

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET

Brownfield Cleanup Program

HIP Cleaners

(Rochdale Village Mall #2)
169-47 137th Avenue
Queens, NY 11434

December 2023

SITE No. C241166

NYSDEC REGION 2

Cleanup Action Completed at Brownfield Site

Action has been completed to address the contamination related to the HIP Cleaners (Rochdale Village Mall #2) site ("site") located at 169-47 137th Avenue, Queens, NY under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by Rochdale Village, Inc. ("applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicant has submitted a draft Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been or will be achieved to fully protect public health and the environment for the proposed site use.

- Access project documents online through the DECinfo Locator:
<https://www.dec.ny.gov/data/DecDocs/C241166/>.
- The documents also are available at the locations identified at left under "Where to Find Information."

Highlights of the Site Cleanup: The following activities have been or will shortly be completed to achieve the remedial action objectives:

- Vapor Intrusion Mitigation - Installation of an active sub-slab depressurization system and soil vapor extraction system to minimize the potential for vapor intrusion at the site and treat remaining tetrachloroethene (PCE) impacts in the soil.
- In-Situ ("in-place") Chemical Oxidation (ISCO) - ISCO is a technology used to treat residual volatile organic compounds in the groundwater. A chemical oxidant was injected into groundwater beneath the site.
- Site Cover System - The site will continue to maintain the existing site cover system, which consists of the structures comprising the site development.
- Development of a Site Management Plan (SMP) for long-term management of residual contamination as required by the Environmental Easement, including plans for: (1) Institutional and Engineering Controls (IC/ECs); (2) monitoring; (3) operation and maintenance; and (4) reporting.

BROWNFIELD CLEANUP PROGRAM

- An Environmental Easement was recorded to prevent future exposure to any contamination remaining at the site, to ensure proper future use of the site, and to ensure implementation of the SMP.

Next Steps: When NYSDEC approves the FER, it will be made available to the public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicant would be able to redevelop the site after receiving a COC. In addition, the applicant will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

Site Description: HIP Cleaners is located in an urban area of the Jamaica section of Queens, NY and is identified as a portion of Lot 2, Block 12495 on the NYC tax map. The site's address is 169-47 137th Avenue. The site is a single unit (0.062 acres) in a commercial building (Rochdale Village Mall #2) in Rochdale Village, a 115-acre development. The site is currently occupied by an active dry cleaner. A dry-cleaning facility has occupied the site for approximately 47 years.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C241166) at:

<https://www.dec.ny.gov/cfm/external/derexternal/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the

voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business, or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives (SCOs) or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
