Mr. Jamar Adams
Elliott Fulton LLC c/o Essence Development
30 Hudson Yards
New York, NY 10001

RE: Phase I Environmental Site Assessment
Chelsea-Elliott
264 & 278 10th Avenue, 427 & 441 West 26th Street, 407 West 25th Street
New York, New York 10001
Hillmann Project No: Z34898

Dear Mr. Adams:

Hillmann Consulting LLC has completed a Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in conformance with our contract agreement and the scope and limitations of ASTM Practice E 1527-21, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 908-688-7800.

Sincerely,

Hillmann Consulting, LLC

Chris Hirschmann
Environmental Services Director

Etan Hindin
Senior Project Manager

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CEA	– Classification Exception Area
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DEC	– Department of Environmental Conservation
DEP	– Department of Environmental Protection
DHS	– Department of Health Services
DNPL	– Delisted National Priority List
DOB	– Department of Buildings
DOH	– Department of Health
DOT	– Department of Transportation
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
EPA	– Environmental Protection Agency
ERNS	– Emergency Response Notification System
FD	– Fire Department
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LCP	– Lead-Containing Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
OER	– Office of Environmental Remediation
OPRA	– Open Public Records Act
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of 264 & 278 10th Avenue, 427 & 441 West 26th Street, 407 West 25th Street, New York, New York (the Subject Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Primary Street Address:	264 & 278 10th Avenue, 427 & 441 West 26th Street, 407 West 25th Street				
City:	New York	**County:**	New York	**State:**	New York
Tax ID/Parcel Number:	278 10th Avenue: Block 724, Lot 1; 441W26th: Block 724, Lot 10; 427W26th: Block 724, Lot 15; 264 10th Avenue: Block 723, Lot 1; 407W25th: Block 723, Lot 15				
Property Owner:	New York City Housing Authority (NYCHA)				
Zoning Designation:	R8 (Residential)				
Approx. Property Area:	6.53-acres (combined)				
Buildings:	Seven residential apartment buildings and a daycare building: **Chelsea**: 407 West 25th Street parcel (Block 723, Lot 15) is comprised of two (2) 21-story plus basement apartment buildings. The eastern building is equipped with a two-bay maintenance garage on the east side and a waste management areas east of the building. **Chelsea Addition**: 441 West 26th Street parcel (Block 724, Lot 10) – one (1) 14-story plus basement apartment building (ground level day center). **Elliott**: three (3) parcels (Block 724, Lots 1 and 15 and Block 723, Lot 1), four (4) 11-story and 12-story plus basement apartment buildings and one freestanding daycare at the northeast corner of West 26th Street and 10th Avenue. NOTE: See Appendix A for building numbering/locations				
Approx. Building Size:	1,002-units (combined)				
Approx. Year Built:	1940-1968				

Commercial Occupants:	Primarily residential with a day-center, and management office plus a freestanding daycare
Current Use:	Multifamily residential and daycare
Inspected By:	Mr. Etan Hindin and Mr. Dominick Aponte
Site Contact/Company:	Mr. Patrick Chan / Property Manager (NYCHA)
Site Escort/Company:	Sidiya Harris / Site Caretaker (NYCHA)
Inspection Date:	April 19, 2022
Weather Conditions:	Overcast 42 degrees Fahrenheit

1.3 Findings, Opinions and Conclusions

Recognized Environmental Conditions & Significant Data Gaps

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed the following *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs) and/or *significant data gaps* (SDGs) in connection with the Subject Property:

RECOGNIZED ENVIRONMENTAL CONDITIONS

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1940's-1960's, as follows:

- N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930);
- Machine Shop (429 West 26th Street 1911);
- Manufacturing (not specified) use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930);
- Garage with a 10,000-gallon buried tank (417-423 West 25th Street – 1930-1950);
- Printer-Lithographer operation with multiple tanks noted to the immediate east of the Property at the southwest corner of 9th Avenue and West 26th Street – 263 9th Avenue (1930-2005).

The aforementioned historic uses, including a transformer sub-station, machine shop, manufacturing, and garage with a UST, and a printer/lithographer immediately east of the Property, are considered a REC.

Hillmann recommends obtaining records of a subsurface investigation (if already performed) or performing a subsurface investigation to determine the presence/absence of impact to underlying environmental media from

aforementioned uses and the presence/absence of an abandoned underground storage tanks (USTs) in the area of the former garage (417-423 West 25th Street).

Hillmann notes that prior reports reviewed by Hillmann (See Section 3.1) detail investigations limited to the leaking USTs and not site-wide subsurface investigations.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)

Elliott-Houses-NYCHA, 426 West 27th Street is listed on the LTANKS database for Spill Number: 9602200 due to a tank test failure on May 15, 1996. The spill listed as consolidated with Spill Number: 8908401 is listed as having obtained regulatory closure on February 2, 2006. The remarks detail a discharge of #6-fuel oil, extensive remediation and monitoring and the installation of an oil recovery system detailed in Section 3.1 above. The database listing remarks state:

"20K TANK - EVERYTIME FILLED ACTIVE FLOW TAKES PLACE INTO BASEMENT THRU WALLS - ABSORBED WITH SPEEDY DRY AND TEMPORARILY TAKING TANK OUT OF SERVICE"

The database listing detail regarding the backdrop to the regulatory closure is as follows:

The PRS [Petroleum Recovery System] was operated between 1998 and 2014. Free product has not been observed in the accessible monitoring wells since 2007. Since halting the PRS in 2014, free product has not been observed in the accessible monitoring wells and little free product (less than 0.25in) has been observed in the recovery wells. No petroleum related VOCs or SVOCs (listed in Table 3 of CP-51) were detected in groundwater samples collected in April 2015 from the accessible monitoring wells. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, spills can be closed. The Closure Letter should contain the contaminated soil clause. Spill closure email will be prepared with contaminated soil clause and sent to NYCHA.

Given the closure with a "*soil clause"* the above is considered a CREC. Hillmann recommends obtaining the closure records from NYCHA to understand the nature of any closure conditions e.g., monitoring or administrative requirements or institutional/engineering controls.

If the onsite groundwater monitoring wells, petroleum recovery system and associated 275-gallon waste oil UST observed during the site reconnaissance are no longer in use these wells and equipment should be decommissioned in accordance with applicable regulations.

SIGNIFICANT DATA GAPS (SDGs)

No SDGs were identified.

Historical Recognized Environmental Conditions (HRECs)

This assessment has revealed the following *historical recognized environmental conditions* (HRECs) in connection with the Subject Property:

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

Chelsea Houses-NYCHA, 431 West 25th Street is listed on the LTANKS, NY SPILLS and UST databases. The LTANKS listings is for Spill Number: 9806339 due to a tank test failure on August 21, 1998. The spill is listed as having obtained regulatory closure on August 27, 2013. The listing details the removal of a 30,000-gallon #2 fuel oil UST with six post excavation samples leading to the removal of 900-tons of soil. Exceedances included Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene.

The listing details the backdrop to regulatory closure as follows:

"*30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000 -investigation done in 2006 along fill lines and by fill port (DEC request) -some PAHs detected in grab groundwater sample in 2006 -5 permanent wells installed in 2010 -All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences) -Slight sheen subsequently detected in MW-5. Absorbent sock placed in well. -Minor impacts on sock in 2012. -No oil detect on absorbent sock in 2013. -Confirmed no product sheen in well during site visit of 7/31/13. NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned*."

Hillmann recommends obtaining the closure letter. If it is determined that any conditions are linked to the No Further Action (other than decommissioning the wells), the case would be re-classified as a CREC, however available database listing detail does not list and conditions.

Additionally, Hillmann observed multiple monitoring wells in the vicinity of the former 30,000-gallon UST. Hillmann recommends decommissioning the wells if no ongoing monitoring requirements apply.

De Minimis and Other Environmental Conditions

The following *de minimis* and other environmental conditions were identified:

OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS
The Property is equipped with two (2) 25,000-gallon #2 fuel oil USTs. Hillmann recommends continued maintenance and permitting and obtaining most recent maintenance record logs from NYCHA.
Multiple NY SPILLS listings were identified associated with Property addresses. Given their regulatory closure and the nature/quantity of the spills (contained with not impact to soil/groundwater), they are not considered a REC.
Multiple Property and adjacent Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC in connection with the Property.
Multiple adjacent sites are listed on the NY SPILLS and LTANKS databases. Each of the adjacent listings obtained regulatory closure and are not considered a REC in connection with the Property.
500 West 25th Street, listed on the VCP database for OER Site Number: 17CVCP047M associated with redevelopment and investigations/remediation associated with historic use obtained a notice of completion dated November 9, 2020. Given the status and findings of the investigations, the southwestern adjacent VCP site is not considered a REC in connection with the Property. Records were reviewed via the NYC EPIC Online Document Repository.

Environmental Professional Statement

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of *Environmental professional* as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the *subject property*. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Etan Hindin
Environmental Professional

Chris Hirschmann
Environmental Professional

1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as "Non-ASTM Scope concerns", in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E1527-21 as *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."* The following is a summary of findings for the limited review of potential BERs, where applicable, as per the contracted scope of work and limitations outlined in Section 2. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE			
Subject	**Findings**	**Not Appl.**	**Rpt. Ref.**
Asbestos	Given the 1940-1968 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis. Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-on insulation and roofing materials.		7.1
Lead Paint	Given the 1940-1968 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis. Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 mg/cm^2 (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann.		7.2
Radon	The Property is located in the USEPA radon designation Zone 3 or 'low risk' area for radon.		7.3
Mold / Microbial Damage	The basement of Building Elliot-1 was observed to have standing water on the concrete surface. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed.		7.4
NWI Wetlands	No NWI Wetlands were depicted within the Property.		7.5
Lead in Drinking Water	Potable water service at the Subject Property is provided by the City of New York. The water purveyor water supply is within acceptable standards. Property building specific lead-in-drinking water sampling was not performed.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-21. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E1527-21 as *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The term *controlled recognized environmental condition* is a type of recognized environmental condition and defined by ASTM E1527-21 as a *"recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."*

The term *historical recognized environmental condition* is defined as a *"previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."* The ASTM E1527-21 standard has clarified that a *historical recognized environmental condition* (HREC) is not a *recognized environmental condition* (REC).

The term *de minimis condition* is defined by the ASTM, *"…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."* A condition determined to be a *de minimis condition* is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-21 standard:

- Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥1990 should not be interpreted to suggest that any such buildings are free of ACM or would not warrant evaluation of building materials for ACM prior to disturbance. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

- Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Subject Property. If the Property contains buildings built in 1980 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect

LPB; however, the scope of work exclusion for building built ≥1980 should not be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

- USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

- Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

- NWI Wetlands: The Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory Wetland Mapper (http://wetlandsfws.er.usgs.gov/NWI/download.html) to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work. It is also emphasized that a field delineation of regulated wetlands by a qualified professional would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

- Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	264 & 278 10th Avenue, 427 & 441 West 26th Street, 407 West 25th Street				
City:	New York	**County:**	New York	**State:**	New York
Tax ID/Parcel Number:	278 10th Avenue: Block 724, Lot 1; 441W26th: Block 724, Lot 10; 427W26th: Block 724, Lot 15; 264 10th Avenue: Block 723, Lot 1; 407W25th: Block 723, Lot 15				
Approx. Land Area:	6.53-acres (combined)				
Apprx. Latitude/Longitude:	North 40.7496440 degrees/West 74.0014680 degrees				
Additional Details (if appl.):	Secondary address range: 407-461 West 25th Street;				

	408-466 and 421-465 West 26th Street; 416-460 West 27th Street.
Property Owner:	New York City Housing Authority (NYCHA)
Zoning Designation:	R8 (Residential)

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 ESA Report Component Dates/Viability

The ASTM E1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarizes the component completion dates:

ESA Component	Completion Date
Interviews	April 19, 2022
Env Lien Search	(excluded from scope)
Government Records Review	March 28, 2022
Visual Inspections	April 19, 2022
Env. Professional Declaration	May 6, 2022

2.5 User Reliance

This report is for the exclusive use of Elliott Fulton LLC c/o Essence Development and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of Elliott Fulton LLC c/o Essence Development; and without obtaining written consent from Hillmann in the form of a reliance agreement/letter.

Hillmann may, in its sole discretion, withhold its consent to additional reliance and/or Hillmann may condition consent for reliance upon payment of a fee or other conditions.

2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

2.7 General Limitations and Exceptions

Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-21 are reported.

Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development,

redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and

that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Hillmann to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s) taken. Hillmann advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Hillmann. Hillmann shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

3.1 Environmental Lien and Activity and Use Limitation (AUL) Search

The User did not provide Hillmann with the results of an environmental lien and AUL search for the Subject Property.

3.2 Prior Environmental Reports/Documentation

The following prior environmental reports/documentation was provided:

Excel Spreadsheet – R9.5 Sites

An excel spreadsheet was provided listing PBS (Petroleum Bulk Storage) 475483 for Chelsea as having an active tank (Tank #1) ad Elliot PBS 601955 with an active tank (Tank #2). Both are listed as having closed spills, no tank testing and Elliott is listed as having had a visual inspection.

Below is the excel table provided:

Consolidation Name	Development Name	PBS	Active	Tank #s	Tank Testing	Visual inspections	Open Spills	Closed Spills
Chelsea	CHELSEA	475483	Y	1	N	N	N	Y
Chelsea	CHELSEA ADDITION		N		N	N	N	N
Chelsea	ELLIOTT	601955	Y	2	N	Y	N	Y
Fulton	FULTON		N		N	N	N	N

Site Specific Field Investigation Work Plan Elliott Houses, 426 West 27th Street, New York, New York NYSDEC Spill Number 89-08401 PBS Number 601955; prepared by Gannett Fleming Engineers and Architects, P.C. (GF) dated July 2007 (DRAFT)

The draft report prepared by GF for NYCHA details a subsurface investigation in the vicinity of two (2) 20,000-gallon single-walled underground storage tanks (USTs) [PBS No. 601955] removed and replaced with one (1) 25,000-gallon double-walled UST in 1997. "*The purpose of this assessment is to evaluate the effectiveness of the existing on-site oil recovery system and to assess the horizontal extent of the product plume".*

The draft report notes that the groundwater table is approximately 10 to 17 feet below ground surface (bgs) and groundwater flow is towards the west. The USTs that were removed (per the GF report according to NYCHA) were installed in 1947 and contained No. 4 and No. 6 fuel oil. A 275-gallon AST is noted to be located onsite associated with an oil recovery system installed in 1998. The GF report notes that a Phase II was conducted by TRC in November 1989 due to fuel oil observed to leak into the boiler room through the northern wall of the boiler room. The tank was repaired, and seepage into the boiler room ceased, however TRC noted there could still be product within the subsurface soil. Soil and groundwater sampling confirmed free product in the subsurface

(~4-ft thick). In 1998 after the two aforementioned tanks were removed an oil recovery system including two recovery wells, an oil/water separator, and a 275-gallon holding tank was installed. "*According to the NYCHA, free product was observed in monitoring well MW-2 in March 2007".*

The Draft GF report, in Section 3.0 lays out a proposed scope of work which would include monitoring well measurements and sampling, fingerprint analysis, and recovery system evaluation.

Hillmann has included a figure from the GF report showing the locations of the former USTs relative to the present UST as well as the locations of monitoring wells. See Appendix A Figure 3.

Phase II Field Investigation Elliott Houses, 426 West 27th Street, New York, NY 10001, NYSDEC Spill #89-08401; prepared by American Environmental Assessment & Solutions, Inc. (AEASinc) dated March 15, 2011

The Phase II was performed "*to evaluate the effectiveness of the existing on-site recovery system and to assess the horizontal extent of the product plume. The assessment was performed in the vicinity of two former 20,000-gallon single walled underground storage tanks (USTs) which were removed and replaced with one 25,000 gallon double walled UST in 1997".*

The Phase II included soil and groundwater sampling with the following results:

Soil Contamination

VOCs were identified in soil sample SB-4 at 13 to 15 feet. The compound Isoproplybenzene and n-Propylbenzene were detected at levels exceeding their respective RSCO. SB-4 was installed west of RW-1.

SVOCs were identified in soil sample SB-6 and SB-7 exceeding their respective RSCO. The compound Chrysene was detected in SB-6 at 400 µg/kg exceeding its respective RSCO of 400 µg /kg.

Five SVOCs were detected in SB-7 exceeding their respective RSCO. The compounds Benzo(a)Anthracene; Benzo(a)Pyrene; Benzo(b)Fluoranthene; Benzo(k)Fluoranthene; and Chrysene were identified at levels exceeding their respective Recommended Soil Cleanup Objective (RSCO). SB-7 was installed between RW-2 and MW-2

Groundwater Contamination

VOCs were detected in groundwater sample GW-3 at levels exceeding the NYSDEC Groundwater Quality Standards. Five VOCs were detected in groundwater sample GW-3 above their respective groundwater standard. The compounds 1,2,4-Trimethylbenzene; Benzene; Isopropylbenzene; Isopropylbenzene; n-Butylbenzene; and n-Propylbenzene were detected in GW-3 exceeding their respective NYSDEC Ambient Groundwater Quality Standards.

Other VOCs were detected at very low levels below their respective groundwater standard in GW-3 and GW-4.

> No VOCs were detected [in] groundwater sample GW-1 or GW-2.
> No SVOCs were identified in any of the groundwater samples obtained from GW-01 through GW-04.

The AEASinc report concludes and recommends:

> *It is evident that the remediation system has been effective in removing the free floating product from the groundwater as was revealed from the monitoring data and previous environmental report indicating that product thickness has greatly reduced from 4.5 feet in 1992 to 3 inches currently and should be kept in use until no free floating product is present in the groundwater. However although the remediation system usage should be continued, the dissolved constituents in the groundwater should also be addressed.*
>
> *The remediation system should be kept in use to further reduce product thickness until no free floating product is detected in any of the wells or in the groundwater.*
>
> *Since the observed fuel oil impacts have shown to represent an isolated area, no further subsurface investigation is warranted. AEASinc recommends conducting Vacuum Enhanced Fluid Recovery (EFR) and product thickness measurements on a monthly basis for a period of 12 months. The purpose is to remove contamination from the subsurface of the AOC in the liquid, vapor and dissolved phases. After such period the effectiveness of the product recovery strategy should be evaluated by NYCHA and possibly increase recovery efforts of the impacted groundwater twice a month until petitioned for spill closure.*

3.3 User Responsibilities

Section 6 of the ASTM E1527-21 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-21 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	NR	
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	NR	
Specialized knowledge or experience of the person seeking to qualify for the LLP:	NR	

Question:	Yes/No:	Detail:
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		
Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	NR	
Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,		
-Do you know the past uses of the property?	NR	
-Do you know of specific chemicals that are present or were once present at the property?	NR	
-Do you know of spills or other chemical releases that have taken place at the property?	NR	
-Do you know of any environmental cleanups that have taken place at the property?	NR	
The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	NR	
Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	NR	

NR-no response

3.4 User's Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-21, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Environmental Information

Physical Setting

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 16 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the west. The closest down gradient water body is the Hudson River, located approximately 1,750-ft to the west-northwest.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Subject Property is classified as "Urban Land". The Urban Land designation indicates that a majority of the original soils on the site have been disturbed by development or covered with impervious surfaces, such as buildings or pavement.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The Geologic Age Identification Category for the Property is Stratified Sequence, and the Rock Stratigraphic Unit is the Paleozoic Eta, Ordovicias System and Lower Orodovician and Cambrian carbonate rocks Series.
Prior Env. Reports: (Section 3.2)	Prior reports discussed in Section 3.2 detail investigations performed at the site which indicated groundwater to be 10-17-ft bgs and flowing westward.
Additional Sources/ Data:	None
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the west.

Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report in Appendix E. Hillmann has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby

Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the Subject Property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix E.

Property Listings

The following listings of the Subject Property were identified:

- An NY SPILLS database listing, Spill number 0511572, for "Elliott Houses-NYCHA" associated with 426 West 27th Drive obtained regulatory closure on January 9, 2006. The spill occurred on January 6, 2006 when NYC DEP received a call pertaining to the release of 30-gallons of #2 fuel oil. The remarks state that the spill was due to a mechanical failure, and the spill contained in the basement and cleaned. Given no indication that remediation was needed and regulatory closure, the listing is not considered a REC or HREC.

- Elliott- Houses (Chelsea Houses), 426 West 27th Street is listed on the AST database for a permitted Petroleum Bulk Storage aboveground storage tank with ID: 2-601955. The AST capacity is listed as 275-gallon, for waste oil, and installed in 1995.

- Elliott-Houses-NYCHA, 426 West 27th Street is listed on the LTANKS database for Spill Number: 9602200 due to a tank test failure on May 15, 1996. The spill listed as consolidated with Spill Number: 8908401 is listed as having obtained regulatory closure on February 2, 2006. The remarks detail a discharge of #6-fuel oil, extensive remediation and monitoring and the installation of an oil recovery system detailed in Section 3.1 above. The database listing remarks state:

  "20K TANK - EVERYTIME FILLED ACTIVE FLOW TAKES PLACE INTO BASEMENT THRU WALLS - ABSORBED WITH SPEEDY DRY AND TEMPORARILY TAKING TANK OUT OF SERVICE"

  The database listing detail regarding the backdrop to the regulatory closure is as follows:

  The PRS [Petroleum Recovery System] was operated between 1998 and 2014. Free product has not been observed in the accessible monitoring wells since 2007. Since halting the PRS in 2014, free product has not been observed in the accessible monitoring wells and little free product (less than

0.25in) has been observed in the recovery wells. No petroleum related VOCs or SVOCs (listed in Table 3 of CP-51) were detected in groundwater samples collected in April 2015 from the accessible monitoring wells. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, spills can be closed. The Closure Letter should contain the contaminated soil clause. Spill closure email will be prepared with contaminated soil clause and sent to NYCHA.

Given the closure with a "*soil clause"* the above is considered a CREC. Hillmann recommends obtaining the closure records from NYCHA to understand the nature of any closure conditions e.g., monitoring or administrative requirements or institutional/engineering controls.

- Multiple Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) associated with Property addresses were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC.

- Chelsea-Elliott Municipal Housing Project, 427 West 26th Street is listed on the NY SPILLS database for Spills 1104033 – closed July 13, 2011 and 1711615 – closed March 23, 2018. 425 West 25th Street is listed for Spill 9802923 – closed July 21, 1998. The spills were contained and closed with no impact to soil/groundwater. Given the nature of the cases, they are not considered a REC or HREC.

- The Property is listed on the RCRA-NonGen, FINDS and ECHO databases likely associated with the removal of regulated waste. The listings are regulatory in nature, not indicative of a release and not considered a REC.

- Chelsea Houses-NYCHA, 431 West 25th Street is listed on the LTANKS, NY SPILLS and UST databases. The LTANKS listings is for Spill Number: 9806339 due to a tank test failure on August 21, 1998. The is listed as having obtained regulatory closure on August 27, 2013. The listing details the removal of a 30,000-gallon #2 fuel oil UST with six post excavation samples leading to the removal of 900-tons of soil. Exceedances included Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene.

  The listing details the backdrop to regulatory closure as follows:

  "*30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000 - investigation done in 2006 along fill lines and by fill port (DEC request) -some PAHs detected in grab groundwater sample in 2006 -5 permanent wells installed in 2010 -All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences) -Slight sheen subsequently detected in MW-5. Absorbent sock placed in well. -Minor impacts on sock in 2012. -No oil detect on absorbent sock in 2013. -Confirmed no product sheen in well during site visit of 7/31/13. NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned*."

  Hillmann recommends obtaining the closure letter to determine what, if any, conditions are linked to the No Further Action. Additionally, Hillmann observed multiple monitoring wells

in the vicinity of the former 30,000-gallon UST. Hillmann recommends decommissioning the wells if no ongoing monitoring requirements apply.

Chelsea-Houses, 431 West 25th Street is listed as being equipped with one (1) 25,000-gallon #2 fuel oil UST installed on September 1, 2000. The UST is listed as having secondary containment and leak detection. A 30,000-gallon UST is listed as having been installed in 1964 and removed in 2000.

Given the above and historic uses a VEC cannot be ruled out for the Property.

Adjoining Property Listings

The following adjoining property listings were identified.

- Multiple adjacent Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC in connection with the Property.

- Multiple adjacent sites are listed on the NY SPILLS and LTANKS databases. Each of the adjacent listings obtained regulatory closure and are not considered a REC in connection with the Property.

- 500 West 25th Street, listed on the VCP database for OER Site Number: 17CVCP047M associated with redevelopment and investigations/remediation associated with historic use obtained a notice of completion dated November 9, 2020. Given the status and findings of the investigations, the southwestern adjacent VCP site is not considered a REC in connection with the Property. Records were reviewed via the NYC EPIC Online Document Repository.

Surrounding Area Findings

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

Federal NPL				**# of sites:**	1	**Search Distance:**	1-mile
Notable Listing:	Hudson River PCBs						
Distance in feet:	1,600	**Direction:**	WNW	**Gradient:**	Down		
Data Discussion:	Given the location and nature of the NPL case – PCBs in the Hudson River sediment, the listing is not considered a REC to the Property.						

REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Federal Delisted NPL				**# of sites:**	0	**Search Distance:**	1-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal SEMS				**# of sites:**	2	**Search Distance:**	½-mile
Notable Listing:	Hudson River PCBs						
Distance in feet:	1,600	**Direction:**	WNW	**Gradient:**	Down		
Data Discussion:	Given the location and nature of the SEMS case (also listed on the NPL database) – PCBs in the Hudson River sediment, the listing is not considered a REC to the Property. The second SEMS listing is 1,925-ft from the Property to the east. Given the distance the SEMS case (USPS JAF Building) is not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal SEMS-ARCHIVE				**# of sites:**	3	**Search Distance:**	½-mile
Notable Listing:	Manhattan General Mail Facility						
Distance in feet:	567	**Direction:**	NE	**Gradient:**	Up/Cross		
Data Discussion:	Given the regulatory status and/or distance, the SEMS-ARCHIVE sites are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal CORRACTS				**# of sites:**	0	**Search Distance:**	1-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal RCRA-TSD				**# of sites:**	0	**Search Distance:**	½-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

State/Tribal SUPERFUND & HAZARDOUS WASTE				**# of sites:**	4	**Search Distance:**	1-mile
Notable Listing:	Bayview Correctional Facility / 550 West 20th Street						
Distance in feet:	1,492	**Direction:**	SW	**Gradient:**	Down		
Data Discussion:	Given the distance, gradient and/or regulatory status the SHWS listing are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						

VEC Discussion:	Based on the available data, a VEC is not suspected.

State/Tribal LANDFILL/SOLID WASTE DISPOSAL				**# of sites:**	3	**Search Distance:**	½-mile
Notable Listing:	Westside Operations Center (WOC) / 281 11th Avenue						
Distance in feet:	1,069	**Direction:**	NW	**Gradient:**	Down		
Data Discussion:	Given the distance and downgradient location, the WOC transfer station is not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal LEAKING STORAGE TANKS				**# of sites:**	144	**Search Distance:**	½-mile
Notable Listing:	28th Under Highline Associates LLC / 505 West 27th						
Distance in feet:	182	**Direction:**	W	**Gradient:**	Down		
Data Discussion:	Given the distance, gradient and/or regulatory status, the LTANKS listings are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal VOLUNTARY CLEANUP SITES				**# of sites:**	41	**Search Distance:**	½-mile
Notable Listing:	311 10th Avenue						
Distance in feet:	218	**Direction:**	NW	**Gradient:**	Down		
Data Discussion:	Given the nature of the listings and/or distance/gradient the VCP sites are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal BROWNFIELD SITES				**# of sites:**	15	**Search Distance:**	½-mile
Notable Listing:	Former Getty Service Station / 239 10th Avenue						
Distance in feet:	238	**Direction:**	W	**Gradient:**	Down		
Data Discussion:	Given the distance, gradient and/or regulatory statut, the Brownfields listings are not considered a REC in connection with the Property.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

UNMAPPED/ORPHAN LIST SITES	
	Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below:
Notable Listings:	None

Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
NYCFD-Public Records Unit / Tank Section	FOI request	No response was received prior to report issuance.
NYS DEC	FOI request	No response was received prior to report issuance.
NYCDEP	FOI request	No response was received prior to report issuance.
NY DOB	Online search	Records included in Appendix F including certificates to operate dual natural gas/heating oil number 2 boilers.
USEPA	Online search	No records indicative of a REC identified.
Internet	Online Search	No records indicative of a REC identified.

Pertinent records referenced in the above table have been included in Appendix F.

4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the Subject Property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the Subject Property.

The historical record sources listed below have been sought with the objective to document past uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural use, placement of fill dirt and other uses that do not involve structures. Hillmann has sought to review historical records in minimum intervals of five years.

Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
1890, 1899, 1911, 1930	**Property:**	The southwest portion of the Property (Block 723, Lot 1) is depicted as the Columbia Ale Brewery. The southeastern portion of the Property is depicted as a coal yard, stable and elevator factory among multiple multi-story mixed use buildings. The Property north of West 26th Street is improved with multiple multi-story mixed use buildings and a Copper Works company in the present Chelsea Addition portion of the Property. Multiple Property addresses were used for manufacturing listed to the right and depicted spatially relative to the present Property configuration in Appendix A, Figure 4.	N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930); Machine Shop (429 West 26th Street 1911); Manufacturing use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930); Garage with a 10,000-gallon buried tank (417-423 West 25th Street – 1930-1950).
	Adjoining:	Multiple mixed-use buildings and a manufacturing establishments building to the northeast,	Printer-Lithographer operation with multiple tanks noted to the immediate east of the Property at the southwest corner of 9th Avenue and West 26th Street – 263 9th Avenue (1930-2005). Motor freight station / auto repair shop equipped with multiple gasoline tanks noted to the adjacent west across 10th Avenue at 293 10th Avenue (1930-2001). Given the location downgradient and across a multi-lane road not considered a REC in connection with the Property.
1950, 1976, 1979, 1980, 1982, 1985, 1987, 1988, 1991-1996, 2001-2005	**Property:**	The present Elliott Buildings 2 and 3 south of West 26th Street are depicted and listed as John Lovejoy, 11-story plus basement apartment buildings. The present Elliott Buildings 1 and 4 between West 26th and 27th Streets are depicted and listed as "Elliott Houses – New York City Housing Authority", 12-story plus basement apartment buildings. The area of the present Chelsea Addition building between Elliott Buildings 1 and 4 has been cleared except for the Hudson Guild Neighborhood House (5-story plus basement building constructed in 1908-09). In the subsequent 1976 Sanborn Fire Insurance Map it is depicted as a 96 unit 14-story plus basement Chelsea Houses Addition with an auditorium/community house corresponding to its present configuration.	
	Adjoining:	Public school to the immediate east of the Property.	

A copy of the Certified Sanborn Map Report is attached in Appendix D.

City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

Property	
Use(s) / Occupant(s):	**Years**
Residential and mixed-use listings	1920-2017
Hand Laundry (Glassman Standard Hand Laundry) at 436 West 26th Street	1923

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties	
Use and/or Occupant(s)	**Years**
Mix of residential and commercial occupants.	1920-2017

A copy of the EDR City Directory report is attached in Appendix D.

Historical Topographic Maps

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

Historical Aerial Photographs

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix E, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
Historic Cleaners: (on-site/adjoining only)	None	Tonis Dry Cleaners, 2001-2006 at 243 9th Avenue to the adjacent southeast across West 25th Street;

Historic Auto: (on-site/adjoining only)	None	Carlo and Peter Truck Repair 289 10th Avenue, 1975-2002 and Marial Service Station, 279 10th Avenue, 1971-2014 to the adjacent west across 10th Avenue.
MGP: (1-mile distance)	None	Six listings within 1-mile. Each greater than 1,600-ft from the Property and downgradient.

Petroleum/Natural Gas Well Review

The historical record sources were reviewed for records of historic petroleum and/or natural gas wells at the Subject Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports: (Section 3.2)	Not applicable; no prior reports were provided.
Site Observations:	Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance.
Other Sources:	No additional pertinent historical data was obtained.

Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

Property	
Date Range	**Use**
Late 1800's to 1940's	Mixed-use and manufacturing including a machine shop, brewery
1940's-Present	Apartment buildings

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Date Range	**Use**
Unk to Present	Residential, commercial and printing/lithography

Historical Records Data Failure

The ASTM E1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and

likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions were sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

Objective	Met?	Detail	Significant?
First developed use/date determined?	Yes	The first developed use of the Property was for dwellings in the late 1800's.	No
Record sources at 5-year intervals back to 1940 or first developed use?	Yes	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Summary of Identified Past Uses of this section.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

Historic Uses REC Discussion

The review of historical records indicated evidence of the following potential RECs in connection with the Property:

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1940's-1960's as follows:

- N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930);
- Machine Shop (429 West 26th Street 1911);
- Manufacturing (not specified) use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930);
- Garage with a 10,000-gallon buried tank (417-423 West 25th Street – 1930-1950);
- Printer-Lithographer operation with multiple tanks noted to the immediate east of the Property at the southwest corner of 9th Avenue and West 26th Street – 263 9th Avenue (1930-2005).

The aforementioned historic uses including a transformer sub-station, machine shop, manufacturing, and garage with a UST, and a printer/lithographer immediately east of the Property are considered a REC.

5.0 INTERVIEWS

5.1 Interviews with Owners, Operators and Occupants

Current Owner / Key Site Operator

Property Owner	Contact Name	Affiliation	Interview Type
New York City Housing Authority (NYCHA) representative	Sidiya Harris	Property Caretaker with NYCHA	In person
Interview Date:	April 19, 2022		
Interview Outcome/Findings:			
An interview for information pertinent to the assessment was conducted in person at the time of the site visit. The following pertinent information was indicated: Sidiya was unaware of any known environmental concerns at the Property.			

Prior Owners/Operators/Occupants

Name	Company/Title	Yrs @ Site	Interview Type
Interview Date:			
Interview Outcome/Findings:			
No prior owners, operators or occupants were interviewed.			

Neighboring Property Owner/Occupants

Name	Company/Title	Yrs at site	Interview Type
Interview Date:			
Interview Outcome/Findings:			
The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.			

5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the Subject Property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may

have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

Name	**Agency Name/Title**	**Interview Type**
Interview Outcome/Findings:		
No additional local/state government officials were interviewed.		

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the Subject Property. This included visual and/or physical observations of the Subject Property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed Subject Property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Mr. Etan Hindin and Mr. Dominick Aponte
Property Escort/Company:	Sidiya Harris / Property Caretaker
Inspection Date:	April 19, 2022
Weather Conditions:	Overcast 45 degrees Fahrenheit

Significant Inaccessible Areas

Due to the pandemic occupied units were inaccessible. The inability to access these units is not considered a Significant Data Gap.

Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

6.2 General Site Setting

Site and Vicinity Characteristics

Abutting Roadways:	West 25th Street to the south; West 27th Street – Drive to the north; 10th Avenue to the west; West 26th Street divides the Property parcels.
Current Property Use:	Multifamily residential and daycare
Evidence of Past Property Uses:	None observed.
Evidence of Past Adjoining Property Uses:	None observed.
Surrounding Area Uses:	Commercial, residential

Current Adjoining Property Uses

Dir	Street Address	Description
N	294 10th Avenue	Park
W	259-293 10th Avenue	Residential and commercial
E	281 9th Ave 401 West 25th Street 263 9th Avenue	Public School Residential and commercial Residential and commercial
S	406-462 West 25th Street	Residential and commercial

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

Topographic Characteristics

Terrain:	Flat to gently sloping
Direction of Downward Slope:	Towards the northwest
On-site Water Bodies:	None observed
Other Significant Features:	None observed

General Description of Structures and Improvements

Buildings:	Eight
Approx. Building Size:	1,002-units (combined)
Approx. Year Built:	1963-1965
Number of Stories:	**Chelsea**: 407 West 25th Street parcel (Block 723, Lot 15) is comprised of two (2) 21-story plus basement apartment buildings. The eastern building is equipped with a two-bay maintenance garage on the east side and a waste management areas east of the building. **Chelsea Addition**: 441 West 26th Street parcel (Block 724, Lot 10) – one (1) 14-story plus basement apartment building (ground level day center). **Elliott**: three (3) parcels (Block 724, Lots 1 and 15 and Block 723, Lot 1), four (4) 11-story and 12-story plus basement apartment buildings and one freestanding daycare at the northeast corner of West 26th Street and 10th Avenue. NOTE: See Appendix A for building numbering/locations
Basement/Subgrade Levels:	See above
Exterior Ground Cover:	Asphalt, cement and landscaped areas,

Ancillary Structures:	Bulk trash/compactor covered-masonry enclosure with two overhead doors. Northeast of Chelsea Building 2
Sources of Heating & Cooling:	Dual natural gas/heating oil boilers for onsite generated steam heat and tenant-owned optional electric window units for cooling.
Potable Water/Sewage Disposal:	Municipal utility connections

6.3 Site Features and Conditions

Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the Subject Property:

Occupant	Substance	Qty/Container Type	Storage Conditions
NYCHA	Maintenance and cleaning materials (including paint)	1-30-gallon	All stored indoors on intact concrete. No storage concerns noted.

Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
UST	Heating oil Number 2	25,000-gal	Double walled	1998	Active (natural gas generally used)	In area of former UST with monitoring wells noted. West of Chelsea Building 1 just north of West 25th Street.
UST	Heating oil Number 2	25,000-gal	Double walled	1998	Active (natural gas generally used)	West of Elliott Building 4 south of West 27th Street – Drive
AST	Waste oil	275	Steel	1990's	Status unknown	Elliott Building 4 Boiler Room – Remediation Oil Recovery System waste oil tank (see discussion Section 3.1)
AST	Holding tank	275	Steel	1990's	Status unknown	Elliott Building 4 Boiler Room - Remediation Oil Recovery System holding tank (see discussion Section 3.1)

Strong, Pungent or Noxious Odors and their Sources

No strong, pungent or noxious odors were noted at the Subject Property.

Standing Surface Water/Pools & Sumps

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

Drums, Totes and Intermediate Bulk Containers

No hazardous substance or petroleum product drums were noted.

Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

PCBs in Oil Filled Electrical/Hydraulic Equipment

The Property is equipped with a trach compactor northeast of Chelsea Building 2 just south of West 26th Street. The compactor area is masonry enclosed with a roof and two overhead garage bay doors. No concerns were noted.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM E1527-21 standard and this assessment.

Stains or Corrosion on Floors, Walls or Ceilings

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

Drains and Sumps

Floor drains and a basement sump designed for the purpose of managing sanitary sewage were noted. No conditions indicative of a REC were observed.

Pits/Ponds/Lagoons

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed.

On-Site Solid Waste Disposal/Fill Material

No evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed.

Based on the history of previous site development, historical fill material may be present in the subsurface at areas of previous site grading or building structures.

Waste Water

Sanitary sewage generated at the Subject Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Subject Property is discharged via roof drains into the municipal sewer system.

Septic Systems/Cesspools

No septic systems/cesspools identified.

Wells

The following wells were identified at the Subject Property:

Multiple monitoring wells were observed in the vicinity of the two (2) Property heating oil USTs, west of Chelsea Building 1 just north of West 25th Street, and west of Elliott Building 4 south of West 27th Street – Drive. The wells are associated with documented releases from USTs removed from the Property discussed in Section 3 and 4 above.

Railroad Spurs

No railroad spurs were identified on the Subject Property.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E1527-21 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Given the 1940-1968 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis.

Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-of insulation and roofing materials.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

Given the 1940-1968 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis.

Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 mg/cm^2 (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth.

The following evidence of significant moisture intrusion or mold/microbial growth was noted:

The basement of Building Elliott - 1 was observed to have standing water on the concrete surface with some discoloration. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed.

7.5 NWI Mapped Wetlands

The National Wetlands Inventory online Wetland Mapper (https://www.fws.gov/wetlands/data/mapper.html) was reviewed for indications of jurisdictional wetlands at or immediately adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

The review did not indicate regulated wetland areas on the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

Potable water service at the Property is provided by a utility connection with the City of New York. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F. Note – no site-specific lead-in-water sampling was performed within the context of the Phase I.

1 EXECUTIVE SUMMARY

American Environmental Assessment and Solutions, Inc. (AEASinc) has performed a Phase II Field Investigation at the property located at 426 West 27th Street, New York (New York County), NY (the "Site" or "Subject Property"). The Phase II Field Investigation was performed in general accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standards E 1903-97 and the contract between AEASinc and the Client.

The purpose of the Phase II Field Investigation was to evaluate the effectiveness of the existing on-site recovery system and to assess the horizontal extent of the product plume. The assessment was performed in the vicinity of two former 20,000 gallon single walled underground storage tanks (USTs) which were removed and replaced with one 25,000 gallon double walled UST in 1997.

In 1989 as a result of seepage of fuel oil into the northern basement wall of building 4 the New York State Department of Environmental Conservation assigned spill number **89-08401** to the Site. Since then various environmental assessments, investigation and remediation were performed at the Site to address the leakage and spill number **89-08401** at the Site.

This Phase II Field Investigation was to implement a Site Specific Field Investigation Work Plan prepared by Garnett Fleming dated November 2009 and to document all environmental activities performed by AEASinc.

The Subject Property contains a housing development identified as Elliot Houses located at 426 West 27th Street in the Chelsea area of Manhattan, NY. The Site is bordered by West 27th Street to the north, West 26th Street to the South, 9th Avenue to the east and 10th Avenue to the west. The total area of the development is approximately 5-acres. The area of concern (AOC) specified for this investigation was identified as the area in the vicinity of two former 20,000 gallon single walled USTs. The current 25,000 gallon UST that is in use by the development is situated in the foot print of the former USTs, on the northern side of building 4 within the development.

Field activities consisted of a Ground Penetrating Radar Survey, the installation and sampling of seven soil borings, the installation and development of two new monitoring wells, the surveying of all monitoring and recovery wells and the sampling of all monitoring wells. Select soil samples were obtained from each soil boring and groundwater samples were obtained from all monitoring wells. The soil and groundwater samples were submitted to a New York State certified laboratory and analyzed for common petroleum constituents in accordance with STARS Method 8260, and 8270BN. All field activities were performed from December 2010 to February 2011.

Soil Contamination
VOCs were identified in soil sample SB-4 at 13 to 15 feet. The compound Isoproplybenzene and n-Propylbenzene were detected at levels exceeding their respective RSCO. SB-4 was installed west of RW-1.

SVOCs were identified in soil sample SB-6 and SB-7 exceeding their respective RSCO. The compound Chrysene was detected in SB-6 at 400 µg/kg exceeding its respective RSCO of 400 µg /kg.

Five SVOCs were detected in SB-7 exceeding their respective RSCO. The compounds Benzo(a)Anthracene; Benzo(a)Pyrene; Benzo(b)Fluoranthene; Benzo(k)Fluoranthene; and Chrysene were identified at levels exceeding their respective Recommended Soil Cleanup Objective (RSCO). SB-7 was installed between RW-2 and MW-2.

Groundwater Contamination
VOCs were detected in groundwater sample GW-3 at levels exceeding the NYSDEC Groundwater Quality Standards. Five VOCs were detected in groundwater sample GW-3 above their respective groundwater standard. The compounds 1,2,4-Trimethylbenzene; Benzene; Isopropylbenzene; Isopropylbenzene; n-Butylbenzene; and n-Propylbenzene were detected in GW-3 exceeding their respective NYSDEC Ambient Groundwater Quality Standards.

Other VOCs were detected at very low levels below their respective groundwater standard in GW-3 and GW-4.

No VOCs were detected groundwater sample GW-1 or GW-2.

No SVOCs were identified in any of the groundwater samples obtained from GW-01 through GW-04.

1.1 ENVIRONMENTAL PROFESSIONAL DECLARATIONS

Ms. Antoinette Ollivierre Senior Geologist, gathered and compiled information contained in this report and performed all fieldwork.

Antoinette Ollivierre, CEC, CEI
Senior Geologist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

This summary does not contain all the information presented in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

No effort has been made to perform any investigation beyond what is included in this report and / or the scope of work outlined in the Site Specific Field Investigation Work Plan. The observations included herein summarize the results of the environmental activities up to date of the fieldwork and the date of this report.

The following sections provide the details and specific information pertaining to the various components of the Phase Field Investigation.

2 INTRODUCTION

American Environmental Assessment & Solutions, Inc has prepared this Phase II Field Investigation Report on behalf of the New York City Housing Authority (NYCHA). This Phase II Field Investigation Report was prepared to document all environmental activities performed at the Site from December 2010 through February 2010 by AEASinc and to determine the effectiveness of the onsite remediation system.

2.1 SITE DESCRIPTION AND LOCATION

The Subject Property contains a housing development identified as Elliot Houses located at 426 West 27th Street in the Chelsea area of Manhattan, NY. The Site is bordered by West 27th Street to the north, West 26th Street to the South, 9th Avenue to the east and 10th Avenue to the west. The total area of the development is approximately 5-acres. The area of concern (AOC) specified for this investigation was identified as the area in the vicinity of two former 20,000 gallon single walled USTs. The 25,000 gallon UST that is currently in use by the development is situated in the foot print of the former USTs, on the northern side of building 4 within the development.

Figure 1 provides a Site Location Map

2.2 SITE BACKGROUND

Information obtained from a Phase II Field Investigation Report prepared by TRC dated 1992; a Site Specific Field Investigation Work Plan prepared by Garnett Fleming dated November 2009 and a Petroleum Status Report dated August 2010 provided AEASinc with background information pertaining to the fuel oil spill and impact of the Subject Property. According to the information obtained, two 20,000 gallon single walled USTs (designated as Tank 001 and Tank 002) were installed in 1947 north of the boiler room in building 4. The USTs stored number 4 fuel oil and was used to fire the boilers located in the basement of building 4 for heating of the development.

In 1989 fuel oil seepage through the northern wall of the boiler room was reported and the New York State Department of Environmental Conservation (NYSDEC) Spill number **89-08401** was assigned to the Site. Information obtained from NYCHA indicated that the oil initially seeped into the boiler room through the wall sleeve for the oil supply piping when Tank 001 was filled to capacity. As a result of the leakage, an ultrasonic test and repairs to Tank 001 were performed.

In 1997 the two 20,000 gallon single walled USTs were removed and replaced with one 25,000 gallon double walled steel UST. The 25,000 gallon double walled steel UST is currently in use by the development and stores # 2 fuel oil for heating of the building.

The Subject Property is registered with the NYSDEC Petroleum Bulk Storage (PBS) Unit under facility number 2-601955.

Figure 2 provides a Site Sketch

2.3 PREVIOUS INVESTIGATIONS

To address the impacted area surrounding the former USTs and Spill number **89-08401**, various environmental assessments, investigations and remediation were previously performed. The previous environmental assessments and investigations include the following:

In 1989 TRC prepared a Phase II Field Investigation Report that discusses the leakage into the boiler room and identified spill number 89-08401. In 1991 TRC conducted a Site inspection of the boiler room and confirmed that the leakage had ceased.

In 1992 TRC conducted a Site Investigation to determine the extent of product in the subsurface, extent of stained soil and groundwater impact due to the fuel oil leakage in the vicinity of the former UST at the Site. The investigation revealed impacted soil in the vicinity of the former USTs and along the northern wall of the boiler room of building 4. The investigation also included drilling of eight soil borings; the installation of three groundwater monitoring wells and the collection of eleven soil samples, four groundwater samples, one product sample, and eight QA/QC samples. The samples were analyzed for total petroleum hydrocarbons (TPH), aromatic hydrocarbons (AH) and / or polynuclear aromatic hydrocarbons (PAH).

Based upon the field observation during the soil borings / monitoring wells installation and sample analytical results, TRC concluded that soil boring B-2 and B-3 contained oil-stained soil; monitoring well MW-3 contained approximately 2 feet of free product and analysis of the product sample determined it had a viscosity level of number 4 fuel oil.

In 1997 Aqua-X Conservation, Inc conducted a field observation and documented the removal of the two former single walled 20,000 gallon USTs. Five endpoint samples were taken from the tank excavation and were analyzed for volatile organic compound (VOCs) via EPA Method 8021. Laboratory results indicated VOC concentrations exceeded the NYSDEC's Recommended Soil Cleanup Objectives (RSCOs) for soil. According to Aqua-X the backfill around the former USTs were excavated due to observed leakage and contamination which included discoloration and odor of the soil. The area was then backfilled with a mixture of silty sand and common backfill material.

In 1998 a product recovery system /remediation system was installed. The remediation system consist of two recovery wells with total fluid pneumatic pumps, piping, an

oil/water separator and a 275-gallon steel above ground storage tank (AST) for the recovered petroleum product. Information obtained from the Petroleum Remediation Status report indicated that the remediation system initially consisted of five recovery wells. The remediation system has been in operation since 1998 and remains in service.

In July 2007 Garnett Fleming prepared a Site Specific Field Investigation Work Plan (Work Plan) that was revised in November 2009. For revision of the Work Plan, Garnett Fleming visited the Site and noted that monitoring wells MW-1 and MW-3 were either destroyed or paved over. MW-1 originally located south of the boiler room and MW-3 originally located at the southern corner of the Hudson Guild. NYCHA informed Garnett Fleming that MW-1 was reinstalled at the eastern corner of the Hudson Guild by the contractor who completed the landscaping work.

2.4 PURPOSE AND SCOPE

The scope of work for this Phase II Field Investigation was based upon an approved Site-Specific Field Investigation Work Plan prepared by Garnett Fleming, dated November 2009. The scope of work as outlined in the Work Plan consisted of the following:

- A geophysical survey;
- Advancing of seven borings;
- Installation of two monitoring well;
- Development of newly installed monitoring wells;
- Monitoring and recovery wells gauging;
- Monitoring wells sampling;
- Monitoring wells survey;
- Preparation of a Phase II Field Investigation Report documenting all work, assessment and conclusion of findings including determination of effectiveness of onsite remediation system and recommendations.

The purpose of the investigation was to determine the effectiveness of the onsite remediation system and to further assess the soil and groundwater quality in the AOC.

All related portions of the fieldwork were performed, at a minimum in accordance with acceptable industry standards. These acceptable industry standards include, but not limited to, the ASTM Standard Guide for Phase II Environmental Site Assessments (E 1903-97), the New York State Department of Environmental Conservation Bureau of Spill Prevention & Response Sampling Guidelines and Protocols, March 1991 and the Draft DER-10 Technical Guidance for Site Investigation and Remediation, December 2002.

2.5 PHYSICAL SETTING

AEASinc reviewed United States Geological Survey (USGS) Topographic (Topo) Maps and other information regarding the physical setting of the site to assist with the interpretation of subsurface water movement near the property.

Summary	
Source Name	**Year Published/Issued**
USGS 7.5 Minute Topo Map	Central Park, NY Quadrangle 1995
FEMA Flood Map	Jersey City – 3604970182F, September 5th, 2007
Notes: FEMA = Federal Emergency Management Agency.	

The subject property is located in the western portion of Manhattan (Chelsea area), New York County. The elevation of the subject property is approximately 20 feet above sea level (USGS 7 1/2-Minute Central Park Quadrangle, 1967, Photorevised 1995).

The topography in the vicinity of the Subject Property is level to sloping in some areas. The ground surface is covered by asphalt, concrete and native soil in some areas. Chelsea Park is located adjacent to the Site.

The region's most ancient rocks are the foundation of the Highlands region. Metamorphic and igneous rocks of Late Precambrian and Early Paleozoic age crop out in northeast-trending belts of rock forming the core of the Appalachian Mountains. The area is a rugged, hilly to mountainous terrain, bearing the characteristic scars of Pleistocene glaciation. The rocky outcrops visible on hillsides, and along stream banks and roadside exposures, consist mostly of gneiss, schist, and marble.

Onsite soil consisted of fill material containing rocks, bricks, debris to approximately 11 feet below grade and fine to medium grained Silty sand at deeper depths with some areas containing clayey sand in various locations.

Site-specific groundwater was encountered and has been determined. The actual direction of groundwater flow may differ from that determined and may be influenced by the presence of the remediation system and, if any, of subsurface structures or large volume withdrawal wells in the area.

The depth to groundwater onsite of the Subject Property was determined at 12 to 15 feet below grade. The average groundwater depth was determined to be approximately 15 feet during drilling activities. The onsite remediation system was then shut-off to allow the groundwater to reach equilibrium and a week later the onsite monitoring wells were gauged. The depth to groundwater was then determined at 12 to 14 feet below

grade. Based on our interpretation of the physical setting, sources and our experience, AEASinc infers that groundwater flow direction in the vicinity of the Site is towards the west, in the direction of the Hudson River. The Hudson River is located approximately 2,057 feet from Elliot Housing development.

Surface water runoff on the Site flows to the surrounding Streets that are connected to the City storm water sewer system.

3 FIELDWORK

3.1 INTRODUCTION

The purpose of this section is to document the details and protocols that were utilized to accomplish the project goals. Field investigation and sampling activities were conducted from December 2010 through February 2011, under the supervision of Ms. Antoinette Ollivierre, Senior Geologist for AEASinc. Prior to the field investigation, utilities were marked out by the respective utility companies where they entered or were located adjacent to the Site. Utility mark out confirmation number 103411026 was issued to the mark out.

Prior to drilling activities a geophysical survey was performed at the Site on December 15th, 2010. The geophysical survey was performed to locate and mark out all onsite utilities in the vicinity and surrounding the AOC to the proposed drilling location. Due to snow coverage a second geophysical survey was performed at the Site on January 13th, 2011.

Figure 3 provides a Utility Map for the AOC

3.2 SOIL INVESTIGATION

Due to extreme snow storms in NYC drilling activities were postponed and commenced on January 11th, 2011. Each boring location was hand auger to five feet below grade prior to utilizing the hollow stem auger for drilling and sampling.

3.3 PROTOCOL & SAMPLING LOCATIONS

A total of seven (7) soil borings were installed during the investigation of the vicinity of the former USTs. The soil borings were designated SB-1 through SB-7 and advance from five feet below grade until groundwater was encountered. On January 11th, 2011 soil boring SB-1 and SB-2 were installed; SB-3 through SB-5 were installed on January 14th; and SB-6 through SB-7 were installed on January 18th. All seven soil borings were advanced utilizing a hollow stem auger. Soil samples were collected in all borings at 2-foot intervals utilizing split samplers. After infield screening, select soil samples were collected and placed into laboratory supplied glassware.

The following provides the locations of soil borings SB-1 through SB-7 along with total depths of each boring and the highest PID readings obtained during the field screening:

Soil Borings Locations			
Soil Boring	**Location(s) Installed**	**Total Depth (feet)**	**Highest PID Readings**
SB-1	Located between RW-1 and RW-2	19	198.6ppm at 13′ – 15′
SB-2	Located north of RW-1	17	75.9ppm at 15′ – 17′
SB-3	Located north of RW-1	19	0.0
SB-4	Located west of RW-1	19	119.2ppm at 13′ – 15′
SB-5	Located between RW-1 and RW-2	19	197.9ppm at 15′ – 17′
SB-6	Located between RW-2 and MW-2	19	68.6ppm at 15′ – 17′
SB-7	Located between RW-2 and MW-2	19	22.7ppm at 17′ – 19′

Figure 4 provides a Sampling and Monitoring Well Map

Upon completion of the investigation, borings were filled with soil cuttings and clean soil to ground surface.

3.4 FIELD CHARACTERIZATION

Separate aliquots of each soil sample were placed into airtight zip-lock bags and 4-ounce jars and appropriately labeled. An AEASinc geologist then characterized each soil sample in the field. The soil characterization consisted of determining the soil classification utilizing the Unified Soil Classification System. Each sample was then screened for organic vapors utilizing a Photoionization Detector (PID).

A PID makes use of the principle of photoionization for the detection and qualitative measurement of organic vapors. A PID does not respond to all compounds similarly, rather, each compound has its own response factor relative to its calibration. For this investigation, the PID was calibrated to the compound isobutylene, which is published by the manufacturer. The PID has a minimum detection limit of 0.1 parts per million (ppm). This meter measures the hydrocarbon concentrations in isolated portions of the secured samples.

Headspace analyses were conducted on each sample by partially filling the zip lock bag and sealing it, thereby creating a void. This void is referred to as the sample headspace. To facilitate the detection of any hydrocarbons contained within the headspace, the container was agitated for a period of 30 seconds. The probe of the PID was then placed within the headspace to measure the organic vapors present. Soil boring logs were then generated based upon the soil characterization, along with the PID field screening.

The general soil type beneath the Site consisted of fill material containing rocks, bricks, and debris to approximately 11 feet below grade and fine to medium grained Silty sand

at deeper depths with some areas containing clayey sand in various locations. Olfactory evidence of petroleum contamination was identified during the field screening of the samples from every soil boring. Visual staining, sheen and petroleum odor were identified in soil boring SB-1 through SB-7. Organic vapors were detected with the PID during the field screening of samples and the highest level of organic vapors detected in each boring are listed in the table above. Additional information for each sample field screened is provided as appendix A; boring logs. The water table was encountered during this investigation at approximately 15 feet below grade.

Appendix A provides copies of the Soil Boring Logs

Based upon the requirements set forth in the scope of work, a select soil sample from each boring was containerized and analyzed at a State-certified laboratory.

3.5 MONITORING WELL INSTALLATION

Two monitoring wells were installed at the Site in the vicinity of the former USTs and impacted areas. The monitoring wells were installed on January 14th and 19th, 2011. The monitoring wells were installed to further assess the groundwater quality in the AOC and were installed at the locations that exhibited high levels of fuel oil impact. Each monitoring well was installed at a total depth of 25 feet below grade. The monitoring wells were constructed using 4-inch diameter schedule 40 PVC pipe and a 10 feet of 4 inch diameter, 0.020-inch (20 slot) PVC well screen. In general, screen lengths of 10 feet was placed at the bottom of the borehole, and the annular space between the well screen, the borehole wall, and approximately 2 feet above the screen was backfilled with a uniform silica sand filter pack. Approximately 1- to 3-foot bentonite clay seal was placed above the sand pack in each monitoring well. The remaining annular space was filled to grade with cement-bentonite grout slurry. A flush mounted protective cover.

Following installation, the remediation system was shut off to allow for the groundwater to reach equilibrium. Then a week later the newly installed monitoring wells were developed to remove silt and clays from the well and to stabilize the well filter pack. The wells were developed by surging and purging.

3.6 GROUNDWATER INVESTIGATION

On January 28th, 2011 AEASinc accessed, gauged, purged and sampled MW-2. The remaining three monitoring wells were covered by approximately 3 feet of snow and higher in other areas where the snow was stockpiled and could not be accessed. A roll-off container was also observed to be on top of MW-1.

On February 18th, 2011 AEASinc accessed the remaining monitoring wells. The recovery and monitoring wells were gauged for depth to water and depth to product. All four monitoring wells were purged utilizing a submersible pump and dedicated polyethylene tubing. Each well was purged three times their well volume and placed into 55-gallon drums for disposal. Then groundwater samples were collected from each monitoring well and placed into laboratory supplied glassware.

All monitoring and recovery wells were surveyed on February 18th, 2011 by a NYS license land surveyor (#050607). The survey was performed to obtain elevation readings and to be utilized in the creation of groundwater elevation maps. The following provides a summary of the survey including monitoring data, product thickness and groundwater elevation.

Summary of water and product level measurements
Elliot Houses
426 West 27th Street, New York, NY

Well	Well Elevation	Depth to Product	Depth to Water	Product Thickness	Product Level Elevation	Groundwater Level Elevation
MW-1	14.42	-	12.0	-	-	2.42
MW-2	17.10	-	13.8	-	-	3.30
MW-3	16.01	-	12.7	-	-	3.31
MW-4	16.16	-	12.7	-	-	3.46
RW-1	13.85	12.55	12.85	3 inches	1.3	1.00
RW-2	17.94	-	12.6	Trace	-	5.34

As per the table above, free product was encountered in RW-1 and RW-2. However the groundwater from the monitoring wells contained petroleum odor and some visible sheen.

3.7 LABORATORY ANALYTICALS

All samples were placed in a cooler filled with ice and maintained at 4 degrees Celsius. Each sample was transmitted under proper chain of custody procedures to a State-certified (ELAP No. 10854) laboratory for confirmatory laboratory analyses. All soil and groundwater sample were analyzed for VOCs via NYSDEC STARS list Method 8260 and SVOCs via NYSDEC STARS list Method 8270.

3.8 DECONTAMINATION

Each piece of sampling or other down hole equipment was decontaminated prior to each use in order to ensure that cross-contamination between sampling locations does not occur. The following procedure was utilized in the decontamination process:

- Wipe clean and wash with Alconox®
- Potable water rinse
- Methanol rinse
- Deionized water rinse
- Air dry

All decontamination procedures were performed in an area segregated from any sampling areas. Any rinsate from the decontamination areas is contained and removed from the Site.

3.9 QUALITY ASSURANCE / QUALITY CONTROL

All samples were properly handled and placed into appropriate labeled laboratory supplied containers. The samples were placed in a cooler filled with ice and maintained at a maximum 4 degrees Celsius. All samples were transmitted under proper chain of custody procedures to a State-certified (ELAP No. 10854) laboratory for confirmatory laboratory analyses. All holding times were met. The laboratory did not report any irregularities with respect to their internal Quality Assurance / Quality Control.

4 ANALYTICAL RESULTS

4.1 RESULTS OF SOIL SAMPLES

Table 1 provides the analytical results for the Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compounds (SVOCs) detected in soil samples SB-1 through SB-7. Concentrations reported in **Table 1** are in micrograms per kilogram (µg/kg). **Table 1** also provides a comparison of the analytical results to the Recommended Soil Cleanup Objectives (RSCO) from the NYSDEC STARS Memo # 1 and to the 6 NYCRR Part 375.6(b) Restricted Residential Soil Cleanup Objectives. The SCOs represent the concentration of a contaminant in soil which when achieved at the Site will require no use restrictions on the Site for the protection of public health, groundwater and ecological resources due to the presence of contaminants in soil.

VOCs

VOCs were identified in soil sample SB-4 at 13 to 15 feet. The compound Isoproplybenzene and n-Propylbenzene were detected at levels exceeding their respective RSCO. SB-4 was installed west of RW-1. Low levels of VOCs below their respective RSCO were also detected in SB-4. Low levels of VOCs at levels below their respective RSCO were also detected in soil samples SB-1, SB-2, SB-3, SB-5, SB-6 and SB-7.

SVOCs

SVOCs were identified in soil sample SB-6 and SB-7 exceeding their respective RSCO. The compound Chrysene was detected in SB-6 at 400 µg/kg exceeding its respective RSCO of 400 µg /kg.

Five SVOCs were detected in SB-7 exceeding their respective RSCO. SB-6 and SB-7 were installed between RW-2 and MW-2. The following is a summary of the compounds found in SB-7 at levels above their respective RSCO.

Compound	Concentration (µg/kg	RSCO (µg/kg)
Benzo(a)Anthracene	1,600	224
Benzo(a)Pyrene	870	61
Benzo(b)Fluoranthene	960	1,100
Benzo(k)Fluoranthene	710	1,100
Chrysene	1,200	400

Low levels of SVOCs at levels below their respective RSCO were also detected in soil samples SB-1, SB-2, SB-4 and SB-5. No SVOCs were detected in SB-3.

Table 1 is attached to this report

4.2 RESULTS OF GROUNDWATER SAMPLES

Table 2 provides the analytical results for the Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compounds (SVOCs) detected in groundwater samples GW-01 through GW-04. Concentrations reported in **Table 2** are in micrograms per liter (µg/L). **Table 2** also provides a comparison of the analytical results to the NYSDEC TOGS Ambient Groundwater Quality Standards.

VOCs

VOCs were detected in groundwater sample GW-3 at levels exceeding the NYSDEC Groundwater Quality Standards. Five VOCs were detected in groundwater sample GW-3 above their respective groundwater standard. The following is a summary of the VOCs detected in GW-3 exceeding their respective NYSDEC Ambient Groundwater Quality Standards.

Compound	**Concentration (µg/L)**	**NYSDEC Ambient Groundwater Quality Standard (µg/L)**
1,2,4-Trimethylbenzene	10	10
Benzene	1.1 J	0.7
Isopropylbenzene	8.5	5
n-Butylbenzene	6.9	5
n-Propylbenzene	12	5

Other VOCs were detected at very low levels below their respective groundwater standard in GW-3 and GW-4.

No VOCs were detected groundwater sample GW-1 or GW-2.

SVOCs

No SVOCs were identified in any of the groundwater samples obtained from GW-01 through GW-04.

Table 2 is attached to this report

Appendix C provides a copy of the soil and groundwater samples laboratory results

5 DISCUSSION

Based upon the information revealed from this Phase II Field Investigation it is evident that soil and groundwater contamination still exist in the subsurface of the Subject Property. Field screening of the soil samples revealed that every sample except for sample SB-3 contained organic vapors. Infield screening of the soil samples indicated that SB-1, SB-4 and SB-5 contained the highest levels of vapors, based upon PID readings. Organic vapors detected by the PID meter indicated that soil contamination is present from 5 to 19 feet in all the soil borings as seen in SB-1, except in soil boring SB-3. However, only SB-4 was detected via analyses to contain VOCs exceeding their respective RSCOs. Although no VOCs were detected in SB-5 above their respective RSCOs, total VOCs in SB-5 was 12,200 ug / kg exceeding NYSDEC allowable levels of 10, 000 ug/kg for total VOCs. Similarly, low levels of VOCs were identified in SB-6 and SB-7. Laboratory analysis revealed that levels of SVOCs ranging from below their RSCOs to levels about their RSCOs exist in all the samples except SB-3. It can be interpreted that the horizontal plume of soil contamination is located south of SB-3. The presence of fuel oil contamination in the soil in the vicinity of SB-4 and extending south, east and west has the potential to adversely impact the groundwater further. With fluctuation of groundwater levels and percolation of large quantity of water from heavy rainfall, the soil contamination has leaching potential to reach groundwater over time.

Laboratory analysis for the groundwater samples revealed that dissolved constituents are present in the groundwater. VOCs exceeding their respective NYSDEC Ambient Groundwater Standards are present in the groundwater in the location of SB-3. SB-3 is located west of Tank 1 and south of RW-1. Monitoring data for RW-1 indicated that 3 inches of product is present in this recovery well. AEASinc believes that dissolved constituents may be present in the groundwater in RW-1 as well. Based upon the information presented in the previous environmental reports and the current Phase II Investigation it appears that the groundwater contamination has slight shifted west.

It is evident that the remediation system has been effective in removing the free floating product from the groundwater as was revealed from the monitoring data and previous environmental report indicating that product thickness has greatly reduced from 4.5 feet in 1992 to 3 inches currently and should be kept in use until no free floating product is present in the groundwater. However although the remediation system usage should be continued, the dissolved constituents in the groundwater should also be addressed.

6 CONCLUSIONS

American Environmental Assessment & Solutions, Inc (AEASinc) has performed a Phase II Field Investigation at the property located at 426 West 27th Street. New York, NY. Based upon the findings of the Phase II Field Investigation, the following conclusions are provided.

- The field portion of AEASinc's investigation consisted of a geophysical survey to locate and mark out onsite utilities, the installation and sampling of seven (7) soil borings; the installation of two monitoring wells, the development of the newly installed monitoring wells and the sampling of all monitoring wells. All fieldwork was performed in accordance with all applicable federal, state and local regulations. Select soil was collected based upon infield screening and analyzed at a state-certified laboratory for Volatile Organic Compounds and Semi-Volatile organic Compounds via NYSDEC STARS list Method 8260 and 8270.

- VOCs were identified in soil sample SB-4 at 13 to 15 feet. The compound Isoproplybenzene and n-Propylbenzene were detected at levels exceeding their respective RSCO. SB-4 was installed west of RW-1. Low levels of VOCs at levels below their respective RSCO were also detected in soil samples SB-1, SB-2, SB-3, SB-5, SB-6 and SB-7.

- SVOCs were also identified in the soil samples obtained at the Site. SVOCs were identified in soil sample SB-6 and SB-7 exceeding their respective RSCO. The compound Chrysene was detected in SB-6 at 400 µg/kg exceeding its respective RSCO of 400 µg /kg.

  Five SVOCs were detected in SB-7 exceeding their respective RSCO. The compounds Benzo(a)Anthracene; Benzo(a)Pyrene; Benzo(b)Fluoranthene; Benzo(k)Fluoranthene; and Chrysene were identified at levels exceeding their respective Recommended Soil Cleanup Objective (RSCO). SB-7 was installed between RW-2 and MW-2. Low levels of SVOCs at levels below their respective RSCO were also detected in soil samples SB-1, SB-2, SB-4 and SB-5. No SVOCs were detected in SB-3.

- VOCs were identified in only one groundwater sample. VOCs were detected in groundwater sample GW-3 at levels exceeding the NYSDEC Groundwater Quality Standards. Five VOCs were detected in groundwater sample GW-3 above their respective groundwater standard. The compounds 1,2,4-Trimethylbenzene; Benzene; Isopropylbenzene; Isopropylbenzene; n-Butylbenzene; and n-Propylbenzene were detected in GW-3 exceeding the respective NYSDEC Groundwater Quality Standards.

- No SVOCs were identified in the groundwater obtained from the monitoring wells onsite.

- Other VOCs were detected at very low levels below their respective groundwater standard in GW-3 and GW-4.

- No VOCs were detected groundwater sample GW-1 or GW-2.

- No SVOCs were identified in any of the groundwater samples obtained from GW-01 through GW-04.

7 RECOMMENDATIONS

AEASinc understands that the purpose of this Phase II Field Investigation was to evaluate and determine the effectiveness of the remediation system and delineate the horizontal extent of the soil contamination. However, based upon the information presented above, AEASinc provides the following recommendations:

- The remediation system should be kept in use to further reduce product thickness until no free floating product is detected in any of the wells or in the groundwater.

- Since the observed fuel oil impacts have shown to represent an isolated area, no further subsurface investigation is warranted. AEASinc recommends conducting Vacuum Enhanced Fluid Recovery (EFR) and product thickness measurements on a monthly basis for a period of 12 months. The purpose is to remove contamination from the subsurface of the AOC in the liquid, vapor and dissolved phases. After such period the effectiveness of the product recovery strategy should be evaluated by NYCHA and possibly increase recovery efforts of the impacted groundwater twice a month until petitioned for spill closure.

Certified Sanborn® Map Report

03/28/22

Site Name:

Elliott-Chelsea
415-431, 420-428 West 25th St
New York, NY 10001
EDR Inquiry # 6915004.3

Client Name:

Hillmann Environmental Co.
1600 Route 22 East
Union, NJ 07083
Contact: Joanne Bedkowski

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Limited Permission To Make Copies

Hillmann Environmental Co. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2022 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 37 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 24 RCRA-VSQG sites within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 11/19/2021 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 01/06/2022 has revealed that there are 4 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 03/15/2022 has revealed that there are 144 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 55 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 NY CBS AST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 03/15/2022 has revealed that there are 91 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 223 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there is 1 US AIRS site within

approximately 0.001 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States

from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 6 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

SEYBERT NICHOLAS PRINTING (Continued) **1016098676**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

HUDSON RIVER PCBS (Continued) **1000384273**

CAS Number: 1336-36-3
Substance: POLYCHLORINATED BIPHENYLS
Pathway: AIR PATHWAY
Scoring: 4

NPL Status: Currently on the Final NPL
Substance ID: A046
CAS Number: 1336-36-3
Substance: POLYCHLORINATED BIPHENYLS
Pathway: SURFACE WATER PATHWAY
Scoring: 4

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"7/13/11 - Raphael Ketani. The spill was called in yesterday as the discovery of oil and filters in a sewer. A contractor was hired to clean out the sewer. I tried to contact Michael Lopez (718) 707-5725 of the Chelsea Elliot Municipal Housing Project, 427 West 26th Street, NY, but I could only leave a message. Later, I spoke to Mr. Lopez. He said that Michael Tartaro (718) 707-7842 was the one who was overseeing the cleanup of the spill. I spoke to Mr. Tartaro. He said that CMI was present using their vacuum truck to routinely clean out the sewers in the housing complex when they came upon the oil and filters. The CMI driver sucked up the oil and filters and waited for Clean Venture to arrive with their vac truck. CMI disgorged everything onto a tarp and the Clean Venture driver sucked up everything into his truck. What couldn't be sucked up - bricks and other debris - was put into seven drums and hauled away. The sidewalk where the oil had spilled into the sewer was also cleaned. Mr. Tartaro then sent me manifests by e-mail. As the spill was confined to the sewer and was small and was cleaned up the same day as the discovery, I determined that the spill was not a threat to the environment or to the public. Therefore, I closed the spill case. "
Remarks:	"Contractor that was hired to clean out storm sewer found waste oil & filters that have been dumped into the sewer by unknown persons. Caller will be calling evironmental contractor to do the cleanup."

DEC Memo:	"12/14/05: This spill transferred from J.Kolleeny to S.Kraszewski. 9/22/06: Spill transferred from Kraszewski to Kann. 1/19/10: J.Kann - revised work plan received 11/17/09. WP approved 1/19/10. 9/23/10: J.kann - Quarterly Report recieved 9/01/10. 5/11/12: J.Kann - quarterly report recieved on 5/9/12. 9/6/12: J.kann - quarterly report received on 8/21/12. 1/16/13 : J.kann - 10/24/12 QR rcvd on 1/16/13. 5/21/14: J.Kann - email sent to NYCHA today stating: The Department understands that a recovery system is operating, that monthly VEFR is being performed and that quarterly monitoring is currently being done at the following five sites: Amsterdam Houses Elliott Houses Manhattanville Houses Melrose Houses Baruch Houses Since wells at these five sites have consistently (based on quarterly reports received over the past year) had no product, a sheen or less than 0.08 inch of product in their wells, the Department would like NYCHA to temporarily cease operation of the systems and VEFR at these sites. For the next 4 months, the wells must be monitored to determine if any significant recharge of product occurs. Accurate readings of product thickness must be made, which may require using the gauging method used at South Jamaica Houses on May 19, 2014. In addition, during this 4 month time period, no absorbent socks should be placed in the wells. Data from this monitoring, along with recommendations, must be included in the 2014 3rd quarter monitoring report for these sites, which is due to the Department by October 1, 2014. In the event that a significant recharge is noticed in any of the wells during these 4 months, the Department must be contacted immediately (within 72 hours of gauging). 1/24/17: J.Kann - based on review of Quarterly monitoring reports, The source of petroleum has been removed. The PRS was operated between 1998 and 2014 Free product has not been observed in the accessible monitoring wells since 2007. Since halting the PRS in 2014, free product has not been observed in the accessible monitoring wells and little free product (less than 0.25in) has been observed in the recovery wells. No petroleum related VOCs or SVOCs (listed in Table 3 of CP-51) were detected in groundwater samples collected in April 2015 from the accessible monitoring wells. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, spills can be closed. The Closure Letter should contain the contaminated soil clause. Spill closure email will be prepared with contaminated soil clause and sent to NYCHA "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region:	2
DER Facility ID:	70246
DEC Memo:	"12/06/05: This spill transferred from J.Kolleeny to S.Kraszewski. 02/06/06: This spill transferred from S.Kraszewski to Q.Abidi. 03/17/06: SK Reviewed Site Assessment Report completed on Nov. 30, 2000 by State Environmental Services, Inc. One 30K tank, which stored #2 Fuel Oil was removed. Six post-excavation samples were taken from the pit and submitted for laboratory analysis. About 900 tons of soil was removed and disposed of. All soil samples were tested for VOCs and SVOCs. None of the samples detected any VOC contaminants. All samples recorded exceedances of the same SVOC compounds: Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene. The concentrations ranged from 1950 ppb to 498 ppb, which are relatively low. Four of the six samples had SVOC exceedance concentrations of 1000 ppb or less. No samples were taken from the fill lines or fill port. Report lacks a site plan with area of excavation and sample locations. No lab analysis summary table provided either. SK spoke with Chris Sawyer from NYCHA Fuel Oil Remediation. I informed him that they would need to take soil samples from the former fill lines

CHELSEA HOUSES -NYCHA (Continued) **S103478255**

and fill port area. Chris said that Harborview Houses would be included when performed additional soil borings. Sent Chris Email requesting additional soil borings along the fuel lines and next to the fill port. - SK 04/04/06: This spill Transferred from Q. Abidi to Koon Tang. 07/03/09: J.kann - spill transferred to J.Kann. Site assessment report submitted on 2/5/07. Investigative work plan submitted in March 2009. Additional wells to be installed to evaluate groundwater at the site, which is acceptable. One comment was sent on 7/3/09 to GF - A second round of groundwater sampling is proposed one month after the initial sampling is performed. What is the reasoning behind this? Typically two or more months is used. 09/15/09: J.kann - Sampling to be performed two months after initial sampling. Work Plan approved via email on 7/6/09. 2/4/11: J.kann - SAR received on 12/3/10 and edoced. 5/24/12: J.Kann - SAR under review. NYCHA requests closure. Will review entire file for Chelsea Houses. 6/13/12: J.kann - requested in an email of 5/30 that NYCHA gauge the wells at the site before I present to the closure panel. NYCHA sent well gauging data and photo on 6/12 indicating that a product sheen is present in MW5. A response email was sent to NYCHA on 6/13. 10/17/12: J.Kann - requested a follow-up from NYCHA regarding whether or not there is measurable product in MW-5 and/or if a absorbent sock is still present. 5/17/13: J.kann - followed up with NYCHA. They will go out and gauge MW-5 the weeek of May 20. 8/26/13: J.Kann - visited site on July 31st. Observed the removal of sock and gauging of on site wells. No product in all wells. Sock visibly clean (photo). NYCHA indicated that the sock has been clean for several months. Based on observations, the spill will be considered for closure. 8/27/13 J.Kann - completed review of file. Spill closed. Following summarizes site: -30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000 -investigation done in 2006 along fill lines and by fill port (DEC request) -some PAHs detected in grab groundwater sample in 2006 -5 permanent wells installed in 2010 -All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences) -Slight sheen subsequently detected in MW-5. Absorbant sock placed in well. -Minor impacts on sock in 2012. -No oil detect on absorbant sock in 2013. -Confirmed no product sheen in well during site visit of 7/31/13. NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned."

Remarks: "will isolate and retest"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	AL GULUN
DEC Memo:	"11/4/05 - Raphael Ketani. I spoke to Mr. Al Gulun ((516) 221-7500) of Soil Mechanics. He said that the site had an old print shop on the upper floors. So they went downstairs and saw stains on the concrete floor. They broke open the floor and detected volatiles. So they dug out the soil and collected end point samples. Thirty drums of contaminated soil and concrete went out in drums. Mr. Gulun said that he will mail an investigation report to Spills. 01/30/06 Sharif//Rec'd closure report prepared by Soil Mechanics.The building is currently being renovated for residential use. During the underground utilities installation, contaminated soil was encountered beneath the former hazardous chemical storage room (app. 8'x14').All accessible impacted soil was removed from a 16'x18' excavated area. Four end point samplea were taken which showed VOC/SVOC levels below TAGM. Waste disposal manifest and photographs of the site were provided. NFA required."
Remarks:	"FOUND CONTAMINATION DURING SITE INVALUATION: MATERIAL HAS BEEN DUG OUT"

DEC Memo:	"Spoke with Michael at STV INC. The site is an abandoned, former wire house.There is a 10,000 gallon #6 oil UST on premises. Soil borings performed around the tank showed contamination. The site is E designated.A summary report will be sent to DEC after the investigation is completed.The site is proposed to be converted to a private school.Future School authority: Avenues Worlds School Attn: Raymond Bordwell 115 1st Avenue#2 Floor New York, NY 10003 (646)225-6284 12/09/11 Email from Brian Connolly on 12/07/11 wrote: As a part of the remediation process, STV directed the first in a series of product recovery from three (3)on-site wells today (12/7/2011).Brookside Environmental removed 1,500 gallons of groundwater via a vac-truck. The groundwater exhibited a slight sheen on the surface but no discernable and/or quantifiable product was observed during the event. A slight odor but no PID readings were recorded.The next event is scheduled approximately two weeks from today s event. 04/16/12 Spill closure report in edocs.STV prepared the closure report.10,000 gallon UST was removed along with associated piping.Excavation extended 2 ft below the ground water to remove petroleum contaminated material.Installed two recovery wells in the loading bay and one in the pump room of the cellar.Installed a vapor barrier system beneath the entire disturbed slab areas and foundation sidewalls.Installed two offsite monitoring wells to the south and west of the building foot print.Post remediation ground water samples result showed no VOC or SVOcs avove DEC guidelines.Case closed. "
Remarks:	"Abandoned tank on was found on the property, soil boring showed #6 fuel in the soil."

DEC Memo:	"10/7/05-Vought-As per DEC Sangesland (Duty Desk Officer). Great Bear Auto Repair. PBS records show two waste oil USTs (300 gal and 275-gallon). Caller says one of the auto repair bays (near the restroom) has a metal cement plate over a vault area which the owner has dumped waste oil illegally. The caller is associated with someone who was recently fired from his job at Great Bear. Sangesland forwarded this site to DLE for inspection/enforcement. ECO Michael

AUTO SHOP (Continued) **S107415821**

Jordan assigned to the case. 11/7/05-Vought-DEC Austin received annonymous call on 11/4/05 from callers acquaintance who worked for New York State but would not leave name or contact info but wanted an update on the spill. Vought called ECO Jordan and spoke to him and he will perform site visit today and contact Vought with results. 11/17/2005 Sangesland - annonymous caller called again asking for an update on the spill case. 12/1/05-Vought-Site visit performed including DEC Vought, DEC Piper as per DEC Austin. No metal cement plates or concrete patches in bay next to bathroom. Concrete is unbroken. As per onsite mechanic (David) as waste oil tank was located in bay 15 years ago and was abandoned in place. Vought spoke to tenant (Moe Givner 646-721-0642)and he has been tenant for only three years. As per Moe, owner's address is: 26-10 Corporation Park-It Management 250 West 26th Street New York, NY 10001 Vought spoke with DEC Austin and instructed to check on PBS registration of tank. PBS registration requirements effective as of 1/14/95 and since UST was abandoned 15 years ago it is not required to be registered. Further investigation not warranted as per DEC Austin due to annecdotal nature of information. Spill closed as per Austin."

Remarks: "BURIED 200 GALLONS PLUS UNDER A DYNO METER, RIGHT SIDE OF PROPERTY NEAR BATHROOM: IT IS FLAMMABLE COVER IT WITH METAL AND THEN CEMENT:"

DEC Memo:	"3/12/19 - Obligado - Desk Duty - Called Riteway. Left message. 3/13/19 - Obligado - Tank test was performed after a tank cleaning. Not holding pressure. The tank had a hole on the tank of the tank. A temp tank has been set up. TTF Letter Sent. 03/20/19 - Lakhani Riteway Paul informed that the 3000 gallons AST was emptied. Contaminated debris surrounds the tank. A proposal is being sent to the owner. 07/10/19 - Lakhani DEC Lakhani inspected the tank on 05/17/19 and required Riteway to install four (4) boring in the tank room: one (1) in each corner of the tank. Borings should extend to either groundwater, bedrock or the first depth where no further impact is noticed; whichever comes first. Samples should be collected and analyzed. On 07/09/19, Paul informed that the tank has been removed. 07/11/19 - Lakhani Sample results: 1,2,4-trimethylbenzene 4600 ppb(sample 1). DEC Lakhani inspected the site on 07/10/19. The tank was removed. Four (4) test pits were dug using a hand auger. Results from the samples collected in each corner of the tank room. The sample collected from the southwest corner showed a few minor hits slightly above UUSCOs. Due to the proximity of foundation of the building, DEC Lakhani authorized backfill. Riteway will complete the concrete slab and encapsulate. 08/22/19 - Lakhani The slab was restored in the tank room. The spill has been addressed. Spill is closed."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"161156. 9/21 @ 10:20. On 9/21 at 10:05 Rist # 16899 reported to me that at N/W/C W 26 ST & 9 AV in M-39723 he discovered approx 1/2 gal of dielectric fluid on the floor of the Manhole mixed with dirt. No sewer/waterway affected, no fire/smoke involved, no private property affected, no injuries and weather did not contribute. The source of the spill is a Feeder cable on Feeder 13m64. and the cause is a leaky cable. The Feeder is out of service now according to the Finder. Environmantal tag # 49330 was hung. Sample for PCB was taken. Chain of custody # DD 09068 will be used. Cleanup will be scheduled as soon as UG crews are available. Account # 42224. Logger R Pagano # 48703 9/21 @ 11:15. This incident has been changed back to a 72-HR Underground as per a conversation between Pellegrino & ERT. Logger R Pagano # 47803 *"
Remarks:	"LEAKING FEEDER: NO TO 5QUESTIONS; CONED # 161156**********CANCEL***CANCEL***CANCEL***"

DEC Memo:	"09/25/95: PIN-4169 - ASSIGNED TO CHRIS FOR TRACKING PURPOSES. 10/6/03 See also PIN 4169, spill #s 8605682, 8606807, 9410208, 9410209. 1/8/04 Reassigned from Tomasello to K Foley. 06/20/06: Re-assigned from Foley to Yau. (Yau) 06/22/06: Prepared and sent an old spill letter to property owner through certified mail. A site investigation report (SIR) is expected to be due on 07/22/06. (Yau) 06/27/06: Owner called to inquire about the spill. Stated that he brought the property recently (around 2002) and had no idea where is the spill was. Told him that DEC will look into it and call him back with the exact location of the spill. (Yau) 08/02/06: Owner called to request an update to the site. Told him that a review is underway. Found that DEC had a PIN job for this site. Unsure whether the cleanup is complete. If the cleanup is incomplete, the owner might have to re-do the cleanup. Will call owner back as soon as review is completed. (Yau) 10/16/06 Reassign from Yau to Chanda (Chanda) 12/12/06-Vought-Spill reassigned from DEC Chanda to DEC Vought. 03/20/07-Vought-File review by Vought: See also open spill #0603967 at same location. Videotape-unknown date (circa 19884)-tape showing

10TH AVE. W 27/W 28 ST. G (Continued) **S102671142**

well being bailed with free product thickness of 1 . Registered CSL Letter sent by DEC Yau to Tenth Gas Inc (address as per Property Shark). FOIL request from Brinkerhoff-8/18/06. Vought called AG Bechard for status of PIN case. PIN case assigned to AG John Nyhoff. Vought called Nyhoff and left message to return call. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. 03/21/07-Vought-Left message for AG Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke with AG Nyoff and as per Nyoff default judgement was made against former owner of property resulting in lean of approximately 354K. 3/26/07-Vought-Received ISR from Nyoff. Vought left message for Nyoff to return call with which party was found responsible (Alex Goffman or Westside Tripple Auto Repair). 4/23/07-Final ISR submitted to DEC Austin for review and spill closed by Vought. DEC Memo:	"03/15/07-Vought-File review by Vought: Letter from American Environmental Solutions (AES)- Brain Pendergast (ph:631-475-0020 fax:631-475-0025) to DEC Falvey-12/19/06: Atlantic Development Group, LLC has retained Brinkerhoff Environmental Services, Inc. as the environmental consultant and American Enviornmental Solutions, Inc. (AES) as the remediation supervisor... . In 9/06, AES removed one (4000-gallon) diesel UST and three (4000-gallon) gasoline USTs from the site. The tanks were encased in concrete and there was no evidence of a petroleum release . A small amount of contaminated soil was located in the area east of the former pump island . Approximately 20 tons of soil was excavated in 11/06. Revised PBS application being submitted by AES. Five PBS violations found by DEC Falvey during inspection. Remedial Action Report (Brinkerhoff Environmental-732-223-2225). Site was formerly occupied by a gasoline station and auto repair facility. In 9/06 AES collected endpoint

FORMER GAS STATION (Continued) **S108058323**

samples from waste oil UST excavation and endpoint sampling was not conducted in the gasoline and diesel UST excavation since the USTs had been encased in concrete. No evidence of discharge was observed in the field in either the gasoline/diesel UST excavation or in the waste oil excavation . In 11/06 Brinkerhoff directed excavation of soil in the area of the dispenser island and the former sample location that reported VOCs. Report proposes No Further Action. Nine soil boring performed in 6/06. PID readings, petroleum staining and petroleum odors were encountered in Soil Boring SB-4 and SB-9 . Soil analyticals from boring show both samples were DILUTED: 260ppb benzene(SB9 3'bg),111000ppb xylene (SB9 3'bg), 70000ppb 1,2,4-trimethylbenzene(SB9 3'bg), 26000ppb 1,3,5-trimethylbenzene(SB9 3'bg), 370ppb MTBE(SB9 3'bg). SITE IS E DESIGNATED. Four endpoint samples collected from excavation of soils at SB9 show no TAGM 4046 Required Soil Cleanup Objective exceedences. SVOC exceedences attributed to urban fill material. Endpoint samples from excavation of SB9 collected at least ten feet away from initial soil boring location. Samples collected from 11'bg at SB9 show VOCs below TAGM. Tank Closure Report (American Environmental Solutions-January 2007. The site is currently being redeveloped for future use as a hotel. Five USTs were removed from 9/06-11/06 including one (1000-gallon)waste oil UST, three (4000-gallon) gasoline USTs and one (4000-gallon) diesel. All lines and piping associated with the tanks located on the site were removed . Thirty tons of soil was disposed from site. Soil was excavated from the area just east of the pump island. AES collected five endpoint soil samples from waste oil excavation in 9/06 and Brinkerhoff collected soil samples in 11/06. No endpoint samples collected from gasoline and diesel USTs because they were entirely cased in concrete and there were no holes in anay of these tanks and no evidence of a petroleum discharge was observed . Report recommends no further action. Waste oil samples show no TAGM exceedenced except for PAHs attributed to fill material. Endpoint soil samples collected from pump island excavations show no TAGM 4046 Soil Quality Objective exceedences except for PAHs attibutable to fill material. 3/20/07-Vought-See also closed spill numbers: 8605682, 9410208, 9410209 and 8302630(Open pin #). Vought spoke to DEC Krimgold who is preparing Consent Order for PBS violations and requested to add remedial requirements. Conference call with DEC Urda, AG Nyoff and AG Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. DEC requires: 1)collection of water sample at SB9 due to shallow groundwater table and historical video for spill #8302630 showing bailer from monitoring well adjacent to pump islands with free product 2)expected depth of foundation 2)vapor barrier/SSDS 3/26/07-Vought-Received call from Matt Snyder (212-318-1650x253 cell 914-522-0759) and returned call and spoke to Snyder. Contact at Brinkerhoff that Urda is using is Doug Harm. Vought referred Snyder to Doug Harm at Brinkerhoff. DEC sent Consent Order to Doug Harm. 04/04/07-Vought-Receied message from Doug Harm (732-223-2225) regarding site and returned call and left message to return call. 4/5/07-Vought-Received call from and spoke to Harm who received CAP for Consent Order. Brinkerhoff will collect groundwater

FORMER GAS STATION (Continued) **S108058323**

samples on 4/10 and report will be submitted to DEC. Workplan submitted to DEP for their additional requirements and DEP will not approve plan until they receive plan for building. Building will not occur until Consent Order obligations are completed. ISR will be submitted to DEC. RAP may not be submitted for 90-120 days as owner not decided on how to develop property as of yet. 4/6/7-Vought-Vought called Harm who proposed 60 days for ISR and 180 days for submission of RAP as owner still undecided on development plans. Harm assured DEC Vought that development will not take place as permits cannot currently be obtained from DEP due to outstanding E designation requirements. Vought approved of proposed changes to CAP and submitted to DEC Urda. Harm also sent in letter with request as per Vought. 4/13/07-Vought-Reviewed Corrective Action Plan Extension Request dated 4/5/07 submitted by Brinkerhoff (Harm). Groundwater sampling scheduled to be conducted on 4/10/07. An extension for submittal of the RAP of 180 days is requested . See above entry for 4/5/07 as 120 day extension for RAP is acceptable by Department. Vought sent email to DEP Naizaire requesting information on DEP project manager. 06/04/07-Vought-Received email from DEC Nazaire that DEP project manager is Tracy Goldman (718-595-6443) and left message to return call. 06/26/07-Vought-Received call from and spoke to Suman Khanna (718-349-0555) who put in foil request and he received detailed PDF report and was not aware of prior Attorney General action. 10/23/09-Vought-Received message from Harm (732-223-2225) on 9/28 that property being developed with residential apartments and that vapor barrier and SSD installed. Vought spoke to Harm and 3000 tons of soil was removed and post excavation samples were collected. Excavation occurred to water table. No sidewalk wells remain. DEC will receive closure and excavation report within the next couple of weeks (by 12/1/09). Vought called and spoke to NYSOAG John Nyhoff and informed him of property development. 8/6/10 - Raphael Ketani. I took over the case from Jeff Vought of Spills who transfered to Unit A, Superfund Sites and Brownfields, within DER. On 7/11/06, oil contaminated soil was discovered during a site investigation. The site was a former gas station. The address is 303 10th Avenue in Manhattan. The consultant was Doug Harm of Brinkerhoff Environmental (732-223-2225). The site is located at 303-309 10th Avenue, Manhattan. The block and lot are 699 and 33. According to ACRIS, the deed shows that 303 10th Avenue Hospitality, LLC is still the owner of the property. Their address is 20 West 46th Street, 2nd Floor, NY, 10036. There are two PBS registrations. The earlier one, #2-601361, shows four 4,000 gal. USTs with gasoline and diesel fuel. They were installed on 9/1/98 and removed on 2/1/77. The second registration is #2-604322. There is one 250 gal. lube oil UST. I left a message for Mr. Harm (732) 223-2225 requesting the closure report for the site along with the groundwater results. Also, I spoke Mr. Vought regarding the site. He said that they were putting in the foundation for a building when he had the case. 8/9/10 - Raphael Ketani. Mr. Harm called me back. He said that the last step in the investigation would be to install a monitoring well in front of the building. However, for a long time, there had been scaffolding in place which prevented any well installations. The scaffolding has finally come down and Brinkerhoff will install the well. The groundwater analytical results will be sent to the DEC in about 60 days. 10/26/10 - Raphael Ketani. Today I received the 10/5/10 Closure Report from Brinkerhoff Envirionmental Services, Inc. I began my review of the report. 10/27/10 - Raphael Ketani. I finished my review of the

FORMER GAS STATION (Continued) **S108058323**

Closure Report. According to the information contained in the report, almost all of the soil within the footprint of the former gas station was removed down to 13 feet from 5/27/08 to 3/17/09. Eight (8) soil end point samples were taken from 8/27/08 to 3/19/09 and indicated that there was no BTEX contamination and generally low concentrations of SVOCs. The only SVOCs that exceeded the TAGM standards were the benzo series and their associated combustion products. Given that only these analytes exceeded the TAGM standards, the soil results resemble those for historical fill. Groundwater samples were taken on 9/25/07, and 2/11/08 from wells MW-1 to MW-3. After 2/11/08, the wells were destroyed due to the foundation construction for the new apartment building. The results for MW-1 were in the thousands of parts per billion for samples that were taken during both rounds. The other two wells had non-detect or very low analytical results during the second round. A groundwater sample was taken on 03/19/09 from a test pit and the results indicated that the tested VOCs were non-detect, except for slightly elevated results for MTBE and TBA. A later well, MW-4, was installed on 8/12/10 downgradient to the former location of MW-1 after the construction was finished in order to check the groundwater analyte concentrations. The analytical results for the sample that was collected on 8/26/10 were almost entirely non-detect. According to the Closure Report, a sub-slab vapor barrier and a passive vapor ventilation system were installed. Based upon the information in the 10/5/10 Closure Report, I have determined that the petroleum contamination has been remediated. Also, as a vapor barrier and passive ventilation system were installed, I have determined that there is no threat to the public or the environment. Therefore, I am closing the spill case effective today."

Remarks: "DURING SOIL TESTING FOUND CONTAMINATION: - OWNER IS 303 10TH AVE HOSPITALITY LLC 20 WEST 46TH STREET NEW YOR NEW YORK 10036"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"12/17/14-Hiralkumar Patel. 2:30 PM:- visited site. met Joseph Santiago, building superintendent. he claimed detection of petroleum odors within multiple units of the building, especially during beginning of the site activities on adjacent property which was a former gas station and now under construction. with Joseph, inspected

RESIDENTS AT NEIGHBORING PROPERTY (Continued) **S117393856**

unit 2W in the building and met with unit owner Tiffany Kolahdooz. Ms. Kolahdooz mentioned about petroleum odors in her unit during morning hours, which she claims that confirmed by FDNY when they responded around 10 AM today. petroleum odors were not detected in main lobby or inside unit 2W of building 245 at the time of the site visit. unit 2W has a terrece on south side of the building, which is immediately west of the former gas station site. no petroleum odors were detected on terrece also. Joseph showed kitchen range exhaust vents of multiple units on south side of the building, which are close to the former gas station site. as these vents do not have any flap on it, any vapors from any source can enter into the building. as Ms. Kolahdooz is concerned about health safety of her child, Joseph agreed to install a flap on exhaust vent for her unit. vent flap installation is not possible for other units. Joseph will also consult with their environmental firm to install some kind of continuous air monitoring system in their building. during the site visit, petroleum odors were not detected anywhere around the former gas station site (239 10th Ave, spill #: 9707190) where crew was installing casings. Tiffany Kolahooz Unit 2W Ph. (646) 620-6623 email: tiffandmousa@gmail.com Joseph Santiago **super of building 245** Ph. (646) 478-7060 (917) 607-0167 email: joseph.santiago@ellimanpm.com 12/17/14-Hiralkumar Patel. 8:51 AM:- left message for Shaminder Chawla at NYC OER. 1:44 PM:- spoke with Mr. Chawla and informed him about odor complaint from the site. he will talk to project manager at OER. Shana Holberton Project Manager NYC OER Ph. (212)788-3220 email: SHolberton@dep.nyc.gov after discussing with DEC DeMeo, case closed. 2:27 PM:- sent email to Mr. Chawla including copy of spill report. email copied to Ms. Holberton and DEC DeMeo."

Remarks: "caller has tenants reporting a heavy diesel odor at property next door. The contractor at site confirms the odor the does not know the cause or will not disclose it."

DEC Memo:	"07/08/13-Hiralkumar Patel. alternate addresses: 245-247 10th AVe, 505 W 24th St PBS #: 2-610129. as per PBS record, the site had one 1,080 gal and one 550 gal waste oil USTs, which were removed in Feb. 2006. other spills : 0408626, 1210261. spill #: 0408626 was reported on 11/04/2004 due to contamination in groundwater. case closed based on letter from Roux Associates dated 01/11/2005. spill #: 1210261 was reported on 11/13/2012 due to gas odor in buiding, after hurricane Sandy. case still open. reviewed letter submitted for spill #: 0408626: - letter was prepared by Roux Associates after reviewing Subsurface Assessment Report prepared by HydroTech Environmental - during investigation, HydroTech performed GPR survey, installation and sampling of 10 soil borings and installation and sampling of 4 monitoring wells - found six tanks at site: three (3) 2,000 gal USTs abandoned in place, three (3) 550 gal USTs abandoned in place and one (1) 550 gal waste oil UST in-service ---------- - one active 550 gal waste oil tank is located on the portion of the property adjacent to 10th Ave - active tank had been formerly used for diesel fuel ---------- - as per Roux, found PAHs in soil samples - found VOCs in well MW-1, which is located near the 10th Ave and immediately north of an active Getty service station (located at 239 10th Ave) - Roux suggested no on-site source, based on following 1) less than 0.2 ppm on PID in boring SP-3, which was close to tank and north of well MW-1 2) no VOCs found above cleanup objectives in soil sample from SP-3 3) no detection of most of VOCs that were detected in groundwater sample 4) well MW-1 is located within 10 ft of the upgradient boundary of the site next to an active Getty station the letter from Roux Associates does not include sampling results.

CO OP (Continued) **S113818795**

reviewed google pic dated June 2011. Lukoil gas station is located at 239 10th Ave (239-243 10th Ave, 501-503 W 24th St), south of the subject site. parking garage located at 249 10th Ave (249-251 10th Ave, 502 W 25th St), north of the subject site. 10:25 AM:- spoke with Joseph, building super. he mentioned that the existing building at the subject was built around 2006/2007. on-site building has one level basement. building is on west side of 10th Ave. Joseph returned to work after a week vacation and he noted black/greenish substance seeping into building through floor in electric room, which is located in northeastern corner of the basement. the impacted floor is about 2 sq. inch in size. seepage area is towards the neighbouring parking garage. Joseph's office is next to electric room so he inspects area everyday and never observed seepage before. building has two sumps: one in east side of basement and another in west side. Joseph mentioned that there is water seepage issue in the building. the eastern sump is about 15 ft from the seepage point and close to neighbouring gas station. some non-petroleum deposits noted in eastern sump. during conversation, informed Joseph about an open spill case reported on 11/13/12. he mentioned that the building received about 2-3 ft of water in entire basement during hurricane Sandy. they noted some smell after storm, but no more odors in building. based on this information, case # 1210261 is closed. based on following, source could be on-site: - parking garage entrance just north of the subject site - repair shop is along W 25th street which is away from the leak area - on-site historical 550 gal waste oil UST was probably close to the seepage area discussed with Joseph about historical tanks on-site. he mentioned that the current management took this building about seven months ago. he also started working at the site about seven months ago. so they don't have any information/documents abould old tanks on site. he mentioned that the site still owns by developer. based on available information, asked Joseph: - to contact developer regarding tank closure reports - to cleanup minor seepage and observe area for any more seepage David Lipsic **property manager** Douglas Elliman Management Ph. (212) 350-2803 (212) 350-2899 email: david.lipsic@ellimanpm.com Joseph Santiago **building super** Ph. (917) 607-0167 email: joseph.santiago@ellimanpm.com 12:47 PM:- left message for Mr. Spitzen at Grasso Holdings. Grasso Holdings **property developer/owner** 30 South 15th Street Philadelphia, PA 19102 Attn.: Daniel Spitzen Ph. (215) 989-3600 / 701-3824 email: dspitzen@grassoholdings.com 4:00 PM:- visited site. met Joseph. observed impacted area in electric room which is located in northeast corner of the building, partially under the sidewalk. found yellow stain on wall indicating some liquid seeping in. found small puddle near the wall, containing spot of black liquid and greenish/silver sheen on water. no rainbow sheen observed on water. black stuff was on bottom of the puddle. no petroleum odors noted in area. the water puddle was about 6 sq. inch in size. Joseph showed a small pipe in floor along western wall of the electric room. found water stain around this pipe. Joseph mentioned that recently he noticed some water come out of this pipe. he mentioned that water seepage is not continous. inspected eastern sump, located along southern foundation wall, about 30-40 ft from southeast corner of the basement. found some deposit in sump indicating possible sewer line leak in area. suggested Joseph to contact plumber and report possible sewer/water main leak to NYC DEP. inspected southern foundation wall of neighbouring parking garage's basement. no sign of oil spill noted in visible areas.

CO OP (Continued) **S113818795**

07/09/13-Hiralkumar Patel. 10:26 AM:- spoke with Mr. Spitzen. informed him about unregistered tanks that were removed between 2004 and 2006 and asked him to update PBS record and provide documents confirming proper closure of these tanks. reviewed e-docs on PBS file. found a PBS application signed by Daniel Spitzen on 01/27/2005 for removal of one 1,000 gal waste oil UST and one 550 gal gasoline UST. 11:13 AM:- sent email to Mr. Spitzen including letter from Roux Associates (dated 01/11/2005), PBS application submitted in 2006 (signed on 01/27/2005) and blank PBS application. asked Mr. Spitzen to submit PBS application, including documents confirming proper close of tanks (abandoned in-place or removed), by the end of 08/09/13. asked him to register tanks with correct size/location/status. email copied to DEC Leszek, Mr. Lipsic and Joseph. 07/18/13-Hiralkumar Patel. received message from Mr. Spitzen (at 1:16 PM on 07/17/13). 07/19/13-Hiralkumar Patel. 12:43 PM:- spoke with Mr. Spitzen. he mentioned that previous work, by HydroTech and Roux Assoc, were done on three lots. owners of 245 10th Ave only purchased one entire lot and one partial lot. they did not purchase the third lot. Mr. Spitzen mentioned that old buildings were building-on-slab. they excavated area for new basement and found two tanks in ground. the remaining tanks, listed on Roux's letter, were located on other portion of the lots which are not part of 245 10th Ave. Mr. Spitzen will send email with documents. 07/29/13-Hiralkumar Patel. received email from Mr. Spitzen (at 5:15 PM on 07/26/13) including copy of - partial Phase I done by AEI Consultant (dated 11/18/05); - tank removal report (dated 03/09/05; removal of total five USTs: one 2,000 and four 550 gal); - tank removal report (dated 04/07/06; partial report only; removal of two USTs: one 1,000 gal and one 55l gal) and; - purchase and sale agreement. as per sale agreement, current owner purchased lot 33 and portion of lot 28. as per tank removal reports, no contamination noted in endpoint soil samples. also, tank removal was done at grade level implying that there was no basement in the buildings that existed prior to new construction. based on available information, case closed. 1:44 PM:- spoke with Mr. Spitzen and informed him about case closure. 1:46 PM:- sent email to Mr. Spitzen about case closure."

Remarks: "oil and metallic fluid is seeping through the walls, unk source."

DEC Memo:	"02/17/09-Hiralkumar Patel. spoke with Ms. Umana (at 7:15 PM on 02/16/09). Petro service man went for routiune service at the site and noticed stain on surface near foundation wall. no active leak observed. suspecting leak from fill line. 02/19/08-Hiralkumar Patel. visited site. met Nancy Weper (212-675-5862), tenant who occupies first floor and basement. tank is located in sub-basement. Ms. Weper complained about petroleum odors from sub-basement. inspected sub-basement. found no petroleum odors. found stain on foundation wall where fill line enters into sub-basement. no petroleum smell noted at stain during site visit. no leak from tank. Ms. Weper mentioned that Petro guy smelled petroleum at stain on foundation wall. 02/20/09-Hiralkumar Patel. spoke with Ms. Weper (at 2:40 PM). Ms. Weper mentioned that Petro is at the site doing line repair. spoke with Prem Ramchandani, building owner. he mentioned that leak was found in fill line near foundation wall area and Petro is correcting problem. Mr. Ramchandani doesn't know whether Petro replacing entire fill line or putting new fill line at different location. Mr. Ramchandani will ask Petro to call with answer. EPGR Realty **building owner** 511 6th Avenue, Suite 149 New York, NY 10011 Attn.: Prem Ramchandani Ph. Mr. Sokol inquired about action taken by the Department between Feb. 2009 and Dec. 2012. he also asked for documents available to the department, for review. informed him that since Feb. 2009, the Department has tried numerous times to contact previous property owner and had sent letters, but no response received from previous owner. 10:23 AM:- left message for Mr. Ramchandani. 1:16 PM:- after discussing with DEC counsel, a letter with Stipulation Agreement was sent to property owners via certified mail (7007 2560 0001 2550 1928). asked them to return signed agreement by the end of 02/07/14. stipulation letter emailed to Mr. Sokol. 01/23/14-Hiralkumar Patel. received letter from Mr. Sokol in response to the Department's letter dated 01/22/14. Mr. Sokol inquired about what investigatory actions had taken by the department in 2009, 2010, 2011 and 2012. he wanted to know how this spill was reported. Mr. Sokol mentioned that he will recommend his clients not to execute any type of consent agreement, until and unless the department can demostrate that it has made resonable efforts to secure the cooperation of the responsible party. Mr. Sokol included copy of his letter dated 07/29/13 and deed document. 01/24/14-Hiralkumar Patel. 11:02 AM:- after discussing with DEC counsel, copy of spill report and letters to previous owner were emailed to Mr. Sokol with note that the signed STIP is due on 02/07/14 as mentioned in letter dated 01/22/14. 02/07/14-Hiralkumar Patel. 12:47 PM:- left message for Mr. Sokol with reminder that signed STIP is due today. 04/01/14-Hiralkumar Patel. 10:10 AM:- went

EPGR REALTY LLC (Continued) **S109415461**

to site for inspection. nobody was at site. observed a concrete patch at curb, in front of main entrance to site. observed active fill port, next to basement hatch, located in northeast corner of the front yard (in southeast corner of the building). a vent pipe is located next to stairs to main entrance of the building. left business card at site. 10:15 AM:- left message for Mr. Sokol. 06/07/16-Hiralkumar Patel. searched NYC ACRIS record and noted that the property has been sold to Clara Frijs LLC. Clara Frijs LLC. **property owner** 449 West 24th Street New York, NY 10011 as per NYS Dept. of State, mailing address for Clara Frijs LLC. is: Clara Frijs LLC. c/o Pryro Cashman LLP. Attn. David Rose, Esq. 7 Times Square New York, NY 10036 Ph. (212) 326-0142 Fax (212) 798-6337 email: drose@pryorcashman.com 12:53 PM:- left message for Mr. Rose. 06/09/16-Hiralkumar Patel. received message from Mr. Rose (at 8:01 PM on 06/08/16). 3:39 PM:- left message for Mr. Rose. 06/13/16-Hiralkumar Patel. 11:42 AM:- received message from Mr. Rose. 12:08 PM:- spoke with Mr. Rose. he believes that his law firm was involved in property transaction, but doesn't own this property. he will look for property owner's contact information. 12:20 PM:- sent email to Mr. Rose requesting contact information for property owner. 11/25/16-Hiralkumar Patel. 2:00 PM:- visited site with DEC Lakhani. met Mr. & Ms. Meyer, current property owner. Ms. Meyer mentioned that they purchased property last year and have no knowledge of oil spill. inspected building sub-basement. noted a cut open pipe in foundation wall and an existing fill line next to it. the cut open pipe is possibly a former remote fill line. a hole was noted in foundation wall where these pipes are located. hole in foundation wall may have been created when a new fill line was installed in 2009. stained foundation noted under this cut open pipe, but no petroleum odors or oil seepage noted from the hole in the foundation wall. during an inspection, another petroleum discharge was noted at the site. Ms. Meyer mentioned that there was an oil spill about a week ago due to a leak in tank's bottom. noted petroleum stain on pavers on sub-basement floor. the petroleum stain noted to the other side of the tank room where a trench is located which ends into sump pit behind the boiler. found free phase product in the sump pit. a temporary patch has been placed on leak point in tank's bottom. liquid level in sump pit was steady and sump pump was not operating. based on field observations, asked Ms. Meyer to: - secure remote fill port to prevent any more delivery to the tank system - immediately remove petroleum product from the sump pit - repair or replace the leaking oil tank asked Ms. Meyer to report an oil spill to DEC Hotline. as she was unaware of spill reporting process, she requested if new spill case can be opened by DEC staff. 11/28/16-Hiralkumar Patel. after reviewing available information, the subject spill case is administratively closed based on following: - stain was noted on foundation wall during visit on 02/19/08, but no petroleum odors were detected - during discussion with Mr. Ramchandani (property owner at that time) on 02/20/09, he mentioned that leak was found in fill line near the foundation wall - during an inspection on 11/25/16, a hole was noted in foundation wall where a cut open pipe is located and no signs of oil seepage noted from this hole based on findings of petroleum discharge from the tank, a new spill report (# 1608286) was generated for the subject site."

Remarks: "stain only, outside near foundation/no leak at this time...only seems to leak during fuel deliv."

DEC Memo:	"11/28/16 - Lakhani On 11/25/16, DEC Patel and DEC Lakhani visited the property in regards to an older spill (# 0812516) on the

RESIDENTIAL BUILDING (Continued) **S119028311**

property. Upon speaking to the current property owner, Claus Meyer, DEC Patel and DEC Lakhani were notified of a spill that occurred a week prior to the visit (11/19/16). The spill was investigated as it had occurred in the basement of the property where a 275 gallon #2 fuel oil tank and boilers are kept. The tank was found leaking a week prior to the visit. During the descent into the basement, petroleum odors were present. The tank was located on the west side of the basement. Staining was observed on the exterior of the tank. The tank was temporarily patched and the patch was covered with plastic which was held in place by rope. The brick floor of the basement was stained by oil and covered with absorbent material. A trench on the east side of the basement was stained by the oil as well. The trench led to the boiler room where it emptied into the sump pit behind the boiler. The sump pit was filled with an unknown amount of oil. The oil in the sump was required to be removed as per DEC Patel. Furthermore, the property owners were also required to pump the remaining oil out of the tank. The oil provider was called to determine the volume of oil in the tank. According to their records, 161 gallons of oil was delivered on 11/18/26 and 50 gallons of oil was delivered on 11/15/16. The provider was unaware of the spill. Claus Meyer called Mike from Milro to have the sump pit immediately pumped out. 11:52 AM:- DEC Patel and DEC Lakhani called Claus Meyer to determine whether the tank was repaired or replaced. He confirmed that it hasn't been scheduled to be repaired or replaced yet, however the sump pit had been pumped out on 11/25/16. 11:54 AM:- Mike confirmed with DEC Patel that the sump pit is now empty after removing 20 gallons of oil. Mike confirmed that the bottom of the sump pit was concrete. He also confirmed that the tank was neither pumped out nor removed or repaired. 11/29/16-Hiralkumar Patel. Clara Frijs LLC. **property owner** c/o Claus Meyer 449 W 24th Street New York, NY Ph. (908) 331-6012 / (908) 331-6233 email: claus@meyersusa.com 11/30/16-Hiralkumar Patel. 2:41 PM:- spoke with Mike and inquired him about cleanup of spill impacted materials in basement and repair/replacement of faulty tank. he mentioned that home owner has reported this incident to their insurance company and waiting for response. 2:50 PM:- left message for Ms. Reed at Chubb Insurance. Karen Reed Chubb Insurance Ph. (877) 252-4670 Ext. 4075 (757) 222-4075 Claim #: 047516053300 email: kreed@chubb.com 12/01/16-Hiralkumar Patel. 10:45 AM:- left message for Mike. discussed with DEC Austin. as the leaking tank has not been fixed, the department requires immediate removal of remaining oil from the faulty tank. 10:46 AM:- spoke with Ms. Meyer. informed her that the faulty tank must be emptied by the end of today. 10:51 AM:- left message for Ms. Reed. 11:48 AM:- received message from Ms. Reed. 11:52 AM:- spoke with Ms. Reed. she mentioned that insurance company is still reviewing the claim for coverage. informed her about requirements from the department. 12/02/16 - Lakhani 09:12 AM: Spoke to Ms. Meyer regarding the tank and she mentioned that the tank is scheduled to be pumped out and replaced today at 6:00 pm. A requirement letter addressed to Claus Meyer has been drafted and sent via US Mail. The requirement letter was also sent to Claus Meyer and Mike Vizzini (Milro Assoc.) via email. 12/05/16 - Lakhani 09:18 AM: Mike responded to the email informing that the homeowner contacted their oil company to have them pump out the oil and set up a possible temporary tank. Milro emailed an estimate to Mr. Meyer to perform a delineation, wash, and degrease the oil that impacted the concrete basement slab. 12/7/16 - Lakhani 11:56 AM: Called Ms. Meyer and she

RESIDENTIAL BUILDING (Continued) **S119028311**

confirmed that the tank was pumped out and replaced. She is awaiting a quote from Mike for the delineating, washing, and degreasing of the impacted concrete basement slab. 12/13/16 - Lakhani Mike sent an email to DEC Kumar, forwarded to DEC Lakhani, saying that Milro will delineate the residence and degrease the oil impacted concrete on 12/20/16. Mike said that he will update with findings on 12/21/16. 12/20/16 - Lakhani 10:43 AM: Mike left a voicemail on DEC Patel's phone informing that a Milro crew is on site. A new tank was installed in a different location compared to the old tank. They have completed clean up with speedi dry. The site has a brick mortar floor. They will be completing delineation of the site. 10:58 AM: Called Mike and told him that we would like a sketch of the site which should include the old tank location, each sample s location and depth, and respective PID readings. Once we receive those readings, we will contact him regarding further action if needed. DEC Lakhani emailed Mike his contact information. 12/21/16 - Lakhani Mike sent their sketch with PID readings and site photos. Uploaded to D2. The email was as such: Milro Associates, Inc. was contacted to respond to a #2 fuel oil spill at the above-referenced location. The release was caused by a leaking 275 gallon above ground oil storage tank located in the basement of the residence. An unknown amount of #2 fuel oil was released into the unfinished basement of the residence. On November 25th, 2016 Milro was dispatched to remove #2 fuel oil from a sealed concrete floor sump. Milro manifested 20 gallons of oil within the sump. The existing slab was pitched back to the sump. Causing the oil to migrate from the old tank to the sump. As part of the cleanup, On December 20, 2016 Milro cleaned the impacted area and inspected the basement concrete slab for cracks and floor drains. Cracks were observed on the brick and mortar slab within the spill area and the underlying soil was investigated for oil contamination. Soil borings were advanced through the slab and soil samples were collected using a hand auger at 6 - 1 below grade. Soil samples were field screened using a Photoionization Detector (PID). The PID indicated a range of12.8 parts per million (ppm) to 272.80 ppm. Milro removed 1 drum of oil contaminated debris including absorbents. The slab was washed and degreased to help with residual odors. Air equipment was utilized during the work process to help with residual odors and removed at days end. During the soil borings at 1 below grade water was observed and pooled back into the sump. It s unknown if the water observed was groundwater and or trapped water below. The brick was would make it hard to encapsulate the floor because it is not flush. Residual odor was observed at a mild level. Possible monitoring of the sump by the homeowner and NYSDEC could be needed and or soil removal near that sump to remove the oil contaminated soil. DEC Kumar and DEC Lakhani called Karen Reed (Chubb) and she informed that the property owner, Ms. Meyer, would need to file a separate and different claim for third party coverage. 12:11 PM: Called Ms. Meyer and informed her about Mike's findings. Let her know the best way proceed is to begin digging and removing the contaminated soil. Also let her know that her insurance company was contacted to determine whether third party coverage is part of her insurance because water was found in one of the holes. She requested that the findings be consolidated into a letter and emailed to her. Email to Ms. Meyer has been sent. 12/23/16 - Lakhani Called Mr. Meyer (9083316012) on 12/22/16 at 3:19 PM. He did not answer and his phone is full and not accepting messages. 9:25 AM: Called Mr. Meyer, he did not answer and his phone is still full and not

RESIDENTIAL BUILDING (Continued) **S119028311**

accepting any messages. 9:29 AM: Spoke to Mike and he informed that water was found in SB-4. There was also recharge of oil to the sump. Milro cleaned it out with spill pads. Groundwater could be 12 to 18 below grade. DEC Lakhani informed Mike about the third party involvement because of impact to groundwater. Reviewed next steps with Mike as digging out contaminated soils and to check if there is any more product build up. Milro's crew did not observe any olfactory odors in the basement. 9:48 AM: Called Ms. Meyer and she informed DEC Kumar and DEC Lakhani that she had filed a claim. She was informed that immediate remediation has to be done on the property because there was groundwater impact. Furthermore, there is a concern that the oil may migrate to neighboring basements in which case a pin job would be opened if the property owners are not reachable since they will be on vacation from 12/25/16 to 1/1/17. Ms. Meyer was told about the possible violations, penalties, and bills that would result if oil was found in the neighboring basements and if state contractors were involved. She requested an email be sent to her regarding the above information. 9:54 AM: Called Mike to ask whether a crew can be dispatched to the property. He said he would let DEC Lakhani know whether a crew can go or not. Mike called and informed that there were Milro Associates on site today. He is asking them whether they observed any oil during their visit. He also reached out to Ms. Meyer and asked her whether she can take pictures. Mike also informed that there are two (2) floods recorded for the property. One of the floods occurred in January. Both floods were due to a boiler and so the encountered water is suspected to be trapped water as per Mike. There are six (6) other spills on 24th Street between 9th and 10th Avenue in addition to the two (2) spill cases at 449 West 24th St. Said spills occurred at 426 W 24th St (1107482), 440 W 24th St (9412378, 8808585), 450 W 24th St (9515779), and 470 W 24th St (0109374, 9008416). 12/27/16 - Lakhani 10:47 AM: Called Karen Reed of Chubb Insurance. She informed that the Meyers made a claim on 12/21/16 for a water leak related to a boiler (CLAIM #040516076836). She also informed that the Meyers have third party coverage as part of their policy and a claim has been made (CLAIM #040516077181). The claim is in the process of be assigned to an environmental addresser. Chubb is soon sending an investigator to investigate the property due to the water leak and oil tanks claims made. DEC Lakhani let her know that the Meyers are on vacation and not currently reachable. 11:13 AM: Mike called and informed that Ms. Meyer called to obtain an estimate for soil excavation. Mike is putting an estimate together for when Ms. Meyer returns on 1/2/17. Mike was also notified about the water leak in the basement on Tuesday, 12/21/16. It was due to a boiler and there was 1' of water in the basement. However, upon inspection in the evening of 12/21/16, the water was gone. The water most probably had seeped into the subsurface. Ms. Meyer has reported to Milro that the sump fills up with water. Mike sent pictures sent by Ms. Meyer on 12/23/16 of the sump to DEC Lakhani. The sump is recharged with water and there is no evidence of any oil in the sump pit. DEC Requirement letter addressed to Karen Reed (Chubb Insurance) and Claus Meyer was sent stating that during the soil sample collection, free product was observed at the water table. The presence of free product on the water table combined with shallow depths to water presents a potential for third party impact. Therefore it was required that they: 1) implement interim remedial measures, 2) confirm effective removal of contamination and 3) delineate soil and groundwater contamination via determining groundwater flow direction and

RESIDENTIAL BUILDING (Continued) **S119028311**

installing down gradient monitoring wells. This letter that was sent supersedes the previous letter sent on 12/2/16. Letter was uploaded onto D2. 12/28/16 - Lakhani 9:11 AM: DEC Kumar receives a call from John from LBG, Inc. (9146945711) 9:47 AM: DEC Lakhani calls John to inform him about the spill and site. LGB, Inc. was retained by Chubb to assess the environmental impact of the site. John says they will send someone to the property to investigate on behalf of Chubb Insurance. 01/03/17 - Lakhani Called Karen Reed, but she was unavailable. Called John from LBG and he informed that he is waiting on Chubb to contact the Meyers so he can schedule an investigative site visit. He also informed that the environmental addresser from Chubb is Deborah Decillis (2014796343). Called Deborah, but she was unavailable so a message was left for her regarding claim #040516077181. 01/04/17 - Lakhani Deborah called back and informed that Chubb will be sending LBG on-site to evaluate the tank leak and third party impacts. In the case that third party impacts have been determined that occurred since the Meyers began owning the property in August 2015, Chubb will cover the costs for cleanup to the point where the spill can be closed. 11:29 AM: Called Ms. Meyer, but she did not respond. Message could not be left. 2:25 PM: Called Ms. Meyer. Spoke to her briefly about any updates. Will call tomorrow (1/5/17) between 9 and 9:30 AM as Ms. Meyer was at the hospital with her mother. 01/05/17 - Lakhani 09:15 AM: Called Ms. Meyer to receive an update on the spill case. She asked to postpone the call to 9:45 AM. She stated that she was irritated by the spill case and about the progress made thus far. DEC Lakhani assured her that he was doing as much as he can to help her cleanup the spill as quickly as possible. Ms. Meyer requested that the old spill documents be sent to her as proof of the DEC's involvement on the property. As per DEC Urda, all documents associated with spill #0812516 can be sent to the Meyers. 09:55 AM: Ms. Meyer calls and discusses the spill. Chubb Insurance has not reached out to them regarding scheduling a visit to determine impact and coverage. Email was sent to the Meyers including spill #0812516 documents, reminder of the Department requirement letter sent on 12/27/16, and reminder of an upcoming report due on 01/27/17. Deborah emailed informing that LBG will be onsite at the Meyer's home on the morning of 1/6/17 to evaluate the leak and perform a third party investigation. 01/06/17 - Lakhani 04:13 PM: Called John but he was unavailable. Message was left. 01/09/17 - Lakhani 10:27 PM: Spoke to John. He informed that during LBG's site visit, no holes were drilled. Borings by Milro were filled in and so were not inspected. Some filming/sheen was observed in the sump. Globules observed in the sump as well. A water sample was taken from the sump which recharged with product from the sump pit sidewall. Staining was observed on the brick. John will send email regarding site visit and findings to Chubb. 01/11/17 - Lakhani 01:04 PM: Called Deborah to speak about LBG's site visit. She was unavailable and so a message was left. 04:27 PM: Deborah called and informed that LBG was on the property on Friday 01/06/17. LBG confirmed the tank leak and the heavy sheen on the water in the sump pump. Confirmed that the leak occurred in October/November. LBG did not do any sampling. Deborah had reached out to Milro regarding cleanup. Milro will be sending a proposal to Chubb. Deborah also reached out to the Meyers that to inform that Chubb will be covering them for the cleanup. Deborah sent DEC Lakhani photos from LBG's site visit. There is sheen on the water in the sump indicating there is impact to groundwater. 01/26/17 - Lakhani On 01/23/17, Chubb DeCillis emailed the estimate that Milro provided

RESIDENTIAL BUILDING (Continued) **S119028311**

Chubb for the remediation work plan to take place. She provided Milro with authorization to the start the project on 01/23/17. She would advise of a start date. Work plan is as follows: 1) Remove oil impacted bricks, mortar and soil by hand. Cover excavation with plastic and install air equipment for residual odor 2) Obtain DEC land samples 3) Vac out oil impacted groundwater 4) Vac out impacted groundwater 5) Backfill excavation and subbase, brick and mortar slab 6) Restore brick and mortar slab. Claim #040516077181 Milro Mike emailed notifying that Milro has been retained by Chubb to clean up the oil contaminated soil. He will update next week (01/30/17 - 02/03/17) with a start date. 02/03/17 - Lakhani Emailed Milro Mike regarding a start date. Mike responded that Milro will be on site on Friday 02/10/17. 02/13/17 - Lakhani Milro Mike emailed and updated with a new start date for the work. Due to bad weather the work is scheduled to begin on 01/17/17. 02/16/17 - Lakhani Received email from Milro Mike informing that Milro had removed 2 yards of oil impacted soil. With an additional day, they can remove the impacted soil from the residence. Milro is scheduled to return to the site on 02/23/17. Once the groundwater is exposed, they will either clean the water or take samples. He asked to let him know if a site investigation will be performed mid-day on 02/23 (12 PM). 02/24/17 - Lakhani Sent the following email to Milro Mike: I hope you re doing well. I m sorry I could not schedule a visit for yesterday. I will most probably reach out to the property owner to do a quick inspection. Could you update me on the work that your crew completed at the site yesterday? Please send me any photos you have taken as well. Mike responded requesting another day for soil removal. He confirmed that groundwater was indeed impacted. Milro will schedule a final soil removal day and update DEC Lakhani on their findings. 03/01/17 - Lakhani Milro Mike informed that Milro will be returning to the site tomorrow (03/02/17) fro a last day of soil removal. They intend to take grab sidewall samples for analysis. The groundwater is impacted and they will be using pads and will bring in a vac truck to help clean. Milro will remove/replace spill pads in groundwater 1'bg. They will remove the oil contaminated soil by hand and collect endpoint samples. Site visit scheduled for 03/02/17 at 2:30 PM. DEC Patel and Lakhani will meet LBG, the consultant, at the site. 03/02/17 - Lakhani DEC Patel and Lakhani visited the site today along with Milro Andrew and LBG Dave. We descended into the basement and there were no olfactory odors observed. Milro has excavated a 7'x4' pit which had charged with groundwater. Oil was observed on the water by Milro and so absorbent pads were placed down. These pads were changed out three times over the day. A smaller excavation adjacent to the pit, in the location of the former tank was also charged with water. Pads were placed here too. Milro also dug two test pits north of the 7'x4' pit. One was 3' deep and displayed a black oil on top of the water. Pads were placed in the test pit and were soaked with oil. Adjacent to it, is another test pit dug down 1' which did not display any oil on the water. The sump pit was clean and no sheen was observed. Milro had uprooted three pipes that were reportedly connected to the tank. Given what was observed DEC Patel and Lakhani recommended that Milro: 1) Milro explore the three lines 2) test the lines for any leaks 3) pump water/oil out of the excavations and test pits into a drum 4) Extend the second test pit (1' deep) down to the depth of the first test pit (3' deep) 5) run a finger print analysis on the oil in the first test pit. DEC Patel and Lakhani will revisit the site on 03/06/17 after Milro completes work 03/03/17. Pictures

RESIDENTIAL BUILDING (Continued) **S119028311**

from site visit uploaded onto D2. Sent email to Milro Mike scheduling a site visit for 2 PM on Monday, 3/6/17. Milro will be returning to the site on Monday as well. 03/06/17 - Lakhani DEC Patel and DEC Lakhani visited and met Milro Andrew onsite. Upon descending into the sub-basement, a very faint petroleum odor was observed. Most probably due to the excavation work the Milro crew had recently completed. There have been no odor complaints by the property owner. The water in the 7'x4' excavation was relatively cleaner than it was on 03/03/17. The pads were already removed upon arrival to the site, but Andrew said only the edges of the pads were soaked with oil. DEC requested that more pads be placed in the excavation as a precaution because a rain event was forecasted for tomorrow. The smaller excavation beside the 7'x4' pit was clean with just a streak of sheen along one of the sidewalls. Therefore, DEC proposed that the pit be backfilled to allowing for work space. The test pits were dug to the same depth and were connected, having excavated around the test pits as well. The first test pit showed dark brackish water while the water in the pits looked like groundwater with oil. Groundwater at the site is at fluctuating heights throughout the site. Another test pit was dug in the farther northeast corner of the sub-basement, along the trench, because it was thought that the contamination may be coming from the trench area. However, that the new, third test pit did not show heavy contamination. There were saturated soils that were observed on the northern sidewall, on the border of the test pit excavation and the 7'x4' pit. This prompted DEC to instruct Milro to remove more contaminated soil. Milro has not yet received authorization from the insurance company to continue work, as Chubb is waiting for cost estimate for the further needed remediation. Milro has not pumped out the water or tested the lines. DEC Patel and Lakhani instructed Andrew to skim the oil off the top of the water. 03/15/17 - Lakhani Emailed Milro seeking for an update. 03/17/16 - Lakhani Milro Mike responded informing that Milro will start additional soil removal next week (03/20 - 03/24). Mike attached groundwater sample analyticals to the email. #4 oil was observed in the groundwater sample. Spoke to York Laboratories and they fingerprint by comparing to reference libraries and carbon characteristics of the petroleum product. DEC Lakhani responded with the following email: I have contacted York Laboratory to obtain further analytics from the fingerprint analysis. The source of the contamination could be coming from off-site, however from my research this seems unlikely. I am currently exploring an older spill that occurred on the property in 2009. Therefore, this could be pre-existing contamination that was left at the site mixed with the spill that occurred in November 2016. I will keep you updated once I hear back from York Laboratory. 03/20/17 - Lakhani 418 W 25th Street changed their grade of fuel from #4 to #6 in 1996. The property had two (2) spills in 2001 and 2005. The property has a 7,500 gallon AST installed in 1965. 425 W 25th Street had three (3) spills in 1998. They were potentially using #4 fuel oil. Report for one of the spills suggests that the property is not a source because down gradient wells of the contaminated well did not show any product. 281 9 Ave used #6 fuel oil and had spills in 1996 and 1997. However, the property is distanced from the site. As per ACRIS, the Chelsea Recreation Center installed a new fuel storage tank in 2003. Spoke to Robert at the rec center and he informed that they are currently on gas. The rec center will confer with their engineer and confirm the absence of presence of a storage tank on the property. 03/21/17 -

RESIDENTIAL BUILDING (Continued) **S119028311**

Lakhani York Labs sent chromatogram of the sample compared to a #4 and #2 fuel oil standard chromatogram. Confirmed that it is most probably #4 fuel oil. Uploaded to D2. Received phone call from the Chelsea Rec Center and was informed that there is back-up fuel tank in the basement for the generator which currently sits 3/4 full. Nevertheless, the site has had fuel storage history dating back to 1940, when it was most likely to have held a higher grade fuel oil. The tank is located in the cellar of the building. 03/29/17 - Lakhani Milro Andrew Dolan emailed to update that Milro is scheduled to continue with contaminated soil removal on 04/03/2016, and will continue to be on site for the rest of the week. Spoke to Chelsea Rec Center Manager Brian Sullivan and scheduled a site visit for Wednesday 4/5 at 1pm. Manager Robert will be on site to provide access to the tank room. 04/03/17 - Lakhani Milro Andrew called to inform that the groundwater at the site has significantly risen - the groundwater is just an inch below grade. LBG, the consultant, was on site today and took samples of the product. Milro has skimmed off oil from the water surface. However, they are postponing soil removal because of the rain event that is supposed to occur on 4/4 and 4/6. Therefore, Milro Andrew plans to visit the site on 4/10 to assess the feasibility of soil removal. Today, Milro is backfilling the excavation beneath the former tank area. He also informed that the sump had recharged with oil measuring up to 1/4 . Milro removed the oil from the pump. 04/05/17 - Lakhani Visited the Chelsea Recreation Center at 430 W 25th St with DEC Kumar. DEC Kumar and DEC Lakhani met with site manager Robert Markowick (Robert.Markowick@parks.nyc.gov) and engineer Anthony. The recreation center has an aboveground tank on the roof of the building. The center also has an aboveground day tank held in a subterranean room. No evidence of a leak or of oil penetrating a wall of the room was observed. There was no evidence of oil staining on the wall or on the floor. DEC asked to check the sump. The sump is sealed with a cover bolted down to the floor. Anthony said he could have the sump opened and checked by mid next week. Anthony will send photos of the sump. DEC also visited 418-420 W 25th St. The buildings are composed of apartments called Loft 25. DEC met Hussein, the superintendent (420w25@akamrm.com), who led us to the storage area where a cute pipe in the wall was filled with concrete in Tenant Storage 4. The pipe leads to the sidewalk on 25th St. In the room housing the fire pump, a stain, most probably caused by oil, was observed. Hussein stated that he noticed the stain coming through the wall about less than a year ago. Hussein also informed DEC that bore holes were drilled into the sidewalk outside the building 5 years ago, but he is unsure whether he holds the report. 04/07/17 - Lakhani NYC Parks Dept Rajin Small called to confirm the type of information was required from the Chelsea Recreation Center. DEC Lakhani informed him that pictures of the inside of the sump pit were needed. 04/10/17 - Lakhani 418 W 25th Street: - Loft 25 apartments - Alternative addresses for the property include 420 - 426 West 25th Street - There are two (2) spills that have occurred on the property: Spill #0107340 occurred on 10/17/01. According to the spill report, five (5) gallons of #4 fuel oil was spilled by Mystic Oil. No other notes or documents exist for the spill. Spill is closed. Spill #0509359 occurred on 11/04/05. According to the spill report, contamination was found during site evaluation. The material was dug out. The site had an old print shop on the upper floors. There was a stain on the concrete floor in the basement which was used as a former hazardous chemical drum storage room . Floor was broken and

RESIDENTIAL BUILDING (Continued) **S119028311**

volatiles were detected. Four (4) endpoint samples were collected which showed VOC/SVOC levels below standards. Closure report in D2. Spill is closed - According to the DOB, on 01/05/96 the boiler and oil burner were replaced and there was a change in the grade of fuel oil from 4 to 6 - There is one (1) 7,500 gallon #2 fuel oil in-service AST on the property 430 W 25th Street: - Chelsea Recreation Center (New York Parks and Recreation) - Alternative addresses for the property include 432 - 444 West 25th Street - No spills exist for the property - According to the DOB, a certificate of occupancy, dated 2004, indicates that there is an oil tank in the cellar - The building has converted to gas and keeps the oil tank as a backup - No tanks are registered on PBS - In 2003, there was an installation of new boilers, generator, and fuel storage tank in conjunction with the new building. The existing fuel storage tank was removed from service. No information about grade of fuel used 425 W 25th Street: - NYCHA Chelsea Houses - Alternative addresses include for the property include 425- 431 West 25th Street and 428 - 442 West 26th Street - There are three (3) spills that have occurred on the property: Spill #9802923 occurred on 06/04/98. According the spill report, 20 gallons of #2 fuel oil affected a sewer. No other documents available. Spill is closed. Spill #9812239 occurred on 01/04/99. According to the spill report, 100 gallons of #2 fuel oil were spilled in boiler room. Spill is closed. Spill #9806339 occurred on 08/21/98. According to the spill report, one (1) 30,000 gallon #2 fuel oil tank was removed in 08/2000. Soil was contaminated as all six (6) post-excavation samples were tested for VOCs and SVOCs. None of the samples detected any VOC contaminants. All samples recorded exceedances of PAHs. Five (5) permanent wells were installed in 2010. All groundwater samples were under TOGS with the exception of MW-5 - three (3) minor VOC compound exceedences. A slight sheen was subsequently detected in MW-5. Absorbent sock placed in well. Minor impacts on sock in 2012. No oil was detected on sock in 2013. Closure report can be found in D2. Spill is closed - Currently there is one (1) 25,000 gallon #2 fuel oil UST on the property installed on 09/01/2000. On 08/01/2000, a 30,000 gallon #2 fuel oil UST was removed from the property - According to DOB certificate of occupancy, the cellar was the location of the boiler room which dates back to 1964. In 2000, two (2) LP boilers were replaced with two (2) new boilers with combination oil-gas burner. In 1995, the fuel storage tank was replaced as per plans field herewith no change in use. In 1993, two (2) existing fuel oil burners were replaced 04/17/17 - Lakhani Parks Dept. Chelsea Rec Ctr. Robert Markowick sent pictures of the sump at the Chelsea Rec Center. There was no oil observed on the water in the sump. Pictures uploaded to D2. Milro Andrew (Cell: 5164043881) emailed to inform that he will have a crew at the Meyer Residence today until 1-2 pm. Spoke to Andrew and he informed that they are trying to have a vac truck brought to the site. However, the Milro crew may no be able to work at the site 04/18, 04/20, and 04/21. Oil is still observed flowing into the excavations. There was a minimal amount of oil observed in the sump pit (less than 1/4). Spill pads are constantly being placed down and replaced to recover the product. Andrew sent pictures of the excavation and the sump pit. Uploaded to D2. 04/18/17 - Lakhani Milro Andrew informed that the Milro crew left the Meyer site on 04/17/17. Two (2) yards of oil contaminated soil and materials/debris were removed. Unfortunately, they are still uncertain whether they will be returning to the site today. He also informed that they are on site

RESIDENTIAL BUILDING (Continued) **S119028311**

today with a vac truck. They will continue with soil removal. They will be reaching foundation limits soon. Site visit scheduled for 1 pm on 04/24/17. 04/24/17 - Lakhani Called Milro Andrew and he informed that Milro is onsite and doing soil removal by hand. He reports that every time they dig out soil from underneath the water, dots of black oil surface on the water. The vac truck he has onsite broke and so Andrew is currently having the pump on the vac truck fixed so that Milro can remove the groundwater at the site. Andrew had not provided an update on progress at the site, indicating that all work was stalled due to the irreparable damage to the vac truck. 05/03/17 - Lakhani Sent Milro Andrew an email requesting an update on the site. Spoke to LBG Dave and he informed that he had been on site when Milro was completing soil removal. He observed that there was not much product on the water. Milro has removed a majority of the contaminated soils and has passed the contaminated zones to encounter clean native soils. DEC Lakhani spoke to Milro Andrew. Andrew confirmed that clean, indigenous soil has been encountered a foot beneath the groundwater. The soil is a lighter siltier soil beneath the #2 fuel oil contaminated, debris ridden, asphalt affected soils. Andrew reported that asphalt had been used as historic fill material at the site. 05/05/17 - Lakhani DEC Lakhani and DEC Kumar visited the site and met LBG Dave and Milro Andrew at the Meyer residence. There is minimal oil observed on the groundwater that is being constantly absorbed by pads. The soil beneath the water was relatively clean. DEC authorized the backfill of the excavation. However, prior to the backfill a groundwater grab sample was required to address any dissolved contamination, if any. The sump has been clean as well. DEC asked Milro to vac out the water and backfill. Pictures uploaded to D2. 05/24/17 - Lakhani Milro Andrew sent groundwater analyticals, however, the sample was only tested for SVOCs. SVOCs were below standards. 06/02/17 - Lakhani Milro Andrew informed that VOCs were not tested for because the groundwater sample was not taken correctly. Therefore, only SVOCs could be analyzed. All SVOCs are below standards. Naphthalene concentration is 0.35 ug/L. The concentration is very low compared to the 10 ug/L standard for naphthalene. Given these results, the VOCs in the groundwater must be relatively low as well. DEC has authorized Milro to backfill the excavation. Email sent to Ms. Mayer authorizing backup and acknowledging that the cleanup is complete. 06/27/17 - Lakhani Spoke to Milro Andrew and was informed that the excavation has been backfilled to a couple of inches below grade. The Meyers are currently on vacation and will be returning in mid-July. Upon their return, Milro will schedule concrete and brick work to complete the project. Spill is closed. 10/10/17 - Lakhani Spill closure request uploaded to D2."

Remarks: "During an investigation of previously reported discharge (spill #: 0812516) from a remote fill line, a petroleum release was noted from a 275 gallon tank at the site."

Environmental Interest/Information System:

CON EDISON SERVICE BOX: 5020 (Continued) **1016149020**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

(Harrington) 1/13/2005: Approved SI work plan (installation of four (4) monitoring wells). Harrington 3/24/2005: Project transferred to Vought - Region 2. (Harrington) 08/31/2005 - Feng - Project transferred from Vought to Feng. 10/18/2005 - Feng - Spill#: 98-10383 has been consolidated into this spill#. 10/25/2005 - Feng - Subsurface Investigation Report, dated 5/2/2005. on 4/12-13/2005, Tyree installed 3 off-site monitoring wells in sidewalk adjacent to 10th Ave and 1 in sidewalk adjacent to West 24th St as per the Work Plan approved by Harrington on 1/23/2005. Highly contaminated soil found in B-5(4'-8'), B-6(6'-8'), and B-7(6'-8'). however, goundwater was just slight high contaminated in B-6. 10/25/2005 - Feng - Quarterly Monitoring Report, 5/2005 - 7/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.04' to 8.54' below grade. W-1, decreasing, 146ppb BTEX and 37ppb MTBE. W-2, decreasing, 274ppb BTEX and 104ppb MTBE. W-3, decreasing and fluctuating, 1,649ppb BTEX and 461ppb MTBE. W-4, 1,753ppb BTEX and no MTBE. W-5, 9,975ppb BTEX and less than 46.0ppb MTBE. W-6, 4,718ppb BTEX and 58ppb MTBE. W-7, 18,230ppb BTEX and 16,700ppb MTBE. 11/2/2005 - Feng - Quarterly Monitoring Report, 8/2005 - 10/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.21' to 8.71' below grade. W-1, decreasing, 12ppb

GETTY (Continued) **S104503705**

BTEX and 13ppb MTBE. W-2, decreasing, 7ppb BTEX and 45ppb MTBE. W-3, decreasing and fluctuating, 2,518ppb BTEX and 262ppb MTBE. W-4, decreasing, 1,418ppb BTEX and no MTBE. W-5,increasing, 11,608ppb BTEX and 74ppb MTBE. W-6, 4,336ppb BTEX and MTBE MDL. W-7, sharply decreased, 2,461ppb BTEX and 211ppb MTBE. 11/18/2005 - Feng - STIP sent to Getty Properties with request of 1) wells installation of one (1) downgradient of W-2 and W-7, one (1) east to W-5 and one (1) southeast to W-6. 2) surrounding properties sketch. CC to Tyree and Delta. STIP due 12/19/2005. 2/17/2006 - Feng - on 2/9/2006 Received signed STIP with modified CAP. (RJF) 2/27/2006 - Feng - Quarterly Monitoring Report, 11/2005 - 1/2006. The site is an active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.06' to 8.87' below grade. 7 monitoring wells onsite. W-1, 254 ppb BTEX, 34 ppb MTBE. W-2, increased and 343 ppb BTEX, increased and 231 ppb MTBE. W-3, decreased and 1,644 ppb BTEX, decreased and 62 ppb MTBE. W-4, decreased and 1,140 ppb BTEX, MTBE ND. W-5, sharply decreased and 5,170 ppb BTEX, MTBE ND. W-6, decreased and 3,328 ppb BTEX, MTBE ND. W-7, decreased and 2,012 ppb BTEX, decreased and 127 ppb MTBE. (RJF) 4/6/2006 - Feng - Stip cancelled due to dropping in concentration. Wait for next quarter monitoring report. (RJF) 5/16/2006 - Feng - WorkPlan submitted by Tyree, dated 5/12/2006. Tyree proposed to install 3 offsite monitoring wells. One locate at sidewalk across West 24th Street (P-8), one at sidewalk across southeast corner (P-9), and one at the sidewalk across 10th Ave (P-10). The wells will be constructed of 2 schedule 40 flush joint PVC having 15' of 0.02 slotted screen and 5' of riser. Each wells will be installed 10' into groundwater. The WorkPlan is approved and approval email sent to Joe Rennie. (RJF) 6/20/2006 - Feng - Subsurface Investigation Report, dated 6/5/2006. Tyree installed 3 offsite monitoring wells, 20 feet 2-inch PVC. Groundwater encountered at approximately 8 feet below grade. Soil and Groundwater samples were collected (Chain of Custody indicated that), but only soil samples analyticals were presented. PID reading = 0 for depth from 0-20'. Slight VOCs and SVOCs detected in soil but below TAGM 4046. Emailed Joe Rennie for groundwater data. (RJF) 6/28/2006 - Feng - Quarterly Monitoring Report, 2/2006 - 4/2006. The site is active Lukoil gasoline station/convenience store. As of sampling and monitoring on 4/12/2006, groundwater flows to south at the depth of 7.92' to 9.41' bg. 7 monitoring wells onsite. W-1, 75 ppb BTEX, 28 ppb MTBE. W-2, 30 ppb BTEX, 291 ppb MTBE. W-3, increased and 8,520 ppb BTEX (1,280 ppb B, 4,280 ppb T, 770 ppb E, 2,190 ppb X), 57 ppb MTBE. W-4, 2,438 ppb BTEX (25 ppb B, 33 ppb T, 1,000 ppb E, 1,380 ppb X), MTBE ND. W-5, 7,969 ppb BTEX (2,320 ppb B, 119 ppb T, 2,190 ppb E, 3,340 ppb X), 102 ppb MTBE. W-6, 2,423 ppb BTEX (322 ppb B, 31 ppb T, 1,010 ppb E, 1,060 ppb X), 19 ppb MTBE. W-7, increased and 22,780 ppb BTEX (6,310 ppb B, 8,870 ppb T, 1,520 ppb E, 6,080 ppb X), increased and 8,350 ppb MTBE. Stipulation Agreement sent to Getty Properties and cc to Tyree and Delta. STIP due 7/24/2006.(RJF) 8/16/2006 - Feng - Stipulation Agreement executed on 8/10/2006. (RJF) 8/17/2006 - Feng - Quarterly Monitoring Report, 4/2006 - 7/2006, by Tyree. The site is active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.38' to 8.87' bg. As of sampling on 7/24/2006, 9 monitoring wells. W-1, 57 ppb BTEX, 8 ppb MTBE. W-2, 13 ppb BTEX, 35 ppb MTBE. W-3, 6,862 ppb BTEX (635 ppb B, 3,260 ppb T, 346 ppb E, 2,621 ppb X), 114 ppb MTBE. W-4, 2,047 ppb BTEX, ND MTBE. W-5, 10,968 ppb BTEX (1,440 ppb B, 128 ppb T, 1,940 ppb E, 7,460 ppb X), ND MTBE. W-6, 2,982 ppb BTEX, 23 ppb MTBE. W-7,

GETTY (Continued) **S104503705**

24,900 pppb BTEX (6,320 ppb B, 5,590 ppb T, 1,430 ppb E, 11,560 ppb X), 4,700 ppb MTBE. W-8, both ND. W-9, destroyed during sidewalk repair. W-10, both ND. Emailed Rob Szczepanski (Tyree) to approve the delineation of contamination, RAP due 11/17/2006 as per the Stipulation Agreement. (RJF) 10/26/2006 - Feng - The adjacent property will be developed, 245 10th Ave and 502 West 24th Street, E-142-Designation Site of NYCDEP. Called Amy Ma of NYCDEP to inform her about the existing spill in the Getty Station locate 239 10th Ave. (RJF) 11/15/2006 - Feng - Quarterly Monitoring Report, 8/2006 - 10/2006, 10/19/2006, by Tyree. Active Lukoil gasoline station/convenience store. Groundwater sampled and gauged 10/16/2006. 9 monitoring wells. DTW 8.31' to 9.83' bg. Flow direction south. No LNAPL. BTEX range ND to 30,410 ppb (MW-7). MTBE range ND to 3,330 ppb (MW-7). (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. DEC staff has informed Tyree and Delta about the site development at the adjacent property, and the dewatering process may affect the contamination plume. Tyree will contact DEP before the preparation of RAP. (RJF) 1/23/2007 - Feng - Email Rob S. (Tyree) the contact person info in DEP and the adjecent project info. (RJF) 6/6/2007 - Feng - Quarterly Monitoring Report, 11/2006 - 1/2007, 2/2007. Groundwater monitored 1/30/2007. 9 monitoring wells. Active gasoline station. DTW 7.94' to 9.47' bg. Flows southerly. LNAPL in W-7 (0.26'). W-1, 185 ppb BTEX, 163 ppb MTBE. W-2, 9 ppb BTEX, 24 ppb MTBE. W-3, 18,410 ppb BTEX, 102 ppb MTBE. W-4, not accessible. W-5, 10,606 ppb BTEX, 33 ppb MTBE. W-6m 1,953 ppb BTEX, 36 ppb MTBE. W-7, 0.26' of LNAPL. W-8, ND. W-9, destroyed. W-10, 3 ppb BTEX, MTBE ND. (RJF) 7/9/2007 - Feng - Quarterly Monitoring Report, 2/2007 - 4/2007, 5/2007. Groundwater sampled 4/30/2007. 9 monitoring wells. DTW 9.06' to 16.76' bg. Flows to south. No LNAPL. W-1, 1,255 ppb BTEX, 129 ppb MTBE. W-2, 1,572 ppb BTEX, 362 ppb MTBE. W-3, Dry. W-4, NA. W-5, dry. W-6, NA. W-7, NA. W-8, ND. W-10, ND. (RJF) 11/7/2007 - Feng - Quarterly Monitoring Report, 5/2007 - 7/2007, 8/2007. Groundwater sampled 7/30/2007. 9 monitoring wells were sampled. DTW 8.11' to 9.27' bg. Flows to south. No LNAPL. BTEX range ND to 5,980 ppb. MTBE range ND to 393 ppb. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. Tyree will sample for one more quarter to evaluate the site condition after the dewatering process at the adjacent site. Need to sample MW-4. RAP to be submitted by 2/2008. (RJF) 1/28/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 10/2007, 11/2007. Active Lukoil gasoline station/convenience store. Groundwater gauged and sampled 10/23/2007. 9 monitoring wells. DTW 10.05' to 16.37' bg. Flows to south. No LNAPL. BTEX range ND to 5,131 ppb (W-6). MTBE range ND to 252 ppb (W-3). (RJF) 3/19/2008 - Feng - eDoc Quarterly Monitoring Report 1Q2008. (RJF) 3/20/2008 - Feng - Email to Tyree and Delta for RAP status. (RJF) 3/24/2008 - Feng - Quarterly Monitoring Report, 11/2007 - 1/2008, 2/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 1/14/2008. 9 monitoring wells. No DTW available due to water probe broke onsite. Flows to south. No LNAPL. BTEX range ND to 4,203 ppb (W-1). MTBE range ND to 412 ppb (W-2). (RJF) 7/11/2008 - 2Q2008, 2/2008 - 4/2008, 5/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 4/25/2008. 9 monitoring wells. DTW 9.65' to 11.58' bg. Flows to south. No LNAPL. BTEX range ND to 10,765 ppb (W-3). MTBE range ND to 191 ppb (W-3). email Tyree for RAP status. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. The dewatering that started 4/2007 was stoped 2/2008. MW-4 was not sampled because

GETTY (Continued) **S104503705**

storage box was on top of that. Wait to see the rebound before the delineation. Possible monitoring wells will be installed between the service building and the tank. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Review 2Q2009 quarterly for possbile delineation. (RJF) 3/18/2009 - Quarterly Monitoring Report, 5/2008 - 7/2008, 8/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 7/22/2008. 9 monitoring wells. NO LNAPL. DTW 9.21' to 10.67' bg. Flows to south. BTEX range ND to 7,530 ppb (W-3). MTBE range ND to 165 ppb (W-3). (RJF) 5/6/2009 - Quarterly Monitoring Report, 8/2008 - 10/2008, 11/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 10/30/2008. 10 monitoring wells. NO LNAPL. DTW 8.11' to 9.66' bg. flows to south. BTEX range ND to 20,856 ppb (W-7). MTBE range ND to 192 ppb (W-7). (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active Lukoil gasoline station convenience store. 12 monitoring wells. Groundwater was gauged 4/24/2009, 5/29/2009, 6/19/2009 and 7/9/2009. NO LNAPL. DTW 8.11' to 9.66' bg. Flows to south. Groundwater was sampled 6/19/2009. BTEX range ND to 11,198 ppb (W-7). MTBE range ND to 274 ppb (W-2). (RJF) 7/9/2010 - Reviewed Investigation Work Plan, dated 6/3/2010, by Tyree. Tyree proposes 2 wells W-11 and W-12 in west of W-7 and north of W-7. Work Plan is approved. Report due 10/2010. 2/8/2012 - Reviewed the Subsurface Investigation Work Plan, dated 5/17/2011, by Tyree. Tyree proposes to install 2 monitoring wells at the sidewalk along West 24th Street. Tyree mentioned that refusals were hit during the previous attempt to install wells as per the 7/2010 approved work plan. 2/10/2012 - Letter sent to Getty approving the work plan. Report due 4/2012. DEC provides comments, 1) sample groundwater and soil for CP-51 list VOCs; 2) conduct site history review to identify the reason why W-5, W-6 and W-7 with elevated BTEX concentration. Notified Getty that the case has been transferred to Central Office. All the future correspondences shall be directed to the new project manager, Kevin Hale. (J. Feng) 2/1/2012 Getty portfolio transferred to KGH. 3/14/2013 KGH meets with Tyree/Getty to discuss remedial progress on various sites including Getty #341. The site has been cleaned up nicely over the years and Getty is petioning for closure. Site is a large volume, flagship station currently operated as a Lukoil. 3/21/2013 KGH reviews case-file for Getty Station #341. As part of the file review KGH does an internet search on the site. This station was the site of a photo op/press event involving the President of Russia Vladimir Putin celebrating the success of Lukoil in the USA. 6/6/2013 - Review of the file shows that this site was completely excavated to the extent feasible in 1998. There may be some low-level residual associated with utilities beneath the sidewalk but it is out of reach and of no consequence. The greenest & most sustainable approach is to let it attenuate naturally. 11/19/2013 4:36 PM from Craig Werle Kevin- I'm following up on our call today concerning closure of the one remaining open spill at the former Getty station at 239 10th Ave.As the environmental consultant that has been retained by VHS 239 LLC (new owners of the property) to assist with their Brownfields Cleanup Program (BCP) application for the site, I have attached the Tyree quarterly monitoring report for the third quarter of 2012. On page 6, Tyree, on behalf of Getty, requests closure of spill 97-07190 and issuance of a No Further Action letter. We hope that this direct request for will facilitate your expeditious review and closure of the spill so that it won't complicate the acceptance of the pending BCP application . Please

GETTY (Continued) **S104503705**

contact me with any additional questions. Thanks for your help; Craig Craig A. Werle, P.G. - Principal Hydrogeologist - ROUX ASSOCIATES, INC. 12/2/2013 KGH to D'Ambrosio, 1:43 PM Subject: Re: Getty's request for closure of Spill - 239 10th Ave. CC: Conlon, Benjamin; Werle(cwerle@rouxinc.com), Craig: Cozzy, Robert; Farrar, Dennis Denise, Hope you had a nice Thanksgiving. I believe you had already joined Craig Werle and I on the phone when I advised him that as far as I could tell, Getty had not submitted a Petition for Closure of Spill # 97-07190 at the 10th Avenue site. He informed me to the contrary that they had indeed made a request and forwarded me a copy of their 3rd Quarter 2012 Monitoring Report which had been renamed Petition for Closure (attached). I've checked my files and can not find the original version. That is NOT surprising as it would likely have been sent to me sometime during the Fall of 2012 - at which time we were committed to the Hurricane Sandy Response. I requested during that time that Tyree pull back all electronically submitted reports (which had overloaded my Blackberry) and re-submit them on a CD when I was out of the field and back in the office. I expect that they did resubmit the 3rd Quarter 2012 Report but I cannot locate it. It does not appear on the list of reports resubmitted on CD. Regardless, I have reviewed the attached Quarterly Monitoring Report sent by Mr. Werle. As cited in his e-mail below, a request for closure is made on page 6. The response to this request is as follows: The Department has considered the request for no further action but must deny closure of Spill #97-07190 at this time. The Department acknowledges that considerable work has been completed and that excavation of contaminated soil has been completed to the extent feasible laterally. It is possible that residual soil contamination exists beneath the limits of previous excavation which would have to be properly managed if deeper redevelopment occurred in the near term. The Department agrees with the Tyree stated opinion that the residual GW contamination will attenuate naturally over time and sees no current exposure or potential impact to human health off-site from Spill # 97-07190. Unfortunately, the Department is also in receipt of an application to the BCP which claims that the site is in need of 4.8 million dollars worth of environmental clean-up work. In the face of these two seemingly conflicting scenarios, the Department will request Getty or current owner to submit an Exposure Assessment Report and Request for Closure clearly demonstrating that environmental issues have been addressed to the extent feasible and that closure is appropriate or what steps they will undertake to make it so. I look forward to working with you and sorting this out in a timely manner. Sincerely Kevin Hale NYSDEC- Albany From: Kevin Hale 3/6/2014 - received Exposure Assessment Report- Former Getty Station #341 Kevin- Attached please find a Qualitative Exposure Assessment Report for the former Getty station located at 239 10th Ave. The report evaluates the potential for exposures to residual hydrocarbon concentrations on the site and recommends the closure of spill #97-07190. Two hard copies of this report is also being sent to your office. Please contact me with any questions concerning the report. Craig 4/28/2014 The Department has reviewed the Qualitative Exposure Assessment Report submitted for the site. The data clearly demonstrates that any low-level residual will degrade in place and presents no on or off-site impacts. It is our understanding that the station has recently been shut-down to make room for construction of a condo complex and that the developers are working with NYCOER. As such, The Department concurs that No Further Action is required and

BROWNFIELDS:
Name: FORMER GETTY SERVICE STATION
Address: 239 10TH AVENUE
City,State,Zip: NEW YORK, NY 10001
Program: BCP
Site Code: 488150
Acres: 0.130
HW Code: C231086
SWIS: 3101
Town: New York City
Record Added Date: 10/21/2013
Record Updated Date: 01/13/2014
Update By: BXANDERS
Site Description: "Location: The site is located at the northwest corner of the intersection of West 24th Street and 10th Avenue. The site is approximately 0.13 acres in size. Site Features: The site currently is occupied by a non-operating gasoline service station, including a recently vacated 1-story commercial building last used as a convenience store. Current Zoning and Land Use: The subject property is zoned as M1-5, which allows for commercial and mixed-use buildings. The intended use of the site is for residential and commercial. The site is bounded directly adjacent by an 11-story residential building to the north, a car wash and mixed-use (residential and commercial) building to the south, and across 10th Avenue 4- and 6-story mixed-use buildings and a 20 story residential building. The site is approximately 100 feet away from the High Line Park, which overlooks the site to the east, separated by a one-story art gallery. Past Use of the Site: The site was operated as a small portion of a gas light fixture manufacturing facility that occupied the eastern third of the block in the 1890s. The site then operated as a gasoline filling station from at least 1930 until recent decommissioning in 2013. Since 1988 the site had 8 spill numbers assigned to it, out of which one spill number still remains open. In 1998 twelve 550-gallon gasoline USTs, three 4,000-gallon gasoline USTs, one 275-gallon fuel oil UST, and two fueling pump islands were removed and 1,853 tons of impacted soil was removed. Post excavation soil sampling results identified concentrations of volatile organic compounds (VOCs) exceeding NYSDEC Recommended Soil Cleanup Objectives (RSCOs). Petroleum impacted groundwater was also detected on-site which still remains. Site Geology and Hydrogeology: The geologic conditions at the site consists mainly of fine to medium grained sands mixed with gravels, boulders, construction debris and interbedded layers of silt down to 25 feet below grade (fbg). The Site s topography is generally flat and the surface elevation is approximately 43 feet above mean sea level. Groundwater occurs within the unconsolidated soils at depths ranging from approximately 7 to 10 fbg; based on historical gauging data, there appears to be an appreciable degree of seasonal variation in the direction of groundwater flow at the site, periodically fluctuating between south, southwest and west. "
Env Problem: "Nature and Extent of Contamination: Based upon investigations

FORMER GETTY SERVICE STATION (Continued) **S106703285**

	conducted to date, the primary contaminants of concern for the site include petroleum hydrocarbon related volatile organic compounds (VOCs) compounds. Soil: Per 1998 lab results for the end point soil samples collected from 10 feet below grade (SW-7) the highest benzene concentration was detected as 44.5 ppm which exceeded the soil cleanup objective (SCO) for commercial use (to 44 ppm). Other SCO exceedances were ethylbenzene at 198 ppm (restricted residential SCO = 41 ppm), xylene at 1,990 ppm (industrial SCO=1000 ppm), toluene at 479 ppm (resrricted residential SCO=100 ppm) and MTBE at 124 ppm (restricted residential SCO= 100 ppm). Groundwater: Since 2001 twelve (12) monitoring wells have been installed on and off-site (3 on site and 9 off-site) related to the current open spill. Per August 2012 (latest available) monitoring data the highest on-site concentrations detected were: benzene (32 ppb), ethylbenzene (139 ppb), xylene (80.5 ppb) and MTBE (18.3 ppb). Groundwater standards have been exceeded for all of the above analytes. Site related soil vapor and indoor air samples never been analyzed. Special Resources Impacted/Threatened: The site is located in the urban area and Fish and Wildlife Impact Analysis is not warranted. "
Health Problem:	"Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available."

DEC Memo:	"03/20/08 - See eDocs for Con Ed report detailing cleanup and closure. 158962. June 06, 2005 @ 09:00 @ 08:45 UG Supervisor S. Falkowski reported to T. Haynes that, UG Splicer Carmen Cabbell #20479 was pumping out service box 5231, located at 517 W 28 St. She noticed oil being pump out also. The oil didn't leak into the City drain. She had placed absorbent pads on the asphalt to absorb the oil. The oil in the service box is contained. Approximately 1 pint of oil and 20 gallons of water in total less than .05 was pumped onto the street. Incident occurred at 08:40. Acct. 12018 No sewer/waterways affected. No fire/smoke involved. No injuries related to the spill. Weather condition did not contribute to the spill. No private property affected. Spill on concrete and asphalt. Clean-up is set-up for 15:00 06-06-2005. No, sewer connection. No concrete sump. No visual water movement. No sump pump. Yes, standing water. Environmental tag #17086 Two samples taken 1-pcb 1-oil id. Chain of custody #dd 04443. Logger: T. Haynes CIG: M. Piropato #18699 notified @ 09:44"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND PBS 2-317888 - shows several tanks abandoned in place. a/k/a 507 West 24th St 2 - 2,000 gal diesel tanks abandoned several years ago. Soil borings done around these tanks show trace levels of contamination. All below TAGM. Sangesland asked Mr Taylor of Laurel Envir. to send in a report and if the numbers are below TAGM, the case will be closed out. 12/17/2003 Laurel Envir. sent in a report with soil sample results showing all contaminants below TAGM. Spill Closed"
Remarks:	"In February of 2000 did a tank test, and found no levels of anything reportable. Spoke to DEC recently and they stated he needed to call spill hotline, to obatin a spill #. to close out. "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	003
Tank Id:	49479
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	I04 - Overfill - Product Level Gauge (A/G)
	C01 - Pipe Location - Aboveground
	H05 - Tank Leak Detection - In-Tank System (ATG)
	L09 - Piping Leak Detection - Exempt Suction Piping
	E00 - Piping Secondary Containment - None
	G03 - Tank Secondary Containment - Vault (w/o access)
	J02 - Dispenser - Suction Dispenser
	F00 - Pipe External Protection - None
	K00 - Spill Prevention - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	11/01/1994
Capacity Gallons:	10000

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Only soil samples collected. Site appears to be contaminated with gasoline (BTEX & MTBE) from a neighboring gas station. Groundwater is approx 4ft deep. This building does NOT have any petroleum tanks. Owner is trying to convert the space into an art gallery. Gallery owner will not come into the space until the problem is solved Soil borings were done through the floor of a building. Some BTEX and MTBE was found in the borings. Consultant plans on doing additional soil borings & groundwater testing (4 ft to GW) Environmental Enigneer has been hired to work on the project: Nicholas Canonico - Nova Consulting 516-352-3233 266 Jericho Tpk. Floral Park NY 11001 cell

GASOLINE CONTAMINATION (Continued) **S106721244**

516-244-4069 Nearest gasoline source appears to be a former gas station on the corner located on a lot with the following addresses: 285, 287, 289, 291 & 293 Tenth Ave. There are NO PBS permits for any of these addresses. There is an open spill at 291 10th Ave - #8701549 - DEC contact Joe Sun. - Sangesland 10/22/04 Rommel, received call from Nick, location formerly used for cab storage and maintenance. Aboveground Waste oil tank formerly on site. Additional investigation to include soil and groundwater sampling. Rommel. 12/06/04 File Update by Sun: Based on the Subsurface Investigation Report for the subject site, prepared by Nova Consulting & Engineering, LLC, dated November 2004, the spill is closed. "

Remarks: "Discovered BTX and hydrocarbon conamination in soil borings taken inside the building."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC responder notes: Transformer flash fire, rupture. An EMT was burned by spraying oil. Oil on sidewalk - crew already have completed double wash of sidewalk and re-opened it. PCB sample from 1992 is 10 ppm. New sample has been collected from vault and adjacent manhole and sent to Chem Lab. Clean up proceeding as 50-499 until confirmatory samples return. See file for photographs. (JHO) ~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~ e2mis no. 144-630: 8-20-02 @ 09:55 F Simms #66618 reports that while investigating a transformer explosion @ vs4493 290 9 ave, he discovered 1/2 gallon of transformer oil had

VAULT 4493 (Continued) **S106006725**

spilled onto the concrete sidewalk, a mailbox and an ambulance. Upon arrival of F Simms there was no smoke or fire involved. An emt worker was burned on the leg and neck and transported to the hospital. Police and fire department were on location. Transformer is on feeder #13m59. Environmental yellow tag # 35966 was applied. 2 samples are to be taken from the spill as soon as it is safe to enter the structure, chain of custody # aa21260. Further investigation can take place when it is safe to enter the structure. Feeder is not grounded at this time. Cleanup pending safe access. Lou First, Manhattan E,H&S reported at 12:50 hrs. that the I&A was on location and they estimated that there was approx. 30 to 40 gallons of oil in the vault. He reported that Jane O'Connell from the NYSDEC arrived on location at approx. 11:45 hrs. He also reported that Chris Haas from the NYCDEP was on location at approx. 12:00 hrs. lab sequence # 02-07760-001 PCB 3 ppm 8/20/02 18:00 J. Gnall # 195 I&A supervisor reports that at this time a partial cleanup has been completed. A final cleanup will be done when the unit is removed. A tanker removed 200 gallons of oil from the transformer & 340 gallons of water/oil mixture from the vault. They also cleaned up the sidewalk & mailbox that had oil on it. All were double washed with slix. & rinsed off with flush truck. Note: The tree was checked & no oil was found as per L. First The city to do a follow up. Update 8-21-02 @ 03:00 E Higgins #18537 reports that the cleanup is complete as of 03:00. Aprox 2 yards of solids (ppe and debris) removed. Double washed with bio-gen and flushed. The transformer was drained of 200 gallons of oil. Draining of the transformer removes the source of the spill. Prior to the final cleanup the transformer was removed. "

Remarks: "cleanup in progress 144630 *** U P D A T E *** TRANSFORMER FAILED 230 GALLONS IN THE VAULT - RECORDS SHOW THAT IN 1992 IT WAS 9PPM"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL See spill # 0205294 e2mis no. 144-631: Fred Simms #66618, Field Operations Manager, reported at 10:28 hrs. that he found at 10:25 hrs. approx. 70 gallons of transformer oil in manhole M39730 located at 290 9th Avenue and West 27th Street. The Emergency crew was on location in response to a fire dept. (NYFD) request of a transformer explosion in vault VS4493 at the same location. Mr. Simms reported that due to the transformer explosion in vault VS4493 at the same location, oil from the transformer was going into the manhole. The crew was about to enter the manhole to cut the secondary due to the transformer problem when they discovered the spill. The source of the oil is possibly the transformer in vault VS4493 and the cause is a transformer failure. No agencies on location. The Account No. is F3445. Lino Rodriguez #32100 will take two liquid samples from the spill for PCB and Oil ID on a priority E basis. Chain of Custody #AA21261 will be issued for the samples. No initial cleanup action taken. The crew is waiting for the feeder to be grounded before going into the manhole. 8/20/0 Received lab results, lab sequence # 02-07762-001 TOTAL PCB 3 ppm 8/20/02 16:36 Received lab results, Lab sequence # 02-07763-001 Analysis indicates the presence of a substance similar to a dielectric fluid. 8/20/02 21:05 Received a call from A. Zappone # 85207 Underground (cleanup) supervisor that the cleanup was completed 100% at 21:00. "

DEC Memo:	"DEC Piper spoke w. Vic, as per conversation plans are for a high rise. The property is three separate lots and all had some type of contaminants. Vic will forward Phase I and II and a work plan is going to be drawn up. This site is a E-designated site and will be monitored by the NYC DEP. High Line Development Group. Michael Shananbrook 212-937-8861 As per GZA, funding was lost in 2008. 1/9/12- csl sent to High Line Development Group. Michael Shananbrook 550 W 29th St. NY, NY 10001 04/24/14 - The project has been reassigned to M. MacCabe in the central office. Staff is reviewing a remedial work plan intended to address the chlorinated VOCs in groundwater. 02/25/16 - The site was remediated under the oversight of the NYC Office of Environmental Remediation project No. 13EHAN009M and has been closed."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Sangesland spoke with Roux Assoc. Tank excavation with some spillage around tanks. (Tanks had been previously abandoned in place). Now tanks are being pulled. Sangesland asked for several end point soil samples taken from tank grave after removal. Test for VOC & SVOC. 3/16/2005 Sangesland reviewed a report from Roux Assoc. dated 3/9/05 On 2/18/05 Roux collected 6 post-ex samples. One per each side & 2 bottom VOC's - All samples contained low levels of VOC's, but they were ALL BELOW RSCO Stds. SVOC's - Some minor Hits on PAHs consistant with historical fill levels. Results show some contaminants exceed regulatory standards. Samples taken on removed (waste) soils showed much higher VOC & SVOC levels. Roux conclusion says that the contamination source has been removed and the site should be closed out. Based on the soil sampling work performed on the site and the report prepared by Roux Assoc., the NYSDEC agrees with the conclusion and the spill case is closed with: No Further Action - Does Not Meet Standards "
Remarks:	"REMOVING TANK, JUST AN ODOR IN THE SOIL: NOT SURE HOW TO MOVE FORWARD WITH PROJECT:"

HW Code:	C231082
SWIS:	3101
Town:	New York City
Record Added Date:	01/02/2013
Record Updated Date:	12/31/2014
Update By:	BXANDERS
Site Description:	"Location: The site is located at 514 - 520 West 28th Street in New York City, New York County and has an area of approximately 0.51 acres. It is between 10th and 11th Avenues and is bounded to the north by West 28th Street and the south by West 27th Street. Commercial structures are adjacent to the east and west boundaries. Site Features: Presently, the site is undergoing redevelopment. Prior to remediation and redevelopment, the two lots that made up the site contained a vehicle rental company and a scrap yard. Current Zoning and Land Use: The site is zoned commercial (C6-3) and is located in a commercial and residential area of the West Chelsea section of the Borough of Manhattan. Past Use of the Site: The site has been occupied by several residential structures, laundry cleaning, metal works, manufacturing, motor freight storage, automobile repair and a scrap yard. Site Geology and Hydrogeology: Prior to remediation, subsurface material present below the site included historic fill from prior developments that may have been used to stabilize soil or to elevate the existing ground. The fill included concrete, brick, cinders, and other construction debris mixed, silt, sand and gravel and was generally present from 1-10 feet below ground. Below the fill the shallow subsurface soil at the site consists of sands and silts, glacial till intermixed with lean clay. Depth to bedrock ranged from 15 to 25 feet below grade. The surface geology of Manhattan generally includes very thin layers of unconsolidated glacial deposits underlain by bedrock. Groundwater at the site is encountered at approximately 8 to 11 feet below ground surface. Regional groundwater flow direction is westerly toward the Hudson "
Env Problem:	"Soil: Investigations found no evidence of significant VOC contamination in soil. Trimethylbenzenes and xylenes were present in one of the 21 soil samples at concentrations above their unrestricted use SCOs, but well below residential use SCOs. PAHs were observed in about half of the samples at concentrations indicative of historic fill. Metals are also present in soil at concentrations typical of historic fill and urban background. However, mercury concentrations ranged from non-detect to 69.6 parts per million (ppm). The unrestricted use SCO for mercury is 0.18 ppm; restricted residential is 0.81 ppm. The entire site has been excavated beyond the site boundary on all side and and to bedrock over about two-thirds of the site. The remaining soil meets unrestricted SCOs for all constituents. Groundwater: Cis-1,2-dichloroethene (DCE) was found in groundwater samples from two wells near the north-west corner of the site at concentrations up to 260 ppb. DCE has been documented in up-gradient groundwater and is not due to an on-site source. Soil Vapor: The presence of chlorinated VOCs in soil vapor and groundwater presents the possibility of vapor intrusion to future on-site buildings. The maximum concentrations of tetrachloroethene (PCE) and trichloroethene (TCE) were detected along the west boundary at the respective concentrations of 308 micrograms per cubic meter (ug/m3) and 828 ug/m3. The site has been excavated to below the water table and the new on-site building will have a water vapor barrier USTs Two USTs were exhumed in August 2013 and disposed of off-site. Two more wells were removed during the site remediation activities."

514-520 WEST 28TH STREET (Continued) **S112818548**

Health Problem:	"The site is fenced and covered by concrete, people will not come into contact with site related soil and groundwater contamination unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains its water from a different source not affected by this contamination. Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air or buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site related contaminants due to soil vapor intrusion does not represent a concern for the site in its current condition. "

DEC Memo:	"4/18/13 - Austin - Recieved call from notifier, who complained about pet. vapors coming from excavtation in from of building, causing commercial building residents to get sick - apparently related to tank work (removal? repair?) at location - described what sounded like a Baker tank at construction site - Address is related to PBS # 2-511234, an expired registration at 531 W. 25 St. (one of the entrance addresses for the building in question)showing a 5K # 2 fuel oil AST installed in 1920 - She is requesting an investigation of this matter to abate the vapors 4/18/13-Zhune visited the site. While doing excavation in the sidewalk to install the ConEd transformers a tank was found. The tank was removed and contaminated groundwater was pumped to a frack tank. At the time of my inspection there was a vaccum truck pumping the contaminated groundgwater from the frack tank. The excavation was backfilled and no odor was percived outside and inside the building located on 535 west 25 street during my inspection. 11/13/13- Randy sent me an email requesting What is the status on this spill report?. Update on this spill report. He had a call from a consultant about the spill's status. 11/14/13- EPI consulting did Phase I for the entire building. As per the consultant they were hired for the bank who is provided a loan to the owner. As part of the Phase I they searched the spills records. They found this spill # 1300622 open. Superintendent- Miguel Hernandez mhernandez@unitybuildingservices.com 718-285-1605 Manager of the building- Will Grooner 646-937-3104. Jenni Siva- 212-401-6117 4/8/19-Assistant Property manager Max Moehlen 212-255-3613 5/9/19-Tomor Bellcishta 917-794-8205 5/9/19-Zhune inspected the site and met to Tomor Bellcishta. Based on field observations no current release, no smell in the basement, no sign of oil in the sump and no report of contamination observed by Con Ed. Spill Closed."
Remarks:	"Complainant indicated strong petroleum odors coming from tank excavation/Baker tank in front of this address - Indicates she is getting headaches and nausea"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	22942
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	I04 - Overfill - Product Level Gauge (A/G)
	A00 - Tank Internal Protection - None
	J02 - Dispenser - Suction Dispenser
	F00 - Pipe External Protection - None
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	D00 - Pipe Type - No Piping
	G01 - Tank Secondary Containment - Diking (Aboveground)
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	12/01/1990
Capacity Gallons:	7500
Tightness Test Method:	NN
Date Test:	Not reported

DEC Memo:	"5/27/14 - Austin - Found this spill in the Open-Unassigned files - Called in during Hurricane Sandy operation- Spill assigned to who was listed on duty for that day, for investigation - end 7/15/14-Langan Engeenering & Environmental Services emailed the Phase I dated August 2011 The new development consist of 130-foot tall 10-story mixed used as commercial/residencial building with one cellar level. 7/15/14-Langan Engeenering & Environmental Services emailed the Remedial Investigation Report dated March 2, 2012. Work performed under Remedial Action Plan 1. Conducted site inspection to identify AOCs and physical Obstructions (i.e.,structures, buildings, etc.); 2. Installed six soil borings across the entire project site, and collected 18 soil samples for chemical analysis from the soil borings to evaluate soil quality 3. Installed three groundwater monitoring wells throughout the site to estimate groundwater flow and collected three groundwater samples for chemical analysis to evaluate groundwater quality. 4. Installed three soil vapor probes throughout the site and collected three samples for chemical analysis. 10/2/14-Langan Engeenering & Environmental Services emailed the Remedial Action Report dated October 2014. The fallowing Remedail Action were completed. " Soil/fill was excavated to a depth of approximately 19-feet b.g.s. (Depth to groundwater ranges from 7.5 to 10 feet at the Site.) A total of 8,806 tons of soil/fill was excavated and removed from the property. " Dewatering was performed. " Achieved Track 2 Restricted Residential SCOs over 100% of the site. " On 25 July 2012 an approximately 275-gallon UST located approximately one-foot below sidewalk grade was removed from the eastern side of the property by Boro Waste Oil, Inc. (Boro) of Staten Island, New York. On 25 July 2012, four end-point samples (PE-2 through PE-5) were collected from the sidewalls of the UST excavation on the eastern side of the site from 3.5- to 4-feet b.g.s. and one end-point sample (PE-1) was collected from the base of the UST excavation from 4- to 4.5-feet b.g.s. No exceedances of the Track 1 SCOs were reported in any of the samples collected. " On 23 October 2012 a 550-gallon UST located approximately three-feet below sidewalk grade was removed from the northeastern corner of the property by Boro. Due to the presence of groundwater in the UST excavation a spill was reported to the NYSDEC and Spill No. 1210222 was assigned. End point samples were collected following the tank removal. On 3

EXCAVATION COMPANY (Continued) **S112230234**

	January 2013, four end-point samples (PE-7 through PE-10) were collected from the sidewalls of the UST excavation on the north-central portion of the site from 3.5- to 4-feet b.g.s. and one end-point sample (PE-6) was collected from the base of the UST excavation from 4- to 4.5-feet b.g.s. Exceedances of the Track 1 SCOs were detected for nickel in PE-6 (30.4 mg/kg) and PE 8 (41.5 mg/kg). No other exceedances were detected above Track 1 SCOs. " Soils were excavated to depths of 19 feet in tanks area also. " Removed two underground storage tanks and remediated petroleum contaminated soil/fill in compliance with applicable laws and regulations. " Collected and analyzed end-point samples."
Remarks:	"Tank removal with impacted soil. Cleanup is pending. Removal was prior to Storm."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"CSL sent to property owner: (copy faxed to Mr Ray Kahn 212-330-7505) Mr. Peter J. Filiberto 327 10th Ave Corp. 45-54 61st Street Woodside, NY 11377 tanks will be pulled. 6/7/08- DEC Piper psoke w. Ray Kahn, They have found 6 ust's filled w. water. They are pumping them out today and will begin removal. endpoints will be collected. 10/1/07- DECP iper reived call from Ray Espo. The excavation has been open for some time now and is not covered. There is gross soil contaminaiton that is being washed down. Investigaiton.work needed letter sent to Mr. Peter J. Filiberto327 10th Ave Corp. 10/9/07- DEC Piper revied subsurface investigation of adjacent property, open spill 0700172. A high rise is going to be built on four lots which includes 321-325 10th Ave. Soil borings revealed no VOC's in soil though BTEX constituents and MtBE were found in GW. Some constituents were under TAGM and some were over, particularily MTBE at 471 ppb at 321 10th ave most downgradient well. The suspect source of the dissolved contaminants are the adjacent gasoline station at 327 10th ave.(This spill site) ********** ********** ********** 10/22/07- DEC Piper spoke with David Lent of IVI Env. They are putting together a work plan. The site will be redeveloped with a high rise. Excavation of the entire site will be part of the project. IVI will conduct a subsurface investigation to delineate the soils and gw. 2/23/16- DEC piper sent info req to 327th 10th Avenue Manhattan LLC 40-54 61st Street Woodside, NY 11377 3/9/16 - Obligado - Desk Duty - I received a call from Mr. Anthony Nicoletti, who works on behalf of the Estate of Peter Filiberto, (516-665-2659, tonick46@yahoo.com) inquiring why he received a letter. He was under the impression that the spill issue has been cleaned up and resolved. I told him the spill was still open and the Case Manager is Ryan Piper who was currently out of the office but could be could be contacted directly with regard to DEC requirements. He requested prior violation notices. I emailed him a the prior two

FORMER GAS STATION (Continued) **S108636696**

CSL letters and a copy of the Spill Report and advised him he could submit a FOIL request if he requested additional information.
2/22/17- DEC piper emailed Anthony Nicolertti requesting site status.
1/21/22- DEC Piper reviewed and discussed site with DEC Austin. Based on age, lack of info, remedial efforts next door, this spill is administratively closed."

Remarks: "DURING A PHASE TWO, FOUND CONTAMIANTED SOIL"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"letter to be sent Last update by JBMCCULL on 12/20/05 - transferred back to R-2 3/5/08 - Austin - Assigned to Ketani for further investigation - end 4/21/08 - Raphael Ketani. The spill occurred on 5/11/89. The UST was filled with water and the top of the tank and the cement were seeping oil. The tank holds #6 oil. Richard Breslow, 559 W. 45 Street, NY (212) 265-4023 was on the original spill report as the spiller. There is no file for the case. I checked Property Shark, NYC Property Tax listings, and ACRIS and found the owners as: 27th Street Property, LLC, c/o Centaur Properties, LLC, 35 E. 21 Street, 3rd Floor, NY, 10010; and Gaiety Investments, Ltd., c/o Hartman & Craven, LLP, 488 Madison Avenue, NY, 10022. The PBS registration is for 536 W. 27 Street. The number is #2-476560. It shows a 5000 gal. tank that was closed, but used to contain #6 oil. I sent CSLs to both 27th Street Property and Gaiety Investments, Ltd. 4/23/08 - Raphael Ketani. Joe Graceson of Centaur Properties (212) 308-4443 called and left his phone number in a voice mail message. I made contact with Mr. Graceson. He said that Centaur is the sole owner. He said that the building uses gas only. The building was bought from Gaiety a little while ago. Centaur has had little cooperation from Gaiety in obtaining old records. He asked for any records that DEC has. I told him we have nothing. He asked what the next step would be if he can't find any information regarding the cleanup. I told him that Centaur will have to hire an environmental company to do an investigation and cleanup. I told him that DEC will need to receive the investigation plan, the site investigation report, the remediation plan, and the remediation report. He said he understood. With that, the conversation ended. 4/28/08 - Raphael Ketani. Steve O'Connell of Hartman & Craven (212) 836-4933 called. He said he represents Gaiety. He said that his company was involved when Gaiety first purchased the property and when they recently sold it. He said that Gaiety has no involvement with the site. 5/28/08 -

530 WEST 27TH ST/MANH (Continued) **S104275540**

Raphael Ketani. Mohammed Ahmed of Fleming Lei Shue called and said that he can't find any records or plans showing where the fuel tank used to be. He asked whether DEC had any records. I told him No. He said he will try to put together an investigation plan. He said that he thinks he has a general idea of where the tank used to be. I told him that it may boil down to just doing some geoprobing all over the basement. He said that may be what will happen. 5/29/08 - Raphael Ketani. Mr. Ahmed called. He said that he found a 1 page document from the NYFD stating that the tank was removed. I told him to send the document to me. I also told him that this doesn't preclude doing a soil investigation. He said he understood and that he will send a proposal for the work to be done. I received the Fire Department document by FAX from Mr. Ahmed. 6/3/08 - Raphael Ketani. Today I received the site investigation plan dated 5/29/08 via e-mail from Mr. Ahmed. I reviewed the plan, found it acceptable and e-mail Mr. Ahmed to go ahead with the work. 8/15/08 - Raphael Ketani. In preparation for case transfer, I am annotating the database as regards what needs to be done at the site to resolve the alleged or known environmental contamination. Followup is needed to see whether Fleming Lei Shue conducted the investigation and to get a copy of the report. Mr. Ahmed (212) 675-3225 called me. He said that the report is complete. He said he will send it, but only a little contamination was found on the concrete slab that used to support the tank. He said the groundwater has a little benzene, but this is not from the tank as it had #6 oil. He said the benzene levels are in the single digits to about 19 ppb. 09/02/08-HRAHMED-Returned Mohamed of Flemming Lee Sue call and left a message to call back. 09/03/08-HRAHMED-Mohamed sent me Limited Site Assessment Report with end point sample analyticles. As per the report, New York City Fire Department (FDNY) records have indicated that the UST has been removed from the Site . 09/24/08-HRAHMED-Met with Mohamed of Flemming Lee Sue. No visual sign of affected drain or pit, no odor noticed. The openning of the basement is small. The base floor is a concrete finished basement. It used to be a club. this case is closed. "

Remarks: "BURIED UNDERGROUND TANK FILLED WITH WATER BUT SURFACE SOIL AROUND TANKTOP & CEMENT IS SEEPING WITH OIL, OIL WAS SAMPLED."

DEC Memo:	"7/27/15 TJD Left messages on both work and cell phones for the notifier requesting callback with additional information. Received a call back from Kevin McGrath at Chazen with updated information. Email (pasted below) provides historical information and direction to assigned responder (Piper). I received a call back from the notifier, this is a redevelopment site with an old closed spill number (1306369 - Patel) and is also a NYCOER E-designation parcel. With the above stated it appears the reported condition is unrelated to either of these known conditions. The notifier describes an open excavation approximately 28 feet deep (4 feet into bedrock) that the bottom is level and graded pending construction. Today product, believed to be a weathered #2 fuel oil is migrating into the open excavation (from offsite parcel) from the seams on construction sheeting at an elevation of approximately 16 ft bgs. Product is accumulating at the bottom of the open excavation. The contractor has scheduled a vac truck for tomorrow morning to pump product (Atlas Disposal out of Dover NJ). Soil and product samples have been collected for product ID and 8260/8270 analysis. Your site contact is Eric Orlowski, his cell phone is 518.928.5823. Please perform a site inspection first

CONSTRUCTION SITE (Continued) **S118141456**

thing tomorrow morning to investigate and document findings. THIS IS NOT A RECALL - however, if you want to modify your work hours and start your day early - please let me know. They are scheduled to start pumping at 8AM, but I have requested that they await your arrival estimated at before 9AM so you can take a look before there is nothing to see. 7/28/15- DEC Piper responded to site to inspect and meet Env coordinator. A seep of oil has entered the SW corner of the property. It appears that it was from the adjacent building. That building is now on gas though historical sandborns show tank. Unclear weather tank was AST or UST and / or fill line was buried and leaking. Contractor to pump out oil in bottom of excavation. 7/30/15- DEC Piper received email from contactor. A vac truck cleaned the oil of f the water in the bottom of the excavation that day. Since then, no other oil has been observed. They will pour wall in a couple days with appropriate vapor. moisture barrier. Based on work to date and no reoccurrence, this spill is closed. 10/21/15-Vought-Received email from OER Chawla with cc to RSE that Jeff and Randy:Please let me know who is managing this spill. thanks. Included in OER Chawla's email string was email from Integral (Kevin McGrath) to OER Alfieri dated 10/19/15 that Hi Alysha, Progress at the Site is still slow as the new CM transitions into the site. The construction contractor (Veritas) responsible for the excavation and removal of soil and bedrock has completed all of the removal action down to the bedrock final grade elevation. The last week was spent cutting the rock on the SE corner of the site and loading it out. The soil access ramp has been removed and the floor of the excavation is now ready for the final mud-slab, vapor barrier, floor slab installation. We had an issue last week with fuel oil leaking through the eastern barrier wall between the site and the adjacent Scores nightclub property next door. At least three of the seams in the barrier wall that were sealed back in July reopened. I inspected the site on Friday and it is clear to me that the oil is on the water table beneath the building next door. The CM was instructed to berm off and contain the leaking groundwater mixed with fuel and pump it to an oil-water separator so the free-product can be drained off and disposed of properly. They will also be mobilizing a team to the site to seal the leaking joints (again). At the moment they have less than 5-10 gallons of old fuel-oil, floating on the water in a pool in the SW corner of the site which should be cleaned up in the next couple days. I will speak to NYSDEC later this morning about the situation. We still have an open spill number for this issue so we do not need to report a new spill. I would like to get some understanding of what NYSDEC is doing with the adjacent property owner to help mitigate this issue so it stops being a problem for us. I also have a query in to the manufacturer of the pre-pruff vapor barrier material to assess the potential impact, if any, to the effectiveness of the vapor barrier layer from long-term exposure to free phase petroleum. You are of course welcome to visit the Site anytime. Thanks. As subject of spill was from OER Chawla was 1306369 (closed spill also at this site that was assigned to DEC Patel), Vought replied to all that Shaminder, This spill was closed by Kumar Patel on 12/10/13. Due to the reports of new product infiltration as per the below email which was not known at the time of spill closure, the spill will likely be reopened by Kumar. I will follow up with him to ensure he responds to all. DEC Patel responded to all parties that Please note that the spill number 1306369 was reported based on field observations during installation of soil borings at the site and the case was closed

CONSTRUCTION SITE (Continued) **S118141456**

based on results of soil and groundwater samples which shows presence of metals and PAHs. Another spill case (#1504458) was reported on 07/27/2015 due to findings of petroleum product on groundwater. Ryan Piper was the case manager. Spill reopened by Vought after discussion with DEC Demeo and RSE. Vought corrected spill address and city spelling on UIS in case of future searches by address and project manager for spill to be determined by DEC Demeo. 2/1/16- DEC Piper- additional seep was less than 2 gal. Based on extent of petroleum and work completed to date on both properties, this spill is closed."

Remarks: "historical spill - clean up pending"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"09/23/13-Hiralkumar Patel. alternate address: 526-532 W 28th Street, 525-531 W 27th Street no PBS or other spills found. 10:50 AM:- spoke with Kevin. the site going to be redeveloped with at least 7 story mixed use building with full basement. Kevin mentioned that the existing structure will be demolished and the entire site will be excavated to a depth of 15 ft bg. during Phase I, they noted a 20,000 gal #4 oil tank which was abandoned in-place in late 1940s. during site inspection, they noted covered corner in basement and the tank might be in there. last week, during phase II investigation, they noted contaminated soil in area near the suspected tank location. Kevin mentioned that groundwater underneath the site fluctuates between 9 and 14 ft bg. bedrock found at 21 ft bt. NYC OER is also overseeing the investigation, under e designation. asked Kevin to submit previous environmental reports and property owner/developer's contact information. Kevin mentioned that Phase II report will be submitted by the end of 10/18/13. Kevin McGrath Chazen Companies Ph. (518) 266-7370 email: kmcgrath@chazencompanies.com 12:15 PM:- received email from Kevin including propert owner's contact information. WC 28 Realty LLC. c/o Centaur Properties LLC. 580 5th

UNOCCUPIED NIGHT CLUB / APT HOUSE (Continued) **S113916125**

Avenue, 32nd Floor New York, NY 10036 Attn.: Larry Greenberg Ph. (212) 308-4443 (O) (917) 656-9321 (C) Fax (212) 308-8630 email: larry@centaurproperties.com Kevin mentinoed that based on visual observations, there appears to be a very old petroleum spill along the west side of the property extending from 9-11 feet below grade at the north end to 9-14 feet below grade at the south end. the soils are stained grey, have a faint odor, and register 10-100 ppm on the PID (north to south). water table was at 11 feet below grade at beginning of the investigation and at about 9.5 feet below grade at the end (very heavy rains for two consecutive days). the Remedial Action, which has already been discussed with OER, will consist of the removal of all soils to at least 14 feet below grade to prepare the site for new construction. extensive dewatering of the excavation with pretreatment and disposal to the sewer will be required during construction and should mitigate any residual groundwater impacts. Kevin also submitted Phase I and work plan for Phase II. abstract of Phase I: - propety was constructed as two individual buildings in the late 1800s to 1916 - site was originally built and occupied by E.R. Merrill Spring Company, a manufacturer of automobile sptrings/parts and parts for Sherman Tanks - historical site uses included a truck terminal garage, warehouse and foundary, warehouse for storage and construction of theatrical props and scenery and was reportedly used as a studio for filming - from 1998 to 2002 the building was used by the current owner as a warehouse for a packaging supply company - between 2002 and 2003, the owner renovated the structure for use as two night clubs 12/10/13-Hiralkumar Patel. 10:31 AM:- spoke with Kevin regarding Phase II report. he mentioned that a draft report has been submitted to NYC OER for review and comment. once finalized, he will submit copy to DEC also. asked Kevin to submit sample results and site map for review. 12:46 PM:- received email from Kevin including figures, boring logs and data tables. Kevin mentioned that the site has several ft of urban fill material, which is impacted with several heavy metals and PAHs. no evidence of significant petroleum release was detected in the soil, groundwater, or soil-vapor data. redevelopment plans include the excavation and removal of all soil within the property boundary to bedrock and dewatering. reviewed boring logs. found maximum PID of 101 ppm in boring B-8. but no contamination noted in soil samples. well MW-5 installed in boring B-8. no contamination noted in groundwater sample from MW-5 either. based on submitted sample result, no further investigation needed. case closed. 07/25/17-Hiralkumar Patel. 11:39 AM:- DEC Piper forwarded email from Kevin including a report. during site redevelopment, three previously unknown 550 gal USTs were found at the site. one of the former UST was found in poor condition with evidence of petroleum impact to subsurface soil. all soil, and approx. 3-6 ft of bedrock, within property footprint has been removed as part of site redevelopment. 08/09/17-Hiralkumar Patel. 10:56 AM:- received email from Kevin inquiring about PBS registration number. 12:24 PM:- spoke with Kevin. informed him that the Department has received report dated 07/25/17. asked him to submit PBS application, with original signature, to PBS unit for processing. 12:50 PM:- sent email to Kevin and asked him to submit PBS application to PBS unit for processing. email copied to OER Shaminder. **e designation**"

Remarks: "e designation on property - boring location had layer of 100ppm - cleanup pending"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 001
Tank Id: 39820
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle
J05 - Dispenser - On Site Heating System (Supply/Return)
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
H05 - Tank Leak Detection - In-Tank System (ATG)
E00 - Piping Secondary Containment - None
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
L99 - Piping Leak Detection - Other

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1920
Capacity Gallons: 5000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Contact Name:	ALLBORO TANK
DEC Memo:	"3/4/2020 - Feng - Desk Duty. Spoke to Chris Quintana of All Boro Tank. They had a double delivery to a 5,000-gallon AST. About 25 gallons overfilled. 20 gallons came from the vent pipe to the street. 5 gallons from the tank manhole with missing gasket cover. The whistle is not working and the meter of the tank is not working. Their guys are cleaning up the street now. Received photos of the spill. Called off-hour runner Hermandeep Sekhon for a site inspection. Chris Quintana All Boro Tank 718-489-4244 Contact persons in the field: Ayendys Lopez 347-549-7875 Anthony Quintana 718-600-5277 3/5/20 - Sekhon Site visited on 3/4/20 (PM). Met Tomar Super (9177948205) and Lopez (all boro) on site. Affected wall, side walk scrubbed, degreased and pressure washed. Tank top scrubbed and tank room cleaned.Debris removed from tank room. No odors observed anywhere in building or at front entrance. 4/10-20 - Sekhon tomor.bellcishta@ll-holding.com max.moehlen@ll-holding.com All Boro complaining that RP not responding to their request. Case discussed with DEC Austin. RP asked to send passed tank system test report. 4/30 - Sekhon Rp asked multiple times to provide passed tank test report but not answering to the request. 5/27 - Sekhon email send to facility contacts to get updates. 7/16- Sekhon Email send to facility contacts to get updates. Also VM left . Rsponse back from Rp - Good afternoon, I am waiting to hear back from All Boro, apparently in there initial response they tested the tank. If that isn't acceptable I will get them to retest. I will follow up with them tomorrow with a phone call. I apologize for the delay. Max Maximilian Moehlen - Assistant Property Manager L&L HOLDING COMPANY, LLC 531 West 25th Street - Suite 113G- New York, NY 10001 V: (646) 779-2940- C: (917) 900-5237 Max.Moehlen@ll-holding.com 8/12/20 Sekhon RP response Good morning, We have requested All Boro tank to perform the test. I will let you know when they come to perform the work and hopefully we can close this matter out ASAP. I apologize for the delay. Thank you, Max 10/21/20 - Sekhon Tank pressure test passed report submitted. DECDOCs 10/28 - Sekhon On 10/27 (PM) - Site visited, met Mr.Max and Tomar on site. No odor observed anywhere, spill cleaned upto satisfaction. All

DEC Memo:	"10/2/18 - Sekhon 10/1/18 (4:56 pm) - feeder M-54 is leaking between E 13 Street substation and W 49th Street substation. Leaking at a rate of 15g/h with a total loss of 85 gallons. A PFT van will run the feeder. EMIS # 269599. Next conference is at 8 pm. 10/1/18 - updates from 10/1/18 conference call @ 8pm Leak rate is app. 19g/h with an estimated total loss of 160 gallons of dielectric fluid. The PFT van received indications at the substation locations with no significant hits. Van will continue to run the feeder on the overnight. Email received from EH&S - Desk On 10/2/18 at 0405hours,aclamp was installed on the 5 pipe of feeder M54 in MH61721, located at West 23rd street and 10 ave, in Manhattan. Site was visited by DEC Piper and DEC Sekhon. Leak was clamped and app 3800 gallons of oil+water mix pumped out from the concrete man hole. End point samples were taken and send to lab for analysis. 10/31/18 - Sekhon MH 61721 was double power washed with simple green by the environmental vender PSC industrial. 1,450 gallons of Non-Hazardous Oily Water Waste was disposed of by the vendor to Clean Earth of NJ under Non-Hazardous Waste Manifest 17057482. The permanent repairs are as follows: A clamp was installed over the leaking feeder. A permanent repair

COMMERCIAL (Continued) **S122877991**

barrel was welded over the clamp. All valves and flanges were checked and tightened- no further leaking equipment was found in the structure. The leak was contained 100% to the structure. emis DECDOCs. Spill discussed with DEC Piper and closed. "

Remarks: "Underground leak of dielectric fluid. Currently popping manhole covers in search of leak. Clean up will commence once identified."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis Notes: 7/30/01 1107hrs: Transmission Operations reportes while inspecting manhole M61721, discovered 2gal unknown oil on top of 1000gal water. There are 2 feeders, M54/55, in structure. Environmental yellow tag #2624 was placed. No sewer connection as per conduit plate #M-20-D-2. Sump is concrete. Samples pending ChemLab. Not cleaned up within 24hrs because of lack of manpower and ChemLab results. Chem lab reported 01-07788 <1.0 ppm PCB. Removed/recovered liquid/solids. Removed visible traces of oil. Washed stained areas. S & D Environmental completed cleanup on 7-31-01 at 22:00hrs."
Remarks:	"2 gallons of an unknown type of oil on 1000 gallons of water - not cleaned up"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

CON EDISON SERVICE BOX: 5455 (Continued) **1017773849**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name: RON ELLIOTT
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 149593 Mr. Toto # 39043 upon inspection of Mobile Generator G.E. # 3981 at 11:30 Hrs.noticed storage tank for Amide's was empty { Cap. 150 gals. } product went into sewer located on 29 Strret and 9 Th. Ave. Manhattan. Reported no injuries, no fire or smoke MSDS form CAS # 57-13-6 was faxed to ERT Fax # 1-212-580-6915 (12:15). Product is non hazardous. Cause leaking filter housing. When water evaporates end residue is fertilizer.Toto # 39043 is sweeping up remainder of crystals and placing crystals into plastic bags. Reported by Mr. John Poje # 56778===JP After several attempts to uptain a valid E2IMS number since 11:30 finally system accepted. Official time contacted 12:57 C.I.G. Mr. Murphy # 76378 Update on 31-Jul-2003 Mr. Steve Covello, emp. # 76287, reported clean up complete. Update - 31-Jul-2003; OCCS desk made attempts to enter into E2MIS under numbers 149591 and 149595, in both cases there was a system error and E2MIS closed out without saving reports. Final entry is in 149593. Actual first time J. Poje notified CIG was 11:40 AM, at which time he was instructed to call the ERT direct. this was due to the E2MIS not properly functioning and CIG requires an E2MIS number to read the report while they make their decisions. "
Remarks: "product is urea liquor - 70% is water non pretroeum based product less than 2% is ammonia "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no 159922 M Acevedo # 53317 reports that while inspecting tm3153, he discovered 4 gallons of transformer oil mixed with dirt on the concrete floor of the structure. No sewer or waterway affected. TM 3153 is on feeder 13m64. Spill is caused by a bushing leak , source is the transformer. There is oil filled equipment in the structure (the transformer). Environmental yellow tag # 38796 was applied. No substantial cracks observed. Due to the amount of dirt in the structure, a sump could not be verified. 2 dirt and oil samples were taken by M Acevedo # 53317, 1 from the spill and 1 from the unit, both for pcb. Cleanup is pending deenergization of equipment."
Remarks:	"BUSHING ON TRANSFORMER IS LEAKING: NO TO 4 QUESTIONS; CLEAN UP IS PENDING DEENERGIZING: CONED # 159922"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 8/16/2000 Sangesland went to the site. Building was closed, but the contractor was in his truck out front. Several 550's were pulled from the floor (interior) of what was a garage space in the building. There was long term contamination from the piping and fill lines. Contractor said quite a bit of soil was going to be removed. Sangesland repeated the requirement for endpoint samples. Contractor was given the Spill number and the address to send the tank closure report to. 9/13/2000 Long Island Analytical Laboratories Inc. (631-472-3400) submitted a 4 page report dated Sept 7, 2000 which says: ...LIAL was retained to conduct a limited subsurface investigation with respect to the removal of five-550 gallon fuel oil tanks that were recently registered and removed by Arlen Contracting.... ... following scope of work is submitted to your dept. for review and comment ... ...Aug 25,2000 LIAL conducted subsurface investigation to delineate the contamination. the area in question is contained in the western portion of the building .... 8 Geoprobe soil borings to the groundwater / soil interface (approx 10 feet) were done..... ... analytical date indicates that an area approx 45 ft long (running north to south) and 25 feet wide (east-west) is contaminated with virgin fuel oil. The contamination layer appears to be limited to a band approx. 4 feet thick starting at four feet below grade and continuing to the groundwater.... ...Since the tanks that have been removed were along a load bearing wall, excavation must be done in small segments in order to protect the building.... ...Upon competion of the removal of the contaminated soil endpoint samples will be collected and analyzed for 8021/8270. Letter is signed: Michael Veraldi Laboratory Director 9/13/2000 Sangesland called LIAL and said the digout to clean endpoints with a follow up confirmation report would be acceptible..... NYSDEC will require 2 wells in the event future treatment is necessary. 10/10/2000 LIAL sent in a report which shows 6 end point samples were taken at the site (2 bottom - 4 sidewall) all samples were non detect for EPA 8021/8270. 10/17/2000 Since 5 - 550 tanks were pulled and there was contamination of the soil, Sangesland requested a water sample be taken from the site. Mr. Veraldi (LIAL) said he would pull

SPILL NUMBER 0005886 (Continued) **S104788495**

a sample and run it for 8021/8270. 11/10/2000 LIAL installed a well in September and took a water sample. Sample taken Sept 27 - Analyzed Sept 27 Tested for 8021/8270: Results show the water sample was clean. All results <5ppm Spill Closed 11/10/2000"

Remarks: "CONTRACTOR WORKING ON AN ABADNONED WATER LINE THERE BROKE THE WATER LINE - HEAVY ODOR OF OIL NOW"
