Mr. Andrew C. Cohen
BRP Development, Inc.
767 3rd Ave,
New York, NY 10017

Re: Phase I Environmental Site Assessment
90-02 168th Street, Queens, New York 11432* (*Block 9796, Lot 63)
AKRF Project Number 180390

Dear Mr. Cohen:

AKRF, Inc. is pleased to submit this Phase I Environmental Site Assessment Report for the above-referenced property. This report includes the findings of a reconnaissance of the Property, an evaluation of readily available historical information and selected environmental databases and electronic records. AKRF, Inc. met the requirements of American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 unless noted otherwise in Section 8.0: "Limitations and Data Gaps".

We appreciate the opportunity to provide you with our services. If you should have any questions or comments regarding the enclosed report, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.

Neoma Chefalo
Senior Environmental Scientist

Axel Schwendt
Vice President

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by BRP Development, Inc. to perform a Phase I Environmental Site Assessment (ESA) of 90-02 168th Street (Tax Block 9796, Lot 63) in the Jamaica section of Queens, New York (the "Property") (see Figures 1 and 2). At the time of the site reconnaissance, the approximately 99,500-square foot Property was being used as a public parking lot, with three attendant shelters. The area surrounding the Property was predominately mixed-use commercial and residential with some religious and institutional uses.

This Phase I ESA was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, this practice are described in Section 8.0. The term "Recognized Environmental Condition" means the presence or likely presence of hazardous substances or petroleum at a property, including the ground, groundwater, or surface water at or under a property.

This assessment revealed evidence of the following Recognized Environmental Conditions (RECs):

Recognized Environmental Conditions (RECs)

- Historical Sanborn maps indicated that the Property contained an automotive repair shop in 1942.

Controlled Recognized Environmental Conditions (CRECs)

- Electronic NYCDEP files indicated a Notice of Compliance form issued by NYCDEP for the Property dated December 31, 2009 noting that an order was issued in September 2009 requiring certain response measures be taken with respect to a "a release or potential release of hazardous substances" at the Property. To the extent that the form noted that NYCDEP concluded, through visual inspection and documentation, that the work required by the order had been satisfactorily completed, this item is considered a CREC.

Environmental Concerns

- Historical Sanborn maps indicated that the Property contained dwellings and small outbuildings by 1886, with subsequent commercial uses, including a plumber's shop, paint storage and hardware shops in 1925. Buried foundation elements and demolition debris from former structures could include petroleum storage tanks.
- Historical automotive and industrial uses were noted in the surrounding area on the 1925 through 2006 Sanborn maps, including: the Metropolitan Tobacco facility building (subsequently a Red Cross facility) with a gasoline tank immediately west of the Property; a printing facility immediately south of the Property; and a Police Precinct with a garage on the east-adjacent block, across 168th Street.
- The regulatory databases identified two petroleum bulk storage (PBS) facilities within 100 feet of the Property (one with closed regulatory status spills documenting soil and groundwater contamination).
- The attendant shelters and buried foundation elements and demolition debris from former structures could include polychlorinated biphenyls (PCBs), asbestos containing materials (ACM) and/or lead-based paint (LBP).

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by BRP Development, Inc. to perform a Phase I Environmental Site Assessment (ESA) of 90-02 168th Street (Tax Block 9796, Lot 63) in the Jamaica section of Queens, New York (the "Property") (see Figures 1 and 2). At the time of the site reconnaissance, the approximately 99,500-square foot Property was being used as a public parking lot, with three attendant shelters. The area surrounding the Property was predominately mixed-use commercial and residential with some religious and institutional uses.

The scope of services for this assessment was in conformance with ASTM Standard E1527-13 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice)*. Any exceptions to, or deletions from, this practice are described in Section 7.0. The scope included the following:

- Observations of the Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, and/or odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Readily available geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration within, from and onto the Property.
- The reconnaissance of the Property included preliminarily identifying visible suspect asbestos-containing materials (ACMs) and the potential lead-based paint. However, no samples were collected or analyzed.
- A state database of radon concentrations was used to determine whether indoor radon levels in the general area (data are by county) generally comply with United States Environmental Protection Agency (USEPA) guidelines.
- Historical fire insurance maps for the Property and adjacent properties were reviewed to evaluate historic land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Property and other properties within the ASTM-defined radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF) and the USEPA Civil Enforcement Docket. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.
- The following state regulatory databases were reviewed to determine the regulatory status of the Property, adjacent properties, and properties within a predetermined study area; the listings of hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Major Oil Storage Facilities (MOSF); Brownfield Sites; and Historic Utility Sites.

- A review of online Buildings Department records for the Property was conducted to obtain information likely to be pertinent to this assessment, with records requests from additional pertinent agencies for relevant records.

2.0 PHYSICAL SITE DESCRIPTION

On October 11, 2018, Ms. Neoma Chefalo of AKRF conducted a reconnaissance of the Property. Neighboring properties were also viewed from public rights-of-way. The weather was overcast with light rain and approximately 80° F; parked vehicles covered the majority of the ground surface, potentially obscuring surface features. The Property was inspected for the presence of stained surfaces, storage tanks, drums, leaking pipes, transformers, suspect asbestos-containing materials (ACMs), suspect lead-containing paint, and any other evidence of hazardous material usage and storage on-site.

Photographs documenting the site inspection are included in Appendix A.

2.1 General Site Conditions

At the time of the site reconnaissance, the approximately 99,500-square foot Property was being used as a public parking lot (see Figure 2). The parking lot was enclosed in chain-link fencing, with gated entrances along 168th Street, 90th Avenue and 91st Avenue, each with small metal and concrete attendant shelters. The asphalt pavement was in good to fair condition, with no major cracking noted in accessible areas. Small landscaped areas were observed on the northern, western and southeastern borders of the Property. Apparent storm drains were noted throughout the Property.

No evidence of petroleum bulk storage or chemicals, staining, stressed vegetation, or other evidence of a material release were observed.

2.2 Topography and Hydrogeology

The surface topography at the Property was relatively level. Based on the U.S. Geological Survey, Jamaica, NY Quadrangle (1995), the Property is approximately 60 feet above the National Geodetic Vertical Datum of 1988 (an approximation of sea level).

Based on topography, area groundwater flow is anticipated to be in southwesterly direction towards Jamaica Bay, located approximately 3.5 miles away. Actual groundwater flow at the Site can be affected by many factors, including current and past pumping of groundwater; past filling activities; underground utilities and other subsurface openings or obstructions such as basements and subway tunnels; bedrock geology; and other factors beyond the scope of this study. Groundwater in this part of Queens is not used as a source of potable water.

2.3 Storage Tanks

2.3.1 Underground Storage Tanks (USTs)

During the reconnaissance, no evidence, such as vent pipes, fill caps, or concrete patches, was observed that would indicate USTs are or were present. No USTs were identified in the regulatory database or computerized New York City Department of Buildings (NYCDOB) files. Buried foundation elements and demolition debris from the former structures could include USTs.

Off-site USTs are discussed in Section 5.2.2.

2.3.2 Aboveground Storage Tanks (ASTs)

No evidence, such as tanks or vaults likely to contain tanks, vent pipes or fill caps was observed during the reconnaissance to indicate that ASTs are or were present. No records pertaining to ASTs were identified in the regulatory database or computerized NYCDOB records.

Off-site ASTs are discussed in Section 5.2.2.

2.4 Polychlorinated Biphenyls (PCBs)

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were manufactured for use in a wide variety of products, primarily in electrical equipment such transformers, capacitors, fluorescent light fixtures (especially ballasts), and voltage regulators, but also in hydraulic fluids and some other products.

Based on the age of the attendant shelters and former buildings (before circa 1963 based on Sanborn maps), fluorescent lighting fixtures, caulking, and electrical components (including within debris) at the Property may contain PCB-containing components.

2.5 Lead-Based Paint

Lead-based paint was generally not used inside residential buildings after 1977 nationwide. After 1977, its use inside commercial structures was also restricted and its use elsewhere became less common, but lead-based paint may still sometimes be used outdoors. Lead-based paint can present a hazard, particularly to children, especially when it is in poor condition.

Based on the age of the attendant shelters and former buildings, lead-based paint may be present (including within debris) at the Property. Painted surfaces (i.e., attendant shelters and gated entrances) were noted to be in generally good condition during the reconnaissance.

2.6 Utilities

The Property was being used for surface parking with some electrical service (i.e. attendant shelters); apparent storm drains were observed at the Property; no other current utility connections were observed.

2.7 Waste Management and Chemical Handling

No wastes were observed being generated, and the handling of chemicals was not observed.

2.8 Radon

Radon is a colorless, odorless gas most commonly produced by the radioactive decay of certain rocks. According to a New York State Department of Health database the average level of radon found in basements in Queens County is 1.24 picocuries/liter, below the USEPA recommended action level of 4.0 picocuries/liter.

3.0 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Asbestos is also commonly found in vinyl flooring, plaster, sheetrock, joint compound, ceiling tiles, roofing materials, gaskets, mastics, caulks and other products. Materials containing more than one percent asbestos are

considered asbestos-containing materials (ACM). ACM are classified as either friable (i.e., more readily release fibers, such as most spray-applied fireproofing) or non-friable (such as floor tiles).

Regulatory requirements for ACM (or suspect ACM until proven not to be ACM) include maintenance requirements and, prior to any renovation or demolition, inspection/sampling by a NYS-certified asbestos inspector to determine if the project will disturb ACM. Any such ACM (and any other ACM subsequently identified) must be removed prior to the renovation or demolition.

ACMs may be present within the Property in debris associated with the former buildings and/or within building components within the attendant shelters.

4.0 ADJACENT LAND USE

The area around the Property was mixed-use commercial and residential, with some religious and institutional uses. The Property block contained residential, religious and commercial/retail uses. The Property was bounded to the north by 90th Avenue, followed by a public library and religious structures; to the east by 168th Street, followed by a Police Precinct and a parking lot; to the south by commercial/retail uses including department stores and a bank; and to the west by a church complex, a religious bookstore, and residential buildings (some with street-level retail).

5.0 PROPERTY HISTORY AND RECORDS REVIEW

5.1 Prior Ownership and Usage

5.1.1 Historical Land Use Maps

Historical maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage or disposal on or near the Property. Specifically, Sanborn Fire Insurance Maps from 1886, 1891, 1897, 1901, 1911, 1925, 1942, 1951, 1963, 1981, 1987, 1995, 2001, and 2006 were reviewed. Copies of the maps are provided in Appendix B.

1886

The Property contained a dwelling, a barn and a small stable on the southern portion and vacant land on the northern portion.

The Property block included dwellings and stables, with several commercial uses along Fulton Street (current Jamaica Avenue) to the south, including a bakery and a butcher. The surrounding blocks were primarily residential and commercial/retail in nature.

1891-1897

Additional dwellings, sheds and stables were noted on the northern portion of the Property.

The surrounding area remained similar to the 1886 map. A laundry was shown on the southern portion of the Property block.

1901

The Property remained similar to the 1897 map.

A hardware and paint store were noted on the southern portion of the Property block and an unspecified store was shown in place of the former laundry noted on earlier maps. No further significant changes were noted in the surrounding area from the 1897 map.

1912

Additional dwellings were noted on the Property and Bergen Place (current 91st Avenue) was shown extending from the western portion of the Property in an east-west configuration.

The Metropolitan Tobacco Co. office and warehouse was shown immediately west of the Property. Additional stores and a storage warehouse were noted on the southeastern portion of the block.

1925

A plumber's shop and paint storage shed were noted on the southeastern portion of the Property.

The Metropolitan Tobacco facility noted west of the Property in 1912 expanded, with a **gasoline tank** noted in the building. A **tin shop** and an illegible commercial building were noted approximately 50 feet west of the Property along 166th Street. An auto storage house and a **printing facility** were noted immediately south of the Property. Additional automotive uses were noted in the greater surrounding area, including repair shops and service stations on blocks north and west of the Property.

1942-1951

A small **auto repair shop** and a Gospel Tabernacle were noted on the northeastern portion of the Property. Several dwellings, sheds and the plumber's shop noted on the southeastern portion of the Property in 1925 had been razed.

A furniture sales store was noted immediately south of the Property in place of the former auto storage houses and printer noted on the 1925 map, and several furniture warehouses and a department store were noted on the southern portion of the Property block. Several automotive facilities were shown in the greater surrounding area, including garages and filling stations on blocks to the north and west. A theater and bus loading area were noted on the west-adjacent block.

1963

The structures noted on previous maps had been razed and the Property was shown as a surface parking lot.

The former Tobacco Co. building noted west of the Property on earlier maps was converted to a Red Cross building (the gasoline tank was still noted). A high school was noted immediately west of the Property in place of a former commercial structure noted on previous maps. Unspecified stores and a bank were noted on the southern portion of the block, in place of furniture storage warehouses and furniture stores noted on previous maps. The 103rd **Police Precinct and associated garage** were noted to the east across Grand Avenue. A parking lot was shown on the east-adjacent block. No other significant changes were noted from the 1951 in the surrounding area.

1981-1987

No significant changes were noted from the 1963 map on the Property.

The former Red Cross building noted west of the Property was converted to a church (the gasoline tank still remained). The former theater on the west-adjacent block was converted to a church. A public library was noted on the north-adjacent block. No further significant changes were noted in the surrounding area from the 1963 map.

1995-2006

No significant changes were noted from the 1987 map on the Property or in the surrounding area.

To summarize, historical Sanborn maps indicated that the Property contained dwellings and small outbuildings since at least 1886, with subsequent commercial and automotive uses, including a plumber shop, paint storage and hardware shops in 1925 and an auto repair shop in 1942. By 1963, the structures were razed and the Property was shown as a parking lot through 2006. Former uses including the auto repair shop and paint shop have some potential to have affected subsurface conditions (i.e., from potential former chemical and/or petroleum storage). Buried foundation elements and demolition debris from the former structures could include petroleum storage tanks, PCBs, ACM and/or LBP.

Historical automotive and industrial uses were noted in the surrounding area on the 1925 through 2006 Sanborn maps including: The Metropolitan Tobacco facility building (subsequently a Red Cross facility) with a gasoline tank and a tin shop west of the Property; a printing facility immediately south of the Property; and a Police Precinct with a garage on the east-adjacent block, across 168th Street.

5.1.2 Historical Aerial Photographs

Since historical fire insurance maps were available for the Property (and surrounding area) and these maps included information relating to land use, aerial photographs would, most likely, not provide additional useful information relevant to the potential for recognized environmental conditions or other environmental concerns. As such, aerial photographs were not reviewed.

5.1.3 Property Tax Files and Zoning Records

Based on NYC Department of City Planning's Primary Land Use Tax Output (PLUTO) information, the Property is zoned C4-5X (Commercial).

5.1.4 Local Street Directories

A review of the historical city directories was conducted by EDR. The following table presents descriptions and interpretations from the historical city directory reviews:

Table 1
Historical City Directories

Year	Comments
1934	**Site:** Residential, Religious **Surrounding Properties:** Residential
1950	**Site:** Residential **Surrounding Properties:** Residential
1962	**Site:** Residential **Surrounding Properties:** Residential
1970	**Site:** Residential **Surrounding Properties:** Residential, Commercial, Religious
1976	**Site:** Not Listed **Surrounding Properties:** Residential, Commercial, Religious
1980	**Site:** Not Listed **Surrounding Properties:** Residential, Commercial, Religious
1983	**Site:** Not Listed **Surrounding Properties:** Residential, Commercial, Religious
2005	**Site:** Not Listed **Surrounding Properties:** Residential, Commercial, Religious

No pertinent environmental information was provided in the historical city directories.

A copy of the Historical City Directories is included in Appendix C.

5.1.5 Recorded Land Title Records

Copies of title records were not provided to AKRF for review. A review of computerized New York City Automated City Register Information System (ACRIS) records, which included records of financial transactions involving the Property, identified no environmental liens for the Property.

5.2 Regulatory Review

Regulatory database information, as shown in Appendix D, was obtained from EDR, Inc. of Shelton, CT. The Introduction section of Appendix D includes summaries of the databases searched, their radii around the Property and limitations of the data. The databases searched and associated radii were consistent with ASTM E1527-13.

5.2.1 Federal

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Superfund Enterprise Management System Archive (SEMS-ARCHIVE), Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); and Federal Institutional Control/Engineering Control Registries. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's compilation of some sites that probably remedial action under the Superfund Program. NPL sites can pose a significant risk of stigmatizing surrounding properties and thus impacting property values.

No NPL sites were identified within a one-mile radius of the Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of sites which the USEPA has investigated, or plans to investigate, pursuant to the Superfund Act of 1980 (CERCLA). As such, some of these sites may ultimately present concerns and others may not (but could still pose a perceived threat, thus affecting property values).

No CERCLIS sites were identified within a ½-mile radius of the Property.

SEMS-ARCHIVE (Superfund Enterprise Management System Archive)

This database tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

No SEMS-Archive sites were identified within a ½-mile radius of the Property.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on certain reported releases of petroleum and other potentially hazardous substances.

No ERNS listings were identified as potentially located on the Property in the database information.

Toxic Chemical Release Inventory System (TRIS)

The TRIS contains information reported by a variety of industries on their annual estimated releases of certain chemicals.

No TRIS sites were identified within a ⅛-mile radius of the Property.

Federal Institutional Control/Engineering Control Registries

These registries are listings of sites with engineering and institutional controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site.

The Property was not listed in the Federal Institutional Control/Engineering Control Registries database. No facilities were listed on the Federal Institutional Control/Engineering Control Registries database within a ½-mile radius of the Property.

5.2.2 State

The state records reviewed included listings of hazardous material spills; Resource Conservation and Recovery Act (RCRA) Notifiers; Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); State Hazardous Substance Waste Disposal Sites (SHSWDS); Major Oil Storage Facilities (MOSF); Brownfield Sites; Environmental Restoration Program (ERP) sites; Voluntary Cleanup Program (VCP) sites, and Brownfield Cleanup Program (BCP) sites.

New York SPILLS Database

This database includes releases reported to the NYSDEC, including tank test failures (for USTs only) and tank failures.

The Property was not listed on the NY Spills database.

The database information listed 253 spills, including 70 LTANKS and 183 NY Spills sites, within a ½-mile radius of the Property. Of these, the following incidents have some potential to have affected area subsurface conditions:

- A spill (# 0112070) was reported in 2002 at the Tabernacle of Prayer, located at 90-07 Merrick Boulevard, west-adjacent to the Property, due to a tank test failure. The tank was reportedly retested and the spill was closed in 2004. No further pertinent information was provided in the listing.
- Spill # 9511826 was listed at the 103rd Police Precinct located at 168-02 91st Street (approximately 100 feet east of the Site) in 1995 due to soil/groundwater contamination from leaking petroleum/gasoline tanks. Remedial activities were initiated, including soil vapor extraction and groundwater monitoring between circa 1995 and 2009. The spill case was closed in 2009 when supplemental soil sampling indicated only minor VOC detections according to the file notes, and diminishing detections were reported in soil/groundwater. Spill # 0904504 was reported in 2009 due to a tank test failure due to equipment failure. The file notes indicated that the tank system was removed in 2011, with no evidence of a release observed. The spill achieved closure in 2015.

Based on the listing details, including nature of the releases, distance and/or inferred groundwater flow direction, the remaining spills are not likely to have affected the Property subsurface. Details from all reported spills are included in Appendix C.

Resource Conservation and Recovery Act (RCRA) Notifiers Listings

This database lists sites which have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDs); small-quantity (SQG) and large-quantity generators (LQG); and transporters regulated under RCRA. The discussion below includes any CORRACTS listings of facilities which are subject to corrective action under RCRA.

No TSD facilities were identified within a ½-mile radius of the Property. No CORRACTS facilities were identified within a one-mile radius of the Property. The Property was not listed as a RCRA Generator.

Four RCRA Generators were identified with a ¼-mile radius of the Property.

Based on the listing details, distances, and/or inferred groundwater flow direction, these listings are not likely to have affected the Property subsurface.

Chemical Bulk Storage (CBS) Database

The New York CBS is a list of facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

No CBS facilities were listed within a ⅛-mile radius of the Property.

Solid Waste Facilities (SWF)

This database includes certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

A total of 14 SWF facilities were listed within a ½-mile radius of the Property. Based on listing details and/or inferred groundwater flow direction, these listings are not likely to have affected the Property subsurface.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database.

The Property was not listed as a PBS facility. A total of 26 PBS (13 UST and 13 AST) sites were identified within a ⅛-mile radius of the Property. Of these, the following have some potential to have affected area subsurface conditions:

Table 2
Area Petroleum Bulk Storage Facility Data

Location	Capacity (gallons)	Product Stored	Status	Installation Date	Approximate Distance/Direction from Site
Tabernacle of Prayer 90-07 Merrick Boulevard	1 x 2,000 UST	No. 2 Fuel Oil	In-Service	1978	West-adjacent
103rd Precinct 168-02 91st Avenue	1 x 2,500 UST	No. 2 Fuel Oil	Closed-Removed	1963	100 feet East
	1 x 275 AST	No. 2 Fuel Oil	In-Service	1963	
	2 x 550 UST	Gasoline	Closed-Removed	Not Listed	
	1 x 275 AST	No. 2 Fuel Oil	Converted to Non-Regulated Use	Not Listed	

Note: AST – aboveground storage tank UST-underground storage tank

The above-listed facilities were also cited in the NY Spills database, as noted previously. Based on listing details, distance and/or the anticipated groundwater flow direction, releases from the remaining facilities are unlikely to have affected the Property subsurface. Details of the PBS facilities are included in Appendix C.

State Inactive Hazardous Waste Disposal Site Registry (SHWS)

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

Five SHWS sites were identified within a one-mile radius of the Property. Given their listing details, including distance from the Property, inferred hydraulic position and/or remedial status, the facilities are not likely to have affected subsurface conditions beneath the Property.

State Hazardous Substance Waste Disposal Site Study (SHSWDS)

This database tracks certain sites that were not listed on SHWS, but may still require investigation and/or cleanup.

No SHSWDS sites were identified within a one-half mile radius of the Property.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were reported within a ⅛-mile radius of the Property.

State Voluntary Cleanup Program/Brownfield Cleanup Program

The Voluntary Cleanup Program (VCP) is a NYSDEC program for investigation and remediation of (generally) privately-owned sites. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present. This NYSDEC program is the successor to the State VCP. Again, some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

Two VCP/BCP sites were identified within a one-half mile radius of the Property. Given their listing details, including distance from the Property, inferred hydraulic position and/or remedial status, the facilities are not likely to have affected subsurface conditions beneath the Property.

New York City E-Designation Site Listing

A New York City "E" designation for a property requires that the fee owner of the site conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYC Office of Environmental Remediation (OER) before the issuance of a building permit by the NYC Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements).

The Property is listed with an e-designation for window wall attenuation and alternate ventilation (noise). The Noise (E) designation requires 30 dB(A) of window/wall attenuation and a means of alternate ventilation (that does not degrade the acoustical performance of the building facade) for residential development [Note: for commercial development, the requirements are 5 dB(A) less].

Registered Dry Cleaners/EDR US Hist Cleaners

The registered dry cleaners database was researched to identify listings within one-quarter mile of the Site. As a supplement to the registered dry cleaners database, EDR's proprietary listing of potential drycleaner sites (listings based on the opinion of EDR) was also reviewed.

Four Dry Cleaners sites were listed within a one-half mile radius of the Property. Based on listing details, distance and/or assumed hydraulic relationship, these listings are not anticipated to have affected environmental conditions at the Property.

5.2.3 Local Agency File Review

Records available online from the New York City Fire, Buildings and Finance Departments were viewed (or requested) for the Property. Since the records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, and records indicating prior uses. Copies of pertinent information are included in Appendix E (Buildings Department Records).

Fire Department

The FDNY is responsible for the enforcement of local fire codes pertaining to the use and storage of flammable and hazardous materials. Searches of the "total amount and size of removed or sealed fuel oil/heating oil" and "history of buried tank leaks" databases were requested in a record search form dated October 12, 2018.

As of the date of this report, the FDNY has not responded to the FOIL request. If issues of potential concern are noted upon receipt of this information that would change the findings or conclusions of this report, an addendum to this report will be created to discuss relevant findings.

Buildings Department

Electronic NYCDOB records for the Property were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage, or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Property.

- A 1945 Certificate of Occupancy (C of O) was listed for a parking lot for more than 5 cars. The 1947 and 1949 C of Os also noted a parking lot.
- Demolition permits issued in 1930 and new building permits filed in 1923 and 1941.

No pertinent environmental records were identified in the NYCDOB electronic files.

Department of City Planning

A search of NYC Environmental Quality Review Requirements (CEQR) data by EDR, Inc. indicated that the Property has been assigned an (E) designation for "Window Wall Attenuation & Alternate Ventilation". The Noise (E) designation requires 30 dB(A) of window/wall attenuation and a means of alternate ventilation (that does not degrade the acoustical performance of the building facade) for residential development [Note: for commercial development, the requirements are 5 dB(A) less].

5.2.4 Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be checked when, in judgment of the environmental professional, such records are: 1) reasonably ascertainable; 2) useful, accurate and complete in light of the objective of the records review; and 3) are obtained in initial ESAs. These records include:

- Local Brownfields Lists

- Local Lists of Landfill/solid waste disposal sites
- Local Lists of Hazardous Waste/Contaminated Sites
- Local Lists of Registered Tanks
- Local Land Records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records include:

- Department of Health/Environmental Division
- Fire Department
- Building Permit/Inspection Department
- Local/Regional Pollution Control Agency
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

AKRF sent a Freedom of Information Law (FOIL) request to the New York City Department of Environmental Protection (NYCDEP) on October 12, 2018 pertaining to environmental records. As of the writing of this report, a FOIL response has not been received by NYCDEP. Electronic NYCDEP files indicated a Notice of Compliance form issued by NYCDEP for the Property dated December 31, 2009 noting that an order was issued in September 2009 requiring certain response measures be taken with respect to a "a release or potential release of hazardous substances" at the Property. The form noted that NYCDEP concluded through visual inspection and documentation that the work directed under the order had been satisfactorily completed – no further pertinent information was included in the Notice of Compliance form.

If issues of potential concern are noted upon receipt of additional information, an addendum to this report will be created to discuss relevant findings.

In addition to the Local Agency File Review, AKRF sent a FOIL request to NYSDEC Region 2 on October 12, 2018 for the Property to determine whether pertinent environmental records for the Property could be obtained for further review. As of the writing of this report, a FOIL response has not been received by NYSDEC. If issues of potential concern are noted upon receipt of additional information, an addendum to this report will be created to discuss relevant findings.

In AKRF's judgment, no additional local records meeting the ASTM criteria are pertinent for the Property.

6.0 USER PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the client provide any pertinent information regarding the Property, specifically:

- The reason for performing the Phase I ESA;
- Whether they were aware of any pertinent current or historic activities at or near the Property, including but not limited to: hazardous substances or petroleum, waste management practices, filling or disposal drains, septic/sewer systems, and potable and non-potable wells;
- Owner and occupant information and whether they were aware of any previous Phase I ESAs or other potentially pertinent reports, plans or information;
- Whether any *environmental liens* or *activity and land use limitations* are in place or filed or recorded against the Property or whether there was pending, threatened, ongoing or past violations, litigation or enforcement action relevant to hazardous substances or petroleum products;
- Whether they had any specialized knowledge or experience related to the Property or nearby properties (e.g., specialized knowledge of the chemicals used by this type of business);
- Whether the (anticipated) purchase price reflects that the Property is or could be contaminated; and
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Property including current/past uses of the Property and adjacent properties.

BRP Development, Inc. coordinated access to the Property. The Phase I ESA was conducted for preliminary due diligence purposes prior to potential acquisition. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

7.0 PREVIOUS STUDIES

No previous studies were provided to AKRF.

8.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- Interviews and user provided information were limited to those discussed in Section 6.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The majority of the Property was covered by parked vehicles, potentially obscuring surface features in these areas.
- The Property area history was not conducted in five-year intervals. However, sufficient information about the history of the site and surrounding area could be obtained from the available historical Sanborn and topographic maps, Buildings Department records, and interviews, and this data gap is not likely to alter the conclusions of this report.
- Agency file reviews for the Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 5.2). AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions or other environmental concerns at the Property and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

9.0 CONCLUSIONS

This Phase I ESA was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, this practice are described in Section 8.0. The term "Recognized Environmental Condition" means the presence or likely presence of hazardous substances or petroleum at the property, including the ground, groundwater, or surface water at or under the property.

This assessment revealed evidence of the following Recognized Environmental Conditions (RECs):

Recognized Environmental Conditions (RECs)

- Historical Sanborn maps indicated that the Property contained an automotive repair shop in 1942.

Controlled Recognized Environmental Conditions (CRECs)

- Electronic NYCDEP files indicated a Notice of Compliance form issued by NYCDEP for the Property dated December 31, 2009 noting that an order was issued in September 2009 requiring certain response measures be taken with respect to a "a release or potential release of hazardous substances" at the Property. To the extent that the form noted that NYCDEP concluded, through visual inspection and documentation, that the work required by the order had been satisfactorily completed, this item is considered a CREC.

Environmental Concerns

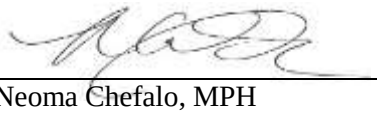
- Historical Sanborn maps indicated that the Property contained dwellings and small outbuildings by 1886, with subsequent commercial uses, including a plumber's shop, paint storage and hardware shops in 1925. Buried foundation elements and demolition debris from former structures could include petroleum storage tanks.
- Historical automotive and industrial uses were noted in the surrounding area on the 1925 through 2006 Sanborn maps, including: the Metropolitan Tobacco facility building (subsequently a Red Cross facility) with a gasoline tank immediately west of the Property; a printing facility immediately south of the Property; and a Police Precinct with a garage on the east-adjacent block, across 168th Street.
- The regulatory databases identified two petroleum bulk storage (PBS) facilities within 100 feet of the Property (one with closed regulatory status spills documenting soil and groundwater contamination).
- The attendant shelters and buried foundation elements and demolition debris from former structures could include polychlorinated biphenyls (PCBs), asbestos containing materials (ACM) and/or lead-based paint (LBP).

10.0 SIGNATURE PAGE

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.

Axel Schwendt
Vice President



Neoma Chefalo, MPH
Senior Environmental Scientist

11.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the Property, and to identify existing and/or potential environmental problems associated with the Property including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*.

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 8.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the property at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the Property and the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than BRP Development, Inc. and their successors or assignees, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 8 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
LOT 63,TAXBLOCK 9796 90-02 168 STREET QUEENS, NY 11432	NY E DESIGNATION	N/A

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-LQG sites within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

90-02 168TH STREET
9002 168TH ST
JAMAICA, NY 11432

TARGET PROPERTY COORDINATES

Latitude (North):	40.70708 - 40° 42' 25.49''
Longitude (West):	73.793605 - 73° 47' 36.98''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	601911.4
UTM Y (Meters):	4506729.5
Elevation:	62 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940539 JAMAICA, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

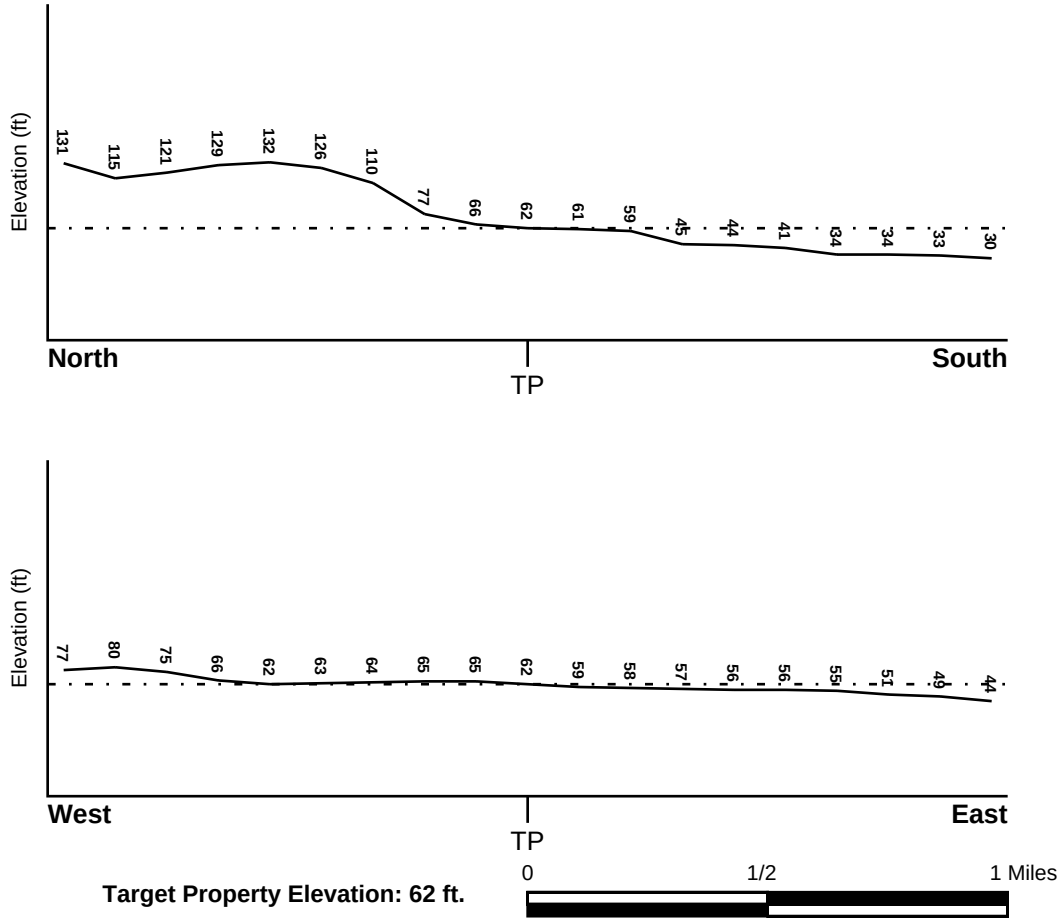
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 62 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970059B	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
3604970051B	FEMA Q3 Flood data
3604970052B	FEMA Q3 Flood data

3604970067B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
JAMAICA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Pleistocene
Code:	Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

NOTICE OF COMPLIANCE

WHEREAS, on September 8, 2009 an order was issued pursuant to section 24-610 of the New York City Administrative Code by the Commissioner of the New York City Department of Environmental Protection (DEP) requiring that certain response measures be taken with respect to a release or threatened release of hazardous substances at 90-02 168 Street, Jamaica, NY 11432 (Block9796, Lot 63); and

WHEREAS, copies of said orders were filed with the office of City Register on September 29, 2009 and recorded at CRFN: 2009000315511; and

WHEREAS, DEP concluded through visual inspection, as well as, documentation provided by the responsible party and/or consultants to the DEP, that the work directed to be done under the order has been satisfactorily completed;

THEREFORE, the order dated September 8, 2009 has been complied with by the responsible party.

12/31/09

New York DEC Support
to me

2:38 PM (4 minutes ago)

Dear Emmanuelle :

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 10/12/2018 and given the reference number FOIL #W043020-101218 for tracking purposes. You may expect the Department's response to your request no later than **11/9/2018**.

Record Requested: **Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 90-02 168th Street (Tax Block 9796, Lot 63) Jamaica, Queens,11432**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.
