that on Dec. 14th they tied in well RW-1 to SVE system for pilot test I requested. They ran system for 2 hours and got PID reading at wellhead of 4.2 ppm; since PID was low, they didn't take sample for lab analysis. They left RW-1 tied in to system and will return on Dec. 21st to monitor vapors. I asked them to take a sample for lab even if PID readings are low, since PID doesn't always correlate well with lab results. Heather agreed to analyze a sample for BTEX + MTBE

COMMERCIAL BUILDING (Continued) **S108294794**

and TPH. - J. Kolleeny 02/01/07: Sent email to Heather Cloud of GES on 1/2/07 asking if they took a lab sample of recovered vapors from RW-1 on 12/21/06, as I had requested. Received email reply from Heather on 1/4/07 saying sample was taken on 21st but data not back yet; will forward as soon as she gets it. On 1/9/07 received email from Heather with lab results; air sample was analyzed for BTEX, MTBE and TPH, all were non-detect. Based on this, she proposed discontinuing vapor extraction from RW-1 and not tying in extraction wells to SVE system. I reviewed data and noted that detection limits seemed high; sent following email to Heather on 1/10/07: I looked at air results, and I noticed that method reporting limits seem unusually high: 0.5 milligrams per cubic meter (mg/m3) for MTBE & BET, 1.5 mg/m3 for X, and 50 mg/m3 for TPH (which I'm guessing is C1-C4 Hydrocarbons and C4-C10 Hydrocarbons). For comparison, I looked at Oct. '06 lab results for influent/effluent samples from vault area (spill 0607761), and detection limits were mostly below 100 micrograms/cubic meter (ug/m3), an order of magnitude lower, at least. I also noticed that Oct. '06 analyses were done by Air Toxics Ltd., whereas recent SVE pilot test analyses were done by TestAmerica. Can you please look into this and let me know why detection/reporting limits were so high? Also, was PID reading taken on sample collected for lab, and was it non-detect as before? I may be beating a dead horse, but I wouldn't want to miss some BTEX recovery in sample because of elevated lab detection limit. On 1/24/07, received email reply from Heather: 1. Laboratory Reporting Method: I touched base with Test America, they informed me that method reporting/detection limits for air analytical results (BTEX, MTBE, & TPH via EPA Method 18) are their standard values. These are limits they calibrate their equipment to; therefore, they cannot lower detection limits. In terms of October samples, we submitted those samples to Test America for VOCs via Method TO-15. Test America could not run this analysis, so they subbed it out to Air Toxics. For Method TO-15, Air Toxics has a lower detection limit. In terms of PID readings, we recorded 14.2 ppm when we collected air sample from RW-1. 2. Groundwater: While at site last week to conduct weekly O&M for Spill #06-07761, we checked all wells for groundwater. Groundwater has returned in ALL wells. Average depth to water is approximately 0.5-1 ft below surface. In light of this, we can no longer extract vapors from RW-1, so we disconnected RW-1 from system. Also, since water is back, we collected a full round of samples from ALL wells, and submitted water samples for VOCs STARS list. We collected samples yesterday, so we should have analytical results back in a couple of weeks. If you'd like, I can forward you results once we get them. Additionally, these results will be submitted in 1st Qtr. '07 Site Status Update Report that will be submitted in April. I replied to Heather on 1/29/07 that GW results need not be submitted prior to 1st Quarter '07 Site Status Update Report. - J. Kolleeny 03/05/07: Received electronic copy of 4th Quarter '06 Site Status Report (in eDocs) by email on 3/2/07 from Heather Cloud of GES; will review when hard copy is received. - J. Kolleeny 03/16/07: Received hard copy of 4th Quarter '06 site status report, provides details of vapor problems in Level 3 telecommunications room associated with spill 0607761, when vault with contaminated soil was found. Also notes that no groundwater was present in monitoring wells and that DEC therefore approved a waiver of requirement to start up and operate groundwater recovery & treatment system. Information regarding return of groundwater to wells and collection/analysis of
