

Clean Backfill Facility Certification

December 9, 2015

SCE Environmental Group
1380 Mt. Cobb Rd.
Lake Ariel, PA 18436

Re: RCA Uncontaminated Letter
4550 Vernon Blvd.
Long Island City, NY

Dear Mr. Butler:

This letter has been provided to SCE Environmental Group with regards to the 3/4" RCA and the 3" – 5" Stone which is being exported from Vanbro Corp. located at 1900 South Ave., Staten Island, NY to the above referenced site located at 4550 Vernon Blvd., Long Island City, New York. The materials being supplied have been derived from materials which are both present on site and inbound at our facility. The material is all commercially available and has been made from clean non-contaminated material.

Vanbro Corp / Richmond Recycling LLC only accepts Clean Uncontaminated material at the facility. Any materials being imported to our facility must meet our protocol and must be free from any known contaminants. The material is free from Asphalt, contains less than 10% brick and meets DEC ENR10 requirements.

Should you have any questions, or need any additional information, please do not hesitate to contact me.

Thank You,

A handwritten signature in dark ink, appearing to read "Gary Roth", is written over a horizontal line.

Dear Mr. Butler,

This is to certify that the 3/4" - 11/2" clean stone supplied to you for your project meets New York Department of Transportation Standard specifications and quality requirements. The source number is 524-530, stone test number is G2525 and the gradation sample number is 12907.

Please be advised that the material supplied from our Liberty Aggregates, LLC. yard, Lot: 19&25, Block: 21503, Jersey City, New Jersey, is free of any hazardous materials or contamination and is considered to be clean virgin material.

If any further information should be required concerning this material, please feel free to contact me at (201)240-4767.

Respectfully Submitted,

Liberty Aggregates, LLC.
