Roux Environmental Engineering and Geology, D.P.C. (Roux) was on-site to oversee Remedial Investigation (RI) drilling activities, collect samples, and perform CAMP.

GENERAL COMMENTS:

Contractor Work Performed On-Site:

- GPRS conducted a geophysical survey throughout the Site and near the proposed sample locations prior to drilling operations.
- Trinity precleared soil borings RX-05 (co-located with RXSV-05) and RX-06 (co-located with RXMW-06) to five feet below land surface (ft bls) using hand tools.
- Trinity advanced soil boring RX-05 to 10 ft bls and RX-06 to 15 ft bls utilizing a Geoprobe 7720DT.
- Trinity installed a soil vapor point at RXSV-05 to a depth of 4 ft bls.
- Trinity installed a permanent monitoring well at RXMW-06 to a depth of 15 ft bls.

Roux Conducted Work Performed On-Site (if applicable):

- Oversaw drilling activities, screened and recorded lithology of soil, collected soil samples, and performed CAMP.

Material Imported/Exported:

- None.

Air Monitoring:

- CAMP was implemented from 10:40 to 15:20 during intrusive work. No exceedances of dust or VOCs were observed. The maximum corrected downwind concentration of VOCs was 0.0 parts per million (ppm). The maximum corrected downwind concentration for dust was 0.011 milligrams per cubic meter (mg/m^3).

OBSERVATIONS, DISCUSSIONS, ETC

Roux Environmental Engineering and Geology, D.P.C. (Roux) was on-site to oversee Remedial Investigation (RI) drilling activities, collect samples, and perform CAMP.

GENERAL COMMENTS:

Contractor Work Performed On-Site:

- Trinity precleared soil borings RX-09 (co-located with RXSV-09), RX-08 (co-located with RXMW-08), and RX-03 (co-located with RXMW-03) to five feet below land surface (ft bls) using hand tools.
- Trinity advanced soil borings RX-09 to 10 ft bls and 15 ft bls at RX-08 and RX-03 utilizing a Geoprobe 7720DT.
- Trinity installed a permanent soil vapor point at RXSV-09 to a depth of 2 ft bls.
- Trinity installed two monitoring wells at RXMW-08 and RXMW-03 to a depth of 12.5 ft bls.

Roux Conducted Work Performed On-Site (if applicable):

- Oversaw drilling activities, screened and recorded lithology of soil, collected soil and soil vapor samples, and performed CAMP.

Material Imported/Exported:

- None.

Air Monitoring:

- CAMP was implemented from 8:00 to 14:10 during intrusive work. No exceedances of dust or VOCs were observed. The maximum corrected downwind concentration of VOCs was 0.0 parts per million (ppm). The maximum corrected downwind concentration for dust was 0.010 milligrams per cubic meter (mg/m^3).

Samples Collected:

- The soil sample intervals analyzed for VOCs, SVOCs, TAL Metals, Pesticides, Herbicides, PCBs, Total Cyanide, Tri/Hexavalent Chromium, 1,4-Dioxane, and PFAS were noted as follows:
  - RX-09: 0-2 and 6-8 ft bls.
  - RX-08: 0-2 and 6-8 ft bls.

PROJECT:	35-32 College Point Boulevard NYSDEC BCP Site No. C241262	3532 CPB LLC	**WEATHER:**	65-83°F, Sunny, RH: 75%, P: 29.81 inHg, Wind: NW @ 10 mph
LOCATION:	35-32 College point Boulevard, Flushing, New York		**TIME:**	07:00 – 15:00

  - RX-03: 0-2 and 4-6 ft bls.
- Soil Vapor samples analyzed for TO-15 were noted as follows:
  - RXSV-05 at 4 ft bls.
  - RXSV-07 at 4 ft bls.
  - RXSV-04 / DUP_SV_06202025 at 2 ft bls.
  - RXSV-01 at 2 ft bls.
  - RXSV-09 at 2 ft bls.

Other Relevant Comments or Problems Encountered:

- During pre-clearing operations at location RX-03, Trinity encountered subsurface refusal at approximately 1.5 feet below land surface (bls). To avoid the potential presence of an underground concrete slab, Trinity was directed to relocate 10 feet east of the original position. However, refusal was again encountered at a depth of 1.5 feet bls. Based on a review of historical aerial imagery, which showed no indication of surface obstructions, Roux marked out a third location 18 feet northeast of the initial point. Drilling activities at this new location was successful, reaching a depth of 15 feet bls without further refusal.

Health and Safety:

- Level D PPE was worn on-Site.

Anticipated Work Activities for the Next Day/ Week:

- Develop the newly installed monitoring wells throughout the Site.
