DEC Memo: "TTF letter was sent to A B C Realty 152 W 57th Street 12th Floor New York, NY 10019 Attn: William Harra TTF in edocs. 03/09/11-Hiralkumar Patel. 3:00 PM:- visited site as inspecting property at 535 W 23rd street, a property two doors west from the subject site. met Fraser (917-921-8309), building super. site has building on slab and a photo gallery is located on groundfloor. Fraser mentioned that the tank is located somewhere underneath the gallery floor. he mentioned that after the tank system failed the test, tank was drained using supply line connection in boiler room. boiler room is sub-grade and west of the tank location. inspected boiler room wall adjoining the tank location and found no oil staining or seeping. fill port found sealed. Fraser mentioned that management is planning to remove tank and install new tank at the same location. currently, site is using temp. tank. 6/7/11 Spoke to Seth Freedland, attorney representing the tenant, which is an art gallery. Phone: (212)344-1400 ext.202. He requested that they delay the work for the spill closure until July 2011. I would consider it, but would require a plan to do the investigation. He will contact the condo association and e-mail me back. Case has been open since January 2011. bf 6/7/11 bf: received the folowing e-mail: Resending. Below bounced back& Sorry. Seth D. Friedland Friedland Laifer & Robbins, LLP 62 William Street, Third Floor New York, New York 10005 Tel. 212.344.1400 x. 202 Fax 212.344.8735 email: sfriedland@friedlandlaifer.com This message and any attachments are solely for the use of the intended recipient(s). From: Seth D. Friedland Sent: Tuesday, June 07, 2011 12:46 PM To: 'bkfalvey@gw.dec.state..ny.us' Cc: Seth D. Friedland Subject: 521 West 23rd Street, NYC -- DEC Spill No. 1010869 - PBS No. 2-304158 Brian: Thanks for taking the time to discuss the above matte this morning. As mentioned, I represent the Steven Kasher Gallery which is the ground level tenant at the condominium building which is the subject of the above PBS case. Our client operates a gallery at the location, and the tank is suspected of being buried under the gallery floor. To accommodate our client s business requirements and to avoid undue disruption of our client s operations, as discussed, I would like to coordinate the proposed tank closure work to be performed during the month of July on a date or dates to be selected. You indicated that you would be amenable to the work being done in July. I will coordinate with the building manager and its consultant in

COMMERICAL BUILDLING (Continued) **S110762281**

order to propose the schedule of work and let you know. Should you have any questions, of course, please let me know. Thanks again for your assistance. Regards, Seth D. Phone: (646)235-4800 and (212)809-1110. Contractor for gallery owner. Tank passed and lines failed ttt. I told him he needs to delineate contamination. He will send work plan. bf 8/14/12 PBS inspection today. Tank is still in use based on the petrometer which shows that there are approximately 1400 gallons of fuel in the tank. NOV issued and sent to William Harra at the above address. PBS settlement conference scheduled for 9/19/12. bf 9/19/12 Nopbody appeared for the PBS conference scheduled for today. bf 9/25/12 Today, received e-mail response from Riteway, contractor for the facility: Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. From: David Chan [mailto:david@petroleumtek.com] Sent: Tuesday, September 27, 2011 3:34 PM To: 'Brian Falvey' Subject: spill 1010869 Hi Brian, Please find the closure report and supporting documentation for spill # 1010869. If you have any questions please do not hesitate to ask. Best regards, Dave Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718-855-7272 phone 718-855-7244 fax david@petroleumtek.com ----------end---------- 10/1/12 On 9/25/12 received the following e-mail from David Chan of rite-way that also included attachments: site sketch, analytical sample results, closure requerst letter, and ttt tank only test report. ----------start---------- Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. ----------end---------- On 9/28/12, received the following e-mail from David Chan which included the same attachments as the 9/25/12 e-mail: ----------start---------- Hi Brian.... ----------end---------- Tank failed because of hole in vent line. Submitted photos show the vent line with a corrosion hole and no visual contamination. Four samples were taken and were below DER- 10 allowances. A tank system test is required to close the spill

COMMERICAL BUILDLING (Continued) **S110762281**

case. today, responded to Mr. Chan's e-mail with the following: ----------start---------- David, The spill case can not be closed until the Department receives a passing tightness test for the whole system. The owner needs to correct the following registration information: 1. The product stored is #4 oil not #2 oil. 2.The tank overfill prevention is registered as a gauge. A gauge used for overfill prevention is only applicable to aboveground tanks. 3. The tank spill prevention is a catch basin. It is registered as none. 4. Pipe secondary containment is blank. The information correction application is attached. There is no fee for this application transaction and an original copy must be submitted (fax or e-mail copies will be returned unprocessed). Brian ----------end---------- bf 11/13/12 received the following e-mail from David Chan: Dear Brian, Please find the final tank and system test verifying the integrity of the system for the spill closure. I am following up with the owner with regards to their PBS. Please let me know if you need anything else for the closure. Thank you in advance. Best regards, David Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718-855-7272 phone 718-855-7244 fax david@petroleumtek.com 11/27/12 Based on sampling results, case closed. bf"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Region:	2
DER Facility ID:	189550
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 4/22/03 SAMUEL- RCVD TANK CLOSURE & SITE ASSESSMENT REPORT. CONTACT PERSON:- HUGH J FREUND 212 705 7000- ATTORNEY FOR THE MARY BOONE GALLERY (R.P) 2/9/06- DEC Piper spoke w/ LEE WESTCHOTT at Whitman CO. As per conversation there was free floating product discovered at the property. There is a monitoring well network. It has been recently sampled and Lee will forward a summary status report to the dept. including analytical summaries within the next month. Case referred to Koon Tang. 06/08/06: This spill transferred to S.Kraszewski. - SK 08/14/06: Received a voicemail from Ira Whitman, concerning the status of the site. He gave no callback number. SK reviewed the Tank Closure Report from Fall 2001. It is evident that high levels of VOCs were detected around the fuel oil UST. Lower exceedances were also found around the gasoline USTs and the Oil/Water separator. No mention if GW was encountered; the site lies next tothe Hudson River so GW is probably shallow. No MWs were installed during the investigation. Must know the GW condition above all else at this point. - SK 08/15/06: Called Ira Whitman (732-553-4333) after he left a voicemail. He is no longer the consultant involved with this site, in fact he believes that no firm is involved at all. He was involved on a site project adjacent from this one: Dynamic Delivery was the contractor involved with the clean-up. He said this site already received an NFA. I said, based on the report, the GW condition must be established. He said it might be worth-while to review the reports from the neighboring site, which is also downgradient from this one (closer to the Hudson.) He said to contact a John Houshmand, of Clark Construction, who discovered the tanks during renovation work on the property. - SK 08/18/06: Left a

MARY BOONE GALLERY (Continued) **S104782023**

message for John Houshmand (917-553-4333). - SK 08/22/06: John Houshmand called back. He gave me the contact info for Mary Boone, owner of the gallery. Gallery: 212-753-2929, Cell: 917-861-2929. She is not the property owner of the site, she only rents the space. According to John, contractor for the building and several others nearby, after the abatement of the gasoline tanks, fuel oil tank and sump pit the entire area was covered in concrete and established as the Mary Boone Gallery. He also mentioned the adjacent site which supposedly has GW wells and may be useful in characterizing the GW condition for this site. I told John I would look into this other site and get back to him, since he regularly deals with the owner. - SK 08/29/06: I discussed the site situation with JK. The site needs a GW investigation, unfortunately their is no access to the interior so the MWs need to be placed on the sidewalk next to the former gasoline USTs and oil/water separator pit. Also, a soil boring next to the gasoline fill port will be needed. I called John Houshmand (917-553-4333) and explained what work would need to be done. I also asked him for the property owner's contact info since it is not on file. He will find out, plus he asked about other consultants to do the work since The Whitman company had a falling out with Mary Boone. I said to convince her that he seems like a reputable company based on the report. Letter was sent out asking for two MWs, a soil boring and sub-slab soilgas sampling. Property owner is a Samuel Weinberg. - SK 11/09/06: Reassigned from Stephen Kraszewski to Chanda. (Chanda) 01/02/07:Kartik Chnada of DEC sent a letter to Property Owner(Mr.Samuel Weinberg), requring that an additional investigation of GW and additional monitoring wells at the site. A work plan is mandated by 03/02/07 for approval. 01/10/07: Chanda received an e-mail from John Houshmand, Clark Construction Corp.He said that the RP will be retained Long Island Analytical Laboratories(LIAL), Inc. to perform this work. 2/27/07: Chanda received a limited subsurfsce investigstion work plan prepared by LIAL dated on 2/26/07. 2/28/07: Chnada reviewed the limited subsurface investigation work plan. on 2/28/07, the Department conditionaly approves this work plan. On 2/28/07, Chanda sent a letter to RP(Samuel Weingberg)and his consultant (John Hushmand), Michael Veraldi (LIAL), requiring that an investigation summary report be submitted to DEC for review by April 16, 2007. 4/19/07: Chnada received a phone call from Michael Veraldi, LIAL concerning the status of the site. He explained to me the cause of the delay on the investigation work report. 4/23/07: Chanda received a letter from Michael veraldi, LIAL regarding an extension to complete the approved work plan at the site. 4/24/07: Chanda sent a time extension approval letter to the RP(Samuel Weingberg) and his consultant (John Hushmand), Michael Veraldi (LIAL). An Investigation Summary Report must be submitted to the Department by May 4, 2007. (Chanda) 5/24/07: Chanda called John Hushmand (Clark Construction Corp.)and Micheael Veraldi (LIAL) regarding the investigation Summary Report and present site status. Micheal told me all work has been done and he is wating for analytical results. The report will be submited to DEC for review by 5/31/07. 6/6/07: On 6/5/07, Chanda received a Limited sub-surface site investigation report prepared by LIAL dated May 30, 2007. 6/8/07:Kartik Chanda of DEC reviewed the imited sub-surface site investigation report regarding this spill. The soil samples, grondwater samples and soil vapor samples showed that results is not exceed our NYSDEC and NYSDOH guideline. Chanda discussed with Joe Sun (NYSDEC) regarding the results of soil, groundwater, and soil vapor samples. Based on the information

MARY BOONE GALLERY (Continued) **S104782023**

presented to the Department DEC closed this spill case. 6/11/07: Chanda sent a NFA letter to Samual Weinberg, Weinberg Properties and his consultants (John Houshmand, and Miclael Vrraldi) regarding closed this spill case. "

Remarks: "while removing tanks contaminated soil found -"

Tank Info:

Tank Number:	001
Tank Id:	19284
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	05/01/1973
Capacity Gallons:	7500

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Later called 543-545 West 25th St. 5/22/02 - Sangesland spoke with Mark Robbins of Hydro Tech (631-462-5866) cell # 516-996-5559 Property owner Jack Fuchs - Whitehall Business Archives, Inc. 40 Worth Street, NY, NY 10013 Hydro Tech was pulling a buried 3,000 gal #2 oil tank from a parking lot. 15 ft to nearest neighbor, south end of tank is at the sidewalk line. They discovered 10 large holes in the tank. The pit has product in it. Hydro will vac out the hole and will excavate out contaminated soil to clean endpoints. If all contamination can not be excavated a remediation plan will be prepared and submitted. 7/2/2002 - Mark Robbins of Hydro Tech submitted a report which outlines the removal of a UST and the over excavation of the tank pit area. Sidewall endpoint samples were all below TAGM levels for VOC and SVOC's except for a handful of slight exceedences. No bottom soil samples were taken because of the presence of ground water. Hydro Tech recommends the installation of a monitoring well in the north side of the excavation area. The well should be monitored for the presence of separate-phase and dissolved phase product. DEC instructs Hydro Tech to install a monitoring well on the site, develop the well and sample for VOC's and SVOC's. The DEC will require 2 rounds of Clean samples taken at least 3 months apart in order to close out. 10/29/2002 - Sangesland reviewed submittal from Hydro Tech Environmental. Water sample taken from monitoring well on site showed no product and sample was clean for everything except a minor hit 1.1 ug/l of Benzene. SVOC all below detect. 4/11/2003 - Sangesland reviewed a submittal from Hydro Tech dated Feb 28, 2003. This report shows the second round of GW sampling. All results were ND, therefore the spill can be closed out. Spill Closed."
Remarks:	"case when assigned call the notifier 516 996 5559 "

DEC Memo:	"SEE ALSO 86-05564, 95-11782, 98-08740, 95-13588. 4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel. 4/19/04 Reassigned from Rommel to K Foley. 5/24/04 Tibbe received voicemail from Curt Schmidt, Fleming Lee Shue (212-675-3225). Replacing AKRF. 5/27/04 Added diesel and #2FO to material spilled to address spills #9808740 and 9511782. Spoke to C. Schmidt. Will set up a site meeting next week. 555 W 23th St(spill #0306399), the Tate building, is adjacent to Mendon property which has a system installed on the first floor (no basement). 6/3/04 Set up meeting with A. Fleming for Monday, 6/7. A. Fleming (office 212-675-3225, cell 917-885-1475). 6/7/04 Met with A. Fleming. System located inside Tate has not been in operation. Arnie needs to look into system manufacturer data to see if they can make changes to the system. Wells haven't been sampled since AKRF lost the job. Will arrange to have wells sampled. 7/15/04 Received call from C. Schmidt, FLS. Wells will be sampled 7/19-7/20. FLS still looking into making changes to existing system. 9/21/04 Spoke with Mohammed Ahmed, Fleming Lee Shue (917-612-6018). He was previously with AKRF. Would like to present all data and propose NFA. He will need to FOIL the file to get AKRF data. 10/13/04 Received summary from FLS proposing closure of site. Background: Site is currently a luxury apartment building with art galleries on the ground floor. The site was historically used for freight transportation and warehouse facilities. The Hudson River is approx 0.25mi to the west. Site was mainly used as a truck rental, fueling and maintenance yard. Hertz formerly occupied the site and built a two-story garage in 1963. Hertz installed six 550gal gas USTs

MENDON LEASING (Continued) **S104275477**

in the adjacent parking area located along 24th Street. Hertz also installed a gas distribution system with 4 dispensers. In 1965, Hertz installed four additional 550gal diesel USTs and a separate dispenser. One 7500gal heating oil tank was installed in the SW portion of the building. CMCR, LTD acquired the site from Hertz and also used the site as a truck rental/leasing facility. In 1985, the site was leased to Mendon Leasing Corp. Mendon reported four spills, 9511782(diesel), 9513588(gas), 9605688(gas), 9808740(#2FO). Costco Wholesale purchased the site in 1998 in anticipation of zoning that would allow a retail development at the site and closed the fuel and gas tanks in place. In July 2000, the Related Companies purchased the property and built the current apartment building that covers the site. Tank testing: In July 1990, Mendon was issued an NOV from the FDNY for failing to do the 10yr tightness testing on the six gas tanks. In March 1991, Mendon has all the gas and diesel tanks tested. The gas tanks passed but the diesel tank failed. The diesel tank was repaired and passed retest. In 1993, the heating oil tank was tested and passed. In 1995, the diesel tanks were tested again and failed. The contents were emptied in 5/96 and filled with polyurethane foam. In Feb 1997, the gas tanks were also emptied and filled with water. Previous Investigations: Several invetigations were conducted between 1993 and 2001. ES Engineering did work on behalf of Greyhound Lines. ERM Northeast did work for DEC. AKRF did work for Costco and Related. Soil and GW has been impcated by on-site releases of petroleum and possibly also off-site sources. Areas within the parking lot on the north side of the former two-story garage building and inside the building, in the vicinity of the heating oil tank, contained free product in soils and GW. Free product in the former parking lot ranged from 0.08 to 1.63'. Free product found inside the former garage building was as thick as 4'. Dissolved-phase VOCs were also detected in GW as high as 5408ppb. No SVOCs were detected. Soil/GW interface is located at approx 8'bgs, flowing west toward Hudson. GW is not tidal. Bedrock approx 63'bgs, sloping S-SW. Remedial Actions: In Dec 1999, four 550gal diesel USTs and six 550gal gas USTs were removed from beneath the open parking lot. The heating oil tank was removed in Oct 2000. Approx 1000 tons of grossly contaminated soils were excavated and disposed of. The free product appeared on the groundwater surface and removed with absorbant pads. The excavations were left open to monitor for free product. No additional free product was observed and excavations were backfilled. No post-ex sampling was completed. The Department issued a letter on 2/12/01 with comments. A remedial workplan consisting of an in-situ remediation for soil and GW using SVE and bioremediation was presented and approved by the Dept. In March-April 2001, six geoprobes were completed. NMW-1 showed total BTEX in GW at 275400ppb, NWM-2 at 156200ppb, and NMW-4 at 1330ppb. Insufficient GW was recovered from NMW-3 and NMW-5. NMW-6 was non-detect. In October 2000, an SVE pilot was performed. An underslab SVE system was designed and installed to remove residual VOCs and to add atmospheric oxygen to allow bioremediation to occur. Air extracted from below the slab was carbon treated before venting to the roof. A vapor barrier was installed beneath the slab. Operation of the system began August 2002 and operated thru August 2003 for 1615hrs. VOCs, carbon dioxide, oxygen and moisture levels were monitored before the input and at the output of the carbon canisters. System inspection and monitoring were conducted daily for the first two weeks and then weekly inspections were made. At startup, VOCs were measured at 20-50ppm. Concentrations

MENDON LEASING (Continued) **S104275477**

dropped from the initiation in August 2002 thru November 2002 when the system was stopped for seven weeks due to equipment problems. Upon restarting the system in Jan 2003, a rebound was measured with VOCs rising to 60ppm. The system was operated for two weeks with a second 4 week idle period(1/7/03-2/25/03). After this rest period, the rebound did not occur. The system operated for a period of four weeks with a continual decrease of VOC concentration. Equipment failure again shut the system down for five weeks(3/27/03-5/1/03). A slight rebound to several ppm occured when the system restarted. The system continued to operate thru June 2003 with day-long shutdown for maintenance with no rebounds observed. Levels of VOCs in the extracted air in June 2003 were zero. Between July 2003 and July 2004, the SVE system was out of service due to major damage in the main section of the blower. In August 2004, the SVE blower and motor were downsized to a 10HP regenerative blower capable of 200 scfm at 80 inches of water. VOCs were measured two days after startup which detected levels of VOCs in extracted air between 2 and 5ppm, indicating that no significant VOCs are being extracted from beneath the building. A total of 10 MWs exist on site. Four(MW-3, ERM-4, MW-14, MW-15) are currently located on the sidewalk. The other six(NMW-1 to NMW-6) are inside the Tate building. Max total BTEX detected in MW-14 at 1990ppb(7/16/02). Max MTBE detected in NMW-2 at 410ppb(8/8/03). By the concentrations of MTBE detected in upgradient wells, MW-14 and MW-15, there may be an off-site source. (There are two gas stations upgradient at 24th St and 10th Ave.) Concentrations of BTEX have been decreasing in source areas. It appears that removal of grossly contaminated soils and free product at the time of the UST removal in 2001 eliminated the primary source of GW contamination. Groundwater samples to be collected 10/16/04. 11/1/04 Spoke to Mohammed Ahmed, FLS (212-675-3225). Approx 3 of free product(gasoline) was detected in MW-14 (sidegradient of tank field) on 8/17/04. One week later, there was no product detected. Sampled again on 10/14/04, no product detected. He suspects that it is from an off-site source. There is a LukOil Station at 239 10th Avenue (open spills #9810383, 9707190). Oct 2004 monitoring report to be submitted this week. 11/16/04 Received status update (FLS, 11/11/04). GW sampling conducted 10/12-10/13/04. No samples were collected from MW-15 located on the sidewalk of 24th St and NMW-1 located inside the Buia Gallery on 23rd St. MW-15 was backfilled during construction of the Tate Bldg. NMW-1 was inaccessible due to an exhibit. BTEX ranged from ND to 1086ppb(MW-14). MTBE ranged from ND to 130ppb(NMW-2). Off-site sources of contamination may be contributing to site conditions. However, it is not clear that it is not from onsite sources. 12/7/04 Issued letter requiring additional delineation around MW-14 and at former upgradient well location MW-15. Report to be submitted by 3/15/05. 12/20/04 Spoke to M. Ahmed, FLS. Will propose re-installation of upgradient MW-15, one well further upgradient (to confirm possible off-site impacts), and one west of MW-14(sidegradient). 12/29/04 Received proposal from FLS to install three additional MWs. 12/30/04 Issued letter approving workplan. 2/18/05 Received report for the installation of MW-14, 15A and 17. According to the report, there appears to be an off-site source on the northwest portion of property along W24th St. Concentrations of BTEX increased from 1086ppb to 2067ppb in MW-14. Report also states that the LukOil station may be contributing to the MTBE concentrations across the site. 3/15/05 Spoke to Mohammed Ahmed, FLS. Requested two Geoprobes across W 24th St to eliminate the Motor

MENDON LEASING (Continued) **S104275477**

Freight Station and Auto Repair Shop as potential sources. 8/15/05 Spoke to M. Ahmed. A. Fleming spoke to NYSDOH at K. Tang's recommendation. NYSDOH requested subslab and indoor air samples. Results expected next week. FLS proposes to use this data to support closure. Explained that there is still dissolved which remains on the corner of the property. Agreed to wait for results to decide next steps. 11/29/05 Email to A. Fleming and M. Ahmed, FLS, provided comments on the October 17th request for spill closure. Regarding the indoor air and soil gas sampling which was performed, it is unclear if the concentrations detected within the building are due to any background interferences within the building. Directed FLS to conduct a full inventory as directed by the NYSDOH guidance for evaluating soil vapor intrusion. An additional round of indoor air samples must be taken at least 24hrs following the removal of any possible VOC sources. Results will be forwarded to NYSDOH. The Departments will determine further action for vapor mitigation, if required, following review. The groundwater data collected to date has been sporadic with five sampling rounds completed within the last three years. Quarterly groundwater sampling and monthly gauging must be completed and results submitted to the Department. Groundwater direction must be confirmed. The groundwater concentrations at MW-14 were as high as 4340ppb total VOCs in the last sampling round in January and have historically been fluctuating. MW-17, which was recently installed west of MW-14, also had readings of 2777ppb total VOCs. The Department requires additional wells be installed across W 24th street, north of MW-14 and MW-17, and west of MW-17. A proposal to remediate the contamination in this area will be required. It is expected that the additional delineation, groundwater and indoor air sampling results, with scaled site and contour maps, will be submitted by the beginning of February. 4/20/06 Requested update from M. Ahmed of FLS. 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 7/06/06 Requested update from A. Flemming of FLS. Mr. Flemming and I spoke about the history of the site. He still believes the impacts to groundwater at wells MW-14 and MW-17 are from off-site contamination (possibly Lukoil site on 10th Ave and 24th Street). These wells are supposedly up-gradient side of the site. I requested Arnie send me the latest data on the site including groundwater sampling and indoor air sampling data. - JAM 7/25/06 Spoke with A. Flemming a number of times. I do not believe a second round of indoor air sampling was conducted, however a vapor barrier is in place. They conducted site-wide groundwater sampling in May 06. Mr. Flemming believes the latest GW results show that off-site sources are contributing to the GW contamination along W24th Street. He will submit a report of the wells that were sampled (not all were sampled because they were inaccessable). I requested that he state his justification for spill closure in the groundwater sampling report. 10/16/06 Received a call from Steve Panter of Fleming Lee Shue (212) 675-3225. He said the report is ready and will be submitted this week. - JAM 11/14/06 Received the report dated October 20, 2006 via email. The report summarizes all the groundwater analytical data since April 2003. FLS makes the argument that off-site sources are contaminating the sidewalk wells. A summary of all the off-site sources is included as well as a two part technical explanation for the difference between groundwater contamination in the sidewalk MWs and on-site MWs. The first part is a multivariate analysis, and the second is a comparison between Benzene and MTBE. The report is uploaded into edocs. - JAM 11/22/06 Received SVE System

MENDON LEASING (Continued) **S104275477**

Data and Indoor Air Quality Data Summary Report from FLS. Report uploaded to eDocs. 01/22/07 Issued a letter to Greg Gushee The Related Companies, Inc. 60 Columbus Circle New York, NY 10022 with the NYSDEC's position on the FLS report. Chris Magee in Central Office reviewed the report and based on the material presented he does not concur with FLS' conclusion that off-site sources are contributing to the contamination found in the sidewalk wells. The letter states that The Related Companies, Inc. is responsible to monitor and remediate the site. Groundwater must be gauged and sampled quarterly and based on the results the NYSDEC will determine if a remedial strategy is necessary. The letter is uploaded into edocs. - JAM 8/21/07 Reviewed FLS letter submitted to the DEC on April 13, 2007 in response to DEC comments sent on 1/22/07. FLS believes that contamination found in off-site wells on West 24th Street stems from a different source. I sent the letter to Chris Magee in Central Office for review. - JAM 9/06/07 Sent email to Steve Panter at FLS. The email states that, the data are inconclusive and do not prove that an off-site source is affecting the groundwater in the monitoring wells in the sidewalk... The Department cannot approve spill closure at this time. A round of groundwater samples should be collected from all wells to obtain up-to-date groundwater quality data. Results should be submitted with appropriate recommendations for further monitoring and/or remedial activities if necessary. - JAM 1/18/08 Received an email from Jim Harrington in Central Office. Steve Panter from FLS contacted Mr. Harrington stating that they will do another round of sampling but he wants assurance that after the next round of GW sampling the spill case will be closed. Mr. Harrington said he will review the spill case and material forwarded by Mr. Panter. Afterwards, he will contact Region 2 staff for further discussion before responding to Mr. Panter. - JAM 9/22/08 Reviewed the Groundwater Sampling Report/Spill Closure Request submitted by Flemming Lee Shue dated May 12, 2008. All on- and off-site monitoring wells were sampled in February 2008. Groundwater monitoring results show no signicant change in contaminant levels in any of the on-site or off-site wells. The sidewalk wells continue to show exceedences for VOCs in groundwater (i.e. 748ug/L total VOCs in well MW-14 and 829ug/L total VOCs in MW-16) however, the exposure risk from these contaminants is low. The groundwater monitoring report is uploaded to eDocs. Senior technical staff in Central Office supports closure of this spill without meeting recommended objectives because of the low risk of exposure. This spill case was closed and a NFA letter was issued. NFA uploaded to eDocs. - JAM"

Remarks: "CALLER FOUND .7 FEET OF GASOLINE IN A TWO INCH GROUNDWATER MONITORING WELL. LOCATION IS A TRUCK LEASING COMPANY. MARK TIBBE NOTIFIED OF RESULTS. ADDITIONAL MONITORING WELLS TO BE INSTALLED AND SIX TANKS ARE TO BE PULLED."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Sangesland spoke with Carol Owings of Key Environmental. She said the site is an industrial building that had several buried tanks removed. There is contaminated soil on the site that can not be removed, so the area will be treated in place. Key Enviornmental will work on a plan to submit to the DEC for review. Sangesland wrote a CSL letter and listed Ryan Piper as the contact for the site. CSL sent to one of the owners: William Cirillo, 33 Tiers St, Apt F, Bronx, NY 10464 5-31-07- EWMA- new contractor. will contact me. 2/6/08- DEC Piper reivewed RAWP addendum and approves. 05/20/08-Hiralkumar Patel. another spill reported (Spill #: 0801913) as found more tanks from site. during excavation, found three approx. 1000 gal size tanks, in middle of property. one tank was found empty and has been removed from ground. multiple holes noted on that tank. another two tanks sitting next to each other and has product in it. contractor will remove tank properly and will take endpoint samples. 09/10/08-Hiralkumar Patel. another spill reported (spill #: 0806482) as found oil coming out from ground in excavated area. 11/14/11- DEC Piper psoke with consultant. Report has been generated and will be sent shortly. 12/20/11- DEC Piper reviewed UST closure report. 5

COMMERICAL PROPERTY (Continued) **S108467893**

permanent mw's installed . The wells were set to a depth of 25 feet b.s.g. and constructed with 10 feet of screen and 15 feet of riser. however groundwater is at 7.5- 8 feet bgs. On February 13, 2008 a representative of EWMA sampled MW-1 through MW-5 and MW-27 for VO+10, BN+15 and lead. Sample MW-1 was obtained from MW-1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 471 ppb and in excess of the TOGS 1 ppb standard; and concentrations of toluene at 76.4 and in excess of the TOGS 5 ppb standard; and concentrations of ethylbenzene at 333 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 357 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 99 ppb and in excess of the TOGS 10 ppb standard; Sample MW-27 was obtained from MW-27 (located along 27th Street) and revealed concentrations of benzene at 13 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 11 ppb and in excess of the TOGS 5 ppb standard; Sample MW-2 was obtained from MW-2 (located along 27th Street) and revealed concentrations of benzene at 196 ppb and in excess of the TOGS 1 ppb standard; and concentrations of toluene at 27.7 and in excess of the TOGS 5 ppb standard; and concentrations of ethylbenzene at 243 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 578 ppb and in excess of the TOGS 5 ppb standard. The soil excavated that exhibited fill material type characteristics was transported by truck and delivered to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. The excavated soils, including the soil that exhibited evidence of petroleum impacts from the former USTs were also transported to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. Approximately 3,556 cubic yards of soil was excavated from the Property. In September 2008, and following the initial four foot soil removal additional soil was removed from the site. The additional soil was removed because the original design of the building was changed to include a basement which required the additional removal of soil. Specifically, from September 29th 2008 through February 30th. 2009, representatives of Impact and EWMA coordinated the direct soil load out an additional 22 feet of soil from the Property. This phase of the excavation was coordinated during the installation of steel sheeting, tie backs and foundation piles following the initial excavation of soil to four (4) feet b.s.g. The soil excavated that exhibited fill material type characteristics was transported by truck and delivered to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. The excavated soils, including the soil that exhibited evidence of petroleum impacts from the former USTs were also transported to Total Recycling Corporation (TRC) of Allentown, Pennsylvania. Approximately 19,556 cubic yards of soil was excavated from the Property. On May 20, 2008, during the Property redevelopment and the initial upper layer soil removal, three (3) additional unknown underground storage tanks (USTs) were encountered within the footprint and beneath the concrete floor of the former building. One (1) 1,000-gallon fuel oil and two (2) 550-gallon fuel oil USTs were observed during soil removal. The USTs were located in the footprint of the former building. Prior to the UST removal, Mr. Hiralkumar Patelof the (NYSDEC) visited the site, inspected the USTs, and approved the removal of the USTs.Mr. Patel requested that the USTs be properly removed, which included the pumping of liquids,cutting, cleaning and disposing of their contents. Soil samples were also requested by Mr. Patelin accordance with NYSDEC UST regulations and local and state guidelines. W.R.Grace

Preprufe 300R/160R membrane was installed as a barrier between sub-grade soils and exterior surfaces of basement slab areas, and between vertical soil retention systems and exterior surfaces of sub-surface wall areas. These membranes are manufactured in accordance with ASTM Standards, demonstrate an ASTM E154 permeance of 0.010 Perms, and are comprised of multilayered composite high density polyethylene (HDPE) sheets. The 300R membrane has a thickness of 40 mils and the 160R membrane has a thickness of 32 mils. Ambient air venting systems are installed beneath the basement slab areas and the slab on grade areas. The basement sub-slab venting system consists of a 12-inch thick bed of -inch crushed stone beneath the slab, an embedded air inlet header with ambient air inlets at one end of the building, and an embedded vent header with venting outlets at the other end of the building. The slab-on-grade sub-slab venting system consists of a 6-inch thick bed of -inch crushed stone beneath the slab with a 6-mil polyethylene vapor barrier and a layer of geotextile fabric between the slab and the stone, an embedded air inlet header with ambient air inlets at one end of the building, and an embedded vent header with venting outlets at the other end of the building. the venting systems will be active, with radon fans and back draft dampers installed in the vent outlet piping at one end of the building at locations that can be inspected, monitored and maintained. The ambient air inlets will receive air from about two feet above ground surface at one end of the building, and the venting outlets will vent air from about twenty feet above ground surface at the other end of the building. The inlet and outlet locations can be inspected and monitored as needed. Together, the barriers and venting systems will provide two layers of vapor intrusion control and will provide a conservative and maintainable vapor intrusion control system that will be an integral component of the planned building. During the week of September 3, 2010, Zebra Environmental Corp. of Lynbrook, New York installed five (5) permanent 2-inch monitoring wells at the property under the direct supervision of a EWMA representative. The intent was to re-install the replacement wells in or near the previous locations. Ground water was generally encountered between 10.0 and 12.0 feet b.s.g. Soil cuttings during installation activities were screened using a PID and split spoon samples were collected every five feet. EWMA did not note visual signs of contamination during the installation of the wells and no elevated PID readings were recorded. The monitoring wells were constructed using two-inch diameter, 0.020-inch machine slot Schedule 40 PVC well screen intersecting ground water at the time of the well installation. Solid two inch diameter Schedule 40 PVC completed the upper portion of the well. The connection between the riser and well screen was flush-joint threading with no adhesive required. The wells were filter packed with clean, No. 2 sand from the bottom of the borehole to approximately two feet above the top of the screen. The remaining annular space around the upper portion of each well was grouted using Benseal and cement. The monitoring wells were completed as flush mount wells with concrete pads. On September 20, 2010 a representative of EWMA sampled MW-1R, MW-27R, MW-2R, MW- 3R, and MW-5R for VO+10, BN+15 and lead. The results of the ground water sampling event revealed volatile organic compounds above the NYSDEC NYSDEC TOGS 1.1.1 Groundwater Standards/Criteria in the groundwater samples of four (4) monitoring wells, MW-1R, MW-27R. MW-2R, and MW-3R. EWMA notes that the results of the sampling event did not detect any exceedences in monitoring well MW-5R, which is located

COMMERICAL PROPERTY (Continued) **S108467893**

along West 28th Street. Laboratory analysis revealed the following: " Sample MW-1R was obtained from MW-R1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 9.88 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 83.9 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 352 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 16.1 ppb and in excess of the TOGS 10 ppb standard; " Sample MW-27R was obtained from MW-27R (located along 27th Street) and revealed concentrations of benzene at 5.11 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 54.3 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 227 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-2R was obtained from MW-2R (located along 27th Street) and revealed concentrations of benzene at 3.29 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 39.9 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 173 ppb and in excess of the TOGS 5 ppb standard; and concentrations of naphthalene at 11.8 ppb and in excess of the TOGS 10 ppb standard; " Sample MW-3R was obtained from MW-3R (located along 28th Street) and revealed concentrations of benzene at 13.4 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 10.1 ppb and in excess of the TOGS 5 ppb standard; " EWMA notes that the results of the September 20, 2010 sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. On October 26, 2010 a representative of EWMA sampled MW-1R, MW-27R, MW-2R, MW-3R, and MW-5R for VO+10 and BN+15. The results of the ground water sampling event revealed volatile organic compounds above the NYSDEC NYSDEC TOGS 1.1.1 Groundwater Standards/Criteria in the groundwater samples of four (4) monitoring wells, MW-1R, MW-27R, MW-2R, and MW-3R. EWMA notes that the results of the sampling event did not detect any exceedences in monitoring well MW-5R, which is located along West 28th Street. Ground water flow is relatively flat throughout the Property however, topographic grade is to the southwesterly direction. Laboratory analysis revealed the following: " Sample MW-1R was obtained from MW-R1 (located downgradient of the former UST location and along 27th Street) and revealed concentrations of benzene at 4.99 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 186 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 808 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-27R was obtained from MW-27R (located along 27th Street) and revealed concentrations of benzene at 3.62 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 35.2 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 156 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-2R was obtained from MW-2R (located along 27th Street) and revealed concentrations of benzene at 3.60 ppb and in excess of the TOGS 1 ppb standard; and concentrations of ethylbenzene at 19.3 ppb and in excess of the TOGS 5 ppb standard; and concentrations of total xylenes at 85.8 ppb and in excess of the TOGS 5 ppb standard; " Sample MW-3R was obtained from MW-3R (located along 28th Street) and revealed concentrations of benzene at 4.33 ppb and in excess of the TOGS 1 ppb standard; and concentrations of total xylenes at 8.66 ppb and in excess of the TOGS 5 ppb standard; " EWMA notes that the results of the October 26, 2010 sampling event did not detect any

COMMERICAL PROPERTY (Continued) **S108467893**

exceedences in monitoring well MW-5R, which is topographically upgradient and located along West 28th Street. Two rounds of groundwater sample results from the wells indicate that the dissolved ground water contamination at the Property has been significantly reduced. However, groundwater contaminants continue to be present at low levels that exceed the GWQS in the perimeter ground water monitoring wells. Based on the presence of concentrations of contaminants above the GWQS in the upgradient wells, ground water contamination may be migrating on site from off site source(s). Due to the removal of site soils down to 25 feet and the water table, there are no source soils remaining at the site. Therefore, natural attenuation for the remaining residual ground water contaminants is proposed. EWMA recommend no further investigation and closure for NYSDEC Spill Case No. 0613440. The NYCDEP reviewed the Closure Report and the Property was provided with a Notice of Satisfaction. Based on work to date, this spill is closed. see edocs if warranted. "

DEC Memo:	"10/02/08-Hiralkumar Patel. spoke with dispatcher 258 at FDNY. he mentioned that large quantity of diesel spilled in open excavation at construction site. 10/02/08 - Raphael Ketani. Earlier cases are associated with this site and are listed under the Spills managers Ryan Piper and Hiralkumar Patel. They are 0613440-tank failure (active case), 0801913-discovered fuel tanks, 0806482-found oil in ground. The site is block and lot 699 and 9. The owner is 537 West 27 Street Owners, LLC, c/o RD Management, LLC, 810 7th Avenue, 28th Floor, NY, 10019. The site main address is 537 West 27 Street, but alternative addresses are 537-545 W. 27 Street and 538-546 W. 28 Street. The site had a one story garage/service station from old pictures in Property Shark. The site has an E-designation and the DEP contacts are Terrell Estesen (718) 595-4473 and Maurice Winter (718) 595-4514. PBS case #2-610856 lists 6 closed 550 gallon tanks. Two had diesel fuel and the rest had #2 oil. The owner is listed as 537 W. 27 Street Owners, LLC. I visited the site today. I met Leeron Tagger, Environmental Technician from Environmental Waste Management Associates (973) 560-1400/FAX (973) 560-0400. He said that the FDNY was here and left. He said that they showed up because a neighbor had complained about strong odors in the air in their ventilation system. He said that 3 tanks were discovered at the site, two in the center and one in the southeast corner. He said that all three had a hole or two and had leaked oil. Mr. Tagger said that the two tanks that were in the middle of the property were discovered with oil in them. I noticed that they had dug out the site to about 7 feet below grade. I asked him how much more soil was going to be dug out. The construction foreman said that they will dig out to about 12 feet below grade, but groundwater is 10 feet below grade. I asked the foreman where bedrock was. He said it varied between 20 feet to 40 feet below the site. Mr. Tagger stated that they will conduct site dewatering and collect the contaminated water and filter it for the oil and other contaminants. I smelled a strong odor of diesel fuel. I asked him whether contaminated soil had been removed. He said that some had been removed and that he has a manifest for the soil. I asked him whether end-point samples were taken. He said that they had. I told him that I smelled strong diesel odors and that much more soil will need to be removed. He said that it will. I told him that EWMA will need to submit a report with a sit map showing the locations where the tanks were and where the oil contaminated soil is, manifests for the soil removed, and end point sample results. He said that a report is being prepared for the site right now. I asked him whether the tanks had been registered with DEC. He said that he thought they had been, and that two checks had been sent to DEC, but that I should talk to the project manager, Rob Edgar at (973) 560-1400, ext 159. I took 3 pictures of the site and left. Later, I tried to call Mr. Edgar regarding the need to remove more soil because the odors were strong and because there had been odor complaints from a neighbor. I could only leave a message. However, I did state that the matter was urgent and that EWMA had to institute an odor management/abatement program immediately and to call me back

CONSTRUCTION SITE (Continued) **S109372079**

as soon as possible. Mr. Edgar called me back. He said that they already took out 55 truck loads of soil. He said that he has someone on site who is monitoring for fugitive dust and odors. He said that Mr. Tagger walks around with a PID meter and checks the vapor concentrations. He said that, so far, they have not been over the limits. I told Mr. Edgar that it's not just a matter of how high the vapor concentrations are, but also whether the odors are a nuisance. I told him that the vapors got into the ventilation system of a neighbor and there were complaints to DEC. He said that he was aware of this and that there's oil in the soil, so there are odors. He said that's the situation at the site. I told him that not only does he have to get the construction company to remove soil quickly, but that he has to come up with a method of controlling and abating the odors. He suggested covering the affected areas with plastic. I told him that plastic may not be the best method. I told him that I will talk to my supervisor, Randall Austin, Chief of the Spills Unit. Mr. Austin recommended that they use odor suppressing foam to control the vapors and that they come up with an odor management plan. However, he said that plastic can be used as a temporary measure. I called Mr. Edgar and told him that the plastic sheeting can be used as a temporary measure, but that foam should be put down to control the odors while they dig. He said that the construction company doesn't like using the foam. I told him that he will have to come up with some plan to take care of the odors and that the odor control has to begin immediately. He said that EWMA always complies with all environmental regulations and laws. I told him that his company will have to get control of the odors fast and abate this problem, otherwise there could be more complaints and more problems. With that the conversation ended. 10/3/08 - Raphael Ketani. I made an unannounced site visit today at about 2:11PM. I met Mr. Tagger of EWMA and Mark Trashaj of L&M Builders, LLC - foreman for the development company (914) 833-3000. I saw that no digging was taking place, but the crew was laying plastic sheeting over the site where the oil had spilled (see photos in E-docs). The odors at the site were slight, except where the backhoe was sitting. My PID meter registered up to 2100 ppb of vapors at one foot above the soil with a slight breeze blowing. I showed Mr. Tagger and Mr. Trashaj that my PID meter was detecting up to 2100 ppb of total vapors. They said that the soil which comprises the platform for the excavator is contaminated with oil. I asked them when this soil will be removed and when the rest of the soil will be carted away. Mr. Trashaj said that they can't remove any more soil or else the steel sheet pilings will fall into the site. He said that the next step will be to install holdfasts for the steel pilings over the next two weeks. I told him that the contaminated soil has to be moved. He said that they will keep the contaminated areas covered with plastic at all times and if any gets ripped, then they will replace the damaged plastic. I told him that the contaminated soil which comprises the platform has to be removed next week. He said that this will be done as it doesn't affect the stability of the steel sheet pilings. Mr. Tagger assured me that when they dig, there are many trucks lined up to take loads of soil. He said that they will work hard to remove the rest of the soil after the holdfasts are installed and that they will maintain the plastic covering. After this, I left, but I told them that I will be back next week. 10/8/08 - Raphael Ketani. I spoke to the case manager for the site, Ryan Piper of DEC Region 2 Spills. I debriefed him on what when on at the site the two times I visited it

CONSTRUCTION SITE (Continued) **S109372079**

and about the odor complaint. I told him about the installation of the plastic sheeting and that Randall Austin, Chief of the unit, had approved its use temporarily. I told Mr. Piper about the oil contaminated soil that was being used as a platform for the excavator and that no digging will take place over the next two weeks as tie backs need to be installed all around. I mentioned that I had informed Mr. Tagger, Mr. Trashaj, and Mr. Edgar that the contaminated platform soil had to go immediately. Mr. Piper told me to close out this case and refer it back to the active one, #0613440. Therefore, I am closing out this case today and referring it back to the initial spill case that is still active with Mr. Piper."

Remarks: "Unknown spill at a construction site. Caller had no further info."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MILLER DEC SIGONA REASSIGNED TO MILLER ON 1/23/98 3/5/10 - Austin - Reassigned as TTF to Jake Krimgold for further investigation. - end 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo 8/24/12 TJD Spill cross-referenced to PBS#. 10/09/14-Hiralkumar Patel. reviewed available documents for DEC DeMeo. site name: West 30th Street Heliport PBS #: 2-342211. as per PBS record, the site has/had following tanks: - one (1) 8,000 gal other product AST on saddles, in-service, installed in Apr. 1997 - one (1) 8,000 gal other product AST on soil, converted to non-regulated use, installed in Apr. 1997 (this could be same tank as above) 10/27/14 TJD File review - based upon above information obtained from Patel. - eleven (11) 550 gal other product USTs, closed-in-place, in Apr. 1997 - five (5) 550 gal other product USTs, closed prior to Mar. 1991 other spills #: 8804707, 8901091, 9504121 spill # 8804707 was reported on 08/29/1988 by USCG due to petroleum patch. case closed. spill # 8901091 was reported on 05/04/1989 due to tank test failure for eight (8) 550 gal jet fuel tanks. case closed.

HELIPORT W 30TH ST/MANH - TTF (Continued) **S100145501**

spill # 9504121 was reported on 07/06/1995 by USCG due to 40 gal jet fuel spill result of collision between two helicopters. case closed. reviewed documents on e-docs for PBS: - 12/18/1988: tanks 9 to 16 (550 gal jet A fuel) were passed - 12/07/1991: tanks 1 to 8 (550 gal jet A fuel) were passed - 06/11/2007: N. D. Eryou sent letter to DEC Falvey. he mentioned that the eleven (11) 550 gal USTs owned by Port Authority and they were conveyed with the land lease to NYS DOT (Aviation Division). he was not present during tanks abandonment in 1997, but believed that NYSDOT was going to remove the USTs as part of the stormwater upgrades that were underway as part of the immeidate adjacent Route 9 upgrades. 10/27/14 TJD File review. Based upon summarized review discussed above - (8) 550 gallon UST's passed tightness tests (Tanks 9 to 16) prior to reported spill (1988). Remaining (8) 550 gallon UST's (Tanks 1 to 8) passed a tighness test subsequent to reported spill (1991). As per PBS inspection 1/9/07 (Falvey) all UST's have been permanently closed on site. New 8K AST's are currently in operation at this facility. A total of (3) spill reports have been reported and closed at this facility since initial TTF report. Unknown what tank # failed the tighness test, however, all UST's are reported out of service. Due to proximity of the failure to the Hudson River if a significant petroleum discharge had occurred impacts to the adjacent surface waters would have been observed. No further action is required at this time. Spill is administratively closed."

Remarks: "550 GALLON TANK FAILED HORNER EZY CHECK WITH A LEAK RATE OF .179GPH, TANK #8, PARTIALLY PUMPED OUT TANK, WILL FINISH PUMPING TANK LATER TODAY."

DEC Memo: "8/4/13-Vought-Received email from OER Chawla that Jeff: During remediation, a spill was called in at the above address. Please let me know who this spill is assigned to so that we can coordinate remedial efforts. Thanks, Shaminder. Email contains string from GZA Clifford Bell that The findings of stained soils immediately surrounding and underlying the approximate 2,000 gallon tank on July 7 were reported to the NYS DEC. The Spill # is 1404620. I will keep you informed on the case manager and path forward. Thank you. Clifford Bell C.P.G. LEED AP GZA GeoEnvironmental of New York 104 West 29th Street, 10th Floor New York, New York 10001 Office: 212-594-8140 x 8931 Direct: 646-929-8931 Cell: 646-483-6250 Email: clifford.bell@gza.com Vought sent email to OER Chawla with cc to Bell, Ahmed and RSE that Shaminder, Still catching up on emails. The project manager for the spill is Hasan Ahmed (copied above) and you or Clifford Bell (also copied above) can also call him at 718-482-6405. Please keep in mind that Hasan will be managing the case only if it a short term excavation or remedy. If the case is long term (eg submission of work plans and reports) then the case will be transferred to another Project Manager in the Spills Unit. Can you or Cliff provide a brief one paragraph email with the scope of work and current status so Hasan can best decide the Project Manager? Thanks. 8/5/14-Vought-Received reply from GZA Bell that Jeffrey: We do not intend for the tank closure to be long term. The previously abandoned-in-place tank filled with concrete was removed on July 8 by the excavation team assisted by an FDNY Certified UST firm. Soils immediately adjacent to the tank and impacted soils as defined by visual staining, olfactory conditions, and photoionization detector responses were removed, segregated and transported to an approved petroleum handling facility. The tank was resting on a concrete slab. Plastic was placed on top of the resulting excavation. Our intention is to step out and excavate additional soils beyond and at the depth of the underlying concrete slab to confirm removal of impacted soils as indicated by field observations. The slab will be removed. Additional endpoint samples will be collected for confirmation. We plan to perform this work within the next 2 weeks. We will notify Hasan 2 days in advance of the excavation. Please do not hesitate to contact us as needed for further details. Thank you. Vought spoke with DEC Ahmed and he noted that he would reply to above 8/5/14 email from GZA Bell and that he will remain project manager. 8/6/14- Ahmed - Replied back to clifford today saying: Clifford As per conversation with you on 8/1/14 over the phone, you mentioned that as per the revised plan, the planned excavation depth for the foundation at the tank location is 15 ft and the depth of the concrete slab is 4 ft. You have the option to take end point samples at the final depth of excavation or at any depth you mentioned in the email. Please send me a site plan showing the location of the tank and planned excavation. What is the groundwater depth at this site? Thank you. "
Remarks: "Tank removal with soil impact. Prior historical closed-intact tank but impactsed soil discovered during removal. Cleanup is pending."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"According to Mohammed Ahmed, the property owner is: Jack Guttman Bass Associates 141 Fifth Ave, Penthouse NY NY 10010 Fax copy to Fleming - Fax #212-675-3224 10.17.05-Sharif// I sent a stipulation with corrective action plan. The Corrective Action Plan requires delineation of groundwater contamination offsite and dewatering discharge contamination. 11.18.05 Sharif//Property Owner's lawyer Larry Schnapt,(212)756-2205 Called me to say his client is not going to sign the stipulation since it waives his right to claim cost of remediation to Spill Fund, instead he will send a statement about their aggrement to remediate the groundwater contamination if it exists. 12/20/05-Sharif// Case was transferred to Koon Tang for reassignment with files. 12/20/05-Sun//The Case was reassigned to June Feng. 12/28/2005 - Feng - File reviewed by Feng and summarized site history : 1) The site will be constructed as multistory commercial stucture w/ basement. 2) Groundwater encountered at 8' below grade, so basement will below water table. 3) Removed a crushed 550-gallon UST during excavation beginning construction, no sign of contamination was seen. 4) Dewatering system was installed, soil removal was found to have petroleum odor and sheen. 5) Soil was sampled. Soil contamination was found beginning at 8' bg to 16' bg. Soil samples taken from the four quadrant at depth of 12-16 feet below grade. 6) Soil were excavated to 11.5' bg after dewatering. Total of 1,218.71 tons of soil was excavated (reached the excavation limit). Endpoint samples were taken. 7) ORC applied in southwestern covered with gravel and poured with concrete. 8) Foundation was poured and basement was built. 9) A 47.24 mil high density polyethylene vapor barrier (Preprufe 300R waterproof system) was installed between the mud-slab and the basement slab. Items need to be addressed: 1) Groundwater sampling. WT @ 8' and soil was found to be contaminated from 8' to 16'. Soil excavation only to 11.5'. If contamination was found in groundwater, treatment will be required. 2) Indoor air sampling. Vapor barrier was not extended to the walls below grade, so indoor air samples will be needed upon completion of the structure. 12/30/2005 - Feng - Contacted the consultant, Chris De Carlo (Fleming Lee Shue), and will submitted all the requested information, included groundwater samples result, constrction detail and vapor mitigation effort design. (RJF) 2/16/2006 - Feng - Reviewed the supporting documents and construction drawings. Vapor barrier designed was provided. Extension to install groundwater monitoring wells in June 2006 is approved. Letter to Bass Associates and CC to

CONSTRUCTION SITE - MISC (Continued) **S106868504**

Fleming Lee Shue and Schulte Roth & Zabel (lawyer). 10/4/2006 - Feng - Called Chris DeCarlo. Fleming Lee Shue has submitted a proposal to the owner and never get approved. The consultant for this site may have been changed and Fleming Lee Shue might be be the consultant next round. Called Jack Guttman at the number Chris DeCarlo provided and the number has been changed. Email to Lawrence Schnapf and asked him to contact Jack Guttman for the status of the groundwater samples. (RJF) 10/10/2006 - Feng - Site visit and met with Mohamed Ahmed (Fleming Lee Shue). Groundwater flows in a direction to Hudson River. No upgradient well will be installed due to the underground utilities. One downgradient well will be installed. Sidewalk permit letter sent to Fleming Lee Shue. (RJF) 5/29/2007 - Feng - Subsurface Investigation Report, dated 12/20/2006, submitted by Fleming Lee Shue. On 11/22/2006, soil boring was advanced to 20 feet bg. No PID reading and soil sample was not taken. DTW 9 feet. On 11/29/2006, groundwater sample taken. Analyticals show low contamination, 13.7 ppb MTBE. 2nd Quarterly Groundwater Sampling report, 3/19/2007. Groundwater sampled on 2/16/2007. No product. Analyticals show 14.9 ppb MTBE and some trace of SVOCs. Fleming Lee Shue will keep monitoring. (RJF) 7/24/2007 - Feng - Spoke with M. Ahmed (Fleming Lee Shue), quarterly report will be sent out within this week. (RJF) 8/21/2007 - Feng - Quarterly Groundwater Sampling Report #3, 7/25/2007, by Fleming Lee Shue. Groundwater sampled collected 6/13/2007. No product. No exceedance found. (RJF) Discussed with DEC J. Sun. Spill closed for: 1) Impacted soil was excavated down to 8 feet and endpoint samples show some minor SVOCs exceedance. 2) Application of 1,500 lbs of ORC at the basement excavation to remediate the groundwater. 3) Installation of a 47.24 mil of vapor barrier to prevent the vapor intrusion into the building. 4) Low/ND downgradient groundwater sample indicates no offsite impact. NFA issued. (RJF)"

Spiller Company:	001
Contact Name:	WALTER SEELIG
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/20/03. Contaminated soil letter sent to Walter Seelig (High Ridge Enterpr.). Also see spill # 9008960. YK. 11/21/03 Rommel Met Brian McCabe, senior geologist, on site. Soil samples collected from 8 to 16 feet below grade were contaminated. Groundwater (15 to 18 feet) was also sampled during the investigation and were impacted by BTEX and MTBE. They will excavate what soil they can and install a minimum of three monitoring wells (one outside by remote fills). Spill 9008960 reported TTF of 4000 gallon gas UST 11/14/1990 STIPULATION SIGNED RD 2/18/04. 3/18/04-Vought-Spoke with Rob Ferguson

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

(631-586-4900). Subsurface Investigation report sent to DEC on 2/3/2004. Ferguson will send small CAP upon receiving subsurface investigation report review. Ferguson requires review of subsurface investigation as per STIP. Vought requested that another copy of the Subsurface investigation be sent to DEC. 4/1/04-Vought-Spoke with Tom Melia (F&N) and he requested that he be point of contact. Spill transferred from Rommel to Vought. 4/6/04-Vought-File review by Vought: Contaminated soil letter sent form DEC Krimgold to High Ridge Enterprises. Site meeting minutes (Fenley & Nicol Brian McCabe)-11/25/03. Site meetin on 11/24/03. In attendance were DEC Rommel, F&N McCabe, F&N Melia and F&N Hole. The results of the sampling indicated that the contamination is located in the northern portion of the building. The effected area extended from the north end od the 4000 gallon tank excavation to the front of the building, approximately thirty five feet and from the center for the 550-gallon tank excavation west to the side of the building, approximately twenty feet. DEC recommended additional soil excavation without comprimising structural intergrity and required 1)installation of one well inside the building after backfilling completed 2)installation of two wells on sidewalk at the location of the former remote fills and twenty feet west of the bay door. Letter from Fenley & Nicol(Thomas Melia) to DEC(Rommel)-12/18/03. The new owner of the building indicated that his intended use for the building is as an art gallery . During building remodeling excavation was performed and tanks were discovered under floor. Two gasoline USTs (one 4000-gallon and one 550-gallon) were removed and were in separate lcoations fifteen to twenty feet apart. Upon removal of the bottom slab the soil encountered was saturated with liquid phase hydrocarbon . Depth to water expected to be 18’ below grade. F&N proposes delineation of soil and groundwater contamination, installation of wells and additional soil excavation. See also Spill #9008960 reported in 1990 for tank test failure and administratively closed on 3/4/03. Letter from DEC Rommel-12/4/03. Letter approving installation of wells on the sidewalk on the south side of West 29th Street between 10th and 11th Avenues and requesting expediting of sidewalk permits. Letter from F&N(Melia) to DEC Rommel-12/18/03. At this time we are continuing our efforts to delineate the extent of the contamination... . Three monitoring wells installed (one inside and two outside building). At this time the owener of ther property feels that it would be too far costly to excavate the contaminated soil without jeopardizing the structural integrity of the building, and would prefer that we install an air sparge/soil vapor extraction (As/SVE) system to remediate the hydrocarbon impact . Please indicate your approval below. No approval indicated by DEC Rommel. Stipulation Agreement-1/15/04. Stip with deadline of 2/13/04 sent to: Walter Seeling High Ridge Enterprises, Inc. P.O. Box 2542 York, Pa. 17405. Subsurface Investigation Report (F&N-Melia 631-586-4900x190) -3/19/04. Investigation consisted of six soil borings, six temporary groundwater monitoring points and three monitoring wells. The central and eastern units are currently vacant and undergoing renovations for use as an art gallery . Depth to groundwater is 8-9’ and flows northwest. Soil analyticals show 35ppb benzene(SP-1 at 12’), 882ppb benzene(SP-2 at 12’), 14ppb (SP-3 at 12’), 4900ppb benzene(SP-4 at 12’), 817ppb benzene(SP-5 at 12’). Groundwater analyticals show 2.5 ppb benzene(TW-1), 1459ppb benzene(TW-2), 45ppb benzene(YW-3), 2109ppb benzene(TW-4), 254ppb benzene(TW-5), 11ppb benzene(TW-6), 1200ppb benzene(FN-1), 206ppb benzene(FN-2), 4.2ppb benzene(FN-3).

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

Report recommends Air Spage/Soil Vapor extraction system. NYSDEC requires: 1)signing of Stipulation before any further correspondence l 2)presence or absence of free product and interim remedial recovery if present 3)surrounding area site plan including property usage 4)additional wells east of FN-2 and well north of FN-2 to calculate required radius of influence for system design. 4/6/04-Vought called F&N(Milea) to repeat Stipulation requirement and left message to return call to DEC. 4/7/04-Vought-Received faxed copy of STIP already implemented by DEC Kunkel on 2/18/04 (Copy of original not in file). 4/8/04-Vought-Sent letter to High Ridge requiring well installation north of FN2 and east of FN2, submission of monitoring well data and surrounding property sketch. 4/16/04-Vought-Wells will be installed next week (tentatively). Wells for pilot test will also installed. Mailing address is: High Ridge Enterprises P.O. Box 2542 York, Pa. 17405 4/18/04-Vought-Received message from David Oloke (F&N-631-586-4900x144) that he is new project manager for site. Vought called David and two additional well installed (one north of FN2 and one east of FN2). All onsite wells were sampled. No free product in new wells. Four vapor wells installed and air sparge well will be installed. DEC will receive pilot test report by 7/15/04. 6/23/04-Vought-Spoke with David and initial results faxed on 6/9/04. .5 of free product in well in 1 vapor well sent for fingerprinting. EFR not effective. DEC requires recovery of free product and submission of pilot test. 9/2/04-Vought-File review by Vought: Groundwater results (F&N)-6/23/04. Groundwater analyticals show 1.2ppb benzene(FN5), 1.8ppb benzene(FN4), 14ppb benzene(FN3), 26ppb xylene(FN3), 474ppb benzene(FN2), 621ppb MTBE(FN2), 8ppb toluene(FN2), 2065ppb benzene(FN1), 47170ppb MTBE(FN1), 4106ppb toluene(FN1) and 2761ppb xylene(FN1). Addendum to the direction beneath the site was found to be toward the north. Property uSubsurface Investigation Report (F&N)-7/14/04. On 5/7/04 two additional monitoring wells were installed. On June 4, 2004 the AS/SVE pilot tests were conducted . One inch of floating product was detected in P2. The results of the AS pilot test indicated that the introduction of air pressure into the formation below the contaminant zone is a viable remediation technique . Report recommends commencement of an interim remedial measure to recover product from P-2 via weekly EFR. Report also recommends installation of another well to replace P2. Vought called David from F&N to approve of workplan. Well installation will be included with final remedial action plan. Vought sent letter approving of proposed workplan (installation of well at P2 and IRM) and included requirement of determination of groundwater flow direction and surrounding property sketch. 9/3/04-Vought-Received fax from Oloke (F&N). The groundwater flow sage of downgradient sites to the north are a parking garage and an art studio. Vought called Oloke and approved workplan as per 9/2/04 letter. Vought called Oloke and he will begin drafting RAP for submission to DEC. 9/29/04-Vought-Spoke to David F&N and he will be sending RAP in overnight. 10/1/04-Vought-Reviewed RAP received by DEC on 10/30/04. Site is currently occupied by a masonary block structure which is subdivided into three sections. An art gallery occupies the western unit. The central and eastern units are currently vacant and are undergoing renovations for use as an art gallery. RAP proposes weekly recovery of free product from FN2 via a peristaltic pump until well is converted to a 2 product recovery well designated at FN6. Two additional wells will be installed in the interior of the building. Monthly groundwater monitoring and quarterly sampling. Five air

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

sparge and four SVE wells will be installed in the interior of the building. Remedial system will be installed on the roof of the building. Daily monitoring for the first week, weekly monitoring for the first month, monthly maintenance visits and effluent sampling, quarterly effluent sampling and groundwater sampling. Vought sent letter approving of RAP. 10/28/04-Vought-Spoke to David(F&N) and FN1 must be reinstalled due to it was a bent well. Wells will be installed during the next few days. 9/27/05 - SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 11/9/05 - Obligado - Review System STartup Report. AS/SVE system consists of 5 HP compressor and 3.5 hp blower and 5 air sparge wells and four soil vapor extraction wells. Effluent air stack results show 31.4 ug/m3 for benzene. Operation and maintenance schedule proposes monthly SVE effluentmonitoring and Quarterly Status Reports. System started in May 2005. Due to noise generation, the system only runs from 9pm to 6am. Quarterly Status Report - Groundwater analyticals show 4.7 ppb benzene (FN3), 50.1 ppb MTBE (FN2), 78.3 ppb MTBE SVE5, 1.7 ppb MTBE SVE3. Benzene effluent show 46.74 ug/m3. 5/15/06 - Obligado - Called David Oloke. Asked that he send recent Quarterly Status Reports. 5/22/06 - Obligado - 2Q06 Quarterly Status Report, submitted by Fenley Nicol, Inc. Ground water analyticals show 9 ppb benzene 35 ppb MTBE in FN3 and and 3.7 ppb benzene in FN4. Benzene effluent below STIP limits. There is duplicated data on Table 2 Air Sampling Results, probably a cut and paste error, call Dave Oloke, he said he will look into it at send a new table with the electronic copy. Report recommends continuing system operation. 6/23/06 - Obligado - Called David Oloke. Asked for the corrected Table. He said he will email it to me. 10/23/06 - Obligado - Called David Oloke. Left message requesting most recent quarterly status report. David Oloke call me back and said he would send the report shortly and he would correct the typo on Table 2. 1/30/07 - Obligado - Review 3Q06 monitoring report. Typo in 2Q06 table has been fixed in cumulative table. AS/SVE system online and working at 100% maximum capacity. Air samples collected monthly. Benzene in gw exceeds standard at 4 ppb. in 2 wells. All effluent below STIP guidance. Benzene detected in VES/AS effluent at 4.86 ug/m3 in 6/06. Recommends continued operation of the system. Review 4Q06 monitoring report - AS/SVE system operating at 100% capacity 9 hours per day. All effluent samples below STIP guidance. BTEX effluent at 361.71 ug/m3 during 10/27/06 Report recommends continued operation of system. GW results show minor exceedences of Benzene - max concentration at 8 ppb in FN3. However gw monitoring does not include FN1 where highest contamination was found. 9/13/07 - Obligado - Review 1Q07 monitoring report. According to the report, the AS/SVE syste is running at 100% capacity. System is still pulling vapors, at a flow rate of 50 cfm and a concentration in March 07 of 111.30 ug/m3 BTEX. Benzene (12.8 ug/m3) was below the STIP limit. Recommends continued operation of AS/SVE system. 10/26/07 - Obligado - Review 2Q07/3Q07 monitoring report. Benzene detected during quarterly monitoring at MW3 adn MW4 slightly above standards. Analytical results of air stream were below the max benzene STIP Limit. Recommneds continued operation of the AS/SVE System. 9/3/08 - Obligado - Review 1Q08 monitoring report. AS/SVE running for 9 hours a day at 100% capacity. Effluent collected monthly. Benzene detected slightly above standards in MW2,3,4,and5. System effluent ND for BTEX. 6/3/09 - Obligado - REview 1Q09 monitoring report. Requests to shut down system for a 1 year post remedial monitoring period to determine if system was effective and monitor for rebound. Sent a

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

letter to Seeling cc to David Oloke approving system shut down temporarily but requiring sampling of monitoring wells MW1, MW6, adn MW7 beneath the building as required by approved RAWP. Required 90 days to submit an update report on system shutdown and additional sampling. 12/3/09 - Obligad - Met with David Oloke on site. The AS/SVE system was down as proposed. According to David they were unable to collect ground water samples from the three sampling points. According to David the water he collected was too silty. He recommended doing an exposure assessment to close the spill number or to install the well in an alternate location in the building entrance. I told him I would review the spill file to determine if that location was acceptable. 12/22/09 - Sent email to Mr. Oloke - The Department has determined that the proposed location is cross-gradient and outside the of the source area, and would not provide the necessary data to confirm the site remedation was successful. As such, the Department reiterates its requirement in the June 2, 2009 letter, to sample the 3 monitoring wells FN1, FN6, and FN7 (as originally proposed in the approved RAWP) and submit a Monitoring Report within 90 days of this notice. If sufficient ground water can not be obtained from these sampling points (after exhausting all available well sampling and well development techniques), than a Remedial Investigation Work Plan (RIWP) to install a new monitoring well in the gallery in between FN1, FN6, and FN7 must be submitted within 90 days of this notice. The RIWP should contain an implementation schedule. 10/9/10 - Obligado - Email from David Oloke I would like to inform you that we're scheduled to be onsite to install one groundwater monitoring well on the sidewalk directionally towards the source area beneath the building in order to determine the current groundwater quality beneath the site. We scheduled for Monday 25 through Wednesday 27. 1/14/11 - Obligado - Email from David Oloke We are set to go back to High Ridge, 524 West 29th Street in Manhattan on Monday 1/17/11 to install the groundwater monitoring well for spill inactivation. The client is making plans to be onsite as well . 1/19/11 - Obligado Email from David Oloke We core drilled through the foundation wall and could not get the well rods to the desired depth due to refusal. So we back to square one. Our client spoke with the tenant again yesterday to see if he will allow us access into the building. 4/1/11 - Obligado - I sent email to David Oloke related to potential alternative methods for obtaining ground water samples at the site since the diagonal well method was not successful, such as snaking new tubing into the existing system wells, and high vaccuum extraction to obtain ground water samples from the sparge wells. I asked Mr. Oloke to look into these options, as well as any other methods and report back the findings to the DEC. 3/12/12 - Obligado - I reviewed a Site Status Report. They collected samples from MW1, MW6, and MW7 under the gallery slab using the vacuum extraction technicque. Samples were collected in June and November of 2011. During the most recent sampling event in NOvember, the maximum VOCs was 117.3 ug/L in MW-7. MW1 had 63.42 ug/L total VOCs, and MW6 had 59.75 ug/L VOCs. Several compounds were slightly above standards. The greatest exceedence was 36 ug/L napthalene in MW7, which is above the standard of 10 ug/L. In NOvember they turned on the AS/SVE system and allowed it to run for four weeks. At the end of the four weeks , air samples were collected and all the targeted VOCs were ND. Based on the above, they requested closure. Ground water contamination has been greatly reduced. The AS/SVE system reached asymptotic recovery rates. Additional remediation is not

HIGH RIDGE ENTERPRISES (Continued) **S104275619**

	warranted nor feasible. After discussion with DEC Hussein and Ketani, this spill is closed. A spill closure letter ahs been sent to Walter Seeling, cc to David Oloke."
Remarks:	"caller was hired to remove a few tanks from the site - x-ref spill # 9008960 - they encountered contaminated soil - they are stockpiling soil now"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

DEC Memo:	"10.11.05 SR//Sharif spoke with Bill Simmons, they are removing five 4000-gal tanks and found contamination. Apparently, there are no holes in tank. I suggested to dig out as much as possible and take end point sample, send result to DEC. If problem is major i.e., ground water affected, needs long term remediation, then it goes to Koon Tang. 01/26/05 Sharif//Rec'd UST cosure report prepeared by ECS. Five 4000 gallon gasoline single-wall USTs and associated piping were removed. Ground water was encountered during excavation at 6 to 7 feet below grade. Petroleum-impacted soils were encountered within UST grave and beneath former dispenser islands. Dewatering activities were performed in UST grave area to remove impacted soil to 13 ft below ground. Twenty-three post excavation soil samples out of 44 had VOC concentrations above TAGM. Level of remaining soil contamination below groundwater level warrants delineation of groundwater

EXXON (Continued) **S107415886**

contamination and may require additional long-term remedial efforts. Case has been transferred to Koon Tang for reassignment. 02/03/06: Spill transferred from S. Rahman to J. Kolleeny. Spoke with Bill Simmons of ECS; site had wells put in years ago after soil contam was found, but was closed by J. Rommel of DEC after BTEX levels in GW showed decreasing trend and sensitive receptor survey showed no SR's (see spill 9912838). Cumberland Farms sold site, but retain responsibility for env'tal investigation and cleanup. Current owner plans to develop site with 15-story residential building, involving further excavation of soil and possibly dewatering. Owner's consultant is currently doing Phase II investigation and preparing a report. ECS will forward this report, when available, to DEC with their recommendations for further action. - J. Kolleeny 04/06/06: Spoke with Bill Simmons of ECS, he sent an email on 3/30/06 with outline of draft RAP and attached data tables and site plans from upcoming Phase II report being prepared by Impact Env'tal. ECS's draft remedial plan involves soil excavation during site re-development activities, plus mitigation measures like sealing basement of planned residential building with moisture barrier (basement likely to extend into water table, 6-8 feet bg). ECS is pushing RP to do more, rather than less, soil excavation to remove as much potential source material as possible and help GW quality improve. I agreed with this, and suggested applying ORC to open excavation. I also stated that plume is not delineated and addt'l wells are needed, plus after soil excavation there will likely be need for follow-up GW monitoring. GW data from Impact, collected in Jan. '06, showed worst GW along southeastern and northwestern edges of site. I also suggested that another round of GW sampling be conducted soon, approx. 3 mos. (one quarter) after last round. Bill Simmons agreed with these suggestions/statements and indicated that RAP would be submitted in several weeks. - J. Kolleeny 07/26/06: Reviewed Remedial Action Plan (received April 24, 2006), plus diagrams I requested from Bill Simmons of ECS, sent by email on 7/26/06, showing site with historic soil sampling locations, excavated areas, and proposed post-remedial monitoring wells (in eDocs Image Folder). RAP involves excavation of petroleum-contaminated soil encountered during site re-development, de-watering during construction activities, post-excavation soil sampling, and application of ORC to open excavation. In addition, ECS proposes quarterly GW monitoring of existing wells prior to re-development, and installation of 5 new wells (existing wells will be destroyed during construction) for post-remediation monitoring. I sent approval letter (by email and hard copy to Angela Pimental of CFI and Bill Simmons) requesting two more post-remediation monitoring wells, stating that number and locations of post-remediation wells may need to be adjusted based on results of post-ex soil samples, and asking that soil screening and sampling be performed during installation of post-remediation wells. - J. Kolleeny 06/14/07: Spoke with Bill Simmons of ECS, mentioned that approved RAP included implementing quarterly GW monitoring prior to site remediation by excavation, asked if any quarterly monitoring has been done. He indicated that current owner/developer has been unwilling to undertake sampling, and it's unclear which consultant (ECS, Langan or other), should be doing it (site remediation apparently not being done by CFI). I said DEC was being cooperative by allowing remdiation to be linked with site re-development, but that it's not acceptable for all work on spill case to be stalled. Bill said he is attending

EXXON (Continued) **S107415886**

big meeting regarding project today and will bring up this issue, also said excavation is projected to start in late July; I said in that case it's even more important that baseline GW sampling be performed. He agreed and said he would mention this at meeting and let me know result. I said if RP is not cooperative, he should give me contact info and I will pursue them directly. - J. Kolleeny 06/19/07: Sent email to Bill Simmons of ECS to follow up on 6/14/07 conversation: We spoke last week about site, where quartly GW monitoring is to be done while awaiting implementation of approved RAP. You mentioned you were going to meet with parties involved and would bring this up. Can you let me know outcome of meeting? Has anyone agreed to do GW monitoring? Please let me know. Got email from Bill saying: Owner & developers allowed us access, went to Site on June 15, found 2 wells in vicinity of former USTs on northern and NE portions of Site. We sampled them, should have results next week. I reviewed DEC notes and RAP, sent back reply: Thanks for sampling wells. However, I looked back over my notes and RAP and have some concerns. Worst contamination has historically been in well MW-4, which doesn't exist anymore. When sampled by Impact Env'tal in Jan. '06, well had > 35,000 ppb total VOCs! Other well which had significant contam was MW-5, east of former tanks/dispensers, which also doesn't exist anymore. GW flow direction at site has varied, but has at times been to south and/or east. This warrants further delin to evaluate potential off-site migration. When I reviewed/approved RAP in July '06, I thought remedial action would be implemented in near future, and that post-remed mon wells would be installed to evaluate residual GW contam. However, given that nothing has been done for almost a year, I don't think sampling of 2 existing wells on north and NE portions of site is sufficient to determine baseline, pre-remediation GW conditions. I think it's important to install minimum of 2 new wells, either along SE and eastern boundaries of site (in sidewalk along 10th Ave.), or across street to south and SE. Got reply from Bill: Site is currently under development. Plans, to begin next week and continue thru Oct., include install'n of sheet piling, install'n of dewatering treatment system that will operate for 2-3 months, potentially removing millions of gals of water, excavation of petroleum-impacted soil, collection of post-ex soil samples, and mixing of ORC in excavation. RAP details what is to occur at site after development and includes install'n of post-remed mon wells to evaluate potential off-site plume and effects RAP and construction activities have on GW. We were told last year that plans were moving quickly and also thought project would have started several months ago if not late last year. DEP is also involved with reviewing/approving all documents due to Site having E-Designation. Further, access to sidewalks around site will be blocked for construction. Due to logistics involved with installing wells at this time in project (i.e.: lack of access, construction traffic) and certain destruction of any wells installed due to construction and RAP activities that will be performed (i.e.: removal of millions of gals of water, soil excavation and ORC mixing) that will have significant positive effect on subsurface conditions at site, we do not believe install'n of monitoring wells at this time is feasible or warranted. Add'ly, historical GW data (Nov.'00 thru May'04) & data from Jan.'06 sampling event provide adequate baseline info for evaluating pre- & post-remedial impacts. I've attached results of 2 GW samples collected in March '07 for waste characteriz'n data for dewatering and DEP discharge permit criteria by Langan Engrg &

EXXON (Continued) **S107415886**

Env'tal Svcs on behalf of developer plus Site Plan showing location of samples [in eDocs]. We look forward to discussing further, hear your comments. I reviewed GW waste charact. sample data, wrote back: Thanks for waste charact. GW data. Your arguments are reasonable & persuasive; I withdraw request for install'n of addt'l delin wells at this time. As you stated, post-remed wells will have to be installed to evaluate on- & off-site subsurface conditions after remediation and development at site. Please send lab results of 2 wells ECS recently sampled when available, and let me know when soil excavation and de-watering activities have been scheduled; I'd like to come to site to observe. - J. Kolleeny 06/22/07: Received/reviewed copy of Langan Engrg Supplemental Site Invest Rpt dated 6/19/07, and on 6/21/07 sent email to Bill Simmons of ECS: Yesterday I received copy of a Supplemental Site Invest Rpt dated 6/19/07, prepared by Langan Engrg & Envt'l Svcs, addressed to Gary Heath of NYCDEP. This rpt has caused me some concern. Rpt summarizes excavation of 10 test pits across site in March '07, with collection of soil samples. Rpt concludes that there is widespread soil contam at site, but mainly below 8 feet bgs. GW was encountered in test pits, but no free product or sheen was observed. Based on these observations, Langan suggests that removal of contam soil from much of site, in accordance with approved remedial plan, will require unnecessary removal of upper 8 feet of relatively uncontaminated fill material, and that since planned site building will only have small cellar and will have on-grade slab over rest of site, with vapor barrier & sub-slab depressuriz'n system, excavation of contam soil should only be performed in proposed cellar area and petroleum-impacted soil identified elsewhere on site should be left in place. Langan's recommendation seems to be based on premise that only relevant concern posed by petroleum contam is its potential impact on building occupants via vapor intrusion. In fact, there is significant GW contaminant plume beneath site (which may extend off-site) which must be addressed under NYS Envt'l Conserv Law. Based on most recent GW data available to me (Jan. '06), very high levels of GW contam were found outside of planned cellar area (former well MW-4). GW contam at site must be addressed to resolve open spill 0508226. Best way to accomplish this, in light of fact that site is undergoing redevelopment, is to excavate as much contam soil as possible, since soil contam acts as source material for GW contam. This was recognized by ECS in April '06 Remedial Action Plan, which stated ECS proposes performance of exploratory test pits...Any petroleum-impacted soil that is discovered will be excavated and disposed of off-site. This remedial action will remove source areas and ultimately improve GW quality. RAP further proposed application of ORC to open excavation(s), to enhance biodegradation processes which reduce dissolved petroleum contam. DEC has approved April '06 RAP; any change in remedial plan must be submitted to NYSDEC in writing and approved by DEC. This may require collection and submission of up-to-date GW quality data to support revised remedial proposal. Again, I express my concern over Langan's suggestion that soil known to be petroleum contaminated be left in place at site, which contradicts RAP. Please let me know your thoughts on this. - JK 06/27/07: Received call from Bill Simmons of ECS, discussing recent Langan Engrng rpt and my email of 6/22/07. I stated that either impacted soil in southern areas of site (i.e., outside of planned cellar area) must be excavated, or alternative remedial plan must be proposed, which may require addt'l supporting data. Bill sent email

EXXON (Continued) **S107415886**

summarizing conversation, with attached results for GW samples collected 6/15/07 from two wells in north, NE portions of site. Results (in eDocs) showed no petroleum-related compounds detected. Bill's email stated: Please find attached analytical results of GW sampling of wells MW-7 and MW-8 on 6/15/07. Data indicate no VOCs besides chloroform. As follow-up to our phone conversation this a.m. regarding your email: I will discuss with all parties involved need for soil excavation to remove source of GW contam and further migration off site, specifically in vicinity of former well MW-4 located on SE part of site, of which most recent data collected in Jan. '06 by Impact Envt'l indicated total VOCs at 36,901 ppb. We specifically discussed Grids 7, 13, 14, 15, 19 & 20 (per Langan Engrg Site Plan in Supplt'l Site Invest Rpt dated 6/19/07) with depths from 5 fbg to minimally 10 fbg. Note that excavation of southern parts of Grids 7, 13 & 19 will be limited due to presence of abutting building and its structural integrity. If soil excavation is not performed, Revised RAP will be required with new GW data from SE, southern and eastern parts of site with proposal of alternative remedial methods to treat identified soil impact. I will keep you updated on progress. - J. Kolleeny 06/29/07: Received email from Bill Simmons of ECS: We are all in process of determining best strategy for excavation of petroleum-impacted soils in grids discussed along southern and eastern portions of Site. Developer has involved a structural engineering firm to provide geotechnical input specifically about abutting building to south and structural integrity concerns of getting too close to building without likely collapse. We request that you visit property to meet with certain people so an on-site discussion and meeting can better relate all site concerns. I have cc'd Joel Landes of Langan Engineering as he will be heading this issue. I was unable to attend site meeting on July 11, 2007. - J. Kolleeny 07/12/07: Received email from Bill Simmons: I want to provide you with update and status on project site meeting we had on Wednesday July 11. We determined that excavation of petroleum-impacted soils up to 10-12 feet in Grids along southern portions of Site(7,13 and 19) can be completed safely by coming no closer than 10 feet to building benching out 5 feet and using a 1 to 1 slope. As for eastern sidewalk portion (Grids 20, 21 and 22), we can likely get closer to sidewalk property border using a 1 to 1 slope. We will also excavate soils where we see impact in Grids 14 and 15 in addition to already proposed cellar area. ORC will be placed in all completed excavation areas. We anticipate this work will begin week of July 23. - JK 08/02/07: On 7/31/07, received letter from Bill Simmons of ECS dated 7/30/07 (in eDocs), informing DEC of progress at site and addressing my recent concerns. Letter restates comments in his 7/12/07 email regarding depth of excav in various grids with sloping rqmnts to protect struct integrity of abutting bldg, says excavation is expected to begin week of 8/6/07. - JK 01/02/08: Sent email to Bill Simmons of ECS requesting remediation update: I was going through my spills and noticed I haven't had an update on this case since August. Can you send an update on progess of soil excavation? Has de-watering been performed, or application of ORC to excavation? Has end-point soil sampling been performed, and if so, are any lab results available? I think it would be advisable to have DEC review end-point sampling data prior to backfilling excavation. Also, has any additional GW sampling been done? I remind you that RAP I approved for Cumberland Farms - who are, to my knowledge, Responsible Party for this spill - included quarterly GW

EXXON (Continued) **S107415886**

monitoring prior to remediation. If CFI no longer considers themselves responsible for addressing this spill (which would be news to me), please let me know right away. I re-read my notes on this site, including comments in an email from you which gave impression that there may be more than one RAP for site. In other words, I sense that some parties involved (i.e., Langan) are operating under RAP that was not submitted to, reviewed and approved by DEC. If property owner and/or responsible party wish to achieve closure of this spill, we all need to be on same page. Got email reply from Bill: Project is progressing. We are all operating under same RAP so I do not know what you are referring to. Impact Environmental operates dewatering system for CFI and developer and performs daily on-site Health & Safety Monitoring per DEP requirements. Langan is not doing anything except overseeing that things are being performed per all requirements on behalf of developer. 1. From Aug. 27 - Sept. 22, 2007, 1,213.71 tons of soil were removed from GRIDS 7, 10, 11, 13, 14, 15, 19 & 20, up to 12'-13' feet below grade. ORC was added to GRIDS 7, 13, 14, 19 and 20 - See Attached Plan. Post-Ex data from these GRIDS is attached in Table [in eDocs]. 2. Dewatering system was started on 12/12/07. Soil excavation within cellar area down to 15'-17' feet in GRIDS 10, 11, 12, 16, 17, 18, 22, 23 & 24 began on 12/19/07, and is on-going. 3. As we discussed in June '07 it was not possible to do any GW monitoring prior to soil excavation other than what I sent you on 6/19/07, because all wells had been destroyed. 4. I expect cellar soil excavation, post-excavation sampling and ORC application to be completed in next few weeks, but lagging construction for sidewalks for sidewalks will determine this schedule. I sent email to Bill: Thanks for update and soil data. I'm glad end-points look pretty good so far. I guess I got impression there may be more than one remedial plan (besides April '06 ECS plan I approved) because in my notes I've written that Langan mentioned installation of a vapor barrier and sub-slab depressurization system. I recall that RAP I approved mentioned installation of moisture barrier, with presumption that there would be basement extending into water table, and only mentioned passive sub-slab venting system as a possibility. I thought maybe Langan had submitted a more detailed proposal for sub-slab system to NYCDEP because of e-designation - I know they've been submitting reports to DEP and I'm not sure if I'm copied on all of them. Do you have any sampling data for de-watering discharge? I know this is regulated by DEP, not DEC, but I figured if you have data, it could provide some clue as to GW conditions at site. and sent another email: P.S. to my last email, you're right that we discussed GW sampling in June and agreed GW sampling is not possible because wells are destroyed (your item #3 below). Please let me know when you think it might be possible to begin installing some perimeter wells to do follow-up GW monitoring - can this be done once excavation, dewatering, and sidewalk construction are completed, or will it have to wait until site re-development (i.e., new building) is fully complete? Bill wrote back: Wells will not be able to be installed until after development likely - utilities have been moved and sidewalk will be closed until then, and there are site trailers on sidewalks etc... Then Bill sent another email with attachments, stating: I want us all to be clear on all of this. DEP did require installation of vapor barrier and sub-slab depressurization system for building due to e-designation and Langan did previously submit plans to DEP which were approved for developer. I thought you were referring to RAP for Soil and GW issues only. Documents are attached

EXXON (Continued) **S107415886**

for SSDS and waterproofing. I will forward anything else I can find from Langan regarding this. As for de-watering - I have not seen any data but I can and will request this from Impact - which I will receive eventually anyways in their discharge report/documentation. Attachments (in eDocs) were specs, product info & site plans for waterproofing, vapor barrier and sub-slab depressurization system, plus NYCDEP approval letter of same, and DEP Notice To Proceed letter. I sent another email to Bill: I had a chance to look more closely at post-excavation soil data (I didn't initially see there were multiple sheets to Excel file), and noticed there was one sample that had some significant exceedances of TAGM 4046 recommended cleanup objectives - GRID 13 Eastbase 12'-13' sample. Is excavation still open in area where this sample was collected, and would it be feasible to dig a little more soil out in this area? - J. Kolleeny 01/03/08: Received email reply from Bill Simmons of ECS to my 1/2/08 query about excavating addt'l contam soil: Could not dig any further or deeper in that area. Abutting building structure began to be compromised with sidewall cave-ins exposing foundation which was original brick, and GW was not helping - they had to backfill immediately after sample was collected and ORC was added. This is only very small area (less than 5x5 feet) of this sample that exceeded and we dosed it with ORC extremely well. Also, received emails from Bill with attached documents: an 8/1/07 letter rpt from Langan Engrg to NYCDEP, modifying and providing details of their earlier conceptual proposal for waterproofing/vapor barrier system for planned site building, and 12/6/06 letter rpt by Langan to DEP, serving as an addendum to ECS's April '06 RAP; Langan's addendum provides info regarding: (1) capping open areas of site with clean fill/top soil, (2) providing construction health & safety plan, (3) vapor barrier, and (4) active sub-slab venting system. Both Langan documents are in eDocs. I sent email to Bill Simmons: Thanks for providing these documents. I'm satisfied that remediation of subsurf petroleum contam at site is being performed in accordance with April '06 Remedial Action Plan by ECS which I reviewed & approved. Issues addressed in various documents Langan submitted to NYCDEP, including waterproof membrane, vapor barrier, sub-slab depressuriz'n system, and capping of open areas of site with 2 feet of certified clean fill material, are issues that I do get involved with at some of my sites. In most of those cases, I also request involvement of NYS Dept. of Health in reviewing & commenting on such plans. However, in this case, since NYCDEP is taking such an active oversight role because of property's e-designation, I do not feel need to be directly involved in reviewing and evaluating various engineering controls and vapor mitigation measures planned for site, or to request involvement of NYSDOH. Nevertheless, I would appreciate being copied on correspondence regarding such issues between Langan and DEP. - J. Kolleeny 03/16/09: Sent email to Bill Simmons of ECS: I don't think I've heard anything about this site in long while. Can you provide an update? Bill sent reply: No envt'l or construction work has been done at Site since Oct.'08, we think developer has some financial issue which has put project on hold. We have occasionally tried to contact them for their plans, but no response yet. However, here is an envt'l RAP summary so far: We believe that all petroleum-impacted soil excavation has been completed that has generated approx 5,555 tons of soil for off-site recycling -unless developer plans to excavate other areas of site in future and it is discovered - but remaining plans we know of now only consist of removal of top 4 feet of urban fill to be

EXXON (Continued) **S107415886**

replaced. > 100 post-excavation soils samples were collected from completed excavation areas for lab analysis. ORC (Chemical treatment) in base limits of soil excavation has also been completed. Over 10 million gals of GW were de-watered, treated and discharged until system was shut down last week of Aug.'08. GW samples collected just prior to shutting down system on 8/27/08 from INFLUENT before bag filters had 6 VOCs at low levels but still above DEC standards (7 ppb toluene, 6.7 ppb ethylbenzene, 30 ppb xylenes, 11.3 ppb MtBE, 11.5 ppb 1,2,4-Trimethylbenzene, and 5.2 ppb 1,3,5-Trimethylbenzene) and sample collected after bag filters only had MtBE at 10.6 ppb (DEC standard of 10 ppb). Moisture/chemical barrier was installed in basement part of bldg, which has been constructed and formed to grade. Once development resumes, we will know timetable for install'n of off-site post-construction GW monitoring wells and sampling program. Let me know if you have any other questions. I sent back reply: Thanks for update. Will rpt be coming at some point summarizing work done to date, with end-pt soil sample results, details on amount of ORC applied to excavation, and recommendations for install'n of wells and post-remedial GW monitoring? - J. Kolleeny 09/10/09: On 9/9/09, received email from Bill Simmons of ECS: There is some action with this site. Developers are working on selling assets to new developer and they want to push forward install'n of wells in sidewalks soon, before any more work begins in future. To do so, driller (Zebra) need letter to DOT from NYSDEC authorizing access under Spill # to do this work in sidewalks of 10th Ave and 23rd Ave [Street]. Can you provide one asap? We want to try and install 2 wells in each sidewalk (total of 4) but this will be determined once utilities are located and access is available to those locations. We will also install 2 on-site along downgradient western boundary since building is not up yet. I sent sidewalk opening permit request letter (in eDocs) to Bill, cc to Chris Johnson of Cumberland Farms. - J. Kolleeny 12/14/09: Reviewed Remedial Action Plan Closure Rpt by ECS, dated 11/4/09 (parts in eDocs). Rpt summarizes all site invest & remed performed (including excavation of > 5,700 tons of soil, dewatering, and application of RegenOx & ORC Advanced), and presents results of post-remed soil & GW sampling that shows residual contamin in several areas of site. Based on substantial remedial work done to remove contam materials from site and fact that post-remed samples show decreased levels of contam compared with pre-remed samples, ECS recommended spill closure. I sent letter (in eDocs) to Chris Johnson of CFI, cc to Bill Simmons of ECS, saying DEC cannot close spill yet, because of need to monitor residual contam. I asked for quarterly GW monitoring, install'n of one new well NW of most contam well (MW-2) when site conditions permit, surveying of wells to determine up-to-date GW flow direction, submission of quarterly mon rpts. Also said if contam levels stay elevated, site may need addt'l remediation. Changed priority ranking to P2, since site is in monitoring phase. - J. Kolleeny 02/09/10: Reviewed Groundwater Monitoring Report & Work Plan by ECS, dated 2/5/10 (in eDocs). Rpt presents results of Jan. 2010 GW sampling of 6 on-site wells and work plan for install'n of addt'l well as I requested in 12/14/09 letter. GW results show total VOCs in worst well MW-2 decreased from 2,434 ug/L in Oct.'09 to 99 ug/L in Jan. 2010; 2nd worst well City MW-6 had 522 ug/L in Jan. 2010, down slightly from 550 ug/L tVOCs in Oct.'09. Work plan proposes new well in sidewalk along W. 23rd St. (west of SW corner of W. 23rd St. & 10th Ave.). I sent approval letter (in eDocs) to Chris Johnson of CFI, cc to Bill Simmons of ECS, saying new and

EXXON (Continued) **S107415886**

existing wells should be surveyed to determine up-to-date GW flow direction. - J. Kolleeny 02/10/10: Received email from Bill Simmons of ECS: New wrinkle to discuss. DOT plans to install an elevator to High Tran that abuts Site to west. Elevator will be installed in sidewalk along West 23rd St in NW portion of sidewalk. Attached is their plan [in eDocs]depicting where they plan on digging etc., which is to start week of Feb. 22. Our monitoring well MW-1 and their well CITY-MW-6 are in this area and will likely be destroyed but I ll find out next week. Newly proposed well MW-7 is east of this area and should be ok. I'll be meeting with them next week to discuss their plan including likelihood that if they dig to 15 -17 they will find petroleum-impacted soil since we only excavated up to these edges. We will plan on being there to cooperate management of this and collect closure samples. My question is this: We have to survey wells to get GW flow. These are options: 1. Survey all 6 wells before this works starts and use gauging data to get flow direction now. However, 2 wells will be destroyed in next few weeks so we will not have any more data from them and do not know if we will be able to install any replacement wells in this area. 2. Wait until this work is done, then install MW-7 and survey 5 existing wells. Maybe we will know once elevator project is done if any replacement wells can go in this zone and we could install it and survey it also. Please advise. I wrote back: I prefer option 2 - wait until DOT finishes installing elevator, then install MW-7 and see if it's possible to install one replacement well for 2 destroyed wells (since well CITY-MW-6 had moderately elevated contamination), and survey wells at that point. Thanks for keeping me posted. - J. Kolleeny 05/03/10: Reviewed GW Mon Update Rpt dated 4/28/10, by ECS (in eDocs). Rpt summarizes March 2010 post-remediation GW sampling event. Worst well, MW-2, had total VOCs of 558.5 ug/L, up from 99 ug/L in Jan. 2010 (but down from 2,395 ug/L in Oct.'09). Well City MW-6 had tVOCs of 39 ug/L, down from 349 ug/L in Jan. 2010; well MW-3 had 67 ug/L tVOCs, about same as 59 ug/L in Jan. 2010. Wells MW-1, MW-4 & MW-5 were ND for VOCs. Rpt states that DOT sidewalk elevator project is anticipated to start in May 2010. Future Work section of rpt states that ECS will notify DEC when DOT provides start date for elevator work, and will be on-site during soil excavation to collect post-ex samples; once DOT work is complete, ECS will install well I requested near NE corner of W. 23rd St & 10th Ave., and if applicable, replacement well in elevator area. These events and data from next qtrly GW event will be in next rpt. - JK 06/15/10: On 6/14/10, received email from Bill Simmons of ECS: An update: Due to ongoing delay on start of elevator sidewalk project (any day now for past 3 months) we plan to install proposed monitoring well MW-7 in sidewalk on June 16. On May 27, 2010 a construction crew discovered an abandoned 250 gal oil tank during pile cap excavation on SW portion of Site. Tank was partly filled with soil & concrete, was removed from ground and is currently stored at site covered in plastic tarp; it will be removed soon, as access to this area is now blocked. We collected soil samples from beneath tank that field-screened at Zero and submitted some samples for lab analysis. This will be summarized in next rpt. On 6/15/10 I replied: Thanks for update, glad you're proceeding with install'n of MW-7, and thanks for taking necessary steps with discovered 250-gallon tank. Keep me posted on progress. - JK 11/10/10: Reviewed GW Mon Update Rpt by ECS, dated 8/18/10, rcvd at DEC on 9/7/10 (in eDocs). Rpt summarizes install'n of addt'l well MW-7 in sidewalk along W. 23rd St. north of MW-2, as requested by DEC, in June 2010, and sampling of wells MW-1,

EXXON (Continued) **S107415886**

MW-2, MW-3, CITY MW-6 and MW-7, also in June 2010. Worst well was CITY MW-6, with 660 ug/L total VOCs. In June & July 2010, 483 tons of soil was excavated/removed from site for construction. Rpt states, for Future Work, that DEC will be notified when High Line Park elevator sidewalk construction project will start; once project is completed, need for replacement wells will be evaluated. - JK 12/10/10: Sent email to Bill Simmons of ECS: Any update on Highline Park elevator constructn project? Has any GW monitoring been performed since June 2010 event, which was summarized in update rpt dated 8/18/10? Bill wrote back: City began elevator project ~Aug. 23 by installing shoring in 44 x20 area in sidewalk. Between then and Sept. 7 they removed soil - 22 trucks, which equates to somewhere around 550-650 tons or so removed from surface to 17 ft deep. They dewatered and treated via carbon from around Sept. 7 through sometime around end of Oct. or early Nov., reportedly at around at least 8,500/GPD. June 2010 GW sampling event was last. All site wells have been destroyed, even wells in east sidewalk along 10th Ave. Building is going up and taking up every inch of space they have to street edges. We were on-site during portions of this work but no post-ex soil samples could be collected due to shoring walls and base at 17 was all mud. We are trying to get any soil disposal manifests and dewatering backup, but I can t promise. I will at least try to get specifics # s on any of tonnage and gallons if I can. I sent back response: Thanks for update. Do you know if City did any sampling of untreated and/or treated dewatering water, and if so, if it's possible to get hold of any of sampling results? He wrote back: That is what we are looking to get. They told us prior to installing dewatering pump and setting up system that they were planning on collecting an influent untreated sample and they were discharging to sewer so they must have been sampling that according to whatever permit they had but they have not provided us any info. I will try again and let you know they are very evasive. - JK 05/02/13: Reviewed Spill Closure Rqst rpt by ECS, dated 4/22/13 (in eDocs). Rpt summarizes all investigative & remedial actions performed at site. In particular, rpt notes that in Oct. 2005, ~1,565 tons of petroleum-impacted soil were removed from former UST area on northern portion of site and 5,741 gals of GW were pumped during dewatering activities; between July & Aug. of 2007, ~1,924 tons of soil classed as clean fill were excavated from top 5 ft of entire site; between Aug. 2007 and Oct. 2008, 5,712 tons of soil were excavated at depths ranging from 8-18 ft, from 70% of site (some end-point samples showed residual soil impacts); RegenOx and ORC Advanced were applied to excavation; and ~ 9,158,400 gals of GW were pumped out, treated and discharged to DEP combined sewer as part of construction- and excavation-related dewatering. Also, in Aug.-Oct. 2010, as part of construction activities for NYCEDC elevator (along west 23rd St) to High Line Park, ~850-950 tons of petroleum-impacted soil were excavated to depth of 17-18 ft (9-10 ft below water table) from 44' x 20' area of sidewalk along 23rd St., along NE site boundary, and a GW dewatering system operated for 6 weeks pumping ~8,500 gals/day, for total of ~380,000 gals recovered, treated & discharged (ECS was not able to obtain actual data on soil or GW from NYCEDC). In addition to these remedial actions, a vapor barrier membrane and active sub-membrane depressurization system were installed beneath bldg (except cellar area which extends into GW and has waterproofing); these engineering controls will mitigate potential vapor intrusion from any residual soil & GW impacts. Last available post-remedial GW

EXXON (Continued) **S107415886**

data, from June 2010, showed worst result was 660 ug/L total VOCs in well CITY MW-6; this well & several others were destroyed during NYCEDC's High Line elevator install'n project, but presumably soil excavated and GW dewatered during project would have helped reduce residual GW contaminant levels and promote further natural attenuation of any remaining impacts. Based on all remedial actions performed and engineering controls implemented, ECS concludes that no further action is warranted at site and requests spill closure. I concur. I closed spill, sent closure letter (in eDocs) to Chris Johnson of Cumberland-Gulf Group of Companies, cc to Bill Simmons of ECS. - J. Kolleeny "

Remarks: "Caller reports removing five 4000 gallon tanks. There is contamination at the site. Caller reports no holes in the tanks. Cumberland Farms will be contacting a company for cleanup. Contractor on the site removing the tanks is: Tyree Orginazation Roland Fisher 631.300.6753."

Waste Description:	TETRACHLOROETHYLENE
Waste Code:	P001
Waste Description:	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS,

CVS PHARMACY #10041 (Continued) **1015754402**

WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Waste Code: P188
Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U072

CVS PHARMACY #10041 (Continued) **1015754402**

Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U204
Waste Description: SELENIOUS ACID (OR) SELENIUM DIOXIDE

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U279
Waste Description: U279

Waste Code: U411

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL Formerly assigned to Tomasello 4/10/2002 - Someone from Penske Truck Leasing called looking for a closure letter on this site. Sangesland spoke to him. DeMeo was on duty for the day, therefore it was assigned to DeMeo. Sangesland suggested the rep from Penske should send a copy of the original closure report to DeMeo along with a request for closure. 8/29/03 TJD Work plan approved. 12/9/03 TJD Transferred Demeo greater than greater than greater than Rommel. 1/7/04 Reviewed 12/31/03 report from GES proposing 5 additional delineation wells. Spoke to Tony Dellaria, GES, verbally approved additional well locations with the addition of one well downgradient of MW4. Letter to Penske, Route 10, Green Hills, PO Box 7635 Redding PA 19603-7635 Rommel 3/8/04 Spoke to Debra Kaplan,GES. Wells are scheduled for 3/22/04. Rommel. greater than greater than greater than 05/13/04 10:46AM greater than greater than greater than Ms. Rommel, Attached please find the Subsurface Investigation Report for the above-referenced site. The hard copy of the report was sent to you today. If you have any questions, please feel free to call Anthony Dellaria at (631) 420-5095. Thank you. greater than greater than greater than Jennifer Rommel 05/13/04 03:43PM greater than greater than greater than DEC approves the work proposed in the Subsurface Investigation Report dated 5/13/04. At the end of the three months of HIT events, please submit an evaluation of the need for a permanent recovery system. 5/17/04 Received summary, 4 mw installed. Total 8 wells. Product in MW1 and MW4 - quarterly bailing recommended. Rommel 10/14/04 Reassigned from Rommel to Sun. 10/31/04 File Update by Sun: - On 11/22/04, Sun sent a letter to Richard Saut of Penske requiring complete delineation of soil and groundwater contaminations, submittal of an Investigation Summary Report followed by a Remedial Action Plan. The Department set a deadline of 12/10/04 for signing the Stipulation Agreement. The Stipulation Agreement was signed by Penske on 12/10/04 and implemented by the Department on 12/27/04. -On 12/21/04, Sun sent a letter to Richard Saut of Penske informing him that the Department has approved the Remedial Action Plan (RAP)/HypeAir Work Plan prepared by his Consultant, Groundwater & Environmental Service (GES) for the subject site; specifically two in-situ chemical oxidation events at the site via HypeAir air and Hydrogen peroxide injection system. The Department requires that due to the proximity of existing utility corridors, temperature, pH, pressure, oxidation-redox potential (ORP), conductivity and dissolved oxygen (DO) shall be monitored on all the monitoring wells. Any potential accumulation of vapors during the injection activities shall be avoided. (Sun) 02/21/06: Sun received 4th Quarter 2005 Site Status Update Report. Review of this report is pending. (Sun) 02/27/06: The Department approves the GES s request for two (2) additional injection events to be completed in April and May 2006; specifically two in-situ chemical oxidation (Chem-Ox) events at the above referenced site utilizing a hydrogen peroxide, ozone, and persulfate injection system (HypeAir). (Sun) 07/23/07-Sun: On

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

07/23/07 the Department approves the GES s request for performing enhanced product recovery through the injection of surfactant into MW-5. The Department also approves a series of high intensity targeted (HIT) remediation events using high vacuum extraction at monitoring wells MW-3, MW-4, and MW-5 to reduce residual hydrocarbons impacts on-site for 8-hour events for approximately four (4) months. (Sun) 08/09/07-Sun: On 7/18/07 Joe Sun of DEC was informed by Kevin Heaphy of Parson Brinckerfoff Amercica (PB) that the MTA will be using this site (Lot 60) and the adjacent Fed Ex lot for a mocking pit to build the initial shaft for Tunnel boring machine to be used for the No. 7 subway extension project. In general, the site is slated to be used as a staging area for the project. A meeting was held on 8/9/07 to discuss project among all the key parties, including DEC, MTA, NYCT, Developer, Parson Brinckerfoff (PB), Penske, property owner (Michael Silvermintz)and Penske s consultant, GES. The meeting concluded that PB will first review the GES s investigation and remediation reports and then will discuss with GES and MTA project team to assess if other viable remedial action plans (RAP) can be implemented to expedite the cleanup process. Any new proposed RAP will be submitted to DEC for review and approval. (Sun) 08/23/07-Sun: Sun received 2nd Quarter 2007 Site Status Update Report. Based on laboratory analytical results, a 64% reduction of disslved benzene, toluene, ethylbenze, and total xylenes (BTEX) concentrations has been observed on and off-site since initiating hydrogen peroxide and ozone injections at the site. (sun) 08/30/07: Sun received the following email from Heather Cloud of GES Joe, Penske and GES submitted all historical documents to Kevin Heaphy for his review. He reviewed the documents and we had a follow up call with him and the MTA this past Monday (8/27). During the call, Kevin brought up a suggestion of relocating the wells off-site or installing remote access points in the sidewalk. As discussed at the NYSDEC meeting, we told Kevin that that locating the wells offsite was not an option, and installing remote access points in the sidewalk could not be sufficient for our liquid level measurements and groundwater sampling activities. Additionally, there is a high pressure gas main in the sidewalk, so we would not be able to drill safely in this area. They did not have any additional suggestions or ideas beyond relocating the wells. (Sun) Since they did not have any additional suggestions, it was decided that GES is going to proceed with our approved work plan. We are actually scheduled to conduct our surfactant injection on September 5 and the high vacuum extraction events on the 6th and 7th. Once we get the data back from the first event, we will evaluate the effectiveness and move forward from there. (Sun) 11/19/07-Sun: Sun received the following email from Heather Cloud of GES, Hi Joe, We conducted the Surfactant Injection at MW-5 on September 5, 2007 followed by a high vacuum extraction event on September 7, 2007 to remove and recover residual product at MW-5. Since conducting the injection event, we have not seen any product at MW-5. Groundwater data at MW-5 prior to the injection (July 3, 2007) was 489 ppb BTEX (144 ppb benzene). Following the injection (October 12, 2007), groundwater data at MW-5 was 87 ppb BTEX (66 ppb benzene). Since the injection event, we have conducted 2 high vacuum extraction events on MW-3 and MW-4. These events were completed in September and October. Between the 2 high vacuum extraction events, we have recovered 5 pounds of mass and 1,300 gallons of water. We were at the site today and are at the site tomorrow to complete our 3rd high vacuum extraction event on MW-3,

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

MW-4, and MW-5. The 3rd QTR Site Status Update Report is currently being reviewed by the client, so you should have it shortly. (Sun) 02/15/08-Sun: DEc received the following email from Andrew Cullen of Penske, All, After much review, we have come to the conclusion that we will make an attemp to meet the requirements of the contractor and complete the necessary remediation work required by the NY DEC on two Saturday's per month. However, I need all the parties to understand that our agreement specifically states we need 2 to 3 days per month to perform the necessary remediation. Limiting us to only two days per month may cause the remedial efforts to go past our original estimates. Moreover, MTA also agreed to reimburse Penske for any premium costs assoicated with work that must be scheduled outside of normal working hours (i.e. Monday to Friday 8:00am to 5:00pm) . If at any time we find the contractor is not cooperating, our remedial efforts will require more than 2 days per month, or any invoices for premium costs or damage by the contractor are not paid in accordance with our agreement, we will alert the appropriate parties. I do not anticpate this happening, but given the events that have lead us to this point, I feel compelled to remind everyone of the terms and conditions of our agreement. (Sun) 03/04/08-Sun: Sun sent the following email to all the parties invloved, Penske may have to conduct remedial efforts more often than 2-3 days a month if project demands. The required frequency and nature of remedial efforts will depend on results of on-going remediation to be received in future. If current extraction method does not produce acceptable (to the NYSDEC) results, DEC reserves its rights to require Penske to undertake more aggressive remedial efforts. NYSDEC is not a party to any of the agreements between Penske and MTA, and reserves all rights under the existing Laws and Regulations. (Sun) 03/25/08-Sun: Sun received the 4th Quarter 2007 Site Status Update Report. (Sun) 07/03/08-Sun: Sun received from Heather Cloud of GES on the current site status: We are currently conducting quarterly groundwater monitoring and sampling. Our next groundwater sampling event is scheduled for this month. - Based upon the recent groundwater data, we are not seeing a reduction in the BTEX concentrations. See attached groundwater analytical tables. Therefore, the high vacuum extraction events don't appear to be overly effective at this time. We are currently evaluating alternate options to address the dissolved phase impacts. We are looking at potentially injecting sodium percarbonate or other potential oxidizers. The total BTEX concentrations are primarily comprised of benzene. We have seen great success in reducing benzene levels with sodium percarbonate at other sites. Also, this type of technology is not intrusive at all. With the MTA project going on, we are limited with the technologies that we can go with. - The 1st QTR QMR is currently being reviewed by Penske. You should have this report within the next week or so. (Sun) 8/4/08 - Carlson: Case reassigned to Carlson. Reviewed 1st Quarterly 2008 report. Wells sampled on 1/3/08. Maximum BTEX concentration 5,425 ppb (MW3), maximum MTBE concentration 64 ppb (MW3). Report notes that VEFR is not effective. Sent letter requiring submission of a new RAP and additional delineation by 9/12/08. 9/11/08 - Carlson: Approved extension to 11/14/08 for submission of a new RAP. Scheduled site visit for 9/25/08 to discuss potential locations for an additional delineation well. 9/30/08 - Carlson: Performed site visit on 9/25/08. Met with Heather Cloud of GES, Richard Saut of Penske, Charles Stives of Liro Engineering, as well as representatives from MTA and NYCT. Five monitoring/remediation wells have be destroyed

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

during recent activities. A location was identified for the installation of an additional monitoring well. RAP due 11/14/08. 10/6/08 - Carlson: Reviewed update report dated 9/23/08. Wells sampled on 4/26/08. Maximum BTEX concentration 3,537 ppb (MW3). They are pilot testing sodium percarbonate. 3/20/09 - Carlson: Reviewed Site Status Report dated 2/25/09. Delineation well discussed during 9/30/08 site visit was not installed. Destroyed wells were not replaced. Sodium percarbonate solution was injected into MW-1, MW-2, and MW-4 on 9/20/08. Wells were sampled on 10/25/08. Decreased concentrations were found in MW1 and MW2, but BTEX increased in MW4. Spoke to Heather Cloud at GES. She will submit workplan. Received Remediation and Delineation Work Plan dated 2/10/09. 4/16/09 - Carlson: Meeting held with Penske. Mark requested the addition of another boring. 4/23/09 - Carlson: Meeting held MTA. Access to most of the site not possible for 1 year because the TBM is in operation. Access to the sidewalk can be arranged. MTA will submit a construction timeline. 5/4/09 - Carlson: Received phone message from Sal McCabe - construction timeline will be submitted. 5/7/09: Received update report. Received email from Christopher Ward - mw5 has been located and will be abandoned (under future muck bin). 5/15/09 - Carlson: Received email. MW5 will be abandoned tomorrow. 7/1/09 - Carlson: Received cc of penske access request to sample wells on 7/25 7/2/09 - Carlson: Paul matthews of mta responded - requested sampling be delayed for one month. 7/2/09 - Carlson: I replied saying one month delay is ok. Construction timeline was not submitted as requested at the last meeting. 7/6/09 - Carlson: Received cc of penske access request to sample wells on 8/22/09. 9/18/09 - Carlson: Left voice message for Chris Ward to followup on case status. 11/5/09 - Carlson: Received cc of letter requesting access from MTA to sampling wells. Left voice message for Chris Ward to see if they were given access - need to get phone number for MTA contact Paul Matthews. 11/10/09 - Carlson: GES received access from MTA to sample wells. 2/12/2010: Received cc of letter from GES to MTA - access requested to sample wells on 2/20/2010. Spoke to Chris Ward. Update report will be submitted. 5/26/2010 - Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. 6/25/2010 - Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. Left message for MTA Philip McGrade to followup on status of construction. 6/29/10 - Carlson: Spoke to Paul Matthews at MTA (212-616-4462). TBM is still in operation 5 days/wk 24hr/day. No construction on weekends when GES samples wells. Remedial work on Saturdays would be very difficult due to access on site. Project completion scheduled for 2013. 7/27/2010 - Carlson: Meeting held with Penske on 7/27. NYSDEC to organize meeting with MTA to discuss access/remedial plan. 8/24/2010 - Carlson: Meeting held with MTA and Penske on 8/24. Penske to reinstall wells on a weekend. Wells to be covered with roadplates. Contractor will remove roadplates prior to remedial activitiy at the site. Penske/MTA/NYSDEC to perform site visit to confirm locations of new wells. 9/22/2010 - Carlson: Site meeting held to discuss well installation locations and procedures. GES will prepared updated site plan. 3-11-11. - Breen: Consultant, GES, sent in Site Status Update Report on CD today. Heather Cloud is Operations Manager. Sarken Dressler is the Staff Hydrogeologist. Report for 9610811 is on the same CD. 6/6/12 - Carlson: Reviewed Site Status Update Report dated 4/30/12. Wells sampled on 2/25/12. Wells destroyed in 2008 were not replaced. Max BTEX only 588 in MW-4. Max MTBE only 3 ppb in MW-8. Called MTA Philip McGrade at number in file.

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

Voice mail indicated this is not his number anymore. Left message at this number for help getting status of MTA 7-line extension project at this site. 6/8/12 - Carlson: Left message for Phil McGrade (646 252 8315) to follow up on 7 train extension project. 7/11/12 - Carlson: See new spill 1201147 at site - MTA found a diesel/#2 fuel oil in tank shaft location. Tank was removed. 9/14/12 - Carlson: Reviewed 2nd quarter 2012 update report. Existing wells show low concentrations. Destroyed wells were never replaced. Continue to followup on status of 1201147. Need to contact MTA to get status of MTA project. 11/19/12 - Carlson: Spoke to Paul Matthews at MTA - he isn't involved in project anymore. New contact is Steve Asquith 646-252-8326. Left message for Steve Asquith. 11/26/12 - Carlson: Spoke to Steve Asquith (917-217-4765). He is arranging access with Penske/GES. Send him my email address, he will cc me on correspondence with penske/GES; 11/27/12 - Carlson: Emailed Steve Asquith (sasquith@mtacc.info) - please cc me on correspondence with Penske/GES as discussed during yesterdays phone conversation. 12/11/12 - Carlson: Site meeting with Healther Cloud (GES) and Dave Mariani (Skanska). Well locations were marked out. Wells will be installed in january. 9/17/2013 - Carlson: Received FOIL request from Michael Silvermintz (michaelsilvermintz@gmail.com, 646-831-1443). Forwarded to DEC Silva for processing. 9/23/13 - Carlson: Received phone call from Steve Cambruschini - new owner will purchase this property and redevelop. They intend to sign a new stip. They plan on excavating impacted soil. He will email me for a FOIL request of file. Need to get contact info of new owner to send new stip. 10/10/13: received phone call from Christopher McMahon requesting FOIL review. Sent email to email Gloria Silva for FOIL review. Also, I requested he send me contact info for new owner so I can send new stipulation agreement. 10/28/2013 - Carlson: Reviewed 3rd Quarter 2013 Site Status Report. Monitoring wells gauged and sampled on 9/28/2013. Sheen (0.04ft) in MW-3R. Maximum BTEX concentration 1,410 ppb (MW-3R). 10/29/2013 - Carlson: Issued new Stipulation Agreement to 293 Tenth Ave. Corp, c/o Michael Silvermintz. Signed Stip due by 11/12/2013. RAWP due 30 days after effective date of the Stipulation. 2/21/14 - Carlson: Reviewed RAWP dated January 2014. Site to be excavation, dewatered, and redeveloped. Site will be excavated in former tank area to 11 ft below grade (4 ft below gw table). Excavation will be dewatered in order to extend below groundwater table. Hotspots encountered will be overexcavated, to the extent feasible. Two downgradient wells will be reinstalled in southern portion of property that will not contain a basement. Endpoint samples will be collected as per DER-10. Issued approval letter. 3/31/14 - Raphael Ketani. As of today, I am taking over case management from Ms. Carlson. The contact person is Chris McMahon at Langan Engineering, River Drive Center 1, 619 River Drive, Elmwood, NJ, 07407, (201) 794-6900. The proposed development of the site is as a 7 story combined commercial and office building. 4/9/14 - Raphael Ketani. I made an unannounced site visit. The site contained triple stacked office trailers on the West 26th Street side of the site. Standing from the outside, I could see that there was a lot of activity and equipment on site from the MTA construction next door for the 7 Train tunnel construction. So, I didn't enter the bounds of the site. However, I did take pictures of the site from the outside. I could see that workers were still finishing the brick work outside the MTA building that had been constructed above the tunnel shaft. 4/10/14 - Raphael Ketani. I tried to contact Steve Asquith (917)

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

217-4765 of the MTA to let him know that I was the new DEC project manager, but I could only leave a message. Later, I contacted Mr. McMahon (201) 794-6900. He told me that the MTA plans to be done with their work and off of the site by the second week in May 2014. Mr. McMahon added that the new owner intended to first demolish the former Fed Ex building that is adjacent to the east of the site during July 2014. Excavation of the entire site will take place to 14 feet below grade. Endpoint samples will be taken as per the plan included in the approved RAWP. I told Mr. McMahon that Langan should follow the soil contamination as much as possible before taking endpoint samples. This way, the samples will be low or non-detect with regard to any analytes and the whole process will go smoothly. Mr. McMahon stated that groundwater was about 8 or 9 feet below grade and asked about sampling the groundwater after the MTA leaves. I told him that this wont be necessary as Langan will dig out all of the contamination below the water table. Mr. McMahon stated that the beginning of redevelopment is planned for either September or October of 2014. I asked Mr. McMahon to send me the endpoint sampling map with a cover letter describing what will take place regarding the endpoint sampling and sample processing. I added that, later, the DEC will need the letter of acceptance from the facility that will receive the soil. Also, I stated, the DEC will need a letter from the facility that will accept the contaminated water that is collected. Mr. McMahon stated that once they know where everything will go, then he will send these letters. After this point, I said, the DEC will need a schedule describing the excavating, endpoint sampling, sample processing, foundation construction and so forth. Mr. McMahon said that he will send this to the DEC. At the end of our conversation, Mr. McMahon asked about the request by the owner for a change in the Stipulation Agreement whereby Penske is let off of the hook. I told Mr. McMahon that this is something Lou Oliva, Region 2 Chief Counsel, will have to work out with Penske. With that, the conversation ended. Mr. Asquith (917) 217-4765 called me back. He said that Skanska, the construction company building the ventilation shaft, is presently cleaning up the site. They told him that they expect to be off of the site by the end of April 2014. 5/2/14 - Raphael Ketani. I reviewed the First Quarter 2014 Site Status Update Report dated 4/29/14 that was submitted by GES. Groundwater sampling took place on 3/15/14 for wells MW-1, MW-2, MW-3R, MW-4, MW-6 to MW-8 and MW-10. MW-9R was not sampled as MTA equipment was over it. There was 0.02' of product in MW-3R. All of the analyses were for just BTEX. MW-1 had results from non-detect to just above the TOGS 1.1.1 standards. MW-3R had the results 660 ppb total xylenes, 913 ppb ethylbenzene, 95.5 ppb benzene, 13.1 ppb toluene. MW-4 results were 237 ppb ethylbenzene, 215 ppb benzene, 18.4 total xylenes, 10.7 ppb toluene. MW-10 had 2 non-detects and 2 very low hits. For MW-2, MW-6 to MW-8, the results were either entirely non-detect or mostly non-detect with one very low hit. MTBE varied in concentration from mostly non-detect to 8.98 ppb. Quarterly sampling is planned for June 2014. 5/19/14 - Raphael Ketani. Today I received a copy of the signed Stipulation Agreement from 293 Tenth Avenue Corporation. It was signed by Michael Silvermintz, President of the corporation, on 5/2/14. I hand delivered the Stip to the Region 2 legal division. According to the schedule in the approved Remedial Action Work Plan dated 1/24/14, the remedial activities are anticipated to take 4 months beginning in October 2014. Later, I was informed that the DEC needed the original signature page in order to make the executed Stipulation Agreement. I

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

contacted Mr. McMahon (201) 794-6900 and asked him to have his client send the original signature page with Mr. Silvermintz' original signature as soon as possible by regular mail. Mr. McMahon agreed to do this. 6/13/14 - Raphael Ketani. The Stipulation Agreement with the original signature of the president of 293 Tenth Avenue Corporation, Mr. Silvermintz, was given to me today. 6/17/14 - Raphael Ketani. The Stipulation Agreement was submitted to the Region 2 legal division for processing. 6/23/14 - Raphael Ketani. The Stipulation Agreement was signed by Venetia Lannon, Region 2 Director, and the original was sent to Mr. Silvermintz. 8/1/14 - Raphael Ketani. I reviewed the second quarter 2014 groundwater monitoring report for the site. The document was titled Site Status Update Report and dated 7/31/14. On 6/21/14, groundwater sampling took place at 6 onsite wells. Groundwater elevations were from 6.04' bgs at MW-8 to 6.71' bgs at MW-6. Flow was to the south. The wells sampled were MW-1, 2, 4, 6, 7 and 8. Wells MW-3R, 9R and 10 were inaccessible at the time. Well MW-5 had been abandoned some time ago. The VOC results for wells MW-1, 2, 6 and 7 were entirely non-detect for BTEX and MTBE. The sample from MW-8 had hits just above and just below the TOGS 1.1.1 standards. The results for MW-4 had 260 ppb of benzene and 424 ppb of ethylbenzene. In addition, a sample was taken from IW-2R on 3/21/13 and had 3530 ppb of benzene. Why this well was not sampled again was not explained. The contamination in the groundwater at MW-4 needs to be addressed. IW-2R needs to be sampled again. Also, wells MW-3R, 9R and 10 need to be made available for sampling, given that their loss is significant as there are not many wells for sampling.
Additionally, I checked the property database ACRIS for the current ownership information. The property is still owned by 293 Tenth Avenue Corporation at 5 Rosewood Lane, Wesley Hills, NY, 10901. The property block and lot are 697 and 56. There is a UCC1 with 540 West 26th Street Property Debt Investors IIA, LLC at 10 East 53rd Street, 37th Floor, NY, NY, 10022. 8/4/14 - Raphael Ketani. A letter was sent today to Mr. Silvermintz of 293 10th Avenue Corporation. In the letter, I stated that the work plan was overdue and that 293 10th Ave was in violation of the Stip. I added that if the work plan is not received by August 22, 2014, then the Department will take legal action. 8/28/14 - Raphael Ketani. Mr. McMahon (201) 794-6900/cell (201) 218-2339 had called and left a message that he wanted to talk to me about the site. I tried to return his call, but could only leave a voice message. 9/8/14 - Raphael Ketani. I spoke to Mr. McMahon (201) 794-6900/cell (201) 218-2339 today about future monitoring work at the site. He said that, right now, the owner is having trouble with the tenant of the building on the other lot. He refuses to move. So, the excavating has been pushed back to March 2015. Mr. McMahon stated that the MTA had destroyed all but two wells on the truck leasing site. He proposed that groundwater sampling be stopped as all of the contamination will be removed by the excavating. The excavating will include the areas of MW-2 and IW-2R, the two most contaminated locations. I asked Mr. McMahon whether end point samples will be taken. He said that the sides of the pit and the bottom will be sampled as per the guidance in the DEC regulations. I told him that the DEC will need manifests for all of the material that is removed. He said that we will get copies of every manifest. I told Mr. McMahon that this will be the approved plan of action for the foreseeable future. With that, the conversation ended. Later, Mr. McMahon sent me an e-mail clarifying and memorializing the excavation plan in more detail. He included 3

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

figures with the e-mail. 7/9/15 - Raphael Ketani. As I hadn't received any information about the spill case in some time from Mr. McMahon, I sent him an email requesting an update. Mr. McMahon sent a response email today: Progress at the site has been advancing; however, our schedule may have been a bit aggressive when we last spoke. The existing building demolition is nearing completion and we are working with the NYC TA to clear up a couple of issues regarding the building plans and the influence with their neighboring building and subway tunnel. Those issues are supposed to be resolved within the next two weeks and the site will pull their building and start construction immediately thereafter. I actually had put it in my mind to give you a heads up today or tomorrow that construction was going to begin shortly to give you a little advance notice if you were interested in visiting during construction/remediation. My client is VERY eager to start the project and has already signed a lease for 80% of the building that carries very heavy penalties for not meeting certain deadlines that are driving the project forward at this point. I am certain that barring further issues with TA that we will be mobilizing to the site within weeks. 7/10/15 - Raphael Ketani. I responded today by email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] and stated that the Department requires a report showing the work that had taken place to demolish the building, copies of all manifests for all materials that are removed from the site, copies of manifests for asbestos and asbestos contaminated material disposal - the receiving facility must be permitted for asbestos and the Department needs a copy of this permit, pictures of the demolition and excavation work, end point sample results, groundwater grab sample results (if any samples are taken), manifests for all liquids, contaminated soil and clean soil removed from the site and maps showing where the end point samples were taken. 8/20/15 - Raphael Ketani. Mr. McMahon (201) 398-4535/cell (201) 218-2339 had called and left a message yesterday and I returned his call today. He stated that preliminary construction had begun at the site. However, he stated that the building that was going to be demolished was not on or part of the spill site. It was on an adjacent property. I told him that, in this situation, he didn't need to send the Department any manifests or information regarding the demolition. He added that the groundwater would be prevented from entering the site by the construction of a barrier wall around where the basement would be. A machine would be used which would auger down 10 feet below grade. The auger will have holes in it. Once the auger reaches the target depth, then concrete will be pumped down the auger and the auger withdrawn. This will leave a column of concrete. Mr. McMahon mentioned that this would be like creating a secant pile wall, except that there would be more soil left between the piles. They would auger all around the proposed basement area. Any contaminated soil and groundwater will be collected and sent to appropriate disposal sites which heat the materials as a means of disposal. I told Mr. McMahon that this sounded alright to the Department. 12/1/15 - Raphael Ketani. Melissa Ng, Senior Staff Engineer from Langan (212) 479-5490/mng@langan.com sent Ryan Piper of the Spills Unit an email requesting information regarding the site as she was writing a Phase I for another site nearby. I sent her a copy of the case notes. 12/2/15 - Raphael Ketani. Ms. Ng contacted me directly by email and requested the 1/29/14 Remedial Action Work Plan for the site. I sent her the plan. 12/11/15 - Raphael Ketani. As there have been no updates since 8/20/15, I sent an email to Mr.

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] requesting information regarding the demolition of the building and the excavating of the site. 6/23/16 - Raphael Ketani. As there have been no reports submitted or progress updates, I sent an email to Mr. McMahon requesting an update, soil and groundwater analytical data, disposal manifests and pictures. Mr. McMahon responded to my email. He stated the following: The majority of the material at the site has been removed in conjunction with the remedial efforts at the site associated with the foundation construction. To date, we have collected 29 post-excavation soil samples and have a single sample that remains to be collected. Of the 29 samples, we have results for 27 of them. Based on a preliminary review of the results, there have been no exceedances of the CP-51 criteria. As of today, trucking is still occurring occasionally at the site. All petroleum impacted material has been shipped to the Bayshore facility in Keasby, NJ for treatment. We have yet to receive the manifests from the foundation contractor, but they were requested last week. I anticipate that it will take a few weeks to compile them. I have provided a link below for you to access recent pictures (6/17/16) of the site and I d be happy to speak with you regarding the project. http://clients.langan.com/lph/default.aspx?postTransaction=1231963216 Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] included a list of 15 pictures which were available at the internet link. Two pictures, 6801 and 6804, showed cylindrical objects sticking up in groups of 3 or 5 with some showing rebar sticking out of them. I sent an email to Mr. McMahon asking him what these structures were. He replied by email that they are concrete and steel filled caissons, which are drilled foundation elements that provide support to the building, several dozen were installed as part of the building foundation construction. The purpose of the picture is to show the waterproofing going beneath the pile caps and grade beams at the site. 9/19/2016 - Colton McPartland. Scanned paper file for DEC Raphael Ketani and placed on computer desktop for future bulk upload once naming convention is received from DEC Jane Obrecht. 9/22/16 - Raphael Ketani. I spoke to Mr. McMahon today by phone. He stated that the foundation has been constructed. Twenty three thousand cubic yards of soil was removed. The contaminated soil was taken to Bayshore for burning and recycling. Thirty post-excavation soil samples were taken. The results were non-detect for VOCs with only a small number of SVOCs. The last groundwater sample was completely non-detect. Samples taken from the dewatering system were clean. Another groundwater sample will be collected very soon. Two 550 gallon tanks were removed and will be registered. Two wells will be installed outside the foundation footprint. A private school will be constructed in the lower part of the building. 2/27/17 - Raphael Ketani. As no communications nor reports had been received in many months regarding the remediation of the site, I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] requesting the documents. A due date of 3/17/17 was set for the submission of the remediation report and the PBS registration. 4/12/17 - Raphael Ketani. I sent an email to Mr. McMahon informing him that the reports were overdue and requesting their immediate submission. Mr. McMahon called me today regarding my email today. He stated that the report was delayed because they wanted to collect a second round of groundwater samples. They did collect the samples and found that one sample had 230 ppb of benzene. So he will recommend quarterly sampling to the client. He added that he had most of the

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

documentation for the report and that it is in draft form right now. I asked him when the DEC might receive the report. He stated that he believed Langan could send it by the end of next week. With that, the conversation ended. 6/16/17 - Raphael Ketani. As the analytical results report was never sent, I sent an email to Mr. McMahon stating that 293 Tenth Avenue Corporation was in violation of the Stipulation Agreement. I added that we required the submission of the report by June 30th, 2016 or else fines and legal action can and may be taken. 6/21/17 - Raphael Ketani. Mr. McMahon (973) 560-4900 called to apologize for not sending the analytical results report. He said that the DEC will receive the report next week. He added that the latest groundwater sample was taken on 6/6/17 from the one remaining well which is outside the secant/foundation wall. He sent me an email with the VOC and SVOC analytical results table. All of the analytical results had decreased significantly, except for benzene. It was 230 ppb in the previous sample and was now 240 ppb in the current sample. He said that he didn't understand why only benzene remained high. He added that the earlier low analytical results for benzene were due to groundwater being pumped from the site. The pumping system was turned off during late 2016 and after this the benzene concentration rose. I told Mr. McMahon that, as a result of the cessation of pumping, the water table at the well may have also risen into some more contaminated soil and, thus, more oil dissolved in the groundwater. However, I could not explain why benzene would be affected, but not the other analytes. Mr. McMahon stated that the well will be sampled 3 months from now in order to see what the long term concentration trend is. I told him that would be fine. With this, the conversation ended. 6/30/17 - Raphael Ketani. I reviewed the Langan Engineers June 2017 DRAFT Remedial Action Report. The site will be developed by constructing a 7 story tall building which will house various facilities, including a multifloor private school. Six USTs containing gasoline and diesel were removed from the site. As a deep foundation was required for the building, a deep pit was dug which included removing 219 tons of petroleum contaminated soil. Initially, a groundwater monitoring well array was installed and elevated concentrations of various analytes were detected in the samples. Site investigations took place during 2002, 2003 and 2004. Wells MW-1 to MW-10 were installed both on and off site. Vacuum extraction events and LNAPL recovery took place. This resulted in the collection of 174.63 gallons of product. Injection wells IW-1 to IW-4 were installed during December 2004. Hydrogen peroxidie, ozone, sodium persulfate, sodium percarbonate and surfactant were injected from 2005 to 2008. The vacuum events were completed during 2007 and 2008 and recovered 4,827 gallons of oil contaminated groundwater. Also, 8.80 lbs. of product were collected in the vapor phase. Quarterly monitoring took place from October 2003 to March 2013. During March 2013, 12 wells were sampled. About 0.01 feet of product was found in MW-3R. BTEX was present in all of the on site water samples and in the off site sample from MW-8. LNAPL thickness varied from 0.01 feet to 0.18 feet and historically appeared in MW-1, MW-4 and MW-5 during monitoring events which took place from 2004 to 2006. The site was remediated in accordance with the January 2014 RAP. Soil and fill were excavated to 11 feet below grade. A total of 364 tons of non-hazardous soil and fill and 11,378 tons of petroleum contaminated soil and fill were removed. The materials were sent to Capital Development in Bangor, Pennsylvania and Bayshore Soil Management in Keasbey, New Jersey. Grace Preprufe 300R, Grace Preprufe 160R and

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

Grace Bituthene 4000 vapor barrier sheeting with a minimum thickness of 20 mil was installed as part of the foundation construction. Grace Preprufe 300R vapor barrier with a thickness of 46 mil was installed beneath the cellar slab, elevator pit slab, first floor slab and on the interior of the elevator pit sidewalls. Grace Prepruf 4000 vapor barrier with a thickness of 62 mil was installed on the exterior elevator pit sidewalls. Grace Preprufe 160R vapor barrier with a thickness of 32 mil was installed on the exterior of the western foundation sidewall and Grace Bituthene 4000 vapor barrier with a thickness of 62 mil was installed on the exterior of the northern, eastern and southern foundation sidewalls. A Health and Safety Plan (HASP), Community Air Monitoring Plan (CAMP), Soil Materials Management Plan (SMMP), Stormwater Pollution Prevention Plan (SPPP) and groundwater dewatering were conducted during the remediation of the site. Utilities and easements were located prior to any invasive work. Excavated soil and fill were screened for contamination. Suspect contaminated soil was stockpiled on site and covered prior to delivery to the disposal facilities. Each dirt hauling truck was inspected for contaminated soil on the undercarriage and tires prior to leaving the site. If contaminated material was present, then it was removed before the truck entered the street. The USTs were encountered at about 7.5 feet below grade in the eastern part of the site. They were 42 inches in diameter and 87 inches long. AARCO removed the two 550 gallon gasoline USTs on 9/26/15. About 630 gallons of mixed liquid was collected and disposed of at Tyree Services Corp. in Farmingdale, NY. Residual sludge and water was drummed and taken to Triumvirate Environmental in Astoria, Queens. The USTs were cleaned and cut up and sent to TNT Scrap in Brooklyn, NY. Thirty soil end point samples (PE-1 to PE-30) were taken from the sidewalls and the bottom of the tank graves from 3/31/16 to 6/28/16. The samples were sent to York Analytical Labs for processing via methods 8260B and 8270C. The analytical results were compared to the CP-51 standards. Five groundwater dewatering samples were collected before treatment from 6/22/16 to 8/11/16 and sent to the lab. The samples were processed via methods 8260B and 8270C. On 7/27/16, two permanent monitoring wells were installed (LMW-1 and LMW-2) to the south of the southern cellar foundation and soilcrete walls. The borings were drilled to 15 and 16 feet below the ground surface. Each well was constructed with a 10 foot long 10 slot screen. Post remediation monitoring was conducted using 5 onsite wells. Wells MW-6 to MW-8 were situated upgradient and across West 26th Street from the site. LMW-1 and LMW-2 were sampled on 8/11/16, 3/16/17 and 6/6/17. MW-6 to MW-8 were sampled on 6/1/17. Table 1 indicated that the results for the PE series of soil end point samples were almost entirely non-detect for VOCs and SVOCs. Table 2 showed that the influent water sample results for Discharge 1, 2 and 5 were almost entirely non-detect for VOCs and SVOCs. The results for Discharge 3 and 4 were more limited, but still showed that there were no detections. The groundwater sample results for LMW-1, LMW-2, and MW-6 to MW-8 were displayed in Table 3. LMW-1 had consistent very low to high (max. 240 ppb) analyte exceedences, but, with the exception of a sample from LMW-2 (3/16/17) and one from MW-8 (6/1/17), the VOC results for the other samples and the SVOC results for all of the samples were almost entirely non-detect. 7/6/17 - Raphael Ketani. I reviewed the Langan Engineers FINAL Remedial Action Report dated 7/5/17. The contents of the FINAL report appeared to be the same as in the DRAFT report. I approved the report without comment. 10/25/17

PENSKE TRUCK LEASING CO L P (Continued) **1000382741**

- Raphael Ketani. I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com requesting the latest groundwater analytical data. 12/8/17 - Raphael Ketani. I sent an email to Mr. McMahon requesting the latest groundwater data. 12/14/17 - Raphael Ketani. Mr. McMahon sent me the 12/5/17 and 12/6/17 groundwater sample analytical data for the site. Samples were taken from MW-1, MW-2, MW-6, MW-7 and MW-8. Locations MW-6 to MW-8 were upgradient and across the street to the north. MW-2 was in the southwestern quarter of the site. MW-1 was in the southeastern quarter of the site, but almost in the center of the site. The VOC exceedences for the samples from MW-2 and MW-6 to MW-8 were either none or no more than 19.2 ppb. However, the MW-1 12/5/17 sample had 10 VOC exceedences. Most of the exceedences varied from 6.3 ppb to 73.1 ppb, but benzene was 238 ppb. Mr. McMahon called me on the phone and we discussed the results. We agreed that the benzene result for MW-1 stood out. I commented that it was too high to close the case with. We looked at the historical trend for benzene from MW-1. The decreasing trend was noted. I asked Mr. McMahon whether any treatment solutions has been injected into MW-1. He stated that Langan had not done this. I told him that the Department will require that another round of groundwater sampling take place in order to see whether the decreasing trend continues and whether the benzene concentration has decreased further. He agreed to do more sampling. I also asked him to include a Kendall-Mann trend graph in the next monitoring report. With that, the conversation ended. 3/28/18 - Raphael Ketani. Yesterday, I received Table 1 and Figure 2 for the March 2018 groundwater sampling results. The samples were collected on 3/6/18 and 3/9/18. The VOC results were almost entirely non-detect for the samples from LMW-2 and LMW-6 to LMW-8. Though most of the VOC results for the sample from MW-1 were non-detect, there were still 9 exceedences of the TOGS 1.1.1 standards. The highest exceedences were for total xylenes at 63.7 ppb and benzene at 228 ppb. However, with both analytes, a decreasing concentration trend continued to be present. The SVOC results for all of the samples were almost entirely non-detect.

---------- I reviewed the case file. The information in the case file described the removal of 6 USTs and many tons of oil contaminated soil in the process of digging out the site for a deep foundation. Chemical treatments to remove additional contamination also took place at various times in the past. Based upon this information and the decreasing concentration trends which were evident from the latest versions of Table 1 and Figure 2, I determined that the gross contamination had been removed. Any residual contamination would not be a threat to the public or the environment. Therefore, I closed the spill case effective today and sent a spill closure letter to Peter Rosenthal and Eric DeSimone of Savanna at 430 Park Avenue, 12th Floor, NY, NY, 10022, Mr. McMahon (cmcmahon@langan.com) and Steven Ciambruschini of Langan. "

Remarks: "CALLER RESPONDED TO ABOVE LOCATION TO REMOVE FUEL TANKS. UPON REMOVAL SOME SOIL CONTAMINATION DISCOVERED. TANKS REMOVED AND SOIL EXCAVATION IN PROGRESS. NO CALL BACK REQUESTED."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

DEC Memo: "5/12/2006 Sangesland spoke with Joe Ostrowski at PTC about this site. He said the tank is in a tank room and began to leak. The owner hired PTC to ONLY vac out the tank. Joe says approx. 25-30 gal of #6 oil remains under the tank along with oil soaked debris. Unknown who is doing the cleanup. Property Shark says the building has several alternate addresses: a/k/a 548-552 West 28th St & 547-553 West 27th St NO PBS records found for any of these addresses.... Probably in PBS Violation Property Shark Owner: Mariners Gate, LLC 548 West 28th St, NY, NY 11101 Property manager- Jim Pastreich, Pinetree Group 212-279-5600 Sangesland spoke to Mr. Pastreich's secretary. He'll call back. 5/12/06- DEC Piper responded to site. Oil soaked debris remains under tank. Tank was emptied and cleaned yesterday. Seam in tank was cracked. DEC Piper instructed Jim of Pinetree to contract cleanup co. ECO Kurt Bush responded to site and issued ticket for un registered tank. PTC issued proposal. PTC to cleanup on Monday and investigate presence of oil b/w tank and vault. 5/16/06- DEC Piper spoke w/ PTC. As per conversation, there is oil between the tank and the vault. A hole drilled through the vault revealed product. Piper issued CSL. 5/19/06- DEC Piper spoke w/ Jim. As per conversation, soil contamination removed. Repairs will be made to tank and retested. Jim did not mention contaminated material b/w tnak and vault as PTC described to DEC earlier. Jim will contract out another concractor as PTC services were not rendered/ nor wanted. Piper faxed list of contractors to Jim. This work needs to be completed. 10/4/06- DEC Piper left message for Jip P to call back w/ update and documentation. Piper searched PBS and the tank is now registered. 4/27/07- DEC Piper has not recieved any info on cleanup or repairs. Additionally, the PBS reg is expired. Referred to PBS for inspection. 9/24/07- DECP iper recieved disposal mainfests from work performed in 9/ 2006. Soil samples were recently collected. No VOC's over TAGM though there are a few SVOC's over. The tank has been repaired. PBS violations exist and has was referred to legal. This spill is closed. See edocs if warranted."

Remarks: "TANK IS LEAKING AND STILL INVESTIGATING CAUSE: IN PROCESS OF CLEANING AND IS IN A ENCLOSED TANK ROOM"

Update By:	SMQUANDT
Site Description:	"Location The site is located at 538-542 West 29th Street in the Chelsea neighborhood of Manhattan, and is identified on the Manhattan Borough Tax Map as Block 700, Lots 55, 56, and 57. The proposed BCP

542 WEST 29TH STREET (Continued) **S125298846**

site includes all three tax lots. The site is located on southern side of West 29th Street and is bound by West 29th Street to the north, mixed-use residential/commercial buildings followed by the elevated High Line and Tenth Avenue to the east, a multi-story residential apartment building followed by West 28th Street to the south, and a multi-story mixed-use residential and commercial building followed by Eleventh Avenue to the west. The No. 7 subway southern extension runs north-south below Eleventh Avenue, which is about 200 feet to the west of the proposed BCP site. Site Features The site occupies a footprint of about 9,900-sqaure-feet (0.227 acres) and is currently improved with one three-story commercial building (Lot 55), one three-story mixed-use commercial and residential building (Lot 56), and one two-story warehouse (Lot 57). The buildings are currently vacant. Current Zoning and Land Use According to the New York City Planning Commission (NYCPC) Zoning Map 8b, dated January 22, 2015, the site is located in a C6-3 commercial district. C6-3 includes a wide range of high bulk commercial uses. Buildings in this district are often corporate headquarters, large hotels, department stores, and entertainment facilities in high-rise mixed buildings. The existing zoning is consistent with the proposed commercial-use development. The surrounding area is primarily commercial and residential, but also includes manufacturing buildings, subway tunnels, public parks, churches, schools and day care centers. One sensitive receptor, Bright Horizons Day Care at Hudson Yards, is located within the immediate area (less than mile) of the site, about 100 feet to the north at 529 West 29th Street. The nearest ecological receptor is the Hudson River, located about 1,300 feet west of the site. As a result of the City Environmental Quality Review (CEQR) process, Block 700, Lots 55, 56, and 57 were assigned an E-Designation (E-142) on June 23, 2005 by the New York City Department of City Planning (NYCDCP) as part of the High Line/West Chelsea Rezoning (CEQR No. 03DCP069M). The E-Designation requires coordination with the New York City Office of Environmental Remediation (OER) to obtain a Notice to Proceed (NTP) or a Notice of No Objection (NNO) prior to obtaining building permits. The E-Designation addresses environmental requirements for hazardous materials (Hazmat), noise (window wall attenuation and alternative means of ventilation), and air quality during development. Past Use of the Site The site and surrounding area have been developed since the early 1800 s. The site was developed prior to 1890 with two unspecified use buildings which were demolished between 1899 and 1922. Lot 57 was formerly used as a lumber storage yard (1909-1944) and various auto repair facilities over a span of about 50 years (1945-1994). In 1995, the Lot 57 was purchased by Gotham Seafood Corporation, a seafood wholesaler. Sanborn maps indicate that Lots 55 and 56 were improved with mixed use-residential and commercial developments from about 1890 to 2005. Certificates of Occupancy (CO) provided by the New York City Department of Buildings (NYCDOB) identified an auto repair shop within Lot 56 in 1924 and 2012. In addition, available CO s for Lot 55 dated 1970 and 1987 identified manufacturing and a heating plant with potential fuel storage. Currently, all of the lots are vacant. Adjoining properties were historically used for residential, commercial, industrial and manufacturing operations. Site Geology and Hydrogeology Historic fill material was encountered immediately beneath the building foundation slabs and extends to depths varying from about 7.5 to 10 feet below grade surface (bgs) at 540 West 29th Street (Lots 56), and from about

542 WEST 29TH STREET (Continued) **S125298846**

3 to 12 feet bgs at 542 West 29th Street (Lot 57). Historic fill material was encountered below the cellar slab at 538 West 29th Street (Lot 55) at depths ranging from 3 to 5 feet below cellar grade. The historic fill predominately consists of brown fine- to medium-grained sand with varying amounts of gravel, concrete, asphalt, charcoal, slag, ash, wood, brick, and glass. The layer of historic fill is typical for this area of New York City. The fill layer is underlain by native soils typically consisting of reddish-brown to olive, fine- to medium grained silty sand with varying amounts of gravel and silt. Petroleum impacts, evidenced by odors, staining, and/or photoionization detector (PID) readings above background levels, were apparent in two soil borings (SB03 and SB06) at depths ranging from about 0 to 10 feet bgs and 14 to 15 feet bgs, respectively. Groundwater was encountered at depths ranging from 3.2 feet below cellar grade at 538 West 29th Street (Lot 55), 9.2 to 11 feet bgs at 540 West 29th Street (Lot 56) and from 8 to 11.51 feet bgs at 542 West 29th Street (Lot 57). Based on the well gauging results, groundwater appears to flow west toward the Hudson River, which is relatively consistent with regional topography."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE 6/8/05 - Project transferred to TLGibbons in Central Office, Albany 8/16/05 - Spoke with Brenden Keany, Mutual Redevelopment Houses, Inc., (212) 675-3200. Spill reported 5/23/96 by CDM during removal of twelve (12) 20,000 gal. #2 and #6 fuel oil USTs. The large fuel usage was for a cogen plant which generates electricity for ~3,000 people. After removing tanks and cleaning, went to dual fuel system, reinstalling only six 20,000 gal. #2 fuel oil USTs. Spoke with David Marabello (732-225-7000), CDM project manager during spill. He said that they excavated to the lateral and vertical limits possible, using shoring, without compromising structure of building. Southern portion of excavation encountered bedrock. Sixteen post-excavation samples were collected and evaluated for VOCs and SVOCs. All samples greater than 10 feet bgs. Elevated levels of VOCs and SVOCs were encountered in several samples, hovever, according to 10/2/98 CDM tank closure report, levels not indicative of gross tank failure, rather indicative of chronic spills over time. While some sporadic elevated levels of petroleum remain, everything that was

MUTUAL REDEVELOPMENT HOUSES (Continued) **U003127184**

reasonable to be done, was done. Close spill. "
Remarks: "OLD TANK APPEARED TO HAVE FAILED. TANK IS BEING REMOVED, CONTAMINATED SOIL WAS FOUND DURING REMOVAL PROCESS. INVESTIGATION IS UNDERWAY AT THIS TIME."

C01 - Pipe Location - Aboveground
J03 - Dispenser - Gravity
E07 - Piping Secondary Containment - Trench Liner
L09 - Piping Leak Detection - Exempt Suction Piping
I02 - Overfill - High Level Alarm

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	09/01/1999
Capacity Gallons:	240
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	ACDANIEL
Last Modified:	04/14/2017
Material Name:	lube oil
Tank Number:	AST5
Tank Id:	61709
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

G04 - Tank Secondary Containment - Double-Walled (Underground)
G01 - Tank Secondary Containment - Diking (Aboveground)
C01 - Pipe Location - Aboveground
J02 - Dispenser - Suction Dispenser
I00 - Overfill - None
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H99 - Tank Leak Detection - Other

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Tank Converted to Non-Regulated Use
Pipe Model:	Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

CON EDISON MANHOLE: 4160 (Continued) **1016143345**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Region:	2
DER Facility ID:	296101
DEC Memo:	"Sangesland sent contaminated soil letter Curt Schmidt said that Mark Tibbe knows about a major spill site just upgradient from this site. 2/5/03 - TRANSFERRED FROM SAWYER TO ROMMEL 3/1/04 Reassigned from Rommel to K Foley. Spill Remediation Plan received 12/22/03 for removal of four 260gal gas USTs, one 500gal gas UST, and one 500gal no. 2 fuel oil UST. Site under development but once contained three buildings. A former auto service and plastic manufacturing existed on site. Five USTs from NW corner were removed 9/29/03 (four 260gal gas USTs and one 500gal gas UST). Soil excavation was postponed due to safety concerns. Will excavate and direct load for disposal. A minimum of four post-ex samples will be collected at PID hot spots on each sidewall. DTW is 6'bgs and therefore a bottom sample will probably not be feasible. If there is potential for structural damage to the adjacent building, two soil samples will be collected from that sidewall. Two samples will be collected from sidewalls greater than 20' in length. Analysis by VOCs (8021) and SVOCs (8270). Spill #9704542 was previously reported for a fuel oil release from UST. Scaled site map with former tank locations/hot spots and Phase I and

555 WEST 23RD ST (Continued) **S105999938**

II reports. There have been site investigations and proposed remediation plans submitted for 543-547 West 23rd St (spill #8605848). There is documented fuel oil and gasoline contamination of groundwater associated with sites to the east that have encroached upon the site. Mendon Leasing, 527 W 23rd file(#9605688,9808740,9511782, 9513588). 3/22/06 Reassigned from Foley to Tang. (KMF) 4/3/06: Reassigned to Andersen. Three sources of contamination: Fuel oil leak from a UST in northeast corner. Gasoline leak from five USTs in northwest corner. Gasoline groundwater contamination from adjacent Mendon Leasing site. All six tanks were removed by Fleming Lee Shue (FLS). The tank closure report was not received. Spoke with FLS and they will resend a report that was sent to Albany. 4/7/06: Received and reviewed tank closure report. Soil was excavated from three areas of contamination. Residual SVOC contamination from urban fill and VOC contamination from the adjacent spill site is present. The site will be redeveloped with a vapor barrier. NFA letter sent. "

Remarks: "CALLERS COMPANY PERFORMING EXCAVATIONS ON SITE, AND SOIL SAMPLES ARE SHOWING GASOLINE CONTAMINATION OF THE SOIL AROUND SOME UNDERGROUND TANK SITES ON THE PROPERTY"

DEC Memo:	"02/03/06 Feroze talked with Mr. Minick (owner) 212-604-9898. He informed that there was a leak in the tank, they have closed the leak and pumped the oil out. It is above ground tank, floor is made of concrete. An environmental company is working for them. TTF is sent to : Mr. Minick 440 west 22nd Street New york, NY 10011. 02/10/06 Mr. Minick called and told me that they will close the tank by PTC. He will submit DEC the documents soon. 03/02/06 Feroze,: Mr.Minick told me that PTC has taken soil sample. He will submit soil analysis result and tank closer report to DEC soon.It was 275 gallon tank. 03/10/06 Feroze received a certificate and soil analysis result. The result shows that VOC and SVOC are within accepatble limit. They also submited a manifest for removal of contaminated soil. The spill is closed."
Remarks:	"ruptured tank in basement:"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

CON EDISON SERVICE BOX: 43092 (Continued) **1016143592**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DER Facility ID:	232628
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO/DO 12/19/02 - AUSTIN, DDO - TTF LETTER SENT 1/11/06- DEC Piper spoke w/ Eugene Degan, (PRev. Owner Rep 845.294.7509) regarding tank test. He could not be sure though he thinks the tanks are still empty. He will look into this. Piper then contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and will have previous owner get info. Galden Frankel performed Phase I and II on property. Left message at GF requesting call back. 1/18/06- DEC Piper

STUART DEAN COMPANY (Continued) **S105997685**

spoke w/ property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He will fax info. DEC Piper to review and inform Rob of additional work if warranted. 2/6/06- DEC Piper spoke w/ Rob S. I explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed iin place. As per Rob, he will be sending in the new appplication this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to insicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MtBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation. 5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST"

Remarks: "they are going to abandoned the tank"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"11/13/2020 - Feng - Desk Duty in office. Spoke to Paul Tyree and James Ross. It is a 5,000-gallon UST in the school's basement. It failed the tank test today. The tank tester is still at the site. There is still 3,500 gallons of #2 oil still inside the tank. They are planning to pump out the tank and to investigate whether there is a leak. They are looking for subcontractor to do the pump out. They are setting up temporary tank in the basement to hold the pumped oil. And they are setting a temporary heat system for the school. So far no determination of any loss. No signs of spills. There is potential smell in the basement and not sure about the building. Briefed to Veronica Zhune and assign her the spill for further follow up. She might inspect the site tomorrow to make sure the tank is pumped out. PBS 2-608435 Paul Tyree Metro Environmental office: 631-393-6655 Cell: 516-426-5224 ptyree@mesllc.org Property Manager: Andi Metaliaj 917-513-1023 11/14/20-Zhune responded to this spill. the tank is a 5000 -gallon tank UST and failed the test . About 3500 gallons of oil #2 were pumped out by Metro Environmental. There is staining in the boiler room. Waited for Custodian to walk me 5 floors of the school to check for odors in the school. Found room #1 (first grade) second floor with slightly oil odors. Did air monitoring in the 5 floors with the PID meter. The meter indicated 1PPM in some areas of the school. Installed scrubbers in the 5 floors. 11/16/20-Zhune spoke to Ms. Perez the principal of the school. She said everything is fine. No odors complaint in the school. 11/23/20-Paul Tyree email- I hope all is well. I just wanted to give you a quick update on the work that was completed at Guardian Angel today. . Took soil borings, groundwater and soil samples in the court yard and boiler room . Screen soils . Air monitoring continues . Ventilation system is up and operating in the school we expected to have the analytical results in hand within 10 days business days. We will send you the report with the data and our recommended next steps no later than 48 hours after. We should have it to you by 12/3/20. 12/12/20 - Obligado - I reviewed an email provided by Paul Tyree which included a request

GUARDIAN ANGEL SCHOOL (Continued) **S102672077**

to abandon the leaking tank in place. The email included soil sampling results, ground water sampling, and indoor air sampling results. The tank is present below a concrete covered courtyard. The tank is located adjacent to the area where oil staining was observed on the basement wall. Soil borings were advanced to a depth of 2 feet on all sites of the tank. No exceedences of CP51 soil clean up objectives were detected in any of the soil samples. One Gw sample was collected which also did not have any exceedences of GW standards. Indoor air samples were also cRollected from the basement, 1st floor, and 2nd floor. I sent the indoor air sampling results to NYSDOH to review. According to Nathan Walz there are some minor hits above background in the science and classroom that I expect will continue to decrease with time, since this is a school I would recommend that another round of samples be collected to confirm a downward trend. I forwarded the request for confirmatory indoor air sampling to Paul Tyree. 12/16/20 - Obligado - I inspected the site with Paul Tyree. No significant odors were observed in the cellar. No oil seepage into the boiler room was observed. The courtyard is completely surrounded by Church and School buildings. Removal of the UST not feasible or practical. I told Paul Tyree that they could proceed with the tank abandonment. 1/26/21-Paul Tyre from Metro Environmental Services LLC emailed the closure report dated 1/20/21. The report stated that MES properly close in place 1 x 5000 gallon UST. Soil samples were taken and analyzed for VOCs and SVOCs at an accredited laboratory. All results were below NYSDEC clean up criteria. A groundwater was obtained and submitted for analyzes. Groundwater sampling results were below NYDSDEC standards. Qualitative and Quantitative air sampling was conduct6ed and the last qualitative air sampling was below NYSDOH standards. Based on the information of the re[port this spill is closed. Spill closed."

Remarks: "ust in vault, unknown amount"

DEC Region:	2
DER Facility ID:	75604
DEC Memo:	"According to the NYSDEC records, on August 5, 1998, the on-site 2,000 gallon UST failed a tank tightness test and was issued Spill #98-05607. After review of information received from the client, it has been determined that after the UST failed tank tightness testing, the UST was cleaned, sandblasted, and relined with an epoxy lining, and the associated piping was replaced in September 1998. On July 10, 2003, the 2,000 gallon UST failed a tank tightness test wasissued Spill #03-03799. It appears that soil borings were performed to determine the extent of the UST leak/spill. Upon reviewing data received from the NYSDEC Spills Database, the NYSDEC notes section determined the soils were slightly above TAGM guidelines due to levels consistent with old coal ash fill materials and was granted closure status on September 2, 2003. The UST was emptied and taken out of service, and an 1,080 gallon steel registered AST was installed in a small cellar area near the north bay door area. On September 28, 2005, EnviroTrac contacted the NYSDEC regarding Spill #98-05607 to determine what isneeded to close the Spill. It was determined that since Spill #98-05607 was prior to Spill #03-03799

MIDTOWN NEON SIGN (Continued) **S104619635**

which is closed , and was the same tank and area, it should be closed as well. "
Remarks: "TANK TO BE EVACUATED, CLEANED, AND LINES TO BE TESTED."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE/SANGESLAND 12/10/2002 Sangesland reviewed a report prepared by David Winslow of ATC Associates Inc (212-353-8280). Report states that contamination was found around a buried 1000 gal tank under the floor of the building. The tank was cleaned out and excavated around. Because of foundation issues, the tank could not be removed and not all of the contaminated soil could be removed. Based on the soil conditions, Sangesland requested goundwater samples from the area. ATC took four groundwater samples in the area of this tank. GW is at approx 8 ft below the cement floor level. 3 of 4 samples are clean. One has some VOC hits just over 8020. Based on the location and the inability to excavate further, and that the surrounding water samples were clean, we can conclude that the contamination is localized and not spreading. Spill closed "
Remarks:	"CALLER STATES UPON REMOVAL OF THE UNDERGROUND TANK - FOUND HOLES IN THE TANK AND CONTAMINATED SOIL"

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

LUIS PHILLIP CLEANERS (Continued) **1004756634**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.
AIR MINOR
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"9/19/07 Called 212-593-9100 (# on FIR) and left message for Scott Ross (contact on FIR). Mr. Ross returned my call and left a message. I called him back and he said the tank was not tested. He confirmed that the tank is 2K (consistent with registration) and is not 5K as in the spill report. He said that the tank is a concrete wrapped tank. I called Mark Salamack of Petroleum Tank Cleaners (they did the test). I left a message and requested that he call me back. M. Salamack called me back and said the technician believes the failure is in the fill line. Also he told me the address was incorrect on the

APT. BUILDING (Continued) **S108765788**

Spill Report. The address is 312 NOT 12. Sent ttf letter to: Ivy Steele Chelsea London Co. c/o Buchbinder & Warren One Union Square West New York, NY 10003 Attn: Eva Matos Called Ms. Steele at 212-243-6722 and left message to call me back. Eva Matos called me back and told me the line failed and that PTC will be making the repairs. She also told me to send letter to her attention. I confirmed the mailing address with her. bf 10/9/07 Received fax from Eva Matos Letter included an invoice from PTC showing that the tank was retested and passed. Also, the fill line and vent line were replaced. No mention of contamination. I called Ms. Matos back and left a message on her voice mail. I stated that a letter is needed from PTC regarding any contamination found. Phone: 646-637-9019. bf 10/11/07 On 10/10/07, I received a letter by fax from Mark Salamack. Letter states that the failure was caused by a broken vent line. The fill line was compromised, but not broken. Both were replaced and no contamination was encountered. Tank was tightness tested on 9/27/07 and passed. NFA. bf 10/15/07 On 10/12/07, received message from Eva. She requested a call back regarding whether or not I received letter from PTC. I called her back (646-637-9019) and told her that I received the letter. bf"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

PBS #: 2-332607. as per PBS record, the site has one 6,000 gal #6 oil AST in vault, in-service, installed in Jan. 1965. as per NYC DOB record, a permit application was approved on 01/23/14 for replacement of oil burner with gas/oil burner and change of fuel oil grade from #6 to #2 oil. Chelsea Town LLC. **property owner** c/o Hoffman Management 300 West 55th Street, Suite 2S New York, NY 10019 Attn.: Mark Hoffman PH. (212) 247-4975 email: mhoffman@hoffmgt.com 11/06/14-Hiralkumar Patel. 9:20 AM:- spoke with Chris at All Boro. the tank was emptied out and cleaned as part of grade conversion from #6 to #2 oil. prior to filling up the tank with #2 oil, tank system was tested which failed. immediately, technician

TANK TEST FAIL (Continued) **S117364572**

conducted an isolation test of tank only and it failed. technician found crack in epoxy coating inside the tank. All Boro will do further investigation. Chris mentioned that 15% of the tank is in contact with surface. 9:42 AM:- sent TTF letter to Mr. Hoffman requiring report submission by the end of 12/19/14. letter emailed to Mr. Hoffman and Chris. 12/18/14-Hiralkumar Patel. 2:18 PM:- spoke with Chris. he will call back. 3:22 PM:- received call from Chris. currently the tank is empty and owner has decided to remove the tank system once a new natural gas heating system is installed. the new gas system may be installed by the end of Jan. 2015. 3:50 PM:- received email from Chris including above discussion about gas system installation and tank system removal. 04/16/15-Hiralkumar Patel. 10:09 AM:- left message for Mr. Hoffman inquiring update. 12:57 PM:- received call from Chris. he mentioned that a new gas line was installed two weeks ago and he got approval to remove the tank. he will provide work schedule soon. 10/26/15-Hiralkumar Patel. 1:22 PM:- received email from Chris including pics of tank room. he mentioned that tank has been removed. he will remove residual contamination noted underneath the tank and will collect endpoint samples. 12/28/15-Hiralkumar Patel. 10:49 AM:- received email from Chris including result of three soil samples. based on chain-of-custody, three soil samples were collected. found VOC contamination in all three samples. Chris asked if further remediation needed. soil sample results: ----------2 ft Front Head----2 ft Rear Head-----Center
Ethylbenzene----------210
Xylene----------410----------2,110----------400
1,2,4-Trimethylbenzene----------1,000----------12,000----------2,800
1,3,5-Trimethylbenzene----------380----------3,400----------760
Naphthalene----------440----------4,000----------1,200 10:58 AM:- sent email to Chris. informed him that based on submitted lab report, the department requires further remediation, if practical. 12/30/15-Hiralkumar Patel. received email from Chris (at 6:00 PM on 12/29/15). they will begin remediation on 01/04/16. 01/08/16-Hiralkumar Patel. 2:25 PM:- spoke with Chris at All Boro. they started remediation of remaining contamination on 01/04/16 and will finish work by next week. 01/20/16-Hialkumar Patel. 10:57 AM:- received email from Chris including some site pics. 02/16/16-Hiralkumar Patel. 11:17 AM:- received email from Chris including some site pics. 03/01/16-Hiralkumar Patel. received email from Chris (at 10:31 PM on 02/29/16) including results of five soil samples. out of five samples, minor VOC contamination noted in samples #1 (Head 36 inches deep) and #3 (60 inches deep center). found higher VOC contamination in sample # 5. soil analyticals: ----------# 5 Head 85 inches deep
Toluene----------530
Ethylbenzene----------2,200
Xylene----------19,500
1,2,4-Trimethylbenzene--------38,000
1,3,5-Trimethylbenzene--------11,000
Naphthalene----------6,400 10:11 AM:- sent email to Chris and asked him to submit scaled site map with sample locations. 10:18 AM:- received call from Chris. he is going for site meeting at 11 AM today and get measurements to prepare scaled site map. he mentioned

TANK TEST FAIL (Continued) **S117364572**

that sample # 5 was taken from bottom of the excavation, towards north end (towards W 30th St) near the building foundation wall. he stated that the most recent tank was located on 12 inches thick concrete pad, so contamination noted below the concrete pad is possibly a result of historical spill at the site which was confirmed by one of the board member. Chris confirmed there are no odor complaints from on-site occupants as tank location is in garage area. as excavation is inside the building and closer to the foundation wall, asked him not to conduct any further excavation. asked him to delineate remaining contamination prior to finalizing remediation action plan. also suggested him to have an inspection by a structural engineer prior to any further excavation. 10:29 AM:- spoke with John at Hoffman Management. informed him that based on available information, the department requires further delineation of contaminated material prior to finalizing a remediation action work plan. suggested him to have a structural engineer inspect the site prior to any further remediation via excavation. John Throumoulos Hoffman Management email: johnt@hoffmgt.com 10:56 AM:- sent email to John and informed him that the department requires further delineation prior to finalizing a remedial action plan. suggested him to have a site inspection done by a structural engineer prior to any further excavation. asked him to submit schedule for further investigation and submission of results. email copied to Mr. Hoffman and Chris. 04/06/16-Hiralkumar Patel. received email from Chris (at 10:40 PM on 04/05/16) including result of two soil and one groundwater sample. no contamination noted in samples. 12:06 PM:- received call from Chris inquiring about comments on sample results. he mentioned that boring was installed in area of former endpoint sample location B5. sample B5 was taken at 7 ft below basement level. during boring, they found groundwater at 6 ft below base of excavation (approx. 13 ft below basement floor and approx. 26 ft below street level). asked him to submit a boring log and sketch with location of endpoint samples and recent boring, prior to commenting on sampling results. 04/08/16-Hiralkuamr Patel. received email from Tom (at 4:09 PM on 04/07/16) including site sketch, boring logs and some pics. as per the sketch, five borings were installed through excavation, but two soil samples were collected only from one boring (B5). the submitted sketch is missing location of endpoint samples collected previously. 2:27 PM:- sent email to Chris and Tom and asked them to submit site sketch with location of endpoint samples and recent borings. 04/27/16-Hiralkumar Patel. received email from Tom (at 5:48 PM on 04/26/16) including report for delineation work conducted through tank excavation pit. abstract: - All Boro excavated accessible gross petroleum impacted soils from beneath the tank - the basement floor elevation is 10 ft below the exterior street level grade - excavation divided in three sections: southern most section is 3 ft deep, middle section is 5 ft deep and northern most section (towards 30th St) is 7 ft deep - five soil borings (B1 through B5) were installed through the base of the completed excavation - boring B1 was installed in northern most section of the excavation, to a final depth of 23 ft below exterior grade (13 ft below basement floor and 6 ft below excavation bottom) - borings B2 through B5 were installed in middle section of the excavation - borings B2, B3 and B4 were installed to a final depth of 16.5 ft below exterior grade (6.5 ft below basement floor and 1.5 ft below excavation bottom) where refusal encountered - boring B5 was installed to a final depth of 22 ft below exterior grade (12 ft below basement floor and 7 ft below

TANK TEST FAIL (Continued) **S117364572**

excavation bottom) - evidence of petroleum impact (elevated field screening readings and petroleum odors) was encountered in borings B2 through B5 - maximum of 57 ppm recorded on PID at 17-19 ft below exterior grade in boring B5 - two soil samples were collected from boring B5: 5 ft below excavation floor (20 ft below exterior grade) and 7 ft below excavation floor (22 ft below exterior grade) - due to refusal, no samples collected from B2, B3 and B4 - one temporary groundwater sampling well was installed in soil boring location B1 and collected one groundwater sample - groundwater was measured at 11 ft below basement floor (21 ft below the exterior grade) - found slight petroleum sheen and odors in groundwater sample - minor VOCs noted in soil samples (max. 340 ppb 1,3,5-Trimethylbenzene) - only Naphthalene (23 ppb) noted in groundwater sample above cleanup standard 10:05 AM:- sent email to Chris and asked to submit a detailed report for work performed at the site in referenced to the subject spill case. asked him to submit report no later than 05/06/16. email copied to Mr. Hoffman. 06/02/16-Hiralkumar Patel. met Chris in office. asked him about spill closure report. he mentioned that the report has not been submitted yet as they have not restored the site. asked him to submit report without waiting for site restoration. he will submit cleanup report by 06/17/16. 07/15/16-Hiralkumar Patel. 1:49 PM:- sent email to Chris and asked him to submit required documents by 07/20/16. 08/04/16-Hiralkumar Patel. received report from Chris including cause of release, summary of cleanup activities, samples result and disposal manifests. 08/12/16-Hiralkumar Patel. case closed based on review of all available information. 3:16 PM:- sent spill closure letter to Mr. Hoffman. letter emailed to Mr. Hoffman and Chris."

DEC Memo:	"03/20/08 - See eDocs for Con Ed report detailing cleanup and closure. 162146. This is a third party spill. On 12/6/05 at 22:02 E. Fermaint # 11181 flush supervisor called to report that at 22:00 while entering the yard at W. 28 st (281 11 Ave) he saw that a contractors truck had leaked 7 gallons of hydraulic fluid onto the concrete & asphalt. The contractor is Filco they pick up the wood debris. E. Fermaint spoke to the supervisor of Filco at 22:00 and he told E. Fermaint that the would be at the location in a 1/2 an hr to do the cleanup. There was no sewers or waterways affected. No fire or smoke was involved. No private property was affected. No injuries were related to the spill. R. Bruns # 21106 "
Remarks:	"leak from Filco truck - Filco will be cleaning up - ref 162146"

DEC Memo:	"08/09/16- Ahmed - EMIS# 249094 While prepping to build a platform in the W. 28th Street Flush facility excavation at 281 11th Avenue, coned collected soil samples. The lab results indicated 7350 ppm of lead from the soil excavated, based on the soil weight it was calculated 68lbs of lead found in the soil. Another foot of soil will be removed and the soil will be retested. Based on the discussion with Jeff and Jane, spill assigned to Ahmed. 3/30/21 - Austin - Con Ed takes soil concentrations of lead in the soils they excavate, determines total weight of the lead in the yards of soil removed, and then compares it to the RQ for lead in CBS reporting requirements. This is not a release - Spill closed - end."
Remarks:	"lead found in soil. area was cleaned up and removed from location"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
