Sample and Data Qualifiers Relating to This Work Order

QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
ICVE	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration verification (recovery exceeded 30% of expected value).
EXT-Temp	Extraction temperture slightly exceeded acceptance range.
EXT-COMP	Completed
CCVE	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
CAL-E	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration (average Rf>20%)

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 12, 2024 and listed below. The project was identified as your project: **170197671**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 24L0934

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.
8. Analyses conducted at York Analytical Laboratories, Inc. Stratford, CT are indicated by NY Cert. No. 10854; those conducted at York Analytical Laboratories, Inc., Richmond Hill, NY are indicated by NY Cert. No. 12058.

Approved By  **Date:** 12/23/2024

Sample and Data Qualifiers Relating to This Work Order

P	This qualifier indicates the compound detected exhibited greater than 40% between the quantitation and confirmatory columns.
CCVE	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
EXT-COMP	Completed
EXT-Temp	Extraction temperture slightly exceeded acceptance range.
ICVE	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration verification (recovery exceeded 30% of expected value).
IGN-01	Non-Ignit.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
CAL-E	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration (average Rf>20%)
M-CCV1	The recovery for this element in the Continuing Calibration Verification (CCV) was outside the 90-110% recovery criteria.
S-GC	Two surrogates are used for this analysis. One surrogate recovered within control limits therefore the analysis is acceptable.
PF-01	No Free Liquid
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
QR-02	The RPD result exceeded the QC control limits; however, both percent recoveries were acceptable. Sample results for the QC batch were accepted based on percent recoveries and completeness of QC data.
QR-04	The RPD exceeded control limits for the LCS/LCSD QC.
S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
S-08	The recovery of this surrogate was outside of QC limits.
M-BS	The recovery for this element in the batch blank spike recovered slightly outside of control limits

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference

Wet — The data has been reported on an as-received (wet weight) basis

Low Bias — Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

High Bias — High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

Non-Dir. — Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 13, 2024 and listed below. The project was identified as your project: **170197671**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 24L1037

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.
8. Analyses conducted at York Analytical Laboratories, Inc. Stratford, CT are indicated by NY Cert. No. 10854; those conducted at York Analytical Laboratories, Inc., Richmond Hill, NY are indicated by NY Cert. No. 12058.

Approved By  **Date:** 12/23/2024

Sample and Data Qualifiers Relating to This Work Order

QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
M-CCV1	The recovery for this element in the Continuing Calibration Verification (CCV) was outside the 90-110% recovery criteria.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
ICVE	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration verification (recovery exceeded 30% of expected value).
EXT-Temp	Extraction temperture slightly exceeded acceptance range.
EXT-COMP	Completed
CCVE	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
CAL-E	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration (average Rf>20%)
B	Analyte is found in the associated analysis batch blank. For volatiles, methylene chloride and acetone are common lab contaminants.

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on January 06, 2025 and listed below. The project was identified as your project: **Willet Point Stadium**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

York Sample ID	Client Sample ID	Matrix	Date Collected	Date Received
25A0187-01	Stockpile #1	Soil	01/06/2025	01/06/2025

General Notes for York Project (SDG) No.: 25A0187

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.
8. Analyses conducted at York Analytical Laboratories, Inc. Stratford, CT are indicated by NY Cert. No. 10854, NJ Cert No. CT005, PA Cert No. 68-04440, CT Cert No. PH-0723; those conducted at York Analytical Laboratories, Inc., Richmond Hill, NY are indicated by NY Cert. No. 12058, NJ Cert No. NY037, CT Cert No. PH-0721, NH Cert No. 2097, EPA Cert No. NY01600.

Lab ID	Client Sample ID	Volatile Sample Container
25A0187-01	Stockpile #1	40mL Pre-Tared Vial + 10mL MeOH; Cool to 4° C

Sample and Data Qualifiers Relating to This Work Order

S-08	The recovery of this surrogate was outside of QC limits.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
IGN-01	Non-Ignit.
ICVE	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration verification (recovery exceeded 30% of expected value).
EXT-Temp	Extraction temperture slightly exceeded acceptance range.
EXT-COMP	Completed
CCVH	The value reported is estimated due to its behavior during continuing calibration verification (>20% difference for average RF or >20% drift for linear or quadratic fit.) This value may be biased high.
CCVE	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
CAL-E	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration (average Rf>20%)
B	Analyte is found in the associated analysis batch blank. For volatiles, methylene chloride and acetone are common lab contaminants.

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

Non-Dir. Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

Attention: Chris Zacharias

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on January 21, 2025 and listed below. The project was identified as your project: **Willets Stadium**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

York Sample ID	Client Sample ID	Matrix	Date Collected	Date Received

General Notes for York Project (SDG) No.: 25A1191

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.
8. Analyses conducted at York Analytical Laboratories, Inc. Stratford, CT are indicated by NY Cert. No. 10854, NJ Cert No. CT005, PA Cert No. 68-04440, CT Cert No. PH-0723; those conducted at York Analytical Laboratories, Inc., Richmond Hill, NY are indicated by NY Cert. No. 12058, NJ Cert No. NY037, CT Cert No. PH-0721, NH Cert No. 2097, EPA Cert No. NY01600.

Sample and Data Qualifiers Relating to This Work Order

QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
P	This qualifier indicates the compound detected exhibited greater than 40% between the quantitation and confirmatory columns.
M-CCV1	The recovery for this element in the Continuing Calibration Verification (CCV) was outside the 90-110% recovery criteria.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
IGN-01	Non-Ignit.
ICVE	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration verification (recovery exceeded 30% of expected value).
HT-pH	HOLDING TIME EXCEEDED. Samples for pH must be measured in the field or within 15 minutes of sample collection.
EXT-Temp	Extraction temperture slightly exceeded acceptance range.
EXT-COMP	Completed
CCVE	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
CAL-E	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration (average Rf>20%)

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

Non-Dir. Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

Field Chain-of-Custody Record

YORK ANALYTICAL LABORATORIES INC

York Analytical Laboratories, Inc. (YORK)'s Standard Terms & Conditions are listed on the back side of this document. This legal document serves as your written authorization for YORK to proceed with the analyses requested below. Your signature binds you to YORK's Standard Terms & Conditions.

120 Research Drive Stratford, CT 06615 132-02 89th Ave Queens, NY 11418 56 Church Hill Rd. #2 Newtown, CT 06470 2161 Whitesville Rd Toms River, NJ 08755 clientservices@yorklab.com 800-306-YORK

YORK Project Number: 25A1191

YOUR Project Name / Number: Willet stadium

PO Number: willet stadium

Samples Collected From: NY X; NJ; CT; PA; Other: (please specify)

Turn-Around Time: RUSH - Next Day; RUSH - Two Day; RUSH - Three Day X; RUSH - Four Day; RUSH - Five Day; Standard (6-9 Day); PFAS Standard 7-10 Day

Please print clearly and legibly. All information must be complete. Samples will not be logged in and the turn-around-time clock will not begin until any questions by YORK are resolved.

HP Lau

Samples Collected by: (print AND sign your name)

Matrix Codes: S - soil/solid/sludge; GW - groundwater; DW - drinking water; SW - surface water; WW - wastewater; O - Oil; Other

Preservative (please list number of containers)

Sample Identification	Date	Time	Matrix	Unpreserved	HCl (hydrochloric acid)	MeOH (methanol)	HNO_3 (nitric acid)	H_2SO_4 (sulfuric acid)	NaOH (sodium hydroxide)	$Na_2S_2O_3$ (sodium thio.)	Trizma	Ammonium Acetate	Other:	TAL/TCL+30 incl VOCs	Herbicides	EPH GRO 2	TCLP Metals	RCRA Characteristics	Grab or Comp. G/C
Stockpile 2A	1/21/25	0730	S											X	X	X	X	X	
Stockpile 2B	1/21/25	0740	S											X	X	X	X	X	

Report Type (circle): QA Report; Summary (Results Only); NY ASP B Package; NJ Reduced; NJ DKQP; NJ Full; CT RCP

EDD Type (circle): EQuIS (standard); NYSDEC EQuIS; NJDEP SRP Haz Site; Standard Excel; CMDP; Other:

Regulatory Comparative: Compared to the following Regulation(s): (please fill in)

Field Filtered; Lab Filtered

Comments:

Samples iced/chilled at time of lab pickup? circle Yes or No

NOTES:
Any Regulatory Exceedences are color coded by Regulation

Q is the Qualifier Column with definitions as follows:
D=result is from an analysis that required a dilution
J=analyte detected at or above the MDL (method detection limit) but below the RL (Reporting Limit) - data is estimated
U=analyte not detected at or above the level indicated
B=analyte found in the analysis batch blank
E=result is estimated and cannot be accurately reported due to levels encountered or interferences
P=this flag is used for pesticide and PCB (Aroclor) target compounds when there is a % difference for detected concentrations that exceed method dictated limits between the two GC columns used for analysis
NT=this indicates the analyte was not a target for this sample
~=this indicates that no regulatory limit has been established for this analyte

CLASS B RECYCLING CENTER GENERAL APPROVAL

Under the provisions of N.J.S.A. 13:1E-1 *et seq.* and N.J.S.A. 13:1E-99.11 *et seq.*, known as the Solid Waste Management Act and New Jersey Statewide Mandatory Source Separation and Recycling Act, respectively, and pursuant to N.J.A.C. 7:26A-1 *et seq.*, known as the Recycling Regulations, this approval is hereby issued to:

Bayshore Recycling Corp.

Facility Type:	Recycling Center for Class B Materials
Block & Lot Nos.:	Block 41.03 & Lots 3.02, 3.18 & 4.02 Block 51 & Lots 1, 1.02, 1.18, 2, 2.02 & 2.03 Block 52 & Lot 1
Municipality:	Township of Woodbridge
County:	Middlesex
Facility ID No.:	132397
Permit No.:	CBG210002

This General Approval is subject to compliance with all conditions specified herein and all regulations promulgated by the New Jersey Department of Environmental Protection (Department).

This General Approval shall not prejudice any claim the State may have to riparian land nor does it allow the registrant to fill or alter, or allow to be filled or altered, in any way, lands that are deemed to be riparian, wetlands, stream encroachment or flood plains, or within the Coastal Area Facility Review Act (CAFRA) zone or are subject to the Pinelands Protection Act of 1979, nor shall it allow the discharge of pollutants to waters of this State without prior acquisition of the necessary grants, permits, or approvals from the Department.

May 10, 2022
Issuance Date

Dana Lawson
Dana Lawson, Chief
Bureau of Recycling & Hazardous Waste Management

May 10, 2027
Expiration Date

Scope of Approval

This General Approval (approval), along with the referenced application documents herein specified, shall constitute the sole approval of Recycling Center operations for Class B Recyclable Material (concrete, asphalt, brick, block, slag (on a case by case basis), glass cullet, wood (untreated and unpainted), potable water treatment residuals, carbon filtration media, street sweepings and petroleum contaminated soil) storage and process center by **Bayshore Recycling Corp.** located in the Township of Woodbridge, Middlesex County, New Jersey. Any registration, approval or permit previously issued by the Division of Sustainable Waste Management, or its predecessor agencies, for the specific activities as described below and as conditioned herein, is hereby superseded.

Regulated Activities at the Facility

Conditions 1 through 42 of this general approval are conditions applicable to all New Jersey recycling facilities. Conditions 43 through 64 of this general approval are applicable to New Jersey recycling facilities that receive, store, process, or transfer Class B material. Conditions 65 through 78 of this general approval are specific to operations related to petroleum contaminated soils, slag, potable water treatment residuals, carbon filtration media, and street sweeping Class B recyclable materials. Condition 79 of this general approval is a condition specific to operations related to concrete, asphalt, brick, block, wood (untreated and unpainted), and glass cullet Class B recyclable materials.

Facility Description

The facility is a Class B recycling center operated by the Bayshore Recycling Corp. The recycling center is located at 75 Crows Mill Road/100 Bayview Avenue on Block 41.03 & Lots 3.02, 3.18 & 4.02, Block 51 & Lots 1, 1.02, 1.18, 2, 2.02 & 2.03, and Block 52 & Lot 1 in the Township of Woodbridge, Middlesex County. This regional recycling center is authorized to receive concrete, asphalt, brick, block, slag (on a case-by-case basis), glass cullet, wood (untreated and unpainted), potable water treatment residuals, carbon filtration media, street sweepings, and petroleum contaminated soil from demolition contractors, municipalities, manufacturers, gasoline stations, homeowners and sites remediated for petroleum contamination. All processed soil will be used for beneficial use projects, brownfields, landfill caps, and construction projects. The recycling center is authorized to receive, store, process, or transfer the Class B recyclable materials twenty-four (24) hours per day, Monday through Sunday.

Petroleum contaminated soil shall be sampled either at the point of generation or at the recycling center for the petroleum contaminated soils processing operation. The sampling results shall be used to determine the maximum contaminant feed rate or maximum petroleum contaminant concentration for the processing equipment.

Prior to the acceptance of potable water treatment residuals, carbon filtration media and street sweepings the facility shall have received analytical results along with a signed certification from the generator certifying the material meets the Department's soil remediation standards for ingestion-dermal and inhalation exposure pathway.

Approved General Approval Application and Associated Documents

The registrant shall construct and operate the facility in accordance with N.J.A.C. 7:26A-1 *et seq.*, the conditions of this Approval, and the following documents:

1. Site Plan – "Modification to General Class B Recycling Center Approval for Bayshore Recycling Corporation", signed and sealed on October 11, 2016 by Lauren J. LaPort, P.E, The ELM Group, Inc., dated April 7, 2009 and last revised on August 26, 2015.

2. Bayshore Recycling Corp. – Renewal Request with no changes for Class B General Approval, prepared by Jennifer Solewski, Vice President, Business & Technical Development, dated September 28, 2021.

3. Bayshore Recycling Corp. – Application for a General Class B Recycling Approval, signed by Valarie Montecalvo, President, Bayshore Recycling Corp., dated August 13, 2001.

4. Bayshore Recycling Corp. – Modification Request for Class B Recycling Center General Approval, prepared by Jennifer Solewski, Vice President of Regulatory Affairs & Corporate Development, dated July 19, 2016.

5. Bayshore Recycling Corp. – Renewal Request with no changes for Class B General Approval, prepared by Jennifer Solewski, Vice President of Regulatory Affairs & Corporate Development, dated January 9, 2017.

6. Middlesex County Solid Waste Management Plan (Plan) inclusion of Bayshore Recycling Corp. as a Class B Recycling Facility located on Block 51, Lots 1, 1R, 2B, and 2C, certified by the Commissioner of the Department of Environmental Protection on September 10, 2001.

7. Amendment to the Plan to include capacity increase, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated January 20, 2004.

8. Amendment to the Plan to include acceptance of cullet, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated March 16, 2004.

9. Amendment to the Plan to include combination of Blandford Land Development Class B Recycling Center and adjacent Bayshore Recycling Corp. Class B Recycling Center and receipt of additional materials at Bayshore Recycling Corp. Class B Recycling Center, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated February 14, 2006.

10. Amendment to the Plan to include receipt and processing of potable water residuals and carbon filtration media, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated April 25, 2011.

11. Amendment to the Plan to include receipt and processing of street sweepings, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated June 16, 2011.

12. Amendment to the Plan to include the transfer of capacities of Bayshore Recycling Corp. Class C Recycling Center (partial) and Converted Organics of Woodbridge, LLC Class C Recycling Center (all) to Bayshore Recycling Corp. Class B Recycling Center, the deletion of Converted Organics of Woodbridge, LLC Class C Recycling Center and modification of block and lot designation of Bayshore Recycling Corp. Class B Recycling Center, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated February 4, 2014.

13. Amendment to the Plan to include the weekly averaging of 31,500 tons of petroleum contaminated soil with a daily maximum of 6,300 tons, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated January 14, 2015.

In case of conflict, the provisions of N.J.A.C. 7:26A-1 et seq. shall have precedence over the conditions of this Approval, and the conditions of this Approval shall have precedence over plans and specifications listed above.

RE: CFG Stadium Group LLC – Willets Point Stadium
37-11 126th St, Queens, NY 10016
NYSDEC BCP# C241146C | Approval Volume: 2,000 tons

Approval Number: 253070158
Job Number: 1021044

Dear Mr. Deighton,

Clean Earth of Carteret, LLC. (CEC) is pleased to provide you with the following approval letter for the soil material being generated from the site referenced above. We reviewed the soil disposal request letter prepared by Langan, material profile sheet, sampling map, and analytical results performed by York Analytical Laboratories Inc. (Project Number: 25A1191) for the above referenced site. Based upon the review of the data provided, CEC can accept non-hazardous contaminated soil being generated from the site above.

This letter serves as approval consideration of ~2,000 tons of non-hazardous contaminated soil represented by waste class sample $ID_{(s)}$: Stockpile 2A, Stockpile 2B, and all related grab samples to be generated from construction activities at the site.

Please note that provided laboratory data package is short TPH analysis. The facility is permitted to analyze missing parameters by collecting soil samples from incoming loads. Please note that TPH analysis (every 600 Tons) will be required to comply with CEC's Class B permit. In the essence of saving time, CEC will collect the additional TPH samples as required upon arrival at the facility to meet the CEC analytical requirements. CEC will amend the invoice accordingly.

Please provide the approval number when scheduling and include the approval number and grid location ID on all manifests when shipping soils generated from this site. CEC can only accept non-hazardous soils. Any soils with free petroleum product or liquids, sludges, or hazardous waste cannot be accepted. The generator will be notified of any non-conforming material.

If you should have any questions or require any additional information, please call (732)-541-8909.

Sincerely,
Clean Earth of Carteret, LLC

Alexa Ruberti

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on January 21, 2025 and listed below. The project was identified as your project: **Willets Stadium**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 25A1191

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.
8. Analyses conducted at York Analytical Laboratories, Inc. Stratford, CT are indicated by NY Cert. No. 10854, NJ Cert No. CT005, PA Cert No. 68-04440, CT Cert No. PH-0723; those conducted at York Analytical Laboratories, Inc., Richmond Hill, NY are indicated by NY Cert. No. 12058, NJ Cert No. NY037, CT Cert No. PH-0721, NH Cert No. 2097, EPA Cert No. NY01600.

Sample and Data Qualifiers Relating to This Work Order

QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
P	This qualifier indicates the compound detected exhibited greater than 40% between the quantitation and confirmatory columns.
M-CCV1	The recovery for this element in the Continuing Calibration Verification (CCV) was outside the 90-110% recovery criteria.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
IGN-01	Non-Ignit.
ICVE	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration verification (recovery exceeded 30% of expected value).
HT-pH	HOLDING TIME EXCEEDED. Samples for pH must be measured in the field or within 15 minutes of sample collection.
EXT-Temp	Extraction temperture slightly exceeded acceptance range.
EXT-COMP	Completed
CCVE	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
CAL-E	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration (average Rf>20%)

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

Non-Dir. Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

Re: Class B Recycling Center General Approval Renewal (with no changes)
Clean Earth of Carteret, LLC
Block 102, Lot 6
Borough of Carteret, Middlesex County
Facility ID No: 132310, Approval No.: CBG210002

Dear Mr. Persico:

Please be advised that the New Jersey Department of Environmental Protection, Division of Sustainable Waste Management, Bureau of Recycling and Hazardous Waste Management (Bureau) has reached a final determination to issue the above Class B Recycling Center General Approval Renewal. Enclosed is a copy of the final document.

Should you wish to contest any of the modified conditions of the enclosed general approval, you must file a request for an adjudicatory hearing within twenty (20) days of the date you receive this decision notice in accordance with the procedures found in N.J.A.C. 7:26A-3.14. A copy of the request should also be mailed to the Bureau.

If you have any questions concerning this matter, please contact me at (609) 984-2067 or nicholas.nader@dep.nj.gov.

Sincerely,

Nicholas C. Nader, Supervising Engineer
Bureau of Recycling and Hazardous Waste Management

RECYCLING CENTER GENERAL APPROVAL FOR CLASS B RECYCLABLE MATERIALS

Under the provisions of N.J.S.A. 13:1E-1 *et seq.* and N.J.S.A. 13:1E-99.11 *et seq.*, known as the Solid Waste Management Act and New Jersey Statewide Mandatory Source Separation and Recycling Act, respectively, and pursuant to N.J.A.C. 7:26A-1 *et seq.*, known as the Recycling Regulations, this approval is hereby issued to:

Clean Earth of Carteret, LLC

Facility Type:	Recycling Center for Class B Materials
Block & Lot No.:	Block 102, Lot 6
Municipality:	Borough of Carteret
County:	Middlesex
Facility ID No.:	132310
Approval No.:	CBG210002

This General Approval is subject to compliance with all conditions specified herein and all regulations promulgated by the Department of Environmental Protection (Department).

This General Approval shall not prejudice any claim the State may have to riparian land nor does it allow the registrant to fill or alter, or allow to be filled or altered, in any way, lands that are deemed to be riparian, wetlands, stream encroachment or flood plains, or within the Coastal Area Facility Review Act (CAFRA) zone or are subject to the Pinelands Protection Act of 1979, nor shall it allow the discharge of pollutants to waters of this State without prior acquisition of the necessary grants, permits, or approvals from the Department.

March 7, 2022
Issuance Date

Nicholas C. Nader, Supervising Engineer
Bureau of Recycling and Hazardous Waste Management

March 7, 2027
Expiration Date

Scope of Approval

This General Approval (approval), along with the referenced application documents herein specified, shall constitute the sole approval of Recycling Center operations for Class B Recyclable Material (petroleum contaminated soil, street sweepings, brick, block, concrete, stone, rock, and asphalt) by **Clean Earth of Carteret, LLC**, located in the Borough of Carteret, Middlesex County, New Jersey. Any registration, approval or permit previously issued by the Division of Solid and Hazardous Waste, or its predecessor agencies, for the specific activities as described below and as conditioned herein, is hereby superseded.

Regulated Activities at the Facility

Requirements 1 through 42 of this approval contain the general conditions applicable to all recycling centers. Requirements 43 through 88 of this approval contain the operating requirements specific to the recycling center for receipt, storage, processing, or transfer of Class B recyclable materials including non-hazardous petroleum contaminated soils. Requirements 89 through 92 of this approval are the sampling requirements for testing street sweepings. Requirements 93 through 98 of this approval contain the conditions for aggregate crushing operations.

Facility Description

The facility is a Class B recycling center owned and operated by Clean Earth of Carteret, LLC (Clean Earth). The recycling center is located at 24 Middlesex Avenue on Block 102, Lot 6, in the Borough of Carteret, Middlesex County. This regional recycling center receives and treats petroleum contaminated soil from soil remediation contractors and street sweepings from municipalities.

Petroleum contaminated soils accepted for treatment by the facility include soils contaminated with gasoline, kerosene, jet fuel, numbers 1-6 fuel oil, manufactured gas plant residuals, and used oil and waste oils. The treatment process consists of using the facility's biological remediation process to introduce specifically engineered solid and liquid microbial reagents and a fertilized blend into the soil matrix.

Additionally, the recycling center is authorized to receive, store, process and transfer brick, block, concrete, stone, rock, and asphalt from construction and demolition contractors, construction companies, municipalities, and counties. Hours of operation for the receipt, treatment/processing and transferring source separated recyclable material are 24 hours per day, 7 days per week. The operation of the crushers shall be limited to 7:00 a.m. to 7:00 p.m., Monday through Friday and Saturday 7:00 a.m. to 4:00 p.m.

The recycling center may receive a combined total of 4,700 tons per day of aggregate material and contaminated soil, with weekly average not to exceed 28,000 tons.

The recycling center is also utilized for finished product storage and equipment storage as shown on the site plan. The recycling center markets clean soil and dense graded aggregate from the site.

Approved General Approval Application and Associated Documents

The holder shall construct and operate the facility in accordance with N.J.A.C. 7:26A-1 *et seq.*, the conditions of this Approval, and the following documents:

a) Inclusion of SD&G, Inc. as a Class B Recycling Facility in the District Solid Waste Management Plan (Plan) by the County of Middlesex, certified by the NJDEP Commissioner on July 16, 1996 and subsequent Plan Amendment by Administrative Action dated November 6, 2002 to change the facility's name to Clean Earth of Carteret, Inc.

b) Plan Amendments by Administrative Action dated May 12, 2003, August 19, 2005, May 11, 2010, and July 31, 2018, approving changes to operations of the facility.

c) Plan Amendment by Administrative Action dated January 11, 2019 to change the block and lot designation.

d) Site Plan dated May 9, 2014 and last revised (Revision No. 8) on November 02, 2021, signed and sealed by Bradley J. Cunningham, New Jersey registered P.E.

e) Clean Earth of Carteret, Submittal of signed transfer agreement, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated May 22, 2003.

f) Drawing No. SB-01 – Process Building Floor Plan, dated May 2, 2014 and last revised (Revision No. 2) on December 3, 2020, signed and sealed by Bradley J. Cunningham, New Jersey registered P.E.

g) Clean Earth of Carteret, Inc., Request to utilize cement kiln dust or lime as a drying agent to remove moisture from its treated soils, prepared and signed by Michael D. Logan, Vice President, Compliance Plus Services, dated December 27, 2006.

h) Notification of Proposed Stock Purchase of Clean Earth Holdings, Inc. dated August 20, 2014 and prepared by Michael D. Logan, Vice President of Compliance Plus Services, Inc.

i) Class B Recycling Center General Approval Renewal and Modification Application for the Acceptance of Restricted Use Aggregate ("RUA") and Direct Reuse Soils ("DRS SOILS"), dated March 5, 2012, prepared by Michael D. Logan, Vice President of Compliance Plus Services, Inc.

j) Class B General Approval Renewal Application dated June 10, 2014, and prepared by Michael D. Logan, Vice President of Compliance Plus Services, Inc. This Renewal Application did not include any modification approval requested to the proposed acceptance and processing of Direct Reuse of Soils (DRS) and Restricted Reuse Aggregate (RUA) referenced above.

k) Class B Recycling Center Renewal Application of General Approval dated November 21, 2016 and signed by Michael D. Logan, Vice President – Environmental Services, Compliance Plus Services, Inc. and including the following:

   1. Ground Lease Agreement dated November 1, 2010;
   2. List of Permitted Equipment; and
   3. Certification dated November 21, 2016, signed by Christopher Dods, President – Clean Earth of Carteret and certifying that there have been no changes in the operations of the recycling center since the most recent Approval modification.

l) Supplemental information dated February 17, 2017 and signed by Michael D. Logan, Compliance Plus Services.

m) Class B Approval Modification Application dated June 15, 2017 and prepared by Compliance Plus Services.

n) Supplemental information dated January 16, 2018 and signed by Michael D. Logan, Compliance Plus Services, submitted in response to the Bureau's Notice of Technical Deficiency dated November 16, 2017.

o) Supplemental information dated March 27, and April 11, 2018 by John A. Castner, P.E., Compliance Plus Services.

p) Application for Modification of Class B General Approval, dated March 8, 2019, prepared and submitted by Compliance Services, Inc. on behalf of Clean Earth of Carteret, signed by Michael D. Logan and including certification dated February 19, 2019, signed by Christopher Dods, CEO/President, Clean Earth of Carteret.

q) Supplemental information dated May 14 and June 18, 2019 and submitted via electronic mail by John A. Castner, P.E., Compliance Plus Services, Inc. on behalf of Clean Earth of Carteret.

r) Application for Modification of Class B General Approval, dated December 4, 2020 and prepared and signed by Michael D. Logan, Compliance Plus Services, Inc.

s) Supplemental information dated December 18, 2020 and submitted by Michael D. Logan, Compliance Plus Services.

t) Application for renewal of Class B General Approval (with no changes), dated November 8, 2021 and signed by Sharon Crawford, Area Environmental Manager, Clean Earth.

In case of conflict, the provisions of N.J.A.C. 7:26A-1 *et seq.* shall have precedence over the conditions of this Approval, and the conditions of this Approval shall have precedence over plans and specifications listed above.

Subject Item: PI 132310 -

1. All persons issued a general approval to operate a recycling center for Class B, Class C and/or Class D recyclable material pursuant to N.J.A.C. 7:26A-1 et seq. shall comply with all conditions of the approval. [N.J.A.C. 7:26A- 3.1(a)]
2. The holder of this general approval shall prominently post and maintain a legible sign, at or near the entrance to the recycling center, indicating that the recycling center is an approved New Jersey Department of Environmental Protection recycling center. The sign shall also indicate the following: Hours of operation of the recycling center; Listing of the source separated materials to be received; The size, weight, or other restrictions regarding materials to be received; The maximum amount of contaminants allowed in each load; Warning that loads will be inspected and will be barred from offloading if the contaminant level is exceeded; and Notice that the person offloading shall certify the amount of material per load, municipality of origin of the material and any other information contained on the Recyclable Material Receipt Form. [N.J.A.C. 7:26A- 3.5(f)]
3. Application for renewal of this general approval shall be submitted at least three months prior to expiration of the current approval and shall comply with all requirements for renewal set forth in N.J.A.C. 7:26A-3.6 et seq. One copy of the application for renewal of the general approval shall be submitted by the applicant to the municipal clerk of the municipality in which the recycling center is located, and to the solid waste or recycling coordinator of the county in which the recycling center is located. [N.J.A.C. 7:26A- 3.6(a)]
4. The applicant for renewal of this general approval shall certify in writing to the Department that there have been no changes in the operations of the recycling center since the issuance of the general approval in order to renew the approval in its existing form. In the event that there have been changes in the operations of the recycling center or where changes are planned, the application for renewal of a general approval shall be accompanied by a written request to modify the general approval in accordance with N.J.A.C. 7:26A-3.10. [N.J.A.C. 7:26A- 3.6(b)]
5. In a case where the holder of this general approval does not comply with N.J.A.C. 7:26A-3.6(a) and (b) and continues to operate without renewal of the general approval, the Department may take enforcement action including the assessment of penalties under N.J.S.A. 13:1E-9; require the holder of this general approval to file an application as a new applicant for a general approval in accordance with N.J.A.C. 7:26A-3.2 and pay the application fee as per N.J.A.C. 7:26A-2; and/or take any other appropriate actions. [N.J.A.C. 7:26A- 3.6(c)]
6. All persons granted a renewal pursuant to N.J.A.C. 7:26A-3.6(d) shall continue to pay the annual fee as specified in N.J.A.C. 7:26A-2. [N.J.A.C. 7:26A- 3.6(h)]
7. The holder of this general approval shall obtain prior approval from the Department for any modification of the general approval. [N.J.A.C. 7:26A- 3.10(a)]
8. Any change affecting the conditions of this general approval requires the prior approval of the Department. [N.J.A.C. 7:26A- 3.10(b)1]
9. Any change to the information submitted pursuant to N.J.A.C. 7:26A-3.2(a), 3.4, 3.8, 3.18, 3.19 or 3.20 requires the prior approval of the Department, except that changes in end-market information submitted pursuant to N.J.A.C. 7:26A-3.2(a) 7 shall not require the prior approval of the Department but shall be handled in accordance with N.J.A.C. 7:26A-3.10(f). [N.J.A.C. 7:26A- 3.10(b)2]

Subject Item: PI 132310 -

10. The holder of this general approval shall notify the Department in writing of the intended modification and shall update the information submitted pursuant to N.J.A.C. 7:26A-3.2(a), 3.4, 3.8, 3.18, 3.19 or 3.20. The holder of this general approval shall also provide written notice to the solid waste or recycling coordinator of the applicable county of any request to modify a general approval. [N.J.A.C. 7:26A- 3.10(c)]

11. The holder of this general approval shall not institute the modification until it receives written approval from the Department. [N.J.A.C. 7:26A- 3.10(e)]

12. Within one week of any change to the end-market information submitted to the Department pursuant to N.J.A.C. 7:26A-3.2(a)7, the holder of this general approval shall submit to the Department a written notification which details any change in the use of the recyclable material transferred from the recycling center to an end-market or in the end-market location to which the recyclable material is transferred. The written notification shall be sent to: New Jersey Department of Environmental Protection, Division of Sustainable Waste Management, Bureau of Recycling and Hazardous Waste Management, 401 East State Street, P.O. Box 420, Mail Code 401-02C, Trenton, New Jersey 08625-0420. Such notification may be sent electronically to the Bureau's email inbox: recyclingfacilities@dep.nj.gov. [N.J.A.C. 7:26A- 3.10(f)]

13. The Department may revoke this general approval upon a determination that the holder of the general approval has violated any provision of N.J.S.A. 13:1E-1 et seq., the New Jersey Statewide Mandatory Source Separation and Recycling Act, or any rule, regulation or administrative order promulgated pursuant to N.J.S.A. 13:1E-1 et seq. and the New Jersey Statewide Mandatory Source Separation and Recycling Act. [N.J.A.C. 7:26A- 3.13(a)1]

14. The Department may revoke this general approval upon a determination that the holder of the general approval has violated any solid waste utility law at N.J.S.A. 48:2-1 et seq. or 48:13A-1 et seq., or any rule, regulation or administrative order promulgated pursuant to N.J.S.A. 48:2-1 et seq. or 48:13A-1 et seq. [N.J.A.C. 7:26A- 3.13(a)2]

15. The Department may revoke this general approval upon a determination that the holder of the general approval has violated any provision of any laws related to pollution of the waters, air or land surfaces of the State or of any other State or Federal environmental laws including criminal laws related to environmental protection. [N.J.A.C. 7:26A- 3.13(a)3]

16. The Department may revoke this general approval upon a determination that the holder of the general approval has refused or failed to comply with any lawful order of the Department. [N.J.A.C. 7:26A- 3.13(a)4]

17. The Department may revoke this general approval upon a determination that the holder of the general approval has failed to comply with any of the conditions of this general approval issued by the Department. [N.J.A.C. 7:26A- 3.13(a)5]

18. The Department may revoke this general approval upon a determination that the holder of the general approval has transferred a general approval to a new owner or operator pursuant to N.J.A.C. 7:26A-3.15 without the prior approval of the Department. [N.J.A.C. 7:26A- 3.13(a)6]

19. The Department may revoke this general approval upon a determination that the holder of the general approval has failed to obtain any required permit or approval from the Department or other State or Federal agency. [N.J.A.C. 7:26A- 3.13(a)7]

Subject Item: PI 132310 -

20. The Department may revoke this general approval upon a determination that the holder of the general approval has committed any of the acts which are criteria for denial of a general approval set forth in N.J.A.C. 7:26A-3.12. [N.J.A.C. 7:26A- 3.13(a)8]

21. This general approval shall not be transferred to a new owner or operator without the Department's prior approval. [N.J.A.C. 7:26A- 3.15(a)]

22. A written request for permission to allow a transfer of this general approval must be received by the Department at least 60 days in advance of the proposed transfer of ownership or operational control of the recycling center. The request for approval shall include the following: the name, address and social security number of all prospective new owners or operators; a written certification by the proposed transferee that the terms and conditions contained in the general approval will be met by the proposed transferee; and a written agreement between the current owner or operator of the recycling center and the proposed new owner or operator containing a specific future date for transfer of ownership or operational control. [N.J.A.C. 7:26A- 3.15(a)1]

23. A new owner or operator may commence operations at the recycling center only after the existing approval has been revoked and a new approval is issued to the new owner or operator pursuant to N.J.A.C. 7:26A-3.5. [N.J.A.C. 7:26A- 3.15(a)2]

24. The holder of this general approval remains liable for ensuring compliance with all conditions of the approval unless and until the existing approval is revoked and a new approval is issued to the new owner or operator pursuant to N.J.A.C. 7:26A-3.5. [N.J.A.C. 7:26A- 3.15(a)3]

25. Compliance with the transfer requirements set forth at N.J.A.C. 7:26A-3.15 shall not relieve the holder of this general approval from the separate responsibility of providing notice of such transfer pursuant to the requirements of any other statutory or regulatory provision. [N.J.A.C. 7:26A- 3.15(a)4]

26. The transfer of a controlling interest in the stock or assets of the recycling center that is the subject of this general approval shall constitute a transfer of this general approval. [N.J.A.C. 7:26A- 3.15(b)]

27. The holder of this general approval shall maintain a daily record of the amounts of each recyclable material by type and municipality of origin which are received, stored, processed or transferred each day, expressed in tons, cubic yards, cubic feet or gallons. Those operators specifying this information in cubic yards shall also indicate the conversion ratio of the materials from cubic yards to tons and vice versa. [N.J.A.C. 7:26A- 3.17(a)1]

28. The holder of this general approval shall maintain a daily record of the name, address and telephone number of the end-markets for all recyclable materials transported from the recycling center, including the amounts, in tons, cubic yards, cubic feet or gallons, transported to each end-market. Those persons specifying this information in cubic yards shall also indicate the conversion ratio of the materials from cubic yards to tons and vice versa. [N.J.A.C. 7:26A- 3.17(a)2]

29. The holder of this general approval shall maintain a daily record of the amount of residue disposed of, expressed in tons, cubic yards, cubic feet or gallons, including the name and New Jersey Department of Environmental Protection solid waste registration number of the solid waste collector/hauler contracted to provide the haulage/disposal service. Those persons specifying the amount of residue in cubic yards shall also indicate the conversion ratio of the residue from cubic yards to tons or vice versa. [N.J.A.C. 7:26A- 3.17(a)3]

Subject Item: PI 132310 -

30. The holder of this general approval shall retain all Recyclable Material Receipt Forms required pursuant to N.J.A.C. 7:26A-3.2(a)16iii for three calendar years following the calendar year for which an annual report is required pursuant to N.J.A.C. 7:26A-3.17(c). [N.J.A.C. 7:26A- 3.17(b)]

31. The holder of this general approval shall submit an annual report containing monthly summary statements of the information required pursuant to N.J.A.C. 7:26A-3.17(a) to the New Jersey Department of Environmental Protection, Division of Sustainable Waste Management, on or before March 1 of each year, for the previous calendar year. The summaries shall include the following: monthly totals of the amount of recyclable material received from each customer by municipality of origin; monthly totals of the amount of recyclable product transferred to each end-market; and the amount of residue disposed of during each month. The annual report shall be submitted electronically to the Bureau's inbox: recyclingfacilities@dep.nj.gov, on forms or in the format specified by the Department. [N.J.A.C. 7:26A- 3.17(c)]

32. All information submitted to the Department pursuant N.J.A.C. 7:26A shall be handled in accordance with the requirements of the Public Records law, N.J.S.A. 47:1-1 et seq. The Department will hold confidential all end-market information, as well as information pertaining to the municipality of origin of recyclable material, submitted pursuant to N.J.A.C 7:26A-3.2, 3.7, and 3.17 through 3.20 for a period of two years from the date on which the information is submitted to the Department, where specified as confidential by the applicant and where there are no health, safety or environmental concerns which require the release of the information, as determined by the Department. [N.J.A.C. 7:26A-3.17(f)]

33. The holder of this general approval shall provide a recycling tonnage report by March 1 of each year to all municipalities from which recyclable material is received in the previous calendar year. The report shall detail the amount of each source separated recyclable material, expressed in tons or cubic yards, brought to the recycling center, as well as the date on which the recyclable materials were delivered to the recycling center. Those persons specifying this information in cubic yards shall also indicate the conversion ratio of the materials from cubic yards to tons or vice versa. [N.J.A.C. 7:26A- 4.4(a)]

34. The recycling center shall not commence operations unless and until it is included in the applicable district solid waste management plan. [N.J.A.C. 7:26A- 4.2]

35. The construction of the recycling center that is the subject of this general approval shall be in conformance with the New Jersey Uniform Construction Code, N.J.S.A. 52:27D-119 et seq., and the rules promulgated pursuant thereto. [N.J.A.C. 7:26A- 4.1(b)]

36. The New Jersey Department of Environmental Protection or an authorized representative acting pursuant to the County Environmental Health Act, N.J.S.A. 26:3A2-1 et seq. shall have the right to enter and inspect any building or other portion of the recycling center at any time in order to determine compliance with the provisions of all applicable laws or rules and regulations adopted pursuant thereto. This right to inspect includes, but is not limited to: sampling any materials on site; photographing any portion of the recycling center; investigating an actual or suspected source of pollution of the environment; and, ascertaining compliance or non-compliance with the statutes, rules or regulations of the Department, including conditions of the recycling center approval issued by the Department. [N.J.A.C. 7:26-1.7(a)]

Subject Item: PI 132310 -

37. The right of entry specified at N.J.A.C. 7:26A-1.7(a) shall be limited to normal operating hours for the purpose of reviewing and copying all applicable records, which shall be made available to the Department during an inspection and submitted to the Department upon request. [N.J.A.C. 7:26-1.7(b)]

38. The facility shall comply with the general operating requirements for all Recycling Centers as provided at N.J.A.C. 7:26A-4.1. [N.J.A.C. 7:26A- 4]

39. In case of conflict, the provisions of N.J.A.C. 7:26A-1 et seq. shall have precedence over the conditions of this Approval, and the conditions of this Approval shall have precedence over plans and specifications listed above. [N.J.A.C. 7:26A- 3.5(e)]

40. Pursuant to N.J.A.C. 7:26A-3.2(a)18, the holder of this General Approval shall ensure that all recycling activities authorized by this General Approval are conducted in full compliance with the applicable Storm Water Management rules at N.J.A.C. 7:8-5 and 6 and Pollutant Discharge Elimination System rules at N.J.A.C. 7:14A et seq. and any permit issued pursuant to 7:14A et seq. In the event that compliance with the above rules require changes to the site plan or any operations authorized by this general approval, the holder of the general approval shall submit a modification application including a revised site plan, within thirty (30) days of receiving all approvals/permits from the NJPDES Program, to the Bureau of Recycling and Hazardous Waste Management for review and approval. [N.J.A.C. 7:26A- 3.5(e)]

41. The holder of this General Approval shall grade and maintain the facility to minimize the accumulation of ponded water in a manner that protects human health, safety, and the environment, and prevents detrimental conditions including, but not limited to odors, mosquito colonization, or causes site materials to be tracked off-site. Any soil modification and grading performed shall be in accordance with the approved Soil Erosion and Sediment Control Plan approved by the Applicable Soil Conservation District and shall be in compliance with all Department permits. [N.J.A.C. 7:26A-3.5(e)]

42. Upon notification from the Department that a State of Emergency, which may impact the facility's operations, has been declared by the Governor pursuant to New Jersey Disaster Control Act at N.J.S.A. App. A:9-30 et seq., the permittee shall provide to the Division of Sustainable Waste Management, a daily report on the operational status of the facility and the quantity of wastes received during the previous day or any other relevant information requested pursuant to N.J.S.A. App.A:9.36. The status report shall be submitted electronically to solidwasteemergencies@dep.nj.gov, or as otherwise directed by the Department, on forms or in format porvided by the Department and in compliance with the time frames established by the Department after the State of Emergency Declaration. The status report shall be submitted daily until the permittee is informed by the Department that the reports are no longer required for the State of Emergency. [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG139162 - General Class B & Soil Conditions

43. Recycling centers receiving petroleum contaminated soil must have a preparedness and prevention plan. The contingency plan contained in the approved documents must be maintained onsite and updated as necessary. [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG139162 - General Class B & Soil Conditions

44. Upon detection of a release of contaminants to the environment, the facility shall perform the following cleanup steps: stop the release, contain the released contaminants, clean up and manage properly the released contaminants and other materials and if necessary, repair or replace any leaking soil containment systems prior to returning them to service. [N.J.A.C. 7:26A-3.5(e)]

45. Upon closure of the facility the owner or operator shall remove or decontaminate petroleum contaminated soils, containment system components, and structures and equipment and manage them as hazardous waste, unless the materials are not hazardous waste under N.J.A.C. 7:26G-5. [N.J.A.C. 7:26A- 3.5(e)]

46. All equipment and portions of the facility designated for the storage or processing of petroleum contaminated soils shall be visually inspected each operating day for integrity and leaks. [N.J.A.C. 7:26A-3.5(e)]

47. Records shall be maintained for all visual inspections. These records shall document that inspections were performed, any problems found, and the subsequent correction of such problems. All records shall be kept for a minimum of three years. [N.J.A.C. 7:26A-3.5(e)]

48. The facility shall keep a record of each shipment of petroleum contaminated soil accepted for processing. These records may take the form of a log, invoice, manifest, bill of lading or other shipping documents. All tracking records shall be maintained by the holder of this general approval as required by N.J.A.C. 7:26A-3.2(a) 16iii for three calendar years.

    Records for each shipment shall include the following information: the name and address of the transporter who delivered the soil to the facility, the name and address of the generator from whom the soil was sent, the NJDEP registration number of the transporter, EPA ID number (if applicable) of the generator, the quantity of soil accepted and the date of acceptance.

    Prior to the receipt of a shipment of soil from a generation source, the holder of this approval shall have received a completed Clean Earth of Carteret Material Characterization Report, as referenced in the approved General Approval Application, and associated documents for that shipment. The report shall include at least the following information: name and address of the generation site, contact information, quantity of soil, type of oil contaminating the soil, contamination source (i.e. underground storage tank, above ground storage tank, spill, historic or other), past use of generation site (i.e. industrial, commercial, residential or historic fill), analytical results conducted on the soil and a certification that the information provided is true and accurate. The holder of this approval shall review the information provided to ensure the shipment complies with the facility's acceptance criteria for soil prior to authorizing acceptance of a shipment. [N.J.A.C. 7:26A- 3.5(e)]

49. The facility shall maintain onsite a written operating record showing analysis records, tracking records, and summary reports of incidents requiring implementation of the contingency plan. This information shall be made available to Department personnel upon request and shall be kept for a minimum of three years. [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG139162 - General Class B & Soil Conditions

50. The following source separated Class B recyclable materials, which have been separated at the point of generation from other waste materials or separated at a permitted solid waste facility authorized to separate recyclable materials, may be received, stored, processed or transferred at this recycling center: NJDOT street sweepings that meet NJ Non-Residential Direct Contact Soil Remediation Standards (SRS) and non-hazardous petroleum contaminated soils which otherwise would be ID 27 if not recycled. Only soil contaminated with the following compounds shall be accepted and processed at this facility: gasoline, kerosene, jet fuel, Numbers 1 through 6 fuel oil, Manufactured Gas Plant residuals, and used oil and waste oils. Used oil shall be defined as any oil that has been and as a result of such use, is contaminated by physical or chemical impurities. No soils may be accepted that have been contaminated with materials that are other waste materials, or waste by-products, such as sludges. No soils with free petroleum product or other liquids shall be accepted at the facility. For soils containing greater than 17,000 ppm Extractable Petroleum Hydrocarbons (EPH) or Total Petroleum Hydrocarbons (TPH), the soil shall be determined not to contain free liquids, using the analytical test method(s) in the latest edition of USEPA SW-846. No hazardous waste, as defined by N.J.A.C. 7:26G-5, shall be accepted by the facility. Authorized soil may include soils that are contaminated with petroleum hydrocarbons which originate from historically contaminated sites or historic fill sites provided they do not contain in excess of 1% by volume of other contaminants such as trash or rubbish. [N.J.A.C. 7:26A- 3.5(e)]

51. At no time shall the receipt, storage, processing, or transferring of non-source separated construction and demolition material be allowed at this recycling center. The prohibition of this material shall be strictly enforced and any incident shall be considered a serious violation to the conditions of this Approval. [N.J.A.C. 7:26A-3.5(e)]

52. The recycling center may not receive, store, process, or transfer source separated petroleum contaminated soils and NJDOT street sweepings with any other Class B recyclable materials. The commingling of petroleum contaminated soil and NJDOT street sweepings shall only be allowed after the testing requirements identified in this approval have been met. The commingling of any other materials not described above is prohibited. [N.J.A.C. 7:26A-3.5(e)]

53. The maximum amount of contaminants, as defined in N.J.A.C. 7:26A-1.3, allowed in each incoming load of Class B recyclable material shall be limited to 1% by volume. Incidental by-product materials shall not be considered to be contaminants. [N.J.A.C. 7:26A-3.5(e)]

54. Incidental amounts of rebar, metal, soil, and other by-products which adhere to the Class B recyclable materials, as specified in this Approval, and which are returned to the economic mainstream as raw material or products, may be received, stored, processed, or transferred at this recycling center. The receipt of such incidental amounts of these materials need not be separately accounted for, but the storage and end-markets for these materials shall be subject to specific conditions of this Approval. [N.J.A.C. 7:26A-3.5(e)]

55. The holder of this general approval shall operate the recycling center and construct or install associated appurtenances thereto, in accordance with the provisions of N.J.A.C. 7:26A-1 et seq., the conditions of this general approval, and the general approval application documents. [N.J.A.C. 7:26A-3.5(e)]

56. One complete set of the general approval application documents, this general approval, and all records, reports and plans as may be required pursuant to this approval shall be kept on file at the recycling center and shall be available for inspection by authorized representatives of the Department or delegated agents upon presentation of credentials. [N.J.A.C. 7:26A-3.5(e)]

Subject Item: RCBG139162 - General Class B & Soil Conditions

57. Hours of operation for the receipt, storage, treatment/processing and transferring source separated petroleum contaminated soils and NJDOT street sweepings material can occur 24 hours per day, 7 days per week. [N.J.A.C. 7:26A- 3.5(e)]

58. Material deliveries to the recycling center shall be scheduled in such a manner as to minimize truck queuing on the recycling center property. Under no circumstances shall delivery trucks be allowed to back-up or queue onto public roads. [N.J.A.C. 7:26A-3.5(e)]

59. The recycling center may receive no more than a combined total of 4,700 tons per day of petroleum contaminated soils and street sweepings, and source separated recyclable material. Soils meeting applicable end use standards without the need for treatment are considered to be product and do not count toward the daily tonnage. This condition is contingent upon the traffic on the public roads adjacent to the facility not being adversely affected. Should the traffic be impacted by the facility, the Department reserves the right to reduce the capacity of the facility. [N.J.A.C. 7:26A- 3.5(e)]

60. The total amount of unprocessed soil material stored in the building (Soil Storage Warehouse) shall not exceed 18,287 cubic yards. Materials stored in the Soil Storage Warehouse (SSW) shall be stored only in those areas designated for that purpose as indicated on the approved interior layout drawing. In addition, Area B on the approved site plan may be used to temporarily store 15,000 cubic yards of unprocessed soils until further processing in the SSW. The unprocessed soils in Area B will be segregated on an asphalt base with Jersey barriers and tarped during storage. [N.J.A.C. 7:26A-3.5(e)]

61. If at any time, the amount of soil material stored inside SSW exceeds 18,287 cubic yards, and the amount of soil material stored in the temporary storage Area B exceeds 15,000 cubic yards, the recycling center shall immediately cease receiving any unprocessed soil material until the combined amount of unprocessed soil material fall below 33,287 cubic yards. [N.J.A.C. 7:26A- 3.5(e)]

62. Unprocessed recyclable material shall not remain onsite, in its unprocessed form, for more than one (1) year. [N.J.A.C. 7:26A- 3.9(b)]

63. The total amount of processed soil materials stored outside shall not exceed 55,792 cubic yards. Processed material shall be stored only in those areas designated for that purpose as indicated on the approved site plan drawings. [N.J.A.C. 7:26A- 3.5(e)]

64. If at any time, the amount of processed soil material stored onsite exceeds 55,792 cubic yards, the recycling center shall immediately cease processing activities until the amount of processed material falls below 55,792 cubic yards. [N.J.A.C. 7:26A- 3.5(e)]

65. All processed material shall be stored separately from residues. [N.J.A.C. 7:26A-3.5(e)]

66. By-products shall be stored in the container(s) or area(s) as depicted on the approved site plan and shall be removed off-site to the end markets as referenced in the approved documents. [N.J.A.C. 7:26A-3.5(e)]

67. Horizontal and vertical control points for the unprocessed and processed soil stockpile areas shall be set and maintained onsite. Horizontal limitation markers shall be set at the corners of the stockpile areas as depicted on the approved site plan. Vertical limitation markers shall be set at locations in close proximity of the stockpile areas and shall clearly establish elevation height of 20 feet above the existing grade for the stockpile areas located inside the building and 30 feet above the existing grade for the processed stockpile areas located outside. Metal pipes/rods or the equivalent, as approved by the Department, shall be used to establish these control points. [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG139162 - General Class B & Soil Conditions

68. Ingress and egress of the facility shall be restricted to Middlesex Avenue only. [N.J.A.C. 7:26A-3.5(e)]

69. Methods of effectively controlling dust shall be implemented at the facility in order to prevent offsite migration. [N.J.A.C. 7:26A-3.5(e)]

70. Fire fighting and emergency procedures shall be posted, and shall include the telephone numbers of local fire, police, ambulance, and hospital facilities. If a fire occurs on-site, the facility shall immediately notify the local fire official and the N.J.D.E.P. Environmental Action Hotline at 1-877-927-6337. [N.J.A.C. 7:26A-3.5(e)]

71. Any suspected or prohibited hazardous waste, as defined at N.J.A.C. 7:26G-5, found in a load accepted at the recycling center shall not be returned to the generator. Such materials shall be segregated and stored in a secure manner and shall be immediately reported to the N.J.D.E.P. Environmental Action Hotline at 1-877-927-6337. The owner/operator of the recycling center shall secure the name of the collector/hauler suspected of delivering such waste to the facility and related information surrounding the incident, if available, and shall make this information known to the Department's enforcement personnel. Such materials may be returned to a known generator, provided the specific permission to do so is received by the owner/operator after contacting 1-877-927-6337. Otherwise, the owner/operator shall dispose of the unauthorized waste in accordance with instructions received from the Department. [N.J.A.C. 7:26A- 3.5(e)]

72. All revisions to the site plan and the approved documents which may be required as a result of the above, shall be submitted to this office for modification to this Approval. [N.J.A.C. 7:26A-3.5(e)]

73. Pursuant to N.J.A.C. 7:26A-3.11(a), the holder of this general approval shall obtain prior approval from the Department for any increase in the design capacity of the facility. The facility shall submit a request to the Department, in writing, for the proposed increase and shall submit updated information pursuant to the requirements of N.J.A.C. 7:26A-3.2(a), 3.4, or 3.8, as applicable. The facility shall also provide written notice of the request to the solid waste or recycling coordinator of the applicable district. [N.J.A.C. 7:26A-3.5(e)]

74. The sampling plan, collection, preservation, and handling for the sampling and analysis of unprocessed contaminated soil as required in this Approval must be performed in accordance with the New Jersey Technical Requirements for Site Remediation at N.J.A.C. 7:26E and the latest edition of the New Jersey Department of Environmental Protection's Field Sampling Procedures Manual. All analysis must be performed by a NJDEP certified laboratory. [N.J.A.C. 7:26A- 3.5(e)]

75. All soils must be tested using the most current approved test methodology in accordance with USEPA SW-846. [N.J.A.C. 7:26A-3.5(e)]

76. Petroleum contaminated soils shall be sampled either at the point of generation or at the recycling center. Soils from different generation sites shall be segregated at the facility until the sampling results are received. The sampling and analysis shall be implemented as described in the following conditions. [N.J.A.C. 7:26A- 3.5(e)]

77. Every 400 cubic yards of contaminated soil from each site shall be sampled and analyzed for EPH or TPH in the following manner: a representative sample from every 100 cubic yards of contaminated soil shall be taken and these four samples shall be composited into one sample and analyzed. When the volume of soil is greater than 100 and less than 400 cubic yards, a representative sample of every 100 cubic yards, or a fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG139162 - General Class B & Soil Conditions

78. Every 800 cubic yards of contaminated soil shall be sampled and analyzed for total volatile organic compounds (VOC), in the following manner: a representative sample from every 100 cubic yards of contaminated soil shall be taken and these samples shall be composited into one sample and analyzed. When the volume of soil is less than 800 cubic yards, a representative sample of every 100 cubic yards, or fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3.5(e)]

79. The sampling results shall be used to determine the maximum contaminant feed rate or maximum contaminant concentration for the processing equipment in accordance with the Air Quality Permit and shall also demonstrate that the material is non-hazardous for the above contaminants in accordance with N.J.A.C. 7:26G-8.5. The processing equipment at the facility uses bioremediation to process petroleum contaminated soils and achieve acceptable contaminent levels for reuse. [N.J.A.C. 7:26A- 3.5(e)]

80. Processed material end products, for uses other than as landfill cover material, Department approved Brownfields projects or road construction projects, shall be sampled and analyzed for EPH, total volatile organic compounds (VOC), and all contaminants listed in the SRS. The sampling procedure shall be implemented as follows: Every 100 cubic yards of processed soil shall be sampled and analyzed for the above contaminants in the following manner: a representative sample from every 20 cubic yards of processed soil shall be taken and these five samples shall be composited into one sample and analyzed. Processed soil destined for out of state clients shall follow sampling and analytical requirements as well as action levels established by respective state's regulatory authority. [N.J.A.C. 7:26A- 3.5(e)]

81. Processed material end products to be used in road construction projects shall be sampled every 1,000 cubic yards for EPH and VOC in the following manner: a representative sample from every 100 cubic yards of processed soil shall be taken and the samples shall be composited into one sample and analyzed. Processed soil destined for out of state clients shall follow sampling and analytical requirements as well as action levels established by respective state's regulatory authority. [N.J.A.C. 7:26A- 3.5(e)]

82. Other levels of testing may be allowed on a case-by-case basis as determined by use criteria in accordance with Department guidance and regulations. Applications for case-specific testing requirements must be made to the Bureau of Recycling and Hazardous Waste Management. [N.J.A.C. 7:26A- 3.5(e)]

83. Only approved criteria shall be used to determine the allowable end use of the processed material and the maximum allowable contamination levels for use. [N.J.A.C. 7:26A-3.5(e)]

84. The maximum allowable contamination levels for unrestricted general use are 200 ppm EPH and all individual organic contaminants less than or equal to 50% and inorganic contaminants less than or equal to 75% of the most stringent Direct Contact Soil Remediation Standards (SCC). [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG139162 - General Class B & Soil Conditions

85. The analytical requirements of the individual landfills shall be complied with for soils being used as landfill cover material. For soils being used as fill material in Brownfields projects, the requirements (including sampling frequency and analytical parameters) shall be approved by the individual Site Remediation Program case manager or Licensed Site Remediation Professional (LSRP) as appropriate on a case-by-case basis. Processed soil destined for out of state clients shall follow sampling and analytical requirements as well as action levels established by respective state's regulatory authority. [N.J.A.C. 7:26A- 3.5(e)]

86. Other levels of contamination may be allowed on a case-by-case basis as determined by use criteria and levels of contamination in accordance with Department guidance and regulations. Certificates of Authority to operate beneficial use projects pursuant to N.J.A.C. 7:26-1.7(g) must be obtained before any use of the processed material end products. [N.J.A.C. 7:26A-3.5(e)]

87. Any processed material end products that do not meet the above criteria must be reintroduced to the treatment process for further treatment. After treatment, the processed material end products must be reanalyzed in accordance with the above criteria. [N.J.A.C. 7:26A-3.5(e)]

88. All analysis records must be kept for a minimum of three years and made available for inspection by state and local officials upon request. [N.J.A.C. 7:26A-3.5(e)]

Subject Item: RCBG139339 - Street Sweepings Sampling

89. Every 400 cubic yards of street sweepings from each site shall be sampled and analyzed for EPH or TPH in the following manner: a representative sample from every 100 cubic yards shall be taken and these four samples shall be composited into one sample and analyzed. When the volume is greater than 100 and less than 400 cubic yards, a representative sample of every 100 cubic yards, or a fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A- 3]

90. The sampling results shall be used to determine the maximum contaminant feed rate or maximum contaminant concentration for the processing equipment in accordance with the Air Quality Permit and shall also demonstrate that the material is non-hazardous for the above contaminants in accordance with N.J.A.C. 7:26G-5. [N.J.A.C. 7:26A-3]

91. Unprocessed street sweepings shall be sampled either at the point of generation or at the recycling center. Street sweepings from different generation sites shall be segregated at the facility until the sampling results are received. [N.J.A.C. 7:26A- 3]

92. Every 800 cubic yards of street sweepings shall be sampled and analyzed for total volatile organic compounds (VOC), in the following manner: a representative sample from every 100 cubic yards shall be taken and these samples shall be composited into one sample and analyzed. When the volume is less than 800 cubic yards, a representative sample of every 100 cubic yards, or fraction thereof, shall be taken and these samples shall be composited into one sample and analyzed. [N.J.A.C. 7:26A-3]

Subject Item: RCBG882032 - Final Phase Crushing Operations

93. The recycling center may receive no more than a combined total of 4,700 tons per day of source-separated asphalt, concrete, brick, block, rock, and stone, and/or petroleum contaminated soil and street sweepings. [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG882032 - Final Phase Crushing Operations

94. Hours of operation for the receipt, processing and transferring source separated recyclable material can occur 24 hours per day, 7 days per week; the operation of the crusher shall be limited to: 7:00 a.m. to 7:00 p.m., Monday through Friday and Saturday from 7:00 a.m. to 4:00 p.m. [N.J.A.C. 7:26A- 3.5(e)]

95. The following equipment or equivalent is authorized for site operations:

Terex Finlay J1175 Crusher
Sandvik QH331 Cone Crusher
Sandvik QA331 Screener
Sandvik QE440 Screener (2 units)
Sandvik QE441 Screener
Extect Robotrac Screener (2 units)
Edge Modular Picking Station
Edge Stacking Conveyor (2 units)

At a minimum, one (1) crusher, three (3) screeners and two (2) stacking conveyors shall be maintained in operable condition to ensure adequate Class B material processing. equipment or for equipment down time.

The holder of this Approval must notify the Bureau in writing of any replaced equipment along with the manufacturer specifications for the replacement equipment within two weeks of such replacement. Where applicable, the holder of the Approval must also submit any air permit(s) or air permit application(s) required for the replacement equipment. The above required information may be submitted electronically to recyclingfacilities@dep.nj.gov. [N.J.A.C. 7:26A- 3.5(e)3]

96. The recycling center is authorized to store unprocessed and processed materials (asphalt, concrete, brick, block, rock, and stone) in the designated storage areas, as shown on the approved site plan. The maximum authorized capacity and height for each area is as follows:

Area A: Unprocessed Materials - 12,956 cubic yards; 20 feet
Area B: Unprocessed Materials - 19,697 cubic yards; 20 feet
Area C: Unprocessed Materials - 43,557 cubic yards; 30 feet
Area E: Unprocessed Materials - 6,401 cubic yards; 30 feet
Area D: Processed Materials - 53,807 cubic yards; 15 feet

If at any time, the total amount of unprocessed and processed materials stored onsite reaches the maximum authorized capacities shown on the approved site plan, the recycling center shall immediately cease receiving additional unprocessed material until the amount of unprocessed and processed material stored onsite falls below the total authorized storage capacity of 136,418 cubic yards. Under such circumstances, arrangements shall be made to transfer processed material offsite. While tranfering processed material offsite, any processed material stored in an unprocessed material storage area (Per Condition 97 below) shall be transferred first. [N.J.A.C. 7:26A- 3.5(e)]

Subject Item: RCBG882032 - Final Phase Crushing Operations

97. Processed material may be stored in an unprocessed material storage area as needed, subject to availability of additional capacity in that area and provided that processed and unprocessed materials are separated by either a physical barrier or by maintaining at least eight (8) feet of aisle space between the piles. Under no circumstances shall the combined volume of processed and unprocessed materials exceed that area's maximum storage capacity. [N.J.A.C. 7:26A- 3.5(e)]

98. Horizontal and vertical control points for the unprocessed and processed materials stockpile areas shall be set and maintained on-site. Permanent horizontal limitation markers with bin blocks, jersey barriers, or equivalent as approved by the Department shall be set at the corners of the operational areas, as depicted on the approved site plan. Vertical limitation markers with metal pipes, metal rods, or equivalent as approved by the Department shall be set at locations in close proximity of the stockpile areas and shall clearly establish elevation height above the existing grade for material stock piles. [N.J.A.C. 7:26A- 3.5(e)]

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on March 21, 2025 and listed below. The project was identified as your project: **Willets Point Stadium**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

York Sample ID	Client Sample ID	Matrix	Date Collected	Date Received

General Notes for York Project (SDG) No.: 25C1416

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.
8. Analyses conducted at York Analytical Laboratories, Inc. Stratford, CT are indicated by NY Cert. No. 10854, NJ Cert No. CT005, PA Cert No. 68-04440, CT Cert No. PH-0723; those conducted at York Analytical Laboratories, Inc., Richmond Hill, NY are indicated by NY Cert. No. 12058, NJ Cert No. NY037, CT Cert No. PH-0721, NH Cert No. 2097, EPA Cert No. NY01600.

Sample and Data Qualifiers Relating to This Work Order

Z-01	Temprature taken at the time of analysis
S-08	The recovery of this surrogate was outside of QC limits.
QR-04	The RPD exceeded control limits for the LCS/LCSD QC.
QR-02	The RPD result exceeded the QC control limits; however, both percent recoveries were acceptable. Sample results for the QC batch were accepted based on percent recoveries and completeness of QC data.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
M-CCV1	The recovery for this element in the Continuing Calibration Verification (CCV) was outside the 90-110% recovery criteria.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
IGN-01	Non-Ignit.
ICVE	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration verification (recovery exceeded 30% of expected value).
HT-pH	HOLDING TIME EXCEEDED. Samples for pH must be measured in the field or within 15 minutes of sample collection.
EXT-Temp	Extraction temperture slightly exceeded acceptance range.
EXT-COMP	Completed
CCVH	The value reported is estimated due to its behavior during continuing calibration verification (>20% difference for average RF or >20% drift for linear or quadratic fit.) This value may be biased high.
CCVE	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
CAL-E	The value reported is ESTIMATED. The value is estimated due to its behavior during initial calibration (average Rf>20%)

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis

Low Bias — Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

High Bias — High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

Non-Dir. — Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

APPENDIX J
SOIL REUSE REQUEST AND NYSDEC APPROVAL

NEW YORK STATE
DEPARTMENT OF ENVIRONMENTAL CONSERVATION

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e) and 6NYCRR Part 360.13. Use of this form is not a substitute for reading the applicable regulations and Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is: Restricted Residential Use

Have Ecological Resources been identified? no

Is this soil originating from the site? yes

How many cubic yards of soil will be imported/reused? >1000

If greater than 1000 cubic yards will be imported, enter volume to be imported: N/A - Reuse Only

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone? no

Does it contain less than 10%, by weight, material that passes a size 100 sieve? no

Is this virgin material from a permitted mine or quarry? no

Is this material recycled concrete or brick from a DEC registered processing facility? no

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

In accordance with Appendix D (Excavation Work Plan) Section D-7 of the approved April 22, 2024 Site Management Plan (SMP), material may be used as backfill below the composite cover system for the excavation from which the material was taken without additional analytical testing, assuming no grossly impacted material is observed; however, contaminated on-site material may only be used beneath the site cover as backfill for subsurface utility lines with prior approval from the DEC project manager. The maximum proposed volume anticipated to be reused is 3,600 cubic yards from depths ranging between 1 and 6 feet bgs.

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.4(e)5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

As noted in the Appendix D (Excavation Work Plan) Section D-7 of the approved April 22, 2024 Site Management Plan (SMP), material may be used as backfill below the composite cover system for the excavation from which the material was taken without additional analytical testing. The planned scope of work will include the following:
1. Contaminated site material from below the site cover will be locally excavated for utilities and stockpiled adjacent to the excavation. If grossly-impacted material is encountered, it will be properly segregated and tested for offsite disposal. Grossly-impacted material will not be reused or replaced onsite.
2. Following utility installation, site material will be replaced in the original excavation location around the newly installed subsurface utility lines.
3. A demarcation layer will be re-installed above the replaced material and site cover will be restored per D-9 Cover System Restoration.

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

CFG Stadium Group, LLC - Property Developer/Operator

Location where fill was obtained:

On-site generated soil/fill

Identification of any state or local approvals as a fill source:

N/A

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Prior to the 1900s, the Willets Point area was a tidally influenced salt marsh. From the early 1900s to the early 1930s, the area was used as a dumping ground for coal ash from residential and municipal heating operations in greater New York City. In the late 1930s, Willets Point and nearby Flushing Corona Park were graded and developed. Previously deposited coal ash was left in place as fill. Willets Point was developed primarily with automotive uses, including small car repair shops, filling stations, and scrapyards. These automotive-centric industrial activities characterized Willets Point through about 2015, when they were largely shutdown. The site was remediated to a Track 4 Restricted-Residential Use under the Brownfield Cleanup Program (BCP) and is identified as BCP Site No. C241146C.

Provide a list of supporting documentation included with this request:

Cc: Obligado, Andre A (DEC); O'Connell, Jane H (DEC); Gerald Nicholls; Kristen Wexler; Ali Reach
Subject: [External] RE: Willets Point Development Stadium (C241146C) - Backfill for Utilities Request

Elizabeth,

The Department has reviewed the request dated January 6, 2025 to reuse approximately 3,600 cubic yards of soil at the Willets Point Development Stadium site. The material will be used for backfill of the excavated utility corridors below the demarcation layer from where the excavation came from within the site. Based on the information provided, the request is hereby approved.

As understood by the Department, in accordance with the Excavation Work Plan attached to the Site Management Plan, the material will be screened for visual and olfactory evidence of contamination and a photoionization detector to determine that the material is suitable for reuse. If grossly contaminated material is encountered further testing and/or offsite disposal will may be required.

Should you have any questions, please contact me.

Thank you,

Wendi Zheng

Subject: RE: Willets Point Development Stadium (C241146C) - Backfill for Utilities Request

Hi Wendi,

The volume anticipated to be excavated in the utility corridors is 3,600 CY; however, based on logistics and other factors, a portion of this will be disposed offsite at a permitted facility. The remaining amount is proposed to be replaced below the demarcation layer from the excavation it came from. The excavation depths range from 1 to 6 feet.

Thank you,
Beth

Subject: Willets Point Development Stadium (C241146C) - Backfill for Utilities Request

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Hi Wendi,

I hope you hare having a nice holiday season!

The contractors (Ferreira and Mayrich) at the Willets Point Development Stadium (BCP Site No. C241146C) plan on using site material (non-hazardous soil/fill) beneath the site cover as backfill for subsurface utilities. In accordance with Appendix D (Excavation Work Plan) Section D-7 of the approved April 22, 2024 Site Management Plan (SMP), material may be used as backfill below the composite cover system for the excavation from which the material was taken without additional analytical testing, assuming no grossly impacted material is observed; however, contaminated on-site material may only be used beneath the site cover as backfill for subsurface utility lines with prior approval from the DEC project manager. We are requesting your approval for the below planned scope of work:

Please see below for details:

- Summary of work to be performed:
    - Contaminated site material from below the site cover will be locally excavated for utilities and stockpiled adjacent to the excavation.
        - If grossly-impacted material is encountered, it will be properly segregated and tested for offsite disposal. Grossly-impacted material will not be reused or replaced onsite.
    - Following utility installation, site material will be replaced in the original excavation location around the newly installed subsurface utility lines.
    - A demarcation layer will be re-installed above the replaced material and site cover will be restored per D-9 Cover System Restoration

A sketch of utility corridors where backfill may be replaced is attached. Please let us know if you have any questions.
Thank you,
Beth

RE: Willets Point Stadium Project
37-11 126th Street
Queens, NY 11368
BCP Site No. C241146C
OER# 24TMP0780Q

Dear Ms. Rodrigues:

Bayshore Soil Management, LLC (BSM) has reviewed the provided analytical results for the Willets Point Stadium project located in Queens, NY. Based on our review of the provided analysis in York Analytical report: 24J0599, sample TP1 and Alpha Analytical reports: L2452184, L2455938, and L2453039, samples WC01 (0-7/7-15), WC02 (0-5/5-10), WC03 (0-6/6-12), WC04 (0-5), WC05 (0-15), WC07 (0-5), WC08 (0-6), WC09 (0-17), WC10 (0-11), WC11 (0-5), WC14 (0-5), WC15 (0-5), WC16 (0-6), WC17 (0-6/6-10), WC18 (0-6/6-12), WC19 (0-6/6-10), and associated grab samples for VOCs, EPH and delineation samples for WC06 (0-6) and WC12 (0-5). BSM has identified materials that appear to meet our acceptance criteria for Petroleum Contaminated Soil/Urban Fill. Material represented by samples WC06 (0-6) and WC12 (0-5) are excluded due to hazardous TCLP Lead, along with WC13 (0-5) due to elevated PCBs. The approval decision was based on the review of the submitted generator waste profile, site information, analytical testing results stemming from field sampling work, and review of the following documents:

Bayshore Soil Management, LLC can only accept non-hazardous contaminated soil and based on our review of the above-referenced soil chemistry data and with the above noted conditions, the material is acceptable under the guidelines of our operating permits, with the above-noted exceptions.

Dana Lawson, Chief
Bureau of Recycling & Hazardous Waste Management

May 10, 2027
Expiration Date

Scope of Approval

This General Approval (approval), along with the referenced application documents herein specified, shall constitute the sole approval of Recycling Center operations for Class B Recyclable Material (concrete, asphalt, brick, block, slag (on a case by case basis), glass cullet, wood (untreated and unpainted), potable water treatment residuals, carbon filtration media, street sweepings and petroleum contaminated soil) storage and process center by **Bayshore Recycling Corp.** located in the Township of Woodbridge, Middlesex County, New Jersey. Any registration, approval or permit previously issued by the Division of Sustainable Waste Management, or its predecessor agencies, for the specific activities as described below and as conditioned herein, is hereby superseded.

Regulated Activities at the Facility

Conditions 1 through 42 of this general approval are conditions applicable to all New Jersey recycling facilities. Conditions 43 through 64 of this general approval are applicable to New Jersey recycling facilities that receive, store, process, or transfer Class B material. Conditions 65 through 78 of this general approval are specific to operations related to petroleum contaminated soils, slag, potable water treatment residuals, carbon filtration media, and street sweeping Class B recyclable materials. Condition 79 of this general approval is a condition specific to operations related to concrete, asphalt, brick, block, wood (untreated and unpainted), and glass cullet Class B recyclable materials.

Facility Description

The facility is a Class B recycling center operated by the Bayshore Recycling Corp. The recycling center is located at 75 Crows Mill Road/100 Bayview Avenue on Block 41.03 & Lots 3.02, 3.18 & 4.02, Block 51 & Lots 1, 1.02, 1.18, 2, 2.02 & 2.03, and Block 52 & Lot 1 in the Township of Woodbridge, Middlesex County. This regional recycling center is authorized to receive concrete, asphalt, brick, block, slag (on a case-by-case basis), glass cullet, wood (untreated and unpainted), potable water treatment residuals, carbon filtration media, street sweepings, and petroleum contaminated soil from demolition contractors, municipalities, manufacturers, gasoline stations, homeowners and sites remediated for petroleum contamination. All processed soil will be used for beneficial use projects, brownfields, landfill caps, and construction projects. The recycling center is authorized to receive, store, process, or transfer the Class B recyclable materials twenty-four (24) hours per day, Monday through Sunday.

Petroleum contaminated soil shall be sampled either at the point of generation or at the recycling center for the petroleum contaminated soils processing operation. The sampling results shall be used to determine the maximum contaminant feed rate or maximum petroleum contaminant concentration for the processing equipment.

Prior to the acceptance of potable water treatment residuals, carbon filtration media and street sweepings the facility shall have received analytical results along with a signed certification from the generator certifying the material meets the Department's soil remediation standards for ingestion-dermal and inhalation exposure pathway.

Approved General Approval Application and Associated Documents

The registrant shall construct and operate the facility in accordance with N.J.A.C. 7:26A-1 *et seq.*, the conditions of this Approval, and the following documents:

1. Site Plan – "Modification to General Class B Recycling Center Approval for Bayshore Recycling Corporation", signed and sealed on October 11, 2016 by Lauren J. LaPort, P.E, The ELM Group, Inc., dated April 7, 2009 and last revised on August 26, 2015.

2. Bayshore Recycling Corp. – Renewal Request with no changes for Class B General Approval, prepared by Jennifer Solewski, Vice President, Business & Technical Development, dated September 28, 2021.

3. Bayshore Recycling Corp. – Application for a General Class B Recycling Approval, signed by Valarie Montecalvo, President, Bayshore Recycling Corp., dated August 13, 2001.

4. Bayshore Recycling Corp. – Modification Request for Class B Recycling Center General Approval, prepared by Jennifer Solewski, Vice President of Regulatory Affairs & Corporate Development, dated July 19, 2016.

5. Bayshore Recycling Corp. – Renewal Request with no changes for Class B General Approval, prepared by Jennifer Solewski, Vice President of Regulatory Affairs & Corporate Development, dated January 9, 2017.

6. Middlesex County Solid Waste Management Plan (Plan) inclusion of Bayshore Recycling Corp. as a Class B Recycling Facility located on Block 51, Lots 1, 1R, 2B, and 2C, certified by the Commissioner of the Department of Environmental Protection on September 10, 2001.

7. Amendment to the Plan to include capacity increase, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated January 20, 2004.

8. Amendment to the Plan to include acceptance of cullet, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated March 16, 2004.

9. Amendment to the Plan to include combination of Blandford Land Development Class B Recycling Center and adjacent Bayshore Recycling Corp. Class B Recycling Center and receipt of additional materials at Bayshore Recycling Corp. Class B Recycling Center, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated February 14, 2006.

10. Amendment to the Plan to include receipt and processing of potable water residuals and carbon filtration media, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated April 25, 2011.

11. Amendment to the Plan to include receipt and processing of street sweepings, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated June 16, 2011.

12. Amendment to the Plan to include the transfer of capacities of Bayshore Recycling Corp. Class C Recycling Center (partial) and Converted Organics of Woodbridge, LLC Class C Recycling Center (all) to Bayshore Recycling Corp. Class B Recycling Center, the deletion of Converted Organics of Woodbridge, LLC Class C Recycling Center and modification of block and lot designation of Bayshore Recycling Corp. Class B Recycling Center, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated February 4, 2014.

13. Amendment to the Plan to include the weekly averaging of 31,500 tons of petroleum contaminated soil with a daily maximum of 6,300 tons, approved by the Bureau of Licensing & Planning through the Administrative Action letter dated January 14, 2015.

In case of conflict, the provisions of N.J.A.C. 7:26A-1 et seq. shall have precedence over the conditions of this Approval, and the conditions of this Approval shall have precedence over plans and specifications listed above.

December 9th 2024

CFG Stadium Group LLC
37-11 126th Street
Queens, NY 10016
Brownfield Cleanup Program (BCP) site: (BCP Site No. C241146C)

Clean Earth of North Jersey, Inc. ("CENJ"), 105 Jacobus Avenue, Kearny, NJ 07032, has received and reviewed the following documents for the above referenced site:

- CENJ Hazardous WPS and CBU addendum
- Langan-Preliminary Waste Characterization Report-Oct 29
- April 22, 2024 Final Engineering Report (FER), prepared by Langan

This letter serves as ***approval*** of NON RCRA, NON TSCA solid soils, NO PFAS, for ~800 CY represented by the sample IDs and all related grab and duplicate samples in the referenced reports.

WC-13(0-5)

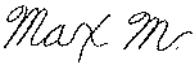
The approval number **(2430849263)** must be provided when scheduling and the Grid Name/Depth must be written on all manifests when shipping soils to CENJ.

This approval is based upon material being accurately represented by all information provided to CENJ at this time, including, but not limited to, Waste Profiles, analysis, site diagrams, site history, and sampling plans. Please be advised that should the material be found to be non-conforming based on our facility permit requirements, CENJ will contact you to discuss options.

Treatment of this material will be performed under CENJ Hazardous Waste Facility Permit No. HWP170002 EPA ID No. NJD991291105.

Clean Earth Inc. and its subsidiaries would like to thank you for giving us the opportunity to manage this waste stream. Should you have any questions or concerns, please do not hesitate to contact me at 412-389-1445.

Sincerely,
CLEAN EARTH INC.



Max Michkofsky
Materials Manager

WASTE MATERIAL PROFILE SHEET INSTRUCTIONS

The following information is required of all waste to be considered for transportation, storage, treatment or disposal. It is used to determine that the waste may be transported, stored, treated or disposed of in a legal, safe and environmentally sound manner. All questions must be answered and completed in ink. Response of "NONE" or "NOT APPLICABLE" should be made if appropriate. Most items required are self-explanatory. Other items need definition or instruction as follows:

PART A - GENERATOR INFORMATION

GENERATOR NAME AND ADDRESS- As notified to EPA.
MAILING ADDRESS- Should be the location that will manage the returned waste profile sheets and manifest.
US EPA ID- For the facility generating the waste.
TECHNICAL CONTACT- A person who could give additional information about the waste, if needed.
COMMON NAME OF WASTE- A name which will be generally descriptive of the waste; a generic classification (e.g., paint, oil and water).
PROCESS GENERATING WASTE- Specific descriptive process or source which generates the waste.

PART B - PHYSICAL/CHEMICAL CHARACTERISTICS OF WASTE

ODOR- If present, describe as well as possible (e.g., solvent, acrid, sweet).
COLOR- Self explanatory.
PHYSICAL STATE- Check as many as apply.
FLASH POINT/IGNITABILITY- A value attained using the appropriate testing method as set forth in 40CFR Part 261.21.
AIR REACTIVE- Will ignite spontaneously in air.
SHOCK SENSITIVE- Normally unstable and readily undergoes violent change without detonating.
GENERATES TOXIC FUMES- In sufficient quantity to endanger human health or the environment when mixed with water, acid or base.
PERCENT LIQUID/SOLID- List the % total solids, suspended solids, free liquids and water.
SPECIFIC GRAVITY- The weight of the water compared to the weight of an equal volume of the waste.

PART C - CHEMICAL COMPOSITION

List all organic and/or inorganic components of the waste using specific chemical names. If trade names are used, Material Safety Data Sheets or other documents which adequately describe the composition of the waste must be provided. For each component indicate expected percent or range in which the component is present. In case of extreme pH (less than 2 or greater than 12.5) indicate specific acid or caustic species. Any hazardous components present in "trace" amounts and not specifically mentioned in PARTS D, F and/or H should be included, even if specific concentrations are not known. Any components listed in PARTS D, F, and/or H which exceed 10,000 PPM (1%) must be included. Components must total to 100% including water, earth or other components. If a unit of measure other than percent must be used, indicate that unit. Indicate which, if any, of the constituents are listed in SARA, Title III, Section 313. This list can be found at 40CFR Part 372. Also, indicate which, if any, of the constituents are listed in SARA, Title III, EHS Section 302. This list can be found at 40 CFR Part 355; Appendices A and B.

PART D - TOXICITY CHARACTERISTIC

Use the appropriate line to indicate the actual level, specified ranges or if below regulated level for each toxicity characteristic as defined by 40CFR Part 261.24.

PART E - HAZARDOUS CHARACTERISTICS

Complete if the waste exhibits any of the hazardous characteristics as per OSHA 29CFR Part 1910.1200 Hazard Communications Standard.

PART F - SARA/OSHA

See below for detailed directions.

PART G - SHIPPING INFORMATION

Indicate method of shipment and type of container. If drums, they must be as specified in 49CFR Part 173, 178 or 179. Indicate quantity to be shipped during specified time frame (e.g., 10 drums per month).

PART H - MANIFEST INFORMATION

Is the waste a US DOT hazardous material as defined in 49CFR Part 172.101? If yes, enter the **SHIPPING NAME, HAZARD CLASS/ DIVISION, DOT ID NUMBER, R.Q.** (Reportable Quantity) as defined in 49CFR and identify applicable **PACKAGING GROUP.** Enter the technical names of at least two most predominant components which contribute to the hazards of the mixture or solution for all proper shipping names found in 49CFR Part 172.203 (k)3. Enter the Emergency Response Telephone number and contact name as required by 49CFR Part 172.604.

PART I - WASTE CHARACTERISTICS

Use this section to properly list all applicable US EPA/STATE Hazardous Waste Numbers and identify any waste that may be prohibited from land disposal under 40CFR Part 268.

PART J - AUTHORIZATION TO CORRECT WMPS

Provide generator's signature in this section to allow CENJ to make corrections on the WMPS that are consistent with the results of sample analysis and regulatory requirements. Signing this section will help expedite the approval process in the event corrections need to be made.

PART K - SPECIAL HANDLING/ COMMENTS

Use this section to alert the handlers of the waste of any precautions that should be taken or if the waste requires special safety or personal protective equipment. Use this space to list any additional information that may help in managing this waste.

PARTS N/O - WARRANTIES/ SIGNATURE

Please read these warranties carefully. If any of these warranties cannot be certified, state the reason in Section K, Comments. The generator of the waste must sign and date the Generator's Waste Material Profile Sheet.

***PART F - CONTINUED, Instructions on Health Hazard Characterization**

Identify by checking the box which most appropriately describes the hazardous characteristics as defined below:

NONE
Self-explanatory.

HIGHLY TOXIC
(a) A chemical that has a median lethal dose (LD50) of 50 milligrams or less per kilogram of body weight when administered orally to albino rats weighing between 200 and 300 grams each.
(b) A chemical that has a median lethal dose (LD50) of 200 milligrams or less per kilogram of body weight when administered by continuous contact for 24 hours (or less if death occurs within 24 hours) with the bare skin of albino rabbits weighing between 2 and 3 kilograms each.
(c) A chemical that has a median lethal concentration (LC50) in the air of 200 parts per million by volume or less of gas or vapor, or 2 milligrams per liter or less of mist, fume or dust, when administered by continuous inhalation for one hour (or less if death occurs within one hour) to albino rats weighing between 200 and 300 grams each.

TOXIC
(a) A chemical that has median lethal dose (LD50) of more than 50 milligrams per kilogram but not more than 500 milligrams per kilogram of body weight when administered orally to albino rats weighing between 200 and 300 grams each.
(b) A chemical that has a median lethal dose (LD50) of more than 200 milligrams per kilogram but not more than 1000 milligrams per kilogram of body weight when administered by continuous contact for 24 hours (or less if death occurs within 24 hours) with the bare skin of

albino rabbits weighing between 2 and 3 kilograms each.
(c) A chemical that has a median lethal concentration (LC50) in air of more than 200 parts per million but not more than 2000 parts per million by volume of gas or vapor, or more than two milligrams per liter but not more than 20 milligrams per liter of mist, fume, or dust, when administered by continuous inhalation for one hour (or less if death occurs within one hour) to albino rats weighing between 200 and 300 grams each.

IRRITANT
Irritant means a chemical substance or mixture, not a corrosive which on immediate, prolonged or repeated contact with normal living tissues induces a local inflammatory response in the skin, eyes or mucous membranes per 16CFR Part 1500.41.

SENSITIZER
Sensitizer means a chemical substance or mixture that causes a substantial number of persons to develop a hypersensitive reaction in normal tissue upon reapplication of the chemical substance or mixture through an allergic or photodynamic reaction.

CORROSIVE
Corrosive Material means a chemical liquid or solid that causes visible destruction or irreversible alteration in human skin tissue at the site of contact or in the case of leakage from its packaging, a liquid that has a severe corrosion rate on steel.
(1) A Material is considered to be destructive or to cause irreversible alteration in skin tissue if, when tested on the intact skin of the albino rabbit by the method described in Appendix A of 49CFR Part 173, the structure of the tissue at the site of contact is destroyed or changed irreversibly after an exposure period of 4 hours or less.

(2) A liquid is considered to have a severe corrosive rate if its corrosion rate exceeds 0.250 inch per year (IPY) on steel (SAE 1020) at a test temperature of 103F.

OTHER HAZARDOUS CHEMICALS . . .
Short Term
Acute (short term) refers to the adverse effects that normally are evident immediately or shortly after the exposure. Appropriate information on the effects of inhalation and skin or eye exposure should be entered here. The information should be in the form of simple symptomatic statements such as "pale and nauseous," "dizzy feeling," "weak," "irritation," etc. Again, refer to supplier MSDSs, the NPCA Labeling Guide or any other appropriate source for hazard warning language.

CARCINOGENS
Carcinogen means a chemical which has been demonstrated to cause cancer in humans or to cause cancer in animals and, therefore, is considered capable of causing cancer in humans. A chemical is considered to be a carcinogen if:
(a) it has been evaluated by the International Agency for Research on Cancer (IARC) and found to be a carcinogen or potential carcinogen; or
(b) it is listed as a carcinogen or potential carcinogen in the Annual Report on Carcinogens published by the National Toxicology Program (NTP) (latest edition); or
(c) it is regulated by OSHA as a carcinogen.

OTHER HAZARDUS CHEMICALS . . .
Long Term
Chronic (long term, cumulative) refers to the adverse effects that develop slowly over a long period of time or upon repeated prolonged exposure. Appropriate information on the effects of chronic overexposure should be reported here. Evidence of carcinogenicity, asbestosis, sensitization, etc., should be indicated here. Known or suspect mutagens or teratogens must also be identified here. Mutagen means those chemical or physical effects which can alter genetic material in an organism and results in physical or functional changes in all subsequent generations. Teratogen means a chemical which has been demonstrated to cause physical defects in the developing embryo.

SAMPLES
If the generator cannot properly characterize their waste, a representative sample must accompany each Waste Material Profile Sheet submitted to CENJ. The only exception would be for virgin material where a Material Safety Data Sheet (MSDS) has been submitted with the Profile Sheet.

All samples must be taken according to 40CFR Part 261 Appendix I or the New Jersey DEP Field Sampling Procedures Manual.

All samples must be packaged according to US DOT, US EPA and any other applicable regulations.

Each sample container must be properly labeled to comply with NJAC 7:26 - 8.2(A) 12ii and NJAC 8:59 - Subchapter 5 and any other applicable regulations.

A CENJ Chain of Custody Record must be completed and submitted with each sample. Samples which are not properly classified, described, packaged, marked, labeled and in the proper condition to transport according to the applicable regulations of the US DOT, OSHA, NJ DEP, New Jersey Worker and Community Right-to-Know Act and/or any other applicable regulations may be rejected and returned at the generator's expense.

INDEMNITY
Customer hereby agrees to indemnify and hold CENJ harmless from and against any and all loss, damage, suits, liability and expenses (including, but not limited to, reasonable investigation and legal expenses) arising out of any claim for loss of or damage to property, including CENJ's property, and injuries to or death of persons, including customer's or CENJ's employees, caused by or resulting from the negligence or willful misconduct or violation of any federal, state or local laws or regulations of customer, its employees or agents. CENJ hereby agrees to indemnify and hold customer harmless from and against all loss, damage, suits, liability and expenses (including, but not limited to, reasonable investigation and legal expenses) arising out of any claim for loss of or damage to property, including customer's property, and injuries to or death of persons, including CENJ's or customer's employees, to the extent caused by or resulting from the negligence or willful misconduct of CENJ, its employees or agents.

DISTRIBUTION OF COPIES
Retain a copy for your records. Send a copy of this Generator's Waste Material Profile Sheet and attachments within the sample shipping package, ensuring that if the sample leaks, the paperwork will remain intact. Send this package to the address below.

Lindane	D013	0.4	<0.4
Methoxychlor	D014	10.0	<10
Methyl Ethyl Ketone	D035	200.0	<200
Nitrobenzene	D036	2.0	<2.0
Pentachlorophenol	D037	100.0	<100
Pyridine	D038	5.0 *	<5.0
Tetrachloroethylene	D039	0.7	<0.7
Toxaphene	D015	0.5	<0.5
Trichloroethylene	D040	0.5	<0.5
2,4,5-Trichlorophenol	D041	400.0	<400
2,4,6-Trichlorophenol	D042	2.0	<2.0
2,4,5-TP (Silvex)	D017	1.0	<1.0
Vinyl chloride	D043	0.2	<0.2

* Quantitation limit is greater than the calculated regulatory level. The quantitation limit therefore becomes the regulatory level.

** If o-,m- and p-Cresol concentrations cannot be differentiated, the total Cresol (D026) concentration is used. The regulatory level of total Cresol is 200mg/L.

E. HAZARDOUS CHARACTERISTICS

- ☐ Radioactive
- ☐ Infectious
- ☐ Toxic
- ☐ Explosive
- ☐ Pyrophoric
- ☐ Oxidizer
- ☐ Corrosive
- ☒ Other Describe TC Toxic
- ☐ Corrosive
- ☐ None of the above

- ☐ Compressed Gas
- ☐ Flammable Solid
- ☐ Organic Peroxide
- ☐ Shock Sensitive
- ☐ Reactive Metals (Specify in section C)

F. IDENTIFY THE HEALTH HAZARD CHARACTERISTICS FROM THE TABLE BELOW

Immediate (Acute) Health Hazard

- ☐ None
- ☐ Highly Toxic
- ☐ Toxic
- ☐ Irritant
- ☐ Sensitizer
- ☐ Corrosive
- ☐ Other Hazardous Chemicals with an adverse effect on a target organ that generally occurs as a result of short term exposure and with a short duration.

Delayed (Chronic) Health Hazard

- ☐ Carcinogens (if carcinogens are known to be in waste, specify the carcinogen in Section C)
- ☒ Other Hazardous Chemicals with an adverse effect on a target organ that generally occurs as a result of long term exposure and with a long duration.

G. SHIPPING INFORMATION

- ☐ Bulk Liquid
- ☒ Bulk Solid
- ☐ Bulk Sludge
- ☐ Other Describe

- ☐ Drums (Steel)
- ☐ Drums (Poly)

Shipping Frequency: Quantity 800 cy Per One Time

H. MANIFEST INFORMATION

Is this a DOT Hazardous Material? ☒ Yes ☐ No

Proper DOT shipping name (49CFR table 172.101) RQ, Hazardous waste, solid, n.o.s. (lead) Rq. Units (lb/kg) 10

DOT Hazard Class / Division: 9 UN/UA NA3077 Packing Group (select one) ☐ I ☐ II ☒ III

Additional descriptions requirements (49CFR 172.203) ERG#171

Emergency response telephone number (49CFR 172.604) (212) 739-7865 Contact (print name) Robert Walker

I. WASTE CHARACTERISTICS

Is this a US EPA Hazardous Waste? ☒ Yes ☐ No US EPA Hazardous Waste Number(s) D008 Hazard Codes E

If yes, if the waste is a characteristic hazardous waste, does it contain underlying hazardous constituents (as defined at 40CRT 268.2(i)) Above the Universal Treatment Standard.

☐ Yes ☐ No If yes, please complete the UHC Waste Profile Addendum.

State Non-Hazardous Waste Number(s)

Does this waste contain any PCBs? ☐ Yes ☒ No If yes, indicate level Are PCBs TSCA Regulated? ☐ Yes ☐ No

Does this waste contain any herbicides, pesticides, dioxin or residues thereof? ☐ Yes ☒ No If yes, list compound and concentration in Section C.

Is this waste prohibited from land disposal under 40CFR Part 268? ☒ Yes ☐ No

If yes, list waste subcategory description, if applicable Toxicity Characteristic or check none ☐ None

Is this waste a (check one) ☒ Non-Wastewater ☐ Wastewater? (See 40CFR 268.2)

Benzene NESHAP applicability: Is waste subject to management under National Emission Standards for Benzene Waste Operations as provided in 40CFR Part 61 Subpart FF?

☐ Yes ☐ No If yes, give benzene concentration

If this waste is a RCRA Hazardous Waste, does it contain VOCs in concentrations ≥500 PPM (40CFR Subpart CC)? ☐ Yes ☐ No

Are there any special handling instructions for the disposal of this waste? ☐ Yes ☒ No If yes, specify

J. AUTHORIZATION TO CORRECT WMPS

WASTE MATERIAL PROFILE SHEET INSTRUCTIONS

The following information is required of all waste to be considered for transportation, storage, treatment or disposal. It is used to determine that the waste may be transported, stored, treated or disposed of in a legal, safe and environmentally sound manner. All questions must be answered and completed in ink. Response of "NONE" or "NOT APPLICABLE" should be made if appropriate. Most items required are self-explanatory. Other items need definition or instruction as follows:

PART A - GENERATOR INFORMATION

GENERATOR NAME AND ADDRESS- As notified to EPA.
MAILING ADDRESS- Should be the location that will manage the returned waste profile sheets and manifest.
US EPA ID- For the facility generating the waste.
TECHNICAL CONTACT- A person who could give additional information about the waste, if needed.
COMMON NAME OF WASTE- A name which will be generally descriptive of the waste; a generic classification (e.g., paint, oil and water).
PROCESS GENERATING WASTE- Specific descriptive process or source which generates the waste.

PART B - PHYSICAL/CHEMICAL CHARACTERISTICS OF WASTE

ODOR- If present, describe as well as possible (e.g., solvent, acrid, sweet).
COLOR- Self explanatory.
PHYSICAL STATE- Check as many as apply.
FLASH POINT/IGNITABILITY- A value attained using the appropriate testing method as set forth in 40CFR Part 261.21.
AIR REACTIVE- Will ignite spontaneously in air.
SHOCK SENSITIVE- Normally unstable and readily undergoes violent change without detonating.
GENERATES TOXIC FUMES- In sufficient quantity to endanger human health or the environment when mixed with water, acid or base.
PERCENT LIQUID/SOLID- List the % total solids, suspended solids, free liquids and water.
SPECIFIC GRAVITY- The weight of the water compared to the weight of an equal volume of the waste.

PART C - CHEMICAL COMPOSITION

List all organic and/or inorganic components of the waste using specific chemical names. If trade names are used, Material Safety Data Sheets or other documents which adequately describe the composition of the waste must be provided. For each component indicate expected percent or range in which the component is present. In case of extreme pH (less than 2 or greater than 12.5) indicate specific acid or caustic species. Any hazardous components present in "trace" amounts and not specifically mentioned in PARTS D, F and/or H should be included, even if specific concentrations are not known. Any components listed in PARTS D, F, and/or H which exceed 10,000 PPM (1%) must be included. Components must total to 100% including water, earth or other components. If a unit of measure other than percent must be used, indicate that unit. Indicate which, if any, of the constituents are listed in SARA, Title III, Section 313. This list can be found at 40CFR Part 372. Also, indicate which, if any, of the constituents are listed in SARA, Title III, EHS Section 302. This list can be found at 40 CFR Part 355; Appendices A and B.

PART D - TOXICITY CHARACTERISTIC

Use the appropriate line to indicate the actual level, specified ranges or if below regulated level for each toxicity characteristic as defined by 40CFR Part 261.24.

PART E - HAZARDOUS CHARACTERISTICS

Complete if the waste exhibits any of the hazardous characteristics as per OSHA 29CFR Part 1910.1200 Hazard Communications Standard.

PART F - SARA/OSHA

See below for detailed directions.

PART G - SHIPPING INFORMATION

Indicate method of shipment and type of container. If drums, they must be as specified in 49CFR Part 173, 178 or 179. Indicate quantity to be shipped during specified time frame (e.g., 10 drums per month).

PART H - MANIFEST INFORMATION

Is the waste a US DOT hazardous material as defined in 49CFR Part 172.101? If yes, enter the **SHIPPING NAME, HAZARD CLASS/ DIVISION, DOT ID NUMBER, R.Q.** (Reportable Quantity) as defined in 49CFR and identify applicable **PACKAGING GROUP.** Enter the technical names of at least two most predominant components which contribute to the hazards of the mixture or solution for all proper shipping names found in 49CFR Part 172.203 (k)3. Enter the Emergency Response Telephone number and contact name as required by 49CFR Part 172.604.

PART I - WASTE CHARACTERISTICS

Use this section to properly list all applicable US EPA/STATE Hazardous Waste Numbers and identify any waste that may be prohibited from land disposal under 40CFR Part 268.

PART J - AUTHORIZATION TO CORRECT WMPS

Provide generator's signature in this section to allow CENJ to make corrections on the WMPS that are consistent with the results of sample analysis and regulatory requirements. Signing this section will help expedite the approval process in the event corrections need to be made.

PART K - SPECIAL HANDLING/ COMMENTS

Use this section to alert the handlers of the waste of any precautions that should be taken or if the waste requires special safety or personal protective equipment. Use this space to list any additional information that may help in managing this waste.

PARTS N/O - WARRANTIES/ SIGNATURE

Please read these warranties carefully. If any of these warranties cannot be certified, state the reason in Section K, Comments. The generator of the waste must sign and date the Generator's Waste Material Profile Sheet.

***PART F - CONTINUED, Instructions on Health Hazard Characterization**

Identify by checking the box which most appropriately describes the hazardous characteristics as defined below:

NONE
Self-explanatory.

HIGHLY TOXIC
(a) A chemical that has a median lethal dose (LD50) of 50 milligrams or less per kilogram of body weight when administered orally to albino rats weighing between 200 and 300 grams each.
(b) A chemical that has a median lethal dose (LD50) of 200 milligrams or less per kilogram of body weight when administered by continuous contact for 24 hours (or less if death occurs within 24 hours) with the bare skin of albino rabbits weighing between 2 and 3 kilograms each.
(c) A chemical that has a median lethal concentration (LC50) in the air of 200 parts per million by volume or less of gas or vapor, or 2 milligrams per liter or less of mist, fume or dust, when administered by continuous inhalation for one hour (or less if death occurs within one hour) to albino rats weighing between 200 and 300 grams each.

TOXIC
(a) A chemical that has median lethal dose (LD50) of more than 50 milligrams per kilogram but not more than 500 milligrams per kilogram of body weight when administered orally to albino rats weighing between 200 and 300 grams each.
(b) A chemical that has a median lethal dose (LD50) of more than 200 milligrams per kilogram but not more than 1000 milligrams per kilogram of body weight when administered by continuous contact for 24 hours (or less if death occurs within 24 hours) with the bare skin of

albino rabbits weighing between 2 and 3 kilograms each.
(c) A chemical that has a median lethal concentration (LC50) in air of more than 200 parts per million but not more than 2000 parts per million by volume of gas or vapor, or more than two milligrams per liter but not more than 20 milligrams per liter of mist, fume, or dust, when administered by continuous inhalation for one hour (or less if death occurs within one hour) to albino rats weighing between 200 and 300 grams each.

IRRITANT
Irritant means a chemical substance or mixture, not a corrosive which on immediate, prolonged or repeated contact with normal living tissues induces a local inflammatory response in the skin, eyes or mucous membranes per 16CFR Part 1500.41.

SENSITIZER
Sensitizer means a chemical substance or mixture that causes a substantial number of persons to develop a hypersensitive reaction in normal tissue upon reapplication of the chemical substance or mixture through an allergic or photodynamic reaction.

CORROSIVE
Corrosive Material means a chemical liquid or solid that causes visible destruction or irreversible alteration in human skin tissue at the site of contact or in the case of leakage from its packaging, a liquid that has a severe corrosion rate on steel.
(1) A Material is considered to be destructive or to cause irreversible alteration in skin tissue if, when tested on the intact skin of the albino rabbit by the method described in Appendix A of 49CFR Part 173, the structure of the tissue at the site of contact is destroyed or changed irreversibly after an exposure period of 4 hours or less.

(2) A liquid is considered to have a severe corrosive rate if its corrosion rate exceeds 0.250 inch per year (IPY) on steel (SAE 1020) at a test temperature of 103F.

OTHER HAZARDOUS CHEMICALS . . .
Short Term
Acute (short term) refers to the adverse effects that normally are evident immediately or shortly after the exposure. Appropriate information on the effects of inhalation and skin or eye exposure should be entered here. The information should be in the form of simple symptomatic statements such as "pale and nauseous," "dizzy feeling," "weak," "irritation," etc. Again, refer to supplier MSDSs, the NPCA Labeling Guide or any other appropriate source for hazard warning language.

CARCINOGENS
Carcinogen means a chemical which has been demonstrated to cause cancer in humans or to cause cancer in animals and, therefore, is considered capable of causing cancer in humans. A chemical is considered to be a carcinogen if:
(a) it has been evaluated by the International Agency for Research on Cancer (IARC) and found to be a carcinogen or potential carcinogen; or
(b) it is listed as a carcinogen or potential carcinogen in the Annual Report on Carcinogens published by the National Toxicology Program (NTP) (latest edition); or
(c) it is regulated by OSHA as a carcinogen.

OTHER HAZARDUS CHEMICALS . . .
Long Term
Chronic (long term, cumulative) refers to the adverse effects that develop slowly over a long period of time or upon repeated prolonged exposure. Appropriate information on the effects of chronic overexposure should be reported here. Evidence of carcinogenicity, asbestosis, sensitization, etc., should be indicated here. Known or suspect mutagens or teratogens must also be identified here.
Mutagen means those chemical or physical effects which can alter genetic material in an organism and results in physical or functional changes in all subsequent generations.
Teratogen means a chemical which has been demonstrated to cause physical defects in the developing embryo.

SAMPLES
If the generator cannot properly characterize their waste, a representative sample must accompany each Waste Material Profile Sheet submitted to CENJ. The only exception would be for virgin material where a Material Safety Data Sheet (MSDS) has been submitted with the Profile Sheet.

All samples must be taken according to 40CFR Part 261 Appendix I or the New Jersey DEP Field Sampling Procedures Manual.

All samples must be packaged according to US DOT, US EPA and any other applicable regulations.

Each sample container must be properly labeled to comply with NJAC 7:26 - 8.2(A) 12ii and NJAC 8:59 - Subchapter 5 and any other applicable regulations.

A CENJ Chain of Custody Record must be completed and submitted with each sample. Samples which are not properly classified, described, packaged, marked, labeled and in the proper condition to transport according to the applicable regulations of the US DOT, OSHA, NJ DEP, New Jersey Worker and Community Right-to-Know Act and/or any other applicable regulations may be rejected and returned at the generator's expense.

INDEMNITY
Customer hereby agrees to indemnify and hold CENJ harmless from and against any and all loss, damage, suits, liability and expenses (including, but not limited to, reasonable investigation and legal expenses) arising out of any claim for loss of or damage to property, including CENJ's property, and injuries to or death of persons, including customer's or CENJ's employees, caused by or resulting from the negligence or willful misconduct or violation of any federal, state or local laws or regulations of customer, its employees or agents. CENJ hereby agrees to indemnify and hold customer harmless from and against all loss, damage, suits, liability and expenses (including, but not limited to, reasonable investigation and legal expenses) arising out of any claim for loss of or damage to property, including customer's property, and injuries to or death of persons, including CENJ's or customer's employees, to the extent caused by or resulting from the negligence or willful misconduct of CENJ, its employees or agents.

DISTRIBUTION OF COPIES
Retain a copy for your records. Send a copy of this Generator's Waste Material Profile Sheet and attachments within the sample shipping package, ensuring that if the sample leaks, the paperwork will remain intact. Send this package to the address below.

Clean Earth of North Jersey, Inc.

Brownfield Cleanup Program (BCP) site: (BCP Site No. C241146C)

Clean Earth of North Jersey, Inc. ("CENJ"), 105 Jacobus Avenue, Kearny, NJ 07032, has received and reviewed the following documents for the above referenced site:

- CENJ Hazardous WPS and CBU addendum
- Langan-Preliminary Waste Characterization Report-Oct 29
- April 22, 2024 Final Engineering Report (FER), prepared by Langan

This letter serves as ***approval*** of RCRA D008 SOIL, NON TSCA solid soils, NO PFAS,NO UHC'S >10x, for ~800 CY represented by the sample IDs and all related grab and duplicate samples in the referenced reports.

WC-12(0-5)

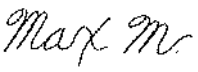
The approval number **(2430849392)** must be provided when scheduling and the Grid Name/Depth must be written on all manifests when shipping soils to CENJ.

This approval is based upon material being accurately represented by all information provided to CENJ at this time, including, but not limited to, Waste Profiles, analysis, site diagrams, site history, and sampling plans. Please be advised that should the material be found to be non-conforming based on our facility permit requirements, CENJ will contact you to discuss options.

Treatment of this material will be performed under CENJ Hazardous Waste Facility Permit No. HWP170002 EPA ID No. NJD991291105.

Clean Earth Inc. and its subsidiaries would like to thank you for giving us the opportunity to manage this waste stream. Should you have any questions or concerns, please do not hesitate to contact me at 412-389-1445.

Sincerely,
CLEAN EARTH INC.



Max Michkofsky
Materials Manager

RE: Class 1 Modification of a Hazardous Waste Facility Permit for:
Clean Earth of North Jersey, Inc. (CENJ)
Kearny Town, Hudson County
Facility ID No.: NJD991291105
Permit No.: HWP170002

Dear Mr. Logan,

The Bureau of Recycling & Hazardous Waste Management (Bureau) is in receipt of a Class 1 permit modification request for the above referenced facility, dated December 1, 2017, and supplemental information submitted on June 19, 2018. The modification request is to authorize the installation of steel plates to wear surfaces in the existing containment building unit (CBU), specifically on the process floor outside of cells #2, #3, and #4.

The Bureau has completed a review of the application, as well as the supplemental information. Based on this review, the Bureau hereby approves the modification request, which appears as condition 96 in the enclosed modified Hazardous Waste Facility Permit. In accordance with 40 CFR 270.42(a)(ii), CENJ must send notice of the modification to all persons on the facility mailing list (attached), and all appropriate units of State and local government as specified in 40 CFR 124.10(c)(ix) within 90 calendar days of modification request approval.

The Bureau has also modified the permit to remove all references to tanks ST-4 and ST-5, since both tanks have been closed and removed from hazardous waste service and replaced with new tanks ST-6 and ST-7. Additionally, the following updates regarding tanks ST-6 and ST-7 have been made: removal of references to the installation of these tanks; and authorization to manage ID 72 waste in these tanks since the permittee's solid waste permit has been modified to authorize such use.

Should you have any questions regarding this matter, please contact John Latwinas at (609) 984-3023 or john.latwinas@dep.nj.gov.

Sincerely,

Karen Kloo, Chief
Bureau of Recycling & Hazardous Waste Management

Hazardous Waste Facility Permit

Under the provisions of N.J.S.A. 13:1E-1 et seq. known as the Solid Waste Management Act, this permit is hereby issued to:

CLEAN EARTH OF NORTH JERSEY INC
105 Jacobus Ave
Kearny Town, New Jersey 07032

For the Purpose of Operating a:	Hazardous Waste Treatment, Storage, and Transfer Facility
Lot & Block:	Lots 14 and 14A; Block: 289
In the Municipality of:	Kearny Town
County:	Hudson
Under Facility Permit No.:	HWP170002
EPA ID No.:	NJD991291105

This permit is subject to compliance with all conditions specified herein and all regulations promulgated by the Department of Environmental Protection.

This permit shall not prejudice any claim the State may have to riparian land, nor does it allow the permittee to fill or alter or allow to be filled or altered in any way, lands that are deemed to be riparian, wetlands, stream encroachment areas or flood plains, or that are within the Coastal Area Facility Review Act (CAFRA) zone or are subject to the Pinelands Protection Act of 1979, nor shall it allow the discharge of pollutants to waters of this State without prior acquisition of the necessary grants, permits, or approvals from the Department of Environmental Protection or the U.S. Environmental Protection Agency.

Bureau of Recycling and Hazardous Waste Management

June 29, 2018
Modification Date

May 5, 2024
Expiration Date

Scope of Permit

The conditions of this permit are based on the New Jersey hazardous waste regulations at N.J.A.C. 7:26G and the permit application submitted by the permittee. N.J.A.C. 7:26G "incorporates by reference" (with limited exception) the Federal hazardous waste regulations found at Parts 124, 260-266, 268 and 270, Title 40 of the Code of Federal Regulations (C.F.R.). In order to eliminate confusion, and to clearly describe the precise obligations that are imposed upon the permittee, only the specific C.F.R citations are referenced in this permit. For the applicable State regulatory citations, refer to N.J.A.C. 7:26G.

This permit, along with the referenced permit application documents herein specified, shall constitute the sole Hazardous Waste Facility Permit for the operation of the hazardous waste facility. Any registration, Approval or Permit previously issued by the Division of Solid and Hazardous or its predecessor agencies is hereby superseded. The permittee need not comply with the conditions of this permit to the extent and for the duration such non-compliance is authorized by an emergency permit (40 C.F.R. 270.61).

Description of Hazardous Waste Activities

The permittee owns and operates a commercial hazardous waste treatment, storage and transfer facility. The facility receives waste streams of various hazardous waste codes from off-site generators via highway and rail. The wastes are stored and treated on-site in containers and tanks and within cells the Containment Building. The facility has a permitted maximum storage capacity of 249,500 gallons or its equivalent volume of hazardous waste at any one time.

Existing waste treatment activities at the facility include the blending/bulking of waste in tanks and tankers to meet the specifications of off-site authorized industrial boilers or furnaces, solvent reclamation facilities, hazardous waste incinerators, marketers of hazardous waste fuel and treatment facilities; solidification/stabilization of waste solids, slurries, and sludges in concrete cells within the Containment Building and in containers; consolidation of waste shipments; transfer of waste shipments, and container/ lab pack repackaging. All treatment activities are conducted within appropriately designed and constructed secondary containment units.

Also conducted within the footprint of the hazardous waste facility, but not within the scope of this hazardous waste permit, are the following: the management of non-hazardous waste within the container storage areas, tanks, former Stabilization/Solidification Area #1, the Containment Building, and proposed Solid Waste Transfer Station Building at the Stabilization/Solidification Area #1; the management of non-friable asbestos within the Containment Building; and large quantity universal waste handler activities involving the collection and transfer of batteries, pesticides, mercury-containing devices, consumer electronics, lamps, and oil-based finishes. The above activities are conducted in accordance with other appropriate regulations and permits/approval from the Department.

Class 1 Modification Issued November 12, 2014

In response to the permittee's September 2014 Class 1 Permit Modification Request, the permit has been modified to authorize the installation of steel wear plates on the inside portions of the cell push walls and the cell concrete floor of the Containment Building Unit.

Class 1 Modification Issued July 2, 2015

In response to the permittee's May 4, 2015 request and supplementary information submitted via email on May 5, 2015 by Averil Rance, Vice President, Clean Earth of North Jersey, Inc., the permit has been modified to allow the permittee sixty (60) days to submit a revised design for a secondary containment structure for the relocation of Tanks ST-4 and ST-5 and to establish August 5, 2016 as the completion date for the relocation of the tanks.

Class 1 Modification Issued October 21, 2015

The permit has been modified in response to the permittee's Class 1 Permit Modification Request, submitted on July 1, 2015 by Michael D. Logan, Vice President, Compliance Plus Services and later clarified in submittals dated September 10, 2015 and September 29, 2015. The facility is authorized to remove tanks ST-4 and ST-5 from hazardous waste service and to install new hazardous waste storage tanks ST-6 and ST-7 in a new containment area.

Class 1 Modification Issued December 9, 2015

In response to the permittee's October 13, 2014 Class 1 Permit Modification Request and February 23, 2015 Response to Notice of Deficiency, the permit has been modified to authorize the repackaging and consolidation of polychlorinated biphenyl (PCB) waste in authorized container storage areas and the repackaging of containerized hazardous wastes in Areas A and B.

The permit is also being modified to indicate that the permittee is authorized to manage ID 72 solid waste in new tanks ST-6 and ST-7 once authorized by the permittee's Solid Waste Permit and provided the decontamination procedures outlined in the approved solid waste permit application documents are followed. This was an authorized use of tanks ST-4 and ST-5, which tanks ST-6 and ST-7 replace.

Class 1 Modification Issued June, xx 2018

In response to the permittee's December 1, 2017 Class 1 Permit Modification Request, the permit has been modified to authorize the installation of steel plates to wear surfaces on the process floor of the existing containment building unit (CBU) outside of cells #2, #3, and #4.

The permit has also been modified to indicate that the permittee is authorized to manage hazardous waste in newly installed tanks ST-6 and ST-7 replacing tanks ST-4 and ST-5. Additionally, all references to tanks ST-4 and ST-5 have been closed and removed from the permit since both tanks have been removed from hazardous waste service.

Referenced Permit Application Documents

The permittee shall operate the facility, and construct or install associated appurtenances thereto, in accordance with the regulations contained in 40 C.F.R. Parts 260 through 270, the conditions of this permit, and the following permit application documents:

(1) Clean Earth of North Jersey, Inc, Part A permit application for a hazardous waste facility signed by Robert Fixter, August 10, 2009 and revised June 2011.

(2) Clean Earth of North Jersey, Inc, Part B permit application for a hazardous waste facility signed by Robert Fixter, August 10, 2009, subsequently revised October 2010; March 23, 2011; May 23, 2011, June 7, 2011, June 29, 2011, July 18, 2011, September 13, 2011, and October 7, 2011, signed by Michael Logan, Vice President, Compliance Plus Services and the following drawings:

(10) Class 1 Permit Modification Request for the installation of steel wear plates on cell push walls and floors, dated September 8, 2014 and signed by Michael D. Logan, Vice President of Compliance Plus Services. This request included drawing entitled *Containment Building Unit Cell Wall and Floor Steel Plate Details* signed and sealed by Bradley J. Cunningham, PE.

(11) Revised closure plan page and closure cost pages for the addition of steel wear plates, emailed on October 22, 2014 by Bradley J. Cunningham, Manager at Compliance Plus Services.

(12) Revised construction schedule with interim inspections, emailed on October 28, 2014 by Michael D. Logan, Vice President of Compliance Plus Services.

(13) The following documents submitted by Michael D. Logan, Vice President, Compliance Plus Services, on behalf of the facility:

Class 1 Permit Modification Request, dated July 1, 2015, for the removal of ST-4 and ST-5 from hazardous waste service and the installation of new hazardous waste storage tanks ST-6 and ST-7 in a new containment area.

Response to NOD, dated September 10, 2015, which includes an amended decontamination procedure for the July 1, 2015 request.

A clarifying email, dated September 29, 2015, containing a revised construction schedule for the July 1, 2015 request.

(14) Drawing signed and sealed by Robert Busch, PE:

Drawing Title	Revision	Number
New Containment Area Foundation Plan Sections & Details	1	CENJ-06

(15) Class 1 Permit Modification Request to authorize the repackaging and consolidation of polychlorinated biphenyl (PCB) waste in authorized container storage areas and the repackaging of containerized hazardous wastes in Areas A and B, dated October 13, 2014 and signed by Michael D. Logan, Vice President of Compliance Plus Services.

(16) Revised pages for the facility's Closure Plan, dated October 13, 2014 and signed by Michael D. Logan, Vice President of Compliance Plus Services

(17) Response to Notice of Deficiency, dated February 23, 2015 and signed by Michael D. Logan, Vice President of Compliance Plus Services.

(18) Class 1 Permit Modification Request to add steel wear plates to the process floor outside of cells #2, #3, and #4 of the facility's existing Containment Building Unit, dated December 1, 2017 and signed by Michael D. Logan, Vice President of Compliance Plus Services.

(19) Construction schedule submitted by John A. Castner, P.E., P.P, Senior Permitting Engineer at Compliance Plus Services, Inc. on June 19, 2018 detailing the installation of the steel wear plates outside of cells #2, #3, and #4.

In case of conflict, the applicable hazardous waste management regulations contained in 40 C.F.R. shall have precedence over the conditions of this permit, and the conditions of this permit shall have precedence over the Part B permit application documents.

One complete set of the permit application documents listed above, this Hazardous Waste Facility Permit, and all records, reports and plans as may be required pursuant to this permit shall be kept on-site and shall be available for inspection by authorized representatives of the Department upon presentation of credentials. The records, reports and plans required pursuant to this permit include the following:

The description of the personnel training program and the records required by this permit and 40 C.F.R. 264.16.

The Contingency Plan required by this permit and 40 C.F.R. Part 264 Subpart D, and specifically the plan prepared by Michael Logan, Compliance Plus Services dated August 2009 and subsequent revisions.

The written Operating Record required by this permit and 40 C.F.R. 264.73.

Copies of the financial documents and closure cost estimate required by this permit and 40 C.F.R. Part 264 Subpart H.

The Waste Analysis Plan outlined in this permit and as required by 40 C.F.R. 264.13, and specifically the plan prepared by Michael Logan, Compliance Plus Services dated August 2009 and subsequent revisions.

The Inspection Schedule required by 40 C.F.R. 264.15(b) and the records required by this permit.

The Closure Plan required by this permit and 40 C.F.R. 264.112 and specifically the plan prepared by Michael Logan, Compliance Plus Services dated August 2009 and subsequent revisions.

Subject Item: PI 45910 -

1. The permittee must comply with all conditions of this permit, except that the permittee need not comply with the conditions of this permit to the extent and for the duration such noncompliance is authorized in an emergency permit (See 40 C.F.R. 270.61). Any permit noncompliance, except under the terms of an emergency permit, constitutes a violation of the appropriate Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application. [40 CFR 270.30(a)]
2. If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee must apply for and obtain a new permit. [40 CFR 270.30(b)]
3. A complete application for a new permit shall be submitted at least one hundred eighty (180) days prior to the expiration date of this permit. [40 CFR 270.10(h)]
4. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. [40 CFR 270.30(c)]
5. In the event of noncompliance with the permit, the permittee shall take all reasonable steps to minimize releases to the environment, and shall carry out such measures as are reasonable to prevent significant adverse impacts on human health or the environment. [40 CFR 270.30(d)]
6. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of the permit. [40 CFR 270.30(e)]
7. This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition. [40 CFR 270.30(f)]
8. The permit does not convey any property rights of any sort, or any exclusive privilege. [40 CFR 270.30(g)]
9. The permittee shall furnish to the Department, within a reasonable time, any relevant information which the Department may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The permittee shall also furnish to the Department, upon request, copies of records required to be kept by this permit. [40 CFR 270.30(h)]
10. The permittee shall allow an authorized representative of the Department, upon the presentation of credentials and other documents as may be required by law, to: (a) enter at reasonable times upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit; (b) have access to and copy any records that must be kept under the conditions of this permit; (c) inspect any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and (d) sample or monitor, for the purposes of assuring permit compliance or as otherwise authorized by RCRA, any substances or parameters at any location. [40 CFR 270.30(i)]

Subject Item: PI 45910 -

11. The permittee shall retain records of all sampling and monitoring information for a period of at least three (3) years from the date of the sample, measurement, report, or certification. Such records shall include all calibration and maintenance records for monitoring devices, all original strip chart recordings or other data for continuous monitoring instrumentation, and copies of all reports which include results of analyses or monitoring data. All reports required by this permit, the certification required by 40 C.F.R. 264.73(b)(9), and records of all data used to complete the application for this permit shall also be retained for a period of at least three (3) years. This period may be extended by the Department at any time. The permittee shall maintain records from all ground-water monitoring wells and associated ground-water surface elevations for the active life of the facility; and for disposal facilities throughout the post-closure care period as well. All samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity. [40 CFR 270.30(j)(2)]

12. Records for monitoring information shall include the date, exact place, and time of sampling or measurements; the identity of the individual(s) who performed the sampling or measurements; the date(s) analyses were performed; the identity of the individual(s) who performed the analyses; documentation of the analytical techniques or methods used; and the results of such analyses. [40 CFR 270.30(j)(3)]

13. All applications, reports, or information submitted to the Department shall be signed and certified as specified in 40 C.F.R. 270.11. [40 CFR 270.30(k)]

14. The permittee shall give notice to the Department as soon as possible of any planned physical alterations or additions to the permitted facility. [40 CFR 270.30(l)(1)]

15. The permittee shall give advance notice to the Department of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements. [40 CFR 270.30(l)(2)]

16. For a new facility, the permittee may not treat, store, or dispose of hazardous waste, and for a facility being modified the permittee may not treat, store, or dispose of hazardous waste in the modified portion of the facility, except as provided in 40 C.F.R. 270.42, until the permittee has submitted to the Department, by certified mail or hand delivery, a letter signed by the permittee and a licensed/registered professional engineer in the State of New Jersey, stating that the facility has been constructed or modified in compliance with the permit and the Department has inspected the modified or newly constructed facility and finds it is in compliance with the conditions of the permit. If, within fifteen (15) days of the date of submission of the aforementioned letter the permittee has not received notice from the Department of intent to inspect, prior inspection is waived and the permittee may commence treatment, storage, or disposal of hazardous waste. [40 CFR 270.30(l)(2)]

17. This permit is not transferable to any person except after notice to the Department. The Department may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary under the Resource Conservation and Recovery Act (See 40 C.F.R. 270.40). [40 CFR 270.30(l)(3)]

18. Monitoring results shall be reported at the intervals specified elsewhere in this permit. [40 CFR 270.30(l)(4)]

19. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than fourteen (14) days following each schedule date. [40 CFR 270.30(l)(5)]

Subject Item: PI 45910 -

20. The permittee shall report any noncompliance which may endanger health or the environment orally within twenty-four (24) hours from the time the permittee becomes aware of the circumstances, including information concerning the release of any hazardous waste that may cause an endangerment to public drinking water supplies and any information of a release or discharge of hazardous waste or of a fire or explosion from the hazardous waste management facility, which could threaten the environment or human health outside the facility. [40 CFR 270.30(l)(6)(i)]

21. The description of any reported occurrences of noncompliance or release and its cause shall include the name, address, and telephone number of the owner or operator; the name, address, and telephone number of the facility; the date, time, and type of incident; the name and quantity of material(s) involved; the extent of injuries, if any; an assessment of actual or potential hazards to the environment and human health outside the facility, where this is applicable; and the estimated quantity and disposition of recovered material that resulted from the incident. [40 CFR 270.30(l)(6)(ii)]

22. A written submission or report of the noncompliance or release shall also be provided within five (5) days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance. The Department may waive the five (5) day written notice requirement in favor of a written report within fifteen (15) days. [40 CFR 270.30(l)(6)(iii)]

23. All oral notifications of noncompliance or releases shall be provided to the NJDEP Hotline at 1-877-WARN DEP (1-877-9276-337). Written notification shall be provided to the Bureau of Recycling and Hazardous Waste Management and the Bureau of Hazardous Waste & UST Compliance and Enforcement at the addresses provided in this permit. [40 CFR 270.30(a)]

24. A biennial report must be submitted covering facility activities during odd numbered calendar years (See 40 C.F.R. 264.75). [40 CFR 270.30(l)(9)]

25. The permittee shall report all instances of noncompliance not reported under 40 C.F.R. 270.30(l)(4), (5), and (6) at the time monitoring reports are submitted. The reports shall contain the information listed in 40 C.F.R. 270.30(l)(6). [40 CFR 270.30(l)(10)]

26. Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the Department, it shall promptly submit such facts or information. [40 CFR 270.30(l)(11)]

27. The issuance of this permit does not authorize any injury to persons or property or invasion of other private rights or any infringement of applicable Federal, State, or local laws or regulations. [40 CFR 270.4(c)]

28. Cause for, and procedures of, modification, or revocation and reissuance of this permit shall be as provided under 40 C.F.R. 270.41. [40 CFR 270.41]

29. Causes for terminating a permit during its term or for denying a permit renewal application include the permittee's noncompliance with any condition of this permit; the permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or misrepresentation of any relevant facts at any time; or a determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination. [40 CFR 270.43(a)]

Subject Item: PI 45910 -

30. Facility personnel shall successfully complete a program of classroom instruction or on-the-job training that teaches them to perform their duties in a way that ensures the facility's compliance with the requirements of 40 C.F.R. 264.16, as stated in the facility's Part B permit application documents referenced in this permit. New employees shall be trained within six (6) months of the date of employment. [40 CFR 264.16(a)]

31. The permittee shall maintain the following documents and records at the facility: (a) the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; (b) a written job description for each position; (c) a written description of the type and amount of both introductory and continuing training that has been and will be given to each person filling a position; and (d) records that document that the training or job experience required has been given to, and completed by, facility personnel. [40 CFR 264.16(d)]

32. The permittee shall keep the training records on current personnel until closure of the facility; training records on former employees shall be kept for at least three (3) years from the date the employee last worked at the facility. Personnel training records may accompany personnel transferred within the same company. [40 CFR 264.16(e)]

33. The facility shall be designed, constructed, maintained and operated to minimize the possibility of fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, surface water or groundwater that could threaten human health or the environment. [40 CFR 264.31]

34. The facility shall be equipped with emergency equipment, including but not limited to: (a) an internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; (b) a device, such as a telephone (immediately available at the scene of operations) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; (c) portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and (d) water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems. [40 CFR 264.32]

35. All facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment, where required, shall be tested and maintained as necessary to assure its proper operation in time of emergency. [40 CFR 264.33]

36. Whenever hazardous waste is being poured, mixed, spread, or otherwise handled, all personnel involved in the operation must have immediate access to an internal alarm or emergency communication device, either directly or through visual or voice contact with another employee, unless the Department has ruled that such a device is not required under 40 C.F.R. 264.32. [40 CFR 264.34(a)]

37. If there is ever just one employee on the premises while the facility is operating, he must have immediate access to a device, such as a telephone (immediately available at the scene of operation) or a hand-held two-way radio, capable of summoning external emergency assistance, unless the Department has ruled that such a device is not required under 40 C.F.R. 264.32. [40 CFR 264.34(b)]

Subject Item: PI 45910 -

38. The permittee must attempt to make arrangements with State and local authorites, as appropriate for the type and scale of facility, to familiarize police, fire departments, and emergency response teams with the layout of the facility, properties of hazardous waste handled at the facility and associated hazards, places where facility personnel would normally be working, entrances to and roads inside the facility, and possible evacuation routes. Where State or local authorities decline to enter into such arrangements, the permittee must document the refusal in the operating record and where more than one police and fire department might respond to an emergency, agreements designating primary emergency authority to a specific police and specific fire department, and agreements with any others to provide support to the primary emergency authority must be made. [40 CFR 264.37(a)]

39. The permittee must attempt to make agreements with emergency response teams, emergency response contractors, and equipment suppliers to handle emergencies at the site. [40 CFR 264.37(a)(3)]

40. The permittee must attempt to make arrangements to familiarize local hospitals with the properties of hazardous waste handled at the facility and the types of injuries or illnesses which could result from fires, explosions, or releases. [40 CFR 264.37(a)(4)]

41. The provisions of the Contingency Plan included in the hazardous waste facility permit application plus all amendments, revisions and modifications thereof subsequently submitted for review and accepted by the Department shall be carried out immediately whenever there is a fire, explosion or release of hazardous waste or hazardous waste constituents which could threaten human health or the environment. [40 CFR 264.51(b)]

42. Whenever there is an imminent or actual emergency situation, the emergency coordinator (or his designee when the emergency coordinator is on call) must immediately activate internal facility alarms or communication systems, where applicable, to notify all facility personnel and notify appropriate State or local agencies with designated response roles if their help is needed. [40 CFR 264.56(a)]

43. If the emergency coordinator determines that the facility has had a release, fire, or explosion which could threaten human health, or the environment outside the facility, and his assessment indicates that evacuation of local areas may be advisable, the emergency coordinator must immediately notify appropriate local authorities. The emergency coordinator shall be available to help officials decide if local areas should be evacuated. The telephone numbers are: Fire Department (201) 991-1402 or 911; and Police Department:(201) 998-1313 or 911. [40 CFR 264.56(d)(1)]

44. If the emergency coordinator determines that the facility has had a release, fire, or explosion which could threaten human health or the environment, the emergency coordinator must immediately notify the New Jersey Department of Environmental Protection, Communication Center/Trenton Dispatch, Bureau of Communication and Response Services, at 1-877-WARN DEP (24 Hours). If the release, fire, or explosion could threaten human health and the environment outside the facility, the emergency coordinator shall also contact the government official designated as the on-scene coordinator for the area (in the applicable regional contingency plan under Title 40 Part 1510) or the National Response Center (using their twenty-four (24) hour toll free number) at 1-800-424-8802. [40 CFR 264.56(d)(2)]

Subject Item: PI 45910 -

45. When reporting an emergency to the required agencies, the emergency coordinator shall report: (a) name and telephone number of the reporter; (b) name and address of the facility; (c) time and type of incident (e.g. release, fire); (d) name and quantity of material(s) involved, to the extent known; (e) the extent of injuries, if any; and (f) the possible hazards to human health, or the environment, outside the facility. [40 CFR 264.56(d)(2)]

46. The permittee shall note in the operating record the time, date, and details of any incident that requires implementing the contingency plan. Within fifteen (15) days after the incident, the permittee shall submit a written report on the incident to the Department. The report shall include, but not be limited to: (a) name, address, and telephone number of the permittee; (b) name, address, and telephone number of the facility; (c) date, time, and type of incident (e.g. fire, explosion); (d) name and quantity of material(s) involved; (e) the extent of injuries, if any; (f) an assessment of actual or potential hazards to human health or the environment, where this is applicable; and (g) an estimated quantity and disposition of recovered material that resulted from the incident. [40 CFR 264.56(j)]

47. The permittee must comply with the security procedures described in the facility's Part B permit application plus all amendments, revisions and modifications thereof subsequently submitted and referenced in this permit.

48. The permittee shall prevent the unknowing entry, and minimize the possibility for the unauthorized entry, of persons or livestock onto the active portion of the facility. [40 CFR 264.14(a)]

49. A facility shall have a twenty-four (24) hour surveillance system which continuously monitors and controls entry onto the active portion of the facility; or an artificial or natural barrier which completely surrounds the active portion of the facility; and a means to control entry, at all times, through the gates or other entrances to the active portion of the facility. [40 CFR 264.14(b)]

50. The permittee shall post a sign with the legend, "Danger - Unauthorized Personnel Keep Out", at each entrance to the active portion of a facility, and at other locations, in sufficient numbers to be seen from any approach to this active portion. The legend shall be written in English and in any other language prevalent in the area surrounding the facility and must be legible from a distance of at least twenty-five (25) feet. Existing signs with a legend other than "Danger - Unauthorized Personnel Keep Out" may be used if the legend on the sign indicates that only authorized personnel are allowed to enter the active portion, and that entry onto the active portion can be dangerous. [40 CFR 264.14(c)]

51. The permittee shall keep a written operating record at the facility in which the information required under 40 C.F.R. 264.73(b) shall be recorded. The information shall be recorded as it becomes available and maintained in the operating record until closure of the facility. [40 CFR 264.73]

52. The permittee shall have a detailed written cost estimate of closing the facility in accordance with 40 C.F.R. 264.142(a). [40 CFR 264.142(a)]

Subject Item: PI 45910 -

53. The permittee shall adjust the closure cost estimate for inflation within sixty (60) days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with 40 C.F.R. 264.143. If the permittee uses the financial test or corporate guarantee, the closure cost estimate shall be updated for inflation within thirty (30) days after the close of the firm's fiscal year and before submission of the updated information to the Department. The adjustment may be made by recalculating the maximum costs of closure in current dollars, or by using an inflation factor derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its Survey of Current Business. The inflation factor is the result of dividing the latest published annual Deflator by the Deflator for the previous year. The first adjustment is made by multiplying the closure cost estimate by the inflation factor. The result is the adjusted closure cost estimate. Subsequent adjustments are made by multiplying the latest adjusted closure cost estimate by the latest inflation factor. [40 CFR 264.142(b)]

54. During the active life of the facility, the permittee shall revise the closure cost estimate no later than thirty (30) days after the Department has approved the request to modify the closure plan, if the change in the closure plan increases the cost of closure. The revised closure cost estimate must be adjusted for inflation as specified in 40 C.F.R. 264.142(b). [40 CFR 264.142(c)]

55. The permittee shall keep at the facility, during the operating life of the facility, the latest closure cost estimate prepared in accordance with 40 C.F.R. 264.142(a) and (c) and, when this estimate has been adjusted in accordance with 40 C.F.R. 264.142(b), the latest adjusted closure cost estimate. [40 CFR 264.142(d)]

56. The permittee shall establish financial assurance for closure of the facility. The permittee shall use a financial assurance mechanism approved by the Department, from the options specified in paragraphs (a) through (f) of 40 C.F.R. 264.143. [40 CFR 264.143]

57. The wording of all financial documents (except for the insurance policy itself) that are submitted to comply with the requirements for financial assurance for closure must be as per 40 C.F.R. 264.151 with the changes specified at N.J.A.C. 7:26G-8.1(c)10. [40 CFR 264.143]

58. The permittee shall maintain financial responsibility for bodily injury and property damage to third parties caused by sudden accidental occurrences arising from operations of the facility. The permittee shall have and maintain liability coverage for sudden occurrences in the amount of at least $1 million per occurrence with an annual aggregate of at least $2 million exclusive of legal defense costs. The permittee shall demonstrate financial responsibility for sudden accidental occurrences according to the mechanisms given in 40 C.F.R. 264.147 paragraphs (a)(1), (2), (3), (4), (5) or (6). [40 CFR 264.147(a)]

59. The wording of all financial documents (except for the insurance policy itself) that are submitted to comply with the liability coverage requirements must be as per 40 C.F.R. 264.151 with the changes specified at N.J.A.C. 7:26G-8.1(c)10. [40 CFR 264.147]

60. The permittee shall comply with all regulations of the Department of Environmental Protection and other State Statutes applicable to the facility. Regulations are effective upon publication in the New Jersey Register or as otherwise indicated in the Notice of Adoption in the New Jersey Register. [40 CFR 270.32(b)(2)]

Subject Item: PI 45910 -

61. All documents required to be submitted to the Department by this permit shall be submitted to the following agencies: New Jersey Department of Environmental Protection, Division of Solid and Hazardous Waste, Bureau of Recycling and Hazardous Waste Management, Mail Code: 401-02C, PO Box 420, Trenton, NJ 08625-0420; and New Jersey Department of Environmental Protection, Compliance and Enforcement, Bureau of Hazardous Waste & UST Compliance and Enforcement, Northern Regional Office, 7 Ridgedale Ave, Cedar Knolls, NJ 07927-1120. [40 CFR 270.32(b)(2)]

62. The permittee shall operate the facility, and construct or install associated appurtenances thereto, in accordance with the regulations contained in 40 C.F.R. Parts 260 through 270, the conditions of this permit, and the permit application documents referenced in this permit. In case of conflict, the applicable hazardous waste management regulations contained in 40 C.F.R. shall have precedence over the conditions of this permit, and the conditions of this permit shall have precedence over the Part B permit application documents. [40 CFR 270.32(b)(2)]

63. One complete set of the permit application documents referenced in this permit, this Hazardous Waste Facility Permit, and all records, reports and plans as may be required pursuant to this permit shall be kept on-site and shall be available for inspection by authorized representatives of the Department upon presentation of credentials. [40 CFR 264.74(a)]

64. The permittee shall adhere to the provisions of the Waste Analysis Plan cited in this permit, and any subsequent revisions approved by the Solid and Hazardous Waste Management Program. No changes shall be made to the Waste Analysis Plan without prior written approval from the Solid and Hazardous Waste Management Program. [40 CFR 264.13(b)]

65. Each hazardous waste managed at this location shall be fully identified and classified in accordance with 40 C.F.R. 264.13. At a minimum, the permittee shall gather all of the information which must be known to manage the waste in accordance with the provisions of this permit, as well as to treat or dispose of the waste at an authorized facility. [40 CFR 264.13(a)]

66. Waste sampling and analysis shall be in accordance with the procedures outlined in the Waste Analysis Plan cited in this permit and shall employ equipment and methods as described in the latest edition of USEPA Manual SW-846 or as otherwise approved by the USEPA or the Department. All analyses performed to comply with the conditions of this permit shall be conducted by a laboratory that is certified by the Department to conduct the analysis. [40 CFR 264.13(b)]

67. The permittee shall maintain, in the written Operating Record required by this permit, records and results of all waste analyses performed. Such records and results shall be entered into the written Operating Record as they become available and shall be maintained until closure of the facility. [40 CFR 264.73(b)(3)]

68. All records and results of analyses conducted shall include an identification of the waste sampled, the name of the individual who collected the sample, the date, time, and location of sampling; the date analyses were performed; the name of the individual who performed the analysis; and the results for all test parameters analyzed. [40 CFR 264.73(b)(3)]

Subject Item: PI 45910 -

69. The permittee shall perform inspections in accordance with the referenced permit application documents and as follows: Internal communication equipment, the telephone system and site gates and gate locks shall be inspected weekly for proper operation; Protective clothing shall be inspected weekly for proper operation and supply; Site fencing, ladders, platforms, stairways and walkways shall be inspected weekly for corrosion or damage; Warning signs shall be inspected weekly for visiblity and damage; Fire extinguishers shall be inspected monthly for adequate pressure and charge; First aid equipment and supplies shall be inspected monthly for adequate supply and operation; Emergency equipment and supplies shall be inspected monthly for adequate supply and proper maintenance; Spill absorbent and overpack drums shall be inspected monthly for adequate supply; Electric motors, fire alarm systems and communications systems shall be inspected monthly for power, wear and wiring deterioration; and Fire hydrants shall be inspected annually for adequate pressure. [40 CFR 264.15(b)]

70. The permittee must record the inspections required by this permit in an inspection log or summary. Records of all the required inspections shall be maintained at the facility for a minimum of three (3) years. At a minimum, this log/summary must include the date and time of each inspection, the name of the inspectors, a notation of the observations made, and the date and nature of any repairs or other remedial actions performed. [40 CFR 264.15(d)]

71. The permittee shall remedy any deterioration or malfunction of equipment or structures revealed by the inspection on a schedule, which ensures that the problem does not lead to an environmental or human health hazard. Where a hazard is imminent or has already occurred, remedial action shall be taken immediately. [40 CFR 264.15(c)]

72. At the time of final closure, the permittee shall close the hazardous waste units authorized by this permit in accordance with 40 C.F.R. 264 Subpart G, the closure plan referenced in this permit, and the conditions of this permit. [40 CFR 264.111(c)]

73. The permittee shall keep a copy of the closure plan and all revisions to the plan at the facility until closure is completed. [40 CFR 264.112(a)]

74. The permittee shall amend the closure plan any time changes in operating plans or facility design affect the closure plan or whenever there is a change in the expected year of closure of the facility. The permittee must comply with the requirement cited at 40 C.F.R. 264.112(c)(3) for amendment of closure plan. [40 CFR 264.112(c)]

75. The permittee shall notify the Department at least forty-five (45) days prior to the date the permittee expects to begin closure, except in cases where the facility's permit is terminated or if the facility is otherwise ordered by judicial decrees or compliance order to close. The date when the owner or operator "expects to begin closure" shall be within thirty (30) days after the date on which the owner or operator expects to receive the final volume of wastes. [40 CFR 264.112(d)]

76. The permitee shall adhere to the following regarding rejection of unauthorized waste shipments: 1. the permittee shall accept only waste that the facility is authorized to accept; and 2. the permittee, if offered hazardous waste which the facility is not authorized to handle, shall not accept the waste from the hauler and shall follow the applicable requirements and instructions found at 40 CFR 264.71, 264.72, and Appendix to Part 262 - Uniform Hazardous Waste Manifest and Instructions, as deemed necessary for rejection. [40 CFR 270.32(b)]

Subject Item: PI 45910 -

77. For lab pack containers to be accepted for processing, the permittee shall comply with the following pre-acceptance waste analysis procedures. The permittee shall obtain a waste profile sheet (WPS), a chemical waste packing list, and any supporting documentaion in accordance with this permit. The packing list for each lab pack shall list the specific names of all laboratory chemical bottles, jars, jugs, etc. in that lab pack container. The permittee shall review the information on the WPS, packing list and any supporting documentation. If the labortory chemicals are all wastes that the permittee is authorized to accept for on-site processing, the permittee may contract with the generator for the shipment of the waste. Lab pack chemicals in their original containers and bearing original labels need not be analyzed unless the permittee has reason to believe that they are not as represented on the waste profile sheet. If the individual bottles, jars, jugs, etc. are to be removed from the lab pack containers, opened, and blended or bulked with other wastes, then the permittee shall confirm the compatibility of the wastes prior to commencing such blending or bulking by performing the compatibility test identified in the Waste Analysis Plan referenced in this permit. [40 CFR 264.13]

78. For wastes to be accepted for container transfer only, the permittee shall comply with the following pre-acceptance waste analysis procedures. The permittee shall obtain a completed generator Waste Profile Sheet (WPS) and any other supporting documents such as, but not limited to, a chemical waste packing list for lab packs. The permittee shall review the information on the WPS and any supporting documentation. If the waste stream(s) are all wastes which the permittee is authorized to accept then the permittee shall review the acceptability of the waste stream(s) at the potential authorized off-site treatment or disposal facilities. Such review shall include the permittee's knowledge of waste acceptability criteria of the potential ultimate facility and, if necessary, shall involve the submittal of the WPS and any supporting documentation to the potential ultimate facility for confirmation of the acceptability of the waste stream. Waste streams accepted for transfer need not be analyzed unless the permittee has reason to believe they are not as represented on the waste profile sheet, but shall undergo testing to meet acceptability criteria of the ultimate treatment or disposal facility, if necassary. The permittee shall only accept lab packs that are accompanied by a packing list that itemizes the individual containers within the lab pack. The permittee shall only accept lab packs that contain individual containers of laboratory chemicals that have been packed at the generator's site by the permittee's Quality Assurance Technicians and/or companies experienced in the identification, segregation and packing laboratory chemicals. The permittee shall require the generator of lab packs to properly identify or analyze the contents of individual containers within a lab pack that do not have the original manufacturer's label. [40 CFR 264.13]

Subject Item: PI 45910 -

79. The permittee shall perform the basic mandatory waste acceptance analyses on representative samples collected from incoming shipments of waste in accordance with the Waste Analysis Plan, including Table 5.3 (May 2011) as referenced in this permit. These analyses include, as applicable, the following: paint filter test, flash point, ignitability, BTU/gallon, percent chlorine, chlorine spot test, specific gravity, miscibility, pH, total organic carbon (aqueous waste only), chemical compatibility, and reactivity. Polychlorinated biphenyl (PCB) analysis shall also be performed on ignitable, combustible and organic wastes that are not 100% aqueous waste streams. The permittee shall base the decision to accept or reject the incoming waste shipment on a comparison of information obtained from analysis of the incoming waste shipment samples to the information obtained from the pre-acceptance waste analysis procedures required by this permit. When a waste shipment is found to be non-conforming, the permittee may comply with the requirements for acceptance of non-conforming waste found elsewhere in this permit. In the event that a representative sample of waste yields a PCB analysis greater than 50 ppm, except for non-regulated small capacitors, the permittee shall segregate the waste in the designated TSCA permitted storage areas, contact the generator regarding the discrepancy, and obtain the information required to properly store and dispose of the waste or, if necessary, return the waste to the generator. [40 CFR 264.13, 40 CFR 270.32(b), 40 CFR 264]

80. The permittee shall not exceed a hazardous waste storage volume of 249,500 gallons or its equivalent volume at any one time. [40 CFR 270.32(b)]

81. During implementation of the waste analysis procedures required by this permit, if the permittee finds a waste to be non-conforming, the permittee may accept the waste if it appears to be other than the quantity and waste type described on the manifest provided performance of the pre-acceptance waste analysis procedures required by the permit indicates that the permittee is authorized to accept such waste and thereafter the permittee complies with 40 C.F.R. 264.72. [40 CFR 264.13]

82. The permittee shall comply with the following pre-acceptance waste analysis procedures for wastes other than lab packs and containers for transfer. Prior to accepting any waste from off-site generators the permittee shall obtain a properly completed generator Waste Profile Sheet (WPS). The WPS shall contain all applicable information identified in the sample WPS form provided in the Waste Analysis Plan referenced in this permit. If the generator fails to provide all of the information requested on the forms listed in this permit that is necessary to safely and properly store, transfer, treat or dispose of the waste, the permittee shall contact the generator and obtain the necessary information to complete the forms. The permittee may make arrangements to accept the waste if a thorough evaluation of the information obtained indicates that the waste is one of the wastes the permittee is authorized by this permit to accept. [40 CFR 264.13]

Subject Item: PI 45910 -

83. The permittee is authorized to construct the proposed Rail Turnout for Track 2 in accordance with the requirements of this permit. The proposed Rail Turnout shall be constructed and installed as shown in the engineering drawing entitled "Diagram of Location of Proposed Rail Turnout for Track 2" referenced as Appedix 1-7 in the permit documents. Within thirty (30) days after completion of the construction, the permittee shall submit to the Department, by certified mail or hand delivery, a letter signed by the permittee and a licensed professional engineer registered in the State of New Jersey, stating that the Rail Turnout for Track 2 has been constructed in compliance with the permit, as well as as-built drawings. The Department will inspect the Rail Turnout to determine whether or not it is in compliance with the layout and specification of the design plans set forth in the engineeering plans and reports. If within fifteen (15) days of the date of the submission of the permittee's aforementioned letter, the permittee has not received from the Department a notice of intent to inspect, prior inspection is waived and it is understood that the Rail Turnout meets the design requirements. If the Rail Turnout is found not to be in conformance with the approved design, a schedule shall be submitted within thirty (30) days of the date of the Department's inspection, outlining how the Rail Turnout will be brought into conformance. The schedule shall be subject to the Department's approval. The permittee shall not utilize the Rail Turnout for Track 2 for waste transportation until the Department approves the construction. [40 CFR 270.32(b)]

84. Before processing any waste, the permittee shall test a representative sample of the waste to be processed for the parameters listed below: 1) Tank or container storage/treatment - compatibility; 2) Container repacking - pH, reactivity, ignitability and compatibility; 3) Consolidation - ignitability, reactivity and compatibility; 4) Solidification/stabilization - pH, reactivity, ignitability and compatibility; 5) Blending and bulking in containers or tanks - specific gravity, reactivity, ignitability, corrosivity, compatibility, pH, organic chlorine content, BTU content, bottom sediment, water content, type acid or base, and total organic cabon, if applicable; and 6) Filtering/screening - pH, reactivity, ignitability and compatibility. [40 CFR 264.13, 40 CFR 270.32(b), 40 CFR 264.17, 40 CFR 264.177]

85. The permittee shall comply with the following procedures for incoming shipments of waste lab packs and containers for transfer. Upon arrival of each waste shipment the permittee perform a visual inspection of the incoming waste shipment. The permittee's decision to accept or reject the incoming waste shipment shall be based on a comparison of the information obtained by inspection versus information obtained from the manifest and the pre-acceptance documentation obtained in accordance with this permit. When a waste is found to be non-conforming, the permittee shall comply with the procedures for acceptance of non-conforming wastes found elsewhere in this permit. [40 CFR 264.13]

Subject Item: PI 45910 -

86. PCB waste shall be managed in accordance with all applicable Toxic Substance Control Act (TSCA) regulations at 40 CFR Part 761 and as follows:

1. PCB waste (including liquids, semi-liquids, sludges, and solids) may be repackaged and consolidated in container storage Areas A and C; the QC dock; and the East Pad of the QC dock.

2. Non-liquid PCB waste in the Containment Building may be transferred or consolidated into another container or rail car;

3. Non-liquid or semi-solid PCB waste (ie. sludges and slurries) that is also hazardous waste may be solidified/stabilize in the CBU for shipment to another authorized facility for treatment or disposal; and

4. PCB waste shall only be managed in the following areas: container storage Areas A and C; the QC dock; the East Pad of the QC dock; and the Containment Building. [40 CFR 270.32((b))]

87. The permittee shall perform analyses on a representative sample of outgoing waste shipments on an as needed basis to satisfy the requirements of the ultimate storage, transfer, treatment or disposal facility authorized to receive such waste. [40 CFR 264.13]

88. The permittee shall comply with the following waste analysis procedures for incoming wastes, except for lab packs and containers for transfer. Upon arrival of each waste shipment, the permittee shall perform a visual inspection of the incoming waste shipment and collect representative samples of the waste shipment. Samples shall be taken using a coliwasa or equivalent sampler for liquids or a stainless steel scoop for solids. For bulk shipments at least one sample shall be taken from each transport unit. Bulk shipment samples shall not be composited except for polychlorinated biphenyl (PCB) screening. For containerized shipments the permittee shall collect a separate representative sample for analysis in accordance with the waste analysis requirements of this permit from each container of each generator's waste stream as described on each manifest line item description with the exception of the following: for heterogeneous hazardous waste, composite samples may be collected from up to ten containers per composite sample; and for homogeneous hazardous waste, separate samples may be collected from as few as 20% of the containers or composite samples may be collected from up to 20 containers per composite sample. For multi-phase wastes, the permittee shall perform a separate series of analyses on each phase of waste to be subjected to a different activity. For multiple shipments of waste received during the same day, profiled under the same approval code number, generated from the same process(es) and where the waste constituents do not vary in type or quantity in significant amounts, only the first shipment received shall be sampled and analyzed. Subsequent shipments received on the same day shall be visually inspected and compared to the first shipment and the waste profile sheet to determine conformance with the approved waste stream. If found to be visually non-conforming each non-conforming shipment shall be sampled and analyzed. [40 CFR 264.13]

89. The permittee shall not store or treat hazardous waste at any location at the facility other than those authorized by this permit. The permittee shall obtain prior approval from the Solid and Hazardous Waste Management Program to make any changes or alterations to the authorized activities in this permit. [40 CFR 270.32(b)]

Subject Item: PI 45910 -

90. For each outgoing shipment of waste initially accepted from off-site, or mixtures or residues generated by the permittee from the storage, transfer or treatment of waste accepted from off-site, the manifest shall include the identification number(s) assigned by the original off-site generators to the wastes included in the shipment or from which the waste mixture or residue was generated by the permittee, except: where the hazardous waste number assigned by the original generator was a characteristic code and the permittee has treated the waste to no longer exhibit said characteristic, then said characteristic number need not be included on the manifest, but shall instead be identified on a seperate sheet attached to the facility copy of the manifest which shall be kept on file at the facility; and where the hazardous waste number(s) assigned by the original off-site generator was incorrect and the permittee has determined the correct number(s) for the waste and has complied with the manifest discrepancy and unmanifested waste report requirements, then the correct hazardous waste number(s) shall be substituted for the incorrect hazardous waste number(s) originally assigned by the off-site generator. [40 CFR 270.32(b)]

91. For the purposes of classifying the waste and determining compliance with land disposal restrictions of 40 C.F.R. Part 268, the permittee shall collect samples from hazardous waste that has been treated by stabilization. All samples collected shall be analyzed for the parameters necessary to classify the waste and to determine compliance with the land disposal restrictions. A representative composite sample of each treatment batch shall be collected in accordance with the procedures detailed in Sections 3.0 through 3.6.4 of the document titled "Batch Sampling Procedures for Treated Hazardous Wastes" revised May 2011 in Appendix 5-6 of permit documents. Section 3.5 Reduced Batch Sampling Frequency Requirements for Continous Treatment Batches, which outlines reduced composite sampling frequencies for specific waste streams and circumstances, is also approved. [40 CFR 264.13, 40 CFR 270.32(b), 40 CFR 264.17, 40 CFR 264.177]

Subject Item: HWSG762507 - Containment building

92. Solidification/stabilization shall take place as provided herein. For stabilization in cells: the permittee shall empty the waste to be solidified/stabilized from containers into any of the four cells in the Containment Building. The permittee shall introduce approved reagent listed in Table 4-3 into the waste to be solidified/stabilized by the use of equipment authorized by the Department, as described in the application documents and engineering designs referenced in this permit. The permittee shall mix the waste and approved reagent listed in Table 4-3 with a backhoe, front end loader or other equipment authorized by the Department. The permittee shall place the solidified/stabilized waste in appropriate DOT shipping containers, including: roll-offs, dump trailers, gondolas, or intermodal containers, in any area authorized by this permit for storage or transfer pending shipment to off-site authorized facilities. For solidification/stablization in containers, the process shall be performed in containers of up to 110 gallons or roll-off containers up to 40 cubic yard capacity. An approved solidification/stabilization agent listed on Table 4-3 shall be added to the top of the container with a hand scoop or other similar equipment to absorb any free liquids, if necessary. Filled containers shall be resealed, labeled, and stored in any area authorized by this permit for storage or transfer pending shipment to off-site authorized facilities. If the solidifed/stabilized waste is destined for incineration or thermal treatment, the untreated waste can be transferred, prior to solidification/stabilization, to an incinerable container that meets the specification of the off-site destination facility. [40 CFR 270.32(b)]

Subject Item: HWSG762507 - Containment building

93. The permittee shall operate the Containment Building in a fashion that ensures that waste will not come in contact with door or window openings. [40 CFR 264.1101(a)(2)(ii)]

94. Within 60 days of completion of closure of the Containment Building, the permittee shall submit to the Department by registered mail a report of closure activities. The report shall include a certification that the Containment Building has been closed in accordance with the the specifications in the approved closure plan and the requirments of this permit. The certification must be signed by the permittee and signed and sealed by an independent professional engineer registered in the State of New Jersey. The report shall also include supporting documentation. The Department will review the report, including the decontamination verification and soil sampling data, and conduct an inspection of the Containment Building. If the Department determines that the Containment Building was clean closed, the Department will accept the closure certification and closure will be deemed complete. [40 CFR 264.115]

95. If the permittee detects a condition that could lead to or has caused a release of waste, the permittee must repair the condition promptly, in accordance with the following procedures. Upon detection of a condition that has lead to the release of waste, the permittee shall: enter a record of the discovery in the facility operating record; immediately remove the portion of the Containment Building affected by the condition from service; determine what steps must be taken to repair the Containment Building; remove any leakage from the secondary collection system and establish a schedule for accomplishing the cleanup and repairs; within seven (7) working days after the discovery of the condition, notify the Department of the condition; and within fourteen (14) working days, provide a written notice to the Department with a description of the steps taken to repair the Containment Building, and the schedule for accomplishing the work. The Department will review the information submitted, make a determination regarding whether the Containment Building must be removed from service completely or partially until repairs and cleanup are complete, and notify the permittee of the determination and underlying rationale in writing. Upon completing all repairs and cleanup, the permittee must notify the Department in writing and provide a verifcation, signed by a qualified professional engineer registered in the State of New Jersey, that the repairs and cleanup have been completed according to the written plan. [40 CFR 264.1101(c)(3)]

96. The permittee shall maintain the stored/treated waste within the containment walls of the Containment Building by ensuring that the peak of the pile shall not exceed the height of any containment wall intended to contain it. [40 CFR 264.1101(c)(1)(ii)]

97. The permittee shall not place incompatible hazardous waste or treatment reagents into the Containment Building or its secondary containment system if they could cause the unit or secondary containment system to leak, corrode, or otherwise fail. [40 CFR 264.1101(a)(3)]

98. The permittee shall take measures to prevent the release of liquids or wet materials into areas without secondary containment. [40 CFR 264.1101(d)(2)]

99. Within 180 days after receiving the final volume of waste at the Containment Building, the permittee must remove or decontaminate all waste residues, contaminated system components (liner, etc.), contaminated subsoils, and structures and equipment contaminated with waste and leachate, and manage them as hazardous waste unless 40 C.F.R. 261.3(d) applies. Decontamination shall take the form of washing with detergent and water at high pressure. [40 CFR 264.1102(a)]

Subject Item: HWSG762507 - Containment building

100. The permittee is authorized to utilize the following equipment for the solidification/stabilization of wastes: back hoe; fork lift; drum grappler; front end loader; leak proof roll-offs; leak proof dump trailers; leak proof intermodal containers; concrete cells 1, 2, 3 and 4; approve reagent listed in Table 4-3; and screening equipment. The permittee may add or delete equipment from the above list provided the permittee has given the Department, at the address listed in this permit, written notification of such addition(s) or deletions(s) and the permittee has received written approval from the Department. [40 CFR 270.32(b)]

101. Within 180 days after receiving the final volume of waste at the Containment Building, the permittee shall conduct soil sampling around the Containment Building in accordance with the approved closure plan. Soil sampling shall not be conducted prior to the removal of all waste from the unit. The permittee shall notify the Department in writing at least forty two (42) calendar days prior to initiation of soil sampling so that an auditor from the Department can be present during the sampling episode. Soil sampling analytical results shall be submitted to the Department either prior to or with the closure report. [40 CFR 264.1102(a)]

102. The permittee is authorized to consolidate compatible waste from containers into roll offs, rail cars (including gondolas), dump trucks, or dump trailers; place in storage cells; or place in the processing area of the building. Only bulk wastes that are not D001 or D003 waste shall be consolidated in roll offs. Before consolidating waste, the permittee shall test a representative sample of the waste in accordance with the Waste Analysis Plan. [40 CFR 270.32((b))]

103. If, after removing or decontaminating all residues and making all reasonable efforts to effect removal or decontamination of contaminated components, subsoils, structures, and equipment, the permittee finds that not all contaminated subsoils can be practicably removed or remediated in accordance with requirement 104, the permittee must close the Containment Building and perform post-closure care in accordance with the closure and post-closure requirements that apply to landfills (40 C.F.R. 264.310). In addition, for the purposes of closure, post-closure, and financial responsibility, the Containment Building will then be considered to be a landfill, and the permittee must meet all of the requirements for landfills specified in 40 C.F.R. Part 264 Subparts G and H. [40 CFR 264.1102(b)]

104. All surfaces of the Containment Building to be in contact with waste shall be chemically compatible with those wastes. [40 CFR 264.1101(a)(2)]

105. Within 180 days after receiving the final volume of waste at the Containment Building, if decontamination has been performed, the permittee shall collect all residues generated during decontamination of the Containment Building and its components and ship these residues off-site to a faciltiy authorized to manage such waste. [40 CFR 264.114]

106. Within 180 day after receiving the final volume of waste at the Containment Building, if decontamination has been performed, the permittee must complete decontamination verification procedures for the area. Decontamination shall consist of collecting final wash water and wash water blank samples and testing them for the parameters listed in Table 9-1: Decontamination Verification Samples; Locations, Number and Type included in the referenced permit application documents. Decontamination methods shall be repeated until the concentrations of the rinse water test parameters are equal to the amount present in the wash water blank. [40 CFR 264.1102(a)]

107. The permittee is authorized to store, treat, or transfer sludges and slurries only in the areas of the Containment Building which meet the requirements of 40 CFR 264.1101(b). [40 CFR 270.32(b)]

Subject Item: HWSG762507 - Containment building

108. Upon closure of the CBU, soil contamination shall be addressed in accordance with the Department's Technical Requirements for Site Remediation, N.J.A.C. 7:26E, including the requirements for remediation of historic fill as defined in those rules. Contamination resulting from the permittee's operation, if any, shall be addressed and remediated by the permittee as part of the closure of the CBU. [40 CFR 270.32(b)]

109. The permittee shall submit to the Department, either prior to or with the closure report, the results of the decontamination verification procedures. The permittee shall retain the equipment and structures that required decontamination on-site until the permittee has received a written determination from the Department that the decontamination levels specified in the closure plan have been achieved and the analytical results are acceptable to the Department, unless the permittee decides to dispose of the equipment and structures as hazardous waste. [40 CFR 264.115]

110. The permittee shall maintain the primary barrier to be free of significant cracks, gaps, corrosion, or other deterioration that could cause waste to be released from the primary barrier. [40 CFR 264.1101(c)(1)(i)]

111. The permittee is authorized to utilize the Containment Building to treat, store and transfer hazardous wastes authorized by this permit, with the exception of D001 waste and D003 waste that are not reactive sulfide wastes. Authorized activities include repackaging of non-lab pack waste; solidification/stabilization with approved reagents listed in Table 4-3, filtration, consolidation, decanting, and blending & bulking of waste. The permittee shall operate and maintain the Containment Building in accordance with the application documents and engineering designs referenced in this permit. The maximum hazardous waste capacities of the storage/treatment areas in the Containment Building shall be as follows: Cell 1 - 402 cubic yards; Cells 2, 3 and 4 - 195 cubic yards (each); and the Process Floor - 453 cubic yards. Non-liquid PCB waste may be transferred or consolidate into another container or rail car in this area, while all PCB waste shall be managed as outlined by this permit. [40 CFR 270.32(b)]

112. The permittee shall use controls and practices to ensure containment of the waste within the Containment Building. [40 CFR 264.1101(c)(1)]

113. The permittee shall take measures to prevent the tracking of waste out of the Containment Building by personnel or equipment used in handling the waste. An area must be designated to decontaminate equipment and any rinsate must be collected and properly managed. The permittee is authorized to treat the rinsate through solidification in the Containment Building as detailed in permit application documents referenced in this permit. [40 CFR 264.1101(a), 40 CFR 264.1101(b), 40 CFR 264.1101(c)]

114. The permittee is prohibited from storing, treating or transferring uncontainerized liquid or semi-liquid waste in the Containment Building or in the truck loading/unloading bay of the Containment Building. [40 CFR 270.32(b)]

Subject Item: HWSG762507 - Containment building

115. The permittee shall take measures to control fugitive dust emissions such that any openings (doors, windows, vents, cracks, etc.) exhibit no visible emissions (see 40 C.F.R. Part 60, Appendix A, Method 22 - Visual Determination of Fugitive Emissions from Material Sources and Smoke Emissions from Flares). In addition, all associated particulate collection devices shall be operated and maintained with sound air pollution control practices (see 40 C.F.R. Part 60 Subpart 292). This state of no visible emissions must be maintained effectively at all times during routine operating and maintenance conditions, including when vehicles and personnel are entering and exiting the Containment Building. [40 CFR 264.1101(c)(1)(iv)]

116. The permittee is authorized to use the Containment Building to manage solid, sludges or slurry wastes identified with the following hazardous waste numbers: D002, D004 through D043, all "P" and "U" hazardous wastes listed at 40 C.F.R. 261.33, F001 through F012, F019 through F024, F025, F026 through F028, F032, F034, F035, F037, F038, F039, K001 through K011, K013 through K052, K060 through K069, K071, K073, K079, K081, K083 through K088, K090, K091, K093 through K118, K123 through K126, K131, K132, K136, K156 through K161,K169, K170, K171, and K172. The permittee is prohibited from managing D003 that is not reactive sulfide wastes and D001waste in the Containment Building. The permittee may manage ID 27, ID 27A, and ID 72 wastes in the Containment Building pursuant to the permitee's Solid Waste Permit and provided the decontamination procedures, outlined in section 4.3.2.5 of the approve application documents, are followed. [40 CFR 270.32(b)]

117. The permittee shall inspect and record in the facility's operating record, at least once every seven (7) days, data gathered from monitoring equipment and leak detection equipment, as well as the Containment Building and area immediately surrounding the Containment Building, to detect signs of releases of waste. The permittee shall conduct inspections of the following activity/equipment as outlined below: Lighting for proper operation; Primary and Secondary Inspection Sumps for accumulated liquids; Process Floor (visible areas), Joints (visible areas), Secondary Containment and Push Walls, Building Walls, Columns and Supports for significant cracks, gaps, corrosion or other deterioration that could cause waste to be released; Air Pollution Control and Ventilation System for proper operation; General Exterior for signs of release of hazardous waste; and Doors, Windows, Vents and Cracks for visible emissions in accordance with 40 C.F.R. Part 60, Appendix A, Method 22. [40 CFR 264.1101(c)(4), 40 CFR 270.32(b), 40 CFR 264.73]

118. The permittee is authorized to commence and complete a construction project to install steel wear plates on the concrete floor of the CBU in front of cells #2, #3, and #4, in accordance with the following conditions: (a) The plates shall be installed in accordance with the specifications and multi-stage construction schedule outlined in the approved modification documents; (b) Work will primarily occur on weekends when operations in the CBU are reduced; (c) Access to a minimum of one containment cell will be maintained during construction; (d) A temporary caulking agent will be used to seal the edge of plates when installation is stopped to allow full facility operations to resume; (e) The construction project is to be completed by November 1, 2018, appoximately one hundred twenty (120) days from the date of authorization and; (f) Within seven (7) days from the date of completion of the project, the permittee shall submit appropriate notice to the department which will include as-built drawings signed and sealed by a NJ licensed professional engineer. [40 CFR 264.1101(a), 40 CFR 264.1101(b), 40 CFR 264.1101(c)]

Subject Item: HWSG762507 - Containment building

119. Within 90 days after receiving the final volume of waste at the Containment Building, the permittee must remove all waste from the Containment Building and ship the waste to an authorized facility. [40 CFR 264.113(a)]

Subject Item: HWSG785088 - Hazardous Waste Tanks

120. The permittee shall design, construct, operate, and maintain each tank system in accordance with the application documents referenced in this permit. [40 CFR 270.32(b)(1)]

121. Each secondary containment system must be designed, installed, and operated to prevent migration of waste or accumulated liquid out of the system to the soil, ground water, or surface water at any time during use of the tank system. [40 CFR 264.193(b)(1)]

122. Spilled or leaked waste and accumulated precipitation must be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health and the environment, if the permittee can demonstrate to the Department that removal of the released waste or accumulated precipitation cannot be accomplished within 24 hours. [40 CFR 264.193(c)(4)]

123. Each secondary containment system must be maintained free of cracks and gaps. [40 CFR 264.193(e)(1)(iii)]

124. The permittee must not place hazardous wastes or treatment reagents in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. [40 CFR 264.194(a)]

125. The permittee must comply with the requirements of 40 C.F.R. 264.196 if a leak or spill occurs in a tank system. [40 CFR 264.194(c)]

126. The permittee must not place ignitable or reactive waste in a tank system unless the permittee complies with 40 C.F.R. 264.198. [40 CFR 264.198]

127. The permittee must not place incompatible wastes, or incompatible wastes and other materials, in the same tank system, unless the permittee complies with 40 C.F.R. 264.17(b). [40 CFR 264.199(a)]

128. The permittee must not place hazardous waste in a tank system that has not been decontaminated if the tank system previously held an incompatible waste or material, unless the permittee complies with 40 C.F.R. 264.17(b). [40 CFR 264.199(b)]

129. The permittee shall manage all hazardous waste placed in a tank system in accordance with the applicable requirements of Subparts AA, BB, and CC of 40 C.F.R. Part 264. [40 CFR 264.200]

130. The permittee shall inspect the following items at least once each operating day: Tank Shells for corrosion, wet seams, bulges, rivets or welds; Tank Supports for corrosion and deterioration; Overfill Prevention Controls for deterioration, damage, and function; Spill Prevention Controls for deterioration, leaks, damage, and function; Tank Ancillary Equipment for deterioration, leaks, damage, and function; Containment System for erosion, wet spots, cracks, gaps, uneven settlement, spalling, spills, and precipitation; Tank Labels and Warning Signs for visibility; and Emergency Equipment for function and unobstructed availability. The permittee shall inspect the following items at least once each month: Tank High Level Alarms for proper operation and maintenance; Tank High Level Automatic Fee Cut-Off Devices for proper operation and maintenance; and Tank Guages for proper operation and maintenance. [40 CFR 264.195]

Subject Item: HWSG785088 - Hazardous Waste Tanks

131. Within ninety (90) days after receiving the final volume of hazardous waste at a hazardous waste tank system, the permittee shall remove all hazardous waste from the tanks and manifest such waste to an off-site authorized facility. [40 CFR 264.113(a)]

132. Within 180 days after receiving the final volume of hazardous waste at a hazardous waste tank system, the permittee shall complete decontamination of the tanks, their ancillary equipment, and their secondary containment systems. Decontamination procedures shall include power washing with detergent/water. [40 CFR 264.197(a)]

133. Within one hundred eighty (180) days after receiving the final volume of hazardous waste at the tank system, the permittee shall collect all residues generated from the decontamination of the tank system components and ship the material off-site to a facility authorized to manage such waste. [40 CFR 264.197(a)]

134. Within 180 days after receiving the final volume of hazardous waste at a hazardous waste tank system, the permittee shall complete decontamination verification procedures for the tanks, their ancillary equipment and secondary containment systems. Decontamination verification shall consist of collecting samples of the final wash water from the decontamination of the secondary containment units, the tanks, and all tank appurtenances and a wash water blank and analyzing the samples for the parameters listed in Table 5.1 of the Facility Closure Decontamination Sampling Plan referenced in this permit. Decontamination methods shall be repeated until the concentrations of the final waste water test parameters are equal to the amount present in a wash water blank. [40 CFR 264.197(a)]

135. The permittee shall submit to the Department, either prior to or with the closure report, the results of the decontamination verification procedures. The Department will review the results and notify the facility if additional decontamination procedures are required. The permittee shall not remove any equipment or structures requiring decontamination from the site until the Department has made a determination that decontamination was adequate. [40 CFR 264.115]

136. Within sixty (60) days of completion of closure of a hazardous waste tank system, the permitte shall submit to the Department, by registered mail, a report of closure activities. The report shall include a certification that the tank system has been closed in accordance with the specifications of the approved closure plan and this permit and supporting documentation. The certification must be signed by the facility and by an independent registered professional engineer licensed by the State of New Jersey. The Department will review the report and perform an inspection of the facility. Based on the review of the report and the results of the inspection, the Department will notify the facility of the acceptability of the closure certification and of any additional activities which may be required. [40 CFR 264.115]

137. Within 180 days after receiving the final volume of hazardous waste at a tank system, the permittee shall conduct soil sampling around the tank in accordance with the approved closure plan. Soil sampling shall not be conducted prior to the removal of all hazardous waste from the unit. The permittee shall notify the Department in writing at least forty-two (42) calendar days prior to initiation of soil sampling so that an auditor from the Department can be present during the sampling episode. Soil sampling analytical results shall be submitted to the Department either prior to or with the closure report. [40 CFR 264.1102(a)]

Subject Item: HWSG785088 - Hazardous Waste Tanks

138. The permittee is authorized to store and/or treat hazardous waste authorized by this permit in tank systems ST-6 and ST-7. Treatment shall be limited to blending, bulking, filtration, and decanting. Each tank will be of steel construction and shall have a maximum capacity of 7,500 gallons. [40 CFR 264.197, 40 CFR 264.13, 40 CFR 270.32(b)(1)]

139. The permittee shall operate and maintain the tank decanting process in accordance with the permit application documents and the engineering designs referenced in this permit. Before decanting any waste, the permittee shall test a representative sample of the waste to be decanted in accordance with the Waste Analysis and Quality Assurance requirements of this permit. The permittee shall decant liquid waste from tanks authorized by this permit by pumping, vacuuming, gravity or other equivalent methods; and the permittee shall perform the decanting of liquid waste and subsequent transfer of such waste within the storage, transfer, and treatment areas authorized by this permit. [40 CFR 270.32(b)]

140. The permittee is authorized to use ST-6 and ST-7 to conduct blending, bulking, decanting, filtration, and storage of aqueous wastes identified with the following hazardous waste numbers: D001, D002, D004 through D043, all "P" and "U" hazardous wastes listed at 40 C.F.R. 261.33, F001 through F012, F019 through F024, F025, F026 through F028, F032, F034, F035, F037, F038, F039, K001 through K011, K013 through K052, K060 Through K069, K071, K073, K079, K081, K083 through K088, K090, K091, K093 through K118, K123 through K126, K131, K132, K136, and K156 through K161. [40 CFR 270.32(b)]

141. The permittee shall operate and maintain the blending and bulking treatment process in accordance with the permit application documents and engineering designs referenced in this permit and as follows. Before treating any waste, the permittee shall test a representative sample of the waste to be treated in accordance with the Waste Analysis and Quality Assurance requirements of this permit. Waste derived fuels and other wastes resulting from the treatment process shall be managed in accordance with the requirements of this permit until shipped off-site to facilities authorized to receive these wastes. The permittee is authorized to utilize the following equipment in the blending and bulking treatment process: a set of filter screens; liquid transfer pumps with explosion proof motors; assorted transfer hoses; grounding lines; one 12' x 4' x 4' screen filter box; one 5.83' x 4' x 3' screen filter box; and one in-line dispersing grinder with explosion proof motor. The permittee may add or delete equipment from the above list provided the permittee has given the Department written notification of such addition(s) or deletions(s), and the permittee has received written approval from the Department. [40 CFR 270.32(b)]

142. Every day the facility is in operation the permittee shall record in an inspection log or summary the volume of any tank used for the storage of hazardous waste. The permittee shall place the inspection log or summary record of the tank storage volume into the operating record of the facility. [40 CFR 264, 40 CFR 270.32(b), 40 CFR 264.73]

Subject Item: HWSG785088 - Hazardous Waste Tanks

143. The permittee is authorized to use ST-6 and ST-7 to conduct blending, bulking, decanting, filtration, and storage of organic solvent/aqueous wastes idenified with the following hazardous waste numbers: D001, D002, D004 through D043, F001 through F012, F019, F024, F025, F032, F034, F035, F037, F038, F039, K001 through K011, K013, K014, K015 through K030, K035, K036, K042, K044, K046, K048 through K052, K060, K061, K062,, K079, K081, K083 through K088, K093 through K096, K100 through K105, K156 through K161, P001, P006, P022, P028, P029, P030, P050, P053, P055, P064, P074, P098, P105, P106, P120, P127, P128, P185, P188 through P192, P194, P196 through P199, P201 through P205, U001 through U012, U014 through U027, U028 through U031, U034 through U039, U041 through U053, U055 through U064, U066 through U099, U101, U102, U103, U105 through U134, U136, U137, U139, U140 through U159, U161 through U174, U177, U179 through U189, U190 through U194, U197, U200 through U228, U230 through U235, U237, U239, U240, U242, U243, U244, U246, U247, U248, U249, U271, U272, U277 through U280, U328, U353, U359, U364 through U367, U372, U373, U375 through U379, U381, U382 through U387, U389 through U396, U400 through U404, U407, U409, U410, and U411. The permittee is authorized to manage ID 72 waste in ST-6 and ST-7 pursuant to the permitee's Solid Waste Permit and provided the decontamination procedures, outlined in Section 3.0 of the approved Hazardous Waste Permit application and section 9.6 of the approved Solid Waste Permit application documents, are followed. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

144. The permittee is authorized to store, treat and/or transfer wastes authorized by this permit in the following existing container storage areas with the following maximum capacity:

Container Storage Area	Maximum Capacity
A	48,000 gallons
B	21,560 gallons
C	17,600 gallons
D	10,560 gallons
E	19,500 gallons
F	20,625 gallons
G	48,000 gallons
Main Processing Pad & Loading/Unloading Dock	80,000 gallons
East Pad of the QC Dock	20,000 gallons
West Pad of the QC Dock	60,000 gallons
QC Dock	11,500 gallons
Tank Farm Loading/Unloading Pad	30,879 gallons
Hockmeyer Area	24,640 gallons

The total maximum capacity for these 13 container storage areas is 412,864 gallons. [40 CFR 270.32(b)]

145. The permittee shall design, construct, operate and maintain each container storage area in accordance with the application documents referenced in this permit. [40 CFR 264]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

146. If a container holding hazardous waste is not in good condition (e.g., severe rusting, apparent structural defects, etc.) or if it begins to leak, the permittee must transfer the hazardous waste from this container to a container that is in good condition. [40 CFR 264.171]

147. The permittee must use a container made of or lined with materials, which will not react with and are otherwise compatible with the hazardous waste to be stored, so that the ability of the container to contain the waste is not impaired. [40 CFR 264.172]

148. A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. [40 CFR 264.173(a)]

149. A container holding hazardous waste must not be opened, handled, or stored in a manner that may rupture the container or cause it to leak. [40 CFR 264.173(b)]

150. Each containment system must have a base underlying the containers that is free of cracks or gaps and is sufficiently impervious to contain leaks, spills, and accumulated precipitation until the collected material is detected and removed. [40 CFR 264.175(b)(1)]

151. The permittee must remove spilled or leaked waste and accumulated precipitation from each containment system in as timely a manner as is necessary to prevent overflow of the collection system. [40 CFR 264.175(b)(5)]

152. The permittee must not place incompatible wastes, or incompatible wastes and other materials, in the same container, unless the permittee complies with 40 C.F.R. 264.17(b). [40 CFR 264.177(a)]

153. The permittee must not place waste in an unwashed container that previously held an incompatible waste or material. [40 CFR 264.177(b)]

154. A storage container holding waste that is incompatible with any waste or other material stored nearby must be separated from the other materials or protected from them by means of a dike, berm, wall, or other device. [40 CFR 264.177(c)(1)]

155. The permittee shall manage all hazardous waste placed in a container in accordance with the applicable requirements of Subparts AA, BB, and CC of 40 C.F.R. Part 264. [40 CFR 264.179]

156. The permittee shall inspect each container storage/treatment area on a weekly basis for the following: all containers securely closed; any leaking containers; any containers swollen or bulged; any containers concaved due to internal vacuum build up; any containers with corrosion; all containers properly labeled and identified; all containers compatible with the waste stored in them; adequate aisle space; and all containers supported above any standing liquids. Containers shall be properly labeled as follows: containers in-transit shall be labeled and marked in accordance with the applicable US Department of Transportation regulations at 49 CFR part 172; containers of hazrdous waste generated on-site by Clean Earth shall be clearly marked with the words "Hazardous Waste" and the date upon which the accumulation period begins in accordance with 40 CFR 262.34(a); and all other containers shall be clearly marked to identify its contents and the date upon which the accumulation period begins. [40 CFR 264.174]

157. Within 90 days after receiving the final volume of waste at a hazardous waste container storage area(s), the permittee must remove all waste from the area(s) and ship the waste to an authorized facility. [40 CFR 264.113(a)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

158. Within one hundred eighty (180) days after receiving the final volume of waste at a hazardous waste container storage area, the permittee must complete decontamination of the area. Decontamination procedures shall include washing the containment system with water and detergent at high pressure. [40 CFR 264.178]

159. Within one hundred eighty (180) days after receiving the final volume of waste at the container storage area, the permittee shall collect all residues generated from the decontamination of the container storage area and ship the material off-site to a facility authorized to manage such waste. [40 CFR 264.178]

160. Within one hundred eighty (180) days after receiving the final volume of waste at a hazardous waste container storage area, the permittee must complete decontamination verification procedures for the area. Decontamination verification shall consist of sampling and testing the final rinse water from the hazardous waste container storage area and a wash water blank for the parameters listed in Table 9.1 "Decontamination Verification Samples; Location, Number and Type" as referenced in this permit. Decontaimation methods shall be repeated until the concentrations of the rinse water test parameters are equal to the amount present in a wash water blank. [40 CFR 264.178]

161. The permittee shall submit to the Department, either prior to or with the closure report, the results of the decontamination verification procedures. The Department will review the results and notify the facility if additional decontamination procedures are required. The permittee shall not remove any equipment or structures requiring decontamination from the site until the Department has made a determination that decontamination was adequate. [40 CFR 264.115]

162. The permittee is authorized to operate a treatment process to filter wastes authorized by this permit in any container storage area authorized by this permit. The permittee shall operate and maintain the treatment process in accordance with the application documents and engineering designs referenced in this permit. Liquid or semi-liquid waste may be pumped through portable filtration devices to remove suspended solids prior to transferring such waste to any storage, transfer or treatment activity authorized by this permit. The permittee is authorized to utilize the following equipment for the filtration process: one 12'x4'x4' screen filter box; one 5.83'x4'x3' screen filter box; assorted transfer hoses; grounding lines; portable filtration devices; a set of filter screens; pumps with explosion proof motors; and in-line dispersing grinders with explosion proof motors. The permittee may add or delete equipment from this list provided the permittee has given the Department written notification of such addition(s) or deletion(s) and the permittee has received written approval from the Department. [40 CFR 270.32(b)]

163. For the lab pack repackaging process, the permittee shall bulk compatible waste to be processed in containers. The processed container shall be assigned a container number and the contents of the container shall be recorded on a consolidation sheet which shall be on file with the Quality Assurance Supervisor. Before bulking a waste, the permittee shall test a representative sample of the waste in accordance with the procedures outlined in Appendix 5-4 "Compatibility Procedures for "Processing Lab Pack Containers" in the documents referenced in this permit. The emptied bottles, jars, jugs, etc. shall be crushed and accumulated in a container authorized for hazardous waste solids which shall be manifested off-site to an authorized facility. The soiled packing media shall also be accumulated in a container authorized for hazardous waste solids which shall be manifested off-site to an authorized facility. Unsoiled packing media may be reused. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

164. The permittee shall render empty, in accordance with 40 CFR 261.7, any container that has held hazardous waste before on-site crushing of such container in the permittee's drum crusher. [40 CFR 270.32(b)]

165. In Container Storage Area A, the permittee is authorized to treat, store, and transfer waste authorized by this permit, including D001, D003, and PCB waste (including waste containing PCBs at 50 ppm or greater). The waste capacity of Area A shall be limited to a maximum of 48,000 gallons. Non-rolloff containers shall not be larger than 300 gallons. Rolloff containers shall not be larger than 40 cubic yards. Cargo tanks shall not be larger than 8,000 gallons. Blending & bulking, decanting, and repackaging of waste is authorized in this area. [40 CFR 270.32(a)]

166. Every day the facility is in operation, the permittee shall record in an inspection log or summary the number and volume of containers in each storage area. [40 CFR 261.7, 40 CFR 264, 40 CFR 270.32(b)]

167. The permittee is authorized to stage incoming compatible, containerized waste in the existing locations listed below in accordance with the permit application documents and engineering designs referenced in this permit. The permittee shall place all incoming waste shipments into a treatment or storage area authorized by this permit by the same time of day that the waste shipment originally entered the facility property on the next operating day of the facility. The permittee shall remove from the facility property or place into a storage or treatment area authorized by this permit all outgoing waste shipments by the same time of day that the waste shipment was originally removed from a storage or treatment area authorized by this permit and placed into a container staging or loading/unloading area authorized by this permit on the next operating day of the facility. Staged containerized waste shall not count toward the permitted waste container storage capacities authorized by this permit until the time limits specified above have been exceeded. Containers of hazardous waste may be staged at the following locations: Tank Farm Loading/Unloading Pad; QC Dock; Main Processing Pad & Loading/Unloading Dock; West Pad of the QC Dock; East Pad of the QC Dock; Container Storage Areas A, C, D, E, and G; and the Containment Building. [40 CFR 270.32(b)]

168. At the Tank Farm Loading/Unloading Pad, the permittee is authorized to treat, store, and transfer waste authorized by this permit, with the exception of PCB waste. The waste capacity at the Tank Farm Loading/Unloading Pad shall be limited to a maximum of 30,879 gallons. Individual tankers shall not be larger than 7,000 gallons. Consolidation, blending & bulking, decanting, and filtration of waste, and repackaging of non-lab pack waste is authorized in this area. [40 CFR 270.32(b)]

169. At the Hockmeyer Area, the applicant is authorized to treat, store, and transfer waste authorized by the permit, with the exception of D001, D003, and PCB waste. The waste capacity of this area shall be limited to a maximum of 24,640 gals. Individual containers shall not be larger than 119 gallons. Blending & bulking and decanting of waste and repackaging of non-lab pack waste (one container to a new or replacement container only) is authorized in this area. [40 CFR 270.32(b), 40 CFR 264]

170. The permittee is authorized to operate a treatment process for decanting liquid containerized waste authorized by this permit in accordance with the application documents and engineering designs referened in this permit. The permittee may conduct the decanting process within any of the existing storage, transfer and treatment areas authorized by this permit. Before decanting any waste, the permittee shall test a representative sample of the waste in accordance with the waste analysis requirements of this permit. The permittee shall decant the waste from containers by aspirating, pouring, pumping or siphoning. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

171. The permittee is authorized to operate a treatment process for the blending and bulking of organic solvent waste or aqueous waste in any of the authorized storage, transfer or treatment areas authorized by this permit. The permittee shall operate and maintain the treatment process in accordance with the application documents and engineering designs referenced in this permit. Before treating any waste, the permittee shall test a representative sample of the waste in accordance with the waste analysis requirements of this permit. If necessary, the permittee shall decant liquid waste from containers utilized in the treatment process in accordance with the decanting requirements of this permit. Waste derived fuels, waste solvents and aqueous wastes produced by the treatment process shall be managed in accordance with the requirements of this permit pending shipment to off-site authorized facilities. The permittee is authorized to utilize the following equipment in the blending and bulking treatment process: two 5,000 gallon mobile tankers; one 4,000 gallon mobile tanker; a set of filter screens; liquid transfer pumps with explosion proof motors; assorted transfer hoses; two container homogenizing mixers; grounding lines; one 12'x4'x4' screen filter box; one 5.83'x4'x3' screen filter box; and one in-line dispersing grinder with explosion proof motor. The permittee may add or delete equipment from this list provided the permittee has given the Department written notification of such addition(s) or deletion(s) and the permittee has received written approval from the Department. [40 CFR 270.32(b)]

172. The permittee shall use the QC Dock or any treatment, storage, transfer, loading/unloading, or staging area authorized by this permit for receiving all incoming waste shipments. [40 CFR 270.32(b)]

173. The permittee is authorized to conduct blending, bulking, decanting, storage, staging, transfer, filtration, loading/unloading and vehicle staging for aqueous wastes identified with the following waste numbers: D001, D002, D004 through D043, all "P" and "U" hazardous wastes listed at 40 C.F.R. 261.33, F001 through F012, F019 through F024, F025, F026 through F028, F032, F034, F035, F037, F038, F039, K001 through K011, K013 through K052, K060 through K069, K071, K073, K079, K081, K083 through K088, K090, K091, K093 through K118, K123 through K126, K131, K132, K136, K156 through K161, K169, K170, K171 and K172. [40 CFR 270.32(b)]

174. The permittee is authorized to conduct repackaging, decanting, storage, transfer, staging, filtering, loading/unloading and vehicle staging for waste identified with the following waste numbers : D001, D002, D004 through D043, F001 through F012, F019, F024, F025, F028, F032, F034, F035, F037, F038, F039, K001 through K062, K064, K065, K066, K069, K071, K073, K083 through K088, K090, K091, K093 through K118, K123 through K126, K131, K132, K136, K141, K147, K148, K156 through K161, K169, K170, K171 and K172, P001 through P018, P020 through P024, P026 through P031, P033, P034, P036 through P051, P054, P056 through P060, P062 through P078, P081, P082, P084, P085, P087, P088, P089, P092 through P099, P101 through P116, P118 through P123, P127, P128, P185, P188 through P192, P194, P196, P199, P201 through P205, U001 through U009, U014 through U039, U041 through U053, U055 through U099, U101 through U174, U176 through U194, U196, U197, U200 through U211, U213 through U223, U225 through U228, U234 through U240, U243, U244, U246 through U249, U271, U272, U277 through U280, U328, U353 through U359, U364 through U367, U372, U373, U375 through U379, U381, U382 through U387, U389 through U396, U400 through U404, U407, U409, U410, and U411. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

175. In Container Storage Area D, the permittee is authorized to treat, store, and transfer waste authorized by this permit, with the exception of D001, D003, and PCB waste. The waste capacity of Area D shall be limited to a maximum of 10,560 gallons. Individual containers shall not be larger than 300 gallons. Blending & bulking and decanting of waste and repackaging of non-lab pack waste (one container to a new or replacement container only) is authorized in this area. [40 CFR 270.32(b), 40 CFR 261.23, 40 CFR 261.22, 40 CFR 261.21, 40 CFR 264]

176. The permittee shall maintain a minimum aisle space of 18 inches between double rows of containers. Containers smaller than 110 gallons shall be stacked no higher than the equivalent of two 110 gallon containers, while 110 gallon containers shall be stacked no greater than two high. Containers greater than 110 gallons shall not be stacked. [40 CFR 264.35]

177. The permittee is authorized to conduct consolidation, storage, decanting, staging, transfer, loading/unloading, screening and vehicle staging for solid, sludges or slurry wastes identified with the following waste numbers: D001, D002, D004 through D043, all "P" and "U" hazardous wastes listed at 40 C.F.R. 261.33, F001 through F012, F019 through F024, F025, F026 through F028, F032, F034, F035, F037, F038, F039, K001 through K011, K013 through K052, K060 through K069, K071, K073, K079, K081, K083 through K088, K090, K091, K093 through K118, K123 through K126, K131, K132, K136, K156 through K161, K169, K170, K171 and K172. [40 CFR 270.32(b)]

178. Within 180 days of receiving the final volume of waste at a container storage area, the permittee shall perform closure soil sampling around the area in accordance with the Revised Soil Sampling and Analytical Closure Plan referenced in this permit. Soil sampling shall not be conducted prior to the removal of all hazardous waste from the units. The permittee shall notify in writing the Department at the address listed in this permit at least forty two (42) calendar days prior to initiation of soil sampling so that an auditor from the Department can be present during the soil sampling episode. Soil sampling analytical results shall be submitted for the Department's review either prior to or with the closure report. [40 CFR 270.32(b)]

179. The permittee is authorized to operate as a transfer station for containerized waste authorized by this permit. Containers accepted for transfer shall not be opened by the permittee except for inspection, sampling or analysis in accordance with the waste analysis requirements of this permit, repackaging of the contents of the container as authorized by this permit, or repackaging of a damaged container. [40 CFR 270.32(b)]

180. The permittee is authorized to operate a process for the repackaging of containers of solid and semi-solid wastes authorized by this permit in accordance with the permit application documents and engineering designs referenced in this permit. Repackaging of waste from one container to another new or replacement container may occur at any of the hazardous waste storage areas. Repackaging of waste from a single container to more than one container shall only occur at: the Main Processing Pad & Loading/Unloading Dock Area; Tank Farm Loading/Unloading Pad; the CBU; Storage Areas C and F. Before repackaging a waste, the pemittee shall test a representative sample of the waste in accordance with the waste analysis requirements of this permit. Once repackaged, the containers shall be placed in an authorized container storage area pending shipment to an authorized off-site facility. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

181. The permittee is authorized to conduct blending, bulking, decanting, storage, staging, transfer, filtration, loading/unloading and vehicle staging for organic solvent/aqueous wastes identified with the following waste numbers: D001, D002, D004 through D043, F001 through F009, F010, F011, F012, F019, F024, F025, F032, F034, F035, F037, F038, F039, K001 through K011, K013, K014, K015 through K030, K035, K036, K042, K044, K046, K048 through K052, K060, K061, K062, K079, K081, K083 through K088, K093 through K096, K100 through K105, K156 through K161, K169, K170, K171 and K172, P001, P006, P022, P028, P029, P030, P050, P053, P055, P064, P074, P098, P105, P106, P120, P127, P128, P185, P188 through P192, P194, P196 through P199, P201 through P205, U001 through U012, U014 through U027, U028 through U031, U034 through U039, U041 through U053, U055 through U064, U066 through U099, U101, U102, U103, U105 through U134, U136, U137, U139, U140 through U159, U161 through U174, U177, U179 through U189, U190 through U194, U197, U200 through U228, U230 through U235, U237, U239, U240, U242, U243, U244, U246, U247, U248, U249, U271, U272, U277 through U280, U328, U353, U359, U364 through U367, U372, U373, U375 through U379, U381, U382 through U387, U389 through U396, U400 through U404, U407, U409, U410, and U411. [40 CFR 270.32(b)]

182. The permittee is authorized to operate a treatment process for the consolidation of the compatible contents of containers of waste authorized by this permit. The permittee shall consolidate waste only at Main Processing Pad & Loading/Unloading Dock; Tank Farm Loading/Unloading Pad; Container Storage Area B; Container Storage Area C; and covered area of Container Storage Area F. Before consolidating any waste, the permittee shall test a representative sample of the waste in accordance with the waste analysis requirements of this permit. The permittee shall consolidate waste from containers into rolloffs for transfer to the Containment Building or for bulk shipment to an authorized off-site facility. The permittee is authorized to consolidate bulk wastes into rolloffs wastes authorized by this permit, with the exception of D001 and D003 waste as defined at 40 C.F.R. 261.21 and 261.23. [40 CFR 270.32(b)]

183. At the East Pad of the QC dock, the permittee is authorized to treat, store, and transfer waste authorized by this permit, including D001, D003, and PCB waste (including waste containing PCBs at 50 ppm or greater). The waste capacity of this area shall be limited to a maximum of 20,000 gallons. Individual tanker containers shall not be larger than 7,000 gallons. Rolloff containers shall not be larger than 40 cubic yards. Non-rolloff containers shall not be larger than 300 gallons. Blending & bulking and decanting of waste and repackaging of non-lab pack (one container to a new or replacement container only) waste is authorized in this area. [40 CFR 270.32(b)]

184. In Container Storage Area B, the permittee is authorized to treat, store, and transfer waste authorized by this permit, with the exception of PCB waste. The waste capacity of Area B shall be limited to a maximum of 21,560 gallons. Individual containers shall not be larger than 300 gallons. Consolidation, blending & bulking, decanting, and repackaging of waste is authorized in this area. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

185. The permittee is authorized to operate a treatment process for the solidification/stabilization of hazardous waste in containers utilizing approved reagents listed in Table 4-3 in accordance with the application documents and engineering designs referenced in this permit. The process shall be performed only within Container Storage Area C, the concrete containment pad surrounding the Main Processing Pad & Loading/Unloading Dock, and the Containment Building. Before treating any hazardous waste, the permittee shall test a representative sample of the waste in accordance with the waste analysis requirements of this permit. The process shall be performed in non-bulk containers up to 119 gallons or bulk containers up to 40 cubic yard capacity (limited to DOT authorized metal containers/bins, such as roll-offs, or non-metal containers, such as cardboard or fiber boxes, when required to facilitate off-site treament or disposal, such as incineration). Partially filled containers shall be consolidated until a full container is obtained, if necessary. An approved solidification/stabilization reagent listed in Table 4-3 shall be added to the top of the container with a hand scoop or other similar equipment to absorb any free liquids, if necessary. Filled containers shall be resealed and labeled pending shipment to an authorized off-site facility. In the case where the treated waste will be sent off-site for thermal incineration or treatment, the untreated waste shall be transferred, prior to solidification/stabilization, to an incinerable container that meets the specification of the off-site destination facility. [40 CFR 270.32(b)]

186. At the Main Processing Pad & Loading/Unloading Dock, the permittee is authorized to treat, store, and transfer waste authorized by this permit, with the exception of PCB waste. The waste capacity of this area shall be limited to a maximum of 80,000 gallons. Individual containers shall not be larger than 8,000 gallons. D001 waste shall only be managed in portions of this area that are at least 50 feet from the property line. Consolidation, blending & bulking, decanting, and repackaging of non-lab pack waste is authorized in this area. Solidifcation/stabilization in containers is authorized within the secondary containment system of this area. [40 CFR 270.32(b)]

187. In Container Storage Area G, the permittee is authorized to treat, store, and transfer waste authorized by this permit, with the exception of D001, D003 and PCB waste. The waste capacity of Area G shall be limited to a maximum of 48,000 gallons. Individual containers shall not be larger than 300 gallons, and roll off containers shall not be larger than 40 cubic yards (8,000 gallons). Blending & bulking and decanting of waste and the repacking of non-lab pack waste (one container to a new or replacement container only) is authorized in this area. [40 CFR 270.32(b)]

188. In Container Storage Area E, the permittee is authorized to treat, store, and transfer waste authorized by this permit , with the exception of D001, D003 and PCB waste. The waste capacity of Area E shall be limited to a maximum of 19,500 gallons. Individual containers shall not be larger than 300 gallons, while rolloff container shall not be larger than 30 cubic yards. Blending & bulking and decanting of waste and repackaging of non-lab pack waste (one container to a new or replacement container only) is authorized in this area. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

189. The permittee is authorized to operate a repackaging process for lab packs in accordance with the application documents referenced in this permit. The repacking of lab packs shall be performed within Container Storage Area C and the covered portion of Container Storage Area F authorized by this permit. The pemittee shall only accept sealed lab packs of up to 110 gallon capacity. The permittee shall only open 20 lab packs for repackaging at any one time. From the information on the packing list, the permittee's Quality Assurance Technician shall recommend the proposed disposition of each individual container within the lab pack by writing on the packing list either the letter "P" for on-site processing or "T" for transfer to an authorized off-site facility. The packing list with the recommended dispositions shall be filed with the Quality Assurance Supervisor for approval. A copy of this packing list with the recommended disposition(s) shall be affixed to the top of the lab pack container. Upon approval by the Quality Assurance Supervisor, the individual containers in the lab pack shall be removed and placed into other containers designated for specific approved disposition or left in the original container. For repacked lab packs for transfer, the lab pack shall be properly labeled and shall contain the new packing list. For every new addition to a lab pack, the packing list shall be amended. The packing list shall be placed on top of the container and a duplicate copy shall be filed with the Quality Assurance Supervisor with the additions to the lab pack listed. The permittee shall segregate individual bottles, jars, jugs, etc. in repacked lab pack containers in accordance with DOT regulations. When the new lab pack is filled, it shall be moved to any container storage or transfer area authorized by this permit pending shipment to an off-site authorized facility. [40 CFR 270.32(b)]

190. The permittee is authorized to conduct repackaging, staging, transfer, storage, decanting, consolidation, filtration, loading/unloading and vehicle staging of solid, semi-solid and liquid wastes identified with the following waste numbers: All "D" hazardous waste listed at 40 C.F.R. 261.21 through 261.24, all "P" and "U" hazardous wastes listed at 40 C.F.R. 261.33, F001 through F012, F019 through F024, F025, F026 through F028, F032, F034, F035, F037, F038, F039, K001 through K011, K013 through K052, K060 through K069, K071, K073, K079, K081, K083 through K088, K090, K091, K093 through K118, K123 through K126, K131, K132, K136, K141, K147, K148, K156 through K161, K169, K170, K171 and K172. The permittee shall manage PCB waste in Container Storage Areas A and C; QC dock; East Pad of QC Dock; and the CBU only. [40 CFR 270.32(b)]

191. At the Quality Control (QC) dock the permittee is authorized to treat, store, and transfer waste authorized by this permit, including D001, D003, and PCB waste (including waste containing PCBs at 50 ppm or greater). The waste capacity of this area shall be limited to a maximum of 11,500 gallons. Individual containers shall not be larger than 300 gallons. [40 CFR 270.32(b)]

192. In Container Storage Area C, the permittee is authorized to treat, store, and transfer waste authorized by this permit, including D001, D003, and PCB waste (including waste containing PCBs at 50 ppm or greater). The waste capacity of Area C shall be limited to a maximum of 17,600 gallons. Individual containers shall not be larger than 300 gallons. The storage and processing (including repackaging) of lab packs is permitted in this area. Consolidation, blending and bulking, solidification/stabilization in containers, and repackging of non-lab pack waste is authorized in this area. [40 CFR 270.32(b)]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

193. In Container Storage Area F, the permittee is authorized to treat, store, and transfer waste authorized by this permit, with the exception of D001, D003 and PCB waste. The waste capacity of Container Storage Area F shall be limited to a maximum of 20,625 gallons. Individual containers shall not be larger than 300 gallons. The storage and processing of lab packs, the consolidation of containerized waste, and solidification/stabilization of waste in containers shall only be conducted in the covered portion of Container Storage Area F. Blending & bulking and decanting of waste is authorized in all portions of this area. [40 CFR 270.32(b)]

194. The permittee shall not locate containers holding ignitable or reactive waste within 50 feet of the facility's property boundary. [40 CFR 264.176]

195. The permittee shall take precautions to prevent accidental ignition or reaction of ignitable or reactive waste. [40 CFR 270.32(b)]

196. At the West Pad of the QC dock, the permittee is authorized to treat, store, and transfer waste authorized by this permit, with the exception of PCB waste. The waste capacity of this area shall be limited to a maximum of 60,000 gallons. Individual Tankers shall not be larger than 6,000 gallons; all other continer types shall not be larger than 30 cubic yards. Blending & bulking and decanting of waste and repackaging of non-lab pack waste (one container to a new or replacement container only) is authorized in this area. [40 CFR 270.32(b)]

197. The permittee is authorized to conduct solidification/stabilization with approved reagents listed on Table 4-3, staging, transfer, storage, decanting, consolidation, screening, loading/unloading and vehicle staging for solid, sludge or slurry wastes identified with the following waste numbers: All "D" hazardous waste listed at 40 C.F.R. 261.21 through 261.24, all "P" and "U" hazardous wastes listed at 40 C.F.R. 261.33, F001 through F012, F019 through F024, F025, F026 through F028, F032, F034, F035, F037, F038, F039, K001 through K011, K013 through K052, K060 through K069, K071, K073, K079, K081, K083 through K088, K090, K091, K093 through K118, K123 through K126, K131, K132, K136, K156 through K161, K169, K170, K171, and K172. [40 CFR 270.32(b)]

198. The permittee shall record, in an inspection log or summary, the internal tracking of containers of hazardous waste that have been rejected by the ultimate treatment, storage or disposal facility and subsequently returned to the permittee. The permittee shall place this inspection log or summary into the operating record of the facility. [40 CFR 264, 40 CFR 270.32(b), 40 CFR 264.73]

Subject Item: HWSG787685 - Hazardous Waste Container Storage/Treatment Areas

199. The permittee is authorized to stage vehicles containing waste for parking or loading/unloading in the existing hazardous waste management areas listed below. The permittee shall place all incoming shipments into a treatment or storage area authorized by this permit by the same time of day that the waste shipment originally entered the facility property on the next operating day of the facility. The permittee shall remove from the facility property or place into a storage or treatment area authorized by this permit all outgoing waste shipments within 24 hours (or next operating day following a weekend or holiday) of the time the waste shipment was originally removed from a storage or treatment area authorized by this permit and placed into a vehicle staging or loading/unloading area authorized by this permit. Waste staged for the purpose of parking or loading/unloading shall not count toward the permitted waste container storage capacities authorized by this permit until the time limits specified above have been exceeded. The permittee shall operate and maintain the vehicle staging and loading/unloading areas in accordance with the application documents referenced in this permit. Vehicles containing hazardous wastes shall only be staged at the following locations as identified on the application documents: Tank Farm Loading/Unloading Pad; West Pad of the QC Dock; East Pad of the QC Dock; Main Processing Pad & Loading/Unloading Dock; and the Containment Building. Re: Administrative Completeness of a Hazardous Waste Facility Permit Application
Clean Earth of North Jersey, Inc. ("CENJ")
105 Jacobus Avenue, Kearny Town, New Jersey
EPA ID# NJD991291105, Permit No. HWP240001

Dear Mr. Logan:

The Bureau of Recycling and Hazardous Waste Management (the Bureau) is in receipt of a Hazardous Waste Facility Permit Application for the renewal of the above referenced facility's hazardous waste storage and treatment permit submitted on January 8, 2024.

The Bureau has completed an administrative review of the application. Based on this review, the Bureau has determined that the application is administratively complete. Therefore, the Bureau accepts the application for distribution and technical review.

Should you have any questions regarding this matter, please contact Kevin Veltre of my staff at (609) 940 – 5870 or by email at Kevin.Veltre@dep.nj.gov.

Sincerely,

Jennifer Meyer
Bureau of Recycling and Hazardous Waste Management

RE: Willets Point Stadium Project
37-11 126th Street
Queens, NY 11368
BCP Site No. C241146C
OER# 24TMP0780Q

Dear Ms. Rodrigues:

Bayshore Soil Management, LLC (BSM) has reviewed the provided additional analytical results for the Willets Point Stadium project located in Queens, NY. Based on our review of the provided analysis in York Analytical reports: 24A0187 and 24J0599, samples Stockpile #1, TP1 and Alpha Analytical reports: L2452184, L2455938, and L2453039, samples WC01 (0-7/7-15), WC02 (0-5/5-10), WC03 (0-6/6-12), WC04 (0-5), WC05 (0-15), WC07 (0-6), WC08 (0-6), WC09 (0-17), WC10 (0-11), WC11 (0-5), WC14 (0-5), WC15 (0-5), WC16 (0-6), WC17 (0-5/5-10), WC18 (0-5/5-10), WC19 (0-5/5-10), and associated grab samples for VOCs, EPH and delineation samples for WC06 (0-6) and WC12 (0-5). BSM has identified materials that appear to meet our acceptance criteria for Petroleum Contaminated Soil/Urban Fill. Material represented by samples WC06 (0-6) and WC12 (0-5) are excluded due to hazardous TCLP Lead, along with WC13 (0-5) due to elevated PCBs. The approval decision was based on the review of the submitted generator waste profile, site information, analytical testing results stemming from field sampling work, and review of the following documents:

Bayshore Soil Management, LLC can only accept non-hazardous contaminated soil and based on our review of the above-referenced soil chemistry data and with the above noted conditions, the material is acceptable under the guidelines of our operating permits, with the above-noted exceptions.

- April 4, 2022 Waste Characterization Report, prepared by Langan
- April 29, 2022 Remedial Investigation Report (RIR) for OU-2, prepared by Langan
- June 7, 2022 Remedial Action Work Plan (RAWP) for OU-2, prepared by Langan
- June 21, 2023 RAWP Modification Letter, prepared by Langan
- April 22, 2024 Final Engineering Report (FER), prepared by Langan
- April 22, 2024 Site Management Plan (SMP), prepared by Langan
- October 29, 2024 Preliminary Waste Characterization Report, prepared by Langan

This project is currently approved for up to 7,200 tons under **BSM#2724-0988**. The approved dataset will support up to 19,800 tons, with BSM collection of a Paint Filter Test and additional EPH samples at 1 per 600 tons for materials beyond 1,800 tons. If you have any questions or require further information, please do not hesitate to contact us at 732.738.6000.

RE: Willets Point Stadium Project
37-11 126th Street
Queens, NY 11368
BCP Site No. C241146C
OER# 24TMP0780Q

Dear Ms. Rodrigues:

Bayshore Soil Management, LLC (BSM) has reviewed the provided additional analytical results for the Willets Point Stadium project located in Queens, NY. Based on our review of the provided analysis in York Analytical report 25A1191, sample Stockpile 2B, in addition to previously approved reports 24L0788, 24L0934, 24L1037, 25A0187, 24J0599, samples WC01_COMP 0-15, WC02_COMP 0-10, WC03_COMP 0-10, WC04_COMP 0-10, WC05_COMP 0-10, WC06_COMP 0-10, WC07_COMP 0-10, WC08_COMP 0-5Stockpile #1, TP1 and Alpha Analytical reports: L2452184, L2455938, and L2453039, samples WC01 (0-7/7-15), WC02 (0-5/5-10), WC03 (0-6/6-12), WC04 (0-5), WC05 (0-15), WC07 (0-6), WC08 (0-6), WC09 (0-17), WC10 (0-11), WC11 (0-5), WC14 (0-5), WC15 (0-5), WC16 (0-6), WC17 (0-5/5-10), WC18 (0-5/5-10), WC19 (0-5/5-10), and associated grab samples for VOCs, EPH and delineation samples for WC06 (0-6) and WC12 (0-5). BSM has identified materials that appear to meet our acceptance criteria for Petroleum Contaminated Soil/Urban Fill. Material represented by samples WC06 (0-6) and WC12 (0-5) are excluded due to hazardous TCLP Lead, along with WC13 (0-5) due to elevated PCBs and Stockpile 2A due to elevated Total Lead. The approval decision was based on the review of the submitted generator waste profile, site information, analytical testing results stemming from field sampling work, and review of the following documents:

Bayshore Soil Management, LLC can only accept non-hazardous contaminated soil and based on our review of the above-referenced soil chemistry data and with the above noted conditions, the material is acceptable under the guidelines of our operating permits, with the above-noted exceptions.

RE: CFG Stadium Group LLC – Willets Point Stadium
37-11 126th St, Queens, NY 10016
NYSDEC BCP# C241146C | Approval Volume: 2,000 tons

Approval Number: 253070158
Job Number: 1021044

Dear Mr. Deighton,

Clean Earth of Carteret, LLC. (CEC) is pleased to provide you with the following approval letter for the soil material being generated from the site referenced above. We reviewed the soil disposal request letter prepared by Langan, material profile sheet, sampling map, and analytical results performed by York Analytical Laboratories Inc. (Project Number: 25A1191) for the above referenced site. Based upon the review of the data provided, CEC can accept non-hazardous contaminated soil being generated from the site above.

This letter serves as approval consideration of ~2,000 tons of non-hazardous contaminated soil represented by waste class sample $ID_{(s)}$: Stockpile 2A, Stockpile 2B, and all related grab samples to be generated from construction activities at the site.

Please note that provided laboratory data package is short TPH analysis. The facility is permitted to analyze missing parameters by collecting soil samples from incoming loads. Please note that TPH analysis (every 600 Tons) will be required to comply with CEC's Class B permit. In the essence of saving time, CEC will collect the additional TPH samples as required upon arrival at the facility to meet the CEC analytical requirements. CEC will amend the invoice accordingly.

Please provide the approval number when scheduling and include the approval number and grid location ID on all manifests when shipping soils generated from this site. CEC can only accept non-hazardous soils. Any soils with free petroleum product or liquids, sludges, or hazardous waste cannot be accepted. The generator will be notified of any non-conforming material.

If you should have any questions or require any additional information, please call (732)-541-8909.

Sincerely,
Clean Earth of Carteret, LLC

March 27th 2025

CFG Stadium Group LLC
37-11 126th Street
Queens, NY 10016
Brownfield Cleanup Program (BCP) site: (BCP Site No. C241146C)

Clean Earth of North Jersey, Inc. ("CENJ"), 105 Jacobus Avenue, Kearny, NJ 07032, has received and reviewed the following documents for the above referenced site:

- CENJ Hazardous WPS and CBU addendum
- Langan-Preliminary Waste Characterization Report-Oct 29
- April 22, 2024 Final Engineering Report (FER), prepared by Langan
- Lab Report-York Analytical 25C1416

This letter serves as ***approval*** of RCRA D008 , NON TSCA solid soils, NO PFAS, NO UHC'S >10x, for ~1,950 tons represented by the sample IDs and all related grab and duplicate samples in the referenced reports.

WC-6(0-6)
Stockpile #3

The approval number **(2430849397)** must be provided when scheduling and the Grid Name/Depth must be written on all manifests when shipping soils to CENJ.

This approval is based upon material being accurately represented by all information provided to CENJ at this time, including, but not limited to, Waste Profiles, analysis, site diagrams, site history, and sampling plans. Please be advised that should the material be found to be non-conforming based on our facility permit requirements, CENJ will contact you to discuss options.

Treatment of this material will be performed under CENJ Hazardous Waste Facility Permit No. HWP170002 EPA ID No. NJD991291105.

Clean Earth Inc. and its subsidiaries would like to thank you for giving us the opportunity to manage this waste stream. Should you have any questions or concerns, please do not hesitate to contact me at 412-389-1445.

Sincerely,
CLEAN EARTH INC.
