January 4, 1990

Mr. Derek Chou
Black Bear Company
44-25 23rd Street
Long Island City, New York 11101

RE: Sight Investigation Emery Building, Long Island City

Dear Mr. Chou:

To confirm our conversation this morning, we propose to provide a soil vapor analysis screening study of the site referred to above and will in addition, take soil samples for laboratory analysis. The soil vapor analysis will be performed using our own field photoionization equipment.

This study will provide qualitative data relative to volatile organics or light hydrocarbon chemicals contaminating the soil. Negative results from the screening study will assure that entire classifications of organic chemicals are not contaminating the soil and groundwater at the site.

In addition, soil samples will be taken and provided for chemical analysis in the laboratory to determine the presence of EP-toxicity heavy metals. If the tests all give negative results, it represents a reasonable assurance that the site has not been contaminated by many of the more common materials considered hazardous by the U.S. Environmental Protection Agency. If positive results are obtained, you will be contacted so that we may discuss options and alternatives if more definitive determinations are desired. After performing the above tests and analyses, we will provide a brief report of our findings for you to use during your short term considerations.

We propose to provide all of the above for a fixed fee of $3,000.00 which includes all expenses, laboratory costs, and fees.

In addition, while at the site, we will obtain as much information as possible in order to evaluate the costs associated with permanently decommissioning the underground gasoline storage tank at the site. The decommissioning will have to be in accordance with all protocols and regulations currently in effect and enforced by Federal Environmental Agencies as well as the State and City Department of Environmental Conservation and Fire Marshal's Offices.

We trust the above meets your requirements. If there are any questions at all, please do not hesitate to contact me directly at any time. We look forward to working with you on this assignment.

Sincerely yours,

Arthur Gerunda
President

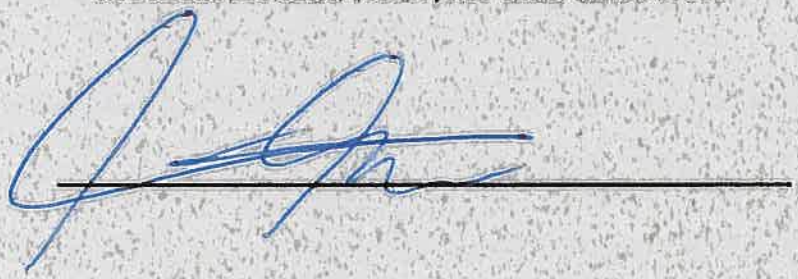
HAZARDOUS SUBSTANCES SURVEY & REPORT

27-10 HUNTERSPOINT AVENUE LONG ISLAND CITY, NY



PRESENTED TO BLACK BEAR COMPANY INC.

PROJECT NO. J-955

FEBRUARY 14, 1990

REPORT PREPARED & CERTIFIED BY ARTHUR GERUNDA, PRESIDENT

NYC ASBESTOS CERT. #03397; NYS CERT. #AH88-07511

NOTE: THIS DOCUMENT IS SOLELY INTENDED TO MEET THE PRE-LOAN REQUIREMENTS OF THE INSTITUTION NOTED ABOVE. NO AUTHORIZATION IS GIVEN TO DISTRIBUTE THIS REPORT TO ANY PARTIES NOT INVOLVED IN THE TRANSACTION FOR WHICH THE REPORT WAS PUBLISHED. THIS DOCUMENT IS NOT TO BE USED AS THE BASIS FOR ANY REMEDIAL ACTION.

EXECUTIVE SUMMARY

The property that was surveyed and is the subject of this report was **found to free of any overt signs of contamination by light hydrocarbons, volatile organics or EP Toxicity heavy metals.**

Asbestos Containing Material (ACM) was found to exist in the building in the form of thermal insulation on heating system pipes and acoustic ceiling tiles forming a dropped ceiling in the office areas.

INTRODUCTION

MTS EnviroSurv Inc. (MTS), was engaged by **Black Bear Inc.** to provide an environmental survey of the property located at 27-10 Hunterspoint Avenue. The purpose of the survey was to determine if there were any environmentally related reasons to prevent Black Bear from considering purchase of the site.

It is not practical to engage in an environmental investigation that includes analysis of soil, groundwater and air in a search for each of the materials considered hazardous and listed as toxic substances by the United States Environmental Protection Agency.

THERE WAS THE POTENTIAL FOR CONTAMINATION BY PETROLEUM HYDROCARBONS

A well planned environmental investigation seeks to establish if residual contamination has occurred by polluting the site through potential ecological hazards. For the case of the site in question, materials with a reasonable potential for contaminating the site were motor fuels, engine lubricants and heating oil. Motor fuels and heating oil were stored at the site in underground tanks. Gasoline was contained in 5 four thousand gallon, single wall, steel, storage vessels, installed in a concrete vault in the open paved area of the property. These tanks fed a gasoline pump island that was used to fuel vehicles used by previous occupants, Emery Freight and Purolator Courier.

Engine lubricants were stored in the building in a floor mounted storage tank and in small containers. Number 2 fuel oil was stored in an underground tank installed adjacent to the north-east corner of the building.

The tanks were tested using the petrotite method in November of 1989. Data from these tests, submitted by the current owner of the building indicated that the tanks did not leak.

SOIL VAPOR TESTS AND LABORATORY ANALYSES OF SOILS WERE CONDUCTED

During an inspection of the property, MTS conducted soil vapor analysis to determine if there was any residual contamination of the soil by light hydrocarbons or volatile organics that may have resulted from spilling of these materials. Further, samples of soil were taken from areas surrounding the underground tanks and gasoline pumps and tested for heavy metals. These tests were conducted in order to determine if leaded fuels had been spilled

into the soil in the past or if industrial wastes were dumped on the site or brought in as landfill prior to development and improving the site with the building and other facilities.

Soil vapor tests were likewise conducted adjacent to and over the fuel oil storage tank. These tests were done to determine if any light hydrocarbons had been introduced to the soil by leaking of the fuel oil tank. Soil vapor tests were conducted using a field chromatograph in conjunction with a photoionization device.

Approach to Study

The approach to this study was to verify conclusively that contamination by materials considered to be toxic or hazardous had not occurred. The investigation focused on the contaminants that could generally be classified as flammable explosives, gasoline, petroleum products, polychlorinated biphenyls, including materials defined as hazardous by the Federal Government and the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA): The Hazardous Materials Transportation Act: The Resource Conservation and Recovery Act (RECRA), and statutes adopted as a result of these environmental regulations. In addition, the survey focused on the presence of any extraordinary contaminants, such as asbestos and municipal wastes or other debris and trash.

For the purposes of this environmental audit, it was decided that proof of the absence of any of these materials at the time of the survey, superceded any information suggesting that historical uses of the property had the potential for causing contamination.

Methodology

Determination of the presence of solid contaminants such as asbestos, solid wastes and debris, were determined by visual inspection.

The balance of the contaminants upon which the investigation was focused, were, in actuality, a variety of families of organic chemicals. These organic chemicals fell under the general classification of halogenated and non-halogenated organics, petroleum fractions, hydrocarbons, aliphat below the surface of the soil, or intermingled with the groundwater. The presence of volatile liquid organic material creates vapors containing the organic material. These vapors, being lighter than air, rise from the surface of the liquid through the soil above. The presence of these vapors in the soil is verification of the existence of the liquid below the surface of the soil.

SURVEY & OBSERVATIONS

The property was free of any overt signs of contamination. There were no stains or markings on the surface of the asphalt paving that could have been considered symptoms of spilling of organic chemicals or hydrocarbons. Inspections of low points on the property, where rainwater and runoff had accumulated, showed that there was no silt, sediment or other indications of pollutants in runoff.

PID READINGS WERE NEGATIVE

Soil Vapor Analysis readings were made by boring 5 feet below the surface of the property and pumping the soil vapors through the PID. When performed in and around the tank vault, the PID readings were negative indicating there was no gasoline, light hydrocarbons or volatile organics present in the soil. When performed around the pump island directly adjacent to the underground tanks, some elevated readings were obtained. These readings were low however, less than 30 parts per million higher than ambient air. These slightly elevated readings could be attributed to minor spills of gasoline at the pumping station. The spill could have penetrated through the concrete apron.

Similar soil vapor testing performed adjacent to and directly over the fuel oil storage tank indicated that there were no leaks of #2 oil from the tank into the soil.

A probing inspection was made of the interior of the building. There was a 275 gallon tank mounted to the floor of the garage area inside the building. This tank was used to store engine lubricating oil. Leaks and spills of this material were observed. **The concrete floor was sufficient to contain the material however, and prevented it from penetrating into the soil and groundwater beneath the building.**

ASBESTOS FOUND IN CEILING TILES

An inspection was made of the space in the building on the ground floor and the second floor that was developed as office space. There was a dropped ceiling formed by acoustic tiles throughout most of the office, locker room and restroom areas. A sample of the ceiling tile was taken and analysis in the laboratory using polarized light microscopy indicated that the tiles contained Chrysotile Asbestos. **The material was in good condition and not friable.**

An inspection of the space above the dropped ceiling revealed that there was no pipe insulation, HVAC duct insulation, fireproofing or any other materials that could have been suspected of containing asbestos.

ASBESTOS FOUND ON PIPE INSULATION IN BOILER ROOM

An inspection of the boiler room which was located on the north side of the building revealed that there was thermal insulation on the piping that contained asbestos. The boiler room was constantly kept under lock and key and inaccessible to any visitors, tenants or employees except for maintenance workers. The material was in poor condition and was friable.

CONCLUSIONS AND RECOMMENDATIONS

The property did not appear to have suffered any consequential contamination of the soil and groundwater as a result of previous activities at the site. All tests indicated that there was no trace of entire classifications of chemicals in the soil such as volatile organics, light hydrocarbons and other groups of volatile organic containing two or more carbon atoms.

The optimum economic scenario for the five underground storage tanks should be developed. The capital cost for installation and testing of the tanks has already been expended. The situation can be exploited by adapting the tank for use as storage capacity for fuels, lubricants and other inventory. While the existence of the tanks represents a significant asset, to take advantage of the situation certain liabilities must be assumed. These liabilities are related to underground storage tank monitoring, maintenance and periodic testing and costs for these operating functions. In the office areas, the ACM is a liability because it exposes the owner of the building to legal responsibility for health related factors of utilities and occupants, justified or otherwise.

LABORATORY ANALYSIS

Bulk samples of materials suspected of containing asbestos were subjected to Polarized Light Microscopy analysis at the facilities of Laboratory Testing Services, Inc., an EPA and NIOSH approved laboratory located in Westbury, New York.

Samples of soil and groundwater were subjected to chemical laboratory analysis at the facilities of H2M Labs, Inc., an EPA approved and New York State certified laboratory located in Melville, New York.

GENERAL ANALYSIS

This report is based on the observations made on January 16, 1990 at the site described. The survey was made to determine if there were any overt signs of contamination present at the site, any hazard due to friable Asbestos, or if there was any indication of noncompliance with Federal or Local Environmental Regulations.

This report applies only to those portions of the building, property, rooms, public access areas and utility areas inspected. The observations reported do not apply to those areas or items not seen, not capable of being seen or otherwise difficult to inspect.

This report is not to be construed as or used a guarantee, a warranty, a prediction of future condition or an estimate of value.

Laboratory Testing Services

LAB. NO.: 90-03132

CLIENT: Management & Technology Services
256-B Orinoco Drive
Brightwaters, New York 11718
Attn: Mr. Art Gerunda

MATERIAL: Thirteen (13) Bulk Samples

SUBMITTED FOR: Asbestos Determination

1.0 BACKGROUND:

Laboratory Testing Services, Inc. received thirteen (13) bulk samples for asbestos determination from Management Technology Services, Brightwaters, New York.

2.0 PROCEDURE:

Analysis of friable samples was done in accordance with EPA "Interim Method for the Determination of Asbestos in Bulk Insulation Samples" (EPA-600/M4-82-020, Dec. 1982).

This method utilizing Polarized Light Microscopy is applicable to all bulk samples of friable insulation materials submitted for identification and quantification of asbestos components.

Analysis of non-friable materials is performed by a modified version of (EPA-600/M4-82-020). Non-friable substances are not within the scope of the EPA method. Quantification of asbestos in these samples may deviate from the accurate range normally obtained from (EPA/600/M4-82-020).

3.0 APPLICABLE QUALIFICATIONS:

Our Laboratory is accreditted under the National Voluntary Laboratory Accreditation Program (NVLAP) for bulk asbestos analysis. Our laboratory has been assigned NVLAP Laboratory Code Number 1332. This program is performed under the United States Department of Commerce, National Institute of Standards and Technology (formerly National Bureau of Standards), Gaithersburg, Maryland.

Laboratory Testing Services, Inc. is an approved laboratory in the New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP Identification # 10837).

4.0 RESULTS:

The following results were obtained from our tests.

75 URBAN AVENUE, WESTBURY, NEW YORK 11590 • (516) 334-7770 • (800) 433-0008 • FAX NO. 516-334-7720

Laboratory Testing Services

Methodology Explanation:

Laboratory Testing Services, Inc. follows guidelines of EPA-600/M4-82-020 for the analysis of bulk samples for asbestos by polarized light microscopy. This method was prepared by the EPA to set criteria for the analysis of friable substances. (Easily crumbled or reduced to a powder by hand pressure). Friable samples typically include pipe wrap and pipe joint cement. Occasionally, samples of non-friable materials are submitted for analysis for asbestos. Examples of these substances are floor tile and wall plaster. Analysis of these materials sometimes require deviations from the EPA method. Laboratory Testing Services, Inc. utilizes the following methods to analyze substances which require a deviation from EPA method 600/M4-82-020:

A) Low Temperature Ashing - The sample is placed in a furnace at low temperature (less than 350°c) to burn off vinyl matricies or large amounts of cellulose, Asbestos is a mineral and will not burn off. This method facilitates the detection of small amounts of asbestos in substances with a vinyl matrix (floor tile) or those with a large amount of cellulose (certain pipe wraps and ceiling tile).

B) Milling - Non-friable substances are placed in a mortar and pestle or "Wiley" mill and are pulverized.

C) Acid Wash - The sample was washed in warm dilute Hydrochloric Acid or Acetic Acid to remove calcium carbonate, gypsum and/or bassanite (plaster) deposits.

D) Hexametaphosphate Wash - The sample was washed in a 1% Hexametaphosphate solution to remove calcium carbonate, gypsum and/or bassanite (plaster) deposits.

When a deviation from EPA Method 600-M4-82-020 was used to analyze a sample, this is noted in column 3 of Laboratory Testing Services, Inc. results reporting forms (under "color, method"). For example, if ashing was used as part of the analytical process, this is signified as "2-A" in the method column. If milling was used as part of the Analytical process, this is signified as "2-B" in the method column.

Certificate of Capital Improvement

To be completed by customer and given to, signed by and retained by contractor making capital improvement to the real property.

The contractor must collect the sales tax on the full amount charged under the contract unless the customer gives him a properly completed Certificate of Capital Improvement. When a properly completed Certificate of Capital Improvement has been furnished to the contractor, the burden of proving the job or transaction is not taxable rests solely upon the customer.

This certificate must be issued to a contractor by his customer as evidence that the work to be performed will result in a capital improvement to real property. THIS CERTIFICATE MAY NOT BE USED TO PURCHASE BUILDING MATERIALS OR OTHER TANGIBLE PERSONAL PROPERTY TAX FREE. Acceptance of this certificate by a contractor does not relieve the contractor of his liability for the payment of sales tax on his purchase of building materials or other tangible personal property incorporated into the real property as a capital improvement.

ATC Project No. 15.14853.0194

Dear Mr. Viswanathan:

Attached is the Level 2 Environmental Site Assessment Report for the above referenced Site. The report includes the following sections: Executive Summary, Introduction, Summary of Previous Environmental Site Assessments, Scope Investigation, Results of Soil Sampling / Analysis, Results of Groundwater Sampling / Analysis, Conclusions, References, and Limitations. This report also includes a Site Plan and Laboratory Analysis Results as appendices.

If you have any questions regarding this report, please do not hesitate to call our office.

Sincerely,

ATC ASSOCIATES INC.

Levent Eskicakit, P.G.
Senior Project Manager

David H. Spader

1.0 EXECUTIVE SUMMARY

FleetBoston Financial (Fleet) authorized ATC Associates Inc. (ATC) to perform a Level 2 Environmental Site Assessment (Level 2 ESA) of the property located at 27-10 Hunters Point Avenue, Long Island City, New York (the "Site"). The Site is bound to the north by Hunters Point Avenue, to the west by 27th Street, to the south industrial/commercial properties, and to the east by Dutch Kills Creek. Black Bear Company, Inc. and Carey Limousine NY, Inc. currently occupy the Site.

A previous Level 1 Environmental Site Assessment (Level 1 ESA) report, prepared by Freudenthal & Elkowitz Consulting Group, Inc. (FECG), on behalf of Fleet, dated December 11, 2002, identified the following recognized environmental conditions warranting additional investigation at the Site:

- The former presence of five (5) 4,000-gallon gasoline underground storage tanks (USTs) and associated piping, for which no documentation related to their removal was available.
- Interior oil/water separator, floor drains and catch basins.
- The active 7,500-gallon UST.
- An exterior truck scale, oil/water separator and concrete pad.
- The possible presence of additional USTs throughout the Site.
- Historic fill materials.

Based on these concerns, a Level 2 ESA was conducted by ATC, on March 11-12, 2003 to evaluate soil and/or groundwater quality beneath the Site. As part of the Level 2 ESA, ATC conducted a geophysical survey and a soil/groundwater investigation.

The geophysical survey did not identify the presence of any additional USTs other than one (1) in service 7,500-gallon fuel oil UST and one (1) in service 550-gallon waste oil UST. Due to the poor quality of the Site fill material, ATC was unable to evaluate the presence of any underground piping associated with the former USTs.

According to the Site personnel, and documents provided to ATC at the time of the Site investigation, the five (5) 4,000-gallon USTs were removed from the Site by Tone Tank and Pump, Inc. in 1990. The documents indicated that these USTs were successfully tightness tested prior to removal.

During the course of the geophysical study ATC determined that an oil/water separator was located outside the Site building. An additional oil/water separator was also located next to the boiler room within the Site building.

ATC advanced a total of sixteen (16) borings throughout the Site and collected a total of sixteen (16) soil samples and six (6) groundwater samples for laboratory analysis during the Level 2 ESA.

The Site soils consist of approximately nine (9) feet of fill material containing brick, concrete, fly ash, slag, fine silty sands, clay and fine gravels. Native material, consisting of fine to medium sands with some silt, was observed at depths greater than nine (9) feet bgs.

Field screening of soil samples with a photoionization detector (PID), indicated that the Site soils exhibited no field evidence of petroleum contamination.

Laboratory results indicated that no petroleum-related volatile organic compounds (VOCs) were detected above the New York State Department of Environmental Conservation Technical and Administrative Guidance Memorandum # 4046 (NYSDEC TAGM Memo) – Soil Cleanup Objectives, in any of the soil samples collected from the Site. Total VOCs ranged from non-detect to 110 parts per billion (ppb).

Semivolatile organic compounds (SVOCs) were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives in six (6) of the sixteen (16) soil samples collected for laboratory analysis. Total SVOCs ranged from non-detect to 104,140 ppb.

Soil samples B-8 and B-14 collected from the vicinity of the interior floor drain and exterior oil/water separator, respectively, contained 1,780 parts per million (ppm) and 557 ppm of lead respectively. These concentrations are above the NYSDEC TAGM Eastern USA Background Levels of 500 ppm for this substance.

No polychlorinated biphenyls (PCBs) were detected above the laboratory methods detection limits (LMDL) in the soil samples collected adjacent to the oil/water separators.

The laboratory results for groundwater sample, GW-1 collected from soil boring (B-2) within the vicinity of the former gasoline USTs area, indicated that Benzene was detected slightly above the NYSDEC Division of Water Technical and Operational Guidance Series (1.1.1) *Ambient Water Quality Standards and Guidance Values* (NYSDEC TOGS Standards and Guidance Values). Benzene was detected at 5.6 ppb, slightly above the NYSDEC TOGS Standards and Guidance Value of 1 ppb for this compound. None of the remaining groundwater samples collected from the Site (GW-2, GW-3, GW-4, GW-5 and GW-6) contained VOCs or SVOCs above the LMDL.

2.0 INTRODUCTION

This Level 2 Environmental Site Assessment (Level 2 ESA) was conducted on March 11and 12, 2003 by ATC in order to investigate potential releases of contamination as a result of historical usage of the Site. The Site is located at 27-10 Hunters Point Avenue, in Long Island City, New York. This report was prepared by Levent Eskicakit, P.G. at the request of Mr. Subbu Viswanathan of FleetBoston Financial.

- The Site is a 387,000 square foot commercial property currently utilized for vehicle maintenance and petroleum products storage by Black Bear Company, Inc. The northwest portion of the Site building is utilized by Carey Limousine NY, Inc. as an office space.

3.0 SUMMARY OF PREVIOUS ENVIRONMENTAL SITE ASSESSMENTS

According to a Level I ESA, prepared by FECG, on behalf of Fleet, dated December 11, 2002, the Site was historically utilized for industrial purposes including, a truck sales and service facility, a truck depot for a shipping company and a warehouse to drum and store petroleum and vehicle related products (i.e., motor oil, antifreeze and greases, etc.). The Level I ESA report identified USTs, oil/water separators, subsurface scales and floor drains were identified at the Site. Additionally, five (5) 4,000-gallon gasoline USTs were reportedly removed from the Site in 1990.

The following areas of concern warranting additional investigation were identified by FECG at the Site:

- AOC-1: The presence of five (5) 4,000-gallon gasoline USTs and associated piping, for which no documentation related to their removal was available.
- AOC-2: Interior oil/water separator, floor drains and catch basins.
- AOC-3: An active 7,500-gallon UST.
- AOC-4: An exterior truck scale, oil/water separator and concrete pad.
- AOC-5: The possible presence of additional USTs at the Site.
- AOC-6: Historical fill material.

4.0 SCOPE OF INVESTIGATION

The scope of work for this Level 2 ESA focused on the above areas of concern that were identified by the prior Level 1 ESA. A geophysical survey was conducted to investigate the presence of any additional potential USTs and underground piping. Following the geophysical survey, ATC conducted soil and groundwater sampling using hydraulic direct push methods.

4.1 Scope of Work

ATC conducted the following scope of work for the Level 2 ESA:

Task 1 – Preliminary Work

- Contacting "One-Call" subsurface utility mark-out service;
- Preparation of a site-specific health and safety plan (HASP) for the Level II ESA work at the Site;

Task 2 – Geophysical Investigation

An Electromagnetic (EM) Survey followed by a Ground Penetrating Radar (GPR) Survey were conducted to locate any potential USTs, and piping runs in the areas characterized by former and present petroleum storage. A Geonics EM-61 time domain metal-detector and a GSSI SIR 3 GPR in conjunction with a 300-megahertz antenna were used. The EM-61 induces an electromagnetic field and measures the response to both ferrous and non-ferrous metallic objects using a two-coil receiver system. A grid of north-south traverses was established across the Site at five-foot intervals. GPR was used to further characterize the source of any magnetic anomalies that were detected.

Task 3 – Subsurface Soil and Groundwater Evaluation

A total of sixteen (16) soil borings were advanced at Site using Geoprobe techniques. One (1) soil sample was collected from each of the sixteen (16) soil borings and submitted to a New York State ELAP certified laboratory. The soil samples were collected from each boring from the soil horizon showing the highest apparent contamination. If no field evidence of soil contamination was detected, then a sample from six inches above the water table was retained for laboratory analysis. All soil samples were analyzed for VOCs and SVOCs in accordance with EPA Methods 8260 and 8270, respectively. In addition, the soil samples collected adjacent to the oil/water separators were analyzed for PCBs and RCRA metals in accordance with EPA Methods 8082 and 6000/7000 series, respectively.

ATC also collected six (6) groundwater samples from the Site. The grab samples were collected using "hydropunch" type water sampling units. The groundwater samples were

analyzed for VOCs, and SVOCs, in accordance with EPA Method 8260 and 8270, respectively.

4.2 Geophysical Survey

The results of the geophysical survey did not identify the presence of any additional USTs at the Site. Due to poor quality of the Site fill material, ATC was unable evaluate the presence of any underground piping associated with the former USTs. Figure 2 portrays the areas investigated during the geophysical survey.

4.3 Soil Sampling and Field Observations

Vertical soil samples were obtained via Geoprobe® technology utilizing a Macro Core (MC) open sampler to collect discrete soil cores. Disposable acetate sampling sleeves were inserted into the Geoprobe® equipment in order to obtain soil samples from selected depths. These samplers utilize open tube design and are capable of retrieving a 1.5" diameter by 44" long soil sample.

ATC advanced a total of sixteen (16) soil borings throughout the Site. The Site soils consisted of approximately nine (9) feet of fill material containing brick, concrete, fly ash, slag, fine silty sands, clay and fine gravels. Native material, consisting of fine to medium sands with some silt, was observed at depths greater than 9 feet bgs. Groundwater was observed at depths of 9 to 13 feet bgs.

Soil cores were continuously collected for field screening at all boring locations. Each soil core collected was screened with a pre-calibrated PID. Upon calibration, the PID registered a background reading of zero to 0.1 ppm. The soil was screened a minimum of one reading per foot during the soil logging process and the readings recorded on the corresponding boring log (see Appendix 1). PID readings ranged from non-detect to 1 part per million (ppm).

ATC collected one soil sample from each of sixteen (16) soil borings for laboratory analysis. Soil samples were collected from the interval characterized by the greatest field evidence of contamination. If no field evidence of contamination was detected then soil samples were collected six (6) inches above the groundwater table at the Site.

Selected soil samples were placed in proper, laboratory-supplied glassware, labeled, and then placed in a cooler with ice, and later submitted to Scilab Boston, Inc., a New York-certified laboratory (Certification No. 5974). The soil analyses included: analysis of VOCs and SVOCs, with additional analysis for PCBs and RCRA Metals performed on two (2) of the soil samples. The analytical parameters were selected based on the review of previous reports, and on the types of contaminants suspected to be present based on Site history.

4.4 Groundwater Sampling and Field Observations

ATC collected a total of six (6) groundwater samples utilizing a Geoprobe® groundwater sampling unit. A dedicated flexible polyethylene tube was inserted through the hollow push rods to groundwater at borings B-2 (GW-1), B-3 (GW-2), B-5 (GW-3), B-6 (GW-4), B-11 (GW-5) and B-15 (GW-6). These borings were selected for groundwater samples due to the presence of possible sources of groundwater contamination and to assess off-site migration of contaminants onto the Site. Water was pumped to appropriate sample containers using a peristaltic pump. All sampling equipment which contacted soil or groundwater was decontaminated between soil borings using an alconox wash, water rinse, second alconox wash and water rinse. Depth to groundwater at the Site was found to be approximately nine (9) feet to thirteen feet bgs.

The collected groundwater samples were submitted to Scilab Boston, Inc. for analysis under EPA Method 8260 (VOCs) and EPA Method 8270 (SVOCs).

5.0 GROUNDWATER FLOW DIRECTION

Based upon Site topography and drainage patterns, groundwater is expected to flow to the west towards Dutch Kills Creek.

6.0 RESULTS OF SOIL SAMPLING / ANALYSIS

The results of the soil laboratory analyses are summarized in Table 1. The complete laboratory report is provided in Appendix 3.

As indicated in Table 1, no VOCs were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives. Total VOCs ranged from non-detect to 110 ppb in the samples collected from all soil borings.

SVOCs were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives in six (6) of the sixteen (16) soil samples. Specifically, soil samples from borings B-4, B-5, B-8, B-9, B-12 and B-13 contained elevated SVOCs above their respective Cleanup Objectives. Total SVOCs ranged from non-detect to 104,140 ppb. These samples were collected from historical fill horizons at the Site.

No PCBs above laboratory method detection limits were detected in the soil samples collected from soil borings B-9 and B-13.

Soil samples B-8 and B-14 collected from the vicinity of the interior floor drain and exterior oil/water separator, contained 1,780 ppm and 557 ppm of lead respectively, which is slightly above the NYSDEC TAGM Eastern USA Background levels of 500 ppm for this substance. No other RCRA metals were detected above the NYSDEC TAGM Eastern Background levels in the remaining soil samples at the Site. These samples were collected from the historical fill horizons at the Site.

7.0 RESULTS OF GROUNDWATER SAMPLING / ANALYSIS

The results of the groundwater laboratory analyses are summarized in Table 2. The laboratory report is presented in Appendix 3.

Analysis of the groundwater sample GW-1 collected from soil boring B-2 within the vicinity of the former gasoline USTs identified Benzene slightly above the NYSDEC TOGS Standards and Guidance Values. Total VOCs range from non-detect to 5.6 ppb in all groundwater samples analyzed.

No other VOCs or SVOCs were detected above the LMDL in the remaining groundwater samples collected from the Site.

8.0 CONCLUSIONS

Based upon the results of the Level 2 ESA, ATC concludes the following:

The Site soils consisted of approximately nine (9) feet of urban fill material containing brick, concrete, fly ash, slag, fine silty sands, little clay and fine gravels. Native material, consisting of fine to medium sands with some silt, was observed at depths greater than 9 feet bgs. Groundwater was observed at depths of 9 to 13 feet bgs.

Laboratory results indicated that no VOCs were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives in any of the soil samples collected for laboratory analysis from the Site. However, SVOCs were detected above NYSDEC TAGM Memo Soil Cleanup Objectives in six (6) of the sixteen (16) soil samples collected from the Site. The elevated concentrations are typical of urban fill materials and are attributed to fill components such as ash and asphalt. ATC concludes that the results do indicte evidence of a release of petroleum product.

The laboratory results indicated that groundwater samples GW-2, GW-3, GW-4, GW-5 and GW-6 from borings B-3, B-5, B-6, B-11 and B-15, respectively, contained no VOCs or SVOCs above the laboratory methods detection levels. However, the laboratory results indicated that groundwater sample (GW-1) collected from soil boring (B-2) within the vicinity of the former gasoline USTs contained concentration of Benzene at 5.6 ppb, slightly above the NYSDEC TOGS standards and guidance value of 1 ppb for this compound. Although the Benzene maybe attributed to the former gasoline USTs, the level is relatively minor and limited in extent. Additionally, no benzene was detected in soil samples from this location. Based on these results, ATC concludes that the detected Benzene does not represent an environmental concern for the Site.

10.0 LIMITATIONS

Limitations of this Level 2 Environmental Site Assessment

ATC has prepared this Level 2 Environmental Site Assessment in accordance with the contract scope of work, using reasonable efforts to attempt to identify areas of potential liability associated with soil and groundwater contamination at the Site. Any survey for the soil or groundwater contamination in the Site was limited in nature. The survey may not be relied upon as a comprehensive investigation for the presence of such contamination in all areas of the Site, or as meeting any standards established for conducting such surveys. ATC has made no independent investigation of the accuracy of these secondary sources and has assumed them to be accurate and complete. ATC does not warrant the accuracy or completeness of information provided by secondary sources. ATC does not warrant that contamination that may exist on the Site has been discovered, that the Site is suitable for any particular purpose or that the Site is clean or free of liability. Any cost estimates are based on general comparisons with past projects of similar scope and size, and actual costs or design-phase estimates may vary substantially from these estimates.

Re: **Oil Tank Registration Renewal**
PBS # 2-452335

PLEASE FORWARD THIS LETTER TO OWNER OR MANAGING AGENT

Dear Property Owner / Manager:

You have been identified as the owner/managing agent of those facilities included in this renewal package. Enclosed with this letter are computer records of bulk oil storage facilities that show the registration status with New York State Department of Environmental Conservation (NYS DEC) expired on 08/23/1993. Failure to renew the registration with NYS DEC is a violation of the Environmental Conservation Law (ECL), Section 17-1009(2). Under ECL, Section 71-1929, the maximum allowable monetary penalty is $25,000 per day per violation.

It is imperative that you take immediate action to alleviate this serious violation. You have **ten (10)** business days from the date of this letter to respond to this notice. Failure to respond will trigger a field inspection and referral to the legal division for formal enforcement action.

To facilitate filling out of the applications for renewal, we have included computer printouts of the facilities information from existing registration records. You should copy as much information from the computer printouts onto the applications as appropriate. The registration fee schedule is included in the instruction sheet. Completed applications and fee checks should be sent to the following address.

NYS Dept. of Environmental Conservation
47-40 21st Street, 2nd Floor
Long Island City, NY 11101
Attn: PBS Unit
(718) 482-4933 Ext. 7149

Sincerely,

PBS Unit

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION

INSTRUCTIONS FOR COMPLETING PETROLEUM BULK STORAGE APPLICATION

Please type or print all items, except "signature" in Section A. This form must be completed for each applicable petroleum facility. Forward completed applications to the appropriate DEC Regional Office. Use one form if there are 15 or less regulated tanks at a facility. For more than 15 regulated tanks at a facility, use additional forms as required. A site plan including tank numbers should be enclosed. **Instructions for Section B are on the reverse side.**

SECTION A

Item Name	Specific Instructions
PBS NUMBER	Enter the seven digit DEC Registration Number if the facility was previously registered; otherwise, leave blank.
OTHER EXISTING DEC NUMBERS	**CBS Number:** Enter the Chemical Bulk Storage Number if the facility has been registered under the Hazardous Substance Bulk Storage Law, Article 40 of ECL; 6 NYCRR Parts 595-599. If not applicable, write "Not Applicable". **SPDES Number:** Enter the number which has been assigned to a facility under the State Pollutant Discharge Elimination System, Article 17, Title 8 of ECL, 6 NYCRR Parts 750-758. If not applicable, write "Not Applicable".
TRANSACTION TYPE	
Initial/New Facility:	First application for registration by the owner of a regulated facility. PBS Number will be assigned by DEC.
Change of Ownership:	Application for registration by the new owner of the facility being transferred. Be sure to enter the PBS Number from the existing registration certificate and complete all sections.
Substantial Tank Modification:	Complete this section if one of the following applies: (1) one or more new stationary tanks has been added to the facility; or (2) an existing stationary tank has been replaced, reconditioned or permanently closed. In Section A, only complete the Facility Section and PBS Number. Be sure to provide the signature of a duly authorized officer. In Section B, fill in the entire line of information for each tank being amended.
Information Correction:	If any information changes have occurred since the initial application or the last renewal, include the corrected information in the appropriate spaces and be sure to include the PBS Number. In Section A, the signature of a duly authorized officer must be provided.
Renewal:	Application is being made for a previously registered facility that has not changed ownership since the last registration. Registration certificates for petroleum bulk storage facilities must be renewed every five years and are not transferable. Indicate any changes that may have occurred since last renewal and provide the signature of the duly authorized officer.
GEOGRAPHICAL LOCATOR	Indicate the actual latitude and longitude for the facility. This includes the degrees, minutes and seconds of the location. If known, please provide.
FACILITY INFORMATION	Enter the name and location (NO PO Boxes, please) of the facility. Include any information that would asist in locating the facility. For county, enter the county in which the facility is located. For township, enter the geographical location, not the mailing city. Enter the facility telephone number and the name of the operator at the facility who is familiar with the tanks and the efforts of the business to comply with provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
OWNER INFORMATION	Name, address and telephone number of the company which owns the facility. Federal Tax Identification Number is the number assigned by the Internal Revenue Service. It is required by New York State Department of Tax and Finance. For owner type, check the appropriate box. Note: apartment buildings are considered corporate/commercial.
MAILING CORRESPONDENCE	Enter the desired mailing name and address for correspondence (i.e. Certificates, Tank Bulletin) and the name of the contact person who is familiar with the efforts of the business to comply with the provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
TYPE OF PETROLEUM FACILITY	Check the appropriate box(es). If other, specify the type of facility in the space provided.
NAME AND OFFICIAL TITLE OF OWNER OR OWNER'S AUTHORIZED REPRESENTATIVE	Please type or print both name and title. An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility. In the case of a partnership or sole proprietorship, the application must be signed by a general partner or the proprietor, respectively. In the case of a municipality, state or other public facility, the application must be signed by either a principal or executive officer, ranking elected official or other duly authorized employee.
AMOUNT ENCLOSED	For Transaction Types 1, 2 and 5, please indicate the enclosed fee. Make check/money order payable to NYSDEC. The fee is based on combined petroleum tank storage capacity at the facility in gallons: 1,101-2,000 gallons—$50/facility, 2,001-4,999 gallons—$150/facility, 5,000-399,999 gallons—$250/facility.
SIGNATURE AND DATE	Signature of the owner or duly authorized officer is required, along with the date the application was prepared.

Thomas C. Jorling
Commissioner

Dear Petroleum Storage Tank Owner:

The 5-year registration for your petroleum storage tank(s) will expire soon. The expiration date of your registration certificate is printed on the top right-hand corner of Section B of the enclosed renewal application. The enclosed Petroleum Bulk Storage (PBS) renewal package includes the following documents:

(1) A PBS renewal application form with portions of Sections A and B pre-printed;

(2) An instruction sheet with detailed explanations for completing the PBS renewal application form; and

(3) A list of special instructions on completing your renewal application form (on the back of this letter).

Owners are required to use the enclosed pre-printed revised PBS application form for renewal. Several items have been added to the application form to supplement the information collected originally at registration.

Please review, revise (if necessary), and complete the renewal application form according to the enclosed instruction sheet. Be sure to fill in all blank portions of the form. Return the completed and signed form and fee to the appropriate DEC regional office, whose address is printed on the top right-hand corner of Section A of the renewal form, before the facility's current registration expires.

Upon receipt and review of the package, the Department will process the completed renewal forms and print a new 5-year certificate. The certificate and all future correspondence will be mailed to the address provided in the "Mail Correspondence" section of the renewal form.

If you have any questions or need additional forms or regulations, please call the appropriate DEC Regional Office or the Bulk Storage Help-line at 1-800-242-4351.

Sincerely,

Thomas E. Quinn, Director
Bureau of Spill Prevention & Response

INSTRUCTIONS FOR COMPLETING PETROLEUM BULK STORAGE APPLICATION

Please type or print all items, except "signature" in Section A. This form must be completed for each applicable petroleum facility. Forward completed applications to the appropriate DEC Regional Office. Use one form if there are 15 or less regulated tanks at a facility. For more than 15 regulated tanks at a facility, use additional forms as required. A site plan including tank numbers should be enclosed. **Instructions for Section B are on the reverse side.**

SECTION A

Item Name	Specific Instructions
PBS NUMBER	Enter the seven digit DEC Registration Number if the facility was previously registered; otherwise, leave blank.
OTHER EXISTING DEC NUMBERS	**CBS Number:** Enter the Chemical Bulk Storage Number if the facility has been registered under the Hazardous Substance Bulk Storage Law, Article 40 of ECL; 6 NYCRR Parts 595-599. If not applicable, write "Not Applicable". **SPDES Number:** Enter the number which has been assigned to a facility under the State Pollutant Discharge Elimination System, Article 17, Title 8 of ECL, 6 NYCRR Parts 750-758. If not applicable, write "Not Applicable".
TRANSACTION TYPE	
Initial/New Facility:	First application for registration by the owner of a regulated facility. PBS Number will be assigned by DEC.
Change of Ownership:	Application for registration by the new owner of the facility being transferred. Be sure to enter the PBS Number from the existing registration certificate and complete all sections.
Substantial Tank Modification:	Complete this section if one of the following applies: (1) one or more new stationary tanks has been added to the facility; or (2) an existing stationary tank has been replaced, reconditioned or permanently closed. In Section A, only complete the Facility Section and PBS Number. Be sure to provide the signature of a duly authorized officer. In Section B, fill in the entire line of information for each tank being amended.
Information Correction:	If any information changes have occurred since the initial application or the last renewal, include the corrected information in the appropriate spaces and be sure to include the PBS Number. In Section A, the signature of a duly authorized officer must be provided.
Renewal:	Application is being made for a previously registered facility that has not changed ownership since the last registration. Registration certificates for petroleum bulk storage facilities must be renewed every five years and are not transferable. Indicate any changes that may have occurred since last renewal and provide the signature of the duly authorized officer.
GEOGRAPHICAL LOCATOR	Indicate the actual latitude and longitude for the facility. This includes the degrees, minutes and seconds of the location. If known, please provide.
FACILITY INFORMATION	Enter the name and location (**NO PO Boxes, please**) of the facility. Include any information that would asist in locating the facility. For county, enter the county in which the facility is located. For township, enter the geographical location, not the mailing city. Enter the facility telephone number and the name of the operator at the facility who is familiar with the tanks and the efforts of the business to comply with provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
OWNER INFORMATION	Name, address and telephone number of the company which owns the facility. Federal Tax Identification Number is the number assigned by the Internal Revenue Service. It is required by New York State Department of Tax and Finance. For owner type, check the appropriate box. Note: apartment buildings are considered corporate/commercial.
MAILING CORRESPONDENCE	Enter the desired mailing name and address for correspondence (i.e. Certificates, Tank Bulletin) and the name of the contact person who is familiar with the efforts of the business to comply with the provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
TYPE OF PETROLEUM FACILITY	Check the appropriate box(es). If other, specify the type of facility in the space provided.
NAME AND OFFICIAL TITLE OF OWNER OR OWNER'S AUTHORIZED REPRESENTATIVE	Please type or print both name and title. An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility. In the case of a partnership or sole proprietorship, the application must be signed by a general partner or the proprietor, respectively. In the case of a municipality, state or other public facility, the application must be signed by either a principal or executive officer, ranking elected official or other duly authorized employee.
AMOUNT ENCLOSED	For Transaction Types 1, 2 and 5, please indicate the enclosed fee. Make check/money order payable to NYSDEC. The fee is based on combined petroleum tank storage capacity at the facility in gallons: 1,101-2,000 gallons—$50/facility, 2,001-4,999 gallons—$150/facility, 5,000-399,999 gallons—$250/facility.
SIGNATURE AND DATE	Signature of the owner or duly authorized officer is required, along with the date the application was prepared.

RE: 27-10 Hunter Point Avenue, Long Island City NY

I hereby certify that I am an Oil-Burning Equipment Installer with License #2689A and Install Test Repair Buried Tanks License# 61830378.

I further certify that the fuel oil storage system at the above premises has been legally abandoned and the piping capped or sealed on 10/5/05.

1. All contents of the storage system have been removed by A.B.C. TANK REPAIR & LINING INC and the system rendered free of flammable or combustible vapors.

2. All waste was removed from the storage system and has been disposed of in accordance with the applicable city, state and federal requirements.

3. (1) 7500 gallon buried oil tank has been legally abandoned in place by filling with a slurry mix.

4. All connecting lines have been disconnected and sealed. All fill lines have been discontinued, the fill line connection has been sealed with concrete so as to prevent use of fill line and vent line has been left open.

I further certify that the storage system has been legally abandoned in compliance with the Administrative Code of the City of New York and section 21-02 of the NYC Fire Department Rules.

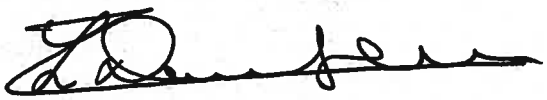
Re: Affidavit of Underground Storage Tank Abandonment
27-10 Hunters Point Avenue
Long Island City, New York

Dear Mr. Chou:



I am pleased to forward to you a copy of the tank abandonment affidavit prepared for the subject 7,500-gallon No. 2 fuel oil underground storage tank (the "subject UST") present at your facility. The original affidavit was forwarded to the New York City Fire Department (see Attachment A).

In addition, a Petroleum Bulk Storage Application form was completed to inform the New York State Department of Environmental Conservation of the permanent closure of the subject UST (see Attachment B).

This completes our abandonment services for the subject UST. Please do not hesitate to contact me with any questions or concerns. I look forward to working with you in the future.

Sincerely,

FREUDENTHAL & ELKOWITZ

REMARKS OR MATERIAL USED

ALL WASTE PRODUCT WILL BE DELIVERED TO PROPER DISPOSAL SITE NAMED ON 364 PERMIT.

§374-2.1 - Definitions

(a) Definitions. Terms that are defined in Sections 370.2 and 371.1 of this Title, as incorporated by reference in subdivision 370.1(e) of this Title, have the same meanings when used in this Subpart, unless otherwise defined in this Subpart.-

(1) **"Aboveground used oil tank"** means a tank used to store or process used oil that is not an underground used oil tank.

(2) **"Adjacent towns or cities"** means towns and cities that share a common border with each other.

(3) **"Container"** means any portable device in which a material is stored, transported, treated, disposed of, or otherwise handled.

(4) **"Contract"**means a promissory agreement between two or more persons to perform or not perform a particular act.

(5) **"Do-it-yourselfer used oil collection center"**, or **"DIY used oil collection center"**, means any site or facility that accepts/aggregates and stores used oil collected only from household do-it-yourselfers.

(6) **"Existing tank"**means a tank that is used for the storage or processing of used oil and that is in operation, or for which installation has commenced on or prior to January 14, 1995. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin installation of the tank and if either: (1) a continuous on-site installation program has begun; or 2) the owner or operator has entered into contractual obligations - which cannot be canceled or modified without substantial loss - for installation of the tank to be completed within a reasonable time.

(7) **"Household do-it-yourselfer used oil"**, or **"DIY used oil"**, means oil that is derived from households, such as used oil generated by individuals through the maintenance of their personal vehicles.

(8) **"Household do-it-yourselfer used oil generator"**, or **"DIY used oil generator"**means an individual who generates household do-it-yourselfer used oil.

(9) **"New tank"** means a tank that will be used to store or process used oil and for which installation has commenced after January 14, 1995.

(10) **"On-premises oil changing operation"** means any commercial operation that drains or collects used lubricating oil and replaces it with new or re-refined lubricating oil.

(11) **"Petroleum refining facility"** means an establishment primarily engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, and lubricants, through fractionation, straight distillation of crude oil, redistillation of unfinished petroleum derivatives, cracking or other processes (i.e., facilities classified as SIC 2911).

(12) **"Processing"** means chemical or physical operations designed to produce from used oil, or to make used oil more amenable for production of fuel oils, lubricants, or other used oil-derived product. Processing includes, but is not limited to: blending used oil with virgin petroleum products, blending used oils to meet the fuel specification, filtration, simple distillation, chemical or physical separation and re-refining.

(13) **"Re-refining distillation bottoms"** means the heavy fraction produced by vacuum distillation of filtered and dehydrated used oil. The composition of still bottoms varies with column operation and feedstock.

(14) **"Retail"** means the sale of lubricating oil to consumers in containers of five gallons or less for direct use by the consumer and not offered for resale.

(15) **"Retail establishment"** means every vendor that sells lubricating oil at retail in quantities in excess of 1,000 gallons per year.

(16) **"Service establishment"** means any automobile service station, including gas only outlets, or any other retail outlet and

boat marina, selling at least 500 gallons of lubricating oil annually and having an on-premises oil changing operation.

(17) **"Tank"** means any stationary device, designed to contain an accumulation of used oil which is constructed primarily of non-earthen materials, (e.g., wood, concrete, steel, plastic) which provides structural support.

(18) **"Total halogens"** means the total of organic and inorganic halides (fluorine, F; chlorine, Cl; bromine, Br; iodine, I), expressed as chloride present in a used oil, in parts per million (ppm) by weight.

(19) **"Underground used oil tank"** means any one or combination of tanks (including any piping connected thereto) that is used to contain an accumulation of used oil, and is entirely covered by earth or other material. This term does not include any storage tank situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

(20) **"Used oil"** means any oil that has been refined from crude oil, or any synthetic oil, that has been used, and as a result of such use, is contaminated by physical or chemical impurities.

(21) **"Used oil aggregation point"** means any site or facility that accepts, aggregates, and/or stores used oil collected only from other used oil generation sites owned or operated by the owner or operator of the aggregation point, from which used oil is transported to the aggregation point in shipments of no more than 55 gallons. Used oil aggregation points may also accept used oil from household do-it-yourselfers.

(22) **"Used oil burner"** means a facility where used oil not meeting the specification requirements in paragraph 374-2.2(b)(1) of this Subpart is burned for energy recovery in devices identified in subdivision 374-2.7(b) of this Subpart.

(23) **"Used oil collection center"** means any site or facility that is recognized by this department pursuant to paragraph 374-2.4(b)(2) of this Title, to manage used oil, and

accepts/aggregates and stores used oil collected from used oil generators regulated under section 374-2.3 of this Title, who bring used oil to the collection center in shipments of no more than 55 gallons under the provisions of subdivision 374-2.3(e) of this Title. Used oil collection centers may also accept used oil from household do-it-yourselfers.

(24) **"Used oil fuel marketer"** means any person who conducts either of the following activities:

(i) directs a shipment of off-specification used oil from their facility to a used oil burner; or

(ii) first claims that used oil that is to be burned for energy recovery meets the used oil fuel specifications set forth in paragraph 374-2.2(b)(1) of this Subpart.

(25) **"Used oil generator"** means any person, by site, whose act or process produces used oil or whose act first causes used oil to become subject to regulation.

(26) **"Used oil processor/re-refiner"** means a facility that processes or re-refines used oil.

(27) **"Used oil tank system"** means any one or combination of aboveground or underground used oil tanks, including any piping connected thereto, and other associated fixtures or equipment.

(28) **"Used oil transfer facility"** means any transportation related facility including loading docks, parking areas, storage areas, and other areas where shipments of used oil are held for more than 24 hours and not longer than 35 days during the normal course of transportation or prior to an activity performed pursuant to subparagraph 374-2.3(a)(2)(ii) of this Subpart. Transfer facilities that store used oil for more than 35 days are subject to regulation under section 374-2.6 of this Subpart. A used oil transfer facility is also subject to regulation under Subpart 360-14 of this Title, unless exempt pursuant to the terms of subdivision 360-14.1(b) of this Title.

(29) **"Used oil transporter"** means any person who transports

used oil, any person who collects used oil from more than one generator and transports the collected oil, and owners and operators of used oil transfer facilities. Used oil transporters may consolidate or aggregate loads of used oil for purposes of transportation but, with the following exception, may not process used oil. Transporters may conduct incidental processing operations that occur in the normal course of used oil transportation (e.g., settling and water separation), but that are not designed to produce (or make more amenable for production of) used oil derived products or used oil fuel.

§374-2.2 - Applicability

(a) Applicability. This subdivision identifies those materials which are subject to regulation as used oil under this Subpart and Subpart 360-14 of this Title. This subdivision also identifies some materials that are not subject to regulation as used oil under this Subpart, and indicates whether these materials may be subject to regulation as hazardous waste under Parts 370 through 374-1, 374-3, and 376 of this Title.

The storage in tanks of materials which are not subject to regulation as hazardous waste and which are identified in this section as petroleum product, used oil fuels, or as fuels or lubricants derived, re-refined, or re-processed from used oil, may be subject to the requirements and standards of Parts 612, 613, and 614 of this Title.

In addition to the requirements of this Subpart, used oil generators, collection centers, DIY collection centers, aggregation points, transporters, transfer, storage, re-refining or processing facilities, burners and marketers must meet all applicable requirements of Parts 201, 225, 364, and Subparts 360-1 and 360-14 of this Title that are broader in scope or more stringent than the requirements of this Subpart.

(1)) Used oil. The department presumes that used oil is to be recycled or burned for energy recovery unless a used oil handler disposes of used oil, or sends used oil for disposal.

Except as provided in subdivision 374-2.2(b) of this section, the regulations of this Subpart apply to used oil and to materials identified in this subdivision as being subject to regulation as used oil, whether or not the used oil or material exhibits any characteristics of hazardous waste identified in section 371.3 of this Title.

(2) Mixtures of used oil and hazardous waste.

(i) Listed hazardous waste.

('a') Mixtures of hazardous waste, listed in section 371.4 of this Title, and of used oil are subject to regulation as hazardous waste under Parts 370 through 374-1, 374-3, and 376 of this Title, rather than as used oil under this Subpart.

('b') Rebuttable presumption for used oil. Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste because it has been mixed with halogenated hazardous waste listed in section 371.4 of this Title. Persons may rebut this presumption by demonstrating that the used oil does not contain hazardous waste (for example, by using an analytical method from SW-846, as incorporated by reference in paragraph 370.1 (e)(8) of this Title, to show that the used oil does not contain significant concentrations of halogenated hazardous constituents listed in Appendix 23 of this Title).

('1') Laboratory analyses completed for purposes of rebuttable presumption must be performed by a laboratory currently certified under the appropriate approval categories by the New York State Department of Health's Environmental Laboratory Approval Program (ELAP).

('2') The rebuttable presumption does not apply to metalworking oils/fluids containing chlorinated paraffins, if they are processed, through a tolling arrangement, as described in paragraph 374-2.3(e)(3) of this Subpart, to reclaim metalworking oils/fluids. The presumption does

apply to metalworking oils/fluids if such oils/fluids are recycled in any other manner, or disposed.

('3') The rebuttable presumption does not apply to used oils contaminated with chlorofluorocarbons (CFCs) removed from refrigeration units where the CFCs are destined for reclamation. The rebuttable presumption does apply to used oils contaminated with CFCs that have been mixed with used oil from sources other than refrigeration units.

(ii) Characteristic hazardous waste. Mixtures of used oil and of hazardous waste that solely exhibits one or more of the hazardous waste characteristics identified in section 371.3 of this Title, and mixtures of used oil and of hazardous waste that is listed in section 371.4 of this Title solely because it exhibits one or more of the characteristics of hazardous waste identified in section 371.3 of this Title are subject to:

('a') except as provided in clause (2)(ii)('c') of this subdivision, regulation as hazardous waste under Parts 370 through 374-1, 374-3, and 376 of this Title rather than as used oil under this Subpart, if the resultant mixture exhibits any characteristics of hazardous waste identified in section 371.3 of this Title; or

('b') except as specified in clause (2)(ii)('c') of this subdivision, regulation as used oil under this Subpart, if the resultant mixture does not exhibit any characteristics of hazardous waste identified under section 371.3 of this Title.

('c') regulation as used oil under this Subpart, if the mixture is of used oil and a waste which is hazardous solely because it exhibits the characteristic of ignitability (e.g., ignitable-only mineral spirits), provided that the resultant mixture does not exhibit the characteristic of ignitability under subdivision 371.3(b) of this Title.

(iii) Conditionally exempt small quantity generator hazardous waste. Mixtures of used oil and conditionally exempt small

quantity generator hazardous waste regulated under paragraph 371.1(f)(10) of this Title are subject to regulation as used oil under this Subpart.

(3) Materials containing or otherwise contaminated with used oil.

(i) Except as provided in subparagraph (3)(ii) of this paragraph, materials containing or otherwise contaminated with used oil from which the used oil has been properly drained or removed to the extent possible such that no visible signs of free-flowing oil remain in or on the material:

('a') are not used oil and thus not subject to this Subpart; and

('b') if applicable are subject to the hazardous waste regulations of Parts 370 through 374-1, 374-3, and 376 of this Title.

(ii) Materials containing or otherwise contaminated with used oil that are burned for energy recovery are subject to regulation as used oil under this Subpart.

(iii) Used oil drained or removed from materials containing or otherwise contaminated with used oil is subject to regulation as used oil under this Subpart.

(4) Mixtures of used oil with products.

(i) Except as provided in subparagraph (4)(ii) of this paragraph, mixtures of used oil and fuels or other fuel products are subject to regulation as used oil under this Subpart.

(ii) Mixtures of used oil and diesel fuel mixed on-site by the generator of the used oil for use in the generator's own vehicles are not subject to this Subpart once the used oil and diesel fuel have been mixed. Prior to mixing, the used oil is subject to the requirements of section 374-2.3 of this Subpart.

(5) Materials derived from used oil.

(i) Materials that are reclaimed from used oil that are used beneficially and are not burned for energy recovery or used in a manner constituting disposal (e.g., re-refined lubricants) are:

('a') not used oil and thus are not subject to this Subpart; and

('b') not solid wastes and are thus not subject to the hazardous waste regulations of Parts 370 through 374-1, 374-3, and 376 of this Title as provided in clause 371.1(d)(3)(ii)('a') of this Title.

(ii) Materials produced from used oil that are burned for energy recovery (e.g., used oil fuels) are subject to regulation as used oil under this Subpart and Part 225 of this Title.

(iii) Except as provided in subparagraph (5)(iv) of this paragraph, materials derived from used oil that are disposed of or used in a manner constituting disposal are:

('a') not used oil and thus are not subject to this Subpart; and

('b') are solid wastes regulated under Part 360 of this Title, unless they are subject to the hazardous waste regulations of Parts 370 through 374-1, 374-3, and 376 of this Title if the materials are listed or identified as hazardous waste.

(iv) Used oil re-refining distillation bottoms that are used as feedstock to manufacture asphalt products are not subject to this Subpart.

(6) Wastewater. Wastewater, the discharge of which is subject to regulation under either Section 402 or Section 307(b) of the Federal Clean Water Act, as incorporated by reference in subdivision 370.1(e) of this Title (including wastewaters at facilities which have eliminated the discharge of wastewater), contaminated with "de minimis" quantities of used oil are not subject to the requirements of this Subpart. For purposes of this paragraph, "de minimis" quantities of used oils are defined as small spills, leaks, or drippings from pumps, machinery, pipes,

and other similar equipment during normal operations or small amounts of oil lost to the wastewater treatment system during washing or draining operations. This exception will not apply if the used oil is discarded as a result of abnormal manufacturing operations resulting in substantial leaks, spills, or other releases, or to used oil recovered from wastewaters.

(7) Used oil introduced into crude oil pipelines or a petroleum refining facility.

(i) Used oil mixed with crude oil or natural gas liquids (e.g., in a production separator or crude oil stock tank) for insertion into a crude oil pipeline is exempt from the requirements of this Subpart. The used oil is subject to the requirements of this Subpart prior to the mixing of used oil with crude oil or natural gas liquids.

(ii) Mixtures of used oil and crude oil or natural gas liquids containing less than one percent used oil that are being stored or transported to a crude oil pipeline or petroleum refining facility for insertion into the refining process at a point prior to crude distillation or catalytic cracking are exempt from the requirements of this Subpart.

(iii) Used oil that is inserted into the petroleum refining facility process before crude distillation or catalytic cracking without prior mixing with crude oil is exempt from the requirements of this Subpart provided that the used oil constitutes less than one percent of the crude oil feed to any petroleum refining facility process unit at any given time. Prior to insertion into the petroleum refining facility process, the used oil is subject to the requirements of this Subpart.

(iv) Except as provided in subparagraph (7)(v) of this paragraph, used oil that is introduced into a petroleum refining facility process after crude distillation or catalytic cracking is exempt from the requirements of this Subpart only if the used oil meets the specifications of paragraph 374-2.2 (b)(1) of this section. Prior to insertion into the petroleum refining facility process, the used oil is subject to the

requirements of this Subpart.

(v) Used oil that is incidentally captured by a hydrocarbon recovery system or wastewater treatment system as part of routine process operations at a petroleum refining facility and inserted into the petroleum refining facility process is exempt from the requirements of this Subpart. This exemption does not extend to used oil which is intentionally introduced into a hydrocarbon recovery system (e.g., by pouring collected used oil into the wastewater treatment system).

(vi) Tank bottoms from stock tanks containing exempt mixtures of used oil and crude oil or natural gas liquids are exempt from the requirements of this Subpart.

(8) Used oil on vessels. Used oil produced on vessels from normal shipboard operations is not subject to this Subpart until it is transported ashore.

(9) Used oil containing PCBs. Used oil containing 50 ppm by weight, or greater, of polychlorinated biphenyls (PCBs) is a hazardous waste as defined in subdivision 371.4(e) of this Title. In addition to the requirements of this Subpart, used oil containing any quantifiable level of PCBs may be subject to the requirements found in 40 CFR 761.20(e), as incorporated by reference in subdivision 370.1(e) of this Title.

(b) Used oil specifications.

(1) Used oil burned for energy recovery, and any fuel produced from used oil by processing, blending, or other treatment, is subject to regulation under this Subpart unless it is shown not to exceed any of the allowable levels of the constituents and properties in the specification shown in Table 1. Once used oil that is to be burned for energy recovery has been shown not to exceed any specification and the person making that showing complies with subdivisions 374-2.8(c) and (d), and paragraph 374-2.8(e)(2) of this Subpart, the used oil is no longer subject to this Subpart.

(i) Laboratory analyses completed for purposes of

specification determination must be performed by a laboratory currently certified under the appropriate approval categories by the New York State Department of Health's Environmental Laboratory Approval Program (ELAP).

Table 1 - Used Oil Not Exceeding Any Specification Level Is Not Subject to This Subpart When Burned for Energy Recovery[1]	
Constituent/property	Allowable level
Arsenic	5 ppm maximum.
Cadmium	2 ppm maximum.
Chromium	10 ppm maximum.
Lead	100 ppm maximum.
PCBs	2 ppm maximum[2]
Flash point	100 degrees F minimum.
Total halogens	4,000 ppm maximum.[3]

FOOTNOTE: [1]The specification does not apply to mixtures of used oil and hazardous waste that continue to be regulated as hazardous waste (see paragraph 374-2.2(a)(2) of this section).

FOOTNOTE: [2]Used oil containing 50 ppm by weight, or greater, of PCBs is a hazardous waste, excluding oil derived from small capacitors, as defined in subparagraph 371.4(e)(3)(ii) of this Title, as the sole PCB contamination source. Applicable standards for the burning of used oil containing PCBs are imposed by Parts 370 through 374-1 and 376 of this Title and 40 CFR 761.20(e), as incorporated by reference in subdivision 370.1(e) of this Title.

FOOTNOTE: [3]Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste under the rebuttable presumption provided under subparagraph 374-2.2(a)(2)(i) of this section. Such used oil is subject to section 374-1.8 of Subpart 374-1 of this Title rather than this Subpart when burned for energy recovery, unless the presumption of mixing can be successfully rebutted.

(2) All used oil, whether in transit or in storage at a facility, must be considered off-specification used oil, unless analysis or

other information documents that the used oil is on-specification.

(c) Prohibitions.

(1) Surface impoundment prohibition. Used oil must not be managed in surface impoundments, waste piles, pits, ponds or lagoons.

(2) Use as a dust suppressant. The use of used oil as a dust suppressant, for land application, or for disposal directly on the land, is prohibited.

(3) Burning in particular units. Off-specification used oil fuel may be burned for energy recovery in only the following devices:

(i) industrial furnaces identified in subdivision 370.2(b) of this Title;

(ii) boilers, as defined in subdivision 370.2(b) of this Title, that are identified as follows:

('a') industrial boilers located on the site of a facility engaged in a manufacturing process where substances are transformed into new products, including the component parts of products, by mechanical or chemical processes;

('b') utility boilers used to produce electric power, steam, heated or cooled air, or other gases or fluids for sale; or

('c') used oil-fired space heaters provided that the burner meets the provisions of subdivision 374-2.3(d) of this Subpart.

(iii) hazardous waste incinerators subject to regulation under sections 373-2.15 and 373-3.15 of this Title.

(4) Absorbents. Used oil which is recyclable or reusable must not be disposed of through the use of absorbent materials, other than for purposes of spill cleanup.

§374-2.3 - Standards for Used Oil Generators

(a) Applicability.

(1) General. Except as provided in subparagraphs (i) through (iv) of this paragraph, this section applies to all used oil generators. A used oil generator is any person, by site, whose act or process produces used oil or whose act first causes used oil to become subject to regulation.

(i) Household "do-it-yourselfer" used oil generators. Household "do-it-yourselfer" used oil generators are not subject to regulation under this Subpart.

(ii) Vessels. Vessels at sea or at port are not subject to this section. For purposes of this section, used oil produced on vessels from normal shipboard operations is considered to be generated at the time it is transported ashore. The owner or operator of the vessel and the person(s) removing or accepting used oil from the vessel are co-generators of the used oil and are both responsible for managing the waste in compliance with this section once the used oil is transported ashore. While among themselves, the co-generators may decide among them which party will fulfill the requirements of this section. In the event of a violation of this section, the co-generators' obligation to comply with the requirements of this section are joint and several.

(iii) Diesel fuel. Mixtures of used oil and diesel fuel mixed on site by the generator of the used oil for use in the generator's own vehicles are not subject to this Subpart once the used oil and diesel fuel have been mixed. Prior to mixing, the used oil fuel is subject to the requirements of this section.

(iv) Farmers. Farmers who generate an average of 25 gallons or less per month of used oil from vehicles or machinery used on the farm in a calendar year are not subject to the requirements of this Subpart, if the used oil is used in normal farming operations. Normal farming operations do not include land application or land disposal of

used oil.

(2) Other applicable provisions. Used oil generators who conduct the following activities are subject to the requirements of other applicable provisions of this Subpart as indicated in subparagraphs (2)(i) through (2)(v) of this paragraph:

(i) Generators who transport used oil, except under the self-transport provisions of paragraphs 374-2.3(e)(1) and (2) of this section, must also comply with section 374-2.5 of this Subpart.

(ii) Generator processing.

('a') Except as provided in clause ('b') of this subparagraph, generators who process or re-refine used oil must also comply with section 374-2.6 of this Subpart.

('b') Generators who perform the following activities are not processors provided that the used oil is generated on-site and is not being sent off-site to a burner of on-specification or off-specification used oil fuel:

('1') filtering, cleaning or otherwise reconditioning used oil before returning it for reuse by the generator;

('2') separating used oil from wastewater generated on-site to make the wastewater acceptable for discharge or reuse pursuant to section 402 or section 307(b) of the Federal Clean Water Act, as incorporated by reference in subdivision 370.1(e) of this Title, or other applicable federal or state regulations governing the management or discharge of wastewaters;

('3') using oil mist collectors to remove small droplets of used oil from in-plant air to make plant air suitable for continued recirculation;

('4') draining or otherwise removing used oil from materials containing or otherwise contaminated with used oil in order to remove excessive oil to the extent possible pursuant to paragraph 374-2.2(a)(3) of this

Subpart; or

('5') filtering, separating or otherwise reconditioning used oil before burning it in a space heater pursuant to subdivision 374-2.3(d) of this section.

(iii) Generators who burn off-specification used oil for energy recovery, except under the on-site space heater provisions of subdivision 374-2.3(d) of this section, must also comply with section 374-2.7 of this Subpart.

(iv) Generators who direct shipments of off-specification used oil from their facility to a used oil burner, or who are the first to claim that used oil that is to be burned for energy recovery meets the used oil fuel specifications, set forth in paragraph 374-2.2(b)(1) of this Subpart, must also comply with section 374-2.8 of this Subpart.

(v) Generators who dispose of used oil must also comply with section 374-2.9 of this Subpart.

(b) Hazardous waste mixing.

(1) Mixtures of used oil and hazardous waste must be managed in accordance with paragraph 374-2.2(a)(2) of this Subpart.

(2) The rebuttable presumption for used oil as provided in clause 374-2.2(a)(2)(i)('b') of this Subpart applies to used oil managed by generators. Under the rebuttable presumption for used oil, used oil containing greater than 1,000 ppm total halogens is presumed to be a hazardous waste and must be managed as hazardous waste and not as used oil unless the presumption is rebutted. However, the rebuttable presumption does not apply to certain metalworking oils/fluids and certain used oils removed from refrigeration units.

(c) Used oil storage. Used oil generators are subject to all applicable Spill Prevention, Control and Countermeasures (40 CFR Part 112, as incorporated by reference in subdivision 370.1(e) of this Title), in addition to the requirements of this section. Used oil generators are also subject to the Underground Storage Tank (40 CFR Part 280, as incorporated

by reference in subdivision 370.1(e) of this Title) standards for used oil stored in underground used oil tanks whether or not the used oil exhibits any characteristics of hazardous waste, in addition to the requirements of this section.

(1) Storage units. Used oil generators shall not store used oil in units other than tanks, containers, or units subject to regulation under Subparts 373-2 and 373-3 of this Title. In addition, all storage units must be designed, constructed and operated in accordance with the following requirements in effect for the municipality in which the generator facility is located:

(i) local building and fire codes, if any; and

(ii) the New York State Uniform Fire Prevention and Building Code, 19 NYCRR Chapter XXXIII, Subchapter A, including the National Fire Protection Association Flammable and Combustible Liquids Code (NFPA-30)(as incorporated by reference in subdivision 370.1(e) of this Title).

(2) Used Oil Tanks: Compliance with Petroleum Bulk Storage Regulations.

(i) All aboveground and underground used oil tank systems, regardless of tank size, must comply with sections 612.2 through 612.4, 613.2 through 613.9, 614.6 and 614.12 of this Title, except that:

('a') aboveground used oil tanks with 10 percent or more volume beneath the surface of the ground must also meet the applicable requirements contained in 40 CFR Part 280 (as incorporated by reference in subdivision 370.1(e) of this Title), whether or not the used oil exhibits any characteristics of hazardous waste.

('b') used oil tanks at a facility licensed under Part 610 of this Title do not require registration under Part 612 of this Title.

(ii) New aboveground and new underground used oil tank systems must be installed in accordance with section 613.2, paragraphs 613.3(c)(3) through (6), and sections 614.2

through 614.14 of this Title.

(iii) Requirements of this subdivision shall apply on January 14, 1995, except as follows:

('a') used oil tanks, regardless of their size, must be registered pursuant to section 612.2 of this Title by July 14, 1995.

('b') existing generator facilities must be in compliance with the applicable requirements of subdivisions 613.3(c) and 613.6(b) of this Title by January 14, 1997.

(3) through (6) Reserved

(7) Condition of units. Containers and aboveground used oil tanks used to store used oil at generator facilities must be:

(i) in good condition (no severe rusting, apparent structural defects or deterioration); and

(ii) not leaking (no visible leaks).

(8) Labels.

(i) Containers and aboveground used oil tanks used to store used oil at generator facilities must be clearly labeled or marked with the design capacity and working capacity of the tank and with the words "Used Oil".

(ii) Fill pipes used to transfer used oil into underground used oil tanks at generator facilities must be clearly labeled or marked with the capacity of the tank and with the words "Used Oil".

(9) Response to releases.

(i) Any spill, discharge, or release of used oil shall be subject to all applicable provisions of Article 12 of the Navigation Law (NL Sections 170 through 197) and its implementing rules and regulations, 17 NYCRR Parts 32 - 33 and Part 611 of this Title, regarding, but not limited to, notification, cleanup, and liability, and are also subject to applicable provisions of Article 17, Titles 10 and 17, of the Environmental

Conservation Law, and section 613.8 of this title.

(ii) Upon detection of a release of used oil to the environment that is not subject to the requirements of Subpart F of 40 CFR Part 280, as incorporated by reference in subdivision 370.1(e) of this Title, a generator must perform the following cleanup steps:

('a') stop the release;

('b') contain the released used oil;

('c') clean up and manage properly the released used oil and other materials;

('d') if necessary, repair or replace any leaking used oil storage containers or tanks prior to returning them to service.

(iii) Within two hours of detecting a spill, discharge, or release of used oil, the generator must notify the department Spill Hotline at (800) 457-7362, or, if calling from out of state, (518) 457-7362.

(d) On-site burning in space heaters. Generators may burn used oil in used oil-fired space heaters provided that:

(1) the heater burns only used oil that the owner or operator generates or used oil received from household do-it-yourselfer used oil generators;

(2) the heater is designed to have a maximum capacity of not more than 0.5 million Btu per hour; and

(3) the combustion gases from the heater are vented to the outside ambient air.

(e) Off-site shipments. Except as provided in paragraphs (1) through (3) of this subdivision, generators must ensure that their used oil is transported only by transporters who have obtained an EPA identification number and are authorized under Part 364 of this Title to transport used oil, if applicable.

(1) Self-transportation of small amounts to approved collection

centers. Generators may transport, without an EPA identification number, used oil that is generated at the generator's site and used oil collected from household do-it-yourselfers to a used oil collection center provided that:

(i) the generator transports the used oil in a vehicle owned by the generator or owned by an employee of the generator;

(ii) the generator transports no more than 55 gallons of used oil at any time; and

(iii) the generator transports the used oil to a used oil collection center that is permitted pursuant to subparagraph 374-2.4(b)(2)(ii) of this Subpart.

(2) Self-transportation of small amounts to aggregation points owned by the generator. Generators may transport, without an EPA identification number, used oil that is generated at the generator's site to an aggregation point provided that:

(i) the generator transports the used oil in a vehicle owned by the generator or owned by an employee of the generator;

(ii) the generator transports no more than 55 gallons of used oil at any time; and

(iii) the generator transports the used oil to an aggregation point that is owned and/or operated by the same generator.

(3) Tolling arrangements. Used oil generators may arrange for used oil to be transported by a transporter without an EPA identification number if the used oil is reclaimed under a contractual agreement pursuant to which reclaimed oil is returned by the processor/re-refiner to the generator for use as a lubricant, cutting oil, or coolant. The contract (known as a "tolling arrangement"), must indicate:

(i) the type of used oil and the frequency of shipments;

(ii) that the vehicle used to transport the used oil to the processing/re-refining facility and to deliver recycled used oil back to the generator is owned and operated by the used oil processor/re-refiner; and

(iii) that reclaimed oil will be returned to the generator.

(f) Service and Retail Establishments. A "service establishment" is any automobile service station, including gas only outlets, or any other retail outlet and boat marina, selling at least 500 gallons of lubricating oil annually and having an on-premises oil changing operation. A "retail establishment" is every vendor that sells lubricating oil at retail in quantities in excess of 1,000 gallons per year. Generators who are service establishments or retail establishments must also comply with the following requirements:

(1) Service establishments.

(i) An owner or an employee of every service establishment who is present on the premises must accept, at no charge, used petroleum-based or synthetic lubricating oil in quantities not to exceed five gallons per day from any household do-it-yourselfer, in accordance with the following requirements:

('a') the service establishment must maintain a tank or container with sufficient capacity to provide adequate service to individuals, for the temporary storage of used oil;

('b') the service establishment may refuse to accept used oil if the used oil tank or container is temporarily filled to capacity. If filled to capacity, the service establishment must proceed expeditiously to have the used oil emptied by a used oil transporter authorized under Part 364 of this Title, and must inform individuals when used oil can be brought back to the establishment for collection.

('c') the service establishment must accept used oil only during the normal business hours of the establishment;

('d') the service establishment may require used oil to be dropped off in rigid screw-top closed containers;

('e') the service establishment may refuse to accept used oil if it has been contaminated through other than ordinary and normal use; and

('f') the service establishment may not impose a separate charge or fee upon any individual for acceptance or disposal of used oil, whether or not the individual is a customer for service.

('g') the service establishment must conspicuously post a sign in a location which is always open to public view, stating: "WE ACCEPT USED OIL FOR RECYCLING AT NO CHARGE". Such establishment may additionally state, on the same sign or an additional sign, that used oil is accepted only during normal business hours and may state such hours. The information on any sign must be legible from a distance of at least 25 feet from the outside of the establishment's building, with lettering a minimum of one inch in height;

(2) Retail establishments. Retail establishments may either directly accept used petroleum-based or synthetic lubricating oil from household do-it-yourselfers, or contract with another retail establishment, service establishment or municipality, for the collection of used oil brought to it for acceptance.

(i) Retail establishments which elect to provide for the direct collection of used oil must accept, at no charge, used petroleum-based or synthetic lubricating oil in quantities not to exceed five gallons per day from any household do-it-yourselfer, in accordance with the following requirements:

('a') the retail establishment must maintain a tank or container with sufficient capacity to provide adequate service to individuals, for the temporary storage of used oil;

('b') the retail establishment may refuse to accept used oil if the used oil tank or container is temporarily filled to capacity. If filled to capacity, the retail establishment must proceed expeditiously to have the used oil emptied by a used oil transporter permitted under Part 364 of this Title to transport used oil, and must inform individuals when used oil can be brought back to the establishment for collection;

('c') the retail establishment must accept used oil only

during the normal business hours of the establishment;

('d') the retail establishment may require used oil to be dropped off in rigid screw-top closed containers;

('e') the retail establishment may refuse to accept used oil if it has been contaminated through other than ordinary and normal use; and

('f') the retail establishment must conspicuously post a sign in a location which is always open to public view, stating: "WE ACCEPT USED OIL FOR RECYCLING AT NO CHARGE." Such establishment may additionally state, on the same sign or an additional sign, that used oil is accepted only during normal business hours and may state such hours. The information on any sign must be legible from a distance of at least 25 feet from the outside of the establishment's building, with lettering a minimum of one inch in height.

(ii) Retail establishments which elect not to provide for direct collection of used oil must either:

('a') enter into a contract with another retail establishment, service establishment or municipality, which maintains a tank or container for the temporary storage of used oil. The retail establishment which contracts with another retail establishment, service establishment or municipality, for the provision of collection services must conspicuously post a sign in a location which is always open to public view, stating: "USED OIL FOR RECYCLING WILL BE ACCEPTED BY (name of contracted establishment or municipality) AT (address of contracted establishment or municipality) AT NO CHARGE". The information on this sign must be legible from a distance of at least 25 feet from the outside of the establishment's building and have lettering a minimum of one inch in height.

('1') in counties or cities with a population of one million or more, the distance between the contracting retail establishment and the contractor shall not exceed eight

miles; and

('2') in all other areas, the contracting retail establishment and the contractor must be within the same town or city or within adjacent towns or cities; or

('b') obtain a hardship waiver from the department for inability to comply with this subdivision due to prohibition by local codes, ordinances, or State or federal statute or regulation, or due to the impossibility of installing a used oil tank or container because of physical constraints. The retail establishment must submit a request for a hardship waiver to the Director, Division of Solid & Hazardous Materials, New York State Department of Environmental Conservation, 625 Broadway, Albany, NY 12233-7250, which includes the following information:

('1') the name and location, including street address, of the retail establishment;

('2') the approximate gallons of lubricating oil sold annually by the retail establishment;

('3') a discussion which includes the statutory, regulatory or physical constraints prohibiting the placement of a tank or container for temporarily storing used oil, a description of specific efforts being made by the retail establishment to overcome those constraints, a street scale map of the geographic range established in subclauses ('b')('1') and ('b')('2') of this clause indicating the location of the retail establishment requesting the waiver, and the locations of other retail establishments, municipalities, and service establishments located within that geographic range.

SENDER: COMPLETE THIS SECTION

- Complete items 1, 2, and 3. Also complete item 4 if Restricted Delivery is desired.
- Print your name and address on the reverse so that we can return the card to you.
- Attach this card to the back of the mailpiece, or on the front if space permits.

New York State Department of Environmental Conservation
Division of Environmental Remediation
Bureau of Technical Support, 11th Floor
625 Broadway, Albany, New York 12233-7020
Phone: (518) 402-9543 • **FAX:** (518) 402-9577
Website: www.dec.state.ny.us

Dear Petroleum Storage Tank Owner:

The five-year registration for your Petroleum Bulk Storage (PBS) tank(s) expires soon. The registration expiration date is printed on the top right-hand corner of the enclosed renewal application. Please notice that the form has changed since your last renewal. The enclosed renewal package includes:

- Your pre-printed renewal application form
- Fees determination worksheet
- A notice regarding the new PBS application review policy
- Tank and piping model codes reference sheet

Please review, revise (if necessary), and complete the PBS renewal application form. Be sure to fill in ***all*** blank portions of the form, sign and date the form, and include the correct fee. (Fees determination worksheet on back of this page.)

If you no longer own this facility, please provide the current owner's name and address (if known) and return the renewal package to the appropriate NYSDEC office (see address in upper right corner of Section A) as soon as possible.

PBS regulations contain various requirements for operating and upgrading storage facilities. If you are not familiar with these requirements, need a copy of the regulations, need detailed application instructions or have questions, please call the Spill Prevention and Bulk Storage Section at (518) 402-9543 or visit the Spill Prevention and Bulk Storage web site at **www.dec.state.ny.us/website/der/bulkstor** . Allow 4 weeks for the renewal form to be processed.

Incomplete/inaccurate applications, applications with overdue tank/piping system tests or aboveground storage tanks with 10,000 gallons or greater capacity without secondary containment, will not be processed by the Department and will be rejected. Once corrected/completed, the application and fees must be resubmitted to the Department for processing. Failure to submit a complete and acceptable PBS application prior to the PBS registration certificate expiration date is a violation of law for which you may be held liable for penalties or other enforcement actions.

Please be advised that tanks installed or substantially modified after December 27, 1986 which do not meet 6 NYCRR Part 614 standards must be removed.

Return the completed and signed form and applicable fee to the appropriate NYSDEC office (the address is at the top of Section A). Please provide one check per facility and put the PBS number on the check. Upon satisfactory review of your application and receipt of the correct fee, the Department will issue a new five-year certificate. The certificate and all future correspondence will be mailed back to the person and address you indicate in the "Correspondence" section of the application form. Please remember it is the facility owner's responsibility to ensure your information remains valid and current on your registration.

Sincerely,

Russ Brauksieck

Russ Brauksieck, P.E.
Chief, Spill Prevention and Bulk Storage Section

Enclosures
(Revised August 2007)

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION

INSTRUCTIONS FOR COMPLETING "SECTION A" OF PETROLEUM BULK STORAGE APPLICATION

GENERAL INSTRUCTIONS - Type or print all items, except "signature" in Section A. This form must be completed for each applicable petroleum facility. Forward completed applications to the appropriate NYSDEC office.

PBS NUMBER - Enter the seven digit NYSDEC Registration Number if the facility was previously registered; otherwise, leave blank.

OTHER EXISTING DEC NUMBERS - Enter the Chemical Bulk Storage (CBS) Number (Hazardous Substance Bulk Storage Law, Article 40 of ECL; 6NYCRR Parts 595-599) and State Pollution Discharge Elimination System (SPDES) Number (Article 17, Title 8 of ECL, 6NYCRR Parts 750-758) that are assigned to the facility, if applicable. If not applicable, write "Not Applicable".

TRANSACTION TYPE - Check the appropriate box(es) to indicate type of transaction. (Check all that apply.)

Initial/New Facility..... First application for registration by the owner of a regulated facility. PBS number will be assigned by NYSDEC. Complete all sections. **A copy of the deed page showing the date of ownership is needed.** The expiration date of the registration certificate will be five years from the date of ownership, as determined by the deed. If the ownership spans a period of more than five years ago or a tank installation date is more than five years ago, additional fees will be required.

Change of Ownership..... Application for registration by the new owner of the facility being transferred. Enter the PBS Number from the existing registration certificate and complete all sections. **A copy of the deed page showing the date of ownership is needed.** The expiration date of the registration certificate will be five years from the date of ownership, as determined by the deed. If the change of ownership occurred more than five years ago, additional fees will be required.

Tank Installation, Closing, Repair or Reconditioning..... Check this box if one of the following applies: (1) one or more new stationary tanks has been added to the facility; or (2) an existing stationary tank has been replaced, reconditioned or permanently closed. In Section A, complete the Facility Section, PBS Number, name/title/signature of a duly authorized officer, and date. In Section B, fill in the entire line of information for each tank being amended.

Information Correction..... If any information changes have occurred since the initial application or the last renewal, indicate the corrected information in the appropriate spaces, include the PBS Number, and complete the name/title/signature of a duly authorized officer, and date.

Renewal..... Application is being made for a previously registered facility that has not changed ownership since the last registration. Registration certificates for petroleum bulk storage facilities must be renewed every five years and are not transferable. Indicate any changes that have occurred since last renewal and provide the name/title/signature of the duly authorized officer, and date.

FACILITY INFORMATION - Enter the name and location (not PO Box) of the facility. Include any information that would assist in locating the facility. For county, enter the county in which the facility is located. For township, enter the geographical location, not the mailing city. Enter the facility telephone number and the name of the operator at the facility who is familiar with the tanks and the efforts of the facility to comply with Petroleum Bulk Storage Law (see Article 17, Title 10 of the Petroleum Bulk Storage Law, 6NYCRR Parts 612-614 and 6NYCRR, Subpart 360-14 (used oil)). Also enter the emergency contact name and telephone number.

OWNER INFORMATION - Enter the name, address and telephone number of the facility owner. Federal Tax Identification Number is the number assigned by the Internal Revenue Service for a corporation or a Social Security Number for an individual. It is required by New York State Department of Tax and Finance. For owner type, check the appropriate box. Note: apartment buildings are considered corporate/commercial.

MAILING CORRESPONDENCE - Enter the desired mailing name and address for correspondence (e.g. registration certificate, renewal notice) and the name, telephone number and e-mail address of the contact person who is familiar with the efforts of the facility to comply with provisions of the Petroleum Bulk Storage Law.

TYPE OF PETROLEUM FACILITY - Check the appropriate box (check only one). If "other", specify the type of facility in the space provided.

NAME AND OFFICIAL TITLE OF OWNER OR OWNER'S AUTHORIZED REPRESENTATIVE - Type or print name and title of the owner or authorized representative. An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility. For a partnership or sole proprietorship, the application must be signed by a general partner or the proprietor, respectively. For a municipal, state or other public facility, the application must be signed by a principal or executive officer, ranking elected official or other duly authorized employee.

AMOUNT ENCLOSED - Indicate the fee enclosed. Fees are required for initial registrations, renewals, and changes of ownership. There is no fee required for substantial tank modifications or information corrections. Make check/money order payable to NYSDEC. The fee is based on combined petroleum tank storage capacity * at the facility in gallons: 1,101-2,000 gallons - $100/facility; 2,001-4,999 gallons - $300/facility; 5,000-399,999 gallons - $500/facility. *NOTE: Product Type 0022 (waste/used oil) is **not** subject to registration fee. (An example of product type 0022 is used oil that will be hauled away by a waste hauler.)

SIGNATURE AND DATE - Enter the name, title, and signature of the owner or duly authorized officer, along with the date the application was prepared.

INSTRUCTIONS FOR COMPLETING "SECTION B" OF PETROLEUM BULK STORAGE APPLICATION

GENERAL INSTRUCTIONS - Enter all the information. Provide detail for each regulated tank (one complete line per tank; use additional forms as required). A site plan including tank numbers should be enclosed. Enter one choice per block. Make only one entry per column, except for tank external protection, tank secondary containment, tank leak detection, tank overfill prevention, piping external protection, and piping leak detection columns, where you may indicate a primary and secondary choice. **Refer to the Key at the bottom of "Section B" of the application form to indicate your responses.**

(Instructions for completing Section B are continued on the next page)

(Column 20) PIPING LEAK DETECTION - Specify leak detection method used (Refer to 6NYCRR section 614.14(g)(3).)

Tank and Piping Model Chart (For use in Section B, Column 2a)

This chart lists some commonly used tank models and piping models for which the model description defines the related equipment. Therefore, for a given tank, if the tank model appears on the chart and you enter the tank model code in column 2a of the registration form, you will not have to enter the related information in shaded columns 8, 10 and 11 for that tank. Similarly, for a given tank, if the piping model appears on the chart and you enter the piping model code in column 2a of the registration form, you will not have to enter the related information in shaded columns 17, 18 and 19 for that tank. (Use codes 101 through 108 for underground tanks only; use codes 201 through 205 for aboveground tanks only; use codes A through G for piping.)

Code #	Model Description	Examples of Model Names or Manufacturers
Underground Tanks *- Use codes 101 through 108 for underground tanks only.*		
101	STI-P3 single wall tank (cathodically protected steel tank with no secondary containment)	Highland Tank, Mohawk Metals, Lancaster Tank, Modern Welding
102	STI-P3 double wall tank (cathodically protected double wall steel tank)	Highland Tank, Mohawk Metals, Lancaster Tank, Modern Welding
103	FRP single wall tank (Fiberglass tank with no secondary containment)	Owens Corning, Fluid Containment, Containment Solutions, Xerxes
104	FRP double wall tank (Fiberglass double wall tank)	Owens Corning, Fluid Containment, Containment Solutions, Xerxes
105	Fiberglass clad steel single wall tank (no secondary containment)	Buffalo Tank, Highland Tank
106	Fiberglass clad steel double wall tank	Buffalo Tank
107	Jacketed steel tank (steel tank with secondary containment of plastic or FRP)	Total Containment Jacketed tank, Elutron tank, Permatank, Modern Welding Glasteel II
108	ACT 100U double wall steel tank (steel tank with urethane cladding)	Titan, Euro-Tank, HT-Fibre-Thane
Aboveground Tanks *- Use codes 201 through 205 for aboveground tanks only.*		
201	Steel tank in a dike	Highland Tank and others
202	Concrete encased steel tank	ConVault
203	Double wall tank (does not meet requirement for secondary containment)	
204	Modified double wall tank (meets requirements for secondary containment because containment is provided for all spill scenarios including spills from the top of the tank such as overfills)	SuperSafe Tank, Armor Cast, FitFueler Tank, Highland OP Tank
205	Plastic tank (used oil only)	Kosmo Igloo
Piping *- Use codes A through G for piping.*		
A	Single wall steel pipe with originally installed cathodic protection	
B	Steel pipe inside of plastic pipe	
C	FRP single wall pipe	Ameron, A O Smith
D	FRP double wall pipe	Ameron, A O Smith
E	Flex pipe - Double wall	APT-Poly-Tech, Bufflex II, Perma-Flexx, GeoFlex-S, GeoFlex-D, Enviroflex, Omniflex
F	Copper pipe	
G	Copper pipe inside of plastic pipe	

New PBS Application Review Policy Notice
(September 2006)

Please note that the Petroleum Bulk Storage (PBS) application review policy has changed. The new application review policy will result in your application being returned to you unprocessed if:

- Section A has blanks or if the information is inaccurate.

- For Change of Ownership, a copy of the deed page showing the date of ownership was not submitted. The expiration date of the registration certificate will be five years from the date of ownership, as determined by the deed. If the change of ownership occurred more than five years ago, additional fees will be required.

- Section B, columns 1 through 8 (Action, Tank Number, Tank Location, Status, Install/Close Dates, Capacity, Product Stored, and Tank Type) are inaccurate or incomplete. (Please note that while the Department is not returning the application for other missing tank information at this time, it reserves the right to do so in the future. Furthermore, erroneous tank information may result in tank/piping system tightness test requirements or violations which may result in other compliance or enforcement actions.)

- Any aboveground tank with a capacity of 10,000 gallons or more doesn't have secondary containment (subdivision 613.3(c)(6))

- Any underground tank system is overdue for tightness testing (section 613.5)

Failure to submit a complete and acceptable PBS application prior to the PBS registration certificate expiration date is a violation of law for which you may be held liable for penalties or other enforcement actions.

IN ADDITION TO THE FEES & ORIGINAL SIGNATURE, THE FOLLOWING ITEMS ARE MISSING & MUST BE PROVIDED OR APPLICATION WILL BE RETURNED:

- Tank Spill Prevention

- Piping Secondary Containment

Erin M. Crotty
Commissioner

Dear Petroleum Storage Tank Owner:

The five year registration for your petroleum bulk storage (PBS) tank(s) expires soon. The expiration date is printed on the top right-hand corner of Section B of the enclosed renewal application. This application is part of a renewal package which contains:

(1) Your PBS renewal application with portions pre-printed;
(2) An instruction sheet for completing the PBS application;
(3) Additional special instructions for completing your PBS renewal application form.

Please review, revise (if necessary), and complete the renewal application form. Refer to items two (2) and three (3) listed above to help you complete or revise your application. Be sure to fill in all blank portions of the form (except as noted in the special instructions).

Please submit the completed and signed form and fee (if applicable) before the expiration date. Address it to the appropriate Department regional office, the address of which is printed on the top right-hand corner of Section A.

Upon receipt and review of the package, the Department will process the completed renewal form and issue a new five year certificate. Part of this review will be to determine if there are any underground tank systems that are overdue for testing. The registration application may not be processed if there are tanks overdue for testing.

Please see the special instructions regarding three important items that may apply to your facility:
- registration requirement for used oil tanks (since July 1995),
- change in regulation of small heating oil tanks (effective August 8, 1996),
- EPA 1998 upgrade deadline for certain underground tanks.

Notice to Underground Tank Owners

Please note that the due date for tank tightness tests appears on Section B and on the face of your PBS registration certificate. The tank tightness tests are required for underground tanks only. The tightness test due date was calculated based on the testing schedule included in section 613.5 of the state PBS regulations and the information that you provided previously on your PBS application form. To demonstrate compliance with this tank tightness test requirement you must have the tank tested before the due date and submit a copy of the test results within 30 days after the date of the test to the Department regional office (address is printed on the top right-hand corner of Section A). You must also keep a copy of the test results for your records.

Please be advised that a failure to perform the required tightness test(s) by the specified date and/or to timely submit proof of such test(s) is a violation of law for which you may be held liable for penalties. Please be further advised that any failed tightness test must be reported to the Department within two hours of discovery.

Additional Special Instructions for Renewal of Petroleum Bulk Storage Registration

1) Gather your records

Gather all facility and tank related records, including operator name and phone number, tank inventories, tank testing, tank closures, tank additions, etc. Please discard any inventory of blank PBS application forms and instructions that are dated before August 1995. See form number on the upper left-hand corner of Section A, i.e., 93-19-1 (8/95) - 26c.

2) Section A

Review, revise and complete Section A, referring to the instructions for completing petroleum bulk storage application (hereafter referred to as instructions). Clearly mark corrections by crossing out incorrect information and neatly printing the correct information. Please do **not** use "white out". The only items that can be left blank are CBS and SPDES number (if not applicable) and Latitude and Longitude (if not known). Fill in amount enclosed, signature and date **after** Section B is completed.

Owner information/Change of Ownership. If you no longer own this facility, please provide the current owner's name and address (if known) and return this renewal package to the appropriate Department office as soon as possible. If you are the new owner, please correct the transaction type to 2 (ownership transfer), and update the information accordingly.

3) Section B

Review, revise and complete Section B, referring to the instructions and the key for Section B. Please fill in any blank items.

Product stored. Two new categories B: Used oil (fuel) and C: Used oil have been added. An example of Product type B: used oil that feeds a boiler or furnace. An example of product type C: used oil hauled away by a waste hauler.

Last test date. This has been preprinted if test results have been submitted for an underground tank. If your tank(s) have been tested, but the testing date is missing, please note the test date and attach a copy of the test report. Not all underground tanks require testing. Refer to 6NYCRR Section 613.5. ***If your tank(s) are overdue for testing, a test report must be submitted prior to or with the registration application. Without a test report, the registration application may not be processed.***

4) Registration Fee

The fee schedule is on a per facility basis. Add together the capacities of all in-service and temporarily out of service PBS tanks (read notes below for Used Oil Tanks and Change in Regulation of Some Small Heating Oil Tanks for applicability) at the facility to determine it's storage capacity. See 6NYCRR paragraph 612.1(c)(21) for the definition of petroleum.

Combined Storage Capacity at Facility	**5 Year Fee**
Under 1,101gallons	Registration not required (see note (a) below)
1,101-2,000 gallons	$50 per storage facility
2,001-4,999 gallons	$150 per storage facility
5,000-399,999 gallons	$250 per storage facility
400,000 gallons and greater	Registration not required but license is required (see note (b) below)

Notes:

(a) If the aggregate capacity of in-service and temporarily out of service tanks at the facility is under 1,101 gallons, then renewal and fee are not required. Exception: used oil tanks, as noted below. Indicate which tanks in Section B have been permanently closed per section 613.9(b) of the PBS regulations. Return completed renewal application form to the Department regional office.

(b) If the aggregate capacity at the facility is 400,000 gallons or more, then renewal and fee are not required. The facility must be licensed under Article 12 of the Navigation Law. If already licensed, return the enclosed PBS renewal form to the Department regional office with a note indicating the license number. If not already licensed, return the renewal form to the Department regional office and request a Major Oil Storage Facility application form.

(c) **Used Oil Tanks.** Tanks storing used oil require registration, regardless of size, per Subpart 360-14 of 6NYCRR. Used oil is typically found at service establishments that change oil in vehicles. Tanks storing over 1,100 gallons of product B(used oil being used as fuel) are subject to registration fees. Product type C (used oil) requires registration but **not** subject to registration fees. Additional information regarding used oil tanks is available upon request.

(d) **Change in Regulation of Some Small Heating Oil Tanks.** Certain heating oil tanks under 1,100 gallons have been deregulated from the PBS program effective August 8, 1996. Heating oil tank(s) (i.e., #'s 1,2,4,5,6 fuel oils and kerosene), under 1,100 gallons, used for on-premises consumption at the same site, which is not interconnected to any other heating oil tank are no longer included in calculating the facility storage capacity. If the facility capacity without these small heating oil tanks is over 1,100 gallons then all tanks at the facility are to be included on the registration including the small heating oil tanks. An example of a deregulated tank is a 550 gallon #2 fuel oil tank that feeds a furnace at a bus garage. However, if at the same bus garage is a motor fuel tank or tanks that have a combined storage capacity over 1,100 gallons, then the 550 gallon heating oil tank would also be registered. Used oil (fuel) tanks under 1,100 gallons are still subject to registration but not the registration fee. If one or more of the tanks listed on your renewal application are now deregulated, please update your application by changing "action" to 3, changing "status" to 5, and writing in the closure date of 8/8/96.

(e) Make the check or money order payable to: New York State Department of Environmental Conservation (or NYSDEC).

(Continued)

INSTRUCTIONS FOR COMPLETING PETROLEUM BULK STORAGE APPLICATION

(Continued from reverse side)

SECTION B

GENERAL INSTRUCTIONS

Enter all the information (see KEY of choices for certain items, at the bottom of Section B). Use **one** complete line for each tank at the facility. Enter one choice per block. Make only one entry per item, except for tank external protection, piping external protection, secondary containment, leak detection and spill/overfill prevention.

Item Name	Specific Instructions
ACTION	**1. Initial Listing:** For initial registration, renewal, or change of ownership of a facility. **2. Add Tank:** For installing a new tank at a facility. **3. Close/Remove Tank:** For permanently closing a tank per 6 NYCRR section 613.9(b), or conversion to non-regulated substance/use. **4. Information Correction:** If any information changes have occurred since the initial application or last renewal for any tank, include the corrected information in the appropriate spaces and be sure to include the tank number. **5. Recondition/Repair/ Reline Tank:** For reconditioning a tank per 6 NYCRR section 614.6 (underground tanks) and 614.12 (aboveground tanks), i.e. permanent repair and/or relining.
TANK NUMBER	Use the tank numbering system at the facility. If none exists then establish one i.e. 001, 002, etc. Any combination of letters and numbers is acceptable, except "000" or duplicate tank numbers at the same facility.
TANK LOCATION	See 6 NYCRR section 612.1(c)(1), and (29) for specific definitions of aboveground and underground tanks, respectively. 1. Aboveground: Tank bottom rests on grade or pad, allowing no visual inspection. 2. Aboveground on saddles, legs, stilts, rack, or cradle: Tank bottom rests above grade or pad, allowing visual inspection. 3. Aboveground, 10% or more belowground: Aboveground less than 90% above grade, partially buried. 4. Underground: Completely covered with earth or vaulted with no access. 5. Underground, vaulted, with access: Tank in subterranean vault, accessible for inspection
STATUS	If a tank is permanently out of service (Status 3 or 4), it must be closed pursuant to 6 NYCRR section 613.9(b). If not closed as such, it may be considered temporarily out-of-service (Status 2). See section 613.9 for further closure details. Status 5 refers to a product stored in the tank that is no longer regulated under the definition of petroleum in 6 NYCRR section 612.1(c)(21).
INSTALLATION OR PERMANENT CLOSURE DATE	For Action 1, 2, 4 or 5, specify the month and year the tank was completely installed. If unknown, enter 0000. For Action 3 (Closure), enter the month and year the tank was permanently closed, or converted to non-regulated substance/use.
CAPACITY	Specify the total design or maximum capacity of the tank in gallons.
PRODUCT STORED	Used oil examples: B(fuel)—fed into burners or space heaters; C—hauled away by waste hauler. See amount enclosed (Section A) regarding fees.
TANK TYPE	If tank type is unknown, or tank is coated or painted steel, enter 1. Tank Type requirements for new underground and aboveground tanks are specified in 6 NYCRR section 614.2a(1) and 614.8a(1), respectively. Tank Type 6 requires a variance before installation per 6 NYCRR section 614.1(e).
TANK—INTERNAL PROTECTION	Specify the type of protection provided for the tank to prevent internal corrosion. Refer to 6 NYCRR sections 614.12 and 614.6 for aboveground and underground tank requirements, respectively.
TANK—EXTERNAL PROTECTION	Specify the type(s) of protection provided for the tank to prevent external corrosion. Refer to 6 NYCRR sections 614.9(b) and 614.3(e) for aboveground and underground tank requirements, respectively.
PIPING LOCATION	1. Aboveground: Piping rests on or above ground, or pad. 2. Underground: Completely covered with earth. 3. Aboveground/Underground Combination: Piping is both aboveground and underground.
PIPING TYPE	Refer to 6 NYCRR section 614.14(a) for piping requirements for new underground piping systems.
PIPING—INTERNAL PROTECTION	Specify the type of protection provided for the pipe to prevent internal corrosion.
PIPING—EXTERNAL PROTECTION	Specify the type(s) of protection provided for the pipe to prevent external corrosion.
SECONDARY CONTAINMENT	Refer to 6 NYCRR section 613.3(c)(6) for secondary containment requirements for aboveground tanks. For new underground storage tanks, see 6 NYCRR section 614.4. For the two available entries of this category, select the supporting structure use for secondary containment as the first entry and, if different, enter the means of obtaining impermeability as the second entry.
LEAK DETECTION	Refer to 6 NYCRR section 614.11 regarding the monitoring requirements for new aboveground tanks. Refer to section 614.5 for new underground tanks.
SPILL/OVERFILL PREVENTION	Refer to 6 NYCRR section 614.14(g)(1) on spill/overfill prevention requirements for new underground tanks. See section 613.3(c) on additional spill/overfill requirements for new and existing underground and aboveground tanks.
DISPENSER METHOD	Specify method/pump used to remove product from tank.
LAST TEST DATE	For underground tanks, enter the month and year of the most recent tightness test performed per 6 NYCRR section 613.5(a). This entry does not satisfy the requirement for notification of test results. Calculations, along with the test report, must be submitted to DEC if they have not already been. Note that not all underground tanks require testing. Refer to 6 NYCRR section 613.5(a).

As an authorized representative of the above named facility, I affirm under penalty of perjury that the information displayed on this form is correct to the best of my knowledge. Additionally, I recognize that I am responsible for assuring that this facility is in compliance with all sections of 6 NYCRR Parts 612, 613 and 614, and applicable sections of 6 NYCRR Subpart 360-14 (used oil tanks only), not just those cited below:

- The facility must be re-registered if there is a transfer of ownership.
- The Department must be notified within 30 days prior to adding, replacing, reconditioning, or permanently closing a stationary tank.
- The facility must be operated in accordance with the code for storing petroleum, 6 NYCRR Part 613.
- Any new facility or substantially modified facility must comply with 6 NYCRR Part 614.
- **This certificate must be posted on the premises at all times.** Posting must be at the tank, at the entrance of the facility, or the main office where the storage tanks are located.
- Any person with knowledge of a spill, leak or discharge must report the incident to DEC within two hours (1-800-457-7362).

As an authorized representative of the above named facility, I affirm under penalty of perjury that the information displayed on this form is correct to the best of my knowledge. Additionally, I recognize that I am responsible for assuring that this facility is in compliance with all sections of 6 NYCRR Parts 612, 613 and 614, and applicable sections of 6 NYCRR Subpart 360-14 (used oil tanks only), not just those cited below:

- The facility must be re-registered if there is a transfer of ownership.
- The Department must be notified within 30 days prior to adding, replacing, reconditioning, or permanently closing a stationary tank.
- The facility must be operated in accordance with the code for storing petroleum, 6 NYCRR Part 613.
- Any new facility or substantially modified facility must comply with 6 NYCRR Part 614.
- **This certificate must be posted on the premises at all times.** Posting must be at the tank, at the entrance of the facility, or the main office where the storage tanks are located.
- Any person with knowledge of a spill, leak or discharge must report the incident to DEC within two hours (1-800-457-7362).

Dear Petroleum Storage Tank owner:

The five year registration for your petroleum bulk storage (PBS) tank(s) expires soon. The expiration date for your tanks is printed on the top right hand-corner of Section B of the enclosed renewal application. This application is part of a renewal package which contains:

(1) Your PBS renewal application with portions pre-printed;
(2) An instruction sheet for completing the PBS application;
(3) Additional special instructions for completing your PBS renewal application form.

Please review, revise (if necessary), and complete the renewal application form. Refer to items two (2) and three (3) listed above to help you complete or revise your application. Be sure to fill in all blank portions of the form (except as noted in the special instructions).

Please submit the completed and signed form and fee (if applicable) before the expiration date. Address it to the appropriate DEC regional office, the address of which is printed on the top right-hand corner of Section A.

Upon receipt and review of the package, the department will process the completed renewal form and issue a new five year certificate.

Please see the special instructions regarding three important items that may apply to your facility:

- registration requirement for used oil tanks (since July 1995),
- deregulation of small heating oil tanks (effective August 8, 1996),
- EPA 1998 upgrade deadline for certain underground tanks.

Call the appropriate DEC regional office or the Bulk Storage Help line at (888) 457-4351 or (518) 457-4351, if you have any questions, or need additional forms or regulations.

Sincerely yours,

Morris E. Leno

SEE INSTRUCTIONS ON BACK

NOV-R2 (01/08) **DISTRIBUTION:** White copy - Facility Representative Yellow copy - DEC Technical Pink copy - DEC Legal

Instructions.

In order to demonstrate that the facility is in compliance, you should bring to the settlement conference proof that the violations cited on the front page of this Notice of Violation have been corrected or are being corrected. Such proof may include (but not limited to) the following, for particular violations:

- **Violations No. 01-06.** Photos of a posted valid and current PBS registration certificate, a copy of a completed PBS application and check (when applicable) submitted to the Department.
- **Violation No. 07**. A copy of a completed PBS application for substantial tank modification submitted to the Department (when necessary), documentation showing that the tank was properly permanently closed or a written agreement with a contractor with a schedule of tank closure.
- **Violation No. 08**. Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362 and bring the spill case number assigned by Hotline, photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to the spill event.
- **Violation No. 09**. Photos of color-coded fill port(s).
- **Violation No. 10**. Documentation (letter, invoices, etc.) showing that the sump/fill catch bucket was cleaned repaired or replaced.
- **Violation No. 11**. Latest tightness test repot including test calculations and results conducted within the last 5 years. Documentation showing the scheduled day of the tightness test or permanent tank closure.
- **Violations No. 12 and 13**. Properly reconciled inventory records for the last three (3) ten-day periods.
- **Violation No. 14**. A letter/report with investigation results accounting for the discrepancy.
- **Violation No. 15**. Documentation (letters, contracts, proposals, invoices, etc.) showing that leak monitoring has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 16**. Printed records of weekly leak detection.
- **Violation No. 17**. Printed monthly records showing the leak detection system working properly.
- **Violation No. 18**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the pipe leak detector was repaired/installed or is scheduled for repair/installation.
- **Violation No. 19**. An annual cathodic protection (CP) monitoring report completed within last 12 months or documentation showing a scheduled date for CP testing.
- **Violation No. 20**. Documentation (letters, contracts, proposals, invoices, etc.) showing that overfill prevention has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 21**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that shear (impact) valve(s) has been properly installed or is scheduled for repair/installation.
- **Violation No. 22**. Photos of tank label(s) affixed at the fill port or documentation showing that the label(s) was ordered.
- **Violation No. 23**. Latest (completed within last 12 months) tightness test report including test calculations and results, a standpipe test report or other test acceptable to the Department, or a schedule for such test or permanent tank closure.
- **Violation No. 24**. Copy of as-built plan or drawing with appropriate installer's 614 statement or documentation (letters, contracts, proposals, etc.) showing that drawings were ordered from the appropriate architectural or engineering firm.
- **Violation No. 25**. Photos of properly labeled tank and/or gauge.
- **Violation No. 26**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that secondary containment was installed or scheduled to be installed, or that the tank is scheduled to be closed permanently.
- **Violation No. 27**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the gauge/high level device was installed or is scheduled to be installed.
- **Violation No. 28**. Monthly inspection report completed within last 30 days.
- **Violation No. 29**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the Stage I and/or Stage II vapor recovery system was repaired/installed, scheduled to be repaired/installed or tank is scheduled for permanent closure.
- **Violation No. 30**. Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362. Contact DEC for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.
- **Violations No. 31-34**. Immediately begin work to contain and/or remove of the discharge. Contact DEC's case manager for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.

==========

I, Jennifer Trubia, have been told of the violations cited above and the need to remedy these violations immediately. I have also been told that an administrative settlement conference has been set for 03/24/09 at 3:00 PM in the Region 2 office located at **47-40 21st Street, Long Island City, NY**. I understand that if I do not attend the settlement conference, Department legal staff may institute a formal civil or administrative enforcement proceeding. I also confirm that I have been notified that I will be meeting with an attorney from the Department to discuss settlement and that I may bring my own attorney to the settlement conference.

Owner/Operator/Representative Signature: Jennifer Trubia Title Oprmgr Date: 2/23/09

SEE INSTRUCTIONS ON BACK

718-591-469 **Instructions.**

In order to demonstrate that the facility is in compliance, you should bring to the settlement conference proof that the violations cited on the front page of this Notice of Violation have been corrected or are being corrected. Such proof may include (but not limited to) the following, for particular violations:

- **Violations No. 01-06.** Photos of a posted valid and current PBS registration certificate, a copy of a completed PBS application and check (when applicable) submitted to the Department.
- **Violation No. 07.** A copy of a completed PBS application for substantial tank modification submitted to the Department (when necessary), documentation showing that the tank was properly permanently closed or a written agreement with a contractor with a schedule of tank closure.
- **Violation No. 08.** Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362 and bring the spill case number assigned by Hotline, photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to the spill event.
- **Violation No. 09.** Photos of color-coded fill port(s).
- **Violation No. 10.** Documentation (letter, invoices, etc.) showing that the sump/fill catch bucket was cleaned repaired or replaced.
- **Violation No. 11.** Latest tightness test repot including test calculations and results conducted within the last 5 years. Documentation showing the scheduled day of the tightness test or permanent tank closure.
- **Violations No. 12 and 13.** Properly reconciled inventory records for the last three (3) ten-day periods.
- **Violation No. 14.** A letter/report with investigation results accounting for the discrepancy.
- **Violation No. 15.** Documentation (letters, contracts, proposals, invoices, etc.) showing that leak monitoring has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 16.** Printed records of weekly leak detection.
- **Violation No. 17.** Printed monthly records showing the leak detection system working properly.
- **Violation No. 18.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the pipe leak detector was repaired/installed or is scheduled for repair/installation.
- **Violation No. 19.** An annual cathodic protection (CP) monitoring report completed within last 12 months or documentation showing a scheduled date for CP testing.
- **Violation No. 20.** Documentation (letters, contracts, proposals, invoices, etc.) showing that overfill prevention has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 21.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that shear (impact) valve(s) has been properly installed or is scheduled for repair/installation.
- **Violation No. 22.** Photos of tank label(s) affixed at the fill port or documentation showing that the label(s) was ordered.
- **Violation No. 23.** Latest (completed within last 12 months) tightness test report including test calculations and results, a standpipe test report or other test acceptable to the Department, or a schedule for such test or permanent tank closure.
- **Violation No. 24.** Copy of as-built plan or drawing with appropriate installer's 614 statement or documentation (letters, contracts, proposals, etc.) showing that drawings were ordered from the appropriate architectural or engineering firm.
- **Violation No. 25.** Photos of properly labeled tank and/or gauge.
- **Violation No. 26.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that secondary containment was installed or scheduled to be installed, or that the tank is scheduled to be closed permanently.
- **Violation No. 27.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the gauge/high level device was installed or is scheduled to be installed.
- **Violation No. 28.** Monthly inspection report completed within last 30 days.
- **Violation No. 29.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the Stage I and/or Stage II vapor recovery system was repaired/installed, scheduled to be repaired/installed or tank is scheduled for permanent closure.
- **Violation No. 30.** Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362. Contact DEC for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.
- **Violations No. 31-34.** Immediately begin work to contain and/or remove of the discharge. Contact DEC's case manager for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.

STATE OF NEW YORK
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
----------X

In the Matter of the Violations of Article 17 of the New York State Environmental Conservation Law, Article 12 of the New York State Navigation Law, and Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York,

ORDER ON CONSENT

NYSDEC File No. R2-20090319-167

- by -

Black Bear Company, Inc.

Respondent.
----------X

WHEREAS:

1. The New York State Department of Environmental Conservation ("NYSDEC" or the "Department") has administrative jurisdiction over the abatement and prevention of pollution of the waters and air of the state, and is responsible for the enforcement of the Environmental Conservation Law of the State of New York ("ECL"), and Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York ("NYCRR");

2. It is the responsibility of the Department to conserve, improve and protect New York State's natural resources and environment, and control pollution in order to enhance the health, safety and welfare of the people of the state and their overall economic and social well-being; and

3. The Respondent, Black Bear Company, Inc., owns and operates a petroleum bulk storage facility located at 27-10 Hunters Point Boulevard, Queens, New York 11101, identified in Department records as PBS #2-452335 (the "Facility").

VIOLATIONS

4. Department staff inspected the Facility on February 23, 2009 and found the following violations:

   a. Respondent violated 6 NYCRR § 613.4(a)(2) by failing to monitor an unmetered tank for leaks - $500 penalty

5. ECL § 71-1929 provides for penalties of up to THIRTY SEVEN THOUSAND FIVE HUNDRED dollars ($37,500) per day for each violation of the ECL Part 17 and 6 NYCRR Parts 612, 613 and 614 set forth above.

6. ECL § 71-2103 provides for penalties of up to FIFTEEN THOUSAND dollars ($15,000) per day for each violation of 6 NYCRR Part 230 set forth above.

7. Navigation Law § 192 provides for penalties of up to TWENTY FIVE THOUSAND dollars ($25,000) per day for violation of the Navigation Law as set forth above.

8. This Order is made strictly for the purposes of the Department and is not intended for the benefit of, or use by, any third party.

9. In settlement of the Respondent's civil liability for the aforesaid violations, the Respondent admits the violations set forth herein, waives its right to a hearing herein as provided by law and consents to the issuing and entering of this Order on Consent pursuant to the provisions of Articles 17 and 71 of the ECL, and agrees to be bound by the provisions, terms and conditions herein.

NOW, being duly advised and having considered this matter, the Commissioner of the Department of Environmental Conservation hereby ORDERS that:

I. COMPLIANCE SCHEDULE

Within 60 days of the effective date of this Order, the Respondent shall close the tank. Respondent must then submit a tank closure application to Mr. Moses Ajoku, Petroleum Bulk Storage Unit, New York State Department of Environmental Conservation, 47-40 21st Street, Long Island City, New York, 11101-5407; mxajoku@gw.dec.state.ny.us (e-mail); 718-482-4098 (fax). All correspondence must carry the Facility identification number set forth in paragraph 3 above.

II. PENALTY

A. The Respondent is hereby assessed a civil penalty in the amount of Five Hundred ($500.00) Dollars for the violations stated herein. Payment shall be made by check or money order payable to the "Environmental Protection and Spill Compensation Fund" and delivered with the Respondent's signed original of this Order to: Louis P. Oliva, Regional Attorney, New York State Department of Environmental Conservation, 47-40 21st Street, Long Island City, New York, 11101-5407.

B. Payment of the civil penalty shall not in any way alter the Respondent's obligation to complete performance under the terms of this Order. In the event that the Respondent fails to fully comply with the requirements of this Order in a timely fashion, the Respondent shall be subject to penalties of up to $37,500 per day per violation pursuant to ECL § 71-1929, and penalties of up to $15,000 per day pursuant to ECL § 71-2103, without prejudicing the Department from seeking further appropriate penalties for violations of this Order.

III. MISCELLANEOUS

A. Compliance with all terms of this Order shall satisfy the Respondent's outstanding civil liability for the violations described above. The provisions, terms and conditions of this Order shall be deemed to bind the Respondent and the Respondent's heirs, legal representatives, receivers, trustees in bankruptcy, successors and assigns.

B. This Order shall constitute the entire agreement of the Department and the Respondent with respect to settlement of the violations specifically referenced herein.

C. If the Respondent cannot comply with a deadline or requirement of this Order, because of war, strike, riot, catastrophe, or other condition which was not caused by the negligence or willful misconduct of the Respondent and which could not have been avoided by the Respondent through the exercise of due care, the Respondent shall apply in writing to the Department within a reasonable time after obtaining knowledge of such fact and request an extension or modification of the deadline or requirement.

D. No change in this Order shall be made or become effective except as specifically set forth by written order of the Commissioner, being made either upon written application of the Respondent, or upon the Commissioner's own findings after notice and opportunity to be heard have been given to the Respondent. The Respondent shall have the burden of proving entitlement to any modification requested.

E. The Respondent shall indemnify and hold the Department, the State of New York, and their representatives and employees harmless for all claims, suits, actions, damages and costs resulting from the acts and/or omissions of the Respondent, intentional, negligent, or otherwise, of every nature and description, arising out of or resulting from the compliance or attempted compliance with the provisions of this Order by the Respondent or its employees, servants, agents, successors or assigns.

F. This Order shall take effect when it is signed by the Commissioner of the Department of Environmental Conservation or his designee.

DATED: Long Island City, New York
March 31, 2009

ALEXANDER B. GRANNIS
Commissioner
New York State Department of
Environmental Conservation

By: _____
SUZANNE Y. MATTEI
Regional Director
NYSDEC - Region 2

CONSENT BY RESPONDENT

Respondent, **Black Bear Company, Inc.**, hereby consents to the issuing and entering of this Order without further notice, waives its right to a hearing herein, and agrees to be bound by the terms, conditions and provisions contained in this Order.

RE: 2710 HUNTERS POINT AVENUE, QUEENS

ABC TANK Repair & Lining, Inc. (ABC Tank) is pleased to submit our proposal for your review. ABC TANK will supply the necessary labor, materials and equipment to perform the following:

	$90.00/hour
• Dig up area to expose tank.	**$200.00**
• Cut open tank to gain access.	**$550.00**
• Pump out & clean interior of (1) 550-gallon oil tank.	**$500.00**
• Fill tank with sand and abandon in place.	**$400.00/sample**
• Submit soil samples to a certified laboratory for analysis.	**$300.00**
• Issue (1) NYC Fire department affidavit (once invoice is paid in full)	
• Disposal of contaminated water, if any @ .75/gallon	**$350.00**
• Back fill dug up area and re-cement.	

Terms of Payment: Payment due upon completion of job.
All prices are subject to applicable taxes.

This proposal does not include any work not specifically mentioned. Any other work required would be quoted separately.

The price is valid for a period of sixty- (60) calendar days from date of this proposal.

If the terms, prices & conditions meet your approval, please sign & return (1) copy for our files. For your convenience, you may fax your signed acceptance back to A.B.C. at 718-272-3147.

Yours truly,

Robert Iengo

As an authorized representative of the above named facility, I affirm under penalty of perjury that the information displayed on this form is correct to the best of my knowledge. Additionally, I recognize that I am responsible for assuring that this facility is in compliance with all sections of 6 NYCRR Parts 612, 613 and 614, and applicable sections of 6 NYCRR Subpart 360-14 (used oil tanks only), not just those cited below:

-- The facility must be re-registered if there is a transfer of ownership.
-- The Department must be notified within 30 days prior to adding, replacing, reconditioning, or permanently closing a stationary tank.
-- The facility must be operated in accordance with the code for storing petroleum, 6NYCRR Part 613.
-- Any new facility or substantially modified facility must comply with 6NYCRR Part 614.
-- **This certificate must be signed and posted on the premises at all times.** Posting must be at the tank, at the entrance of the facility, or the main office where the storage tanks are located.
-- Any person with knowledge of a spill, leak or discharge must report the incident to DEC within two hours **(1-800-457-7362)**.

RE: 27-10 Hunter's Point

Order No.: 0905062

Dear Bob Iengo:

American Analytical Laboratories, LLC. received 2 sample(s) on 5/6/2009 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The results reported herein relate only to the items tested or to the samples as received by the laboratory. This report may not be reproduced, except in full, without the approval of American Analytical Laboratories, LLC and is not considered complete without a cover page and chain of custody documentation. The limits (LOQ) provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report or the data is qualified. This package has been reviewed by American Analytical Laboratories' QA Department/Laboratory Director to comply with NELAC standards prior to report submittal. This report consists of 14 pages.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Karen Kelly for

Lori Beyer
Lab Director

METROPOLITAN
M INC.
HEAT & POWER COMPANY

Four Generations...Industrial & Domestic

July 21, 2009

New York City Fire Department
Bureau of Fire Prevention
9 Metrotech Center - 3rd Floor
Brooklyn, N.Y. 11201

RE: 2710 Hunter Pointer Avenue Queens NY

I hereby certify that I am an Oil-Burning Equipment Installer with License #2689A and Install Test Repair Buried Tanks License# 61830378.

I further certify that the fuel oil storage system at the above premises has been legally abandoned and the piping capped or sealed on 5/1/09.

1. All contents of the storage system have been removed by A.B.C. TANK REPAIR & LINING INC. and the system rendered free of flammable or combustible vapors.

2. All waste was removed from the storage system and has been disposed of in accordance with the applicable city, state and federal requirements.

3. (1) 550 gallon buried fuel oil tank has been legally abandoned in place by filling with a sand mix.

4. All connecting lines have been disconnected and sealed. All fill lines have been discontinued, the fill line connection has been sealed with concrete so as to prevent use of fill line and the vent line has been left open.

I further certify that the storage system has been legally abandoned in compliance with the Administrative Code of the City of New York and section 21-02 of the NYC Fire Department Rules.

EXECUTIVE SUMMARY

Atlantic Environmental Solutions, Inc. (AESI) was retained by SG Industrial Acquisitions, LLC to conduct a Phase I Environmental Site Assessment (ESA) for the properties located at: 27-10 49th Avenue (AKA Hunters Point Blvd.) Long Island City, New York ("subject property" or "site").

As part of the Phase I Investigation, AESI completed an inspection of the subject property on October 3, 2017. AESI sent inquires to the New York State Department of Environmental Conservation (NYSDEC) as well New York City's Department of Fire, City Planning, Finance, Buildings and Health. At the time of report writing, AESI is awaiting a response. Once a response is received, AESI will review all available documents and inform the client should any pertinent information be found. AESI also reviewed previously completed environmental investigation reports.

Pursuant to the completion of the Phase I investigation, AESI has identified the following recognized environmental conditions:

- Seven (7) underground storage tanks (USTs) have been identified in relation to the subject property: Five (5) 4,000-gallon gasoline USTs, one (1) 7,500-gallon heating oil UST, and one (1) 550-gallon waste oil UST. The gasoline USTs were removed in 1990, the heating oil UST was abandoned in place in 2005, and the waste oil UST was abandoned in place in 2009.

- During the site inspection, AESI identified two (2) oil/water separators and associated floor drains. Inspection of the floor drains identified petroleum product with an odor typical of hydraulic oil. Staining was also visible on the floor in the area of the floor drains.

- During the site inspection, AESI also identified three (3) in-ground hydraulic lifts, one (1) hydraulic elevator, one (1) pallet scale, and one (1) out-of-service truck scale.

- The Level 2 Environmental Site Assessment performed in 2003 identified historic fill material in the subsurface of the subject property. Sample results identified concentrations of polycyclic aromatic hydrocarbons (PAHs) consistent with historic fill. Fill extended to approximately 9 feet below grade. This material was originally placed on the site to raise the elevation prior to development. No active remediation is required for this material, however, historic fill material disturbed during redevelopment of the site should be handled as contaminated soil and excess soil should be transported off site for disposal.

Although the Level 2 Environmental Site Assessment performed in 2003 did not identify any discharges to the subsurface, AESI observed conditions during the site inspection that indicate that impacts may have occurred since. AESI recommends performing a geophysical survey of the property to identify the location and path of all sub-grade

drains, tanks, and oil/water separators. Once the subsurface elements have been mapped, AESI recommends performing a subsurface investigation to determine if soil and groundwater at the subject property has been adversely impacted by the site operations, former USTs, oil/water separators, hydraulic lifts and scales, and/or discharge of hydraulic oil to the floor drains.

1.0 INTRODUCTION

Atlantic Environmental Solutions, Inc. (AESI) was retained by SG Industrial Acquisitions, LLC to conduct a Phase I Environmental Site Assessment (ESA) of the property located at: 27-10 49th Avenue, Long Island City, New York ("subject property" or "site"). A site location map is provided as Figure 1 to indicate the subject property, a Tax Map as Figure 2, and photographs of the property are included within Attachment A.

1.1 PURPOSE

The objective of the assessment is to develop an initial summary of the actual and potential environmental liabilities associated with the subject property through visual analysis, review of readily available information, review of accessible previous environmental reports, and review of past and present land use in the vicinity. Specifically, AESI performed the assessment to identify the presence of hazardous substances, petroleum products, or conditions that indicate an existing or past discharge of hazardous substances or petroleum products onto the ground, ground water, surface water, or structures located on the subject property.

1.2 SCOPE OF ASSESSMENT AND METHODOLOGY USED

The Phase I Environmental Site Assessment was prepared in accordance with the general requirements developed by the American Society for Testing and Materials (ASTM) as presented in the *Standard Practice for Phase I Environmental Assessments* (E1527-13). This report provides a general characterization of the subject property based on readily available information obtained from: an inspection of the property, a review of available records, interviews with facility personnel, and interviews with relevant regulatory officials. This report provides documentation of the assessment, a summary of all identified areas of environmental concern, and recommendations for further action, where warranted.

AESI performed an inspection of the subject property on October 3, 2017. The site reconnaissance was performed to determine if there were obvious, visual indications of present or past activities which have, or could have, contaminated the site. The site inspection included a visual assessment of the interior and exterior of the site structure and observations of neighboring properties made from the perimeter of the subject property.

1.3 LIMITATIONS, LIMITING CONDITIONS, AND EXCEPTIONS

This assessment included communication with relevant Federal, State, and local regulatory agencies, and a review of readily available historical information. It was not the purpose of this assessment to determine the actual presence, degree, or extent of contamination, if any, on the subject property.

The assessment was not intended to identify all *de minimis* conditions that do not present a material risk of harm to public health or the environment that would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. In general, recognized environmental conditions (RECs) requiring further investigation consist of those areas where a discharge is suspected to have resulted in

the contamination of soil, groundwater, or surface water at concentrations above applicable State or Federal cleanup criteria.

The assessment did not include an evaluation for the presence or absence of radon, asbestos, freshwater wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, high voltage power lines, lead-based paint, lead in drinking water, or other non-scope considerations as defined by the ASTM standard practice E1527-13.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located at 27-10 49th Avenue (A.K.A. 27-10 Hunters Point Boulevard), Long Island City, New York in Queens County. The site is identified on local tax maps as Block 113, Lot 35. The parcel is approximately 38,300 square feet in area. The property is developed with one (1) two-story office and warehouse building, operated by Black Bear Lubricants Inc. and Carey Limousine, and an associated parking lot. The site is bound to the north by 49th Avenue followed by commercial properties. It is bound to the west by 27th Street followed by a warehouse space operated by UPS. It is bound to the south by commercial properties. It is bound to the east by Dutch Kills Creek.

2.2 ENVIRONMENTAL SETTING

2.2.1 Regional Topography, Geology, and Hydrogeology

According to the United States Geological Survey (USGS), the area is underlain by the Harrison Gneiss, a biotite-hornblende-quartz-plagioclase gneiss with accessory garnet and sphene. The formation is known to be up to 4,000 feet thick in places. The surficial geology of the area is comprised mainly of glacial till of varying texture. The till layer varies in thickness from 3-150 feet. The nearest body of water is the Dutch Kills Creek, located adjacent to the east of the subject property. The Dutch Kills Creek flows into the Newtown Creek approximately 0.25 miles to the south of the subject property.

2.2.2 Local Topography, Geology, and Hydrogeology

Local topography is generally flat. Groundwater in the area of the site is expected to flow towards the Dutch Kills to the east. The elevation of the site is approximately 14 feet above mean sea level (MSL). Groundwater has been observed at depths of 9-13 feet at the subject property.

2.2.3 Site Soils

The shallow soils at the site are classified by the U.S. Department of Agriculture Soil Conservation Service as urban land. The soil surface textures include silt loam, loamy sand, sandy loam, and fine sandy loam. Deeper soils consist of stratified sandy loams, and gravels underlain by metamorphic rock. According to the “Level 2 Environmental Site Assessment” completed in March 2003 which was reviewed by AESI. Soils on the site consisted of approximately 9 feet of fill material containing brick, concrete, fly ash,

slag, fine silty sands, clay, and fine gravels. Native material consisting of fine to medium sands with some silt was observed at depths greater than 9 feet below ground surface (bgs).

2.3 DESCRIPTIONS OF STRUCTURES AND UTILITIES

Structures	
Number of Buildings	1
Stories	2
Date of Construction	1963
Area (Square Feet)	33,266
Utilities	
Heat	Natural Gas
Electricity	Con Edison
Water	The City of New York

2.4 ENVIRONMENTAL LIENS

Based on available information, no environmental liens are currently held against the subject property. No Federal Superfund liens were identified in the background information search.

2.5 CURRENT USES OF PROPERTY

2.5.1 Description of Operations

The subject property is currently operated by Black Bear Lubricants Inc. (Black Bear) and Carey Limousine. Black Bear mixes and packages engine oils, hydraulic oils, gear lubricant, transmission oils, grease, and industrial lubricants on the property. Black Bear also utilizes office space on the first floor. Carey Limousine utilizes a portion of the first floor and the second floor as office space for a limousine rental service. Please see Sections for Findings and Recommendations.

2.5.2 Raw Materials

Black Bear Lubricants does not manufacture on site. Petroleum products are brought to the property in drums, mixed and packaged as engine oils, hydraulic oils, gear lubricant, transmission oils, grease, and industrial lubricants.

2.5.3 Wastes Generated (Annual Generator Reports and Manifests)

No hazardous wastes were observed at the subject property during the site inspection.

2.5.4 Federal, State, and Local Permits and Registrations

The site is listed in the NYSDEC Petroleum Bulk Storage (PBS) database under PBS Site No. 2-452335. The PBS program documents facilities which store over 1,100-gallons of petroleum products in aboveground storage tanks (ASTs) or Underground storage tanks (USTs), or facilities with one or more UST larger than 110-gallons. According to the PBS database, the following USTs are registered to the subject property:

Tank Number	Capacity (Gal.)	Contents	Status
001	5,000	Gasoline	Closed Prior to 03/1991
002	5,000	Gasoline	Closed Prior to 03/1991
003	5,000	Gasoline	Closed Prior to 03/1991
004	5,000	Gasoline	Closed Prior to 03/1991
005	5,000	Gasoline	Closed Prior to 03/1991
006	7,500	#2 Fuel Oil	Closed – In Place
101	550	Waste Oil/Used Oil	Closed – In Place

2.5.5 Environmental Enforcement Actions

Based on our review of background information obtained from the correspondence and inquiries made by AESI, no Environmental Enforcement Actions have been recorded at the property.

2.5.6 Previous Environmental Assessment or Investigation Reports

AESI reviewed the following environmental reports and historical documents during this Phase I Environmental Site Assessment:

Letter to New York City Fire Department – Metropolitan Heat & Power Company Inc. – July 2009.

This letter certifies that the fuel oil system located on the property was legally abandoned on May 1, 2009. According to the letter, all contents of the storage system were removed by A.B.C. Tank Repair & Lining Inc. The 550-gallon fuel oil UST (Tank No. 101) associated with the system was legally abandoned in place by filling with a sand mix. All connecting lines were disconnected and sealed. All fill lines were discontinued and filled with concrete.

Laboratory Results – American Analytical Laboratories – May 2009

Two (2) soil samples (“East” and “West”) were submitted for volatile organic compound (VOC) and semi-volatile organic compound (SVOC) analysis. The samples appear to have been collected in the area of the 550-gallon UST. No VOCs were detected in either sample. Polyaromatic hydrocarbons (PAHs) consistent with historic fill were detected at levels above NYSDEC soil cleanup objectives (SCOs). Please see Sections 5.0 and 6.0 for Findings and Recommendations.

Letter to New York City Fire Department – Metropolitan Heat & Power Company Inc. – October 2005.

This letter certifies that the fuel oil storage system located on the property was legally abandoned on October 5, 2005. According to the letter, all contents of the storage system were removed by A.B.C. Tank Repair & Lining Inc. The 7,500-gallon fuel oil UST (Tank No. 006) associated with the system was legally abandoned in place by filling with a sand mix. All connecting lines were disconnected and sealed. All fill lines were discontinued and filled with concrete.

Level 2 Environmental Site Assessment – ATC Associates Inc. – March 2003

A prior "Level 1 ESA", which was not available for review by AESI, identified the following areas of concern (AOCs) on the subject property:

- AOC-1: Five (5) 4,000-gallon gasoline USTs and associated piping
- AOC-2: Interior oil/water separator, floor drains, and catch basins
- AOC-3: One (1) active 7,500-gallon UST
- AOC-4: Exterior truck scale, oil/water separator, and concrete pad
- AOC-5: Possible additional USTs
- AOC-6 Historic Fill Material

ATC performed a geophysical survey as well a subsurface investigation consisting of sixteen (16) soil borings and six (6) "hydropunch" temporary well points. The results of the geophysical survey were inconclusive due to the poor quality of site fill material. The soil borings were advanced in the areas of the above listed AOCs. One (1) soil sample was collected from each of the sixteen (16) boring locations. One (1) groundwater sample was collected from each of the temporary well points. All samples were analyzed for VOCs and SVOCs. Two (2) soil samples were analyzed for polychlorinated biphenols (PCBs) and metals.

Laboratory results indicated that no VOCs were detected in any of the soil samples above the applicable NYSDEC SCOs. SVOCs were detected in six (6) of the soil samples. SVOCs detected were consistent with historic fill material.

One (1) groundwater sample, collected in the area of the gasoline tanks, contained benzene at a concentration of 5.6 ppb, slightly above the NYSDEC standards. Due to the limited extent of this benzene concentration, ATC concluded that the benzene did not represent an environmental concern for the site. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

Tank Removal Affidavit – TONE Tank and Pump, Inc. – July 1990

This letter to the State of New York and the County of Kings is an affidavit confirming the removal of five (5) 4,000-gallon gasoline USTs on June 8, 1990 by Robert A. Arcaro and TONE Tank and Pump, Inc. Attachments to the letter include an invoice for the work and the Certificate of Capitol Improvement for the work. No documentation of sampling at the time of removal of the USTs is provided.

Site Investigation – MTS EnviroSurv – January 1990

The investigation identified that materials with a potential for contaminating the site, including motor fuels, engine lubricants, and heating oil were stored on the subject property. The investigation identified that motor fuel and heating oil were stored in USTs including five (5) 4,000-gallon gasoline USTs. Asbestos Containing Material (ACM) was

also found to exist in the building in the form of thermal insulation and acoustic ceiling tiles.

MTS conducted a soil vapor analysis and collected samples of both soils and groundwater from the areas surrounding the underground tanks and gasoline pumps and testes for heavy metals.

Based upon the results of the testing, the subject property did not appear to have suffered any contamination of soil or groundwater result of the site operations. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

2.5.7 Protectiveness of Previous Environmental Remedies

Based on our review of background information obtained from the correspondence and inquiries made by AESI, no protectiveness or previous environmental remedies have been identified in connection with the subject property.

2.5.8 Proceedings Involving Environmental Matters

Based on the review of background information obtained from the correspondence and inquiries made by AESI, no proceedings involving environmental matters were found for the subject property.

2.6 CURRENT USES OF ADJOINING PROPERTIES

The site is bound to the north by 49th Avenue followed by a commercial warehouse operated by Mana Products, a cosmetics manufacturer. It is bound to the west by 27th Street followed by a warehouse space operated by UPS. It is bound to the south by a warehouse building operated by Leadstone, USA, a quartz manufacturing company and a commercial building of unknown use. It is bound to the east by Dutch Kills Creek.

3.0 RECORDS REVIEW, INTERVIEWS, AND CORRESPONDENCES

3.1 HISTORICAL USE INFORMATION

3.1.1 Fire Insurance Map Review

AESI contacted EDR Sanborn, Inc., the largest provider of historic fire insurance maps, requesting fire insurance maps for the site area. Fire insurance maps were available for the subject property for the years 1898, 1915, 1936, 1947, 1950, 1970, 1977, 1979, 1980, 1985, 1986, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1999, 2001, 2002, 2003, 2004, 2005, and 2006. Copies of the Sanborn maps are provided in Attachment B. The following is a brief summary for each year reviewed:

1898 – The subject property appears to be developed with thirteen (13) residential lots; however, it does not appear that houses have been constructed on those lots. The area surrounding the subject property is similar. There is a line to the north of the subject property noting the “Line of Fill”. To the east of the property is a marked out water channel identified as “proposed channel”.

1915 – No significant changes to the subject property can be observed subsequent to the 1898 Sanborn Map. The property to the north is now developed with one (1) building identified as a contracting company with an associated 275-gallon gasoline UST to the north of the building. The channel to the east is now identified as "Kills Creek".

1936 – No significant changes to the subject property can be observed subsequent to the 1915 Sanborn Map. The building on the property to the north has been expanded and one (1) additional shed building has been developed since the 1915 Sanborn Map. A gasoline tank is still shown to the north of the building. The property is now identified as Thompson Starrett Co. Inc Mechanical Department. The property to the south has been developed as "Irving Iron Works Co.". The property consists of eight (8) buildings, including one (1) for Oil Storage and one (1) for Coal Storage. The channel to the east is now identified as "Dutch Kills Creek".

1947 – A small commercial building has been developed on the western portion of the subject property, adjacent to 27th Avenue. The buildings on the property to the north have been razed since 1936. The rest of the surrounding properties appear similar to the 1936 Sanborn Map.

1950 – The subject property appears similar to the 1947 Sanborn Map. The property to the west has been developed with one (1) building. The building is identified as the United Parcel Service (UPS) truck reconditioning. The rest of the surrounding properties appear similar to the 1947 Sanborn Map.

1970 – The commercial building on the western portion of the subject property has been replaced with a large commercial building identified as Truck Sales & Service. The building was reportedly constructed in 1963.The property to the north has been developed with one (1) building identified as "Russ Togs Inc." clothing warehouse. The property to the south has been developed with one (1) additional building just to the southwest of the subject property.

1977-2006 – Significant changes have not occurred on the subject property or surrounding properties subsequent to the 1970 Sanborn Map.

3.1.2 Aerial Photograph Review

Aerial photographs were reviewed for the subject property for the years 1924, 1941, 1944, 1951, 1954, 1961, 1966, 1974, 1976, 1980, 1984, 1991, 1994, 2006, 2009, and 2011. Please refer to Attachment C for a copy of these photographs. The following represents an interpretation of the aerial photographs with respect to the subject properties and the immediate surrounding area:

1924 – The subject property appears to be undeveloped. The area surrounding the property appears to be mainly developed. The Dutch Kills Creek is visible

adjacent to the east. The properties directly to the north and south appear developed with several structures and appear industrial in use.

1941 – The subject property remains undeveloped. The property directly to the west appears to be used for parking or storage.

1944 – Significant changes have not occurred on the subject property or surrounding properties subsequent to the 1941 Aerial Photograph.

1951 – A small building has been constructed on the northwest corner of the subject property subsequent to the 1944 Aerial Photograph. The property to the west has been developed with one (1) warehouse building.

1954 – Significant changes have not occurred on the subject property subsequent to the 1951 Aerial Photograph. The buildings on the property to the north appear to have been razed, and the property appears to be used for parking and storage.

1961 – The subject property appears to be used as parking. A small building has been developed directly to the southwest of the subject property.

1966 – The subject property has been developed with one (1) building on the western side of the property. The surrounding properties appear similar to the 1961 Aerial Photograph.

1974 – Significant changes have not occurred on the subject property subsequent to the 1966 Aerial Photograph. The property to the north has been developed with one (1) warehouse building.

1976-2011 – Significant changes have not occurred on the subject property or surrounding properties subsequent to the 1974 Aerial Photograph.

3.1.3 Historic Topographic Map Review

AESI reviewed historic USGS Topographic Maps for the years 1897, 1898, 1900, 1947, 1956, 1967, 1979, 1997, and 2013. The topographic maps identify some of the surrounding structures, roadways, rail lines, elevation differentiation, and nearby waterways. Please refer to Attachment D for a copy of these topographic maps. The following is a brief summary for each year reviewed:

1897 – The subject property is located in the Hunter's Point area of Long Island City in the borough of Queens, New York. The subject property and surrounding area appears generally undeveloped. Dutch Kills Creek is located adjacent to the east.

1898 – Significant changes were not observed on the subject property subsequent to the 1897 Topographic Map.

1900 – Significant changes were not observed on the subject property subsequent to the 1898 Topographic Map.

1947 –The subject property remains undeveloped. The surrounding area appears developed as mainly industrial properties. An unmarked rail line is visible to the west.

1956 – The subject property remains undeveloped. The surrounding area has now been shaded as urban development.

1967 – The subject property is now shown as developed with one (1) building on the western portion of the property. The property to the north has been developed with one (1) building and the property to the south has also been developed with one (1) building.

1979 – Significant changes were not observed on the subject property subsequent to the 1967 Topographic Map.

1997 – Significant changes were not observed on the subject property subsequent to the 1979 Topographic Map.

2013 – Significant changes were not observed on the subject property subsequent to the 1997 Topographic Map.

3.1.4 City Directory Abstract

AESI reviewed the city directory abstract for the subject property and conducted a limited municipal deed search. The city directory abstract provides the name and operations of the property using sources such as City's City Directory. Refer to Attachment E for a copy of the city directory abstract.

Year	*Operators/Tenants*
2000	Walter's Limousine Service, Carey Limousine, Black Bear Co. Inc.
2005	Walter's Limousine Service, Carey Limousine, Black Bear Co. Inc.
2010	Carey International Inc., Esquire Cadillac Limousine SVC.
2014	Carey International Inc., Esquire Cadillac Limousine SVC.

3.1.5 Historic Ownership

A limited historic ownership review of the subject site was conducted; however, this review is not a deed search. The subject property has been owned by Kinloch Company Inc. since 1990.

3.1.6 Municipal and County File Review

New York City, Office of City Clerk
Inquiries were sent to the office of the New York City Clerk. AESI is still waiting for a response. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

New York City, Finance Department
Inquiries were sent to the office of New York City Finance Department. AESI is still waiting for a response. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

New York City, Department of Buildings
Inquiries were sent to the office of the City of New York Building Department. AESI is still waiting for a response. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

New York City, Fire Department
Inquiries were sent to the office of the City of New York Fire Department. AESI is still waiting for a response. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

New York City, Department of Health
Inquiries were sent to the office of the City of New York Department of Health. At this time, AESI is still waiting for a response. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

New York City, Department of City Planning
Inquiries were sent to the office of the City of New York Department of City Planning. At this time, AESI is still waiting for a response. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

New York State Department of Environmental Conservation
Inquiries were also sent to the Record Access Office of the New York State Department of Environmental Conservation. AESI is still waiting for a response. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

3.2 STANDARD ENVIRONMENTAL RECORD SOURCES: FEDERAL AND STATE

In addition to the site inspection, AESI conducted a review of available environmental regulatory records provided by Federal and State regulatory agencies and compiled by a commercial database firm, Environmental Data Resources, Inc. (EDR). The objective of the background research was to obtain and/or review readily available records from standard sources that would assist in identifying recognized environmental concerns. The EDR report, included as Attachment G, contains information from a variety of public sources; the accuracy of the information from these sources can vary and is not always complete. AESI has reviewed the information and made all reasonable efforts to compensate for obvious mistakes or insufficiencies in the information provided for which AESI has obtained supplemental, actual knowledge. The following sources of information, which meets or exceeds the ASTM E1527-13 requirements were reviewed for sites within the stated approximate distances from the subject property:

Sources reviewed for sites within a one-mile radius of subject property:

- National Priority List (NPL) Sites - Superfund;
- Corrective Action Report (CORRACTS);
- NPL Records of Decision (ROD); and assessor
- NPL Consent Decrees (CONSENT).

Sources reviewed for sites within a one-half mile radius of subject property:

- Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS);
- Federal Comprehensive Environmental Response, Compensation, and Liability Information System - No Further Remedial Action Planned Sites (CERC-NFRAP);
- State Hazardous Waste Sites (SHWS) (aka known contaminated site list);
- Resource Conservation and Recovery Act - Treatment, Storage, & Disposal Facilities (RCRIS-TSD);
- State Landfill Sites; and
- State Leaking Underground Storage Tank Incident Reports (LUST).
- State and Tribal Voluntary Cleanup Sites (NJ VCP)
- State and Tribal Brownfield Sites (NJ Brownfields)

Sources reviewed for sites on or adjacent to subject property:

- Resource Conservation and Recovery Act (RCRA) - Small Quantity Generators;
- RCRA - Large Quantity Generators; and
- RCRA- Conditionally Exempt Small Quantity Generators; and
- State Registered Underground Storage Tanks (UST).
- State and Tribal Engineering Control Registries (NJ ENG Control)
- State and Tribal Institutional Control Registries (NJ INST Control)

Sources reviewed only for the subject property:

- Delisted NPL Sites;
- Federal Comprehensive Environmental Response, Compensation, and Liability Information System - No Further Remedial Action Planned Sites (CERC-NFRAP);
- RCRA Administrative Action Tracking System (RAATS);
- Hazardous Materials Information Reporting System (HMIRS);
- PCB Activity Database (PADS);
- Federal Emergency Response Notification System list (ERNS);
- Facility Index System (FINDS);
- Toxic Chemical Release Inventory System (TRIS);
- Federal Superfund Liens (NPL Liens);
- Toxic Substances Control Act (TSCA);
- Material Licensing Tracking System (MLTS).

3.2.1 Federal NPL Sites (1 mile)

The NPL list is generated by the USEPA and consists of the highest priority Superfund sites in the country. A facility's inclusion on this list indicates that the site has been classified as a national priority site and that further investigation is pending. NPL sites were not identified within one (1) mile of the subject property. Although not identified in the one (1) mile radius database search, the Dutch Kills Creek, a tributary of the Newtown Creek, is part of the Newtown Creek Superfund site. The industrial past of properties along the Newtown Creek has resulted in the presence of elevated concentrations of pesticides, heavy metals, polychlorinated biphenols (PCBs), VOCs, and various other contaminants in the Newtown Creek and its tributaries. A review of information available on the EPA website for the Newtown Creek indicates that the subject property is not part of the Newtown Creek Superfund site.

3.2.2 Corrective Action Report (CORRACTS) (1 mile)

The USEPA-generated CORRACTS list identifies hazardous waste handlers (TSD facilities) with RCRA corrective action activity. Four (4) CORRACTS sites were identified within one (1) mile of the subject property. The closest site was identified as Active Steel Drum Co. located 0.355 miles to the southeast and upgradient of the subject property. The site was issued EPA ID No. NYD003933355. The site has been assigned a low corrective action priority. Due to the distance from the subject property, the site is unlikely to have an adverse effect on the subject property.

3.2.3 NPL Records of Decision (ROD) (1 mile)

The USEPA-generated ROD list identifies hazardous waste handlers (TSD facilities) with RCRA corrective action activity. ROD sites were not identified within one (1) mile of the subject property.

3.2.4 NPL Consent Decrees (CONSENT) (1 mile)

The CONSENT list is generated by the USEPA regional offices to identify major legal settlements at NPL Superfund sites. CONSENT sites were not identified within one (1) mile of the subject property.

3.2.5 Federal CERCLIS List (½ mile)

The USEPA-generated CERCLIS list identifies hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and/or private persons pursuant to CERCLA. CERCLIS list sites were not identified within one-half (1/2) mile of the subject property.

3.2.6 Federal Comprehensive Environmental Response, Compensation, and Liability Information System - (CERC-NFRAP) (1/2 mile)

The Federal Comprehensive Environmental Response, Compensation, and Liability Information System- No Further Remedial Action Planned Sites (CERC-NFRAP) database lists sites where the EPA has determined no further steps will be taken to list the site on the NPL. CERC-NFRAP sites were not identified within a one-half (1/2) mile of the subject property.

3.2.7 Federal RCRA TSD Facilities (½ mile)

This database identifies sites which store, treat and/or dispose of hazardous wastes as defined by RCRA. RCRA TSD list sites were not identified within one-half (1/2) mile of the subject property.

3.2.8 Landfill Sites and/or Solid Waste Facilities (SWF) (½ mile)

This database contains an inventory of solid waste disposal facilities and landfills in the state. Twelve (12) SWF sites were identified within one-half (1/2) mile of the subject property. The closest site is identified as Hunter's Point Recycling Inc. located 501 feet to the east and upgradient of the subject property. The site is an active SWF facility which recycles concrete, rock, clean soil, metals, and wood. Due to the nature of the waste stored on the site, the site is unlikely to have an adverse effect on the subject property.

3.2.9 State Hazardous Waste Sites (SHWS) (½ mile)

This list is the State's equivalent to the Federal government's Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list. Sites listed in this database may also be listed in CERCLIS. This list includes sites being cleaned up by potentially responsible parties (PRPs), as well as sites being cleaned up using State funds. Two (2) SHWS sites were identified within one-half (1/2) mile of the subject property. The closest site was identified as White Sun Cleaners, located at 47-38 34th Street, 0.487 miles east and upgradient of the subject property. The site was issued Site Code No. 57110. No spill cases have been recorded on the property. Due to the distance and lack of open spill cases, the site is unlikely to have an adverse effect on the subject property.

3.2.10 Leaking Storage Tanks (LTANKS) (½ mile)

This database consists of an inventory of sites with reported releases from USTs and ASTs. Forty-two (42) LUST sites were identified within one-half (1/2) mile of the subject property.

The closest site is identified as 28-39 49th Street, located 218 feet east and downgradient of the subject property. The site is listed in the database due to a spill of approximately 1 gallon of #2 fuel oil resulting from a tank failure. The property is a private dwelling. The spill occurred on June 27, 1995. The site was issued Site ID No. 193346 and Spill Case No. 9503766. The spill was effectively cleaned up and the spill case was closed on June 27, 1995. Due to the status of the case, the site is unlikely to have an adverse effect on the subject property.
The next closest site is identified as NY Envelope, located at 2910 Hunters Point Avenue, 0.107 miles southeast and downgradient of the subject property. The commercial/industrial property is listed on the database due to a spill of an unknown amount of #2 fuel oil which occurred on May 25, 2001. A 20,000-gallon tank failed a tank tightness test. The site was given Site ID No. 313258 and Spill Case No. 0102148. The spill case was closed by the NYSDEC on June 17, 2005. Due to the status of the case, the site is unlikely to have an adverse effect on the subject property.

The next closest site is identified as 47-15 Pearson Place, 0.114 miles northwest and upgradient of the subject property. The site is listed in the database due to a spill of approximately 12-gallons of #4 fuel oil. The spill resulted from an overfill of a tank truck, which occurred on February 2, 2002. The site was given Site ID No. 287873 and Spill Case No. 0110585. The cleanup was completed and the case was closed by the NYSDEC on July 31, 2003. Due to the status of the case, the site is unlikely to have an adverse effect on the subject property.

3.2.11 Resource Conservation and Recovery Act (RCRA) Small Quantity Generators (SQG) (On or adjacent)

The RCRA-Small Quantity Generator (SQG) database consists of sites which generate small quantities (less than 1,000 kilograms per month) of hazardous wastes and have obtained EPA generator identification numbers. RCRA-SQG sites were not identified on or adjacent to the subject property.

3.2.12 Resource Conservation and Recovery Act (RCRA) Large Quantity Generators (LQG) (On or adjacent)

The RCRA-Large Quantity Generator (LQG) database consists of sites which generate large quantities (more than 1,000 kilograms per month) of hazardous wastes and have obtained EPA generator identification numbers. RCRA-LQG sites were not identified on or adjacent to the subject property.

3.2.13 Resource Conservation and Recovery Act (RCRA) Conditionally Exempt Small Quantity Generator (CESQG) (On or adjacent)

The RCRA-Conditionally Exempt Small Quantity Generator (CESQG) database consists of sites which generate, transport, treat, and/or dispose of hazardous waste as defined by RCRA. CESQGs generate less than 100 kilograms of hazardous waste, or less than 1 kilogram acutely hazardous waste per month. One (1) RCRA-CESQG site was identified adjacent to the subject property. The site is identified as United Parcel Service Inc., located at 49-10 27th Street, 98 feet west and downgradient of the subject property. The site generates small quantities of wastes including ignitable waste, corrosive waste, 1, 4-diethyleneoxide, ethylene oxide, and methanol. No open spill cases are identified

on the site. Due to the lack of open cases and the gradient to the subject property, the site is unlikely to have an adverse effect on the subject property.

3.2.14 Registered Underground Storage Tanks (UST) (On or adjacent)

The subject property is listed in the database as Black Bear Company. The following USTs are registered to the subject property:

Tank Number	Capacity (Gal.)	Contents	Status
001	5,000	Gasoline	Closed Prior to 03/1991
002	5,000	Gasoline	Closed Prior to 03/1991
003	5,000	Gasoline	Closed Prior to 03/1991
004	5,000	Gasoline	Closed Prior to 03/1991
005	5,000	Gasoline	Closed Prior to 03/1991
006	7,500	#2 Fuel Oil	Closed – In Place
101	550	Waste Oil/Used Oil	Closed – In Place

Please see Sections 5.0 and 6.0 for Findings and Recommendations.

According to State and Federal records, one (1) registered UST site is located adjacent to the subject property. The site is listed as Patent Construction, located at 50-09 27th Street, 174 feet southwest and downgradient of the subject property. The site was given PBS ID No. 2-005347. Two (2) USTs are registered to the site. Tank 001 is listed as a 3,000-gallon #2 fuel oil UST, which is listed as closed-in-place on February 1, 1998. Tank 002 is listed as a 1,500-gallon #2 fuel oil tank, which is listed as closed-in-place on February 1, 1998. No spill cases are open on the site. Due to the lack of an open spill case, as well as the gradient to the subject property, the site is unlikely to have an adverse effect on the subject property.

3.2.15 State and Tribal Engineering Control Registries (NY ENG Control) (On or Adjacent)

The state and tribal Institutional Control/ Engineering Control Registries (NY ENG Controls) database lists legal documents that restrict the use of contaminated properties and also includes the owner(s) regulatory requirements for cleanup. NY ENG Control sites were not identified on or adjacent to the subject property.

3.2.16 State and Tribal Institutional Control Registries (NY INST Control) (On or Adjacent)

The state and tribal Institutional Control Registries (NY INST Control) database lists site where engineering and/or institutional controls remain in place as part of a remedial action to address soil and/or groundwater contamination. NY INST Control sites were not identified on or adjacent to the subject property.

3.2.17 State and Tribal Voluntary Cleanup Sites (NY VCP) (1/2 mile)

The state and tribal voluntary cleanup site (NY VCP) database lists responsible parties, developers, local officials, or individuals who may work with the department to remediate non-priority contaminated site that pose no immediate threat to human health or the environment. One (1) NY VCP sites was located within a ½ mile of the subject

property. The site is identified as Arch Street Yards (LIRR), located 0.408 miles northwest and downgradient of the subject property. The site was given Site Code No. 455970 due to identified contamination including tetrachloroethylene (PCE), trichloroethylene (TCE), benzene, and various other semivolatile organic compounds. The vertical and horizontal extent of contamination has been delineated. Due to the distance of the site from the subject property, the site is unlikely to have an adverse effect on the subject property.

3.2.18 State and Tribal Brownfield Sites (NY Brownfields) (1/2 mile)

Brownfields sites (NY Brownfields) are identified as former or current commercial/industrial use sites that are presently vacant or underutilized, on which there is suspected to have been a discharge of a contamination to the soil or groundwater at concentration greater than applicable cleanup criteria. Three (3) NY Brownfields list sites were identified within one-half (1/2) mile of the subject property. The closest site is identified as 44-30 Purves Street, 0.372 miles north and upgradient of the subject property. The site was contaminated with VOCs, metals, and SVOCs. Remedial actions are listed as complete. The site was issued Site Code No. 492842. Due to the status of the site, it is unlikely to have an adverse effect on the subject property.

3.3 INTERVIEWS AND CORRESPONDENCES

3.3.1 Interviews with Operator

Refer to Section 3.3.2 for information associated with interviews conducted during the site inspection.

3.3.2 Interviews with Property Manager

An on-site interview was conducted with the property owner and information obtained was integrated within this report.

3.3.3 Interviews with Owner

Refer to Section 3.3.2 for information associated with interviews conducted during the site inspection.

3.3.4 Interviews and Correspondences with Regulatory, Municipal, and Utility Officials

In addition to the EDR report, written or verbal requests for information were made to the following agencies to enhance and supplement the sources identified above:

- USEPA Region II - Freedom of Information (FOI).
- New York State Department of Environmental Conservation.
- New York City Clerk.
- New York City Finance Department
- New York City Department of Buildings.
- New York City Fire Department.
- New York City Department of City Planning.

- New York City Department of Health.

Inquiries were sent to the above Departments. Should information be found, showing an adverse environmental quality at the subject property, AESI will inform the client. See Attachment F for copies of inquiry letters.

3.3.5 State On-Line Mapping Resources

AESI reviewed the New York State Department of Environmental Conservation (NYSDEC) electronic database, NYC DOB electronic database, NYC Speed and NYC ACRIS. AESI reviewed all listed electronic databases and identified no environmental concerns or active conditions.

4.0 INFORMATION FROM SITE RECONNAISSANCE AND DILIGENT INQUIRY

AESI conducted a site inspection of the subject property on October 3, 2017. The site inspection observations are discussed in the following sections.

4.1 HAZARDOUS SUBSTANCES AND WASTES

4.1.1 Hazardous Substance Inventory and Description of Use

Black Bear Lubricants stores mixes and packages engine oils, hydraulic oils, gear lubricant, transmission oils, grease, and industrial lubricants on the property. Staining was observed in some areas of the warehouse floor and indications of petroleum products were observed in floor drains in the warehouse area. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.1.2 Hazardous Waste Generation, Handling, and Disposal

Black Bear Lubricants stores mixes and packages engine oils, hydraulic oils, gear lubricant, transmission oils, grease, and industrial lubricants on the property. Staining was observed in some areas of the warehouse floor and indications of petroleum products were observed in floor drains in the warehouse area. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.1.3 Hazardous Substance and Unidentified Substance Containers

Black Bear Lubricants stores mixes and packages engine oils, hydraulic oils, gear lubricant, transmission oils, grease, and industrial lubricants on the property. Staining was observed in some areas of the warehouse floor and indications of petroleum products were observed in floor drains in the warehouse area. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.2 BULK STORAGE TANKS AND APPURTENANCES

4.2.1 Aboveground Tanks and Associated Piping

Aboveground tanks or associated piping were not observed on the subject property during the site inspection.

4.2.2 Underground Tanks and Associated Piping

One (1) UST fill port and associated vent pipe was observed in the sidewalk of the subject property in front of the parking lot entrance. Based on prior reports, this UST is likely to the 7,500-gallon #2 fuel oil UST. No other USTs or associated piping were observed during the site inspection, however the following USTs are registered to the subject property:

Tank Number	Capacity (Gal.)	Contents	Status
001	5,000	Gasoline	Closed Prior to 03/1991
002	5,000	Gasoline	Closed Prior to 03/1991
003	5,000	Gasoline	Closed Prior to 03/1991
004	5,000	Gasoline	Closed Prior to 03/1991
005	5,000	Gasoline	Closed Prior to 03/1991
006	7,500	#2 Fuel Oil	Closed – In Place
101	550	Waste Oil/Used Oil	Closed – In Place

Based on previous reports reviewed by AESI, the five (5) gasoline USTs have been removed and the 7,500-gallon #2 fuel oil and 550-gallon waste/used oil USTs have been abandoned in place.

Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.2.3 Storage Pads and Areas Including Drum and Waste Storage

Black Bear Lubricants stores mixes and packages engine oils, hydraulic oils, gear lubricant, transmission oils, grease, and industrial lubricants on the property. Staining was observed in some areas of the warehouse floor and indications of petroleum products were observed in floor drains in the warehouse area. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.2.4 Rail Spurs or Sidings

Rail spurs or sidings were not observed on the subject property during the site inspection.

4.2.5 Rail, Truck, or Other Loading and Unloading Areas

Two (2) loading bays were observed during AESI's site investigation. Floor drains were present in the area of the loading bays and staining was visible in the area of the drains. AESI opened the floor drains and identified what appeared to be petroleum product within several of the drains. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.2.6 Pump Stations, Sumps, and ***Pits***

An oil water separator pit was observed within the Black Bear Lubricants space, adjacent to the boiler room. Due to the presence of petroleum product in floor drains within the building, AESI recommends additional investigation for this area. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.2.7 Surface Lagoons and Impoundments
Surface lagoons or impoundments were not observed on the subject property during the site inspection.

4.2.8 Chemical Storage Cabinets or Closets
Black Bear Lubricants stores mixes and packages engine oils, hydraulic oils, gear lubricant, transmission oils, grease, and industrial lubricants on the property. Staining was observed in some areas of the warehouse floor and indications of petroleum products were observed in floor drains in the warehouse area. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.3 DRAINAGE SYSTEMS AND AREAS

4.3.1 Surface Water Bodies
Surface water bodies were not observed on the subject property during the site inspection. Dutch Kills Creek lies adjacent directly to the east of the subject property. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.3.2 Floor Drains or Trenches and Piping
Several floor drains and trenches were observed on the subject property. Staining was visible in the area of the drains. AESI opened the floor drains and identified what appeared to be petroleum product within several of the drains. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.3.3 Process Area Sinks and Piping
Process area sinks and piping were not observed on the subject property during the site inspection.

4.3.4 Sanitary Sewer Collection Systems
The subject property is connected to the municipal sewer system No further investigation of this area is warranted.

4.3.5 Septic Systems and Leach Fields
Septic systems or leach fields were not observed on the subject property during the site inspection.

4.3.6 Seepage Pits and Dry Wells
Seepage pits or dry wells were not observed on the subject property during the site inspection.

4.3.7 Storm Water Detention Ponds and Fire Water Ponds
Storm water detention ponds or fire water ponds were not observed on the subject property during the site inspection.

4.3.8 Drainage Swales and Culverts
Drainage swales or culverts were not observed on the subject property during the site inspection.

4.3.9 Roof Leaders Where Process Operations Vent To Roof

Roof leaders or vents to roof were not observed on the subject property during site inspection.

4.4 DISCHARGE AND DISPOSAL AREAS

4.4.1 Solid Waste Generation and Disposal and Dumpsters

Three (3) dumpsters were observed within a gated area of the parking lot on the subject property during the site inspection. No staining or evidence of a discharge was observed in the vicinity of the dumpsters.

4.4.2 Sanitary and Process Waste Generation and Discharge Points

Waste generation or discharge points were not observed on the subject property during site inspection.

4.4.3 Underground Piping, Including Industrial Process Sewers

Several floor drains and trenches were observed on the subject property. Staining was visible in the area of the drains. AESI opened the floor drains and identified what appeared to be petroleum product within the drains. AESI also identified one (1) oil/water separator unit located in the parking lot east of the building. A second oil/water separator was also identified within the warehouse in the prior Level 2 investigation. Floor drains in the warehouse likely lead to the oil/water separators. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.4.4 Waste Piles

Waste piles containing construction debris were not observed on the subject property during the site inspection.

4.4.5 Landfills or Land farms

Landfills or land farms were not observed on the subject property during the site inspection.

4.4.6 Open Pipe Discharges

Open pipe discharge points were not observed on the subject property during the site inspection.

4.5 BUILDING INTERIOR AREAS (with a potential for discharge to the environment)

4.5.1 Waste Treatment Areas

AESI identified one (1) oil/water separator unit located in the parking lot east of the building. A second oil/water separator was also identified within the warehouse in the prior Level 2 investigation. Floor drains in the warehouse likely lead to the oil/water separators. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.5.2 Boiler Rooms

One (1) boiler room was identified within the building on the subject property. No staining or other signs of discharge were identified within the boiler area. According to on-site representatives, the boiler is currently run exclusively on natural gas; however, the connections to the 7,500-gallon UST appeared to still exist, and it appeared that fuel oil was still present in the lines. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.6 OTHER SITE SPECIFIC AREAS OF CONCERN

4.6.1 Electrical Transformers and Capacitors

Electrical transformers or capacitors were not observed on the subject property.

4.6.2 Areas of Stressed Vegetation, Discolored Areas, and Odors

Stressed vegetation, discolored areas, or odors were not observed on the grounds of the subject property during the site inspection.

4.6.3 Compressor Vent Discharges

Compressors were observed within the Black Bear Lubricants space during the site inspection. Surficial staining was observed in the vicinity of one of the compressors. The floor appeared to be in good condition and it is unlikely that the staining has impacted the underlying soil. No further investigation is warranted for this area.

4.6.4 Non-Contact Cooling Water Discharges

Non-contact cooling water discharges were not observed on the subject property during the site inspection.

4.6.5 Active or Inactive Production, Monitoring or Irrigation Wells

Active or inactive production, monitoring, or irrigation wells were not observed on the subject property during the site inspection.

4.6.6 Weighing Stations

Two (2) hydraulic scales were observed within the warehouse area. One (1) of the scales is currently in use and one (1) is no longer in operation. Staining was observed in the area of the scales. Please see Sections 5.0 and 6.0 for Findings and Recommendations.

4.6.7 Vapor Encroachment

Vapor encroachment areas were not observed on the subject property during the site inspection.

4.6.8 PCB Containing Equipment

PCB containing equipment was not observed on the subject property during the site inspection.

4.7 ADDITIONAL SERVICES

AESI performed an Asbestos Survey of the subject property. Asbestos containing materials were identified on site. The asbestos survey has been provided under separate cover.

5.0 FINDINGS

5.1 DE MINIMIS ENVIRONMENTAL CONDITIONS

Conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies are deemed de minimis conditions by the ASTM standard.

- No de minimis conditions were discovered by AESI during the inspection.

5.2 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

Historical Recognized Environmental Conditions are conditions that indicate a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- No historical recognized environmental concerns were identified by AESI during this investigation.

5.3 RECOGNIZED ENVIRONMENTAL CONDITIONS

Recognized Environmental Conditions (REC) are those constituting the presence or likely presence of any hazardous substance or petroleum products under conditions that indicate an existing release, a past release, or material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.

- Seven (7) underground storage tanks (USTs) have been identified in relation to the subject property: Five (5) 4,000-gallon gasoline USTs, one (1) 7,500-gallon heating oil UST, and one (1) 550-gallon waste oil UST. The gasoline USTs were removed in 1990, the heating oil UST was abandoned in place in 2005, and the waste oil UST was abandoned in place in 2009.

- During the site inspection, AESI identified two (2) oil/water separators and associated floor drains. Inspection of the floor drains identified petroleum product with an odor typical of hydraulic oil in several of the drains. Staining was also visible on the floor in the area of the floor drains.

- During the site inspection, AESI also identified three (3) in-ground hydraulic lifts, one (1) hydraulic elevator, one (1) pallet scale, and one (1) out-of-service truck scale.

- The Level 2 Environmental Site Assessment performed in 2003 identified historic fill material in the subsurface of the subject property. Sample results identified concentrations of polycyclic aromatic hydrocarbons (PAHs) consistent historic fill. Fill extended to approximately 9 feet below grade.

6.0 RECOMMENDATIONS

Atlantic Environmental Solutions, Inc. (AESI) performed a Phase I Environmental Assessment inspection on October 3, 2017 in connection with the referenced property located at 27-10 49th Avenue, Long Island City, New York ("subject property" or "site"). The inspection was performed in conformance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Standard Practice E-1527-13). Recognized Environmental Conditions (RECs) warranting further evaluations were observed by our firm at the subject property, and our recommendations are as follows:

- Seven (7) underground storage tanks (USTs) have been identified in relation to the subject property: Five (5) 4,000-gallon gasoline USTs, one (1) 7,500-gallon heating oil UST, and one (1) 550-gallon waste oil UST. The gasoline USTs were removed in 1990, the heating oil UST was abandoned in place in 2005, and the waste oil UST was abandoned in place in 2009.

- During the site inspection, AESI identified two (2) oil/water separators and associated floor drains. Inspection of the floor drains identified petroleum product with an odor typical of hydraulic oil. Staining was also visible on the floor in the area of the floor drains.

- During the site inspection, AESI also identified three (3) in-ground hydraulic lifts, one (1) hydraulic elevator, one (1) pallet scale, and one (1) out-of-service truck scale.

- The Level 2 Environmental Site Assessment performed in 2003 identified historic fill material in the subsurface of the subject property. Sample results identified concentrations of polycyclic aromatic hydrocarbons (PAHs) consistent with historic fill. Fill extended to approximately 9 feet below grade. This material was originally placed on the site to raise the elevation prior to development. No active remediation is required for this material, however, historic fill material disturbed during redevelopment of the site should be handled as contaminated soil and excess soil should be transported off site for disposal.

Although the Level 2 Environmental Site Assessment performed in 2003 did not identify any discharges to the subsurface, AESI observed conditions during the site inspection that indicate that impacts may have occurred since. AESI recommends performing a geophysical survey of the property to identify the location and path of all sub-grade drains, tanks, and oil/water separators. Once the subsurface elements have been mapped, AESI recommends performing a subsurface investigation to determine if soil and groundwater at the subject property has been adversely impacted by the site operations, former USTs, oil/water separators, hydraulic lifts and scales, and/or discharge of hydraulic oil to the floor drains.

7.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

The preceding Phase I Environmental Assessment was prepared by the undersigned environmental professionals in accordance with the ASTM - Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-13).

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR§ 312 and we have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40CFR Part 312.

The undersigned environmental professionals are employed by Atlantic Environmental Solutions, Inc., an environmental consulting firm located in Hoboken, New Jersey, and is qualified to conduct Phase I environmental assessments.

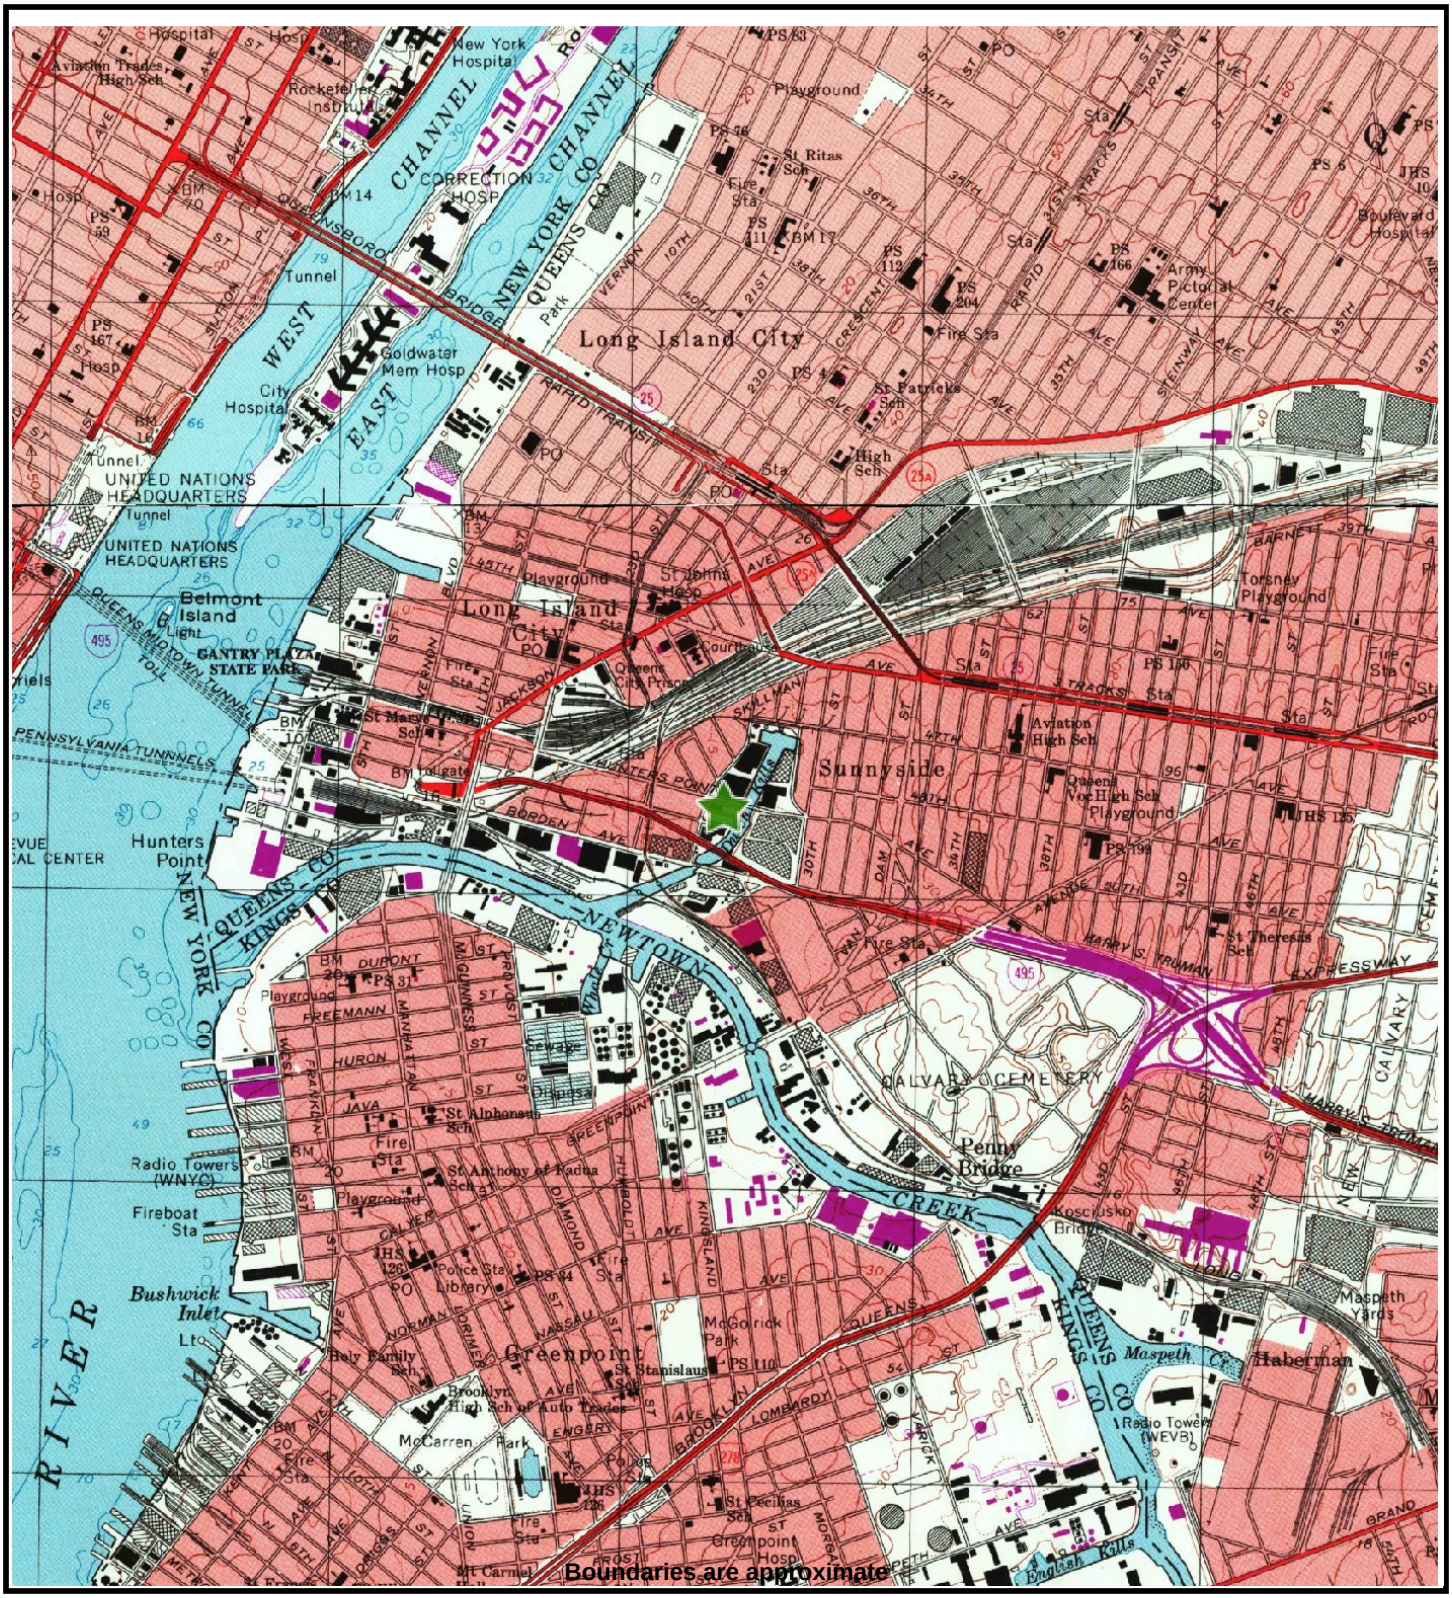
8.0 LIMITATIONS, QUALIFICATIONS, AND DISCLAIMERS

This report has been prepared on behalf of, and exclusively for the use of SG Industrial Acquisitions, LLC. This report and the findings contained within shall not, in whole or in part, be distributed or conveyed to any other party without the prior consent of Atlantic Environmental Solutions, Inc.

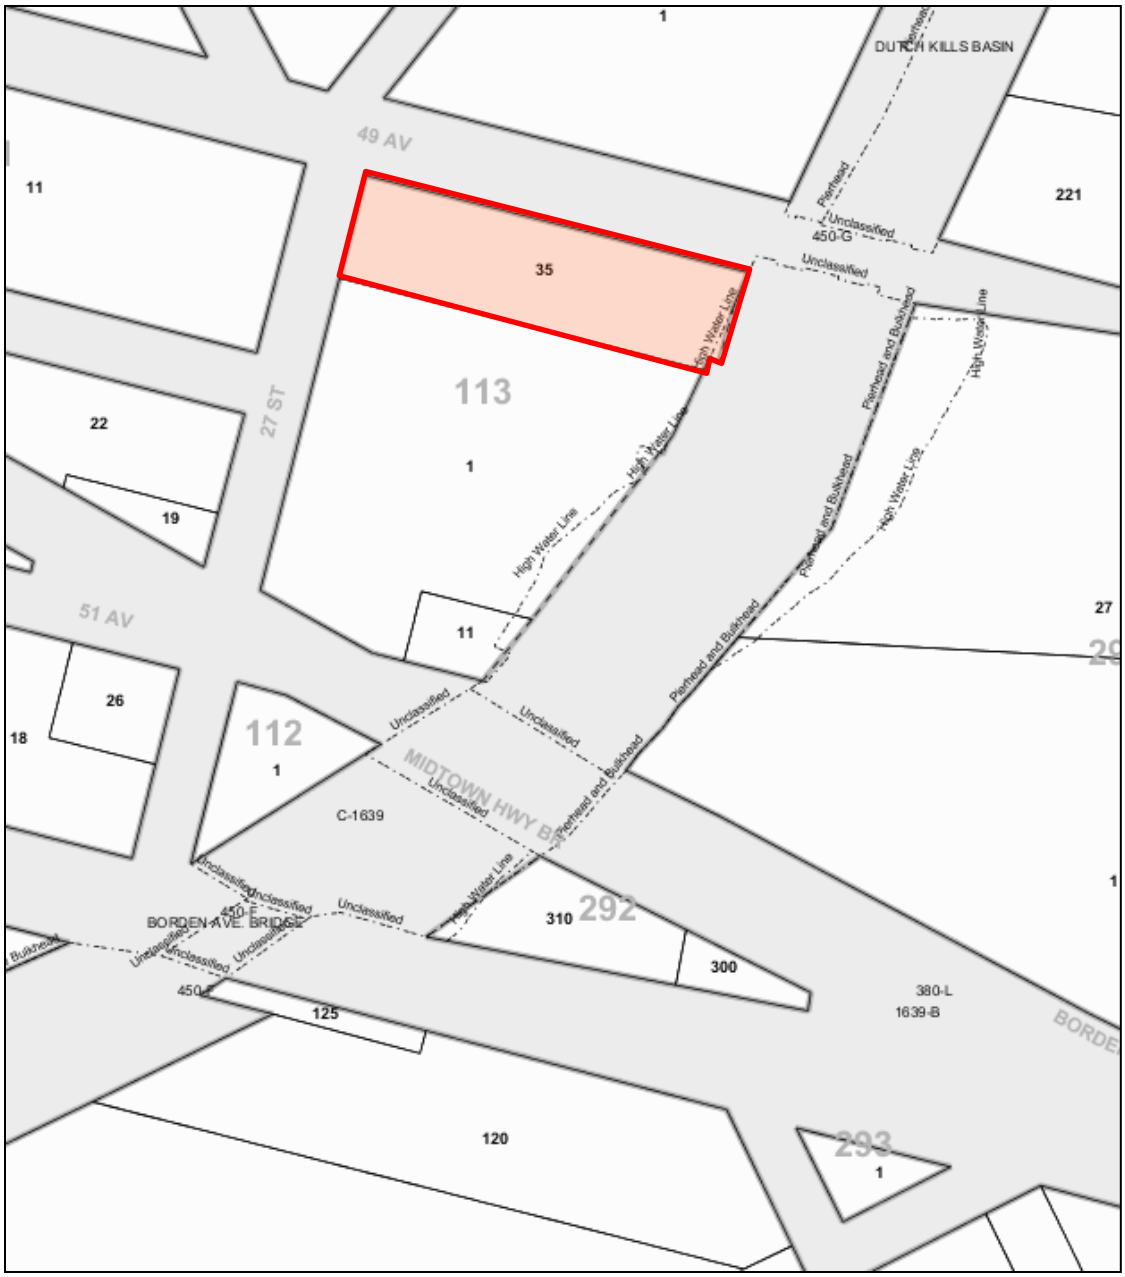
The opinions included in this report are based on the information obtained during the assessment, our experience, and the information provided by the persons available at the site at the time of inspection familiar with the subject property. If additional information becomes available, we require the opportunity to review the information, reassess the potential environmental concerns, and modify our opinions, if necessary.

8.1 DATA GAPS



A data gap is defined by the ASTM - Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-13) as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance, and interviews. The following data gaps were identified:

- The New York State Department of Environmental Conservation, New York City Department of Fire, City Planning, Finance, Buildings and Health did not respond to AESI's request for information at the time of report preparation.



If additional information becomes available that may impact the findings of the report, we require the opportunity to review the information, reassess the potential environmental concerns, and modify our opinions, if necessary.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

FREEDOM OF INFORMATION ACTION (FOIA) INQUIRES AND RESONSE DOCUMENTATION

Salvatore DeLucia

From: Abbott, Patricia <PAbbott@dep.nyc.gov>
Sent: Friday, October 20, 2017 7:32 AM
To: Salvatore DeLucia
Subject: YOUR FOIL REQUEST

October 20, 2017

Atlantic Environmental Solutions

Re: 27-10 49th Ave Long Island City, NY

Dear Salvatore DeLucia:

[ ] We write to inform you that a search of records maintained by The Division of Emergency Response and Technical Assessment, (DERTA) yielded documents responsive to your FOIL request. Your request is granted. Copies of records responsive to your request and to which you are entitled access are enclosed.

[X] Please be advised that a search of records maintained by DERTA was made and records you requested were not found.

In the event that you disagree with this determination, you may appeal it within 30 days, by writing to:

DEP FOIL Appeals Officer
NYC Department of Environmental Protection
59-17 Junction Blvd., 19th Floor
Flushing, NY 11373

FOIL 164616

Sincerely,

Patricia Abbott
Executive Assistant

Re: Freedom of Information (FOI) Request
27-10 49th Avenue
Long Island City

Dear Sir or Madam:

Atlantic Environmental Solutions, Inc. (AESI) has been retained to perform an environmental assessment of the referenced property. The purpose of this letter is to request any information which may be in your files in connection with the subject property. Please review your files for any of the following:

- Environmental violations, incidents, complaints, etc.
- Community Right to Know (RTK) Information
- Underground Storage Tank (UST) registrations, installation or removal permits
- Hazardous substance (including petroleum) discharges, leaks, spills, etc.
- Monitoring well, potable well, or other well installation records
- Industrial Site Recovery Act (ISRA) or ECRA correspondence
- Groundwater contamination reports, including Classification Exception Areas (CEAs)
- Declaration of Environmental Restrictions (DERs)
- Hazardous Substance Inventories
- Air emission permits, records
- Solid waste or sanitary waste permits, records

Thank you in advance for your help regarding this matter. In the event that there is a fee associated with obtaining this information, or if your office would rather make the file available for my review, please do not hesitate to contact me at (201) 876-9400. Our fax number is (201) 876-9563.

Sincerely,

Salvatore DeLucia
Environmental Scientist

PREVIOUS ENVIRONMENTAL REPORTS

EnviroSurv

(516) 968-4245 256-B ORINOCO DRIVE, BRIGHTWATERS, NEW YORK 11718 FAX: (516) 968-4247

JAN 9 1990

January 4, 1990

Mr. Derek Chou
Black Bear Company
44-25 23rd Street
Long Island City, New York 11101

RE: Sight Investigation Emery Building, Long Island City

Dear Mr. Chou:

To confirm our conversation this morning, we propose to provide a soil vapor analysis screening study of the site referred to above and will in addition, take soil samples for laboratory analysis. The soil vapor analysis will be performed using our own field photoionization equipment.

This study will provide qualitative data relative to volatile organics or light hydrocarbon chemicals contaminating the soil. Negative results from the screening study will assure that entire classifications of organic chemicals are not contaminating the soil and groundwater at the site.

In addition, soil samples will be taken and provided for chemical analysis in the laboratory to determine the presence of EP-toxicity heavy metals. If the tests all give negative results, it represents a reasonable assurance that the site has not been contaminated by many of the more common materials considered hazardous by the U.S. Environmental Protection Agency. If positive results are obtained, you will be contacted so that we may discuss options and alternatives if more definitive determinations are desired. After performing the above tests and analyses, we will provide a brief report of our findings for you to use during your short term considerations.

We propose to provide all of the above for a fixed fee of $3,000.00 which includes all expenses, laboratory costs, and fees.

In addition, while at the site, we will obtain as much information as possible in order to evaluate the costs associated with permanently decommissioning the underground gasoline storage tank at the site. The decommissioning will have to be in accordance with all protocols and regulations currently in effect and enforced by Federal Environmental Agencies as well as the State and City Department of Environmental Conservation and Fire Marshal's Offices.

We trust the above meets your requirements. If there are any questions at all, please do not hesitate to contact me directly at any time. We look forward to working with you on this assignment.

Sincerely yours,

Arthur Gerunda
President

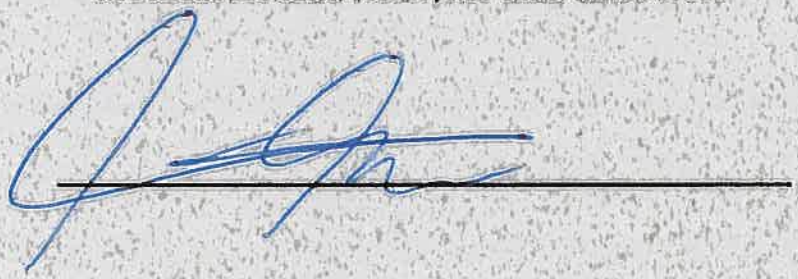
HAZARDOUS SUBSTANCES SURVEY & REPORT

27-10 HUNTERSPOINT AVENUE LONG ISLAND CITY, NY



PRESENTED TO BLACK BEAR COMPANY INC.

PROJECT NO. J-955

FEBRUARY 14, 1990

REPORT PREPARED & CERTIFIED BY ARTHUR GERUNDA, PRESIDENT

NYC ASBESTOS CERT. #03397; NYS CERT. #AH88-07511

NOTE: THIS DOCUMENT IS SOLELY INTENDED TO MEET THE PRE-LOAN REQUIREMENTS OF THE INSTITUTION NOTED ABOVE. NO AUTHORIZATION IS GIVEN TO DISTRIBUTE THIS REPORT TO ANY PARTIES NOT INVOLVED IN THE TRANSACTION FOR WHICH THE REPORT WAS PUBLISHED. THIS DOCUMENT IS NOT TO BE USED AS THE BASIS FOR ANY REMEDIAL ACTION.

EXECUTIVE SUMMARY

The property that was surveyed and is the subject of this report was **found to free of any overt signs of contamination by light hydrocarbons, volatile organics or EP Toxicity heavy metals.**

Asbestos Containing Material (ACM) was found to exist in the building in the form of thermal insulation on heating system pipes and acoustic ceiling tiles forming a dropped ceiling in the office areas.

INTRODUCTION

MTS EnviroSurv Inc. (MTS), was engaged by **Black Bear Inc.** to provide an environmental survey of the property located at 27-10 Hunterspoint Avenue. The purpose of the survey was to determine if there were any environmentally related reasons to prevent Black Bear from considering purchase of the site.

It is not practical to engage in an environmental investigation that includes analysis of soil, groundwater and air in a search for each of the materials considered hazardous and listed as toxic substances by the United States Environmental Protection Agency.

THERE WAS THE POTENTIAL FOR CONTAMINATION BY PETROLEUM HYDROCARBONS

A well planned environmental investigation seeks to establish if residual contamination has occurred by polluting the site through potential ecological hazards. For the case of the site in question, materials with a reasonable potential for contaminating the site were motor fuels, engine lubricants and heating oil. Motor fuels and heating oil were stored at the site in underground tanks. Gasoline was contained in 5 four thousand gallon, single wall, steel, storage vessels, installed in a concrete vault in the open paved area of the property. These tanks fed a gasoline pump island that was used to fuel vehicles used by previous occupants, Emery Freight and Purolator Courier.

Engine lubricants were stored in the building in a floor mounted storage tank and in small containers. Number 2 fuel oil was stored in an underground tank installed adjacent to the north-east corner of the building.

The tanks were tested using the petrotite method in November of 1989. Data from these tests, submitted by the current owner of the building indicated that the tanks did not leak.

SOIL VAPOR TESTS AND LABORATORY ANALYSES OF SOILS WERE CONDUCTED

During an inspection of the property, MTS conducted soil vapor analysis to determine if there was any residual contamination of the soil by light hydrocarbons or volatile organics that may have resulted from spilling of these materials. Further, samples of soil were taken from areas surrounding the underground tanks and gasoline pumps and tested for heavy metals. These tests were conducted in order to determine if leaded fuels had been spilled

into the soil in the past or if industrial wastes were dumped on the site or brought in as landfill prior to development and improving the site with the building and other facilities.

Soil vapor tests were likewise conducted adjacent to and over the fuel oil storage tank. These tests were done to determine if any light hydrocarbons had been introduced to the soil by leaking of the fuel oil tank. Soil vapor tests were conducted using a field chromatograph in conjunction with a photoionization device.

Approach to Study

The approach to this study was to verify conclusively that contamination by materials considered to be toxic or hazardous had not occurred. The investigation focused on the contaminants that could generally be classified as flammable explosives, gasoline, petroleum products, polychlorinated biphenyls, including materials defined as hazardous by the Federal Government and the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA): The Hazardous Materials Transportation Act: The Resource Conservation and Recovery Act (RECRA), and statutes adopted as a result of these environmental regulations. In addition, the survey focused on the presence of any extraordinary contaminants, such as asbestos and municipal wastes or other debris and trash.

For the purposes of this environmental audit, it was decided that proof of the absence of any of these materials at the time of the survey, superceded any information suggesting that historical uses of the property had the potential for causing contamination.

Methodology

Determination of the presence of solid contaminants such as asbestos, solid wastes and debris, were determined by visual inspection.

The balance of the contaminants upon which the investigation was focused, were, in actuality, a variety of families of organic chemicals. These organic chemicals fell under the general classification of halogenated and non-halogenated organics, petroleum fractions, hydrocarbons, aliphat below the surface of the soil, or intermingled with the groundwater. The presence of volatile liquid organic material creates vapors containing the organic material. These vapors, being lighter than air, rise from the surface of the liquid through the soil above. The presence of these vapors in the soil is verification of the existence of the liquid below the surface of the soil.

SURVEY & OBSERVATIONS

The property was free of any overt signs of contamination. There were no stains or markings on the surface of the asphalt paving that could have been considered symptoms of spilling of organic chemicals or hydrocarbons. Inspections of low points on the property, where rainwater and runoff had accumulated, showed that there was no silt, sediment or other indications of pollutants in runoff.

PID READINGS WERE NEGATIVE

Soil Vapor Analysis readings were made by boring 5 feet below the surface of the property and pumping the soil vapors through the PID. When performed in and around the tank vault, the PID readings were negative indicating there was no gasoline, light hydrocarbons or volatile organics present in the soil. When performed around the pump island directly adjacent to the underground tanks, some elevated readings were obtained. These readings were low however, less than 30 parts per million higher than ambient air. These slightly elevated readings could be attributed to minor spills of gasoline at the pumping station. The spill could have penetrated through the concrete apron.

Similar soil vapor testing performed adjacent to and directly over the fuel oil storage tank indicated that there were no leaks of #2 oil from the tank into the soil.

A probing inspection was made of the interior of the building. There was a 275 gallon tank mounted to the floor of the garage area inside the building. This tank was used to store engine lubricating oil. Leaks and spills of this material were observed. **The concrete floor was sufficient to contain the material however, and prevented it from penetrating into the soil and groundwater beneath the building.**

ASBESTOS FOUND IN CEILING TILES

An inspection was made of the space in the building on the ground floor and the second floor that was developed as office space. There was a dropped ceiling formed by acoustic tiles throughout most of the office, locker room and restroom areas. A sample of the ceiling tile was taken and analysis in the laboratory using polarized light microscopy indicated that the tiles contained Chrysotile Asbestos. **The material was in good condition and not friable.**

An inspection of the space above the dropped ceiling revealed that there was no pipe insulation, HVAC duct insulation, fireproofing or any other materials that could have been suspected of containing asbestos.

ASBESTOS FOUND ON PIPE INSULATION IN BOILER ROOM

An inspection of the boiler room which was located on the north side of the building revealed that there was thermal insulation on the piping that contained asbestos. The boiler room was constantly kept under lock and key and inaccessible to any visitors, tenants or employees except for maintenance workers. The material was in poor condition and was friable.

CONCLUSIONS AND RECOMMENDATIONS

The property did not appear to have suffered any consequential contamination of the soil and groundwater as a result of previous activities at the site. All tests indicated that there was no trace of entire classifications of chemicals in the soil such as volatile organics, light hydrocarbons and other groups of volatile organic containing two or more carbon atoms.

The optimum economic scenario for the five underground storage tanks should be developed. The capital cost for installation and testing of the tanks has already been expended. The situation can be exploited by adapting the tank for use as storage capacity for fuels, lubricants and other inventory. While the existence of the tanks represents a significant asset, to take advantage of the situation certain liabilities must be assumed. These liabilities are related to underground storage tank monitoring, maintenance and periodic testing and costs for these operating functions. In the office areas, the ACM is a liability because it exposes the owner of the building to legal responsibility for health related factors of utilities and occupants, justified or otherwise.

LABORATORY ANALYSIS

Bulk samples of materials suspected of containing asbestos were subjected to Polarized Light Microscopy analysis at the facilities of Laboratory Testing Services, Inc., an EPA and NIOSH approved laboratory located in Westbury, New York.

Samples of soil and groundwater were subjected to chemical laboratory analysis at the facilities of H2M Labs, Inc., an EPA approved and New York State certified laboratory located in Melville, New York.

GENERAL ANALYSIS

This report is based on the observations made on January 16, 1990 at the site described. The survey was made to determine if there were any overt signs of contamination present at the site, any hazard due to friable Asbestos, or if there was any indication of noncompliance with Federal or Local Environmental Regulations.

This report applies only to those portions of the building, property, rooms, public access areas and utility areas inspected. The observations reported do not apply to those areas or items not seen, not capable of being seen or otherwise difficult to inspect.

This report is not to be construed as or used a guarantee, a warranty, a prediction of future condition or an estimate of value.

LAB. NO.: 90-03132

CLIENT: Management & Technology Services
256-B Orinoco Drive
Brightwaters, New York 11718
Attn: Mr. Art Gerunda

MATERIAL: Thirteen (13) Bulk Samples

SUBMITTED FOR: Asbestos Determination

1.0 BACKGROUND:

Laboratory Testing Services, Inc. received thirteen (13) bulk samples for asbestos determination from Management Technology Services, Brightwaters, New York.

2.0 PROCEDURE:

Analysis of friable samples was done in accordance with EPA "Interim Method for the Determination of Asbestos in Bulk Insulation Samples" (EPA-600/M4-82-020, Dec. 1982).

This method utilizing Polarized Light Microscopy is applicable to all bulk samples of friable insulation materials submitted for identification and quantification of asbestos components.

Analysis of non-friable materials is performed by a modified version of (EPA-600/M4-82-020). Non-friable substances are not within the scope of the EPA method. Quantification of asbestos in these samples may deviate from the accurate range normally obtained from (EPA/600/M4-82-020).

3.0 APPLICABLE QUALIFICATIONS:

Our Laboratory is accreditted under the National Voluntary Laboratory Accreditation Program (NVLAP) for bulk asbestos analysis. Our laboratory has been assigned NVLAP Laboratory Code Number 1332. This program is performed under the United States Department of Commerce, National Institute of Standards and Technology (formerly National Bureau of Standards), Gaithersburg, Maryland.

Laboratory Testing Services, Inc. is an approved laboratory in the New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP Identification # 10837).

4.0 RESULTS:

The following results were obtained from our tests.

75 URBAN AVENUE, WESTBURY, NEW YORK 11590 • (516) 334-7770 • (800) 433-0008 • FAX NO. 516-334-7720

Laboratory Testing Services

Methodology Explanation:

Laboratory Testing Services, Inc. follows guidelines of EPA-600/M4-82-020 for the analysis of bulk samples for asbestos by polarized light microscopy. This method was prepared by the EPA to set criteria for the analysis of friable substances. (Easily crumbled or reduced to a powder by hand pressure). Friable samples typically include pipe wrap and pipe joint cement. Occasionally, samples of non-friable materials are submitted for analysis for asbestos. Examples of these substances are floor tile and wall plaster. Analysis of these materials sometimes require deviations from the EPA method. Laboratory Testing Services, Inc. utilizes the following methods to analyze substances which require a deviation from EPA method 600/M4-82-020:

A) Low Temperature Ashing - The sample is placed in a furnace at low temperature (less than 350°c) to burn off vinyl matricies or large amounts of cellulose, Asbestos is a mineral and will not burn off. This method facilitates the detection of small amounts of asbestos in substances with a vinyl matrix (floor tile) or those with a large amount of cellulose (certain pipe wraps and ceiling tile).

B) Milling - Non-friable substances are placed in a mortar and pestle or "Wiley" mill and are pulverized.

C) Acid Wash - The sample was washed in warm dilute Hydrochloric Acid or Acetic Acid to remove calcium carbonate, gypsum and/or bassanite (plaster) deposits.

D) Hexametaphosphate Wash - The sample was washed in a 1% Hexametaphosphate solution to remove calcium carbonate, gypsum and/or bassanite (plaster) deposits.

When a deviation from EPA Method 600-M4-82-020 was used to analyze a sample, this is noted in column 3 of Laboratory Testing Services, Inc. results reporting forms (under "color, method"). For example, if ashing was used as part of the analytical process, this is signified as "2-A" in the method column. If milling was used as part of the Analytical process, this is signified as "2-B" in the method column.

Certificate of Capital Improvement

To be completed by customer and given to, signed by and retained by contractor making capital improvement to the real property.

The contractor must collect the sales tax on the full amount charged under the contract unless the customer gives him a properly completed Certificate of Capital Improvement. When a properly completed Certificate of Capital Improvement has been furnished to the contractor, the burden of proving the job or transaction is not taxable rests solely upon the customer.

This certificate must be issued to a contractor by his customer as evidence that the work to be performed will result in a capital improvement to real property. THIS CERTIFICATE MAY NOT BE USED TO PURCHASE BUILDING MATERIALS OR OTHER TANGIBLE PERSONAL PROPERTY TAX FREE. Acceptance of this certificate by a contractor does not relieve the contractor of his liability for the payment of sales tax on his purchase of building materials or other tangible personal property incorporated into the real property as a capital improvement.

Read this form completely before making any entries

THIS CERTIFICATE IS NOT VALID UNLESS ALL ENTRIES ARE COMPLETED

1.0 EXECUTIVE SUMMARY

FleetBoston Financial (Fleet) authorized ATC Associates Inc. (ATC) to perform a Level 2 Environmental Site Assessment (Level 2 ESA) of the property located at 27-10 Hunters Point Avenue, Long Island City, New York (the "Site"). The Site is bound to the north by Hunters Point Avenue, to the west by 27th Street, to the south industrial/commercial properties, and to the east by Dutch Kills Creek. Black Bear Company, Inc. and Carey Limousine NY, Inc. currently occupy the Site.

A previous Level 1 Environmental Site Assessment (Level 1 ESA) report, prepared by Freudenthal & Elkowitz Consulting Group, Inc. (FECG), on behalf of Fleet, dated December 11, 2002, identified the following recognized environmental conditions warranting additional investigation at the Site:

- The former presence of five (5) 4,000-gallon gasoline underground storage tanks (USTs) and associated piping, for which no documentation related to their removal was available.
- Interior oil/water separator, floor drains and catch basins.
- The active 7,500-gallon UST.
- An exterior truck scale, oil/water separator and concrete pad.
- The possible presence of additional USTs throughout the Site.
- Historic fill materials.

Based on these concerns, a Level 2 ESA was conducted by ATC, on March 11-12, 2003 to evaluate soil and/or groundwater quality beneath the Site. As part of the Level 2 ESA, ATC conducted a geophysical survey and a soil/groundwater investigation.

The geophysical survey did not identify the presence of any additional USTs other than one (1) in service 7,500-gallon fuel oil UST and one (1) in service 550-gallon waste oil UST. Due to the poor quality of the Site fill material, ATC was unable to evaluate the presence of any underground piping associated with the former USTs.

According to the Site personnel, and documents provided to ATC at the time of the Site investigation, the five (5) 4,000-gallon USTs were removed from the Site by Tone Tank and Pump, Inc. in 1990. The documents indicated that these USTs were successfully tightness tested prior to removal.

During the course of the geophysical study ATC determined that an oil/water separator was located outside the Site building. An additional oil/water separator was also located next to the boiler room within the Site building.

ATC advanced a total of sixteen (16) borings throughout the Site and collected a total of sixteen (16) soil samples and six (6) groundwater samples for laboratory analysis during the Level 2 ESA.

The Site soils consist of approximately nine (9) feet of fill material containing brick, concrete, fly ash, slag, fine silty sands, clay and fine gravels. Native material, consisting of fine to medium sands with some silt, was observed at depths greater than nine (9) feet bgs.

Field screening of soil samples with a photoionization detector (PID), indicated that the Site soils exhibited no field evidence of petroleum contamination.

Laboratory results indicated that no petroleum-related volatile organic compounds (VOCs) were detected above the New York State Department of Environmental Conservation Technical and Administrative Guidance Memorandum # 4046 (NYSDEC TAGM Memo) – Soil Cleanup Objectives, in any of the soil samples collected from the Site. Total VOCs ranged from non-detect to 110 parts per billion (ppb).

Semivolatile organic compounds (SVOCs) were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives in six (6) of the sixteen (16) soil samples collected for laboratory analysis. Total SVOCs ranged from non-detect to 104,140 ppb.

Soil samples B-8 and B-14 collected from the vicinity of the interior floor drain and exterior oil/water separator, respectively, contained 1,780 parts per million (ppm) and 557 ppm of lead respectively. These concentrations are above the NYSDEC TAGM Eastern USA Background Levels of 500 ppm for this substance.

No polychlorinated biphenyls (PCBs) were detected above the laboratory methods detection limits (LMDL) in the soil samples collected adjacent to the oil/water separators.

The laboratory results for groundwater sample, GW-1 collected from soil boring (B-2) within the vicinity of the former gasoline USTs area, indicated that Benzene was detected slightly above the NYSDEC Division of Water Technical and Operational Guidance Series (1.1.1) *Ambient Water Quality Standards and Guidance Values* (NYSDEC TOGS Standards and Guidance Values). Benzene was detected at 5.6 ppb, slightly above the NYSDEC TOGS Standards and Guidance Value of 1 ppb for this compound. None of the remaining groundwater samples collected from the Site (GW-2, GW-3, GW-4, GW-5 and GW-6) contained VOCs or SVOCs above the LMDL.

2.0 INTRODUCTION

This Level 2 Environmental Site Assessment (Level 2 ESA) was conducted on March 11and 12, 2003 by ATC in order to investigate potential releases of contamination as a result of historical usage of the Site. The Site is located at 27-10 Hunters Point Avenue, in Long Island City, New York. This report was prepared by Levent Eskicakit, P.G. at the request of Mr. Subbu Viswanathan of FleetBoston Financial.

- The Site is a 387,000 square foot commercial property currently utilized for vehicle maintenance and petroleum products storage by Black Bear Company, Inc. The northwest portion of the Site building is utilized by Carey Limousine NY, Inc. as an office space.

3.0 SUMMARY OF PREVIOUS ENVIRONMENTAL SITE ASSESSMENTS

According to a Level I ESA, prepared by FECG, on behalf of Fleet, dated December 11, 2002, the Site was historically utilized for industrial purposes including, a truck sales and service facility, a truck depot for a shipping company and a warehouse to drum and store petroleum and vehicle related products (i.e., motor oil, antifreeze and greases, etc.). The Level I ESA report identified USTs, oil/water separators, subsurface scales and floor drains were identified at the Site. Additionally, five (5) 4,000-gallon gasoline USTs were reportedly removed from the Site in 1990.

The following areas of concern warranting additional investigation were identified by FECG at the Site:

- AOC-1: The presence of five (5) 4,000-gallon gasoline USTs and associated piping, for which no documentation related to their removal was available.
- AOC-2: Interior oil/water separator, floor drains and catch basins.
- AOC-3: An active 7,500-gallon UST.
- AOC-4: An exterior truck scale, oil/water separator and concrete pad.
- AOC-5: The possible presence of additional USTs at the Site.
- AOC-6: Historical fill material.

4.0 SCOPE OF INVESTIGATION

The scope of work for this Level 2 ESA focused on the above areas of concern that were identified by the prior Level 1 ESA. A geophysical survey was conducted to investigate the presence of any additional potential USTs and underground piping. Following the geophysical survey, ATC conducted soil and groundwater sampling using hydraulic direct push methods.

4.1 Scope of Work

ATC conducted the following scope of work for the Level 2 ESA:

Task 1 – Preliminary Work

- Contacting "One-Call" subsurface utility mark-out service;
- Preparation of a site-specific health and safety plan (HASP) for the Level II ESA work at the Site;

Task 2 – Geophysical Investigation

An Electromagnetic (EM) Survey followed by a Ground Penetrating Radar (GPR) Survey were conducted to locate any potential USTs, and piping runs in the areas characterized by former and present petroleum storage. A Geonics EM-61 time domain metal-detector and a GSSI SIR 3 GPR in conjunction with a 300-megahertz antenna were used. The EM-61 induces an electromagnetic field and measures the response to both ferrous and non-ferrous metallic objects using a two-coil receiver system. A grid of north-south traverses was established across the Site at five-foot intervals. GPR was used to further characterize the source of any magnetic anomalies that were detected.

Task 3 – Subsurface Soil and Groundwater Evaluation

A total of sixteen (16) soil borings were advanced at Site using Geoprobe techniques. One (1) soil sample was collected from each of the sixteen (16) soil borings and submitted to a New York State ELAP certified laboratory. The soil samples were collected from each boring from the soil horizon showing the highest apparent contamination. If no field evidence of soil contamination was detected, then a sample from six inches above the water table was retained for laboratory analysis. All soil samples were analyzed for VOCs and SVOCs in accordance with EPA Methods 8260 and 8270, respectively. In addition, the soil samples collected adjacent to the oil/water separators were analyzed for PCBs and RCRA metals in accordance with EPA Methods 8082 and 6000/7000 series, respectively.

ATC also collected six (6) groundwater samples from the Site. The grab samples were collected using "hydropunch" type water sampling units. The groundwater samples were

analyzed for VOCs, and SVOCs, in accordance with EPA Method 8260 and 8270, respectively.

4.2 Geophysical Survey

The results of the geophysical survey did not identify the presence of any additional USTs at the Site. Due to poor quality of the Site fill material, ATC was unable evaluate the presence of any underground piping associated with the former USTs. Figure 2 portrays the areas investigated during the geophysical survey.

4.3 Soil Sampling and Field Observations

Vertical soil samples were obtained via Geoprobe® technology utilizing a Macro Core (MC) open sampler to collect discrete soil cores. Disposable acetate sampling sleeves were inserted into the Geoprobe® equipment in order to obtain soil samples from selected depths. These samplers utilize open tube design and are capable of retrieving a 1.5" diameter by 44" long soil sample.

ATC advanced a total of sixteen (16) soil borings throughout the Site. The Site soils consisted of approximately nine (9) feet of fill material containing brick, concrete, fly ash, slag, fine silty sands, clay and fine gravels. Native material, consisting of fine to medium sands with some silt, was observed at depths greater than 9 feet bgs. Groundwater was observed at depths of 9 to 13 feet bgs.

Soil cores were continuously collected for field screening at all boring locations. Each soil core collected was screened with a pre-calibrated PID. Upon calibration, the PID registered a background reading of zero to 0.1 ppm. The soil was screened a minimum of one reading per foot during the soil logging process and the readings recorded on the corresponding boring log (see Appendix 1). PID readings ranged from non-detect to 1 part per million (ppm).

ATC collected one soil sample from each of sixteen (16) soil borings for laboratory analysis. Soil samples were collected from the interval characterized by the greatest field evidence of contamination. If no field evidence of contamination was detected then soil samples were collected six (6) inches above the groundwater table at the Site.

Selected soil samples were placed in proper, laboratory-supplied glassware, labeled, and then placed in a cooler with ice, and later submitted to Scilab Boston, Inc., a New York-certified laboratory (Certification No. 5974). The soil analyses included: analysis of VOCs and SVOCs, with additional analysis for PCBs and RCRA Metals performed on two (2) of the soil samples. The analytical parameters were selected based on the review of previous reports, and on the types of contaminants suspected to be present based on Site history.

4.4 Groundwater Sampling and Field Observations

ATC collected a total of six (6) groundwater samples utilizing a Geoprobe® groundwater sampling unit. A dedicated flexible polyethylene tube was inserted through the hollow push rods to groundwater at borings B-2 (GW-1), B-3 (GW-2), B-5 (GW-3), B-6 (GW-4), B-11 (GW-5) and B-15 (GW-6). These borings were selected for groundwater samples due to the presence of possible sources of groundwater contamination and to assess off-site migration of contaminants onto the Site. Water was pumped to appropriate sample containers using a peristaltic pump. All sampling equipment which contacted soil or groundwater was decontaminated between soil borings using an alconox wash, water rinse, second alconox wash and water rinse. Depth to groundwater at the Site was found to be approximately nine (9) feet to thirteen feet bgs.

The collected groundwater samples were submitted to Scilab Boston, Inc. for analysis under EPA Method 8260 (VOCs) and EPA Method 8270 (SVOCs).

5.0 GROUNDWATER FLOW DIRECTION

Based upon Site topography and drainage patterns, groundwater is expected to flow to the west towards Dutch Kills Creek.

6.0 RESULTS OF SOIL SAMPLING / ANALYSIS

The results of the soil laboratory analyses are summarized in Table 1. The complete laboratory report is provided in Appendix 3.

As indicated in Table 1, no VOCs were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives. Total VOCs ranged from non-detect to 110 ppb in the samples collected from all soil borings.

SVOCs were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives in six (6) of the sixteen (16) soil samples. Specifically, soil samples from borings B-4, B-5, B-8, B-9, B-12 and B-13 contained elevated SVOCs above their respective Cleanup Objectives. Total SVOCs ranged from non-detect to 104,140 ppb. These samples were collected from historical fill horizons at the Site.

No PCBs above laboratory method detection limits were detected in the soil samples collected from soil borings B-9 and B-13.

Soil samples B-8 and B-14 collected from the vicinity of the interior floor drain and exterior oil/water separator, contained 1,780 ppm and 557 ppm of lead respectively, which is slightly above the NYSDEC TAGM Eastern USA Background levels of 500 ppm for this substance. No other RCRA metals were detected above the NYSDEC TAGM Eastern Background levels in the remaining soil samples at the Site. These samples were collected from the historical fill horizons at the Site.

7.0 RESULTS OF GROUNDWATER SAMPLING / ANALYSIS

The results of the groundwater laboratory analyses are summarized in Table 2. The laboratory report is presented in Appendix 3.

Analysis of the groundwater sample GW-1 collected from soil boring B-2 within the vicinity of the former gasoline USTs identified Benzene slightly above the NYSDEC TOGS Standards and Guidance Values. Total VOCs range from non-detect to 5.6 ppb in all groundwater samples analyzed.

No other VOCs or SVOCs were detected above the LMDL in the remaining groundwater samples collected from the Site.

8.0 CONCLUSIONS

Based upon the results of the Level 2 ESA, ATC concludes the following:

The Site soils consisted of approximately nine (9) feet of urban fill material containing brick, concrete, fly ash, slag, fine silty sands, little clay and fine gravels. Native material, consisting of fine to medium sands with some silt, was observed at depths greater than 9 feet bgs. Groundwater was observed at depths of 9 to 13 feet bgs.

Laboratory results indicated that no VOCs were detected above the NYSDEC TAGM Memo Soil Cleanup Objectives in any of the soil samples collected for laboratory analysis from the Site. However, SVOCs were detected above NYSDEC TAGM Memo Soil Cleanup Objectives in six (6) of the sixteen (16) soil samples collected from the Site. The elevated concentrations are typical of urban fill materials and are attributed to fill components such as ash and asphalt. ATC concludes that the results do indicte evidence of a release of petroleum product.

The laboratory results indicated that groundwater samples GW-2, GW-3, GW-4, GW-5 and GW-6 from borings B-3, B-5, B-6, B-11 and B-15, respectively, contained no VOCs or SVOCs above the laboratory methods detection levels. However, the laboratory results indicated that groundwater sample (GW-1) collected from soil boring (B-2) within the vicinity of the former gasoline USTs contained concentration of Benzene at 5.6 ppb, slightly above the NYSDEC TOGS standards and guidance value of 1 ppb for this compound. Although the Benzene maybe attributed to the former gasoline USTs, the level is relatively minor and limited in extent. Additionally, no benzene was detected in soil samples from this location. Based on these results, ATC concludes that the detected Benzene does not represent an environmental concern for the Site.

10.0 LIMITATIONS

Limitations of this Level 2 Environmental Site Assessment

ATC has prepared this Level 2 Environmental Site Assessment in accordance with the contract scope of work, using reasonable efforts to attempt to identify areas of potential liability associated with soil and groundwater contamination at the Site. Any survey for the soil or groundwater contamination in the Site was limited in nature. The survey may not be relied upon as a comprehensive investigation for the presence of such contamination in all areas of the Site, or as meeting any standards established for conducting such surveys. ATC has made no independent investigation of the accuracy of these secondary sources and has assumed them to be accurate and complete. ATC does not warrant the accuracy or completeness of information provided by secondary sources. ATC does not warrant that contamination that may exist on the Site has been discovered, that the Site is suitable for any particular purpose or that the Site is clean or free of liability. Any cost estimates are based on general comparisons with past projects of similar scope and size, and actual costs or design-phase estimates may vary substantially from these estimates.

Re: **Oil Tank Registration Renewal**
PBS # 2-452335

PLEASE FORWARD THIS LETTER TO OWNER OR MANAGING AGENT

Dear Property Owner / Manager:

You have been identified as the owner/managing agent of those facilities included in this renewal package. Enclosed with this letter are computer records of bulk oil storage facilities that show the registration status with New York State Department of Environmental Conservation (NYS DEC) expired on 08/23/1993. Failure to renew the registration with NYS DEC is a violation of the Environmental Conservation Law (ECL), Section 17-1009(2). Under ECL, Section 71-1929, the maximum allowable monetary penalty is $25,000 per day per violation.

It is imperative that you take immediate action to alleviate this serious violation. You have **ten (10)** business days from the date of this letter to respond to this notice. Failure to respond will trigger a field inspection and referral to the legal division for formal enforcement action.

To facilitate filling out of the applications for renewal, we have included computer printouts of the facilities information from existing registration records. You should copy as much information from the computer printouts onto the applications as appropriate. The registration fee schedule is included in the instruction sheet. Completed applications and fee checks should be sent to the following address.

NYS Dept. of Environmental Conservation
47-40 21st Street, 2nd Floor
Long Island City, NY 11101
Attn: PBS Unit
(718) 482-4933 Ext. 7149

Sincerely,

PBS Unit

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION

INSTRUCTIONS FOR COMPLETING PETROLEUM BULK STORAGE APPLICATION

Please type or print all items, except "signature" in Section A. This form must be completed for each applicable petroleum facility. Forward completed applications to the appropriate DEC Regional Office. Use one form if there are 15 or less regulated tanks at a facility. For more than 15 regulated tanks at a facility, use additional forms as required. A site plan including tank numbers should be enclosed. **Instructions for Section B are on the reverse side.**

SECTION A

Item Name	Specific Instructions
PBS NUMBER	Enter the seven digit DEC Registration Number if the facility was previously registered; otherwise, leave blank.
OTHER EXISTING DEC NUMBERS	**CBS Number:** Enter the Chemical Bulk Storage Number if the facility has been registered under the Hazardous Substance Bulk Storage Law, Article 40 of ECL; 6 NYCRR Parts 595-599. If not applicable, write "Not Applicable". **SPDES Number:** Enter the number which has been assigned to a facility under the State Pollutant Discharge Elimination System, Article 17, Title 8 of ECL, 6 NYCRR Parts 750-758. If not applicable, write "Not Applicable".
TRANSACTION TYPE	
Initial/New Facility:	First application for registration by the owner of a regulated facility. PBS Number will be assigned by DEC.
Change of Ownership:	Application for registration by the new owner of the facility being transferred. Be sure to enter the PBS Number from the existing registration certificate and complete all sections.
Substantial Tank Modification:	Complete this section if one of the following applies: (1) one or more new stationary tanks has been added to the facility; or (2) an existing stationary tank has been replaced, reconditioned or permanently closed. In Section A, only complete the Facility Section and PBS Number. Be sure to provide the signature of a duly authorized officer. In Section B, fill in the entire line of information for each tank being amended.
Information Correction:	If any information changes have occurred since the initial application or the last renewal, include the corrected information in the appropriate spaces and be sure to include the PBS Number. In Section A, the signature of a duly authorized officer must be provided.
Renewal:	Application is being made for a previously registered facility that has not changed ownership since the last registration. Registration certificates for petroleum bulk storage facilities must be renewed every five years and are not transferable. Indicate any changes that may have occurred since last renewal and provide the signature of the duly authorized officer.
GEOGRAPHICAL LOCATOR	Indicate the actual latitude and longitude for the facility. This includes the degrees, minutes and seconds of the location. If known, please provide.
FACILITY INFORMATION	Enter the name and location (NO PO Boxes, please) of the facility. Include any information that would asist in locating the facility. For county, enter the county in which the facility is located. For township, enter the geographical location, not the mailing city. Enter the facility telephone number and the name of the operator at the facility who is familiar with the tanks and the efforts of the business to comply with provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
OWNER INFORMATION	Name, address and telephone number of the company which owns the facility. Federal Tax Identification Number is the number assigned by the Internal Revenue Service. It is required by New York State Department of Tax and Finance. For owner type, check the appropriate box. Note: apartment buildings are considered corporate/commercial.
MAILING CORRESPONDENCE	Enter the desired mailing name and address for correspondence (i.e. Certificates, Tank Bulletin) and the name of the contact person who is familiar with the efforts of the business to comply with the provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
TYPE OF PETROLEUM FACILITY	Check the appropriate box(es). If other, specify the type of facility in the space provided.
NAME AND OFFICIAL TITLE OF OWNER OR OWNER'S AUTHORIZED REPRESENTATIVE	Please type or print both name and title. An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility. In the case of a partnership or sole proprietorship, the application must be signed by a general partner or the proprietor, respectively. In the case of a municipality, state or other public facility, the application must be signed by either a principal or executive officer, ranking elected official or other duly authorized employee.
AMOUNT ENCLOSED	For Transaction Types 1, 2 and 5, please indicate the enclosed fee. Make check/money order payable to NYSDEC. The fee is based on combined petroleum tank storage capacity at the facility in gallons: 1,101-2,000 gallons—$50/facility, 2,001-4,999 gallons—$150/facility, 5,000-399,999 gallons—$250/facility.
SIGNATURE AND DATE	Signature of the owner or duly authorized officer is required, along with the date the application was prepared.

Thomas C. Jorling
Commissioner

Dear Petroleum Storage Tank Owner:

The 5-year registration for your petroleum storage tank(s) will expire soon. The expiration date of your registration certificate is printed on the top right-hand corner of Section B of the enclosed renewal application. The enclosed Petroleum Bulk Storage (PBS) renewal package includes the following documents:

(1) A PBS renewal application form with portions of Sections A and B pre-printed;

(2) An instruction sheet with detailed explanations for completing the PBS renewal application form; and

(3) A list of special instructions on completing your renewal application form (on the back of this letter).

Owners are required to use the enclosed pre-printed revised PBS application form for renewal. Several items have been added to the application form to supplement the information collected originally at registration.

Please review, revise (if necessary), and complete the renewal application form according to the enclosed instruction sheet. Be sure to fill in all blank portions of the form. Return the completed and signed form and fee to the appropriate DEC regional office, whose address is printed on the top right-hand corner of Section A of the renewal form, before the facility's current registration expires.

Upon receipt and review of the package, the Department will process the completed renewal forms and print a new 5-year certificate. The certificate and all future correspondence will be mailed to the address provided in the "Mail Correspondence" section of the renewal form.

If you have any questions or need additional forms or regulations, please call the appropriate DEC Regional Office or the Bulk Storage Help-line at 1-800-242-4351.

Sincerely,

Thomas E. Quinn, Director
Bureau of Spill Prevention & Response

INSTRUCTIONS FOR COMPLETING PETROLEUM BULK STORAGE APPLICATION

Please type or print all items, except "signature" in Section A. This form must be completed for each applicable petroleum facility. Forward completed applications to the appropriate DEC Regional Office. Use one form if there are 15 or less regulated tanks at a facility. For more than 15 regulated tanks at a facility, use additional forms as required. A site plan including tank numbers should be enclosed. **Instructions for Section B are on the reverse side.**

SECTION A

Item Name	Specific Instructions
PBS NUMBER	Enter the seven digit DEC Registration Number if the facility was previously registered; otherwise, leave blank.
OTHER EXISTING DEC NUMBERS	**CBS Number:** Enter the Chemical Bulk Storage Number if the facility has been registered under the Hazardous Substance Bulk Storage Law, Article 40 of ECL; 6 NYCRR Parts 595-599. If not applicable, write "Not Applicable". **SPDES Number:** Enter the number which has been assigned to a facility under the State Pollutant Discharge Elimination System, Article 17, Title 8 of ECL, 6 NYCRR Parts 750-758. If not applicable, write "Not Applicable".
TRANSACTION TYPE	
Initial/New Facility:	First application for registration by the owner of a regulated facility. PBS Number will be assigned by DEC.
Change of Ownership:	Application for registration by the new owner of the facility being transferred. Be sure to enter the PBS Number from the existing registration certificate and complete all sections.
Substantial Tank Modification:	Complete this section if one of the following applies: (1) one or more new stationary tanks has been added to the facility; or (2) an existing stationary tank has been replaced, reconditioned or permanently closed. In Section A, only complete the Facility Section and PBS Number. Be sure to provide the signature of a duly authorized officer. In Section B, fill in the entire line of information for each tank being amended.
Information Correction:	If any information changes have occurred since the initial application or the last renewal, include the corrected information in the appropriate spaces and be sure to include the PBS Number. In Section A, the signature of a duly authorized officer must be provided.
Renewal:	Application is being made for a previously registered facility that has not changed ownership since the last registration. Registration certificates for petroleum bulk storage facilities must be renewed every five years and are not transferable. Indicate any changes that may have occurred since last renewal and provide the signature of the duly authorized officer.
GEOGRAPHICAL LOCATOR	Indicate the actual latitude and longitude for the facility. This includes the degrees, minutes and seconds of the location. If known, please provide.
FACILITY INFORMATION	Enter the name and location (**NO PO Boxes, please**) of the facility. Include any information that would asist in locating the facility. For county, enter the county in which the facility is located. For township, enter the geographical location, not the mailing city. Enter the facility telephone number and the name of the operator at the facility who is familiar with the tanks and the efforts of the business to comply with provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
OWNER INFORMATION	Name, address and telephone number of the company which owns the facility. Federal Tax Identification Number is the number assigned by the Internal Revenue Service. It is required by New York State Department of Tax and Finance. For owner type, check the appropriate box. Note: apartment buildings are considered corporate/commercial.
MAILING CORRESPONDENCE	Enter the desired mailing name and address for correspondence (i.e. Certificates, Tank Bulletin) and the name of the contact person who is familiar with the efforts of the business to comply with the provisions of Article 17, Title 10 of the Petroleum Bulk Storage Law, 6 NYCRR Parts 612-614.
TYPE OF PETROLEUM FACILITY	Check the appropriate box(es). If other, specify the type of facility in the space provided.
NAME AND OFFICIAL TITLE OF OWNER OR OWNER'S AUTHORIZED REPRESENTATIVE	Please type or print both name and title. An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility. In the case of a partnership or sole proprietorship, the application must be signed by a general partner or the proprietor, respectively. In the case of a municipality, state or other public facility, the application must be signed by either a principal or executive officer, ranking elected official or other duly authorized employee.
AMOUNT ENCLOSED	For Transaction Types 1, 2 and 5, please indicate the enclosed fee. Make check/money order payable to NYSDEC. The fee is based on combined petroleum tank storage capacity at the facility in gallons: 1,101-2,000 gallons—$50/facility, 2,001-4,999 gallons—$150/facility, 5,000-399,999 gallons—$250/facility.
SIGNATURE AND DATE	Signature of the owner or duly authorized officer is required, along with the date the application was prepared.

RE: 27-10 Hunter Point Avenue, Long Island City NY

I hereby certify that I am an Oil-Burning Equipment Installer with License #2689A and Install Test Repair Buried Tanks License# 61830378.

I further certify that the fuel oil storage system at the above premises has been legally abandoned and the piping capped or sealed on 10/5/05.

1. All contents of the storage system have been removed by A.B.C. TANK REPAIR & LINING INC and the system rendered free of flammable or combustible vapors.

2. All waste was removed from the storage system and has been disposed of in accordance with the applicable city, state and federal requirements.

3. (1) 7500 gallon buried oil tank has been legally abandoned in place by filling with a slurry mix.

4. All connecting lines have been disconnected and sealed. All fill lines have been discontinued, the fill line connection has been sealed with concrete so as to prevent use of fill line and vent line has been left open.

I further certify that the storage system has been legally abandoned in compliance with the Administrative Code of the City of New York and section 21-02 of the NYC Fire Department Rules.

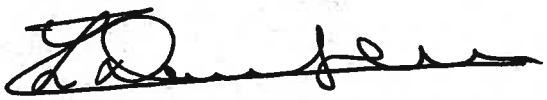
Re: Affidavit of Underground Storage Tank Abandonment
27-10 Hunters Point Avenue
Long Island City, New York

Dear Mr. Chou:



I am pleased to forward to you a copy of the tank abandonment affidavit prepared for the subject 7,500-gallon No. 2 fuel oil underground storage tank (the "subject UST") present at your facility. The original affidavit was forwarded to the New York City Fire Department (see Attachment A).

In addition, a Petroleum Bulk Storage Application form was completed to inform the New York State Department of Environmental Conservation of the permanent closure of the subject UST (see Attachment B).

This completes our abandonment services for the subject UST. Please do not hesitate to contact me with any questions or concerns. I look forward to working with you in the future.

Sincerely,

FREUDENTHAL & ELKOWITZ

REMARKS OR MATERIAL USED

ALL WASTE PRODUCT WILL BE DELIVERED TO PROPER DISPOSAL SITE NAMED ON 364 PERMIT.

§374-2.1 - Definitions

(a) Definitions. Terms that are defined in Sections 370.2 and 371.1 of this Title, as incorporated by reference in subdivision 370.1(e) of this Title, have the same meanings when used in this Subpart, unless otherwise defined in this Subpart.-

(1) **"Aboveground used oil tank"** means a tank used to store or process used oil that is not an underground used oil tank.

(2) **"Adjacent towns or cities"** means towns and cities that share a common border with each other.

(3) **"Container"** means any portable device in which a material is stored, transported, treated, disposed of, or otherwise handled.

(4) **"Contract"**means a promissory agreement between two or more persons to perform or not perform a particular act.

(5) **"Do-it-yourselfer used oil collection center"**, or **"DIY used oil collection center"**, means any site or facility that accepts/aggregates and stores used oil collected only from household do-it-yourselfers.

(6) **"Existing tank"**means a tank that is used for the storage or processing of used oil and that is in operation, or for which installation has commenced on or prior to January 14, 1995. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin installation of the tank and if either: (1) a continuous on-site installation program has begun; or 2) the owner or operator has entered into contractual obligations - which cannot be canceled or modified without substantial loss - for installation of the tank to be completed within a reasonable time.

(7) **"Household do-it-yourselfer used oil"**, or **"DIY used oil"**, means oil that is derived from households, such as used oil generated by individuals through the maintenance of their personal vehicles.

(8) **"Household do-it-yourselfer used oil generator"**, or **"DIY used oil generator"**means an individual who generates household do-it-yourselfer used oil.

(9) **"New tank"** means a tank that will be used to store or process used oil and for which installation has commenced after January 14, 1995.

(10) **"On-premises oil changing operation"** means any commercial operation that drains or collects used lubricating oil and replaces it with new or re-refined lubricating oil.

(11) **"Petroleum refining facility"** means an establishment primarily engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, and lubricants, through fractionation, straight distillation of crude oil, redistillation of unfinished petroleum derivatives, cracking or other processes (i.e., facilities classified as SIC 2911).

(12) **"Processing"** means chemical or physical operations designed to produce from used oil, or to make used oil more amenable for production of fuel oils, lubricants, or other used oil-derived product. Processing includes, but is not limited to: blending used oil with virgin petroleum products, blending used oils to meet the fuel specification, filtration, simple distillation, chemical or physical separation and re-refining.

(13) **"Re-refining distillation bottoms"** means the heavy fraction produced by vacuum distillation of filtered and dehydrated used oil. The composition of still bottoms varies with column operation and feedstock.

(14) **"Retail"** means the sale of lubricating oil to consumers in containers of five gallons or less for direct use by the consumer and not offered for resale.

(15) **"Retail establishment"** means every vendor that sells lubricating oil at retail in quantities in excess of 1,000 gallons per year.

(16) **"Service establishment"** means any automobile service station, including gas only outlets, or any other retail outlet and

boat marina, selling at least 500 gallons of lubricating oil annually and having an on-premises oil changing operation.

(17) **"Tank"** means any stationary device, designed to contain an accumulation of used oil which is constructed primarily of non-earthen materials, (e.g., wood, concrete, steel, plastic) which provides structural support.

(18) **"Total halogens"** means the total of organic and inorganic halides (fluorine, F; chlorine, Cl; bromine, Br; iodine, I), expressed as chloride present in a used oil, in parts per million (ppm) by weight.

(19) **"Underground used oil tank"** means any one or combination of tanks (including any piping connected thereto) that is used to contain an accumulation of used oil, and is entirely covered by earth or other material. This term does not include any storage tank situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

(20) **"Used oil"** means any oil that has been refined from crude oil, or any synthetic oil, that has been used, and as a result of such use, is contaminated by physical or chemical impurities.

(21) **"Used oil aggregation point"** means any site or facility that accepts, aggregates, and/or stores used oil collected only from other used oil generation sites owned or operated by the owner or operator of the aggregation point, from which used oil is transported to the aggregation point in shipments of no more than 55 gallons. Used oil aggregation points may also accept used oil from household do-it-yourselfers.

(22) **"Used oil burner"** means a facility where used oil not meeting the specification requirements in paragraph 374-2.2(b)(1) of this Subpart is burned for energy recovery in devices identified in subdivision 374-2.7(b) of this Subpart.

(23) **"Used oil collection center"** means any site or facility that is recognized by this department pursuant to paragraph 374-2.4(b)(2) of this Title, to manage used oil, and

accepts/aggregates and stores used oil collected from used oil generators regulated under section 374-2.3 of this Title, who bring used oil to the collection center in shipments of no more than 55 gallons under the provisions of subdivision 374-2.3(e) of this Title. Used oil collection centers may also accept used oil from household do-it-yourselfers.

(24) **"Used oil fuel marketer"** means any person who conducts either of the following activities:

(i) directs a shipment of off-specification used oil from their facility to a used oil burner; or

(ii) first claims that used oil that is to be burned for energy recovery meets the used oil fuel specifications set forth in paragraph 374-2.2(b)(1) of this Subpart.

(25) **"Used oil generator"** means any person, by site, whose act or process produces used oil or whose act first causes used oil to become subject to regulation.

(26) **"Used oil processor/re-refiner"** means a facility that processes or re-refines used oil.

(27) **"Used oil tank system"** means any one or combination of aboveground or underground used oil tanks, including any piping connected thereto, and other associated fixtures or equipment.

(28) **"Used oil transfer facility"** means any transportation related facility including loading docks, parking areas, storage areas, and other areas where shipments of used oil are held for more than 24 hours and not longer than 35 days during the normal course of transportation or prior to an activity performed pursuant to subparagraph 374-2.3(a)(2)(ii) of this Subpart. Transfer facilities that store used oil for more than 35 days are subject to regulation under section 374-2.6 of this Subpart. A used oil transfer facility is also subject to regulation under Subpart 360-14 of this Title, unless exempt pursuant to the terms of subdivision 360-14.1(b) of this Title.

(29) **"Used oil transporter"** means any person who transports

used oil, any person who collects used oil from more than one generator and transports the collected oil, and owners and operators of used oil transfer facilities. Used oil transporters may consolidate or aggregate loads of used oil for purposes of transportation but, with the following exception, may not process used oil. Transporters may conduct incidental processing operations that occur in the normal course of used oil transportation (e.g., settling and water separation), but that are not designed to produce (or make more amenable for production of) used oil derived products or used oil fuel.

§374-2.2 - Applicability

(a) Applicability. This subdivision identifies those materials which are subject to regulation as used oil under this Subpart and Subpart 360-14 of this Title. This subdivision also identifies some materials that are not subject to regulation as used oil under this Subpart, and indicates whether these materials may be subject to regulation as hazardous waste under Parts 370 through 374-1, 374-3, and 376 of this Title.

The storage in tanks of materials which are not subject to regulation as hazardous waste and which are identified in this section as petroleum product, used oil fuels, or as fuels or lubricants derived, re-refined, or re-processed from used oil, may be subject to the requirements and standards of Parts 612, 613, and 614 of this Title.

In addition to the requirements of this Subpart, used oil generators, collection centers, DIY collection centers, aggregation points, transporters, transfer, storage, re-refining or processing facilities, burners and marketers must meet all applicable requirements of Parts 201, 225, 364, and Subparts 360-1 and 360-14 of this Title that are broader in scope or more stringent than the requirements of this Subpart.

(1)) Used oil. The department presumes that used oil is to be recycled or burned for energy recovery unless a used oil handler disposes of used oil, or sends used oil for disposal.

Except as provided in subdivision 374-2.2(b) of this section, the regulations of this Subpart apply to used oil and to materials identified in this subdivision as being subject to regulation as used oil, whether or not the used oil or material exhibits any characteristics of hazardous waste identified in section 371.3 of this Title.

(2) Mixtures of used oil and hazardous waste.

(i) Listed hazardous waste.

('a') Mixtures of hazardous waste, listed in section 371.4 of this Title, and of used oil are subject to regulation as hazardous waste under Parts 370 through 374-1, 374-3, and 376 of this Title, rather than as used oil under this Subpart.

('b') Rebuttable presumption for used oil. Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste because it has been mixed with halogenated hazardous waste listed in section 371.4 of this Title. Persons may rebut this presumption by demonstrating that the used oil does not contain hazardous waste (for example, by using an analytical method from SW-846, as incorporated by reference in paragraph 370.1 (e)(8) of this Title, to show that the used oil does not contain significant concentrations of halogenated hazardous constituents listed in Appendix 23 of this Title).

('1') Laboratory analyses completed for purposes of rebuttable presumption must be performed by a laboratory currently certified under the appropriate approval categories by the New York State Department of Health's Environmental Laboratory Approval Program (ELAP).

('2') The rebuttable presumption does not apply to metalworking oils/fluids containing chlorinated paraffins, if they are processed, through a tolling arrangement, as described in paragraph 374-2.3(e)(3) of this Subpart, to reclaim metalworking oils/fluids. The presumption does

apply to metalworking oils/fluids if such oils/fluids are recycled in any other manner, or disposed.

('3') The rebuttable presumption does not apply to used oils contaminated with chlorofluorocarbons (CFCs) removed from refrigeration units where the CFCs are destined for reclamation. The rebuttable presumption does apply to used oils contaminated with CFCs that have been mixed with used oil from sources other than refrigeration units.

(ii) Characteristic hazardous waste. Mixtures of used oil and of hazardous waste that solely exhibits one or more of the hazardous waste characteristics identified in section 371.3 of this Title, and mixtures of used oil and of hazardous waste that is listed in section 371.4 of this Title solely because it exhibits one or more of the characteristics of hazardous waste identified in section 371.3 of this Title are subject to:

('a') except as provided in clause (2)(ii)('c') of this subdivision, regulation as hazardous waste under Parts 370 through 374-1, 374-3, and 376 of this Title rather than as used oil under this Subpart, if the resultant mixture exhibits any characteristics of hazardous waste identified in section 371.3 of this Title; or

('b') except as specified in clause (2)(ii)('c') of this subdivision, regulation as used oil under this Subpart, if the resultant mixture does not exhibit any characteristics of hazardous waste identified under section 371.3 of this Title.

('c') regulation as used oil under this Subpart, if the mixture is of used oil and a waste which is hazardous solely because it exhibits the characteristic of ignitability (e.g., ignitable-only mineral spirits), provided that the resultant mixture does not exhibit the characteristic of ignitability under subdivision 371.3(b) of this Title.

(iii) Conditionally exempt small quantity generator hazardous waste. Mixtures of used oil and conditionally exempt small

quantity generator hazardous waste regulated under paragraph 371.1(f)(10) of this Title are subject to regulation as used oil under this Subpart.

(3) Materials containing or otherwise contaminated with used oil.

(i) Except as provided in subparagraph (3)(ii) of this paragraph, materials containing or otherwise contaminated with used oil from which the used oil has been properly drained or removed to the extent possible such that no visible signs of free-flowing oil remain in or on the material:

('a') are not used oil and thus not subject to this Subpart; and

('b') if applicable are subject to the hazardous waste regulations of Parts 370 through 374-1, 374-3, and 376 of this Title.

(ii) Materials containing or otherwise contaminated with used oil that are burned for energy recovery are subject to regulation as used oil under this Subpart.

(iii) Used oil drained or removed from materials containing or otherwise contaminated with used oil is subject to regulation as used oil under this Subpart.

(4) Mixtures of used oil with products.

(i) Except as provided in subparagraph (4)(ii) of this paragraph, mixtures of used oil and fuels or other fuel products are subject to regulation as used oil under this Subpart.

(ii) Mixtures of used oil and diesel fuel mixed on-site by the generator of the used oil for use in the generator's own vehicles are not subject to this Subpart once the used oil and diesel fuel have been mixed. Prior to mixing, the used oil is subject to the requirements of section 374-2.3 of this Subpart.

(5) Materials derived from used oil.

(i) Materials that are reclaimed from used oil that are used beneficially and are not burned for energy recovery or used in a manner constituting disposal (e.g., re-refined lubricants) are:

('a') not used oil and thus are not subject to this Subpart; and

('b') not solid wastes and are thus not subject to the hazardous waste regulations of Parts 370 through 374-1, 374-3, and 376 of this Title as provided in clause 371.1(d)(3)(ii)('a') of this Title.

(ii) Materials produced from used oil that are burned for energy recovery (e.g., used oil fuels) are subject to regulation as used oil under this Subpart and Part 225 of this Title.

(iii) Except as provided in subparagraph (5)(iv) of this paragraph, materials derived from used oil that are disposed of or used in a manner constituting disposal are:

('a') not used oil and thus are not subject to this Subpart; and

('b') are solid wastes regulated under Part 360 of this Title, unless they are subject to the hazardous waste regulations of Parts 370 through 374-1, 374-3, and 376 of this Title if the materials are listed or identified as hazardous waste.

(iv) Used oil re-refining distillation bottoms that are used as feedstock to manufacture asphalt products are not subject to this Subpart.

(6) Wastewater. Wastewater, the discharge of which is subject to regulation under either Section 402 or Section 307(b) of the Federal Clean Water Act, as incorporated by reference in subdivision 370.1(e) of this Title (including wastewaters at facilities which have eliminated the discharge of wastewater), contaminated with "de minimis" quantities of used oil are not subject to the requirements of this Subpart. For purposes of this paragraph, "de minimis" quantities of used oils are defined as small spills, leaks, or drippings from pumps, machinery, pipes,

and other similar equipment during normal operations or small amounts of oil lost to the wastewater treatment system during washing or draining operations. This exception will not apply if the used oil is discarded as a result of abnormal manufacturing operations resulting in substantial leaks, spills, or other releases, or to used oil recovered from wastewaters.

(7) Used oil introduced into crude oil pipelines or a petroleum refining facility.

(i) Used oil mixed with crude oil or natural gas liquids (e.g., in a production separator or crude oil stock tank) for insertion into a crude oil pipeline is exempt from the requirements of this Subpart. The used oil is subject to the requirements of this Subpart prior to the mixing of used oil with crude oil or natural gas liquids.

(ii) Mixtures of used oil and crude oil or natural gas liquids containing less than one percent used oil that are being stored or transported to a crude oil pipeline or petroleum refining facility for insertion into the refining process at a point prior to crude distillation or catalytic cracking are exempt from the requirements of this Subpart.

(iii) Used oil that is inserted into the petroleum refining facility process before crude distillation or catalytic cracking without prior mixing with crude oil is exempt from the requirements of this Subpart provided that the used oil constitutes less than one percent of the crude oil feed to any petroleum refining facility process unit at any given time. Prior to insertion into the petroleum refining facility process, the used oil is subject to the requirements of this Subpart.

(iv) Except as provided in subparagraph (7)(v) of this paragraph, used oil that is introduced into a petroleum refining facility process after crude distillation or catalytic cracking is exempt from the requirements of this Subpart only if the used oil meets the specifications of paragraph 374-2.2 (b)(1) of this section. Prior to insertion into the petroleum refining facility process, the used oil is subject to the

requirements of this Subpart.

(v) Used oil that is incidentally captured by a hydrocarbon recovery system or wastewater treatment system as part of routine process operations at a petroleum refining facility and inserted into the petroleum refining facility process is exempt from the requirements of this Subpart. This exemption does not extend to used oil which is intentionally introduced into a hydrocarbon recovery system (e.g., by pouring collected used oil into the wastewater treatment system).

(vi) Tank bottoms from stock tanks containing exempt mixtures of used oil and crude oil or natural gas liquids are exempt from the requirements of this Subpart.

(8) Used oil on vessels. Used oil produced on vessels from normal shipboard operations is not subject to this Subpart until it is transported ashore.

(9) Used oil containing PCBs. Used oil containing 50 ppm by weight, or greater, of polychlorinated biphenyls (PCBs) is a hazardous waste as defined in subdivision 371.4(e) of this Title. In addition to the requirements of this Subpart, used oil containing any quantifiable level of PCBs may be subject to the requirements found in 40 CFR 761.20(e), as incorporated by reference in subdivision 370.1(e) of this Title.

(b) Used oil specifications.

(1) Used oil burned for energy recovery, and any fuel produced from used oil by processing, blending, or other treatment, is subject to regulation under this Subpart unless it is shown not to exceed any of the allowable levels of the constituents and properties in the specification shown in Table 1. Once used oil that is to be burned for energy recovery has been shown not to exceed any specification and the person making that showing complies with subdivisions 374-2.8(c) and (d), and paragraph 374-2.8(e)(2) of this Subpart, the used oil is no longer subject to this Subpart.

(i) Laboratory analyses completed for purposes of

specification determination must be performed by a laboratory currently certified under the appropriate approval categories by the New York State Department of Health's Environmental Laboratory Approval Program (ELAP).

Table 1 - Used Oil Not Exceeding Any Specification Level Is Not Subject to This Subpart When Burned for Energy Recovery[1]	
Constituent/property	Allowable level
Arsenic	5 ppm maximum.
Cadmium	2 ppm maximum.
Chromium	10 ppm maximum.
Lead	100 ppm maximum.
PCBs	2 ppm maximum[2]
Flash point	100 degrees F minimum.
Total halogens	4,000 ppm maximum.[3]

FOOTNOTE: [1]The specification does not apply to mixtures of used oil and hazardous waste that continue to be regulated as hazardous waste (see paragraph 374-2.2(a)(2) of this section).

FOOTNOTE: [2]Used oil containing 50 ppm by weight, or greater, of PCBs is a hazardous waste, excluding oil derived from small capacitors, as defined in subparagraph 371.4(e)(3)(ii) of this Title, as the sole PCB contamination source. Applicable standards for the burning of used oil containing PCBs are imposed by Parts 370 through 374-1 and 376 of this Title and 40 CFR 761.20(e), as incorporated by reference in subdivision 370.1(e) of this Title.

FOOTNOTE: [3]Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste under the rebuttable presumption provided under subparagraph 374-2.2(a)(2)(i) of this section. Such used oil is subject to section 374-1.8 of Subpart 374-1 of this Title rather than this Subpart when burned for energy recovery, unless the presumption of mixing can be successfully rebutted.

(2) All used oil, whether in transit or in storage at a facility, must be considered off-specification used oil, unless analysis or

other information documents that the used oil is on-specification.

(c) Prohibitions.

(1) Surface impoundment prohibition. Used oil must not be managed in surface impoundments, waste piles, pits, ponds or lagoons.

(2) Use as a dust suppressant. The use of used oil as a dust suppressant, for land application, or for disposal directly on the land, is prohibited.

(3) Burning in particular units. Off-specification used oil fuel may be burned for energy recovery in only the following devices:

(i) industrial furnaces identified in subdivision 370.2(b) of this Title;

(ii) boilers, as defined in subdivision 370.2(b) of this Title, that are identified as follows:

('a') industrial boilers located on the site of a facility engaged in a manufacturing process where substances are transformed into new products, including the component parts of products, by mechanical or chemical processes;

('b') utility boilers used to produce electric power, steam, heated or cooled air, or other gases or fluids for sale; or

('c') used oil-fired space heaters provided that the burner meets the provisions of subdivision 374-2.3(d) of this Subpart.

(iii) hazardous waste incinerators subject to regulation under sections 373-2.15 and 373-3.15 of this Title.

(4) Absorbents. Used oil which is recyclable or reusable must not be disposed of through the use of absorbent materials, other than for purposes of spill cleanup.

§374-2.3 - Standards for Used Oil Generators

(a) Applicability.

(1) General. Except as provided in subparagraphs (i) through (iv) of this paragraph, this section applies to all used oil generators. A used oil generator is any person, by site, whose act or process produces used oil or whose act first causes used oil to become subject to regulation.

(i) Household "do-it-yourselfer" used oil generators. Household "do-it-yourselfer" used oil generators are not subject to regulation under this Subpart.

(ii) Vessels. Vessels at sea or at port are not subject to this section. For purposes of this section, used oil produced on vessels from normal shipboard operations is considered to be generated at the time it is transported ashore. The owner or operator of the vessel and the person(s) removing or accepting used oil from the vessel are co-generators of the used oil and are both responsible for managing the waste in compliance with this section once the used oil is transported ashore. While among themselves, the co-generators may decide among them which party will fulfill the requirements of this section. In the event of a violation of this section, the co-generators' obligation to comply with the requirements of this section are joint and several.

(iii) Diesel fuel. Mixtures of used oil and diesel fuel mixed on site by the generator of the used oil for use in the generator's own vehicles are not subject to this Subpart once the used oil and diesel fuel have been mixed. Prior to mixing, the used oil fuel is subject to the requirements of this section.

(iv) Farmers. Farmers who generate an average of 25 gallons or less per month of used oil from vehicles or machinery used on the farm in a calendar year are not subject to the requirements of this Subpart, if the used oil is used in normal farming operations. Normal farming operations do not include land application or land disposal of

used oil.

(2) Other applicable provisions. Used oil generators who conduct the following activities are subject to the requirements of other applicable provisions of this Subpart as indicated in subparagraphs (2)(i) through (2)(v) of this paragraph:

(i) Generators who transport used oil, except under the self-transport provisions of paragraphs 374-2.3(e)(1) and (2) of this section, must also comply with section 374-2.5 of this Subpart.

(ii) Generator processing.

('a') Except as provided in clause ('b') of this subparagraph, generators who process or re-refine used oil must also comply with section 374-2.6 of this Subpart.

('b') Generators who perform the following activities are not processors provided that the used oil is generated on-site and is not being sent off-site to a burner of on-specification or off-specification used oil fuel:

('1') filtering, cleaning or otherwise reconditioning used oil before returning it for reuse by the generator;

('2') separating used oil from wastewater generated on-site to make the wastewater acceptable for discharge or reuse pursuant to section 402 or section 307(b) of the Federal Clean Water Act, as incorporated by reference in subdivision 370.1(e) of this Title, or other applicable federal or state regulations governing the management or discharge of wastewaters;

('3') using oil mist collectors to remove small droplets of used oil from in-plant air to make plant air suitable for continued recirculation;

('4') draining or otherwise removing used oil from materials containing or otherwise contaminated with used oil in order to remove excessive oil to the extent possible pursuant to paragraph 374-2.2(a)(3) of this

Subpart; or

('5') filtering, separating or otherwise reconditioning used oil before burning it in a space heater pursuant to subdivision 374-2.3(d) of this section.

(iii) Generators who burn off-specification used oil for energy recovery, except under the on-site space heater provisions of subdivision 374-2.3(d) of this section, must also comply with section 374-2.7 of this Subpart.

(iv) Generators who direct shipments of off-specification used oil from their facility to a used oil burner, or who are the first to claim that used oil that is to be burned for energy recovery meets the used oil fuel specifications, set forth in paragraph 374-2.2(b)(1) of this Subpart, must also comply with section 374-2.8 of this Subpart.

(v) Generators who dispose of used oil must also comply with section 374-2.9 of this Subpart.

(b) Hazardous waste mixing.

(1) Mixtures of used oil and hazardous waste must be managed in accordance with paragraph 374-2.2(a)(2) of this Subpart.

(2) The rebuttable presumption for used oil as provided in clause 374-2.2(a)(2)(i)('b') of this Subpart applies to used oil managed by generators. Under the rebuttable presumption for used oil, used oil containing greater than 1,000 ppm total halogens is presumed to be a hazardous waste and must be managed as hazardous waste and not as used oil unless the presumption is rebutted. However, the rebuttable presumption does not apply to certain metalworking oils/fluids and certain used oils removed from refrigeration units.

(c) Used oil storage. Used oil generators are subject to all applicable Spill Prevention, Control and Countermeasures (40 CFR Part 112, as incorporated by reference in subdivision 370.1(e) of this Title), in addition to the requirements of this section. Used oil generators are also subject to the Underground Storage Tank (40 CFR Part 280, as incorporated

by reference in subdivision 370.1(e) of this Title) standards for used oil stored in underground used oil tanks whether or not the used oil exhibits any characteristics of hazardous waste, in addition to the requirements of this section.

(1) Storage units. Used oil generators shall not store used oil in units other than tanks, containers, or units subject to regulation under Subparts 373-2 and 373-3 of this Title. In addition, all storage units must be designed, constructed and operated in accordance with the following requirements in effect for the municipality in which the generator facility is located:

(i) local building and fire codes, if any; and

(ii) the New York State Uniform Fire Prevention and Building Code, 19 NYCRR Chapter XXXIII, Subchapter A, including the National Fire Protection Association Flammable and Combustible Liquids Code (NFPA-30)(as incorporated by reference in subdivision 370.1(e) of this Title).

(2) Used Oil Tanks: Compliance with Petroleum Bulk Storage Regulations.

(i) All aboveground and underground used oil tank systems, regardless of tank size, must comply with sections 612.2 through 612.4, 613.2 through 613.9, 614.6 and 614.12 of this Title, except that:

('a') aboveground used oil tanks with 10 percent or more volume beneath the surface of the ground must also meet the applicable requirements contained in 40 CFR Part 280 (as incorporated by reference in subdivision 370.1(e) of this Title), whether or not the used oil exhibits any characteristics of hazardous waste.

('b') used oil tanks at a facility licensed under Part 610 of this Title do not require registration under Part 612 of this Title.

(ii) New aboveground and new underground used oil tank systems must be installed in accordance with section 613.2, paragraphs 613.3(c)(3) through (6), and sections 614.2

through 614.14 of this Title.

(iii) Requirements of this subdivision shall apply on January 14, 1995, except as follows:

('a') used oil tanks, regardless of their size, must be registered pursuant to section 612.2 of this Title by July 14, 1995.

('b') existing generator facilities must be in compliance with the applicable requirements of subdivisions 613.3(c) and 613.6(b) of this Title by January 14, 1997.

(3) through (6) Reserved

(7) Condition of units. Containers and aboveground used oil tanks used to store used oil at generator facilities must be:

(i) in good condition (no severe rusting, apparent structural defects or deterioration); and

(ii) not leaking (no visible leaks).

(8) Labels.

(i) Containers and aboveground used oil tanks used to store used oil at generator facilities must be clearly labeled or marked with the design capacity and working capacity of the tank and with the words "Used Oil".

(ii) Fill pipes used to transfer used oil into underground used oil tanks at generator facilities must be clearly labeled or marked with the capacity of the tank and with the words "Used Oil".

(9) Response to releases.

(i) Any spill, discharge, or release of used oil shall be subject to all applicable provisions of Article 12 of the Navigation Law (NL Sections 170 through 197) and its implementing rules and regulations, 17 NYCRR Parts 32 - 33 and Part 611 of this Title, regarding, but not limited to, notification, cleanup, and liability, and are also subject to applicable provisions of Article 17, Titles 10 and 17, of the Environmental

Conservation Law, and section 613.8 of this title.

(ii) Upon detection of a release of used oil to the environment that is not subject to the requirements of Subpart F of 40 CFR Part 280, as incorporated by reference in subdivision 370.1(e) of this Title, a generator must perform the following cleanup steps:

('a') stop the release;

('b') contain the released used oil;

('c') clean up and manage properly the released used oil and other materials;

('d') if necessary, repair or replace any leaking used oil storage containers or tanks prior to returning them to service.

(iii) Within two hours of detecting a spill, discharge, or release of used oil, the generator must notify the department Spill Hotline at (800) 457-7362, or, if calling from out of state, (518) 457-7362.

(d) On-site burning in space heaters. Generators may burn used oil in used oil-fired space heaters provided that:

(1) the heater burns only used oil that the owner or operator generates or used oil received from household do-it-yourselfer used oil generators;

(2) the heater is designed to have a maximum capacity of not more than 0.5 million Btu per hour; and

(3) the combustion gases from the heater are vented to the outside ambient air.

(e) Off-site shipments. Except as provided in paragraphs (1) through (3) of this subdivision, generators must ensure that their used oil is transported only by transporters who have obtained an EPA identification number and are authorized under Part 364 of this Title to transport used oil, if applicable.

(1) Self-transportation of small amounts to approved collection

centers. Generators may transport, without an EPA identification number, used oil that is generated at the generator's site and used oil collected from household do-it-yourselfers to a used oil collection center provided that:

(i) the generator transports the used oil in a vehicle owned by the generator or owned by an employee of the generator;

(ii) the generator transports no more than 55 gallons of used oil at any time; and

(iii) the generator transports the used oil to a used oil collection center that is permitted pursuant to subparagraph 374-2.4(b)(2)(ii) of this Subpart.

(2) Self-transportation of small amounts to aggregation points owned by the generator. Generators may transport, without an EPA identification number, used oil that is generated at the generator's site to an aggregation point provided that:

(i) the generator transports the used oil in a vehicle owned by the generator or owned by an employee of the generator;

(ii) the generator transports no more than 55 gallons of used oil at any time; and

(iii) the generator transports the used oil to an aggregation point that is owned and/or operated by the same generator.

(3) Tolling arrangements. Used oil generators may arrange for used oil to be transported by a transporter without an EPA identification number if the used oil is reclaimed under a contractual agreement pursuant to which reclaimed oil is returned by the processor/re-refiner to the generator for use as a lubricant, cutting oil, or coolant. The contract (known as a "tolling arrangement"), must indicate:

(i) the type of used oil and the frequency of shipments;

(ii) that the vehicle used to transport the used oil to the processing/re-refining facility and to deliver recycled used oil back to the generator is owned and operated by the used oil processor/re-refiner; and

(iii) that reclaimed oil will be returned to the generator.

(f) Service and Retail Establishments. A "service establishment" is any automobile service station, including gas only outlets, or any other retail outlet and boat marina, selling at least 500 gallons of lubricating oil annually and having an on-premises oil changing operation. A "retail establishment" is every vendor that sells lubricating oil at retail in quantities in excess of 1,000 gallons per year. Generators who are service establishments or retail establishments must also comply with the following requirements:

(1) Service establishments.

(i) An owner or an employee of every service establishment who is present on the premises must accept, at no charge, used petroleum-based or synthetic lubricating oil in quantities not to exceed five gallons per day from any household do-it-yourselfer, in accordance with the following requirements:

('a') the service establishment must maintain a tank or container with sufficient capacity to provide adequate service to individuals, for the temporary storage of used oil;

('b') the service establishment may refuse to accept used oil if the used oil tank or container is temporarily filled to capacity. If filled to capacity, the service establishment must proceed expeditiously to have the used oil emptied by a used oil transporter authorized under Part 364 of this Title, and must inform individuals when used oil can be brought back to the establishment for collection.

('c') the service establishment must accept used oil only during the normal business hours of the establishment;

('d') the service establishment may require used oil to be dropped off in rigid screw-top closed containers;

('e') the service establishment may refuse to accept used oil if it has been contaminated through other than ordinary and normal use; and

('f') the service establishment may not impose a separate charge or fee upon any individual for acceptance or disposal of used oil, whether or not the individual is a customer for service.

('g') the service establishment must conspicuously post a sign in a location which is always open to public view, stating: "WE ACCEPT USED OIL FOR RECYCLING AT NO CHARGE". Such establishment may additionally state, on the same sign or an additional sign, that used oil is accepted only during normal business hours and may state such hours. The information on any sign must be legible from a distance of at least 25 feet from the outside of the establishment's building, with lettering a minimum of one inch in height;

(2) Retail establishments. Retail establishments may either directly accept used petroleum-based or synthetic lubricating oil from household do-it-yourselfers, or contract with another retail establishment, service establishment or municipality, for the collection of used oil brought to it for acceptance.

(i) Retail establishments which elect to provide for the direct collection of used oil must accept, at no charge, used petroleum-based or synthetic lubricating oil in quantities not to exceed five gallons per day from any household do-it-yourselfer, in accordance with the following requirements:

('a') the retail establishment must maintain a tank or container with sufficient capacity to provide adequate service to individuals, for the temporary storage of used oil;

('b') the retail establishment may refuse to accept used oil if the used oil tank or container is temporarily filled to capacity. If filled to capacity, the retail establishment must proceed expeditiously to have the used oil emptied by a used oil transporter permitted under Part 364 of this Title to transport used oil, and must inform individuals when used oil can be brought back to the establishment for collection;

('c') the retail establishment must accept used oil only

during the normal business hours of the establishment;

('d') the retail establishment may require used oil to be dropped off in rigid screw-top closed containers;

('e') the retail establishment may refuse to accept used oil if it has been contaminated through other than ordinary and normal use; and

('f') the retail establishment must conspicuously post a sign in a location which is always open to public view, stating: "WE ACCEPT USED OIL FOR RECYCLING AT NO CHARGE." Such establishment may additionally state, on the same sign or an additional sign, that used oil is accepted only during normal business hours and may state such hours. The information on any sign must be legible from a distance of at least 25 feet from the outside of the establishment's building, with lettering a minimum of one inch in height.

(ii) Retail establishments which elect not to provide for direct collection of used oil must either:

('a') enter into a contract with another retail establishment, service establishment or municipality, which maintains a tank or container for the temporary storage of used oil. The retail establishment which contracts with another retail establishment, service establishment or municipality, for the provision of collection services must conspicuously post a sign in a location which is always open to public view, stating: "USED OIL FOR RECYCLING WILL BE ACCEPTED BY (name of contracted establishment or municipality) AT (address of contracted establishment or municipality) AT NO CHARGE". The information on this sign must be legible from a distance of at least 25 feet from the outside of the establishment's building and have lettering a minimum of one inch in height.

('1') in counties or cities with a population of one million or more, the distance between the contracting retail establishment and the contractor shall not exceed eight

miles; and

('2') in all other areas, the contracting retail establishment and the contractor must be within the same town or city or within adjacent towns or cities; or

('b') obtain a hardship waiver from the department for inability to comply with this subdivision due to prohibition by local codes, ordinances, or State or federal statute or regulation, or due to the impossibility of installing a used oil tank or container because of physical constraints. The retail establishment must submit a request for a hardship waiver to the Director, Division of Solid & Hazardous Materials, New York State Department of Environmental Conservation, 625 Broadway, Albany, NY 12233-7250, which includes the following information:

('1') the name and location, including street address, of the retail establishment;

('2') the approximate gallons of lubricating oil sold annually by the retail establishment;

('3') a discussion which includes the statutory, regulatory or physical constraints prohibiting the placement of a tank or container for temporarily storing used oil, a description of specific efforts being made by the retail establishment to overcome those constraints, a street scale map of the geographic range established in subclauses ('b')('1') and ('b')('2') of this clause indicating the location of the retail establishment requesting the waiver, and the locations of other retail establishments, municipalities, and service establishments located within that geographic range.

SENDER: COMPLETE THIS SECTION

- Complete items 1, 2, and 3. Also complete item 4 if Restricted Delivery is desired.
- Print your name and address on the reverse so that we can return the card to you.
- Attach this card to the back of the mailpiece, or on the front if space permits.

New York State Department of Environmental Conservation
Division of Environmental Remediation
Bureau of Technical Support, 11th Floor
625 Broadway, Albany, New York 12233-7020
Phone: (518) 402-9543 • **FAX:** (518) 402-9577
Website: www.dec.state.ny.us

Dear Petroleum Storage Tank Owner:

The five-year registration for your Petroleum Bulk Storage (PBS) tank(s) expires soon. The registration expiration date is printed on the top right-hand corner of the enclosed renewal application. Please notice that the form has changed since your last renewal. The enclosed renewal package includes:

- Your pre-printed renewal application form
- Fees determination worksheet
- A notice regarding the new PBS application review policy
- Tank and piping model codes reference sheet

Please review, revise (if necessary), and complete the PBS renewal application form. Be sure to fill in ***all*** blank portions of the form, sign and date the form, and include the correct fee. (Fees determination worksheet on back of this page.)

If you no longer own this facility, please provide the current owner's name and address (if known) and return the renewal package to the appropriate NYSDEC office (see address in upper right corner of Section A) as soon as possible.

PBS regulations contain various requirements for operating and upgrading storage facilities. If you are not familiar with these requirements, need a copy of the regulations, need detailed application instructions or have questions, please call the Spill Prevention and Bulk Storage Section at (518) 402-9543 or visit the Spill Prevention and Bulk Storage web site at **www.dec.state.ny.us/website/der/bulkstor** . Allow 4 weeks for the renewal form to be processed.

Incomplete/inaccurate applications, applications with overdue tank/piping system tests or aboveground storage tanks with 10,000 gallons or greater capacity without secondary containment, will not be processed by the Department and will be rejected. Once corrected/completed, the application and fees must be resubmitted to the Department for processing. Failure to submit a complete and acceptable PBS application prior to the PBS registration certificate expiration date is a violation of law for which you may be held liable for penalties or other enforcement actions.

Please be advised that tanks installed or substantially modified after December 27, 1986 which do not meet 6 NYCRR Part 614 standards must be removed.

Return the completed and signed form and applicable fee to the appropriate NYSDEC office (the address is at the top of Section A). Please provide one check per facility and put the PBS number on the check. Upon satisfactory review of your application and receipt of the correct fee, the Department will issue a new five-year certificate. The certificate and all future correspondence will be mailed back to the person and address you indicate in the "Correspondence" section of the application form. Please remember it is the facility owner's responsibility to ensure your information remains valid and current on your registration.

Sincerely,

Russ Brauksieck

Russ Brauksieck, P.E.
Chief, Spill Prevention and Bulk Storage Section

Enclosures
(Revised August 2007)

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION

INSTRUCTIONS FOR COMPLETING "SECTION A" OF PETROLEUM BULK STORAGE APPLICATION

GENERAL INSTRUCTIONS - Type or print all items, except "signature" in Section A. This form must be completed for each applicable petroleum facility. Forward completed applications to the appropriate NYSDEC office.

PBS NUMBER - Enter the seven digit NYSDEC Registration Number if the facility was previously registered; otherwise, leave blank.

OTHER EXISTING DEC NUMBERS - Enter the Chemical Bulk Storage (CBS) Number (Hazardous Substance Bulk Storage Law, Article 40 of ECL; 6NYCRR Parts 595-599) and State Pollution Discharge Elimination System (SPDES) Number (Article 17, Title 8 of ECL, 6NYCRR Parts 750-758) that are assigned to the facility, if applicable. If not applicable, write "Not Applicable".

TRANSACTION TYPE - Check the appropriate box(es) to indicate type of transaction. (Check all that apply.)

Initial/New Facility..... First application for registration by the owner of a regulated facility. PBS number will be assigned by NYSDEC. Complete all sections. **A copy of the deed page showing the date of ownership is needed.** The expiration date of the registration certificate will be five years from the date of ownership, as determined by the deed. If the ownership spans a period of more than five years ago or a tank installation date is more than five years ago, additional fees will be required.

Change of Ownership..... Application for registration by the new owner of the facility being transferred. Enter the PBS Number from the existing registration certificate and complete all sections. **A copy of the deed page showing the date of ownership is needed.** The expiration date of the registration certificate will be five years from the date of ownership, as determined by the deed. If the change of ownership occurred more than five years ago, additional fees will be required.

Tank Installation, Closing, Repair or Reconditioning..... Check this box if one of the following applies: (1) one or more new stationary tanks has been added to the facility; or (2) an existing stationary tank has been replaced, reconditioned or permanently closed. In Section A, complete the Facility Section, PBS Number, name/title/signature of a duly authorized officer, and date. In Section B, fill in the entire line of information for each tank being amended.

Information Correction..... If any information changes have occurred since the initial application or the last renewal, indicate the corrected information in the appropriate spaces, include the PBS Number, and complete the name/title/signature of a duly authorized officer, and date.

Renewal..... Application is being made for a previously registered facility that has not changed ownership since the last registration. Registration certificates for petroleum bulk storage facilities must be renewed every five years and are not transferable. Indicate any changes that have occurred since last renewal and provide the name/title/signature of the duly authorized officer, and date.

FACILITY INFORMATION - Enter the name and location (not PO Box) of the facility. Include any information that would assist in locating the facility. For county, enter the county in which the facility is located. For township, enter the geographical location, not the mailing city. Enter the facility telephone number and the name of the operator at the facility who is familiar with the tanks and the efforts of the facility to comply with Petroleum Bulk Storage Law (see Article 17, Title 10 of the Petroleum Bulk Storage Law, 6NYCRR Parts 612-614 and 6NYCRR, Subpart 360-14 (used oil)). Also enter the emergency contact name and telephone number.

OWNER INFORMATION - Enter the name, address and telephone number of the facility owner. Federal Tax Identification Number is the number assigned by the Internal Revenue Service for a corporation or a Social Security Number for an individual. It is required by New York State Department of Tax and Finance. For owner type, check the appropriate box. Note: apartment buildings are considered corporate/commercial.

MAILING CORRESPONDENCE - Enter the desired mailing name and address for correspondence (e.g. registration certificate, renewal notice) and the name, telephone number and e-mail address of the contact person who is familiar with the efforts of the facility to comply with provisions of the Petroleum Bulk Storage Law.

TYPE OF PETROLEUM FACILITY - Check the appropriate box (check only one). If "other", specify the type of facility in the space provided.

NAME AND OFFICIAL TITLE OF OWNER OR OWNER'S AUTHORIZED REPRESENTATIVE - Type or print name and title of the owner or authorized representative. An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility. For a partnership or sole proprietorship, the application must be signed by a general partner or the proprietor, respectively. For a municipal, state or other public facility, the application must be signed by a principal or executive officer, ranking elected official or other duly authorized employee.

AMOUNT ENCLOSED - Indicate the fee enclosed. Fees are required for initial registrations, renewals, and changes of ownership. There is no fee required for substantial tank modifications or information corrections. Make check/money order payable to NYSDEC. The fee is based on combined petroleum tank storage capacity * at the facility in gallons: 1,101-2,000 gallons - $100/facility; 2,001-4,999 gallons - $300/facility; 5,000-399,999 gallons - $500/facility. *NOTE: Product Type 0022 (waste/used oil) is **not** subject to registration fee. (An example of product type 0022 is used oil that will be hauled away by a waste hauler.)

SIGNATURE AND DATE - Enter the name, title, and signature of the owner or duly authorized officer, along with the date the application was prepared.

INSTRUCTIONS FOR COMPLETING "SECTION B" OF PETROLEUM BULK STORAGE APPLICATION

GENERAL INSTRUCTIONS - Enter all the information. Provide detail for each regulated tank (one complete line per tank; use additional forms as required). A site plan including tank numbers should be enclosed. Enter one choice per block. Make only one entry per column, except for tank external protection, tank secondary containment, tank leak detection, tank overfill prevention, piping external protection, and piping leak detection columns, where you may indicate a primary and secondary choice. **Refer to the Key at the bottom of "Section B" of the application form to indicate your responses.**

(Instructions for completing Section B are continued on the next page)

(Column 20) PIPING LEAK DETECTION - Specify leak detection method used (Refer to 6NYCRR section 614.14(g)(3).)

Tank and Piping Model Chart (For use in Section B, Column 2a)

This chart lists some commonly used tank models and piping models for which the model description defines the related equipment. Therefore, for a given tank, if the tank model appears on the chart and you enter the tank model code in column 2a of the registration form, you will not have to enter the related information in shaded columns 8, 10 and 11 for that tank. Similarly, for a given tank, if the piping model appears on the chart and you enter the piping model code in column 2a of the registration form, you will not have to enter the related information in shaded columns 17, 18 and 19 for that tank. (Use codes 101 through 108 for underground tanks only; use codes 201 through 205 for aboveground tanks only; use codes A through G for piping.)

Code #	Model Description	Examples of Model Names or Manufacturers
Underground Tanks *- Use codes 101 through 108 for underground tanks only.*		
101	STI-P3 single wall tank (cathodically protected steel tank with no secondary containment)	Highland Tank, Mohawk Metals, Lancaster Tank, Modern Welding
102	STI-P3 double wall tank (cathodically protected double wall steel tank)	Highland Tank, Mohawk Metals, Lancaster Tank, Modern Welding
103	FRP single wall tank (Fiberglass tank with no secondary containment)	Owens Corning, Fluid Containment, Containment Solutions, Xerxes
104	FRP double wall tank (Fiberglass double wall tank)	Owens Corning, Fluid Containment, Containment Solutions, Xerxes
105	Fiberglass clad steel single wall tank (no secondary containment)	Buffalo Tank, Highland Tank
106	Fiberglass clad steel double wall tank	Buffalo Tank
107	Jacketed steel tank (steel tank with secondary containment of plastic or FRP)	Total Containment Jacketed tank, Elutron tank, Permatank, Modern Welding Glasteel II
108	ACT 100U double wall steel tank (steel tank with urethane cladding)	Titan, Euro-Tank, HT-Fibre-Thane
Aboveground Tanks *- Use codes 201 through 205 for aboveground tanks only.*		
201	Steel tank in a dike	Highland Tank and others
202	Concrete encased steel tank	ConVault
203	Double wall tank (does not meet requirement for secondary containment)	
204	Modified double wall tank (meets requirements for secondary containment because containment is provided for all spill scenarios including spills from the top of the tank such as overfills)	SuperSafe Tank, Armor Cast, FitFueler Tank, Highland OP Tank
205	Plastic tank (used oil only)	Kosmo Igloo
Piping *- Use codes A through G for piping.*		
A	Single wall steel pipe with originally installed cathodic protection	
B	Steel pipe inside of plastic pipe	
C	FRP single wall pipe	Ameron, A O Smith
D	FRP double wall pipe	Ameron, A O Smith
E	Flex pipe - Double wall	APT-Poly-Tech, Bufflex II, Perma-Flexx, GeoFlex-S, GeoFlex-D, Enviroflex, Omniflex
F	Copper pipe	
G	Copper pipe inside of plastic pipe	

New PBS Application Review Policy Notice
(September 2006)

Please note that the Petroleum Bulk Storage (PBS) application review policy has changed. The new application review policy will result in your application being returned to you unprocessed if:

- Section A has blanks or if the information is inaccurate.

- For Change of Ownership, a copy of the deed page showing the date of ownership was not submitted. The expiration date of the registration certificate will be five years from the date of ownership, as determined by the deed. If the change of ownership occurred more than five years ago, additional fees will be required.

- Section B, columns 1 through 8 (Action, Tank Number, Tank Location, Status, Install/Close Dates, Capacity, Product Stored, and Tank Type) are inaccurate or incomplete. (Please note that while the Department is not returning the application for other missing tank information at this time, it reserves the right to do so in the future. Furthermore, erroneous tank information may result in tank/piping system tightness test requirements or violations which may result in other compliance or enforcement actions.)

- Any aboveground tank with a capacity of 10,000 gallons or more doesn't have secondary containment (subdivision 613.3(c)(6))

- Any underground tank system is overdue for tightness testing (section 613.5)

Failure to submit a complete and acceptable PBS application prior to the PBS registration certificate expiration date is a violation of law for which you may be held liable for penalties or other enforcement actions.

IN ADDITION TO THE FEES & ORIGINAL SIGNATURE, THE FOLLOWING ITEMS ARE MISSING & MUST BE PROVIDED OR APPLICATION WILL BE RETURNED:

- Tank Spill Prevention

- Piping Secondary Containment

Erin M. Crotty
Commissioner

Dear Petroleum Storage Tank Owner:

The five year registration for your petroleum bulk storage (PBS) tank(s) expires soon. The expiration date is printed on the top right-hand corner of Section B of the enclosed renewal application. This application is part of a renewal package which contains:

(1) Your PBS renewal application with portions pre-printed;
(2) An instruction sheet for completing the PBS application;
(3) Additional special instructions for completing your PBS renewal application form.

Please review, revise (if necessary), and complete the renewal application form. Refer to items two (2) and three (3) listed above to help you complete or revise your application. Be sure to fill in all blank portions of the form (except as noted in the special instructions).

Please submit the completed and signed form and fee (if applicable) before the expiration date. Address it to the appropriate Department regional office, the address of which is printed on the top right-hand corner of Section A.

Upon receipt and review of the package, the Department will process the completed renewal form and issue a new five year certificate. Part of this review will be to determine if there are any underground tank systems that are overdue for testing. The registration application may not be processed if there are tanks overdue for testing.

Please see the special instructions regarding three important items that may apply to your facility:
- registration requirement for used oil tanks (since July 1995),
- change in regulation of small heating oil tanks (effective August 8, 1996),
- EPA 1998 upgrade deadline for certain underground tanks.

Notice to Underground Tank Owners

Please note that the due date for tank tightness tests appears on Section B and on the face of your PBS registration certificate. The tank tightness tests are required for underground tanks only. The tightness test due date was calculated based on the testing schedule included in section 613.5 of the state PBS regulations and the information that you provided previously on your PBS application form. To demonstrate compliance with this tank tightness test requirement you must have the tank tested before the due date and submit a copy of the test results within 30 days after the date of the test to the Department regional office (address is printed on the top right-hand corner of Section A). You must also keep a copy of the test results for your records.

Please be advised that a failure to perform the required tightness test(s) by the specified date and/or to timely submit proof of such test(s) is a violation of law for which you may be held liable for penalties. Please be further advised that any failed tightness test must be reported to the Department within two hours of discovery.

Additional Special Instructions for Renewal of Petroleum Bulk Storage Registration

1) Gather your records

Gather all facility and tank related records, including operator name and phone number, tank inventories, tank testing, tank closures, tank additions, etc. Please discard any inventory of blank PBS application forms and instructions that are dated before August 1995. See form number on the upper left-hand corner of Section A, i.e., 93-19-1 (8/95) - 26c.

2) Section A

Review, revise and complete Section A, referring to the instructions for completing petroleum bulk storage application (hereafter referred to as instructions). Clearly mark corrections by crossing out incorrect information and neatly printing the correct information. Please do **not** use "white out". The only items that can be left blank are CBS and SPDES number (if not applicable) and Latitude and Longitude (if not known). Fill in amount enclosed, signature and date **after** Section B is completed.

Owner information/Change of Ownership. If you no longer own this facility, please provide the current owner's name and address (if known) and return this renewal package to the appropriate Department office as soon as possible. If you are the new owner, please correct the transaction type to 2 (ownership transfer), and update the information accordingly.

3) Section B

Review, revise and complete Section B, referring to the instructions and the key for Section B. Please fill in any blank items.

Product stored. Two new categories B: Used oil (fuel) and C: Used oil have been added. An example of Product type B: used oil that feeds a boiler or furnace. An example of product type C: used oil hauled away by a waste hauler.

Last test date. This has been preprinted if test results have been submitted for an underground tank. If your tank(s) have been tested, but the testing date is missing, please note the test date and attach a copy of the test report. Not all underground tanks require testing. Refer to 6NYCRR Section 613.5. ***If your tank(s) are overdue for testing, a test report must be submitted prior to or with the registration application. Without a test report, the registration application may not be processed.***

4) Registration Fee

The fee schedule is on a per facility basis. Add together the capacities of all in-service and temporarily out of service PBS tanks (read notes below for Used Oil Tanks and Change in Regulation of Some Small Heating Oil Tanks for applicability) at the facility to determine it's storage capacity. See 6NYCRR paragraph 612.1(c)(21) for the definition of petroleum.

Combined Storage Capacity at Facility	**5 Year Fee**
Under 1,101gallons	Registration not required (see note (a) below)
1,101-2,000 gallons	$50 per storage facility
2,001-4,999 gallons	$150 per storage facility
5,000-399,999 gallons	$250 per storage facility
400,000 gallons and greater	Registration not required but license is required (see note (b) below)

Notes:

(a) If the aggregate capacity of in-service and temporarily out of service tanks at the facility is under 1,101 gallons, then renewal and fee are not required. Exception: used oil tanks, as noted below. Indicate which tanks in Section B have been permanently closed per section 613.9(b) of the PBS regulations. Return completed renewal application form to the Department regional office.

(b) If the aggregate capacity at the facility is 400,000 gallons or more, then renewal and fee are not required. The facility must be licensed under Article 12 of the Navigation Law. If already licensed, return the enclosed PBS renewal form to the Department regional office with a note indicating the license number. If not already licensed, return the renewal form to the Department regional office and request a Major Oil Storage Facility application form.

(c) **Used Oil Tanks.** Tanks storing used oil require registration, regardless of size, per Subpart 360-14 of 6NYCRR. Used oil is typically found at service establishments that change oil in vehicles. Tanks storing over 1,100 gallons of product B(used oil being used as fuel) are subject to registration fees. Product type C (used oil) requires registration but **not** subject to registration fees. Additional information regarding used oil tanks is available upon request.

(d) **Change in Regulation of Some Small Heating Oil Tanks.** Certain heating oil tanks under 1,100 gallons have been deregulated from the PBS program effective August 8, 1996. Heating oil tank(s) (i.e., #'s 1,2,4,5,6 fuel oils and kerosene), under 1,100 gallons, used for on-premises consumption at the same site, which is not interconnected to any other heating oil tank are no longer included in calculating the facility storage capacity. If the facility capacity without these small heating oil tanks is over 1,100 gallons then all tanks at the facility are to be included on the registration including the small heating oil tanks. An example of a deregulated tank is a 550 gallon #2 fuel oil tank that feeds a furnace at a bus garage. However, if at the same bus garage is a motor fuel tank or tanks that have a combined storage capacity over 1,100 gallons, then the 550 gallon heating oil tank would also be registered. Used oil (fuel) tanks under 1,100 gallons are still subject to registration but not the registration fee. If one or more of the tanks listed on your renewal application are now deregulated, please update your application by changing "action" to 3, changing "status" to 5, and writing in the closure date of 8/8/96.

(e) Make the check or money order payable to: New York State Department of Environmental Conservation (or NYSDEC).

(Continued)

INSTRUCTIONS FOR COMPLETING PETROLEUM BULK STORAGE APPLICATION

(Continued from reverse side)

SECTION B

GENERAL INSTRUCTIONS

Enter all the information (see KEY of choices for certain items, at the bottom of Section B). Use **one** complete line for each tank at the facility. Enter one choice per block. Make only one entry per item, except for tank external protection, piping external protection, secondary containment, leak detection and spill/overfill prevention.

Item Name	Specific Instructions
ACTION	**1. Initial Listing:** For initial registration, renewal, or change of ownership of a facility. **2. Add Tank:** For installing a new tank at a facility. **3. Close/Remove Tank:** For permanently closing a tank per 6 NYCRR section 613.9(b), or conversion to non-regulated substance/use. **4. Information Correction:** If any information changes have occurred since the initial application or last renewal for any tank, include the corrected information in the appropriate spaces and be sure to include the tank number. **5. Recondition/Repair/ Reline Tank:** For reconditioning a tank per 6 NYCRR section 614.6 (underground tanks) and 614.12 (aboveground tanks), i.e. permanent repair and/or relining.
TANK NUMBER	Use the tank numbering system at the facility. If none exists then establish one i.e. 001, 002, etc. Any combination of letters and numbers is acceptable, except "000" or duplicate tank numbers at the same facility.
TANK LOCATION	See 6 NYCRR section 612.1(c)(1), and (29) for specific definitions of aboveground and underground tanks, respectively. 1. Aboveground: Tank bottom rests on grade or pad, allowing no visual inspection. 2. Aboveground on saddles, legs, stilts, rack, or cradle: Tank bottom rests above grade or pad, allowing visual inspection. 3. Aboveground, 10% or more belowground: Aboveground less than 90% above grade, partially buried. 4. Underground: Completely covered with earth or vaulted with no access. 5. Underground, vaulted, with access: Tank in subterranean vault, accessible for inspection
STATUS	If a tank is permanently out of service (Status 3 or 4), it must be closed pursuant to 6 NYCRR section 613.9(b). If not closed as such, it may be considered temporarily out-of-service (Status 2). See section 613.9 for further closure details. Status 5 refers to a product stored in the tank that is no longer regulated under the definition of petroleum in 6 NYCRR section 612.1(c)(21).
INSTALLATION OR PERMANENT CLOSURE DATE	For Action 1, 2, 4 or 5, specify the month and year the tank was completely installed. If unknown, enter 0000. For Action 3 (Closure), enter the month and year the tank was permanently closed, or converted to non-regulated substance/use.
CAPACITY	Specify the total design or maximum capacity of the tank in gallons.
PRODUCT STORED	Used oil examples: B(fuel)—fed into burners or space heaters; C—hauled away by waste hauler. See amount enclosed (Section A) regarding fees.
TANK TYPE	If tank type is unknown, or tank is coated or painted steel, enter 1. Tank Type requirements for new underground and aboveground tanks are specified in 6 NYCRR section 614.2a(1) and 614.8a(1), respectively. Tank Type 6 requires a variance before installation per 6 NYCRR section 614.1(e).
TANK—INTERNAL PROTECTION	Specify the type of protection provided for the tank to prevent internal corrosion. Refer to 6 NYCRR sections 614.12 and 614.6 for aboveground and underground tank requirements, respectively.
TANK—EXTERNAL PROTECTION	Specify the type(s) of protection provided for the tank to prevent external corrosion. Refer to 6 NYCRR sections 614.9(b) and 614.3(e) for aboveground and underground tank requirements, respectively.
PIPING LOCATION	1. Aboveground: Piping rests on or above ground, or pad. 2. Underground: Completely covered with earth. 3. Aboveground/Underground Combination: Piping is both aboveground and underground.
PIPING TYPE	Refer to 6 NYCRR section 614.14(a) for piping requirements for new underground piping systems.
PIPING—INTERNAL PROTECTION	Specify the type of protection provided for the pipe to prevent internal corrosion.
PIPING—EXTERNAL PROTECTION	Specify the type(s) of protection provided for the pipe to prevent external corrosion.
SECONDARY CONTAINMENT	Refer to 6 NYCRR section 613.3(c)(6) for secondary containment requirements for aboveground tanks. For new underground storage tanks, see 6 NYCRR section 614.4. For the two available entries of this category, select the supporting structure use for secondary containment as the first entry and, if different, enter the means of obtaining impermeability as the second entry.
LEAK DETECTION	Refer to 6 NYCRR section 614.11 regarding the monitoring requirements for new aboveground tanks. Refer to section 614.5 for new underground tanks.
SPILL/OVERFILL PREVENTION	Refer to 6 NYCRR section 614.14(g)(1) on spill/overfill prevention requirements for new underground tanks. See section 613.3(c) on additional spill/overfill requirements for new and existing underground and aboveground tanks.
DISPENSER METHOD	Specify method/pump used to remove product from tank.
LAST TEST DATE	For underground tanks, enter the month and year of the most recent tightness test performed per 6 NYCRR section 613.5(a). This entry does not satisfy the requirement for notification of test results. Calculations, along with the test report, must be submitted to DEC if they have not already been. Note that not all underground tanks require testing. Refer to 6 NYCRR section 613.5(a).

Division of Environmental Remediation
50 Wolf Road, Albany, New York 12233-3750

Dear Petroleum Storage Tank owner:

The five year registration for your petroleum bulk storage (PBS) tank(s) expires soon. The expiration date for your tanks is printed on the top right hand-corner of Section B of the enclosed renewal application. This application is part of a renewal package which contains:

(1) Your PBS renewal application with portions pre-printed;
(2) An instruction sheet for completing the PBS application;
(3) Additional special instructions for completing your PBS renewal application form.

Please review, revise (if necessary), and complete the renewal application form. Refer to items two (2) and three (3) listed above to help you complete or revise your application. Be sure to fill in all blank portions of the form (except as noted in the special instructions).

Please submit the completed and signed form and fee (if applicable) before the expiration date. Address it to the appropriate DEC regional office, the address of which is printed on the top right-hand corner of Section A.

Upon receipt and review of the package, the department will process the completed renewal form and issue a new five year certificate.

Please see the special instructions regarding three important items that may apply to your facility:

- registration requirement for used oil tanks (since July 1995),
- deregulation of small heating oil tanks (effective August 8, 1996),
- EPA 1998 upgrade deadline for certain underground tanks.

Call the appropriate DEC regional office or the Bulk Storage Help line at (888) 457-4351 or (518) 457-4351, if you have any questions, or need additional forms or regulations.

Sincerely yours,

Morris E. Leno

SEE INSTRUCTIONS ON BACK

NOV-R2 (01/08) **DISTRIBUTION:** White copy - Facility Representative Yellow copy - DEC Technical Pink copy - DEC Legal

Instructions.

In order to demonstrate that the facility is in compliance, you should bring to the settlement conference proof that the violations cited on the front page of this Notice of Violation have been corrected or are being corrected. Such proof may include (but not limited to) the following, for particular violations:

- **Violations No. 01-06.** Photos of a posted valid and current PBS registration certificate, a copy of a completed PBS application and check (when applicable) submitted to the Department.
- **Violation No. 07**. A copy of a completed PBS application for substantial tank modification submitted to the Department (when necessary), documentation showing that the tank was properly permanently closed or a written agreement with a contractor with a schedule of tank closure.
- **Violation No. 08**. Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362 and bring the spill case number assigned by Hotline, photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to the spill event.
- **Violation No. 09**. Photos of color-coded fill port(s).
- **Violation No. 10**. Documentation (letter, invoices, etc.) showing that the sump/fill catch bucket was cleaned repaired or replaced.
- **Violation No. 11**. Latest tightness test repot including test calculations and results conducted within the last 5 years. Documentation showing the scheduled day of the tightness test or permanent tank closure.
- **Violations No. 12 and 13**. Properly reconciled inventory records for the last three (3) ten-day periods.
- **Violation No. 14**. A letter/report with investigation results accounting for the discrepancy.
- **Violation No. 15**. Documentation (letters, contracts, proposals, invoices, etc.) showing that leak monitoring has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 16**. Printed records of weekly leak detection.
- **Violation No. 17**. Printed monthly records showing the leak detection system working properly.
- **Violation No. 18**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the pipe leak detector was repaired/installed or is scheduled for repair/installation.
- **Violation No. 19**. An annual cathodic protection (CP) monitoring report completed within last 12 months or documentation showing a scheduled date for CP testing.
- **Violation No. 20**. Documentation (letters, contracts, proposals, invoices, etc.) showing that overfill prevention has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 21**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that shear (impact) valve(s) has been properly installed or is scheduled for repair/installation.
- **Violation No. 22**. Photos of tank label(s) affixed at the fill port or documentation showing that the label(s) was ordered.
- **Violation No. 23**. Latest (completed within last 12 months) tightness test report including test calculations and results, a standpipe test report or other test acceptable to the Department, or a schedule for such test or permanent tank closure.
- **Violation No. 24**. Copy of as-built plan or drawing with appropriate installer's 614 statement or documentation (letters, contracts, proposals, etc.) showing that drawings were ordered from the appropriate architectural or engineering firm.
- **Violation No. 25**. Photos of properly labeled tank and/or gauge.
- **Violation No. 26**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that secondary containment was installed or scheduled to be installed, or that the tank is scheduled to be closed permanently.
- **Violation No. 27**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the gauge/high level device was installed or is scheduled to be installed.
- **Violation No. 28**. Monthly inspection report completed within last 30 days.
- **Violation No. 29**. Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the Stage I and/or Stage II vapor recovery system was repaired/installed, scheduled to be repaired/installed or tank is scheduled for permanent closure.
- **Violation No. 30**. Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362. Contact DEC for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.
- **Violations No. 31-34**. Immediately begin work to contain and/or remove of the discharge. Contact DEC's case manager for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.

==========

I, Jennifer Trubia, have been told of the violations cited above and the need to remedy these violations immediately. I have also been told that an administrative settlement conference has been set for 03/24/09 at 3:00 PM in the Region 2 office located at **47-40 21st Street, Long Island City, NY**. I understand that if I do not attend the settlement conference, Department legal staff may institute a formal civil or administrative enforcement proceeding. I also confirm that I have been notified that I will be meeting with an attorney from the Department to discuss settlement and that I may bring my own attorney to the settlement conference.

Owner/Operator/Representative Signature: Jennifer Trubia Title Oprmgr Date: 2/23/09

SEE INSTRUCTIONS ON BACK

718-591-469 **Instructions.**

In order to demonstrate that the facility is in compliance, you should bring to the settlement conference proof that the violations cited on the front page of this Notice of Violation have been corrected or are being corrected. Such proof may include (but not limited to) the following, for particular violations:

- **Violations No. 01-06.** Photos of a posted valid and current PBS registration certificate, a copy of a completed PBS application and check (when applicable) submitted to the Department.
- **Violation No. 07.** A copy of a completed PBS application for substantial tank modification submitted to the Department (when necessary), documentation showing that the tank was properly permanently closed or a written agreement with a contractor with a schedule of tank closure.
- **Violation No. 08.** Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362 and bring the spill case number assigned by Hotline, photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to the spill event.
- **Violation No. 09.** Photos of color-coded fill port(s).
- **Violation No. 10.** Documentation (letter, invoices, etc.) showing that the sump/fill catch bucket was cleaned repaired or replaced.
- **Violation No. 11.** Latest tightness test repot including test calculations and results conducted within the last 5 years. Documentation showing the scheduled day of the tightness test or permanent tank closure.
- **Violations No. 12 and 13.** Properly reconciled inventory records for the last three (3) ten-day periods.
- **Violation No. 14.** A letter/report with investigation results accounting for the discrepancy.
- **Violation No. 15.** Documentation (letters, contracts, proposals, invoices, etc.) showing that leak monitoring has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 16.** Printed records of weekly leak detection.
- **Violation No. 17.** Printed monthly records showing the leak detection system working properly.
- **Violation No. 18.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the pipe leak detector was repaired/installed or is scheduled for repair/installation.
- **Violation No. 19.** An annual cathodic protection (CP) monitoring report completed within last 12 months or documentation showing a scheduled date for CP testing.
- **Violation No. 20.** Documentation (letters, contracts, proposals, invoices, etc.) showing that overfill prevention has been repaired/installed or is scheduled for repair/installation.
- **Violation No. 21.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that shear (impact) valve(s) has been properly installed or is scheduled for repair/installation.
- **Violation No. 22.** Photos of tank label(s) affixed at the fill port or documentation showing that the label(s) was ordered.
- **Violation No. 23.** Latest (completed within last 12 months) tightness test report including test calculations and results, a standpipe test report or other test acceptable to the Department, or a schedule for such test or permanent tank closure.
- **Violation No. 24.** Copy of as-built plan or drawing with appropriate installer's 614 statement or documentation (letters, contracts, proposals, etc.) showing that drawings were ordered from the appropriate architectural or engineering firm.
- **Violation No. 25.** Photos of properly labeled tank and/or gauge.
- **Violation No. 26.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that secondary containment was installed or scheduled to be installed, or that the tank is scheduled to be closed permanently.
- **Violation No. 27.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the gauge/high level device was installed or is scheduled to be installed.
- **Violation No. 28.** Monthly inspection report completed within last 30 days.
- **Violation No. 29.** Photos and documentation (letters, contracts, proposals, invoices, etc.) showing that the Stage I and/or Stage II vapor recovery system was repaired/installed, scheduled to be repaired/installed or tank is scheduled for permanent closure.
- **Violation No. 30.** Immediately notify the NYS Spill Hotline of a spill at (800) 457-7362. Contact DEC for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.
- **Violations No. 31-34.** Immediately begin work to contain and/or remove of the discharge. Contact DEC's case manager for guidance at (718) 482-4651. Photos and/or documentation (letters, invoices, etc.) showing that the spill was cleaned up. If cleanup is not completed, proposal letters or contracts from consultant/contractor regarding current status of spill investigation/remediation. Also, all correspondence with the DEC spill case manager pertaining to this spill event.

STATE OF NEW YORK
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
----------X

In the Matter of the Violations of Article 17 of the New York State Environmental Conservation Law, Article 12 of the New York State Navigation Law, and Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York,

ORDER ON CONSENT

NYSDEC File No. R2-20090319-167

- by -

Black Bear Company, Inc.

Respondent.
----------X

WHEREAS:

1. The New York State Department of Environmental Conservation ("NYSDEC" or the "Department") has administrative jurisdiction over the abatement and prevention of pollution of the waters and air of the state, and is responsible for the enforcement of the Environmental Conservation Law of the State of New York ("ECL"), and Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York ("NYCRR");

2. It is the responsibility of the Department to conserve, improve and protect New York State's natural resources and environment, and control pollution in order to enhance the health, safety and welfare of the people of the state and their overall economic and social well-being; and

3. The Respondent, Black Bear Company, Inc., owns and operates a petroleum bulk storage facility located at 27-10 Hunters Point Boulevard, Queens, New York 11101, identified in Department records as PBS #2-452335 (the "Facility").

VIOLATIONS

4. Department staff inspected the Facility on February 23, 2009 and found the following violations:

   a. Respondent violated 6 NYCRR § 613.4(a)(2) by failing to monitor an unmetered tank for leaks - $500 penalty

5. ECL § 71-1929 provides for penalties of up to THIRTY SEVEN THOUSAND FIVE HUNDRED dollars ($37,500) per day for each violation of the ECL Part 17 and 6 NYCRR Parts 612, 613 and 614 set forth above.

6. ECL § 71-2103 provides for penalties of up to FIFTEEN THOUSAND dollars ($15,000) per day for each violation of 6 NYCRR Part 230 set forth above.

7. Navigation Law § 192 provides for penalties of up to TWENTY FIVE THOUSAND dollars ($25,000) per day for violation of the Navigation Law as set forth above.

8. This Order is made strictly for the purposes of the Department and is not intended for the benefit of, or use by, any third party.

9. In settlement of the Respondent's civil liability for the aforesaid violations, the Respondent admits the violations set forth herein, waives its right to a hearing herein as provided by law and consents to the issuing and entering of this Order on Consent pursuant to the provisions of Articles 17 and 71 of the ECL, and agrees to be bound by the provisions, terms and conditions herein.

NOW, being duly advised and having considered this matter, the Commissioner of the Department of Environmental Conservation hereby ORDERS that:

I. COMPLIANCE SCHEDULE

Within 60 days of the effective date of this Order, the Respondent shall close the tank. Respondent must then submit a tank closure application to Mr. Moses Ajoku, Petroleum Bulk Storage Unit, New York State Department of Environmental Conservation, 47-40 21st Street, Long Island City, New York, 11101-5407; mxajoku@gw.dec.state.ny.us (e-mail); 718-482-4098 (fax). All correspondence must carry the Facility identification number set forth in paragraph 3 above.

II. PENALTY

A. The Respondent is hereby assessed a civil penalty in the amount of Five Hundred ($500.00) Dollars for the violations stated herein. Payment shall be made by check or money order payable to the "Environmental Protection and Spill Compensation Fund" and delivered with the Respondent's signed original of this Order to: Louis P. Oliva, Regional Attorney, New York State Department of Environmental Conservation, 47-40 21st Street, Long Island City, New York, 11101-5407.

B. Payment of the civil penalty shall not in any way alter the Respondent's obligation to complete performance under the terms of this Order. In the event that the Respondent fails to fully comply with the requirements of this Order in a timely fashion, the Respondent shall be subject to penalties of up to $37,500 per day per violation pursuant to ECL § 71-1929, and penalties of up to $15,000 per day pursuant to ECL § 71-2103, without prejudicing the Department from seeking further appropriate penalties for violations of this Order.

III. MISCELLANEOUS

A. Compliance with all terms of this Order shall satisfy the Respondent's outstanding civil liability for the violations described above. The provisions, terms and conditions of this Order shall be deemed to bind the Respondent and the Respondent's heirs, legal representatives, receivers, trustees in bankruptcy, successors and assigns.

B. This Order shall constitute the entire agreement of the Department and the Respondent with respect to settlement of the violations specifically referenced herein.

C. If the Respondent cannot comply with a deadline or requirement of this Order, because of war, strike, riot, catastrophe, or other condition which was not caused by the negligence or willful misconduct of the Respondent and which could not have been avoided by the Respondent through the exercise of due care, the Respondent shall apply in writing to the Department within a reasonable time after obtaining knowledge of such fact and request an extension or modification of the deadline or requirement.

D. No change in this Order shall be made or become effective except as specifically set forth by written order of the Commissioner, being made either upon written application of the Respondent, or upon the Commissioner's own findings after notice and opportunity to be heard have been given to the Respondent. The Respondent shall have the burden of proving entitlement to any modification requested.

E. The Respondent shall indemnify and hold the Department, the State of New York, and their representatives and employees harmless for all claims, suits, actions, damages and costs resulting from the acts and/or omissions of the Respondent, intentional, negligent, or otherwise, of every nature and description, arising out of or resulting from the compliance or attempted compliance with the provisions of this Order by the Respondent or its employees, servants, agents, successors or assigns.

F. This Order shall take effect when it is signed by the Commissioner of the Department of Environmental Conservation or his designee.

DATED: Long Island City, New York
March 31, 2009

ALEXANDER B. GRANNIS
Commissioner
New York State Department of
Environmental Conservation

By: _____
SUZANNE Y. MATTEI
Regional Director
NYSDEC - Region 2

CONSENT BY RESPONDENT

Respondent, **Black Bear Company, Inc.**, hereby consents to the issuing and entering of this Order without further notice, waives its right to a hearing herein, and agrees to be bound by the terms, conditions and provisions contained in this Order.

RE: 2710 HUNTERS POINT AVENUE, QUEENS

ABC TANK Repair & Lining, Inc. (ABC Tank) is pleased to submit our proposal for your review. ABC TANK will supply the necessary labor, materials and equipment to perform the following:

	$90.00/hour
• Dig up area to expose tank.	**$200.00**
• Cut open tank to gain access.	**$550.00**
• Pump out & clean interior of (1) 550-gallon oil tank.	**$500.00**
• Fill tank with sand and abandon in place.	**$400.00/sample**
• Submit soil samples to a certified laboratory for analysis.	**$300.00**
• Issue (1) NYC Fire department affidavit (once invoice is paid in full)	
• Disposal of contaminated water, if any @ .75/gallon	**$350.00**
• Back fill dug up area and re-cement.	

Terms of Payment: Payment due upon completion of job.
All prices are subject to applicable taxes.

This proposal does not include any work not specifically mentioned. Any other work required would be quoted separately.

The price is valid for a period of sixty- (60) calendar days from date of this proposal.

If the terms, prices & conditions meet your approval, please sign & return (1) copy for our files. For your convenience, you may fax your signed acceptance back to A.B.C. at 718-272-3147.

Yours truly,

Robert Iengo

As an authorized representative of the above named facility, I affirm under penalty of perjury that the information displayed on this form is correct to the best of my knowledge. Additionally, I recognize that I am responsible for assuring that this facility is in compliance with all sections of 6 NYCRR Parts 612, 613 and 614, and applicable sections of 6 NYCRR Subpart 360-14 (used oil tanks only), not just those cited below:

-- The facility must be re-registered if there is a transfer of ownership.
-- The Department must be notified within 30 days prior to adding, replacing, reconditioning, or permanently closing a stationary tank.
-- The facility must be operated in accordance with the code for storing petroleum, 6NYCRR Part 613.
-- Any new facility or substantially modified facility must comply with 6NYCRR Part 614.
-- **This certificate must be signed and posted on the premises at all times.** Posting must be at the tank, at the entrance of the facility, or the main office where the storage tanks are located.
-- Any person with knowledge of a spill, leak or discharge must report the incident to DEC within two hours **(1-800-457-7362)**.

RE: 27-10 Hunter's Point

Order No.: 0905062

Dear Bob Iengo:

American Analytical Laboratories, LLC. received 2 sample(s) on 5/6/2009 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The results reported herein relate only to the items tested or to the samples as received by the laboratory. This report may not be reproduced, except in full, without the approval of American Analytical Laboratories, LLC and is not considered complete without a cover page and chain of custody documentation. The limits (LOQ) provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report or the data is qualified. This package has been reviewed by American Analytical Laboratories' QA Department/Laboratory Director to comply with NELAC standards prior to report submittal. This report consists of 14 pages.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Karen Kelly for

Lori Beyer
Lab Director

HEAT & POWER COMPANY

Four Generations...Industrial & Domestic

July 21, 2009

New York City Fire Department
Bureau of Fire Prevention
9 Metrotech Center - 3rd Floor
Brooklyn, N.Y. 11201

RE: 2710 Hunter Pointer Avenue Queens NY

I hereby certify that I am an Oil-Burning Equipment Installer with License #2689A and Install Test Repair Buried Tanks License# 61830378.

I further certify that the fuel oil storage system at the above premises has been legally abandoned and the piping capped or sealed on 5/1/09.

1. All contents of the storage system have been removed by A.B.C. TANK REPAIR & LINING INC. and the system rendered free of flammable or combustible vapors.

2. All waste was removed from the storage system and has been disposed of in accordance with the applicable city, state and federal requirements.

3. (1) 550 gallon buried fuel oil tank has been legally abandoned in place by filling with a sand mix.

4. All connecting lines have been disconnected and sealed. All fill lines have been discontinued, the fill line connection has been sealed with concrete so as to prevent use of fill line and the vent line has been left open.

I further certify that the storage system has been legally abandoned in compliance with the Administrative Code of the City of New York and section 21-02 of the NYC Fire Department Rules.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 10 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/16/2017 has revealed that there are 17

EXECUTIVE SUMMARY

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 05/01/2017 has revealed that there is 1 NY VAPOR REOPENED site within approximately 1 mile of the target property.

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 NY MOSF UST sites within approximately 0.5 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

NY MOSF AST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 NY MOSF AST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 40 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110001594169

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 12/16/02 - AUSTIN, DDO - SPOKE WITH JOE LADOLCETTA - MODEL TRUCKING DRIVER TOOK VEEDER ROOT READING FOR TWO 4K TANKS ON SITE - TANK # 1 SHOWED 7 GALS., AND TANK # 2 SHOWED 710 GALS. THEY FILLED TANK # 2 WITH 2K OF FUEL, NO PROBLEM. TANK #1 OVERFILLED AT 2200 GALS., AND BACKED UP THROUGH FILL - 20 GALS. SPILLED, ACCORDING TO

PUBLIC SERVICE TRUCK RENT (Continued) **S106010088**

LADOLCETTA - SPILL WAS IN PARKING LOT; NO IMPACT TO SEWERS - NO SPILL THROUGH VENT - CLAIMS CLEANUP DONE 25 MINUTES AFTER EVENT OCCURRED - SEND FDO (SANGESLAND) TO CHECK SITE TO CONFIRM SPILL CLEANED UP PROPERLY AND STATUS ON CORRECTING VEEDER ROOT PROBLEM (MR. PLASS IS CONTACT FOR THIS LATTER ISSUE). 718-349-6200. 12/16/02 Sangesland met on site with Mr. Plass. Area is a parking lot with buried tank(s)? Area around the fill boxes show evidence of long term surface spills. Area appears to be solid cement and/or blacktop with a 1 to 3 layer of surface oily mud. Sangesland requested this surface area be cleaned and documentation of cleaning (photographs) be forwarded to this office. The quantity of oily soil appeared to be very minor, it is more an odor nusance problem for people walking on the adjacent sidewalk. "

Remarks: "alarm not working on tank caused spill all cleaned up"

FINDS:

Registry ID: 110004568192

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 152560: APPROX 2 QTS OF AN UNKNOWN OIL ON APPROX

VAULT #VS794 (Continued) **S106383954**

1000 GALS OF WATER IN VS794. SPILL IS CONTAINED. THIS STRUCTURE WAS CLEANED ON 3/17/04 AT 2004 HRS (INCIDENT # 152525). STRUCTURE WAS PRESSURE TESTED ON 3/16/04 AND HELD PRESSURE. SUMP WAS CEMENTED ON 3/17/04. HISTORICAL PCB COUNT IS <1.0 PPM DTD 9/24/96. THIS STRUCTURE MAKES WATER. NO SEWER CONNECTIONS. SAMPLE RESULTS OF INCIDENT 1555 ARE LAB SEQ 04-02007 AND THE RESULTS ARE 15 PPM. 23:14HRS LAB SEQ#04-02087-001 <1 PPM PRESSURE TESTED V794 AND PASSED. FORBES & W. LONG OF QUEENS ENV. OPS. REPORT THEY DOUBLE WASHED STRUCTURE WITH BIOGEN 760, FOUND SUMP ALREADY SEALED, AND REMOVED ENV. STOP TAG 03045. CLEANUP COMPLETE AS OF THIS TIME."

Remarks: "2 QRTS OF UNKNOWN OIL FOUND ON 1000G OF WATER IN A VAULT. NO TO ALL 5 QUESTIONS."

DEC Memo:	"161356. 10/4/2005 02:30 HRS D. SALVESEN #07099 FOD OPERATOR REPORTS FINDING APPROX 3 GALS OF UNKNOWN OIL ON APPROX 300 GALS OF WATER IN VS0643 ON 1Q04. THIS WAS FOUND WHILE MARKING PHASES ON ACCT# 45768 ON A SCHEDULED JOB TO HAVE THE UNIT REPLACED. THERE WAS NO SMOKE, FIRE, OR INJURIES RELATED TO THE SPILL, NOR WERE ANY SEWERS, WATERWAYS, OR PRIVATE PROPERTY AFFECTED. THE SOURCE AND CAUSE OF THE SPILL IS UNKNOWN. THE STANDING WATER IN THE STRUCTURE HAD NO MOVEMENT, AND THE EXISTENCE OF ANY SEWER CONNECTIONS, SUMPS, OR DRAINS COULD NOT BE VERIFIED AT THIS TIME. AS PER FCR THIS UNIT IS SCHEDULED TO BE REPLACED ON 10/4, THEREFORE NO NEED TO PRESSURE TEST. THERE IS NO PCB HISTORICAL DATA ON WAREHOUSE FOR THIS UNIT. ENV STOP TAG# 48752 WAS PLACED AND ONE LIQUID SAMPLE TAKEN ON E PRIORITY FOR PCB ANALYSIS ON CHAIN OF CUSTODY# EE16676. THE SAMPLE WILL BE TAKEN TO CHEM LAB BY THE CREW AND CLEANUP WILL BE PERFORMED UPON LAB RESULTS AND AFTER REMOVAL OF UNIT. J ANDERSON 10/4/05 03:35 HRS D. SALVESEN AFTER CHECKING THE 2ND VAULT VS0794 ON 1Q08 REPORTS FINDING THE SAME AMOUNTS OF OILAND WATER. THE HISTORICAL PCB DATA FROM WAREHOUSE DATED 3/26/2004 INDICATES 4 PPM LAB SEQ# 0402432003. A SECONDSAMPLE WILL BE TAKEN FROM THIS STRUCTURE USING THE SAME ENV STOP TAG AND CHAIN OF CUSTODY NUMBERS. THIS UNIT ISNOT SCHEDULED TO BE REPLACED AND WILL HAVE TO BE PRESSURE TESTED. J ANDERSON UPDATE 10/4/05 04:15 HRS ENGINEERING RECORDS WERE CHECKED AND STATES THAT VS643 IS SEWERED, ALSO NOTIFIED ERT P. WALSH OF THIS. J ANDERSON UPDATE 10/4/05 04:20 HRS AFTER VERIFYING WITH ERT DAUGHTREY THAT THIS WOULD STILL QUALIFY AS A 72 HOUR JOB USING ONE INCIDENT NUMBER FOR TWO STRUCTURES WITH A COMBINED SPILL OF APPROX 6 GALS, IT WAS HIS DECISION TO MAKE THIS A REPORTABLE SPILL. CIG C. HAYNES NOTIFIED OF SPILL. J ANDERSON Closed. 12-1-05. see eDocs. GB "

DEC Memo:	"03/20/12-Hiralkumar Patel. DEC Paul and DEC Hussein went to the site for inspection and found free product on water in former heating oil tank location on Lot 1. DEC Paul asked for site visit. 2:00 PM:- visited site with DEC Vought. met with Gregory Wyka from ELM Group. inspected excavation of former heating oil tanks on lot 1. found layer of product on water and impacted soils at the groundwater interface. DEC Paul asked Gregory to report a new spill number based on findings of product on water. informed Gregory that the department requires complete delineation and remediation of petroleum contamination. Gregory Wyka The ELM Group Ph. (212) 962-4301 Ext. 304 (646) 895-3320 (C) Fax (212) 962-4302 email: gwyka@elminc.com Aurora Contractors, Inc. Ph. (631) 981-3785 3:51 PM:- a spill report created as wasn't reported by RP yet. 29-01 Borden Realty Co., LLC. **property owner** c/o Parkwill Management Corp. **management company** 60 East 56th Street, 7th Floor New York, NY 10022 Attn.:

FEDEX (Continued) **S110612090**

Robert Corroon **property owner** Ph. (212) 751-4620 Ext. 103 email: rcorroon@ix.netcom.com 03/21/12-Hiralkumar Patel. 12:33 PM:- spoke with Greg at ELM. he mentioned that after yesterday's site visit, work has been stopped as need to clarify some issues. he mentioned that as per approved work plan, they were not planning to excavate too deep below water table and were planning to use on-site soil to backfill the excavation, if not contaminated. asked him to contact DEC Hussein regarding use of on-site soil to backfill the excavation. he mentioned that they were planning to excavation 2-4 ft below the water table. informed him that the Department requires complete delineation of contamination and excavation depth can be determined based on results of soil/groundwater samples. they have put absorbent pads on water in excavation. he asked to contact Mimi Raygorodetsky. 12:42 PM:- spoke with Mimi at ELM. informed her that the Department require complete delineation and remediation of contamination. Mimi mentioned that they were planning to excavate to feasible limit and collect endpoint samples. she also mentioned that they are planning to bring a frac tank on-site to pump contaminated water from excavation. agreed with her plan and informed Mimi that based on endpoint samples, the department may require additional investigation. asked her to send an email with description of the cleanup plan and a work schedule. discussed with DEC Austin. 2:55 PM:- sent letter to Mr. Corroon requiring removal of petroleum product from excavation, soil/gw delineation and endpoint samples. asked him to submit report by 04/30/12. letter emailed to DEC Paul, DEC Austin, DEC Oliva, DEC Hussein, DEC Ross and Mimi. 3:25 PM:- received call from Mimi. she mentioned that vacuum truck will be on-site tomorrow. they will continue excavation of contaminated material. 4:04 PM:- received call from Mimi and requested a site meeting. scheduled a site visit at 10 AM tomorrow. 03/22/12-Hiralkumar Patel. 10:00 AM:- visited site. met with Mimi, Greg and Mr. Corroon. vacuum truck was on-site. due to spill in bronx, left site before contractor begun excavation. Mimi will send update. 12:25 PM:- received email from Mimi. they dewatered teh pit and then excavated contaminated soil under water table. they dug to approx. 16 to 18 feet below grade (about 6 to 8 feet below the water table) and found clay layer with organic matter. it was light brown in color and exhibited no odor or PID readings. collected endpoint samples. 03/26/12-Hiralkumar Patel. received email from Mimi (at 6:21 PM on 03/23/12). she wanted to confirmed that petroleum contamination issue related to spill #: 1008547 and 1114115 will be handled in spills and DEC Ross will manage chlorinated solvent and PCB contamination. also she wanted to confirm that the department's letter dated 03/21/12 orerrule the previous approval for petroleum related issue. 03/28/12-Hiralkumar Patel. 1:17 PM:- left message for Mimi. 04/02/12-Hiralkumar Patel. 3:49 PM:- received message from Mimi. they received lab data and will submit tomorrow. 04/03/12-Hiralkumar Patel. 4:21 PM:- received email from Mimi including results of endpoint samples. she is still waiting for results of E1, endpoint sample collected at 18 ft bg. reviewed sample results. it is missing results of sidewall samples E2, E3 and E4 also. SVOC contamination found in some samples. need to reivew data of other samples. 4:40 PM:- sent email to Mimi and asked to submit missing data prior to any discussion. 04/04/12-Hiralkumar Patel. 11:14 AM:- received email from Greg including a revised map with sampling depths. 04/10/12-Hiralkumar Patel. 4:40 PM:- received email from Mimi including result of sample E1, which was collected at 18 ft

FEDEX (Continued) **S110612090**

bg. reviewed available endpoint sample results. no VOCs found in any samples, but some SVOCs found. SVOC compounds were found below 3,300 ppb in most of the samples, except sample E9 (max 15,000 ppb Chrysene) and E13 (max 11,000 ppb Benzo(b)flouranthene). samples E9 and E13 were the endpoint bottom samples collected at 11 ft bg. another sample E1 was collected at 18 ft bg via test pit through excavation bottom. 04/11/12-Hiralkumar Patel. received call from Mimi and Greg. Mimi mentioned that south sidewall samples E2, E3 and E4 were composited in sample EC1. she also mentioned that after collecting endpoint bottom samples E9 through E13, they did test pit in middle of excavation and collected sample E1 from 18 ft bg. 04/12/12-Hiralkumar Patel. discussed with DEC Austin. based on following, he mentioned that no further investigation is needed: - as there is no Naphthalene found in endpoint samples, other SVOC compounds could be result of backfill material - SVOC compounds were found in other part of property during investigation in Dec. 2010 - oil and water from tank excavation was pumped out 3:28 PM:- sent email to Mimi and asked to submit a final closure report. email copied to Greg and Mr. Corroon. 04/23/12-Hiralkumar Patel. 11:16 AM:- spoke with Mimi. asked her if any product appeared on water after initial pump out. she mentioned that after excavating soil contamination and collecting soil sample at 18 ft depth, they left excavation open for couple of hours to let water recharge. at that point, no product was observed on water and they collected water sample. asked her to submit a final closure report. 05/23/12-Hiralkumar Patel. 10:21 AM:- sent email to Mimi inquiring about tank closure report. email copied to Greg and Mr. Corroon. 10:23 AM:- received email from Mimi. the report is complete and currently being reviewed by their client. will submit report shortly, once reviewed. 06/27/12-Hiralkumar Patel. 2:56 PM:- spoke with Mimi. she mentioned that due to some conflicts between onwer and ELM group, report was not submitted, but she is finalizing the report and will submit in couple of days. 07/13/12-Hiralkumar Patel. received tank removal/spill closure report. based on available information, case closed. 3:29 PM:- sent spill closure letter to Mr. Corroon. letter emailed to Mr. Corroon, Mimi and DEC Hassan. **refer to spill #: 1008547 also.**"

Remarks: "Petroleum product on water and contaminated soil observed in excavation of former heating oil tanks."

DEC Memo:	"11/16/10-Hiralkumar Patel. 10:09 AM:- left message for Mimi. 11/22/10-Hiralkumar Patel. 2:00 PM:- left message for Mimi. 3:57 PM:- received call from Mimi. she mentioned that site has a large vacant industrial building. currently, a potential tenant is looking to rent this place and hired Langan for environmental investigation. Langan installed borings around previously abandoned two 5,000 gal #4 oil USTs. during boring work, heavily contaminated soil (with strong petroleum odors/high PID readings/staining) was encountered between 4 to 8 ft depth. Langan installed a temporary well and collected soil, groundwater and soil-vapor sample. ELM Group is working for property owner. Mimi is waiting for lab data from Langan which will probably be available by next week. based on results of recent sampling, ELM group will develope a work plan for complete delineation and remediation. 29-01 Borden Realty Co., LLC. **property owner** c/o Parkwill Management Corp. **management company** 60 East 56th Street, 7th Floor New York, NY 10022 Atnn.: Robert Corroon **property owner** Ph. (212) 751-4620 Ext. 103 email: rcorroon@ix.netcom.com Michael Burke Langan Ph. (212) 479-5413 12/30/10-Hiralkumar Patel. 10:11 AM:- left message for Mimi. 10:18 AM:- left message for Michael. 10:24 AM:- spoke with Mr. Corroon. he owns the property. currently, site has one story warehouse building. Mr. Corroon is renting this place and new tenant will demolish the existing building and redevelop. Mr. Corroon refuse to provide info about future use. asked Mr. Corroon to provide complete contact info of the future tenant. Mr. Corroon

FEDEX (Continued) **S110612090**

mentioned that they owns property for long time and they abandoned two 5,000 gal tanks about 7 years ago. during recent investigation, oily soil found near the boiler at 5-6 ft depth. Mr. Corroon suspects an old drywell in the area. asked Mr. Corroon to submit available reports for environmental investigation. 11:39 AM:- received email from Mr. Corroon. they are still negotiating the lease agreement and will provide futuer tenant's info, once lease is signed. 01/05/11-Hiralkumar Patel. 10:33 AM:- left message for Mr. Corroon to submit report(s). 01/10/11-Hiralkumar Patel. 12:38 PM:- received message from Mr. Corroon. he will talk to Keith at ELM group and ask to submit documents. 01/20/11-Hiralkumar Patel. 12:52 PM:- received call from Mr. Corroon. he will submit documents by 01/24/11. 01/21/11-Hiralkumar Patel. 3:57 PM:- received call from Mimi. she mentioned that due to confidentiality agreement between the owner and future tenant, they can not release the full langan report, but will include work summary in their report. Mimi mentioned that during field work, they found high PID, staining and product on tip of 1 inch diameter piezometer installed in boring. but no contamination found in soil or groundwater samples. Mimi will submit report on 01/24/11. 01/25/11-Hiralkumar Patel. received email from Mimi (at 5:40 PM on 01/24/11). she mentioned that owner is reviewing the report and she will send report by tomorrow. 4:16 PM:- received call from Mike from Langan. they did Phase I and Phase II investigations. asked him to submit copies of these reports. he will talk to his client and will send copies, if gets approval. 01/26/11-Hiralkumar Patel. 2:12 PM:- received letter report from Mimi including summary of reports prepared by Langan. 3:14 PM:- sent email to Mimi. asked her to submit complete Phase I and Phase II reports, prepared by Langan, for review. 3:27 PM:- received email from Keith from ELM. they got approval to release Langan's reports and will submit tomorrow. 01/31/11-Hiralkumar Patel. 11:00 AM:- received copy of Phase I and Phase II reports. abstract of Phase I: - prepared a Phase I for two properties: 29-01 Borden Ave (Block/Lot: 292/1) and 29-10 Hunters Point Ave (Block/Lot: 292/27) - Dutch Kills to the west of the property - Lot 1 is improved with an approx. 172,000 sq. ft. 1-story manufacturing building and Lot 27 is improved with an approx. 161,480 sq. ft. 1-story manufacturing building - both buildings are vacant - abandoned, generally east-west oriented railroad tracks are located in an overgrown vegetated area between the buildings - proposed development will include the demolition of existing structures and the construction of a FedEx warehouse/distribution facility - proposed design includes a one-story steel frame building with mezzanine level - a new 132,000 sq. ft. building will be located in the eastern section of the site - the first floor will consist of a 10-inch concrete slab that will be used primarily for vehicle parking and a partial mezzanine level will be used primarily as office and mechanical shop - the western section of the site will be paved parking area which extends to the western property line along the Dutch Kills - Lot 1 was occupied by Radio Engineering Laboratories from 1962-1970, by Warner Lambert Co., Inc-American Chiclet Division from 1977-1986, Waldes Truarc Inc. (a retaining ring manufacturer) in 1991 and Acosta Artdeco (concrete precast facility), Mountain Air Mechanical Inc. (cooling and heating sales and servicing) in 2005 - Lot 27 was occupied by the National Envelope corp. from approx. 1981-2006 less than ---------- - black staining was observed in the main interior loading dock of the building at Lot 1 - black staining on the wall of the boiler room in building at Lot

FEDEX (Continued) **S110612090**

27 - the center of the property (an area between two lots) was excavated to construct a basin with access to the Dutch Kills - the basin was filled in for development purposes between 1900 and 1924 - hazardous waste was generated at the site between 1994-2007 - on RCRA database, the subject property was listed as a large quantity generator in 1994-1996 and a small quantity generator from 2000-2007 in relation to waste generated at National Envelope at 29-10 Hunters Point Ave (Lot 27) less than ---------- - waste types included non-listed ignitable wastes, unknown waste, PCE and silver less than --------- - eight violation related to generation of hazardous waste were issued by US EPA to National Envelope (EPA ID# NYD001344886) between 1998 and 2007 (one on 10/06/1998, three on 05/19/2000 and four on 05/09/2007) less than ---------- - according to USGS maps, the subject property is relatively flat and the surrounding area slopes gently towards the west - groundwater at the site is approx. 8 ft bg and is presumed to flow west towards teh Dutch Kills - the subject site was not listed in the drycleaner database; however, one dry cleaner was identified 900 ft east, northeast of the site and is no longer in operation less than ---------- - 1898 Sanborn Map: the subject property is undeveloped; a proposed slip of the Dutch Kills extends through the center of the property - 1915 Sanborn Map: the subject site unchanged, except that the proposed slip is now labeled a basin - 1970 Sanborn Map: Lot 1 is improved with a one-story buiding constructed between 1956 and 1957 that is occupied by Radio Engineering Laboratories, Inc.; Lot 27 is improved with a one-story building, including a loft, offices and an electrical appliance warehouse, constructed between 1951 and 1952; the basin connected to the Dutch Kills was filled and the center of the property is occupied by railroad tracks that run east-west and then curve southeast along 30th street less than -------- - according to sanborn maps, the basin was apparently filled in the late 1940s for development purposes; however, based on 1924 aerial photograph, the basin was filled some time before 1924 - as per 1962 City Directory, Lot 1 was listed as AmerTran Transformers Division of Radio Engineering Lab less than ---------- - as per 1983 City Directory, Lot 1 was listed as Warner Lambert Company, which is a manufacturer of pharmaceuticals, gum, and candy - as per 1991 City Directory, Lot 1 was listed as Waldes Truarc Inc. (a retaining ring manufacturer) - multiple saw cut markings and steel plates observed in both buildings (indicating old sub-surface pits, drainage pit, hydraulic lifts etc.) - on lot 27, bank of four slop sinks (which is roller wash sink area) is located immediately east of the boiler room at the western extent of the manufacturing floor. sections of piping below the sinks were broken; however, a drain below one of the sinks discharged into a bucket fixed into the concrete floor less than -------- - additional slop sink is located, on lot 27, along the northern wall near the center of the building (this sink in area close to ink storage). slop sink drained through a hose into an area below 2 ft by 3 ft metal plate - the loading dock in Lot 1 contains two approx. 10 ft by 20 ft concrete pads, two 8 inch by 8 inch dry wells, and four steel plates ranging in size from 2 ft by 2 ft to 2 ft by 3 ft in the eastern portion of the loading dock; as per owner’s representative, these area may be related to a decommissioned UST - two fill ports and two vent pipes were observed along the southern exterior wall of the building on Lot 1 - a fill port and vent pipe were observed along the center of the western exterior wall in the parking lot adjacent to the boiler room in Lot 27 abstract of Phase II: - groundwater measurements recorded during

FEDEX (Continued) **S110612090**

the Phase II ranged from 6 to 11 ft bg and are likely influenced by tidal fluctuations of the Dutch Kills - conducted geophysical survey; confirmed location of 20,000 gal UST in western portion of the building on Lot 27 and identified two approx. 5,000 gal USTs in the central southernmost portion of the building on Lot 1 - scattered geophysical anomalies, indicative of unconsolidated soil, were identified throughout the site - installed 12 soil borings (SB1 through SB12) to depths ranging from 12 to 16 ft bg - two soil samples were collected per boring, except SB2 where recovery was limited - soil was observed to be historic urban fill material predominately of brown or grey-brown medium to fine sand with some silt, gravel, brick, wood and concrete - fill material extended into groundwater, upto 16 ft bg - petroleum-related odors and staining, residual petroleum in unsaturated soil, and PID readings ranging from 29.1 to 9,999 ppm were identified in boring SB-7 adjacent to the USTs in Lot 1 - heterogeneous fill material included creosote-impacted wood near the center of the subject property (in area of former basin) in borings SB5 and SB6 at depths between 10 and 12 ft bg; PID readings at this interval ranged from 60 to 96.1 ppm in SB5, but no PID readings detected in SB6 - heavy SVOC contamiantion found in sample at 10-12 ft in SB5, at 8-10 ft in SB6, at 6-8 ft in SB7, at 2-4 and 6-8 ft in SB9 and at 2-4 and 8-10 ft in SB10 - each of the 12 borings were converted into 1 inch diameter temporary monitoring wells with 10 ft of screen and groundwater samples were collected - petroleum related sheen was observed on the groundwater at SB7 less than ---------- - temporary well were not surveyed - found 530 ppb Naphthalene in groundwater from TMW-5 - eight sub-slab soil vapor samples were collected by drilling 6 inches beyond the floor slab - ambient air sample was collected in the parking lot of Lot 27 along the Dutch Kills - PCE contamination not found in samples, but TCE found in eight soil samples from seven borings (out of 12 boring) and two groundwater samples - reporting limit of TCE and PCE were 260 ppb for soil sample at 6-8 ft bg in SB7 and were 530 ppb for soil sample at 10-12 ft bg in SB5 less than ------- TCE in soil samples (in ppb): ----------SB2-------SB3-------SB3--------SB4-------SB5-------SB6------ -SB10-------SB11 2-4 ft 2-4 ft 8-10 ft 8-10 ft 2-4 ft 2-4 ft 8-10 ft 2-4 ft
TCE-------3.2--------51-------5.3--------3.6-------3.7-------5. 0-------5.7--------4.4 TCE in groundwater samples (in ppb): ----------TMW2------TMW3 TCE--------4.9-------1.3 soil-vapor analyticals (in ug/m3)

Lot 27: 29-10 Hunters Point Ave - alternate address: none - PBS #: 2-311774. as per PBS record, site has one 20,000 gal #2 oil UST in-service. UST

FEDEX (Continued) **S110612090**

installed in Jun 1952 and tested on 05/13/06. - spills on property: 9604370, 0102148, 0209638 and 0601095 - spill #: 9604370 was reported on 07/01/1996 due to 75 gal #2 oil spill during delivery due to defective gauge. case closed. - spill #: 0102148 was reported on 05/25/2001 due to tank test failure. case was closed based on passing retest result on 06/11/01. - spill #: 0209638 was reported on 12/19/2002 by FDNY due to findings of an unknown amount of ink spilled into Dutch Kills. as per DEC Zhao, a drain discharge found into Kills and dye test was planned (either by NYS DLE, NYC DEP or Coast Guard). spill closed. - spill #: 0601095 was reported on 04/28/2006 due to tank test failure. case was closed based on passing retest result. 3:33 PM:- sent email to Keith at ELM. asked him to send details about violation issued to National Envelope by EPA. email copied to Mike at Langan. 4:10 PM:- received call from Mimi. discussed project with Mimi and Keith. Mimi requested that Langan should not be included on any future correspondence. informed her that Langan was included as they prepared Phase I and Phase II reports, but as Langan works for potential tenant, agreed with Mimi's request. she will contact Langan to get more details aboout EPA violations issued to National Envelope. during discussion, asked Mimi to confirm integrity of the 20,000 gal tank by having tank tightness test (which is due in May 2011). also informed her that the department requires complete delineation of soil and groundwater (if applicable) contamination around the two 5,000 gal USTs in Lot 1, site-specific groundwater flow direction (via installation of minimum of three permanent at least 4 inch wells) and tidal survey. also informed her that if owner choose to remove the previously abandoned 5,000 gal USTs from Lot 1 then the wells may not be needed based on endpoint sample results. asked Mimi to provide following information by 02/11/11: - details about EPA violation on Lot 27 - schedule for tightness test for 20,000 gal UST on Lot 27 - whether soil/gw investigation or tanks removal on Lot 1 4:38 PM:- received email from Mike from Langan. Mike mentioned that EDR report only indicate about number of violations and its categories and doesn't have any further details. EPA violations were issued for the following categories: - pre-transport - preparedness and prevention - state statute or regulation - general - manifest 02/07/11-Hiralkumar Patel. 11:26 AM:- received call from Mimi. she spoke with Mr. Corroon. she mentioned that the 20,000 gal UST will be tested soon to confirm its integrity. she also mentioned that they are planning to do some geoprobes to delineate the contamination and will remediate the area when the exsiting building will be demolished. informed her that if building demolition occurs by end of April 2011 then the Department can wait for remediation at that time, otherwise onwer has to start remediation in May 2011. informed her that the property owner has to submit written document confirming that the remediation will start by May 2011 (whether building demolished or not). informed Mimi that the new building foundation must not be poured in contaminated zone until remediation is completed or a remedial action plan is approved. no CBS record found on any lot. DEC Vought will check haz-waste databases for any record. 2/15/11-Vought-Site also referred to Section A due to concentrations of up to 5880ug/m3 PCE found in soil vapor samples. Site was formerly occupied by National Envelope who left site (and also had documented on-site use of solvents). DEC Spills unit is currently managing investigation and remedation of #6 free product found at on-Site USTs. Owner is currently seeking to sell property to Federal Express so that they may demolish onsite

FEDEX (Continued) **S110612090**

structures and construct new onsite distribution center. A full file review needs to be performed to aid in site classification. 3/9/11-Vought-Meeting with RHWRE to discuss possible transfer of chlorinated solvent issue to another PM in Section A due to heavy workload. 03/21/11-Hiralkumar Patel. 4:33 PM:- sent email to Mimi inquiring update. 03/22/11-Hiralkumar Patel. 4:29 PM:- received email from Mimi. she mentioned that owner is still discussing about either investigation now or tank removal when building demolition occurs. Mimi will call back by next week with confirmed answer. 04/05/11-Hiralkumar Patel. received email from Mimi (at 6:27 PM on 04/01/11). she mentioned that on-site building will be demolished in 8-9 months and at that point, old UST and associated contamination will be removed. discussed with DEC Austin about delineation of soil/gw contamination and high PCE/TCE in soil-vapor samples. Austin asked to send email with brief discription about the project for possible transfer to Section A due to PCE/TCE concentration and historical use of chlorinated solvents on site. 2:49 PM:- sent email to DEC Austin with site description. 04/06/11-Hiralkumar Patel. 9:09 AM:- received response from DEC Jane indicating that as no contamination found in soil or groundwater samples, site would not require any further investigation under the superfund program. she mentioned that the department may require investigation if, during future work (petroleum investigation/remediation), any additional data is generated that identifies chlorinated solvents in soil or groundwater. discussed with DEC Austin. he asked for further investigation regarding chlorinated solvents. he asked to find out location of chlorinated solvent storage, operation, discharge points, drain structures etc. he mentioned that if the property owner doesn't know about storage/use/discharge location of chlorinated solvents, then the department requires soil/groundwater sampling on both lots with multiple borings/wells. 1:49 PM:- left message for Mimi. 1:51 PM:- left message for Mr. Corroon. 2:09 PM:- sent email Mimi and Mr. Corroon informing that the department requires further investigation of petroleum and chlorinated solvent contamination. asked them to call back to discuss further. 3:48 PM:- received call from Mimi. informed her that as building demolition would occur after 9 months, petroleum remediation would not occur for another year and the department does not agree with this time frame. as such the department requires complete delineation of petroleum contamination. also discussed about chlorinated solvent issue. Mimi mentioned that the property's insurance company is covering all issues except petroleum so any investigation under the spill number will be paid by property owner. and owner wants to investigate chlorinated solvent issue under other program so they can get coverage from insurance company. Mimi asked to send copy of regulation which allows spills section to require investigation of non-petroleum substance. discussed with DEC Austin. he mentioned that the department, not the spills section, requires the investigation of chlorinated solvent contamination. he mentioned that if responsible party refuse to do such investigation and inquires about authority of spills section, then case will be referred to legal. 4:18 PM:- left message for Mimi. 4:59 PM:- received message from Mimi. 04/07/11-Hiralkumar Patel. 10:46 AM:- received message from Mr. Corroon. 04/08/11-Hiralkumar Patel. 10:35 AM:- left message for Mimi. 04/11/11-Hiralkumar Patel. 11:57 AM:- received call from Mimi and Keith from ELM. Mimi asked about regulation for PCE investigation. informed Mimi that the department (not the spill section) requires PCE investigation and all

FEDEX (Continued) **S110612090**

DEC rules/regulation applies in this matter. informed her that after getting preliminary data, this case may be transferred to other section. Mimi mentioned that after findings of PCE use on property and PCE concentration in soil vapor samples, they did further investigation to locate locations of chemical storage/process/discharge/drains etc. and now instead of collecting soil samples, they wants to use other technique which reads only halogenated compounds in soil and groundwater during delineation work. this way they don't need to wait for lab results. asked Mimi to submit details about this technique so can be discussed with supervisor. Mimi also inquired about delineation of petroleum contamination. as discussed earlier, approved Mimi's request for visual delineation via geoprobe and not requiring soil/groundwater sampling as it is #6 oil and expecting to see stained soil if area is contaminated. 04/13/11-Hiralkumar Patel. 9:56 AM:- received message from Mr. Corroon. 04/14/11-Hiralkumar Patel. 2:05 PM:- spoke with Mr. Corroon. informed him about required investigation for petroleum as well as chlorinated solvent. during conversation Mr. Corroon mentioned that currently they don't have any insurance so there is no issue about covering cost of chlorinated spill investigation. 04/22/11-Hiralkumar Patel. received email from Mimi (at 7:16 PM on 04/21/11) including soil vapor contour map. she mentioned that heavy PCE contamination in soil-vapor samples were found on western side in southern lot (Lot 1), but as per Phase I, chlorinated solvent was used in northern building only (Lot 27). Mimi proposed visual observation of both properties, potential geophysical survey on western portion of the two properties and delineation of chlorinated solvent contamination around potential release points. she proposed to collect soil sample with most significant evidence of impact (PID/staining/odor etc.), if present or else collection of soil sample right above the water table. she also proposed collection of groundwater sample if contamination observed in boring. 04/29/11-Hiralkumar Patel. discussed proposed PCE investigation method with DEC Austin. before approving sampling strategy, Austin asked to inspect the site to find out possible PCE release areas (storage/process/discharge/drains/pit/damanged floor/stains etc.). 2:46 PM:- sent email to Mimi and asked her to schedule a site visit with full access to every rooms on property. email copied to Keith and Mr. Corroon. 05/03/11-Hiralkumar Patel. scheduled a site visit at 11 AM tomorrow. 05/04/11-Hiralkumar Patel. 11:00 AM:- visited site. met with Mr. Corroon, Keith (ELM) and Kenny (Midcounty Mechanical). Kenny mentioned that his company was contracted since 1971 to maintain/service electrical/mechanical parts. Kenny Midcounty Mechanical Ph. (347) 386-2891 email: midcountymechanical@verizon.net Kenny mentioned that the company was primarily making plain envelopes (cutting papers, applying glue and fold it). national envelope was also using three printing machines to print some utility company envelopes. three parallel printing machines were located in central western portion of lot 27 starting with one machine close to western foundation wall and close to 20,000 gal UST. former boring SB1 installed in parking lot, in area on other side of western foundation wall. no contamination found in boring SB1. as per Kenny, the company was storing ink in about 5-6 55 gal drum. inspected drum storage area, which is located close to former boring SB8. found sewage injection pit not far from the ink storage area. as per Kenny, all the drains inside the building is connected to this sewage injection pit and from this pit, sewage pumped out into city sewer system (pump

FEDEX (Continued) **S110612090**

was needed as city sewer is at higher elevation than pit inside the building). Kenny mentioned that about 6-7 years ago, company changed from oil based ink to water based ink. the former boring SB8 was installed in area between the ink storage and sewage injection pit. as no soil/groundwater/soil-vapor contamination found in SB-08, Keith mentioned that no further investigation is needed in former ink storage area. also inspected a machine shop where internal machines were being repaired. no sign of spills (odor or stain on concrete) observed in machine shop area. while discussing about EPA violations, Kenny mentioned that company received EPA violations due to illegal discharge of roller wash waste into city sewer system. inspected roller wash sink area. Kenny mentioned that workers were dumping roller washing waste into sewer system but was stopped after EPA's violation. during inspection, found pit in floor and found paper waste into the pit. Kenny mentioned that there was a paper waste compactor located on this pit. there was no use of any chemical in the pit. this pit was found closer to loading area closer to former boring SB2. inspected area of former 5,000 gal USTs in Lot 1. Kenny mentioned that their company changed from oil to gas heating system. Kenny remembers that both 5,000 gal tanks were cleaned and tested tight prior to abandoning in place. found two concrete pads where old boilers were located. found a dry well pit (0.5 ft by 0.5 ft) adjacent to both boiiler pads. Kenny suspect that oil found in SB7 could be result of oil dumping into two dry well pits. Keith will conduct a geoprobe investigation to delineation petroleum contamination. based on observations during the site visit, asked Keith to investigate in three areas: area around SB3, roller washing sink and area along the drain structure from the roller wash sink. also suggest him to conduct a soil-vapor delineation starting from SB3. Keith will discuss with his supervisor and submit work plan next week. asked Kenny to submit documents regarding testing of 5,000 gal tanks prior to abandoning. 4:49 PM:- sent email to Kenny and asked him to submit documents regarding cleaning/testing/abandoning of two 5,000 gal USTs in Lot 1. email copied to Keith and Mr. Corroon. 05/19/11-Hiralkumar Patel. 2:03 PM:- spoke with Mimi. they are currently reviewing the work plan and once client approves it, she will submit work plan by 05/23/11. 05/20/11-Hiralkumar Patel. 4:08 PM:- received eamil from Mimi. she hasn't got chance to review the work plan. she will send work plan soon after client's review. 05/24/11-Hiralkumar Patel. 11:06 AM:- spoke with Keith and asked him to submit work plan by 05/31/11. 06/01/11-Hiralkumar Patel. received work plan from Keith (at 1:08 PM on 05/31/11). abstract: - two 5,000 gal USTs on Lot 1 were closed-in-place on 07/27/06 - as per tanks closing firm, both tanks were pressure tested prior to closure and both tanks passed the test, but no documentation is available - two drains (or dry wells) were noted within the boiler room slab that appear to connect together with piping - there is an outflow pipe in one of the drains that leads to an unknown discharge point less than -------- - proposes to advance four soil borings to a depth of 12 ft bg, in the boiler room, in the vicinity of fomer boring SB7: one to the east, one to the west, one to the northeast and one to the northwest - soil samples from borings around SB7 will not be analyzed in a lab - highest concentration of TCE detected in soil was 55 ppb at 2-4 ft bg in SB3 and in groundwater was 4.9 ppb in TMW2 - two highest concentrations in soil-vapor samples, are located within the lot 1 building - the vapor concentration gradient increases in the direction of SV3, suggesting that any source for chlorinated solvents

FEDEX (Continued) **S110612090**

might be west of SV3 - even though several potential release points exist on lot 27, the chlorinated solvent contamination investigation focuses on the western loading dock/parking area in lot 1, west of SV3 - proposes installation of three soil borings in the parking lot to the west of SV3 - two soil samples (one with highest PID and one from six-inch interval above groundwater interface) and one groundwater sample will be collected from each boring in area of former SV3 and samples will be analyzed for chlorinated compounds via EPA method 8260B and 8260C the submitted work plan is not acceptable as requires investigation in following areas also: - soil/gw delineation on south side of the former boring SB7 - soil/gw investigation at the discharge point of an outflow pipe from one of the drain (dry well) in boiler room on lot 1 (area near former boring SB7) - soil/gw (soil-vapor, if possible) delineation at the former roller wash sink and along the drainage structure from the sink reviewed Phase II lab results again for TCE/PCE values in soil/groundwater samples. PCE contamination not found in samples, but TCE found in eight soil samples from seven borings (out of 12 boring) and two groundwater samples. TCE in soil samples (in ppb): ----------SB2-------SB3-------SB3--------SB4-------SB5-------SB6------ -SB10-------SB11 2-4 ft 2-4 ft 8-10 ft 8-10 ft 2-4 ft 2-4 ft 8-10 ft 2-4 ft
TCE-------3.2--------51-------5.3--------3.6-------3.7-------5. 0-------5.7--------4.4 TCE in groundwater samples (in ppb): ----------TMW2------TMW3 TCE--------4.9-------1.3 06/08/11-Hiralkumar Patel. discussed with DEC Austin requesting case transfer to section A due to former on-site ink (which contains chlorinated solvents) use, former EPA violations, improper discharge of a waste water to on-site drains, shallow soil samples with TCE contamination, sub-slab (6 inches below floor) soil-vapor samples contaminated with TCE and PCE. Austin asked for case summary. 06/14/11-Hiralkumar Patel. 11:36 AM:- sent email to DEC Austin with case summary. DEC Austin discussed case with DEC Paul. as the site was listed as large quantity gnerator of hazardous waste, Austin asked to contact DEC Hussein for further information regarding the site. 06/15/11-Hiralkumar Patel. 1:57 PM:- sent email to DEC Hussein requesting further information regarding RCRA violations and other RCRA issues. 06/21/11-Hiralkumar Patel. 10:37 AM:- spoke with DEC Hussein. he mentioned that there is no open case against National Envelope, but they have large file. he asked to come and check file for any information. 06/27/11 after discussing with DEC Austin, DEC Hassan and DEC Linda Ross, case transferred to DEC Ross. 7/25/2011-Linda Ross Meeting at Region 2 headquarters. Sign up sheet is electronicaly filed. Attendees Linda Ross-DEC Paul John-DEC Keith Brodock, ELM Robert Corroon, Owner, COO Richard Zirinsky Associates Michael Bogin, Esq. for Owner Jordan Barringer, DEC intern Erick Kraemer, DEC intern Lou Oliva, Esq. DEC Hassan Hussein-DEC Planning to demolish the two buldings and remove the slabs. The buildings were built in the 1950s. Federal Express (Fed Ex) is planning a sorting facility for the site. Fed Ex wants the facility to be operational by the holiday season 2012. There will be a new building built for the site, with a new slab and a parking garage. Lot 1-Boiler room-2 4,000 gallon #4 fuel oil tanks which have been closed in place-they passed their last tightness test. Therefore, not sure where the DNAPL in area is from. The DNAPL did not have any analytical exceedances. Might be severely weathered. There are two floor drains in the boiler room. Additional soil sampling is proposed for the boiler room and to delineate the CVOC

FEDEX (Continued) **S110612090**

soil vapor beneath the slab beneath part of the building. The CVOC soil vapor is seperate from the boiler room DNAPL. Lot 27 (former National Envelope)- There is a 2,000 gallon UST, still in place. DEC discussed that a Closure Plan is necessary for the hazardous waste storage area. Clean closure is required and there needs to be a public notice. Sewer testing is also required for the sewer injection pit since there were discharges to the sewer and possible the sewer injection pit. Entire Site - Discussed the possiblity of putting a vapor barrier and sub-slab depressurization system in the new Fed Ex building - LR to contact Health Depart and discuss. Relevant guidance document is CP-51 and for other constituents will use industrial numbers from Part 375. Demolition and asbestos removal are planned for the end of August. Agree for site visit for next day at 1:00 pm on site. 7/26/2011 Site visit 1:00 pm Attendees Hassan Husssein, DEC-phots taken Linda Ross, DEC Bob Corroon, Owner Keith Bradock, ELM Walk through the two buildings, first, 29-01 Bordon Avenue and second National Envelope 29-10 Hunters Point Avenue. First Building (29-01 Bordon Avenue-Lot 1) has a subslab vapor issue that exceeds the NYS Department of Health guidelines. Agreed to collect two soil samples out side of the loading docks near the high vapor reading to determine if there was a relase of VOCs to the soil in this area. The additional requested boring is in the train track area which is heavily treed and it would be difficult to get a rig in for sampling, so a soil sample will be taken below the organic debris with a hand sampling device. This sample will only be analyzed for VOCs to determine the source of the VOC vapor. Looked at the corrosion around the steel beams discussed in Phase I. The cement floor was intact and unstained and so no pathway to soil and groundwater is expected. The boiler room which had the DNAPL with no analytical exceedances was discussed and it was agreed that the two floor drains will be sampled for VOCs and an additional boring will be placed to the north of the floor drains. Second Building (29-10 Hunters Point Avenue-Lot 27, former National Envelope)needs a closure plan for the hazardous waste storage area. Staining in the hazardous waste storage area. Discussed how the sewer injection pit and the sewer needs to have a leak test to see if there was a release to soil and groundwater on th site. If there is a leak in either the sewer or the sewer injection pit, additional delineation may be required. 8/2/2011 Monthly Internal Progress Report for July 2011 prepared by L.Ross:Internal meeting was held on June 27, 2011 with Kumar Patel and Randy Austin to transfer the site to Linda Ross. This is a spill site that will be redeveloped for a Federal Express facility. Fed Ex will be renting the property. There is a petroleum contaminated area and TCE vapor area. The site needs additional study regarding the sewer system pathway and greater delineation of contamination. On July 5, 2011 the Spills unit contacted the Former National Envelope team to inform them that the new project manager is Linda Ross. A meeting was held on Monday, July 25, 2011 to discuss the site. The meeting notes and signup sheet are listed in the DEC notes and Edoc. OGS, DER and the site owner, consultant and attorney attended the meeting. The topics covered were: introductions, overview of the proposed redevelopment, review of the environmental investigations to date and discussion of proposed work plan. On July 26, 2011 Hassan Hussein and Linda Ross performed a site walkthrough to discuss sampling locations and to see the interiors of the buildings. On July 26, 2011 ELM the site consultant submitted an engineering drawing and a brief discussion of the air exchange. On July 28, 2011 ELM asked questions via email

FEDEX (Continued) **S110612090**

regarding the investigation work plan. 03/20/12-Hiralkumar Patel. DEC Paul and DEC Hussein went to the site for inspection and found free product on water in former heating oil tank location on Lot 1. DEC Paul asked for site visit. 2:00 PM:- visited site with DEC Vought. met with Gregory Wyka from ELM Group. inspected excavation of former heating oil tanks on lot 1. found layer of product on water and impacted soils at the groundwater interface. DEC Paul asked Gregory to report a new spill number based on findings of product on water. informed Gregory that the department requires complete delineation and remediation of petroleum contamination. Gregory Wyka The ELM Group Ph. (212) 962-4301 Ext. 304 (646) 895-3320 (C) Fax (212) 962-4302 email: gwyka@elminc.com 3:51 PM:- a spill report (# 1114115) created as wasn't reported by RP yet. 4-27-12 - Hassan Hussein recieved a letter from Dawn Hetrick of NYSDOH regarding vapor intrustion at the Borden Ave site. 5-23-12 - Hassan Hussein received a letter from Michael Burke date 5-23-12 responding to DEC letter of September 16, 2011. 5-23-12 - Hassan Hussein reponded Michael Burke's letter of 5-23-12 in an email correspondence. 6-01-12 - Hassan Hussein received an email from Michael Burke containing another copy of the 5-23-12 letter and additional information on the proposed Stego Wrap vapor barrier. Hassan responded with an email to Mr. Burke explaining that he will review the submitted information and get back to him some time following week. Later the same day, Mr. Burke sent a copy of his email to Dawn Hetrick of NYSDOH. Dawn responded with an email that same day explain the DOH concerns and explained what she will follow up with NYCDEP to get further guidance on the city's review procedure. 6-08-12 - Hassan Hussein completed his review of Michael Burke's 6/1/12 submittal. Hassan also sent Dawn Hetrick email on 6/8/12 asking her if she has an update. She responded with an update regarding her efforts to contact the city and explained that the approach taken by the company is reasonable. 6-08-12 - Hassan Hussein sent Michael Burke an email approving the proposed approach outlined in his 5/23/12 letter. 10/5/12: Issued letter requiring completion of the second round of delineation proposed in the previously approved 11/17/11 workplan. Subsurface Investigation Report due 11/16/12. 12/11/12 - Carlson: Received phone message from Peter Zimmerman, 212-962-4308, 917-952-9068. He is the new project manager. Progress report to be submitted. 1/15/2013 - Carlson: Left voice message for Peter Zimmerman. Investigation report overdue. 2/1/13 - Carlson: Reviewed letter dated 1/24/13 - only one proposed reinstallation of MW1. DEC requires four wells as per 2011 workplan, left voice message for Peter Zimmerman. 2/4/13 - Carlson: Spoke to Peter Zimmerman, a two part workplan will be submitted, they will mobilize twice, first to reinstall MW-1, and then mobilize again to install delineation wells. 5/27/15 - Raphael Ketani. I am the new project manager for the spill case. The site used to be occupied by National Envelope, but is now a FED EX distribution facility. The two buildings which used to occupy the site were torn down several years ago. Michael Burke of Langan Engineering (212) 479-5582 was involved in the spill case. He mentioned that Mimi Raygorodetsky (212) 479-5441 and he were involved in the National Envelope/FED EX project manager for Langan. Mr. Burke added that Langan's involvement was only due diligence. Robert Corroon, Jr., Chief Operating Officer (212) 751-4620, x103, from Richard Zirinsky Associates. RZA is the corporate entity which owns the entire FED EX site. However, the two parcels which comprise the site are owned by the subsidiary companies 2901 Realty Co, LLC and 2910 Realty Co, LLC. There was a later spill

FEDEX (Continued) **S110612090**

opened for the site, #1114115, due to the discovery of contaminated soil and groundwater while removing a UST. It was managed by Kumar Patel of the Region 2 Spills Unit. It was closed on 7/13/12.
According to the above case notes, the second round of contaminant delineation was never performed. 5/28/15 - Raphael Ketani. An orientation meeting took place today as planned. In attendance were Mr. Corroon of RZA, Keith Brodock, PE (212) 440-6702/cell (646) 895-3325, Hassan Hussein and myself. Initially, Mr. Brodock and Mr. Corroon described the site history and the remediation history. The site itself is bounded on the west by the Dutch Kills, on the south by Borden Avenue, on the east by 29th Street and on the north by Hunters Point Boulevard. The site consists of two separate lots. There used to be two buildings on the entire site. The southern building was at 2901 Borden Avenue and was used by Radio Engineering Laboratory as a warehouse. They made personal radios for the public and the military and used dry transformers (no liquids or PCBs). The northern building had been used by National Envelope. Both buildings were completely removed and the present FED EX distribution center building was constructed in the eastern part of the entire site. The building is slab on grade, contains a vapor barrier underneath and has a high capacity ventilation system. Some years ago, two USTs were removed from the boiler room which was located in the southern building near the southwest corner of the entire property. It was found that one 5000 gal. tank had leaked, but the other 5000 gal. tank was intact. A spill was called in (#1114115), the remediation took place, and the case was closed on 7/13/12. To the north, a RCRA site was located along Hunters Point Boulevard near the northwest corner of the entire property. The material was cleaned up and the case was closed. Thus, the subject oil spill case is the only open case for the entire site. However, additional borings were done within the northern half of the site. PCB contaminated groundwater was discovered with the highest concentration at 0.654 ppb at the very southwestern corner of the northern half of the property. The soil samples also had PCBs. The area was resampled and again there were PCB results. The DEC sent a letter dated 1/24/13 requiring further delineation of the contamination. Mr. Brodock stated that he was not aware of any source on site for the PCBs. Mr. Hussein stated that there was an agreement that more data was needed. There was supposed to be new sampling and the installation of 2 new wells. He added that some companies who had occupied the buildings may have used PCBs, but this was uncertain. PCBs have a low affinity to water. He finished by stating that we needed to know where the PCBs had come from. Mr. Brodock said that he believed the PCBs were in the historic fill. He added that the western half of the northern parcel had been a turn around area of open water for the Dutch Kills and was later filled in. Mr. Corroon asked how one can know that the PCBs didn't come from the site. I responded that step out borings could be done from the edge of the Dutch Kills and continued inland to the edge of the FED EX building. This was, one could see the contamination concentration gradient of the PCBs. If the concentrations are highest near the Kills, then the source is the Kills. Mr. Brodock stated that all of the petroleum spills had been remediated. In the end, it was agreed that I would review the work plan that was previously approved by the DEC and the DEC's 1/24/13 letter and provide comments to Mr. Hussein. Then the DEC would let RZA and Integral know how to proceed. After the meeting, I reviewed spill case #0903437, Borden Avenue Bridge. In particular, I reviewed the total diesel range organics

FEDEX (Continued) **S110612090**

(DRO) concentrations and the PCB analytical results for the spill case that were contained in the Test America 6/29/09 analytical report. I did this in order to confirm whether the Dutch Kills could be a source of PCB contamination for the National Envelope/FED EX site. A sample of treatment system intake water from the Dutch Kills was analyzed. Two sediment samples (S-1 and S-2) were also analyzed, one from each coffer dam that had been constructed in the Kills itself. S-1 had 5,100,000 ppb of DRO and S-2 had 7,000,000 ppb of DRO. The PCBs tested for were: PCB-1242, PCB-1254 and PCB-1260. The treatment system intake water sample had 1.6 ppb, 2.3 ppb and 2.2 ppb of PCBs, respectively. S-1 had 590 ppb, 520 ppb and 760 ppb of PCBs, respectively. S-2 had 720 ppb, 1100 ppb and 890 ppb of PCBs, respectively. 5/29/15 - Raphael Ketani. I reviewed the ELM Group 11/15/11 and 11/17/11 Revised Work Plan: NAPL Delineation,CVOC Investigation and PCBs Investigation. Both versions of this latest work plan were the same word for word except for the first paragraph under the PCB Investigation section which described the details of the monitoring well construction. In the work plan, ELM states that they do not believe the sources of the CVOCs and PCBs are the result of on site activity. They add that the contaminants may be in the historical fill. In the ELM Group work plan, it is stated that the Langan Engineering 12/7/10 Phase II Report indicated the detection of PCBs at their well/boring TMW-2/SB2 in the very southwestern corner of the north parcel. The groundwater sample results were 0.654 ug/l for total PCBs. Well over the TOGS 0.09 ug/l limit. In light of this, ELM had planned on installing one boring/well, SB22/MW-1, near SB2. If PCBs would be detected in the groundwater, then borings/wells SB23/MW-2 to SB25/MW-4 would also be installed in the southwestern corner of the north parcel. The work plan also calls for installing borings SB13 to SB19 in the middle of the southern border of the entire property in order to investigate for NAPL and the installation of borings SB20 and SB21 in the southern quarter of the entire property in order to investigate for CVOCs. I also reviewed the DEC letter dated 10/5/12 to Mr. Carroon. The letter stated that as PCBs were detected in the groundwater at TMW-2 and MW-1, the Department required the installation of wells MW-2 to MW-4. Two soil samples were to be taken from each boring. One from the groundwater interface and a sample with the highest contamination. All soil samples and the subsequent groundwater samples were to be tested for PCBs, CVOCs, VOCs and SVOCs. 6/2/15 - Raphael Ketani. I received the Integral Consulting 1/24/13 letter. In the letter, it was stated that they would install SB22/ELM MW-1. They would look at the results from the soil and groundwater samples and see whether they validate the Conceptual Site Model (CSM). The idea behind the CSM is that the PCBs are confined to the Area of Interest (AOI). The installation of additional borings and wells will be evaluated based upon the analytical results. In consideration of my review of the 11/17/11 Revised Work Plan, the DEC 10/5/12 letter and the Integral 1/24/13 letter, I determined that installing borings/wells SB23/ELM MW-2 to SB24/ELM MW-4 was the best way to proceed. I sent Mr. Corroon [(212) 751-4620, x 103] and Mr. Brodock [(212) 440-6702/cell (646) 895-3325] an email today stating that the Department required that they conduct the work that is described in the approved 11/17/11 work plan and the DEC letter dated 10/5/12. I set a deadline of July 10, 2015 for the work to start. 6/3/15 - Raphael Ketani. Mr. Corroon sent an email agreeing with DEC's decision. 7/17/15 - Raphael Ketani. Mr. Brodock sent me an email today: We installed one well on July 10th, and are

FEDEX (Continued) **S110612090**

scheduled to install the other two wells on July 30th. We attempted to install all three wells last week, but were unable to access the two well locations closest to the bulkhead due to the small fence opening. We ve rescheduled with the driller to bring a smaller rig which should fit into the 6.5 opening. I ll send another update after those wells are installed on July 30th. 12/15/15 - Raphael Ketani. As the well installation and results report was never received and as there have been no progress updates, I sent an email to Mr. Corroon and Mr. Brodock requesting the report and an update. A deadline of January 8, 2016 was set for the submission of the report. 1/14/16 - Raphael Ketani. Mr. Brodock (212) 440-6702/cell (646) 895-3325/kbrodock@integral-corp.com called to request an extension of the deadline for submitting the investigation report. He asked that the due date be set to February 29th, 2016. I agreed to the deadline extension. 2/29/16 - Raphael Ketani. Mr. Brodock sent me an email requesting an extension of the report submission deadline to April 15. The reasons for his request were that the financial concerns regarding the project were resolved only last week on Wednesday (2/24/16). Now that they have been paid, they are now able to prepare the report. Mr. Brodock stated that they can now meet the April 15th deadline. I granted the extension of the deadline. 4/19/16 - Raphael Ketani. As the 4/15/16 deadline has come and gone without the submission of the investigation report, I sent an email to Mr. Brodock requesting the report and a progress update. 4/22/16 - Raphael Ketani. Mr. Brodock (kbrodock@integral-corp.com) responded to my 4/19/16 email. He stated that his client (FED EX) had authorized the generation of the report on 4/13/16. So he needs more time to prepare it and send it to the DEC. He suggested a submission date of no later than 4/27/16. I responded by email and stated that this was acceptable. 4/28/16 - Raphael Ketani. I reviewed the Integral Engineering 2015 PCB Investigation and Historic Fill Evaluation Report dated 4/27/16. Boring SB-25 was installed on 7/10/15 by AARCO Environmental Services Corp to 15 feet below grade. MW-1 was paved over and couldn't be found. SB-23 and SB-24 were installed to 15' and 13' below grade, respectively, on 7/30/15. One soil sample containing fill was taken from above the water table at SB-23. Two soil samples containing fill were taken from above the water table at 5.5'-6.5' and 8'-10' below grade at SB-24. The soils observed were sand, silt, clay and fill. There were no native soils. Groundwater was encountered at 7' and 11' below grade. Each location was turned into a well: SB-23 became MW-2; SB-24 became MW-3; SB-25 became MW-4. The soil samples were submitted to the lab for CVOC and PCB analyses. All of the results were well below the CP-51 standards for commercial and industrial sites. Groundwater was sampled on 8/12/15. Groundwater was determined to be 7.5' and 10.4' below the top of the casing. The results for PCE for samples taken from wells that were at or near the Dutch Kills were from non-detect to 0.88 ppb. The results for TCE from these same samples were from non-detect to 10 ppb. Cis-1,2-dichloroethene was from non-detect to 12 ppb. While there were exceedences of the TOGS 1.1.1 standards of 5 ppb for these analytes, the results were still very low. The PCB results were from non-detect to 2.57 ppb (Aroclor 1260) for the samples. Samples taken from wells at or near the Dutch Kills had hits of CVOCs and PCBs. While samples taken from wells inland to the east were entirely non-detect for CVOCs and PCBs. From the data in the report and the data in the other documents in the case file, I determined that the source of the CVOC and PCB contamination was the Dutch Kills and not

FEDEX (Continued) **S110612090**

the site. As the oil spill in the southern part of the site had been remediated and as the Dutch Kills appears to be the source of the CVOCs and PCBs in the fill and the groundwater, and as there are no sensitive receptors near the site and since the site is surrounded by commercial and industrial facilities, I determined that there was little or no risk to the public or the environment from any residual contamination in the fill under the site. Therefore, I closed the spill case effective today. A spill closure letter was sent to Robert F. Corroon, Jr., 29-01 Borden Realty Co., LLC, 60 East 56th Street, FL 9, NY, 10022-3342 (rc@parkwill.net). Mr. Brodock, Mr. Jordan Junion of Integral and Robert Zirinsky (partner at 29-01 Borden Realty; robertz50@aol.com) were copied. [More specifically, Robert Zirinsky works for Ralph Zirinsky Realty Co., which is a partial owner of 29-01 Borden Realty Co., LLC. Bob Corroon works for Richard Zirinsky Associates, which is a partial owner of 29-01 Borden Realty Co., LLC. Both Robert and Bob have the title of Authorized Signatory for 29-01 Borden Realty Co., LLC, the company that owns the property.] 7/6/16 - Raphael Ketani. Mr. Brodock sent me an email today stating that the wells were abandoned on 6/21/16."

Remarks: "Caller reporting a historical spill. Clean up is pending."

FINDS:

Registry ID: 110055432786

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

J MANHEIMER (Continued) **1000152546**

environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004367505

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region:	2
DER Facility ID:	199295
DEC Memo:	"09/05/06 -Zielinski This spill case reassigned from CO to Region 2. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL C 4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel. Spill transferred to Greco as part of Spills Closure Initiative in July, 2005. Contacted original callers company and determined the spill name and address was originally put into system incorrectly as 20-90 Review Ave. (also incorrectly listed as 20090 Review Ave.). Neither of the above addresses is an actual address in Queens County, however, 28-90 is, and 28-90 has two tanks similar to the ones referenced in the spill report. 28-90 is also a the home of a company that is a client of the tank test company which called in the tank test failures. Spill name and address were changed to 28-90 Review Ave. The company at that addres is AA Truck Rental. JDG 8/3/05 Contacted Mr. PJ McDermott 718- 937-8611 at AA Trucking. Mr. McDermott is checking records and will get back to me. JDG 8/3/05 11/21/05 Tried to recontact Mr. McDermott, but he was unavailable. JDG 12/30/05 Tried to recontact Mr. McDermott, but he was unavailable. Left message. JDG 01/04/06 Insufficient documentation was received following several attempts. Have documentation that the tanks passed tightness tests in 1998, and were later closed in place

28-90 REVIEW AVENUE (Continued) **S100879318**

in 1999, however, there is no record of a cleanup. Project needs further work, as release was characterized as requiring a major excavation. Should be returned to region 2 for further investigation at end of Spill Closure Initiative. 9/8/06 - Jon Greco of Central Office sent an email stating: Most recently, the owner's representative (Mr. Michael Paskoff, who has been performing tank tests at the site for many years, and it was his firm that called in the release 13 years ago) has asked that I close the spill, as it was called in solely due to an inconclusive tank test. He has copied me on a letter to the owner (Mr. Eric Roberts) and the letter reports that while the original tests were inconclusive, the tanks were retested later that day and were found to be tight. He goes on to say that no repairs were made and no excavations were performed by his firm. Finally, he claims the tests were observed by Inspector Geldman, of the NYC Fire Department. Reviewed PBS records, confirmed tank tested tight. Spills Closed. _ KST "

Remarks: "INCONCLUSIVE TEST RESULT TO REPAIR & RETEST - CALLED AGAIN AT 1300 OTHER 4000 GAL TANK ALSO FAILED MAJOR EXCAVATION."

FINDS:

Registry ID: 110067684241

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DER Facility ID: 130179
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/1/2002-VOUGHT-Initial tank test performed by ProTest Laboratories. Second and third tank test performed by Federal Electrical Supply Corporation (718-729-5700). The reason for spill report was initial tank test failure. As a result of failure vent line, fill line, suction line and return line were replaced by Petroleum Tank Cleaners. Tank was tested again on 2-6-2002 and failed again because testers failed to close off return line to day tank. Tank and system was tested for third time and passed on 2-14-2002. Isaac Mungra and Anthony (PTC) confirmed that there was no soil or groundwater contamination. Tank tests and repair invoices were provided. Spill closed by Vought. "

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT Sent tank test failure letter to Varderame. 11/15/2002 ARS 11/14/2003-Vought-Reviewed report dated 6/26/03 from Verderame Realty (Bruce Bauer 718-786-1100). Site will no longer be using oil and will be converting to gas. Closure of a 2000-gallon #2 fuel oil UST and collection of post excavatin endpoint samples by Bluestone Environmental (Andrew Cozzi 732-469-5188). The UST excavation base was at approximately 8 to 8.5 feet below the concrete floor . The soil in the excavation was a fill that consisted of dark brown sand with construction debris such as bricks and pieces of concrete . Five soil samples were submitted for analyses for 8260/8270. Soil analyticals show two 1,3,5-trimethylbenzene exceedances up to 9110ppb, benzo(a)anthracene up to 1010ppb, benzo(a)pyrene up to 631ppb, benzo(b)fluoranthene up to 1110ppb, benzo(k)fluoranthene up to 579ppb, and chrysene up to 1210ppb. These exceedances are attributable to fill material. Spill closed by Vought after conference with DEC Rommel."
Remarks:	"tank test failure - it will be cleaned and retested next week "

FINDS:

Registry ID: 110012190798

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"A search of previous spill at that address turned up spill # 9712326. This spill was a report of contaminated soils discovered on 2/4/98 during a phase II site assessment. The spill was assigned to DEC (Sigona) who closed the spill out on 3/28/00 1/18/2006 - Haggerty - Noel Biscone from Bridgedale (718-965-6450), property manager, submitted Subsurface Investigation Report for review. The sampling dates may be sufficent to close this spill # as well Ten 550 gallon deisel USTs (See PBS# 2-233404) and 630 tons of contaminated soil were removed in August 2004. The site is in an industrial area next to the LIE and a large railyard. Spill closed 01/25/06"
Remarks:	"DEC (Saccacio) found ten 550 gallon USTs being removed from the ground by a contractor. The soil around the tanks were contaminated with an unkown petroleum."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110012644193

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

SUBACCHI FURNITURE (Continued) **1000144031**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

CON EDISON (Continued) **1019909039**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110004322867

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"9/14/06 - Zielinski Visited the site. The tank was closed in place on April 1, 2000. Received from Joe Epifane of ABCO Supply a copy of a manifest that 7 cubic yards of oil-soaked soil, blacktop, and concrete had been removed from the site in September 1998. The tank was repaired and subsequetly passed the tightness test performed by Fenley and Nicol Environmental on September 19, 1998(eDocs). The case is closed. 9/11/06 - Zielinski The spill transferred from CO. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO 10/24/00 originally assigned to tomasello. reassigned to zhao. 12/29/05 Transferred to E. Hampston via Spill Initative. PBS indicates tank closed in place. Need to contact possible owner George Moncher (#718-937-9000) to determine investigation and cleanup status."
Remarks:	"09/05/06 -Zielinski This spill case reassigned from Central Office to Region 2. CONTRACTOR BEING CALLED IN TO LOCATE PROBLEM WITH

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL C 4/12/04-Vought-Spill transferred from Miller to Rommel as per Rommel. 3/28/05 - also see 8804104. KST 12/29/05 Transferred to E. Hampston via Spills Initative. Wrote letter to owner requesting update/information. 11/02/06 Reassigned to Sun.(MS) 12/18/06 Sun sent letter certified mail to Jean Satoski (LIC Service Station), 49-01 Van Dam Street, on 12/14/06 requiring that the following be submitted to the NYSDEC by 1/14/07: 1. Tank closure assessment report. 2. Locations of tank and/or line test failure. 3. Subsurface investigation report, including current and historical soil and groundwater analysis. 4. Surrounding property sketch: A surrounding property sketch including property layout and usage must be submitted to NYSDEC. North arrow and scale must also be included on the site plan. If no tank closure report was prepared or no subsurface investigation was conducted before, the Department requires the following be performed and submitted: 1. Submission of a Tank Closure & Site Assessment Including Soil and Groundwater Investigation Results. (JS/MS) 2/27/07: Based on TCR results Sun/Sellberg sent a letter to Alex Javic of LIC Service Station requiring additional investigation be performed, and a report sent to the DEC by 4/13/2007. Letter is as follows: The investigation at a minimum must include the installation of soil borings/wells: around the area of the the former nine (9) 550-gallon underground storage tanks. Groundwater monitoring wells should be installed to the south (former location of S6), east (former location of S1) and west (former location of S4) of this area and groundwater flow direction will be determined. During drilling, the soil must be screened continuously with a PID. The deepest dry soil sample and the sample with the highest PID reading in each boring/well will be sent for EPA Method 8260/8270 analyses and the results will be sent to the Department. Following well installation, a water sample must be obtained and submitted for EPA Method 8260/8270 analyses. Note that MTBE must be included on all soil and groundwater analyses. Prior to drilling activities, all utilities must be located and marked out. A report summarizing the findings of the subsurface investigation including boring logs, soil and groundwater sample analyses, site plan, and conclusions and recommendations must be submitted to the Department by April 13, 2007. (JS/MS) 4/5/07: MS spoke to Jill Haimson of Preferred Environmental (516)647-4211. She will submit a SIWP by 4/16/07. (JS/MS) 4/24/07: DEC received and approved the SIWP. SIR to be submitted by 7/16/07. Sent letter certified mail to RP and faxed same to consultant (Jill Haimson). (JS/MS) 6/6/07: MS called J. Haimson to check status of site investigation. Due to difficulties in obtaining on-site access, work had been delayed. SIR will be submitted later than original timeline.(JS/MS) 6/27/07: Preliminary results (field observations) were discussed by the DEC and the consultant via telephone on June 11th, and again on June 21st, 2007. RP is claiming an upgradient source to be the problem. (JS/MS) 9/21/07: An additional visit was done by the consultant in mid

GREEN SERVICE STA (Continued) **S106703575**

September to better assess surrounding properties as additional investigation is warranted. This investigation will include the evaluation of a suspected up-gradient source which may/may not be contributing to on-site groundwater contamination. (JS/MS) 10/18/07: Upon threat of legal action, Preferred finally submitted SIR (apparently RP had not given consent to submit?). DEC is currently reviewing. Onsite contamination exists in both soil and mainly groundwater across the site. Additional delineation will be necessary as well as possible ORC injection/treatment. (JS/MS) 11/14/07: Alex Javick met with JS and MS today to sign STIP and discuss remedial options. Plan is to start with ORC (iSOCS) - 6months, if not effective use chemical injection. Monitoring will take place quarterly. Submit signed stip to regional director on 11/15/07. (JS/MS) 11/26/07: STIP executed on 11/16/07 and returned on 11/21/07. Sent copy to owner via mail and consultant via email today. MS to discus remediation details with Jill Haimson of Preferred. (JS/MS) 11/28/07: MS spoke to Jill. She will submit a RAP by 12/7/07 detailing use and placement of iSOCS as well as injection of regen-ox to boost remediation. (JS/MS) 12/17/07: DEC approved RAP as follows: ...The RAP proposes the application of Regen-Ox (manufactured by Regenesis) to address petroleum related soil and groundwater contamination at the site. In addition, Preferred proposed the installation of In-Situ submerged Oxygen Curtain (inFusionTM/iSOC) probes within four (4) onsite well locations. Pursuant to the Stipulation Agreement signed and dated effective November 16, 2007, the Department requires that within 45 days of the Department s approval of the RAP, Respondent shall implement the work outlined in the RAP. The Department approves the RAP with the following condition: Please specify the number, location and spacing between all proposed Regen-Ox injection points. RP has 45 days from RAP approval to perform the work outlined in the RAP. MS sent letter today to RP and will email Preferred tomorrow regarding injection points follow-up. (JS/MS) 1/17/08: Alex Javick in to meet about remedial systems. Will send STIP to Ms. Jean Satoski once received address from Mr. Javick. (JS/MS) 1/22/08: Stip #2 sent today to Ms Jean Satoski at 84 Gun Club Road, Northport, NY 11768. Signed stip is due by 2/5/08. Added following to original letter to include operator’s cooperation and Ms. Satoski’s roles as RP: Presently, the operator of your station has initiated the required actions to address the above and has been fully cooperating with the Department. However, according to Department records, you are the certified property owner of 49-01 Van Dam Street, LIC, NY 11101 and therefore, also a responsible party. Signed STIP is due by 2/5/08. (JS/MS) 2/27/08: Received signed Stip from Satoski. Signed by Regional Director, Region 2 (JS/MM) 3/4/08: Sent photocopy of executed Stip to Satoski. Informed J. Hamison from Preferred about executed stip signed by both parties. (JS/MM) 4/17/08: RAP not executed yet. Satoski and Javic have not agreed on payment. Sent out violation of stip letters. Waiting for responses. (JS/MM) 4/22/08: Called Javic, not in office. Expecting phone call today. (JS/MM) 5/18/08: Received already approved RAP from Preferred. (JS/MM) 6/23/08: No info received from Preferred. (JS/MM) 08/11/08: Transferred to Kolleeny/Mandac (JK/MM) 12/12/08: Received Quarterly Groundwater Sampling/Baseline Sample Report from Bill Schlageter of Preffered Environmental dated 11-19-08. Under review. Next sampling event in December 2008. (JK/KG) 12/16/08: RAP implemented. May 28 and 29, 2008 - 14 wells were installed (4 groundwater monitoring wells, 4 solinst

GREEN SERVICE STA (Continued) **S106703575**

emitter wells, 6 chemical injection wells) July 24 and 25, 2008 - Regen-Ox injected into 6 injection wells August 21, 2008 - Solinst Waterloo Oxygen Emmitter Probes were installed in 4 wells September 8, 2008 - Groundwater samples were collected at MW-1, 2, 3, 4 and IW-1. Total VOCS: MW-1 2,192 ug/L, MW-2 11,950 ug/L, MW-3 19,898 ug/L, MW-4 7,963 ug/L, IW-1 3,070 ug/L IW-6 and E-2 were found to have product, 1.47 ft and 0.04 ft respectively. Wells are checked biweekly for product. If product is encountered it is hand balied. Dissolved oxygen concentrations have increased since oxygen emmitters were installed. Next sampling event is scheduled for December 2008. (JK/KG) 12/18/08: Spoke with Bill Schalageter (Prefferred Env.). I asked him about the well with 1.47 ft of product. He said Alex Javic is still checking the well twice a week. He is bailing the product and disposing of it into the waste oil tank on site. Bill said the product is about an inch to a couple of inches. He will send someone out within the next week to verify how many inches of product are in the well and will send me an email with the details. Based on the amount of product they will need to be more aggressive in removing the product. I suggested a vac truck. I also asked Bill to have the wells surveyed and include GW flow direction, gradient, and scale on the map. (JK/KG) 12/30/08: Spoke with Jill Haimson (Preferred Env.) about product in well. She will talk to Bill and find out if someone went to the site to gauge the product. She will email me the details. If no one went to the site she will have someone go this week. (JK/KG) 01/29/09: Have not received details about product in well or product recovery. Emailed Jill and Bill requesting an update. (JK/KG) 02/02/09: Rec'd following email from Schalageter on 1/29/08. Since we spoke, Preferred was out the site twice including a quarterly sampling event conducted January 23, 2009. During the first visit (January 5, 2009) , approximately eight inches of product was present in well (IW-6), none was detected in any other of the wells. The product was bailed from IW-6 and disposed of, subsequent to bailing, Preferred gauged the wells for twenty minutes and no product recharge was observed. During the January 23, 2009 sampling event, approximately 4 inches of product was detected in IW-6, again no recharge of product was observed subsequent to removal. No product was detected in any of the other wells on January 23, 2009. A complete description of monitoring and sampling events will be provided in the Quarterly sampling report to be submitted upon receipt of sampling data. Please feel free to contact me with any questions or concerns. Regards, Bill (JK/KG) 02/03/09: Responded to Bill, After talking with Jon, please continue with product recovery on a regular basis. If the amount of product increases or doesn't appear to be decreasing, a more aggressive remedial measure will be necessary. Based on the VOC concentrations in MW-2 and MW-3, further delineation or more injections may be necessary. First, I will need to review the results of the latest sampling event (when they are ready). (JK/KG) 04/14/09: Rec'd pdf of Quarterly Groundwater Sampling Report on 4/13/09; under review. (JK/KG) 04/15/09: Rec'd hardcopy of QMR. Wells were surveyed; groundwater flow direction is to the southwest. Weekly product recovery will continue and the next quarterly event is scheduled for April 2009. Groundwater on 1/23/09: MW-1: BTEX - 1,422 ug/L, Total VOCs - 2,533 ug/L, MTBE - 170 ug/L MW-2: BTEX - 3,590 ug/L, Total VOCs - 4,909 ug/L, MTBE - 180 ug/L MW-3: BTEX - 15,150 ug/L, Total VOCs - 21,338 ug/L, MTBE - 2,700 ug/L MW-4: BTEX - 11,174 ug/L, Total VOCs - 21,425 ug/L, MTBE - 1,600 ug/L IW-1: BTEX - 1,715 ug/L, Total VOCs - 2,739 ug/L, MTBE - 280 ug/L

GREEN SERVICE STA (Continued) **S106703575**

IW-4: BTEX - 1,652 ug/L, Total VOCs - 2,501 ug/L, MTBE - 200 ug/L
E-4: BTEX - 4,664 ug/L, Total VOCs - 8,201 ug/L, MTBE - 1,700 ug/L
(JK/KG) 04/20/09: Spoke to Schlageter on 4/16/09. I asked him to include historical analytical data in future reports. We discussed the product in IW-6; he said it appears to be old gasoline and the station manager is still hand bailing it. The product is being disposed of in the on-site waste oil tank. I told Schlageter that the product can not be disposed of in the waste oil tank. Preferred has gauged the wells since the January sampling event. I asked him to send me the gauging data by Monday (4/20). (JK/KG) 04/28/09: Rec'd March gauging data (in eDocs). On 3/6 product in IW-6 was about 6 inches and on 3/27 it was about 0.25 inches. (JK/KG) 05/04/09: Letters sent to J. Satoski and A. Javik on 4/30/09. A more aggressive approach to product recovery should be implemented by using mobile vacuum extraction. A RAP should also be prepared and submitted. It should propose additional remedial actions, such as another round of RegenOx injections. The next QMR is due 6/19/09. (JK/KG) 05/07/09: Spoke to Mr. Javick, he said he doesn't have the money to pay for the cleanup. He was reminded that he signed the Stipulation Agreement and that a report is due in June. (JK/KG) 06/22/09: Rec'd call from Bill Schlageter. He said quarterly monitoring has not been performed and Mr. Javick is not willing to pay for the cleanup. I called Mr. Javick and he said Ms. Satoski will pay 100%. I then spoke to Ms. Satoski and she confirmed that she has agreed to pay for remediation of the site. She will advise Preferred to proceed with site work once some checks clear in her bank account. Preffered is prepared to submit a supplemental RAP. (JK/KG) 06/23/09: Rec'd Supplemental Remedial Action Work Plan dated 6/23/09 and submitted by Preferred Environmental. Under review. (JK/KG) 06/25/09: Rec'd revised SRAWP dated 6/24/09. SRAWP proposes proposes additional injections of RegenOx into the existing on-site injection wells, monitoring of groundwater field parameters, continued groundwater treatment via in-situ emitter probes, continued quarterly groundwater monitoring, and submission of monitoring reports to NYSDEC. A round of groundwater samples will be collected from monitoring wells MW-1, MW-2, MW-3, and MW-4 prior to the RegenOx injections. If free-phase product is detected in well IW-6, the product will be removed using vacuum-enhanced fluid recovery prior to the injections. The SRAWP was approved and letters were sent to Satoski and Javick. The deadline for submission of a groundwater monitoring report, with the results of the pre-injection samples from the four on-site monitoring wells, is August 7, 2009. The deadline for submission of a report summarizing the remedial injections and presenting the follow-up quarterly groundwater sampling results is September 25, 2009. Email for Satoski is williamtaggard@mac.com (JK/KG) 07/20/09: Rec'd the following email from Schlageter: We will be conducting the injection this week (Monday-Wednesday) at 49-01 Van Dam Street, LIC. Prior to the injection, the required pre-injection sampling will be conducted from monitoring wells. Bryan from our office will be on-site and as always, you can contact me or Jill with any questions. Thank You, Bill (JK/KG) 08/31/09: Spoke to Haimson. She didn't realize a report with the results of the baseline sampling was due 8/7/09. The report will be prepared and submitted next week. (JK/KG) 09/30/09: Follow-up with Preferred as the groundwater monitoring report, with the results of the pre-injection samples from the four on-site monitoring wells, and the report summarizing the remedial injections and presenting the follow-up quarterly groundwater sampling results have not been

GREEN SERVICE STA (Continued) **S106703575**

submitted. (JK/KG) 11/03/2009: This spill case was transferred to A. Doronova. - AD 03/23/2010: Received a pdf copy of Quarterly Monitoring Report for October 2009. DL to eDocs. Will review. AD 07/27/2010: Received an e-mail from Mr. Schlageter: Ainura: As we discussed, attached is the supplemental RAP for the above-referenced project. Please review and contact me to discuss. Thank you Bill William J. Schlageter Operations Manager/Senior Hydrogeologist Will review. AD 08/24/2010: Reviewed the supplemental work plan. It proposes to conduct EFR on a weekly basis for two months period on the site wells exhibiting a free product (wells IW-6 and E-4); to continue employment of 3 out of 4 oxygen emmiters; to conduct monthly monitoring activities; to perform air sparging of aquifer; and once free product has been addressed, to rehabilitate and re-install emmiter probe into E-4 and reconnect oxygen supply to this well. Discussed this work plan with J. Kolleeny of DEC. As it was noted, air sparging method usually combained with SVE to control vapors in unsatutated zone. Since SVE is not proposed here, implementation of air sparging alone is questionable. AD 08/26/2010: Called and spoke with B. Schlageter of Prefferred. Requested to revise the work plan. AD 08/11/2010: Received a pdf copy of the 1st quarter 2010 GW monitoring report. DL the report to eDocs. AD 09/16/2010: Received an e-mail from Bill: Ms. Doronova: As we discussed, attached is the revised Supplement to the Remedial Action for the above-referenced property. The Supplemental action has been revised to omit the mobile air-spare treatment upon your request. Please review and contact me with any comments. Upon your approval, we will implement the proposed action within one week. Thank you, Bill William J. Schlageter Operations Manager/Senior Hydrogeologist PREFERRED ENVIRONMENTAL SERVICES Certified Port Authority of New York and New Jersey (PANYNJ), NYS and NYC Women-Owned Business Enterprise (WBE) 323 Merrick Avenue North Merrick, New York 11566 Tel: (516) 546-1100 ext. 22 Fax: (516) 213-8213 Cell: (917) 715-0752 www.preferredenv.com DL the work plan to eDocs. Will review. AD 09/17/2010: Reviewed the revised work plan. It proposes to conduct weekly VEFR on two site wells (IW-6 and E-4) which exhibit free product, for a period of two months. Operation and maintenance of three oxygen emitters at the site will continue on a monthly basis. Preferred also recommends to suspend quarterly GW monitoring for a six months. AD 09/20/2010: Discussed this WP with J. Kolleeny of DEC. AD 09/21/2010: Issued and sent an approval letter to Ms. Joan Satowski with the following comments: " Although Preferred requests that quarterly groundwater monitoring at the site be suspended for six months, the Department requires that quarterly groundwater monitoring continue; " Following completion of the VEFR events, quarterly groundwater monitoring data should be evaluated. If the results do not indicate significant improvement of groundwater quality at the site, and/or if free product continues to appear in the two affected wells, then an alternative remedial measure should be proposed to DEC. Dl pdf copy of the letter to eDocs. AD 04/11/2011: Received an e-mail from Bill: Ainura: Attached is the quarterly sampling report for February 2011 for the above-referenced property. The report summarizes activities conducted from November 2010 through February 2011. Results of the quarterly sampling are favorable significant reduction of dissolved phase VOCs, however some residual free product remains present within IW-6. The next quarterly sampling is scheduled for May 2011. Please feel free to contact me with any questions. Thank you Bill William J. Schlageter DL the report to eDocs. Will review. AD 06/30/2011:

GREEN SERVICE STA (Continued) **S106703575**

Reviewed the report. It states that on February 2011 sampling, thirteen of the fourteen on-site wells were observed to be free of floating product however, free product was observed in IW-6 during the February 2011 quarterly sampling event (.49 ft). Floating product was also observed during the prior monitoring events in October 2010(.06 ft), November 2010 (.02 ft), and December 2010 (.21 ft). An absorbent pad was installed within IW-6 to address free product. Free product had previously been detected in the E-4 well location, however, product removal activities has successfully mitigated the free product. Depth to GW water ranged from 6.48 ft. (E-2) to 8.37 ft. (MW-4) bgs. Groundwater flow has historically been determined to have a westerly influence within both northwesterly and south westerly flows historically observed. A total of seven (MW-1 through MW-4, IW-1, IW-4 and E-4) of the 14 on-site wells were selected for on-site sampling. Gasoline-related VOCs were detected in all of the groundwater samples at concentrations exceeding NYSDEC SGVs. The highest TVOCs was detected in MW-3 (7,625ug/L), which is located crossgradient of the tank farm and downgradient of the Luk Oil Station to the southeast. Concentrations of BTEX detected in groundwater samples ranged from 5,110 ug/L in the MW-3 to 61.5 ug/L in the MW-1 at an upgradient location, MTBE concentrations ranged from 17 ug/L in the IW-1 (crossgradient) location to 1,100 ug/L in the MW-3 location. Preferred states that TVOCs have dropped across the site by up to 94% and by more than 50% since the implementation of the supplemental remedial action. They report that MTBE concentrations have also significantly decreased across the site and conclude that the RegenOx injection and oxygen emitters are successfully providing mitigation of the gasoline-related impacts. The next quarterly sampling suppose to be conducted in May of 2011. AD 11/2011: Did not received ane reports. AD 01/12/2012: Called and spoke with B. Schlageter of Preferred. Requested to submit all missing reports for 2011. Later received an e-mail from him saying: Ms. Doronova: As we discussed attached is the report from October. Please note that due to construction at the station property, we were forced to delay the next sampling event sampling until January 2012. Further, although concentrations continue to decrease, we have identified that there is an off-site contribution to the groundwater impacts believed to be the Luk Oil property across Gale Avenue (currently AmeriGas ??) Owner is Leelimits Petroleum. We are petitioning to drop the sampling to a bi-annual schedule. Thank you, Bill DL the report to eDocs. Will review. AD 03/09/2012: Reviewed the report. It states that quarterly sampling activities resumed on August 2011 subsequent to the supplemental remedial efforts, which including VEFR activities and continued oxygen injection. The August 2011 quarterly sampling event included the following: " Measurement for floating product; " Measurement of water table elevation, temperature, and dissolved oxygen; " Purging and sampling of four monitoring wells, two injection wells and one emitter well; " Laboratory analysis of seven groundwater samples; and " Preparation of summary report including data summary and a groundwater flow map. Groundwater flow in August of 2011 was determined to be to the northwest towards Newtown Creek. During the August 2011 sampling, thirteen (13) of the fourteen (14) on-site wells were observed to be free of floating product however, free product was observed in IW-6 during the February 2011 quarterly sampling event (.50 ft). Floating product was also observed during the prior monitoring events in February 2011 (.49 ft.), October 2010 (.06 ft), November 2010 (.02

GREEN SERVICE STA (Continued) **S106703575**

ft), and December 2010 (.21 ft). Free product had previously been detected in the E-4 well location, however, product removal activities has successfully mitigated the free product. A total of seven (MW-1 through MW-4, IW-1, IW-4 and E-4) of the 14 on-site wells were selected for sampling. Gasoline-related VOCs were detected in all of the groundwater samples at concentrations exceeding NYSDEC SGVs. Concentrations of BTEX detected in groundwater samples ranged from 2,129 ug/L in the MW-4 to 54.1 ug/L in the MW-1. MTBE concentrations ranged from 220 ug/L in the MW-2 to 7.1 ug/L in the IW-1 location. The consultant states that August 2011 groundwater quality data was compared to the historic groundwater data developed for the property. To date since the initiation of remedial activities at the Subject Property, TVOCs have dropped by more than 61% since the last quarterly sampling event in February 2011. BTEX and MTBE concentrations have also significantly decreased across the site. This indicates that the RegenOx injection and oxygen emitters are successfully providing mitigation of the gasoline-related impacts. AD 09/19/2012: Sent an e-mail to B. Schlageter requiring submission of all missing reports. AD 12/2012: Did not receive the reports. Called and left a message. AD 02/2013: Spoke with B. Schlageter regarding reports submission. The property owner is very sick and Preferred did not visited the site for several months. He will get back with the site status update. AD 06/04/2013: Called and spoke with Bill of Preferred regarding this site. The site owner contacted them recently, so they are planning to start groundwater monitoring soon. Bill will look for unsubmitted reports and will give an update. AD 01/17/2014: Called and spoke with B. Schlageter of Preferred Env. No GW monitoring was done at the site since we spoke last time. Site owner was uncooperative. Requested to submit the most recent owner's contact information. Suggested to visit the site, sample all site wells and submit a summary report with conclusions and recommendations for further actions. AD 04/12/2016: Called and left a message to Mr.Joseph Macchia - who is listed as an authorized representative in PBS file. AD 04/13/2016: Called and spoke with Mr. William Tagert, (631-757-8829). He is a site owner's son. Because of his mather's health and old age, Mr. Tagert is looking after her business. Explained to him that the spill case is still open, and that he needs to contact environmental consultants to do a site current situation assessment. AD 04/14/2016: Received a call from Mr. Tagert. He said that he contacted Bill Schlageter from Preferred Environmental and scheduled site visit with sampling of wells. A report with conclusions and recommendations for further actions will be submitted to DEC. AD 04/26/2016: called and spoke with Mark of Preferred. He confirmed that his company gave a proposal to Mr. Tagert and is now waiting for his response. AD 02/08/2017: called and spoke with Mr. Tagert. He told me that he hired Preffered Env. again and they are planning to sample site wells. Called and left a message for Bill Schlageter. AD"

FINDS:

Registry ID: 110000616432

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/10/95: This is additional information about material spilled from the translation of the old spill file: 14(550) TANKS C/SOIL. 12/10/96 MMM: TYREE PULLED TANKS, UPGRADED STATION AND DID INVESTIGATION. NO FREE PRODUCT LEFT ON GW. HIGH DISSOLVED BEING ADDRESSED WITH SVES SYSTEM. STIP RETURNED SIGNED.3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 12/17/2003-Vought-See closed diesel spill #0106824 at same location. 3/19/04-Vought-File review by vought: Summary of Underground Tank Removals (Tyree Org)-April 1994. Tanks removed as part of station rebuild activities . A total of eighteen underground storage tanks were cleaned and removed from the site. Twelve were gasoline USTs, two were diesel USTs, one was waste oil and the remaining three are of unknown contents. Groundwater at ten feet below grade. A total of 625 tons of soil was removed from the excavation. Five endpoint soil samples were collected. Method 8021 was inadvertently ommitted from the analysis request . A soil vapor extraction trench was constructed along Van Dam street, two feet from the sidewalk so that the venting system would create a barrier for the potential migration of soi vapoprs based on the reported regional westerly groundwater flow . Four monitoring wells were installed as per DEC. One fuel oil tank remains to be removed and upon remova, one additional monitoring well will be installed. Soil analyticals from well installation show 7200ppb benzene(MW2), 72400ppb napthalene(MW-2), 1435000ppb xylene(W-2), 2490ppb benzene(MW-4), 10770ppb xylene(MW-4). Groundwater Monitoring Report (Tyree Org)-1-16/95. A one thousand(1000) gallon fuel oil tank was removed in June 1995. A monitoring well, MW-5, was installed at this location in August . No free product was encountered. The groundwater flow direction comes onto the site from the north and travels southerly. Once on site, the water flow turns a little to the south-southeasterly direction . Groundwater analyticals show 105ppb benzene(MW-1), 3260ppb benzene(MW-2) and 86400ppb MTBE(MW-2). Report recommends installation of upgradient well and performance of a soil vapor extraction test. Letter from DEC(Mulqueen) to Getty(Ochotorena)-6/26/95. Stipulation Agreement sent to Getty. Stipulation Agreement from Getty-6/30/95. Stipulation signed by Getty. Corrective Action Plan from Tyree-10/5/95. Summary of Underground Fuel Oil tank Removal Activities-January 1996. Removal of one (1000-gallon) fuel oil UST. Five endpoint soil samples were collected for analysis. A groundwater sample will have to be collected to determine if the groundwater is protected . The background soil sampling will be performed once the location is reviewed by the DEC and sidewalk opening permits are obtained . Three Geoprobe borings will be performed. This location is reported to be located in a former refinery . Soil analyticals show minor SVOC exceedences (646ppb benzo(a)anthracene, 595ppb benzo(a)pyrene). Quarterly Monitoring Reports from Tyree (October 1995 thru March 1996). Five monitoring wells onsite. Groundwater at depth of 8-10' and flows to the south. Groundwater analyticals show 145ppb

GETTY #00219 (Continued) **S105142547**

benzene(W-1), 4150ppb benzene(W-2), 5.19ppb xylene(W-3), 437ppb toluene(W-5). Remedial Action Plan (Tyree Org)-July 1996. The soil is intermixed with occasional charred material up to 6 inch in diameter and ashy soil located at the north end of the site . Soil venting pilot test performed on 4/18/96. The results of monitoring and the well survey indicate that groundwater on site flows predominantley west . The groundwater flow was previously incorrectly shown to flow southerly . Surrounding area is commercial. Pilot test results indicate that an approximate radius of infulence between 16 and 22 feet can be achieved with an applied cacuum of 34 to 53 inches . Since the contamination is minimal and localized no groundwater remediation is proposed at this time . Quarterly Monitoring Reports from Tyree (April 1996 thru March 1996). Five monitoring wells onsite. Groundwater at depth of 8-10' and flows to the east-southeast. Groundwater analyticals show 146ppb benzene(W-1), 793ppb benzene(W-2) and 437ppb toluene(W-5). Quarterly Monitoring Reports from Tyree (March 1996 thru December 2000). Five monitoring wells onsite. Groundwater at depth of 8-10' and flows to the west. Groundwater analyticals show 17ppb benzene(W-1) and 4ppb benzene(W-2). Remedial activities described as none . Letter from Tyree to DEC(Rommmel)-6/15/01. Letter sent requesting removal of wells 3 and 4 from the monitoring/sampling regimen leaving wells 1,2 and 5. These changes will be effected as of July 1, 2001. If there are any objections to these changes, please notify us in writing . Quarterly Monitoring Reports from Tyree (March 2001 thru June 2001). Five monitoring wells onsite. Groundwater at depth of 8-10' and flows to the west. Groundwater analyticals show 30ppb benzene(W-1) and 24ppb benzene(W-2). Remedial activities described as none . Quarterly Monitoring Reports from Tyree (July 2001 thru September 2001). Three monitoring wells sampled. Groundwater at depth of 8-10' and flows to the west. Groundwater analyticals show 31ppb benzene(W-2). Remedial activities described as none . Historical Data Compilation (Tyree Org)-December 2001. Compilation including request for no further action. Quarterly Monitoring Reports from Tyree (January 2002 thru December 2003). Three monitoring wells sampled. Groundwater at depth of 8-10' and flows to the west. Groundwater analyticals show 43.3ppb benzene(W-1) and 63ppb MTBE(W-2). Remedial activities described as none . 3/23/04-Vought-DEC requires: 1)groundwater samples from downgradient locations of W-1 and W-2 2)submission of a soil and groundwater remediation plan. Vought sent letter with requirements on 3/23/04. 08/31/2005 - Feng - Project transferred from Vought to Feng. 10/20/2005 - Feng - Geoprobe Investigation Report by Tyree, dated November 29, 2004. on 11/10/2004 Tyree did two (2) groundwater sampling, B-1 and B-2, downgradient to W-1 and W-2, and four (4) soil samples, B-3 to B-6, in the vicinity of the former gasoline tankfield as per DEC Vought's letter on 3/23/2004. Groundwater analyticals show that some VOCs and SVOCs were slightly high and exceeded TAGM 4046. and soil samples collected from B-3 to B-6 show slightly high VOCs in B-3. Based on this report, Tyree recommended further remediation at this site is not necessary. groundwater monitoring wells be sampled on a quarterly basis and be monitored for natural attenuation . 10/18/2005 - Feng - Quarterly Monitoring Report, by Tyree, 4/2005 - 6/2005. 3 MWs onsite. downward trend in concentration. Groundwater flow in west direction. 90ppb BTEX and 20ppb MTBE in W-1. keep monitoring. 11/2/2005 - Feng - Quarterly Monitoring Report, by Tyree, 7/2005 - 9/2005. 3 MWs onsite. downward trend in concentration. Groundwater flow in west direction. W-1, increasing, 143ppb BTEX and

GETTY #00219 (Continued) **S105142547**

21ppb MTBE. W-2, 1 BTEX and 5 MTBE. W-3, 6 MTBE. 12/19/2005 - Feng - Quarterly Monitoring Report, by Tyree, 9/2005 - 11/2005. Active Lukoil gasoline retail/service station. 3 MWs onsite. downward trend in concentration. Groundwater flow in west direction. W-1, decreased and 68 ppb BTEX and 11 ppb MTBE. W-2, non-detected BTEX and 3 ppb MTBE. W-3, non-detected BTEX, 4 ppb MTBE. EFR on W-1, 0.01 gallon of gasoline has been removed. 05/25/06-Sun-Based on the Quarterly Monitoring Report, prepared by Tyree,dated April 6, 2006, Total BTEX ranged from Non-detect to 29 ppb, and MTBE concentrations ranged from 3 ppb to 9 ppb. No free product was detected in any monitoring wells. Based on these low concentrations of BTEX and MTBE and Sensitive Receptor Survey conducted for this site, the spill is closed and NFA letter will be issued. (Sun) "

Remarks: "REBUILDING STATION-SOIL WILL BE REMOVED & TRANSPORTED."
