Re: Groundwater Discharge
Queens West Parcel 9
File Case # 3874

Dear Ms. Lapin:

This is in response to your July 19th and September 26, 2005 submissions, requesting permission to discharge up to **96,000 gallons per day** (gpd) of groundwater generated during the excavation for soil remediation project, through a treatment system consisting of settling tanks, an oil-water separator, bag filters and carbon units, per provided schematic and information, continuously **for a period of three months,** to the on-site sewer connection leading to the sanitary sewer located at 47th Road between 5th Street and Center Boulevard in Queens.

Based upon the information, schematic and analytical data submitted, you are hereby conditionally authorized to discharge up to **96,000 gpd** of groundwater, per provided schematic and information, as specified in your submissions, for a period of three months, to the sanitary sewer at the above mentioned location.

This conditional approval, however, is subject to your obtaining a groundwater discharge Approval, specifying allowable flow rates, from the Division of Permitting and Connections, Bureau of Water and Sewer Operation. You are also required to properly maintain the selected treatment equipments.

Payment shall be made to the Bureau of Customer Service for groundwater discharge into the New York City Wastewater System in accordance with the Water and Wastewater Rate Schedule established by the New York City Water Board.

You are required to hold the groundwater to the maximum extent practicable during heavy wet weather events. In addition, you must notify this section in writing prior to the commencement of discharge. Refer to the File Case C-3874 in any correspondence to this office.

If you have any questions concerning this matter, please telephone Mr. Saied Islam, Assistant Mechanical Engineer, at (718) 595-4707.

Sincerely,

Frances Leung

Re: Groundwater Discharge
Queens West Parcel 9
File Case # C-3874

Dear Ms. Lapin:

On September 28, 2005 you were granted a conditional approval for de-watering /discharge of groundwater into City sewers for the above mentioned property.

Approval is contingent on your going to the Bureau of Customer Services to pay the sewer charges associated with the ***total volume of water to be discharged into the sewer system.*** To assess the sewer charges for the above mentioned property it is necessary for you to submit a licensed engineer's statement estimating the total volume to be discharged into the sewer during the entire period covered by the approval letter. Please note that your original application specified the ***maximum rate of discharge*** which is different from the figure we are now requesting.

Please forward your engineer's statement to one of the Borough offices below and we will compute the sewer charge for the duration of the de-watering process based on the NYC Water Board's Water and Wastewater Rate Schedule. All payments are to be made at the Borough offices and made payable to the NYC Water Board. Before coming to the Borough office for payment, you may call in advance to inquire of the actual amount due.

Sincerely,

Kevin Milosky/DS

RE: Dewatering at 48th Avenue and Center Boulevard
Queens West Parcel 9, Borough of Queens

Dear Mr. Lapin:

This is in response to your October 5, 2005, submission requesting permission to discharge up to 96,000 gallons per day (gpd) of groundwater, continuously for a period of three months through a proposed 8"dia. connection (size of proposed connection is based on SCQ-095/05) to the manhole on the 12"dia. sanitary sewer in 48th Avenue in the Borough of Queens.

Based upon the information, schematic and analytical data submitted, you are hereby authorized to discharge up to 96,000 (gpd) of groundwater as specified in your submission for a period of three months to the sanitary sewer at the above-mentioned location. The IPP Inspection and Permit Section have given you approval for this discharge by a letter dated September 28, 2005.

The discharger shall indemnify and hold the City harmless for any damage or liability incurred by the City due to the dewatering and in the event that the discharger results in overloading the capacity of the discharger sewer. See copy of the revised special Indemnity Agreement attached, to be signed and filed with the discharge permit application.

Please note that this approval is not valid until payment is made to the Bureau of Customer Service for groundwater discharge into the New York City Wastewater System in accordance with the Water and Wastewater Rate Schedule established by the New York City Water Board.

If you have any further questions concerning this matter, please contact Suresh Kumar. at (718) 595-5205.

Very truly yours,

Re: Dewatering Permit

Dear Commissioner :

(Property Owner) hereby agrees to indemnify and to save harmless, to the fullest extent permitted by law, the City of New York, the New York City Department of Environmental Protection (hereinafter referred to as the "City") and their respective offices, representatives, agencies, contractors, servants, and employees from and against any and all claims, suits, actions, proceedings, and losses that may arise after the date of this agreement from the construction, maintenance, operation, or use of any sewer connection (direct or indirect) to the City Sewer System for the purpose of dewatering.

In addition it is noted that the City is held harmless due to any harmful side effects of lowering the Water Table such as but not limited to impact of drawdown on the perimeter of the site, salt water intrusion, movement of contaminated groundwater, backflow due to surcharge of outlet sewer and effect on any wetlands.

Re: **Groundwater Discharge**
Queens West Parcel 9
File Case # C-3874

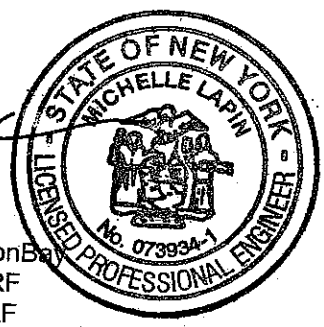

Dear Mr. Milosky:

We are in receipt of your October 4, 2005 letter requesting an estimate of the total volume of water to be discharged into the sewer system during dewatering operations at the subject property. Dewatering will consist of pumping groundwater from inside a sheet pile containment wall installed with water a tight sealant and driven into a low-permeability till layer. Dewatering operations will be conducted for approximately three months (90 days). Based on these parameters, the estimated total volume of water to be discharged to the sewer is 1,160,000 gallons. This estimate includes the initial pore volume of water within the containment wall plus vertical groundwater seepage through the till layer.

Please do not hesitate to call me at 646-388-9520 if you have any questions or require additional information. We will call your office next Monday (October 24, 2005) to inquire about the calculated sewer charges based on this estimate.

Sincerely,

1. Provide the Geographic Coordinates for the project site in NYTM Units. To do this you **must** go to the NYSDEC Stormwater Interactive Map on the DEC website at:

www.dec.state.ny.us/website/imsmaps/stormwater/viewer.htm

Zoom into your Project Location such that you can accurately click on the centroid of your site. Once you have located your project site go to the dropdown menu on the left and choose "Get Coordinates". Click on the center of your site and a small window containing the X, Y coordinates in UTM will pop up. Transcribe these coordinates into the boxes below. For problems with the interactive map use the help function.

X Coordinates (Easting)	Y Coordinates (Northing)

10. Is this a phased project? **(if yes, The SWPPP must address all planned phases)** * ○ Yes ● No

11. Enter the planned start and end dates of the disturbance activities

Start Date	End Date
10 / 24 / 05	02 / 28 / 05

Receiving System(s)

12. Provide the name of the surface waterbody(ies) into which construction site runoff will discharge.

East River

Newtown Creek

For Questions 13 and 14 refer to the Instruction Manual for a subset of 303(d) segments and TMDL watersheds subject to Condition A of the permit. These waterbodies and watersheds have been identified for regulation within the stormwater program due to a pollutant of concern. The Instruction Manual can be accessed at www.dec.state.ny.us/website/dow/toolbox/instr_man.pdf

13. Has the surface waterbody(ies) in question 12 been identified as a 303(d) segment? * ○ Yes ● No

14. Is this project located in a TMDL Watershed? * ○ Yes ● No

NOTE: If you answered Yes to either question 13 or 14, Pursuant to Part I.D.3.(b) of the permit, you must have your SWPPP prepared and certified by a licensed/certified professional and the SWPPP is subject to a 60-business day review.

15. Does the site runoff enter a separate storm sewer system- including roadside drains, swales, ditches, culverts, etc? **(if no, skip question 16)** ● Yes ○ No ○ Unknown

16. What is the name of the municipality/entity that owns the separate storm sewer system?

NYC DEP

17. Does any runoff from the site enter a sewer classified as a Combined Sewer? ○ Yes ● No ○ Unknown

18. Has the required Erosion and Sediment Control component of the SWPPP been developed in conformance with the current NYS Standards and Specifications for Erosion and Sediment Control (aka Blue Book) ?

(●) Yes ( ) No

19. Does this construction activity require the development of a SWPPP that includes Water Quality and Quantity Control components (Post-Construction Stormwater Management Practices) **If no, Skip question 20**

( ) Yes (●) No

20. Have the Water Quality and Quantity Control components of the SWPPP been developed in comformance with the current NYS Stormwater Management Design Manual ?

( ) Yes ( ) No

NOTE: If you answered no to question 18 or 20, Pursuant to Part I.D.3.(b) of the permit, you must have your SWPPP prepared and certified by a licensed/certified professional and the SWPPP is subject to a 60-business day review. Please provide further details in the details/comment section on the last page of this form.

- ● Land Grading
- ○ Lined Waterway (Rock)
- ○ Paved Channel (Concrete)
- ○ Paved Flume
- ○ Retaining Wall
- ○ Riprap Slope Protection
- ○ Rock Outlet Protection
- ○ Streambank Protection

Important:Completion of Questions 24-30 is not required if the project:

Disturbs less than 5 acres and is planned for single-family residential homes(including subdivisions) or construction on agricultural property and does not have a discharge to a 303(d) water or is not located within a TMDL watershed.

Additionally, sites where there will be no future impervious area within the disturbed area and that do not have a change(pre to post development)in hydrology do not need to complete questions 24-30.

24. Indicate **all** the permanent Stormwater Management Practice(s) that will be installed on this site

Post Construction Stormwater Management Practices

Ponds

- ○ Micropool Extended Detention (P-1)
- ○ Wet Pond (P-2)
- ○ Wet Extended Detention (P-3)
- ○ Multiple Pond System (P-4)
- ○ Pocket Pond (P-5)

Filtering

- ○ Surface Sand Filter (F-1)
- ○ Underground Sand Filter (F-2)
- ○ Perimeter Sand Filter (F-3)
- ○ Organic Filter (F-4)
- ○ Bioretention (F-5)
- ○ Other

Wetlands

- ○ Shallow Wetland (W-1)
- ○ Extended Detention Wetland (W-2)
- ○ Pond/Wetland System (W-3)
- ○ Pocket Wetland (W-4)

Infiltration

- ○ Infiltration Trench (I-1)
- ○ Infiltration Basin (I-2)
- ○ Dry Well (I-3)

Open Channels

- ○ Dry Swale (O-1)
- ○ Wet Swale (O-2)

Describe other stormwater management practices not listed above or explain any deviations from the technical standards. If the SWPPP does not conform to the technical standards, the SWPPP must be prepared and certified by a licensed/certified professional and is subject to a 60-business day review.

Has a long term Operation and Maintenance plan for the post construction management practices been developed? ○ Yes ○ No

If Yes, identify the entity responsible for the long term Operation and Maintenance

25. Provide the total water quality volume required and the total provided for the site.

Total Water Quality Volume (WQv)

WQv Required		WQv Provided	
,	acre-feet	,	acre-feet

26. Provide the following Unified Stormwater Sizing Criteria for the site.

Total Channel Protection Storage Volume (CPv) - Extended detention of post-developed 1 year, 24 hour storm event

CPv Required		CPv Provided	
,	acre-feet	,	acre-feet

The need to provide for channel protection has been waived because:
- ● Site discharges directly to fourth order stream or larger

Total Overbank Flood Control Criteria (Qp) - Peak discharge rate for the 10 year storm

Pre-Development		Post-development	
,	CFS	,	CFS

Total Extreme Flood Control Criteria (Qf) - Peak discharge rate for the 100 year storm

Pre-Development		Post-development	
,	CFS	,	CFS

The need to provide for flood control has been waived because:
- ● Site discharges directly to fourth order stream or larger
- ● Downstream analysis reveals that flood control is not required

IMPORTANT: For questions 27 and 28 impervious area should be calculated considering the project site and all offsite areas that drain to the post-construction stormwater management practice(s) (Total Drainage Area = Project Site + Offsite areas)

27. Pre-Construction Impervious Area - As a percent of the Total Drainage Area enter the percentage of the existing impervious areas before construction begins. %

28. Post-Construction Impervious Area - As a percent of the Total Drainage Area enter the percentage of the future impervious areas that will be created/remain on the site after completion of construction. %

29. Indicate the total number of permanent stormwater management practices to be installed

30. Provide the total number of stormwater discharge points from the site (include discharges to either surface waters or to seperate storm sewer systems)

8717

Other:

If this NOI is being submitted for the purpose of continuing coverage under a general permit for stormwater runoff from construction activities, please indicate the former SPDES number assigned.

N Y R

Details/Comments

This NOI is for the remediation project only. The site will be remediated and stabilized (no impervious surfaces). If required, a separate NOI will be filed by others for the future use of the site.

Certification

I have read or been advised of the permit conditions and believe that I understand them. I also understand that, under the terms of the permit, there may be reporting requirements. I also certify under penalty of law that this document and the corresponding documents were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person(s) who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. I further understand that coverage under the general permit will be identified in the acknowledgment that I will receive as a result of submitting this NOI and can be as long as sixty (60) days as provided for in the general permit. I also understand that, by submitting this NOI, I am acknowledging that the SWPPP has been developed and will be implemented as the first element of construction. and agreeing to comply with all the terms and conditions of the general permit for which this NOI is being submitted.
