Tank Info:

Tank Number:	001
Tank Id:	8433
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

	H00 - Tank Leak Detection - None
	I00 - Overfill - None
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
	A00 - Tank Internal Protection - None
	G00 - Tank Secondary Containment - None
	D00 - Pipe Type - No Piping
Tank Location:	Aboveground in subterranean vault with access for inspections.....
	Tank in subterranean vault but accessible for inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	09/01/1980
Capacity Gallons:	4000
Tightness Test Method:	03
Date Test:	07/09/1998
Next Test Date:	Not reported
Date Tank Closed:	Not reported

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"10.11.05 SR//Sharif spoke with Bill Simmons, they are removing five 4000-gal tanks and found contamination. Apparently, there are no holes in tank. I suggested to dig out as much as possible and take end point sample, send result to DEC. If problem is major i.e., ground water affected, needs long term remediation, then it goes to Koon Tang. 01/26/05 Sharif//Rec'd UST cosure report prepeared by ECS. Five 4000 gallon gasoline single-wall USTs and associated piping were removed. Ground water was encountered during excavation at 6 to 7 feet below grade. Petroleum-impacted soils were encountered within UST grave and beneath former dispenser islands. Dewatering activities were performed in UST grave area to remove impacted soil to 13 ft below ground. Twenty-three post excavation soil samples out of 44 had VOC concentrations above TAGM. Level of remaining soil contamination below groundwater level warrants delineation of groundwater contamination and may require additional long-term remedial efforts. Case has been transferred to Koon Tang for reassignment. 02/03/06: Spill transferred from S. Rahman to J. Kolleeny. Spoke with Bill Simmons of ECS; site had wells put in years ago after soil contam was found, but was closed by J. Rommel of DEC after BTEX levels in GW

EXXON (Continued) **S107415886**

showed decreasing trend and sensitive receptor survey showed no SR's (see spill 9912838). Cumberland Farms sold site, but retain responsibility for env'tal investigation and cleanup. Current owner plans to develop site with 15-story residential building, involving further excavation of soil and possibly dewatering. Owner's consultant is currently doing Phase II investigation and preparing a report. ECS will forward this report, when available, to DEC with their recommendations for further action. - J. Kolleeny 04/06/06: Spoke with Bill Simmons of ECS, he sent an email on 3/30/06 with outline of draft RAP and attached data tables and site plans from upcoming Phase II report being prepared by Impact Env'tal. ECS's draft remedial plan involves soil excavation during site re-development activities, plus mitigation measures like sealing basement of planned residential building with moisture barrier (basement likely to extend into water table, 6-8 feet bg). ECS is pushing RP to do more, rather than less, soil excavation to remove as much potential source material as possible and help GW quality improve. I agreed with this, and suggested applying ORC to open excavation. I also stated that plume is not delineated and addt'l wells are needed, plus after soil excavation there will likely be need for follow-up GW monitoring. GW data from Impact, collected in Jan. '06, showed worst GW along southeastern and northwestern edges of site. I also suggested that another round of GW sampling be conducted soon, approx. 3 mos. (one quarter) after last round. Bill Simmons agreed with these suggestions/statements and indicated that RAP would be submitted in several weeks. - J. Kolleeny 07/26/06: Reviewed Remedial Action Plan (received April 24, 2006), plus diagrams I requested from Bill Simmons of ECS, sent by email on 7/26/06, showing site with historic soil sampling locations, excavated areas, and proposed post-remedial monitoring wells (in eDocs Image Folder). RAP involves excavation of petroleum-contaminated soil encountered during site re-development, de-watering during construction activities, post-excavation soil sampling, and application of ORC to open excavation. In addition, ECS proposes quarterly GW monitoring of existing wells prior to re-development, and installation of 5 new wells (existing wells will be destroyed during construction) for post-remediation monitoring. I sent approval letter (by email and hard copy to Angela Pimental of CFI and Bill Simmons) requesting two more post-remediation monitoring wells, stating that number and locations of post-remediation wells may need to be adjusted based on results of post-ex soil samples, and asking that soil screening and sampling be performed during installation of post-remediation wells. - J. Kolleeny 06/14/07: Spoke with Bill Simmons of ECS, mentioned that approved RAP included implementing quarterly GW monitoring prior to site remediation by excavation, asked if any quarterly monitoring has been done. He indicated that current owner/developer has been unwilling to undertake sampling, and it's unclear which consultant (ECS, Langan or other), should be doing it (site remediation apparently not being done by CFI). I said DEC was being cooperative by allowing remdiation to be linked with site re-development, but that it's not acceptable for all work on spill case to be stalled. Bill said he is attending big meeting regarding project today and will bring up this issue, also said excavation is projected to start in late July; I said in that case it's even more important that baseline GW sampling be performed. He agreed and said he would mention this at meeting and let me know result. I said if RP is not cooperative, he should give

EXXON (Continued) **S107415886**

me contact info and I will pursue them directly. - J. Kolleeny
06/19/07: Sent email to Bill Simmons of ECS to follow up on 6/14/07 conversation: We spoke last week about site, where quartly GW monitoring is to be done while awaiting implementation of approved RAP. You mentioned you were going to meet with parties involved and would bring this up. Can you let me know outcome of meeting? Has anyone agreed to do GW monitoring? Please let me know. Got email from Bill saying: Owner & developers allowed us access, went to Site on June 15, found 2 wells in vicinity of former USTs on northern and NE portions of Site. We sampled them, should have results next week. I reviewed DEC notes and RAP, sent back reply: Thanks for sampling wells. However, I looked back over my notes and RAP and have some concerns. Worst contamination has historically been in well MW-4, which doesn't exist anymore. When sampled by Impact Env'tal in Jan. '06, well had > 35,000 ppb total VOCs! Other well which had significant contam was MW-5, east of former tanks/dispensers, which also doesn't exist anymore. GW flow direction at site has varied, but has at times been to south and/or east. This warrants further delin to evaluate potential off-site migration. When I reviewed/approved RAP in July '06, I thought remedial action would be implemented in near future, and that post-remed mon wells would be installed to evaluate residual GW contam. However, given that nothing has been done for almost a year, I don't think sampling of 2 existing wells on north and NE portions of site is sufficient to determine baseline, pre-remediation GW conditions. I think it's important to install minimum of 2 new wells, either along SE and eastern boundaries of site (in sidewalk along 10th Ave.), or across street to south and SE. Got reply from Bill: Site is currently under development. Plans, to begin next week and continue thru Oct., include install'n of sheet piling, install'n of dewatering treatment system that will operate for 2-3 months, potentially removing millions of gals of water, excavation of petroleum-impacted soil, collection of post-ex soil samples, and mixing of ORC in excavation. RAP details what is to occur at site after development and includes install'n of post-remed mon wells to evaluate potential off-site plume and effects RAP and construction activities have on GW. We were told last year that plans were moving quickly and also thought project would have started several months ago if not late last year. DEP is also involved with reviewing/approving all documents due to Site having E-Designation. Further, access to sidewalks around site will be blocked for construction. Due to logistics involved with installing wells at this time in project (i.e.: lack of access, construction traffic) and certain destruction of any wells installed due to construction and RAP activities that will be performed (i.e.: removal of millions of gals of water, soil excavation and ORC mixing) that will have significant positive effect on subsurface conditions at site, we do not believe install'n of monitoring wells at this time is feasible or warranted. Add'ly, historical GW data (Nov.'00 thru May'04) & data from Jan.'06 sampling event provide adequate baseline info for evaluating pre- & post-remedial impacts. I've attached results of 2 GW samples collected in March '07 for waste characteriz'n data for dewatering and DEP discharge permit criteria by Langan Engrg & Env'tal Svcs on behalf of developer plus Site Plan showing location of samples [in eDocs]. We look forward to discussing further, hear your comments. I reviewed GW waste charact. sample data, wrote back: Thanks for waste charact. GW data. Your arguments are reasonable & persuasive; I withdraw request for install'n of addt'l delin wells at

EXXON (Continued) **S107415886**

this time. As you stated, post-remed wells will have to be installed to evaluate on- & off-site subsurface conditions after remediation and development at site. Please send lab results of 2 wells ECS recently sampled when available, and let me know when soil excavation and de-watering activities have been scheduled; I'd like to come to site to observe. - J. Kolleeny 06/22/07: Received/reviewed copy of Langan Engrg Supplemental Site Invest Rpt dated 6/19/07, and on 6/21/07 sent email to Bill Simmons of ECS: Yesterday I received copy of a Supplemental Site Invest Rpt dated 6/19/07, prepared by Langan Engrg & Envt'l Svcs, addressed to Gary Heath of NYCDEP. This rpt has caused me some concern. Rpt summarizes excavation of 10 test pits across site in March '07, with collection of soil samples. Rpt concludes that there is widespread soil contam at site, but mainly below 8 feet bgs. GW was encountered in test pits, but no free product or sheen was observed. Based on these observations, Langan suggests that removal of contam soil from much of site, in accordance with approved remedial plan, will require unnecessary removal of upper 8 feet of relatively uncontaminated fill material, and that since planned site building will only have small cellar and will have on-grade slab over rest of site, with vapor barrier & sub-slab depressuriz'n system, excavation of contam soil should only be performed in proposed cellar area and petroleum-impacted soil identified elsewhere on site should be left in place. Langan's recommendation seems to be based on premise that only relevant concern posed by petroleum contam is its potential impact on building occupants via vapor intrusion. In fact, there is significant GW contaminant plume beneath site (which may extend off-site) which must be addressed under NYS Envt'l Conserv Law. Based on most recent GW data available to me (Jan. '06), very high levels of GW contam were found outside of planned cellar area (former well MW-4). GW contam at site must be addressed to resolve open spill 0508226. Best way to accomplish this, in light of fact that site is undergoing redevelopment, is to excavate as much contam soil as possible, since soil contam acts as source material for GW contam. This was recognized by ECS in April '06 Remedial Action Plan, which stated ECS proposes performance of exploratory test pits...Any petroleum-impacted soil that is discovered will be excavated and disposed of off-site. This remedial action will remove source areas and ultimately improve GW quality. RAP further proposed application of ORC to open excavation(s), to enhance biodegradation processes which reduce dissolved petroleum contam. DEC has approved April '06 RAP; any change in remedial plan must be submitted to NYSDEC in writing and approved by DEC. This may require collection and submission of up-to-date GW quality data to support revised remedial proposal. Again, I express my concern over Langan's suggestion that soil known to be petroleum contaminated be left in place at site, which contradicts RAP. Please let me know your thoughts on this. - JK 06/27/07: Received call from Bill Simmons of ECS, discussing recent Langan Engrng rpt and my email of 6/22/07. I stated that either impacted soil in southern areas of site (i.e., outside of planned cellar area) must be excavated, or alternative remedial plan must be proposed, which may require addt'l supporting data. Bill sent email summarizing conversation, with attached results for GW samples collected 6/15/07 from two wells in north, NE portions of site. Results (in eDocs) showed no petroleum-related compounds detected. Bill's email stated: Please find attached analytical results of GW sampling of wells MW-7 and MW-8 on 6/15/07. Data indicate no VOCs

EXXON (Continued) **S107415886**

besides chloroform. As follow-up to our phone conversation this a.m. regarding your email: I will discuss with all parties involved need for soil excavation to remove source of GW contam and further migration off site, specifically in vicinity of former well MW-4 located on SE part of site, of which most recent data collected in Jan. '06 by Impact Envt'l indicated total VOCs at 36,901 ppb. We specifically discussed Grids 7, 13, 14, 15, 19 & 20 (per Langan Engrg Site Plan in Supplt'l Site Invest Rpt dated 6/19/07) with depths from 5 fbg to minimally 10 fbg. Note that excavation of southern parts of Grids 7, 13 & 19 will be limited due to presence of abutting building and its structural integrity. If soil excavation is not performed, Revised RAP will be required with new GW data from SE, southern and eastern parts of site with proposal of alternative remedial methods to treat identified soil impact. I will keep you updated on progress. - J. Kolleeny 06/29/07: Received email from Bill Simmons of ECS: We are all in process of determining best strategy for excavation of petroleum-impacted soils in grids discussed along southern and eastern portions of Site. Developer has involved a structural engineering firm to provide geotechnical input specifically about abutting building to south and structural integrity concerns of getting too close to building without likely collapse. We request that you visit property to meet with certain people so an on-site discussion and meeting can better relate all site concerns. I have cc'd Joel Landes of Langan Engineering as he will be heading this issue. I was unable to attend site meeting on July 11, 2007. - J. Kolleeny 07/12/07: Received email from Bill Simmons: I want to provide you with update and status on project site meeting we had on Wednesday July 11. We determined that excavation of petroleum-impacted soils up to 10-12 feet in Grids along southern portions of Site(7,13 and 19) can be completed safely by coming no closer than 10 feet to building benching out 5 feet and using a 1 to 1 slope. As for eastern sidewalk portion (Grids 20, 21 and 22), we can likely get closer to sidewalk property border using a 1 to 1 slope. We will also excavate soils where we see impact in Grids 14 and 15 in addition to already proposed cellar area. ORC will be placed in all completed excavation areas. We anticipate this work will begin week of July 23. - JK 08/02/07: On 7/31/07, received letter from Bill Simmons of ECS dated 7/30/07 (in eDocs), informing DEC of progress at site and addressing my recent concerns. Letter restates comments in his 7/12/07 email regarding depth of excav in various grids with sloping rqmnts to protect struct integrity of abutting bldg, says excavation is expected to begin week of 8/6/07. - JK 01/02/08: Sent email to Bill Simmons of ECS requesting remediation update: I was going through my spills and noticed I haven't had an update on this case since August. Can you send an update on progess of soil excavation? Has de-watering been performed, or application of ORC to excavation? Has end-point soil sampling been performed, and if so, are any lab results available? I think it would be advisable to have DEC review end-point sampling data prior to backfilling excavation. Also, has any additional GW sampling been done? I remind you that RAP I approved for Cumberland Farms - who are, to my knowledge, Responsible Party for this spill - included quarterly GW monitoring prior to remediation. If CFI no longer considers themselves responsible for addressing this spill (which would be news to me), please let me know right away. I re-read my notes on this site, including comments in an email from you which gave impression that there may be more than one RAP for site. In other words, I sense

EXXON (Continued) **S107415886**

that some parties involved (i.e., Langan) are operating under RAP that was not submitted to, reviewed and approved by DEC. If property owner and/or responsible party wish to achieve closure of this spill, we all need to be on same page. Got email reply from Bill: Project is progressing. We are all operating under same RAP so I do not know what you are referring to. Impact Environmental operates dewatering system for CFI and developer and performs daily on-site Health & Safety Monitoring per DEP requirements. Langan is not doing anything except overseeing that things are being performed per all requirements on behalf of developer. 1. From Aug. 27 - Sept. 22, 2007, 1,213.71 tons of soil were removed from GRIDS 7, 10, 11, 13, 14, 15, 19 & 20, up to 12'-13' feet below grade. ORC was added to GRIDS 7, 13, 14, 19 and 20 - See Attached Plan. Post-Ex data from these GRIDS is attached in Table [in eDocs]. 2. Dewatering system was started on 12/12/07. Soil excavation within cellar area down to 15'-17' feet in GRIDS 10, 11, 12, 16, 17, 18, 22, 23 & 24 began on 12/19/07, and is on-going. 3. As we discussed in June '07 it was not possible to do any GW monitoring prior to soil excavation other than what I sent you on 6/19/07, because all wells had been destroyed. 4. I expect cellar soil excavation, post-excavation sampling and ORC application to be completed in next few weeks, but lagging construction for sidewalls for sidewalks will determine this schedule. I sent email to Bill: Thanks for update and soil data. I'm glad end-points look pretty good so far. I guess I got impression there may be more than one remedial plan (besides April '06 ECS plan I approved) because in my notes I've written that Langan mentioned installation of a vapor barrier and sub-slab depressurization system. I recall that RAP I approved mentioned installation of moisture barrier, with presumption that there would be basement extending into water table, and only mentioned passive sub-slab venting system as a possibility. I thought maybe Langan had submitted a more detailed proposal for sub-slab system to NYCDEP because of e-designation - I know they've been submitting reports to DEP and I'm not sure if I'm copied on all of them. Do you have any sampling data for de-watering discharge? I know this is regulated by DEP, not DEC, but I figured if you have data, it could provide some clue as to GW conditions at site. and sent another email: P.S. to my last email, you're right that we discussed GW sampling in June and agreed GW sampling is not possible because wells are destroyed (your item #3 below). Please let me know when you think it might be possible to begin installing some perimeter wells to do follow-up GW monitoring - can this be done once excavation, dewatering, and sidewalk construction are completed, or will it have to wait until site re-development (i.e., new building) is fully complete? Bill wrote back: Wells will not be able to be installed until after development likely - utilities have been moved and sidewalk will be closed until then, and there are site trailers on sidewalks etc... Then Bill sent another email with attachments, stating: I want us all to be clear on all of this. DEP did require installation of vapor barrier and sub-slab depressurization system for building due to e-designation and Langan did previously submit plans to DEP which were approved for developer. I thought you were referring to RAP for Soil and GW issues only. Documents are attached for SSDS and waterproofing. I will forward anything else I can find from Langan regarding this. As for de-watering - I have not seen any data but I can and will request this from Impact - which I will receive eventually anyways in their discharge report/documentation. Attachments (in eDocs) were specs, product info & site plans for

EXXON (Continued) **S107415886**

waterproofing, vapor barrier and sub-slab depressurization system, plus NYCDEP approval letter of same, and DEP Notice To Proceed letter. I sent another email to Bill: I had a chance to look more closely at post-excavation soil data (I didn't initially see there were multiple sheets to Excel file), and noticed there was one sample that had some significant exceedances of TAGM 4046 recommended cleanup objectives - GRID 13 Eastbase 12'-13' sample. Is excavation still open in area where this sample was collected, and would it be feasible to dig a little more soil out in this area? - J. Kolleeny 01/03/08: Received email reply from Bill Simmons of ECS to my 1/2/08 query about excavating addt'l contam soil: Could not dig any further or deeper in that area. Abutting building structure began to be compromised with sidewall cave-ins exposing foundation which was original brick, and GW was not helping - they had to backfill immediately after sample was collected and ORC was added. This is only very small area (less than 5x5 feet) of this sample that exceeded and we dosed it with ORC extremely well. Also, received emails from Bill with attached documents: an 8/1/07 letter rpt from Langan Engrg to NYCDEP, modifying and providing details of their earlier conceptual proposal for waterproofing/vapor barrier system for planned site building, and 12/6/06 letter rpt by Langan to DEP, serving as an addendum to ECS's April '06 RAP; Langan's addendum provides info regarding: (1) capping open areas of site with clean fill/top soil, (2) providing construction health & safety plan, (3) vapor barrier, and (4) active sub-slab venting system. Both Langan documents are in eDocs. I sent email to Bill Simmons: Thanks for providing these documents. I'm satisfied that remediation of subsurf petroleum contam at site is being performed in accordance with April '06 Remedial Action Plan by ECS which I reviewed & approved. Issues addressed in various documents Langan submitted to NYCDEP, including waterproof membrane, vapor barrier, sub-slab depressuriz'n system, and capping of open areas of site with 2 feet of certified clean fill material, are issues that I do get involved with at some of my sites. In most of those cases, I also request involvement of NYS Dept. of Health in reviewing & commenting on such plans. However, in this case, since NYCDEP is taking such an active oversight role because of property's e-designation, I do not feel need to be directly involved in reviewing and evaluating various engineering controls and vapor mitigation measures planned for site, or to request involvement of NYSDOH. Nevertheless, I would appreciate being copied on correspondence regarding such issues between Langan and DEP. - J. Kolleeny 03/16/09: Sent email to Bill Simmons of ECS: I don't think I've heard anything about this site in long while. Can you provide an update? Bill sent reply: No envt'l or construction work has been done at Site since Oct.'08, we think developer has some financial issue which has put project on hold. We have occasionally tried to contact them for their plans, but no response yet. However, here is an envt'l RAP summary so far: We believe that all petroleum-impacted soil excavation has been completed that has generated approx 5,555 tons of soil for off-site recycling -unless developer plans to excavate other areas of site in future and it is discovered - but remaining plans we know of now only consist of removal of top 4 feet of urban fill to be replaced. > 100 post-excavation soils samples were collected from completed excavation areas for lab analysis. ORC (Chemical treatment) in base limits of soil excavation has also been completed. Over 10 million gals of GW were de-watered, treated and discharged until system was shut down last week of Aug.'08. GW samples collected just

EXXON (Continued) **S107415886**

prior to shutting down system on 8/27/08 from INFLUENT before bag filters had 6 VOCs at low levels but still above DEC standards (7 ppb toluene, 6.7 ppb ethylbenzene, 30 ppb xylenes, 11.3 ppb MtBE, 11.5 ppb 1,2,4-Trimethylbenzene, and 5.2 ppb 1,3,5-Trimethylbenzene) and sample collected after bag filters only had MtBE at 10.6 ppb (DEC standard of 10 ppb). Moisture/chemical barrier was installed in basement part of bldg, which has been constructed and formed to grade. Once development resumes, we will know timetable for install'n of off-site post-construction GW monitoring wells and sampling program. Let me know if you have any other questions. I sent back reply: Thanks for update. Will rpt be coming at some point summarizing work done to date, with end-pt soil sample results, details on amount of ORC applied to excavation, and recommendations for install'n of wells and post-remedial GW monitoring? - J. Kolleeny 09/10/09: On 9/9/09, received email from Bill Simmons of ECS: There is some action with this site. Developers are working on selling assets to new developer and they want to push forward install'n of wells in sidewalks soon, before any more work begins in future. To do so, driller (Zebra) need letter to DOT from NYSDEC authorizing access under Spill # to do this work in sidewalks of 10th Ave and 23rd Ave [Street]. Can you provide one asap? We want to try and install 2 wells in each sidewalk (total of 4) but this will be determined once utilities are located and access is available to those locations. We will also install 2 on-site along downgradient western boundary since building is not up yet. I sent sidewalk opening permit request letter (in eDocs) to Bill, cc to Chris Johnson of Cumberland Farms. - J. Kolleeny 12/14/09: Reviewed Remedial Action Plan Closure Rpt by ECS, dated 11/4/09 (parts in eDocs). Rpt summarizes all site invest & remed performed (including excavation of > 5,700 tons of soil, dewatering, and application of RegenOx & ORC Advanced), and presents results of post-remed soil & GW sampling that shows residual contamin in several areas of site. Based on substantial remedial work done to remove contam materials from site and fact that post-remed samples show decreased levels of contam compared with pre-remed samples, ECS recommended spill closure. I sent letter (in eDocs) to Chris Johnson of CFI, cc to Bill Simmons of ECS, saying DEC cannot close spill yet, because of need to monitor residual contam. I asked for quarterly GW monitoring, install'n of one new well NW of most contam well (MW-2) when site conditions permit, surveying of wells to determine up-to-date GW flow direction, submission of quarterly mon rpts. Also said if contam levels stay elevated, site may need addt'l remediation. Changed priority ranking to P2, since site is in monitoring phase. - J. Kolleeny 02/09/10: Reviewed Groundwater Monitoring Report & Work Plan by ECS, dated 2/5/10 (in eDocs). Rpt presents results of Jan. 2010 GW sampling of 6 on-site wells and work plan for install'n of addt'l well as I requested in 12/14/09 letter. GW results show total VOCs in worst well MW-2 decreased from 2,434 ug/L in Oct.'09 to 99 ug/L in Jan. 2010; 2nd worst well City MW-6 had 522 ug/L in Jan. 2010, down slightly from 550 ug/L tVOCs in Oct.'09. Work plan proposes new well in sidewalk along W. 23rd St. (west of SW corner of W. 23rd St. & 10th Ave.). I sent approval letter (in eDocs) to Chris Johnson of CFI, cc to Bill Simmons of ECS, saying new and existing wells should be surveyed to determine up-to-date GW flow direction. - J. Kolleeny 02/10/10: Received email from Bill Simmons of ECS: New wrinkle to discuss. DOT plans to install an elevator to High Tran that abuts Site to west. Elevator will be installed in sidewalk along West 23rd St in NW portion of sidewalk. Attached is

EXXON (Continued) **S107415886**

their plan [in eDocs]depicting where they plan on digging etc., which is to start week of Feb. 22. Our monitoring well MW-1 and their well CITY-MW-6 are in this area and will likely be destroyed but I ll find out next week. Newly proposed well MW-7 is east of this area and should be ok. I'll be meeting with them next week to discuss their plan including likelihood that if they dig to 15 -17 they will find petroleum-impacted soil since we only excavated up to these edges. We will plan on being there to cooperate management of this and collect closure samples. My question is this: We have to survey wells to get GW flow. These are options: 1. Survey all 6 wells before this works starts and use gauging data to get flow direction now. However, 2 wells will be destroyed in next few weeks so we will not have any more data from them and do not know if we will be able to install any replacement wells in this area. 2. Wait until this work is done, then install MW-7 and survey 5 existing wells. Maybe we will know once elevator project is done if any replacement wells can go in this zone and we could install it and survey it also. Please advise. I wrote back: I prefer option 2 - wait until DOT finishes installing elevator, then install MW-7 and see if it's possible to install one replacement well for 2 destroyed wells (since well CITY-MW-6 had moderately elevated contamination), and survey wells at that point. Thanks for keeping me posted. - J. Kolleeny 05/03/10: Reviewed GW Mon Update Rpt dated 4/28/10, by ECS (in eDocs). Rpt summarizes March 2010 post-remediation GW sampling event. Worst well, MW-2, had total VOCs of 558.5 ug/L, up from 99 ug/L in Jan. 2010 (but down from 2,395 ug/L in Oct.'09). Well City MW-6 had tVOCs of 39 ug/L, down from 349 ug/L in Jan. 2010; well MW-3 had 67 ug/L tVOCs, about same as 59 ug/L in Jan. 2010. Wells MW-1, MW-4 & MW-5 were ND for VOCs. Rpt states that DOT sidewalk elevator project is anticipated to start in May 2010. Future Work section of rpt states that ECS will notify DEC when DOT provides start date for elevator work, and will be on-site during soil excavation to collect post-ex samples; once DOT work is complete, ECS will install well I requested near NE corner of W. 23rd St & 10th Ave., and if applicable, replacement well in elevator area. These events and data from next qtrly GW event will be in next rpt. - JK 06/15/10: On 6/14/10, received email from Bill Simmons of ECS: An update: Due to ongoing delay on start of elevator sidewalk project (any day now for past 3 months) we plan to install proposed monitoring well MW-7 in sidewalk on June 16. On May 27, 2010 a construction crew discovered an abandoned 250 gal oil tank during pile cap excavation on SW portion of Site. Tank was partly filled with soil & concrete, was removed from ground and is currently stored at site covered in plastic tarp; it will be removed soon, as access to this area is now blocked. We collected soil samples from beneath tank that field-screened at Zero and submitted some samples for lab analysis. This will be summarized in next rpt. On 6/15/10 I replied: Thanks for update, glad you're proceeding with install'n of MW-7, and thanks for taking necessary steps with discovered 250-gallon tank. Keep me posted on progress. - JK 11/10/10: Reviewed GW Mon Update Rpt by ECS, dated 8/18/10, rcvd at DEC on 9/7/10 (in eDocs). Rpt summarizes install'n of addt'l well MW-7 in sidewalk along W. 23rd St. north of MW-2, as requested by DEC, in June 2010, and sampling of wells MW-1, MW-2, MW-3, CITY MW-6 and MW-7, also in June 2010. Worst well was CITY MW-6, with 660 ug/L total VOCs. In June & July 2010, 483 tons of soil was excavated/removed from site for construction. Rpt states, for Future Work, that DEC will be notified when High Line Park elevator sidewalk construction project will start; once project is

EXXON (Continued) **S107415886**

completed, need for replacement wells will be evaluated. - JK 12/10/10: Sent email to Bill Simmons of ECS: Any update on Highline Park elevator constructn project? Has any GW monitoring been performed since June 2010 event, which was summarized in update rpt dated 8/18/10? Bill wrote back: City began elevator project ~Aug. 23 by installing shoring in 44 x20 area in sidewalk. Between then and Sept. 7 they removed soil - 22 trucks, which equates to somewhere around 550-650 tons or so removed from surface to 17 ft deep. They dewatered and treated via carbon from around Sept. 7 through sometime around end of Oct. or early Nov., reportedly at around at least 8,500/GPD. June 2010 GW sampling event was last. All site wells have been destroyed, even wells in east sidewalk along 10th Ave. Building is going up and taking up every inch of space they have to street edges. We were on-site during portions of this work but no post-ex soil samples could be collected due to shoring walls and base at 17 was all mud. We are trying to get any soil disposal manifests and dewatering backup, but I can t promise. I will at least try to get specifics # s on any of tonnage and gallons if I can. I sent back response: Thanks for update. Do you know if City did any sampling of untreated and/or treated dewatering water, and if so, if it's possible to get hold of any of sampling results? He wrote back: That is what we are looking to get. They told us prior to installing dewatering pump and setting up system that they were planning on collecting an influent untreated sample and they were discharging to sewer so they must have been sampling that according to whatever permit they had but they have not provided us any info. I will try again and let you know they are very evasive. - JK 05/02/13: Reviewed Spill Closure Rqst rpt by ECS, dated 4/22/13 (in eDocs). Rpt summarizes all investigative & remedial actions performed at site. In particular, rpt notes that in Oct. 2005, ~1,565 tons of petroleum-impacted soil were removed from former UST area on northern portion of site and 5,741 gals of GW were pumped during dewatering activities; between July & Aug. of 2007, ~1,924 tons of soil classed as clean fill were excavated from top 5 ft of entire site; between Aug. 2007 and Oct. 2008, 5,712 tons of soil were excavated at depths ranging from 8-18 ft, from 70% of site (some end-point samples showed residual soil impacts); RegenOx and ORC Advanced were applied to excavation; and ~ 9,158,400 gals of GW were pumped out, treated and discharged to DEP combined sewer as part of construction- and excavation-related dewatering. Also, in Aug.-Oct. 2010, as part of construction activities for NYCEDC elevator (along west 23rd St) to High Line Park, ~850-950 tons of petroleum-impacted soil were excavated to depth of 17-18 ft (9-10 ft below water table) from 44' x 20' area of sidewalk along 23rd St., along NE site boundary, and a GW dewatering system operated for 6 weeks pumping ~8,500 gals/day, for total of ~380,000 gals recovered, treated & discharged (ECS was not able to obtain actual data on soil or GW from NYCEDC). In addition to these remedial actions, a vapor barrier membrane and active sub-membrane depressurization system were installed beneath bldg (except cellar area which extends into GW and has waterproofing); these engineering controls will mitigate potential vapor intrusion from any residual soil & GW impacts. Last available post-remedial GW data, from June 2010, showed worst result was 660 ug/L total VOCs in well CITY MW-6; this well & several others were destroyed during NYCEDC's High Line elevator install'n project, but presumably soil excavated and GW dewatered during project would have helped reduce residual GW contaminant levels and promote further natural

EXXON (Continued) **S107415886**

attenuation of any remaining impacts. Based on all remedial actions performed and engineering controls implemented, ECS concludes that no further action is warranted at site and requests spill closure. I concur. I closed spill, sent closure letter (in eDocs) to Chris Johnson of Cumberland-Gulf Group of Companies, cc to Bill Simmons of ECS. - J. Kolleeny "

Remarks: "Caller reports removing five 4000 gallon tanks. There is contamination at the site. Caller reports no holes in the tanks. Cumberland Farms will be contacting a company for cleanup. Contractor on the site removing the tanks is: Tyree Orginazation Roland Fisher 631.300.6753."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 001
Tank Id: 13291
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
C03 - Pipe Location - Aboveground/Underground Combination
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G10 - Tank Secondary Containment - Impervious Underlayment
B05 - Tank External Protection - Jacketed

Tank Location: Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CVS PHARMACY #10041 (Continued) **1015754402**

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D027
Waste Description: 1,4-DICHLOROBENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Waste Code: P188
Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

CVS PHARMACY #10041 (Continued) **1015754402**

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U072
Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U201

CVS PHARMACY #10041 (Continued) **1015754402**

Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U204
Waste Description: SELENIOUS ACID (OR) SELENIUM DIOXIDE

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Name: BAYVIEW PROPERTY
Address: 550 WEST 20TH STREET
City,State,Zip: NEW YORK, NY 10011
Program: HW
Site Code: 582178
Classification: A
Region: 2
Acres: 0.363
HW Code: 231132
Record Add: 02/07/2019
Record Upd: 06/07/2021
Updated By: DJEATON
Site Description: "This site is a portion of site 231005 and previously referred to as V00530. Location: The 0.4 acre site is the northwestern part of a larger, historic manufactured gas plant (MGP) operation which once encompassed portions of five city blocks along the western side of Manhattan, New York City. Remediation has already been accomplished at several other portions of the larger site. The descriptions of the other sections can be found under the listings for the sites noted above. This site is bounded by the West Side Highway (NY Route 9A) on the west, and West 18th and 19th Streets to the south and north, respectively. To the east, the rest of the block is made up mixed use commercial properties. Site Features: The site is almost flat, with a slight slope to the west, toward the Hudson River. Most recently, the site housed the Bayview Prison facility for women, which was closed following major flood damage from Tropical Storm Sandy in 2013. The entire site is covered with buildings or pavement. Current Zoning and Land Use: The former prison building and a building annex remain vacant on the site. Current site zoning is C6-3, for commercial purposes. The site is included in the Special West Chelsea District, a 14-square block area established in 2005 to allow mixed commercial and residential development, and to promote development around the adjacent High Line city park. Adjacent properties to the east are being redeveloped for residential and commercial uses. Past Use of the Site: The West 18th Street Gas Works began operations in 1834 and continued to expand through most of the 1800s, but was closed in the early 1900s. Manufactured gas was produced by heating coal in a closed vessel, collecting the gas and purifying it, and then delivering it through underground networks of pipes into the

BAYVIEW CORRECTIONAL FACILITY (Continued) **1007112519**

surrounding area. The gas was used in homes and businesses for heating, lighting, and cooking in much the same way that natural gas is used today. Operable Unit 5 contained two gas holders during the period when the MGP was active. The gas manufacturing process produced a byproduct consisting of a black, oily liquid waste known as coal tar. This tar escaped from underground storage tanks and pipes into surrounding subsurface soils. The tar is resistant to decay and is commonly found in soils at former MGP sites decades after operations ceased. Most of the tar contamination found at the West 18th Street MGP was found on neighboring properties, which have already been remediated or are in the process of being remediated. Relatively minor impacts have been detected on Operable Unit 5. Following closure of the MGP, the gas manufacturing facility was torn down and the site was subdivided and sold to a number of different owners. Subsurface structures such as building foundations and subsurface piping, however, were often not removed and remain in place today. A variety of commercial and industrial operations developed throughout the former MGP site in the middle and late 1900s. Based on investigation work conducted to date, it appears that gas holder foundations still exist beneath the site. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie Cambrian Hartland Formation bedrock. The unconsolidated units are divided in to three distinct stratigraphic units. From the surface down, the units consist of a fill unit (highly heterogeneous, generally highly permeable) a silty-clay unit (a low-permeability aquitard consisting of tidal marsh deposits), and a sand unit (highly permeable stratified alluvial sands). "

Env Problem: "Nature and Extent of Contamination: Sampling at the site was limited due to the presence of buildings that did not permit extensive sampling. Based on the limited sampling to date, which included analysis for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals, no significant contamination has been detected on this operable unit. There is a possibility that some source material may be present within the holder structure under the former prison building, however, there is no evidence that source material is migrating from the operable unit. The soil samples collected on this site contained SVOCs and metal contamination; the highest concentration of total SVOCs is 610 parts per million (ppm). Concentrations of mercury exceed the restricted residential SCOs, with a maximum concentration of 1.9 ppm. Groundwater collected north of this operable unit met ambient water quality standards, and the groundwater south of the adjacent operable unit (south of the site) contained minor contamination of SVOCs, with only naphthalene exceeding its groundwater standards at a concentration of 11 parts per billion. Soil vapor and indoor air sampling have not indicated the potential for soil vapor exposure. "

Health Problem: "As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Number:	001
Tank Id:	3358
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

170 8TH AVE. (Continued) **U003384240**

F99 - Pipe External Protection - Other
H99 - Tank Leak Detection - Other
B05 - Tank External Protection - Jacketed
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
L09 - Piping Leak Detection - Exempt Suction Piping
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	02/14/1984
Capacity Gallons:	3000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	DMPOKRZY
Last Modified:	04/14/2017
Material Name:	#6 fuel oil (on-site consumption)

Date Record Added:	03/05/2002
Date Record Updated:	07/03/2018
Updated By:	GWCROSS
Site Description:	"Location: The site is the northwestern part of a larger, historic gas manufacturing site which once encompassed portions of five city blocks along the western side of Manhattan, New York City. Remediation has already been accomplished at several other portions of the larger site, as detailed below. The portion of the site covered by this document (Operable Unit 5, as described below) is bounded by the West Side Highway (NY Route 9A) on the west, and West 18th and 19th Streets to the south and north, respectively. To the east, the rest of the block is made up mixed use commercial properties. Site Features: The site is almost flat, with a slight slope to the west, toward the Hudson River. Most recently, the site housed the Bayview Prison facility for women, which was closed following major flood damage from Tropical Storm Sandy in 2013. The entire site is covered with buildings or pavement. Current Zoning and Land Use: The former prison building and a building annex remain vacant on the site. Current site zoning is C6-3, for commercial purposes. The site is included in the Special West Chelsea District, a 14-square block area established in 2005 to allow mixed commercial and residential development, and to promote development around the adjacent High Line city park. Adjacent properties to the east are being redeveloped for residential and commercial uses. Past Use of the Site: The West 18th Street Gas Works began operations in 1834 and continued to expand through most of the 1800s, but was closed in the early 1900s. Manufactured gas was produced by heating coal in a closed vessel, collecting and purifying it, and then delivering it

CE - W. 18TH ST. GAS WORKS (Continued) **S105684667**

through underground networks of pipes into the surrounding area. The gas was used in homes and businesses for heating, lighting, and cooking in much the same way that natural gas is used today. Operable Unit 5 contained two gas holders during the period when the MGP was active. The gas manufacturing process produced a black, oily liquid waste known as coal tar. This tar escaped from underground storage tanks and pipes into surrounding subsurface soils. The tar is resistant to decay and is commonly found in soils at former MGP sites decades after operations ceased. Most of the tar contamination found at the West 18th Street MGP was found on neighboring properties, which have already been remediated or are in the process of being remediated. Relatively minor impacts have been detected on Operable Unit 5. Following closure of the MGP, the gas manufacturing facility was torn down and the site was subdivided and sold to a number of different owners. Subsurface structures such as building foundations and subsurface piping, however, were often not removed and remain in place today. A variety of commercial and industrial operations developed throughout the former MGP site in the middle and late 1900s. Based on investigation work conducted to date, it appears that gas holder foundations still exist beneath Operable Unit 5. Operable Units: An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Although the entire West 18th Street MGP site is included in a Voluntary Cleanup Agreement with Consolidated Edison, the former MGP site is now split between several different current owners and operable units, which has enabled a piece-by-piece approach to site cleanup. Some of this cleanup work has been accomplished under the original Voluntary Cleanup Agreement, and some has been accomplished by third party developers under the New York State Brownfield Cleanup program. The following is a summary of the operable units comprising the site. Operable Unit 1 (OU 01) is the entire historical footprint of the MGP site. Operable Unit 2 (OU 02), the West Chelsea Development property (535 West 19th Street), was designated as OU-2 to facilitate redevelopment. Remedial Action took place from September 2006-February 2008, for which a release letter, closing out remediation of this property, was issued in November 2009. Operable Unit 3 (OU 03), 524 West 19th Street, also known as the Gasser Property, was remediated from September 2007 - September 2008. A final engineering report was approved in August, 2009, and a deed restriction was filed in October 2009. Operable Unit 4 (OU 04) is the portion of the site that sits between West 16th and West 17th Street and 10th and 11th Avenue. Another part of the original MGP site, the 19th Street Development site, located at 80 11th Avenue, was remediated under the Brownfield Cleanup Program as site number C231017, and received a Certificate of Completion in September 2006. No formal Operable Unit designation was made for this property. The block bounded by West 17th and 18th Streets, and by 10th and 11th Avenues, entered into the BCP as two different projects. The western portion (known as the 17th Street Development Site, C231036) completed remedial action in December 2014, and is currently being redeveloped. The eastern portion, surrounding the High Line Park, is known as the 515 West 18th Street Site (C231093) has been thoroughly investigated and is currently awaiting remedial action. No formal Operable Unit designation was made for this property. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials

CE - W. 18TH ST. GAS WORKS (Continued) **S105684667**

overlie Cambrian Hartland Formation bedrock. The unconsolidated units are divided in to three distinct stratigraphic units. From the surface down, the units consist of a fill unit (highly heterogeneous, generally highly permeable) a silty-clay unit (a low-permeability aquitard consisting of tidal marsh deposits), and a sand unit (highly permeable stratified alluvial sands). Operable Unit 5 (OU 05) is the subject of this document, and represents one of the last two portions of the West 18th Street MGP Site which have not been remediated or have a remedy selected. A remedy for the other remaining portion at the northeastern corner of the site, and the city streets which traverse the site, will be determined in the future. "

Env Problem: "Nature and Extent of Contamination: Groundwater and subsurface soil are contaminated with BTEX and PAH. A significant amount of coal tar contamination is associated with the former MGP structures on this property. Significant contamination on many parcels extends to the bottom of the fill unit at depths approaching 50 feet below ground surface. Soils saturated with coal tar are found at depths between 1.5 feet and 35 feet below ground surface. Wells spontaneously accumulate up to 8 feet of mobile tar. Special Resources Impacted/Threatened: The heaviest concentration of coal tar is found along the western, downgradient edge of the site. MGP contamination appears to have migrated from this property primarily to the north and west, but has not yet been observed in the Hudson River 160 feet to the west of the site. Tar accumulates spontaneously (without pumping) in monitoring wells at the western property line, so off-site migration can occur readily. Significant Threat: This site presents a significant environmental threat due to the presence of tar moving off-site in the direction of the Hudson River 160 feet away. OU5: Nature and Extent of Contamination: Sampling at the site was limited due to the presence of buildings that did not permit extensive sampling. Based on the limited sampling to date, which included analysis for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals, no significant contamination has been detected on this operable unit. There is a possibility that some source material may be present within the holder structure under the former prison building, however, there is no evidence that source material is migrating from the operable unit. The soil samples collected on Operable Unit 5 contained SVOCs and metal contamination; the highest concentration of total SVOCs is 610 parts per million (ppm). Concentrations of mercury exceed the restricted residential SCOs, with a maximum concentration of 1.9 ppm. Groundwater collected north of this operable unit met ambient water quality standards, and the groundwater south of the adjacent operable unit (south of the site) contained minor contamination of SVOCs, with only naphthalene exceeding its groundwater standards at a concentration of 11 parts per billion. Soil vapor and indoor air sampling have not indicated the potential for soil vapor exposure. "

Health Problem: "Public water is provided to the area, thereby preventing exposures to groundwater. The area is covered with buildings or pavement, thereby preventing direct contact with contamination. The investigation of the whole site is on-going and data will be evaluated as they become available."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	1609
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	I04 - Overfill - Product Level Gauge (A/G)
	J02 - Dispenser - Suction Dispenser
	H99 - Tank Leak Detection - Other
	G03 - Tank Secondary Containment - Vault (w/o access)
	L09 - Piping Leak Detection - Exempt Suction Piping
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1971
Capacity Gallons:	5000

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 11
Tank Id: 227737
Material Code: 0022
Common Name of Substance: Waste Oil/Used Oil

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
E00 - Piping Secondary Containment - None
I04 - Overfill - Product Level Gauge (A/G)
J00 - Dispenser - None
D00 - Pipe Type - No Piping
G01 - Tank Secondary Containment - Diking (Aboveground)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 01/01/2000
Capacity Gallons: 275
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 12/18/2015

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

LUIS PHILLIP CLEANERS (Continued) **1004756634**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.
AIR MINOR
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

NATIONAL ENVIRONMENTAL WASTE SYSTEM (Continued) **1000446169**

corrective action activities required under RCRA.

DEC Memo:	"9/19/07 Called 212-593-9100 (# on FIR) and left message for Scott Ross (contact on FIR). Mr. Ross returned my call and left a message. I called him back and he said the tank was not tested. He confirmed that the tank is 2K (consistent with registration) and is not 5K as in the spill report. He said that the tank is a concrete wrapped tank. I called Mark Salamack of Petroleum Tank Cleaners (they did the test). I left a message and requested that he call me back. M. Salamack called me back and said the technician believes the failure is in the fill line. Also he told me the address was incorrect on the Spill Report. The address is 312 NOT 12. Sent ttf letter to: Ivy Steele Chelsea London Co. c/o Buchbinder & Warren One Union Square West New York, NY 10003 Attn: Eva Matos Called Ms. Steele at 212-243-6722 and left message to call me back. Eva Matos called me back and told me the line failed and that PTC will be making the repairs. She also told me to send letter to her attention. I confirmed the mailing address with her. bf 10/9/07 Received fax from Eva Matos Letter included an invoice from PTC showing that the tank was retested and passed. Also, the fill line and vent line were replaced. No mention of contamination. I called Ms. Matos back and left a message on her voice mail. I stated that a letter is needed from PTC regarding any contamination found. Phone: 646-637-9019. bf 10/11/07 On 10/10/07, I received a letter by fax from Mark Salamack. Letter states that the failure was caused by a broken vent line. The fill line was compromised, but not broken. Both were replaced and no contamination was encountered. Tank was tightness tested on 9/27/07 and passed. NFA. bf 10/15/07 On 10/12/07, received message from Eva. She requested a call back regarding whether or not I received letter from PTC. I called her back (646-637-9019) and told her that I received the letter. bf"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	01
Tank Id:	15015
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

F04 - Pipe External Protection - Fiberglass
J02 - Dispenser - Suction Dispenser
L00 - Piping Leak Detection - None
C01 - Pipe Location - Aboveground
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
I05 - Overfill - Vent Whistle

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	3000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	06/11/2004

Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	J02 - Dispenser - Suction Dispenser E04 - Piping Secondary Containment - Double walled UG H04 - Tank Leak Detection - Groundwater Well A01 - Tank Internal Protection - Epoxy Liner L09 - Piping Leak Detection - Exempt Suction Piping G03 - Tank Secondary Containment - Vault (w/o access) B01 - Tank External Protection - Painted/Asphalt Coating D01 - Pipe Type - Steel/Carbon Steel/Iron F01 - Pipe External Protection - Painted/Asphalt Coating H01 - Tank Leak Detection - Interstitial - Electronic Monitoring K00 - Spill Prevention - None C01 - Pipe Location - Aboveground I05 - Overfill - Vent Whistle
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	11/13/2002
Capacity Gallons:	7000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	MFLEONAR
Last Modified:	04/09/2018
Material Name:	#2 fuel oil (on-site consumption)

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

JOHN'S TAILOR & CLEANER (Continued) **1001818344**

corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number:	001
Tank Id:	10817
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle
L00 - Piping Leak Detection - None
H00 - Tank Leak Detection - None
E00 - Piping Secondary Containment - None
I04 - Overfill - Product Level Gauge (A/G)
J05 - Dispenser - On Site Heating System (Supply/Return)
C03 - Pipe Location - Aboveground/Underground Combination
K00 - Spill Prevention - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	11/01/1987

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DER Facility ID:	118169
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 8/15/05 - Haggerty - TJ O'Conner of Dry as a Bone, tank tester, led me to Jack Learner of Plymouth Management, property manager (212)-447-7000. Left message 8/10/05 ----requires additional info 12/19/2005: Issued a letter to the property manager Jack Learner. (Sadique) 2/07/2006: Per PBS 4000 gal AST is in service. No tank was closed or removed. Possible to close after site visit. (Sadique) 8/12/08: Change Lead_DEC field to 'unassigned'. No documentation provided by property owner. Agree with recommendation above, possible to close after site visit. - JG 3/31/09 - Austin - Transferred from Needs Reassignment to Zhune for further work to remediate and close - end 10/28/10- Zhune spoke to Jack Lerner manager of the buildibg from Plymouth Management Group Inc. 212-447-7000 Ext. 222. He requested copy of the spill report. He said the tank was abondoned in place in 2006. The building converted to gas. He will look for documentation and will send it to DEC. Steve Miller Ext 221 smiller@plymuthny.com Assistant Marilyn Kronfle Ext 223 01/21/11-Hiralkumar Patel. 9:45 AM:- visited site. met Ramon Randon, building super. he is working at the site for about 1.5 years. he doesn't know about old tank location or reason for closing. found old petrometer and old supply/return lines capped inside the boiler room. 10:44 AM:- spoke with Mr. Miller at management office. he mentioned that property manager is on vacation and will be back by 01/28/11. DEC requires: 1) info about tank location, 2) reason for closing tank, 3) is tank removed or still in place?, 4) scaled site map including sampling locations for samples collected by ABC in 2006 during tank closing 4/1/15-ABC Tank emailed the a letter dated 2/27/14. The letter stated on May,2006n-ABC-Tank pumped out, cleaned & Washed the interior of (1)4000 gallon buried fuel oil storage tank. July, 2006-ABC Tank obtained (4) end-point soil samples which were submitted to a certified laboratory for anlysis. I was unable to locate the copy of the result from my office since we only keep our records on hand for (7)years. I also reached out to the laboratory but was told they destroy all documents(5) years. October, 2006 ABC Tank filled the (1) 4000 gallon buried tank with a cement slurry to abandon properly in place. As per DEC-Patel during his site visit. He does not recalled any significant contamination or staining at the site. As per TTF guidance this spill is being closed due to no indication of a current release, no information indicating that there may have been a historical release, and no information that this tank test failure will be an issue in the future. Spill Closed. "
Remarks:	"tank test failure, unknown as of yet on further"

Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	H99 - Tank Leak Detection - Other
	I04 - Overfill - Product Level Gauge (A/G)
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	D02 - Pipe Type - Galvanized Steel
	F00 - Pipe External Protection - None
	A00 - Tank Internal Protection - None
	G99 - Tank Secondary Containment - Other
	J02 - Dispenser - Suction Dispenser
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - In Place
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	3000
Tightness Test Method:	NN

DEC Memo:	"TTF letter was sent to A B C Realty 152 W 57th Street 12th Floor New York, NY 10019 Attn: William Harra TTF in edocs. 03/09/11-Hiralkumar Patel. 3:00 PM:- visited site as inspecting property at 535 W 23rd street, a property two doors west from the subject site. met Fraser (917-921-8309), building super. site has building on slab and a photo gallery is located on groundfloor. Fraser mentioned that the tank is located somewhere underneath the gallery floor. he mentioned that after the tank system failed the test, tank was drained using supply line connection in boiler room. boiler room is sub-grade and west of the tank location. inspected boiler room wall adjoining the tank location and found no oil staining or seeping. fill port found sealed. Fraser mentioned that management is planning to remove tank and install new tank at the same location. currently, site is using temp. tank. 6/7/11 Spoke to Seth Freedland, attorney representing the tenant, which is an art gallery. Phone: (212)344-1400 ext.202. He requested that they delay the work for the spill closure until July 2011. I would consider it, but would require a plan to do the investigation. He will contact the condo association and e-mail me back. Case has been open since January 2011. bf 6/7/11 bf: received the folowing e-mail: Resending. Below bounced back& Sorry. Seth D. Friedland Friedland Laifer & Robbins, LLP 62 William Street, Third Floor New York, New York 10005 Tel. 212.344.1400 x. 202 Fax 212.344.8735 email: sfriedland@friedlandlaifer.com This message and any attachments are solely for the use of the intended recipient(s). From: Seth D. Friedland Sent: Tuesday, June 07, 2011 12:46 PM To: 'bkfalvey@gw.dec.state..ny.us' Cc: Seth D. Friedland Subject: 521 West 23rd Street, NYC -- DEC Spill No. 1010869 - PBS No. 2-304158 Brian: Thanks for taking the time to discuss the above matte this morning. As mentioned, I represent the Steven Kasher Gallery which is the ground level tenant at the condominium building which is the subject of the above PBS case. Our client operates a gallery at the location, and the tank is suspected of being buried under the gallery floor. To accommodate our client s business requirements and to avoid undue disruption of our client s operations, as discussed, I would like to coordinate the proposed tank closure work to be performed during the month of July on a date or dates to be selected. You indicated that you would be amenable to the work being done in July. I will coordinate with the building manager and its consultant in order to propose the schedule of work and let you know. Should you have any questions, of course, please let me know. Thanks again for your assistance. Regards, Seth D. Friedland Friedland Laifer & Robbins, LLP 62 William Street, Third Floor New York, New York 10005 Tel. 212.344.1400 x. 202 Fax 212.344.8735 email: sfriedland@friedlandlaifer.com This message and any attachments are solely for the use of the intended recipient(s). Phone: (646)235-4800 and (212)809-1110. Contractor for gallery owner. Tank passed and lines failed ttt. I told him he needs to delineate contamination. He will send work plan. bf 8/14/12 PBS inspection today. Tank is still in use based on the petrometer which shows that there are approximately 1400 gallons of fuel in the tank. NOV issued and sent to William Harra at the above address. PBS settlement conference scheduled for 9/19/12. bf 9/19/12 Nopbody appeared for the PBS conference scheduled for today. bf 9/25/12 Today, received e-mail response from Riteway, contractor for the facility: Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had

COMMERICAL BUILDLING (Continued) **S110762281**

closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. From: David Chan [mailto:david@petroleumtek.com] Sent: Tuesday, September 27, 2011 3:34 PM To: 'Brian Falvey' Subject: spill 1010869 Hi Brian, Please find the closure report and supporting documentation for spill # 1010869. If you have any questions please do not hesitate to ask. Best regards, Dave Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718-855-7272 phone 718-855-7244 fax david@petroleumtek.com ----------end---------- 10/1/12 On 9/25/12 received the following e-mail from David Chan of rite-way that also included attachments: site sketch, analytical sample results, closure requerst letter, and ttt tank only test report. ----------start---------- Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. ----------end---------- On 9/28/12, received the following e-mail from David Chan which included the same attachments as the 9/25/12 e-mail: ----------start---------- Hi Brian.... ----------end---------- Tank failed because of hole in vent line. Submitted photos show the vent line with a corrosion hole and no visual contamination. Four samples were taken and were below DER- 10 allowances. A tank system test is required to close the spill case. today, responded to Mr. Chan's e-mail with the following: ----------start---------- David, The spill case can not be closed until the Department receives a passing tightness test for the whole system. The owner needs to correct the following registration information: 1. The product stored is #4 oil not #2 oil. 2.The tank overfill prevention is registered as a gauge. A gauge used for overfill prevention is only applicable to aboveground tanks. 3. The tank spill prevention is a catch basin. It is registered as none. 4. Pipe secondary containment is blank. The information correction application is attached. There is no fee for this application transaction and an original copy must be submitted (fax or e-mail copies will be returned unprocessed). Brian ----------end---------- bf 11/13/12 received the following e-mail from David Chan: Dear Brian, Please find the final tank and system test verifying the integrity of the system for the spill closure. I am following up with the owner with regards to their PBS. Please let me know if you need anything else for the closure. Thank you in advance. Best regards, David Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718-855-7272 phone 718-855-7244 fax david@petroleumtek.com 11/27/12 Based on sampling results, case closed. bf"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/14/03 Reassigned from Rommel to VOUGHT 3/25/05-Vought-File review by Vought: Letter from Tyree Org(Pisel) to DEC Tibbe-2/14/96. Enclosed please find the tank test report for the above referenced site. The three (3) 4000-gallon underground storage tanks passed on December 19, 1995. A 2 stick box was replaced. Letter from Tyree Org(Pisel) to DEC Tibbe-2/14/96. The following recounts the details of the Tyree Bros Environmental Services inspection of the aboce referenced site in repsonse to vapor complaints at a neighboring building. The adjacent building, 302 West 13th Street, with the vapor complaints was also inspected. The building is of four story brick construction with a basement . A reading of one percent (1%) of the LEL was recorded in the basement. The NYC Fire Department also checked the building and the service station. They gave no indication of any problem. Fax cover sheet from Tyree (Pisel) to DEC Tibbe-2/27/96. Drilling scheduled for 2/28/96 and delivery scheduled same day so Tyree can check building for vapors at same time. Fax from Tyree Brothers(Pisel) to DEC Tibbe-3/5/96. Here's the map and boring logs for the 3 wells. Called in spill due to W2 contamination @ groundwater. Found 3 divorced vent lines b/g which were capped. Tyree maintenance is going back to 45 degree a/g vents and install pressurized caps . Letter from Tyree Brothers(Rennie) to DEC Tibbe-7/3/96. Acess gained by Tyree to 302 W 13th St on 12/9/95 and on 2/28/96. Gasoline fumes not found during either site visit. Subsequent site visits being made on a routine schedule however access is not being provided by building owner. Calls to owner by Getty were not answered. Getty and Tyree have been trying to scheudle a seal coating of the basement for the past two months . Quarterly Monitoring Report (Tyree Bros)- Second March 1996 thru December 1996. Three monitoring wells onsite with quarterly sampling and weekly gauging. Groundwater at 20-22' below grade and flow to the west-southwest. March groundwater analyticals show 217ppb xylene(W-2) and ppb MTBE(W-2). October sampling shows no TOGS 1.1 Groundwater Standard exceedence. Letter from Tyree(Rennie) to Owner-4/1/97. ...a sealcoating of wall(s) in an area of the basement should be done to help retard these fumes that may be permeating through the affected wall(s). Tyree is kindly requesting a meeting with you onsite to discuss our workscope and to grant acess to the building... Quarterly Monitoring Reports (Tyree Bros) Jan 1997 thru June 1997. Three monitoring wells onsite with quarterly sampling and weekly gauging. Groundwater at 20-22' below grade and flow to the west. Groundwater sampling shows no TOGS 1.1 Groundwater Standard exceedence. Letter from Tyree Bros(Rennie) to owner-12/5/97. To date we have sent those reports (Quarterly Monitoring Reports) eclosed with the April 1,1997 letter to your attention and have not heard from you since . In order to ensure a safe environment within the basement area, Tyree kindly requests your approval to access the building to perform sealcoating of of the wall(s) . Fax from Tyree(Caputo) to DEC Tibbe-3/30/98. This fax is sent in ordert to inform you that your per your meeting with Tyree personel on December 11, 1997 the three groundwater monitoring wells at the above referenced site have been properly abandoned... . Closure letter requested. Tank Upgrade Report Tyree Org -October 1998. Reason for tank upgrade was federal EPA mandate. One pump

GETTY (Continued) **S104501334**

island located adjacent to 8th Avenue . Surrounding area is commercial buildings and residential buildings. Work performed included excavation of vent lines for assessment and upgrading of two (4000-gallon) gasoline USTs and one (4000-gallon)diesel fuel UST. Nineteen soil endpoint samples collected. Soil analyticals show 6680ppb xylene(S8 4'bg), 4930ppb 1,3,5-trimethylbenzene(S8 4'bg), 12500ppb 1,2,4-trimethylbenzene(S8 4'bg) and SVOCs in soil possibly attributed to fill material. Approximately 170.14 tons of soil were removed from site. Subsurface Investigation Report (Tyree Org)-May 2003. Reason for investigation was DEC directive . Three geoprobe borings were performed. Groundwater at 22' below grade. Soil analyticals show no TAGM 4046 Soil Cleanup Objective exceedence. Groundwater analyicals show 69.1ppb MTBE(MW4) and 124ppb MTBE(MW6). Quarterly Monitoring Reports (Tyree Org) February 2003 thru July 2004. Three monitoring wells onsite. Groundwater at depth of 24-25' below grade and flow to the west. Quarterly monitoring and quarterly groundwater sampling. Groundwater analyticals show No TOGS 1.1 Groundwater Standard exceedence for last four quarters. 3/25/05-Vought-Spill closed by Vought due to lack of groundwater exceedence, minor soil contamination and great depth to groundwater and hence lack of sensitive receptor impact(to basements). "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	3935
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	B00 - Tank External Protection - None
	F00 - Pipe External Protection - None
	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	C01 - Pipe Location - Aboveground
	I04 - Overfill - Product Level Gauge (A/G)
	E00 - Piping Secondary Containment - None
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	J02 - Dispenser - Suction Dispenser
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	04/17/1929
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	ACDANIEL
Last Modified:	05/01/2017
Material Name:	#2 fuel oil (on-site consumption)

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

BONJOUR CLEANERS (Continued) **1000265721**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	008
Tank Id:	6752
Material Code:	0013
Common Name of Substance:	Lube Oil

Equipment Records:

G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None

HUDSON DEPOT (Continued) **U003074389**

B01 - Tank External Protection - Painted/Asphalt Coating
H00 - Tank Leak Detection - None
I00 - Overfill - None
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
C01 - Pipe Location - Aboveground

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	11/01/1957
Capacity Gallons:	275
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	02/01/1995
Register:	True
Modified By:	TRANSLAT
Last Modified:	04/14/2017
Material Name:	lube oil

Tank Number:	HUD-1
Tank Id:	6746
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
E00 - Piping Secondary Containment - None
K01 - Spill Prevention - Catch Basin
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
G10 - Tank Secondary Containment - Impervious Underlayment
J02 - Dispenser - Suction Dispenser
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	10/01/1986
Capacity Gallons:	4000
Tightness Test Method:	NN
Date Test:	Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 1
Tank Id: 5135
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

H05 - Tank Leak Detection - In-Tank System (ATG)
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
C02 - Pipe Location - Underground/On-ground
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
E00 - Piping Secondary Containment - None
L09 - Piping Leak Detection - Exempt Suction Piping

Tank Location: Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 06/03/1992
Capacity Gallons: 2500
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: DMPOKRZY

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MARY BOONE GALLERY (Continued) **S104782023**

Whitman CO. As per conversation there was free floating product discovered at the property. There is a monitoring well network. It has been recently sampled and Lee will forward a summary status report to the dept. including analytical summaries within the next month. Case referred to Koon Tang. 06/08/06: This spill transferred to S.Kraszewski. - SK 08/14/06: Received a voicemail from Ira Whitman, concerning the status of the site. He gave no callback number. SK reviewed the Tank Closure Report from Fall 2001. It is evident that high levels of VOCs were detected around the fuel oil UST. Lower exceedances were also found around the gasoline USTs and the Oil/Water separator. No mention if GW was encountered; the site lies next tothe Hudson River so GW is probably shallow. No MWs were installed during the investigation. Must know the GW condition above all else at this point. - SK 08/15/06: Called Ira Whitman (732-553-4333) after he left a voicemail. He is no longer the consultant involved with this site, in fact he believes that no firm is involved at all. He was involved on a site project adjacent from this one: Dynamic Delivery was the contractor involved with the clean-up. He said this site already received an NFA. I said, based on the report, the GW condition must be established. He said it might be worth-while to review the reports from the neighboring site, which is also downgradient from this one (closer to the Hudson.) He said to contact a John Houshmand, of Clark Construction, who discovered the tanks during renovation work on the property. - SK 08/18/06: Left a message for John Houshmand (917-553-4333). - SK 08/22/06: John Houshmand called back. He gave me the contact info for Mary Boone, owner of the gallery. Gallery: 212-753-2929, Cell: 917-861-2929. She is not the property owner of the site, she only rents the space. According to John, contractor for the building and several others nearby, after the abatement of the gasoline tanks, fuel oil tank and sump pit the entire area was covered in concrete and established as the Mary Boone Gallery. He also mentioned the adjacent site which supposedly has GW wells and may be useful in characterizing the GW condition for this site. I told John I would look into this other site and get back to him, since he regularly deals with the owner. - SK 08/29/06: I discussed the site situation with JK. The site needs a GW investigation, unfortunately their is no access to the interior so the MWs need to be placed on the sidewalk next to the former gasoline USTs and oil/water separator pit. Also, a soil boring next to the gasoline fill port will be needed. I called John Houshmand (917-553-4333) and explained what work would need to be done. I also asked him for the property owner's contact info since it is not on file. He will find out, plus he asked about other consultants to do the work since The Whitman company had a falling out with Mary Boone. I said to convince her that he seems like a reputable company based on the report. Letter was sent out asking for two MWs, a soil boring and sub-slab soilgas sampling. Property owner is a Samuel Weinberg. - SK 11/09/06: Reassigned from Stephen Kraszewski to Chanda. (Chanda) 01/02/07:Kartik Chnada of DEC sent a letter to Property Owner(Mr.Samuel Weinberg), requring that an additional investigation of GW and additional monitoring wells at the site. A work plan is mandated by 03/02/07 for approval. 01/10/07: Chanda received an e-mail from John Houshmand, Clark Construction Corp.He said that the RP will be retained Long Island Analytical Laboratories(LIAL), Inc. to perform this work. 2/27/07: Chanda received a limited subsurfsce investigstion work plan prepared by LIAL dated on 2/26/07. 2/28/07: Chnada reviewed the limited subsurface investigation work plan. on

MARY BOONE GALLERY (Continued) **S104782023**

2/28/07, the Department conditionaly approves this work plan. On 2/28/07, Chanda sent a letter to RP(Samuel Weingberg)and his consultant (John Hushmand), Michael Veraldi (LIAL), requiring that an investigation summary report be submitted to DEC for review by April 16, 2007. 4/19/07: Chnada received a phone call from Michael Veraldi, LIAL concerning the status of the site. He explained to me the cause of the delay on the investigation work report. 4/23/07: Chanda received a letter from Michael veraldi, LIAL regarding an extension to complete the approved work plan at the site. 4/24/07: Chanda sent a time extension approval letter to the RP(Samuel Weingberg) and his consultant (John Hushmand), Michael Veraldi (LIAL). An Investigation Summary Report must be submitted to the Department by May 4, 2007. (Chanda) 5/24/07: Chanda called John Hushmand (Clark Construction Corp.)and Micheael Veraldi (LIAL) regarding the investigation Summary Report and present site status. Micheal told me all work has been done and he is wating for analytical results. The report will be submited to DEC for review by 5/31/07. 6/6/07: On 6/5/07, Chanda received a Limited sub-surface site investigation report prepared by LIAL dated May 30, 2007. 6/8/07:Kartik Chanda of DEC reviewed the imited sub-surface site investigation report regarding this spill.
The soil samples, grondwater samples and soil vapor samples showed that results is not exceed our NYSDEC and NYSDOH guideline. Chanda discussed with Joe Sun (NYSDEC) regarding the results of soil, groundwater, and soil vapor samples. Based on the information presented to the Department DEC closed this spill case. 6/11/07: Chanda sent a NFA letter to Samual Weinberg, Weinberg Properties and his consultants (John Houshmand, and Miclael Vrraldi) regarding closed this spill case. "

BROWNFIELDS:
Name: FORMER GETTY SERVICE STATION
Address: 239 10TH AVENUE
City,State,Zip: NEW YORK, NY 10001
Program: BCP
Site Code: 488150
Acres: 0.130
HW Code: C231086
SWIS: 3101
Town: New York City
Record Added Date: 10/21/2013
Record Updated Date: 01/13/2014
Update By: BXANDERS
Site Description: "Location: The site is located at the northwest corner of the intersection of West 24th Street and 10th Avenue. The site is approximately 0.13 acres in size. Site Features: The site currently is occupied by a non-operating gasoline service station, including a recently vacated 1-story commercial building last used as a convenience store. Current Zoning and Land Use: The subject property is zoned as M1-5, which allows for commercial and mixed-use buildings. The intended use of the site is for residential and commercial. The site is bounded directly adjacent by an 11-story residential building to the north, a car wash and mixed-use (residential and commercial) building to the south, and across 10th Avenue 4- and 6-story mixed-use buildings and a 20 story residential building. The site is approximately 100 feet away from the High Line Park, which overlooks the site to the east, separated by a one-story art gallery. Past Use of the Site: The site was operated as a small portion of a gas light fixture manufacturing facility that occupied the eastern third of the block in the 1890s. The site then operated as a gasoline filling station from at least 1930 until recent decommissioning in 2013. Since 1988 the site had 8 spill numbers assigned to it, out of which one spill number still remains open. In 1998 twelve 550-gallon gasoline USTs, three 4,000-gallon gasoline USTs, one 275-gallon fuel oil UST, and two fueling pump islands were removed and 1,853 tons of impacted soil was removed. Post excavation soil sampling results identified concentrations of volatile organic compounds (VOCs) exceeding NYSDEC Recommended Soil Cleanup Objectives (RSCOs). Petroleum impacted groundwater was also detected on-site which still remains. Site Geology and Hydrogeology: The geologic conditions at the site consists mainly of fine to medium grained sands mixed with gravels, boulders, construction debris and interbedded layers of silt down to 25 feet below grade (fbg). The Site s topography is generally flat and the surface elevation is approximately 43 feet above mean sea level. Groundwater occurs within the unconsolidated soils at depths ranging from approximately 7 to 10 fbg; based on historical gauging data, there appears to be an appreciable degree of seasonal variation in the direction of groundwater flow at the site, periodically fluctuating between south, southwest and west. "
Env Problem: "Nature and Extent of Contamination: Based upon investigations

FORMER GETTY SERVICE STATION (Continued) **S106703285**

conducted to date, the primary contaminants of concern for the site include petroleum hydrocarbon related volatile organic compounds (VOCs) compounds. Soil: Per 1998 lab results for the end point soil samples collected from 10 feet below grade (SW-7) the highest benzene concentration was detected as 44.5 ppm which exceeded the soil cleanup objective (SCO) for commercial use (to 44 ppm). Other SCO exceedances were ethylbenzene at 198 ppm (restricted residential SCO = 41 ppm), xylene at 1,990 ppm (industrial SCO=1000 ppm), toluene at 479 ppm (resrricted residential SCO=100 ppm) and MTBE at 124 ppm (restricted residential SCO= 100 ppm). Groundwater: Since 2001 twelve (12) monitoring wells have been installed on and off-site (3 on site and 9 off-site) related to the current open spill. Per August 2012 (latest available) monitoring data the highest on-site concentrations detected were: benzene (32 ppb), ethylbenzene (139 ppb), xylene (80.5 ppb) and MTBE (18.3 ppb). Groundwater standards have been exceeded for all of the above analytes. Site related soil vapor and indoor air samples never been analyzed. Special Resources Impacted/Threatened: The site is located in the urban area and Fish and Wildlife Impact Analysis is not warranted. "

Health Problem: "Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available."

DEC Memo:	"SEE ALSO 86-05564, 95-11782, 98-08740, 95-13588. 4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel. 4/19/04 Reassigned from Rommel to K Foley. 5/24/04 Tibbe received voicemail from Curt Schmidt, Fleming Lee Shue (212-675-3225). Replacing AKRF. 5/27/04 Added diesel and #2FO to material spilled to address spills #9808740 and 9511782. Spoke to C. Schmidt. Will set up

MENDON LEASING (Continued) **S104275477**

a site meeting next week. 555 W 23th St(spill #0306399), the Tate building, is adjacent to Mendon property which has a system installed on the first floor (no basement). 6/3/04 Set up meeting with A. Fleming for Monday, 6/7. A. Fleming (office 212-675-3225, cell 917-885-1475). 6/7/04 Met with A. Fleming. System located inside Tate has not been in operation. Arnie needs to look into system manufacturer data to see if they can make changes to the system. Wells haven't been sampled since AKRF lost the job. Will arrange to have wells sampled. 7/15/04 Received call from C. Schmidt, FLS. Wells will be sampled 7/19-7/20. FLS still looking into making changes to existing system. 9/21/04 Spoke with Mohammed Ahmed, Fleming Lee Shue (917-612-6018). He was previously with AKRF. Would like to present all data and propose NFA. He will need to FOIL the file to get AKRF data. 10/13/04 Received summary from FLS proposing closure of site. Background: Site is currently a luxury apartment building with art galleries on the ground floor. The site was historically used for freight transportation and warehouse facilities. The Hudson River is approx 0.25mi to the west. Site was mainly used as a truck rental, fueling and maintenance yard. Hertz formerly occupied the site and built a two-story garage in 1963. Hertz installed six 550gal gas USTs in the adjacent parking area located along 24th Street. Hertz also installed a gas distribution system with 4 dispensers. In 1965, Hertz installed four additional 550gal diesel USTs and a separate dispenser. One 7500gal heating oil tank was installed in the SW portion of the building. CMCR, LTD acquired the site from Hertz and also used the site as a truck rental/leasing facility. In 1985, the site was leased to Mendon Leasing Corp. Mendon reported four spills, 9511782(diesel), 9513588(gas), 9605688(gas), 9808740(#2FO). Costco Wholesale purchased the site in 1998 in anticipation of zoning that would allow a retail development at the site and closed the fuel and gas tanks in place. In July 2000, the Related Companies purchased the property and built the current apartment building that covers the site. Tank testing: In July 1990, Mendon was issued an NOV from the FDNY for failing to do the 10yr tightness testing on the six gas tanks. In March 1991, Mendon has all the gas and diesel tanks tested. The gas tanks passed but the diesel tank failed. The diesel tank was repaired and passed retest. In 1993, the heating oil tank was tested and passed. In 1995, the diesel tanks were tested again and failed. The contents were emptied in 5/96 and filled with polyurethane foam. In Feb 1997, the gas tanks were also emptied and filled with water. Previous Investigations: Several invetigations were conducted between 1993 and 2001. ES Engineering did work on behalf of Greyhound Lines. ERM Northeast did work for DEC. AKRF did work for Costco and Related. Soil and GW has been impcated by on-site releases of petroleum and possibly also off-site sources. Areas within the parking lot on the north side of the former two-story garage building and inside the building, in the vicinity of the heating oil tank, contained free product in soils and GW. Free product in the former parking lot ranged from 0.08 to 1.63'. Free product found inside the former garage building was as thick as 4'. Dissolved-phase VOCs were also detected in GW as high as 5408ppb. No SVOCs were detected. Soil/GW interface is located at approx 8'bgs, flowing west toward Hudson. GW is not tidal. Bedrock approx 63'bgs, sloping S-SW. Remedial Actions: In Dec 1999, four 550gal diesel USTs and six 550gal gas USTs were removed from beneath the open parking lot. The heating oil tank was removed in Oct 2000. Approx 1000 tons of grossly contaminated soils were excavated and disposed of. The free product appeared on the

MENDON LEASING (Continued) **S104275477**

groundwater surface and removed with absorbant pads. The excavations were left open to monitor for free product. No additional free product was observed and excavations were backfilled. No post-ex sampling was completed. The Department issued a letter on 2/12/01 with comments. A remedial workplan consisting of an in-situ remediation for soil and GW using SVE and bioremediation was presented and approved by the Dept. In March-April 2001, six geoprobes were completed. NMW-1 showed total BTEX in GW at 275400ppb, NWM-2 at 156200ppb, and NMW-4 at 1330ppb. Insufficient GW was recovered from NMW-3 and NMW-5. NMW-6 was non-detect. In October 2000, an SVE pilot was performed. An underslab SVE system was designed and installed to remove residual VOCs and to add atmospheric oxygen to allow bioremediation to occur. Air extracted from below the slab was carbon treated before venting to the roof. A vapor barrier was installed beneath the slab. Operation of the system began August 2002 and operated thru August 2003 for 1615hrs. VOCs, carbon dioxide, oxygen and moisture levels were monitored before the input and at the output of the carbon canisters. System inspection and monitoring were conducted daily for the first two weeks and then weekly inspections were made. At startup, VOCs were measured at 20-50ppm. Concentrations dropped from the initiation in August 2002 thru November 2002 when the system was stopped for seven weeks due to equipment problems. Upon restarting the system in Jan 2003, a rebound was measured with VOCs rising to 60ppm. The system was operated for two weeks with a second 4 week idle period(1/7/03-2/25/03). After this rest period, the rebound did not occur. The system operated for a period of four weeks with a continual decrease of VOC concentration. Equipment failure again shut the system down for five weeks(3/27/03-5/1/03). A slight rebound to several ppm occured when the system restarted. The system continued to operate thru June 2003 with day-long shutdown for maintenance with no rebounds observed. Levels of VOCs in the extracted air in June 2003 were zero. Between July 2003 and July 2004, the SVE system was out of service due to major damage in the main section of the blower. In August 2004, the SVE blower and motor were downsized to a 10HP regenerative blower capable of 200 scfm at 80 inches of water. VOCs were measured two days after startup which detected levels of VOCs in extracted air between 2 and 5ppm, indicating that no significant VOCs are being extracted from beneath the building. A total of 10 MWs exist on site. Four(MW-3, ERM-4, MW-14, MW-15) are currently located on the sidewalk. The other six(NMW-1 to NMW-6) are inside the Tate building. Max total BTEX detected in MW-14 at 1990ppb(7/16/02). Max MTBE detected in NMW-2 at 410ppb(8/8/03). By the concentrations of MTBE detected in upgradient wells, MW-14 and MW-15, there may be an off-site source. (There are two gas stations upgradient at 24th St and 10th Ave.) Concentrations of BTEX have been decreasing in source areas. It appears that removal of grossly contaminated soils and free product at the time of the UST removal in 2001 eliminated the primary source of GW contamination. Groundwater samples to be collected 10/16/04. 11/1/04 Spoke to Mohammed Ahmed, FLS (212-675-3225). Approx 3 of free product(gasoline) was detected in MW-14 (sidegradient of tank field) on 8/17/04. One week later, there was no product detected. Sampled again on 10/14/04, no product detected. He suspects that it is from an off-site source. There is a LukOil Station at 239 10th Avenue (open spills #9810383, 9707190). Oct 2004 monitoring report to be submitted this week. 11/16/04 Received status update (FLS, 11/11/04). GW sampling conducted 10/12-10/13/04. No samples were collected from

MENDON LEASING (Continued) **S104275477**

MW-15 located on the sidewalk of 24th St and NMW-1 located inside the Buia Gallery on 23rd St. MW-15 was backfilled during construction of the Tate Bldg. NMW-1 was inaccessible due to an exhibit. BTEX ranged from ND to 1086ppb(MW-14). MTBE ranged from ND to 130ppb(NMW-2). Off-site sources of contamination may be contributing to site conditions. However, it is not clear that it is not from onsite sources. 12/7/04 Issued letter requiring additional delineation around MW-14 and at former upgradient well location MW-15. Report to be submitted by 3/15/05. 12/20/04 Spoke to M. Ahmed, FLS. Will propose re-installation of upgradient MW-15, one well further upgradient (to confirm possible off-site impacts), and one west of MW-14(sidegradient). 12/29/04 Received proposal from FLS to install three additional MWs. 12/30/04 Issued letter approving workplan. 2/18/05 Received report for the installation of MW-14, 15A and 17. According to the report, there appears to be an off-site source on the northwest portion of property along W24th St. Concentrations of BTEX increased from 1086ppb to 2067ppb in MW-14. Report also states that the LukOil station may be contributing to the MTBE concentrations across the site. 3/15/05 Spoke to Mohammed Ahmed, FLS. Requested two Geoprobes across W 24th St to eliminate the Motor Freight Station and Auto Repair Shop as potential sources. 8/15/05 Spoke to M. Ahmed. A. Fleming spoke to NYSDOH at K. Tang's recommendation. NYSDOH requested subslab and indoor air samples. Results expected next week. FLS proposes to use this data to support closure. Explained that there is still dissolved which remains on the corner of the property. Agreed to wait for results to decide next steps. 11/29/05 Email to A. Fleming and M. Ahmed, FLS, provided comments on the October 17th request for spill closure. Regarding the indoor air and soil gas sampling which was performed, it is unclear if the concentrations detected within the building are due to any background interferences within the building. Directed FLS to conduct a full inventory as directed by the NYSDOH guidance for evaluating soil vapor intrusion. An additional round of indoor air samples must be taken at least 24hrs following the removal of any possible VOC sources. Results will be forwarded to NYSDOH. The Departments will determine further action for vapor mitigation, if required, following review. The groundwater data collected to date has been sporadic with five sampling rounds completed within the last three years. Quarterly groundwater sampling and monthly gauging must be completed and results submitted to the Department. Groundwater direction must be confirmed. The groundwater concentrations at MW-14 were as high as 4340ppb total VOCs in the last sampling round in January and have historically been fluctuating. MW-17, which was recently installed west of MW-14, also had readings of 2777ppb total VOCs. The Department requires additional wells be installed across W 24th street, north of MW-14 and MW-17, and west of MW-17. A proposal to remediate the contamination in this area will be required. It is expected that the additional delineation, groundwater and indoor air sampling results, with scaled site and contour maps, will be submitted by the beginning of February. 4/20/06 Requested update from M. Ahmed of FLS. 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 7/06/06 Requested update from A. Flemming of FLS. Mr. Flemming and I spoke about the history of the site. He still believes the impacts to groundwater at wells MW-14 and MW-17 are from off-site contamination (possibly Lukoil site on 10th Ave and 24th Street). These wells are supposedly up-gradient side of the site. I requested Arnie send me the latest data on the site including

MENDON LEASING (Continued) **S104275477**

groundwater sampling and indoor air sampling data. - JAM 7/25/06 Spoke with A. Flemming a number of times. I do not believe a second round of indoor air sampling was conducted, however a vapor barrier is in place. They conducted site-wide groundwater sampling in May 06. Mr. Flemming believes the latest GW results show that off-site sources are contributing to the GW contamination along W24th Street. He will submit a report of the wells that were sampled (not all were sampled because they were inaccessable). I requested that he state his justification for spill closure in the groundwater sampling report. 10/16/06 Received a call from Steve Panter of Fleming Lee Shue (212) 675-3225. He said the report is ready and will be submitted this week. - JAM 11/14/06 Received the report dated October 20, 2006 via email. The report summarizes all the groundwater analytical data since April 2003. FLS makes the argument that off-site sources are contaminating the sidewalk wells. A summary of all the off-site sources is included as well as a two part technical explanation for the difference between groundwater contamination in the sidewalk MWs and on-site MWs. The first part is a multivariate analysis, and the second is a comparison between Benzene and MTBE. The report is uploaded into edocs. - JAM 11/22/06 Received SVE System Data and Indoor Air Quality Data Summary Report from FLS. Report uploaded to eDocs. 01/22/07 Issued a letter to Greg Gushee The Related Companies, Inc. 60 Columbus Circle New York, NY 10022 with the NYSDEC's position on the FLS report. Chris Magee in Central Office reviewed the report and based on the material presented he does not concur with FLS' conclusion that off-site sources are contributing to the contamination found in the sidewalk wells. The letter states that The Related Companies, Inc. is responsible to monitor and remediate the site. Groundwater must be gauged and sampled quarterly and based on the results the NYSDEC will determine if a remedial strategy is necessary. The letter is uploaded into edocs. - JAM 8/21/07 Reviewed FLS letter submitted to the DEC on April 13, 2007 in response to DEC comments sent on 1/22/07. FLS believes that contamination found in off-site wells on West 24th Street stems from a different source. I sent the letter to Chris Magee in Central Office for review. - JAM 9/06/07 Sent email to Steve Panter at FLS. The email states that, the data are inconclusive and do not prove that an off-site source is affecting the groundwater in the monitoring wells in the sidewalk... The Department cannot approve spill closure at this time. A round of groundwater samples should be collected from all wells to obtain up-to-date groundwater quality data. Results should be submitted with appropriate recommendations for further monitoring and/or remedial activities if necessary. - JAM 1/18/08 Received an email from Jim Harrington in Central Office. Steve Panter from FLS contacted Mr. Harrington stating that they will do another round of sampling but he wants assurance that after the next round of GW sampling the spill case will be closed. Mr. Harrington said he will review the spill case and material forwarded by Mr. Panter. Afterwards, he will contact Region 2 staff for further discussion before responding to Mr. Panter. - JAM 9/22/08 Reviewed the Groundwater Sampling Report/Spill Closure Request submitted by Flemming Lee Shue dated May 12, 2008. All on- and off-site monitoring wells were sampled in February 2008. Groundwater monitoring results show no signicant change in contaminant levels in any of the on-site or off-site wells. The sidewalk wells continue to show exceedences for VOCs in groundwater (i.e. 748ug/L total VOCs in well MW-14 and 829ug/L total VOCs in MW-16) however, the exposure risk from these

MENDON LEASING (Continued) **S104275477**

contaminants is low. The groundwater monitoring report is uploaded to eDocs. Senior technical staff in Central Office supports closure of this spill without meeting recommended objectives because of the low risk of exposure. This spill case was closed and a NFA letter was issued. NFA uploaded to eDocs. - JAM"

Remarks: "CALLER FOUND .7 FEET OF GASOLINE IN A TWO INCH GROUNDWATER MONITORING WELL. LOCATION IS A TRUCK LEASING COMPANY. MARK TIBBE NOTIFIED OF RESULTS. ADDITIONAL MONITORING WELLS TO BE INSTALLED AND SIX TANKS ARE TO BE PULLED."

DEC Memo:	"3/12/19 - Obligado - Desk Duty - Called Riteway. Left message. 3/13/19 - Obligado - Tank test was performed after a tank cleaning. Not holding pressure. The tank had a hole on the tank of the tank. A temp tank has been set up. TTF Letter Sent. 03/20/19 - Lakhani Riteway Paul informed that the 3000 gallons AST was emptied. Contaminated debris surrounds the tank. A proposal is being sent to the owner. 07/10/19 - Lakhani DEC Lakhani inspected the tank on 05/17/19 and required Riteway to install four (4) boring in the tank room: one (1) in each corner of the tank. Borings should extend to either groundwater, bedrock or the first depth where no further impact is noticed; whichever comes first. Samples should be collected and analyzed. On 07/09/19, Paul informed that the tank has been removed. 07/11/19 - Lakhani Sample results: 1,2,4-trimethylbenzene 4600 ppb(sample 1). DEC Lakhani inspected the site on 07/10/19. The tank was removed. Four (4) test pits were dug using a hand auger. Results from the samples collected in each corner of the tank room. The sample collected from the southwest corner showed a few minor hits slightly above UUSCOs. Due to the proximity of foundation of the building, DEC Lakhani authorized backfill. Riteway will complete the concrete slab and encapsulate. 08/22/19 - Lakhani The slab was restored in the tank room. The spill has been addressed. Spill is closed."

Tank Info:

Tank Number: 001
Tank Id: 11818
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
G04 - Tank Secondary Containment - Double-Walled (Underground)

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 12/01/1979
Capacity Gallons: 2500
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 07/08/2020
Register: True

SWIS: 3101
Town: New York City
Record Added Date: 04/13/2016
Record Updated Date: 03/16/2021
Update By: HMDUDEK
Site Description: "Location: The site is located in a mixed-use area of the West Chelsea section of the Borough of Manhattan. The site is comprised of five tax lots (approx. 33,671 SF) identified on New York City tax maps as Block 694, Lots 2, 5, 60, 61 and 65. The site is bounded to the north by West 23rd Street, to the east by 10th Avenue, to the south by West 22nd Street, and to the west by 11th Avenue. Lots 5, 60, 61, and 65 were accepted into the Brownfield Cleanup Program on August 4, 2016 (BCA #C231101). The BCA was amended on October 27, 2017 to also include Lot 2. Site Features: Currently a multi-tenant high-rise residential apartment building with ground floor commercial space is under construction. Current Zoning and Land Use: The site is currently zoned C6-3A, C6-3 and M (Commercial, Mixed Buildings and Manufacturing), which allows for residential use. Lots 5, 60, 61, and 65 are currently operating as an active U-Haul facility. Lot 2 is currently vacant. Adjacent properties include mixed use

555 WEST 22ND STREET (Continued) **S118950495**

commercial/residential to the north, industrial/manufacturing and commercial/residential to the east, office space and commercial/residential to the south and the West Side Highway to the west. Past Use of the Site: Historic site uses included: lumber yard, iron works, garage, automotive repair services, and storage and dispensing of petroleum products. It is unknown whether U-Haul continued to dispense gasoline after taking title to the property in the late 1970s/early 1980s. Currently, no vehicle repair or fueling takes place onsite. Prior use of the site for petroleum storage and fueling appear to have historically impacted both soil and groundwater. Three historic spills where noted to be associated with the site, all historic spills have been closed out. A recent spill was reported adjacent to the site, (northeast) in a sidewalk area, this spill is currently open. Site Geology and Hydrogeology: The site incorporates approximately 0.77 acres of fairly level land situated in the City of New York, New York County, New York. The site is mapped on the Jersey City, NY-NJ Quadrant 7.5 Minute Topographic Map, published by the United States Geological Survey (USGS). Review of the topographic map indicates that the site is located approximately 7 feet above sea level (NAVD 88). The site subsurface consists of an approximate 8-9 foot thick layer of historic fill material, followed by sand and gravel deposits. Depth to water is approximately 8-9 feet below ground (ftbg). Based on the proximity to the Hudson River, groundwater is expected to flow to the west. The site is located in FEMA flood zone AE, also known as the 100-year floodplain. "

Env Problem: "Remediation at the site is complete. Prior to remediation the contaminants of concern included certain metals, volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs). Remedial actions have successfully achieved the restricted residential soil cleanup objectives, which allow for the site s residential and commercial use. Endpoint samples collected and analyzed across the site confirmed the success of the remedial action. The site requires an institutional control, in the form of an environmental easement, and engineering controls in the form of a soil cover system. A Site Management Plan (SMP) was completed to manage remaining contamination at the site and includes an Institutional and Engineering Control Plan that identifies all use restrictions and engineering controls for the site and details and steps and media-specific requirements necessary to ensure these controls remain in place and effective."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site."

DEC Memo:	"Sangesland spoke with Roux Assoc. Tank excavation with some spillage around tanks. (Tanks had been previously abandoned in place). Now tanks are being pulled. Sangesland asked for several end point soil samples taken from tank grave after removal. Test for VOC & SVOC. 3/16/2005 Sangesland reviewed a report from Roux Assoc. dated 3/9/05 On 2/18/05 Roux collected 6 post-ex samples. One per each side & 2 bottom VOC's - All samples contained low levels of VOC's, but they were ALL BELOW RSCO Stds. SVOC's - Some minor Hits on PAHs consistant with historical fill levels. Results show some contaminants exceed regulatory standards. Samples taken on removed (waste) soils showed much higher VOC & SVOC levels. Roux conclusion says that the contamination source has been removed and the site should be closed out. Based on the soil sampling work performed on the site and the report prepared by Roux Assoc., the NYSDEC agrees with the conclusion and the spill case is closed with: No Further Action - Does Not Meet Standards "
Remarks:	"REMOVING TANK, JUST AN ODOR IN THE SOIL: NOT SURE HOW TO MOVE FORWARD WITH PROJECT:"

DEC Memo:	"Sangesland sent contaminated soil letter Curt Schmidt said that Mark Tibbe knows about a major spill site just upgradient from this site. 2/5/03 - TRANSFERRED FROM SAWYER TO ROMMEL 3/1/04 Reassigned from Rommel to K Foley. Spill Remediation Plan received 12/22/03 for removal of four 260gal gas USTs, one 500gal gas UST, and one 500gal no. 2 fuel oil UST. Site under development but once contained three buildings. A former auto service and plastic manufacturing existed on

555 WEST 23RD ST (Continued) **S105999938**

site. Five USTs from NW corner were removed 9/29/03 (four 260gal gas USTs and one 500gal gas UST). Soil excavation was postponed due to safety concerns. Will excavate and direct load for disposal. A minimum of four post-ex samples will be collected at PID hot spots on each sidewall. DTW is 6'bgs and therefore a bottom sample will probably not be feasible. If there is potential for structural damage to the adjacent building, two soil samples will be collected from that sidewall. Two samples will be collected from sidewalls greater than 20' in length. Analysis by VOCs (8021) and SVOCs (8270). Spill #9704542 was previously reported for a fuel oil release from UST. Scaled site map with former tank locations/hot spots and Phase I and II reports. There have been site investigations and proposed remediation plans submitted for 543-547 West 23rd St (spill #8605848). There is documented fuel oil and gasoline contamination of groundwater associated with sites to the east that have encroached upon the site. Mendon Leasing, 527 W 23rd file(#9605688,9808740,9511782, 9513588). 3/22/06 Reassigned from Foley to Tang. (KMF) 4/3/06: Reassigned to Andersen. Three sources of contamination: Fuel oil leak from a UST in northeast corner. Gasoline leak from five USTs in northwest corner. Gasoline groundwater contamination from adjacent Mendon Leasing site. All six tanks were removed by Fleming Lee Shue (FLS). The tank closure report was not received. Spoke with FLS and they will resend a report that was sent to Albany. 4/7/06: Received and reviewed tank closure report. Soil was excavated from three areas of contamination. Residual SVOC contamination from urban fill and VOC contamination from the adjacent spill site is present. The site will be redeveloped with a vapor barrier. NFA letter sent. "

DEC Region:	2
DER Facility ID:	70246
DEC Memo:	"12/06/05: This spill transferred from J.Kolleeny to S.Kraszewski. 02/06/06: This spill transferred from S.Kraszewski to Q.Abidi. 03/17/06: SK Reviewed Site Assessment Report completed on Nov. 30, 2000 by State Environmental Services, Inc. One 30K tank, which stored #2 Fuel Oil was removed. Six post-excavation samples were taken from the pit and submitted for laboratory analysis. About 900 tons of soil was removed and disposed of. All soil samples were tested for VOCs and SVOCs. None of the samples detected any VOC contaminants. All samples recorded exceedances of the same SVOC compounds: Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene. The concentrations ranged from 1950 ppb to 498 ppb, which are relatively low. Four of the six samples had SVOC exceedance concentrations of 1000 ppb or less. No samples were taken from the fill lines or fill port. Report lacks a site plan with area of excavation and sample locations. No lab analysis summary table provided either. SK spoke with Chris Sawyer from NYCHA Fuel Oil Remediation. I informed him that they would need to take soil samples from the former fill lines and fill port area. Chris said that Harborview Houses would be included when performed additional soil borings. Sent Chris Email requesting additional soil borings along the fuel lines and next to the fill port. - SK 04/04/06: This spill Transferred from Q. Abidi to Koon Tang. 07/03/09: J.kann - spill transferred to J.Kann. Site assessment report submitted on 2/5/07. Investigative work plan submitted in March 2009. Additional wells to be installed to evaluate groundwater at the site, which is acceptable. One comment was sent on 7/3/09 to GF - A second round of groundwater sampling is proposed one

CHELSEA HOUSES -NYCHA (Continued) **S103478255**

month after the initial sampling is performed. What is the reasoning behind this? Typically two or more months is used. 09/15/09: J.kann - Sampling to be performed two months after initial sampling. Work Plan approved via email on 7/6/09. 2/4/11: J.kann - SAR received on 12/3/10 and edoced. 5/24/12: J.Kann - SAR under review. NYCHA requests closure. Will review entire file for Chelsea Houses. 6/13/12: J.kann - requested in an email of 5/30 that NYCHA gauge the wells at the site before I present to the closure panel. NYCHA sent well gauging data and photo on 6/12 indicating that a product sheen is present in MW5. A response email was sent to NYCHA on 6/13. 10/17/12: J.Kann - requested a follow-up from NYCHA regarding whether or not there is measurable product in MW-5 and/or if a absorbent sock is still present. 5/17/13: J.kann - followed up with NYCHA. They will go out and gauge MW-5 the weeek of May 20. 8/26/13: J.Kann - visited site on July 31st. Observed the removal of sock and gauging of on site wells. No product in all wells. Sock visibly clean (photo). NYCHA indicated that the sock has been clean for several months. Based on observations, the spill will be considered for closure. 8/27/13 J.Kann - completed review of file. Spill closed. Following summarizes site: -30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000 -investigation done in 2006 along fill lines and by fill port (DEC request) -some PAHs detected in grab groundwater sample in 2006 -5 permanent wells installed in 2010 -All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences) -Slight sheen subsequently detected in MW-5. Absorbant sock placed in well. -Minor impacts on sock in 2012. -No oil detect on absorbant sock in 2013. -Confirmed no product sheen in well during site visit of 7/31/13. NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE/SANGESLAND 12/10/2002 Sangesland reviewed a report prepared by David Winslow of ATC Associates Inc (212-353-8280). Report states that contamination was found around a buried 1000 gal tank under the floor of the building. The tank was cleaned out and excavated around. Because of foundation issues, the tank could not be removed and not all of the contaminated soil could be removed. Based on the soil conditions, Sangesland requested goundwater samples from the area. ATC took four groundwater samples in the area of this tank. GW is at approx 8 ft below the cement floor level. 3 of 4 samples are clean. One has some VOC hits just over 8020. Based on the location and the inability to excavate further, and that the surrounding water samples were clean, we can conclude that the contamination is localized and not spreading. Spill closed "

DEC Region:	2
DER Facility ID:	24612
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 6/8/05 - Project transferred to TLGibbons in Central Office, Albany 8/16/05 - Spoke with Brenden Keany, Mutual Redevelopment Houses, Inc., (212) 675-3200. Spill reported 5/23/96 by CDM during removal of twelve (12) 20,000 gal. #2 and #6 fuel oil USTs. The large fuel usage was for a cogen plant which generates electricity for ~3,000 people. After removing tanks and cleaning, went to dual fuel system, reinstalling only six 20,000 gal. #2 fuel oil USTs. Spoke with David Marabello (732-225-7000), CDM project manager during spill. He said that they excavated to the lateral and vertical limits possible, using shoring, without compromising structure of building. Southern portion of excavation encountered bedrock. Sixteen post-excavation samples were collected and evaluated for VOCs and SVOCs. All samples greater than 10 feet bgs. Elevated levels of VOCs and SVOCs were encountered in several samples, hovever, according to 10/2/98 CDM tank closure report, levels not indicative of gross tank failure, rather indicative of chronic spills over time. While some sporadic elevated levels of petroleum remain, everything that was reasonable to be done, was done. Close spill. "
Remarks:	"OLD TANK APPEARED TO HAVE FAILED. TANK IS BEING REMOVED, CONTAMINATED SOIL WAS FOUND DURING REMOVAL PROCESS. INVESTIGATION IS UNDERWAY AT THIS TIME."

DEC Memo:	"Sangesland spoke to DEP rep. Apparently several days ago this building had a problem with an oil leak in it's basement. DEP was notified but not DEC. Building Manager is Neil at R.A.Cohen & Associates (212-972-5900 ext 203) Neil said that he has had some work done in the basement on the tank, but he did not know any details and he did not know if the problem was solved. Unless he can describe exactly what happened to the tank and what work has been done, a site visit may be required to confirm that the floor is clean and the repairs have been made. 12/6/05 - Raphael Ketani. I tried calling Neil Gevertz, the building manager, at the above phone number, but

APT HOUSE (Continued) **S107489138**

could only leave a voice mail. He has a new direct phone number: (212) 835-9530. I left a voice mail message there, also. 12/8/05 - Raphael Ketani. Mr. Gevertz called me back. We arranged a site visit on 12/12 at 2PM. 12/12/05 - Raphael Ketani. I met Mr. Gevertz (management company rep.), Mr. John Masini, Vice President M.M.I. Mechanical Inc. (718) 449-4166 (boiler and tank maintenance), and Bill Herrera, superintendent of the building, at the site. The boiler room was fresh painted and dry with no odors. There were no cracks in the floor. No stains were visible on the floor, or on the piping. The spill had been called in due to a defective valve. I saw the replacement valve. The valve appeared to be installed properly. Next, we went to the boiler room. The boiler room showed no signs of spills. There was a new oil pump and assembly on the boiler. There were no odors. Lastly, I checked around the vent and fill pipes. There were no stains. Based on the inspection, I am closing the case. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 4/23/2004 Sangesland spoke to Mark at PTC. He said PTC was hired to clean out a tank. During this cleanout a small hole was found. The owner told PTC to take the tank out. Tank was aboveground and wrapped in concrete. Contaminated sand was found in the area behind the concrete wrap. The wrap & contmainated material was removed and so was the tank. Floor under the tank appears in good condition. Clean up should be complete, but Mark will need to conduct one more site visit to comfirm cleanup is complete. 4/29/04 - Sawyer - Spoke to Letty of the management company and she is going to try to obtain the work and disposal documentation for closure. 5/10/04 - Sawyer - Letty of Hand on management sent the receipts from PTC for the removal and disposal of old tank as well as clean up and removal of old fill lines. 17 55 gallon drums of debris for legal disposal. No further Action. Closed."

DEC Memo:	"12/13/13-Zhune spoke to Rob Hill from Riteway. He said the building have two 275 gallons UST. #2 fuel oil conected each other in the basement. The first tank has a leak on top of the tank and spilled 5 gallons of oil onto the floor. Floor is a concrete floor. The oil company came an spread speedi dry on the spill and sent Riteway to check the tank. As per Rob they will replace the tank on Monday 12/16/13 and they will clean the spill underneath the tank. He also said there is no odor in the building. 12/13/13-Zhune spoke to Jimmy (Porter)347-829-0389. He said one of the two tanks have three holes on the top of the tank and spilled oil any time that there is a delivery. Today there was a delivery and oil started coming by one of the big holes. The oil company stopped the delivery and sent Riteway to check the tank. There is oil on the floor covered with speedi dry. He could not say an estimate amount. There is no odor in the building. Kumar Patel inspected the site. 12/13/13-Hiralkumar Patel. alternate address: none no PBS record found. other spill # 0400657 was reported on 04/20/2004 as contamination was found during removal of 1,080 gal #2 fuel oil tank. as per invoice from PTC (dated 04/14/04), they removed seventeen (17) 55-gal drums for legal disposal. as per DEC Sangesland, PTC found contaminated sand in the area behind the concrete wrap of the tank. PTC removed concrete wrap and contaminated material. floor underneath the tank was found in good condition. case closed. 4:00 PM:- visited site. inspected

BUSINESS AT LOCATION (Continued) **S106385907**

basement. no odors noted in basement. site has two 275 gal ASTs on legs, located in southeast corner of the site, along W 14th St. the two ASTs are interconnected at top. the fill line is connected to the tank which is along the foundation wall (tank #1). vent line is connected to tank away from the foundation wall (tank #2). as per one of the technician, who was at site working on sprinkler system, oil started spraying from top of the tank #1, through corrosion holes. observed a pit near the tanks. as per technician, no oil went into pit, but flowed to other side of tank room. found speedy dry on floor. no active leak found from tanks' bottom. 205 LLC. **property owner** c/o Sir Realty Management LLC. **management company** 381 Park Avenue South, Suite 1001 New York, NY 10016 Attn.: William Radmin **property manager** PH. (212) 645-4612 (O) (646) 253-0920 (C) email: wradmin@friedmanroth.com Jose Zapata **building super** Ph. (917) 628-8937 2:30 PM:- left message for Mr. Radmin. 2:38 PM:- left message for Jose. 2:45 PM:- spoke with operator at management office and left message for Mr. Radmin. 2:52 PM:- received call from Mr. Radmin. he mentioned that Statewide boiler company is at site. someone from Statewide will call back. 3:00 PM:- spoke with Rob at Riteway. they are removing both tanks at this time. he mentioned that corrosion holes were developed due to water dripping on tank top. during oil delivery, tank #1 (which is along foundation wall) got full and before oil can move to tank #2 via interconnecting pipe, it started to leak from one of the corrosion hole on top of tank #1. 12/17/13-Hiralkumar Patel. 10:15 AM:- visited site. met crew from Riteway Tank Maintenance. two old 275 gal ASTs have been removed and tank room floor was cleaned. a new 275 gal temporary tank installed in tank room. tank room floor found in good condition, except two locations: a dirt area found along eastern wall of the tank room and a hole found in floor near where leaking tanks were located. a sealed metal plate is located near the hole in tank location area. no petroleum odors noted in area. inspected sewer trap pit, located along south wall of tank room. no sign of impact noted in pit. spoke with Rob at Riteway. informed him that the department requires investigation for possible subsurface contamination in two areas in tank room: one along eastern wall of tank room and hole in floor near former tank location. 11:49 AM:- left message for Mr. Radmin. informed him about required investigation by sealed metal plate in tank room floor and eastern wall of tank room. 12:19 PM:- sent letter to Mr. Radmin requiring subsurface investigation in two locations: along eastern wall of the tank room and by the hole near sealed metal plate. asked him to submit report by the end of 02/28/14. letter emailed to Rob. 12:22 PM:- letter emailed to Mr. Radmin. 01/16/14-Hiralkumar Patel. 1:51 PM:- spoke with Rob inquiring updates. he will check record and call back. 02/21/14-Hiralkumar Patel. 10:05 AM:- spoke with Rob. they removed some contaminated soil from former tank location. they will continue remediation. 10:10 AM:- visited site. inspected excavation in tank room. no petroleum odors noted in excavation. some stained soil noted. 03/25/14-Hiralkumar Patel. 11:20 AM:- received call from Rob. they removed additional contamination after moving on-site tank. Rob believes more contamination at the site, but it can not be removed due to structural issues. aksed Rob to collect endpoint samples from 8260/8270 analyses and submit results, once available. asked him to backfill the excavation as no further excavation possible. 05/12/14-Hiralkumar Patel. 3:34 PM:- spoke with Rob and asked him to submit cleanup report. 05/15/14-Hiralkumar Patel. 1:55 PM:- received

BUSINESS AT LOCATION (Continued) **S106385907**

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Question on proper address of this building. Originally called in as 525 W 25th. Later called 543-545 West 25th St. 5/22/02 - Sangesland spoke with Mark Robbins of Hydro Tech (631-462-5866) cell # 516-996-5559 Property owner Jack Fuchs - Whitehall Business Archives, Inc. 40 Worth Street, NY, NY 10013 Hydro Tech was pulling a buried 3,000 gal #2 oil tank from a parking lot. 15 ft to nearest neighbor, south end of tank is at the sidewalk line. They discovered 10 large holes in the tank. The pit has product in it. Hydro will vac out the hole and will excavate out contaminated soil to clean endpoints. If all contamination can not be excavated a remediation plan will be prepared and submitted. 7/2/2002 - Mark Robbins of Hydro Tech submitted a report which outlines the removal of a UST and the over excavation of the tank pit area. Sidewall endpoint samples were all below TAGM levels for VOC and SVOC's except for a handful of slight exceedences. No bottom soil samples were taken because of the presence of ground water. Hydro Tech recommends the installation of a monitoring well in the north side of the excavation area. The well should be monitored for the presence of separate-phase and dissolved phase product. DEC instructs Hydro Tech to install a monitoring well on the site, develop the well and sample for VOC's and SVOC's. The DEC will require 2 rounds of Clean samples taken at least 3 months apart in order to close out. 10/29/2002 - Sangesland reviewed submittal from Hydro Tech Environmental. Water sample taken from monitoring well on site showed no product and sample was clean for everything except a minor hit 1.1 ug/l of Benzene. SVOC all below detect. 4/11/2003 - Sangesland reviewed a submittal from Hydro Tech dated Feb 28, 2003. This report shows the second round of GW sampling. All results were ND, therefore the spill can be closed out. Spill Closed."

DEC Memo: "12/14/05: This spill transferred from J.Kolleeny to S.Kraszewski. 9/22/06: Spill transferred from Kraszewski to Kann. 1/19/10: J.Kann - revised work plan received 11/17/09. WP approved 1/19/10. 9/23/10: J.kann - Quarterly Report recieved 9/01/10. 5/11/12: J.Kann - quarterly report recieved on 5/9/12. 9/6/12: J.kann - quarterly report received on 8/21/12. 1/16/13 : J.kann - 10/24/12 QR rcvd on 1/16/13. 5/21/14: J.Kann - email sent to NYCHA today stating: The Department understands that a recovery system is operating, that monthly VEFR is being performed and that quarterly monitoring is currently being done at the following five sites: Amsterdam Houses Elliott Houses Manhattanville Houses Melrose Houses Baruch Houses Since wells at these five sites have consistently (based on quarterly reports received over the past year) had no product, a sheen or less than 0.08 inch of product in their wells, the Department would like NYCHA to temporarily cease operation of the systems and VEFR at these sites. For the next 4 months, the wells must be monitored to determine if any significant recharge of product occurs. Accurate readings of product thickness must be made, which may require using the gauging method used at South Jamaica Houses on May 19, 2014. In addition, during this 4 month time period, no absorbent socks should be placed in the wells. Data from this monitoring, along with recommendations, must be included in the 2014 3rd quarter monitoring report for these sites, which is due to the Department by October 1, 2014. In the event that a significant recharge is noticed in any of the wells during these 4 months, the Department must be contacted immediately (within 72 hours of gauging). 1/24/17: J.Kann - based on review of Quarterly monitoring reports, The source of petroleum has been removed. The PRS was operated between 1998 and 2014 Free product has not been observed in the accessible monitoring wells since 2007. Since halting the PRS in 2014, free product has not been observed in the accessible monitoring wells and little free product (less than 0.25in) has been observed in the recovery wells. No petroleum related VOCs or SVOCs (listed in Table 3 of CP-51) were detected in groundwater samples collected in April 2015 from the accessible monitoring wells. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, spills can be closed. The Closure Letter should contain the contaminated soil clause. Spill closure email will be prepared with contaminated soil clause and sent to NYCHA "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL Formerly assigned to Tomasello 4/10/2002 - Someone from Penske Truck Leasing called looking for a closure letter on this site. Sangesland spoke to him. DeMeo was on duty for the day, therefore it was assigned to DeMeo. Sangesland suggested the rep from Penske should send a copy of the original closure report to DeMeo along with a request for closure. 8/29/03 TJD Work plan approved. 12/9/03 TJD Transferred Demeo greater than greater than greater than Rommel. 1/7/04 Reviewed 12/31/03 report from GES proposing 5 additional delineation wells. Spoke to Tony Dellaria, GES, verbally approved additional well locations with the addition of one well downgradient of MW4. Letter to Penske, Route 10, Green Hills, PO Box 7635 Redding PA 19603-7635 Rommel 3/8/04 Spoke to Debra Kaplan,GES. Wells are scheduled for 3/22/04. Rommel. greater than greater than greater than 05/13/04 10:46AM greater than greater than greater than Ms. Rommel, Attached please find the Subsurface Investigation Report for the above-referenced site. The hard copy of the report was sent to you today. If you have any questions, please feel free to call Anthony Dellaria at (631) 420-5095. Thank you. greater than greater than greater than Jennifer Rommel 05/13/04 03:43PM greater than greater than greater than DEC approves the work proposed in the Subsurface Investigation Report dated 5/13/04. At the end of the three months of HIT events, please submit an evaluation of the need for a permanent recovery system. 5/17/04 Received summary, 4 mw installed. Total 8 wells. Product in MW1 and MW4 - quarterly bailing recommended. Rommel 10/14/04 Reassigned from Rommel to Sun. 10/31/04 File Update by Sun: - On 11/22/04, Sun sent a letter to Richard Saut of Penske requiring complete delineation of soil and groundwater contaminations, submittal of an Investigation Summary Report followed by a Remedial

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

Action Plan. The Department set a deadline of 12/10/04 for signing the Stipulation Agreement. The Stipulation Agreement was signed by Penske on 12/10/04 and implemented by the Department on 12/27/04. -On 12/21/04, Sun sent a letter to Richard Saut of Penske informing him that the Department has approved the Remedial Action Plan (RAP)/HypeAir Work Plan prepared by his Consultant, Groundwater & Environmental Service (GES) for the subject site; specifically two in-situ chemical oxidation events at the site via HypeAir air and Hydrogen peroxide injection system. The Department requires that due to the proximity of existing utility corridors, temperature, pH, pressure, oxidation-redox potential (ORP), conductivity and dissolved oxygen (DO) shall be monitored on all the monitoring wells. Any potential accumulation of vapors during the injection activities shall be avoided. (Sun) 02/21/06: Sun received 4th Quarter 2005 Site Status Update Report. Review of this report is pending. (Sun) 02/27/06: The Department approves the GES s request for two (2) additional injection events to be completed in April and May 2006; specifically two in-situ chemical oxidation (Chem-Ox) events at the above referenced site utilizing a hydrogen peroxide, ozone, and persulfate injection system (HypeAir). (Sun) 07/23/07-Sun: On 07/23/07 the Department approves the GES s request for performing enhanced product recovery through the injection of surfactant into MW-5. The Department also approves a series of high intensity targeted (HIT) remediation events using high vacuum extraction at monitoring wells MW-3, MW-4, and MW-5 to reduce residual hydrocarbons impacts on-site for 8-hour events for approximately four (4) months. (Sun) 08/09/07-Sun: On 7/18/07 Joe Sun of DEC was informed by Kevin Heaphy of Parson Brinckerfoff Amercica (PB) that the MTA will be using this site (Lot 60) and the adjacent Fed Ex lot for a mocking pit to build the initial shaft for Tunnel boring machine to be used for the No. 7 subway extension project. In general, the site is slated to be used as a staging area for the project. A meeting was held on 8/9/07 to discuss project among all the key parties, including DEC, MTA, NYCT, Developer, Parson Brinckerfoff (PB), Penske, property owner (Michael Silvermintz)and Penske s consultant, GES. The meeting concluded that PB will first review the GES s investigation and remediation reports and then will discuss with GES and MTA project team to assess if other viable remedial action plans (RAP) can be implemented to expedite the cleanup process. Any new proposed RAP will be submitted to DEC for review and approval. (Sun) 08/23/07-Sun: Sun received 2nd Quarter 2007 Site Status Update Report. Based on laboratory analytical results, a 64% reduction of disslved benzene, toluene, ethylbenze, and total xylenes (BTEX) concentrations has been observed on and off-site since initiating hydrogen peroxide and ozone injections at the site. (sun) 08/30/07: Sun received the following email from Heather Cloud of GES Joe, Penske and GES submitted all historical documents to Kevin Heaphy for his review. He reviewed the documents and we had a follow up call with him and the MTA this past Monday (8/27). During the call, Kevin brought up a suggestion of relocating the wells off-site or installing remote access points in the sidewalk. As discussed at the NYSDEC meeting, we told Kevin that that locating the wells offsite was not an option, and installing remote access points in the sidewalk could not be sufficient for our liquid level measurements and groundwater sampling activities. Additionally, there is a high pressure gas main in the sidewalk, so we would not be able to drill safely in this area. They did not have any additional suggestions or

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

ideas beyond relocating the wells. (Sun) Since they did not have any additional suggestions, it was decided that GES is going to proceed with our approved work plan. We are actually scheduled to conduct our surfactant injection on September 5 and the high vacuum extraction events on the 6th and 7th. Once we get the data back from the first event, we will evaluate the effectiveness and move forward from there. (Sun) 11/19/07-Sun: Sun received the following email from Heather Cloud of GES, Hi Joe, We conducted the Surfactant Injection at MW-5 on September 5, 2007 followed by a high vacuum extraction event on September 7, 2007 to remove and recover residual product at MW-5. Since conducting the injection event, we have not seen any product at MW-5. Groundwater data at MW-5 prior to the injection (July 3, 2007) was 489 ppb BTEX (144 ppb benzene). Following the injection (October 12, 2007), groundwater data at MW-5 was 87 ppb BTEX (66 ppb benzene). Since the injection event, we have conducted 2 high vacuum extraction events on MW-3 and MW-4. These events were completed in September and October. Between the 2 high vacuum extraction events, we have recovered 5 pounds of mass and 1,300 gallons of water. We were at the site today and are at the site tomorrow to complete our 3rd high vacuum extraction event on MW-3, MW-4, and MW-5. The 3rd QTR Site Status Update Report is currently being reviewed by the client, so you should have it shortly. (Sun) 02/15/08-Sun: DEc received the following email from Andrew Cullen of Penske, All, After much review, we have come to the conclusion that we will make an attemp to meet the requirements of the contractor and complete the necessary remediation work required by the NY DEC on two Saturday's per month. However, I need all the parties to understand that our agreement specifically states we need 2 to 3 days per month to perform the necessary remediation. Limiting us to only two days per month may cause the remedial efforts to go past our original estimates. Moreover, MTA also agreed to reimburse Penske for any premium costs assoicated with work that must be scheduled outside of normal working hours (i.e. Monday to Friday 8:00am to 5:00pm) . If at any time we find the contractor is not cooperating, our remedial efforts will require more than 2 days per month, or any invoices for premium costs or damage by the contractor are not paid in accordance with our agreement, we will alert the appropriate parties. I do not anticpate this happening, but given the events that have lead us to this point, I feel compelled to remind everyone of the terms and conditions of our agreement. (Sun) 03/04/08-Sun: Sun sent the following email to all the parties invloved, Penske may have to conduct remedial efforts more often than 2-3 days a month if project demands. The required frequency and nature of remedial efforts will depend on results of on-going remediation to be received in future. If current extraction method does not produce acceptable (to the NYSDEC) results, DEC reserves its rights to require Penske to undertake more aggressive remedial efforts. NYSDEC is not a party to any of the agreements between Penske and MTA, and reserves all rights under the existing Laws and Regulations. (Sun) 03/25/08-Sun: Sun received the 4th Quarter 2007 Site Status Update Report. (Sun) 07/03/08-Sun: Sun received from Heather Cloud of GES on the current site status: We are currently conducting quarterly groundwater monitoring and sampling. Our next groundwater sampling event is scheduled for this month. - Based upon the recent groundwater data, we are not seeing a reduction in the BTEX concentrations. See attached groundwater analytical tables. Therefore, the high vacuum extraction events don't appear to be overly effective at this time.

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

We are currently evaluating alternate options to address the dissolved phase impacts. We are looking at potentially injecting sodium percarbonate or other potential oxidizers. The total BTEX concentrations are primarily comprised of benzene. We have seen great success in reducing benzene levels with sodium percarbonate at other sites. Also, this type of technology is not intrusive at all. With the MTA project going on, we are limited with the technologies that we can go with. - The 1st QTR QMR is currently being reviewed by Penske. You should have this report within the next week or so. (Sun) 8/4/08 - Carlson: Case reassigned to Carlson. Reviewed 1st Quarterly 2008 report. Wells sampled on 1/3/08. Maximum BTEX concentration 5,425 ppb (MW3), maximum MTBE concentration 64 ppb (MW3). Report notes that VEFR is not effective. Sent letter requiring submission of a new RAP and additional delineation by 9/12/08. 9/11/08 - Carlson: Approved extension to 11/14/08 for submission of a new RAP. Scheduled site visit for 9/25/08 to discuss potential locations for an additional delineation well. 9/30/08 - Carlson: Performed site visit on 9/25/08. Met with Heather Cloud of GES, Richard Saut of Penske, Charles Stives of Liro Engineering, as well as representatives from MTA and NYCT. Five monitoring/remediation wells have be destroyed during recent activities. A location was identified for the installation of an additional monitoring well. RAP due 11/14/08. 10/6/08 - Carlson: Reviewed update report dated 9/23/08. Wells sampled on 4/26/08. Maximum BTEX concentration 3,537 ppb (MW3). They are pilot testing sodium percarbonate. 3/20/09 - Carlson: Reviewed Site Status Report dated 2/25/09. Delineation well discussed during 9/30/08 site visit was not installed. Destroyed wells were not replaced. Sodium percarbonate solution was injected into MW-1, MW-2, and MW-4 on 9/20/08. Wells were sampled on 10/25/08. Decreased concentrations were found in MW1 and MW2, but BTEX increased in MW4. Spoke to Heather Cloud at GES. She will submit workplan. Received Remediation and Delineation Work Plan dated 2/10/09. 4/16/09 - Carlson: Meeting held with Penske. Mark requested the addition of another boring. 4/23/09 - Carlson: Meeting held MTA. Access to most of the site not possible for 1 year because the TBM is in operation. Access to the sidewalk can be arranged. MTA will submit a construction timeline. 5/4/09 - Carlson: Received phone message from Sal McCabe - construction timeline will be submitted. 5/7/09: Received update report. Received email from Christopher Ward - mw5 has been located and will be abandoned (under future muck bin). 5/15/09 - Carlson: Received email. MW5 will be abandoned tomorrow. 7/1/09 - Carlson: Received cc of penske access request to sample wells on 7/25 7/2/09 - Carlson: Paul matthews of mta responded - requested sampling be delayed for one month. 7/2/09 - Carlson: I replied saying one month delay is ok. Construction timeline was not submitted as requested at the last meeting. 7/6/09 - Carlson: Received cc of penske access request to sample wells on 8/22/09. 9/18/09 - Carlson: Left voice message for Chris Ward to followup on case status. 11/5/09 - Carlson: Received cc of letter requesting access from MTA to sampling wells. Left voice message for Chris Ward to see if they were given access - need to get phone number for MTA contact Paul Matthews. 11/10/09 - Carlson: GES received access from MTA to sample wells. 2/12/2010: Received cc of letter from GES to MTA - access requested to sample wells on 2/20/2010. Spoke to Chris Ward. Update report will be submitted. 5/26/2010 - Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. 6/25/2010 - Carlson: Received cc of access request by GES to MTA to sample

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

wells on 6/12/2010. Left message for MTA Philip McGrade to followup on status of construction. 6/29/10 - Carlson: Spoke to Paul Matthews at MTA (212-616-4462). TBM is still in operation 5 days/wk 24hr/day. No construction on weekends when GES samples wells. Remedial work on Saturdays would be very difficult due to access on site. Project completion scheduled for 2013. 7/27/2010 - Carlson: Meeting held with Penske on 7/27. NYSDEC to organize meeting with MTA to discuss access/remedial plan. 8/24/2010 - Carlson: Meeting held with MTA and Penske on 8/24. Penske to reinstall wells on a weekend. Wells to be covered with roadplates. Contractor will remove roadplates prior to remedial activitiy at the site. Penske/MTA/NYSDEC to perform site visit to confirm locations of new wells. 9/22/2010 - Carlson: Site meeting held to discuss well installation locations and procedures. GES will prepared updated site plan. 3-11-11. - Breen: Consultant, GES, sent in Site Status Update Report on CD today. Heather Cloud is Operations Manager. Sarken Dressler is the Staff Hydrogeologist. Report for 9610811 is on the same CD. 6/6/12 - Carlson: Reviewed Site Status Update Report dated 4/30/12. Wells sampled on 2/25/12. Wells destroyed in 2008 were not replaced. Max BTEX only 588 in MW-4. Max MTBE only 3 ppb in MW-8. Called MTA Philip McGrade at number in file. Voice mail indicated this is not his number anymore. Left message at this number for help getting status of MTA 7-line extension project at this site. 6/8/12 - Carlson: Left message for Phil McGrade (646 252 8315) to follow up on 7 train extension project. 7/11/12 - Carlson: See new spill 1201147 at site - MTA found a diesel/#2 fuel oil in tank shaft location. Tank was removed. 9/14/12 - Carlson: Reviewed 2nd quarter 2012 update report. Existing wells show low concentrations. Destroyed wells were never replaced. Continue to followup on status of 1201147. Need to contact MTA to get status of MTA project. 11/19/12 - Carlson: Spoke to Paul Matthews at MTA - he isn't involved in project anymore. New contact is Steve Asquith 646-252-8326. Left message for Steve Asquith. 11/26/12 - Carlson: Spoke to Steve Asquith (917-217-4765). He is arranging access with Penske/GES. Send him my email address, he will cc me on correspondence with penske/GES; 11/27/12 - Carlson: Emailed Steve Asquith (sasquith@mtacc.info) - please cc me on correspondence with Penske/GES as discussed during yesterdays phone conversation. 12/11/12 - Carlson: Site meeting with Healther Cloud (GES) and Dave Mariani (Skanska). Well locations were marked out. Wells will be installed in january. 9/17/2013 - Carlson: Received FOIL request from Michael Silvermintz (michaelsilvermintz@gmail.com, 646-831-1443). Forwarded to DEC Silva for processing. 9/23/13 - Carlson: Received phone call from Steve Cambruschini - new owner will purchase this property and redevelop. They intend to sign a new stip. They plan on excavating impacted soil. He will email me for a FOIL request of file. Need to get contact info of new owner to send new stip. 10/10/13: received phone call from Christopher McMahon requesting FOIL review. Sent email to email Gloria Silva for FOIL review. Also, I requested he send me contact info for new owner so I can send new stipulation agreement. 10/28/2013 - Carlson: Reviewed 3rd Quarter 2013 Site Status Report. Monitoring wells gauged and sampled on 9/28/2013. Sheen (0.04ft) in MW-3R. Maximum BTEX concentration 1,410 ppb (MW-3R). 10/29/2013 - Carlson: Issued new Stipulation Agreement to 293 Tenth Ave. Corp, c/o Michael Silvermintz. Signed Stip due by 11/12/2013. RAWP due 30 days after effective date of the Stipulation. 2/21/14 - Carlson: Reviewed RAWP dated January 2014. Site to be excavation, dewatered, and redeveloped. Site will be excavated in

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

former tank area to 11 ft below grade (4 ft below gw table). Excavation will be dewatered in order to extend below groundwater table. Hotspots encountered will be overexcavated, to the extent feasible. Two downgradient wells will be reinstalled in southern portion of property that will not contain a basement. Endpoint samples will be collected as per DER-10. Issued approval letter. 3/31/14 - Raphael Ketani. As of today, I am taking over case management from Ms. Carlson. The contact person is Chris McMahon at Langan Engineering, River Drive Center 1, 619 River Drive, Elmwood, NJ, 07407, (201) 794-6900. The proposed development of the site is as a 7 story combined commercial and office building. 4/9/14 - Raphael Ketani. I made an unannounced site visit. The site contained triple stacked office trailers on the West 26th Street side of the site. Standing from the outside, I could see that there was a lot of activity and equipment on site from the MTA construction next door for the 7 Train tunnel construction. So, I didn't enter the bounds of the site. However, I did take pictures of the site from the outside. I could see that workers were still finishing the brick work outside the MTA building that had been constructed above the tunnel shaft. 4/10/14 - Raphael Ketani. I tried to contact Steve Asquith (917) 217-4765 of the MTA to let him know that I was the new DEC project manager, but I could only leave a message. Later, I contacted Mr. McMahon (201) 794-6900. He told me that the MTA plans to be done with their work and off of the site by the second week in May 2014. Mr. McMahon added that the new owner intended to first demolish the former Fed Ex building that is adjacent to the east of the site during July 2014. Excavation of the entire site will take place to 14 feet below grade. Endpoint samples will be taken as per the plan included in the approved RAWP. I told Mr. McMahon that Langan should follow the soil contamination as much as possible before taking endpoint samples. This way, the samples will be low or non-detect with regard to any analytes and the whole process will go smoothly. Mr. McMahon stated that groundwater was about 8 or 9 feet below grade and asked about sampling the groundwater after the MTA leaves. I told him that this wont be necessary as Langan will dig out all of the contamination below the water table. Mr. McMahon stated that the beginning of redevelopment is planned for either September or October of 2014. I asked Mr. McMahon to send me the endpoint sampling map with a cover letter describing what will take place regarding the endpoint sampling and sample processing. I added that, later, the DEC will need the letter of acceptance from the facility that will receive the soil. Also, I stated, the DEC will need a letter from the facility that will accept the contaminated water that is collected. Mr. McMahon stated that once they know where everything will go, then he will send these letters. After this point, I said, the DEC will need a schedule describing the excavating, endpoint sampling, sample processing, foundation construction and so forth. Mr. McMahon said that he will send this to the DEC. At the end of our conversation, Mr. McMahon asked about the request by the owner for a change in the Stipulation Agreement whereby Penske is let off of the hook. I told Mr. McMahon that this is something Lou Oliva, Region 2 Chief Counsel, will have to work out with Penske. With that, the conversation ended. Mr. Asquith (917) 217-4765 called me back. He said that Skanska, the construction company building the ventilation shaft, is presently cleaning up the site. They told him that they expect to be off of the site by the end of April 2014. 5/2/14 - Raphael Ketani. I reviewed the First Quarter 2014 Site Status Update Report dated 4/29/14 that

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

was submitted by GES. Groundwater sampling took place on 3/15/14 for wells MW-1, MW-2, MW-3R, MW-4, MW-6 to MW-8 and MW-10. MW-9R was not sampled as MTA equipment was over it. There was 0.02' of product in MW-3R. All of the analyses were for just BTEX. MW-1 had results from non-detect to just above the TOGS 1.1.1 standards. MW-3R had the results 660 ppb total xylenes, 913 ppb ethylbenzene, 95.5 ppb benzene, 13.1 ppb toluene. MW-4 results were 237 ppb ethylbenzene, 215 ppb benzene, 18.4 total xylenes, 10.7 ppb toluene. MW-10 had 2 non-detects and 2 very low hits. For MW-2, MW-6 to MW-8, the results were either entirely non-detect or mostly non-detect with one very low hit. MTBE varied in concentration from mostly non-detect to 8.98 ppb. Quarterly sampling is planned for June 2014. 5/19/14 - Raphael Ketani. Today I received a copy of the signed Stipulation Agreement from 293 Tenth Avenue Corporation. It was signed by Michael Silvermintz, President of the corporation, on 5/2/14. I hand delivered the Stip to the Region 2 legal division. According to the schedule in the approved Remedial Action Work Plan dated 1/24/14, the remedial activities are anticipated to take 4 months beginning in October 2014. Later, I was informed that the DEC needed the original signature page in order to make the executed Stipulation Agreement. I contacted Mr. McMahon (201) 794-6900 and asked him to have his client send the original signature page with Mr. Silvermintz' original signature as soon as possible by regular mail. Mr. McMahon agreed to do this. 6/13/14 - Raphael Ketani. The Stipulation Agreement with the original signature of the president of 293 Tenth Avenue Corporation, Mr. Silvermintz, was given to me today. 6/17/14 - Raphael Ketani. The Stipulation Agreement was submitted to the Region 2 legal division for processing. 6/23/14 - Raphael Ketani. The Stipulation Agreement was signed by Venetia Lannon, Region 2 Director, and the original was sent to Mr. Silvermintz. 8/1/14 - Raphael Ketani. I reviewed the second quarter 2014 groundwater monitoring report for the site. The document was titled Site Status Update Report and dated 7/31/14. On 6/21/14, groundwater sampling took place at 6 onsite wells. Groundwater elevations were from 6.04' bgs at MW-8 to 6.71' bgs at MW-6. Flow was to the south. The wells sampled were MW-1, 2, 4, 6, 7 and 8. Wells MW-3R, 9R and 10 were inaccessible at the time. Well MW-5 had been abandoned some time ago. The VOC results for wells MW-1, 2, 6 and 7 were entirely non-detect for BTEX and MTBE. The sample from MW-8 had hits just above and just below the TOGS 1.1.1 standards. The results for MW-4 had 260 ppb of benzene and 424 ppb of ethylbenzene. In addition, a sample was taken from IW-2R on 3/21/13 and had 3530 ppb of benzene. Why this well was not sampled again was not explained. The contamination in the groundwater at MW-4 needs to be addressed. IW-2R needs to be sampled again. Also, wells MW-3R, 9R and 10 need to be made available for sampling, given that their loss is significant as there are not many wells for sampling.
Additionally, I checked the property database ACRIS for the current ownership information. The property is still owned by 293 Tenth Avenue Corporation at 5 Rosewood Lane, Wesley Hills, NY, 10901. The property block and lot are 697 and 56. There is a UCC1 with 540 West 26th Street Property Debt Investors IIA, LLC at 10 East 53rd Street, 37th Floor, NY, NY, 10022. 8/4/14 - Raphael Ketani. A letter was sent today to Mr. Silvermintz of 293 10th Avenue Corporation. In the letter, I stated that the work plan was overdue and that 293 10th Ave was in violation of the Stip. I added that if the work plan is not received by August 22, 2014, then the Department will take legal action. 8/28/14 - Raphael Ketani. Mr. McMahon (201) 794-6900/cell

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

(201) 218-2339 had called and left a message that he wanted to talk to me about the site. I tried to return his call, but could only leave a voice message. 9/8/14 - Raphael Ketani. I spoke to Mr. McMahon (201) 794-6900/cell (201) 218-2339 today about future monitoring work at the site. He said that, right now, the owner is having trouble with the tenant of the building on the other lot. He refuses to move. So, the excavating has been pushed back to March 2015. Mr. McMahon stated that the MTA had destroyed all but two wells on the truck leasing site. He proposed that groundwater sampling be stopped as all of the contamination will be removed by the excavating. The excavating will include the areas of MW-2 and IW-2R, the two most contaminated locations. I asked Mr. McMahon whether end point samples will be taken. He said that the sides of the pit and the bottom will be sampled as per the guidance in the DEC regulations. I told him that the DEC will need manifests for all of the material that is removed. He said that we will get copies of every manifest. I told Mr. McMahon that this will be the approved plan of action for the foreseeable future. With that, the conversation ended. Later, Mr. McMahon sent me an e-mail clarifying and memorializing the excavation plan in more detail. He included 3 figures with the e-mail. 7/9/15 - Raphael Ketani. As I hadn't received any information about the spill case in some time from Mr. McMahon, I sent him an email requesting an update. Mr. McMahon sent a response email today: Progress at the site has been advancing; however, our schedule may have been a bit aggressive when we last spoke. The existing building demolition is nearing completion and we are working with the NYC TA to clear up a couple of issues regarding the building plans and the influence with their neighboring building and subway tunnel. Those issues are supposed to be resolved within the next two weeks and the site will pull their building and start construction immediately thereafter. I actually had put it in my mind to give you a heads up today or tomorrow that construction was going to begin shortly to give you a little advance notice if you were interested in visiting during construction/remediation. My client is VERY eager to start the project and has already signed a lease for 80% of the building that carries very heavy penalties for not meeting certain deadlines that are driving the project forward at this point. I am certain that barring further issues with TA that we will be mobilizing to the site within weeks. 7/10/15 - Raphael Ketani. I responded today by email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] and stated that the Department requires a report showing the work that had taken place to demolish the building, copies of all manifests for all materials that are removed from the site, copies of manifests for asbestos and asbestos contaminated material disposal - the receiving facility must be permitted for asbestos and the Department needs a copy of this permit, pictures of the demolition and excavation work, end point sample results, groundwater grab sample results (if any samples are taken), manifests for all liquids, contaminated soil and clean soil removed from the site and maps showing where the end point samples were taken. 8/20/15 - Raphael Ketani. Mr. McMahon (201) 398-4535/cell (201) 218-2339 had called and left a message yesterday and I returned his call today. He stated that preliminary construction had begun at the site. However, he stated that the building that was going to be demolished was not on or part of the spill site. It was on an adjacent property. I told him that, in this situation, he didn't need to send the Department any manifests or information regarding the

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

demolition. He added that the groundwater would be prevented from entering the site by the construction of a barrier wall around where the basement would be. A machine would be used which would auger down 10 feet below grade. The auger will have holes in it. Once the auger reaches the target depth, then concrete will be pumped down the auger and the auger withdrawn. This will leave a column of concrete. Mr. McMahon mentioned that this would be like creating a secant pile wall, except that there would be more soil left between the piles. They would auger all around the proposed basement area. Any contaminated soil and groundwater will be collected and sent to appropriate disposal sites which heat the materials as a means of disposal. I told Mr. McMahon that this sounded alright to the Department. 12/1/15 - Raphael Ketani. Melissa Ng, Senior Staff Engineer from Langan (212) 479-5490/mng@langan.com sent Ryan Piper of the Spills Unit an email requesting information regarding the site as she was writing a Phase I for another site nearby. I sent her a copy of the case notes. 12/2/15 - Raphael Ketani. Ms. Ng contacted me directly by email and requested the 1/29/14 Remedial Action Work Plan for the site. I sent her the plan. 12/11/15 - Raphael Ketani. As there have been no updates since 8/20/15, I sent an email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] requesting information regarding the demolition of the building and the excavating of the site. 6/23/16 - Raphael Ketani. As there have been no reports submitted or progress updates, I sent an email to Mr. McMahon requesting an update, soil and groundwater analytical data, disposal manifests and pictures. Mr. McMahon responded to my email. He stated the following: The majority of the material at the site has been removed in conjunction with the remedial efforts at the site associated with the foundation construction. To date, we have collected 29 post-excavation soil samples and have a single sample that remains to be collected. Of the 29 samples, we have results for 27 of them. Based on a preliminary review of the results, there have been no exceedances of the CP-51 criteria. As of today, trucking is still occurring occasionally at the site. All petroleum impacted material has been shipped to the Bayshore facility in Keasby, NJ for treatment. We have yet to receive the manifests from the foundation contractor, but they were requested last week. I anticipate that it will take a few weeks to compile them. I have provided a link below for you to access recent pictures (6/17/16) of the site and I d be happy to speak with you regarding the project. http://clients.langan.com/lph/default.aspx?postTransaction=1231963216 Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] included a list of 15 pictures which were available at the internet link. Two pictures, 6801 and 6804, showed cylindrical objects sticking up in groups of 3 or 5 with some showing rebar sticking out of them. I sent an email to Mr. McMahon asking him what these structures were. He replied by email that they are concrete and steel filled caissons, which are drilled foundation elements that provide support to the building, several dozen were installed as part of the building foundation construction. The purpose of the picture is to show the waterproofing going beneath the pile caps and grade beams at the site. 9/19/2016 - Colton McPartland. Scanned paper file for DEC Raphael Ketani and placed on computer desktop for future bulk upload once naming convention is received from DEC Jane Obrecht. 9/22/16 - Raphael Ketani. I spoke to Mr. McMahon today by phone. He stated that the foundation has been constructed. Twenty three thousand cubic yards of soil was removed. The contaminated soil was taken to Bayshore for

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

burning and recycling. Thirty post-excavation soil samples were taken. The results were non-detect for VOCs with only a small number of SVOCs. The last groundwater sample was completely non-detect. Samples taken from the dewatering system were clean. Another groundwater sample will be collected very soon. Two 550 gallon tanks were removed and will be registered. Two wells will be installed outside the foundation footprint. A private school will be constructed in the lower part of the building. 2/27/17 - Raphael Ketani. As no communications nor reports had been received in many months regarding the remediation of the site, I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] requesting the documents. A due date of 3/17/17 was set for the submission of the remediation report and the PBS registration. 4/12/17 - Raphael Ketani. I sent an email to Mr. McMahon informing him that the reports were overdue and requesting their immediate submission. Mr. McMahon called me today regarding my email today. He stated that the report was delayed because they wanted to collect a second round of groundwater samples. They did collect the samples and found that one sample had 230 ppb of benzene. So he will recommend quarterly sampling to the client. He added that he had most of the documentation for the report and that it is in draft form right now. I asked him when the DEC might receive the report. He stated that he believed Langan could send it by the end of next week. With that, the conversation ended. 6/16/17 - Raphael Ketani. As the analytical results report was never sent, I sent an email to Mr. McMahon stating that 293 Tenth Avenue Corporation was in violation of the Stipulation Agreement. I added that we required the submission of the report by June 30th, 2016 or else fines and legal action can and may be taken. 6/21/17 - Raphael Ketani. Mr. McMahon (973) 560-4900 called to apologize for not sending the analytical results report. He said that the DEC will receive the report next week. He added that the latest groundwater sample was taken on 6/6/17 from the one remaining well which is outside the secant/foundation wall. He sent me an email with the VOC and SVOC analytical results table. All of the analytical results had decreased significantly, except for benzene. It was 230 ppb in the previous sample and was now 240 ppb in the current sample. He said that he didn't understand why only benzene remained high. He added that the earlier low analytical results for benzene were due to groundwater being pumped from the site. The pumping system was turned off during late 2016 and after this the benzene concentration rose. I told Mr. McMahon that, as a result of the cessation of pumping, the water table at the well may have also risen into some more contaminated soil and, thus, more oil dissolved in the groundwater. However, I could not explain why benzene would be affected, but not the other analytes. Mr. McMahon stated that the well will be sampled 3 months from now in order to see what the long term concentration trend is. I told him that would be fine. With this, the conversation ended. 6/30/17 - Raphael Ketani. I reviewed the Langan Engineers June 2017 DRAFT Remedial Action Report. The site will be developed by constructing a 7 story tall building which will house various facilities, including a multifloor private school. Six USTs containing gasoline and diesel were removed from the site. As a deep foundation was required for the building, a deep pit was dug which included removing 219 tons of petroleum contaminated soil. Initially, a groundwater monitoring well array was installed and elevated concentrations of various analytes were detected in the samples. Site investigations took place during 2002, 2003 and 2004. Wells MW-1 to

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

MW-10 were installed both on and off site. Vacuum extraction events and LNAPL recovery took place. This resulted in the collection of 174.63 gallons of product. Injection wells IW-1 to IW-4 were installed during December 2004. Hydrogen peroxidie, ozone, sodium persulfate, sodium percarbonate and surfactant were injected from 2005 to 2008. The vacuum events were completed during 2007 and 2008 and recovered 4,827 gallons of oil contaminated groundwater. Also, 8.80 lbs. of product were collected in the vapor phase. Quarterly monitoring took place from October 2003 to March 2013. During March 2013, 12 wells were sampled. About 0.01 feet of product was found in MW-3R. BTEX was present in all of the on site water samples and in the off site sample from MW-8. LNAPL thickness varied from 0.01 feet to 0.18 feet and historically appeared in MW-1, MW-4 and MW-5 during monitoring events which took place from 2004 to 2006. The site was remediated in accordance with the January 2014 RAP. Soil and fill were excavated to 11 feet below grade. A total of 364 tons of non-hazardous soil and fill and 11,378 tons of petroleum contaminated soil and fill were removed. The materials were sent to Capital Development in Bangor, Pennsylvania and Bayshore Soil Management in Keasbey, New Jersey. Grace Preprufe 300R, Grace Preprufe 160R and Grace Bituthene 4000 vapor barrier sheeting with a minimum thickness of 20 mil was installed as part of the foundation construction. Grace Preprufe 300R vapor barrier with a thickness of 46 mil was installed beneath the cellar slab, elevator pit slab, first floor slab and on the interior of the elevator pit sidewalls. Grace Prepruf 4000 vapor barrier with a thickness of 62 mil was installed on the exterior elevator pit sidewalls. Grace Preprufe 160R vapor barrier with a thickness of 32 mil was installed on the exterior of the western foundation sidewall and Grace Bituthene 4000 vapor barrier with a thickness of 62 mil was installed on the exterior of the northern, eastern and southern foundation sidewalls. A Health and Safety Plan (HASP), Community Air Monitoring Plan (CAMP), Soil Materials Management Plan (SMMP), Stormwater Pollution Prevention Plan (SPPP) and groundwater dewatering were conducted during the remediation of the site. Utilities and easements were located prior to any invasive work. Excavated soil and fill were screened for contamination. Suspect contaminated soil was stockpiled on site and covered prior to delivery to the disposal facilities. Each dirt hauling truck was inspected for contaminated soil on the undercarriage and tires prior to leaving the site. If contaminated material was present, then it was removed before the truck entered the street. The USTs were encountered at about 7.5 feet below grade in the eastern part of the site. They were 42 inches in diameter and 87 inches long. AARCO removed the two 550 gallon gasoline USTs on 9/26/15. About 630 gallons of mixed liquid was collected and disposed of at Tyree Services Corp. in Farmingdale, NY. Residual sludge and water was drummed and taken to Triumvirate Environmental in Astoria, Queens. The USTs were cleaned and cut up and sent to TNT Scrap in Brooklyn, NY. Thirty soil end point samples (PE-1 to PE-30) were taken from the sidewalls and the bottom of the tank graves from 3/31/16 to 6/28/16. The samples were sent to York Analytical Labs for processing via methods 8260B and 8270C. The analytical results were compared to the CP-51 standards. Five groundwater dewatering samples were collected before treatment from 6/22/16 to 8/11/16 and sent to the lab. The samples were processed via methods 8260B and 8270C. On 7/27/16, two permanent monitoring wells were installed (LMW-1 and LMW-2) to the south of the southern cellar foundation and soilcrete walls. The

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

borings were drilled to 15 and 16 feet below the ground surface. Each well was constructed with a 10 foot long 10 slot screen. Post remediation monitoring was conducted using 5 onsite wells. Wells MW-6 to MW-8 were situated upgradient and across West 26th Street from the site. LMW-1 and LMW-2 were sampled on 8/11/16, 3/16/17 and 6/6/17. MW-6 to MW-8 were sampled on 6/1/17. Table 1 indicated that the results for the PE series of soil end point samples were almost entirely non-detect for VOCs and SVOCs. Table 2 showed that the influent water sample results for Discharge 1, 2 and 5 were almost entirely non-detect for VOCs and SVOCs. The results for Discharge 3 and 4 were more limited, but still showed that there were no detections. The groundwater sample results for LMW-1, LMW-2, and MW-6 to MW-8 were displayed in Table 3. LMW-1 had consistent very low to high (max. 240 ppb) analyte exceedences, but, with the exception of a sample from LMW-2 (3/16/17) and one from MW-8 (6/1/17), the VOC results for the other samples and the SVOC results for all of the samples were almost entirely non-detect. 7/6/17 - Raphael Ketani. I reviewed the Langan Engineers FINAL Remedial Action Report dated 7/5/17. The contents of the FINAL report appeared to be the same as in the DRAFT report. I approved the report without comment. 10/25/17 - Raphael Ketani. I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com requesting the latest groundwater analytical data. 12/8/17 - Raphael Ketani. I sent an email to Mr. McMahon requesting the latest groundwater data. 12/14/17 - Raphael Ketani. Mr. McMahon sent me the 12/5/17 and 12/6/17 groundwater sample analytical data for the site. Samples were taken from MW-1, MW-2, MW-6, MW-7 and MW-8. Locations MW-6 to MW-8 were upgradient and across the street to the north. MW-2 was in the southwestern quarter of the site. MW-1 was in the southeastern quarter of the site, but almost in the center of the site. The VOC exceedences for the samples from MW-2 and MW-6 to MW-8 were either none or no more than 19.2 ppb. However, the MW-1 12/5/17 sample had 10 VOC exceedences. Most of the exceedences varied from 6.3 ppb to 73.1 ppb, but benzene was 238 ppb. Mr. McMahon called me on the phone and we discussed the results. We agreed that the benzene result for MW-1 stood out. I commented that it was too high to close the case with. We looked at the historical trend for benzene from MW-1. The decreasing trend was noted. I asked Mr. McMahon whether any treatment solutions has been injected into MW-1. He stated that Langan had not done this. I told him that the Department will require that another round of groundwater sampling take place in order to see whether the decreasing trend continues and whether the benzene concentration has decreased further. He agreed to do more sampling. I also asked him to include a Kendall-Mann trend graph in the next monitoring report. With that, the conversation ended. 3/28/18 - Raphael Ketani. Yesterday, I received Table 1 and Figure 2 for the March 2018 groundwater sampling results. The samples were collected on 3/6/18 and 3/9/18. The VOC results were almost entirely non-detect for the samples from LMW-2 and LMW-6 to LMW-8. Though most of the VOC results for the sample from MW-1 were non-detect, there were still 9 exceedences of the TOGS 1.1.1 standards. The highest exceedences were for total xylenes at 63.7 ppb and benzene at 228 ppb. However, with both analytes, a decreasing concentration trend continued to be present. The SVOC results for all of the samples were almost entirely non-detect.

---------- I reviewed the case file. The information in the case file described the removal of 6 USTs and many

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

tons of oil contaminated soil in the process of digging out the site for a deep foundation. Chemical treatments to remove additional contamination also took place at various times in the past. Based upon this information and the decreasing concentration trends which were evident from the latest versions of Table 1 and Figure 2, I determined that the gross contamination had been removed. Any residual contamination would not be a threat to the public or the environment. Therefore, I closed the spill case effective today and sent a spill closure letter to Peter Rosenthal and Eric DeSimone of Savanna at 430 Park Avenue, 12th Floor, NY, NY, 10022, Mr. McMahon (cmcmahon@langan.com) and Steven Ciambruschini of Langan. "

Remarks: "CALLER RESPONDED TO ABOVE LOCATION TO REMOVE FUEL TANKS. UPON REMOVAL SOME SOIL CONTAMINATION DISCOVERED. TANKS REMOVED AND SOIL EXCAVATION IN PROGRESS. NO CALL BACK REQUESTED."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5,000 gal #2 Oil tank failed tank test TTF letter sent to: Key Real Estate Associates LLC 116 John St. - 17th Floor New York, NY 10038-3427 Attn: Arlene Cobb (212-233-0109) NO PBS number could be found for this building: 161 West 15th St is also known as 79 7th Ave. No PBS found for either address. 12/1/05 - Raphael Ketani. I received a tank test report from Petroleum Tank Cleaners, Inc. ((718) 624-4842). It indicated that the 5,000 gal. (they state 6,000 gal.) tank passed the test, but the vent line was bad. The building owner isn't sure whether he will repair the line or remove the tank. They are requesting that the case be closed. I will send a letter telling them they have to first register the tank. 12/12/05 - Raphael Ketani. I received a call from Arlene Cobb, case manager, Key Real Estate Associates LLC, requesting an extension of the time needed to get a

APRTMENT BUILDING (Continued) **S107416906**

letter to me stating that there was no oil spill at the site. I told her I would give her 2 weeks to get me a letter from PTC stating that there are no old oil spills, no new oil spill, no impact to the soil or the environment, and no impact to any drains. She said she would get it to me. The PBS case is #2-610054. 1/4/06 - Raphael Ketani. I left a message for Ms. Cobb requesting the letter she told me she would send back on 12/12/05. 1/5/06 - Raphael Ketani. I spoke to Mr. Cobb. She said that the coop and management are still debating whether to convert to a dual fuel system (oil & gas). However, for now, the tank will remain empty and the lines disconnected. She said that the air leak during the test was in one of the lines, not the tank. She wanted the case closed. I told her to get me a letter from PTC stating what they did and that there is no contamination or impact to drains or the environment, and to submit a letter from her management company stating that they will not refill and use the system for the foreseeable future. She said she would and that she wanted a closure letter. 1/30/06 - Raphael Ketani. I received a letter from PTC stating that the vent line was the only part of the system that failed the test. With this letter and the system test results that were given to the PBS unit, I am closing this case and sending a NFA letter."

Remarks: "ABOVE LIQUID LEAK."

DER Facility ID:	275891
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Sangesland responded to the site of a reported contaminated soil location. Owner of the site is excavating what was a parking lot in order to install footings for a new building. Upon excavation, the southwest corner of the property at 160 west 22nd St was found to have petroleum contaminated soil. After contacting DEC rep Mark Tibbe, it was determined that the property directly to the south (161 west 21st st) was a taxi company with an ongoing state PIN cleanup project. Mr. Tibbe stated that the parking lot at 160 west 22nd st did have 3 monitoring wells associated with the ongoing clean up. AKRF rep Mimi Sotiriou (212-340-9790) stated that all contaminated soil would be dug out, sorted, and shipped out with manifest for proper disposal. Since the contamination was only in the extreme southwest corner of 160 west 22nd st, directly adjacent to the property line of the taxi company and within 15 feet of the remediation equipment, it was clear where the source of the contamination was from. 11/1/2000 AKRF sent a letter to DEC stating that 228.75 tons of contaminated soil was removed from the site. AKRF stated that Petroleum contaminated soil was removed from along the southwest border of the property until no petroleum-like odors were observed.... ...Soil was transported to Mt. Hope Recycling of Wharton, New Jersey Since all contaminated soil was removed from this site, this spill number was closed out. IT SHOULD BE NOTED THAT EXISTING CONTAMINATION FROM THE PROPERTY AT 161 WEST 21ST STREET MAY HAVE AN IMPACT ON THE NEW BASEMENT WALL INSTALLED ON THE SOUTHWEST CORNER OF 160 WEST 22ND STREET. Spill closed 1/2/2001 "

DEC Memo:	"10/10/95: This is additional information about material spilled from the translation of the old spill file: GASOLINE ODOR. see also 8701176, 8701597 (SP97155), 9400302, 9403442, 0006798. (also addresses 160 W 22nd St, 166 W 22nd St) 3/18/04 Received phonecall from Kevin Kleaka, Impact Environmental. Excavation is planned for next Tuesday, 3/23. RAP was previously approved by M. Tibbe. DEC had requested 5day notification. Requested project manager return phonecall (631-269-8800 or cell 516-805-8892) when reassigned.(KMF) 3/22/04 Transferred from Tibbe to Foley. Rommel 3/23/04 Spoke to K. Kleaka, Impact Env. Excavation to begin tomorrow. Tanks have been out since approx 1992-1994. 3/31/05 Spoke to Scott Underhill, URS (518-378-8766). He was hired by Bank of NY to conduct a third party peer review. The bank is putting up funding for the development of the property. 4/5/05 Received update from K. Kleaka, Impact Env. In 3/04, they excavated 340tons of gasoline impacted soil. On 2/14/05, endpoint sampling from 8 locations was conducted and analyzed by 8021. On 3/15/05, additional endpoints were collected from 3 locations and analyzed by 8021. Additional excavation to mitigate residual soil contamination on the northwestern portion of the site will be conducted in 4/05. Construction of building is now to include a second sub-level which will require removing 3-5 feet of bedrock (bedrock is at 17'bgs). GW is at 11-14'bgs. 4/13/05 Spoke to K. Kleaka, Impact Env. They have excavated down to bedrock across most

ANN'S SERVICE CORP (Continued) **S102148346**

of the site. Not much water is accumulating and have not had to dewater. Will schedule site visit and discuss possible modifications to the RAP. 5/17/05 Site visit conducted with owner, Impact, URS and Bank of America. Currently chipping away at bedrock which is about 17'bgs. All soil removed. Almost no groundwater inflitration which is surprising since perched GW was detected at 11-14'bgs. Requested a water sample from the puddle in the NW corner of property. They are contemplating an ORC application. I recommended that if the GW was clean from the bedrock surface, that they not go ahead with ORC. If it is contaminated, they will do ORC pour and will need to monitor effectiveness. Well locations possible along W 21st. Inspected backyard of 166 W 22nd St which is about 8'bgs. Access for equipment, especially for bedrock drilling, would be very difficult but may be able to obtain perched gw samples. 6/6/05 Received results for three grab samples taken from the standing water on site, collected on 5/18/05. BTEX ranged from ND to 2005ppb and MTBE from 128ppb to 1080ppb. Owner requested that the ORC application be eliminated from the RAP. 6/8/05 Email to K. Kleaka and K. Lalezarian. Required that the ORC application be completed along with effectiveness monitoring. Impact to submit revised RAP. 9/9/05 Received revised RAP via email. During the period from 3/24/05 to 5/20/05, 3983 tons of petroleum impacted soil was excavated. It is expected that removal of all source materials will reduce the concentrations found on the perched watertable. However, to address the residual impacts, Impact Env. proposed ORC for bio-enhancement. It will be spread as a dry mixture and the natural formation will provide the water to activate the release. A 6mil vapor barrier and passive vent system will be installed. A MW will be installed along W 21st St. GW samples will be collected before and after the application, analyzed for VOCs and taking field measurements for DTW, pH and DO. Due to physical constraints, no wells are to be installed at 166 W 22nd St. 9/9/05 Approved revised RAP. As discussed with K. Kleaka, the ORC will be applied in a slurry in dry areas and directly mixed with accumulated water in the wet areas. 5/18/06 K. Kleaka, Impact Env, indicates a closure report will be submitted next week. 5/25/06 Reviewed site closure report. The remediation activities completed on the site included the removal and disposal of 3,982.92 tons of petroleum impacted soil and construction fill, confirmatory endpoint soil sampling, certified laboratory analysis, bio-remediation of perched groundwater, and the installation of a vapor barrier in conjunction with a passive subslab ventilation system. After detecting contaminants in soil, all soils were removed to the bedrock surface. 450lbs of ORC was introduced following the detection of VOCs on the perched groundwater. Concentrations of total VOCs in perched water ranged from 165ppb to 3556ppb. MW-1 was installed in order to monitor the effectiveness of the bio-remediation. However, the well did not produce any water and therefore could not be sampled. It appears that the actions taken are protective of human health and the environment."

DEC Region:	2
DER Facility ID:	194620
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL C 3/11/03 - SAMUEL- File available in active unassigned spill files. 03/26/04 - Reassigned from Samuel to Rommel 08/26/05 - Follup letter sent to property owner to address a TTF at the site. It has also been discovered that there is a property transfer in the works and that ATC is the consulting firm handling any environmental work at the site. Therefore, a copy of the spill report and the Region 2 form letter was sent to the ATC project manager for his reference. 8/31/05 - ATC is doing work at the site and believes the tank was removed. A geophysical investigation was performed. The investigation located the remnants of a filler pipe but found no tank. A patch of pavement was observed consistent with the removal of a 500 gal tank. Three borings (one up gradient, two down gradient) were performed and samples taken. ATC asked that an NFA letter be sent based on the analytical results coming back negative for contamination. A letter report would be submitted stating results and concludions. 11/8/05 - No letter report has been recieved so ATC was contacted. Contamination had been detected in one of the borings so no report was sent. The work plan calls for expanding the investigation once the building on site is demolished which should occur in January or February of 2006. At that point additional borings are to be performed to determine the extent of the contamination and subsequent remedial actions will be proposed. 08/18/2006 - IABEILBY: Contacted ATC PM (Jason Hayes, 212-479-5427) to inquire about status of investigation. He stated that further demolition was planned for the site and that the investigation could continue at that point. He was informed that any further contact with the department should be directed to the Region 2 office. NEXT STEP: follow up with consultant to ascertain progress. 8/28/2007 Sangesland spoke to rep from Langan Engineering. He says they have finished work on the site (excavation?endpoints?) He would like to submit a closure report for final review. Case reassigned to Kumar Patel. 08/28/07-Hiralkumar Patel. received message from Jason Hayes from Langan engineering. they excavated contamiated soil during site development and report is ready. Mr. Hayes asked for address to send report. Jason Hayes Langan Engineering Ph. (212) 479-5427 email: jahayes@langan.com sent email to Mr. Hayes requiring submission of closure report alongwith investigation report, that was done in 2005 and during that time found contaminated soil. 08/29/07-Hiralkumar Patel. received email from Mr. Hayes. he mentioned that there was no report produced for investigation work done in 2005. he will include description and analyticals of that work in closure report. 09/10/07-Hiralkumar Patel. received closure report from Mr. Hayes. abstract: - 550 gal gasoline UST that was failed the tightness test was removed at some point between 1996 and 2005 <--------- - depth to groundwater at teh site is estimated at approx. 8 ft bg and presumable flows northwest-west towards the nearby Hudson river - found concrete patch in building (could be UST location), staining on conrete, a sump in the southwest corner and a centrally located floor drain, during 2005 Phase I - site was in use as auto garage in past - Langan performed a GPR survey on Aug. 26, 2005 and did not reveal evidence of USTs -

393 WEST 12TH ST (Continued) **S102399190**

rectangular concrete patched-area was identified along the southern site boundry near the sidewalk, a disconnected fill line was traced from the sidewalk to the potential UST area - fil port in the siewalk is filled with concrete - completed 8 direct-push soil borings at the site - borings were advanced to 10 ft bg - 3 mud-rotary borings were completed as part of a Geotechnical investigation - nine soil samples were collected: one sample from each of geoprobe borings, and one sample from a geotechnical boring (B2) - soil samples were collected from 4 to 10 ft bg - no staining, odor or elevated PID readings were observed in the soil samples with the exception of one soil sample at location E4 - boring E4, adjacent to a sump in the southwest corner of the site, staining and petroleum odor were observed at approx. 9 ft bg - PID readings for boring E4 were observed upto 60 ppm - fill material extended to an approx. depth ranging from 6 ft to 9 ft bg - excavated impacted soil to an approx. depth of 10 ft bg - 4 endpoint samples were collected: one sidewall sample from east, west and north sidewalls and one bottom sample - sidewall samples were collected at approx. 6 inches above the base of the excavation area, approx. 9 ft bg - base sample was collected from a depth of approx. 10 to 10.5 ft bg - sample was not collected from the south sidewall due to the presence of an foundation wall at the southern site border - area of final excavation was approx. 610 sq.ft. with depth of 10 ft bg - groundwater was encountered at approx. 10 ft bg - 220 tons of petroluem impacted soil was removed - found SVOC contamination in sample E2 during 2005 investigation. sample was taken at depth of 3.5-4.5 ft bg. no contamination found in sample E4 where they found heavy PID (60 ppm) - no contamination found in endpoint samples report doens't have information about location of dispenser island and any investigation along old fill line. spoke with Mr. Hayes. he mentioned that they did GPR survey in entire site and didn't found any area that could be location of dispenser island. as per Mr. Hayes, this small gasoline tank was in use to fill up cars under repair and dispeser point could be right on tank. he also mentioned that previous boring E1 was at point where suspected fill line ends inside building and from that point to fill port, fill line runs about 10 ft under sidewalk. no contamination was found in E1. discuss with DEC Austin. based on submitted report, he asked to close the case. case closed."

Remarks: "test = air pressure at 5lbs they discontinued test, they are underground tanks"

DEC Memo:	"09/25/95: PIN-4169 - ASSIGNED TO CHRIS FOR TRACKING PURPOSES. 10/6/03 See also PIN 4169, spill #s 8605682, 8606807, 9410208, 9410209. 1/8/04 Reassigned from Tomasello to K Foley. 06/20/06: Re-assigned from Foley to Yau. (Yau) 06/22/06: Prepared and sent an old spill letter to property owner through certified mail. A site investigation report (SIR) is expected to be due on 07/22/06. (Yau) 06/27/06: Owner called to inquire about the spill. Stated that he brought the property recently (around 2002) and had no idea where is the spill was. Told him that DEC will look into it and call him back with the exact location of the spill. (Yau) 08/02/06: Owner called to request an update to the site. Told him that a review is underway. Found that DEC had a PIN job for this site. Unsure whether the cleanup is complete. If the cleanup is incomplete, the owner might have to re-do the cleanup. Will call owner back as soon as review is completed. (Yau) 10/16/06 Reassign from Yau to Chanda (Chanda) 12/12/06-Vought-Spill reassigned from DEC Chanda to DEC Vought. 03/20/07-Vought-File review by Vought: See also open spill #0603967 at same location. Videotape-unknown date (circa 19884)-tape showing well being bailed with free product thickness of 1 . Registered CSL Letter sent by DEC Yau to Tenth Gas Inc (address as per Property Shark). FOIL request from Brinkerhoff-8/18/06. Vought called AG Bechard for status of PIN case. PIN case assigned to AG John Nyhoff. Vought called Nyhoff and left message to return call. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. 03/21/07-Vought-Left message for AG Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke with AG Nyoff and as per Nyoff default judgement was made against former owner of property resulting in lean of approximately 354K. 3/26/07-Vought-Received ISR from Nyoff. Vought left message for Nyoff to return call with which party was found responsible (Alex Goffman or Westside Tripple Auto Repair). 4/23/07-Final ISR submitted to DEC Austin for review and spill closed by Vought. DEC Memo:	"09/25/95: PIN-4169 - ASSIGNED TO CHRIS FOR TRACKING PURPOSES. 10/6/03 See also PIN 4169, spill #s 8605682, 8606807, 9410208, 9410209. 1/8/04 Reassigned from Tomasello to K Foley. 06/20/06: Re-assigned from Foley to Yau. (Yau) 06/22/06: Prepared and sent an old spill letter to property owner through certified mail. A site investigation report (SIR) is expected to be due on 07/22/06. (Yau) 06/27/06: Owner called to inquire about the spill. Stated that he brought the property recently (around 2002) and had no idea where is the spill was. Told him that DEC will look into it and call him back with the exact location of the spill. (Yau) 08/02/06: Owner called to request an update to the site. Told him that a review is underway. Found that DEC had a PIN job for this site. Unsure whether the cleanup is complete. If the cleanup is incomplete, the owner might have to re-do the cleanup. Will call owner back as soon as review is completed. (Yau) 10/16/06 Reassign from Yau to Chanda (Chanda) 12/12/06-Vought-Spill reassigned from DEC Chanda to DEC Vought. 03/20/07-Vought-File review by Vought: See also open spill #0603967 at same location. Videotape-unknown date (circa 19884)-tape showing

10TH AVE. W 27/W 28 ST. G (Continued) **S102671142**

well being bailed with free product thickness of 1 . Registered CSL Letter sent by DEC Yau to Tenth Gas Inc (address as per Property Shark). FOIL request from Brinkerhoff-8/18/06. Vought called AG Bechard for status of PIN case. PIN case assigned to AG John Nyhoff. Vought called Nyhoff and left message to return call. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. 03/21/07-Vought-Left message for AG Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke with AG Nyoff and as per Nyoff default judgement was made against former owner of property resulting in lean of approximately 354K. 3/26/07-Vought-Received ISR from Nyoff. Vought left message for Nyoff to return call with which party was found responsible (Alex Goffman or Westside Tripple Auto Repair). 4/23/07-Final ISR submitted to DEC Austin for review and spill closed by Vought. DEC Memo:	"4/27/05-Vought-Spill assigned to Rahman to send out tank test letter. 04/27/05-SR// A TTF ltr was sent. 5/26/2005 Joe Ostrowski,(914)777-1930 Northeast Environmental asked for a 5 day time extension to submit the paperwork on this site. The tank was isolated and passed a retest. The problem was found in the fill line. Sangesland told Mr. Ostrowski to repair the fill line, take photos of the fill line area and submit copies of the tank test passing. 06/01/05- SR// Received copies of tank test pass. 10.18.05 Sharif-Spoke with A1 crown. They were hired to retest the tank and it passed.I left a messege for Joe, Northeast Environmental to call back DEC cause' we did not receive any documentation about the fill line repair.Also sent a letter to Andrews Building Corp. 11.02.05 Sharif-The fixed the line and the boiler is back on operation."
Remarks:	"Tank test Failure."

BROWNFIELDS:

Name:	70 BETHUNE STREET
Address:	70 BETHUNE STREET
City,State,Zip:	NEW YORK, NY 10014
Program:	BCP
Site Code:	373205
Acres:	0.730
HW Code:	C231058
SWIS:	3101
Town:	New York City
Record Added Date:	11/08/2006
Record Updated Date:	12/17/2007
Update By:	SMMARTIN
Site Description:	"This is a new BCP application and pertains to the 70 Bethune Street property located in Manhattan, New York County. This site is approximately 0.73 acres in size. Currently the site is vacant and future use of this site will be for residential use with some commercial space and a parking garage. Past uses include a bakery and an ink manufacturer. The building, built in 1909, has three stories, "L" shaped, with one basement level, and 25,000 square feet footprint. The basement slab is four feet below gound surface. The building lies on the western portion of the block between West and Washington Streets. It extends approx 220 feet along Bethune Street and approx 140 feet along West 12th Street from West Street. On part of the property east of the building along Bethune Street is a parking lot and loading dock. The building will be demolished in

SUPERIOR PRINTING INK CO INC (Continued) **1000215465**

	early 2007. Nearby land use includes residential, commercial, and industrial. This BCP application was reviewed and the Department of Environmental Conservation determined that the application was not eligible for inclusion in the BCP. The cleanup of the site continued under the Spills Program (see spill no. 0312310) and was closed November 2007."
Env Problem:	"Known contaminants at this site are petroleum, SVOCs, and metals. The site is underlain throughout with about eight feet of historic fill. Petroluem had impacted the groundwater; the fuel oil tank was removed and a dual phase extraction system has been running to remediate the groundwater. Soil gas was also sampled at six locations. Monitoring wells were installed on the sidewalk around the site. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER This spill number remains open. A second number (#0312534) was called in by the tank test company and this second number has been closed out. Spill Number 0312534 was a tank test failure. Site has both a failed tank and contaminated soil. 3/22/2004 - A contractor spoke to Sawyer concerning the work to be done on the site. 12/16/05- DEC Piper spoke w/ Robin Heath. He will have someone contact the dept regarding the site. 12/29/05- DEC Piper received call from Dick Brownell of Malcolm Pirnie (consultant) regarding site. As per conversation, there is a dual phase extraction sytem running periodically at the site. There is currently free phase product in two of the monitoring wells. A file exists. File should be transferred to Remediation Group. 1/11/06- DEC Piper File transferred to Koon Tang. Remediation required. 1/12/06 - assigned to Jon Kolleeny Group. - KST 02/02/06: This spill transferred from J.Kolleeny to S.Kraszewski. Spoke with Richard Brownell from Malcolm Pirnie (914-641-2424). I inquired about the trench recovery system installed in September 1994 and any monitoring data available for the site and the wells. The trench system was installed as a dual-phase extraction system for several recovery wells located in the former tank area and the boiler room. The system operated from Nove 2004 to Nov 2005 when the motor broke down and had to be repaired. the motor is almost finished and the system will be operational soon. For the duration of the remediation process at this site, free product has been observed in the boiler room, Richard said. Bimonthly O+M reports have been keeping track of the system for some time since little free product was being recovered. I asked Richard to summarize the data

SUPERIOR PRINTING INK CO INC (Continued) **1000215465**

from the O+M reports along with a site diagram with the trench system on it along with the MWs surrounding the perimeter of the site. Also, the site will be undergoing redevelopment which will involve the excvation and removal of the soil on-site. This would be considered source removal of contaminated soils. For now, the system will be started up when ready and run until the data suggests otherwise. I also mentioned that in the near future, GW samples will be required to assess the degree of contamination present in the GW. Richard said no GW samples have been taken in quite some time. - SK 03/01/06: Richard Brownell from Malcom Pirnie returned my call to update me on site progress. The oil recovery system motor is fixed and ran for several days, extracting several gallons of oil. This oil had been collecting for 2.5 months while the system was under repair. When the system had been running in the past, oil was being extracted from two recovery wells, but now only one exhibits free product. This recovery well is located in the boiler room, near the former USTs. He will write up an update report for the site and send it out to me; due by 03/10/06. 03/10/06: Reviewed Summary of Oil Recovery System Results submitted by Malcolm Pirnie. Volume of oil recovered by the system over time shows a decline in product recovered. The system was shut down due to mechanical difficulties from November 17 2005 until February 24, 2006. No SVE data is given in the report. Product measurements seemed to be made randomly at different monitoring wells, few have current product thickness measurements. Some show one measurement with ND given and no follow-up measurements made. - SK 03/15/06: SK spoke with Richard Brownell about the summary report. I told him that SVE air sampling and GW sampling is needed, since it is long overdue. The GW samples must be analyzed for VOCs and SVOCs while air samples can be taken with a PID at the influent and effluent ports of the system. Spoke to J.Kolleeny about the report. He said to ask about the Monitoring and Maintenance Plan for the system before writing up a response letter. - SK 03/17/06: Spoke with Dick Brownell. I asked him if the recovery system had a Monitoring and Maintenance plan. He said he wasn't sure and probably didn't, but he would check to make sure. I said if none is found then he should put together a plan to cover activities from this point on. I told him that I would Email him the Excel tables to use as a template. He said that sounds good. Also, he mentioned about the RAP and if I had a copy. The only copy I have is a draft RAP from Malcom and Pirnie. Dick said he will check if Langan Engineers had sent a copy to DEC. Malcom and Pirnie is currently working on scheduling a round of MW measurements and samplings for analysis. I sent out the Email with the Monitoring and Maintenance tables. - SK 04/10/06: Dick Brownell called with news that they would be taking GW samples either Wednesday or Thursday this week. However, the SVE system is still out of service due to motor problems, so no influent or effluent air samples will be taken. Dick will let me know when exactly they will be collecting samples. - SK 04/17/06: Dick Brownell from Malcom Pirnie called. The sampling will be rescheduled for the 26th. He mentioned that the monitoring well with free product, BB-12, may be widened with a four inch slotted PVC pipe in order to vacuum out oil and water. This may remove the remaining product that is left on-site. No other wells exhibit any product. I asked Dick to write me up a letter summarizing the scope of this work. He said I should have it by Thursday. - SK 04/28/06: SK received a call from Malcom Pirnie, informing me that a letter requesting the installation of the MW where BB-12 is currently located. This work involves cutting a 4' by

SUPERIOR PRINTING INK CO INC (Continued) **1000215465**

4' section and excavating down to the water level and then removal of any free product encountered. If free product enters the pit consistently then a 4 inch slotted PVC will be advanced for continued product recovery. - SK 05/02/06: Sent out approval letter for additional oil recovery work. Also, the GW investigation results should be included in the oil recovery report. Spoke yesterday will Wyn Davies and gave him verbal approval and mentioned that four endpoint samples from the excavation would be needed. Work should begin by early next week, May 8-10. - SK 06/19/06: Reviewed New Sump Pit Proposal from Malcolm Pirnie dated June 19, 2006. Spoke with Wyn Davies about the proposed Sump Pit #2. I asked for 4 grab samples from the pit instead of 2. MW data and soil grab samples analysis results were included. All four soil grab samples detected slight SVOC exceedances. Water samples from MW-5 detected slight VOC contamination above TOGS, but no BTEX above TOGS. Discussed the proposal with J.Kolleeny. Gave Wyn a verbal approval followed by an approval letter. - SK 06/26/06: Dick Brownell (office:914-641-2424) from Malcolm Pirnie called. The additional sump pit has been installed, they seem to have found the pocket of oil and taken care of it, at least for now. Workers vacuumed out the pit to draw down the water. The recovery system is operational once again and Dick said they will have a report for me in July. BB-10, a monitoring point located next to the former tank location, has a 1/4 sheen. - SK 07/07/06: Dick Brownell (cell:914-806-9934) from Malcolm Pirnie called to inform me that no free product remains in any of the recovery wells. The isolated product from the second sump pit has abated. Also, he has found out that this site is slated for redevelopment sometime later this year. I told him that it looks like we are on the verge of closure, but I would prefer to visit the site and discuss this with my supervisor. A site visit is scheduled for July 19 at 10AM. - SK 07/19/06: Visited on-site with Dick Brownell from Malcolm Pirnie, Harold Rubin the RP and Dave Uteson the attorney for the developers interested in the site. We discussed the status of the recovery system. 11/09/06: Reassigned to Stephen Kraszewski to Chanda.(Chanda) 12/26/06: Kartik Chanda of DEC reviewed enter file and called Dick Brownel (office:914-641-2424) to get the update information regarding this site and left message to call back. 12/28/06: Chanda received a phone call from Mr.Dick Brownel(Malcolm Pirnie) he informed to DEC that his company is no longer with this site. This project have new consultant (Mr.Joe Landes ph:212-479-5400) assigned this site and the property has been transfered to new owner. 01/02/07: Chanda called Mr. Joe Landes (New Consultant) to get update information regarding this site. Left massage to call back. 01/02/07: Kartik Chanda of DEC sent a letter to the RP (Mr.Harold Rubin, requiring that a work report be submitted to DEC for review by 02/15/07. 01/04/07: Chanda received a phone call from new consultant LANGAN ENGINEERING & ENVIRONMENTAL SERVICES,P.C (Mr. John Gavras , Ph. 212-479-5406). Chanda sent a copy of previous letter to Mr.John and discuss regarding the site update status. 01/11/07: Chanda received an e-mail from John Gavras (Consultant).He gave the new owner's name and contact information: Bryan N. Cho, Vice President Bethune West Associates, LLC c/o The Related companies 60 Columbus Circle,18th Floor New York, NY 10023 2/15/07: Chanda received an additional sump pit excavation report prepared by Lagan Engineering and Environmantal Services dated on February 13, 2007. 3/01/07: Chanda received a Remedial Action Plan from Attorny (David Yudelson), prepared by Langan Engineering and Environmental Services dated

SUPERIOR PRINTING INK CO INC (Continued) **1000215465**

December 2006. 3/22/07: Kartik Chanda has reviewed the RAP and approved on 3/21/07. Chanda sent approval letter to RP(Bryan N. Cho) and his attorney (David Yudelson) and consultant (John M. Gavras), requiring that the RAP be implemented by may 6, 2007, and the Department requires five days advanced notice of any remedial work of the site. 9/6/07: On 8/28/07, Joe Sun (NYSDEC) visited the site and directed three post-remediation grab samples be collected from standing groundwater within the footprint of the proposed building. In addition, groundwater samples were collected from existing monitoring wells MW-5 and MW-6 located along West 12th Street. 9/21/07: Chanda received an electronic copy of Request for spill closure letter with the remedial action activities for this spill case. 9/24/07: Chanda received a hard copy of the remedial action activities report from Mr. David Yudelson (Sive, Paget & Riesel, P.C.). 10/5/07: Chanda reviewed the remedial action activities report and has the followings comments: 1. Excavation of petroleum-impacted soil in July to September, 2007. 2. This report indicates that post-remediation soil samples were collected bottom of the excavation. In total, 11 bottom soil samples and 7 sidewall soil samples were collected from the excavation. The level of contamination were below the TAGM RSCOs. Several SVOCs (Benzo(a)pyrene, 2-Methylnaphthalene) were detected in the four (4) end point samples and the level is not high. 3. VOCs and SVOCs were not detected of the post-remediation groundwater samples collected on the site. 4. The chlorinated VOC tetrachloroethene (PCE) was detected in the three (3) groundwater samples ranging from 12.9 ppb to 18 ppb. In addition the 2-dichloroethene (DEC)was detected at a concentration of 6.1 ppb. The proposed RAP indicated that In order to be protective of the health of the future residents, an appropriate vapor barrier (Grace Prepruf 300R) and passive sub-slab depressurization system (SSDS) will be installed in to the foundation construction. 10/12/07: Chanda discussed with Joe Sun (Supervisor) regarding the findings of the remedial action report and reviewed the passive SSDS and detail design of the suction pits on 10/11/07. Based on the information presented to the Department. DEC closed this spill. (Joe & Chanda) A NFA letter was issued to Mr. Bryan N. Cho (RP), Mr. David Yudelson(Attorney)and john Gavras (Langan) "

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Program: BCP
Site Code: 477443
Acres: 0.510
HW Code: C231082
SWIS: 3101
Town: New York City
Record Added Date: 01/02/2013
Record Updated Date: 12/31/2014
Update By: BXANDERS
Site Description: "Location: The site is located at 514 - 520 West 28th Street in New York City, New York County and has an area of approximately 0.51 acres. It is between 10th and 11th Avenues and is bounded to the north by West 28th Street and the south by West 27th Street. Commercial structures are adjacent to the east and west boundaries. Site Features: Presently, the site is undergoing redevelopment. Prior to remediation and redevelopment, the two lots that made up the site contained a vehicle rental company and a scrap yard. Current Zoning and Land Use: The site is zoned commercial (C6-3) and is located in a commercial and residential area of the West Chelsea section of the Borough of Manhattan. Past Use of the Site: The site has been occupied by several residential structures, laundry cleaning, metal works, manufacturing, motor freight storage, automobile repair and a scrap yard. Site Geology and Hydrogeology: Prior to remediation, subsurface material present below the site included historic fill from prior developments that may have been used to stabilize soil or to elevate the existing ground. The fill included concrete, brick, cinders, and other construction debris mixed, silt, sand and gravel and was generally present from 1-10 feet below ground. Below the fill the shallow subsurface soil at the site consists of sands and silts,

514-520 WEST 28TH STREET (Continued) **S112818548**

glacial till intermixed with lean clay. Depth to bedrock ranged from 15 to 25 feet below grade. The surface geology of Manhattan generally includes very thin layers of unconsolidated glacial deposits underlain by bedrock. Groundwater at the site is encountered at approximately 8 to 11 feet below ground surface. Regional groundwater flow direction is westerly toward the Hudson "

Env Problem: "Soil: Investigations found no evidence of significant VOC contamination in soil. Trimethylbenzenes and xylenes were present in one of the 21 soil samples at concentrations above their unrestricted use SCOs, but well below residential use SCOs. PAHs were observed in about half of the samples at concentrations indicative of historic fill. Metals are also present in soil at concentrations typical of historic fill and urban background. However, mercury concentrations ranged from non-detect to 69.6 parts per million (ppm). The unrestricted use SCO for mercury is 0.18 ppm; restricted residential is 0.81 ppm. The entire site has been excavated beyond the site boundary on all side and and to bedrock over about two-thirds of the site. The remaining soil meets unrestricted SCOs for all constituents. Groundwater: Cis-1,2-dichloroethene (DCE) was found in groundwater samples from two wells near the north-west corner of the site at concentrations up to 260 ppb. DCE has been documented in up-gradient groundwater and is not due to an on-site source. Soil Vapor: The presence of chlorinated VOCs in soil vapor and groundwater presents the possibility of vapor intrusion to future on-site buildings. The maximum concentrations of tetrachloroethene (PCE) and trichloroethene (TCE) were detected along the west boundary at the respective concentrations of 308 micrograms per cubic meter (ug/m3) and 828 ug/m3. The site has been excavated to below the water table and the new on-site building will have a water vapor barrier USTs Two USTs were exhumed in August 2013 and disposed of off-site. Two more wells were removed during the site remediation activities."

Health Problem: "The site is fenced and covered by concrete, people will not come into contact with site related soil and groundwater contamination unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains its water from a different source not affected by this contamination. Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air or buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site related contaminants due to soil vapor intrusion does not represent a concern for the site in its current condition. "

NYC SANITATION (Continued) **S117535323**

call back DEc. 2-5-15 - Obligado - I called Aarco again, left another message for John Bananno 08-03-2018 As per Remediation Section B Chief Vadim Brevdo, this spill case is reassigned from Vadim Brevdo to MD. S. Hoque as project manager effective August 3, 2018. -MDH 10/23/2018-M.Hoque: Spoke to AARCO(Kathrine and Mike)and discussed the latest status of the spill case. AARCO sent the tank test report. The report stated that a dry portion of the tank was leaked. Tank test was conducted on 2/4/2015 and was failed. Mike told that the tank was emptied. NYC Sanitation did not contact with AARCO for further investigation. (MDH) 4/2/2021-M.Hoque: An email sent to Carlos R. Maldonado-Roubert, Project Director, Public Buildings, Transportation Program Unit Tanks & Remediation requested to submit a site update report. (MDH) 4/8/2021-M.Hoque: The email below received from DDC: From: Aliberti, Jerry (DDC) Thu 4/8/2021 11:55 AM To: Hoque, MD S (DEC) Cc: Roberts, Harvey ; Heede, Connor ; Roger Stevens (PMS Construction Management) ; Tom Larison ; Wesolowski, Martin (Wesolowskim@liro.com); Samani, Afsar (DDC) ; Maldonado-Rouber, Carlos (DDC) ; Fullwood, Harvey (DDC) ; Walton, Ricardo (DDC) ; Brevdo, Vadim (DEC) Good morning MD S Hoque, Thanks for bringing this open spill to our attention. Through our Consent Order with NY State, DDC routinely addresses these spills with monitoring from DEC s Vadim Brevdo and his staff. This spill was generated by a DSNY contractor quite some time ago, but was never disclosed to DDC. However unfortunate that this spill has gone unnoticed by DDC, I m glad to inform you that funding is currently being procured to replace all 7 petroleum storage tanks at this site. Our design consultant, LiRo, and construction manager, PMS, are ready and able to commence this work as soon as the funds are allocated hopefully within 2 to 3 months. Feel free to contact me if you have any questions or concerns. Best regards, Jerry Aliberti, CCM - Deputy Program Director - Public Buildings Division Transportation Program Unit New York City Department of Design + Construction - 30-30 Thomson Avenue - Long Island City, NY 11101 T: 718-391-1073 - M: 917-731-6613 - aliberti@ddc.nyc.gov At 1:56 pm, another email received from Mr. Harvey Roberts of AECOM. Contract PW348-63 will add the Manhattan Repair Shop to its Site List. From: Roberts, Harvey To: Aliberti, Jerry (DDC) ; Brevdo, Vadim (DEC) ; Hoque, MD S (DEC) Jerry, Harvey Roberts Project Manager 605 Third Avenue, 2nd Floor New York, NY 10158 Direct: (212)896-0371 4/9/2021-M.Hoque: At 2:40 pm, Carlos Rouber(347-598-3941) of NYC DDC called me to discuss how to go forward to complete the site remediation. He said that AECOM will work for DDC and it will take 2 to 3 months to start the remediation. Hw will keep the Department updated on this matter. (MDH) 9/9/2021-M. Hoque: Sent an email to Harvey Roberts and others/DDC/AECOM regarding status of the site remediation. (MDH) 9/13/2021-M. Hoque: On September 13, 2021, below email received from the Consultant Attention MD Hoque: DDC has assigned The Manhattan Boro Repair Shop to Contract PW348-71, being performed by the firm, PMS. The PMS scope of work is to remove and replace seven USTs, including piping and related equipment. PMS is currently performing the site inspections needed to prepare its Pre-Design report. Harvey Roberts Project Manager 605 Third Avenue, 2nd Floor New York, NY 10158 3/10/2022-M. Hoque: The email below received for AECOM: From: Roberts, Harvey Sent: Thursday, March 10, 2022 12:06 PM To: Hoque, MD S (DEC) ; Aliberti, Jerry (DDC) Cc: Heede, Connor ; Roger Stevens (PMS Construction Management) ; Tom Larison ; Wesolowski, Martin (Wesolowskim@liro.com) ; Samani, Afsar (DDC) ; Maldonado-Rouber,

NYC SANITATION (Continued) **S117535323**

Carlos (DDC) ; Fullwood, Harvey (DDC) ; Walton, Ricardo (DDC) ; Heede, Connor Subject: RE: NYSDEC Spill case # 1410686, 640 W 26th Street, Manhattan, NY (DSNY Manhattan Boro Repair Shop) Mr. Hoque, NYCDDC transferred the remedial responsibility for Spill Case #1410686, DSNY Manhattan Borough Repair Shop, located at 640 West 26th Street, to another contractor. It is my understanding that NYCDDC the new contractor will replace the tank systems at the facility. Harvey Roberts Project Manager 605 Third Avenue, 2nd Floor New York, NY 10158 Direct: (212)896-0371"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 05/18/2001 Reassigned from Tomasello to Demeo 3/25/2004 Reassigned from Demeo to Sangesland 2/28/2005 Sangesland received a note from John Raguso stating that Emteque was going to begin it's remediation process at the site. The contractor will mobilize and then clean and close the remaining tanks onsite. Once the permits have been finalized, the contractor will then begin the major construction phase of the project to break ground, put in the required shoring and conduct the required remediation/soil removal activities. Contact: John Raguso 631-271-6622 7/7/05 Excavation has begun on the western tank field. When all soil is removed down to the water table (10-13 ft) the pit will be kept open and a vac truck will be on site for several days to vac out any petroleum floating on the water table. The site has several structural issues with surrounding buildings and a Security wall Several end points will be taken, but we already know that this whole area was coal ash fill from the late 1800's. We will expect to see SVOC's, but we do NOT want to see any VOC's. They will dig down to the water table, so that is as much soil removal as can be done. This work (on western tank field) should be finished by 7/15/05. Then similar work will be done on the eastern tank field John Raguso cell #646-529-6531 3/13/2006 Sangesland completed the review of a Spill Closure Petition Report prepared by Emteque Corp. (John Raguso - 631-774-9519) The report provides a history of the site including details of the 6 USTs on site. 3 were closed out several years ago and the other 3 were closed out in 2005 during this closure process. In additon, large soil excavations were made in the areas around these 6 tanks (3 eastern tanks & 3 western tanks) Due to structural issues, all of the contaminated soil could not be removed, but an overwhelming majority (over 95% according to Emteque) of the contaminated soil was removed. The end point sampling conducted in Oct 2005, show VOC and SVOC below TAGM and the GW samples were very good, with only some minor hits . The one item of some concern was Benzene. All 5 GW samples taken were above TAGM for benzene. The TAGM GW limit is 0.7ppb and the levels in all 5 GW samples ranged from 8.2ppb up to 43ppb. 3/30/2006 Sangesland confirmed with John Raguso at Emteque that another round of GW samples will be taken in April '06. If these numbers show a decline, the case may be closed due to natural attenuation. 5/22/2006

601 WEST 26TH STREET (Continued) **S104275653**

Sangesland reviewed a submittal from John Raguso of Emteque. As requested by the DEC, another round of groundwater samples were taken at the site. These samples showed the expected drop in contamination levels. While there are still some slight exceedences of the GW standards, the NYSDEC believes these levels will attenuate naturally over time. Based on the high commercial usage level of the area and the history of train yards, gas stations and historical fill the site is OK to close out as is with no further action Closure letter was sent to 601 West Associates c/o John Raguso with specific requirement to properly close out all monitoring wells on the site."

Remarks: "GAGE LINE BROKE ? CONTAINED IN BOILER RM. AND TANK ROOM - PETROL TANK CLEANER IS SUCKING UP OIL NOW. SENT TO DEP."

Contact Name:	TODD HASSOLD
DEC Memo:	"08/28/11-Hiralkumar Patel. 9:45 PM:- visited site. met Todd from Recovery. inspected boiler room. found water and oil in boiler room. Todd mentioned that they could not inspect the entire boiler room as water in rear of the boiler room is deeper and water level was rising. spoke with Mario, building super. he mentioned that there are no drains in the boiler room floor and only one sump pit in entire boiler room. sump pit has four pumps inside it. they had 3,000 gal vacuum truck which can not hold all the water/oil in the boiler room. also, they were not sure about condition in rear of the boiler room. absorbent pads were on water. as water level was rising, Todd was worried about impact to electric panels which is about 10 higher than water level in boiler room. Todd requested to turn on sump pumps to throw water only from bottom into city sewer system. he mentioned that by lowering water level, oil may impact the wall and other structure, but that can be cleaned easily with power wash at later time. but he was worried about impacting electric panels and other part of basement as water level was rising. after discussing with DEC Austin, approved Todd's request to turn on sump pumps so they can

601 WEST 26TH STREET (Continued) **S104275653**

lower the water level in boiler room. after they remove most of the water (only), they will remove remaining water/oil into vacuum truck. asked Todd to secure sump area with absorbent pads and booms to prevent any oil get into city sewer system. also asked him to turn off pumps frequently to check boiler room for any unusual thing. asked Todd to call with update. Mario mentioned that the entire tank system is turned off. Mario Onichimiuk **building super** Ph. (917) 817-1927 Todd Hassold Recovery Environmental Services, Inc. PH. (973) 940-3144 (O) (973) 896-6185 (C) Fax (973) 940-3146 email: thassold@recoverysrvs.com 08/29/11-Hiralkumar Patel. 9:45 AM:- visited site. cleanup crew was still on-site removing oil. two sump pumps were still working. currently, contractor is skimming off oil from top of water. after water level dropped, super inspected the rear end of the boiler room and found two buckets were knocked down during flooding and caused spill. inspected tank room which is in garage area. site has two 20,000 gal #6 oil ASTs. no spill inside the tank room. boiler room is right underneath the tank room location. as per super, no leak noticed from any fuel piping. asked Mario to call back for re-inspection, once basement is dry. 5:09 PM:- received call from Tom from Recovery. he mentioned that during cleanup, they found oil/water separator in back of the boiler room. he requested a site inspection. 08/30/11-Hiralkumar Patel. 11:00 AM:- visited site. met Tom from Recovery. inspected boiler room. Tom mentioned that sump pumps were turned off yesterday night and when they left, area around sump was clean. but they found more oil this morning. during cleanup last night, they found oil/water separator in boiler room. inspected oil/water separator. found oil on top of oil/water separator, but no indication of any oil overflowed the separator. two pipes enters into oil/water separator. one pipe goes to a loading dock above the boiler room (contractor will find out where this pipe comes from) and second pipe goes into a tunnel located at the west end of the boiler room. there is an hatch boiler room ceiling in area where the oil/water separator inlet pipe crosses to loading dock. tunnel is located along the boiler room ceiling in west end of the boiler room. this tunnel runs east-west and then north-south. this tunnel structure is completely within building footprint and underneath the loading dock area. found oil leak from the northern most end of the tunnel. currently active tanks are located right above the northern end of the tunnel and currently active supply/return lines running aboveground in tunnel. no sign of leak found from currently active lines. found two sumps in the tunnel: first along the western wall of the north-south portion of the tunnel and another along the southern wall of the east-west portion of the tunnel. found a pipe coming out of the western wall of the tunnel in the area south of sump in north-south section. Tom closed the valve on this pipe and water flow into the separator was dropped. as purpose of this inlet pipe was unknown, asked Tom to leave valve open. Mario mentioned that there were three 20,000 gal #6 oil USTs abandoned-in-place behind the western wall of the tunnel (north-south section). found oil seepage from the northern wall of the ease-west section of the tunnel. as sump pumps in tunnel are connected to the oil/water separator, it looks like whatever oil seeped into the tunnel was thrown into oil/water separator. as there was no oil recovery from the separator, oil followed the water discharge pipe into the main sump. informed Mario that main sump pumps must not be used until the cleanup is completed as water coming into sump may be contaminated (dissolved phase). all water from basement must be disposed off as contaminated

601 WEST 26TH STREET (Continued) **S104275653**

material. as per Mario, the former 20,000 gal tanks were under the loading dock platform. Mario gave copy of tank abandonment documents. as per the documents: - Don Carlo Environmental abandoned three (3) 20,000 gal USTs on 07/10/2001. tanks were abandoned using foam and lines were discontinued and closed - Malbro Inc. abandoned three (3) 20,000 gal USTs in Aug. and Sep. of 2005. tanks and all associated piping were filled with lightweight cellular concrete slurry mixture during inspection, found a 3,000 gal diesel AST for emergency generator. Mario mentioned that emergency generator is located on first floor. during inspection, found a coned vault in boiler room containing high voltage lines. this coned vault is located on other side of boiler room, opposite of the main sump in the boiler room. met with Sandy Hahn, property manager. informed her that leak in the boiler room, could be left over spilled material inside the concrete vault (if any) around the former 20,000 gal USTs. due to heavy rain over the weekend (harricane Irene), water may have entered around the abandoned tanks and pushed oil into the tunnel which end up into main sump via oil/water separator. asked her to submit a scaled site map with old/current tanks, piping, tunnel, sumps (in passage as well as boiler room) and oil/water separator. asked her to find out purpose of the pipe that comes out from the old UST area. also asked her to investigate in the old tank area. RXR SL Owner LLC. **property owner** c/o RXR Realty 601 West 26th Street, Suite 1260 New York, NY 10001 Attn.: Sandra Hahn **property manager** Director of Operations PH. 601 WEST 26TH STREET (Continued) **S104275653**

installing more monitoring wells) found around the western tank field - Emteque installed three (3) 4-inch monitoring well through the sidewalk equally spaced around the northeast corner of the intersection of 12th Ave and 26th street - three wells (MW-6, MW-7 and MW-8) were installed to a depth of 14 ft bg with 10 ft of screen - wells were set aprpox. 7 ft into the water table - no evidence of fuel oil contamination was identified in wells - soil samples collected at the water table during the well installation - no contamination found in soil samples collected during well installation - advanced five (5) soil borings (ETFSB-1 through ETFSB-5), to a depth of 12-16 ft bg, through the basement floor over the eastern tank field, collecting soil samples to a depth of approx. 4 ft below the groundwater table - soil samples collected at the water table during soil boring installation - no contmaination found in soil samples collected from soil boring in eastern tank field - 1 inch piezometers installed in three borings (ETFSB-1, ETFSB-2 and ETFSB-3) surrounding the tank field to the south and east - tunnel's wall contains groundwater on west side of eastern tank field - access was not provided to the north side of the eastern tank field - free phase product found on water in eastern tank field area - investigation revealed that contamination associated with leak from the house tank appears to be contained within the vicinity of the house tank between the south wall, the north adjacent tank, the western tank tunnel and has not migrated more than 10 ft east of the tank 4) 06/16/2003: Revised Proposed Petroleum Contamination Corrective Action Plan: - groundwater local to the western tank field is approx. 10 ft below the first floor slab, approx. 6 ft below surrounding grade and flowing predominantly westerly - groundwater lcoal to the eastern tank field is approx. 10 ft below the parking garage of the FBI unit and apparently not flowing, since the groundwater flow is restricted on its western margin by the tank tunnel and to the south and east by basement boiler room walls - a small local easterlly gradient in the vicinity of the plume around western tank field and also in eastern tank field is being induced by dewatering to prevent flooding of the building basement 5) Spill Closure Petition Report: <--------- missing 6) 05/12/2006: Spill Closure Petition Report - Update #1: - collected groundwater samples from well MW-1 and recovery wells RW-1, RW-2, RW-3 and RW-4 - found minor VOC contamination during second round (maximum 46 ppb Benzene in RW-1) - removed almost 53,000 gal of contaminated groundwater and 1,637 tons of soil from the site
- review of documents under spill #s: 0406966 and 0407003
+-/+-/+-/

601 WEST 26TH STREET (Continued) **S104275653**

petroleum odor and black staining were noted in the soil (PID: 83 ppm) at 6 ft bg. boring was extended to 11 ft bg. strong petroleum odors persisted in entire boring length (PID from 60 to 70 ppm). boring SB2-4 was temianted at 11 ft bg (due to obstruction) and was abandoned. based on notes from MTA, both borings were installed on eastern property line, but the #6 oil storage tanks (associated with spill #: 9304676) were located along the western side of the property. contamination found in borings under the west sidewalk of 11th ave, could be result of petroleum release from other tanks on property (owned by tenants).

601 WEST 26TH STREET (Continued) **S104275653**

(C) Fax (212) 867-9715 email: mborello@ebsllcnyc.com based on given information, a FBI rents building space on north side of eastern tank vault. 10:03 AM:- left message at FBI (212-384-5000). 09/01/11-Hiralkumar Patel. 8:00 AM:- received message from Mr. Borello. 12:25 PM:- spoke with Mr. Borello. he mentioned that based on available information, the new tanks are located right above the old western tank vault. they have collected water sample yesterday. he will submit scaled site map and water sample result by 09/08/11. 12:58 PM:- spoke with Eric at Emteque regarding missing initial spill closure report. Eric will check file and submit report, if available. Eric mentioned that they did Phase I report for Chase bank (lender) in 2010. Eric Telemaque Emteque PH. (212) 631-9000 email: eric@emteque.com 9/2/11-Vought-Received call from and spoke to Todd Hassold (Recovery Environmental Ph:973-896-6185) who noted that he had urgent issue on hand in that he was recovering approximately 25,000-gallons of oil/water mixture a day from the oil/water separator (source of water was seepage from adjacent Hudson River) and source of oil still undetermined. Hassold noted the liquid is mostly water with minor petroleum sheen. Hassold noted also that he was in the process of submitting a NYCDEP Discharge Permit Application to dispose of the water from the oil/water separator. Hassold noted that Clean Harbors was closed (disposal facility) and that he did not have the storage capacity for the 25,000-gallons per day over the weekend and such was requesting an emergency permit to discharge to the sewer. Vought spoke to DEC Elburn who noted that due to Hurricane (causing of flooding) that DEC had an emergency permit reqiuirement exemption and as such no permit was needed for DEC. DEC Elburn noted however that NYCDEP also needed to be contacted (NYCDEP Leslie Lipton Ph:718-595-4730). Hassold called Lipton and as per Hassold, Lipton did not respond but Hassold was told by another DEP employee to call 311. Vought suggested that Hassold send an email with a description of the issue to DEC Vought as soon as possible so that he may forward email to DEC Patel, Elburn and DEP Lipton. Vought received email from Thomas Domke (VP Operations Recovery Environmental) confirming phone conversation but not including any details of issue. Vought sent reply email with cc to DEC Patel, Elburn and DEC Lipton that a full description is needed and that Vought on vacation for next two weeks and as such all parties should be copied on full description. Vought and all parties received full description and Vought reviewed description with DEC Water Unit Elburn and sent reply email that DEC had no objections to discharge to sewers as long as NYCDEP requirements were met also. 09/07/11-Hiralkumar Patel. 10:41 AM:- received call from Todd. he mentioned that NYC DEP approved water discharge to city sewer. now the entire boiler room is dry. 10:50 AM:- received call from Mr. Borello. he mentioned that no dissolved contamination found in water sample collected from boiler room last week. asked him to submit result for review. he also mentioned that they are waiting for result of water sample that was collected to get DEP permit to discharge water from oil/water separator into city sewer system. currently, they are planning to drill some holes in tunnel walls for further investigation. Mr. Borello will submit scaled site map today. 12:21 PM:- received message from Eric. he did not found spill closure report prepared probably in Oct. 2005. 09/08/11-Hiralkumar Patel. 10:22 AM:- received email from Mr. Borello including site map (including oil tanks on property), desgin of oil/water separator system and groundwater sample result. no dissolved contmaination

601 WEST 26TH STREET (Continued) **S104275653**

found in water sample. as per the submitted site map, the entire site has total of fifteen (15) tanks: - one 5,000 gal tank at the end of garage ramp (from W 27th street), owned by property owner - two 20,000 gal tanks (currently in-service #6 oil tanks) in loading dock area, owned by property owner - one 10,000 gal tank in loading dock area, owned by Broadview - one 3,000 gal tank (diesel tank) in loading dock ramp, owned by Level III - four 275 gal tanks on 3rd floor, owned by property owner - four 275 gal tanks on 4th floor, owned by Broadview - two 250 gal tanks on 6th floor, owned by Level III reviewed PBS record again. PBS #: 2-600389 - three 20,000 gal in-service #6 oil ASTs in vault with access and three 20,000 gal closed-in-place #6 oil ASTs in vault with access. this PBS registration has expired in July 2006. as per PBS record, tanks owned by previous property owner. as per available information, the remaining three tanks were also closed-in-place in 2005. this PBS registration needs to be renewed/updated/closed with correct information (tanks closed/new property owner). PBS #: 2-604877 - one 10,000 gal diesel AST on legs/saddles. as per PBS record, tank owned by Wiltel Communications Group, Inc. this registration has expired in Dec. 2010. this registration needs to be renewed. PBS #: 2-607987 - one 275 gal waste oil AST on legs/saddles. as per PBS record, tank owned by Verizon. registration currently active. PBS #: 2-611131 - one 10,000 gal diesel AST in contact with imprevious barrier. tank was installed in Jan. 2000. as per PBS record, tank owned by Level III Communications LLC. registration currently active. this registration may need to be updated because as per Mr. Borello, Level III owns a 3,000 gal diesel AST (which is located in loading dock ramp). 2:27 PM:- spoke with Timothy Kimball at Level III Communications. he confirmed that Level III owns 10,000 gal diesel tank which is located in loading dock area and a generator is located next to the tank. he mentioned that they don't own 3,000 gal diesel tank. he also confirmed that they don't have any day tanks on 6th floor. during conversation, he mentioned that Level 3 Communication acquired Wiltel Communications Group in 2007-2008. informed him that the tank registration under Wiltel Communication (for 10,000 gal diesel tank) has not been closed out properly. asked him to close the PBS registration that is under Wiltel Communications's name. Timothy Kimball Level 3 Communications LLC. (also owns Wiltel Communications Group) Ph. (720) 888-4744 email: timothy.kimball@level3.com 2:51 PM:- left message Gregory Myka (315-432-8486) at Verizon to confirm that Verizon only owns one 275 gal waste oil tank at the site. 3:05 PM:- left message for Mr. Borello and informed him that tanks' information provided on map is not accurate. 4:36 PM:- received message from Mr. Myka from Verizon. he confirmed that they have only one 275 gal waste oil tank at the site. they don't have any other tanks. 4:42 PM:- received message from Mr. Borello. he mentioned that he got tank's information from chief engineer. but they will do site survey and talk to each tenant to find out exact number of tanks and its owners. 09/09/11-Hiralkumar Patel. 9:18 AM:- visited site. inspected boiler room. no oil or sheen found on water in entire boiler room. boiler room walls/floor and other oil impacted structures were cleaned. found clean water going into main sump from oil/water separator. frac tank was on W 27th street, but wasn't connected to main sump. 9:27 AM:- spoke with Mr. Borello. informed him that there are multiple PBS records for the subject site. he requested copy of PBS records. 3:49 PM:- sent email to Mr. Borello including PBS records. asked him to submit all on-site tank's information (location, size, owner etc.) by

601 WEST 26TH STREET (Continued) **S104275653**

the end of 09/16/11. informed him that PBS registrations must be updated/renewed immediately. email copied to Ms. Hahn. 09/14/11-Hiralkumar Patel. 10:43 AM:- spoke with Todd. he mentioned that insurance company requested an estimate for investigation. Todd is preparing the estimate and will submit to insurance company. 09/19/11-Hiralkumar Patel. received PBS application package in FedEx. as per submitted application, site has following tanks: - two 20,000 gal #6 oil ASTs in loading dock area; tank owned by property owner - one 5,000 gal #2 oil AST in basement (at end of garage ramp from W 27th street); tank owned by property owner - one 250 gal #2 oil AST in generator room on 3rd floor; tank being used to start up the generator; tank owned by property owner - one 250 gal #2 oil AST on 3rd floor along 12th Ave side by Verizon; tank being used to start up the generator; tank owed by property owner - two 250 gal ASTs on 3rd floor along 11th ave side; both tanks are closed-in-place; tanks owned by property owner - one 10,000 gal diesel tank in loading dock; tank owned by Broad View Network - one 250 gal #2 oil tank under the generator in central office on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank closed-in-place in central office on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank under the generator in data center on 4th floor; tank owned by Broad View Network - one 250 gal #2 oil tank closed-in-place in data center on 4th floor; tank owned by Broad View Network - one 10,000 gal diesel tank in loading dock (PBS #: 2-611131); tank owned by Level 3 Communication - one 247 gal waste oil tank in basement (PBS #: 2-607987); tank owned by Verizon - one 1,000 gal waste oil tank in basement; tank owned by FBI - one 500 gal oil tank on 2nd floor; tank owned by FBI there is no information about 3,000 gal AST observed in loading dock area. 09/20/11-Hiralkumar Patel. 12:18 PM:- received message from Mr. Borello. 4:29 PM:- spoke with Mr. Borello. he mentioned that they drilled some holes in both side tank vaults and found oil pouring out from holes. as such they will break larger access to these vaults for further inspection/cleanup. he will send pics that he collected today. he will also schedule a site inspection, once larger holes made in wall. 4:31 PM:- receive email from Mr. Borello including a pic and a video showing oil pouring out of vault. 09/23/11-Hiralkumar Patel. 1:18 PM:- received call from Todd. he mentioned that they drilled small holes in both vaults and found product coming out from eastern vault only. only water came out through holes in western vault. based on that observations, they made 18 inches by 24 inches hole in western wall of the eastern vault (vault towards the boiler room). found free product in the vault. Todd mentioned that the hole is about 2 ft above the product level in vault, so they are not concerned about overflow through this hole. as there is heavy rain for today and tomorrow, asked Todd to secure the hole to prevent any spill in boiler room, if water level rise in vault. scheduled a site inspection at 3:30 PM on 09/26/11. 1:55 PM:- spoke with Mr. Borello. informed him about possibilty of oil overflow from hole in eastern vault due to heavy rain. Mr. Borello has already spoken with building management/super and they will inspect area frequently. if any spill noticed, they will call contractor for cleanup. also informed Mr. Borello about no information on PBS application about 3,000 gal tank observed in loading dock area. Mr. Borello will confirm that and will submit revised PBS application. 09/26/11-Hiralkumar Patel. 3:30 PM:- visited site. inspected hole made in eastern tank vault area. found free product and water in hole. the area behind the wall was filled with construction debris

601 WEST 26TH STREET (Continued) **S104275653**

and filled with large concrete/stone pieces. met Ms. Hahn, Todd, Tom and Mike. informed them that the department requires delineation of soil/groundwater contamination on north and east side of eastern tank vault. no investigation needed on west and south of the eastern tank vault (as it is in tunnel area). Tom mentioned that they only found some water from holes mades in western tank vault area. asked Mike to prepare a scaled site map for area around tank vaults. asked Ms. Hahn to submit an investigation work plan for delineation. during meeting, Mike confirmed that the 3,000 gal diesel AST observed in loading dock area is owned by Broad View Network and there is no 10,000 gal tank owned by Broad View Network. Mike will submit revised PBS application to DEC Nick. forwarded previously received (incorrect) PBS application (which includes a check) to DEC Nick. asked him not to process application as a new updated PBS application will be submitted. 10/12/11-Hiralkumar Patel. received email from Ms. Hahn (at 11:39 AM on 09/30/11) including copy of revised PBS application and letter describing tank owners. PBS application was sent to PBS unit. as per revised tank owner letter, Broad View Network owns 3,000 gal diesel tank in loading dock and not the 10,000 gal diesel tank as mentioned in earlier PBS application submitted on 09/19/11. all other tank info is the same. 10/26/11-Hiralkumar Patel. 4:18 PM:- received email from Joe Horowitz (Horow137@aol.com) including copy of letter from DEP with conditional authorization for water discharge. 11/02/11-Hiralkumar Patel. 3:21 PM:- received email from Mike including a draft work plan for review. he proposed to install nine soil borings which will be converted to monitoring wells. these borings/wells are proposed around two sets of abandoned USTs. draft work plan doesn't include a work schedule. also need a site map with structures in basement (tunnel, sumps in tunnel, main sump in boiler room, oil/water separator and boring/well locations). 11/14/11-Hiralkumar Patel. 9:45 AM:- spoke with Mike. informed him that the draft work plan looks fine except it is missing two things: work schedule and a site map with structures in cellar (tunnel, sumps in tunnel etc.). he will submit final work plan. 02/03/12-Hiralkumar Patel. 4:31 PM:- left message for Mike. 4:32 PM:- sent email to Mike, Ms. Hahn and Todd inquiring update. 5:08 PM:- received email from Mike. they are in process of obtaining bids from drilling companies and will start work once contractor is selected. he mentioned that oil/water separator is working fine and no additional oil observed in basement. 02/07/12-Hiralkumar Patel. 2:13 PM:- sent email to Mike and asked him about schedule for contractor selection. also asked him about the amount of oil recovered since the oil/water separator turned on. email copied to Ms. Hahn. 02/21/12-Hiralkumar Patel. 11:15 AM:- received email from Mike. they are in final stage of hiring drilling contractor and will schedule work shortly. till now, they recovered less than 55 gal of oil. 07/24/12-Hiralkumar Patel. 2:27 PM:- received email from Mike. they have installed numerous borings and wells at the site. they are having some logistical problems in few areas and requested a site visit. 07/26/12-Hiralkumar Patel. 3:42 PM:- left message for Mike. asked him to submit status report for work done till now, prior to any site visit. 3:47 PM:- sent email to Mike and asked to submit status report for work done till now. informed him that site visit can be done only after completing review of the additional information. email copied to Ms. Hahn. 07/27/12-Hiralkumar Patel. 9:51 AM:- received email from Mike including site map and field notes. as per field notes, four wells installed at the site: two wells (Point A and Point B) on the west

601 WEST 26TH STREET (Continued) **S104275653**

side and two wells (Point G and Point H) on the east side of the former tank field. fuel oil smell noted during installation of wells Point A and Point B. Mike mentioned that a third well could not be installed on east side (in the FBI space) due to refusal. he also mentioned that driller is hesitant to drill in the boiler room due to possible flooding. 11:28 AM:- spoke with Mike. he mentioned that installation of four wells was completed on 07/23/12. dark soil and petroleum odors were noted during installation of wells Point A and Point B on the west side of the tank field. no sign of contamination observed in wells on east side (Point G and Point H) in FBI parking space. he does not know about any product on water as wells are not developed yet. asked him to develope the four wells, define site-specific groundwater flow direction and collect groundwater samples for VOC/SVOC analysis. informed him that wells should not be installed in basement boiler room due to possible flooding issues. asked him to submit detailed boring/well logs for review. 11:47 AM:- sent email to Mike and asked to submit boring/well logs, results of groundwater samples and site-specific groundwater flow direction by the end of 08/20/12. email copied to Ms. Hahn. 09/07/12-Hiralkumar Patel. 11:53 AM:- received email from Mike including soil boring logs and soil/gw data. received boring logs for borings Point A, Point B, Point G and Point H. Point A and Point B were installed in RXR Parking Garage and fuel oil smell noted in both borings at 10 ft depth. wells were installed to 25-30 ft depth in Point A and Point B. borings Point G and Point H were installed in FBI parking space. in Point G, bedrock encountered at 16 ft depth. found PID readings in Point A and Point B, but PID unit is not included in logs. as per lab report, four soil samples collected. one soil sample from 10 ft depth from each of four borings. no VOC contamination found in soil samples, but some SVOC compounds were detected (below cleanup standard) in soil samples. as per lab report, four groundwater samples collected from borings. no contamination found in groundwater samples. the site map does not show location of Point H. needs revised boring logs (with PID unit) and site map (with boring locations). 10/03/12-Hiralkumar Patel. 2:28 PM:- sent email to Mike. asked him to submit revised boring logs and site map. also asked him about amount of product removed till date using on-site recovery system. email copied to Ms. Hahn. 11/26/12-Hiralkumar Patel. went to site for inspection to see impact after hurricane Sandy. met with Mario. he mentioned that the entire basement was full of water, but no more oil observed on water. the oil/water separator, as part of the on-going cleanup, was emptied out right before storm. as boilers were damaged during storm, they have temporary boilers on street. they are also in process of converting to #2 oil. 01/15/13-Hiralkumar Patel. received message from Mike (at 1:11 PM on 01/14/13). he mentioned that he is waiting for response for data he submitted on 09/07/12. 11:33 AM:- sent email to Mike and informed him that the department responded on 10/03/12 and asked for revised boring logs and product recovery data, which has not received yet. 11:37 AM:- received email from Mike including copy of email that he sent on 10/09/12. email included revised boring logs and site map. 12:14 PM:- received email from Mike. they recovered less than 55 gal oil since oil/water separator installed. reviewed available boring logs, site map and sample results. borings A, B, G and H were installed to a depth of 25-30 ft bg (except boring G which was installed at 16 ft bg). maximum PID reading of 2 ppm was recorded at 10 ft in boring B which is located southwest of the former tank rooms. soil and

601 WEST 26TH STREET (Continued) **S104275653**

groundwater samples were collected from these four borings. no contamination found in soil or groundwater samples. 12:23 PM:- spoke with Mike. asked him to submit depth of borings/wells and former tank room reference to single point. 3:14 PM:- received email from Mike. he mentioned that points G and H inside the FBI space were to a depth of 15 ft and would be below the 6 USTs that were closed in place. he also mentioned that points A and B were advanced to a depth of 20 ft but from street grade and are not below the USTs. 01/30/13-Hiralkumar Patel. discussed with DEC Austin. based on site history, available sampling data and observations during site visit after hurricane Sandy, Austin asked to close the case. 1:59 PM:- sent email to Mike. asked him to submit spill closure report. email copied to Ms. Hahn. 02/28/13-Hiralkumar Patel. 2:43 PM:- sent email to Mike inquiring about closure report. email copied to Ms. Hahn. 03/22/13-Hiralkumar Patel. 4:50 PM:- received email from Sharon Dyal (sdyal@ebsllcnyc.com) from Environmental Building Solutions, including spill closure report. 03/26/13-Hiralkumar Patel. based on available information, case closed. 2:45 PM:- sent spill closure letter to Ms. Hahn. letter emailed to Ms. Hahn and Mike."

Remarks: "weather related - cleanup starting"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Cross ref #9304676 1/21/2004 Sangesland contacted several parties associated with the spill in this building. Apparently on 1/20/2004 a leak was discovered in an elbow of the fill line in the basement Tunnel Room of this address. Building Manager: Harold Brody - Responsible Party According to Paul at New York Combustion (718-763-6100), Mr. Brody called NY Comb. to ask them to come and fix the leaking pipe. Paul informed Mr. Brody that a spill would need to be reported. Neither Mr. Brody or Paul reported the spill. Romeo Santos at Don Carlo Environmental (718-857-2100) was hired either evening of 1/20 or morning of 1/21 to do the actual clean up of the oil. Mr. Santos says that he called in the Anonymous spill report #0311818 earlier this morning and then he sub contracted the cleanup work to Petroleum Tank Cleaners. All clean up work is complete. Paul from New York Combustion finished the pipe repair work. 1/23/2004 PTC called to say that they in fact DID NOT complete the clean up at the site. PTC was hired only to vac out the liquid portion of the spill. PTC was told by Don Carlo Enviornmental that they will be responsible for the final cleanup. Don Carlo says the clean up was done by PTC and DC will not be doing any further work. In frustration, Sangesland sent DEC Enironmental Control Officer Paul Blanton to visit the site. He asked why the owner or consultants failed to call in the spill within the 2 hours required by law. There was considerable finger pointing and no one took responsibility for the error. There was some discussion of how the oil went into a second unused tank. No ticket was issued. 3/31/2004 As of this date, the case is still open. No follow up documentation has been submitted to the DEC to close out this case. 10-06-05: NYCT performing borings for #7 line extension. Two boring performedin the area of this facility noted strong contamination (04-06966 & 04-07003). Boring logs and notes in eDocs. MCT 3/30/2006 Sangesland closed this case and referenced this to spill #9304676. All tanks on site were removed. Impacted Soil was excavated. Still some impacted GW as of 10/05 Consultant will take another round of GW samples in 4/06. This spill is closed "
Remarks:	"718-857-1800- DC Enviormental phone, this is the only info I could get out of caller. Might be a leak in the fill line."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/20/03. Contaminated soil letter sent to Walter Seelig (High Ridge Enterpr.). Also see spill # 9008960. YK. 11/21/03 Rommel Met Brian McCabe, senior geologist, on site. Soil samples collected from 8 to 16 feet below grade were contaminated. Groundwater (15 to 18 feet) was also sampled during the investigation and were impacted by BTEX and MTBE. They will excavate what soil they can and install a minimum of three monitoring wells (one outside by remote fills). Spill 9008960 reported TTF of 4000 gallon gas UST 11/14/1990 STIPULATION SIGNED RD 2/18/04. 3/18/04-Vought-Spoke with Rob Ferguson (631-586-4900). Subsurface Investigation report sent to DEC on 2/3/2004. Ferguson will send small CAP upon receiving subsurface investigation report review. Ferguson requires review of subsurface investigation as per STIP. Vought requested that another copy of the Subsurface investigation be sent to DEC. 4/1/04-Vought-Spoke with Tom Melia (F&N) and he requested that he be point of contact. Spill transferred from Rommel to Vought. 4/6/04-Vought-File review by

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

Vought: Contaminated soil letter sent form DEC Krimgold to High Ridge Enterprises. Site meeting minutes (Fenley & Nicol Brian McCabe)-11/25/03. Site meetin on 11/24/03. In attendance were DEC Rommel, F&N McCabe, F&N Melia and F&N Hole. The results of the sampling indicated that the contamination is located in the northern portion of the building. The effected area extended from the north end od the 4000 gallon tank excavation to the front of the building, approximately thirty five feet and from the center for the 550-gallon tank excavation west to the side of the building, approximately twenty feet. DEC recommended additional soil excavation without comprimising structural intergrity and required 1)installation of one well inside the building after backfilling completed 2)installation of two wells on sidewalk at the location of the former remote fills and twenty feet west of the bay door. Letter from Fenley & Nicol(Thomas Melia) to DEC(Rommel)-12/18/03. The new owner of the building indicated that his intended use for the building is as an art gallery . During building remodeling excavation was performed and tanks were discovered under floor. Two gasoline USTs (one 4000-gallon and one 550-gallon) were removed and were in separate lcoations fifteen to twenty feet apart. Upon removal of the bottom slab the soil encountered was saturated with liquid phase hydrocarbon . Depth to water expected to be 18' below grade. F&N proposes delineation of soil and groundwater contamination, installation of wells and additional soil excavation. See also Spill #9008960 reported in 1990 for tank test failure and administratively closed on 3/4/03. Letter from DEC Rommel-12/4/03. Letter approving installation of wells on the sidewalk on the south side of West 29th Street between 10th and 11th Avenues and requesting expediting of sidewalk permits. Letter from F&N(Melia) to DEC Rommel-12/18/03. At this time we are continuing our efforts to delineate the extent of the contamination... . Three monitoring wells installed (one inside and two outside building). At this time the owener of ther property feels that it would be too far costly to excavate the contaminated soil without jeopardizing the structural integrity of the building, and would prefer that we install an air sparge/soil vapor extraction (As/SVE) system to remediate the hydrocarbon impact . Please indicate your approval below. No approval indicated by DEC Rommel. Stipulation Agreement-1/15/04. Stip with deadline of 2/13/04 sent to: Walter Seeling High Ridge Enterprises, Inc. P.O. Box 2542 York, Pa. 17405. Subsurface Investigation Report (F&N-Melia 631-586-4900x190) -3/19/04. Investigation consisted of six soil borings, six temporary groundwater monitoring points and three monitoring wells. The central and eastern units are currently vacant and undergoing renovations for use as an art gallery . Depth to groundwater is 8-9' and flows northwest. Soil analyticals show 35ppb benzene(SP-1 at 12'), 882ppb benzene(SP-2 at 12'), 14ppb (SP-3 at 12'), 4900ppb benzene(SP-4 at 12'), 817ppb benzene(SP-5 at 12'). Groundwater analyticals show 2.5 ppb benzene(TW-1), 1459ppb benzene(TW-2), 45ppb benzene(YW-3), 2109ppb benzene(TW-4), 254ppb benzene(TW-5), 11ppb benzene(TW-6), 1200ppb benzene(FN-1), 206ppb benzene(FN-2), 4.2ppb benzene(FN-3). Report recommends Air Spage/Soil Vapor extraction system. NYSDEC requires: 1)signing of Stipulation before any further correspondence l 2)presence or absence of free product and interim remedial recovery if present 3)surrounding area site plan including property usage 4)additional wells east of FN-2 and well north of FN-2 to calculate required radius of influence for system design. 4/6/04-Vought called F&N(Milea) to repeat Stipulation requirement and left message to

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

return call to DEC. 4/7/04-Vought-Received faxed copy of STIP already implemented by DEC Kunkel on 2/18/04 (Copy of original not in file). 4/8/04-Vought-Sent letter to High Ridge requiring well installation north of FN2 and east of FN2, submission of monitoring well data and surrounding property sketch. 4/16/04-Vought-Wells will be installed next week (tentatively). Wells for pilot test will also installed. Mailing address is: High Ridge Enterprises P.O. Box 2542 York, Pa. 17405 4/18/04-Vought-Received message from David Oloke (F&N-631-586-4900x144) that he is new project manager for site. Vought called David and two additional well installed (one north of FN2 and one east of FN2). All onsite wells were sampled. No free product in new wells. Four vapor wells installed and air sparge well will be installed. DEC will receive pilot test report by 7/15/04. 6/23/04-Vought-Spoke with David and initial results faxed on 6/9/04. .5 of free product in well in 1 vapor well sent for fingerprinting. EFR not effective. DEC requires recovery of free product and submission of pilot test. 9/2/04-Vought-File review by Vought: Groundwater results (F&N)-6/23/04. Groundwater analyticals show 1.2ppb benzene(FN5), 1.8ppb benzene(FN4), 14ppb benzene(FN3), 26ppb xylene(FN3), 474ppb benzene(FN2), 621ppb MTBE(FN2), 8ppb toluene(FN2), 2065ppb benzene(FN1), 47170ppb MTBE(FN1), 4106ppb toluene(FN1) and 2761ppb xylene(FN1). Addendum to the direction beneath the site was found to be toward the north. Property uSubsurface Investigation Report (F&N)-7/14/04. On 5/7/04 two additional monitoring wells were installed. On June 4, 2004 the AS/SVE pilot tests were conducted . One inch of floating product was detected in P2. The results of the AS pilot test indicated that the introduction of air pressure into the formation below the contaminant zone is a viable remediation technique . Report recommends commencement of an interim remedial measure to recover product from P-2 via weekly EFR. Report also recommends installation of another well to replace P2. Vought called David from F&N to approve of workplan. Well installation will be included with final remedial action plan. Vought sent letter approving of proposed workplan (installation of well at P2 and IRM) and included requirement of determination of groundwater flow direction and surrounding property sketch. 9/3/04-Vought-Received fax from Oloke (F&N). The groundwater flow sage of downgradient sites to the north are a parking garage and an art studio. Vought called Oloke and approved workplan as per 9/2/04 letter. Vought called Oloke and he will begin drafting RAP for submission to DEC. 9/29/04-Vought-Spoke to David F&N and he will be sending RAP in overnight. 10/1/04-Vought-Reviewed RAP received by DEC on 10/30/04. Site is currently occupied by a masonary block structure which is subdivided into three sections. An art gallery occupies the western unit. The central and eastern units are currently vacant and are undergoing renovations for use as an art gallery. RAP proposes weekly recovery of free product from FN2 via a peristaltic pump until well is converted to a 2 product recovery well designated at FN6. Two additional wells will be installed in the interior of the building. Monthly groundwater monitoring and quarterly sampling. Five air sparge and four SVE wells will be installed in the interior of the building. Remedial system will be installed on the roof of the building. Daily monitoring for the first week, weekly monitoring for the first month, monthly maintenance visits and effluent sampling, quarterly effluent sampling and groundwater sampling. Vought sent letter approving of RAP. 10/28/04-Vought-Spoke to David(F&N) and FN1 must be reinstalled due to it was a bent well. Wells will be

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

installed during the next few days. 9/27/05 - SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 11/9/05 - Obligado - Review System STartup Report. AS/SVE system consists of 5 HP compressor and 3.5 hp blower and 5 air sparge wells and four soil vapor extraction wells. Effluent air stack results show 31.4 ug/m3 for benzene. Operation and maintenance schedule proposes monthly SVE effluentmonitoring and Quarterly Status Reports. System started in May 2005. Due to noise generation, the system only runs from 9pm to 6am. Quarterly Status Report - Groundwater analyticals show 4.7 ppb benzene (FN3), 50.1 ppb MTBE (FN2), 78.3 ppb MTBE SVE5, 1.7 ppb MTBE SVE3. Benzene effluent show 46.74 ug/m3. 5/15/06 - Obligado - Called David Oloke. Asked that he send recent Quarterly Status Reports. 5/22/06 - Obligado - 2Q06 Quarterly Status Report, submitted by Fenley Nicol, Inc. Ground water analyticals show 9 ppb benzene 35 ppb MTBE in FN3 and and 3.7 ppb benzene in FN4. Benzene effluent below STIP limits. There is duplicated data on Table 2 Air Sampling Results, probably a cut and paste error, call Dave Oloke, he said he will look into it at send a new table with the electronic copy. Report recommends continuing system operation. 6/23/06 - Obligado - Called David Oloke. Asked for the corrected Table. He said he will email it to me. 10/23/06 - Obligado - Called David Oloke. Left message requesting most recent quarterly status report. David Oloke call me back and said he would send the report shortly and he would correct the typo on Table 2. 1/30/07 - Obligado - Review 3Q06 monitoring report. Typo in 2Q06 table has been fixed in cumulative table. AS/SVE system online and working at 100% maximum capacity. Air samples collected monthly. Benzene in gw exceeds standard at 4 ppb. in 2 wells. All effluent below STIP guidance. Benzene detected in VES/AS effluent at 4.86 ug/m3 in 6/06. Recommends continued operation of the system. Review 4Q06 monitoring report - AS/SVE system operating at 100% capacity 9 hours per day. All effluent samples below STIP guidance. BTEX effluent at 361.71 ug/m3 during 10/27/06 Report recommends continued operation of system. GW results show minor exceedences of Benzene - max concentration at 8 ppb in FN3. However gw monitoring does not include FN1 where highest contamination was found. 9/13/07 - Obligado - Review 1Q07 monitoring report. According to the report, the AS/SVE syste is running at 100% capacity. System is still pulling vapors, at a flow rate of 50 cfm and a concentration in March 07 of 111.30 ug/m3 BTEX. Benzene (12.8 ug/m3) was below the STIP limit. Recommends continued operation of AS/SVE system. 10/26/07 - Obligado - Review 2Q07/3Q07 monitoring report. Benzene detected during quarterly monitoring at MW3 adn MW4 slightly above standards. Analytical results of air stream were below the max benzene STIP Limit. Recommneds continued operation of the AS/SVE System. 9/3/08 - Obligado - Review 1Q08 monitoring report. AS/SVE running for 9 hours a day at 100% capacity. Effluent collected monthly. Benzene detected slightly above standards in MW2,3,4,and5. System effluent ND for BTEX. 6/3/09 - Obligado - REview 1Q09 monitoring report. Requests to shut down system for a 1 year post remedial monitoring period to determine if system was effective and monitor for rebound. Sent a letter to Seeling cc to David Oloke approving system shut down temporarily but requiring sampling of monitoring wells MW1, MW6, adn MW7 beneath the building as required by approved RAWP. Required 90 days to submit an update report on system shutdown and additional sampling. 12/3/09 - Obligad - Met with David Oloke on site. The AS/SVE system was down as proposed. According to David they were unable to collect ground water samples from the three sampling

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

points. According to David the water he collected was too silty. He recommended doing an exposure assessment to close the spill number or to install the well in an alternate location in the building entrance. I told him I would review the spill file to determine if that location was acceptable. 12/22/09 - Sent email to Mr. Oloke - The Department has determined that the proposed location is cross-gradient and outside the of the source area, and would not provide the necessary data to confirm the site remedation was successful. As such, the Department reiterates its requirement in the June 2, 2009 letter, to sample the 3 monitoring wells FN1, FN6, and FN7 (as originally proposed in the approved RAWP) and submit a Monitoring Report within 90 days of this notice. If sufficient ground water can not be obtained from these sampling points (after exhausting all available well sampling and well development techniques), than a Remedial Investigation Work Plan (RIWP) to install a new monitoring well in the gallery in between FN1, FN6, and FN7 must be submitted within 90 days of this notice. The RIWP should contain an implementation schedule. 10/9/10 - Obligado - Email from David Oloke I would like to inform you that we're scheduled to be onsite to install one groundwater monitoring well on the sidewalk directionally towards the source area beneath the building in order to determine the current groundwater quality beneath the site. We scheduled for Monday 25 through Wednesday 27. 1/14/11 - Obligado - Email from David Oloke We are set to go back to High Ridge, 524 West 29th Street in Manhattan on Monday 1/17/11 to install the groundwater monitoring well for spill inactivation. The client is making plans to be onsite as well . 1/19/11 - Obligado Email from David Oloke We core drilled through the foundation wall and could not get the well rods to the desired depth due to refusal. So we back to square one. Our client spoke with the tenant again yesterday to see if he will allow us access into the building. 4/1/11 - Obligado - I sent email to David Oloke related to potential alternative methods for obtaining ground water samples at the site since the diagonal well method was not successful, such as snaking new tubing into the existing system wells, and high vaccuum extraction to obtain ground water samples from the sparge wells. I asked Mr. Oloke to look into these options, as well as any other methods and report back the findings to the DEC. 3/12/12 - Obligado - I reviewed a Site Status Report. They collected samples from MW1, MW6, and MW7 under the gallery slab using the vacuum extraction technicque. Samples were collected in June and November of 2011. During the most recent sampling event in NOvember, the maximum VOCs was 117.3 ug/L in MW-7. MW1 had 63.42 ug/L total VOCs, and MW6 had 59.75 ug/L VOCs. Several compounds were slightly above standards. The greatest exceedence was 36 ug/L napthalene in MW7, which is above the standard of 10 ug/L. In NOvember they turned on the AS/SVE system and allowed it to run for four weeks. At the end of the four weeks , air samples were collected and all the targeted VOCs were ND. Based on the above, they requested closure. Ground water contamination has been greatly reduced. The AS/SVE system reached asymptotic recovery rates. Additional remediation is not warranted nor feasible. After discussion with DEC Hussein and Ketani, this spill is closed. A spill closure letter ahs been sent to Walter Seeling, cc to David Oloke."

Remarks: "caller was hired to remove a few tanks from the site - x-ref spill # 9008960 - they encountered contaminated soil - they are stockpiling soil now"

DEC Memo:	"ttf letter needed 3/10 ttf letter sent//mt 8/25/05 - Raphael Ketani.

SPOONS (Continued) **S106868734**

Case transferred from Tipple to Ketani. 9/1/05 - Raphael Ketani. I received a FAX from J.M. Mechanical ((718) 991-2300) on 8/30/05 with a 3/10/05 letter that was sent by Michelle Tipple concerning the tank tightness testing that was to be performed. J.M. Mechanical wanted to know what was supposed to be the next step in the tank evaluation procedure. I spoke to Joseph Zengotita of J.M. and he told me that they tested the tank and it could not hold the pressure. They found that the manhole gasket was rotten and replaced it. Then they redid the test and found that the pressure was holding. I next spoke to Jamie Perna ((212) 977-0000, ext. 236) of Mann Realty Associates regarding the building and the tank. She told me (from her file) that the PBS number is 2-605982, the tank is above ground, but in contact with the ground, and that it holds 1,500 gals of #2 oil. The expiration date of the PBS permit is 5/17/09. She told me that the property manager is Debbie Perna (ext. 238 - her mother). Ms. Perna's cell is (347) 723-8402. I spoke to Debbie Perna and told her to send me a copy of the successful tightness test results report from J.M. Mechanical, a statement that the source of the pressure leak was the rotten manhole gasket and that it has been replaced, and that there was no release of product from the tank or system and no environmental impact. She said she would do this. 9/15/05 - Raphael Ketani. Martina Mauleon, secretary for J.M. Mechanical, called asking what information did DEC want regarding the tank testing. I told her that if the second tightness test was successful, then she should include wording that J.M. Mechanical believes the rotten manhole gasket was the problem and it has been replaced, that the second test passed (include the actual test report), that there wasn't an oil leak, and that there was no environmental damage. She said she would send the letter to Ms. Perna. I told her that would be fine. 10/17/05 - Raphael Ketani. I spoke to Debbie Perna by cell phone. She said she had called J.M. Mechanical and they told her she should get the tank test report this week. Ms. Perna said she will FAX it to me ASAP. 11/8/05 - Raphael Ketani. I finally received the successful tank test from J.M. Mechanical. Everything looks good. So I am closing the case."

Town:	New York City
Record Added Date:	08/06/2019
Record Updated Date:	12/28/2021
Update By:	MDMACCAB
Site Description:	"Location The 29,315 square foot (0.67 acre) site is within the Chelsea neighborhood of Manhattan, bearing the addresses 241 251 West 28th Street and 240 250 West 29th Street. The site is bound by West 29th Street to the north, a 13 story commercial office building and a 12 story commercial office building to the east, West 28th Street to the south, and a five story industrial manufacturing building and a seven story public institutional building to the west. Current Zoning and Land Use The current zoning designation is M1 6D, which permits residential, commercial, and industrial uses. The current surrounding parcel uses are a combination of residential, commercial, industrial, and institutional. The site is presently (December 2021) undergoing construction of two residential towers.. Past Use of the Site The site had been occupied by commercial and industrial facilities as early as 1890. Past site uses included a lumber yard (circa 1890), a fur processing and cleaning company (1927 1934), an auto repair facility (circa 1934), garages with petroleum bulk storage (1930 to 2011) and parking facilities with hydraulic lifts and suspected hydraulic USTs (1920 2014). During its operation as a parking lot and garage, the site was assigned a NYC restrictive E zoning designation in April 2011 for hazardous materials (E 137), air quality, and noise (E 276). Site Geology and Hydrogeology Subsurface stratigraphy at the site consists of historic fill underlain by native soil consisting of silt, sand, gravel, and boulders overlying bedrock. The fill extends to varying depths ranging from about 3 to 20 feet below grade and generally consists of loose, black to gray to brown, fine to coarse sand, with varying amounts of gravel, silt, rock fragments, brick,

241 WEST 28TH STREET (Continued) **S125465251**

	tile, concrete and ash. Mica schist bedrock was encountered at depths ranging from about 21 feet below grade in the southern portion of the site to 63 feet below grade near the northeast corner. Groundwater depth ranges from about 15.8 to 17.4 feet below grade. Regional groundwater is inferred to flow 0.75 miles west toward the Hudson River, following the influence of local topography."
Env Problem:	"Remediation at the site is complete. Prior to remediation, the primary contaminants of concern in soil were primarily associated with historic fill present across the site that included metals and semi volatile organic compound (SVOCs). Ten underground storage tanks (USTs) were located and properly exhumed and properly disposed of off-site. Contaminants associated with historic fill were present across the site. Volatile organic compounds (VOCs) were present in groundwater above water quality standards. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan."
Health Problem:	"Remedial actions are nearly complete at the site and measures are in place to control the potential for coming in contact with residual contamination remaining at the site. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MILLER DEC SIGONA REASSIGNED TO MILLER ON 1/23/98 3/5/10 - Austin - Reassigned as TTF to Jake Krimgold for further investigation. - end 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo 8/24/12 TJD Spill cross-referenced to PBS#. 10/09/14-Hiralkumar Patel. reviewed available documents for DEC DeMeo. site name: West 30th Street Heliport PBS #: 2-342211. as per PBS record, the site has/had following tanks: - one (1) 8,000 gal other product AST on saddles, in-service, installed in Apr. 1997 - one (1) 8,000 gal other product AST on soil, converted to non-regulated use, installed in Apr. 1997 (this could be same tank as above) 10/27/14 TJD File review - based upon above information obtained from Patel. - eleven (11) 550 gal other product USTs, closed-in-place, in Apr. 1997 - five (5) 550 gal other product USTs, closed prior to Mar. 1991 other spills #: 8804707, 8901091, 9504121 spill # 8804707 was reported on 08/29/1988 by USCG due to petroleum patch. case closed. spill # 8901091 was reported on 05/04/1989 due to tank test failure for eight (8) 550 gal jet fuel tanks. case closed. spill # 9504121 was reported on 07/06/1995 by USCG due to 40 gal jet fuel spill result of collision between two helicopters. case closed. reviewed documents on e-docs for PBS: - 12/18/1988: tanks 9 to 16 (550 gal jet A fuel) were passed - 12/07/1991: tanks 1 to 8 (550 gal jet A fuel) were passed - 06/11/2007: N. D. Eryou sent letter to DEC Falvey. he mentioned that the eleven (11) 550 gal USTs owned by Port Authority and they were conveyed with the land lease to NYS DOT (Aviation Division). he was not present during tanks abandonment in 1997, but believed that NYSDOT was going to remove the USTs as part of the stormwater upgrades that were underway as part of the immeidate adjacent Route 9 upgrades. 10/27/14 TJD File review. Based upon summarized review discussed above - (8) 550 gallon UST's passed tightness tests (Tanks 9 to 16) prior to reported spill (1988). Remaining (8) 550 gallon UST's (Tanks 1 to 8) passed a tighness test subsequent to reported spill (1991). As per PBS inspection 1/9/07 (Falvey) all UST's have been permanently closed on site. New 8K AST's are currently in operation at this facility. A total of (3) spill reports have been reported and closed at this facility since initial TTF report. Unknown what tank # failed the tighness test, however, all UST's are reported out of service. Due to proximity of the failure to the Hudson River if a significant petroleum discharge had occurred impacts to the adjacent surface waters would have been observed. No further action is required at this time. Spill is administratively closed."
Remarks:	"550 GALLON TANK FAILED HORNER EZY CHECK WITH A LEAK RATE OF .179GPH, TANK #8, PARTIALLY PUMPED OUT TANK, WILL FINISH PUMPING TANK LATER TODAY."

Town:	New York City
Record Added Date:	05/29/2019
Record Updated Date:	09/30/2021
Update By:	SMQUANDT
Site Description:	"Location The site is located at 538-542 West 29th Street in the Chelsea neighborhood of Manhattan, and is identified on the Manhattan Borough Tax Map as Block 700, Lots 55, 56, and 57. The proposed BCP site includes all three tax lots. The site is located on southern side of West 29th Street and is bound by West 29th Street to the north, mixed-use residential/commercial buildings followed by the elevated High Line and Tenth Avenue to the east, a multi-story residential apartment building followed by West 28th Street to the south, and a multi-story mixed-use residential and commercial building followed by Eleventh Avenue to the west. The No. 7 subway southern extension runs north-south below Eleventh Avenue, which is

542 WEST 29TH STREET (Continued) **S125298846**

about 200 feet to the west of the proposed BCP site. Site Features The site occupies a footprint of about 9,900-sqaure-feet (0.227 acres) and is currently improved with one three-story commercial building (Lot 55), one three-story mixed-use commercial and residential building (Lot 56), and one two-story warehouse (Lot 57). The buildings are currently vacant. Current Zoning and Land Use According to the New York City Planning Commission (NYCPC) Zoning Map 8b, dated January 22, 2015, the site is located in a C6-3 commercial district. C6-3 includes a wide range of high bulk commercial uses. Buildings in this district are often corporate headquarters, large hotels, department stores, and entertainment facilities in high-rise mixed buildings. The existing zoning is consistent with the proposed commercial-use development. The surrounding area is primarily commercial and residential, but also includes manufacturing buildings, subway tunnels, public parks, churches, schools and day care centers. One sensitive receptor, Bright Horizons Day Care at Hudson Yards, is located within the immediate area (less than mile) of the site, about 100 feet to the north at 529 West 29th Street. The nearest ecological receptor is the Hudson River, located about 1,300 feet west of the site. As a result of the City Environmental Quality Review (CEQR) process, Block 700, Lots 55, 56, and 57 were assigned an E-Designation (E-142) on June 23, 2005 by the New York City Department of City Planning (NYCDCP) as part of the High Line/West Chelsea Rezoning (CEQR No. 03DCP069M). The E-Designation requires coordination with the New York City Office of Environmental Remediation (OER) to obtain a Notice to Proceed (NTP) or a Notice of No Objection (NNO) prior to obtaining building permits. The E-Designation addresses environmental requirements for hazardous materials (Hazmat), noise (window wall attenuation and alternative means of ventilation), and air quality during development. Past Use of the Site The site and surrounding area have been developed since the early 1800 s. The site was developed prior to 1890 with two unspecified use buildings which were demolished between 1899 and 1922. Lot 57 was formerly used as a lumber storage yard (1909-1944) and various auto repair facilities over a span of about 50 years (1945-1994). In 1995, the Lot 57 was purchased by Gotham Seafood Corporation, a seafood wholesaler. Sanborn maps indicate that Lots 55 and 56 were improved with mixed use-residential and commercial developments from about 1890 to 2005. Certificates of Occupancy (CO) provided by the New York City Department of Buildings (NYCDOB) identified an auto repair shop within Lot 56 in 1924 and 2012. In addition, available CO s for Lot 55 dated 1970 and 1987 identified manufacturing and a heating plant with potential fuel storage. Currently, all of the lots are vacant. Adjoining properties were historically used for residential, commercial, industrial and manufacturing operations. Site Geology and Hydrogeology Historic fill material was encountered immediately beneath the building foundation slabs and extends to depths varying from about 7.5 to 10 feet below grade surface (bgs) at 540 West 29th Street (Lots 56), and from about 3 to 12 feet bgs at 542 West 29th Street (Lot 57). Historic fill material was encountered below the cellar slab at 538 West 29th Street (Lot 55) at depths ranging from 3 to 5 feet below cellar grade. The historic fill predominately consists of brown fine- to medium-grained sand with varying amounts of gravel, concrete, asphalt, charcoal, slag, ash, wood, brick, and glass. The layer of historic fill is typical for this area of New York City. The fill layer is underlain by native soils typically consisting of

542 WEST 29TH STREET (Continued) **S125298846**

	reddish-brown to olive, fine- to medium grained silty sand with varying amounts of gravel and silt. Petroleum impacts, evidenced by odors, staining, and/or photoionization detector (PID) readings above background levels, were apparent in two soil borings (SB03 and SB06) at depths ranging from about 0 to 10 feet bgs and 14 to 15 feet bgs, respectively. Groundwater was encountered at depths ranging from 3.2 feet below cellar grade at 538 West 29th Street (Lot 55), 9.2 to 11 feet bgs at 540 West 29th Street (Lot 56) and from 8 to 11.51 feet bgs at 542 West 29th Street (Lot 57). Based on the well gauging results, groundwater appears to flow west toward the Hudson River, which is relatively consistent with regional topography."
Env Problem:	"Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available."

Site Description: "Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan."

Health Problem: "Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed

FORMER GUARDIAN CLEANERS (Continued) **S113916768**

beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

Site Code: 440109
Site Description: "Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "
Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan."
Health Problem: "Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

Site Description: "Location: The 25,000 square foot (0.57 acre) site is located at 462 Hudson Street in the Borough of Manhattan in an urban area. The site is bordered by Hudson Street to the west, Barrow Street to the north, one and two-family brownstones to the east, and by Morton Street to the south. Site Features: The site is occupied by two 6-story apartment buildings with commercial uses on the first floor along Hudson St. The dry cleaner occupies the northwest corner of the first floor of the northern building. Current Zoning/Use(s): The site is zoned as C1-6/R6 for commercial and residential uses. Historical Use(s): The on-site building was constructed in 1925. A dry cleaner has operated at the site since at least 1986. The site is a RCRA large quantity generator (EPA ID # NYD981141948) of spent solvent, waste code F002. A monitoring well installed in Hudson Street, directly to the west of the dry cleaner during an evaluation of 75 Morton St by NYCSCA yielded a gw sample containing 2,900 ug/l PCE. Site Topography, Geology and Hydrogeology: The Site is generally level and is at an elevation of approximately 36 feet above mean sea level. The geology of New York County consists of unconsolidated glacial deposits overlying crystalline bedrock. Soil cores collected during investigation on a nearby site generally consisted of historic fill material containing brown sand and silt with fine gravel and brick fragments to a depth of 8 to 15 feet below ground surface (bgs). The Site is located 1300 feet east of the Hudson River. Groundwater in the vicinity of the site was encountered at approximately 27 feet bgs and is expected to flow to the west towards

HUDSON DRY CLEANERS (Continued) **S110246833**

the Hudson River."

Env Problem: "Nature and Extent of Contamination: Information is based on the results of a site characterization investigation performed at the nearby property at 75 Morton Street by the NYC School Construction Authority. That investigation was triggered by the discovery of elevated levels of cVOCs in groundwater on that site. The subsequent Supplemental Site Investigation (SSI) indicated that elevated concentrations of cVOCs (namely PCE) existed along the adjacent sidewalk on the eastern side of Hudson Street. The SSI ascertained that the 75 Morton Street site was not a source of the contamination. Eleven temporary groundwater wells were installed on and upgradient from the Morton Street property and samples were collected for lab analysis. One well was installed immediately in front of and downgradient from the Hudson Cleaners site. Groundwater: Tetrachloroethylene (PCE) was detected at elevated concentrations in groundwater samples taken immediately in front of the Hudson Cleaners site. PCE was detected at a concentration of 2900 ppb at that location, with concentrations decreasing in the downgradient direction consistent with the inferred contaminant plume. The groundwater flow direction was confirmed to be from east to west based on surveyed groundwater elevation measurements collected during the 75 Morton St. SSI. Building owners' contractor completed Phase II scope of work at and around Hudson Dry Cleaners in the fall of 2016. The groundwater sample taken in front of this site had only 2.1 ppb PCE, versus 2900 ppb in May 2013. Soil Vapor & Indoor Air: The RP s consultant mobilized to the site on 27 November 2017 to collected six collocated sub-slab and indoor air samples (IA-01/SV-01 through IA-06/SV-06) and one ambient air sample (OA-01). According to the NYSDOH SVI Guidance Matrix the response actions for samples IA-01/SV-01 (1200 / 1300 ug/m3 PCE)and IA-02/SV-02 (120 / 140 ug/m3 PCE)are Mitigate . The Mitigate response action at these locations was triggered by the presence of PCE in the indoor air and soil vapor. Sample set IA-01/SV-01 was collected from the basement of Hudson Cleaners, and sample set IA-02/SV-02 was collected from just east Hudson Cleaners footprint. Significant Threat: Evaluation of significant threat will be made following completion of the Site Characterization."

Health Problem: "Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion sampling identified impacts in indoor air quality in one portion of the on-site building that represents a health concern. Further, environmental sampling is necessary to determine if soil vapor intrusion is a concern for off-site buildings."

Site Description: "Location: The LIRR West Side Yard Site (site) is located at the southeast corner of 12th Ave and W 33rd St in midtown Manhattan. This is the northwest corner of the Long Island Railroad's West Side Yard (WSY), where commuter trains which have discharged at Penn Station are stored for their next outbound trip. The West Side Highway lies immediately to the west. The northern end of the High Line Park traverses part of the site. Site Features: The site is largely flat, and is almost completely filled with railroad tracks. Small maintenance buildings are present along the western ends of the storage tracks. Current Zoning and Land Use: The WSY is currently used for the storage of passenger trains. Periodic and routine cleaning and washing of the interior of the passenger train cars is performed. The site is zoned for commercial use. Past Use of the Site: The WSY has been utilized for railroad operations for over 100 years. Location: The LIRR West Side Yard Site (site) is located at the southeast corner of 12th Ave and W 33rd St in midtown Manhattan. This is the northwest corner of the Long Island Railroad's West Side Yard (WSY), where commuter trains which have discharged at Penn Station are stored for their next outbound trip. The West Side Highway lies immediately to the west. The northern end of the High Line Park traverses part of the site. Site Features: The site is largely flat and is almost completely filled with railroad tracks. Small maintenance buildings are present along the western ends of the storage tracks. Current Zoning and Land Use: The WSY is currently used for the storage of passenger trains. Periodic and routine cleaning and washing of the interior of the passenger train cars is performed. The site is zoned for commercial use. Past Use of the Site: The WSY has been utilized for railroad operations for over 100 years. Currently and historically, the LIRR has not stored any petroleum products in tanks or bulk containers in the western portion of the WSY, nor has maintenance activities involved the use of petroleum products. This site was previously reported to and investigated under the Spills program as spill no. 0407411, beginning late 2004. Contamination was discovered in a soil boring on the site during a Phase II Environmental Site Investigation of the WSY for the NY Jets organization, which was then reported to the DEC. Site Geology and Hydrogeology: The northwest corner of the WSY is immediately underlain by a layer of historic fill, approximately 20 to 30 feet thick. Site contamination appears to have been co-deposited with this fill, which was used to extend the Hudson River shoreline westward circa 1900. Below the historic fill exists a native low permeable silty clay to clay unit. Groundwater is present beneath the WSY within the urban fill at a depth of approximately 5 to 7 ft bgs (below ground surface), flowing in a northwesterly direction. "
Env Problem: "Nature and Extent of Contamination: Prior to Completion of Remediation Based upon investigations conducted to date, the primary contaminant of concern is coal tar. Soil- The most significant visual evidence of contamination, including staining, hydrocarbon and naphthalene-like odors and elevated PID readings, was observed within

LIRR WEST SIDE YARD (Continued) **S113916804**

the fill deposits in soil borings SB-05 through SB-08, between 15 and 40 feet below grade, and starting at least 10 to 20 feet below the water table. Seventeen of the 20 subsurface soil samples exhibited detectable concentrations of PAHs, with total PAH concentrations ranging from 0.3 ppm in SB-03 (20.5 - 22.5 feet) to a maximum of 1,818 ppm in SB-05 (25 - 27 feet), adjacent to the West Side Yard along the east side of 12th Avenue in the vicinity of the historic observed area of contamination. This sample had visual evidence of contamination, which also exhibited the highest BTEX concentration, but were below the Industrial Use SCOs. Soil samples from SB-06 (21 - 23 feet) and SB-08 (30 - 33 feet) were sent for forensic fingerprint analysis. The analysis suggests that the sample contained pyrogenic material derived from coal and not petroleum, and the PAH distribution was very similar to tars formed from MGPs utilizing carbureted water gas processes. Groundwater- NAPL was not identified in any of the groundwater monitoring wells. However, six of the 17 groundwater samples identified BTEX and PAH compounds at concentrations above Class GA standards. These samples were collected at or in the vicinity of soil borings which exhibited soil contamination and were screened at a depth intercepting the zone of soil contamination observed at 15 to 40 feet below grade. Off-site wells demonstrate that this contamination is not migrated farther off-site. Soil Vapor and Indoor Air- Soil vapor and indoor air have not been evaluated."

Health Problem: "Since the site is fenced and covered by asphalt or concrete, people will not come into contact with site related soil and groundwater contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Currently there are no occupied buildings on the site. The potential for soil vapor intrusion on- and offsite areas should be evaluated if a change of use is proposed. "

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

State and tribal institutional control / engineering control registries

NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

Lists of state and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

NY E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City?s Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248

Version Date:	2019

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

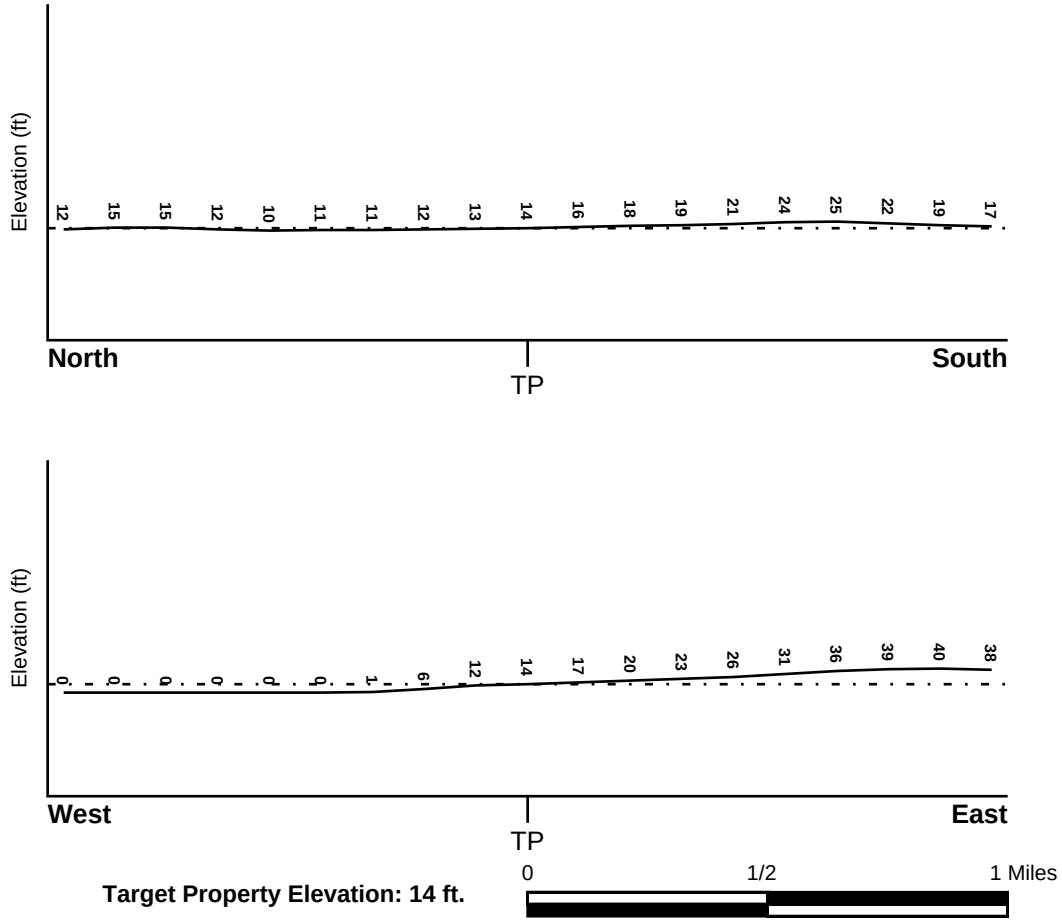
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 14 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970182F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970069F	FEMA FIRM Flood data
3604970088F	FEMA FIRM Flood data
3604970201F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
JERSEY CITY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NE
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Request a Record

Please make your request specific so you receive the fastest service. After you submit a FOIL request you will receive a confirmation number so you can track the status of the response. The agency will notify you about how much time is required to respond to your request.

Category (optional)

Selecting a category helps clarify which agency will receive the request by listing agencies grouped by categories.

Environment

Agency (required)

Select the agency that will handle your request.

Department of Environmental Protection (DEP)

Request Title (required)

FOIL Request

77 characters remaining

Note: The agency, category, and title of your request will be visible to the public. Do not enter personal information here.

Ex: Queens Blvd Roadwork Permit.

Request Description (required)

Records regarding above and underground storage tanks, permits and/or violations, spills, hazardous material and any other information of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-4898), Time frame: 01/01/1963 - 03/28/2022 - Fulton - Various addresses (see attached address listing), Manhattan, NY 10011

4638 characters remaining

Note: The request details you write here will not be visible to the public. However, the agency may post a description of the records provided.

Ex: Roadwork permits for work done in on Queens Blvd. between 40th and 45th streets, Borough of Queens, in September and October 2017.

Upload File (optional, must be less than 20 Mb)

Clear File

Fulton.pdf

Personal Information

First and last name fields are required. The Email field is optional but recommended. If you do not provide an email you must enter either a phone number, fax number, or address in the Alternate Contact Information section.

This information will not be publicly viewable on this site. You must provide contact information so that the agency can respond to your request for records.

First Name (required)

Joanne

Request Type: Freedom of Information Law Request

Description: A FOIL request is a request for any "record" under NY's Freedom of Information Law (Article 6 of the Public Officers Law). Section 86 defines a "record" as: "any information kept, held, filed, produced or reproduced by, with or for an agency or the state legislature, in any physical form whatsoever including, but not limited to, reports, statements, examinations, memoranda, opinions, folders, files, books, manuals, pamphlets, forms, papers, designs, drawings, maps, photos, letters, microfilms, computer tapes or discs, rules, regulations or codes. NYSDEC maintains records in a variety of forms, or media, such as in hard copy (on paper), as recordings, as photographs, in electronic form, etc.

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 3/28/2022 and given the reference number FOIL #W098706-032822 for tracking purposes. You may expect the Department's response to your request no later than **4/26/2022**.

Record Requested: **Records regarding above and underground storage tanks, permits and/or violations, spills, hazardous material and any other information of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-4898), Time frame: 01/01/1963 - 03/28/2022 - Fulton - Various addresses (see attached address listing), Manhattan, NY 10011**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Form 55

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

No. 27136 AVC

Date December 19,1940

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.37. Building Code).

This certificate supersedes C. O. No.

To the owner or owners of the building or premises:

THIS CERTIFIES that the new—~~altered~~—~~existing~~—building—premises located at

89-109 Ninth Avenue
65' front

Block 714 Lot 31 to 38

, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

N.B. ~~or Alt~~ No.— 130-1940 Construction classification—nonfireproof

Occupancy classification—commercial . Height 1 stories, 13 feet.

Date of completion—October 28,1940 . Located in unrestricted Use District.

A Area 2 . Height Zone at time of issuance of permit 3989-1940

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
1st Story	on ground				Gasoline service station and accessory building;office, lubritorium, repairs,laundry parking and storage for more than five (5) motor vehicles.
					Six (6) 550 gallon gasoline tanks approved by Fire Department December 5,1940.

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there by any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaing the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form—244-19.9 Certificate of Occupancy. 8A-2007-29-I.S.

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 16181** 19 30

Supersedes Certificate of Occupancy No. 3187

To the owner or owners of the building: New York Mar.4, 19 30.

THIS CERTIFIES that the building located on Block 714, Lot 21

known as 415-25 West 16th Street 150' front

under a permit, Application No. 1826 Alt of 1929 conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of nonfireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in a n unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS (Lbs. per Sq. Ft.)	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
1st Story on ground				5	Garage for more than 5 autos

This certificate is issued to Niewenhous Co.,Inc., 51 Madison Avenue, City., for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

.....

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Form 150-1b-3 Certificate of Occupancy

8A-2045-20 B

Form—244-1923 Certificate of Occupancy. SA-3087-23-L

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No.** 192 4

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Oct. 28 1924

THIS CERTIFIES that the building located on Block 714 , Lot 28-40-41

known as 407-11 West 16th Street--408-12 West 17th Street
70' 8" front

under a permit, Application No. 241 N.B. of 1924, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of non-fireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
1st Story on ground					Garage more than 5 autos.

This certificate is issued to James R. Torrance, Architect
85 Ninth Avenue City , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement-house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor-vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Date February 25, 1949

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

This certificate supersedes C. O. No.

To the owner or owners of the building or premises:

THIS CERTIFIES that the ~~new~~ altered—~~existing~~—building—premises located at 427-429 West 16th street, 414-428 West 17th st, Block 714 Lots 19 & 20 Lots 42 to 49, incl.

———, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

~~N.B. or~~ Alt. No.— 2508-1948 Construction classification———

Occupancy classification— Commercial . Height——— stories,——— feet.

Date of completion— February 14, 1949 . Located in an unrestricted Use District.

B Area 14 Height Zone at time of issuance of permit ———

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
On ground					Parking lot for more than five (5) motor vehicles.

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Joseph S. Heenan
Borough Superintendent

(Page 1)

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form—344-1935 Certificate of Occupancy. 8A-2087-35-Bld

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC CERTIFICATE OF OCCUPANCY No. 23984 193 8

Supersedes Certificate of Occupancy No.

To the owner or owners of the ~~building~~ lot New York September 28 1938.

THIS CERTIFIES that the ~~building~~ located on Block 715, Lot 29-30

known as 111-115 Ninth Avenue,

~~Under application No. 19 the application to the approved plans and specifications accompanying said application and amendments thereto and the requirements of the building code and of the rules and regulations of the board of standards and appeals applicable to a building of its class and kind except that in the case of a building in existence and for which a previous certificate of occupancy has been issued which has not been altered or converted since the 19 to a use that changed the classification of the building under the building code, this certificate confirms and continues the existing use for which the building has been heretofore used.~~

CERTIFIES FURTHER that the ~~building~~ lot ~~construction authorized by the above-mentioned application No.~~ ~~of the building erected~~ may be used and occupied as a parking and storage space ~~qualified~~, in a unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
					Parking and storage of more than five (5) motor vehicles.
		Area of lot 52'10" x 100'0"			

This certificate is issued to Charles Dommar, 92-9th Avenue, City. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. A.H.M

Thomas J. Sullivan

Commissioner of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, for use in the building.

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF MANHATTAN , CITY OF NEW YORK HVC

No. 24749

Date May 19,1939

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1 to 2.1.3.7 (Building Code).

This certificate supersedes C. O. No. 23984

To the owner or owners of the building or premises:

THIS CERTIFIES that the new—altered—existing building—premises located at

111-15 Ninth Avenue

52'10" front Block 715 Lot 29-30

conforms substantially to the approved plans and specifications and to the requirements of the building code and [illegible] and to the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and that all provisions of section 648C of the New York Charter have been complied with as certified by the Fire Commissioner to the Borough Superintendent.

N.B. or Alt. No. F.O.744-38 & Curb Cut permit M100-39 Construction classification

Occupancy classification— gasoline station and parking lot Height stories feet

Date of completion— . Located in unrestricted Use District.

Area Height Zone at time of issuance of permit

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
On ground					Gasoline service station and parking and storage of more than five (5) motor vehicles.
					Area of parking lot 52'10" x 100'0"
					One (1) 550 gallon gasoline tank approved by the Fire Department March 14,1939.

SUPERSEDED BY C.O. 40626

Borough Superintendent.

(P- 1)

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located;

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

(Page 1)

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there by any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

		MALE	FEMALE	TOTAL	
					Parking and storage of more than five (5) motor vehicles.
		Area of lot 52'10" x 100'0"			

This certificate is issued to Charles Dommar, 92-9th Avenue, City. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. A.H.M

Commissioner of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, for [illegible] in the building.

SUPERSEDED BY C.O. 40626

Borough Superintendent.

(P. - 1)

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 6[illegible]. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF [redacted], CITY OF NEW YORK

No. [redacted]

Date May 28, 1951

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

This certificate supersedes C. O. No.

To the owner or owners of the building or premises:

THIS CERTIFIES that the ~~new~~—altered—~~existing~~—building—premises located at

420 East 156th Street

Block 715 Lot 46

, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

~~New~~ Alt. No.— 1657-1947 Construction classification—Class 3 nonfireproof

Occupancy classification— Commercial Building Height 3 stories, 40 feet.

Date of completion— May 25, 1951 . Located in Unrestricted Use District.

Area 1⅓ , Height Zone at time of issuance of permit 720-1951; 2542-1950; 2672-1950; 669-1948; 489-1948.

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS (Lbs. per Sq. Ft.)	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar	On ground				Boiler room and storage.
Basement	50	2	3	5	Office on each story
1st story	50				(one occupant)
2nd story					One (1) family.
3rd story					One (1) family.

[redacted]

Borough Superintendent

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form 55-20M-13041 114

DEPARTMENT OF HOUSING AND BUILDINGS

JT/lc BOROUGH OF MANHATTAN , CITY OF NEW YORK

No.

Date January 23, 1947

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

This certificate supersedes C. O. No.

To the owner or owners of the building or premises:

THIS CERTIFIES that the ~~new~~—altered—~~existing~~—building—~~premises~~ located at

Form -214-1935 Certificate of Occupancy. BA-2087-35-Bu

DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

CERTIFICATE OF OCCUPANCY No. 20964 1936

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Jan. 10 1936

THIS CERTIFIES that the building located on Block 715, Lot 17

known as 431-35 West 17th Street
37.6" front

under a permit, Application No. 143 N.B. of 1935, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of nonfireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in a unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar					Boiler room
1st story	300			15	Automobile Repair Shop

This certificate is issued to Moore and Hunsiedel, Architects
303 Willis Avenue, City.
, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. GG

84

Commissioner of Buildings, Borough of Manhattan. MK

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Form -244-1931 Certificate of Occupancy. 8A-2687-31-C.P.

DEPARTMENT

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 20282 193 5**

Supersedes Certificate of Occupancy No. 2703

To the owner or owners of the building: New York April 1, 1935

THIS CERTIFIES that the building located on Block 715, Lot 27

known as 411 West 17th Street
25' front

under a permit. Application No. 1883 Alt of 19 34 conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of nonfireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in a n unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
Cellar				3	Storage
1st Story	120-60			5	Garage and Office
2nd "	100				Storage
3rd "	50				Storage
4th "	60			2	Storage
5th-Penthouse	40				Not to be occupied

This certificate is issued to Charles M. Spindler, 164 Montague St. Bklyn. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 5, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height, shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. GS

Superintendent of Buildings, Borough of Manhattan.
Commissioner

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
1st Story	200			3	Storage

SUPERSEDED BY C.O. 44316

Borough Superintendent

(Page 1)

ACTING BOROUGH SUPERINTENDENT

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there by any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaing the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifiies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§.646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

A.H.M

Form 54-44.5M-701496(54) 114

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

No. 44319

Date June 30,1955

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

This certificate supersedes C. O. No. 25677

To the owner or owners of the building or premises:

THIS CERTIFIES that the new—altered—existing—building—premises located at

443 West 17th Street Block 715 Lot 11

, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

N.B. or Alt. No.— 807-1955 Construction classification— Class 3 nonfireproof

Occupancy classification— Commercial Building Height 1 stories, 12 feet.

Date of completion— June 29,1955 Located in Unrestricted Use District.

Area B 1½ Height Zone at time of issuance of permit

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
1st Story	On ground	4		4	Motor vehicle repair shop.

Sec. 6.1.2.3 sub-4 Building Code, C.26-273.0 Adm. Code

"Prior to the commencement of any structure erected or altered after January 1, 1938, the limitation of each floor of such structure as stated in the certificate of occupancy shall be permanently posted under glass and maintained in the main entrance hall of such structures."

Joseph E. Herman
Borough Superintendent

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form—190-1920 Certificate of Occupancy

8A-2045-20 B

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

CERTIFICATE OF OCCUPANCY No. 192 1

THIS CERTIFIES that the building located on Block 713 Lot 27-28

known as 409-11 East 17 Street.

conforms substantially to the approved plans and specifications of filed Application No. 646 19 20
and to all the requirements of the BUILDING CODE AND BUILDING ZONE RESOLUTION of the City of New York

for a non-fireproof, 1 story Garage.

and that the several floors may sustain the live loads, accommodate the number of persons, and be occupied as follows:

FLOORS	Live Load per Square Foot in POUNDS	Number and Classification Persons on each Floor	OCCUPANCY
1st Floor	-----	5	GARAGE

4197

2/4/21

This certificate is issued to Koppel, Gray & Co.

owner of the aforesaid building, address 411 E. 17 St., N.Y.City.

in accordance with the provisions of Section 5, Article 1, Chapter 5 of the Code of Ordinances of the City of New York, and Chapter 503, Section 411-a of the Greater New York Charter.

DATED Feb. 4, 1921.

Superintendent of Buildings

Form -244-1931 Certificate of Occupancy. 8A-2087-31-C.P.

DEPARTMENT
BUREAU OF BUILDINGS
BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 20282 193 5**

Supersedes Certificate of Occupancy No. 2703

To the owner or owners of the building: New York April 1, 1935

THIS CERTIFIES that the building located on Block 715, Lot 27

known as 411 West 17th Street
25' front

under a permit. Application No. 1685 Alt of 19 34 conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code; this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of non fireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in a n unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
Cellar				8	Storage
1st Story	120-60			5	Garage and Office
2nd "	100				Storage
3rd "	50				Storage
4th "	60			2	Storage
5th-Pent House	40				Not to be occupied

This certificate is issued to Charles M. Spindler, 164 Montague St. Bklyn. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Superintendent of Buildings, Borough of Manhattan.
Commissioner

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Form—244-1935 Certificate of Occupancy. HOUSING AND BA-2087-35-Bld 60

DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC CERTIFICATE OF OCCUPANCY No. 28818 193[8]

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York January 17, 19[38].

THIS CERTIFIES that the building located on Block 715, Lot 19-20

known as 425-7 West 17th Street
50.0' front

under a permit, Application No. 38 H.B. of 19[37], conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of fireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
Cellar					Storage
1st Story	120			15	Storage of meat
2nd "	150-60			5	Storage of meat and office

This certificate is issued to Jacob J. Closter, architect
303 West 42nd Street, City
, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. A.H.M

Victor H. Tomlet

Acting Borough Superintendent

Commissioner of Buildings, Borough of Manhattan.

Department of Housing and Buildings

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

To the owner or owners of the building or premises:

THIS CERTIFIES that the new—~~altered~~—~~existing~~—building—~~premises~~ located at

425-427 West 17th street

Block 715 Lot 19 & 20

, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

~~XXNB~~, or Alt. No. 754-1944 Construction classification—Fireproof

Occupancy classification—[illegible] . Height 2 stories, 28 feet.

Date of completion— — . Located in Unrestricted Use District.

A Area 2 times . Height Zone at time of issuance of permit 511-1937

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
Cellar	On ground				Storage and Engine room.
1st story	150 and 120.	6	--	6	Storage chickens.
2d story	60 lbs.	7	15	22	Office, storage, and eviscerating poultry.
					Fuel Oil, Fire Department approval May 11, 1944.
					NOTE: Not more than five (5) persons engaged in eviscerating poultry.

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there by any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form 33-BBM-30144—[illegible] 114

DEPARTMENT OF HOUSING AND BUILDINGS

JT-BOROUGH OF MANHATTAN , CITY OF NEW YORK

No. 33719

Date February 25, 1948

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

This certificate supersedes C. O. No.

To the owner or owners of the building or premises:

THIS CERTIFIES that the ~~new~~—altered—~~addition~~—building—~~premises~~ located at

404-406 West 18th street, 127 Ninth avenue Part of Block 715 Lot 35

———, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

, CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

~~N.B. or~~ Alt. No.— 2378-1946 Construction classification— ---

Occupancy classification— Commercial . Height--- stories- feet.

Date of completion— February 19, 1948 . Located in Unrestricted Use District.

A Area 2 times . Height-Zone at time of issuance of permit ---

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
					Parking lot for more than five (5) motor vehicles.

Borough Superintendent.

C1788

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form 54-111M-701311(52) [redacted] 114

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF MANHATTAN , CITY OF NEW YORK

No. 42197

Date February 11, 1954

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

This certificate supersedes C. O. No. 2706

To the owner or owners of the building or premises:

THIS CERTIFIES that the [redacted]—altered [redacted]g—building—premises located at

409 West 17th Street Block 715 Lot 28

, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent. Class 3

[redacted] Alt. No. 1475-1953 Construction classification—nonfireproof

Occupancy classification—Commercial Bldg. . Height 1 stories, 12'-6" feet.

Date of completion— January 29, 1954 . Located in Unrestricted Use District.

A Area 2 . Height Zone at time of issuance of permit [redacted]

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
Cellar	on ground				Boiler room
1st story	on ground & 120			5	Non-storage garage for not more than five (5) motor vehicles, loading platform and storage. Garage Use approved by Fire Department September 22, 1952.

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the buildings; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division, unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§.646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Samuel Gross

Commissioner of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Form—244-1935 Certificate of Occupancy. 8A-2087-35-Bu

DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC CERTIFICATE OF OCCUPANCY No. 2111 193 7

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Feb. 2, 1937

THIS CERTIFIES that the building located on Block 716, Lot 17

known as 433 West 18th Street 25' front

under a permit, Application No. 1989 Alt of 1936 conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of nonfireproof construction within the meaning of the building code and may be used and occupied as a residence building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED MALE	FEMALE	TOTAL	USE
					Multiple Dwelling Class A
Cellar					Storage
Basement	40				One (1) Apartment
1st Story to 3rd Story	40 on each				Two (2) Apartments on each floor

This certificate is issued to Kaiser Painting Co., 100 East 10th Street, City. for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. JB

Samuel Ehrlich

Commissioner of Buildings, Borough of Manhattan.

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§.646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form—244-1924 Certificate of Occupancy. 34-2087-24-8

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

CERTIFICATE OF OCCUPANCY No. 2231 192 5

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Sept.11 1925

THIS CERTIFIES that the building located on Block 716 , Lot 49

known as 422 West 19th Street
25' front

under a permit, Application No. 1616 Alt of 19 25 conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of non-fireproof construction within the meaning of the building code and may be used and occupied as a residence building as hereinafter qualified, in a r unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

Story	Live Loads Lbs per sq. ft.	Persons Accommodated			Use
		Male	Female	Total	
1st Story					Non-housekeeping apartments
2nd "					
3rd "					
4th "					

This certificate is issued to Frank Klein, architect
422 West 19th Street, City. , for the owner or owners.

(Over.)

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated; nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but, if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined, 20

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Form—1644-1024 Certificate of Occupancy. 3A-0007-34-S

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 3758 192 5**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York July 14 19 25

THIS CERTIFIES that the building located on Block 717, Lot 35

known as 151 Ninth Avenue N.W.C.19th Street
26'3" front

under a permit, Application No. 811 Alt of 19 25 conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of non-fireproof construction within the meaning of the building code and may be used and occupied as a business&residence building as hereinafter qualified, in a n unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

Story	Live Loads Lbs. per sq. ft.	Persons Accommodated			Use
		Male	Female	Total	
Cellar					Storage
1st Story				5 each	Stores
2nd, 3rd & 4th Story					Tenement

This certificate is issued to J.Pollack, Inc. Contractor
383 West 47th Street, City. , for the owner or owners.

...rved. ... d by either board must

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined

.....
Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

RE: PUBLIC RECORDS REQUEST of 3/28/2022, Reference # W098706-032822

Date: 03/30/2022

Dear Ms. Joanne Bedkowski,

I write in response to your Freedom of Information Law (FOIL) request seeking:

> *Records regarding above and underground storage tanks, permits and/or violations, spills, hazardous material and any other information of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-4898), Time frame: 01/01/1963 - 03/28/2022 - Fulton - Various addresses (see attached address listing), Manhattan, NY 10011*

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

FOIL Appeals Officer
Office of General Counsel
New York State Department of Environmental Conservation
625 Broadway, 14th Floor
Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at (718) 482-4912 and reference FOIL #W098706-032822, or simply reply to this email. Thank you.

Sincerely,

Region 2 FOIL Coordinator

Joanne Bedkowski

APPENDIX G

PROJECT PERSONNEL QUALIFICATIONS

Chris Hirschmann, CHMM

Director, Site Investigation & Remediation Services

EDUCATION:

B.S. Environmental Science, Cornell University

M.S., Environmental Science, NJIT – Rutgers University

CERTIFICATION:

OSHA 40-Hour HAZWOPER

OSHA HAZWOPER Supervisor

OSHA 10-Hour Construction

Certified Hazardous Materials Manager (CHMM) #14701

NJDEP Subsurface Evaluator #572258

Hazardous Waste Management Certification

Site Remediation Basics Certification

New York City Office of Environmental Remediation (NYCOER) Brownfield Certification (TurboTraining)

OSHA 30-Hour 1910 General Industry Training

YEARS OF EXPERIENCE:

With Hillmann: 12

Total: 14

PROFESSIONAL EXPERIENCE:

Mr. Hirschmann is currently the Director, Site Investigation & Remediation Services at Hillmann Consulting, LLC. As such, he is responsible for managing and implementing soil, groundwater, and soil vapor subsurface investigations and remediation; regulatory compliance; storage tank closure and install; and third party document review.

Mr. Hirschmann has extensive experience in evaluating and investigating sites for subsurface contamination and instituting remedial activities for commercial and industrial properties (including City & State regulatory & brownfield programs). He also performs SPCC plan preparation and hazardous materials management; and performs Phase I environmental site assessments to meet due diligence requirements under CERCLA, including the quality assurance of technical reports.

Representative experience includes:

The Doe Fund, Bronx, NY:

Identified as a spill case with confirmed soil, groundwater and soil/vapor contamination with the New York State Department of Environmental Conservation (NYSDEC) and brownfield and e-designation site with New York State Office of Environmental Remediation (NYCOER). Mr. Hirschmann functioned as the project director for Hillmann and prepared the remedial investigation work plan (RIWP), conducted remedial investigation activities and prepared a Remedial Investigation Report (RIR). Based on the RIR Hillmann prepared a Remedial Action Work Plan (RAWP) that was subsequently approved by the NYSDEC and NYCOER. Under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities, including implementation of a Community Air Monitoring Plan, during site redevelopment activities.

Women in Need, Brooklyn, NY:

Identified as an e-designation and brownfield case with soil and soil/vapor contamination with NYCOER. Mr. Hirschmann functioned as the project director for Hillmann and prepared the remedial investigation work plan (RIWP), conducted remedial investigation activities and prepared a Remedial Investigation Report (RIR). Based on the RIR Hillmann designed and prepared a Remedial Action Work Plan (RAWP) that was subsequently approved by the NYCOER. Under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities during site redevelopment activities.

TLK Manor, Bronx, NY:

Identified as a contaminated property under the purview of NYCDEP, Hillmann provided investigation and remediation services related to redevelopment activities. Mr. Hirschmann functioned as the project director and conducted the remedial investigation and prepared a Remedial Action Work Plan based on the results of the soil, groundwater and soil/vapor investigation. During redevelopment

HILLMANN CONSULTING

activities, under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities including implementation of a Community Air Monitoring Plan.

BP Real Estate Fund, Queens, NY

Hillmann was retained to address the e-designation on the property for hazardous materials prior to redevelopment activities. Mr. Hirschmann functioned as the project director and prepared a Remedial Investigation Workplan, conducted the Remedial Investigation soil, groundwater and soil vapor sampling activities and issued the Remedial Investigation Report to the NYCOER. The NYCOER subsequently removed the e-designation from the property after review and approval of project documents.

AIG, Bernardsville, NJ:

The Property had a leaking underground storage tank (UST) identified as a spill case with the New Jersey Department of Environmental Protection (NJDEP) and contained widespread soil and groundwater contamination. Hillmann provided investigation and remedial activities at the site including: delineation of soil and groundwater contamination, preparation of remedial action plans for the NJDEP, enhanced fluid recovery for groundwater remediation, injection remediation of groundwater including chemical oxidation material and microbe material to break down and remediate the elevated contaminants found in the groundwater. Mr. Hirschmann was the project manager and NJDEP certified Subsurface Evaluator for the remedial activities.

City of Newark, New Jersey:

Hillmann provided investigation and remediation activities for five City owned brownfield properties. Mr. Hirschmann functioned as the project manager for oversight, design, implementation and management of soil and groundwater remedial investigations at the properties.

Unique People Services, Bronx, New York

Identified as a contaminated property under the purview of NYCDEP, Hillmann provided investigation and remediation services related to redevelopment activities. Mr. Hirschmann functioned as the project director and conducted the remedial investigation and prepared a Remedial Action Work Plan based on the results of the soil, groundwater and soil/vapor investigation. During redevelopment activities, under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities including implementation of a Community Air Monitoring Plan.

Notias Construction, NY, NY:

Hillmann provided environmental investigation activities for 5 separate sites in Manhattan, NY. Mr. Hirschmann functioned as the project manager and prepared Phase II Investigation workplans for soil and soil-vapor sampling, directed site investigation activities and prepared Remedial Investigation Reports for each site. Where

HILLMANN CONSULTING

contamination was identified, Mr. Hirschmann prepared Remedial Action Work Plans for slated redevelopment activities.

AIG: Northeastern States: Hillmann provides ongoing environmental consulting for this client including decommissioning of fuel oil storage tanks, investigation and remediation of fuel oil contaminated soil and groundwater. Mr. Hirschmann provides third-party oversight on behalf of this client to ensure the contractors/consultants onsite are performing project activities in accordance with industry and regulatory protocol. When applicable on certain projects, Mr. Hirschmann will also direct full remedial investigation and remedial activities as the project manager.

PROFESSIONAL EXPERIENCE:

As a Senior Project and Account Manager, Mr. Etan Hindin advises private and public sector clients on a broad range of environmental projects including due diligence (Phase I and II), regulatory compliance, HSE audits, soil and groundwater remediation, and mold investigations and asbestos surveys. Mr. Hindin is responsible for proposing project services, bidding, managing projects, and meeting with clients.

Mr. Hindin has conducted Phase I's of commercial and industrial sites throughout the country and has provided EH&S consulting to Fortune 500 companies. He is particularly well versed in environmental, health and safety regulations and he strives to provide creative, effective, and efficient solutions to complex environmental problems.

Representative experience includes:

Enviro-Sciences (of Delaware), Inc.: From 2011 to 2018, Mr. Hindin served as a Project Manager at Enviro-Sciences (of Delaware), Inc. where he designed sampling programs, oversaw abatement projects, and performed clearance sampling for mold and asbestos. He also managed environmental due diligence projects of commercial and industrial sites, throughout the US. Mr. Hindin often trained entry-level consultants in database review, report writing, and assessment protocols while working to improve report templates to comply with changing regulations and ASTM standards.

NJDEP Watershed Ambassadors Program: From 2010 to 2011, Mr. Hindin worked as a New Jersey Watershed Ambassador for the NJDEP where he monitored water quality utilizing NJDEP protocols and online reporting software, utilized GIS, NJGeoWeb, and DataMiner to research assigned water bodies and surrounding areas. Mr. Hindin also presented on watershed management, resource conservation, sustainability, and environmental regulations.
