**Re: Phase I Environmental Site Assessment**

22-61 45<sup>th</sup> Street  
Queens, NY  
Block: 769; Lot: 42

Dear Mr. Margaronis:

The following report summarizes a Phase I Environmental Site Assessment (ESA) of the above-referenced location (hereinafter referred to as the Property or the Site), performed by CA RICH Consultants, Inc. (CA RICH). This Phase I ESA was completed in substantive conformance with the scope and limitations of ASTM Practice E 1527-13, which sets forth nationally, accepted Phase I guidance criteria. In addition, a Tier 1 vapor encroachment screening completed in accordance with ASTM E 2600-10 is included in the Report.

If you have any questions pertaining to this report, please feel free to contact the undersigned. We thank you for the opportunity to provide you with our professional environmental services.

Sincerely,

**CA RICH CONSULTANTS, INC.**

## **EXECUTIVE SUMMARY**

CA RICH Consultants, Inc. ("CA RICH") of Plainview, New York has completed this Phase I Environmental Site Assessment (ESA) of the Property located at 22-61 45<sup>th</sup> Street, Queens, New York (hereinafter referred to as the "Property" or "Site"). CA RICH performed this Phase I ESA in substantive conformance with the suggested informational requirements, scope and limitations of the American Society for Testing & Materials (ASTM) Standard Practice E 1527-13 for environmental site assessments. Any exceptions to, or deletions from, these practices are described in Section 1.4 of this report.

The subject Property is located at 22-61 45<sup>th</sup> Street in Queens, New York. The Property is situated on the south side of 45<sup>th</sup> Street between Ditmars Boulevard to the east and 23<sup>rd</sup> Avenue to the west. The subject Property contains a one-story warehouse. The warehouse is occupied by "Three Way Plumbing Supply", a plumbing supply distribution company. The building is heated via natural gas and is connected to City sewers and water.

The information and findings presented herein are based upon the data acquired during the Property visit, and through pertinent information obtained from regulatory agencies, responsible persons knowledgeable about the Property, and other historical information sources. Based upon the information reviewed for this Phase I ESA, no "Recognized Environmental Conditions" (RECs) were identified in connection with the subject Property:

Two Other Issues (OIs) were identified that do not meet the REC criteria. These are summarized below.

- OI-1** Based upon the age of the structure, constructed circa 1955, asbestos is likely present in some of the building materials. If the building is to be renovated or demolished, it is recommended that an Asbestos Containing Material (ACM) survey be performed and appropriate measures taken to protect the health and safety of building occupants or workers during activities that may disturb the ACM.
- OI-2** Based upon the age of the structure, constructed circa 1955, lead-based paint is likely present in some of the building materials especially in the lower layers of paint. If the building is to be renovated or demolished, it is recommended that a lead-based paint survey be performed. At the time of the inspection, no peeling paint was observed.

## 1.0 INTRODUCTION

### 1.1 Purpose

The purpose of this Phase I ESA is to identify ASTM-defined Recognized Environmental Conditions associated with the subject Property. This assessment was conducted in substantive conformance with ASTMs "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" E 1527-13.

The ASTM E 1527-13 standard defines recognized environmental conditions as the presence of any hazardous substances or petroleum product in, on, or at the property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environments; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions. A *de minimis* condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

Additionally, controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs) are defined in the ASTM E 1527-13 standard. A controlled recognized environmental condition (CREC) is a recognized environmental condition resulting from a past release of hazardous substance or petroleum product that has been addressed to the satisfaction of the applicable regulatory agency, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the Findings section of the Phase I ESA and as a REC in the Conclusion section.

An historical recognized environmental condition (HREC) is a 'past-release' of any hazardous substance or petroleum product that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This Standard is designed to constitute "*all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice*" as defined in CERCLA 42 USC 9601 (35) (B). Consequently, this assessment investigates the historical land use and present-day condition of the Property in accordance with accepted standards prevailing within the lending industry and the environmental assessment profession.

### 1.2 Detailed Scope of Services

The following general activities were performed by CA RICH as part of this Phase I ESA:

- Visual and physical inspection of representative and reasonably accessible interior and exterior areas of the Property by an experienced CA RICH Environmental Professional (EP) or their appointee under their direct supervision. The inspection also included a review of building practices at adjoining properties;
- Investigation of historical land use practices including review of available Local Directory publications, historical Sanborn® Maps, discussions with knowledgeable parties associated with the Property and other readily available records or reports (i.e. prior Phase 1's);

- Review and inquiry of relevant Federal, State, and local database records pertaining to the subject Property and properties located within approximate minimum search distances for the purposes of identifying any potential sources of migrating hazardous substances or petroleum products; and,
- Review of the Property's proximity to ecologically sensitive areas or media (i.e. parks, rivers, underlying ground water, etc.) using records and maps published by the Federal United States Geological Survey (USGS) along with neighborhood reconnaissance.

### **1.3 Significant Assumptions**

For the purpose of performing this Phase I ESA, CA RICH assumes that information provided to us by the Client, database search companies, historical records, and interviews, is accurate. Our findings and conclusions regarding the potential environmental impact of nearby, off-site buildings or adjoining property facilities upon the subject Property are based upon readily available information from review of the environmental databases and observable conditions at the time of inspection by the EP. Any further, more detailed review or interpretation of a specific file or record is beyond the standard Phase I scope of work approved at this time.

Further, the Environmental Professional investigator(s) cannot be held responsible for either innocent or intentional misrepresentations, inaccurate statements, claims made, or information furnished to CA RICH regarding the environmental integrity of this Property.

### **1.4 Limitations and Exceptions**

CA RICH performed this Phase I ESA of the subject Property in accordance with good commercial and customary practice and generally accepted protocols within the consulting industry as set forth in the ASTM E 1527-13 Standard. CA RICH has included review of some non-ASTM issues for this assessment including asbestos, lead based paint, and radon gas, otherwise there have been no intentional deviations or deletions from this practice in the performance of this assessment. The assessment included a visual (observable) inspection of representative areas of the Property, the examination of readily ascertainable and practically reviewable public records concerning the current and prior use of the Property, recorded environmental conditions, and further discussions with responsible and knowledgeable parties associated with the Property.

The findings, conclusions and professional opinion set forth in this environmental report are based upon the limited information available to CA RICH during this assessment period. If new information becomes available concerning the Property and environs relative to existing or future intended land use after the date of this report, the findings and conclusions contained herein may be subject to modification. While this assessment was performed in accordance with good commercial and customary practice and generally accepted protocols within the environmental consulting industry, CA RICH cannot guarantee that the Property is completely free of hazardous substances or other materials or conditions that could subject the Owner(s) to potential liabilities. The presence or absence of any such material and/or conditions may only be revealed or confirmed through testing and analysis of any stored or suspect residual liquids, gels, or solid waste materials, chemicals, miscellaneous hazards, residues, biologicals, odors, soot, refuse, building materials, underlying fill, fluids, or soils, soil vapors, sediments, ground water, and/or surface water.

Subsurface conditions were not field-investigated and were outside the scope of this Phase I ESA and therefore, may differ from the conditions implied by records review and/or surficial observations. Building contamination, waste emplacement, lead-based paint, asbestos, fill, and soil or groundwater contamination would be disclosed to CA RICH only by surficial indications, interviews, or available regulatory records. In the absence of such information, these possible conditions may only be revealed through further specific media testing or sampling and testing

methodologies all of which are beyond the scope of this 'Phase I' Assessment, with exceptions as reported herein.

Because there are limitations to the amount of time and resources expended at this level of an initial Phase I Assessment, CA RICH cannot guarantee that all existing and pertinent Property information was reviewed. There may remain data gaps and/or additional relevant information not discovered through the standard level of all appropriate inquiry employed at this time. However, we do acknowledge that to the best of our belief, the readily ascertainable information we have supplied is true, complete and correct, and that facts or figures that may have an adverse effect upon the validity of the findings and professional opinion provided herein have not purposely been omitted.

CA RICH has no interest other than professional in this Environmental Site Assessment and neither its performance, nor compensation for same, is contingent upon the findings and/or opinion or recommendation(s), if any, represented herein. Any litigation matters that may pertain to the Property are not discussed and this report is not a legal opinion.

## **1.5 User Reliance**

This report is intended for the sole use of FTF Enterprises, LLC; TPT Enterprises, Corp.; and Pinnacle Realty of New York LLC. It may not be used or relied upon by any other party, or third party, without the written consent of CA RICH. The scope of services performed in execution of this evaluation may not be appropriate to satisfy the needs of other users, future occupants, future prospective purchasers, and/or altered land usage, or altered future land usage; and the use or re-use of this document or the findings, professional opinion, or aforementioned recommendations provided herein is at the risk of said user.

## **2.0 PROPERTY DESCRIPTION**

### **2.1 Location and Legal Description**

The subject Property is located at 22-61 45<sup>th</sup> Street in Queens, New York. The Property is situated on the south side of 45<sup>th</sup> Street between Ditmars Boulevard to the east and 23<sup>rd</sup> Avenue to the west. The tax map designation is Block 769, Lot 42. A Site Location Map is presented in Figure 1.

### **2.2 Description of Property**

The Property is a rectangular-shaped parcel of land that is improved with a one-story warehouse.

### **2.3 Description of Surrounding Area**

The Property is located in a well-developed urban area of Queens that consists of commercial land usage.

### **2.4 Current Uses of the Property**

The subject Property contains a one-story warehouse. The warehouse is occupied by “Three Way Plumbing Supply”, a plumbing supply distribution company.

### **2.5 Current Uses of Adjoining Properties**

The Property is located in a well-developed urban area of Queens that contains commercial land use. Adjoining properties include the following:

- North: One-story commercial building (across 45<sup>th</sup> Street).
- South: One-story commercial building.
- East: Parking lot.
- West: One-story commercial building.

### **2.6 Site Geology & Hydrogeology**

According to maps and reports published by the United States Geological Survey (USGS), the Property is situated at approximately 53 feet above mean sea level and is underlain by glaciofluvial deposits of Upper Cretaceous and/or Quaternary age consisting sand, silt, clay gravel, cobbles and boulders. These deposits rest unconformably on crystalline bedrock of early Paleozoic and/or Precambrian age.

No site-specific hydrogeological information is available concerning groundwater depth and flow direction. The actual soil type, depth to groundwater and flow direction can only be obtained through a site-specific hydrogeological study including the physical installation of soil borings and wells, which is beyond the scope of this Phase I ESA. However, based on the topography of the area, groundwater likely flows in a north easterly direction towards the East River.

The Property is relatively flat and has no natural or artificial surface water bodies or impoundments. Water from rain events runs off into City storm sewers.

### **3.0 USER-PROVIDED INFORMATION**

ASTM E 1527-13 defines the “User” as: “*the party seeking to use practice E 1527-13 to complete an environmental site assessment of the property*”. The User is responsible for providing certain information (if available) to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001. Failure to provide this information could result in a determination that “*all appropriate inquiry*” is not complete. As such, a User/Owner Questionnaire was prepared in conformance with E 1527-13, and submitted to Pinnacle Realty of New York LLC for delivery to the owner. A user questionnaire was not completed and returned to CA RICH at the time of this Report.

#### **3.1 Title Records**

Title records were not provided by the User and not requested by CA RICH. This is considered a data gap; however, this is not expected to have an impact on the conclusion for this Phase I report.

#### **3.2 Environmental Liens**

An environmental lien search was not provided by the User and was not requested by CA RICH. This is considered a data gap; however, this is not expected to have an impact on the conclusion of this Phase I report.

#### **3.3 Specialized Knowledge**

The User did not provide CA RICH with specialized knowledge pertaining to the environmental integrity of the Property.

#### **3.4 Commonly Known or Reasonably Ascertainable Information**

The User did not provide CA RICH with any reasonably ascertainable information.

#### **3.5 Valuation Reduction for Environmental Issues**

A valuation reduction for environmental issues was not provided by the User and is not included as part of this Phase I ESA.

#### **3.6 Owner, Property Manager, and Occupant Information**

Access to the Property was provided on June 4, 2018 by Mr. George Margaronis of Pinnacle Realty of New York LLC. Jessica Proscia, Environmental Professional of CA RICH, walked through the Site and was provided information regarding the Site during the walk-through. The Site is currently occupied by “Three Way Plumbing Supply”, a plumbing supply distribution company.

#### **3.7 Reason for Performing Phase I**

The purpose of performing this Phase I ESA is to conduct environmental due diligence for the sale of the Property.

## **4.0 SITE RECONNAISSANCE**

### **4.1 General**

The subject Property is located at 22-61 45<sup>th</sup> Street in Queens, New York. The Property is situated on the south side of 45<sup>th</sup> Street between Ditmars Boulevard to the east and 23<sup>rd</sup> Avenue to the west. The subject Property contains a one-story warehouse. The warehouse is occupied by "Three Way Plumbing Supply", a plumbing supply distribution company. The building is heated via natural gas and is connected to City sewers and water. Photographs taken during the Site Inspection are included in Appendix A.

### **4.2 Methodology and Limiting Conditions**

Jessica Proscia conducted the Site inspection on June 4, 2018 with access provided by Mr. George Margaronis of Pinnacle Realty of New York LLC. The inspection began with a walk-through of the interior portions of the Property. The exterior perimeter was inspected last. The roof was not inspected.

### **4.3 Interview Information**

Jessica Proscia conducted the inspection and obtained information regarding the Property. The tenants of the building were not interviewed; however, Mr. Margaronis, provided the following information:

- The building is heated via natural gas.
- The building is utilized for plumbing supply distribution.

### **4.4 Exterior Observations**

The exterior façade of the building consists of cinderblock and brick. A sidewalk fronts the building along 45<sup>th</sup> Street. Three roll-up doors were identified along 45<sup>th</sup> Street. No stressed vegetation or staining was observed at the time of inspection.

### **4.5 Interior Observations**

Interior building materials consist of painted sheetrock and cinderblock walls and ceilings, concrete and ceramic tile flooring. The warehouse is heated via forced-air-overhead blowers. The building also contains multiple offices. The electric and natural gas meters were identified within the warehouse.

### **4.6 Storage Tanks**

Storage tanks, both AST and underground (UST), are often used for storing fuel, waste oils, solvents, and other waste and/or potentially hazardous materials. The principal concern from storage tanks is leakage of contents due to corrosion of the tank or associated lines. The leakage may result in migration of the stored material onto the subject Property and/or neighboring properties via soil migration or underlying shallow groundwater flow. In general, soil and groundwater contaminated by leaks from on-site storage tanks may constitute an environmental or health hazard.

At the time of inspection, no evidence of existing or former ASTs or USTs was observed.

#### 4.7 Toxic / Hazardous Materials

No toxic or hazardous materials were observed during the inspection.

#### 4.8 Proximity to Environmentally Hazardous and/or Sensitive Areas

The Property is situated within a commercial area in Queens, New York. The computerized database records (Appendix B) identifies approximately 192 sites in the categories of Government reported sites located in proximity to the Property in accordance with ASTM E 1527-13 minimum search distances. Any locatable site has been mapped on the radius search maps (included in Appendix B) and is discussed in further detail in Section 6.0 of this report.

There are National Wetlands, FEMA 100 and 500 Year Flood Zones mapped within a mile north east of the Property. City water is supplied to the Property and there is no on-site use of shallow groundwater beneath the Property.

### 5.0 HISTORICAL LAND USE PRACTICES

To further determine historical land use and the Property's developed use, available historical Fire Insurance maps, and Local Directory records were reviewed.

#### 5.1 Fire Insurance Mapping

Microfilm collections of fire insurance maps available through the Library of Congress, University Publications of America, and various public local sources were searched for local area coverage. Fire Insurance Maps are detailed maps that show the lot configuration and improvements and may contain information regarding historical ownership, land use, and hazardous or regulated materials storage. The following table summarizes the findings of the Sanborn® map review.

YEAR	DESCRIPTION AND COMMENTS
1898	The subject Property and surrounding area is undeveloped.
1915, 1936, 1948, 1950	The subject Property is undeveloped. The surrounding area is becoming more developed with dwellings, warehouses, and factories.
1967, 1977, 1979, 1981, 1985, 1986, 1988, 1989, 1990 - 1993	The subject Property is developed with a structure identified as a "Knitting Mill". The surrounding area appears similar to the 1950 map.
1994 – 1996, 1999, 2001 - 2006	The subject Property is now identified as manufacturing. The surrounding area includes residential and commercial usage.

The subject Property first appears improved with a commercial structure identified as a "knitting mill" in 1967. The 1994 through 2006 maps identify the Property as manufacturing. There are no open NYSDEC SPILLS or violations associated with this Property. Sanborn Fire Insurance Maps are included in Appendix C.

## 5.2 Local Directory

CA RICH conducted a review of available Local Directory records for 22-61 45<sup>th</sup> Street, Queens, New York from 1922 to 2014. According to the database, the Property was listed as follows:

- 1962 – Brook Textiles Inc.  
Commission Knitting Mills  
Empire State Mills Inc.
- 1967 – Brook Textiles Inc.  
Commission Knitting Mills  
Empire State Mills Corp.
- 1970 – Brook Textiles Inc.  
Commission Knitting Mills  
Empire State Mills Corp.  
Commissioned Officers US Naval Hospital
- 1976 – Brook Textiles Inc.  
Commission Knitting Mills  
Empire State Mills Corp.
- 1991 – Bernstein L D & Sons
- 2000 – Bernstein L D & Sons

The city directory records indicate that the Property has been utilized as commercial since 1962. A copy of the City Directory Abstract is attached as Appendix C.

## 6.0 ENVIRONMENTAL RECORDS REVIEW

This Section discusses database records maintained by Federal, State and local environmental agencies for the Property and for sites located within an approximate minimum search distance. Available information was compiled from computerized database sources of regulatory agency records. The purpose of this database records review is to help assess the likelihood of any potential problems attributable to migrating hazardous substances or petroleum products. The minimum search distances are specified within ASTM Practice E 1527-13.

These database searches were conducted by EDR at the request of CA RICH on May 24, 2018, (Order Number: 5310636.2s). The existence of an actual toxic hazard at a specific site can be concluded only when Government authorities make that determination or when that conclusion is fully documented by the findings of an appropriate site investigation undertaken by licensed professionals.

The resulting database information is briefly summarized below. Complete copies of the database report and radius maps are included as Appendix B. Additional site-specific information was requested elsewhere by CA RICH under the provisions of the Freedom of Information Law (FOIL).

## 6.1 Federal

The number of ASTM federally listed database sites identified in proximity to the Property is tabulated below. The search categories and database review findings are discussed in greater detail below the summary table.

Federal ASTM Database Search Category	Approx. Minimum Search Distance	Subject Property	Total Sites Plotted
EPA National Priority List Sites (NPL)	1.0 mile	Not identified	0
EPA SEMS Sites / CERCLIS Sites	0.50 mile	Not identified	0
EPA SEMS-ARCHIVE/CERCLIS-NFRAP	0.50 mile	Not identified	1
EPA DELISTED NPL	1.0 mile	Not identified	1
RCRA-TSDF	0.50 mile	Not identified	0
RCRA-LQG	0.250 mile	Not identified	2
RCRA-SQG	0.250 mile	Not identified	3
RCRA-CESQG	0.250 mile	Not identified	3
CORRACTS	1.0 mile	Not identified	3
ERNS	TP	Not identified	0
FINDS	TP	Not identified	0
HMIRS	TP	Not identified	0
FEDERAL Engineering Controls	0.50 mile	Not identified	0
FEDERAL Institutional Controls	0.50 mile	Not identified	0
FEDERAL Brownfields	0.50 mile	Not identified	0

- ◆ **EPA National Priorities List (NPL), Superfund Enterprise Management System (SEMS)**  
**\*Formerly known as Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS)**

The CERCLIS list is a compilation by the US EPA of sites that the US EPA has investigated or is currently investigating for a release or threatened release of hazardous substances pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), commonly known as the Superfund Act. Once sites are designated on the CERCLIS list, the USEPA uses its Hazard Ranking System to determine potential risks to human health and the environment. Those CERCLIS sites that present the greatest risk are placed on the National Priority List (NPL), which qualifies the sites to receive remedial funding. The EPA has formally changed the name of CERCLIS to SEMS in 2015.

The subject Property is not identified as a CERCLIS/SEMS or NPL site. There are no sites on the SEMS database located within the approximate minimum search distance from the subject Property.

◆ **Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), No Further Remedial Action Planned (NFRAP)**

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was quickly removed without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat these investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens promote economic redevelopment of unproductive urban sites. The EPA has formally changed the name of CERCLIS-NFRAP to SEMS-ARCHIVE in 2015.

The subject Property is not identified as a CERCLIS-NFRAP or SEMS Archive site. There is one SEMS Archive site reported within the approximate minimum search distance from the subject Property identified as Photo Chemical Products, Inc. Based upon the information reviewed, as well as the distance from the subject Property, this site is not expected to have a direct negative impact on the subject Property.

◆ **Delisted National Priority List (Delisted NPL)**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425 (e), sites may be deleted from the NPL where no further response is appropriate.

The subject Property is not identified as a Delisted NPL site. There is one Delisted NPL site reported within the approximate minimum search distance from the subject Property identified as Radium Chemical Co. Based upon the information reviewed, as well as the distance from the subject Property, this site is not expected to have a direct negative impact on the subject Property.

◆ **Resource Conservation and Recovery Act (RCRA)  
RCRA Treatment Storage and Disposal Facility (TSDF)  
RCRA Large and Small Quantity Generator (LQG/SQG)  
RCRA Conditionally Exempt Small Quantity Generator (CESQG)**

The RCRA was enacted to regulate facilities that generate, store, transport, or dispose of hazardous waste. These facilities must file notification forms with the EPA, which maintain the records in the RCRA Information System (RCRIS) Notifier's database. Inclusion on the RCRIS list does not signify contamination or mishandling of hazardous materials by hazardous waste. Notifier's RCRA-listed sites are not indicative of an environmental concern unless an actual hazard is known to exist. The database includes selective information on sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA.

The subject Property is not listed as a TDSF, LQG, SQG or CESQG site. However, there are two LQG, three SQG, and three CESQG sites located within the approximate minimum search distance. None of these sites contain open violations. Based upon the information reviewed, these sites are not expected to have a direct negative impact on the subject Property.

◆ **Corrective Action Activity (CORRACTS)**

CORRACTS is a list of handlers with RCRA Corrective Action Activity. It reports which nationally defined corrective action core events have occurred for every handler that has had a corrective action activity.

The subject Property is not identified as a CORRACTS site. There are three CORRACTS sites reported within the approximate minimum search distance from the subject Property identified as Triumvirate Environmental NYC LLC, Chemical Solvents Distillers Co., and Con Edison – Astoria. Based upon the information reviewed, these sites are not expected to have a direct negative impact on the subject Property.

◆ **Emergency Response Notification System (ERNS)**

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil and hazardous substances. Pursuant to the ASTM Practice E 1527-13, the ERNS database is searched only for the subject Property.

The subject Property is not identified in the U.S. EPA ERNS database.

◆ **Facility Index System (FINDS) /Facility Identification Initiative Program Summary Report**

The FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

The subject Property is not identified in the U.S. EPA FINDS database.

◆ **Hazardous Materials Information Reporting System (HMIRS)**

The HMIRS database is a list of United States Department of Transportation (US DOT) pipeline and hazardous materials safety administration incidents reports taken from the Hazmat Intelligence Portal.

The subject Property is not identified in the HMIRS database.

◆ **Federal Engineering (ENG) Controls**

The US Engineering Controls Site List lists sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to mitigate or eliminate pathways for regulated substances to enter environmental media or effect human health.

There are no documented Engineering Controls listed for the subject Property. There are no Engineering Controls sites reported within the approximate minimum search distance from the subject Property.

◆ **Federal Institutional (INST) Controls**

The US Institutional Controls List is a listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of an institutional control.

There are no documented Institutional Controls listed for the subject Property. There are no Institutional Controls sites reported within the approximate minimum search distance from the subject Property.

◆ **Federal Brownfields**

Federal Brownfields is a USEPA listing of Brownfield properties from the Cleanups in My Community program, which provides information on Brownfield properties for which information is reported back to the EPA, as well as areas served by Brownfield Grants.

The subject Property is not listed on the US Brownfields List. There are no Federal Brownfield sites reported within the approximate minimum search distance from the subject Property.

## 6.2 State and Tribal

The numbers of State-listed database sites identified in proximity to the Property are tabulated below. The search categories and database review findings are discussed in greater detail in the summary table.

State ASTM Database Search Category	Approx. Minimum Search Distance	Subject Property	Total Sites Plotted
NYS Inactive Hazardous Waste Sites (SHWS)	1.0 mile	Not identified	3
NYS Solid Waste Disposal Sites or Landfills (SWF/LF)	0.50 mile	Not identified	1
NY Vapor Reopened	1.0 mile	Not identified	0
NYS Leaking Underground Storage Tanks (LTANKS)	0.50 mile	Not identified	28
NYS Registered Storage Tank (UST)	0.250 mile	Not identified	17
NYS Chemical Bulk Storage Facilities (CBS)	0.250 mile	Not identified	1
NYS Major Oil Storage Facilities (MOSF)	0.50 mile	Not identified	0
NYS Registered Storage Tank (AST)	0.250 mile	Not identified	19
NY Spills (NY SPILLS)	0.125 mile	Not identified	12
NY Brownfields	0.50 mile	Not identified	0
NY Engineering Controls	0.50 mile	Not identified	0
NY Institutional Controls	0.50 mile	Not identified	0
NY Dry Cleaners	0.25 mile	Not identified	1

◆ **New York State Inactive Hazardous Waste Sites (SHWS)**

New York State Department of Environmental Conservation (NYSDEC) publishes an annual directory of Inactive Hazardous Waste Disposal Sites currently being investigated or requiring investigation. Sites are assigned a Classification number from 1 to 5. Class 1 sites are believed to be an imminent danger to the public health or environment and Class 5 sites have been properly closed and require no further action.

The subject Property does not appear as a NYS-Inactive Hazardous Waste Site. There are three SHWS sites located within the minimum search radius. Based upon the information reviewed, as well as the distance from the subject Property, these sites are not expected to have a direct negative impact on the subject Property.

♦ **New York State Landfills**

State landfill records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

The subject Property is not identified as a solid waste disposal facility or landfill. There is one documented landfill within the approximate search radius, identified as New York Transmission and Used Auto Sales. Based upon the information reviewed, this site is not expected to have a direct negative impact on the subject Property.

♦ **New York Vapor Reopened**

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposure at sites. As a result, all past, present and future contaminated sites will be evaluated to determine whether they have any potential for exposures related to soil vapor intrusion.

The subject Property is not identified as a New York State Vapor Reopened site. There are no documented New York State Vapor Reopened sites reported within the approximate search radius from the Property.

♦ **New York State LUST Sites (LTANKS) and Spills (SPILLS)**

The Leaking Storage Tank Incident Reports contain an inventory of reported leaking storage tank reported from April 1, 1986 through the most recent update. Causes of the incidents include tank test failures, tank failures and tank overfills or releases determined during the removal of USTs that have leaked.

The subject Property is not identified on the SPILLS or LTANKS lists.

There are 28 LTANKS and 12 NY SPILLS identified within the approximate search radius from the Property. All LTANKS and SPILLS sites have been closed out to the satisfaction of the NYSDEC with the exception of one SPILLS site. The open SPILLS site is summarized as follows:

SPILLS

1. NYSDEC Spill number 1606649, identified as "Residence" was generated in October 2016 when a chemical smell was identified by a resident. This site is located within an eighth of a mile northwest of the subject Property, at a higher elevation. Corrective action has been taken.

Based upon the information reviewed, resources effected, as well as the direction and the distance from the subject Property, this site is not expected to have a direct negative impact on the subject Property.

◆ **New York State Registered Storage Tank List (UST/AST)**

New York State requires the registration of all bulk petroleum storage tank facilities with a combined storage capacity greater than 1,100 gallons and less than 400,000 gallons.

The subject Property is not identified on the AST or UST lists.

There are 17 UST and 19 AST sites located within the approximate search radius of the subject Property. The existence of these sites is not expected to have a direct negative impact upon the subject Property.

◆ **New York State Chemical Bulk Storage Facilities (CBS)**

New York State requires the registration of all facilities storing those hazardous substances that are listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. The presence of Chemical Bulk Storage facilities does not indicate an area of environmental concern unless the tanks have leaked product.

The subject Property is not identified as a CBS site. There is one CBS site located within the approximate search radius from the Property. The existence of this site is not expected to have a direct negative impact upon the subject Property.

◆ **New York State Major Oil Storage Facilities (MOSF)**

These are facilities that may be onshore facilities or vessels, with petroleum storage capacities greater than 400,000 gallons.

The subject Property is not identified on the MOSF list. There are no MOSF sites located within the approximate search radius from the Property.

◆ **New York Brownfield**

The NY Brownfields is a listing of Brownfield properties currently or historically in the NY State Brownfield Program. The database includes properties in various stages of the program.

The subject Property is not identified as a NY Brownfield site. There are no documented NY Brownfield sites reported within the approximate search radius from the Property.

◆ **New York State Engineering (ENG) Controls**

The New York State Engineering Controls Site List is a listing of sites with engineering controls in place.

There are no New York State Engineering Controls listed for the subject Property. There are no documented Engineering Controls sites reported within the approximate search radius from the Property.

◆ **New York State Institutional (INST) Controls**

The New York State Institutional Controls List is a listing of sites with institutional controls in place.

There are no New York State Institutional Controls listed for the subject Property. There are no documented Institutional Controls sites reported within the approximate search radius from the Property.

◆ **NY Dry Cleaners**

This database includes a listing of all registered dry cleaning facilities.

The subject Property is not identified as a NY Dry Cleaner. There is one dry cleaning facility reported within the approximate minimum search distance from the subject Property, identified as Vel-An Cleaners. Based upon the information reviewed, as well as the distance from the subject Property, this site is not expected to have a direct negative impact on the subject Property.

◆ **Orphan Sites**

The Federal and State database search also revealed two sites that were not mapped. These sites are listed in the Executive Summary on page ES-26 in Appendix B. Based on the limited information reviewed for this report, there is no indication these Orphan Sites represent a significant environmental liability to the Property.

### **6.3 Local**

◆ **New York State Department of Environmental Conservation (NYSDEC)**

CA RICH conducted a site-specific search via the NYSDEC on-line records for information regarding spills or leaks at the Site. The subject Property was not listed with any open or closed spill numbers. A copy of the on-line search records is included in Appendix D.

◆ **New York City Department of Environmental Protection (NYCDEP)**

CA RICH requested a site-specific search via the Freedom of Information Law (FOIL) of the New York City Department of Environmental Protection (NYCDEP) records for information regarding bulk storage tanks, violations, spills, leaks, inspections, and solid waste. At the time of this report, CA RICH has not received a response from NYCDEP.

◆ **New York City Department of Health (NYCDOH)**

CA RICH requested a site-specific search via the Freedom of Information Law (FOIL) of the New York City Department of Health (NYCDOH) records for information regarding bulk storage tanks, violations, spills, leaks, inspections, and solid waste. CA RICH has not received a response from the Department at the time of this report.

◆ **New York City Department of Buildings (NYCDOB)**

CA RICH searched the New York City Department of Buildings (NYCDOB) Building Information System (BIS) database for the borough of Queens: Block 769, Lot 42. No Certificates of Occupancy (COs) were identified for the subject Property. The building is identified as a warehouse building (E1). The Site does not have any open NYCDOB violations. NYCDOB records are included in Appendix D.

◆ **New York City Department of Finance (NYCDOF)**

CA RICH conducted a search of the New York City Department of Finance (NYCDOF) ACRIS database for the subject Property at Block 769, Lot 42.

According to the database the latest deed was transferred from 22-61 45<sup>th</sup> Street LLC to FTF Enterprises LLC in June 2005. Copies of records are included in Appendix D.

#### 6.4 Vapor Encroachment Survey (VES)

A Tier 1 Vapor Encroachment Survey (VES) was conducted using the EDR database ordered by CA RICH on May 24, 2018 and in conjunction with the Phase I ESA field inspection. The field inspection revealed that the subject Property contains a one-story warehouse.

Topographic maps were used to aid in determining the uppermost direction of groundwater flow. The direction of groundwater flow can help to establish any upgradient locations of potential soil vapor relative to the Site. Upgradient sources of soil vapor present a greater concern for vapor encroachment at the Site; and according to topographic maps, groundwater is assumed to be moving in a north easterly direction towards the East River.

The EDR's database (Appendix B) was used to aid in identifying neighboring properties that may present a vapor encroachment condition. A review of the database found that there are 28 LTANKS and 12 NY SPILLS identified within the approximate search radius from the Property. All LTANKS and SPILLS sites have been closed out to the satisfaction of the NYSDEC with the exception of one SPILLS site. The open SPILLS site is summarized as follows:

##### SPILLS

2. NYSDEC Spill number 1606649, identified as "Residence" was generated in October 2016 when a chemical smell was identified by a resident. This site is located within an eighth of a mile northwest of the subject Property, at a higher elevation. Corrective action has been taken.

The general area immediately surrounding the Property contains commercial land use. No gasoline filling stations or dry cleaners were identified during the Site Inspection. Based upon the field inspection and pertinent information reviewed, a vapor encroachment condition is unlikely to exist at the subject Property.

## **7.0 ADDITIONAL SERVICES**

### **7.1 Asbestos**

Until the late 1970s, asbestos was used in, but not limited to, insulating materials, fireproofing, roofing, flooring, and decorative building materials. The USEPA defines asbestos material as any material containing greater than 1% asbestos by weight. Asbestos-Containing Materials (ACM), in a form which can crumble or be reduced to powder under hand pressure (friable), can release asbestos fibers which are proven to be carcinogenic and cause respiratory illness. The presence of asbestos in a building does not mean that the health of building occupants is necessarily endangered. As long as ACM remains in good condition and is not disturbed, exposure to asbestos fibers is unlikely.

Based upon the age of the building, constructed circa 1955, asbestos is likely present in the interior building materials.

### **7.2 Radon Gas**

Radon is a naturally occurring, invisible, odorless, carcinogenic gas that is generated by the decay of radioactive elements found in certain crystalline rock types or derivatives thereof. Inhalation of radon gas represents the principal exposure pathway. In outdoor air, radon is diluted to such low concentrations that it does not pose a health hazard. However, once inside an enclosed space such as basements, pipe chases, drains and foundation crawl spaces, radon gas may accumulate to dangerous concentrations. The New York State Department of Health and the United States Environmental Protection Agency use 4 pCi/L as a recommended action level for the lowest primary living area of the home. Confirmation of the presence or absence of radon gas is possible through testing.

Review of geologic maps prepared by the United States Geological Survey and the findings of an EPA Residential Radon Survey (Appendix B, page A-25) revealed that the Property is located in an area identified as Zone 3, which indicates that the average indoor living area levels of radon are below the action level of 4 pCi/L. The potential for naturally occurring radon gas contamination at the Property is unlikely.

### **7.3 Lead-Based Paint**

Research has shown that, when ingested, lead can cause permanent neurological problems and brain damage. Federal regulations were promulgated in 1978 that ban the sale of paint containing more than 0.06 percent lead by weight. Consequently, any paint known to contain lead in excess of 0.06 percent is considered to be lead-based.

Based on the age of the building, constructed circa 1955, it is likely that lead-based paint is present inside this building. At the time of inspection, no peeling paint was observed anywhere inside the building.

## **8.0 FINDINGS AND PROFESSIONAL OPINION**

The findings presented herein are based upon the data acquired during the Property visit and through pertinent information obtained from regulatory agencies, responsible persons knowledgeable about the Property, and other historical information sources. No significant data gaps were identified in generating this Report.

The subject Property is located at 22-61 45<sup>th</sup> Street in Queens, New York. The Property is situated on the south side of 45<sup>th</sup> Street between Ditmars Boulevard to the east and 23<sup>rd</sup> Avenue to the west. The subject Property contains a one-story warehouse. The warehouse is occupied by "Three Way Plumbing Supply", a plumbing supply distribution company. The building is heated via natural gas and is connected to City sewers and water.

Based upon the field inspection and pertinent information reviewed, a vapor encroachment condition is unlikely to exist at the subject Property.

## **9.0 CONCLUSIONS**

We have performed this Phase I Environmental Site Assessment of 22-61 45<sup>th</sup> Street, Queens, New York in conformance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. This assessment did not reveal any "Recognized Environmental Conditions" (RECs).

Two Other Issues (OIs) were identified that do not meet the REC criteria. These are summarized below.

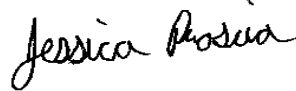

- OI-1** Based upon the age of the structure, constructed circa 1955, asbestos is likely present in some of the building materials. If the building is to be renovated or demolished, it is recommended that an Asbestos Containing Material (ACM) survey be performed and appropriate measures taken to protect the health and safety of building occupants or workers during activities that may disturb the ACM.
- OI-2** Based upon the age of the structure, constructed circa 1955, lead-based paint is likely present in some of the building materials especially in the lower layers of paint. If the building is to be renovated or demolished, it is recommended that a lead-based paint survey be performed. At the time of the inspection, no peeling paint was observed.

## **10.0 DECLARATIONS OF ENVIRONMENTAL PROFESSIONALS**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal Delisted NPL site list***

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>RADIUM CHEMICAL CO.,</b>	<b>66-06 27TH STREET</b>	<b>SSE 1/2 - 1 (0.602 mi.)</b>	<b>152</b>	<b>452</b>

#### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/09/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>PHOTO CHEMICAL PRODU</b>	<b>22-76 35TH STREET</b>	<b>NW 1/4 - 1/2 (0.420 mi.)</b>	<b>AE140</b>	<b>410</b>

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/11/2017 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***State- and tribal - equivalent CERCLIS***

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/12/2018 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

### ***State and tribal landfill and/or solid waste disposal site lists***

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/08/2017 has revealed that there is 1 NY SWF/LF site within approximately 0.5 miles of the target property.

### ***State and tribal leaking storage tank lists***

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/12/2018 has revealed that there are 28 NY LTANKS sites within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 17 NY UST sites within approximately 0.25 miles of the target property.

#### **Local Lists of Hazardous waste / Contaminated Sites**

NY DEL SHWS: A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

A review of the NY DEL SHWS list, as provided by EDR, and dated 02/12/2018 has revealed that there are 2 NY DEL SHWS sites within approximately 1 mile of the target property.

#### **Records of Emergency Release Reports**

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/12/2018 has revealed that there are 12 NY Spills sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

NY DRYCLEANERS: A listing of all registered drycleaning facilities.

A review of the NY DRYCLEANERS list, as provided by EDR, and dated 11/22/2017 has revealed that there is 1 NY DRYCLEANERS site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
VEL-AN CLEANERS Facility Id: 2-6301-00538	46-18 DITMARS BLVD.	ENE 0 - 1/8 (0.109 mi.)	F41	152

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was TIPPLE On 3/3/2003 DEC Sigona contacted affected party determined that DEP would not accept compliant initially. DEC Sigona contacted DEP under complaint No. 585613. DEC Tipple performed field investigation with DEP Cosmos on 3/3/2003 could not confirm gasoline vapor problem. 3/4/03 Tipple updating, DeMeo responded to an updated report, apparently another slug of petroleum entered the sewer. DeMeo arrived prior to FDNY flushing the line and found what is believed to be fuel oil vapors in two residances with the vapor source apparently the sewer traps in the two basements. DeMeo traced the volitiles upstream to the corner house owned by Fernando Gonzales at 22-76 47th street phone 718-274-1990, cell# 917-609-7491. 3/6/02 TTF ON ENTIRE SYSTEM, APPEARS TO BE A MINIMUM OF LINE LEAK ON THE SUCTION LINE. THE TANK ITSELF IS ADJACENT TO THE SEWER, THE RELEASE MAY BE GOING DIRECTLY TO THE SEWER. 500 GAL TANK CURRENTLY HAS LESS THAN 80 GAL OF PRODUCT REMAINING IN THE TANK AND WILL BE EMPTIED, AND EITHER SEPERATED AND RETESTED OR DECOMMISSIONED. 4/1/2003 Tipple visited site, the tank had been excavated and cleaned. All lines were exposed, any stained soil had been removed and disposed. No further action recommended"

Remarks: "caller states that there is a very strong smell in the basement -

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was VOUGHT JMR site inspection 11/28/95: Neither Tank registration nor inventory records were available for inspection. All three remote fills filled with product. An extra vent line was noted on site. 01/07/04 Reassigned from Rommel to vought 1/27/2003-Vought-Exxon rebuilt station and installed new USTs as of 11/98. 9/26/05-Obligado-file transferred from Vought to Obligado 5/16/06 - Obligado - File review - UST Closure report, dated September 1999, submitted by Tyree on behalf of Ted Zordas, Supreme Auto Group, 1610 Northern Blvd, Flushing, NY. 12 550 gallon tanks removed. 1544 tons of gasoline contaminated soil removed from the excavation. 5 post excavation samples collected. Elevated VOCs detected in bottom sample (12 ft bgs) with approx 75000 ppb VOCs. Subsurface Investigation of Exxon Service Station, submitted by Tyree Organization, dated July 2000, on behalf of Mr. Alex Grivas, AHG Realty Corporation, 28-24 216th Street, Bayside, New York 11360. The investigation was conducted because of contaminated endpoint samples previously collected during UST excavation. Six soil borings showed no VOCs in excess of soil standards. SVOCs had SVOC impacts in Surficial Soil samples 1-4. 5 ground water samples collected from 1 temp well and 4

monitoring wells. 45.7 ppb VOCs in MW2 and 4080 ppb MTBE in MW3. Ground water encountered at 40 ft bgs. Transfer to Koon Tang. 11/26/07: Transferred from Tang to Sun/Sellberg. (JS/MS) Need to send letter to Alex Grivas of AHG Realty. PBS #2-480460 shows that three USTs are temporarily out of service. Will send GW contam letter. (JS/MS) 12/03/07: Sent letter to above at 2824 216th Street, Flushing, NY 11360-2636, requiring that a SIWP be submitted by 1/4/2008, to delineate MTBE contamination identified in GW. (JS/MS) 01/28/08: Return receipt was received. Overdue. 05/08/08: GES retained; advised client to give extension. (JS/MM) 07/02/08: GES will take groundwater sample and devise SIWP, due 08/29/08. Extension approved (JS/MM) 09/24/08: Received SIR. Under Review (JK/MM) 10/3/08: SIR shows contamination. Additional SB/GW needed. SIWP due 11/7/08 (JK/MM) 12/11/08: Left message with Heather Cloud (GES - 631-582-4187 ext 26) requesting SIWP that is past due. 12/17/08: On 12/16/08 JK received an email/letter from Impact Environmental stating that they have been retained by the RP and they will submit the SIWP by 12/23/08. (JK/KG) 12/23/08: SIWP rec'd from Impact. Under review. (JK/KG) 12/29/08: Letter sent to A. Grivas and Impact (James Cressy - jcressy@impactenvironmental.com) approving work plan. Proposed work includes the installation of 2 MWs, collection of soil and GW samples, a GW elevation survey, and submission of SIR. Letter states that soil and GW samples must be analyzed for VOCs, SVOCs, and MTBE (not just VOCs). An investigation summary report is due 3/30/09. (JK/KG) 12/30/08: A. Grivas called today stating that Supreme Auto Group leases the property and they have hired Impact Environmental. Correspondence should be sent to them. A. Grivas has owned the property since the 70's. Supreme Auto Group Ted Zordas 199-07 32nd Avenue Flushing, NY 11358 516-312-5670 Letter sent to A. Grivas on 12/29/08 was also sent to Ted Zordas. Spoke to James Cressy (Impact) and verified that Ted Zordas hired Impact for this spill. Called and left a message with Zordas to verify that he is assuming responsibility for the clean up. (JK/KG) 01/22/09: Rec'd message on 1/21/09 from J. Cressy. He sent a letter a few weeks ago to the owner of the property adjacent to the site requesting access to the property in order to install a monitoring well. He has not received a response from the owner. I told him if he doesn't receive a response to install the well in the sidewalk on 43rd Street, downgradient of MW-2 (utilities and structures permitting). (JK/KG) 01/27/09: Rec'd copy of letter Impact sent to adjacent property owner adjacent requesting permission to install a monitoring well on the property. (JK/KG) 02/12/09: Rec'd email on 2/11/09 from Jim DeMartinis stating that Holzmacher had been retained to perform the site investigation. He will be visiting the site on 2/12 to see if the wells had been installed by Impact. Jim DeMartinis J.R. Holzmacher P.E. LLC 631-234-2220 Ex 102 516-983-6987 (Cell) 631-234-2221 (Fax) jimd@holzmacher.com (JK/KG) 03/16/09: Jim DeMartinis visited the site on 3/13/09 and asked if it was okay to install MW-5 in the sidewalk along 43rd St. I told him that was okay. He asked for a 30 day extension. The new deadline for the report is 4/29/09. (JK/KG) 04/30/09: Spoke to Jim; 2 wells were installed and sampled. Holzmacher will be submitting the report. (JK/KG) 05/06/09: Sent email to Jim DeMartinis requesting status of report. Spoke to Jim and he said after the wells were installed, the subcontractor, CDSP, only sampled the 2 new wells. The other 3 wells will be sampled on 5/8 or 5/11. He will include all of the data in the SIR. (JK/KG) 06/16/09: Rec'd pdf of subsurface investigation report dated 6/15/09 submitted

by Holzmacher.(JK/KG) 06/18/09: Two monitoring wells, MW-1R (a replacement well for MW-1) and MW-5, were installed on 4/20/09. These two wells were sampled on 4/21/09. Since only those two wells were sampled, a full round of GW samples were collected from all wells on 5/27/09. Groundwater flow is northeasterly. Depth to groundwater is around 39' bgs. Soil samples were collected at 25' bgs and 35' bgs on 4/21/09 in both borings: MW-1R: Three SVOCs detected (estimated values) just above RSCOs in the sample collected at 25' bgs. Low detected PID readings (15 ppm to 20 ppm). MW-5: No VOCs or SVOCs detected above RSCOs. No detected PID readings. GW samples collected 4/21/09: MW-1R: Multiple VOCs exceeding standards. BTEX (709.8 ug/L), m,p-Xylene (420 ug/L), MTBE (13 ug/L) MW-5: Several VOCs exceeding standards. Benzene (6.2 ug/L), MTBE (67 ug/L) GW samples collected on 5/27/09: MW-1R: All VOC concentrations increased significantly since 4/21/09. BTEX (3,450 ug/L), m,p-Xylene (2,000 ug/L), MTBE (88 ug/L), 1,2,4-Trimethylbenzene (3,600 ug/L) VOC concentrations in MW-2, MW-3, MW-4 and MW-5 are very similar and have increased significantly since last sampling event. 1,2,4-Trimethylbenzene - 1,400 ug/L in all 4 wells, m,p-Xylene - 1,600 ug/L in all 4 wells, BTEX ranged from 2,660 ug/L to 2,740 ug/L. Upgradient and downgradient wells have similar levels of contamination based on the 5/27/09 laboratory data. I spoke to Jim DeMartinis about the similarity in the data. He said he spoke to the lab and the lab said there is no way that the same sample could have been analyzed 4 times. He also spoke to Dan Yarom of CDSP (Environment Pros) who sampled the wells. Based on the information provided in the well evacuation logs and his conversation with Yarom, DeMartinis was confident that the samples were collected properly. I told him to resample the wells in July and if the contaminant levels do not decrease, remedial action will be necessary. (JK/KG) 06/22/09: A letter was sent to Zordas approving Holzmacher's recommendation to collect an additional round of groundwater samples and submit a summary report with recommendations for further action. The summary report is due 8/28/09. (JK/KG) 06/24/09: Left a message for Jim DeMartinis requesting geologic logs for wells. He sent an email stating that he has contacted the driller and will forward the information when he receives it. (JK/KG) 09/01/09: Rec'd groundwater monitoring report from Holzmacher. A round of groundwater samples was collected on August 24, 2009. VOC concentrations have decreased since last sampling event. Holzmacher recommended collecting an additional round of groundwater samples in October 2009. MW-1R: MTBE - 13 ug/L MW-2: MTBE - 110 ug/L, Benzene - 83 ug/L, BTEX - 86.7 ug/L; several other VOCs were detected but below regulatory standards MW-3: MTBE - 14 ug/L MW-4: MTBE - 13 ug/L MW-5: All VOCs ND A letter was sent to Zordas approving the recommendation to sample the wells in October. A summary report with conclusions and recommendations is due 11/30/09. If VOC concentrations decline and are consistent with the August sampling event, this site should be considered for closure.(JK/KG) 11/03/2009: This spill case was transferred to A. Doronova. - AD 12/09/2009: Received an e-mail from P. Zalak of J.R. Holznacher saying: Good morning Ms. Doronova, Mr. Kolleeny just informed us that you will be taking over the above referenced site. Attached please find the Quarterly Monitoring Well Sampling Report for the above mentioned site. A hard copy is being sent to you via FedEx. Please do not hesitate to give Jim DeMartinis a call with any questions. Regards, Patty Patricia L. Zalak Office Manager J.R. Holzmacher P.E., LLC 300 Wheeler-Suite 402 Hauppauge, New York 11788 631-234-2220 Ex 100 631-234-2221 (Fax) patty@holzmacher.com AD 12/18/2009: Reviewed

the groundwater monitoring report. Groundwater samples was collected on December 1, 2009. VOC concentrations have decreased since last sampling event. J. R. Holzmacher recommends collection of an additional groundwater samples in March 2010. MW-1R: MTBE - 13 ug/L; MW-2: MTBE - 1.2 ug/L, Benzene - 3.9 ug/L, BTEX - 14.9 ug/L; MW-3: MTBE - 1.4 ug/L, Benzene - 2.6 ug/L; MW-4: MTBE - 14 ug/L; MW-5: MTBE - 1.6 ug/L. Next GW monitoring report is due April 2010. AD 03/15/2010: Received an e-mail from P. Zalak of JRH saying: Good afternoon Ms. Doronova, Attached please find the latest groundwater sampling results for the above mentioned site. Hard copies will be sent to you via FedEx. Please do not hesitate to give Jim DeMartinis a call with any questions. Regards, Patty Patricia L. Zalak Office Manager J.R. Holzmacher P.E., LLC 300 Wheeler-Suite 402 Hauppauge, New York 11788 631-234-2220 Ex 100 631-234-2221 (Fax) patty@holzmacher.com DL the pdf copy to eDocs. AD 03/17/2010: Received a hard copy of the report. Will review. AD 04/28/2010: Reviewed the groundwater monitoring report for the 1st quarter of 2010. Groundwater samples was collected on March 3, 2010. TVOC concentrations have decreased since last sampling event. J. R. Holzmacher recommends one more round of collection of groundwater samples in May 2010 before request of the spill case closure. MW-1R: MTBE - from 13 to 2.2ug/L; MW-2: MTBE - 1.6 ug/L, Benzene - 3.6 ug/L, BTEX - from 14.9 to 82.4ug/L MW-3: MTBE - ND ug/L, Benzene - 1.7 ug/L; BTEX - 37.1ug/L MW-4: MTBE - from 14 to 8.5ug/L; BTEX - 53.9ug/L MW-5: MTBE - 3.5 ug/L; BTEX - 47.7ug/L Next GW monitoring report is due June 2010. AD 11/03/2010: Received an e-mail from JRH saying: Good afternoon Ms. Doronova, Attached is the latest submittal for the above mentioned site. A hard copy is being sent to you via FedEx. Please do not hesitate to give Jim DeMartinis a call with any questions. Regards, Patty Patricia L. Zalak Office Manager J.R. Holzmacher P.E., LLC 300 Wheeler-Suite 402 Hauppauge, New York 11788 631-234-2220 Ex 100 631-234-2221 (Fax) patty@holzmacher.com DL the report to eDocs. AD 11/05/2010: Received a hard copy of the report. Will review. AD 12/17/2010: Reviewed the groundwater monitoring report for the 2nd quarter of 2010. Groundwater samples was collected on October 14, 2010. TVOC concentrations have decreased since last sampling event. TBTEX concentrations ranged from 3.28ppb in well MW-2 to 0.63ppb in well MW-3. J. R. Holzmacher recommends spill case closure. To wait one more round to see if the VOCs and MTBE will rebound in these wells. AD 01/19/2011; Received an e-mail from JRH saying: Hi Ainura, Attached please find the latest quarterly groundwater monitoring report for the above referenced spill. Based on the data over the past five quarters, we respectfully ask you to close the spill file. The paper copy is in the mail. Please feel free to call if you have any questions or need anything else. Thanks, Jim DeMartinis Senior Hydrogeologist J.R. Holzmacher P.E. LLC 300 Wheeler Road-Suite 402 Hauppauge, New York 11788 631-234-2220 Ex 102 516-983-6987 (Cell) 631-234-2221 (Fax) jimd@holzmacher.com DL the report to eDocs. AD 02/25/2011: Reviewed the groundwater monitoring report for the 1st quarter of 2011. Groundwater samples was collected on January 11, 2011. There were no exceedances of NYS standards in all five wells. Based on the data, J. R. Holzmacher recommends spill case closure. Will discuss this request with K. Kolleeny of DEC. AD 03/02/2011: Discussed the spill closure with J. Kolleeny. Will issue an approval letter. AD 03/07/2011: Sent the closure approval letter via e-mail to Ms. Joan Samaroo of MNC Realty Inc. Contact info is: MNC Realty Inc. 199-07 32nd Avenue Flushing, NY 11358 Tel:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"10/05/16-Hiralkumar Patel. 4:11 PM:- spoke with Misha. she complained about chemical odors in her apartment since yesterday and claimed headache. she is worried about health of her two small children (10 month old and 3 year old). her apartment is on first floor. due to odor complaint and possible health impact, asked DEC Zhune to inspect the site. spoke with Agnes (917-609-1072), building super and Bobby (646-552-7777), building landlord. informed them about odor complaint from building occupant and inspection scheduled by DEC. asked them to arrange for site access. after consulting with DEC Austin, called DEP Hazmat and reported odor issues at the building (case #: 186233285). DEP Hazmat will respond. 6:30 PM:- received call from DEC Zhune confirming presence of odors in the building. she has instructed property owner to ventilate the area. Victor from DEP Hazmat also confirmed presence of odors in building. based on available information, spoke with Elena Ferloni at DEP Hazmat and requested help from NYC DOH. she will send request to DOH. later on, DEC Veronica confirmed better conditions in living space of the apartment. 8:46 PM:- received call from NYC DOH Grant inquiring about the site. informed him that based on updates from DEC inspector, DOH response is not needed. 10/06/16-Hiralkumar Patel. alternate address: none no other spills found. PBS #: 2-154849. as per PBS record, the site has one (1) 4,000 gal #2 oil AST in contact with soil, in-service, installed in Jan. 1931. 22-61 42nd Street LLC. \*\*property owner\*\* 646-552-7777 Bobby Owner case assigned to DEC Zhune. 10/5/16- Zhune responded to this site. Ms. Misha Mika who resides in the apartment # A7 above the boiler complained odors. She also complained headache and she was very worried about the health of her two kids. I inspected the basement and her apartment. I noticed slight olfactory odors in some areas of her apartment (entrance and the kitchen). DEP hazmat Victor also responded. He took PID readings from basement and her apartment and the readings were 0.7 in her apartment and 0.5 in the basement. I instructed to the owner to increase the ventilation units in the basement and in Ms. Misha's apartment. 10/6/16-Zhune called Misha Mika. She said after they installed the ventilation system odors are fine. No odors inside the apartment. 10/13/16-Christ D' called to say that Ms. Misha called the Department of Health to complaint still petroleum smell in her apartment. Christ said that the Department of health inspected the site Friday 10/7/16. They inspected the basement and did not note olfactory odors in the basement. They did not inspected Ms. Misha apartment. 10/13/16-Zhune sent the following email to Christ I inspected the site yesterday afternoon. During my inspection, I noticed petroleum odors in the basement and odors at the entrance of the apartment of Ms. Misha. She resides in apartment #A7 just above the tank and the boiler room. I also found out that the owner hired ABC tank to do the cleanup. Yesterday, ABC pumped the oil from the tank into two 274-gallons temporary tanks. They cleaned the tank. They removed the speedi-dry saturated with oil from around the tank. It was probably the source of the vapors. Apparently the oil tank had a crack and was leaking. ABC will test the tank today. They will lift the tank and clean the spill under the tank. They will do the repairs to the tank. Ms. Misha is concerned about the odors in her apartment. She is also concerned about her health and her two kids health. She wants the Health Department to come to her apartment and confirm that she is safe in her apartment. This morning, I spoke to Allan Firedman and explained the situation in Ms. Misha s apartment. Allan will contact Ms. Misha and set up an appointment to inspect her apartment.

Contact Name:  
DEC Memo:

HOWARD KALAN  
"9/29/03 - AUSTIN - ALSO, SEE #S 9008772 AND 9512418, WHICH WERE CLOSED AND REF. TO THIS SPILL REPORT - END 1/8/04 Reassigned from Sigona to Foley. (KMF) 06/20/06: Re-assigned from Foley to Yau. (Yau) 06/23/06: Prepared and sent an old spill/ request for tank closure report letter to property owner. A site investigation report (SIR) is expected to be due on 07/23/06. (Yau) 06/30/06: Spoke to Ali, owner of property, at (718)932-8133. He stated that the site was properly cleaned up. He'll call the company for the report and submit it to us. (Yau) 08/08/06: Owner never submitted anything to DEC. Sent a second letter to owner through certified mail. SIR due 08/22/06. If nothing is received by 08/22/06, DEC will initiate a formal enforcement. (Yau) 08/10/06: Owner walked into DEC and submitted a copy of the lab analytical results and waste disposal manifest. The lab analytical results were for metals only. (Yau) 08/15/06: Sent a letter to owner requiring submission of a tank closure and site assessment investigation results by 09/29/06. If nothing is received by 09/29/06, DEC will refer to legal for enforcement. (Yau) 10/16/06 Re-assigned from Yau to Chanda (Chanda) 10/24/06 Reassign from Chanda to Tang as part of MTBE Pilot Project. (Sun) 1/22/07: Transferred from Tang to Sun under MTBE Pilot. (JS/MS) 1/26/07: Review file - Summary below: Ditmars Service Station - 46-06 Ditmars Blvd, Queens October 31, 2000: Alvin Petroleum Systems perform tank removal activities: -Six (6) 550-gallon gasoline USTs removed. -One (1) 550-gallon waste-oil UST removed. -Approx. 30 tons of contaminated soil was removed. -No endpoint samples taken, no tank closure report submitted. October 16, 2006: Environmental Management Solutions, Inc. conducts TCR and Limited Site Assessment at request of property owner. Currently at site: -Two (2) 4,000-gallon gasoline USTs. -One (1) 2,500-gallon diesel UST. -One (1) 550-gallon heating oil UST. -Two (2) Pump Islands. Summary of Tank Closure and Limited Site Assessment Report: -Installation of eight (8) environmental test borings. -Nine (9) soil samples and two (2) groundwater samples collected. -Soil samples SB-3A(19'-20) and SB-3B(31'-32') had multiple VOC compounds above RSCO. -GW-3 and GW-6 grossly exceeded VOC GWQS, and exceeded one SVOC: Total BTEXMTBE Napthalene GW-339,000ug/L14,000ug/L540ug/kg GW-611,460ug/L41,000ug/L560ug/kg Due to exceedences and confirmation of groundwater impact this site is categorized as a P1 site. On 1/26/07 Sun/Sellberg sent the property owner at 46-06 Ditmars Blvd, a Stipulation Agreement and Corrective Action Plan, to be signed and returned by 2/16/2007. (JS/MS) 2/7/07: Received signed STIP from RP, will send to division head to execute. (JS/MS) 2/12/07: STIP execution date is 2/8/07. (JS/MS) 6/29/07: Due to adverse site conditions, field activities have taken longer than anticipated. As per Patty Badding, an electric line was hit during the latest event and until that has been resolved, the next sampling event has been put on hold. (JS/MS) 10/02/07: MS spoke to Patty Badding regarding site status. An air rotary rig was used on-site and 2 wells were successfully installed. Paddy has retained Fenley and Nicol to perform the remaining work as conflict between the previous consultant and the RP cannot be resolved. She met Anthony Sigona onsite yesterday and he will submit a work plan. (JS/MS) 11/26/07: MS left message for Patty Badding. (JS/MS) 1/8/07: Emailed PB for update. (JS/MS) 4/4/08: Email for an update; F&N installed bedrock wells onsite. Suppose to sample, but no report or results. (JS/MM) 5/8/08: Email for report. (JS/MM) 7/10/08: Received ISR more than one year late. Under review; discuss soil gas vapor sampling (JS/MM)

08/05/08: Transferred to Kolleeny/Mandac. - JK 9/25/08: Received SIWP; need additional wells for on-site delineation (JK/MM) 10/06/08: Received revised SIWP. Approved. SSIR due 11/21/08(JK/MM) 12/09/08: Emailed Patty Badding for SSIR. (JK/KG) 12/15/08: KG spoke with Patty Badding regarding status of past due SSIR. 6 proposed wells have not been installed due to drilling company owing money. Patty stated she will call the new driller today for their proposal and then send a request for an extension for the SSIR. (KG/JK) 01/26/09: Rec'd email from P. Badding on 01/23/09: I have spoken to owner of 46-06 Ditmars Blvd. concerning install'n of more wells. Do you have updated map that includes 2 add'l wells Michael Mandac added to Work Plan? I also wanted to ask you if you feel 2 add'l on-site wells are necessary. I am waiting on proposal from drilling company and date. I should have information by Monday. Thank you for your patience with this site - wells have to be installed with mud rotory or air rotory due to bolders - expensive - and owner still owes me alot of money. Thanks again. On 1/26/09 I emailed Patty the map with the proposed well locations and left her a voice message to have her call me to discuss the well locations. Upon review of the map, it appears that the north arrow is reversed and the groundwater flow has also been reversed. Need to discuss this with Patty to ensure GW flow is accurate. Spoke to Patty. She will review map for accuracy. I told her it would be best to resample the wells prior to installing new wells to see the current VOC concentrations. The proposed well between MW-2 and MW-3 is not necessary at this time, but if analytical results show otherwise, a well should be installed there. She said she visited the site recently but couldn't locate the wells due to snow. She planned on visiting the site this week, but asked if it was okay to go next week since more snow is anticipated for the next couple of days. I told her that was okay. (JK/KG) 03/04/09: Called and left message for P. Badding regarding site update. Rec'd call from Patty. She sampled the wells and will send me the data today. Will need to review the data and proposed well locations. (JK/KG) 03/09/09: Rec'd GW analytical results from 02/10/09 sampling event. VOCs exceed standards in all wells. MW-2, 3, and 4 had increases in concentrations and MW-5, 6, 7 had decreases. Note that laboratory detection limits for MW-2, 3, 5, 6, and 7 are above standards. MW-2: BTEX - 27,100 ug/L, MTBE - 4,200 ug/L MW-3: BTEX - 27,900 ug/L, MTBE - less than 500 ug/L MW-4: BTEX - 179 ug/L, MTBE - 13 ug/L MW-5: BTEX - 1,400 ug/L, MTBE - 60 ug/L MW-6: BTEX - 9,500 ug/L, MTBE - 3,400 ug/L MW-7: BTEX - ND ug/L, MTBE 320 ug/L (benzene less than 10, toluene less than 50, ethylbenzene less than 50, Xylenes less than 50) Need GW contour map. Spoke to Patty and asked her to send me an updated site plan with current GW contours and flow direction. She faxed me a copy of the map from the July 2008 report. I told her I needed the map to have the groundwater elevations and contours from the February 2009 sampling event. I reminded her that the depicted flow direction appeared to be in the wrong direction in the July 2008 report. She said she would update the map and send it to me by the end of the day. (JK/KG) 03/19/09: Have not received groundwater elevation map. Sent Patty following email: Hi Patty, Per our conversation last week pertaining to the above-referenced site, please send me the site location map with the most recent groundwater flow direction and contours (i.e. February 2009 sampling event). The location of proposed monitoring wells may change based on the direction of the groundwater flow. This map is necessary in order to approve the previously submitted work plan. Patty called and stated

**S102238659**

she would send the map later today. (JK/KG) 03/23/09: Rec'd groundwater contour map. North arrow and groundwater flow direction still appear to be reversed. Groundwater flow is to the northeast. Depth of well and depth to water on February 10, 2009 in table submitted with revised GW contour map are different than values previously submitted for same date. Need to talk to Patty and send RP letter. (JK/KG) 03/30/09: Letter sent to Mr. Kalan re-approving revised work plan submitted on Oct. 2, 2008 with one modification. Soil must be sampled continuously during well installation and the deepest dry soil sample and the sample with the highest PID reading (if detected) should be submitted for laboratory analysis. The proposed work includes installation of 6 monitoring wells, collection of groundwater samples from all wells, a groundwater elevation survey, and submission of a summary report to NYSDEC. The new deadline for the investigation summary report is 5/29/09. (JK/KG) 05/19/09: Spoke to Patty Badding. Wells have not been installed yet. The driller visited the site last week to see if the location of off-site wells would be feasible due to overhead and underground utilities. Patty is supposed to meet the driller at the site this week to discuss the proposed locations. (JK/KG) 06/30/09: Rec'd an email from Patty stating wells are scheduled to be installed 7/2 and 7/3. Placement of one well will need to be moved due to overhead utilities. (JK/KG) 07/30/09: Rec'd a call from Patty on 7/29. She said she was having difficulty getting water marked out and wells have still not been installed. (JK/KG) 09/23/09: Left a message for Patty regarding well installations. (JK/KG) 09/24/09: Spoke to Patty, she said drillers were in process of obtaining permits to install wells off-site and work should be initiated soon. (JK/KG) 09/30/09: Rec'd an email from Patty: Drillers are getting sidewalk permits for well installations. They expect to begin work mid next week. I will forward date early next week. Follow-up with Patty and RP to ensure wells are installed and a summary rpt is prepared and submitted. (JK/KG) 10/15/09: On 10/14/09 received email from Patty Badding, consultant: Driller applied for sidewalk permit at DOT which was denied. I've attached application along with driller's cover page [in eDocs]. This is a new one on me. I sent email with sidewalk permit letter attached: I've attached DEC Sidewalk Permit Request letter which you can have your driller present to DOT. I think this should help. Let me know if my description of no. and locs of proposed wells is accurate - I took it from Oct. 2, '08 investig work plan you submitted to Michael Mandac; I don't seem to have a more recent work plan. However, diagram on your driller's DOT application, which you emailed to me, seems to show only 2 or 3 (?) proposed wells. Please reference spill number 0008889 for this project on all future correspondence, and if you have an email address for Responsible Party (your client), please send it to me, and copy RP on correspondence like this. On 10/15/09, received email from Patty: I have emailed your letter to driller - they asked to have original sent to them, apparently things have gotten difficult with DOT. There were 3 wells initially proposed across Ditmars from site in Work Plan but when I met at site with driller, well closest to NE corner of Ditmars & 46th (across from MW-5) had tree and telephone pole obstructions so he spread other two out a bit more, getting as close as possible to corner. There is also a well on corner across 46th Street from site. I don't have an email address for RP but I'll see if I can get one. I mailed sidewalk request letter (in eDocs) to D.K. Drillers of N.Y., cc to Patty. - JK 11/03/09: Received email from

**S102238659**

Patty Badding, consultant: Good Morning Jon - I got a drill date to complete required groundwater monitoring wells at 46-06 Ditmars Blvd. for tomorrow November 4th. Thank you. - J. Kolleeny 11/3/09 Spill case transferred from J. Kolleeny to J.A. Maisonave. - JAM 1/12/10 A complaint of gasoline odors was received by DEC from a neighboring property. Spill no. 0910967 was opened, however, DEC Spills responded to complaint and could not confirm any gasoline odors. Contacted Patty Badding informing her of complaint and to discuss newly installed monitoring wells. Total of 6 wells were installed on- and off-site. Lab results for soil samples showed contamination in one well (MW-11) in t30-32 ft depth interval. Sent email to Ms. Badding: When will wells will be surveyed and sampled and when should I expect an investigation summary rpt? Rpt should include updated site map with GW flow direction, soil and GW sampling data, and recommendations for future work. Also, GW monitoring should continue on quarterly schedule. Please note that a Stipulation Agreement was executed on Feb. 8, 2007. Schedule set forth in Corrective Action Plan should be followed from this point forward. Ms. Badding's response: I plan to sample and survey monitoring wells this Thursday. It normally takes 3 weeks for hard copy of results (2 weeks by email). I expect to get summary rpt to you no later than Feb 21st. - JAM 01/13/11: This spill case transferred from J. Maisonave to J. Kolleeny. Sent email to Patty Badding (consultant) requesting update on status of site. - JK 02/14/11: On 2/1/11, received CD from Patty Badding of Env'tl Mgmt Solutions, with pdf file of Subsurface Investigation Rpt dated April 6, 2010 (in eDocs; rpt cover page gives date as 4/6/09, but year is a typo according to Patty). Rpt summarizes install'n of addtl wells MW-8 thru MW-13, on- and off-site. No significant soil contam found, but significant GW contam in wells MW-9 & MW-11 (existing wells MW-3, MW-5 and MW-6 also have significant GW contam). On 2/14/11, Ryan Piper of DEC spills informed me that occupant of nearby residence at 21-65 46th St (~300 ft down-gradient of site) has again noticed gasoline odors coming through sewer trap (see sp 0910967). I contacted Patty Badding to let her know, and confirm name/address of RP. I sent letter (in eDocs) to RP Haviv Kalan, cc to Patty Badding, requesting 2 addtl off-site monitoring wells for delineation of GW, and development of RAP. - J. Kolleeny 04/22/11: On 3/13/11, received email with pdf file of Site Investigation Work Plan from Patty Badding of Env'tl Mgmt Solutions; after looking over plan, I sent email on 3/25/11: Work plan you sent mentions an attached site plan, Figure 1, but no figure is there. Can you please revise work plan to include Site Location Map (on USGS quad) and site plan showing existing and proposed well locations? If you could show most recent GW data for existing wells on diagram, that would be big plus. On 4/12/11, received email from Patty Badding with attached pdf file of site investigation work plan (in eDocs), with site location fig and GW data fig as requested, showing proposed locations for 2 new off-site wells as I had requested in 2/14/11 letter (one to west of existing well MW-9 in sidewalk on south side of Ditmars Blvd, and one across 46th St from existing well MW-8, in sidewalk at northwest corner of Ditmars Blvd and 46th St. Plan states that soil sampling will be performed during well install'n, and following install'n, GW samples will be collected from new and existing on- and off-site wells. Upon receipt and evaluation of soil & GW data, EMS will prepare and submit Site Investig Rpt summarizing findings and any need for further investigation or delineation. I sent letter (in eDocs) to Mr. Haviv Kalan, cc to Patty Badding of EMS, approving work

plan but stating that based on results, RAP should be submitted. - JK 07/22/11: Received email from Patty Badding of Env'tl Mgmt Solutions: Good morning Jon, I'm delivering samples from 46-06 Ditmars Blvd to lab today. Normal turnaround is ten working days so I anticipate rpt to be ready middle of 2nd week of August. Is that ok or should I have samples expedited? I sent reply: Hi Patty, 2nd week of August is ok for sending rpt, but as I think I stated earlier, rpt must include remedial strategy proposal to address on- and off-site conditions (soil & GW contamination). Once we settle on remedial strategy, a more detailed RAP will need to be prepared and when approved, implemented. - J. Kolleeny 10/20/11: Received email from Patty Badding of Env'tl Mgmt Solutions saying she would not be able to attend meeting scheduled for today to discuss remedial approach for site, but with attached data tables for recent soil and GW sampling (in eDocs document folder as brief ) and attached site water table contour map and site plans with Aug. 2011 and Sept. 2011 GW data (in eDocs image folder). Soil data for new delineation wells MW-14 & MW-15 and replacement wells MW-1 & MW-2 showed significant soil impacts in MW-1 from 30-32 ft bgs, and GW data showed significant GW impacts in MW-1, MW-2, MW-3, MW-5, MW-6 and MW-11. Met with Nicholas Recchia of EEA Inc. and Michael McEachern of MC Env'tl, LLC, discussed possibility of using AS/SVE as remedial approach. It was agreed that a work plan for an AS/SVE pilot test would be submitted to DEC by 11/20/11. - J. Kolleeny 10/27/11: Received Subsurface Investigation Rpt dated October 2011 by Env'tl Mgmt Solutions, Inc. (in eDocs). Rpt summarizes install'n of 4 add'l wells as requested by DEC; wells MW-14 and MW-15 (off-site) were installed in May 2011, and wells MW-1 (at former soil boring location near active USTs) and MW-2 (replacement for MW-2 often found dry) were installed in August 2011. Results of soil & GW sampling were reviewed and discussed in 10/20/11 entry, above. Awaiting AS/SVE pilot test work plan as discussed at 10/20/11 meeting. - J. Kolleeny 11/23/11: On 11/14/11, received email from Nicholas Recchia of EEA, Inc. with attached pdf file of Pilot Study Work Plan. Plan proposes pilot test of AS/SVE, with install'n of 1 AS well and 1 SVE well for performance of test, plus pre-test soil vapor monitoring points for evaluating baseline BTEX vapors between impacted area and down-gradient receptors. I reviewed plan and on 11/23/11 sent email to Mr. Recchia: I've looked over work plan and it looks good. I have question/comment: As I read it, plan says that during SVE-only portion of pilot test, recovered soil vapors will be screened with PID (not sent for lab analysis), and that once air sparging portion is added, at that point recovered vapors will be sampled for lab analysis. I think it would be a good idea to also take a sample of recovered vapors during SVE portion of pilot test and send for lab analysis, for better comparison of effectiveness of SVE alone versus SVE plus air sparging. Please let me know what you think. If you agree, would you prefer to add this to work plan and send a revised pdf of plan, or just have me add this request to my work plan approval letter? Mr. Recchia sent email reply: Thanks for quick review. I think that having soil vapor samples analyzed at lab would be no problem to incorporate into work plan. I will confirm and revise work plan. - J. Kolleeny 01/06/11: Reviewed revised AS/SVE Pilot Test Work Plan by EEA, Inc. (in eDocs). Plan proposes AS/SVE pilot test to evaluate feasibility of using this technology to address on- and off-site petroleum-related contamination. Pilot test will involve install'n of on- and off-site soil vapor monitoring points, an SVE test well and AS wells. A

**S102238659**

trailer or skid-mounted vacuum blower and air compressor system will be installed with piping, wiring, discharge air handling and possibly air emissions controls, if required (based on elevated PID readings or strong gasoline odors). Soil vapor samples and pre-and post-test GW samples will be collected to evaluate contaminant recovery and impact of air sparging on GW quality, and soil vapor and vacuum distribution data will be collected and analyzed to determine design parameters for an AS/SVE system, such as vacuum ROI. After test has been completed, results will be evaluated and summary rpt will be prepared with conclusions & recommendations regarding operation of full-scale AS/SVE system at site. Work plan includes a Health and Safety Plan. I sent approval letter (in eDocs) by mail to Mr. Haviv Kalan (RP), and by email to Nicholas Recchia and Mike McEachern of EEA. Asked Nick R. to forward by email to Mr. Kalan if he has an email address for him, and to copy me. Nick did so; RP email address is: jeerserv@aol.com. - JK 06/20/12: Received email from Nicholas Recchia of GEI Consultants, Inc. (formerly EEA, Inc.): Mr. Kolleeny, I wanted to give you an update on progress regarding AS/SVE Pilot study we are performing. On June 13th we performed a one-day vacuum test, performed pressure readings & collected vapor samples as per work plan. Generally test was successful. Formation has air transitivity and we recovered VOCs in produced air flow. Our engineers will be reviewing data and will prepare rpt which I will forward to you when completed. I anticipate this to be finished by June 30th. If you have any questions please contact me. - JK 10/11/12: Received email from Nicholas Recchia of GEI Consultants: Jon, Hope all is well. I want to let you know we are finalizing pilot study rpt and will be forwarding you results next week. Site looks promising for an SVE/AS system to be installed. We can go over details after you review rpt. - J. Kolleeny 10/18/12: Received email from Nicholas Recchia of GEI Consultants with attached pdf file of AS/SVE pilot test rpt dated 10/18/12. After prelim review, I emailed Mr. Recchia: Nicholas, Thanks for sending pilot test rpt. I took a quick look at rpt and noticed that it says GW flow direction is unknown. Didn't earlier rpts by previous consultant (Env'tl Management Solutions) indicate a GW flow direction? If not, or if you don't feel it was reliable, couldn't GEI Consultants have determined GW flow direction based on up-to-date well gauging measurements? Do you have top of casing elevations for wells? (They may be in earlier EMS rpts; if not, wells will need to be surveyed.) Mr. Recchia sent reply: Jon, Let me see what we have and I will amend rpt with previous data from EMS and mail you a disk and copy. - JK 12/11/12: Reviewed Air Sparging/Soil Vapor Extraction (AS/SVE) Pilot Test Rpt by GEI Consultants, dated 12/5/12 (revised, originally dated 10/18/12), received 12/10/12 (in eDocs). Rpt summarizes AS/SVE pilot test performed at site in June 2012 to evaluate use of this technology to address on- and off-site petroleum-related contamination. Based on pilot test results, GEI concludes that AS/SVE is likely to be an effective remedial technology for site, and they recommend install'n of an AS/SVE system. GEI also states that complete details of recommended AS/SVE system will be presented in a remedial design rpt. I sent approval letter (in eDocs) by mail to Mr. Haviv Kalan (RP), and by email to Nicholas Recchia and Brandon Nathe of GEI, requesting that RAP be prepared & submitted to DEC by Feb. 15, 2013 for review & approval and requiring that RAP incorporate above-mentioned remedial design rpt with all details of proposed remedial system, plus completed SVE Data Sheets; operation,

S102238659

maintenance and monitoring plan; and implementation schedule. - J. Kolleeny 12/13/12: Received email from Nicholas Recchia of GEI, responding to my Pilot Test approval letter: Jon, Thanks for your quick response. Mr. Kalan s email is jeerserv@aol.com. Our engineers will be putting together a cost estimate and proposal for RAP and install'n/O&M for AS/SVE system for Mr. Kalan s approval. As soon as he approves, we can begin work. I understand we have a deadline of February 15, 2013. - J. Kolleeny 12/26/12: On 12/22/12, received email from Patty Badding of Env'tl Mgmt Solutions, Inc. with attached lab data for Dec. 2012 GW sampling event and table with historical GW data (including Dec. 2012 data). Uploaded data and table to eDocs. Data show worst GW contam in wells MW-1, MW-2, MW-6 and MW-11; however, no data for MW-3 (historically worst well) for Dec. 2012. Sent email to Patty, cc to Nicholas Recchia of GEI Consultants: Patty, I hope you had a nice holiday. Thanks for sending recent and historical GW data. I noticed that well MW-3 was not sampled during December 2012 sampling event. Well MW-3 has historically been most contaminated well at site. Can you let me know why well wasn't sampled? Thanks, and have a Happy New Year! Patty sent reply: MW-3 was dry (I noted that on table). It was never much of a producer. I'll forward monitoring data soon. Happy New Year to you too!! - J. Kolleeny 02/04/13: On 2/1/13, received email from Nicholas Recchia of GEI: Jon, Hope all is well. I wanted to give you an update regarding status of RAP. We just received Mr. Kalan s approval to complete RAP and design drawings. I understand deadline is Feb 15th according to your letter dated Dec 11th. Due to our current work load would it be possible for us to request a two-week extension and have submittal to you by (March 1st, 2013)? On 2/4/13, I sent email reply, with cc to Mr. Haviv Kalan (RP): Hi Nicholas, Yes, your request to extend deadline for submission of RAP until March 1, 2013 is approved. Please let me know if there will be any further delays. - J. Kolleeny 04/18/13: Reviewed RAP AS/SVE Design rpt by GEI Consultants, dated March 2013 (submitted via email on 3/14/13, in eDocs). Contacted Brandon Nathe of GEI, requested revisions including addition of completed SVE Data Sheets, Table summarizing OM&M requirements for system, and suggesting reconsideration of depth of SVE wells and length of screen. - J. Kolleeny 07/15/13: On 6/24/13, received email from Nicholas Recchia of GEI with revised RAP for AS/SVE system. After review, contacted Mr. Recchia on 7/15/13 to request add'l changes, then sent follow-up email summarizing requested changes for him to forward to his technical staff: Nicholas, As we discussed, I have comments on revised RAP sent on 6/24/13. RAP O&M plan states SVE effluent will be checked with PID before carbon, between carbon vessels, and after carbon, but says that only pre-filtered sample will be submitted for lab analysis (for VOCs/MTBE by EPA method TO-15). A sample of treated effluent must also be collected/analyzed at lab for benzene to confirm compliance with discharge limit cited in SVE Data Sheets. RAP O&M plan should be amended to state that samples of treated effluent will be collected for lab analysis of benzene (at a minimum), and possibly also other VOCs or TPH to confirm that carbon units are working. Rpt doesn't include an O&M table, which I provided earlier. It's not essential, but table provides quick summary of O&M requirements, and would let me know what sampling will be done during 30-day startup period. I usually require that vapor influent & effluent samples be collected for lab analysis after one week of system op and at end of 30-day startup period. I also would like to receive system startup rpt summarizing

**S102238659**

30-day startup period, in addition to quarterly mon rpts. This can also be indicated in O&M table if used, and should be stated in RAP's text. I've attached another copy of generic O&M table in case you decide to include it. If used, table should be made specific to site and proposed remedial system & plan. Also, monitoring wells should be gauged for depth to water (and product, if present) during all sampling events (i.e., baseline & quarterly events), and up-to-date water table contour maps based on these measurements should be prepared and included in qtrly monitoring rpts. RAP text should indicate this, in O&M sections. - JK 07/16/13: Reviewed 7/8/13 lab rpt for GW samples collected 6/20/13 by Patty Badding of EMS (in eDocs). Data show wells MW-1, MW-2, MW-6 and MW-11 remain highly impacted. Sent email to Ms. Badding asking if well MW-1 in lab rpt is same as MW-A in GEI rpts. - J. Kolleeny 08/08/13: Completed review of final revised version of Remedial Action Plan - AS/SVE Design rpt by GEI Consultants, dated August 2013, received via email from Nicholas Recchia of GEI on 8/8/13 (rpt in eDocs). This version addresses all my concerns expressed above. RAP presents detailed remedial plan for install'n of AS/SVE system at site to address petroleum impacts to soil & GW. Proposed system would include 5 AS wells and 8 SVE wells, plus connective piping, a compressor, moisture separator, regenerative blower and various other components. Recovered hydrocarbon vapors will be filtered thru two 2,000-lb GAC vessels prior to discharge to atmosphere via 25-ft tall stack. RAP includes SVE Data Sheets indicating that benzene in system s vapor effluent will comply with DEC's discharge limit, and an OM&M plan. RAP also includes implementation schedule indicating that system install'n will begin within 3 weeks of RAP approval, and system startup is anticipated within 9 weeks of approval. I sent letter (in eDocs) to RP Haviv Kalan, cc to Nick Recchia of GEI, approving RAP with comments: (1) If petroleum odors are reported in any nearby residences or businesses during system operation, system must be immediately shut down & modifications made to fix problem before restarting system; (2) RAP lists number of wells for ongoing quarterly GW monitoring; list is approved, but DEC may request sampling of addtl wells at its discretion; (3) If system is not effective in reducing on- & off-site contam levels, system should be modified as necessary to improve its effectiveness, or a different remedial approach should be proposed. - J. Kolleeny 12/19/13: Received email from Jim DeMartinis of J.R. Holzmacher P.E., LLC: Jon, It is my understanding that a RAP was submitted by GEI in August 2013. I have been asked by owners rep if it is possible that an alternative RAP can be submitted. Please advise. I sent email reply: Jim, This site has high levels of dissolved-phase GW contam, with 3 wells having over 20 ppm total VOCs when last sampled in June 2013. There is also evidence of residual soil contam. DEC has twice received petroleum odor complaints from a private residence located down-gradient of site. Responsible Party signed a Stip Agreement in 2007, and is now out of compliance with target dates in Corrective Action Plan which is part of that Stip. Only conditions under which I might consider an alternate RAP would be (1) if that RAP proposed an aggressive remedial approach that would address subsurface petroleum vapors and GW contam (i.e., install'n of a remedial system), (2) if RAP were submitted to me within next 30 days, and (3) if RAP were to include an aggressive implementation schedule such that RAP would be implemented within 45 days of my approval. (I would reserve right to reject an alternate RAP if in my judgement it is not appropriate for

S102238659

site conditions.) If those conditions cannot be met (or if I reject alternate RAP), RP must move to implement existing approved RAP as soon as possible or face possibility that this case will be handed over to our legal staff to initiate enforcement proceedings for violation of Stip. Please let me know as soon as possible if you intend to submit an alternate RAP that meets conditions set forth above. - JK 01/09/14: Received email from Patty Zalak of J.R. Holmacher with attached pdf file of Alternative RAP (in eDocs). RAP proposes doing VEFR with vac truck on 4 most-contaminated wells at site on weekly basis for 3 months. Prior to VEFR events and within one week of DEC approval of this RAP, all 15 wells associated with this spill will be sampled to establish baseline contam levels. Based on GW data, addt'l wells may be included in VEFR events, which will commence day after GW sampling. After 3 months of weekly VEFR, GW sampling will be done to evaluate effectiveness of VEFR and determine if this approach should be implemented on a continuing basis. RAP states that if GW data show VEFR has not been effective, install'n and operation of AS/SVE system proposed in GEI RAP will be implemented. If data suggest that VEFR has been somewhat effective, but not to point of spill closure, injections of RegenOx"l and/or ORC Advanced"l will be evaluated as GW polishing tool. In that case, injection plan will be submitted to DEC for review/approval. I contacted Jim DeMartinis of Holzmacher and requested supporting documentation for statement in RAP that VEFR using vac truck creates larger ROI than SVE system does and for use of VEFR in addressing sites with large GW plumes with high levels of dissolved contam (as opposed to sites with one or two hot spot wells). - JK 01/23/14: After receiving email from Jim DeMartinis acknowledging that he could not produce supporting documentation specific to my requests, regarding VEFR ROI vs. SVE ROI and applicability of VEFR to sites with large GW contam plumes, I sent letter responding to Holzmacher alternative RAP to RP Haviv Kalan, cc to DeMartinis (in eDocs). Response letter requires performance of VEFR pilot test to demonstrate that VEFR can produce significant vacuum radius of influence and recover substantial quantities of hydrocarbon vapors, and requires submission of VEFR pilot test work plan by Feb. 7, 2014, followed by submission of summary rpt with appropriate recommendations 2 weeks after pilot test is performed. Letter notes that implementation sched in Aug. 2013 GEI RAP has not been met, which is violation of stip, and that if VEFR pilot test work plan (or proof that GEI RAP is being implemented) is not received by 2/7/14, this case will be referred to DEC legal staff for enforcement. - JK 03/05/14: On 2/6/14, received email from Jim DeMartinis of Holzmacher with attached pdf of brief VEFR pilot test work plan. On 3/1/14 (a saturday), DeMartinis sent reminder email, asking if I've had chance to review. On 3/3/14, I reviewed plan, which states that during test, ROI will be determined by measuring water levels in nearby wells to look at upwelling. I sent email to DeMartinis: Jim, I looked over pilot test work plan and it does not involve measuring induced vacuum influence in nearby wells as I had requested in my 1/23/14 letter responding to your alternative RAP, and in my 1/22/14 email to you, in which I stated: Just to be clear, when I talk about testing ROI, I am not talking about measuring water levels in nearby wells to see if there is any draw down (altho you can do this too if you wish), I am talking about measuring vacuum response in nearby wells. This will require use of magnehelic gauges on nearby monitoring wells and on SVE test well installed by GEI, as you apply VEFR to each of four

**46-05 DITMARS BLVD/QUEENS (Continued)**

**S102238659**

highly impacted monitoring wells proposed as targets for VEFR, and to SVE well. So, I am not so interested in seeing measurements of water table upwelling in nearby wells as proposed in current work plan (tho you are certainly free to check that during pilot test). What I want to see are measurements of induced vacuums in inches of water column, using a vacuum/pressure gauge. I believe this is industry standard of how to perform an SVE pilot test. (I don't know how you intended to measure vacuum influence in SVE well installed by prior consultant by looking only at GW upwelling, since that well does not extend to water table.) Please revise pilot test work plan to explicitly state that vacuum influence will be measured with appropriate gauges, and also please add a site plan showing wells mentioned in work plan. You can send revised work plan by email and I'll make sure I review it quickly. Please let me know if you have any questions; feel free to call to discuss further. - JK 03/05/14: Received email from Jim DeMartinis of Holzmacher: Jon, I will revise but VEFR has dual purpose. First is physically remove as much contaminated GW as possible. We are looking at determining if conducting VEFR in monitoring wells will successfully reduce volume of plume. As we VEFR a well, will there be an influence in nearby wells? Or do add'l wells need to be installed so plume cannot escape? I am looking to see water level declines in adjacent wells as we VEFR. Second purpose of VEFR is vapor capture/soil remediation. As far as SVE test I agree - pressure readings need to be taken in SVE pilot test well. Going forward, we may also consider installing add'l SVE wells for remediating unsaturated zone - assuming we know where soil contamination is. I sent response: Jim, Thanks for willingness to revise VEFR pilot test work plan. I agree that in this case, primary purpose of VEFR is to reduce volume of contaminated GW, and to that end it's certainly worth measuring water levels in various wells during test. Reason I am insistent on measuring vacuum response in nearby wells during test is to provide supporting evidence for statement in your alterative RAP that VEFR can generate a greater ROI than SVE (I'd be happy with a comparable ROI), and to demonstrate that VEFR can recover appreciable quantities of hydrocarbon vapors. As you know, I am a strong believer in idea that residual soil contam in unsaturated zone, if left untreated, can act as a secondary source of GW contamination and will work against whatever form of GW remediation is being employed. Also, this site has already had vapor-related issues. In AS/SVE pilot test performed by previous consultant, GEI, an off-gas vapor sample collected and analyzed at lab showed very high levels of hydrocarbons, including 25,536 ug/m3 of benzene, 43,460 ug/m3 of m+p xylenes, 112,950 ug/m3 of toluene, and 191,265 ug/m3 of 2,2,4-trimethylpentane, suggesting there are plenty of hydrocarbon vapors in subsurface to capture. I look forward to receiving revised pilot test plan. - J. Kolleeny 03/10/14: On 3/7/14, received email from Patty Zalak of J.R. Holzmacher with attached pdf file of revised VEFR pilot test work plan, dated 3/7/14 (in eDocs). Plan calls for measuring baseline GW levels in mon wells at site, then hooking up each of 4 highly impacted wells plus on-site SVE well installed by GEI to vac truck (one at a time), applying vacuum pressure for one hour and measuring induced vacuums in nearby wells with magnehelic gauge, then measuring water levels in wells, to determine VEFR radius of influence. Influent vapor samples will be collected from 4 wells & SVE well for lab analysis to evaluate hydrocarbon vapor recovery. Work plan says pilot test will be performed within 7 business days of DEC's approval, and that summary

**S102238659**

rpt with appropriate recommendations will be prepared within 2 weeks of completion of pilot test. I sent letter (in eDocs) to RP Haviv Kalan, cc to Jim DeMartinis of Holzmacher, approving pilot test plan, requiring submission of summary rpt by 4/4/14. - JK 07/17/14: I contacted RP, Haviv ( Howie ) Kalan, asked why I never received pilot test rpt as required by 4/8/14; he said test was done in early April and he thought rpt had been sent to me. He faxed rpt by CDSP (Dan Yarom) summarizing test done 4/1/14. Rpt is brief, indicates test was performed on wells MW-A, MW-2, MW-6, MW-11 and SVE-1, but only provides data for tests on MW-6, MW-11 and SVE-1; results showed water level changes in test well, water level changes and neg pressure readings in nearby mon wells, but no units provided for pressure readings. Also, no samples of recovered vapors were collected. Then I received email from Jim DeMartinis, formerly of J.R. Holzmacher P.E., LLC: Jon, Dan Yarom called me regarding a pilot test rpt he submitted. I remember seeing data awhile ago. Can I call you to discuss? Or do you have an email prepared that indicates deficiencies? I told him I would help anyway I could. As I cycle toward retirement, I have started my own firm. I am using this email address (seacliffenvironmental@aol.com) and my new cell number is 631 742-6948. I replied and asked that he call me; Jim replied that he will call once he receives copy of rpt. - JK 07/18/14: Received email from Jim DeMartinis: Jon, I received pilot test rpt from Dan Yarom last night. If you notice there is an oil level recorded for 4 tested wells. I called Dan and one of his field guys and it is indeed floating product. I know data I had looked at awhile ago for those 4 wells indicated very high dissolved concentrations of gasoline constituents. So maybe I should not be surprised by this. My advice is for CDSP to take another set of readings ASAP and if floating product is confirmed, begin VEFR on a weekly basis. This obviously does not exonerate soil above but we can work out a plan to address that. Let me know what you think. I sent email reply, with cc's to RP & CDSP: Jim, I'm a little confused; was J.R. Holzmacher involved in pilot test at all? Since work plan I approved was prepared by Holzmacher, I assumed they (you) would be performing pilot test and writing up results. Rpt I received has a number of problems. First and most importantly, it seems that no samples were collected of recovered subsurface vapors for lab analysis, which I had required as part of pilot test to evaluate effectiveness of VEFR in treating soil contam. I realize that vapor samples collected from wells with free product would likely have had high VOC levels which would not necessarily indicate that VEFR was pulling those vapors from impacted soil around wells, but at least a vapor sample from SVE well, which does not extend to water table, would have given some data on which to base a decision about use of VEFR as primary remedial approach (as you have proposed). Second, pilot test work plan (and also CDSP rpt on page 3) state that wells to be tested included MW-A and MW-2, but no test data is provided for those wells. Was vacuum applied to those wells? There is no explanation of this in rpt. Third, no units are provided for pressure readings in test results. Since rpt is very bare bones and provides almost no text, there is no description of how testing was performed - were magnehelic gauges used to measure induced vacuums as I had requested? It is common for vacuum/pressure measurements from SVE pilot tests to be reported in inches of water column - these are units used in USEPA's guidance document on evaluating SVE as a remedial approach, and they were units in GEI Consultant's AS/SVE pilot test rpt for this site. Fourth, rpt does

S102238659

not include a site plan showing well locations. Fifth, no waste manifests for recovered GW were provided. I agree with you that since free product has been detected at site, you (or CDSP?) should return to site without delay and check wells again for product - ALL site wells should be gauged to check for product - and if free product is present, weekly VEFR should be implemented as an Interim Remedial Measure. I also require that pilot test rpt be revised to address deficiencies listed above and to explain whether or not actions proposed in pilot test work plan were performed, and if not, to explain why. Rpt text should be expanded to explain, especially recommendation section, and site plan and waste manifests should be included in rpt. Current report does not provide sufficient information for me to determine if VEFR is an appropriate remedial approach for site, as you have proposed in your alternate RAP. I would also like to know why I never received this rpt until I contacted Mr. Kalan yesterday. If no vapor samples were collected during test, when you or CDSP return to site, a vac truck should be hooked up to SVE well and a sample should be collected of untreated recovered vapors, using a Tedlar bag, and submitted for lab analysis of VOCs. Results should be submitted as soon as possible. I want to repeat that this site is a high priority due to fact that there have been several odor complaints from a down-gradient residence and due to high contaminant levels (now including free product) in several wells. I expect requirements above to be implemented without further delay. - J. Kolleeny 07/18/14: I sent follow-up email to Jim DeMartinis, cc's to RP & Dan Yarom: P.S.: Can Mr. Yarom confirm that depth to water and depth to oil measurements are accurate? They seem to indicate that wells MW-2, MW-5, MW-6, MW-7 and MW-11 each had between 4 and 5 FEET of free product at time of pilot test! In addition, these measurements are given as Oil Level and Water Level, but they actually appear to be Depth to Oil and Depth to Water measurements, is that right? Please let me know ASAP. Jim D. sent reply: Jon, I know, it seems crazy, but it has happened before. I asked Dan to send his best guy to measure today. If there are any issues I will do it early next week. Yes I believe that is way he reports DTP and DTW but I have asked to respond directly to your question. Then I sent email to RP: Dear Mr. Kalan: Please see email chain below, with my comments on Pilot VEFR System Inspection rpt you sent me yesterday, including my requirement that rpt be revised and re-submitted. You are Responsible Party for this spill and are under a Stip Agreement, so it is your responsibility to ensure that rpt is revised and re-submitted as required and that necessary actions are performed at site. Revised rpt should explain in detail how pilot test was performed and explain whether or not pilot test work plan I reviewed and approved was adhered to; and if not, why not. I expect you to provide some indication that these actions are being performed by July 25, 2014, or I will refer this case to our Legal Division for enforcement. Feel free to contact me if you have any questions. - J. Kolleeny 07/18/14: I sent email to Jim DeMartinis and Dan Yarom: Dan and/or Jim: Whoever goes to site to check for product should collect a sample of product (assuming product is found) for petroleum fingerprint identification and age dating. I am concerned that appearance of several feet of free product in several wells may indicate a new release at site, and wish to rule out that possibility. Also, leak detection system for active USTs at site should be checked for any indications of a problem with tanks/piping/dispensers. - J. Kolleeny 07/22/14: Received email from

Jim DeMartinis: Jon, Please see attached sent to me by CDSP [attachment was well gauging data table showing 4-5 ft of product in all but one of 6 site wells, exception being well MW-3]. Looks like there is significant product in all wells except one. I asked CDSP to check with client regarding his system tightness. Also I asked CDSP to collect a sample to fingerprint and to begin weekly VEFR. I sent email reply: Jim, This is not all wells, it is 6 wells. In previous email, I asked that you or Dan Yarom check ALL site-related wells (on-site & off-site) to check for product. I've gone back over notes in our database, and over course of 7 years of site investigation, well install'n and sampling, this is first instance I can find in which free product was detected at site. It's kind of mind-boggling that all of a sudden, five wells have 4-5 ft of free product. I have copied Mr. Kalan on this email, but I'm not sure how often he checks his emails. Can you please contact him and let him know that he should be treating this as an emergency situation? I need to know ASAP what status of active tank system is. If he is unresponsive, I will ask someone from our PBS unit to go to site and perform a PBS inspection. Please let me know if you are not really involved in this project enough to be contacting Mr. Kalan, and I will reach out to him myself. Then I sent email to Dan Yarom: Mr. Yarom, Today Jim DeMartinis sent me a well gauging data table provided by CDSP, showing gauging data for 6 wells at this site: MW-A, MW-2, MW-3, MW-4, MW-5 and MW-6. Results showed significant amounts of free product in all wells except MW-3. Is this correct? I checked a site map and I see that well MW-5 is located in sidewalk at corner of Ditmars Blvd and 46th St, and MW-4 is on opposite side of tank pad from wells MW-A, MW-2 and MW-3. Also, why wasn't well MW-11 checked? According to your April 1, 2014 Pilot Test rpt, that well had several feet of free product at time of pilot test. As I mentioned to Jim D., I want all other site-related wells to be gauged to check for product - that includes wells MW-7, MW-8, MW-9, MW-10, MW-12, MW-13 and MW-14. Finally, did you collect a sample of product for petroleum fingerprint identification and age-dating, and did you check with station personnel about status of active tank system and its leak detection system? Please let me know ASAP. Then I received email reply from Jim D.: Jon, I meant all wells monitored. I have never been to site and only have limited portions of GEI pilot test rpt- so I really do not know how many wells there are that are functional. I have asked Dan Yarom to call me ASAP so we can get moving on this. I sent reply to DeMartinis: Jim, I will send you and Dan a site plan showing all wells that have been installed (as per GEI remedial design rpt). I don't know conditions of wells. Thanks for your efforts on this. Then I sent site plan diagram from GEI Aug. 2013 RAP showing all well locations to Jim D. and Dan Yarom. - J. Kolleeny 07/22/14: Received email from Jim DeMartinis: Jon, Apparently Dan's people measured 15 wells-see attached [attached was remaining part of well gauging data table, with data for all site-related wells]. For some reason I got stuck on 1st page when I opened it up and forwarded it to you. Now looking at data for all 15 wells - I am really concerned about measurements (floating product in 14 of 15 wells monitored!!!). I have asked them to use transparent bailers first thing tomorrow morning to see if there really is significant floating product. FYI-I have not been retained by owner (yet) but I am trying to help CDSP out. I sent reply: Jim, I agree it's a little hard to believe that all those wells (even wells across street from site) have more than 4 ft of floating product. Using clear bailers is a

EPA ID Number

46-05 DITMARS BLVD/QUEENS (Continued)

S102238659

good idea, and may also be helpful in judging age of product (if indeed product is found in bailers). Thanks again for helping out with this. Please let me know what they find with bailers tomorrow. - J. Kolleeny 07/23/14: I got phone call from RP, Mr. Haviv Kalan, who said workers had been at site in morning and found no gasoline in any wells. I sent email to Jim DeMartinis & Dan Yarom: Jim and Dan, I received a call today from Mr. Kalan, owner of Jeer service station; he said that someone was at site this morning checking wells and determined there is no product in wells. Can someone contact me and explain this to me? How did CDSP on two separate occasions report presence of 4-5 ft of free product in multiple wells at this site? Please contact me ASAP. I got email reply from Jim D.: Jon, Apparently oil-water interface probe is indicating something. Please see attached [well gauging data table with columns for depths to 1st Beep and 2nd Beep, separated by 4-5 ft, but with comments column noting no product but heavy dissolved contam]. Dan says it looks like darker, heavier water. I had this same situation at a site in Flushing and it was due to high dissolved concentrations and not floating product. Stagnant conditions can prevail in a well that hasn't been purged in awhile and give illusion of floating product. I advised Dan to purge and sample all wells which they did and they delivered samples to lab already. We expect results early next week. Is there any relief on deadline in light of this? Dan did ask me to review and revise pilot test rpt which hopefully I will get to later today. I sent email reply, cc's to RP & Dan Yarom: Jim, Thank you for having Dan sample all wells, that was going to be my next request. As for revising pilot test rpt, what I'd really like is for pilot test to be properly completed, meaning perform test on other two wells that were listed in work plan, MW-A & MW-2 (unless those wells were tested and data just wasn't included in Dan's rpt), and more importantly, collection of untreated vapor samples recovered during VEFR from each monitoring well tested and from SVE well for lab analysis. Can those activities be completed and revised rpt (with all corrections I asked for including waste manifests) be submitted by Aug. 8th? And could rpt include GW sampling results? (If that would hold up submittal of revised rpt, GW data can be submitted separately.) If you and/or Dan are only authorized to revise rpt itself, without doing any add'l fieldwork, I can extend deadline to July 31st. In that case, revised rpt should include explanations of why any activities proposed in pilot test work plan but not performed were omitted from test. Please let me know if you (or Dan) can complete fieldwork and send completed, revised pilot test summary rpt by August 8th. - J. Kolleeny 07/24/14: I received email reply from Jim DeMartinis: Jon, Dan is checking as to whether they did do work that you pointed out is missing from rpt. In any case, I spoke with client and Dan late yesterday and if it was not done - it will be completed. We will submit a revised rpt by August 8 and it will include items you asked for (in your email below). Thanks for your patience. I sent email reply, cc's to RP & Yarom: Jim, Okay, thanks. Please be aware that revised rpt should also address all issues I raised in an email I sent to you and Dan on July 18th, such as expanding rpt's text to describe how pilot test was performed, inclusion of units for pressure measurements in data tables, inclusion of a site plan showing well locations, inclusion of waste manifests for recovered and disposed of GW, etc. Please let me know if you don't have that email, and I will re-send it. - J. Kolleeny 08/04/14: Received email from Jim DeMartinis: Jon, I received GW data

S102238659

from CDSP for sampling they conducted on July 23, 2014. Would you kindly send me data from last sampling round which I believe was done in December 2013? I sent reply: Jim, last GW sampling event was in June 2013; lab rpt is attached. - J. Kolleeny 08/08/14: Received email from Jim DeMartinis with attached pdf file of revised pilot test rpt with GW data (in DecDocs). After reviewing rpt, I sent email to Jim, cc's to RP & Yarom: Jim, Thank you for your timely submission of revised pilot test summary rpt and GW sampling results. I have a few questions/comments about rpt. First, rpt states on Page 4 that CDSP returned to site on August 4th to collect vapor samples; they applied vacuum pressure to SVE well and collected 5 vapor samples, from SVE well and from 4 monitoring wells. How were samples collected from monitoring wells if they only attached vac truck to SVE well? I'm afraid there may be some confusion here. Samples should be of vapors recovered by vac truck, since that is most analogous to operation of an SVE system. Samples should be taken from vac truck intake. I notice that in recommendations section, you state that after performing intense VEFR for 3 months, one week after last VEFR event, GW samples should be collected and also vapor samples should be collected from wells using hand pump and tedlar bags. I believe vapor samples should be collected during final VEFR event, using vac truck. Collecting vapor samples from wells that have been sitting for a week will only show what's been volatilizing from GW in well; I want to see soil vapors pulled from surrounding formation, hence use of vac truck. Did CDSP collect vapor samples from monitoring wells on Aug. 4th using a hand pump? How was vapor sample collected from SVE well to which vacuum pressure was applied? Other comments: - Rpt states on Page 2 that on date of pilot test, well MW-3 was dry and thus could not be used for test. Actually, it could have been used, in same way that well SVE-1 was used - a vacuum could've been applied to MW-3 and induced vacuums measured in nearby wells, and when vacuums were applied to other wells, induced vacuum could've been measured in MW-3. Rresence or absence of GW would have nothing to do with this. - CDSP pilot test rpt is presented as is, as an attachment. I was hoping that their rpt would be revised to correct some of its deficiencies, such as lack of units for induced vacuums. - Measurements of two GW levels by interface probe (two different beeps ) is troubling and makes use of data for determination of GW flow direction problematic; this needs to be resolved. Several different probes should be used to see if this always happens. I've never had this happen at any of my other sites, unless there actually is a floating product layer. - According to rpt text, a total of 179 gals of GW were recovered during pilot test, yet waste disposal manifest lists 650 gals. Please explain. - Pilot test was performed on April 1, 2014, but waste disposal manifest for recovered GW is dated April 7, 2014. Please explain. Please get back to me as you as possible with responses to my questions and comments. Overall, I agree that pilot test was successful and I will approve rpt's recommended course of action in a letter to RP, but I want to receive your responses first, especially regarding collection of vapor samples. Feel free to call and discuss any of these issues. - JK 08/11/14: Received email response from Jim DeMartinis: Jon, Please see below. I reply to each of your comments. Thanks, Jim DeMartinis Seaciff Environmental, Inc. P.O. Box 2085 Miller Place, NY 11764 631 742 6948-cell-best way to reach me this week; 631 828-5994-office [JK Comment] First, rpt states that CDSP returned to site on Aug. 4 to collect vapor samples; they applied vacuum pressure to SVE well and

S102238659

collected 5 vapor samples, from SVE well and from 4 monitoring wells. How were samples collected from monitoring wells if they only attached vac truck to SVE well? I'm afraid there may be some confusion here. Samples should be of vapors recovered by vac truck, since that is most analogous to operation of an SVE system. Samples should be taken from vac truck intake. [Jim D. Response] This is what I wrote in pilot test plan: 'Vacuum will also be applied to SVE-1 for one hour while vacuum response is checked in nearby monitoring wells MW-1, MW-2, MW-6, and MW-11. In addition, samples of subsurface vapors recovered from four monitoring wells and from SVE well during SVE-1 test will be collected, screened with a PID, and submitted for laboratory analysis for gasoline-related compounds (CP-51 list). Going back and reading what I wrote, you are right to interpret it way you did. However, when I wrote it I wanted to see influence vacuuming SVE-1 well would have on monitoring wells-both thru individual pressure readings and individual vapor samples. CDSP established a sampling port on casing for each well so they could insert a Tedlar bag. Data collected are consistent and are representative of what could be detected at vac truck intake. Frankly I have never had good luck sampling a vac truck intake due to extreme pressure, dilution, and limitations of two accepted ways of collecting samples - Summa canisters and Tedlar Bags.' [JK Comment] In recommendations section, you state that after performing intense VEFR for 3 months, GW samples should be collected and also vapor samples should be collected from wells using a hand pump and tedlar bags. Vapor samples should be collected during final VEFR event, using vac truck. Collecting vapor samples from wells that have been sitting for a week will only show what's been volatilizing from GW in well; I want to see soil vapors pulled from surrounding formation, hence use of vac truck. [JD Response] I agree vapor samples should be collected during final VEFR event. Point well-taken. [JK Comment] Did CDSP collect vapor samples from monitoring wells on Aug. 4 using a hand pump? How was vapor sample collected from SVE well to which vacuum pressure was applied? [JD Response] Once again they established a sampling point that could snugly accommodate a small probe and intake for Tedlar bag. Port is closed when not in use. This port will also accommodate a hand-held pump and PID probe. [JK Comment] Rptt states that on date of pilot test, well MW-3 was dry and thus could not be used for test. Actually, it could have been used, in same way well SVE-1 was used - a vacuum could've been applied to MW-3 and induced vacuums measured in nearby wells, and when vacuums were applied to other wells, induced vacuum could've been measured in MW-3. Presence/absence of GW would have nothing to do with this. [JD Response] Point well-taken. In future MW-3 will be vacuumed/used regardless of whether it contains GW or not. [JK Comment] CDSP pilot test rpt is presented as is, as an attachment. I was hoping that their rpt would be revised to correct some of its deficiencies, such as lack of units for induced vacuums. [JD Response] This can be done if you like. I treated it as an attachment containing raw data. Photographs in CDSP rpt of gauges used do show units. [JK Comment] Measurements of 2 GW levels by interface probe (2 different beeps ) is troubling and makes use of data for determination of GW flow direction problematic; this needs to be resolved. Several different probes should be used to see if this always happens. I've never had this happen at any of my other spill sites, unless there actually is a floating product layer. [JD Response] I had only one previous experience with this - at a site in

**S102238659**

Flushing with high dissolved gasoline constituents. We never reported that data to DEC because contractor immediately bought a new probe. New probe did not indicate 2 different beeps. I took their old probe and played around with it and got two different beeps at another site. I called Solinst to ask why and really got no technical explanation other than age of instrument and we should send it back to get it checked out. Dan Yarom has committed to either repairing his probe or obtaining a new one. [JK Comment] According to rpt text, a total of 179 gals of GW were recovered during pilot test, yet waste disposal manifest lists 650 gals. Please explain. [JD Response] He also delivered a load of contaminated water from another site. This is common with contractors from a practical point of view - less trips to facility. Tank is graduated so I am confident as to what came from each well at this site. [JK Comment] Pilot test was performed on April 1, 2014, but waste disposal manifest for recovered GW is dated April 7, 2014. Please explain. [JD Response] Trip to disposal facility was on April 7. All vac truck contractors try to get a near full tank before they go to facility. FYI - worst is when a contractor shows up at a site with a near full tank which severely limits what they can remove. - J. Kolleeny 08/11/14: I sent email reply to Jim DeMartinis re his responses: Jim, Thanks for your responses to my questions and comments. I kind of figured vac truck may have combined recovered water from more than one site, and that would be reason for different number of gals and date of waste manifest. I'm still a little confused about how vapor samples were collected; you're saying that while vac truck was hooked up to SVE-1, CDSP took vapor samples from other wells via sample ports attached to well heads? If there was induced vacuum in those other wells (i.e., air flow moving thru surrounding formation, passing thru well screen and on towards SVE-1), I don't really see how Tedlar bags would've recovered anything from those well heads (although lab rpt clearly indicates that they did recover hydrocarbon vapors from other wells). In future, vapor samples should be collected from each well when vac truck is hooked up to that well and applying vacuum. If it's easier to affix a sample port to well head rather than collecting a sample from vac truck intake, that's fine, I just want sample to be of subsurface vapors pulled from formation by vac truck. (I'm pretty sure this is what GEI Consultants did during their AS/SVE pilot test.) There is no need to go back and revise CDSP rpt at this point, but if I am going to be receiving rpts from them in future, they need to meet a certain standard, and should include data tables with units for any quantitative data reported, site plans showing all pertinent site features, water table contour maps based on accurate depth to water measurements, etc. In any case, I will prepare a letter approving recommendations in your revised pilot test rpt and issue letter in next day or so. - JK 08/12/14: Completed review of VEFR Pilot Test Summary Rpt with new GW data, prepared by Seaciff Env'tl and dated 8/5/14 (in DecDocs). Recent GW sampling data continue to show high levels of contam in on- and off-site mon wells. Rpt concludes that pilot test shows VEFR performed by vac truck successfully generated vacuum ROI comparable to those achieved with traditional SVE systems and also recovered significant hydrocarbon vapors from subsurface. Based on pilot test results, Seaciff recommends addressing soil and GW impacts at site by installing 3 add'l SVE wells and doing twice-weekly VEFR for one month, followed by two months of weekly VEFR. VEFR would focus on wells MW-A (aka MW-1), MW-2, MW-3, MW-6 and MW-11, plus four SVE wells. At end of

**S102238659**

three-month period, vapor samples will be collected from vapor extraction wells at site, and round of GW sampling will be conducted. Upon receipt of data, Seaciff will evaluate effectiveness of intensive VEFR. I sent letter (in Dec Docs) to RP Haviv Kalan, cc's to Jim DeMartinis of Seaciff and Dan Yarom of CDSP, approving these recommendations, but with comments/requirements: " As recommended in Seaciff rpt, VEFR events should begin immediately, and DEC should be provided with VEFR schedule by 8/15/14. Install'n of 3 proposed add'l SVE wells should be completed by no later than 8/29/14; DEC should be notified when fieldwork has been scheduled, and when fieldwork has been completed. " At conclusion of three months of VEFR, vapor samples should be collected during final VEFR event (i.e., not after VEFR has ceased for one week, as stated in rpt). Vapor samples should be collected from monitoring wells targeted by VEFR, as well as from SVE wells as proposed; samples should be collected from each well while vacuum is being applied to that well by vac truck (i.e., not collected from surrounding wells with induced vacuums). " When full round of GW sampling is performed at end of three months of VEFR, depth to water measurements should be taken with a properly functioning oil-water interface probe to obtain data for preparation of an accurate water table contour map, for inclusion in a summary rpt. " After three months of VEFR and round of GW sampling, a summary rpt should be submitted with appropriate recommendation for further actions. As stated in earlier DEC correspondence, if at end of three-month period, DEC determines that VEFR has not been sufficiently effective in addressing on- and off-site petroleum impacts, RP will be required to implement approved August 2013 Remedial Action Plan prepared by GEI Consultants, Inc., by installing and operating an AS/SVE remedial system at site. - J. Kolleeny 01/12/15: Received progress rpt on 3 months of VEFR, by Seaciff Env'tl dated 1/12/15 (in DecDocs), sent via email from Jim DeMartinis of Seaciff. Rpt summarizes three months of VEFR on 5 most impacted wells at site (twice/weekly for 1st month, then weekly), plus results of follow-up GW sampling of wells targeted by VEFR and results of vapor samples from four SVE wells (SVE-1 installed by GEI for their AS/SVE pilot test, and SVE-2, -3, & -4 installed by Dan Yarom of CDSP). Rpt states that from 8/18/14 thru 11/25/14, 16 VEFR events were performed, recovering total of 825 gals of contaminated GW. GW sampling of 5 wells targeted by VEFR on 12/15/14 showed well MW-A had 7,010 ug/L total BTEX (down from 12,450 ug/L in July 2014 baseline sampling event), well MW-2 had 1,551 ug/L tBTEX (down from 10,470 ug/L in July 2014), well MW-3 had 2,250 ug/L tBTEX (down from 39,070 ug/L in July 2014), well MW-6 had 1,543 ug/L tBTEX (down from 4,474 ug/L in July 2014), well MW-11 had 2,810 ug/L tBTEX (down from 3,720 ug/L in July 2014). Vapor sample from well SVE-1, also collected on 12/15/14, had 1,102.2 ug/m3 tBTEX (down from 5,341 ug/m3 in sample collected during VEFR pilot test in July 2014); vapor samples from new SVE wells showed: SVE-2 had 3,843 ug/m3 tBTEX, SVE-3 had 971.2 ug/m3 tBTEX, SVE-4 had 1,517.3 ug/m3 tBTEX. Rpt concludes that results of 3 months of VEFR showed significant decreases in tBTEX in GW, and removal of contaminated subsurface vapors, suggesting VEFR is successfully cleaning up site; Seaciff proposes another 3 months of weekly VEFR events on 5 most impacted mon wells, followed again by GW sampling of 5 wells targeted by VEFR and vapor sampling of 4 SVE wells, at least one week after last VEFR event. Evaluation of continued effectiveness of VEFR will be made based on analytical results. - JK 01/13/15: I sent email to Jim DeMartinis

S102238659

about VEFR progress rpt: Jim, rpt does not include a water table contour map as required by my approval letter dated 8/12/14. Also, how were vapor samples collected? Was a vac truck used to generate a vacuum to recover vapor samples? This is not clear from text of rpt; what is clear is that you disregarded requirement in my approval letter that vapor samples be collected during final VEFR event, not a week or so afterward. Vapor samples were collected on Dec. 15th, same day as GW samples. Please provide clarifications. Also, let me know if you don't have top of casing elevations for wells. Jim sent reply: Jon, I forgot to follow up with you regarding obtaining older rpts and especially top of well survey data. My bad... CDSP forgot to collect vapor samples at prescribed time - so they did it later for four SVE points (only) using vac unit. I will make sure it is done right next time. I sent reply: Jim, I will be sending you Env'tl Mgmt Solution's well top of casing (TOC) elevation data and a water table contour map based on their TOC data and depth to water measurements. I cannot vouch for accuracy of TOC data, and water table contour map appears to misinterpret GW flow direction. I will also send a rpt with historical GW data for site, which I would like to see included in next progress rpt along with new data, presented in data table with lines for Total BTEX and Total VOCs (i.e., instead of just including lab data sheets). As for vapor samples, as long as they were collected using vac truck, I don't think it makes much difference if they were collected on day of last VEFR event or a week afterwards. I was concerned that once you completed VEFR events, you would not mobilize vac truck to site again, and vapor samples would be collected using some sort of hand pump, which of course would only be able to sample vapors within well casing, rather than pulling in soil vapors from surrounding formation. I want to point out that vapor sample collected by GEI during their AS/SVE pilot test had much higher BTEX levels than sample you collected during your pilot test and samples you collected after three months of VEFR (hundreds of thousands of ug/m3 in GEI's sample vs. several thousand ug/m3 in your samples). I'm not sure what they used to perform their pilot test a vac truck or some other mobile type of SVE unit; perhaps you should check into that. Or it may have had to do with length of time they applied vacuum to subsurface. In any case, I remain convinced that VEFR is not most appropriate way to treat vadose zone soil contamination. I will send out a letter approving another three months of VEFR soon (either later today or early tomorrow). - JK 01/13/15 (later): I sent letter (in DecDocs) to Mr. Haviv Kalan (RP), cc's to Jim DeMartinis of Seaciff Env'tl and Dan Yarom of CDSP, approving recommendation for another 3 months of VEFR followed by collection of GW and vapor samples, but adding add'l requirements: " After 3 months of VEFR, GW samples should be collected from all on- and off-site mon wells (i.e., not only from 5 wells subjected to VEFR), to fully evaluate extent of on- and off-site GW contam and determine if VEFR is helping to prevent off-site migration of GW impacts. " After 3 months of VEFR, vapor samples should be collected during final VEFR event (i.e., not after VEFR has ceased for at least one week, as proposed in Seaciff rpt). Vapor samples should be collected from mon wells targeted by VEFR, as well as from vapor extraction wells as proposed; samples should be collected from each well while vacuum is being applied to that well by vac truck (i.e., not collected from surrounding wells with induced vacuums). " When GW sampling is performed at end of 3 months of VEFR, depth to water measurements should be taken with oil-water interface probe and used

with well top of casing elevations to determine water table elevations, to prepare an accurate water table contour map for inclusion in summary rpt. If top of casing elevations are unknown or suspected to be inaccurate, well heads should be surveyed to determine accurate top of casing elevations. " After 3 add'l months of VEFR, full round of GW sampling and collection of vapor samples, a summary rpt should be submitted with appropriate recommendation for further actions. Rpt must include water table contour map showing up-to-date GW flow direction, and GW data table with lines for total BTEX and total VOCs, including all available historical GW data for site. " As stated in earlier DEC correspondence, if at end of 3-month period, Department determines that VEFR has not been sufficiently effective in addressing on- and off-site petroleum impacts, Responsible Party will be required to implement approved Aug. 2013 RAP prepared by GEI Consultants, Inc., by installing and operating an AS/SVE remedial system at site. - JK 06/17/15: On 6/9/15, received email from Jim DeMartinis of Seaciff Env't'l with attached remedial progress rpt. Rpt summarizes another 3 months of weekly VEFR, plus GW and vapor sampling in May 2015 (after VEFR had ceased for 2 weeks). Rpt does not include water table contour map, provides water table elevations only for select wells, and does not include historical GW data from prior to Seaciff's involvement as consultant. I contacted Jim DeMartinis and requested that rpt be revised and re-submitted. - J. Kolleeny 06/24/15: On 6/22/15, received revised remedial progress letter rpt for June 2015 by Seaciff Env't'l (in DecDocs), dated 6/22/15. After another 3 months of weekly VEFR events, GW sampling on 5/7/15 showed well MW-A had 1,843 ug/L total VOCs (down from 8,897 ug/L in Dec. 2014), well MW-2 had 2,546 ug/L tVOCs (up from 2,348 ug/L in Dec. 2014), well MW-3 had 20,201 ug/L tVOCs (up from 3,460 ug/L in Dec. 2014), well MW-6 had 1,327 ug/L tVOCs (down from 2,091 ug/L in Dec. 2014), well MW-7 had 433 ug/L tVOCs (up from 106 ug/L in July 2014), well MW-11 had 4,626 ug/L tVOCs (up from 3,247 ug/L in Dec. 2014), MW-13 had 115 ug/L tVOCs (up from 34 ug/L in July 2014). Collection of vapor samples on 4/24/15 showed well SVE-1 had 235 ug/m3 total BTEX (down from 1,102 ug/m3 in Dec. 2014), well SVE-2 had 213 ug/m3 tBTEX (down from 3,843 ug/m3), well SVE-3 had 1,121 ug/m3 tBTEX (up from 971 ug/m3 in Dec. 2014), well SVE-4 had 75 ug/m3 tBTEX (down from 1,517 ug/m3 in Dec. 2014). Five mon wells targeted by VEFR also showed decreases in BTEX vapors recovered. Well gauging data produced water table contour maps showing semi-circular radial GW flow directions from SE to SW; however, rpt notes that this flow direction may be suspect, since well MW-6 has historically shown high VOC levels but is up-gradient of source area according to these contours. Seaciff proposes re-surveying all 15 on- and off-site wells. They also note that well MW-3 is often dry or has little water for sampling, and propose replacing well with deeper well, which would enhance VEFR. Main proposal is to continue weekly VEFR, and collect GW & vapor samples in another 3 months to evaluate effectiveness. I sent letter (in DecDocs) to RP Mr. Haviv Kalan (jeerserv@aol.com), cc's to Jim DeMartinis of Seaciff and Dan Yarom of CDSP, approving these recommendations but stating that if next round of GW sampling again fails to show decreasing VOC levels in all wells targeted by VEFR, DEC may require a plan for add'l remedial actions. - J. Kolleeny 02/03/16: Reviewed remedial progress letter rpt dated Dec. 31, 2015 by Seaciff Env't'l (in DecDocs). Rpt states weekly VEFR events were suspended in Oct. 2015 to try to collect GW samples, but wells were dry or had too little water to sample, so

**S102238659**

VEFR events resumed and GW samples were collected in Dec. 2015 (vapor samples were collected from SVE wells and 5 VEFR target wells in Oct. 2015). In all, 15 VEFR events were performed between June 29 & November 25, 2015; total volume of GW recovered to date is 1,812 gals. Rpt states that CDSP re-surveyed all 15 site-related wells for TOC els, and water table els show GW flow to south. GW sample results show well MW-A had 1,501 ug/L total VOCs (down from 1,843 in May 2015), well MW-2 had 16 ug/L tVOCs (down from 2,546 ug/L in May 2015), well MW-3 had 8 ug/L tVOCs (down from 20,201 ug/L in May 2015), well MW-4 had 0.3 ug/L tVOC (down from 111 ug/L in May 2015), well MW-5 had 3,252 ug/L tVOCs (up from 316 ug/L in May 2015), well MW-6 had 799 ug/L tVOCs (down from 1,327 ug/L in May 2015), well MW-7 had 0.9 ug/L tVOC (down from 433 ug/L in May 2015), well MW-8 had 0.3 ug/L tVOC (down from 58 ug/L in May 2015), well MW-9 had 16 ug/L tVOCs (down from 106 ug/L in May 2015), well MW-10 had 4.5 ug/L tVOCs (down from 56 ug/L in May 2015), well MW-11 had 4.2 ug/L tVOCs (down from 4,626 ug/L in May 2015), well MW-13 had 12 ug/L tVOCs (down from 115 ug/L in May 2015), well MW-14 had 38 ug/L tVOCs (down from 40 ug/L in May 2015). Oct. 2015 vapor samples showed well SVE-1 had 564 ug/m3 total BTEX (up from 235 ug/m3 in April 2015), well SVE-2 had 136 ug/m3 tBTEX (down from 213 in April 2015), well SVE-3 had 224 ug/m3 tBTEX (down from 1,121 ug/m3 in April 2015), well SVE-4 had 279 ug/m3 tBTEX (up from 75 ug/m3), well MW-A had 519 ug/m3 tBTEX (up from 454 ug/m3 in April 2015), well MW-2 had 166 ug/m3 tBTEX (down from 1,668 ug/m3 in April 2015), well MW-3 had 216 ug/m3 tBTEX (up from 170 ug/m3 in April 2015), well MW-6 had 269 ug/m3 tBTEX (up from 179 ug/m3 in April 2015), well MW-11 had 75 ug/m3 tBTEX (down from 206 ug/m3 in April 2015). Rpt recommends reducing VEFR frequency from weekly to twice per month but adding well MW-5 to VEFR program, continuing for 3 months, then sampling GW and vapor. I sent letter (in DecDocs) to RP Haviv Kalan, cc's to Jim DeMartinis of Seaciff Env't'l and Dan Yarom of CDSP, approving recommendation to reduce VEFR frequency and add MW-5 to VEFR wells, but noting that if contam levels stop decreasing or increase, DEC may require return to more aggressive VEFR schedule, and that when progress rpts are submitted, VEFR should continue on most-recent approved schedule instead of waiting for DEC response to continue VEFR (so no hiatus in remediation). Letter notes GW sampling is not consistently being done quarterly, and requires quarterly sampling & reporting, stating that if VEFR wells are dry or lack sufficient water for sampling, replacement wells should be installed to greater depth. Letter states that wells MW-8, MW-12, MW-13, MW-14 & MW-15 may be omitted from GW sampling for now, but should stay open. Finally, letter states that prog rpts should be submitted within one month of quarterly GW and vapor sampling events, and rpts should include data table with all historical GW results and water table contour map with up-to-date GW flow direction. - JK 06/22/16: Reviewed letter rpt by Seaciff Env't'l dated 5/25/16 (in DecDocs). Rpt summarizes site activities from Feb. to April 2016, including VEFR events, GW sampling and soil vapor sampling. Six VEFR events were conducted, recovering 193 gals of GW from 6 wells; total recovered GW to date is 2,005 gals. GW sampling on 4/27/16 showed well MW-A had 8 ug/L total VOCs (down from 1,501 ug/L in Dec. 2015), well MW-2 had 4 ug/L tVOCs (down from 16 ug/L in Dec. 2015), well MW-3 had 3 ug/L tVOCs (down from 8 ug/L in Dec. 2015), well MW-4 was ND (down from 0.3 ug/L tVOCs in Dec. 2015), well MW-5 had 9 ug/L tVOCs (down from 3,252 ug/L in Dec. 2015), well MW-6 had 2 ug/L tVOCs (down from 799 ug/L in Dec. 2015), well MW-7 was ND

**46-05 DITMARS BLVD/QUEENS (Continued)**

**S102238659**

(down from 0.9 ug/L tVOCs in Dec. 2015), well MW-8 was ND (down from 0.3 ug/L tVOCs in Dec. 2015), well MW-9 had 6 ug/L tVOCs (down from 16 ug/L in Dec. 2015), well MW-10 had 15 ug/L tVOCs (up from 5 ug/L in Dec. 2015), well MW-11 had 4 ug/L tVOCs (same as in Dec. 2015), well MW-12 had 5 ug/L tVOCs (up from 2.5 ug/L in Dec. 2015), well MW-13 had 11 ug/L tVOCs (down from 12 ug/L in Dec. 2015), well MW-14 had 13 ug/L tVOCs (down from 38 ug/L in Dec. 2015), well MW-15 was ND (down from 0.3 ug/L tVOCs in Dec. 2015). Vapor samples collected from SVE wells in May 2016 showed well SVE-1 had 305 ug/m3 total BTEX (down from 564 ug/m3 in Oct. 2015), well SVE-2 had 282 ug/m3 tBTEX (up from 136 ug/m3 in Oct. 2015), well SVE-3 had 304 ug/m3 tBTEX (up from 224 ug/m3 in Oct. 2015), well SVE-4 had 319 ug/m3 tBTEX (up from 279 ug/m3 in Oct. 2015); vapor samples collected from 6 VEFR mon wells showed similar ranges and fluctuations. Rpt notes that after more than a year of VEFR, VOC levels in GW and soil vapor have decreased significantly. Seacliff recommends re-sampling mon wells and SVE wells again in 3 months to ensure that contam levels have not rebounded; if no rebound is observed, they will request spill closure. I sent email (in DecDocs) to RP Haviv Kalan, cc's to Jim DeMartinis of Seacliff Env't'l and Dan Yarom of CDSP: Dear Mr. Kalan: I have reviewed letter rpt prepared by Seacliff Env't'l dated May 25, 2016, pertaining to this spill site. Rpt summarizes activities performed at site from Feb. thru April 2016, including VEFR events, GW sampling, and subsurface vapor sampling. Based on results of these activities, Seacliff Env't'l recommends performing another round of GW and soil vapor sampling in 3 months to see if low contam levels observed in most recent sampling event rebound to higher levels. If levels remain low, Seacliff will request spill closure. Department requests that 2 add'l quarterly sampling events be performed at site to confirm that contaminant levels will remain low. To help offset cost of add'l sampling event, mon wells MW-8, MW-12, MW-13, MW-14 & MW-15 may be omitted from GW sampling program, as these wells are located across Ditmars Blvd and/or 46th St from site and have not exhibited highly elevated contam concentrations over course of their sampling history. Please feel free to contact me if you have any questions or comments. - J. Kolleeny 09/01/16: Reviewed letter rpt by Seacliff Env't'l dated 8/31/16 (in DecDocs). Rpt presents results of GW & vapor sampling performed in July 2016. GW samples showed well MW-A had 108 ug/L total VOCs (up from 8 ug/L in April 2016), well MW-2 had 4 ug/L tVOCs (had 4.5 ug/L in April 2016), well MW-3 had 49 ug/L tVOCs (up from 3 ug/L in April 2016), well MW-4 had 3.7 ug/L tVOCs (up from ND in April 2016), well MW-5 had 7.4 ug/L tVOCs (down from 9.4 ug/L in April 2016), well MW-6 was ND (down from 1.6 ug/L tVOCs in April 2016), well MW-7 was ND (same as April 2016), well MW-9 had 24 ug/L tVOCs (up from 6 ug/L in April 2016), well MW-10 had 209 ug/L tVOCs (up from 15 ug/L in April 2016), well MW-11 had 85 ug/L tVOCs (up from 4.4 ug/L in April 2016). Vapor sampling showed well SVE-1 had 1,274 ug/m3 total BTEX (up from 305 ug/m3 in May 2016), well SVE-2 had 1,207 ug/m3 tBTEX (up from 282 ug/m3 in May 2016), well SVE-3 had 1,345 ug/m3 tBTEX (up from 304 ug/m3 in May 2016), well SVE-4 had 1,623 ug/m3 tBTEX (up from 319 ug/m3 in May 2016); mon wells MW-A, MW-2, MW-3, MW-6 & MW-11 also showed moderate increases in ug/m3 tBTEX. Rpt states that depth to GW data show GW levels were slightly lower than levels measured last quarter; states that data are difficult to contour but continue to suggest GW flow to south, consistent with last several quarters. (Rpt does not include water table contour map or provide water table

elevations; only depth to water measurements are provided.\*Update 9/15/16: water table contour map provided by Jim DeMartinis on 9/12/16, added to rpt that was uploaded to D2, but rpt still lacks well gauging data table.) Rpt concludes that sampling results from over a year of VEFR show significant decreases in tVOCs from 7 impacted wells, with all wells showing low or ND levels of VOCs in GW. Results of most recent sampling event show that no significant rebound in contam levels has occurred after cessation of VEFR events. Seaciff recommends sampling of GW and vapor again in Oct. 2016, and if results confirm no rebound, they will request spill closure. I sent email to Jim DeMartinis, cc to Dan Yarom, stating that final round of GW sampling should include all wells except MW-15, to confirm absence of off-site impacts. - J. Kolleeny 12/22/16: Reviewed letter rpt by Seaciff Env't'l dated 11/25/16 (in DecDocs), summarizing GW and vapor sampling conducted at site in Oct. 2016. GW sample results show well MW-A had 5 ug/L total VOCs (down from 108 ug/L in July 2016), well MW-2 had 7 ug/L tVOCs (up from 4 ug/L in July 2016), well MW-3 had 5 ug/L tVOCs (down from 49 ug/L in July 2016), well MW-4 had 154 ug/L tVOCs (up from 4 ug/L in July 2016), well MW-5 had 114 ug/L tVOCs (up from 7 ug/L in July 2016), well MW-6 had 7 ug/L tVOCs (up from ND in July 2016), well MW-7 was ND (same as in July 2016), well MW-9 had 20 ug/L tVOCs (down from 24 ug/L in July 2016), well MW-10 had 151 ug/L tVOCs (down from 209 ug/L in July 2016), well MW-11 had 0.4 ug/L tVOCs (down from 85 ug/L in July 2016). Vapor sampling showed well SVE-1 had 43 ug/m3 total BTEX (down from 1,274 ug/m3 in July 2016), well SVE-2 had 69 ug/m3 tBTEX (down from 1,207 ug/m3 in July 2016), well SVE-3 had 61 ug/m3 tBTEX (down from 1,345 ug/m3 in July 2016), well SVE-4 had 74 ug/m3 tBTEX (down from 1,623 ug/m3 in July 2016); vapor samples from mon wells were low (highest was MW-6 with 116 ug/m3 tBTEX, down from 1,353 ug/m3 in July 2016). I sent email to Jim DeMartinis of Seaciff Env't'l, cc's to Dan Yarom of DCSM & Haviv Kalan, RP: Jim, I've looked over Nov. 25, 2016 Closure Rpt, and it seems you did not sample all off-site wells (except for MW-15) as requested in my 9/1/16 email. In addition, I've asked several times that mon rpts include a well gauging data table with columns for Top of Casing Elevations (relative to mean sea level or some other datum), Depth to GW Measurements, and Water Table Els (relative to sea level or some other datum), with data for all on- and off-site wells. I also asked that water table contour map specify what datum water table els shown on map are relative to; water table map in rpt does not indicate this. Such well gauging info is routinely provided in most GW mon rpts I receive. Attachment A in rpt does not provide top of casing els or water table els, it provides length of casing & depth to water msmts. I'd like to be able to close this spill case, but off-site well water quality data & well gauging/water table el data are not trivial matters. I am requesting that off-site wells be sampled, and that results be submitted as an addendum to closure rpt, along with a complete well gauging data table and a GW contour map with info requested above. Please feel free to call to discuss these issues. - J. Kolleeny 01/26/17: Reviewed closure rpt addendum letter by Seaciff Env't'l dated 1/19/17 (in DecDocs). Rpt summarizes 1/4/17/ sampling of off-site wells MW-8, MW-12, MW-13 & MW-14, which I had requested on 12/22/16 because they were not sampled during Oct. 2016 mon event. Results showed well MW-8 had 2.6 ug/L total VOCs, well MW-12 had 125 ug/L tVOCs, well MW-13 had 136 ug/L tVOCs, and well MW-14 had 10 ug/L tVOCs. I reviewed historical data for these wells, which show that in Feb./March 2010,

Remarks: well MW-8 had 8 ug/L tVOCs, MW-12 had 60.5 ug/L tVOCs, MW-13 had 236 ug/L tVOCs; in July 2011 well MW-8 was ND, MW-12 was ND, MW-13 had 170 ug/L tVOCs, MW-14 had 98 ug/L tVOCs; in Sept. 2011 well MW-8 was ND, MW-12 had 10 ug/L tVOCs, MW-13 had 140 ug/L tVOCs, MW-14 had 147 ug/L tVOCs; in December 2012 well MW-8 had 3 ug/L tVOCs, MW-12 had 13 ug/L tVOCs, MW-13 had 99 ug/L tVOCs, MW-14 had 117 ug/L tVOCs. As a whole, data suggest some fluctuating low levels of VOCs in off-site wells, but no significant off-site contam. Addendum rpt includes well gauging data table showing well top of casing els and water table els relative to common datum - a benchmark established by CDSP in Astoria Blvd sidewalk adjacent to site, and water table contour map based on data, showing a somewhat confusing GW flow pattern but overall flow shown seems to be to south. Oct. 2016 and Jan. 2017 GW data indicate on-site GW impacts have been greatly reduced to levels which do not pose a significant concern, and very minor residual off-site impacts do not pose significant concern. Based on data, I closed spill case and sent closure letter (in DecDocs) to RP Mr. Haviv Kalan, cc's to Jim DeMartinis of Seacliff Env't'l and to Dan Yarom of CDSP. - JK"

"CALLER RESPONDED TO ABOVE LOCATION FOR TANK REMOVAL. UPON REMOVAL SOIL CONTAMINATION HAS BEEN DISCOVERED. APPROX 200 YARDS OF SOIL HAVE BEEN REMOVED AND STORED ON SITE. FURTHER SAMPLING TO BE DONE. NO CALL BACK REQUESTED."

**FINDS:**

Registry ID: 110004334701

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110004469021

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2  
DER Facility ID: 278183  
DEC Memo: "2/10/2004: This spill case was reassigned from Sigona to Rommel for management. 5/15/2005: Spill case reassigned from Rommel to Benjamin for management. 5/25/2005: I called GSC (Exxon's consultant) 845-561-9890 and spoke with Brian Melancon and Jesse Gallo (project engineer). Jesse indicated that the work plan for a SIWP submitted to DEC in January 2005 had been implemented in April 2005. DEC had not approved the plan. He stated that an SI report would be submitted to the DEC in late June 2005. --S. Benjamin 6/7/2005: Received SSIR form EXXON. Reveiwed and approved (via letter to Jesse Gallo- GSC)--S. Benjamin 8/22/07 - Haggerty - Assumed management of spill from Sue Edwards 9/17/07 - Haggerty - Spoke with Jesse Gallo of Kleinfelder (845-567-6530). He states that a ChemOx Pilot Testing Work Plan and a Station Upgrade Report will be submitted in Nov '07. Gasoline contamination is not fully delineated off-site. Additonal wells are required before Pilot Testing can begin. 10/11/07 - Haggerty - approved request from Kleinfelder to shift their sampling schedule back one month. This is to bring this site's quarterly sampling schedule to match another site I manage Mobil 11399 (17-HBT), NYSDEC Case 00-07454. Both Sites are to be sampled for a suite of parameters to determine appropriate remedial strategies. The remedial strategies will likely be very similar for both Sites (ORC or ChemOx if possible). Contamination not delineated on-site or off-site (greatest groundwater contamination located on the perimeter of the property. Subsurface Investigation required prior to the use of any remedial technologies. 2/6/2008: Project has been reassigned to Harrington for management. (Harrington) 3/31/2008: Sent e-mail to Exxon Mobil approving the station upgrade report and the supplemental SI work plan. Extra work includes additional monitoring well installation both on and off-site. (Harrington) 4/28/08: Haggerty - Project Management switched back to Haggerty 2/4/09: Haggerty - Approved Supplemental SI report. ExxonMobil and Kleinfelder overdue with the completion of the approved work plan as well as the report. 5/7/09: Haggerty - Approved Feasibility Investigation Work plan. Includes the installation of injection wells for the eventual Chem-Ox injection pilot test as well as an additional delineation well east along Astoria Blvd April 2010- Approved RI work plan/ Feasibility Study on

2/9/10 for 2nd pilot test . PM limited the duration and reporting schedule of the project. As written, EM s proposal was like a full-scale injection not a pilot test May 2010 - Phase II injections took place in May July 2010 - approved Site Status Update Report. Feasibility Report due in November 2010 November 2010 - EM has handed the project over to East River Petroleum Realty LLC. See 11/18/10 letter from Liberty.(sd) February 2011 - Spoke with new Arcadis project manager, Carla Faraday. Modified Fenton's Reagent results look promising. April 2011 - reviewed Site Status Update Report with the 2nd round of quarterly gw data since the Fenton's injection. 24% overall reduction in conc. I have a conference call set up to speak with the PM and technical staff at Arcadis. They want to use an oxidant with a longer residence time (sodium persulfate). I would like to continue with Fenton's since the results are positive but add persulfate injections after the Fenton's in injected May 2011 - had conference call with Arcadis PM and technical staff. I agreed to switch to sodium persulfate injection pilot test Persulfate has a greater residence time in-situ which should provide a greater distribution of the oxidant in the gw. Work Plan due 6/13/11 June 2011 - work plan under review July 2011 - approved Remedial Action Work Plan for ISCO (sodium persulfate) Sept. 2011 - sodium persulfate injections took place in Sept. January 2012 - reviewed SSUR. Shows promising results. Stated that since the Pilot testing is over. The site needs a CO for futher injections February 2012 - OGC (Ben Conlon) sent Chuca Meyer, East River Petroleum's attorney, the CO April 2012 - CO executed, injections to continue from pilot phase June 2012 - Arcadis contacted PM and wants to have a conference call to discuss the pilot test results and the future RAP. Call will take place the last week of June August 2012 - We agreed another change in strategy is warranted. Due to the GW conditions (anoxic/ reducing conditions), they submitted and I approved a RAP for Sulfate injections December 2012 - injection conducted in October May 2013 - waiting for 3 quarter data post-injection to discuss the next step December 2013 - Arcadis submitted an Exposure Assessment which proposed MNA over the next 4 quarters. PM responded that the concentrations are to high for MNA and proposed a conference call to determine the best course of action. March 20, 2014 - approved SVE/AS pilot test work plan June 2014 - SVE/AS pilot test to be conducted in July 2014. Arcadis will be installing a dedicated SVE well for the pilot test at the Department's request rather than using an existing MW screened only 5ft above the groundwater table July 22, 2014 - V. Brevdo. Spill Case reassigned to Remedial Section B Region 2 as per discussion between R. Cozzy and V. Brevdo (discussion was both verbally and via e-mails). VB September 30, 2014 - V. Brevdo Arcadis submitted Site Status Update Report (SSUR) dated September 26, 2014. VB 01/06/2015 - V. Brevdo e-mail from Arcadis, submission of Site Status Update Report (SSUR)and Pilot Test Work Plan Addendum (PTWPA), both documents dated January 2015. VB. 01/09/2015 - V. Brevdo Current Project Synopsis Mobil Branded Station, 44-02 Astoria Boulevard, Astoria (Spill No. 9008435) The 0.28-acre site is currently used as an active petroleum filling station and a convenience store. The UST field contains five 4,000-gallon gasoline USTs and is located near the northwest side of the site. Four tank field observation monitoring wells are located at the corners of the tank field. The spill case was opened due to tank test failure. From 1964 to 2007, several USTs were either abandoned in place or removed. Chemical Oxidation remediation was implemented in August 2009, November 2010

and August 2011. On November 22, 2013, Arcadis (an environmental engineering consultant for East River Petroleum Realty, LLC) submitted a Qualitative Human Health Exposure Assessment Report to the Department and recommended Monitored Natural Attenuation. The Department did not approve MNA approach and requested additional remediation to address remaining contamination in soil and groundwater at the site. The site contamination includes BTEX and MTBE. On October 24, 2014, Arcadis gauged twenty monitoring and nine injection wells. All twenty monitoring wells and four injection wells were sampled. The Department-approved March 2014 Air Sparging / Soil Vapor Extraction (AS/SVE) pilot test was temporarily on hold in 2014 as Arcadis was conducting evaluation of an alternative remedial technology such as direct groundwater recirculation. However, evaluation indicated that this technology would not be as effective as AS/SVE. On January 6, 2015, Arcadis submitted AS/SVE Pilot Test Work Plan Addendum. Updates made to the AS/SVE Pilot Test Work Plan via addendum shall help Arcadis and the Department to better understand the source area as well as target the contaminants more efficiently. The main difference between the original AS/SVE Pilot Test Work Plan submitted in March 2014 and the work plan addendum submitted on January 6, 2015 is that Arcadis added a groundwater pump test component, two additional air sparge (AS) wells, one additional soil vapor extraction (SVE) well and updated the test monitoring parameters. Arcadis informed the Department that they and East River Petroleum Realty (RP) fully intend to implement the pilot test and the subsequent remedial strategy (that will be developed based on the results of the pilot test) in the expedient manner to complete remediation of the site and bring this spill case to closure. Arcadis intends to begin the well installation within 45 days of the Department's approval of the AS/SVE Pilot Test Work Plan Addendum and commence the pilot test within 30 days of the completion of the wells installation. Arcadis further informed the Department that they are working as efficiently and diligently as possible to complete remediation and bring this spill case to closure. On January 9, 2015, the Department completed review of the AS/SVE Pilot Test Work Plan Addendum and approved it. VB 04-01-2015 - Arcadis (David Tracy) submitted Site Status Update Report dated April 1, 2015. VB Current Project Synopsis Mobil Branded Station, 44-02 Astoria Boulevard, Astoria (Spill No. 9008435) The 0.28-acre site is currently used as an active petroleum filling station and a convenience store. The UST field contains five 4,000-gallon gasoline USTs and is located near the northwest side of the site. Four tank field observation monitoring wells are located at the corners of the tank field. The spill case was opened due to tank test failure. From 1964 to 2007, several USTs were either abandoned in place or removed. Chemical Oxidation remediation was implemented in August 2009, November 2010 and August 2011. On November 22, 2013, Arcadis (an environmental engineering consultant for East River Petroleum Realty, LLC) submitted a Qualitative Human Health Exposure Assessment Report to the Department and recommended Monitored Natural Attenuation. The Department did not approve MNA approach and requested additional remediation to address remaining contamination in soil and groundwater at the site. The site contamination includes BTEX and MTBE. Arcadis submitted Site Status Update Report on April 1, 2015. On January 19, 2015, Arcadis gauged twenty monitoring wells and nine injection wells. All twenty monitoring wells and four injection wells were sampled. On February 10th through 13th, 2015, five (5) wells

were installed as part of the air sparge/soil vapor extraction (AS/SVE) pilot test. This pilot test was carried out in March 2015, and Arcadis intends to present the results to the Department in the June 2015 Site Status Update Report. Based on non-detections or low concentrations for many quarters, Arcadis requested permission to permanently remove six (6) wells from the groundwater monitoring program. The Department granted permission to remove aforementioned wells from monitoring program on April 6, 2015. The next groundwater sampling event is scheduled for April 2015. VB V. Brevdo - July 6, 2015 Pilot test was carried out on March 9-10, 2015. Pilot test was completed on three extraction wells and three Air Sparging wells. In total, approximately 4.5 pounds of free product were recovered. All fifteen monitoring wells and eight injection wells on the site were sampled. Arcadis submitted Site Status Update Report on June 30, 2015. Due to a recent property transfer, East River Petroleum Realty, LLC is no longer associated with this property, and Alliance Energy has assumed responsibility for a continuing cleanup of the site. The next groundwater sampling event is scheduled for July 2015. VB December 21, 2015 - V. Brevdo Spill Case Closure Decision The last two groundwater sampling events were conducted in July and October 2015. On December 16, 2015, Arcadis submitted Final Remediation Report / Receptor Evaluation Report and petitioned the Department for closure of this spill case. Site investigations and groundwater monitoring demonstrated that petroleum impacts are limited to groundwater and the groundwater plume is stable. Based on depth to groundwater (42 feet), exposure via inhalation of soil and/or groundwater vapors in indoor or ambient air does not represent exposure pathway. Remedial activities conducted at the site include the removal of approximately 122 tons of soil during station upgrades, the removal of two 550-gallon USTs and the proper abandonment of ten 550-gallon USTs. Two rounds of in situ chemical oxidation injection events were completed in 2009 and 2010, followed by sodium persulfate injections in 2011 and magnesium sulfate injections to promote anaerobic oxidation in 2012. Additionally, mobile AS/SVE events have recently been completed. In addition, given the relatively flat groundwater gradient and the presence of the Grand Central Parkway sub-grade retaining wall, the remaining mass is stable and unlikely to migrate further due to this apparent hydraulic barrier. Arcadis concluded that previous remedial activities and station upgrades have resulted in bulk hydrocarbon mass removal and reduction of BTEX and MTBE, to the extent feasible, in groundwater at the site and that water quality is expected to improve through ongoing natural degradation processes. In consideration of the above and the absence of complete exposure pathways between site-related impacts and potential receptors, Arcadis recommended that no further action is taken at the site and respected closure of the spill case. The Department agreed that feasible remediation has been completed and site poses no threat to human health and the environment for use as a gas station. The Department closed spill case on December 21, 2015. VB"

**Environmental Interest/Information System**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Region: 2  
DER Facility ID: 227609  
DEC Memo: "12/26/95 SEE ALSO SPILL # 9308114. STATION HAS PROBLEM WITH GROUNDWATER COMING INTO TANKS. SHELL REPORTS NO INVENTORY LOSSES, JUST WATER INFILTRATION. 4/22/97 STIP effective. 9/16/03 Upgraded SVE system 9/02. System appears to be working very well. Find/modify old STIP or reissue new STIP. 12/1/03 Reassigned from Mulqueen to Foley. Site History Sept 1995- USTs failed tightness test. Oct 1996- MW-1 and MW-2 were installed. April 1997- A SVE system was installed and activated. SVE cluster wells 1,2,3 and vent well 4 were tied into the system. May 1998- MW-3 was installed. July 1998- MW-5 and MW-6 installed. June 2000- MW-7 was installed. January 2002- Six onsite sparge wells installed and MW-5, MW-6 were piped to be additional SVE wells. Sept 2002- An upgraded SVE system and new sparge system were installed. Both were started on 9/30/02. 6/8/04 Received June 2004 update report from Phoenix(GW data from 3/5/04). BTEX ranged from ND(MW-2, MW-7) to 3191ppb(MW-1). MTBE ranged from less than 1ppb(MW-1, MW-2, MW-6, MW-7) to 2ppb(MW-5). MW-3 and MW-4 were dry. Cumulative total BTEX recovered is 24920lbs. 11/23/04 Met with P. Sherwood, B. Hoashi(Phoenix) and R. Rule(Shell). MW-8 replaced MW-4. Pulsing system month on, month off. GW data from 9/23/04 show elevated BTEX at MW-1(7506ppb) and at MW-5(1060ppb). System effluent 0.41ppmv BTEX. 1/19/05 Received closure report for removal of one 550gal heating oil UST and associated piping. UST was in good condition, no rusting or pitting. Soils beneath the UST were not stained and did not exhibit odor. 4 composite sidewall samples and a bottom endpoint was collected. Soil samples were analyzed for 8260+MTBE/8270. Results indicated all samples showed concentrations of target VOCs and PAHs below soil cleanup objectives. Results do not indicate a release from the heating oil tank. 6/7/05 Met with R.

Rule(Shell), M. Schneck(Longshore Env), M. Reeves(SAIC), E. Destefanis(SAIC). Phoenix was pulsing the system. MW-1,5 & 6 rebounded after shutdown. SAIC will sample next quarter and reevaluate the system. 9/29/05 Update from SAIC, 2Q05- BTEX ranged from ND(MW-2,7,8) to 11890ppb(MW-1). MTBE from ND(MW-1,2,7,8) to 1550ppb(MW-6). DTW 40.6-42.9'bgs. Quarterly sampling will continue through end of 2006 upon which a determination for either closure or additional operation of the system will be made. 12/23/05 Received 3Q05 report from SAIC. Samples collected 9/28/05 from 7 wells. No water in MW-3. - BTEX from ND(MW-2,7,8) to 10613ppb(MW-1). MTBE from less than 1(MW-2,7) to 1320ppb(MW-6). DTW 41.4-43.6'bgs. Quarterly sampling will continue to gauge effects of remediation system on GW quality. 2/1/06 Meeting with Shell, SAIC, Longshore. Tanks to be pulled in July/August. Monitor concentratons afterwards. Shell not putting new tanks in; garage only. 3/28/06 4Q05 sampling conducted 12/14/05 on 7 MWs. BTEX from ND(MW-2,7,8) to 13655ppb(MW-1). MTBE from ND(MW-2,7,8) to 1220ppb(MW-6). No LNAPL. DTW 40.58-42.76'bgs. 6/7/06 - Obligado - Transferred from Foley to Obligado 9/8/06 - Obligado - Shell Portfolio meeting. Tanks to be pulled in October. Soil has been preclassified. System was deactivated in 2004. 10/13/06 - Obligado - Received phone call from Charlie Nalbhone. He is working for tank installer. He informed me that Shell was in the process of removing tanks and also was going to remove canopies to excavate additional contamination in pump island area. He was concerned about the additional time it would take to remove canopies and it would postpone his tank install job. I told him this was not a concern of the Department. 11/6/06 - Obligado - Review 1Q06 report. 6 monitoring wells were sampled on 3/14/06. BTEX ranged from ND to 6267 ppb (MW5). MTBE ranged from ND to 11,500 ppb (MW6). DTW 40 to 42 ft bgs. 11/9/06 - Obligado - Review 2Q06 report. 6 mws sampled on 6/27/06. MW3 and MW4 dry. BTEX ranged from ND to 4086 ppb (MW1). MTBE ranged from ND to 2000 ppb (MW6). DTW 40.11 to 42.32 ft bgs. No LNAPL. 11/10/06 - Obligado - Review 3Q06 report submitted by GES. 6 gw wells were sampled on 9/27/06. BTEX from ND to 5539 ppb (mw1) and MTBE from ND to 15600 ppb in MW6. DTW 40.00 to 42.17 ft bgs. Proposed plans remove all USTs in October 2006. EXcavate petroleum impacts to the greatest extent possible. Prepare Tank Excavation Assessment Report in December 2006 to document UST removal. GW sampling in December 2006. Called Dawn Vought. She said that the USTs have been removed. Tank grave needs to be inspected before USTs are reinstalled. New piping systems need to be installed as well. 7/31/07 - Obligado - Review UST Closure Report, submitted by GES, dated Feb 26, 2007. During October 2006, 3 gasoline USTs, 4 dispensers and associated piping, 5 hydraulic lifts, 2 oil water sepatators removed and 10 bay drains closed. 499 gallons of residual gasoline and wash water removed and disposed of at an approved facility. PID during gasoline tank excavation ranged from ND to 4125 ppm. 2 soil endpoint samples OEB1 24-26 ft had MTBE at 372 ug/kg and OEB2 26-28 had 1,514,510 ppb total VOCs. Canopy was removed to over excavate contaminated soil. Depths reached 24-28 ft in center of excavation. 1141 tons of impacted soil was removed from the site and transported for disposal at Soil Safe in Logan NJ. Endpoint soil results from beneath vent lines were all below SCOs. Hydraulic lift endoint results ND for SVOCs and PCB, but had hit for chromium of 10 mg/kg but below Eastern USA background levels. Oil water separators removed and had not obvious signsof leakage. Endpoint soil samples had no SVOCs or PCBs. 2 Test pits to 8-10 ft to determine if former 550 gallon USTs had been present in NW

**SHELL SERVICE STATION (Continued)**

**S104513551**

and NE portion of site. No tanks, elevated PID readings (max 6.5 ppm), odors or staining was encountered during test pitting. Recommends reinstalling mw and SVE and monitoring wells and tying them back into the system and restarting the system in March 2008. 9/7/07 - Obligado - Phone call from Eric Harvey. He is the new GES project manager for this site. 9/17/07 - Obligado - Review quarterly monitoring reports: 1Q07 - Work Performed: Installed 4 additional monitoring wells. January through March - reinstalled AS/SVE system. March 17, 2007 - restarted SVE system. Feb 13, 2007 - collected ground water samples. BTEX from ND to 14327 ug/L (MW11), MTBE ND to 1370 ug/L (MW3). DTW is 40.26 ug/L. Effluent sample was ND for all BTEX compounds, as such it was below STIP limits. Proposes weekly and then biweekly O&M visits. Proposes to locate and uncover monitoring well MW10. 2Q07 - Work Performed - System O&M - SVE system was found down upon arrival for every bimonthly O&M visit. System run time is 1%. Ground water sampling on May 2, 2007. 9 wells gauged, MW4 dry and MW10 not accessible. BTEX from ND to 12797 ug/L (MW11), MTBE ND to 1030 ug/L (MW11). Proposes - Replace faulty motor starter on SVE, conduct bi-monthly O&M visits and AS system optimization activities. Continue quarterly gw monitoring. 10/4/07 - Obligado - Portfolio meeting with Rob Rule of shell, Heather Cloud of GES, and Eric Harvey of GES, and myself of DEC. We discussed poor system performance at this site. According to GES, after system repairs, on September 19, the system was restarted, and approximately a week later during an O&M visit the system was still running. Right now the system is just running SVE, and after 2 months they will restart the AS portion of the system. Some wells at this site were paved over during repaving subsequent to tank removal, but those wells have been located and uncovered. 12/27/07 - Obligado - Review 3Q07 report, dated October 31, 2007. System O&M - system down in July and August. In September the SVE motor was replaced and system was restarted. System run time is 11.5%. AS system is not started yet. GW sampled on Aug 7, 2007. BTEX from ND to 9050 ug/L (MW11). MTBe range from ND to 495 ug/L (MW5). DTW is 39 to 42 ft bgs. LNAPL not detected. Proposes continued O&M and start AS system. 5/6/08 - Obligado - Review 4Q07 report. In November 2007, the AS portion of the system was restarted. November and December, the air sparge system was down upon arrival. BTEX range from ND to 19,602 ug/L (MW11). MTBE from ND to 860 ug/L (MW9). No LNAPL detected. 1Q08 Report - AS/SVE system had major mechanical problems and was down for most of the quarter. Wells were sampled on 2/28/08. BTEX from ND to 16690 ug/L (MW11). MTBE was ND to 144 ug/L (MW9). 9/16/08 - Obligado - Meeting with DEC, Shell, GES - They will propose workplan for additional monitoring wells. 11/9/09 - Obligado - Meeting with GES, Shell, DEC. The plume is not delineated in the down gradient direction. They will look into installing a well in the alley way behind the building. If not, then they will install the well in front of the garage bay. 6/2/10 - Obligado - I reviewed a Remedial System Pulsing Work Plan submitted by GES. They claim to have reached asymptotic levels on the system and want to shut it down. At the previous meeting, DEC requested a plan to pulse the system and monitor for rebound. This plan proposes pulsing the system every two weeks and collecting effluent data to see if any increases occur. If not then they will shut the system down for 3 months and monitor for rebound. I sent an approval email to Chris Buck with cc to Shell. 6/4/10 - Obligado - I reviewed an Investigation Work Plan. The plan proposes to install the down gradient well in the alleyway behind the station. Soil sampling and well installation will be

**SHELL SERVICE STATION (Continued)**

**S104513551**

performed in accordance with the Generick Work Plan. I sent an approval letter for the plan. According to the implementation schedule the well installation and sampling will occur within 75 days and the results will be reported in the next Site Status Update Report.

8/9/10 - Obligado - I reviewed the 2nd quarter status update report. They have begun pulsing the system on and off. They also installed one monitoring well in the alleyway behind the station. Soil samples were below SCOs from the soil boring. The gw has not been sampled yet. BTEX was 9000 ug/L in MW11. 8/25/10 - Obligado - Meeting with GES/Shell/DEC. The onsite SVE-AS system was temporarily shutdown to monitor for rebound in groundwater concentration. - Results from the delineation well installation will be included in the 3rd QTR 2010 QMR. 12/22/10 - Obligado - Review the 3Q10 report. One additional well was installed in the down gradient direction, however, the well is more west southwest, then southwest. The well was ND for BTEX and MTBE. According to 3Q10 report, system was shut down on 9/14/10 to monitor for rebound. 7/3/12 - Obligado - I reviewed 1st quarter 2012 update report. BTEX 6500 ug/L in MW11. I reviewed a post remedial soil sampling work plan. Plan proposes 4 confirmatory soil borings. I sent an email to Jennifer Guilles commenting that I thought an additional sparge well was necessary to complete the remediation in MW11 area. Based on the ROI of 10 feet reported by GES, MW11 may not be within the ROI of the system. Spacing between the sparge wells in that area is 30 feet, so the ROI's do not overlap. This is probably why groundwater concentrations remain high in that area. I recommended installing the sparge well during the soil boring investigation and tying the sparge well into the system and running it for a few more months. 8/10/12 - Obligado - I reviewed a AS/SVE mobile work plan. It proposes an additional air sparge well in the 30 ft gap between air sparge points. A mobile remediation trailer will be used to sparge this additional point. Vapors will be pulled MW11. Vapors will run through activated carbon. Influent and effluent vapor samples will be collected. Events will be conducted bimonthly for 3 months followed by an evaluation period. I approved the mobile AS/SVE plan as well as the soil boring plan. 10/16/12 - Obligado - Due to a delay in contractor response, the start of the mobile AS/VE events at 43-20 Astoria Boulevard in Flushing, New York has been delayed. It is currently anticipated that the events will begin the week of October 15 and be completed bi-monthly through December. Please let me know if you have any questions. 10/18/12 - Obligado - I reviewed the 2nd Quarter 2012 update report. 5,392 micrograms per liter BTEX present in MW11. The report proposes to: Conduct high intensity target (HIT) vacuum event on monitoring well MW-11. Conduct post-remedial soil boring investigation as outlined in the June 2012 Post-Remedial Soil Boring Investigation Workplan. 11-16-12 - Obligado - Received soil boring report. 2 of the 4 soil borings had impacts above CP51 at the smear zone between 42 and 46 ft bgs. Specifically, the soil sample collected from B-1 had 77 ppm total VOCs and B-4 had 63.4 ppm total VOCs. The report recommends implementing the approved mobile AS/SVE events. 2/20/13 - Obligado - I reviewed the 4th quarter 2012 report. AS/SVE events have begun. Ground water concentrations were significantly reduced in MW11 since events began. 5744 ug/l BTEX pre-AS/SVE to 2,491.4 during this quarter. Need to continue to monitor progress. BTEX have been increasing in MW1, however, possibly due to an approximate 2 ft drop in the water. Need to continue to monitor this well. 6/24/13 - Obligado - I reviewed a closure request for the spill. According to the report, remedial activities have been

**SHELL SERVICE STATION (Continued)**

**S104513551**

conducted to the extent feasible to remove source. The site is currently an active retail station. Remedial activities include operation of an AS/SVE system, which according to the report recovered system recovered approximately 25,000 pounds of benzene, toluene, ethylbenzene, and total xylenes (BTEX). Approximately 1,410 tons of impacted soil was removed during the tank excavation activities. Subsequent to system shut down in 2011, bi-monthly mobile remediation SVE/AS events were conducted in November and December 2012 around the vicinity of MW-11 which had elevated impacts. Limited soil impacts remain above unrestricted clean-up levels, including OEB-1 from the UST excavation bottom at 24-28 ft bgs, with 1052 ppm total VOCs, B-1 at 45 ft bgs with 77.5 ppm total VOCs, and B4 at 45 ft bgs 63.2 ppm total VOCs. However, the depth and location of these soil sample locations make additional remediation infeasible. During the most recent sampling event, BTEX concentrations in groundwater were as high as 5,195 ug/L in MW11 and 1,098 ug/L in MW1. MW11 has reduced 65 % from a high of 17,128 ug/L in 2010. MW1 has reduced 85 % from 7,416 ug/L in 2007. MW5 386 ug/L has reduced 93% from 6,318 ug/L in 2007. The report includes an exposure assessment, which concludes that due to the depth of the residual impacts and the fact that the groundwater in the area is not used for potable purposes, there are no exposure pathways. Based on the information submitted, the spill source has been remediated to the extent feasible and residual groundwater impacts are likely to continue to attenuate naturally. The site no longer poses a threat to human health and the environment. This spill is closed."

Remarks:

"TEST SHOWED UPPER PORTION OF TANK SYSTEM TO BE AT FAULT , PRODUCT LEVEL WAS BELOW PROBLEM LEVEL. THEY RECOMMEND TO ISOLATE THE TANK OR A HELIUM TEST BE DONE."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "tff ltr sent 1/14/2005 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 7/9/07: This spill case was transferred to Kartik Chanda (Chanda) 7/30/07: Chanda sent a Tank Test Failure letter to RP requiring that the followings be submitted to DEC for review by September 14, 2007. 1. An explanation of the cause of the tank system failure; 2. Either a description of the work performed to restore the integrity of the tank system (including retesting results), or a description of the work performed to close (decommission) the tank; 3. Information regarding petroleum contamination found at the site and cleanup activities (if any) associated with a release from this tank system; 4. Any available documentation (i.e., invoices, bills, sampling analysis reports, etc.) pertaining to the work performed at this site associated with this violation. 9/6/07: Chanda received a letter with attached the following documents regarding this spill site dated 8/15/07, from Rose Giragosian on behalf of owner: 1. Letter of completion(NYC Dept. of Bldg.) 2. Letter of Rockway Fuel Oil Corp. ( oil burner installation) 3.Certificate of approval for oil burning installation ( NYC Dept. of Bldg.) 4.Work Permit NYC Dept. of Bldg.(08/29/05) Abandon buried 3000 gallon fuel oil tank. Install replacement (2) 275 gallon tank. 5.Plan and Drawing of abandon/install replacement fuel oil tanks prepared by New York Engineering Associates, P.C. 9/17/07: Chanda sent a letter to RP( John Garofalo/Giovanni Garofalo)requiring that the following documents be submitted to DEC for review by October 30, 2007. 1.Tank closure assessment reports. 2.Locations of tank and/or line test failure. 3.Subsurface investigation report, including current and historical soil and groundwater analysis. 4.Surrounding property sketch: A surrounding property sketch including property layout and usage must be submitted to NYSDEC. North arrow and scale must also be included on the site plan. 10/26/07: DEC received a letter with UST test results submitted by Petroleum Tank Cleaners, Ltd. dated 7/13/2005. 1/28/08:Kartik Chanda of DEC has reviewed the tank tightness test results and certificate of temporary abandonment of the tank for this site. The Department requires the followings: 1.Collection of Soil Samples from Abandoned Tankfield and analysis. 2.Collection of a Groundwater Sample and analysis. 3.Collection of Soil Samples from Piping Run and analysis. 1/29/08: Chanda sent a letter to RP, requiring that an investigation report be submitted to DEC by 3/14/08 for review and approval. 4/1/08: Chanda received a phone call from Petroleum Tank Cleaners, Ltd.( Mr.Mark)Ph. 718-624-4842, he stated that the investigation report is sent to DEC on 4/1/08. Chanda received soil analytical

result from Petroleum Tank Cleaners, Ltd. via fax. 4/9/08: Chanda received an Investigation Report from Petroleum Tank Cleaners, Ltd., dated April 1, 2008.(see eDocs) 4/20/08: Chanda has reviewed the investigation report and has the following comments: \*This spill was opened when a tank test failure on 1/6/05. The failure was a dry portion leak. The tank was emptied and the lines were pressure tested separately and the vent line was found to leak. The tank was isolated and tested by itself and found to be tight. \* The UST was closed in place. Seven soil samples were taken from around the tank and pipe run area. The samples were taken from 12 feet bgs and analyzed by EPA Method STARS 8260 and 8270. PID Meter did not detect any presence of oil in any of the samples. The soil analytical results showed no VOCs. Several SVOCs (Fluoranthene, Phenanthrene and Pyrene) showed higher concentrations. 4/21/08: Chanda discussed with Joe Sun (NYSDEC) regarding the investigation findings at this site.Based on the information presented to the Department. DEC closed this spill. (Joe & Chanda) A NFA letter was issued to Mr. John Garofalo(RP), Mr. Mark Salamack(Petroleum Tank Cleaners, LTD) "

Remarks: "NON-CONTAMINATING LEAK."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was DEMEO sent tank test failure letter 2/17/04 TJD Passing tank test report received. No information provided regarding cause of original TTF, repairs made or contaminants encountered during investigation and repair. Second letter sent to registered owner requiring submission of information required in Bullet #3 of Option #1 as outlined in standard TTF letter. 3/17/04 TJD RP has submitted a letter from ProTest which states no releases from tank or piping were evident. Cause of original TTF was reported to be a failed stick line and a failed vent line. Based upon information submitted no further action is required. Spill closed."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SUN 04/05/2004-Sub-File Update by Sun- Update Report-October 2003 through November 2003- prepared by EnviroTrac-Ten (10) monitoring wells were gauged and sampled on 11/10/03. The groundwater flow direction is towards the north. No measureable amount of free product was detected in any monitoring wells. Per DEC's approval, the air sparge (AS) and soil vapor extraction (SVE) systems were turned off on May 3, 2002. Prior to turning the system off, an air effluent sample was collected from the SVE system for BTEX and VOC analyses. The analytical results showed that the concentrations of Benzene, Toluene, Ethylbenze and Xylene on all of the monitoring wells with the exception of MW-10 were found not detected (ND). The maximum concentration of BTEX is on MW-10 at 28,9 ppb. The concentrations of MTBE ranged from 1.6 ppb (MW-7) to 62 ppb (MW-8). See also spill 9700124. Rommel. 05/09/05-File Update by Sun: A project review meeting was held on 05/05/05 between the Department, the Hess' Manager and Hess' consultant (EnviroTrac). Per EnviroTrac, Monitoring Well MW-8 appears to have been destroyed during construction activities in the sidewalk area adjacent to the location. A replacement well for MW-8 will be installed once the necessary permits are obtained from the New York City Department of Transportation (NYSDOT). EnviroTrac will inject calcium peroxide in the northern sidewalk of 38th Avenue to address the trace concentrations of MTBE detected in MW-8 in the past few times the well was sampled. The newly installed replacement well will be used

to determine the effectiveness of the calcium peroxide injection. If concentrations of MTBE decrease to approximately 30 parts per billion (ppb), site closure will be proposed as discussed during an April 21, 2004 meeting between Hess, EnviroTrac and the Department. (WJS) 10/28/05: Project reassigned from Sun to Andersen. Monitoring report overdue. Need update on results of injecting calcium peroxide into MW-8. 11/21/05: NFA letter sent."

DEC Memo: "12/11/06-Hiralkumar Patel. DEC Sangesland spoke with Jim at Metro fuel on 12/06/06. as per Jim, they delivered 500 gal of oil at site. site has 1080 gal UST. after delivery, they got call from owner complaining oil odors. Metro fuel sent crew for any cleaup. they found no oil at vent pipe. cleanup crew measured oil level in tank for long period of time and it was steady at 29 . Metro believes that spill may have happened at fill line. Jim spoke with owner and owner told him that fill line was repaired in summer by ABC Tank. Jim asked owner to call ABC to find out if there is any leak in fill line. spoke with Steve today. as per Steve, spill was from return line from connection at boiler. spill was on concrete and no soil was impacted. ABC Tank cleaned up. no more vapor complaints. case closed."  
Remarks: "not sure if the tank or suction line is leaking still investigating"

DER Facility ID: 75016  
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SANGESLAND INVESTIGATION PERFORMED BY BERNINGER ENVIRONMENTAL. CLOSED 5/24/2000 BY C TOMASELLO. SEE ARCHIVE FILE. Case reactivated December 2000 by Randy Austin due to Soil Mechanics report showing contamination. Soil Mechanics was hired by a possible property purchaser to do soil borings for construction purposes. During this event, samples were taken at one point. 3/15/2001 Sangesland met with Walter Berninger and the owner of Clark Forklift. Review was made of Soil Mechanics Report along with reports done by R.W.Weston and others. Basically all of these reports show some levels of contamination in the soil, and trace levels of contamination in the groundwater. Mr. Berninger tried to disprove the Soil Mechanics report, but didn't have the technical data to counter prove it. Sangesland suggested that Mr. Berninger repeat the boring Soil Mechanics took and retest for the same parameters. If the results come back clean then perhaps there was a problem with the Soil Mechanics method of collecting the sample. 3/28/2001 - Sangesland met at the site with Walter Berninger to watch the soil borings being done. A location was selected adjacent to the area of the subject Soil Mechanics sample site. Both soil and water samples were taken, split and submitted to both Pedneault Associates and LI Analytical. 4/9/2001 Berninger Environmental submitted a report showing the results of the testing done at the site. Sangesland had some questions on the format of the data results. 6/5/2001 Berninger resubmitted a 2 page summary table of results from both the soil and water samples taken in March 2001. Table 1 shows soil samples tested to both 8260(Volatile Organics) and 8270 (Semi-Volatile Organics) Table 2 shows groundwater samples tested to 8260 Volatile Organic and 8270 Semi-Volatile Organics Both table show either ND or very low readings for everything. Since Berninger re did the same soil borings & water sampling in the same location as the Soil Mechanics site, AND these samples were taken in front of Sangesland AND all samples were split and sent to 2 labs AND both sets of data came back very low..... The original DEC closure will be reinstated as no further

action status. 11/8/2002 - Sangesland met with the new owners of this property. Susan Pinera of Hertz Corp. (201-307-2547) and Barton Pressly of Jacques Whitford Environmental (914-686-1100). At this meeting they presented results of soil boring investigations they made within the last few months. There were a few minor SVOC exceedences from soil borings taken along the north side of the property. Sangesland told Hertz to call in another spill report, get a new spill number and then submit documentation identifying the extent and risk involved in this spill. "

Remarks:

"TANK TEST FAILURE AT ABOVE LOCATION. BUSINESS ADVISED OF TEST RESULTS. TANK TO BE EXCAVATED/ISOLATED AND RETESTED. NO CALL BACK REQUESTED."

Contact Name: TIM EGAN  
DEC Memo: "6/12/12-Vought-Off hours primary responder. Vought called Hertz (Tim Egan Ph:(201) 307-2526) and cause of spill was generator fuel tank was ruptured with a spill to asphalt and minor contamination to a drywell. They were unloading a diesel powered generator with a forklift and punctured fuel tank (3 hole) in tank releasing 30-gallons of diesel onto asphalt parking lot and some went into catch basin connected to a drywell at 15'bg. Consultant examined catch basin and noted 3/4 inch of free product in bottom of drywell. Egan required that they pour speedy dry into drywell. They notified Cura Environmental and they are mobilizing contractor to examine drywell for clean out possibly with a vactor. Contaminated soil and sediment will be removed and they can sample with a hand auger or a geoprobe. Vought sent and added to E-docs, letter requiring collection of one endpoint sample with a one month due date to: Mr. Timothy Egan Hertz 225 Brae Blvd. Park Ridge, NJ 07656 Email:tegan@hertz.com 6/20/12-Vought-Received call from and spoke to Egan and initial cleanout of drywell was performed and removed two yards of material and are collecting sample. Possible historical impacts in drywell and sample being run for diesel parameters as well as waste characterization. Limited additional excavation may be performed upon receipt and review of analyticals and possible further excavation limited by structural issues. DEC will receive results by 7/20/12. Received message from Dan (Ph:516-805-5944) 8/15/12-Vought-Received call from and spoke to Egan and they are going out to site to perform additional excavation on 8/21 and remove an additional couple of yards and collect endpoint samples. DEC will receive results by 10/1/12. 5/29/14-Vought-Received email from CA Rich(Eric Weinstock Ph:516-576-8844x209 5/30/14-Vought-Received call from someone who was doing research of spill for potential buyer. Vought noted that a Final Report from Cura Emergency Services dated 11/6/12 was received 11/14/12 by DEC. Vought performed database review and noted recent minor spill to spill bucket for UST for open spill 1402150. Vought also noted PBS #2-399531 that is active for site. As per report, A small volume of diesel fuel (estimated at 2 gallons) migrated into a dry well located in the parking lot.

**HERTZ FACILITY (Continued)**

**U001837435**

Adsorbents were applied, brushed into concrete, recovered and containerized for later disposal. Hertz hired Cura Emergency Services to manage cleanup and Cura hired Miller Environmental. Miller removed the impacted adsorbent four days after the spill and the bottom of the drywell was approximately 15' below grade and an additional 8-10' of soil, sediment and debris were removed from the drywell and groundwater was not encountered. One soil sample was collected as it was determined that only a limited amount of material could be removed without potentially damaging the structural integrity of the dry well. Miller returned and cleaned drywell with vacuum truck on 8/21 and groundwater still not encountered and two additional samples were collected (one bottom sample and one sidewall based on direction of surface runoff). Five yards of soil were removed in total and disposed of. Report recommends closure as further excavation of soil was not feasible due to structural issues. Soil analyticals show: 1100ppb ethylbenzene(Bottom 15'bg), 8400ppb xylene(Bottom 15'bg), 7500ppb 1,2,4-trimethylbenzene(Bottom 15'bg), 2700ppb 1,3,5-trimethylbenzene(Bottom 15'bg), 2400ppb ethylbenzene(Sidewall), 22,900ppb xylene(Sidewall). 5/30/14-Vought-Sent email to CA Rich Weinstock that Eric, I just called you but the receptionist noted you were busy. This morning I reviewed the report from Cura Environmental dated 11/6/12 and endpoints from the drywell clean out show up to 2400ppb ethylbenzene and 22,900ppb xylene. The Report notes that further excavation is not feasible due to structural constraints of the drywell. To ensure that we don't have a larger issue, we need to collect one groundwater sample from adjacent to the drywell. As the property may soon be sold (I received a separate call and inquiry from a party representing a potential purchaser), only one sample and not a well is required. I will make every effort to review the results in a timely fashion if you agree to the sample, Let me know your thoughts and feel free to call as well if you wish (917-577-1728) to discuss further. Vought received call from and spoke to Weinstock and he did not have copy of 11/6/12 Cura Report but did note that he received above email. Vought uploaded Cura Report to DEC File Transfer service and sent email to Weinstock noting same. Vought also uploaded Cura Report to D2. CA Rich Weinstock sent email to Vought and confirmed he received the Cura Report. 6/2/14-Vought-Received email from CA Rich Weinstock that Hi Jeff, Thanks for sending over the CURA report. The NYSDEC PBS database indicates that 6 USTs on the site were closed in-place. Do you know if the NYSDEC has a drawing that shows the locations of these tanks? 6/3/14-Vought-Sent reply to CA Rich Weinstock that Eric, Unfortunately here in Region 2-NYC we do not require drawings of tank locations associated with PBS Sites. One of my colleagues who formerly worked in Region 1, (Tim Demeo), noted that in Nassau and Suffolk County the agencies delegated with PBS duties do indeed require these drawings. I would suggest contacting NYCDOB or FDNY Bureau of Fire Prevention as they may have additional information or drawings. Thanks. Vought received reply from Weinstock that Thanks for checking Jeff. I sent a FOIL request to FDNY and we have an expeditor checking with the Building Dept. We will send you a brief Letter/Work Plan for the installation of the boring by the storm drain. We will try to do that next week. We are calling in for utility mark outs today. Vought sent reply to CA Rich Weinstock that Eric, Looks like you got all the bases covered to find any available information on the USTs. I am looking forward to the Letter/Work Plan and please keep in mind that it is imperative that we get to groundwater for a

sample if closure is to be considered (via demonstration that the soil contamination has not reached the water table and become mobile). Thanks again, -Jeff 6/3/15-Vought-Received email from CA Weinstock that A letter/work plan for the collection of one groundwater sample is attached. Thanks for your assistance. We are planning to collect this sample next Wednesday, June 11th. Vought added Work Plan to D2 and performed review. Work Plan included on geoprobe sample on downgradient side of drywell as per USGC Map and groundwater expected at 20-25'bg. Report including map and analyticals will be submitted to the DEC. Vought added Work Plan to D2. 6/5/14-Vought-Called and spoke to CA Rich and he will resubmit work plan to include collection of highest PID and deepest dry sample in addition to collection of water sample. Email from CA Rich Weinstock that Jeff, Attached is a revised letter/work plan as you requested. We are trying to work out an access agreement with the current tenant. I will keep you apprised of our progress. The drilling is still scheduled for this coming Wednesday, 6/11/14. Bobby and Decio, At Mr. Vought s request, we will have to add an additional two soil samples to the work required to address the closure of the spill case number. Have a good day gentlemen. Regards. Vought reviewed revised Work Plan and added to D2 and revision includes collection of deepest dry and highest PID soil samples in addition to a groundwater sample. Vought sent letter approving of Work Plan with cc to CA Rich and added to D2. 7/25/14-Vought-Received email from CA Rich Weinstock on 7/3 that Hi Jeff, Attached is a letter report with the results from the boring we performed for the above-referenced spill. We will also send a paper copy by US Mail. There were no elevated detections in the samples. Give me a call or send me an email if you have any questions. Have a wonderful Holiday weekend. Regards. Vought added attached Request for Spill Closure to D2 and reviewed: Request for Spill Closure (CA Rich Thomas Brown)-7/1/14. CA Rich used a Geoprobe to collect soil samples from 2-20'bg adjacent to impacted drywell and also collected on groundwater sample. Soilsamples non-detect for petroleum VOCs at 2'bg and also at 20'bg and groundwater samples non-detect for VOC's as well. Report requests spill closure. 7/25/14-Vought-Spill closed by Vought as no impact to soil or groundwater adjacent to and below formerly impacted drywell where spill of 30-gallons occurred. Closure letter sent to Tim Egan at address in notes above with CC to CA Rich Weinstock. Vought alo added letter to D2. "

Remarks:

"Generator fuel tank was punctured. Spuill to asphalt, minor contamination to a dry well. Contractor will be enroute in the A.M. to examine dry well. All other fuel was cleaned up at time of spill."

is a construction site where they tore down one building and are in the process of constructing another cinder block building consisting of three sections. I could not recognize any contaminated soil as the melting snow had wet the entire site. I did not smell any oil odors. I met the foreman, Nick Hantzopoulous of Future Evolution, Inc. (construction company; (718) 428-4800). He said he was unaware of any oil spill or contaminated soil. He said the owners are 29 Street Development Co., Astoria (718) 204-2598. I called the number, but no one answered and there wasn't an answering machine. The address of 29 Development is: 34-16 30 Ave., Astoria, 11431. I will send a contaminated soil letter. 12/6/05-Vought-Spoke with Officer Mat who performed site visit on 12/5/05. Mat did not detect any petroleum odors at time of site visit. Mat will perform second site visit on 12/7/05 to further question site personnel regarding remediation of site. Mat will contact Ketani for possible site visit. 12/7/05 - Raphael Ketani. I met ECO Mat at the site we walked over the work site. It was loaded with construction debris on the ground. We didn't see any oil staining and we didn't smell any oil odors, though it was about 32F. The owner of the site is: Mario Nardello, 211 Ridge Road, Douglaston, NY, 11362. I will send Mr. Nardello ((718) 428-4800) a contaminated soil letter. I found a Tank Assessment Report produced by the former environmental company, CGI Environmental and Engineering Consultants. There was a 1,080 gal. UST located just left of the center of the former building with the street. Soil borings were taken, but no data is presented in the report. CGI stated it was too difficult to take borings and hit refusal. No groundwater was encountered. The tank appears to have removed. 12/13/05 - Raphael Ketani. Mr. Steve Talitis (646)208-6512 called me to ask what needed to be done at the site. He is part owner of the site with Mr. Nardello. He said Mr. Nardello gave him a copy of the contaminated soil letter. I told him that he had to hire an environmental company and do a soil investigation. He said he will. I FAXed him (718) 204-2502 a copy of the original spill report. His mailing address is: P.O. Box 56036, Astoria, 11105. He bought the property at the end of June 2005. There is no PBS case. 12/19/05-Feroz-Spill transfered from Ketani to Feroz. Response to above letter due to DEC on 2/6/06. 02/13/06. Feroze talked with Mr. Steve Talitis (646)208-6512 . He told me that he will talk with me with documents on 02/14/05. 02/21/06 Feroze, I received a letter from Mr. Brian Pendergast of American Env. solution Inc 631-234-7971. They will work with that site. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 04/06/06-Hiralkumar Patel. Left message for Brian at American Environmental. 04/07/06-Hiralkumar Patel. REceived call from Brian and he will drop report next week. 05/05/06-Hiralkumar Patel. Spoke to operator and she has report. she will mail today. 05/10/06-Hiralkumar Patel. spoke to operator. she already mailed that report. i haven't got it. she will fax me body of report today. Received report from AES. abstract: - site is currently a vacant lot - four soil borings were installed at three four-foot intervals (0-4, 4-8 & 8-12) to a depth of twelve ft surrounding the former tank location. - one soil sample was composited from each borings. - Samples SB-1, SB-2 & SB-3 were composited from depths of 0-12'. sample SB-4 was composited from 0-6' because refusal was encountered. -----SB-1-----SB-2-----SB-3-----SB-4 -----limit Benzo(a)anthracene-----1,600-----10,000-----3, 100-----770-----224

000-----810-----400  
Dibenzo(a,h)anthracene-----240-----1,  
500-----400-----150-----14 all concentrations are in  
ppb. - Recommendations: \* material located in this site should be  
excavated, properly characterized and disposed off. \* endpoint  
samples must be collected following the excavation of the material  
exceeding the TGAM limit. Spoke with Steve Tallides. they are  
developing this site as commercial and residential site. Steve  
Tallides 35-11 36th Street Astoria, NY 11106 PH. (646) 208-6512 FAX  
(718) 392-3406 Spoke with Tom Smyth (631-851-1600 Ext. 207) at GCI  
Environmental. as per his notes, they have removed 1080 gal fuel oil  
UST and took some soil samples and found contamination. he will call  
back once he pull out all the documents he has on file. Spoke with  
Brian. they have took soil samples only around tank and haven't took  
any soil samples from other part of building. he doesn't know that  
GCI was involved previously. if he gets the previous report from  
owner, he will forward me that. 05/11/06-Hiralkumar Patel. Left  
message for Tom. Tried Brian's number but he is out of office and  
will be back in afternoon. REceived call from Brian. he only took  
soil samples around tank and he hasn't encountered groundwater at 12  
ft depth. he screened those samples at site and hasn't got any  
readings from sample at 12 ft depth so to save lab cost, he asked for  
composite sample. he hasn't take any other sample. so he doesn't know  
about any contamination beyond his sampling location as well as any  
contamination in other part of property if there is any. he spoke  
with current owner and as per him, previous owner did some kind of  
work. current owner doesn't have any reports. 05/15/06-Hiralkumar  
Patel. Left message for Tom. Received message from Tom. Spoke to Tom  
and he will send me previous report through email. Received email  
from Tom -----

GlacierMr. Patel, Attached is the Tank Closure report and the  
appendices which were sent to Ms. Tipple. Please call if you have any  
questions. Thanks, Tom P. Smyth President GCI 1092 Motor Parkway  
Hauppauge, New York 11788-5228 1-800-842-5073 x 207 Phone:  
631-851-1600 x 207 Fax: 631-851-0535

----- email contains  
tank excavation assessment report. abstract of report: - 1080 gal UST  
was located inside the building under the foundation floor. - 1080  
gal UST was removed by Elite Environmental & Tank Tightness Testing  
Services. - on Dec. 1 & 2, 2004, total of 220 gal of fuel oil/sludge  
was pumped from the tank by Enviro Waste. copy of waste disposal  
manifest for the fuel oil/sludge has not yet been forwarded to GCI. -  
overlying concrete and soil were removed by hand excavation. - top of  
the fuel oil UST was located 2 ft bg. - 1080 gal fuel oil UST was cut  
into pieces and removed from the excavation pit. - TOTAL OF THREE  
HOLES WERE IDENTIFIED IN THE BOTTOM OF THE TANK. - total depth of the  
excavation pit was noted to be 6 ft below the foundation floor. -  
copy of disposal receipt for the tank has not yet been forwarded to  
GCI - total of six soil samples were collected. four samples from  
side walls, two samples along the bottom of the excavation pit. - two  
soil samples obtained from the bottom of the excavation pit were  
noted to be stained and exhibiting a distinct petroleum odor. samples

exhibited elevated field screening readings above 100 ppm with PID - on Jan. 17, 2005, a total of three soil borings installed, designated as SB-1, SB-2 & SB-3, along the bottom of the excavation pit. - representative soil samples were collected from each of the borings in two ft intervals. borings were installed to a final depth of approx. 6 ft below the bottom of the excavation pit (approx. 12 ft below the foundation floor), at which point refusal was encountered. - groundwater was not encountered during the installation of the soil borings. - SB-1, SB-2 & SB-3 were all noted to be exhibiting a strong petroleum odor and revealed elevated PID screening readings in excess of 100 ppm. - based upon the field data, it was determined that no representative soil samples would be submitted for laboratory analysis. - based on the remote location of the pit where the UST was located, further excavation of contaminated soil is extremely difficult. - properties immediately adjacent to the subject property are composed of commercial, industrial and residential properties. - according to groundwater contour maps provided by the USGS, the depth to groundwater at the subject site is located approx. five to ten ft ABOVE MEAN SEA LEVEL. Spoke to Mr. Tallides and Mr. Pendergast. they will meet on site on Thursday May 18, 2006 at 10 AM. send out report to Mr. Pendergast and asked to bring scaled site plan with previous tank location with soil boring location at following email address: ampendergast@aol.com 05/18/06-Hiralkumar Patel. Visit site. spoke to Brian and Steve. site is under construction, but still there is an open way to do soil excavation work. asked Brian to find out exact location previous tank and to take at least three soil samples at the location of previous tank. Steve suggest to start excavation instead of wasting time for soil sample results. told Brian to take end point samples from excavation and asked to remove soil around the previous tank location as they are showing high SVOCs. there is a scaffolding on side walk they are removing it on Tuesday May 23, 2006 and after leveling the area inside complex they will start excavating probably on Friday May 26, 2006. CSL sent out to Steve with soil and groundwater delineation, endpoint sampling and vapor barrier requirements. faxed to Steve and Brian. 06/06/06-Hiralkumar Patel. Received call from Brian. he hasn't heard back from Steve for further work. as per Brian, City agency has ordered to stop work. Spoke to Steve (Cell: 646-957-5450). as per him, Brian himself will be doing soil borings this Thursday. Spoke to Brian again. he will talk to Steve and decide with dates. 06/28/06-Hiralkumar Patel. Received endpoint sample result from Brian through fax. three samples taken from bottom of excavation. no contamination found. will send closure report. 06/29/06-Hiralkumar Patel. Spoke to Brian. they dug out upto 12' bg and took three bottom samples. asked Brian to take one sample from each sidewall also as excavation pit is still open. he will take sidewall samples and pictures tomorrow and will send lab results once he gets it. 07/18/06-Hiralkumar Patel. Received message from Brian. he took sidewall samples and will send lab results as he gets it. 07/19/06-Hiralkumar Patel. received message from Brian. spoke with Brian. he got sidewall sample results and as per Brian, samples are ok. they will backfill excavation pit for safety reasons. Brian will send lab analyticals. received lab results for side wall samples. very little SVOC contamination found in samples. 07/20/06-Hiralkumar Patel. Received message from Brian. left message for Brian to backfill excavated pit. 07/28/06-Hiralkumar Patel. Left message for Brian to send final closure report. 08/29/06-Hiralkumar Patel. spoke with Brian. he is waiting to get paid for work that he has done

DER Facility ID: 324501  
DEC Memo: "12/14/06-Vought-Daytime runner. Performed site visit and Petro and homeowner on site. Tank is 275 AST located under basement living room stairway and spill originated from pinhole size leak that began yesterday. Homeowners noticed leak due to odors yesterday however were home during entire week (spill was recent and as a result low volume). Spill on soil and approximately one square foot of soil was affected. Due to minor amount of spill and poor access issues to area under stairway Vought required excavation and disposal of top few inches of soil with no endpoint sample collection due to minimal size of excavation. Vought advised home owner to seal area with concrete once small excavation was backfilled. Total amount of feasible soil removal is less than 5 gallons total. Spill closed by Vought."  
Remarks: " OIL SPILL IN BASEMENT , UNDER STAIRS PETRO OIL ON SCENE "

DEC Memo: "1/22/08 - Raphael Ketani. I was finally able to reach Frank Inoa of the NYC Housing Authority (718) 707-5718. He said that the problem was with boiler #2. He said that from all of the vibration, the compression feeding pipe came loose and 20 gals. of oil leaked out. He said that the oil spilled onto the floor, then into a drain, and finally ended up in a pit, but it never made it to the City sewer. The pit was vacuumed out and cleaned. The floor was cleaned with Dri-Zol. The pipe was repaired. He said there are on cracks in the floor and the soil was not affected. Based upon the small size of the spill, the fact that it didn't reach the City sewer, and the effective cleanup of the spill, according to Mr. Inoa, I am closing the spill case."

Remarks: "VALVE LEAK AND CLEAN UP IN PROCESS"

"5/10/05 - consolidated spill # 9008488, 9310628, 9604146 to this spill record for tracking purposes. All the other spills are tank failure and release to soil/GW. - KST 5/10/05 - Amar Nagi notified me of a tank installation job at the Ravenswood Housing Project. We went to the scene on 21st Street. We saw two 30-40K tanks installed, and partially buried. I took a few pictures which can be found in eDocs - NYCHA-Ravenswood folder. Spoke to PBS Unit and could not find any sub-mod notification. Will refer to John Urda - regional attorney for possible followup enforcement. Need to check with PBS to see if they violated the 30-day notification requirement in 6NYCRR Part 612.2d. - KST 11/1/05: This spill transferred from J.Kolleeny to S.Kraszewski. 11/10/05: Reviewed Site Assessment Report prepared by Kosuri Engineering & Consulting P.C. dated May 2005. Six soil borings taken around USTs 3 and 4 performed January 10-12, 2005 indicate marginal levels of two SVOCs in B2 and B4. As seen above, both tanks have been removed and contaminated soil discovered- unaware of any post excavation samples. - SK 01/25/06: This spill transferred from S.Kraszewski to Q.Abidi. 03/29/06: This spill transferred from Q. Abidi to Koon Tang. 09/23/10: J.Kann - spill transferred from K. Tang to J.Kann. 3/1/12: J.Kann iwp rcvd 2/28/12 and edocd today 07/22/13 - Re-assigned from Kann to Hussein (JOC) 11/16/15: J.Kann - site is a part of the NYCHA portfolio and has been reassigned to the NYCHA

I called him back and left a message. 3-14-16 - Obligado - I called Mr. Granholm again 5163273000. I left a message to call back the dEC 3-28-16 - Obligado - I spoke with mR. Granholm. They are trying to get approvals to pull out the tank. The tank is empty as they had switched to gas. The tank is a UST located underneath a DOT owned parking lot, and they have been having a hard time getting permits to remove the tank. Once permits are obtained he will let me know. 6-9-16 - Obligado - I received a UST Closure Report, submitted by Castleton Environmental. The 2000 gallon AST turned out not to be empty and was pumped of 1809 gallons of #2 fuel oil prior to removal. All four endpoint samples were below CP51 SCOs. Waste manifests were included for the liquid and sludge removal. This spill is closed."

**Summary Details:**

Conditions at proposal August 16, 1989): The Radium Chemical Co., Inc. (RCC) Site consists of a one-story brick building at 60-06 27th Avenue in a densely populated residential and commercial area in Woodside, Queens Borough, New York City, New York. Established in Manhattan in 1913, RCC transferred operations to Woodside in the late 1950s. An unrelated firm occupies part of the building, sharing a common wall with RCC. Initially, RCC produced luminous paint for watch dials and instruments. Later it manufactured radium-containing needles and other sealed devices largely for cancer therapy) for lease or sale to hospitals and research laboratories. Over the past 20 years, safer techniques involving cobalt and cesium have been developed, significantly reducing the use of radium devices. In 1983, the New York State Department of Labor suspended RCC's operating license because of various disposal and safety infractions, and in 1986, the company was denied permission to resume operations. In 1987, the State ordered RCC to remove the radium and decontaminate the building. The owner said he could not afford the cleanup and abandoned the operation, leaving a large number of sealed containers, some of which appeared to be leaking radium and radon gas. The radium-226 present was estimated to be 110 curies. Also on the site were hundreds of containers of laboratory chemicals, many reactive, corrosive, flammable, and potentially shock sensitive. Elevated levels of radiation have been measured inside certain areas of the building. On February 10, 1989, the Agency for Toxic Substances and Disease Registry of the U.S. Department of Health and Human Services issued an advisory warning that the RCC site poses a significant threat to public health because of the possible release of radium-226. Under Section 300.425 c) 3) of the National Contingency Plan, the Federal regulation by which CERCLA is implemented, a site can be placed on the NPL if 1) a public health advisory has been issued recommending that people be removed from the site, 2) EPA determines that the site poses a significant threat to public health, and 3) EPA anticipates that it will be more cost effective to use its remedial authority available only at NPL sites) than its emergency removal authority to respond. The advisory discusses two concerns. One is that an intruder might enter the RCC site from the adjacent firm as has happened in the past) and remove radioactive materials. The second concern is a serious accident. The U.S. Department of Energy's Lawrence Livermore Laboratory modelled scenarios involving a gasoline tanker accident on the Brooklyn-Queens Expressway, 15 feet east of the site. The estimated 27,000 people living within 1 mile of the site could be exposed to any radiation released. In July 1988, at the request of the State, EPA undertook a limited removal action using CERCLA emergency funds. EPA provided 24-hour security and took measures to stabilize the site. In April 1989, EPA began removing the radioactive and hazardous materials to approved disposal facilities. Status November 21, 1989): EPA completed removing materials from the site in October 1989 and is determining how to decontaminate and dismantle the RCC site.

RADINFO (Radiation Information Database) contains basic information about certain facilities that the U.S. Environmental Protection Agency (EPA) regulates for radiation and radioactivity. The regulations that govern radiation across the federal government are complex, and, therefore, RADINFO may not include every facility you might expect to find.

. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

**Biennial Reports:**

Last Biennial Reporting Year: 2017

**Annual Waste Handled:**

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 1672

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 1672

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Description:	42-14 19th Avenue was originally operated from 1964 until the mid-1980s by Chemical & Solvent Distillers (CSD) which was owned by Chemical Waste Disposal Corp. (CWD). Both entities shared the same owner and physical address. The parties filed jointly for a Part A application (RCRA Interim Status) in 1980. CSD ceased operations in 1983 and CWD assumed corrective action and remedial responsibilities for the site. During this time in the operational history, the companies operated a dry-cleaning solvent distribution and recovery service including batch stills, boilers and enclosed and open storage areas. Solvents were reprocessed and lab chemicals were repacked for land disposal. A revised Part A application for a permit to manage hazardous waste was submitted by CWD in 1985 and the facility operated under interim status until September 28, 1993 when a 6NYCRR Part 373 permit was issued to the facility. An application for transfer of the Part 373 permit was requested and approved in conjunction with the transfer of ownership to new owners in April of 1997. In August of 2003, Triumvirate Environmental LLC (NYC) purchased the facility and has operated on site since that time. Triumvirate collects and consolidates hazardous liquid and solid wastes for transfer and disposal at regulated facilities. No disposal occurs at this site.

**FINDS:**

Registry ID: 110000616566

**Environmental Interest/Information System**

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

**HAZARDOUS WASTE BIENNIAL REPORTER**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Biennial Reports:**

Last Biennial Reporting Year: 2017

**Annual Waste Handled:**

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 18036.7

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 4252.4

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

DEC Memo: "15-DEC-2000 08:45 Astoria Tunnel At this time Lima Jones reported that C. Valenti discovered a spill at 08:20 of at least 10 gallons of Dielectric fluid from a feeder cable in the tunnel. The spill has entered the sump in the tunnel and it is unknown at this time if the oil water seperator has contained the oil. 09:33 Lima Jones reports that the leak from feeder 71 return line 2r is in excess of 2000 gallons. The oil leaked into a sump. When the leak was discovered, the sump pump was shut down and the oil water seperator inspected for oil. The seperator contained no oil. Samples will be taken to determine PCB content if any. 12/15/00 Oil/water samples were taken for Benzein. Sample taken to ECOTEST. Oil sample taken for PCB. Sample sent to Con Ed ChemLab. Oil/water from sump will be pumped from sump into first stage of Oil/Water separator for holding and then pumping into frap tank. The second stage of the Oil/Water

separator will be used as containment in the event that the first stage spills over. 1/5/01 Job closed out. Repairs were completed on 12/15/00 at approx. 1:30 pm. 3/15/05 This spill was returned for more information. As per Charlie Valenti (tunnel group) all 2000 gallons of oil was recovered by pumping it up into the oil/water holding tank and then pumping it into a frac tank. A sleeve was welded on the feeder pipe to complete repairs. The tunnel and sump were pressure washed and completely cleaned. No problems since."

Remarks: "LEAK IS UNDER INVESTIGATION - CASE #134778 - GREATER THAN 2000GAL FROM FEEDER M71 - ATTEMPTING TO CLAMP THE LEAK - IN TUNNEL ONLY"

provided in the Fuel Oil Tank Farm Investigation Report, parts 1 and 2 (see spill 8602570 eDocs). Prior to Sept, 2004 data translation this spill Lead\_DEC Field was O'CONNELL 10/10/95: This is additional information about material spilled from the translation of the old spill file: 10-20 GAL. 4/96: According to Draft Data Summary and SWMU/AOC/Spills Evaluation Report Volume II prepared by ENSR, this spill was approximately 20,000 gallons. 11/21/01 e-mail from A. Oliver, Orion Power: Jane/ Sam, The following is provided as an update to DEC Spill No. 0108426. On November 19, 2001, subsurface trenching was being conducted at the Astoria Generating Station - Fuel Oil Tank Farm with the use of a Vactron Unit. The work was being conducted for utility clearance purposes prior to performing a geotechnical boring. At approximately 0900, during the clearing of an L-shaped trench, petroleum odors were noted at a depth of 5 to 5.5 feet below land surface (ft bls). At approximately 1020 a sheen of petroleum product was discovered at the apex of the trench when the groundwater table was encountered at a depth of approximately 6.5 ft bls. At the request of Orion Power, ARCADIS G&M notified the NYSDEC of this incident through the telephone hotline (Operator 281). The L-shaped trench is located approximately 19.4 ft south of Well K106 and approximately 72 ft east of K91. The depth to water in well K106 is consistent with the depth to groundwater encountered in the L-shaped trench. As discussed during our telephone conversation today, Orion Power requests that this newly reported spill (Spill No. 0108426) be closed out and assigned into existing Spill Nos. 1/47 (DEC Spill Nos. 9011256 and 8602570 respectively). Please contact me at (315) 413-2769 if you need any additional information regarding this matter. Thanks, Andrew Oliver."

Site Description:

Location - The 0.5 acre site is located at 32-01 57th Street in the Borough of Queens, Queens County, NY in an urban area. Site Features - The site currently consists of a building undergoing renovation and a partial addition which is planned as a community center for the Tibetan Community of New York & New Jersey. Current Zoning and Land Use - The site is currently zoned as M1-1 (light industrial zone which also allows for commercial and residential uses) and is surrounded by both light industrial and residential parcels. The site is bounded on the North by 32nd Avenue, to the East by 58th Street, to the South by Northern Blvd, and to the West by 57th Street. Past Use of the Site - The site was most recently occupied by a one story brick and concrete block warehouse building and a paved parking lot. The warehouse was most recently occupied by a clothing factory and a food storage facility. Historical on-site uses included hardware manufacturing which may have used solvents and heavy metals. Petroleum Bulk Storage number 2-601962 is assigned to this site for a 1,080 gallon UST converted to non-regulated use in 1996, a 1,080 gallon #2 fuel oil UST closed in place in 1994, and a 3,000 gallon #2 fuel oil UST closed in place in 2004. Site Geology and Hydrogeology: Soil borings conducted in 2011 and 2012 indicate a mix of brown silt, sand, and fine gravel. Groundwater is present at approximately 38 feet below grade. The East River is located approximately 2.5 miles west of the subject property.

Env Problem:

Nature and Extent of Contamination: Data was collected during 2 different investigations: one by AKRF in 2011 and one by AirTek in 2012. Soil and groundwater samples were collected and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides and PCBs. Soil vapor samples were analyzed for VOCs. Based on the results of the investigations, the primary contaminants of concern at the site are chlorinated VOCs including tetrachloroethene (PCE) and trichloroethene (TCE). Soil No petroleum-related or chlorinated VOCs were identified in shallow soil at concentrations above the unrestricted use soil cleanup objectives. Groundwater one groundwater sample was taken which detected PCE at 0.96ppb. Soil Vapor Chlorinated VOCs were detected at up to 7,000 ug/m3 for PCE and up to 20,000 ug/m3 for TCE.

Health Problem:

As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ***Federal Delisted NPL site list***

#### Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Quarterly

### ***Federal CERCLIS list***

#### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 04/06/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Varies

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/09/2018	Source: EPA
Date Data Arrived at EDR: 02/06/2018	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 66	Next Scheduled EDR Contact: 07/30/2018
	Data Release Frequency: Quarterly

### ***Federal CERCLIS NFRAP site list***

#### SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/09/2018	Source: EPA
Date Data Arrived at EDR: 02/06/2018	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 66	Next Scheduled EDR Contact: 07/30/2018
	Data Release Frequency: Quarterly

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/26/2017	Telephone: 800-424-9346
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (212) 637-3660
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (212) 637-3660
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (212) 637-3660
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (212) 637-3660
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/16/2018	Source: Department of the Navy
Date Data Arrived at EDR: 02/22/2018	Telephone: 843-820-7326
Date Made Active in Reports: 05/11/2018	Last EDR Contact: 05/09/2018
Number of Days to Update: 78	Next Scheduled EDR Contact: 08/27/2018
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/27/2018	Telephone: 703-603-0695
Date Made Active in Reports: 05/11/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 73	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

#### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/27/2018	Telephone: 703-603-0695
Date Made Active in Reports: 05/11/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 73	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 01/16/2018

Date Data Arrived at EDR: 01/19/2018

Date Made Active in Reports: 03/23/2018

Number of Days to Update: 63

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Next Scheduled EDR Contact: 07/09/2018

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 02/12/2018

Date Data Arrived at EDR: 02/14/2018

Date Made Active in Reports: 03/27/2018

Number of Days to Update: 41

Source: Department of Environmental Conservation

Telephone: 518-402-9622

Last EDR Contact: 05/16/2018

Next Scheduled EDR Contact: 08/27/2018

Data Release Frequency: Annually

## ***State and tribal landfill and/or solid waste disposal site lists***

SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/08/2017

Date Data Arrived at EDR: 01/02/2018

Date Made Active in Reports: 01/31/2018

Number of Days to Update: 29

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

### ***State and tribal institutional control / engineering control registries***

#### RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

Date of Government Version: 11/18/2010	Source: NYC Department of City Planning
Date Data Arrived at EDR: 06/30/2014	Telephone: 212-720-3401
Date Made Active in Reports: 07/21/2014	Last EDR Contact: 03/23/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/02/2018
	Data Release Frequency: Varies

#### ENV RES DECL: Environmental Restrictive Declarations

The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

Date of Government Version: 06/27/2017	Source: New York City Department of City Planning

Data Release Frequency: Varies

### VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 02/12/2018

Data Release Frequency: Semi-Annually

#### ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Date of Government Version: 02/12/2018  
Date Data Arrived at EDR: 02/14/2018

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: No Update Planned

#### DEL SHWS: Delisted Registry Sites

A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

Date of Government Version: 02/12/2018  
Date Data Arrived at EDR: 02/14/2018  
Date Made Active in Reports: 03/27/2018  
Number of Days to Update: 41

Source: Department of Environmental Conservation  
Telephone: 518-402-9622  
Last EDR Contact: 05/16/2018  
Next Scheduled EDR Contact: 08/27/2018  
Data Release Frequency: Quarterly

#### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/22/2018  
Date Data Arrived at EDR: 03/01/2018

Next Scheduled EDR Contact: 08/27/2018  
Data Release Frequency: Varies

#### HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 01/01/2002  
Date Data Arrived at EDR: 07/08/2005

### **Other Ascertainable Records**

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/11/2017

### US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 01/11/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/19/2018	Telephone: 202-566-1917
Date Made Active in Reports: 03/02/2018	Last EDR Contact: 03/27/2018
Number of Days to Update: 42	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 05/07/2018
Number of Days to Update: 88	Next Scheduled EDR Contact: 08/20/2018
	Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/03/2015	Telephone: 703-308-4044

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016	Source: EPA
Date Data Arrived at EDR: 06/21/2017	Telephone: 202-260-5521
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 03/23/2018
Number of Days to Update: 198	Next Scheduled EDR Contact: 07/02/2018
	Data Release Frequency: Every 4 Years

### TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2016	Source: EPA
Date Data Arrived at EDR: 01/10/2018	Telephone: 202-566-0250
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/23/2018
Number of Days to Update: 2	Next Scheduled EDR Contact: 06/04/2018
	Data Release Frequency: Annually

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 04/09/2018
Number of Days to Update: 77	Next Scheduled EDR Contact: 08/06/2018
	Data Release Frequency: Annually

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/09/2018	Source: EPA
Date Data Arrived at EDR: 02/06/2018	Telephone: 703-416-0223
Date Made Active in Reports: 05/11/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/18/2018
	Data Release Frequency: Annually

### RMP: Risk Management Plans

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/02/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/17/2017	Telephone: 202-564-8600
Date Made Active in Reports: 12/08/2017	Last EDR Contact: 04/20/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 08/06/2018
	Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

### PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 10/17/2014	Telephone: 202-564-6023
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 04/27/2018
Number of Days to Update: 3	Next Scheduled EDR Contact: 08/20/2018
	Data Release Frequency: Quarterly

### PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 06/01/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: 202-566-0500

Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006  
Date Data Arrived at EDR: 03/01/2007  
Date Made Active in Reports: 04/10/2007  
Number of Days to Update: 40

Source: Environmental Protection Agency

Next Scheduled EDR Contact: 03/17/2008  
Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### INDIAN RESERV: Indian Reservations

This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

Date of Government Version: 12/31/2014	Source: USGS
Date Data Arrived at EDR: 07/14/2015	Telephone: 202-208-3710
Date Made Active in Reports: 01/10/2017	Last EDR Contact: 04/11/2018
Number of Days to Update: 546	Next Scheduled EDR Contact: 07/23/2018
	Data Release Frequency: Semi-Annually

### FUSRAP: Formerly Utilized Sites Remedial Action Program

DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

Date of Government Version: 12/23/2016	Source: Department of Energy
Date Data Arrived at EDR: 12/27/2016	Telephone: 202-586-3559
Date Made Active in Reports: 02/17/2017	Last EDR Contact: 05/07/2018
Number of Days to Update: 52	Next Scheduled EDR Contact: 08/20/2018
	Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 06/23/2017	Source: Department of Energy
Date Data Arrived at EDR: 10/11/2017	Telephone: 505-845-0011

Number of Days to Update: 23	Next Scheduled EDR Contact: 09/03/2018
	Data Release Frequency: Varies

### LEAD SMELTER 1: Lead Smelter Sites

A listing of former lead smelter site locations.

Date of Government Version: 01/09/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/06/2018	Telephone: 703-603-8787
Date Made Active in Reports: 03/02/2018	Last EDR Contact: 04/27/2018
Number of Days to Update: 24	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Varies

### LEAD SMELTER 2: Lead Smelter Sites

A list of several hundred sites in the U.S. where secondary lead smelting was done from 1931 and 1964. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust

Date of Government Version: 04/05/2001	Source: American Journal of Public Health
Date Data Arrived at EDR: 10/27/2010	Telephone: 703-305-6451
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 12/02/2009
Number of Days to Update: 36	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Next Scheduled EDR Contact: 06/25/2018

Data Release Frequency: Annually

### E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

Date of Government Version: 02/14/2018

Date Data Arrived at EDR: 03/23/2018

Date Made Active in Reports: 05/14/2018

Number of Days to Update: 52

Source: New York City Department of City Planning

Telephone: 718-595-6658

Last EDR Contact: 03/19/2018

Next Scheduled EDR Contact: 07/02/2018

Data Release Frequency: Semi-Annually

### Financial Assurance 1: Financial Assurance Information Listing

Financial assurance information.

Date of Government Version: 12/01/2017

Date Data Arrived at EDR: 01/02/2018

Date Made Active in Reports: 01/31/2018

Number of Days to Update: 29

Source: Department of Environmental Conservation

Telephone: 518-402-8660

Next Scheduled EDR Contact: 07/16/2018

Data Release Frequency: Quarterly

### Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for hazardous waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 03/09/2017

Date Data Arrived at EDR: 04/12/2017

Date Made Active in Reports: 10/13/2017

Number of Days to Update: 184

Source: Department of Environmental Conservation

Telephone: 518-402-8712

Last EDR Contact: 03/07/2018

Next Scheduled EDR Contact: 06/25/2018

Data Release Frequency: Varies

### HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 01/01/2003

### SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/03/2018  
Date Data Arrived at EDR: 02/14/2018  
Date Made Active in Reports: 03/22/2018

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Longitude (West):	73.904568 - 73° 54' 16.44"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	592451.2
UTM Y (Meters):	4513520.0
Elevation:	53 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	5940599 CENTRAL PARK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3604970094F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
3604970091F	FEMA FIRM Flood data
3604970092F	FEMA FIRM Flood data
3604970093F	FEMA FIRM Flood data

### NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NNW
Site Name:	Astoria Central Treatment Fac/
Site EPA ID Number:	NYD980593636
Groundwater Flow Direction:	GENERALLY N TOWARD THE EAST RIVER.
Measured Depth to Water:	approximately 6 feet.
Hydraulic Connection:	The surficial upper glacial aquifer is generally of poor permeability and is underlain by bedrock.
Sole Source Aquifer:	A sole source aquifer is present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era:	Mesozoic
System:	Cretaceous
Series:	Upper Cretaceous
Code:	uK (decoded above as Era, System & Series)

#### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by CA Rich Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

**APPENDIX E**

**QUALIFICATIONS OF ENVIRONMENTAL  
PROFESSIONALS**

## **QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS**

### **Jessica E. Proscia, EP**

Ms. Proscia is Project Environmental Scientist with CA RICH Consultants, Inc. Jessica received her Bachelor of Science degree in Health Science for Environmental Health from NY State University at Stony Brook, NY. Her professional Phase I and Phase II ESA experience includes obtaining, coordinating and reviewing historical and regulatory database searches; physical inspection of properties within the tri-state area; collecting air, soil, groundwater, surface water and sediment and materials samples for chemical analyses; and design, preparation/compilation and authoring/co-authoring of draft and final CA RICH ESA reports.

### **Richard J. Izzo, CPG**

Mr. Izzo is a Senior Associate at CA RICH and has over 25 years of experience in the design, implementation and management of environmental testing and remediation programs throughout the northeast United States with particular emphasis in the tri-state and NY Metropolitan areas. As a specialist in the assessment and remediation of groundwater, soil, soil vapor, and underground storage tank management, he has worked with local, State and Federal government entities as well as private industry. Mr. Izzo has managed programs including Brownfield investigations; remedial investigations for Superfund Sites; Phase II investigations; Brownfield/Voluntary Cleanups; storage tank management; groundwater quality monitoring programs; and groundwater resource exploration and development. As Senior Associate at CA RICH, Mr. Izzo provides technical review of "All Appropriate Inquiry" Phase I and Phase II Environmental Site Assessments and Remedial Action Reports. He is a Certified Professional Geologist and Hazardous Waste Emergency Response Supervisor, and is member of the Association of Groundwater Scientists & Engineers, and the American Society for Testing and Materials.
