Bud North GC LLC		Chris Steinmann			None.	
Civetta Cousins JV (Civetta)		Eric Weiberth				
<b>Description and Location of Work Activities Performed</b>						
Civetta continued installing pile cap forms, drilling caissons, and cutting piles to final elevation. Brookside Environmental was on site to remove two USTs found on 6/25/22 and cleaned on 6/30/22. Tanks were cut and removed for off-site disposal by Brookside on 7/1/22. Civetta and AKRF delineated the UST grave area in Grid WC-01 from the USTs found on 6/25/22. AKRF used PID readings and olfactory observations to delineate the extent of the petroleum contamination in the area of the USTs. AKRF collected four sidewall and one bottom samples from the UST grave area. All samples were surveyed and sent to York Laboratories for analysis of TP-51 VOCs and SVOCs. Civetta exported 3 loads of soil/fill from Grid WC-09 to Bayshore facility in Keasbey, NJ.
