FACT SHEET

Brownfield Cleanup Program

HPS Parcel F

Center Blvd. between 56th
Ave and 57th Ave
Long Island City, NY 11101

SITE No. C241225

NYSDEC REGION 2

October 2020

Cleanup Action Completed at Brownfield Site

Action has been completed to address the contamination related to the HPS Parcel F site ("site") located at 1-15 57th Avenue, Queens, NY under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by GO HPS LLC ("applicant(s)") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicant(s) has submitted a draft Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been or will be achieved to fully protect public health and the environment for the proposed site use.

- Access project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C241225/>.
- The documents also are available at the location(s) identified at left under "Where to Find Information."

Highlights of the Site Cleanup: The following activities have been completed to achieve the remedial action objectives:

- Excavation and off-site disposal of approximately 37,000 tons of contaminated soil and historic fill material exceeding the Restricted Residential Soil Cleanup Objectives (RRSCOs) to a depth of 15 feet across the site. Clean fill was brought in for subgrade structural requirements.
- Construction dewatering was required to enable deeper excavation and subgrade work. Groundwater from dewatering operations was treated prior to discharge to the municipal sewer system.
- Development of a Site Management Plan (SMP) for long-term management of residual contamination as required by the Environmental Easement, including plans for: (1) Institutional Controls; and (2) reporting.
- An Environmental Easement was recorded to prevent future exposure to any contamination remaining at the site and to ensure implementation of the SMP.

Next Steps: When NYSDEC approves the FER, it will be made available to the public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicant(s) would be able to redevelop the site after receiving a COC. In addition, the applicant(s) will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

BROWNFIELD CLEANUP PROGRAM

A COC may be modified or revoked if, for example, an applicant does not comply with the terms of its Brownfield Cleanup Agreement with NYSDEC.

Site Description: The site is 0.74-acres and is located at 1-15 57th Avenue, in the Hunter's Point section of Long Island City, NY, and is identified as Block 6 and Lot 30 on the New York City Tax Map. The site is bordered on the west by Center Boulevard (with the East River further to the west), on the south by a NYC public school still under construction, on the east by 2nd Street, and on the north by 56th Avenue. It is currently a vacant, undeveloped lot that is unpaved and secured with a fence. The site has had industrial uses since at least the late 19th century including a sugar refinery in the early 1900s and a news publishing plant in operation from the mid-1970s until demolition in 2003. The site has remained vacant until current redevelopment. The site is being redeveloped into residential units (including affordable housing), senior housing units, a community facility, and retail space.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C241225) at:

<https://www.dec.ny.gov/cfm/external/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
