Re: Phase I Environmental Site Assessment Report

94-01 Sutphin Boulevard in Jamaica, New York 11435
MEI Project #: 21-0106

In accordance with our agreement, Middleton Environmental Incorporated (MEI), has performed a Phase I Environmental Assessment of the above referenced property in accordance with ASTM E 1527-13 Scope of Work. Please find a copy of the report enclosed.

We declare that to the best of our knowledge and belief, we meet the definition of Environmental professional as defined in §312.10 of 40 CFR and, we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you for choosing MEI as your consultant for this project. If you have any questions, or if we can be of additional service, please contact us at (631) 321 4300.

Respectfully submitted,

Middleton Environmental Incorporated

1.0 EXECUTIVE SUMMARY

At the request of Merkel Properties, Middleton Environmental Incorporated (MEI) has performed a Phase I Environmental Site Assessment (ESA) of the property located at 94-01 Sutphin Boulevard in Jamaica, New York, herein referred to as the Subject Property. The main objective of this ESA was to identify **Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs)** in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products that indicate an existing release, a past release, or a material threat of a release. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13. This assessment has identified evidence of an REC in connection with potential sub-surface contamination associated with potential abandoned fuel oil tanks at the Subject Property. Lastly, any planned development activities would be subject to all New York City Office of Environmental Remediation (NYCOER), E designation protocol.

The Subject Property consists of an undeveloped, irregular-shaped parcel totaling approximately 1.38 acres in size. The eastern portion of the Property (~90%) is overgrown with vegetation. The western 10% of the Property is paved with concrete, and is utilized for construction materials storage. Additional site improvements are limited to concrete-paved public sidewalks at the Sutphin Boulevard, 94th Avenue, 95th Avenue, and 148th Street frontages.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. MEI's Findings and Opinions and Recommendations for further action or investigation (if any), are presented in Section 10.0.

ASSESSMENT SUMMARY TABLE			
Assessment Component	Section(s)	Recommended Actions	Estimated Cost
Historical Review	5.3, 5.4 & 5.5	No Further Action	
Current Occupants / Operations	3.3	No Further Action	
Hazardous Substances / Petroleum Products	7.2	Phase II Environmental Site Assessment (E Designation)	\$ 15,000 - \$ 12,000
Drains, Sumps & Storm Water Drywells	7.2	No Further Action	
Storage Tanks	7.2	GPR Survey and Phase II ESA	\$ 8,000 - \$ 10,000
PCBs	7.2	No Further Action	
Regulatory Agency / Database Review	5.1	No Further Action	
Asbestos Containing Materials	9.1	No Further Action	
Lead Based Paint	9.2	No Further Action	
Lead in Drinking Water	9.3	No Further Action	
Radon	9.4	No Further Action	
Mold	9.5	No Further Action	
Wetlands	9.6	No Further Action	

2.0 INTRODUCTION

2.1 Purpose

MEI has performed a Phase I Environmental Site Assessment (Phase I ESA) of property located at 94-01 Sutphin Boulevard in Jamaica, New York (Subject Property). The purpose of this Phase I Environmental Site Assessment (Phase I ESA) is to investigate and identify Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs) associated with the Subject Property and/or surrounding property. Recognized Environmental Conditions, as defined in the ASTM Standard Practice E 1527-13, including the following:

The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

For the purpose of this Phase I ESA, *recognized environmental conditions (REC's)*, may also include the presence or likely presence of other conditions as noted in the Scope of Services.

2.2 Scope of Services

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review. The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, radon, mold, and wetlands.

2.3 Assumptions and Limitations

There is a possibility that even with the proper application of these methodologies there may exist on the Subject Property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. The information and conclusions contained in this report are based upon work undertaken by trained professional in accordance with generally accepted engineering and scientific practices current at the time the work was performed. MEI believes that the information obtained from the record review and the interviews concerning the Subject Property is reliable. However, MEI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but rather to provide the User with information relating to the Subject Property. Due to the nature of this investigation and data available, MEI cannot warrant against undiscovered environmental liabilities. Should any additional information become available which differs significantly from our understanding of conditions or findings represented in this report, we request that this information be supplied to MEI so that MEI may reassess the conclusions provided in this report (if necessary).

The findings, opinions and conclusions of this report contain the limitations inherent in these methodologies that are referred to in ASTM E 1527-13. Specific limitations and exceptions to this ESA are set forth below:

Historical and environmental information pertaining to the Subject Property has been included in this report to the extent that such information is "reasonably ascertainable" as defined in the above-referenced standard practice and in accordance with the project specific timeframes.

MEI reviewed an environmental database search report. MEI's conclusions based on the search report are limited to the accuracy of that report. To the extent possible, MEI's field observations are used to verify the information or identify errors and inconsistencies in the search report regarding the listed facilities in the immediate vicinity of the Subject Property.

With respect to conditions outside the scope of the ASTM Standard, MEI's observations are limited to physical observations and a review of published data. Unless otherwise stated, no sampling for Asbestos Containing Materials, Lead Based Paint, Drinking Water, Radon, Mold, or Wetlands was conducted.

2.4 Special Terms and Conditions

This Phase I Environmental Site Assessment (“the report”) has been prepared to assist Merkel Properties in its underwriting of a proposed mortgage loan or financing on the Subject Property. This report can be relied upon by only the parties stated in the transmittal letter at the front of this report. MEI’s liability to a purchaser wishing to use this report is limited to the cost of the report. Amendments to MEI’s limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and MEI’s contract and report extends Merkel Properties only, in accordance with MEI Terms and Condition and the MEI Scope of Work.

2.5 Data Gaps

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.6 Deviations

No deviations from the recommended scope of ASTM Standard E 1527-13 were performed as part of this Phase I ESA with the exception of any additional services noted in Section 2.2 Scope of Services.

2.7 User Reliance

This Phase I Environmental Site Assessment Report is for the benefit of Merkel Properties and this report may not be relied upon by any other person or entity without the written consent of MEI.

Only if written agreement has been executed granting the right to utilize this report, no third party which obtains all or portion of this report shall have any rights of recourse or recovery under any course of action against MEI, its officers, employees, vendors, successors, or assigns.

Reliance is provided in accordance with MEI's Standard Phase I Environmental Site Assessment Contract, and this report is for the benefit of Merkel Properties and its successors and assigns. This report has no other purpose, and may not be relied upon by any other person or entity without the written consent of MEI.

3.0 SITE DESCRIPTION

3.1 Ownership and Location

According to the City of New York Department of Tax Assessment, the Subject Property is identified as Block 9999, Lot 1. The Subject Property is owned by Merkel Properties LLC.

The Subject Property is located at 94-01 Sutphin Boulevard within the postal zone of Jamaica, within the Borough of Queens, and within the City and State of New York. MEI did not identify any prior owners or occupants of potential environmental concern in the property records obtained from the City of New York Department of Tax Assessment.

3.2 Improvements

The Subject Property consists of an undeveloped, irregular-shaped parcel totaling approximately 1.38 acres in size. Additional site improvements are limited to concrete-paved public sidewalks at the Sutphin Boulevard, 94th Avenue, 95th Avenue, and 148th Street frontages.

3.3 Current Use of the Subject Property

The eastern portion of the Property (~90%) is overgrown with vegetation. The western 10% of the Property is paved with concrete, and is utilized for construction materials storage.

3.4 Services, Utilities and Roadways

Street Address(es): 94-01 – 94-19 Sutphin Boulevard / 147-02 - 147-16 94th Avenue / 147-01 - 147-43 95 Avenue

City and State: Postal zone of Jamaica and Borough of Queens, within the City and State of New York

County: Queens County

Owner: Merkel Properties LLC

Property Size: 1.38 acres

Access Roadway to site: 95th Avenue, adjacent to the south of the Subject Property

Site Use: Undeveloped lot

Occupants: Not applicable

Electricity Provider: Consolidated Edison of New York (ConEd)

Natural Gas Provider: National Grid

Fuel Oil Provider: Not applicable

Potable Water: Municipal Water Supply System

Sewer Services: Municipal Sewer System

Heating System: Not applicable

3.5 Adjoining Property Usage

The current use of the adjoining properties is commercial and residential in nature. The Subject Property borders are as follows:

North - The Subject Property is bordered to the north by a high-rise multi-story residential building and 94th Avenue, beyond which is a multi-story building (current under construction).

South - The Subject Property is bordered to the south by 95th Avenue, beyond which are various properties, including multi-family dwellings, 1-story warehouses/industrial buildings, a concrete plant, storage lots, and a multi-story residential buildings with first floor retail space.

East - The Subject Property is bordered to the east by 148th Street, beyond which is an undeveloped lot.

West - The Subject Property is bordered to the west by Sutphin Boulevard, beyond which are multi-story residential buildings with first floor retail units.

4.0 USER PROVIDED INFORMATION

4.1 Environmental Pre-Survey Questionnaire

Pursuant to ASTM E 1527-13, MEI requested the following site information from the User of this report and from the site contact. The following section summarizes information provided Merkel Properties with regard to this Phase I Environmental Site Assessment.

ITEM	PROVIDED BY USER	NOT PROVIDED BY USER	DISCUSSED BELOW	DOES NOT APPLY
4.1 Environmental Pre-survey Questionnaire		X		
4.2 Title Records		X		
4.3 Environmental Liens or Activity and Use Limitation		X		
4.4 Specialized Knowledge		X		
4.5 Commonly Known or Reasonably Ascertainable Information		X		
4.6 Valuation Reduction for Environmental Issues		X		
4.7 Identification of Key Site Manager	X			
4.8 Reason for Performing Phase 1 ESA	X			
4.9 Prior Environmental Reports		X		

4.2 Title Records

Title record information associated with the Subject Property has not been provided to MEI by Merkel Properties. Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3 Environmental Liens or Activity and Use Limitation

The property owner/user/key site personnel did not report any Environmental Liens or Activity/Use Limitations on the site. An environmental lien search was not included in the scope of work of this assessment and therefore was not performed. However, if the findings of a lien search performed by any other party does reveal the presence of an environmental related lien on the subject property, this information should be forwarded to MEI for review, and any significant findings will be added to this assessment as an addendum to this report.

4.4 Specialized Knowledge

Merkel Properties provided no specialized knowledge that is material to Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs). MEI was not provided with or made aware of previous environmental assessments or other documentation that is material to RECs, CRECs, or HRECs in connection with the Subject Property, except as presented in Section 4.3 of this report.

4.5 Commonly Known or Reasonably Ascertainable Information

Merkel Properties has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

4.6 Valuation Reduction for Environmental Issues

Merkel Properties has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

4.7 Identification of Key Site Manager

Merkel Properties provided contact information for the Subject Property owner, manager and/or occupants. The Contact person for site access was Mr. Fred Stark, representative, Merkel Properties LLC.

4.8 Reason for Performing Phase I ESA Report

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the Subject Property. This ESA was also performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E-1527-13 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

4.9 Prior Environmental Reports

Although requested, no previous environmental reports were provided to MEI for review.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Information from standard Federal and state environmental record sources was provided through EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. This integrated database also contains postal service data in order to enhance address matching. Records from one government source are compared to records from another to clarify any address ambiguities. The demographic and geographic information available provides assistance in identifying and managing risk. The accuracy of the geocoded locations is approximately +/-300 feet.

In some cases, location information supplied by the regulatory agencies is insufficient to allow the database companies to geocode facility locations. These facilities are listed under the unmappable section within the EDR report. A review of the unmappable facilities indicated that none of these facilities are within the ASTM minimum search distance from the Site. Pertinent regulatory files / records associated with the Subject Property and/or any adjoining site will be requested for review in the event the listing is associated with a facility at which a suspected or confirmed release has occurred that has not yet been closed to the satisfaction of the regulatory agency and/or if the facility represents a REC in connection with the Subject Property.

Regulatory information from the following database sources regarding possible recognized environmental conditions, within the ASTM minimum search distance from the Site, was reviewed. Specific facilities are discussed below if determined likely that a potential recognized environmental condition has resulted at the Site from the listed facilities (see appendix 12.5 for Environmental Database Report).

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listing Within Search Distance
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal SEMS Sites (formerly CERCLIS Sites)	0.5 mile	No	0
Federal SEMS Archive Sites (formerly CERCLIS NFRAP)	0.5 mile	No	0
Federal RCRA CORRACTS Sites	1.0 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	Yes	1
Federal RCRA Non-CORRACTS TSD Sites	0.5 mile	No	0
Federal Engineering / Institutional Control Sites	Property & Adjoining	No	0
Federal ERNS Sites	Subject Property	No	0
State and Tribal equivalent NPL Sites	1.0 mile	No	5
State and Tribal equivalent CERCLIS Sites	0.5 mile	No	0
State and Tribal Leaking Storage Tank Sites	0.5 mile	No	40
State and Tribal Spills Sites	Subject Property	No	0
State and Tribal Landfill or Solid Waste Disposal Sites	0.5 mile	No	12
State and Tribal Registered Storage Tank Sites	Property & Adjoining	Yes	2
State and Tribal Engineering / Institutional Control Sites	Property & Adjoining	No	0
State and Tribal Voluntary Cleanup Sites	0.5 mile	No	26
State and Tribal Brownfield Sites	0.5 mile	No	5

- **Federal National Priority List (NPL) Sites**

The National Priorities List (NPL) is the Environmental Protection Agency (EPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program. The Subject Property is not listed as a Federal NPL site. No NPL sites were identified within one mile of the Property.

- **Federal Delisted National Priority List (NPL) Sites**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. The Subject Property is not listed as a Federal Delisted NPL site. No Federal Delisted NPL sites were identified within a one mile radius of the Subject Property.

- **Federal SEMS Sites (formerly CERCLIS Sites)**

The SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the SEMS List and the sites which are in the screening and assessment phase for possible inclusion on the SEMS. The Subject Property is not identified as a Federal SEMS facility. No Federal SEMS sites were identified within a half-mile of the Subject Property.

- **Federal SEMS-ARCHIVE List**

The SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the SEMS List. The Subject Property is not identified as a SEMS-ARCHIVE facility. No SEMS-ARCHIVE sites were identified within one mile of the Subject Property.

- **Federal RCRA CORRACTS Sites**

RCRA Corrective Action Tracking System (CORRACTS) is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies Transportation, Storage or Disposal (TSD), facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. The Subject Property was not identified on the RCRA CORRACTS site list. No RCRA CORRACTS sites were identified within one mile of the Subject Property.

- **Federal RCRA Hazardous Waste Generators Sites**

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQGs). A RCRA-LQG is a facility that generates over 1,000 kilograms (Kg) of hazardous waste. A RCRA-SQG is a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month while a RCRA-CESQG generates less than 100 Kg of hazardous waste per month. The Subject Property is listed on the Resource Conservation and Recovery Act (RCRA) LQG database as JFK Center Associates as of 2007, for the generation of Ignitable Wastes. No violations or releases were identified with regard to this listing. This listing is assumed to be associated with historical demolition activities at the Subject Property. Given that this listing does not indicate a release to the sub-surface, it is unlikely to represent an environmental concern to the Subject Property. In addition, one adjoining RCRA LQG site was identified, at 147-25 94th Avenue LQG (located beyond 94th Avenue to the north, by visual observation). However, given that a listing on the RCRA GEN database is not in itself indicative of an issue of concern or a release of hazardous materials, it is considered unlikely that conditions associated with this RCRA GEN site would represent an environmental concern to the Subject Property.

- **Federal RCRA non-CORRACTS TSD Sites**

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) sites are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). The Subject Property is not listed as a Federal RCRA non-CORRACTS TSD site. No RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) sites were identified within a half-mile of the Subject Property.

- **Federal Engineering Control / Institutional Control Sites**

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any of the adjoining properties were listed as a Federal Engineering Control or Institutional Control site.

- **Federal Emergency Response Notification System (ERNS) Sites**

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property is not listed as a Federal ERNS site.

- **State and Tribal Equivalent NPL Sites**

State and Tribal Equivalent NPL databases were searched for sites located within a mile of the Subject Property. The Subject Property is not listed as a State and Tribal Equivalent NPL site. However, five State and Tribal Equivalent NPL sites were identified within one mile of the Subject Property. These sites are each located in excess of 0.23 mile of, and either cross- or down-gradient relative to, the Property. Therefore, based on their distance and gradient, as well as the built-up and developed nature of the surrounding area, it is considered unlikely that conditions associated with these five State and Tribal Equivalent NPL sites would represent an environmental concern to the Subject Property.

- **State and Tribal equivalent CERCLIS Sites**

State and Tribal equivalent CERCLIS databases were searched for sites located within a half mile of the Subject Property. The Subject Property is not listed as a State and Tribal equivalent CERCLIS Site. No State and Tribal equivalent CERCLIS sites are located within a half mile radius of the Subject Property.

- **State and Tribal Leaking Storage Tank Sites**

Leaking Storage Tank (LTANKS) sites are properties where releases of hazardous substances or petroleum products from underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) have been identified and reported to state, tribal, or local agencies. The Subject Property is not listed as a State and Tribal Leaking Storage Tank site. However, 40 sites located within a half-mile of the Subject Property were identified as State and Tribal Leaking Storage Tank sites. These sites are each located in excess of 0.05 mile of (by visual observation), and either cross- or down-gradient relative to, the Property, or have been Closed by the NYSDEC, or both. Therefore, based on their distance, gradient, and/or regulatory status, as well as the built-up and developed nature of the surrounding area, it is considered unlikely that conditions associated with these 40 Leaking Storage Tank sites would represent an environmental concern to the Subject Property.

- **State and Tribal Spills Sites**

The Subject Property was not identified as a State and Tribal Spills site.

- **State and Tribal Landfill Sites and Solid Waste Disposal Sites**

The State and Tribal Landfill and Solid Waste Disposal site databases identify active or inactive landfill and transfer station facilities, as well as open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The Subject Property is not listed as a State and Tribal Landfill and Solid Waste Disposal site. However, 12 State and Tribal Landfill and Solid Waste Disposal sites were identified within a half-mile of the Subject Property. These sites are each located in excess of 0.13 mile of, and either cross- or down-gradient relative to, the Property. Therefore, based on their distance and gradient, as well as the built-up and developed nature of the surrounding area, it is considered unlikely that conditions associated with these 12 State and Tribal Landfill and Solid Waste Disposal sites would represent an environmental concern to the Subject Property.

- **State and Tribal Registered Storage Tank Sites**

The Subject Property was identified on the NYS DEC AST registration database for the following three ASTs: one 8,160-gallon #6 fuel oil AST (#2-610507, listed as having been installed 1950 and Closed on February 21, 2008); one 5,760-gallon AST (#2-610507, listed as having been installed in 1950 and Closed on February 21, 2010); and one 5,000-gallon #6 fuel oil AST (#2-607871; installation and Closure dates not reported). However, four fuel oil fill ports were identified adjacent to the northern border of the Subject Property on the 94th Avenue sidewalk. At a minimum, it is possible that the fourth fuel oil fill port may be associated with an abandoned fuel oil UST at the Property. The potential for sub-surface contamination associated with an abandoned UST (or USTs) at the Property is considered to be an REC. MEI therefore recommends that a ground-penetrating radar (GPR) survey be conducted, in order to verify the presence of potential abandoned USTs at the Subject Property. Based on the results of the GPR survey, further actions may be warranted, and costs incurred. In addition, two adjacent State and Tribal Registered Storage Tank sites were identified: 147-20 94th Avenue (UST) and 147-07 94th Avenue (AST). However, these sites were not identified on the LTANKS database, and no open releases or outstanding regulatory mandates were identified with regard to these two sites. Therefore, given that a listing on the State and Tribal Registered Storage Tank site database is not in itself indicative of an issue of concern, it is considered unlikely that conditions associated with these 12 State and Tribal Landfill and Solid Waste Disposal sites would represent an environmental concern to the Subject Property.

- **State and Tribal Engineering Control / Institutional Control Sites**

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. The Subject and adjoining properties were not identified on the State Engineering Controls or Institutional Control databases.

- **State and Tribal Voluntary Cleanup Sites**

The Subject Property is not listed as a State and Tribal Voluntary Cleanup site. However, 26 State and Tribal Voluntary Cleanup sites were identified within a half-mile of the Subject Property, including one adjacent site, at 93-43 Sutphin Boulevard (located beyond Sutphin Boulevard to the north). However, this adjacent VCP site was not identified on the LTANKS database, and no open releases to the sub-surface were identified with regard to this site. This site was visually observed by MEI to consist of an active development site. Therefore, given the on-going development and new construction at this site, it is considered unlikely that conditions associated with this adjacent State and Tribal Voluntary Cleanup site would represent an environmental concern to the Subject Property. The remaining 25 State and Tribal Voluntary Cleanup sites are each located in excess of 0.10 mile of (by visual observation), and either cross- or down-gradient relative to, the Property. Therefore, based on their distance and gradient, as well as the built-up and developed nature of the surrounding area, it is considered unlikely that conditions associated with these 25 remaining State and Tribal Voluntary Cleanup sites would represent an environmental concern to the Subject Property.

- **State and Tribal Brownfield Sites**

The Subject Property is not listed as a State and Tribal Brownfield site. However, five State and Tribal Brownfield sites were identified within a half-mile radius of the Property, including two adjacent sites, at 147-20 94th Avenue and 147-25 94th Avenue, respectively (each located adjacent to the north, by visual observation). 147-20 94th Avenue was visually observed to now consist of a high-rise residential building, and 147-25 94th Avenue consists of a development site, consisting of a multi-story building currently under construction. Given the re-development of these two adjacent parcels, as well as the lack of reported off-site impacts, these two adjacent State and Tribal Brownfield sites are unlikely to represent an environmental concern to the Subject Property. The remaining three State and Tribal Brownfield sites are each located in excess of 0.23 mile of, and either cross- or down-gradient relative to, the Property. Therefore, based on their distance and gradient, as well as the built-up and developed nature of the surrounding area, it is considered unlikely that conditions associated with these three remaining State and Tribal Brownfield sites would represent an environmental concern to the Subject Property.

5.2 Sanborn Fire Insurance Maps

Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of available fire insurance maps are presented in Appendix 12.6.

FIRE INSURANCE MAP SUMMARY		
Year	Issues Noted	Observations
1901	No	Subject Property: Dwellings, a carpenter's shop, and undeveloped land are depicted.
		Surrounding Area: The surrounding properties consist of a combination of dwellings and undeveloped land.
1911	No	Subject Property: Dwellings, a saw clamp manufacturer, a contractor's stable, and undeveloped land are depicted.
		Surrounding Area: The surrounding properties consist of a combination of dwellings and undeveloped land.
1925	Yes	Subject Property: A 1½ -story meat packing facility labeled "Merkel Inc.", as well as dwellings, and a 1-story garage with a gasoline UST (at the northwestern portion of the Property) are depicted.
		Surrounding Area: The surrounding properties consist of a combination of dwellings, multi-story residential buildings with first floor retail space, and a NY Telephone Company facility. Of note, two gasoline USTs are depicted to the north of the Property (at 147-24 94 th Ave. and 94-02 Sutphin Blvd. respectively).
1942 - 1951	Yes	Subject Property: A 1½ -story meat packing facility labeled "Merkel Inc.", as well as dwellings, are depicted. Of note, the meat packing facility is observed to have been expanded to the east, and now covers the portion of the Property in which a gasoline UST was depicted in 1925.
		Surrounding Area: The surrounding properties consist of a combination of dwellings, multi-story residential buildings with first floor retail space, manufacturing facilities, and a NY Telephone Company facility. Of note, gasoline USTs are depicted to the north of the Property at 147-24 94 th Ave., 147-07 94 th Ave., and 94-02 Sutphin Blvd.
1963 - 1967	Yes	Subject Property: A 1½ -story meat packing facility labeled "Merkel Inc." is depicted on the entire Subject Property parcel.
		Surrounding Area: The surrounding properties consist of a combination of dwellings, multi-story residential buildings with first floor retail space, and manufacturing facilities. Of note, gasoline USTs are depicted to the north of the Property at 147-24 94 th Ave., 147-07 94 th Ave., and 94-02 Sutphin Blvd.
1981 - 2006	Yes	Subject Property: A 1½ -story meat packing facility labeled "Merkel Inc." is depicted.
		Surrounding Area: The surrounding properties consist of a combination of dwellings, multi-story residential buildings with first floor retail space, and manufacturing facilities. Of note, a gasoline UST is depicted to the north of the Property at 94-02 Sutphin Blvd.

A gasoline UST was identified at the northwestern portion of the Subject Property on the 1925 Sanborn map, prior to the expansion of the former 1½-story meat packing facility in this area. In addition, gasoline USTs were depicted on adjacent properties to the north on historical Sanborn maps reviewed at 47-24 94th Avenue, 147-07 94th Avenue, and 94-02 Sutphin Boulevard. However, these three parcels were each observed by MEI to have been re-developed. Therefore, any historical USTs or former sub-surface contamination associated with these historical gasoline USTs is assumed to have been removed from the Property and the aforementioned adjacent properties as part of the historical re-development of the Property and adjacent properties. Therefore, the presence of these historic gasoline USTs is unlikely represent an environmental concern to the Subject Property.

5.3 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by researching available historical aerial photographs from and other available resources. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table:

AERIAL PHOTOGRAPH SUMMARY		
Year	Issues Noted	Observations
1954 - 2006	No	Subject Property: A 2-story manufacturing facility appears to be depicted on-site.
		Surrounding Area: The surrounding area is densely developed, and the adjoining properties to appear to consist of a combination and single- and multi-story structures.
2008 - 2017	No	Subject Property: An undeveloped lot appears to be depicted on-site.
		Surrounding Area: The surrounding area is densely developed, and the adjoining properties to appear to consist of a combination and single- and multi-story structures.

5.4 City Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by MEI and EDR. Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix 12.6.

CITY DIRECTORY SUMMARY		
Year	Issues Noted	Occupants
1934	No	Jamaica Independent Meat Corp. / Merkel
1939	No	Merkel Pork Plant and Main Office
1945	No	Merkel Pork Plant and Main Office
1950	No	Plant Main Office / Pork Main Store
1962	No	Main store
1983	No	County Fair Wholesale Meat Co. / Frankie's Meat and Food
1970	No	Handypac Meat Corp.
1976	No	County Fair Wholesale Meat Co. / Handypac Meat Corp.
1983	No	County Fair Wholesale Meat Co.

5.5 Vapor Encroachment Condition

All readily ascertainable information including all applicable Federal, State, Tribal and local database information, historical usage information, soil and groundwater sources and information from the site reconnaissance were reviewed in order to determine if there is a possibility of a Vapor Encroachment Condition (VEC) regarding the Subject Property. Based upon the results of the site reconnaissance and review of readily ascertainable information, the Vapor Encroachment Condition survey is described below:

POTENTIAL AREA OF CONCERN	RESULT
Does the Subject Property have a current or past contamination concern?	Yes
Does the Subject Property have a suspected contamination concern?	Yes
Does an adjacent property have a current or past contamination concern?	No
Does a nearby property have a have a current or past contamination concern which may impact the Subject Property?	None identified
Does a regional groundwater contamination concern exist beneath the Subject Property?	None identified
Does there exist the possibility for vapor intrusion on the Subject Property?	None identified

This assessment has identified evidence of an REC in connection with potential sub-surface contamination associated with potential abandoned fuel oil tanks at the Subject Property, which would also be considered to be a VEC. This issue is addressed in Section 7.2.

5.6 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the New York City Building Department, the New York City Department of Finance and the New York City Fire Department. Information was reviewed in order to determine the possibility of documented adverse environmental conditions, violations, or complaints associated with the Subject Property.

New York City Building Department and New York City Department of Finance

MEI reviewed information listed in the online NYC Building Information System (BIS) provided by the New York City Building Department's website, as well as information from the New York City Department of Finance website, the Automated City Register Information System (ACRIS)(<http://a836-acris.nyc.gov/CP>). Specific information provided by these websites includes lot sizes and dimensions, building zoning, and usage. These websites also include information pertaining to interior renovations, building improvements, and approximate date of construction. Various permits / actions for the Property were identified on the NYC DOB website, dated 2003 to the present, including Demolition permits for the Property dated 2007-2009. No additional data of environmental or historical significance was identified on the New York City Department of Finance or New York City Department of Buildings websites.

New York City Fire Department

Records from the New York City Fire Department (FDNY) are available by written request and fee only, and results are typically not provided to the user for approximately 30 days (or greater) from the date of receipt of the request by the FDNY, and therefore would not be considered to be "reasonably ascertainable", as defined by ASTM. As such, other sources were reviewed for information regarding current and historic petroleum storage tanks at the Property. These records include state regulatory agency databases, Sanborn Fire Insurance maps, building department records, and historical city directories, which are addressed within the respective sections of this report.

6.0 PHYSICAL SETTING

6.1 Topography

The Subject Property and vicinity characteristics listed below were analyzed utilizing a current USGS 7.5 Minute Topographic Map. This information is useful in determining the grade and topography of the Subject Property. The Subject Property is located at an elevation of approximately 39 feet above mean sea level (msl). The Subject Property is relatively flat. The surrounding area slopes gently downward to the south. There were no slopes, depressions, or rolling hills observed on the Subject Property, and slopes on the Subject Property range from 0 to 3 percent. The Subject Property has been graded for commercial usage.

6.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Near-surface geology in heavily developed areas such as the Subject Property and vicinity is considered "urban land", and is characterized by a non-homogeneous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, subway systems, and other construction results in a varied subsurface profile. In this setting, estimation of local subsurface parameters such as permeability, moisture content, and organic fraction is not feasible without site-specific testing data.

6.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow in the vicinity of the Subject Property is expected to flow to the south, towards Jamaica Bay. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three (3) groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

7.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Jeremy Mushlin, EP, Senior Project Manager, on January 30, 2021. All proper measures were taken by MEI personnel during the site inspection to limit any COVID-19 exposures.

7.1 Methodology and Limited Conditions

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Of note, the majority of the ground surface at the Subject Property was covered with either vegetation or stored constructions materials. Therefore, observations of the ground surfaces were limited. No additional limiting conditions were encountered.

7.2 Physical Observations

- **Underground Storage Tanks**

No petroleum aboveground or underground storage tanks (ASTs or USTs) were identified. However, the Subject Property is was identified on the NYS DEC AST registration database for the following three ASTs: one 8,160-gallon #6 fuel oil AST (#2-610507, listed as having been installed 1950 and Closed on February 21, 2008); a 5,760-gallon AST (#2-610507, listed as having been installed in 1950 and Closed on February 21, 2010); and a 5,000-gallon #6 fuel oil AST (#2-607871; installation and Closure dates not reported). However, four fuel oil fill ports were identified adjacent to the northern border of the Subject Property on the 94th Avenue sidewalk. At a minimum, it is possible that the fourth fuel oil fill port may be associated with an abandoned fuel oil UST at the Property. The potential for sub-surface contamination associated with an abandoned UST (or USTs) at the Property is considered to be an REC. MEI therefore recommends that a ground-penetrating radar (GPR) survey be conducted, in order to verify the presence of potential abandoned USTs at the Subject Property. Based on the results of the GPR survey, further actions may be warranted, and costs incurred.

- **Aboveground Storage Tanks**

Please see the UST section above.

- **Hazardous Substances and Petroleum Products**

An unquantified amount of compressed oxygen and acetylene canisters were observed the eastern, paved portion of the Property. The canisters were stored properly, within labeled metal storage cages. No issues were identified with regard to their presence. MEI did not observe any additional hazardous substances or petroleum products at the Subject Property.

- **Non-Hazardous Substances and Non-Petroleum Products**

MEI did not observe any non-hazardous substances or petroleum products at the Subject Property.

- **Unidentified Substances Containers**

MEI did not observe any unidentified substance containers at the Subject Property.

- **Drains or Storm Water Drywells**

MEI did not observe any storm water drywells or storm drains.

- **Polychlorinated Biphenyls (PCBs)**

MEI did not observe any potential PCB-containing equipment at the Subject Property.

- **Stains or Corrosion**

MEI did not observe any stains or corrosion at the Subject Property.

- **Odors**

MEI did not observe any strong, pungent, or noxious odors at the Subject Property.

- **Pools of Liquid**

MEI did not observe any pools of liquid at the Subject Property.

- **Stressed Vegetation**

MEI did not observe any stressed vegetation at the Subject Property.

- **Stained Soil or Pavement**

MEI did not observe any stained soil or pavement at the Subject Property.

- **Wells**

MEI did not observe any irrigation wells or groundwater monitoring wells at the Subject Property.

- **Sumps, Pits, Ponds, or Lagoons**

MEI did not observe any stained sumps, pits, ponds, or lagoons in accessible areas of the Subject Property.

- **Waste Water**

MEI did not observe any improper disposal of waste water into drains, ditches, or streams at the Subject Property.

- **Solid Wastes Disposal**

The Subject Property is currently vacant, and does not generate solid waste. No improper solid waste storage or disposal was observed.

8.0 INTERVIEWS

8.1 Interview with Property Owner and/or Property Manager

A building representative was interviewed as part of the site reconnaissance. The representative did not indicate the presence of any environmental liens, and was unaware of any contamination concerns regarding the Subject Property.

9.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

9.1 Asbestos Containing Material (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable ACM are those which can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

The Subject Property is currently vacant, and no structures were identified. Therefore, ACM is not considered to be an issue of concern.

9.2 Lead Based Paint (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

The Subject Property is currently vacant, and no structures were identified. Therefore, LBP is not considered to be an issue of concern.

9.3 Lead in Drinking Water

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, the USEPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing such as lead solder, brass, bronze, and other lead containing alloys. The USEPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg/L). The Subject Property is currently vacant, and no structures were identified. Therefore, lead in drinking water is not considered to be an issue of concern.

9.4 Radon

Radon is a colorless, odorless, radioactive gas. Radon comes from the natural decay of uranium that is found in nearly all soils. Radon typically moves through the ground and into building through cracks and openings in the foundation. The USEPA has developed a "Map of Radon Zones" indicating the levels of radon concentrations from testing and aerial surveys conducted in all counties in New York State. The U.S. Environmental Protection Agency's Map of Radon Zones identified the Subject Property as a radon zone Level 3. Level 3 signifies that the average predicted radon level indoors is less than 2 pico-Curies per liter and this is the lowest level in the state. This level compares favorably with the EPA action level of 4.0 pico-Curies per liter as the guideline (it should be noted that current radon information and EPA Action Levels are designated for residential spaces only and commercial and industrial facilities are not subject to EPA's Action Level of 4 pico-Curies per liter as the guideline and definitive information concerning radon gas in an individual building can only be obtained through long term testing).

9.5 Mold

Molds are a class of fungi and have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials and thrive in humid environments. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth.

The Subject Property is currently vacant, and no structures were identified. Therefore, mold is not considered to be an issue of concern.

9.6 Wetlands

MEI reviewed available information regarding wetlands on the Subject Property, including National Wetlands Inventory online GIS mapping. MEI additionally made general site observations for readily observable potential wetland characteristics. MEI did not observe surface water bodies or any evidence of potential wetlands on or adjacent to the Subject Property.

10.0 FINDINGS, OPINIONS AND RECOMMENDATIONS

MEI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. This assessment has identified evidence of an REC in connection with potential sub-surface contamination associated with potential abandoned fuel oil tanks at the Subject Property. Lastly, any planned development activities would be subject to all New York City Office of Environmental Remediation (NYCOER), E designation protocol.

The site reconnaissance, interviews and review of records have not found the presence or possible presence of hazardous substances or petroleum related products in, on, or at the Subject Property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

No petroleum aboveground or underground storage tanks (ASTs or USTs) were identified. However, the Subject Property is was identified on the NYS DEC AST registration database for the following three ASTs: one 8,160-gallon #6 fuel oil AST (#2-610507, listed as having been installed 1950 and Closed on February 21, 2008); a 5,760-gallon AST (#2-610507, listed as having been installed in 1950 and Closed on February 21, 2010); and a 5,000-gallon #6 fuel oil AST (#2-607871; installation and Closure dates not reported). However, four fuel oil fill ports were identified adjacent to the northern border of the Subject Property on the 94th Avenue sidewalk. At a minimum, it is possible that the fourth fuel oil fill port may be associated with an abandoned fuel oil UST at the Property. The potential for sub-surface contamination associated with an abandoned UST (or USTs) at the Property is considered to be an REC. MEI therefore recommends that a ground-penetrating radar (GPR) survey be conducted, in order to verify the presence of potential abandoned USTs at the Subject Property. Based on the results of the GPR survey, further actions may be warranted, and costs incurred.

The Subject Property has a New York City Office of Environmental Remediation (NYCOER), E designation of HAZMAT. Any planned development would be subject to NYCOER protocol.

Lastly, no conditions outside of ASTM E 1527-13 were identified in connection with the Subject Property.

11.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

This Phase I Environmental Site Assessment (ESA) Report documents the research methodology used by qualified environmental professionals of MEI to identify recognized environmental conditions using the scope and limitations of ASTM Standard E 1527-13.

Occupancy

Taxes

1. Tax Bill

Property tax bill for 7/1/2020 to 6/30/2021	\$330,656

2. Key Values in Calculating the Bill

Tax class	4
Market value	\$7,661,000
Assessed value	\$3,447,450
Exemptions granted by city	\$0
Transitional value	\$3,091,986
Transitional exemption value	\$0
Tax abatements	\$0

3. Assessed Value Evolution

The state law requires to phase in any changes to the assessed value over a five-year period. In any given year, multiple transitions are being applied to the property, which result in different assessed and transitional values each year. The law requires the use of the lowest value between the two - assessed or transitional - to calculate the property tax bill. Please note that assessment changes due to physical alterations/renovations to the property are not phased in. Additionally, if a tax class change has occurred in the past two years, we are unable to estimate value increases for the next 5 years.

4. Assessment Reductions & Open Petitions

New York City's Tax Commission is responsible for reviewing and determining the annual applications for corrections of assessments. Owners and other parties with legal interest can claim that they are incorrectly assessed or improperly denied an exemption from real property tax. There are four types of assessment claims subject to review and corrective action: excessive assessment, misclassification, unequal assessment and unlawful assessment. More information can be found on New York City [Tax Commission](#) website.

Open Petitions

If relief from tax commission is not obtained, the owner or other party with legal interest can file a petition with the New York State Supreme Court to keep the appeal open for further review. The information shown here represents only open petitions. The ones that are invalid or abandoned are closed.

Petition year	Petition Index	Petitioner	Attorney	Code description
2017	801044	Merkel Properties LLC	Podell Rothman	
2016	803081	Merkel Properties LLC	Podell Rothman	Fifth-year extension under RPTL Å\$718 agreed to with the Law Department

5. Property Tax Calculation

Market Value

The first step is for the City Assessor to determine the *market value* of the property. While the term *market value* would seemingly refer to how much the property would sell for on the open market, in reality the *market value* established by the City Assessor is almost always substantially lower.

Land market value		\$7,661,000
Building market value	+	\$0
Market value	=	\$7,661,000

Assessed Value

Next, the market value is used to compute the assessed value, which is a percentage of the market value. The exact percentage is determined by the tax class of the property. Tax class 1 is assessed at 6% of the market value, and tax classes 2,3 and 4 are assessed at 45%.

Market value		\$7,661,000
Assessment ratio	x	45%
Maximum assessed value	=	\$3,447,450

Transitional Value

To protect property owners from sudden large increases in property tax, the state limits how quickly the city can increase the assessed value. Typically these limits are applied when the City Assessor makes a big increase to the market value. Without the limits the assessed value would increase by a similar percentage. Instead, the change to the assessed value is phased in over a number of years.

The market value of this property was increased in previous years and the assessed value is currently being phased in. Because this property is in **tax class 4**, the assessment cannot be raised more than 8% from the year before or 30% over five years. Assessed value cannot be raised more than 45% from market value.

Assessed value		\$3,447,450
Exemptions granted by city	-	\$0
Net assessed value	=	\$3,447,450

Transitional value		\$3,091,986
Transitional exemption value	-	\$0
Transitional net value	=	\$3,091,986

Taxable Value

The *taxable value*, for 20/21, is the smaller of the city's net assessed value and the transitional net assessed value.

Taxable value	=	\$3,091,986

Property Tax

Current tax is calculated by multiplying the taxable value (the assessed value minus any exemptions) by the *tax rate*. The city also grants some properties incentives called tax abatements, which are subtracted directly from the current tax. This results in the property tax, the amount the current owner pays.

Tax description	Billable value 20/21	Tax rate 20/21	Tax bill 20/21
Current tax	\$3,091,986	x 10.6940%	= \$330,657
Total abatements		-	\$0
Property tax with final tax rate			= \$330,657

After issuing the final tax assessment and issuing first quarter tax bills, the city typically adjusts the tax rate. This results in an adjustment to the property tax.

Tax description	Billable value 20/21	Tax rate 19/20	Tax bill June
Current tax as billed June 20/21	\$3,091,986	x 10.5370%	= \$325,803
Total abatements		-	\$0
Property tax as billed June 20/21			= \$325,803

Property tax with final tax rate			\$330,657
Property tax as billed June 20/21		-	\$325,803
Property tax adjustment		=	\$4,854

For more information, you can view this property's assessment, tax bill, and account statements by clicking [here](#) and entering the Borough, Block, & Lot.

6. Exemptions and Tax Abatements

Both the City and State of New York offer property tax reductions through exemptions and abatements for residential property, commercial constructions, and properties used by governmental, industrial, and nonprofit organizations. Exemptions provide tax relief by reducing a property's assessed value, and abatements reduce taxes by applying credits to the amount of tax due. The information in this section presents a summary of the granted amounts and other related values of the benefit programs. Some of this data comes from NYC Department of Housing Preservation and Development (HPD) and the Department of Finance, departments which administer the [J-51 Program](#), [421a Program](#) and the [Cooperative and Condominium program](#).

We believe that no exemptions or abatements currently apply to this property.

7. Tentative Values

Every year in January, the NYC Department of Finance Commissioner publishes the tentative property assessment roll for the current fiscal year. All properties are valued by law according to their condition on the taxable status date of January 5th. Owners who believe that the Department of Finance has used incorrect information to determine their market value may file [forms](#) providing corrections. After Finance verifies the complaints, the agency will make any corrections before the final assessment roll is published on May 25. The final roll will also include changes, based on the decisions made by the New York City Tax Commission, an independent City agency, as well as new information Finance gathers about abatements, exemptions and other adjustments. In June, Finance will use the final roll and new tax rates adopted by the City Council to generate property tax bills for the fiscal year beginning July 1st.

At this time there is no data available from NYC Department of Finance Commissioner for this property.

8. Assessment History

Year	Building class	Market value	Assessed value	Taxable	Tax rate%	Base tax	Property tax

Development

1. Floor Area Ratio & Air Rights

There are many rules that limit what you can build on a lot and how large it can be. But the most important is the Floor Area Ratio, or FAR. The FAR is expressed as a ratio of the size of the building in square feet to the size of the lot in square feet. For example, if a lot is 2,000 square feet and has an allowable FAR of 4.0, then you cannot build a building larger than 8,000 square feet. Max FAR depends on several factors including zoning, location and use.

The maximum usable floor area is calculated by multiplying the size of the lot by the larger of the residential or commercial FAR.

Area of lot in square feet		60,138
FAR	x	10
Maximum usable floor area of building	=	601,380

Available Air Rights by Parcel

The building on this lot is smaller than the maximum set by the FAR. Thus it may be possible to add to the building (either more floors or an extension) or it may be possible to sell the "air rights" to a developer who owns a nearby lot. (Note: other factors may limit what you can do.)

Maximum usable floor area		601,380
Usable floor area	-	0
Unused buildable square feet ("air rights")	=	601,380

Residential FAR	10
Commercial FAR	10
Facility FAR	10

2. Zoning

New York City is divided into three basic *zoning districts*: residential (R), commercial (C) and manufacturing (M). These basic zoning districts are subdivided by the intensity of use. Development is governed by the use, bulk, and parking requirements of the zoning district.

R Residential district

C Commercial district

M Manufacturing district

Rezoning Proposal Active

Rezoning Recently Adopted

This map was created from the NYC [Department of City Planning's](#) online zoning map files. It includes updates found in those files through 4/22/2020.

Zoning Designation		Parcel Vicinity	
Commercial	C6-4	Frontage(s)	94 Avenue(narrow)
Special districts	DJ		148 Street(narrow)
E-Designation	E-175		95 Avenue(narrow)
Rezoning Projects			147 Place(narrow)
We have no information to indicate that there is a rezoning planned.		Nearest wide street	Sutphin Boulevard
For more information about zoning district regulations, click here .		Distance to wide street	27.5 ft

Special District

DJ

The Special Downtown Jamaica District (DJ) builds upon Jamaica's strengths as a multimodal transportation hub to support the downtown business district, expand housing and economic opportunities along the area's major streets and transportation corridors, protect adjacent low-density neighborhoods and create affordable housing. The district's use regulations encourage mixed use development in denser transit-oriented locations convenient to shoppers and its bulk provisions allow taller buildings with higher floor area ratios at the transit hubs. [More info](#)

Commercial

C6-4

C6 districts permit a wide range of high-bulk commercial uses requiring a central location. Most C6 districts are in Manhattan, Downtown Brooklyn and Downtown Jamaica. Corporate headquarters, large hotels, department stores and entertainment facilities in high-rise mixed buildings are permitted in C6 districts. C6 districts are well served by mass transit, and off-street parking is generally not required, except within the C6-3D district. C6-4 through C6-9 districts, typically mapped within the city's major business districts, have a maximum FAR of 10.0 or 15.0, exclusive of any applicable bonus. Floor area may be increased by a bonus for a public plaza or Inclusionary Housing. [More info](#)

Map Disclaimer: Our maps are not official zoning maps. The print version of the NYC Zoning Resolution, which includes the zoning maps, together with any amendments adopted by the City Council subsequent to the most recent update to the print version, remains the official version of the Zoning Resolution. All zoning descriptions have been taken from the [NYC Planning](#) official source.

Violations

1. HPD Violations

When excessive violations are present, this can adversely affect the support given by The NYC Department of Housing Preservation and Development (HPD). These violations can result in building-wide inspections, fees, and the requirement of extensive repair work to correct underlying conditions. In some cases, outstanding violations may result in a lien being placed on the property. It is also substantially more difficult to mortgage a building with extensive violations.

We do not have any record of violations in our database. Status can be verified [here](#).

2. HPD Charges

Work Orders

Created	Type	Job type	Alternative Enforcement Program	FEMA associated
10/1/2003	OMO	GC	No	No
1) erect 8 ft high construction fence (5/8" plywood).approx. 1015 ln ft long. 2) fence post should be 4x 4, &2x4 framing . 3) fence post should

5. ECB Violations

There are eleven city agencies that administer the City's quality-of-life laws and issue Notices of Violation (NOVs) for alleged violations. The ECB is a separate and independent agency that hears challenges to those NOVs. The agencies that issue the most violations for real estate are:

- Department of Buildings (DOB)
- Department of Environmental Protection (DEP)
- Fire Department (FDNY)
- Landmarks Preservation Commission (LPC)
- Department of Sanitation (DSNY)

Violation ID	Issue date	Type	Severity	Status	Link to violation
34864814Z	7/7/2010	Construction		Active	Link
Work w/o a permit. Expired permit. Permit #420056913eq-fn expired 6.24.10. Observed: wood construction fence approx 8' high on the perimeter of the block. Remedy: renew permit.

Failrue to maitnain bldg exterior wall defects are broken cornice at west elev crack in cornice at south elev 1 q metal rods 18 long hanging lose at and vertical cracks in exterior wall at west elevator lose ch					
34179330R	5/28/1998	Construction	Hazardous	Resolve	Link
Failure to maintain exterior bldg wall. Defect is: bricks are fallingdown from 2 story brick walls. Loose also some mortar on the walls. Remedy: make safe immediately, obtain permit, erect sidewalk shed.					
34143475N	9/27/1996	Construction	Non-hazardous	Resolve	Link
Failure to maintain building defect is: glass of 1st and 2nd fl. Windows partly brocker. Remedy: repair windows.					

Please note: the NYC Department of Buildings is the only authoritative source for information on ECB violations. Verify the status of the violation on [DOB website](#).

PropertyShark obtains its records from ECB and updates them weekly.

6. Neighborhood Complaints

Created	Agency	Type	Descriptor	Disposition	Closed
12/12/2017	TLC	Taxi report	Driver report	Your report has been sent to the Taxi and Limousine Commission (TLC). You are not available to participate in a hearing so TLC cannot take any action against the driver or car service company. No further information will be available for your report.	12/12/2017
8/28/2017	DEP	Air quality	Air: dust, construction/demolition (ae4)	The Department of Environmental Protection did not observe a violation of the New York City Air/Noise Code at the time of inspection and could not issue a notice of violation. If the problem still exists, please call 311 and file a new complaint. If you are outside of New York City, please call (212) NEW-YORK (212-639-9675).	8/31/2017
9/29/2015	DEP	Sewer	Defective/missing curb piece (SC4)	The Department of Environment Protection inspected your complaint but could not find the problem you reported. If the condition persists, please call 311 (or 212-639-9675 if calling from a non-New York City area code) with more detailed information to submit a new complaint.	9/29/2015

Neighborhood

1. Building Class

The *building class* specifies how a property is used or what type of building is present on that property. Building classes range from A to Z (excluding X). There are at most 10 different sub-classes within each building class (ranging from 0 to 10). These building classes cover all property uses from residential and commercial to government buildings and parks.

The full list of building classes can be found [here](#).

2. Urban Landscape Maps

3. HPD Alternative Enforcement Program

The HPD Alternative Enforcement Program map is based on the current month's HPD violations in a building divided by the number of units in the building. It takes in consideration the open hazardous and immediately hazardous violations (I/I/C class) in the last 5 years.

For more information, visit the [HPD website](#).

4. Distance to Schools

Elementary School Proximity

This map shows zoned Elementary School and other public and private schools available in the area, with exact distances from the subject property to the school of interest.

School district 28

Attendance Elementary School(s)

Nearest Public Elementary School (not zoned)

School	Alternative Learning Center - Q
School code	28Q987
Distance (miles)	0.278

Find more info at [NYC Department of Education](#)

Nearest Private Elementary School

School	Al-Iman School
Distance (miles)	0.502
Principal	Nassir Aliakber
Phone number	(718) 297-6520

Middle School Proximity

This map shows zoned Middle School and other public and private schools available in the area, with exact distances from the subject property to the school of interest.

School district 28

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 10 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: NYR000086314

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/09/2020 has revealed that there are 5 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 09/30/2020 has revealed that there are 12 NY SWF/LF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/09/2020 has revealed that there are 40 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 24 NY UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 26 NY VCP sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/09/2020 has revealed that there are

EXECUTIVE SUMMARY

33 NY Spills sites within approximately 0.125 miles of the target property.

NY SPILLS 90: Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

A review of the NY SPILLS 90 list, as provided by EDR, and dated 12/14/2012 has revealed that there is 1 NY SPILLS 90 site within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 79 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 01/01/2019 has revealed that there are 105 NY MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
JAMAICA GAS AND LIGH	BEAVER RD., AND 158T	ENE 1/4 - 1/2 (0.264 mi.)	AP423	947

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Site Code: 524733
Acres: 0.574
HW Code: C241184
SWIS: 4101
Town: New York City
Record Added Date: 03/16/2016
Record Updated Date: 12/16/2016
Update By: SMQUANDT

Site Description: Location: The site is located in an urban area of Jamaica, Queens at the southwestern intersection of 94th Avenue and 148th Street. The approximately 25,000-square foot site is bound to the north by 94th Avenue, followed by industrial uses; to the east by 148th Street, followed by a vacant lot; and to the south and west by undeveloped lots. Site Features: Currently the site is under construction for residential use as a new, 25-story residential building with a basement, a parking garage, and a residential lobby on the ground level. Current Zoning and Land Use: The site is zoned as C6-4 for commercial use. The surrounding area is largely developed with industrial uses, with some commercial and residential uses. The Long Island Railroad (LIRR) tracks are located approximately 200 feet to the north. Past Use of the Site: The site was historically developed with the following uses: residential (1901 - 1925); cabinet maker (1925); cold storage (1942 - 2006); a private garage and automotive repair with a buried gasoline storage tank (1942 - 1951); a private automotive garage (1925 - 2005); a toy warehouse (1963 - 1967); and an air conditioning manufacturer (1967 - 1996). The eastern warehouse has remained vacant since approximately 2006. Site Geology and Hydrogeology: Surface topography at the site is generally level. The site lies at an elevation of approximately 39 feet above the National Geodetic Vertical Datum (NGVD), which approximates mean sea level (msl). The surrounding area slopes down to the south, toward Jamaica Bay. Groundwater has been encountered at approximately 20 feet below grade and flows to the south. Historic fill materials (including sand, silt, gravel, coal, and brick) was observed from just below the surface to approximately five feet below grade within the soil borings, underlain by apparent native sand, silt, and gravel to approximately 35 feet below grade. Bedrock was not encountered. Remediation at the site is complete. Prior to remediation the contaminants of concern included certain metals, volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs). Remedial actions have successfully achieved the residential soil

cleanup objectives, which are sufficient for the site s residential use. Endpoint samples collected and analyzed across the site confirmed the success of the remedial action. The site does not require engineering or institutional controls, an environmental easement, or a Site Management Plan.

Health Problem: Remedial actions are complete and have eliminated potential exposures to site-related contaminants.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include;

Program: BCP
Site Code: 565437
Acres: 0.8
HW Code: C241206
SWIS: 4101
Town: New York City
Record Added Date: 12/29/2017
Record Updated Date: 05/18/2020
Update By: JCGRATHW
Site Description:

Location: The site is located in an urban area in the Jamaica neighborhood of Queens. The approximately 35,000 square-foot site is bounded to the north by LIRR tracks; to the east by a scaffolding sales and installation facility; to the south by 94th Avenue, followed by a vacant lot and an active construction site; and to the west by commercial uses. The site is located in a developed area predominantly consisting of primarily commercial and industrial, with residential uses in the greater surrounding area to the north and south. Site Features: The site had three vacant interconnected warehouse buildings, a concrete-paved loading dock, and asphalt-paved parking areas which are demolished during 2019. Currently excavation work is on-going at the site as part of remedy. Current Zoning and Land Use: The site is zoned C6-4 (commercial) and is currently vacant, with the exception of equipment and materials left by the former site occupant. The surrounding area is developed primarily with commercial and industrial properties with some residential uses to the north and south. A multi-story residential building is under construction immediately south of the site across 94th Avenue. Past Use of the Site: The site has been used for commercial and industrial purposes since the 1880s. The site was most recently used for a produce warehouse, meat storage facilities, and a refrigeration sales and service facility since the 1960s. Prior to 1967, the site was occupied by small low-rise dwellings, the Long Island Rail Road Company, food processing company Armour & Co. Beef and Provisions, and a storage yard for the N.Y. Telephone Co. Site Geology and Hydrogeology: Surface topography at the site is generally level. Historic fill materials (including concrete, sand, silt, gravel, brick, plastic, glass, asphalt, and wood) were observed from just below surface grade to approximately 15 feet below grade underlain by silt, sand, and gravel. Groundwater was encountered at approximately 20 feet below sidewalk grade. Groundwater flows in a southwesterly direction toward Jamaica Bay, approximately 3.7 miles to the south.

Env Problem:

Nature and Extent of Contamination: Based upon the subsurface

investigations conducted to date, the primary contaminants of concern for the site are mostly SVOCs e.g., Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, and Indeno(1,2,3-cd)pyrene. Soil: Low level of Benzo(a)anthracene was detected in three soil samples where the concentrations ranged from 1.12 to 1.53 ppm. Benzo(a)pyrene also detected in three soil samples and the concentrations ranged from 1.08 to 1.47 ppm. Benzo(b)fluoranthene was detected in four soil samples and the concentrations ranged from 1.08 to 2.81 ppm. These contaminants exceeded the Unrestricted use as well as Restricted Use SCOs (to 1 ppm). Indeno(1,2,3-cd)pyrene was detected in four soil samples and the concentrations ranged from 0.512 to 1.04 ppm. This contaminant exceeded the Unrestricted use and Restricted Use SCOs (to 0.5 ppm). Contaminants of concerns were mostly present at shallow depths within 0-2 feet below grade exception to one location where detection was around 13-15 feet below grade surface. Low concentrations (1.19 to 1.70 ppm) of Chrysene also detected in three locations which exceeded Unrestricted use SCOs (to 1 ppm). Lead detected in eleven samples that ranges from 73.9 to 1960 ppm. Lead concentration exceeded the Restricted Use SCOs (400 ppm) at three locations where one location was around 13-15 feet below grade. Data does not indicate any off-site impacts in soil related to this site. Sediment: Three sediment samples collected from three storm water drywells. Two of these samples detected low concentrations of toluene (2.59 and 2.63 ppm). Toluene concentrations exceeded the UUSCOs of 0.7 ppm, however concentrations were well below the RRSCOs of 100 ppm. Sample from other drywell detected low concentrations of copper, nickel and zinc. Groundwater: No VOCs and or SVOCs were detected at concentrations that exceeded their respective AWQSS. Only three naturally occurring compound such as iron, manganese and sodium were detected in at least one groundwater sample at concentrations exceeding AWQSS. Data does not indicate any off-site impacts in groundwater related to this site. Soil vapor: Seven soil vapor samples were collected and analyzed during RI. Very low levels of several VOCs including BTEX, ethanol, heptane, and hexane etc. detected in all samples. PCE was detected in five samples at concentrations from 5.1 to 257 g/m3. Data does not indicate any off-site impacts in soil vapor related to this site. Special Resources Impacted/Threatened: The site is located in the urban area and Fish and Wildlife Impact Analysis is not warranted. Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes, and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. The potential exists for the inhalation of site-related contaminants due to soil vapor intrusion for any future on-site redevelopment and occupancy. Sampling indicates that soil vapor intrusion is not a concern for off-site structures.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 3/23/05 - Austin - Transferred from DeMeo to Tibbe - end 09/27/05: Ruptured hydraulic hose from a track regulator. Light spray of hydraulic oil on ballast with no significant contamination or puddles according to LIRR documentation. At the time, LIRR Wayne Kilnner called NYSDEC Gene Sullivan who said that remediation did not appear to be warranted as per LIRR documentation. "
Remarks: "FUEL TANK ON ENGINE PUNCTURED, FUEL LEAKED ALONG SOIL AREA, LIRR ASSESSING EXTENT OF SPILL, NEAR METROPOLITAN AVE 3/4 MILE WEST OF JAMAICA STATION."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/10/95: This is additional information about material spilled from the translation of the old spill file: DIESEL LUBE OIL. 8-7-01 INVESTIGATOR CHANGED FROM TOMASELLO TO DEMEO. 3/23/05 - Austin - Transferred from DeMeo to Tibbe - end 11-09-06: LIRR could not find any specific information concerning this spill. It would appear that it was a general maintenance issue. Ballast was removed during general maintenance of the tracks. It was contaminated with historic leaks from the trains. The ballast was stockpiled until time for disposal, which is common practice. "
Remarks: "HISTORICAL SPILL-OPERATING DIESEL TRAINS OVER TRACKS SINCE 1950-1955 SPOKE TO CHRIS TOMASELLO-STOCK PILED CONTAMINATED SOIL."

Tank Info:

Tank Number: 001
Tank Id: 17468
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
Aboveground - contact with soil.... Tank bottom rests on soil,
allowing no visual inspection.

Tank Location:

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1965
Capacity Gallons: 7500

DEC Memo: "11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 07/18/2011
- The spill was reassigned from Joe O'Connell to Linda Ross 3/12/12 - Raphael Ketani. The case was reassigned to me during February 2012. I received the February 1, 2012 Quarterly Progress Report. In the report, it is stated that there are two 20,000 gal. USTs with #2 oil under the president's parking lot. The two tanks were abandoned in place during 1997 with cement slurry. Groundwater is about 23 feet bgs, except for MW-4 where it is 43 feet bgs. Groundwater flow is to the southwest. The site itself is 50 feet above sea level. A draft work plan was submitted to the DEC on 5/20/10. It was updated and resubmitted. Field work for the Supplemental Investigation is scheduled for 3/19/12. There presently are 6 wells on site: 1A, 2, 4, and 6 to 8. They were sampled on 11/15/11. The analytical results are almost entirely non-detect. The PBS registration is #2-600338. Six UST tanks are listed. Tanks #1 and #2 are the 20,000 gal. USTs in question. However, listed is a closed in place 550 gal. diesel tank, a closed and removed 1500 gal. diesel tank, and in service tanks #3 and #4 (1100 gal. and 1500 gal.) containing diesel. 3/16/12 - Raphael Ketani. A conference call took place between Gloria Russo and Al Albano (347) 494-6020 of the LIRR and myself. The site was discussed. Mr. Albano stated that the two USTs below the president's parking lot were closed and filled with concrete slurry back in the 1990s. The field work that was supposed to take place in March 2012 was postponed. A building is present on site which is having its roof refurbished and the construction crew is using the parking lot as a staging area. The roof contains asbestos. So the refurbishment work will take about 3 weeks. Then, in April 2012, the investigative work will start. I told Ms. Russo and Mr. Albano that this was fine. 4/5/12 - Raphael Ketani. Al Albano of the LIRR sent me an e-mail informing DEC that the field work will be taking place on 4/11 through 4/13. 5/1/12 - Raphael Ketani. I reviewed the May 2012 Quarterly Progress Report. A supplemental investigation took place during April 2012 in order to more fully delineate the contamination. Groundwater elevation is about 20 feet above sea level. Depth to water in the wells is generally 23 feet, with one exception of 42 feet. Groundwater flow is to the southwest. Wells MW-1A, 2, 4, 6 to 8 were sampled this quarter. The results were all non-detect. An investigation report will be submitted during June 2012. 6/12/12 - Raphael Ketani. I tried to contact Mr. Albano (347) 494-6020 regarding whether either MW-4 or MW-7 were directly downgradient of

U001841404

the two 20,000 gal. USTs, but I could only leave a message. 6/13/12 - Raphael Ketani. Mr. Albano sent me the following e-mail in response to my e-mail: As depicted on the map, the tank locations (shown in gray dash pattern) are estimated. As part of our recent Remedial Investigation, D&B utilized Ground Penetrating Radar to determine the exact location of the USTs. As part of the Data Summary Package, a revised map will be included that will provide the information you are looking for. That said, please keep in mind the site constraints that have impacted our ability to install wells/borings in various locations throughout the site. In the area around MW-04 and MW-07 specifically, there is a 15 high retaining wall. Above the retaining wall there is an above-ground emergency generator, a fence, uneven ground, etc. Below the retaining wall, there is a trash compactor that sits at the site 24/7. Once the Data Support Package is complete and we ve had a chance to look at the updated map and the analytical data from the recent sampling effort, we can then determine if the well locations are satisfactory and whether or not there is any real need for additional investigatory work. 8/14/12 - Raphael Ketani. I reviewed the August 1, 2012 Progress Report. Wells MW-1A, 2, 4 and 7 were sampled on 5/29/12. The results were all non-detect, except for a very small number of very low VOC and SVOC hits. I approved the report without comment. 9/10/12 - Raphael Ketani. I received the Dvirka and Bartilucci August 2012 Data Summary Report. I began my review. 9/13/12 - Raphael Ketani. I finished my review of the Data Summary Report. Historically, the groundwater was as much as 25 feet lower. Starting from the early nineteen nineties to the late two thousands, the groundwater level rose 5 feet. The change in groundwater level created a very wide smear zone. However, no free NAPL was found in the wells. VOC exceedences of the Unrestricted Standards were found in the soil samples from SB-02 (20-23 feet), SB-03 (20-22.5 feet), SB-03 (25-27 feet) and SB-05 (2-5 feet). From the 4/11-13/12 data, SB-02 had naphthalene at 32 ppm (12 ppm limit) as the only exceedence. SB-03 (20-22.5) had only 13 ppm of cymene (10 ppm limit). SB-03 (25-27) had 15 ppm of cymene, 9.5 ppm 1,2,4-trimethylbenzene (3.5 ppm limit), 18 ppm naphthalene, and 0.46 ppm total xylenes (0.26 ppm limit). SB-05 had 0.33 ppm benzene (0.06 ppm limit), 1.2 ppm ethylbenzene (1 ppm limit) and 2.88 ppm total xylenes. SVOCs were either non-detect or didn't exceed their respective limits. From the 4/19/12 data, groundwater probe location GP-02 had 5 low VOC exceedences, moderate exceedences for 2 SVOCs and 2 high SVOC exceedences. Wells JMW-1A and JMW-2A, MW-4 and MW-6 to MW-8 were almost entirely non-detect for VOCs and SVOCs. The LIRR stated that they will install SB-06, SB-07 and MW-09 to MW-11 only if the information that would be gained from these locations would be critical for characterizing and remediating the spill. The additional data is not necessary for formulating recommendations regarding remediation in the Remedial Investigation Report. This is partly because these locations are only minimally downgradient from the established boring and well locations. They recommend developing the RI Report. Given that the nature and extant of the contamination has been characterized, the RI Report would include remediation alternatives. In their RI/AA (alternative analysis) report, they will compare all of the obtained data to commercial and industrial standards, rather than unrestricted standards. This is because a cleanup to CP-51 standards would not be feasible, given the use of the site and the surrounding area. After having finished my review, I determined that the LIRR hadn't fully delineated the extent of the

LIRR - JAMAICA STATION (Continued)

U001841404

soil and groundwater contamination. Therefore, I will request that they install 2 wells downgradient to MW-7. MW-11 can be to the west of the hut. Another well (maybe MW-13) should be of due west of MW-7. MW-9 should be a little further north of the proposed location. SB-07 should be at the MW-5+ location, but as well MW-12. MW-10 should be a little further north of the proposed location. SB-06 would not be necessary. However, the LIRR needs to put wells even further downgradient from the site. I drafted a letter for the review of Hassan Hussein, supervisor of Unit C. In the letter, I stated that we accepted the data, but further soil and groundwater contamination delineation was necessary. Therefore, wells MW-9 to MW-13 must be installed and that additional wells were needed downgradient of MW-7 and downgradient on the other side of the LIRR tracks. I stated that all results must be compared to CP-51 guidance standards as this is an oil spill. Lastly, I asked for a work plan for the additional work and that it be submitted by November 2, 2012. 9/20/12 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out today. 9/27/12 - Raphael Ketani. The September 2012 LIRR monthly project status meeting took place today. Mr. Albano stated that installing new wells at the locations indicated in the DEC 9/20/12 letter was not possible. He added that these areas were either at a 45 degree slope, or were in tight locations right next to the tracks or electrical utilities, or were over 1,000 feet away from the site and would not make sense to install. Mr. Albano asked that the DEC come over to the site to look the situation over and that, possibly, other locations can be selected. I agreed with Albano and a site visit was set for October 18. 10/18/12 - Raphael Ketani. The site visit took place as planned. In attendance were Ms. Russo and Tom Fox and Anthony Caniano from Dvirka & Bartilucci. I took 9 pictures. The President's Parking Lot is a small area, maybe 75 feet by 30 feet. The adjacent area to the west is a landscaped slope of about 45 degrees, maybe a little more. Beyond the sloped area is a filled area that is held up by a retaining wall. I saw wells 1A, 2A and 6 to 8 were in the parking lot. Next, we climbed the stairs to the track level. I saw well MW-4 next to the generator housing. Then we walked west past the storage container (hut). The area next to the tracks was flat and had enough room to put more wells. We agreed on the installation of MW-11 somewhere on the west side of the storage container and MW-9 on the east side. MW-10 will be installed on the east side of the generator room. After this, the meeting ended. 10/30/12 - Raphael Ketani. I reviewed the November 1, 2012 Progress Report. The wells were gauged on 8/28/12 and on 9/13/12. The depth to groundwater was from 22.41 to 25.21 feet bgs, with the exception of one measurement down to 46.13 feet bgs. Wells MW-1A, 2, 4, and 6 to 8 were sampled on 8/28/12. The results were all non-detect for VOCs and SVOCs. I approved the report without comment. 11/8/12 - Raphael Ketani. Today I received the Remedial Investigation letter/work plan dated November 8, 2012 from the LIRR. The plan involved installing new wells MW-9 to MW-11 along the flat area at the top of the slope which is adjacent to the northmost track line. The letter mentioned installing the wells, taking 3 soil samples from each boring, developing the wells for 2 hours and then sampling using low flow techniques. I found the letter to be acceptable, but there was no mention of the date of development, nor the date of sampling. I drafted an approval letter for the review of Mr. Hussein. In the letter, I stated that well development should not take place sooner than 48 hours after well construction in order to allow time for the

LIRR - JAMAICA STATION (Continued)

U001841404

grout to set. I also stated that once the wells have been developed, then they should wait one month or until the next quarterly sampling date (which ever is later) to sample the new wells. Mr. Hussein approved the letter and it was sent out today. 1/23/13 - Raphael Ketani. Mr. Albano sent me an e-mail stating that the boring/well installation work will start on February 3 and is expected to take 6 days. 1/28/13 - Raphael Ketani. Mr. Albano sent me the following e-mail: LIRR s Power Department performed their markout of our work area. Due to the fact that two electric lines run within about 3 feet of each other, right where MW-11 is proposed, we will need to strike it from the program. Moving the well from the proposed location is not possible. The electric lines run parallel with the tracks in that location. In addition, there is a chain link fence in the way. Plus there is inherent limitations with moving the rig north or south, since it is a high-rail vehicle. The other two well locations look doable. 2/5/13 - Raphael Ketani. Mr. Albano sent me an e-mail that they are having trouble with train traffic on the tracks that the high rail drilling machine needs to sit on. This limited their work to 3 hours during one day. Mr. Albano proposed doing sampling every five feet through the overburden/fill and down to total depth for each of the borings in order to save time. I proposed just drilling through the overburden and starting continuous sampling from street level to total depth. Mr. Albano agreed to my suggestion. 2/12/13 - Raphael Ketani. The Fourth Quarter 2012 Progress Report dated 2/1/13 was reviewed. Wells MW-1, 2, 4 and 7 were sampled. Wells MW-6 and 8 were not available. Gauging data was presented for measuring events from 10/25/12 to 1/16/13. There was no product. MW-4 had 2 groundwater VOC hits below TOGS. MW-7 had 4 groundwater VOC hits that were from just below to just above TOGS. The results for MW-1 and MW-2 were entirely non-detect. 2/14/13 - Raphael Ketani. The February 2013 monthly progress meeting took place for the 8 LIRR sites that I monitor. Mr. Albano explained that the only progress which has been made at the Jamaica Station site is drilling through the fill material at one of the new well locations. He added that there have been serious logistical problems performing the work as the various bureaucratic offices of the LIRR have not been coordinated and so train traffic has been allowed on the tracks next to the drill site. This requires Mr. Albano to move the drilling rig off of the site, preventing continuation of the work. Also, the third rail power was not being shut off as requested. This was a dangerous situation and, again, prevented the work from progressing. Mr. Albano will bring his crew out this weekend (February 16 and 17) and try to do all of the work during these two days. 3/1/13 - Raphael Ketani. Mr. Albano (347) 494-6020 sent me an e-mail. He wrote that there had been problems getting the well drilling work done. There was a lack of coordination between the electrical group, who are responsible for turning off the electricity, and the traffic group, who are responsible for rerouting the trains. An internal meeting took place at the LIRR in order to find out what the problem is and to straighten out the matter. The drilling will tentatively resume during 3 weekends in April 2013. 4/30/13 - Raphael Ketani. I reviewed the May 1, 2013 Progress Report. The LIRR will reattempt to install the wells requested by the DEC. The work will start during July 2013. Groundwater was sampled during 2/13/13 from MW-1, MW-2, MW-4 and MW-7. All of the VOC and SVOC results were non-detect. 8/1/13 - Raphael Ketani. I reviewed the July 2013 Progress Report. The report was mostly a recounting of the past events since April 2013. The three wells that were going to be

LIRR - JAMAICA STATION (Continued)

U001841404

installed during April could not be done due to logistical issues within the LIRR. The well installations were rescheduled for late June and early July. However, the operations staff at the LIRR told Mr. Albano that the track which would be shut down for the drilling work was needed for the summer holiday traffic. Therefore, they told him, the work could not take place. Mr. Albano then rescheduled the work for sometime in September 2013. Wells MW-2A to 9 were gauged on 5/2/13. Wells MW-1,2,4 and 6 to 8 were gauged on 6/20/13. Wells MW-1, 2, 4 and 6 to 8 were gauged on 7/11/13. Groundwater flow was determined to be to the southwest as during previous months. Groundwater samples were collected on 5/2/13 from wells MW-1, 2, 4 and 7. The results were completely non-detect. 10/29/13 - Raphael Ketani. I reviewed the November 2013 Progress Report dated 11/1/13. The report included a retelling of past activities and agreements. The General Engineering Contract was awarded on 10/17/13. A new scope of work is needed and the process will take from 6 to 8 weeks. Therefore, the installation of the DEC requested wells will probably take place during January 2014. The Supplemental Investigation Report will be completed during February 2014. Groundwater flow is due southwest. Groundwater was sampled from wells MW-1, MW-2, MW-4 and MW-7 on 8/2/13. All of the results were non-detect. 10/31/13 - Raphael Ketani. Ms. Russo (347) 494-6034 sent me the Revised November 2013 Progress Report. The only change was that she added the water level measurements at the end of the report. 1/31/14 - Raphael Ketani. I reviewed the December 2013 Progress Report dated 2/1/14. Groundwater flow continued to be to the southwest. Six wells were sampled on 11/21/13. These were MW-1, MW-2, MW-4, MW-6, MW-7 and MW-8. All of the VOC and SVOC results were completely non-detect. 4/29/14 - Raphael Ketani. I reviewed the First Quarter 2014 Progress Report dated 5/1/14. The LIRR expects to install 3 groundwater wells during September 2014. The Supplemental Investigation Report will be submitted during October 2014. The new GEC (General Environmental Contractor) contract was awarded on 10/17/13. The results for the groundwater samples from MW-1, MW-2, MW-4, MW-7 and MW-8 were all non-detect for VOCs and the SVOCs. The sample from MW-6 was almost completely non-detect for VOCs, except one very low VOC hit. However, all of the SVOC results were non-detect. 8/1/14 - Raphael Ketani. I reviewed the Second Quarter 2014 Progress Report dated 8/1/14. The report contained the following information: The LIRR was not able to install the three contingency soil borings/monitoring wells in the elevated track area to the south of the site in January 2014 due to the fact that its General Engineering Consultant (GEC) contract expired on August 31, 2013. A new GEC contract was awarded on October 17, 2013. A Notice of Award was issued to the GEC in May 2014. A Remedial Investigation Work Plan will be submitted to the NYSDEC for approval in August 2014. No drilling can be performed between May 19, 2014 and Labor Day. As such, the expected date of the installation of these monitoring wells is September 2014. Once this work is complete, and all analytical data is obtained, the Supplemental Investigation Report will be finalized and submitted to the NYSDEC. It is anticipated that this report will be completed by November 2014. Wells MW-1, 2, 4, and 6 to 8 were sampled on 6/18/14. Groundwater flow was to the southwest. All of the samples from the wells were completely non-detect for VOCs and SVOCs. 9/9/14 - Raphael Ketani. I reviewed the Additional Remedial Investigation Letter Work Plan dated 9/3/14 and submitted by the LIRR. The LIRR will install wells MW-9 to MW-11 next to the northernmost track. Soil sampling will start at the

LIRR - JAMAICA STATION (Continued)

U001841404

street level - as previously agreed upon. Well development will take place prior to groundwater sampling. The round of groundwater sampling which will follow the new well installations will include samples from MW-9 to MW-11. I found the work plan to be acceptable. 9/19/14 - Raphael Ketani. I received an email from Ms. Russo regarding the plan to install only two additional groundwater monitoring wells at the site. This email was a recap of discussions which had taken place on 9/18/14 during the September 2014 Monthly Site Status Meeting between staff from the LIRR and the DEC. Well MW-9 would not be installed this year due to the construction which needs to take place in Yard D (the 6 active rail lines). A new platform will be constructed for trains heading to Brooklyn. This will require taking 2 lines out of service and leaving 4 lines in service. Such an action will leave very limited space to store the trains. Due to the limited space, Ms. Russo could only get permission to take the northernmost line (where the wells would be installed) out of service during only two weekends, September 27 and 28 and October 4 and 5. Well MW-9 could not be installed because of the time constraint. I sent a response email approving the installation of the two wells right now and waiting on installing the third well. 11/4/14 - Raphael Ketani. I reviewed the Third Quarter 2014 Progress Report dated 11/1/14. Wells MW-10 and MW-11 were installed during September and October 2014. The installation of well MW-9 is being held in abeyance pending the need for additional groundwater coverage and a request by the DEC. Well MW-10 is upgradient and sidegradient to the groundwater flow and is near the LIRR building. Well MW-11 is directly downgradient to the groundwater flow and is the most distant well to the USTs. A Supplemental Investigation Report will be submitted during January 2015. Wells MW-1, 2, 4, and 6 to 8 were sampled on 8/27/14. All of the VOC and SVOC results were non-detect. 2/3/15 - Raphael Ketani. I reviewed the Jamaica Station Fourth Quarter 2014 Report dated 2/1/15. The only items to note were that the LIRR general engineering contractor cannot access the wells until the company has completed the security clearance. This is expected to be completed during February 2015. After this, the contractor will survey the wells and the water table and sample the groundwater. The data for the February round will be submitted to the DEC in a Remediation Investigation Report during April 2015. Wells JMW-1A, 2A, 4 and 6 to 8 were last sampled on 11/20/14. All of the VOC and SVOC results for all of the samples were completely non-detect. 5/5/15 - Raphael Ketani. I reviewed the Jamaica Station First Quarter 2015 Report dated 5/1/15. Wells JMW-1A, 2A, 4, and 6 to 8 were sampled on 2/17/15. There were a small number of very low VOC hits. Otherwise, the samples were all essentially non-detect. There were some very low SVOC exceedences of the benzo series of analytes and their associated combustion products. Otherwise, the samples were mostly non-detect. Wells MW-10 and MW-11 were not sampled during the February round as the contractor needed to be screened in accordance with the new LIRR security standards. It is expected that they will be approved and groundwater sampling of the new wells will take place during May 2015 with a report to be submitted during June 2015. The boring logs for MW-10 and MW-11 indicated the presence of gravelly sand high in each boring followed by primarily brownish medium sand below. MW-10 had gray to black sand from 60 to 72 feet below grade with strong petroleum odors. The samples were moist from 41 to 46 feet bgs and wet from 47 to 82 feet bgs. MW-11 had gray to black sand from 55 to 62 feet below grade with

LIRR - JAMAICA STATION (Continued)

U001841404

strong petroleum odors. The samples were moist from 40 to 42 feet bgs and wet from 45 to 77 feet bgs. 8/3/15 - Raphael Ketani. I reviewed the Jamaica Station Second Quarter 2015 Report dated 8/1/15. Groundwater samples were collected from wells MW-1A, 2A, 4 and 6 to 8 on 5/12/15. All of the VOC results were either entirely non-detect or almost entirely non-detect. Most of the SVOC results consisted of the benzo series of analytes and chrysene and reflected the presence of historical fill. 8/12/15 Raphael Ketani. I reviewed the Remedial Investigation Report dated July 2015 and submitted by Dvirka and Bartilucci on behalf of the LIRR. New wells MW-10 and MW-11 were installed on 5/5/15. Groundwater elevations were measured on 6/23/15. The elevations varied from 18.97 feet at MW-6 and MW-8 at the east end of the parking lot to 18.86 feet at MW-4 in the elevated area next to the tracks. Groundwater flow was determined to be to the southwest. The depth to groundwater at Archer Avenue (on the north side of the parking lot) was about 23 feet below grade. This is about 15 to 20 feet above mean sea level. Recently, there has been a rapid rise in the water table due to the cessation of pumping of the Jamaica Water Supply District. The change in water table elevation may have created a large smear zone. NAPL was never seen in any of the wells. Soil samples taken during 2012 show that the oil contamination starts at least 12 feet below the current water table. The LIRR stated that additional investigation or remediation is not warranted as: 1)The USTs under the parking lot were closed in 1997 and the contaminated soil was excavated. 2)The spill has been delineated. 3)There are a limited number of soil and groundwater samples which show contamination above the CP-51 unrestricted residential soil standards and above the TOGS 1.1.1 standards. 4)Exposure to the public and on site workers is limited by the depth of the contamination asphalt covers the site and the contamination is not migrating. The LIRR requested that the spill case be closed. However, Dvirka and Bartilucci recommended taking additional groundwater samples through 2015. Three geologic cross sections were constructed for the site. Cross section A-A runs north of the parking lot and parallels Archer Avenue. It starts at JS-03 (west) and ends at MW-6 (east). Staining, petroleum odors and elevated PID readings were found in the top 20 feet of soil at JS-03 and in the top 15 feet of soil at JMW-1A. At location SB-01/GP-01, 7 feet of the stains, odors and PID readings were found 5 feet above the old water table horizon and 3 feet of NAPL saturated soil was found just above the old water table. At JS-02, stains, odors and PID readings were found in the lower 30 feet of the soil column. Cross section B-B runs along the south end of the parking lot and through the twin 20,000 gallon UST tank vault at SB-03/JS-01. It starts at SB-05 and ends at JS-04. Staining, petroleum odors and PID readings were present in the top 5 feet of SB-05 and in a 20 foot long section in the middle of the same boring which intersects the new water table. There was also another stained section of soil 6 feet above the old water table horizon. SB-02/GP-02 had 18 feet of stained soil with odors in its top part and a 21 foot NAPL contaminated zone which was situated above the old water table horizon. SB-03 had 20 feet of stained soil with odors in the top of the boring, 10 feet of NAPL bearing soil below the stained zone and a 10 foot stained zone below the NAPL zone. The top 27 feet of JS-01 had stained soil with odors and an 8 foot zone of NAPL bearing soil below it. SB-04 had 10 feet of stained soil towards the bottom of the boring. Cross section C-C runs diagonally through the site from northeast to southwest. The cross section starts at MW-6

LIRR - JAMAICA STATION (Continued)

U001841404

and ends at SB-06/MW-10. JS-02 had stained soil with odors and PID readings upgradient of the tanks. SB-02/GP-02 had 2 zones of staining and odors and 2 zones of NAPL saturation for a total of 18 feet of saturation. MW-4 had 2 feet of NAPL saturated soil just above the old water table horizon. SB-06/MW-10, which is downgradient of the 20,000 gallon USTs, had 11 feet of stained and odor bearing soil at the level of the old water table. The boring logs for SB-01 to SB-03 were compared to the cross sections. The zones of NAPL saturation matched. SB-05 (downgradient to the vault) had stains and odors at the following intervals: 0 -5 ; 5 -10 ; 25 -30 ; and 30 -33 . SB-04 (to the east and upgradient) had odors at the 35 to 45 interval. SB-06 (downgradient to the vault and in the rail bed) had soil with light to strong odors from 55 to 77 . SB-07 (far sidegradient and in the rail bed) had soil with odors from 55 to 62 . Analytical results: Soil samples taken 4/11/12 to 4/13/12, 9/27/14 and 10/4/14: VOCs compared to CP-51 unrestricted residential soil standards: SB-01, SB-04, SB-06 almost entirely non-detect for VOCs with several very low hits SB-07 mostly non-detect with 6 very low hits in the 60 -62 sample (strong oil odors) SB-02 20 to 23 sample with 4 VOC non-detects, 7 very low hits, 3 very low to low exceedences to 32 ppm (benzene was non-detect); 32 to 34 sample with 8 very low hits and 6 non-detects SB-03 20 to 22.5 sample with 8 non-detects, 5 very low to low hits and 13 ppm of cymene; 25 to 27 sample (NAPL saturation) with 4 non-detects, 6 very low to low hits, 4 very low to low exceedences to 18 ppm; 53 to 55 almost entirely non-detect SB-05 2 to 5 sample (black stains and oil odors) with 5 non-detects, 6 very low to low hits, 3 very low to low exceedences to 2.88 ppm (benzene was 0.33 ppm); other 2 samples had either very low hits or non-detects SVOC results: almost entirely non-detect for all of the samples. For the historical borings, the results for the JS series were almost entirely non-detect for VOCs with some very low hits. JS-02 at 18 -20 (upgradient) had 0.91 ppm of total xylenes and 26 ppb of naphthalene. MW-7 (just downgradient) and MW-8 (far sidegradient and upgradient to the east) were almost entirely non-detect. The SVOC results had very low hits or were non-detect. The PCB results for JS-01 were entirely non-detect. Analytical results: Groundwater samples taken from JMW-1A, JMW-2A, and MW-4, 6, 7, and 8 on 5/5/15 and 5/12/15: VOC results compared to TOGS 1.1.1 standards: The results for all of the above groundwater samples were entirely non-detect or almost entirely non-detect with some very low hits. The results for the samples taken on only 5/5/15 from MW-10 and MW-11 were mostly non-detect and entirely non-detect, respectively. The SVOC results were almost entirely non-detect for all of the samples, except for some low exceedences for samples taken on 5/12/15 from JMW-1A, JMW-2A, MW-6, MW-7 and MW-8. Metals samples taken on 5/6/94 from JMW-1A to JMW-3A had exceedences for chromium, copper, lead and nickel. 8/13/15 - Raphael Ketani. Staff at the Department reviewed the data in the case file for the spill case. Based upon: 1) the non-detect to very low analytical results for the soil samples taken during 2012, and previously - thereby meeting the CP-51 unrestricted residential soil standards; 2) the non-detect to very low groundwater results from the samples taken during May 2015 - thereby meeting the TOGS 1.1.1 standards; 3) the cleaning out of the tanks and their abandoning in place and the excavation of the contaminated soil next to the tanks - thereby eliminating the source of the spill; it was determined that any residual contamination would not be a threat to the public nor the environment. Therefore, the spill case was closed effective

Spiller Company: UNKNOWN
Spiller Address: 97TH AVE @ 148TH ST
Spiller Company: 999
Contact Name: DAVID
DEC Memo:

"10/5/2015 - Feng - Duty Desk. Talked to David of NYCDEP HAZMAT (917-682-2432). He is still onsite and waiting for his partner to come. David said there are (6) 5-gallon pails/buckets that have no lids. Inside of the buckets are black plastic bags which are filled with wasted petroleum product. (3) of the buckets, either by accident or cars, were spilled on the street along the curb. He estimated it is about 2-3 gallons, but the stain that brought by the cars extended to half of the block. He does not have enough speedyDry or absorbent to clean up by himself at this time. No sewer/drain being affected. No soil impacted. He is waiting for his partner, who is on the way and will be there in in 30 minutes, to bring a 35-gallon drum to load all of the petroleum product into one single drum. The empty buckets will be picked up by the Department of Sanitation. And the spill, according to David, will be cleaned up by Sanitation also. He already contacted Sanitation and they will be there in 1-2 hours. But by the time his partner gets to the site, they will have more speedyDry and absorbent to contain the spill. I advised him that the spill will be assigned to Ryan Piper for petroleum product pickup. spill is assigned to Ryan Piper for drum run. Emailed him the spill report. 10/15/15- DEC Piper removed 1 drum from site via box truck with IP & T. Spill closed."

Remarks: "david 6 5 gallon buckets containing bags full of unknown petroleum products. 2 were spilled into street. David will be loading all into 35 gallon overpack."

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Contact Name: ANONYMOUS
DEC Memo: "05/12/17 - Lakhani The property is an active construction site. AKRF is the consultant for the BCP site. While drilling to install pilings, contaminated soil was encountered. AKRF believes that the contamination is associated with an unknown UST on the site. However, AKRF cannot investigate the site without installing shoring. Furthermore, the site's close proximity to the LIRR presents another challenge to investigate the site. The proposed redevelopment of the building includes a mixed-use building of commercial/retail with two (2) partial basements. AKRF PM: Neoma Chefalo (nchefalo@akrf.com) - 6463889854 BCP #C241183 12/27/18 - A Certificate of Completion under the BCP program was issued for a dual-track 1 & 4 cleanup at the site. This spill was addressed under the BCP."
Remarks: "clean up pending (Brownsfield clean up program) cs.Manager Mandy Yau"

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "12/10/12 TJD T/C with Mrs. Prince - she states Petro Oil technician has responded to her residence associated with a drip from 275 basement AST. Technician applied a magnet patch on tank bottom and tank is currently not leaking. Owner had a fuel delivery over the weekend - filling tank. Petro is reportedly sending a third party contractor (Milro Associates) to residence to evaluate tank system for possible replacement. DEC advised owner to place a drip pan under tank to aid in monitoring - owner was further advised to replace tank ASAP or transfer fuel to a temporary tank to avoid the potential for a more significant discharge. 3/27/13 AFrischeisen intern TTF letter sent. 5/10/13 TJD T/C with Michael Natoli (Petro Oil - Supervisor) - he confirms history as provided by property owner on 12/10/12. Less than 1 pint of #2FO was discharged onto concrete floor and cleaned with granular absorbents. 275 AST was replaced in early January 2013. As per DEC request Petro provided a short written narrative of events associated with reported discharge - letter has been uploaded to EDOCS. No further action is required."

Remarks: "wet at bottom, concrete, c/u pending"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 1/12/2004-Vought-Spill transferred from Rommel to Vought. SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 10/11/07 - UST Closure Report received by Department. 12/18/07 - Obligado - Reviewed UST Closure Report. 5 underground storage tanks were removed and disposed of off-site. 450 tons of soil from the tank excavation was disposed of off site at Clean Earth of Carteret, Inc. Manifests were attached. Endpoint samples reveal one soil result above allowable soil concentration at 160 ug/kg n-butylbenzene. 3 new tanks were installed. The PBS registration has been updated. After review of site and file, determine a subsurface investigation is warranted as site is in Jamaica Public Well Supply Field and ground water impact has not investigated. I sent a letter to Palmana Realty and ccd to Steve Muller via email. 2/22/08 - Obligado - Reviewed Investigation Work Plan. Proposes 5 soil borings, collection of soil samples from high PID interval and water table, collection of ground water samples, and installation of a minimum of 3 wells if contamination is detected. Submission of a summary report within 60 days. I sent Steve Muller an emailed approval cc to RP and Joe Sun. 3/28/08 - Obligado - Phone conversation with Steve Muller. He said they found impacts and they will need to install wells. He will submit the report on time. 5/19/08 - Obligado - Reviewed Investigation Summary Letter - Max BTEX 450 ug/L. Proposes monitoring. Due to relative low levels I approved of monitoring only at this time but may require additional investigation/remediation based on future sampling. 8/20/08 - Obligado - Meeting with Gasteria/ASR/DEC. Agree to 1 additional well installed across 146th street at corner of Liberty. Submit workplan by September 15. 10/8/08 - Obligado - review workplan. Proposes 1 additional well, soil and ground water sampling. 10/10/08 - Obligado - Sent approval letter. 4/16/09 - Obligado - Received a call from Zach Schreiber (212)718-3056, from the NYC Office of Remediation. He inquired about the spill. The site is an E designated site. I gave him provided him information about the spill. He is going to issue letter of no objection to Gaseteria to operate gas station. 9/16/09 - Obligado - Review spill closure request. According to report, 450 tons of soil removed during tank pull. The endpoint samples were below SCOs. 6 quarters of ground water sampling show only low level VOCs. Maximum Total BTEX is 134 ug/L at ASR3, and appears to be decreasing from initial high of 450 ug/L. MTBE is ND. After discussion with DEC Tibbe, this case has been closed. Sent Spill Closure Letter."

Environmental Interest/Information System:

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State. ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Registry ID: 110004568281

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

No liquid-phase hydrocarbons (LPH) was encountered. Depth to water table ranged from 15.74 to 17.79 ft. below casing. The flow direction is toward southwest (historical). The highest concentration of BTES is at MW-1, which has 8,600 ppb. MW-7 has the highest MTBE at 810 ppb. 1/12/2004- Joe Sun sent a letter and Stipulation Agreement, datedd 1/12/2004 to Michael Matri of Hess Corporation. The letter approves the Remedial Action Plan using a combined VES/AS system, prepared by EnviroTrac, dated February 2000. The Department set a deadline of February 2, 2004 for signing of the Stipulation Agreement by the Respondent. 10/28/05: Reviewed triannual monitoring report dated 5/5/05. SVE/AS system in use and site is almost cleaned up. 2/2/06: Reviewed the update report for August - December 2005. SVE/AS system shutdown. A sensitive receptor survey will be prepared. Max BTEX 373 ppb (MW-1), max MTBE 6.5 ppb (MW-5). 1/26/06: 1/15/06 meeting between Quantum, NYSDEC, and ET. A sensitive receptor survey will be performed and site closure considered. 4/4/06: Sensitive receptor survey received. The site is approximately 0.60 miles from a Jamaica Water Supply well. 4/28/06: Approved removal of SVE system. 7/5/06: Meeting on 6/28/06 with Hess, Quantum, NYSDEC, EnviroTrac and GSC. Approved removal of MW3 and MW6 from sampling. Closure will be reconsidered after another quarter of monitoring. 8/4/06: Reviewed the second triannual 2006 update report. Max BTEX 937ppb (MW8), MTBE ND in all wells. ORM socks will be installed in MW1,8. MW5 approved for removal from sampling. 11/15/06: Reviewed the triannual report dated November 8, 2006. Wells sampled on September 25, 2006. Large decrease in contaminant concentrations. Closure request denied, continue monitoring for rebounding. MW 2 and MW9 approved for removal from sampling. 1/12/07: Received Sensitive Receptor Survey and update report. Wells sampled on 12/1/06. Max BTEX 536 ppb (MW8), max MTBE 2.5 ppb (MW1). Benzene ND. Three inactive Jamaica Water Supply Wells located within 1 mile. Toxics targeting identified three wells within 0.25 mile. The site is located in a commercial district. 1/17/07: Meeting on 1/16/07 with Hess, Delta, NYSDEC. NFA issued."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 0010
Tank Id: 216379
Material Code: 0022
Common Name of Substance: Waste Oil/Used Oil

Equipment Records:

B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
D00 - Pipe Type - No Piping
L00 - Piping Leak Detection - None
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
I00 - Overfill - None

Tank Location: Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.

Tank Type: Steel/Carbon Steel/Iron

Tank Status: In Service

Pipe Model: Not reported

Install Date: Not reported

Capacity Gallons: 55

Tightness Test Method: NN

Date Test: Not reported

Next Test Date: Not reported

Date Tank Closed: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "3/6/07 sent ttf letter to: Anthony Scaccia City Transit Mix, Inc. 104-14 148th Street Jamaica, NY 11435 Called Crompco because I was having difficulty finding the owner or operator of the site. Spoke with mark at Crompco. Tank tester not in all week. Very little info in his file. Dry leak possibly in vent line. He was unable to give me a contact phone # at the facility. Found phone # and address through acris, google, and NYS Business. Called Mr. Scaccia (718)658-3797. He plans on having the tank retested and then, if necessary, have

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 57540
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
B00 - Tank External Protection - None
E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None
C02 - Pipe Location - Underground/On-ground
J02 - Dispenser - Suction Dispenser
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
G03 - Tank Secondary Containment - Vault (w/o access)
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 06/01/1996

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 475428
DEC Memo: "1/26/16: J.Kann - spoke with Rob Hill of Riteway. They installed a new tank in the basement of the property and soil samples were collected around the former tank as a part of the tank decommissioning. The soil had slight exceedences. I informed Rob Hill that Rashad Omar will be the project manager for the site and emailed Rob/Rashad regarding the spill. Since Rashad is the runner today, spill assigned to Rashad. 1/27/2016: Rashad 88-08 151 Avenue has another building on tax lot, 88-12 151 Avenue. No additional spills found for sites. No PBS registration found for 88-08 151 Avenue however there is PBS registration for 88-12 151 Avenue, PBS#2-276898 for a 15,000 gallon #2 fuel oil UST which is in service. As per DOB records a permit was approved on 9/14/15 to install replacement fuel storage tank and abandon existing fuel storage tank. 2/1/2016: Rashad Initial email that J. Kann sent had wrong email address for Rob Hill, I emailed Rob this morning: Can you please send over the soil results and a site plan indicating where the samples were taken for this location? 2/17/2016: Rashad Received email from Rob: These samples were taken from the below the tank bottom. In addition the tank started to fill with water when the holes were made at the tank bottom. The samples were taken from the left to right in the oil tank. Email had sample results, they were uploaded to D2. Sample 1: 1,2,4-Trimethylbenzene 4300ppb, Ethylbenzene 1500ppb, Xylene 810ppb Sample 2: Xylene 530ppb Sample 3: 1,2,4-Trimethylbenzene 3800ppb, xylene 620ppb Sample 4: Xylene 660ppb 2/18/2016: Rashad Sent email to Rob: If water is present can you please take a water sample? Also what size is the tank and what type of fuel was used in the tank? Is the tank being removed or closed in place? Rob responded: It is a #2 oil tank and the tank is a 15,000 gallon tank. I will obtain a water sample tomorrow. 3/2/2016: Rashad Received email from David Chan: Please find the sample results for the water sample at 88-08 151st Ave. Please let me know if you need anything else. Thank you in advance, Email contained analytical data from water sample. The results have been uploaded to D2. The groundwater sample showed no VOCs or SCOVs above unrestricted levels. Spill will be closed as per minor soil contamination and clean groundwater sample. "

C00 - Pipe Location - No Piping
I04 - Overfill - Product Level Gauge (A/G)
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Location: Steel/Carbon Steel/Iron
Tank Type: Closed - Removed
Tank Status: Not reported
Pipe Model: 10/01/1981
Install Date: 3000
Capacity Gallons: -
Tightness Test Method: Not reported
Date Test: Not reported
Next Test Date: 02/01/2008
Date Tank Closed: True
Register: MFLEONAR

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name: K - JAMAICA GAS AND LIGHT MGP
Address: BEAVER RD., & 158TH ST.
City,State,Zip: QUEENS, NY 11451
Program: HW
Site Code: 378997
Classification: Not reported
Region: 2
Acres: 0.75
HW Code: 241063
Record Add: 03/27/2007
Record Upd: 05/04/2020
Updated By: DJEATON

Site Description: Location: The Jamaica Gas and Light MGP site is located in an urban area. The 0.76 acre former manufactured gas plant (MGP) site is immediately east of the intersection of 158th St and Beaver Rd, in Jamaica, NY, Queens County. LIRR (Long Island Railroad) tracks lie to the north of the site, and Prospect Cemetery lies to the south of the site. Site Features: The site is a relatively flat property that is vacant, fenced in, and partially covered in pavement. Current Zoning and Land Use: The site is currently vacant land that is rented out to a waste services company that uses it to store roll-off containers and trash compactors. The site is zoned as R6, residential. The surrounding parcels are currently used for a combination of commercial, and light industrial. York College is about 0.25 miles east of the site. The South Jamaica Houses are about 1/3 miles southeast of the site. Downtown Jamaica is 1/10 mile north of the site. Past Use of the Site: A review of historical documents indicated that the site operated as a MGP for at least 25 years in the late 1800s before being converted to a gas storage and distribution facility around 1900 when the two smaller gas holders and structures associated with the MGP were demolished. The remaining large gas holder and associated gas storage and distribution structures were demolished in 1938. The property was subsequently used as offices by the Brooklyn Union Gas Company until the late 1960s, and then left vacant. Site Geology and Hydrogeology: Underlying the partially paved surface is urban fill consisting of poorly graded sand and gravel with varying amounts of anthropogenic debris, ranging from 3 to 19 feet in thickness. Underlying the fill is a native unit of sand, consisting of subunits of well and poorly graded sand. Discontinuous lenses of silty sand, sandy silt, and clay are present within the sand unit. Maximum boring depth was 45 feet bgs and the bottom of the well graded sand unit was not encountered. The Gardiner's clay, if present, is estimated to occur at depths ranging between 75 and 90 feet bgs. Bedrock is estimated to be at depths greater than 500 ft bgs. Groundwater was encountered at depths ranging from 13 to 27 feet bgs. Groundwater generally flows from the north/northeast to the south/southwest.

K - JAMAICA GAS AND LIGHT MGP (Continued)

S109580118

Env Problem: Nature and Extent of Contamination: Prior to Remediation- Based upon investigations conducted to date, the primary contaminants of concern include coal tar and PAHs (Polycyclic Aromatic Hydrocarbons). Soil- Impacts beneath the site consist of tar odors, staining, and tar coatings of soil grains, generally to the center and southern area of the site, ranging from 3 to 33 feet bgs (below ground surface). Observations of tar coating were limited to four borings and 2 test pits, in the vicinity of the two smaller gas holders and former purifier and meter room. Observations of tar coating are limited to above the water table. Suspected purifier waste was observed in one test pit within the footprint of the former purifier and meter room. The total PAHs criterion, from DEC guidance document CP-51, of 500 ppm was only exceeded in 3 on-site subsurface soil samples. Groundwater- NAPL (Non Aqueous Phase Liquid) was not observed in any of the wells. Groundwater beneath the site does not contain manufactured gas plant (MGP) related constituents at concentrations exceeding the groundwater standards. Inorganic compounds, including iron, lead, manganese, and sodium, which were detected exceeding groundwater standards occur naturally in the aquifer and are not related to the historic MGP operations. Soil Vapor and Indoor Air- Soil vapor and indoor air assessments were not performed because there are no structures or occupants currently on the site.

Health Problem: The NYSDOH will evaluate the potential for impacts to public health from exposure to site contaminants once sufficient information from the investigation of the site becomes available for review.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: K - JAMAICA HOLDER STATION
Address: 158TH ST. & LIBERTY AVE.
City,State,Zip: QUEENS, NY 11451
Program: HW
Site Code: 378996
Classification: Not reported
Region: 2
Acres: 3.299999999999998
HW Code: 241062
Record Add: 03/27/2007
Record Upd: 04/12/2013
Updated By: BXANDERS

Site Description: Location: The Jamaica Holder Station is comprised of two parcels of land near Liberty Avenue in Queens, New York, Queens County. The site is between 158th and 159th Streets. Site Features: The FDA building, parking, and the Nursing Science Building of York College CUNY are located on the site. Current Zoning/Use(s): The current land use for the parcels includes a college building and Federal Building. Past Use of the Site: The site operated as a gas distribution facility from 1944 to 1975. There was a 10.6 million cubic foot tar-sealed, remote gas distribution holder, a boiler room, and an office. The site was operated by Brooklyn Union Gas (BUG), a predecessor company to National Grid. BUG sold the property in 1987. Geology and Hydrogeology: Site geology consists of two unconsolidated units varying in thickness across the site. These units consist of fill ranging from 2.5 feet to 11 feet below ground surface, and well-graded sand ranging from 2.5 to greater than 45 feet below ground surface. Groundwater was encountered at depths ranging from approximately 11 to 34 feet below ground surface. The flow is northeast to southwest.

Env Problem: Prior to Remediation: Based upon investigations conducted to date, there are no contaminants of concern at the site. Soil- There were no detections of contaminants above SCOs. Groundwater - There was only one PAH constituent (benzo(a)anthracene) detected above standards, at a concentration of 0.002 ug/L. The Site Characterization Report was approved in January 2013, with No Further Action for the site.

Health Problem: Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking water or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE Universal Construction Mr. Hemlell 718-850-6446 Cut open & clean tank. Sent letter 1/27/06 to obtain more info. Sent strong followup 2/21/06. 09/05/06 -Zielinski This spill case reassigned from CO to Region 2. 10/20/06 - Zielinski Visited the site. According to staff at the property, the tank has been decommissioned. Over the phone, spoke with Mr. Ravi Etwaru, President of America Sevashram Sangha, Inc. He confirmed that the tank had been closed in place. Mr. Etwaru faxed an affidavit by Pro-Test on two tanks closures in 2000, tanks testing results conducted in 1998, and waste oil removal and disposal. Lack of information about a cause of the failure or soil contamination. 11/06/06 - Zielinski Sent a TTF letter. 01/04/10 - LZ A TTF letter sent to American Sevashram requesting a response by February 12, 2010. 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMEO 2/1/13 TJD T/C with Deo Ramattan (917 929 8028), a representative of Hindu Temple where reported tank test failure was reported approximately 15 years ago. Temple was previously a synagogue and was converted to gas in approximately 2000 - UST's were then abandoned. No records are available. Original TTF report by ProTest does not indicate if failure was due to wet/dry leak. Options to resolve open spill were discussed with caller including soil borings around tanks or removal of tanks and direct observation. Caller is attempting to locate historical documentation and will be obtaining price quotes to perform additional investigation as discussed. 2/12/15 TJD Spill reassigned from DeMEO to Patel 03/27/15-Hiralkumar Patel. alternate address for building 153-14: none no other spill record found. PBS #: 2-117153. as per PBS record, building 153-14 has one (1) 1,500 gal #2 oil UST, closed-in-place in Sep. 1999. as per tank testing result dated 12/17/1998 (stored on edoc), Protest tested two 2,000 gal #2 oil tanks (64 inch diameter). searched PBS database with owner's name American Sevashram, Inc. and found another PBS record (# 2-117145)

for adjacent building 153-20 90th Avenue.

***** alternate address for building 153-20: 153-18 to 153-20 90th Ave no spill record found. PBS #: 2-117145. as per PBS record, building 153-20 has one (1) 3,000 gal #2 oil UST, closed-in-place in Sep. 1999.

***** as per NYC DOB record, permits were approved for both buildings (153-14 and 153-20) in Sep. 1999 for removal of existing boiler and replace it with one gas fired boiler. the tank test report from Protest states that a hole was found in vent pipe for tank #1 and big hole was found somewhere in tank #2 as can't pull vacuum in the system. based on site diagram in tank test report, tank #1 was at building 153-14 and tank #2 was at building 153-20. the subject spill was reported with address 153-14 where hole was found in the vent pipe, but there is no report for tank at 153-20 where tank system failed due to hole some place in the system. America Sevashram Sangha Inc. **property owner** PH. (718) 523-7515 discussed with DEC Austin. based on available information, a site visit is needed. 04/03/15-Hiralkumar Patel. 10:30 AM:- visited site and inspected basement in both buildings 153-14 and 153-20. no signs of oil seepage or petroleum odors noted in basements. in accordance with R2 TTF closure protocol, this spill is being closed due to no indication of a current release, no information indicating that there may have been a historical release, and no information that this tank test failure will be an issue in the future."

DEC Memo: "5/30/2012 Sangesland spoke to Donna at ABC Tank. She says ABC did the work, they will prepare a closure report and submit it as soon as the client pays. Sangesland spoke to Mark at the management company. He believes ABC did too much work and charged too much. Sangesland asked for 3 items: 1) Copy of passing tank test 2) Summary of what work was done on the tank/system to repair the leak 3) Statement that EITHER no contamination was found or Contamination was removed and clean endpoints taken . Sangesland reviewed a letter from Colonial Mgmt dated June 12, 2012. It says: As per our phone conversation please find attached the tank test report performed by ABC Tank Repair and Lining INC. back on March 12, 2012. As I (Mark Colton Colonial Mgt)stated in our discussion there was no contamination of oil into the ground. The only digging done was to the top of the tank so ABC Tank workers could access the manhole which was covered in concrete. If you need any further assistance feel free to call our office at 718-258-4288. Thank you, Mark Colton. *****Based on this note and copies of a passing tank test report Vaulted Aboveground 2500 gal tank dated 3/12/2012 by ABC Tank Christopher Quintana. This spill case is closed. 5-6-14 Dupigny - Notes from Sangesland Call Mark at Colonial Mgt. "

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ 6/19/03 SSO C. Koehler notified DEC of Vault #3 remediation to begin 6/23/03. (KMF) 6/30/03 C. Koehler called to inform me that remediation has been completed in vault 3 but the post-ex samples were not taken. Today, Jacques Whitford returned to Jamaica to take samples and there was 8-10 of water in vault. Water is from water hoses used for cooling the transformer. They plan on vaccing out water and possibly scheduling sampling at night while transformers do not need cooling. She also notified me that one waste characterization sample returned 77ppm for PCBs. (KMF) 9/5/03 Lab results indicate only minor residual contamination (THP concentrations all below 600 ppm, PCBs range from ND to 3 ppm at depth). Gave SSO OK to backfill with clean bluestone. (KMF)
----- Con Ed e2mis #141022: January 23, 2002:
12:46 hrs. While on inspection found approx. 8 oz. of dielectric fluid from transformer #3 had leaked from the unit on to bluestone. Equipment is dripping at a rate of 1 drop per minute. No water involved. Spill is not contained. Sample to be taken to Astoria Chem. Lab. Cleanup to be started as soon as possible. April 12, 2002 Steve

Cataro reports during substation inspection, historic contamination was found on bluestone in/around transformer vault #3. By visual inspection the surface layer appears to be 50-75% stained/discolored. Contamination may be related to the initial spill report. A station remediation plan will be prepared to determine the priority order for addressing this and other historic incidents as per SSO's letter to NYSDEC dated February 20, 2002. Housekeeping and maintenance activities, as required, will be documented. Maximo tag #145739. Update 11/4/03 1500 Hours Stained areas of Vault #3 were remediated by Allstate Power Vac. Job completed 6/30/03. LSN 03-06282-001 to -020 characterize areas of 10 grid samples. Generated (1) rolloff container of waste bluestone and soil. LSN 03-05313-001 indicates PCB count of 78 ppm in soil/bluestone in waste container v30-3. Disposed of 8,346 Kg. of waste on 6/30/0. Haz Waste Manifest NYG2415168. "faulty equipt spilled 8oz. cleanup pending crew. con ed 141022."

DEC Memo: "03/09/06 Feroze. PBS case of this site is #2-196797. TTF is sent to : JAMAIC ASSOCIATES 88-09 Realty Co. 88-09 148th Street Jamaica, NY 11435. Attn: Super Facility Manager. 03/15/06. Spill is transferred from Feroze to Kumer patel. 03/28/06-Hiralkumar Patel. Spoke with Racheal Adomen. She doesn't have tank test results as she is working as consultant for potential buyer. she doesn't know anything about current owner's information or isolation test on site. she can call her client and may get current owner's information. she will call back with this information. and somebody from her office will send me tank test results in email. FAX for RAcheal: (631) 462-5877. from property shark, found owner name and address as below: Michael J Savino 111-32 76 Avenue Queens NY 11375 PH. (718) 263-8707 FAX (718) 263-7816 as per Michael, property has UST. on his request, sent out copy of TTF through fax. 03/31/06-Hiralkumar Patel. Spoke at ATS and operator told me that nobody has done isolation test on site. Left message for Michael. spoke with Michael. as per him, when Advanced Tank did tank test, at that time vent pipe was broken and they haven't done any isolation test. so he thinks problem is with vent

line. they have repaired this vent line and in couple of days they will do isolation test. Michael will call me with test results once he gets it. as per Michael, they only use oil when temperature goes below 15 degree, otherwise they are using gas. and they haven't noticed any loss of oil while they are running gas for last few weeks. 04/04/06-Hiralkumar Patel. Received call from Michael. as per Mike, they are measuring oil level in tank and it is steady at 25.8 cm from last 3-4 days. he will cotact someone and will do tank test and send final report. 04/17/06-Hiralkumar Patel. Received fax from Jerry Lefkowitz, Attorney representing owner, on Apr. 10. i was out for EVOC training. as per Mr. Lefkowitz, he is requesting deadline extension to May 26, 2006. Left message for Michael. Spoke with Mr. Lefkowitz and told him that he doesn't need deadline extension in written if i am getting updates on weekly basis. Spoke with Michael. as per him there is no drop in level inside the tank. told him that he can submit test results showing tank system is tight by May 25, 2006. 05/05/06-Hiralkumar Patel. Received call from Rene from Eastmond. they are doing isolation test and will call back once he gets test results. 05/10/06-Hiralkumar Patel. Received message from Mike Savino. Spoke with Mike. as per him, Eastmond found that tank is ok during isolation test. they found that fill line and vent pipe needs work. Mr. Savino is contacting other companies for work proposal. Left message for Rene. 05/11/06-Hiralkumar Patel. Left message for Rene. 05/15/06-Hiralkumar Patel. Received fax from Mr. Savino. fax contains copy of letter from Rene from Eastmond about tank only test result and estimates for further work. as per Eastmond letter, tank was passed the test but fill and vent lines needs further work. Eastmond submitted proposal for fill and vent line replacement. 05/16/06-Hiralkumar Patel. Received call from Isaac. they have submitted proposal for further work, but haven't heard from owner. also he hasn't got payment for previous isolation test work. 06/05/06-Hiralkumar Patel. Left message for Isaac. Left message for Mr. Savino. 07/06/06-Hiralkumar Patel. Left message for Mr. Savino. 07/28/06-Hiralkumar Patel. spoke with operator at Mr. Savino's office. as per her, they sold this property in May 2006. Left message for Mr. Savino. New Owner: Urban American (201-553-9800). left message for Ms. Ann. received call from Mr. Savino. he will call new owner and asked to contact department. 07/31/06-Hiralkumar Patel. Mr. Savino's lawyer gave phone number for purchaser's lawyer. Peter Koffler (212) 806-5686 08/07/06-Hiralkumar Patel. left message for property manager. 08/10/06-Hiralkumar Patel. received message from Ann (201-553-9800 Ext. 48), property manager. Hydrotech is working to send required documents to the department. 09/06/06-Hiralkumar Patel. spoke with Ann Heath at Grand Review LLC. they will send documents showing work details at fill and vent lines. asked Ms. Heath to investigate along fill line as Eastmond stated that fill line need further work. Ms. Heath will submit documents within 30 days. 10/02/06-Hiralkumar Patel. spoke with Ann. they have hired Eastmond for soil investigation. Eastmond is waiting for permit from DOT. Ann will call back with dates when Eastmond will start working at site. 10/10/06-Hiralkumar Patel. received message from Ann (Cell: 201-726-7342). she hasn't got final schedule from Eastmond regarding soil investigation along fill line. 10/13/06-Hiralkumar Patel. received message from Ann (Ph. 201-537-5148). they got permit from DOT and she wants to discuss scope of work. left message for Ann to submit work plan as the Department never received such plan. received fax from Ms. Heath with proposed work plan. 11/02/06-Hiralkumar

DEC Memo: "1/19/06 - Raphael Ketani. I spoke to Mark Randazzo of O'Brien & Gere ((732) 225-7380, ext 231; cell (781) 883-6432) today. He said they were digging at the site and came across a large tank (17'X6) that was not known to be there. The soil is contaminated with oil. I told him to take 6 soil samples on the floor of the trench (one at each end and 2 at the base of the north wall and at the base of the south wall) and one 3 feet above the floor of the trench in each wall (total 10). He said that he had dug down 15' already and asked how much he should go. I told him that he has to dig out all of the soil that exceeds TAGM 4046, or until he hits groundwater. I told him that if there is groundwater, then water samples need to be taken. I told him that if he believes the digging will endanger buildings or structures, then he has to get an engineer to look at the site. If the engineer makes a determination that it is unsafe to dig deeper, then DEC needs to receive a report stating this from the engineer. He agreed to dig deeper and take the samples. Jan 20th, 2006 Sent CSL To Howard N. Apsan CUNY 535 East 80th St New York, NY 10021 2/17/06 - Raphael Ketani. I spoke to Mr. Randazzo. He said that the digging and

S107523408

soil removal have been completed and soil samples were sent to the laboratory. He said they only went 2 feet deeper due to safety concerns, but they didn't hit water. I asked him when I should receive the final report and he said in 2 or 3 weeks. 3/21/06 - Raphael Ketani. I received the Underground Storage Tank Closure Former St. Monica's Church Property report dated March 2006 and produced by O'Brien & Gere. I reviewed the report and found the results to be non-detect, or below TAGM 4046, or just above TAGM 4046. The PBS case #2-333638 has been updated. They want an NFA letter. Based upon the report, I am closing the spill case. Also, I am writing the NFA letter. "

Remarks: "tank is being pulled, soil contamination, remediation is in progress. tank size is 3600 gallon tanki."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT MULQUEEN INVESTIGATED AND RESPONDED TO SPILL. GASETERIA CLEANUP UP SPILL IN HOUSE BY REMOVING APPROX 100 GALLONS OF GASOLINE AND 3,000 GALLONS OG WATER FROM DRYWELL ONWEST SIDE OF PROPERTY. SPILL NEEDS TO BE FOLLOWED UP WITH SUBSUFACE SAMPLING. 1/12/2004-Vought-Spill transferred from Rommel to Vought. 5/25/05-Vought-Spoke to Steve Muller (ASR). ASR wil send copy of UST Closure Report despite spill going to sewer. 9/23/05- OBLIGADO- FILE TRANSFERRED FROM VOUGHT TO OBLIGADO 11/10/05 - Obligado - Review UST closure report, from ASR dated September 2003. 3 4000 gallon USTS removed, 12 550 gallon USTs removed, enpoint samples collected from beneath excavation. Soil results show 920 ppb MTBE. Requests no further action based on: no exceedences of NYDEC Guidance Values , passed tightness tests in 2000, tanks encased in concrete, ground water at 35 ft and impact to groundwater not likely, site scheduled to be improved with a retail store. DEC will need 1) one soil boring and ground water sample down gradient of western dry well, and 2) one soil boirng and ground water sample below 3-4000 gallon UST excavation. 10/28/05 - Obligado - Site visit with Tomasello. Site has already been rebuilt as Dunkin Donuts. 12/2/05 - Obligado - This site is located on public water supply map, approximately .5 miles from 1 inactive unavailable well and 1 mile from a inactive available public supply well. 12/7/05 - Obligado - Meeting with DEC, Gaseteria, ASR. Gaseteria will need to get property access from Dunkin Donuts. DEC will review file to determine if GW sample is necessary 12/8/05 - Obligado - Discussion with Koon, decide DEC needs ground water samples. 1/31/06 - Obligado - PPhone call to Steve Muller, tell him that due to public supply well, DEC will need GW samples. 6/13/06 - N. Bonsteel - Consolidated spill number 8907942 for 138-50 Jamaica Avenue associated with tank test failure of 2-550gal tanks (since removed) to this spill number. 10/25/06 - Obligado - Called Steve Muller to inquire about ground water sampling. Left message to call DEC. 2/8/07 - Obligado - Sent email to Steve Muller requesting the data. 9/24/07 - Obligado - Phone conversation with Steve Muller. Requested the data. He said he has a report in his file, but it hasn't been signed off. I asked him to send me the report. 8/20/08 -

S102150503

Obligado - Meeting with Gaseteria regarding portfolio of spill sites. We discussed the previous gw sampling event. While the gw concentrations were low, the well location was not in vicinity of former tank area, it was in the northwestern most corner of the site, where we wouldn't expect to find significant contamination. They will submit a workplan for an appropriately located ground water sample. 10/22/08 - Obligado - Sent approval for investigation workplan. Due date for results is 12/22/08. 12/31/08 - Obligado - Reviewed closure request. Very low concentrations of BTEX in gw of ND and 69 ug/L total BTEX in 2 gw samples collected. MTBE ND in both samples. Soil samples from 2003 UST excavation were all below SCOs except for one sample 920 ug/kg MTBE. This spill does not appear to be a threat to public or environment. After discussion with DEC Tibbe, this spill has been closed. "

Remarks: "PUMP WAS STRUCK BY A VEHICLE THE MAJORITY OF SPILL WENT INTO SEWER."

Remarks: Pro Test Environmental sent a letter dated November 2,2009 and result of tightness test. The letter stated the following: On February 27,2009 Pro test performed a tightness test on the above subject tank system and it failed with a dry leak. On October 9,2009, Pro test returned to excavate and isolate the tank from its associated lines. The tank only passed a test, but the vent and fill failed line test. Technicians returned on October 22nd to excavate a trench at the existing vent line and removed the old line. Pro test returned the next day to install a new vent alarm. new vent lineand new fill/stick line. Upon completion of these repairs the tank system passed a retest. There was no evidence of contamination in the excavation before it was backfilled with existing clean fill. Spill Closed "

Updated By: KALEWAND
Site Description: Location: The 0.093 acre site is located at 87-83 139th Street in Jamaica, NY, in an urban area. Site Features: The site currently consists of a 2-story commercial building, with a small alley located adjacent to the northern side of the building. Current Zoning and Land Use: The site is currently zoned as C2-4 (commercial) and is located adjacent to a commercial facility to the north, and a residential property to the south. Past Use of the Site: This site was utilized by Duraspec Electroplating from 1998 to 2015. Duraspec Electroplating performed chromium, nickel, cadmium, copper, gold, nickel, silver, and zinc electroplating. The facility had a wastewater treatment area in the eastern portion of the building. In July 2000 a fire in a neighboring building caused damage to some electroplating process tanks and containers of virgin chemicals stored in the alley. A second fire occurred inside the facility in August 2000 which resulted in significant damage to its plating tanks and wastewater treatment units. A significant amount of plating solutions and untreated wastewater were released to the floor. The property was purchased by Hastings Capital, LLC in January 2016. Facility decommissioning and closure is being completed by the new owner under an approved RCRA Closure Plan. EPA ID no. NYD012379798 is associated with the site. Site Geology and Hydrogeology: Groundwater this site is approximately 40 ft below grade.
Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. Soil: Prior to remediation, soil samples collected during previous investigations identified cadmium at concentrations of up to 1200 parts per million (ppm) and chromium at concentrations of up to 4000 ppm. Groundwater: Groundwater samples were collected which identified petroleum VOCs such as ethylbenzene up to 38 parts per

billion (ppb) and xylene up to 8 ppb. The VOCs are likely attributable to a spill on an adjacent gas station. No VOCs or dissolved metals were detected at concentrations exceeding the groundwater standards. Soil Vapor: Soil vapor samples identified trichloroethene at a concentration up to 82.8 ug/m3. Remedial actions have successfully achieved soil cleanup objectives for Commercial Use. Remaining contamination in the soil, groundwater, and soil vapor is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

Site Description: Location: The 0.093 acre site is located at 87-83 139th Street in Jamaica, NY, in an urban area. Site Features: The site currently consists of a 2-story commercial building, with a small alley located adjacent to the northern side of the building. Current Zoning and Land Use: The site is currently zoned as C2-4 (commercial) and is located adjacent to a commercial facility to the north, and a residential property to the south. Past Use of the Site: This site was utilized by Duraspec Electroplating from 1998 to 2015. Duraspec Electroplating performed chromium, nickel, cadmium, copper, gold, nickel, silver, and zinc electroplating. The facility had a wastewater treatment area in the eastern portion of the building. In July 2000 a fire in a neighboring building caused damage to some electroplating process tanks and containers of virgin chemicals stored in the alley. A second fire occurred inside the facility in August 2000 which resulted in significant damage to its plating tanks and wastewater treatment units. A significant amount of plating solutions and untreated wastewater were released to the floor. The property was purchased by Hastings Capital, LLC in January 2016. Facility decommissioning and closure is being completed by the new owner under an approved RCRA Closure Plan. EPA ID no. NYD012379798 is associated with the site. Site Geology and Hydrogeology: Groundwater this site is approximately 40 ft below grade.

Env Problem: Nature and Extent of Contamination: Remediation at the site is

complete. Soil: Prior to remediation, soil samples collected during previous investigations identified cadmium at concentrations of up to 1200 parts per million (ppm) and chromium at concentrations of up to 4000 ppm. Groundwater: Groundwater samples were collected which identified petroleum VOCs such as ethylbenzene up to 38 parts per billion (ppb) and xylene up to 8 ppb. The VOCs are likely attributable to a spill on an adjacent gas station. No VOCs or dissolved metals were detected at concentrations exceeding the groundwater standards. Soil Vapor: Soil vapor samples identified trichloroethene at a concentration up to 82.8 ug/m3. Remedial actions have successfully achieved soil cleanup objectives for Commercial Use. Remaining contamination in the soil, groundwater, and soil vapor is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

Site Code: 549987

Site Description: Location: The 0.093 acre site is located at 87-83 139th Street in Jamaica, NY, in an urban area. Site Features: The site currently consists of a 2-story commercial building, with a small alley located adjacent to the northern side of the building. Current Zoning and Land Use: The site is currently zoned as C2-4 (commercial) and is located adjacent to a commercial facility to the north, and a residential property to the south. Past Use of the Site: This site was utilized by Duraspec Electroplating from 1998 to 2015. Duraspec Electroplating performed chromium, nickel, cadmium, copper, gold, nickel, silver, and zinc electroplating. The facility had a wastewater treatment area in the eastern portion of the building. In July 2000 a fire in a neighboring building caused damage to some electroplating process tanks and containers of virgin chemicals

stored in the alley. A second fire occurred inside the facility in August 2000 which resulted in significant damage to its plating tanks and wastewater treatment units. A significant amount of plating solutions and untreated wastewater were released to the floor. The property was purchased by Hastings Capital, LLC in January 2016. Facility decommissioning and closure is being completed by the new owner under an approved RCRA Closure Plan. EPA ID no. NYD012379798 is associated with the site. Site Geology and Hydrogeology: Groundwater this site is approximately 40 ft below grade.

Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. Soil: Prior to remediation, soil samples collected during previous investigations identified cadmium at concentrations of up to 1200 parts per million (ppm) and chromium at concentrations of up to 4000 ppm. Groundwater: Groundwater samples were collected which identified petroleum VOCs such as ethylbenzene up to 38 parts per billion (ppb) and xylene up to 8 ppb. The VOCs are likely attributable to a spill on an adjacent gas station. No VOCs or dissolved metals were detected at concentrations exceeding the groundwater standards. Soil Vapor: Soil vapor samples identified trichloroethene at a concentration up to 82.8 ug/m3. Remedial actions have successfully achieved soil cleanup objectives for Commercial Use. Remaining contamination in the soil, groundwater, and soil vapor is being managed under a Site Management Plan.

Health Problem: Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

(21,282 square-feet) in area. Site Features: The property is improved with a single one-story, 3,800 square-foot, slab on grade commercial building. A large portion of the site consists of either an asphalt or gravel parking lot. Site access is restricted through the presence of a steel panel fence along Merrick Boulevard. Current Zoning and Land Use: The site is currently zoned for residential and commercial use and sits within an R4-1 zoning district with a C2-4 commercial overlay. The site is currently vacant. Past Use of the Site: The on-site building was constructed in 1973 and was used most recently as a diesel bus repair facility. Other past uses include a knitting mill, gasoline service station, and home heating oil delivery operation. These past uses are considered to be of environmental concern. A Phase 1 Environmental Site Assessment dated April 17, 2014 and the Draft Remedial Investigation Report dated June 2018 have been completed for this property. Site Geology and Hydrogeology: The site is underlain by asphalt pavement and supporting rocky fill to a depth of approximately six inches. Below the rocky fill is brown fine-grained sand grading into reddish-brown, stratified to medium to coarse grained sands with sub-rounded quartz pebbles and sub-angular rock fragments. These sands are likely native glacial outwash deposits and continue to a depth of 20 feet below ground surface (bgs). Depth to bedrock is approximately 450 feet. Depth to groundwater is approximately 14 to 14.5 feet bgs. Groundwater flows from north to south across the site based on well data.

Env Problem: Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based on investigations performed to date, the primary contaminants of concern are elevated tetrachloroethene(PCE) and trichloroethene(TCE). Soil Vapor - concentrations of PCE in soil vapor range from 1,080 g/m3 to 552,000 g/m3 along with a maximum concentration of TCE detected on site of 2,250 g/m3 in the five on-site soil vapor probe locations sampled. Soil - no VOCs, SVOCs, metals, PCBs, or pesticides were detected above6NYCRR Part 375-5 Commercial Soil Cleanup Objectives (SCOs). Four SVOCs, Benzo(a)anthracene (UUSCO 1ppm, max. 1.1ppm), Benzo(b)fluoranthene (UUSCO 1ppm, max. 1.5ppm), Chrysene (UUSCO 1ppm, max. 1.3ppm), and Indeno(1,2,3-c,d)pyrene (UUSCO .5ppm, max. .85ppm), exceeded their Unrestricted Use SCOs. Other Unrestricted Use SCO exceedances include copper (UUSCO 50ppm, max. 181ppm), lead (UUSCO 27ppm, max. 125ppm), mercury (UUSCO .18ppm, max. .24ppm), and zinc (UUSCO 109ppm, max. 233ppm). Groundwater - concentrations for PCE slightly exceeded New York State Groundwater Quality Standards with a maximum concentration of 6.3 ug/l (NYSGWS max. 5 ug/l). Additionally, sodium and manganese were detected above their respective standards in all seven well samples. Further site investigation is needed to determine the extent and possible source of site-related contamination.

Health Problem: As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

PFAS: PFAS Contamination Site Location Listing

DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City's Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

UTM X (Meters):	600880.8
UTM Y (Meters):	4505811.5
Elevation:	39 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940539 JAMAICA, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3604970059B	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

3604970241F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
JAMAICA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Pleistocene
Code: Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

FED USGS

USGS40000829030

Organization ID: USGS-NY
 Monitor Location: Q 1286. 1
 Description: Not Reported
 Drainage Area: Not Reported
 Contrib Drainage Area: Not Reported
 Aquifer: Not Reported
 Aquifer Type: Not Reported
 Well Depth: 49
 Well Hole Depth: Not Reported

Organization Name: USGS New York Water Science Center
 Type: Well
 HUC: 02030202
 Drainage Area Units: Not Reported
 Contrib Drainage Area Unts: Not Reported
 Formation Type: Not Reported
 Construction Date: Not Reported
 Well Depth Units: ft
 Well Hole Depth Units: Not Reported

Ground water levels,Number of Measurements: 226

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
