RE: 5700 47th Street
Maspeth, NY 11378
Spill No. 07-09978

Dear Mr. Falvey:

The above referenced spill number was generated on December 18, 2007 due to a tank failure. On December 21, 2007,Tyree found the problem was a cross over line that had not been removed from the tank top. We removed line, installed a plug at the fitting, re-tested the tank and it held air pressure for three hours. The tank was then tested by a third party certified testing company (Metro Environmental) on the 21st, December, 2007. The test results supported our find that the tank was tight.

There were no visible signs of petroleum contamination

I will be forwarding the test results as soon as I receive them. If you need additional information, please contact the undersigned.

Thank you.

Sincerely,

Laurie Jodice

1.0 INTRODUCTION

1.1 *Purpose of Report*

Environmental Management Solutions, Inc. ("EMS") was retained by 5700 Maspeth Ave., LLC, owner of the subject site, to supervise excavation activities, including the removal of contaminated soils, and assist in evaluating the soil conditions with respect to the possible presence of petroleum-related contamination.

On August 21, 2008, during a New York State Department of Environmental Conservation ("NYSDEC") inspection, staining was observed associated with historic truck parking. The NYSDEC Spill Hotline was notified and Spill #0808170 was assigned.

1.2 *Scope of Work*

Various items were identified and implemented during the scope of this investigation including:

- Field screening and sampling of the excavation,
- Analytical testing of the soil samples obtained,
- An evaluation of the information collected and preparation of a detailed report summarizing excavation activities and the resulting conclusions and recommendations.

The characteristics of the site and surrounding area are summarized in Section 2.0. Soil excavation activities are described in Section 3.0. Analytical results are summarized in Section 4.0. Waste transportation and disposal is discussed in Section 5.0, and an overall summary and interpretation of the observations and analytical results is provided as Section 6.0, the concluding section.

2.0 SITE CHARACTERISTICS

The subject property, currently operating as a trucking company, is located at 5700 47th Street, Maspeth, Kings County, New York. The general location of the site is shown on an

Area Map provided as Figure 1, Appendix A. Located centrally on the property is a building utilized as a garage with office space occupying the front portion of the building. Behind the building is a concrete pad utilized for truck parking. A Site Map illustrating pertinent site features is presented as Figure 2, Appendix A.

The site is situated in a mixed commercial/industrial area. No residences were identified in the immediate vicinity. Topography of the immediate area is relatively flat. The Newtown Creek is located approximately 100 feet to the west of the area of investigation. According to groundwater observed in the excavation the depth to groundwater is estimated to be at seven feet below ground surface.

3.0 SOIL EXCAVATION ACTIVITIES

3.1 Soil Removal

On March 17 through 19, 2010, 351.04 tons of contaminated soil was excavated and stockpiled for disposal. M. P. Howlett, Inc., located in Port Newark, NJ, removed the contaminated soil to MNJ Services, located in Long Pond, PA for proper disposal. Disposal documentation is provided in Appendix B.

3.2 Soil Sampling

Prior to sample collection, a hand-held RAE Systems photoionization detector (PID), was utilized for the screening evaluation of the excavation. The PID is calibrated using both fresh air (zero point) and single sensor calibrations (second point). Single sensor calibration was conducted by applying a known amount of isobutylene reference standard to each sensor. The volatile vapor scan technique is a screening method used to assess the presence of certain potentially hazardous compounds and the necessity for further exploration and analytical testing. Soil samples were obtained by EMS from multiple areas horizontally and vertically, placed into plastic zip-lock bags, allowed to sit for ten minutes then subjected to a head space volatile vapor scan. Soil was removed according to PID measurements.

The depth of the excavation was approximately eight feet below ground surface (fbgs). Groundwater was observed in the excavation and is estimated to be at seven fbgs. There was no bedrock encountered.

Subsequent to the excavation of contaminated soil, a total of five samples were collected around the perimeter of the pit, approximately one foot from the floor of the excavation, where PID readings were the highest. Two samples were collected from the bottom of the excavation. Associated PID readings are included in Table 1. A map of the excavation and sample locations is provided in Figure 2, Appendix A.

After sample collection all samples were sealed, logged, maintained at 4 degrees Celsius and transported to a New York State Department of Health certified laboratory, for analysis. The chain of custody form was generated in the field and accompanied the samples to a NYSDEC certified laboratory in accordance with standard Quality Assurance and Quality Control (QA/QC) measures.

4.0 ANALYTICAL RESULTS

Seven endpoint samples, identified as S-1 through S-7, were obtained from the sidewalls and from the bottom of the excavation. All soil samples were analyzed for STARS List volatile organic compounds (VOCs) using EPA Method 8260B and for STARS List semivolatile organic compounds (SVOCs) by EPA Method 8270C. Soil samples were submitted to Accredited Analytical Resources, a New York State Department of Health certified laboratory for analytical testing.

All VOC sample results were within the Recommended TAGM 4046 Soil Cleanup Objectives (RSCOs) established by the New York State Department of Environmental Conservation. Further there were no compounds detected above the respective laboratory minimum detection limits. All samples exceeded RSCOs for SVOCs. A summary of analytical results and associated cleanup objectives can be found in Table 1. Complete laboratory analysis is included in Appendix C.

5.0 WASTE TRANSPORTATION AND DISPOSAL

The petroleum-contaminated soil was transported by M.P. Howlett, Inc., located in Port Newark, NJ to MNJ Services, 108AA Sullivan Trail, Long Pond, PA. Disposal documentation is included in Appendix C.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Soil excavation activities were completed at 5700 47th Street, Maspeth, New York, at the request of, 5700 Maspeth Avenue, LLC, owner of the subject property. The scope of work included removal of a concrete pad, excavation of contaminated soil, soil sample screening and collection, laboratory analysis, and preparation of an Investigation Report summarizing excavation activities, soil sampling and analytical results.

Excavation activities were initiated on March 18, 2010 and completed March 19, 2010. The following observations can be made:

- Approximately 351 tons of petroleum-contaminated soil was removed for disposal associated with historical truck parking activities. Groundwater was observed at approximately seven feet below ground surface in the excavation.
- Seven endpoint soil samples were collected for laboratory analysis. There were no VOC concentrations exceeding RSCOs. All samples exceeded allowable RSCO concentrations for SVOCs.
- There was no collection system encountered or any piping associated with a floor drain in the concrete pad.

Given the above referenced conclusions EMS recommends the installation of a single groundwater monitoring well in the area of the excavation to establish groundwater quality. Should groundwater contamination be confirmed additional monitoring wells should be installed to delineate the extent of groundwatter contamination.

ACCREDITED ANALYTICAL RESOURCES, LLC

Methodology Summary

Volatile Organics - EPA 8260B (soil)

An inert gas is purged through a 5 g sample at elevated temperature. Alternatively the soil is extracted with methanol. A portion of extract is spiked into a purging vessel and purged by an inert gas. The vapor is swept through a sorbent column where the purgeables are trapped. After purging is completed, the sorbent column is heated and back-flushed with the inert gas to desorb the purgeables onto a GC column. The GC is temperature programmed to separate the purgeables which are then detected with a mass spectrometer.

Polynuclear Aromatic Hydrocarbons - EPA 8270C (soil)

A 30 gram portion of soil is mixed with anhydrous sodium sulfate and is serially extracted with 1:1 methylene chloride and acetone. The methylene chloride extract is dried and concentrated to a volume of 1 ml. The extract is injected onto a GC and the polynuclear aromatic hydrocarbons are detected with a mass spectrometer.

ACCREDITED ANALYTICAL RESOURCES, LLC

QUALIFIERS
(Organics)

The EPA-defined qualifiers to be used in the organic analysis are as follows:

U - Indicates compound was analyzed for but not detected.

J - Indicates an estimated value. The flag is used under the following circumstances:
- When estimating a concentration in the library search where a 1:1 response is assumed.
- When mass spectral and retention time data indicate the presence of a compound that meets the volatile and semi-volatile GC/MS identification criteria and the result is less than the CRQL but greater than zero.
- When the retention time data indicate the presence of a compound that meets the pesticide/aroclor identification criteria and the result is less than the CRQL but greater than zero.

N - Indicates presumptive evidence of a compound. This flag is only used for tentatively identified compounds (TICs), where the identification is based on mass spectral library search.

P - Used for pest/PCB target analyte when there is greater than 25% difference for detected concentrations between the two GC columns (see Form X). The lower of the two values is reported on Form I and flagged with a "P".

B - This flag is used when the analyte is found in the associated blank as well as the sample.

E - This flag identifies compounds whose concentrations exceed instrument calibration range. If one or more compounds have a response exceeding the calibration range the sample or extract must be diluted and re-analyzed according to the specifications in QA/QC requirements. All such compounds will be flagged with an "E" on the Form I. The Form I for the diluted sample shall have the "DL" suffix appended to the sample number and results for compounds flagged with "E" should be taken from "DL" Form I.

D - Indicates results from a diluted sample analysis.

A - This flag indicates that a TIC is a suspected aldol-condensation product.

193-39-5	Indeno[1,2,3-cd]pyrene	80	J	37	190
53-70-3	Dibenz[a,h]anthracene	38	J	37	190
191-24-2	Benzo[g,h,i]perylene	110	J	37	190

J - Indicates estimated value when detected below PQL.
U - Indicates compound analyzed for but not detected.
D - Indicates result is based on a dilution.
B - Indicates compound found in associated blank.
E - Concentration exceeds highest calibration standard.
MDL - Minimum Detection Limit.
PQL - Practical Quantitation Level.

Re: 57-00 47th Street, LLC
57-00 47th Street
Maspeth, New York
NYSDEC Spill Case 0808170

Ms. Zhune,

The purpose of this letter is to present data collected from the subject site, requested in your letter dated April 6, 2012.

Todd Syska, Inc. was subcontracted by Taylord Environment, Inc. ("TE") to complete a soil borings on the project site, in the area of the former soil remediation. A track mounted, two inch, hydraulic press, GeoProbe™, drill rig was utilized by Todd Syska, Inc. to advance the boring on July 19, 2012. Continuous soil samples were collected throughout the exploration. The soil boring was advanced to approximately 16 feet below grade and finished with a one inch, sch 40, PVC, piezometer. The piezometer constructions was as follows: 16 feet to 6 feet below grade is one inch, sch 40, 0.020 slot screen, PVC; 6 feet to grade is one inch, sch 40, solid PVC. The well was finished with a sand pack from 16 feet to 3 feet below grade, one foot of bentonite plug and sand to grade. See "Figure 1" for the location of the sample point.

TE observed the following physical characteristics of soils encountered during the exploration:
0' – 4' Recycled Item 4 ("Blend"), PID Readings ND ppm
4' – 8' Recycled Item 4 to Brown Clay Loam (transition ~ 6'-7'), PID ND ppm
8' – 12' Dark Brown/Black Organic/Clay Loam, PID 19.8 ppm (GW @ ~11')
12' – 16' Brown Clay to Coal Ash to Wood Ash (All Historically Placed), PID ND ppm

As requested, TE collected a representative soil sample from the exploration. The soil sample was collected from the interval that exhibited the highest PID reading, in the area just above the static groundwater table, approximately 11 feet below grade. The soils collected for laboratory analysis were indigenous to the site, NOT backfill material placed following the remedial action. Laboratory analysis of the soil sample showed concentrations of target analytes below the NYSDEC Guidance Values (CP-51). See Table 1 for a summary of the laboratory data.

On July 19, 2012, TE used a peristaltic pump to develop the piezometer installed in the soil boring. TE pumped three well volumes from the piezometer prior to collecting a representative groundwater sample. The groundwater sample was collected with the peristaltic pump at a low flow rate. Laboratory analysis of

Taylord Environment, Inc.
24 Wing Avenue
Dover Plains, New York 12522
Telephone/Fax (845) 877-3840
E-Mail taylord@optonline.net

02-05-'13 12:13 FROM- T-284 P0002/0012 F-210

the groundwater sample showed concentrations of target analytes below the NYSDEC Guidance Values (TAGM #4046). See Table 1 for a summary of the laboratory data.

Soil and groundwater samples described in this document were collected into laboratory clean glassware, maintained at four degrees Celsius, and delivered to York Analytical Laboratories, Inc., located in Stratford, CT, for analysis. The soil sample was analyzed by EPA Method 8260 and EPA Method 8270, modified for CP-51 compounds only. The groundwater sample was analyzed by EPA Method 8260, modified for CP-51 compounds only.

The post-remediation soil and groundwater samples, presented with this document, demonstrate a successful soil remediation. It is the opinion of TE that no further remedial actions are required for the subject site. TE believes that the previous action successfully eliminated impacted soils. Therefore, Taylord Environment, Inc., on behalf of 57-00 47th Street, LLC, requests closure of the active NYSDEC Spill Case 0808170. The request for closure is based on the remediation preformed and the data presented in this report and by data submitted by Environmental Management Solutions, Inc.

This report has been prepared for the use of the NYSDEC, 57-00 47th Street, LLC, and/or pertinent parties associated with the subject site. Reasonable due diligence was exercised by the staff of Taylord Environment Inc. in conducting the research and investigation necessary for the development of this report. The conclusions provided by Taylord Environment Inc. in this report are based solely on the information reported in this document. Results of future subsurface investigations may result in a modification of the conclusions stated above. The conclusions presented herein are based upon the current regulatory climate and may require revision if future regulatory changes occur. This investigation and preparation of this report has been conducted in accordance with generally accepted practices. No other warranty, expressed or implied, is made.

If you have any questions regarding this report, please contact Scott Taylor at (845) 877-3840.

Sincerely,

Scott Taylor

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on July 20, 2012 and listed below. The project was identified as your project: **5700 47th St. LLC 57-00 47th St. Maspeth, NY.**

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

York Sample ID	Client Sample ID	Matrix	Date Collected	Date Received
12G0633-01	Monitoring Well	Water	07/19/2012	07/20/2012
12G0633-02	Monitoring Well @11'	Soil	07/19/2012	07/20/2012

General Notes for York Project (SDG) No.: 12G0633

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Approved By: Robert Q. Bradley **Date:** 07/31/2012

Notes and Definitions

J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
EXT-EM	The sample exhibited emulsion formation during the extraction process. This may affect surrogate recoveries.

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

Re: **Diesel Fuel Spill Remediation - Spill No. 13-06438**
Industrial Property
57-00 47th Street, Maspeth, New York

Dear Mr. Piper:

This letter summarizes recent spill remediation activities performed by Preferred Environmental Services (Preferred), in concert with Almar Supplies Inc. (Almar), to address a release of diesel fuel associated with New York State Department of Environmental Conservation (NYSDEC) Spill No. 13-06438. Spill No. 13-06438 was assigned on September 19, 2013 due to the identification of diesel fuel-contaminated pea-gravel, surrounding fill piping, during the removal of an out-of-service (OOS) 4,000-gallon single wall fiberglass Underground Storage Tank (UST) at the industrial property located at 57-00 47th Street, Maspeth, New York (Subject Property).

UST removal and subsequent remedial work was performed on September 19, 2013 by Almar, in conjunction with their Fire Department of New York-permitted tank removal contractor AARCO Environmental Services (AARCO), with environmental oversight provided by Preferred. All remedial work was performed in accordance with a verbal work scope provided to the NYSDEC representative (Mr. Ryan Piper) at the time of the UST removal/spill assignment. A photographic log is included as an attachment as well as a detailed Figures (**Figures 1-3**) to document the spill remediation.

Project Background

The former 4,000-gallon single wall fiberglass diesel fuel UST (listed as Tank No. 001 on the Petroleum Bulk Storage Permit 2-318744) had been reportedly out-of-service for approximately one year. The UST was reportedly installed in 1985 and was last successfully integrity tested via a five (5) year precision test on February 14, 2011 by Henrich/Dry As-A-Bone.

On July 30, 2013, the property owner received a violation from the City of New York Fire Department (FDNY) for "*the failure to perform a two (2) year functionality test of the leak detecting system protecting the motor fuel storage system*" of the 4,000 gallon diesel fuel UST. In lieu of re-testing, the leak detection system, the property owner voluntarily decided to remove the UST as it was no longer needed.

UST Removal and Diesel Fuel Spill Remediation

On September 19, 2013, Preferred, in conjunction with Almar and AARCO, removed the out-of-service 4,000-gallon UST from the ground. Prior to its removal, a total 350-gallons of residual diesel fuel and sludge was removed from within the UST, utilizing an NYCRR Part 364-permitted vacuum truck for off-site transport and disposal. During the uncovering of the UST for removal purposes, pea-gravel containing diesel fuel odors, staining and elevated PID readings was noted surrounding former fill piping along the top of the UST. The NYSDEC was subsequently notified and Spill No. 13-06438 was assigned to the property. The UST was observed to be contained within a solid concrete vault.

Upon removal of the UST, no holes or cracks were noted along the UST shell other than those that were created during actual UST removal efforts. Staining was noted along a majority of the UST, likely associated with the limited release associated with the former fill piping along the top of the UST.

Pea-gravel contained within the concrete vault was noted to contain diesel fuel odors, staining and exhibited elevated PID readings. The pea-gravel was subsequently removed from within the vault and placed into a 20-yard roll-off container, awaiting off-site disposal. In addition, trapped water containing diesel fuel odors and sheens within the vault was also removed by a pump truck for proper off-site disposal. A total of 31.07 tons of diesel fuel impacted pea-gravel and 930 gallons of trapped water were removed from within the vault that was measured to extend to twelve (12) feet below grade surface (bgs), at which point the concrete floor of the vault was encountered. The vault was then cleaned and inspected and was noted to be in good condition with no visible holes or direct exposure to adjacent and/or underlying soils.

As requested by the NYSDEC, two (2) soil borings were advanced through the concrete base of the vault via a decontaminated stainless steel hand auger in order to assess underlying soil conditions. Soils encountered below the concrete vault consisted of dark brown to black silty sands with various fill material. Field screening of soils within the two soil borings (B-1 and B-2) confirmed the absence of petroleum impacted soils (e.g., odors, staining, elevated PID readings, etc) from the directly below the concrete vault located at 12.5 feet bgs to a depth of 13 feet bgs, at which point groundwater was encountered. Subsequently, two (2) soil samples (B-1 (12.5-13 ft bgs) and B-2 (12.5-13 ft bgs)) were collected for laboratory analysis. As verbally agreed upon with the NYSDEC, during a subsequent telephone conversation, sidewall soil samples were not required due to the presence of the concrete vault that was confirmed to possess integrity.

Waste Disposal

A total of 350-gallons of residual diesel fuel and 930-gallons of trapped oily water was transported by AARCO Environmental Services (NYR000107326) to the Advanced Waste and Water Technology, Inc. Facility located at 208 Rt. 109, Farmingdale, NY. A total of 31.07 tons of diesel fuel contaminated pea-gravel was transported by Rizzo Environmental Services, a Part 364 licensed waste transporter, in a 20-yard roll-off container to Clean Earth of Carteret disposal facility located at 24 Middlesex Avenue, Carteret, NJ. All waste manifests are included as **Appendix B**.

Endpoint Sampling Analytical Data

The two (2) soil samples (B-1 (12.5-13 ft bgs) and B-2 (12.5-13 ft bgs)) collected by Preferred's geologist were submitted for laboratory analysis for NYSDEC CP-51 List Volatile Organic Compounds (VOCs) by EPA Method 8260 and NYSDEC CP-51 List Semi-Volatile Organic Compounds (SVOCs) by EPA Method 8270 to an NYSDOH-ELAP certified Laboratory (American Analytical Laboratories, LLC). Laboratory analytical data are included as **Appendix C**. Analytical results were then compared to Soil Clean-up Objectives (SCOs) for Fuel Oil Contaminated Soil NYSDEC CP-51/Soil Cleanup Guidance issued October 21, 2010.

As summarized in **Table 1**, only one (1) VOC compound (sec-Butylbenzene) was detected above its

respective laboratory Method Detection Limits (MDLs) in both soil samples. However, sec-Butylbenzene was reported well below its associated NYSDEC CP-51 Soil Cleanup Objective (SCO) within both samples.

A number of SVOC compounds were reported above their respective MDLs within both endpoint soil samples, consistent with the fill like material observed below the concrete vault. Of the detected SVOC compounds, three (3) compounds (Benzo(a)anthracene at 1,100 µg/kg, Chrysene at 1,100 µg/kg and Indeno(1,2,3-c,d)pyrene at 570 µg/kg) were reported slightly above (well within one order of magnitude) their associated NYSDEC SCOs within endpoint soil sample B-2 at 12.5-13 ft bgs. Of the detected SVOC compounds in endpoint sample B-1(12.5-13 ft bgs), all were reported below or at their respective NYSDEC SCOs.

Summary and Conclusions

Spill remediation was conducted at the industrial property located at 57-00 47th Street, Maspeth, New York on September 19, 2013 in order to address NYSDEC Spill 13-06438. Remedial activities included the removal and disposal of 31.07 tons of diesel fuel impacted pea-gravel and 930 gallons of trapped water from within the former concrete vault. Laboratory analysis of one (1) endpoint soil sample (B-1(12.5-13 ft bgs)) collected directly below the concrete vault documented compliant soil conditions underlying the southern portion of the concrete vault. Although slight SVOC exceedances were reported within endpoint soil sample B-2 at12.5-13 ft bgs), collected below the northern portion of the UST vault, these concentrations are just above their applicable SCOs, and are generally consistent with the fill material observed underlying the vault. Therefore, these marginal concentrations are not considered to be indicative of impacts due to the former UST and storage of diesel fuel.

Based upon the successful removal of diesel fuel impacted pea-gravel and trapped water within a solid concrete vault and the compliant soil conditions documented under the southern portion of the concrete vault and near compliant soil conditions under the northern portion of the concrete vault, as documented by endpoint soil samples, closure of NYSDEC Spill No. 13-06438 is respectfully requested.

Sincerely,

Photograph No. 1- Front view of the industrial property located at 57-00 47th Street, Maspeth, New York.

Photograph No. 2 – Prior to the removal of the 4,000-gallon Diesel UST, approximately 350 gallons of residual diesel and sludge was removed from within UST via a pump truck for proper disposal.

Photograph No. 3 – While uncovering the UST, stained pea-gravel exhibiting diesel fuel odors and elevated PID readings were observed surrounding the former fill piping. The NYSDEC was notified and Spill No. 13-06438 was assigned to the property.

Photograph No. 4 – Upon completion of the removal of all liquids from within the UST, the UST subsequently removed from the ground.

Photograph Nos. 5 & 6- Inspection of the 4,000-gallon single-wall fiberglass UST noted the absence of any holes or cracks that did not appear to be sustained during the removal efforts.

Photograph No. 7 – The UST was contained within a solid concrete vault extending to twelve (12) feet below grade surface (bgs). Pea-gravel and trapped water contained within the vault was noted to contain diesel fuel odors, staining and exhibited elevated Photoionization Detector (PID) responses.

Photograph Nos. 8 & 9 - Both the pea-gravel and trapped water were removed from within the vault for off-site disposal.

Photograph Nos. 10 & 11 - As discussed with the NYSDEC, two (2) bottom samples were collected through the concrete floor of the vault in order to determine the environmental condition of underlying soils.

Photograph No. 12- Field screening of soils underlying the concrete vault noted the presence of fill material absent of diesel odors and elevated PID responses.

RE: 57-00 47th St., Maspeth, NY

Order No.: 1309098

Dear Bill Schlageter:

American Analytical Laboratories, LLC. received 2 sample(s) on 9/20/2013 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The results reported herein relate only to the items tested or to the samples as received by the laboratory. This report may not be reproduced, except in full, without the approval of American Analytical Laboratories, LLC and is not considered complete without a cover page and chain of custody documentation. The limits (LOQ) provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report or the data is qualified either on the sample results or in the QC section of the report. This package has been reviewed by American Analytical Laboratories' QA Department/Laboratory Director to comply with NELAC standards prior to report submittal. This report consists of 11 pages.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

American Analytical Laboratories, LLC.

CASE NARRATIVE

Samples were analyzed using the methods outlined in the following references:

Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, SW846 and additional methods as detailed throughout the text of the report.

All method blanks, laboratory spikes, and/or matrix spikes met quality assurance objectives with exceptions notated in this Narrative discussion and/or in the QC Summary Section of the lab report with appropriate qualifiers.

Additional quality control information such as surrogate recovery values for organic testing is provided as part of the analytical results.

Volatile LCS are analyzed with preservatives - HCL/NaHSO4/Methanol depending on level of analysis (high/low) similar to sample analysis. Outliers can be attributed to the presence of chemical preservatives.

The test results meet the requirements of the NYSDOH and NELAC standards, except where noted. The information contained in this analytical reports is the sole property of American Analytical Laboratories, LLC. or the client for which this report was issued. The results contained in this report are only representative of the samples received. American Analytical is only responsible for the certified testing and is not directly responsible for the integrity of the sample before laboratory receipt for those samples that were not collected by NYS ELAP certified laboratory personnel. The sample receipt checklist is included as part of this lab report. Conditions can vary at different times and at different sampling conditions. American Analytical is not responsible for the use or interpretation of the data included herein.

EXECUTIVE SUMMARY

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) was retained by Bay Crane Service of New York (the User) to prepare a Phase I Environmental Site Assessment (ESA) for the properties located at 57-00, 57-05, 57-57, and 58-20 47th Street in the Maspeth neighborhood of Queens, New York (collectively the Subject Property). The Subject Property is identified on the Queens Borough Tax Map as Block 2601, Lots 1 and 6, and Block 2602, Lots 68 and 72. The approximately 168,000-square-foot Subject Property is situated on the northern part of Block 2601 and northeastern part of Block 2602, and is transected by 47th Street. The Subject Property is situated on the city blocks bound by 58th Road to the north, 49th Place to the east, Grand Avenue to the south, and Newtown Creek to the west. The Subject Property is vacant with the exception of the southern area of the Lot 72 which is used by a scaffolding company for staging and storage of equipment. The Subject Property was most recently occupied by a trucking company and US Concrete Inc., a concrete processing/recycling facility (Lots 1 and 6), a delicatessen (Lot 68), and a food services/food truck storage company (Lot 72). A Subject Property Location Map is included as Figure 1 and a Subject Property Plan is provided as Figure 2.

Block 2601 Lots 1 and 6 are subject to an Order on Consent ("Order"), dated April 2021 between the Subject Property owner and New York State Department of Environmental Conservation (NYSDEC). The Order relates to the unauthorized operation of a solid waste and aggregate processing facility, installation of a concrete wall within a wetlands buffer area without a NYSDEC permit and failure to restore the wetlands buffer area along the western boundary of the Subject Property. The active remedial Work associated with bringing the Subject Property into compliance with the Order is anticipated to be completed prior to the transfer of ownership to the User.

This Phase I ESA was completed in general accordance with ASTM International (ASTM) Standard E1527-13 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) and the United States Environmental Protection Agency (USEPA) All Appropriate Inquires (AAI) Rule, for the purpose of identifying recognized environmental conditions (REC), and historical RECs (HREC), controlled RECs (CREC). CRECs were not identified at the Subject Property. Two RECs, one HREC and one de minimis condition were identified and are discussed below.

REC

A REC is defined by ASTM E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment,

under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. The following RECs were identified and are shown of Figure 3:

REC 1 – Historical Use of Subject Property

Historical operations at the Subject Property included a 'fertilizer works' facility (1902 to 1914), an oil depot with petroleum bulk storage (1914 to 1936), truck parking (1974 to 1991), truck repair (1982 to 2006), a waste transfer facility with petroleum bulk storage (2004 to 2021), and auto repair (2013, 2014) on Lots 1 and 6; and a motor freight station with petroleum bulk storage (1963, 1982 to 2006) on Lot 72. The Subject Property is listed as an active facility on the Solid Waste Facilities/Landfill Sites (SWF/LF) database for the processing of construction and demolition (C&D) waste; however, based on the site reconnaissance this operation ceased in early 2021. Historical operations at the Subject Property may have resulted in inadvertent releases of hazardous substances or petroleum products.

REC 2 – Western-Adjoining Superfund Site

Newtown Creek, which is listed in the National Priority List (NPL) and Superfund Enterprise Management System (SEMS) databases. Contamination in the creek is attributed to combined sewer overflow (CSO) and historical industrial facilities on the creek banks. Facilities included over 50 oil refineries, petrochemical plants, fertilizer and glue factories, sawmills, and lumber and coal yards. A remedial investigation is presently underway for the entire Creek and a focused feasibility study (FFS) is currently being prepared by responsible parties regarding a combined sewer outfall (CSO) long term control plan, pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Given that the remedial investigation and a focused feasibility study are underway by the responsible parties, it is unknown as to whether there is any impact to the Subject Property.

HREC

A HREC is defined by ASTM E1527-13 as the past release of any hazardous substances or petroleum products that has occurred in connection with the Subject Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Subject Property to any required controls.

HREC 1 – Closed Spills on the Subject Property

The Subject Property is listed on the Leaking Tanks (LTANKS) and NY SPILLS databases for six spills summarized below:

- NYSDEC Spill No. 94-11004 was reported on November 17, 1994 was after the release of an unknown volume of gasoline. The spill was administratively closed on November 17, 1994.

- NYSDEC Spill No. 97-09690 was reported on November 20, 1997 after the release of an unknown volume of diesel oil on soil. No further information regarding the spill was provided. The spill was administratively closed on January 8, 1998

- NYSDEC Spill No. 98-12248 was reported on January 4, 1999 after petroleum-impacted soil was identified during removal of an underground storage tank (UST). Petroleum-impacted soil was removed and documentation endpoints samples were collected. The spill was remediated to the satisfactory of NYSDEC and the spill was administratively closed on July 12, 2006.

- NYSDEC Spill No. 07-09978 was reported after a UST failed a tank tightness test on December 18, 2007. The tank lines were re-tested and it was determined that the vent line failed due to a loose fitting. Evidence of petroleum contamination to the subsurface was not observed and the spill was administratively closed December 28, 2007.

- NYSDEC Spill No. 08-08170 was reported on October 21, 2008 after a call was made to the NYSDEC citing active release of petroleum substances, and illegal storage and refueling of vehicles at the Subject Property. A limited subsurface investigation completed in 2009 consisting of advancing six soil borings and collection of soil samples identified petroleum impacts to soil ranging from surface grade to about 8 feet below grade surface. About 381.04 tons of petroleum-impacted soil was excavated and disposed of in 2010. Documentation soil samples and groundwater samples collected post-remediation confirmed that the spill was remediated to the satisfaction of the NYSDEC. The spill was administratively closed on October 27, 2012.

- NYSDEC Spill No. 13-06438 was reported on September 19, 2013 after diesel contaminated soil and pea gravel was identified in tank vault during removal of a 4,000-gallon UST. Further information regarding the remediation was unavailable; however, a closure report summarizing the remedial work and analytical data was prepared for NYSDEC. The spill was remediated to the satisfaction of the NYSDEC, and the spill was administratively closed on February 12, 2014.

De Minimis Condition

A de minimis condition is defined by ASTM E1527-13 as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

De minimis oil-like staining was observed throughout Lot 6 including the interior warehouse space, near the mechanics pits, in the vicinity of a former ASTs, throughout the concrete-paved parking areas to the south, east, and west of the building, and underneath a parked excavator; and on Lot 72 throughout the interior warehouse space, truck access bays and exterior concrete-paved parking areas. Surficial concrete cracks, joints or exposed soil were not observed in stained areas; however, staining was observed near the wall/floor seams near the former above ground storage tank (AST) area. The staining is considered a de minimis condition.

1.0 INTRODUCTION

Langan was retained by Bay Crane Service of New York (the User) to prepare a Phase I Environmental Site Assessment (ESA) for the properties at 57-00, 57-05, 57-57, and 58-20 47th Street in the Maspeth neighborhood of Queens, New York (collectively the Subject Property). This Phase I ESA was performed for the User in general accordance with ASTM International's (ASTM) Standard E1527-13 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) and the United States Environmental Protection Agency's (USEPA) All Appropriate Inquires (AAI) Rule. The purpose of this Phase I ESA is to accomplish the following:

1. Identify Recognized Environmental Conditions (RECs) in connection with the Subject Property, as defined in The Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527-13, which states: The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2. Provide services consistent with the USEPA 40 Code of Federal Regulations (CFR) Part 312 Subpart C Standards and Practices §312.20 AAI Rule.

1.1. Scope of the ESA

This Phase I ESA was conducted using a standard of good commercial and customary practice that is consistent with ASTM E1527-13. No significant scope-of-work additions, deletions, or deviations to ASTM E1527-13 were made in connection with this report, as described in Section 8.0. In general, the scope of this assessment consisted of obtaining information from the User; reviewing reasonably ascertainable information and environmental data relating to the Subject Property; reviewing maps and records maintained by federal, state, and local regulatory agencies; interviewing persons knowledgeable about the Subject Property; and conducting a site reconnaissance. The specific scope of this assessment included the following:

1. A site reconnaissance to characterize conditions and assess the Subject Property's location with respect to adjoining and surrounding property uses and natural surface features. The reconnaissance included the surrounding roads and observations of

surrounding properties from public rights-of-way to identify obvious potential environmental conditions on neighboring properties. The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Subject Property and then progressing to adjoining and surrounding properties. Photographs taken as part of the site reconnaissance are included in Appendix A.

2. A review of the response to the User questionnaire. The completed questionnaire is included in Appendix B.
3. A review of available previous environmental reports completed for the Subject Property. Copies of the reports are included in Appendix C.
4. A review of environmental databases maintained by the USEPA, state, and local agencies within the approximate minimum search area. The environmental database report was provided by Environmental Data Resources, Inc. (EDR), and is included in Appendix D.
5. Filing of Freedom of Information Act (FOIA) requests with federal, state, and local agencies. Copies of the FOIA requests are included in Appendix E.
6. A review of New York City Department of Buildings (NYCDOB) records, Federal Emergency Management Agency (FEMA) Flood Maps and a Planning Commission Zoning Map. Available NYCDOB records, the FEMA Map and the Zoning Map are included in Appendices F, G and H respectively.
7. A review of physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils, and hydrologic data.
8. A review and interpretation of aerial photographs, Sanborn® Fire Insurance Maps (Sanborn® Maps), historical topographic maps, and city directories to identify previous activities on and in the vicinity of the Subject Property. Copies are included in Appendices I, J, K, and L respectively.
9. A review of an environmental lien search for the Subject Property. A copy of the environmental lien search report is included in Appendix M.
10. A review of published radon occurrence maps to evaluate whether the Subject Property is located in an area with a propensity for elevated radon levels.

1.2. Assumptions, Limitations, and Exceptions

This Phase I ESA report was prepared for Bay Crane Service of New York for the Subject Property located at 57-00, 57-05, 57-57, and 58-20 47th Street in the Maspeth neighborhood of Queens, New York. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility

for use of this report for any property other than the Subject Property addressed herein, or by any other third party without a written authorization from Langan.

Langan's scope of services, which is described in Section 1.1, was limited to that agreed to with the User and no other services beyond those explicitly stated are implied. The services performed and agreed upon for this effort comports to those prescribed in the ASTM Standard E1527-13. Intrusive sampling (i.e., soil borings and groundwater sampling) was not performed as part of this Phase I ESA.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the Subject Property. The purpose of this investigation was limited to determining if there are any RECs affecting the Subject Property. It should be understood that even the most comprehensive Phase I ESA might fail to detect environmental liabilities at a particular Subject Property. Therefore, Langan cannot "insure" or "certify" that the Subject Property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our client, with the customary standard of care exercised by professionals performing similar services under similar circumstances within the same jurisdiction.

The conclusions, opinions, and recommendations provided in this report are based solely on the specific activities as required for the performance of ASTM E1527-13 and are intended exclusively for the purpose stated herein, at the specified Subject Property, as it existed at the time of our site visits.

2.0 SITE DESCRIPTION

2.1. Location and Description

The Subject Property is located at 57-00, 57-05, 57-57, and 58-20 47th Street and is identified on the Queens Borough Tax Map as Block 2601, Lots 1 and 6 and Block 2602, Lots 68 and 72. The approximately 168,000-square-foot Subject Property is situated on the northern part of Block 2601 and northeastern part of Block 2602, and is transected by 47th Street. The Subject Property is situated on the city blocks bound by 58th Road to the north, 49th Place to the east, Grand Avenue to the south, and Newtown Creek to the west. The Subject Property is improved upon with a vacant slab-on-grade one-story building with a mezzanine level (Lot 6), and two slab-on-grade one-story buildings (Lots 68 and 72). The remainder of the Subject Property is improved with concrete/asphalt parking space. The Subject Property is currently vacant, however, it was most recently operated by a trucking company and by US Concrete Inc., a concrete processing/recycling facility (Lots 1 and 6), a delicatessen (Lot 68), and a food services/food truck storage company (Lot 72). A Subject Property Location Map is included as Figure 1 and a Subject Property Plan is included as Figure 2.

According to the United States Geological Survey (USGS) Central Park Quadrangle 7.5-minute Series Topographic Map, the Subject Property sits at an elevation of about 9 feet above mean sea level (msl) and the surrounding area slopes gradually to the southwest towards Newtown Creek. Based on visual observations of the surrounding area during the site reconnaissance, the Subject Property is located within an industrial area characterized by one- to two-story commercial and manufacturing/industrial buildings. Site reconnaissance photographs are included in Appendix A. Surrounding property use is summarized in the following table:

Direction	Block	Lot	Adjoining Properties	Surrounding Properties
North	58th Road			Industrial-use buildings and Maspeth Creek
	2600	1	One- to two-story building and asphalt-paved parking occupied by NYC Department of Sanitation (DSNY) (47-01 48th Street)	
South	2601	25	NYC Department of Environmental Protection (DEP)Newtown Creek aeriation facility, parking and vegetated land	Industrial-use buildings, Grand Avenue
East	2602	90	One-story warehouse and asphalt-paved parking operated by Raja Foods and Vegetables Inc.	Commercial- and industrial-use buildings, parking, vacant land
		58	One-story warehouse and asphalt-paved parking lot operated by LaserShip shipping service	
		52	One-story industrial/manufacturing building occupied by Safeway Carting	
West	Newtown Creek			Industrial-use buildings

2.2. Description of Site Improvements

Improvements at the Subject Property are summarized in the following table:

SITE IMPROVEMENTS	
Size of the Subject Property	About 168,000 square feet
Buildings/Spaces/Structures	Lot 6: 20,000-square foot single-story slab-on-grade warehouse/office building occupying the central-eastern part of the lot Lot 72: 4,000-square foot single-story slab-on-grade warehouse/office building occupying the western part of the lot Lot 68: 2,000-square foot slab-on-grade commercial building occupying the southwestern part of the lot
Surface Water	None
Potable Water Source	Municipal
Sanitary and Storm Sewer Utilities	Lot 6: Four, large metal/concrete hatches in a row were observed at the southern part of the Lot. According to the site representative, these drain directly to the subsurface. All lots: Sewer drains were observed in exterior areas of the Subject Property and reportedly connected to the New York City municipal or sanitary systems.
Electrical Utilities	Con Edison
Construction Completion Date	1964 (Lot 72); 1966 (Lot 68); 1974 (Lot 6)
General Construction Type	Masonry and steel construction.
Cooling and Ventilation System Type	Heating, ventilation, and air conditioning (HVAC) units, including air conditioners, were observed on the roofs and/or on exterior walls.
Heating System Type	The buildings have natural gas- and/or electric-powered heating systems, which mainly consist of ceiling-mounted hot air blower units.
Emergency Power	None

2.3. Title Records

Langan researched ownership records for the Subject Property on the Automated City Register Information System (ACRIS) website (https://a836-acris.nyc.gov/DS/DocumentSearch/Index). According to ACRIS, the Subject Property is owned by SLMJL Family Property Owner LLC (Block 2601, Lot 1) and RL Family Property Owner LLC (Block 2601, Lot 6 and Block 2602, Lots 68 and 72). Title information available via ACRIS is summarized below:

Date	Document Type	First Party	Second Party
Block 2601, Lot 1			
11/13/2020	Deed	Lamanna, Sabatino	SLMJL Family Property Owner LLC
12/31/2008	Deed	Lamanna, Emilio	Lamanna, Emilio

Date	Document Type	First Party	Second Party
12/16/1986	Deed	Alfredo Lamanna Trucking	Lamanna, Emilio
9/7/1985	Deed	Galasso, Peter	Island Transportation CP
4/23/1985	Deed	Galasso, Peter	Alfredo Lamanna Trucking
1/18/1972	Deed	EJG Construction Corp.	Peter Galasso
1/18/1972	Deed	Galasso Peter	EJG Construction Corp.
Block 2601, Lot 6			
11/13/2020	Deed	57-00 Maspeth Avenue, LLC	RL Family Property Owner LLC
4/30/1998	Deed	Island Transportation Corporation	57-00 Maspeth Avenue, LLC
Block 2602, Lot 68			
11/13/2020	Deed	57-57 47th Street Mack, LLC	RL Family Property Owner LLC
11/28/2012	Deed	57-57 47th Street Realty Corp.	57-57 47th Street Mack, LLC
3/27/2001	Deed	Galasso, Nancy	57-57 47 St Realty Corp
3/27/2001	Deed	Galasso, Peter	Galasso, Nancy
10/23/1992	Deed	Galasso, Peter	Galasso, Nancy
5/1/1986	Deed	Johnson Ave Realty Co	Galasso, Peter
6/22/1970	Deed	Galaron Realty Corp	Peter Galasso
Block 2602, Lot 72			
11/13/2020	Deed	Fumo, LLC	RL Family Property Owner LLC
5/31/2006	Deed	Estate of Alfredo Lamanna	Fumo, LLC
11/9/1983	Deed	Here Realty Inc.	Lamanna, Alfredo
1/14/1983	Deed	Greenspan, Willim R. (Ref)	Here Realty Inc.
1/4/1973	Deed	Cestaro Joseph A	Leco Distributors Inc.

Trucking/transportation companies were identified on Block 2601, Lots 1 and 6 during the review of ACRIS documents. Unreported releases or spills of petroleum and/or hazardous substances associated with these historical trucking operations may have adversely impact soil, groundwater and/or soil vapor at the Subject Property and is considered a REC.

3.0 USER PROVIDED INFORMATION

3.1. User Questionnaire

Per ASTM E1527-13, a User questionnaire was provided to the User to inquire about specialized information related to the Subject Property. Philip Bernardo, representative of the User, completed the questionnaire. Mr. Bernardo stated that he is not aware of any environmental liens or land use limitations at the Subject Property. According to Mr. Bernardo, the purchase price of the Subject Property reasonably reflects fair market value and is not attributable to any contamination known or believed to be present at the Subject Property. The completed User questionnaire is included in Appendix B.

3.2. Previous Environmental Reports

An Order on Consent ("Order") dated April 2021 between the current owner of the Subject Property and New York State Department of Environmental Conservation (NYSDEC) (DEC File No. R2-20210416-53) was provided to Langan for review. The Order applies to the western half of the Subject Property (Block 2601, Lots 1 and 6), and cites the unauthorized operation of a solid waste registration and aggregate facility without a tidal wetlands permit, installation of a concrete wall within a tidal wetlands buffer area without a NYSDEC permit, and violations associated with a 2009 Order including failure to provide NYSDEC with sales and transfer agreements associated with the Subject Property, and failure to restore the wetlands buffer area along the western boundary of the Subject Property. The Order references violation of articles 15, 17, 25 and 27, and 34 of the NYS Environmental Conservation Law and New York State Title 6 of the Codes, Rules and Regulations (6NYCRR) Parts 360, 608, 661 and 750. Compliance activities outlined in the 2021 Order include the following:

- Closure of the solid waste and aggregate processing facilities, which includes removal of all waste materials;
- Implementation of a wetlands restoration plan, including removal of concrete/structural elements, and replanting of the high marsh area and buffer planting area;
- Monitoring the plantings over a five year period with annual reporting;
- Adhere to best management practices during removal and planting activities, and
- Record in the property records for lots 1 and 6 a restrictive declaration to identify and protect the tidal wetlands and vegetated buffer areas such by incursions by current or future owners, tenants, and occupants.

During the site reconnaissance, activity including removal of concrete surface cover, grading and placement of top soil was underway as part of the wetlands restoration worked required to bring

the Subject Property into compliance with the Order. Additionally, operation of the solid waste facility ceased in early 2021, with a majority of the stockpile concrete/aggregate materials removed from the site. Most of the Work associated with the Order will be complete prior to the transfer of ownership to the User. A copy of the Order is provided in Attachment C.

4.0 ENVIRONMENTAL RECORDS

A regulatory database search was provided by EDR and is included in Appendix D. The EDR report provides a listing of sites identified on select federal and state standard source environmental databases within the approximate search radius specified by ASTM E1527-13. Langan reviewed each environmental database on a record-by-record basis to evaluate whether the identified sites represent a potential for environmental impact to the Subject Property. Langan also reviewed "Orphan Sites" listed within the report. Orphan Sites are those sites that could not be mapped due to inadequate address information. Any Orphan Sites that were identified by Langan within the ASTM search radii, either during the site reconnaissance or by cross-referencing to mapped listings, are addressed in the discussion below.

The following table lists the number of sites identified in standard and additional environmental record databases, within the prescribed search area and appearing in the EDR Report.

DATABASE RECORD SUMMARY			
Database Reviewed (Date of government version)	**Minimum Search Area**	**Subject Property listed**	**Number of Sites Within Minimum Search Area**
USEPA DATABASES			
National Priorities List (NPL) (04/27/2021)	1 Mile Radius	No	1
Delisted NPL (04/27/2021)	1 Mile Radius	No	0
Superfund Enterprise Management System (SEMS, formerly CERCLIS) and SEMS-Archive (formerly known as CERCLIS-NFRAP) (04/27/2021)	1/2 Mile Radius	No	6
Resource Conservation and Recovery Act (RCRA) Corrective Reports (CORRACTS) (03/22/2021)	1 Mile Radius	No	0
RCRA Treatment, Storage, and Disposal Facilities (TSDF) (03/22/2021)	1/2 Mile Radius	No	0
RCRA Generators (Large Quantity Generator [LQG], Small Quantity Generator [SQG], Very Small Quantity Generator [VSQG], Conditionally Exempt Small Quantity Generator [CESQG], Non-Generators [Non-Gen]) (03/22/2021)	Subject Property and Adjoining Properties	Yes	3
Facility Index System (FINDS) (02/03/2021)	Subject Property	Yes	2

DATABASE RECORD SUMMARY			
Database Reviewed (Date of government version)	**Minimum Search Area**	**Subject Property listed**	**Number of Sites Within Minimum Search Area**
Environmental Response Notification System (ERNS) (12/14/2020)	Subject Property	No	0
Federal Engineering Controls (US ENG CONTROLS) Sites Lists (02/22/2021)	Subject Property	No	0
Federal Institutional Controls (US INST CONTROLS) Sites Lists (02/22/2021)	Subject Property	No	0
NYSDEC DATABASES			
Inactive Hazardous Waste Disposal Sites (SHWS) (02/09/2021)	1 Mile Radius	No	19*
Solid Waste or Landfill Facilities (SWF/LF) (12/31/2020)	1/2 Mile Radius	Yes	25
Leaking Storage Tanks (LTANKS) (02/09/2021)	1/2 Mile Radius	Yes	39
SPILLS Information Database (NY SPILLS) (02/09/2021)	1/8 Mile Radius	Yes	22
New York Engineering Controls (NY ENG CONTROLS) Sites Lists (02/09/2021)	Subject Property	No	0
New York Institutional Controls (NY INST CONTROLS) Sites Lists (02/09/2021)	Subject Property	No	0
NY Voluntary Cleanup Program (VCP) (02/09/2021)	1/2 Mile Radius	No	2
NY Brownfields (02/09/2021)	1/2 Mile Radius	No	1
Solid Waste Disposal Sites Registered Recycling Facility List (SWRCY) (12/31/2020)	1/2 Mile Radius	No	12
Chemical Bulk Storage (CBS) Underground Storage Tank (UST) and Aboveground Storage Tank (AST) Databases (12/17/2020)	Subject Property and Adjoining Properties	No	0
Major Oil Storage Facilities (MOSF) UST and AST Databases (12/17/2020)	Subject Property and Adjoining Properties	No	0

DATABASE RECORD SUMMARY			
Database Reviewed (Date of government version)	**Minimum Search Area**	**Subject Property listed**	**Number of Sites Within Minimum Search Area**
Registered and Historical Drycleaners (NY DRYCLEANERS) and Cleaners (03/09/2021)	1/4 Mile Radius	No	0
Petroleum Bulk Storage (PBS) Facilities UST and AST Databases (12/17/2020)	Subject Property and Adjoining Properties	Yes	8
EDR (PROPRIETARY) DATABASES			
EDR Former Manufactured Gas Plant (MGP) Sites (N/A)	1 Mile Radius	No	3
EDR US Historical Auto Stations (N/A)	1/8 Mile Radius	No	0
EDR US Historical Cleaners (N/A)	1/8 Mile Radius	No	0

N/A – Not Applicable; databases were reviewed as part of this Phase I ESA but not required as per ASTM E1527-13.
* - includes Orphan listings

A description of the reviewed databases is included in the EDR Report (Appendix D). A summary of sites identified within the prescribed search area is presented below.

4.1. Federal Agency Database Findings

The Subject Property and/or sites within the respective minimum search distances as specified by ASTM E1527-13 were not listed in the following federal agency databases: Delisted NPL, RCRA CORRACTS, RCRA TSDF, ERNS, US ENG CONTROLS, and US INST CONTROLS.

National Priorities List

The National Priority List database is a subset of the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) and identifies over 1,200 sites for priority cleanup under the Superfund program. The Subject Property was not listed in the NPL database. One site, Newtown Creek, was listed within the minimum search distance in the NPL database and is discussed below:

Site Name: Newtown Creek
Location: Western-adjoining property (hydraulically down-gradient)
Description: The site (USEPA ID: NYN000206282) was identified in the NPL database beginning in 2010. Formerly a natural tributary of the East River, Newtown Creek was channelized in the 1800s by backfilling surrounding wet areas to support heavy industrial development. Contamination in the creek is attributed to combined sewer overflow (CSO) and historical industrial facilities on the creek banks. Facilities included over 50 oil refineries, petrochemical plants, fertilizer and glue factories, sawmills, and lumber and coal yards. According to the listing, the Newton Creek Superfund Site, a remedial investigation is presently underway for the entire site and a focused feasibility study (FFS) is currently being prepared regarding a combined sewer outfall (CSO) long term control plan. Proximity to Newtown Creek may result in impacts to groundwater and/or soil vapor at the Subject Property and is considered a REC.

SEMS (formerly CERCLIS) and SEMS-Archive (formerly CERCLIS-NFRAP)

The SEMS database tracks hazardous waste sites, potentially hazardous waste sites and remedial activities under the USEPA Superfund Program. The database compiles data on potentially hazardous waste sites reported to the USEPA and sites that are either proposed for listing or listed on the NPL. The database, formerly known as CERCLIS, was renamed SEMS by the USEPA in 2015. The USEPA stopped updating the CERCLIS database in 2013; new updates are captured in the SEMS database. Former CERCLIS sites that have been granted the status of no further remedial action planned (NFRAP) are now included in the SEMS-ARCHIVE database. The USEPA's AAI Rule and ASTM E1527-13 will eventually be updated to reflect the change to SEMS. The minimum search radius for the databases is within 1 mile from the Subject Property.

The Subject Property was not listed in the SEMS or SEMS-archive databases; however, two sites were listed in the SEMS database and four sites were listed in the SEMS-archive database within the minimum search area. One facility listed in the SEMS database and the four facilities listed in the SEMS-archive database are located over 1,600 feet west of the Subject Property, across Newtown Creek, and are not considered RECs. The remaining SEMS site, Newtown Creek, is considered a REC as discussed in the NPL section.

RCRA Generators Database

The RCRA generators/transporters database is USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. RCRA

databases include LQG, SQG, CESQG, and Non-Gen. ASTM E527-13 identifies the minimum search distance to 'Subject Property and adjoining properties'.

The Subject Property is listed on the database; however, the listing is addressed incorrectly and is not associated with the Subject Property. Two adjoining hazardous waste generators were identified in the NonGen and VSQG databases as described below:

Site Name: NYC Dept Sanitation Garage
Site Address: 52-35 58th Street
Site Location: North-adjoining property (hydraulically cross-gradient)
Description: The site is listed in the RCRA NonGen database (EPA ID NYR000076083) for the generation of D001 (ignitable) waste in 1999. NY Manifests were also identified for the disposal of 447 pounds of D001 and F003 (spent non-halogenated solvent) waste in May 2018. Based on the absence of violations and volume of waste generated, this listing is not considered a REC.

Site Name: At Lite
Site Address: 57-47 47th Street
Site Location: East-adjoining property (hydraulically up-gradient)
Description: The site is listed in the RCRA VSQG database (EPA ID NYR000049809) for the generation of D001 waste between 2000 and 2007. NY Manifests were also identified for the disposal of five gallons of D002 (corrosive waste) in February 2004. Based on the absence of violations and volume of waste generated, this listing is not considered a REC.

FINDS Database

The FINDS database contains facility information and "pointers" to other sources and databases that contain additional details. ASTM E527-13 defines the minimum search distance as the 'Subject Property'. Two listings were identified under the Subject Property address in the FINDS database. One listing was incorrectly addressed and is not associated with the Subject Property. The Subject Property is listed under the 57-00 47th Street address (Lot 6) for the unauthorized discharge to a waterbody without a National Pollutant Discharge Elimination System (NPDES) permit in August 2009. No further violations were identified; therefore, this listing is not considered a REC.

4.2. State Agency Database Findings

The Subject Property and/or sites within the respective minimum search distances as specified by ASTM E1527-13 were not listed in the following state agency databases: NY ENG CONTROLS, NY INST CONTROLS, CBS, MOSF, and NY DRYCLEANERS.

SHWS

The State Hazardous Waste Sites (SHWS) records SHWS records are the states' equivalent to SEMS and may or may not already be listed on the federal SEMS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified, along with sites where cleanup will be paid for by potentially responsible parties. The Subject Property was not listed in the SHWS database; however, 19 listings (including five Orphan sites) were identified within the minimum search area of one mile. Based on their distance and/or hydraulic relationship to the Subject Property, the listings are not considered RECs.

SWF/LF

The Solid Waste Facilities/Landfill Sites (SWF/LF) records are an inventory of solid waste disposal facilities or landfills in a particular state. The Subject Property was listed in the SWF/LF database as summarized below:

Site Name: Pebble Lane Associates LLC
Site Address: 57-00 47th Street (Lot 6)
Location: Subject Property
Description: The Subject Property is listed as an active construction and demolition (C&D) processing facility beginning in April 2009. Waste types accepted at the facility include asphalt, brick, concrete, rock, soil, glass, metals (ferrous), metals (non-ferrous), and C&D debris. The former tenant, US Concrete Inc., operated Lots 1 and 6 for processing and distribution of recycled concrete materials. Undocumented releases of petroleum products, solvents and/or hazardous substances associated with this historical operation may have impacted soil, groundwater and/or soil vapor at the Subject Property and is considered a REC.

Twenty-four listings were identified in the SWF/LF database within the minimum search area of 1/2 mile. Twenty-two of the listings are related to sites located over 1,000 feet from the Subject Property and are not considered RECs. The remaining two listings are discussed below:

Site Name: M & C Transfer Station
Site Address: 58-26 47th Street
Location: South-adjoining (hydraulically cross-gradient)
Description: This facility is listed as an inactive transfer station site. Further information regarding the time of operation and material accepted at the facility was not provided. No violations or spills are listed in association with this facility. Based on the absence of reported violations or spills associated with this facility, it is not considered a REC.

Site Name: Maspeth Recycling Inc.
Site Address: 58-08 48th Street
Location: 555 feet north (hydraulically cross-gradient)
Description: This facility is listed as an active C&D processing facility for waste types include concrete, asphalt, soil, and sand. No spills or violations are listed for this facility. Based on the absence of violations and/or releases, distance and hydraulic relationship to the Subject Property, this listing is not considered a REC.

LTANKS Database

The LTANKS database contains an inventory of reported leaking storage tank incidents, including leaking USTs and ASTs. The minimum search area for the LTANKS database includes the Subject Property and any sites within a 1/2-mile radius. Two listings were identified in association with the Subject Property. One listing for the Subject Property was incorrectly addressed and is associated with the site located 680 feet to the north; this listing is not considered a REC. The remaining listing is discussed below:

Site Name: Island Trans Corp
Site Address: 57-00 47th Street
Location: Subject Property (Lot 6)
Description: NYSDEC Spill No. 07-09978 was reported at the Subject Property after a UST failed a tank tightness test on December 18, 2007. The tank lines were re-tested and it was determined that the vent line failed due to a loose fitting. Evidence of petroleum contamination was not observed and the spill was closed December 28, 2007. Based on the regulatory status, this closed spill on the Subject Property is considered a HREC.

Thirty-nine listings were identified in the minimum search area. Two listings were identified in association with the northern adjoining property; however, these listings were incorrectly addressed and are associated with a site over one mile from the Subject Property. The listed incidents were primarily caused by tank test failures, tank failures, and tank overfills. All 39 incidents have been granted closed status by the NYSDEC, indicating that the NYSDEC is satisfied with spill remediation; therefore, these listings are not considered RECs.

NY SPILLS

The Spills database, maintained and updated by NYSDEC, is an inventory of sites where spills have been identified and reported to the NYSDEC. Eight spills were listed at the Subject Property. Three spills were incorrectly addressed and are not associated with the Subject Property. The remaining five spills are summarized below:

Site Name: 57-00 Maspeth Avenue LLC
Site Address: 57-00 47th Street (Lot 6)
Location: Subject Property
Description: Spill No. 94-11004 was reported on November 17, 1994 after the release of an unknown volume of gasoline. No further information regarding the spill was provided. The spill was administratively closed by the NYSDEC on November 17, 1994.

Site Name: Island Transportation
Site Address: 47th Street (Lot 6)
Location: Subject Property
Description: Spill No. 97-09690 was reported on November 20, 1997 after the release of an unknown volume of diesel oil on soil. No further information regarding the spill was provided. The spill administratively closed by the NYSDEC on January 8, 1998.

Site Name: 5700 Maspeth Avenue LLC
Site Address: 57-00 47th Street (Lot 6)
Location: Subject Property
Description: Spill No. 08-08170 was reported on October 21, 2008 after a call was made to the NYSDEC citing active release of petroleum substances, and illegal storage and refueling of vehicles at the Subject Property. A limited subsurface investigation completed in 2009 consisting of advancing six soil borings and collection of soil samples identified petroleum impacts to soil ranging from surface grade to about 8 feet below grade surface. About 381.04 tons of petroleum-impacted soil was excavated and disposed of in 2010. Documentation soil samples and groundwater samples collected post-remediation confirmed that the spill was remediated to the satisfaction of the NYSDEC. The spill was administratively closed on October 27, 2012.

Site Name: Commercial Property
Site Address: 57-00 47th Street (Lot 6)
Location: Subject Property
Description: Spill No. 13-06438 was reported on September 19, 2013 after diesel contaminated soil and pea gravel was identified in tank vault during removal of a 4,000-gallon UST. Further information regarding the remediation was unavailable; however, a closure report summarizing the remedial work and analytical data was prepared for NYSDEC. The spill was remediated to the satisfaction of the NYSDEC, and the spill was administratively closed on February 12, 2014.

Site Name: Boro Lumber Company
Site Address: 57-57 47th Street (Lot 68)
Location: Subject Property

Description: Spill No. 98-12248 was reported on January 4, 1999 when petroleum-impacted soil was identified during a UST removal. Petroleum-impacted soil was removed and documentation endpoints samples were collected. The spill was remediated to the satisfactory of NYSDEC and the spill was administratively closed on July 12, 2006.

Based on the closed regulatory status, the spills at the Subject Property are considered HRECs.

Fourteen spills were listed within the minimum search radius. Thirteen spills have been granted closed status by the NYSDEC, indicating that NYSDEC is satisfied with spill remediation. The remaining open spill is located 450 feet down-gradient from the Subject Property and across Newtown Creek. Based on their distance, hydraulic relationship and/or current regulatory status, these listings are not considered RECs.

VCP

The VCP uses private funds to remediate contaminated sites to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination. The Subject Property was not listed in the VCP database; however, two sites were identified within the minimum ½-mile search radius. The sites are located over 1,500 feet hydraulically down-gradient from the Subject Property and across Newtown Creek, and are not considered RECs.

NY Brownfields

Brownfield sites are any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria, or guidance adopted by the NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations. The Subject Property was not listed in the BCP database. One listing was identified within a ½-mile radius of the Subject Property in relation to a National Grid property at K – Greenpoint MGP – Energy Center at 287 Maspeth Avenue. Ongoing investigations have identified volatile organic compound (VOC) and semivolatile organic compound (SVOC) contamination of soils and groundwater and the presence of a Dense Non-Aqueous Phase Liquid (DNAPL) at shallow depths with the potential to affect the east-adjoining Newtown Creek. The site is located 225 feet west and hydraulically down-gradient of the Subject Property, across from Newport Creek, and is not considered a REC.

SWRCY

The Solid Waste Disposal Sites Registered Recycling Facility List (SWRCY) provides a list of registered recycling facilities. The Subject Property was not listed on the SWRCY database;

however, 12 listings were identified within the minimum search radius of ½ mile. Ten of the listings are located over 1,000 feet from the Subject Property and/or hydraulically down-gradient from the Subject Property and are not considered RECs. The two remaining listings are located at the same addressed and are summarized below:

Site Name: GPB Waste NY DBA NY/NJ Recycling/NMS Waste Paper
Site Address: 58-35 47th Street
Location: 220 feet southeast of the Subject Property (hydraulically cross-gradient)
Description: The facility is listed under two site names as a cardboard and paper recycling facility. No violations are listed in association with either facilities. One spill is listed in associated with the NMS Waste Paper facility (NYSDEC Spill No. 04-04192); however, the spill was administratively closed in February 2005. Given the absence of violations, type of material handled by the facility and hydraulic location with respect to the Subject Property, these listings are not considered RECs.

PBS UST and AST Databases

The PBS UST and AST databases contain records of registered USTs and ASTs. A registered PBS UST or AST does not constitute a REC in and of itself; however, properties listed on the UST or AST databases with a reported leak, spill, or release could constitute a REC with respect to the Subject Property. The minimum search distance required for USTs and ASTs is the Subject Property and adjoining properties. Three PBS facilities were listed in associated with the Subject Property. One listing is associated with a property over 700 feet north of the Subject Property and is not considered a REC. The remaining two PBS listings are discussed below:

Site Name: 57-00 Maspeth Ave LLC
Site Address: 57-00 47th Street (Lot 6)
Location: Subject Property
Description: The Subject Property is listed in the PBS AST and UST databases under this facility name (PBS Facility No. 2-318744) as housing two in-service ASTs, one closed/removed AST and four closed/removed USTs as summarized below:

Tank No.	Location	Capacity (gallons)	Contents	Date of closure
Status – In service				
2	AST	180	Used Motor Oil	Not Available
3	AST	180	Used Motor Oil	
Status – Closed/Removed				
001	UST	4,000	Diesel	September 19, 2013

Tank No.	Location	Capacity (gallons)	Contents	Date of closure
002	UST	4,000	Other	December 1, 1998
003	UST	4,000	Other	December 1, 1998
004	UST	1,080	Other	December 1, 1998
005	AST	6,000	No.2 Fuel Oil	March 8, 2006

The in-service ASTs, installed January 3, 2000, are reported to have suction dispensers and be in contact with an impervious barrier in a secondary containment vault with no leak detection or overfill protection. During the site reconnaissance (see Section 5.0), only one AST was identified. Two petroleum spills (Spill Nos. 94-11004 and 08-08170) are associated with this facility as discussed in the SPILLS section. The spills were administratively closed by NYSDEC on November 17, 1994 and October 27, 2012, respectively.

Site Name: A Lamanna Trucking Co
Site Address: 57-05 47th Street (Lot 72)
Location: Subject Property
Description: The Subject Property is listed under this facility name in the PBS UST database (PBS Facility No. 2-350001) as formerly housing a 4,500-gallon diesel UST. The UST was reportedly closed and removed December 1, 1998. Spills or releases were not reported in association with this UST.

Based on the timeline of historical industrial operations and petroleum bulk storage at the Subject Property, unreported spills/releases of petroleum products associated with historical petroleum bulk storage may have adversely impacted soil, groundwater and/or soil vapor at the Subject Property is considered a REC.

Three adjoining properties were listed in the PBS UST and AST databases and are described below:

Site Name: DSNY Queens District 5A Garage
Site Address: 58-02 48th Street
Location: North-adjoining property (hydraulically cross-gradient)
Description: The site is listed in the PBS UST database (PBS Facility No. 2-605735) for housing 10 in-service USTs and 11 closed/removed USTs, summarized below:

Tank No.	Tank ID	Capacity (gallons)	Contents	Date of closure
Status – In service				
001A	245123	2,500	Gasoline/Ethanol	Not Available

Tank No.	Tank ID	Capacity (gallons)	Contents	Date of closure
002A	245124	4,000	Biodiesel	
003A	245125	4,000	Biodiesel	
004A	245126	1,000	Motor Oil

The in-service USTs are reported to be have leak protection, overfill alarms and shut off valves and double walled secondary containment.

Site Name: DSNY Queens District 5 Garage
Site Address: 48-01 58th Street
Location: North-adjoining property (hydraulically cross-gradient)
Description: The site is listed in the PBS UST database (PBS Facility No. 2-605736) for housing eight in-service USTs and 11 closed/removed USTs, summarized below:

Tank No.	Tank ID	Capacity (gallons)	Contents	Date of closure
Status – In service				
010A	235603	2,500	No. 2 Fuel Oil	NA

Tank No.	Tank ID	Capacity (gallons)	Contents	Date of closure

011	227047	4,000	Biodiesel	July 24, 2012

In-service USTs are reported to be have leak protection, overfill alarms and shut off valves and doubled walled secondary containment.

The DSNY 5/5A Garage site is associated with five closed SPILLS listings and two closed LTANKS listings; however, these spills have been administratively closed by NYSDEC. Based on the closed status of the spills and reported secondary containment and overflow protection measures, this listing is not considered a REC.

Site Name: Advanced/Molloy
Site Address: 57-47 47th Street
Location: East-adjoining property (hydraulically up-gradient)
Description: The site is listed in the PBS AST database (PBS Facility No. 2-320943) as housing an in-service, 3,000-gallon No. 2 fuel oil AST. The tank is reportedly on saddles, elevated above grade allowing visual inspection. The AST is also reported to have secondary containment, a product level gauge and vent whistle for overfill

protection. Two closed spills are associated with this facility; documentation available for the spills indicates that subsurface media was not impacted and both spills were administratively closed by the NYSDEC. No violations are listed for this facility. Based on the absence of violations, administrative closure on on-site spills and information provided regarding secondary containment and overfill protective measures, this listing is not considered a REC.

Site Name: Boro Timber Co
Site Address: 57-45 47th Street
Location: East-adjoining property (hydraulically up-gradient)
Description: The site is listed in the PBS UST database (PBS Facility No. 2-296007) for housing two closed/removed 4,000-gallon diesel USTs and one closed/removed 4,000-gallon gasoline UST, removed on December 1, 1998. Based on the facility listing, the USTs did not have secondary containment or product level gauge for overfill prevention. One spill (NYSDEC Spill No. 97-14130) was reported at this facility when petroleum-impacted soil was identified during UST removal. The spill was administratively closed by the NYSDEC on July 12, 2006. Based on the closed status of the facility and documented spills, this listing is not considered a REC.

4.3. Other Database Findings

Former Manufactured Gas Plant

The MGP sites database is a proprietary database that includes records of historical manufactured coal gas plants compiled by EDR. The Subject Property was not listed in the database; however, three listings were identified within the minimum search area of 1 mile. Two of the sites are over 2,000 feet down-gradient from the Subject Property and are not considered RECs. The remaining site, National Grid property at K – Greenpoint MGP – Energy Center, is located west and hydraulically down-gradient and across Newtown Creek from the Subject Property. Based on the distance and hydraulic relationship with respect to the Subject Property, this listing is not considered a REC.

4.4. Local Regulatory Agency Findings

FOIA Requests

FOIA requests were submitted during the week of June 7, 2021 to the following federal, state, and local agencies via written correspondence:

- NYCDEP
- NYC Department of Health (DOH)
- New York City Fire Department (FDNY)
- NYSDOH
- NYSDEC

Complete responses have not yet been received from NYCDEP, NYCDOH, FDNY, NYSDOH, and NYSDEC. Should future responses alter the conclusions of this Phase I ESA, an addendum will be issued. Copies of the FOIA requests and any responses received are included in Appendix E.

USEPA

A review of the USEPA MyProperty, MyEnvironment and Envirofacts databases was performed on Jun 18, 2021. The Subject Property (57-00 47th Street) was identified on the Envirofacts database in relation the NPDES outlined in the FINDS section. No violations were identified.

NYCDOB

Langan conducted a records search through the NYCDOB online query system on June 21, 2021. The Subject Property is identified as Block 2601, Lots 1 and 6 and Block 2602, Lots 68 and 72. Department of Finance (DOF) Classification and NYCDOB query information are outlined below:

Block	Lot	BIN	DOF Classification	NYCDOB Violations	Available COs	CO Details
2601	1	484949	Z9-Miscellaneous	No	2005	Waste transfer station in conjunction with the adjacent tax Lot 6.
2601	6	4311638	E1-Warehouse	4 active: failure to file 2017 annual boiler inspection report	2004 to 2014	2004-2014: Waste transfer station and accessory uses including storage, parking and loading berths. COs from 2013 and 2014 also list an automobile repair shop.
2602	68	4058960	O1-Office Buildings	No	None	Not Available
2602	72	4058961	E9-Warehouse	No	1963	Trucking terminal

BIN – Building Identification Number, DOF – Department of Finance, CO – Certificate of Occupancy

Four active low- pressure boilers were listed on the most recent boiler inspection reports available, dated June 2013. Defects were reported for all boilers. The historical uses of the Subject Property as a waste transfer facility and auto repair are considered RECs. Copies of available NYCDOB records are included in Appendix F.

Zoning Department

According to the New York Department of City Planning Commission (NYCDCP) Zoning Map 13a, the Subject Property is zoned in a Manufacturing District (M3-1). M3 districts are designated for areas with heavy industries that generate noise, traffic or pollutants. Typical uses include power plants, solid waste transfer facilities and recycling plants, and fuel supply depots. According to a review of City Environmental Quality Review (CEQR) documents, the Subject Property is not assigned an E-designation or Restrictive Declaration. A copy of the zoning map is included in Appendix H.

"E" Designation

The NYCDCP coordinates a program, through rezoning efforts, to identify properties requiring an assessment of environmental site conditions because of documented historical use, requiring attenuation of neighborhood noise conditions, and/or special measures to mitigate against exacerbation of neighborhood air quality issues. These properties are identified as part of the environmental review process associated with discretionary actions, and are then noted as "E" Designated. For properties that have been so designated, the NYCDOB is restricted from issuing building permits until the New York City Office of Environmental Remediation (NYC OER) reviews information prepared by an environmental professional and makes a determination to issue a Notice of No Objection (NNO) or a Notice to Proceed (NTP) to the NYCDOB.

According to the list of City Environmental Quality Review (CEQR) Environmental Designations, dated June 30, 2009, the Subject Property is not listed with an "E" designation.

4.5. Physical Setting Sources

4.5.1. Topography

According to the USGS Brooklyn Quadrangle 7.5-minute Series Topographic Maps, the Subject Property sits at an elevation of about 9 feet above msl. The general topographic gradient of the Subject Property and surrounding properties slopes southwest towards Newtown Creek.

4.5.2. Geology

Geological surface features (e.g., rock outcroppings) were not observed at the Subject Property. Baskerville's "Bedrock and Engineering Geologic Maps of New York County and Parts of Kings and Queens Counties, New York, and Parts of Bergen and Hudson Counties, New Jersey", dated 1994, indicates the bedrock underlying the Subject Property is part of the Hartland Formation. The Hartland Formation is comprised of mica schist and quartz-feldspar granulite, with localized intrusions of granite and pegmatite. Given the development history and infilling in the south, historic fill will likely be present beneath the Subject Property. Geological surface features (e.g., rock outcroppings) were not observed at the Subject Property.

4.5.3. Hydrology

Groundwater flow is typically topographically influenced, as shallow groundwater tends to originate in areas of topographic highs and flows toward areas of topographic lows, such as rivers, stream valleys, ponds, and wetlands. A broader, interconnected hydrogeological network often governs groundwater flow at depth or in the bedrock aquifer. Groundwater depth and flow direction are also subject to hydrogeological and anthropogenic variables such as precipitation, evaporation, extent of vegetation cover, and coverage by impervious surfaces. Other factors influencing groundwater include depth to bedrock, the presence of artificial fill, and variability in local geology and groundwater sources or sinks. Groundwater is inferred to flow to the southwest towards Newtown Creek. Based on information provided in the EDR report, groundwater is anticipated to about 7 feet bgs. According to the National Wetlands Inventory (NWI), the west-adjoining Newtown Creek is classified as an estuarine and marine deep-water wetland associated with English Kills.

The current Federal Emergency Management Agency (FEMA) Advisory Base Flood Elevation Maps include new advisory flood zone boundaries and advisory base flood elevations. According to the current FEMA Effective Flood Insurance Rate Maps (FIRM) dated September 5, 2007 (Map Numbers 3604970206F and 3604970208F), the northern and western parts of the Subject Property fall within Zone AE, a special flood hazard area with base flood elevation of 10 feet inundated by 1% annual chance of flooding. The remainder of the Subject Property falls within Zone X and lies within the area of 0.2% annual chance of flood. A copy of the FEMA flood map is provided in Appendix G.

4.6. Historical Use Information

Langan reviewed available historical resources (including aerial photographs, Sanborn® and topographic maps, and city directories) dated 1897 to 2017. Findings of the review are presented below.

4.6.1. Aerial Photographs

Langan reviewed aerial photographs of the Subject Property and surrounding areas for the years 1924, 1941, 1951, 1954, 1961, 1966, 1974, 1976, 1980, 1984, 1991, 1994, 2006, 2009, 2013, and 2017. The photographs indicate that the Subject Property was historically surrounded by undeveloped land, with dense urban development occurring in the 1940s and 1950s. In the 1924 photograph, the northern part of the Subject Property appears to be improved with several buildings while the southwest section of the Subject Property is occupied by Newtown Creek. The remainder of the Subject Property comprises undeveloped land. By 1941, the buildings in the northern part of the Subject Property are no longer present with the exception of a small structure along the northwestern boundary (Lot 6). In 1951, 47th Street had been constructed, transecting the Subject Property. A second roadway is also present in the northeast of the Subject Property (Lot 68). Stockpiled soil is visible on the northern and western parts of the Subject Property in the 1954 photograph. By 1966, the southwestern part of the Subject Property formerly occupied by Newtown Creek appears to have been infilled and the present-day buildings on Lots 68 and 72 are visible. By 1974, the present-day building on Lot 6 is constructed and the remainder of Lots 1 and 6 appear to be used for truck parking between 1974 and 1991. In 1991, multiple stockpiles of material, likely associated with the former C&D processing facility, occupy Lot 1. The stockpiles appear to expand into the northern part of Lot 6 beginning in 2006. The Subject Property remains relatively unchanged between 2006 through 2017. The historical operation of the Subject Property including C&D processing/recycling facility and truck parking is considered a REC.

Land adjoining the Subject Property to the north, east and south remained undeveloped until about 1951. From 1954 to 2006, the area surrounding the Subject Property was developed for various commercial and industrial uses. Unreported spills or violations were not listed in association with these operations; therefore, they are not considered RECs. Copies of aerial photographs are included in Appendix I.

4.6.2. Sanborn® Fire Insurance Maps

A search for historical fire insurance maps for the Subject Property and surrounding properties was conducted by EDR and reviewed by Langan. Sanborn® Maps constitute a database of prior

site uses of real property for many cities and towns in the United States. Langan reviewed Sanborn® Maps for the Subject Property for the years 1902, 1907, 1914, 1933, 1936, 1950, 1951, 1965, 1968, 1977, 1979, 1980, 1981, 1982, 1985, 1986, 1988, 1990 through 1996, 1999, and 2001 through 2007. Maps from 1965 through 1982 only partially cover the Subject Property and appear blank. Copies of Sanborn® Fire Insurance Maps are included in Appendix J.

The Sanborn® Map review revealed that the Subject Property was situated in a low -density industrial area as early as 1902. In 1902, the Subject Property was occupied by several one- to two-story buildings associated with C. Meyer Fertilizer Works and an 'old well' present on the southern part of the Subject Property (Lot 6). By 1914, the former buildings are no longer present and Valvoline Oil Company Oil Depot occupies the Subject Property, including multiple areas labelled 'oil tanks', an auto repair building, storage shed and office building occupy the northern part of the Subject Property (Lots 1 and 72). By 1936, the Subject Property is no longer labelled as the Valvoline Oil Company; several unspecified buildings remain on site included on building labelled "dilapidated". In 1982, 47th Street is observed transecting the Subject Property from north to south and the present-day one-story buildings are visible on the Subject Property; the building on Lot 72 is labelled "motor freight station", the Lot 68 building is labelled "construction office" and the building on Lot 6 is labelled "truck body repair". The Subject Property remains unchanged through 2006. Historical operations on the Subject Property including fertilizer works facility, oil depot, truck repair facility and motor freight station are considered RECs.

Adjoining and surrounding properties to the north, east and south generally consisted of residential buildings, and commercial and industrial operations, and Newtown Creek is observed to the west of the Subject Property. While responsible parties are currently conducting a remedial investigation pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Newtown Creek has potential conditions that pose a material threat of a future release to the environment and is considered a REC.

4.6.3. Historical USGS Topographic Quadrangles

Langan reviewed historical USGS Topographic Quadrangle maps obtained from EDR for information regarding past uses of the Subject Property. Quadrangle maps were available for the Subject Property for the years 1897, 1898, 1900, 1947, 1956, 1967, 1979, 1995, and 2013. Based on a review of the historical topographic maps, the Subject Property has been located in a low density developed area and was improved with several buildings since at least 1897. In maps from 1967 and 1979, present-day buildings on the northeastern and western parts of the Subject Property, respectively, are visible.

The surrounding sites were also developed from as early as 1897 and comprised low density development within a wider network of waterways and marsh land. By 1947, land to the north, east and south of the Subject Property are infilled to create the present-day configuration of the west-adjoining Newtown Creek and Maspeth Creek, north of the Subject Property. The Subject Property and surrounding properties appeared relatively unchanged through 2013. Review of the USGS maps did not reveal any RECs. Copies of the topographic maps are included in Appendix K.

4.6.4. City Directories

The City Directory Abstract, obtained from EDR, is a review of available business directories, including city, cross-reference, and telephone directories, at approximately five-year intervals for the years spanning 1922 through 2017. The directory was obtained for the Subject Property and surrounding area. A copy of the City Directory Abstract report is included in Appendix L.

The Subject Property was not listed in the City Directory. Adjoining properties included residential and commercial entities. A review of the city directory did not reveal any RECs.

4.6.5. Environmental Lien Search

Langan contracted EDR to conduct an environmental lien search for the Subject Property. The results of the search, which included a compilation of available data and verification of the findings with the appropriate regulatory authorities, revealed that there are no environmental liens or other Activity and Use Limitations (AUL) associated with the Subject Property. A copy of the Environmental Lien Search is included in Appendix M.

5.0 SITE RECONNAISSANCE

The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Subject Property and progressing to the adjoining and surrounding properties. The assessment of the adjoining and surrounding properties was limited to identifying, if possible, any indications of past or current use that may involve the use, storage, disposal, or generation of hazardous substances or petroleum products; noting the general type of current use; the general topography of the surrounding area; and providing a general description of adjoining and surrounding structures.

The site reconnaissance was performed at 10:00 AM on June 22, 2021 by Tyler Goodnough of Langan, accompanied by Emilio Lamanna, the Subject Property owner, and Phil Bernardo, representative of the User. The weather at the time of the inspection was cloudy with intermittent light rain and approximately 80°F.

5.1. General Site Setting and Reconnaissance Observations

The Subject Property consists of four tax lots totaling approximately 168,000 square feet, and includes contiguous Lots 1 and 6 on the western side of 47th Street, and contiguous Lots 68 and 72 on the eastern side of 47th Street. The Subject Property is improved with three buildings, including a 20,000-square foot warehouse/office building on Lot 6, a 4,000-square foot warehouse/office building on Lot 72, and a 2,000-square foot commercial building on Lot 68. The buildings are all slab-on-grade masonry and steel construction.

Lot 1

Lot 1 is a vacant lot, accessible via a secured gate along 47th Street. During the site reconnaissance, an approximate 1,000-cubic yard stockpile of recycled concrete aggregate (RCA) was observed on the eastern part of the lot. According to Mr. Lamanna, the stockpiled material is remnant of the former concrete processing/recycling operations at the Subject Property.

Lot 6

Lot 6 is accessible via a secured gate on 47th Street and is improved upon with a vacant, slab-on-grade, one-story office/warehouse building with a mezzanine level. Nine vehicle access bay doors are present along the southern and western parts of the building. A locker room, bathroom, and former AST room are also located in the southwestern area of the building. The northern and eastern areas of the building contain office space on the ground floor and mezzanine levels. The building is surrounded by concrete-paved parking areas to the south, east, and west. Several pits were identified in the south-central part of the building including two mechanics pits, one pit

that appeared to be infilled with concrete flush with the building slab, and one pit covered with a metal cover that could not be moved. De minimis oil-like staining was observed throughout the warehouse space interior, near the mechanics pits, throughout the external parking lot area, and underneath an excavator parked along the southern boundary. According to Mr. Lamanna, the building and exterior parts of Lots 1 and 6 were formerly occupied by U.S. Concrete for truck repairs, office space, a small concrete testing laboratory, and a concrete/fill recycling facility. Mr. Lamanna also stated that the recycling facility has been closed as required under the April 2021 Order on Consent (see Section 3.2)

During the site reconnaissance, grading and placement of topsoil was being completed along the western boundary of Lots 1 and 6 to prepare for planting. This activity is being completed to bring the site into compliance with the April 2021 Order on Consent (see Section 3.2).

Lot 68

The building on Lot 68 is a vacant, one-story commercial building surrounded by asphalt-paved parking areas on all sides. According to Mr. Lamanna, Lot 68 was most recently occupied by a delicatessen. The interior of the building on Lot 68 was not accessible during the reconnaissance. De minimis staining was observed in areas of the parked exterior; however, the surface cover appears to be in good condition.

Lot 72

Lot 72 is accessible via a locked gate along 58th Road and is improved with a vacant, slab-on-grade one-story warehouse. Three vehicle access bay doors and warehouse space span the eastern part of the building. The remainder of the building contains office space, bathrooms, utility space and a kitchen area. Oil-like staining was observed on the ground throughout the warehouse. According to Mr. Lamanna, the staining was likely associated with cooking oil resulting from the most recent tenant's operations, and not petroleum products. The building is surrounded by concrete-paved parking areas on all sides. The southern-most part of the lot is currently used by a scaffolding company to stage equipment. An approximate three-gallon, open plastic tub of waste motor oil with nearby de minimis oil-like staining was observed in the east of the parking lot, and de minimis oil-like staining was observed throughout the parking lot areas to the north and east of the building. According to Mr. Lamanna, Lot 72 was most recently occupied by a food services and food truck storage company.

The Lot 6 and Lot 72 buildings contain natural gas- and/or electric-powered heating systems, which mainly consist of ceiling-mounted hot air blower units. HVAC units, including air conditioners, were observed on the roofs and/or on exterior walls of the buildings.

5.2. Pits, Ponds, Lagoons

Several pits were identified in the south-central part of the Lot 6 building including two mechanics pits, one pit that appeared to be infilled with concrete flush with the building slab, and one pit covered with a metal cover that could not be moved. De minimis oil-like staining was observed in the vicinity of the pits; however, surficial concrete cracks, joints or exposed soil were not observed in these stained areas.

Ponds, or lagoons were not observed.

5.3. Pools of Liquid

Pools of liquid were not observed.

5.4. Storm Drains, Wells, and Cisterns

Stormwater drains were observed in the parking areas on eastern and northern parts of the Subject Property (Lots 6 and 72). Floor drains were also observed in the bathrooms of these buildings. A large collection drain was observed in a concrete testing room at the northern side of the building on Lot 6.

Trench drains were observed inside the Lot 6 and Lot 72 buildings. Black oil-like residue was observed inside a concrete-lined trench drain along the southern side of the Lot 6 building. An oily residue, suspected to be from cooking oil, was also observed in a clogged trench drain on the north-central part of the Lot 72 building as well as inside a stormwater drain located on Lot 72. Odors were not observed at any of the drain locations.

Four, large metal and concrete hatches were observed along the southern boundary of the Subject Property (Lot 6). According to Mr. Lamanna, the covers are associated with four large stormwater collection basins that accept water from the drains inside and around the building on Lot 6. Mr. Lamanna stated that the basins drain directly to the subsurface and the remaining drains at the Subject Property are reportedly connected to the New York City municipal or sanitary systems.

No wells were observed at the Subject Property.

5.5. Polychlorinated Biphenyl (PCB) Transformers and Other Suspect Equipment

Suspect PCB-containing transformers and other equipment were not observed.

5.6. Storage Containers, Drums, and Chemical Storage Areas

The following storage containers were observed at the Subject Property:

Container Type	Size	Contents	Location
Seven metal cans	2.5 to 5 gallons	Gasoline	Parking lot south of Lot 72 building
Three metal cans (empty)	Five gallons	Diesel (empty)	Parking lot south of Lot 72 building
Two plastic buckets	5 gallons	Paint, disinfectant/cleaner	Parking lot south of Lot 72 building
Six plastic bottles	1 gallon	Household cleaners	Northeastern corner of Lot 6 building
Metal drum (empty)	55 gallons	Antifreeze/coolant (empty)	Northern exterior wall of Lot 6 building
Plastic bucket	5 gallons	Hydraulic oil	Northern exterior wall of Lot 6 building

Langan did not observe evidence of spills or releases associated with these containers.

5.7. Sewage Ejector Pits and Sumps

Two sumps were observed at the Subject Property located in the northeastern part of the Lot 6 building and in a small concrete enclosure on the eastern part of Lot 1. Odors, staining and/or sheen were not observed at either sump location. Ejector pits were not observed on the Subject Property.

5.8. Waste Generation, Storage, and Disposal

Two, roll-off containers containing trees/branches and other debris from ongoing grubbing and regrading activities were observed on Lot 6. The waste was generated as a result of the work performed to bring the Subject Property into compliance with the NYSDEC Consent Order, dated April 2021 (see Section 3.2). Other waste generation at the Subject Property was not observed.

5.9. Air Emissions or Wastewater Discharges

Air emissions or wastewater discharges were not observed.

5.10. USTs or ASTs

One empty 275-gallon AST was observed at the Subject Property along the west-central exterior wall of the building on Lot 6. Staining and/or odors were not observed in the vicinity of the AST. Evidence of former ASTs was observed in the west-central part of the Lot 6 building, including remnants of concrete secondary containments, cut vent and fill pipes, oil feed lines on the wall, and de minimis, surficial oil-like staining. The concrete floors in the vicinities of the former ASTs

appeared to be in good condition and free of cracks; however, staining was observed near wall/floor seams were present near the former AST area.

Two vent pipes were observed on the southeastern exterior wall of the building on Lot 6. According to Mr. Lamanna, the pipes were associated with former USTs that were located in the southeastern part of the Subject Property (Lot 6). A small steel cover labeled "test" was also observed in the parking lot that may have been associated with the former USTs. Mr. Lamanna stated that the USTs on the Subject Property had all been closed and removed to the satisfaction of NYSDEC in 2017 (see Section 4.2). Staining or odors were not observed around these features.

5.11. Monitoring Wells or Remedial Activities

Monitoring wells or evidence of remedial activities were not observed. At the time of the reconnaissance, regrading and filling activities were ongoing along the western boundaries of Lots 1 and 6. These activities are ongoing to bring the Subject Property into compliance with the NYSDEC Order on Consent, dated April 2021 (see Section 3.2).

5.12. Stained or Discolored Soil

Stained or discolored soil was not observed.

5.13. Leachate or Seeps

Evidence of leachate or seeps was not observed.

5.14. Adjoining and Surrounding Property Uses

Adjoining and surrounding properties include commercial buildings, and manufacturing/ industrial buildings. The Subject Property is bound by 58th Road followed by the City of New York Department of Sanitation District 5 Garage to the north, distribution warehouses and a waste collection company to the east, a NYCDEP Newtown Creek aeriation facility to the south, and Newtown Creek and associated wetlands to the west. Several vent pipes and an apparent UST were observed at the northern adjoining sanitation garage, about 100 feet north-northeast of the Subject Property. With the exception of the DSNY garage, fill ports or vents were not identified on adjoining and surrounding properties.

6.0 INTERVIEWS

6.1.1 Site Owner/Operator

Langan conducted an interview with Emilio Lamanna, the Subject Property owner, during the site reconnaissance. Mr. Lamanna stated that his family had been associated with the Subject Property since the early 1980s. Additional information provided by Mr. Lamanna is discussed in Section 5.0.

6.1.2 Owners/Tenants of Adjoining Properties

Owners/tenants of adjoining properties were not interviewed as part of this Phase I ESA.

7.0 ADDITIONAL SERVICES

7.1. Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithological conditions.

The USEPA has established a recommended radon action level of 4.0 pico Curies per liter (pCi/L). According to the USEPA Radon Zone Map, the Subject Property is located in Zone 3, which indicates a predicted average indoor radon screening level less than 2 pCi/L. Based on federal data included in the EDR report, 81 homes were tested in Queens County with average concentrations of 0.970 pCi/L and 0.620 pCi/L in basements and living areas, respectively. Ninety-three percent of basements and 97% of living areas had concentrations below 4 pCi/L. Based on this information, it is unlikely that elevated levels of radon gas are present at the Subject Property.

8.0 DEVIATIONS AND DATA GAPS

8.1. Deviations

Langan performed a Phase I ESA of the Subject Property using a standard of good commercial and customary practice that is consistent with the ASTM E1527-13 and the 40 CFR Part 312 Standards and Practices for AAI. Significant deviations were not made to the above referenced standards.

8.2. Data Gaps

In order to address data gaps, additional sources of information may be consulted. According to AAI, Section 312.20 (g), "to the extent there are data gaps (as defined in section 312.10) in the information developed…that affect the ability of persons (including the environmental professional) conducting the all appropriate inquiries to identify conditions indicative of releases or threatened releases...such persons should identify such data gaps, identify the sources of information consulted to address such data gaps, and comment upon the significance of such data gaps." According to ASTM E1527-13, Section 8.3.2.3, "historical research is complete when either: (1) the objectives in 8.3.1 through 8.3.2.2 are achieved; or (2) data failure is encountered. Data failure occurs when all standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. If data failure is encountered, the report shall document the failure, and if any of the standard historical sources were excluded, give the reasons for the exclusion."

This Phase I ESA was completed without significant data gaps except that responses to FOIA letters have not been received from all recipients. Sufficient information was provided from other sources to enable conclusions regarding RECs at the Subject Property. As such, this data gap is not expected to alter the results of the Phase I ESA. If information becomes available that alters the conclusions of this report, an addendum will be issued.

9.0 FINDINGS, OPINIONS, AND CONCLUSIONS

This Phase I ESA was conducted in accordance with ASTM E1527-13 and the USEPA AAI Rule. The objective of this Phase I ESA was to identify the presence or likely presence, use, or release on the Subject Property of hazardous substances or petroleum products as defined in ASTM E1527-13 as a REC.

Based on information obtained during the visual inspection of the Subject Property; review of environmental databases and historic information; and contact with federal, state, and local agencies. CRECs were not identified. Two RECs, one HREC, three BERs, one de minimis condition and one non-ASTM consideration were identified and are discussed below.

REC

A REC is defined by ASTM E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. The following RECs were identified:

REC 1 – Historical Use of Subject Property

Historical operations at the Subject Property included a 'fertilizer works' facility (1902 to 2014), an oil depot with petroleum bulk storage (1914 to 1936), truck parking (1974 to 1991), truck repair (1982 to 2006), a waste transfer facility with petroleum bulk storage (2004 to 2021), and auto repair (2013, 2014) on Lots 1 and 6; and a motor freight station with petroleum bulk storage (1963, 1982 to 2006) on Lot 72. The Subject Property is listed as an active facility on the SWF/LF database for the processing of C&D waste; however, based on the site reconnaissance this operation ceased in early 2021. Historical operations at the Subject Property may have resulted in inadvertent releases of hazardous substances or petroleum products.

REC 2 – Western-Adjoining Superfund Site

Newtown Creek, which is listed in the National Priority List (NPL) and Superfund Enterprise Management System (SEMS) databases. Contamination in the creek is attributed to combined sewer overflow (CSO) and historical industrial facilities on the creek banks. Facilities included over 50 oil refineries, petrochemical plants, fertilizer and glue factories, sawmills, and lumber and coal yards. A remedial investigation is presently underway for the entire Creek and a focused feasibility study (FFS) is currently being prepared by responsible parties regarding a combined sewer outfall (CSO) long term control plan, pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Given that the remedial investigation and

a focused feasibility study are underway by the responsible parties, it is unknown as to whether there is any impact to the Subject Property.

HREC

A HREC is defined by ASTM E1527-13 as the past release of any hazardous substances or petroleum products that has occurred in connection with the Subject Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Subject Property to any required controls.

HREC 1 – Closed Spills on the Subject Property

The Subject Property is listed on the LTANKS and NY SPILLS databases for six spills, outlined below:

- NYSDEC Spill No. 94-11004 was reported on November 17, 1994 was after the release of an unknown volume of gasoline. The spill was administratively closed on November 17, 1994.

- NYSDEC Spill No. 97-09690 was reported on November 20, 1997 after the release of an unknown volume of diesel oil on soil. No further information regarding the spill was provided. The spill was administratively closed on January 8, 1998

- NYSDEC Spill No. 98-12248 was reported on January 4, 1999 after petroleum-impacted soil was identified during removal of a UST. Petroleum-impacted soil was removed and documentation endpoints samples were collected. The spill was remediated to the satisfactory of NYSDEC and the spill was administratively closed on July 12, 2006.

- NYSDEC Spill No. 07-09978 was reported after a UST failed a tank tightness test on December 18, 2007. The tank lines were re-tested and it was determined that the vent line failed due to a loose fitting. Evidence of petroleum contamination to the subsurface was not observed and the spill was administratively closed December 28, 2007.

- NYSDEC Spill No. 08-08170 was reported on October 21, 2008 after a call was made to the NYSDEC citing active release of petroleum substances, and illegal storage and refueling of vehicles at the Subject Property. A limited subsurface investigation completed in 2009 consisting of advancing six soil borings and collection of soil samples identified petroleum impacts to soil ranging from surface grade to about 8 feet below grade surface. About 381.04 tons of petroleum-impacted soil was excavated and disposed of in 2010. Documentation soil samples and groundwater samples collected

post-remediation confirmed that the spill was remediated to the satisfaction of the NYSDEC. The spill was administratively closed on October 27, 2012.

- NYSDEC Spill No. 13-06438 was reported on September 19, 2013 after diesel contaminated soil and pea gravel was identified in tank vault during removal of a 4,000-gallon UST. Further information regarding the remediation was unavailable; however, a closure report summarizing the remedial work and analytical data was prepared for NYSDEC. The spill was remediated to the satisfaction of the NYSDEC, and the spill was administratively closed on February 12, 2014.

De Minimis Condition

A de minimis condition is defined by ASTM E1527-13 as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

De minimis oil-like staining was observed throughout Lot 6 including the interior warehouse space, near the mechanics pits, in the vicinity of a former ASTs, throughout the concrete-paved parking areas to the south, east, and west of the building, and underneath a parked excavator; and on Lot 72 throughout the interior warehouse space, truck access bays and exterior concrete-paved parking areas. Surficial concrete cracks, joints or exposed soil were not observed in stained areas; however, staining was observed near the wall/floor seams near the former AST area. The staining is considered a de minimis condition.

11.0 STATEMENT OF QUALIFICATIONS AND SIGNATURES

Langan declares that, to the best of its professional knowledge and belief, the personnel who performed this Phase I ESA meet the definition of Environmental Professional as defined in Subsection 312-10 of 40 CFR Part 312 and that they have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. They have developed and performed the AAIs in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes outlining the qualifications of the Environmental Professionals who performed this Phase I ESA are included in Appendix N.

User Questionnaire

LANGAN

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The User is defined as the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. These inquiries must also be conducted by the EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquires" is not complete.

General Information

User/Client Name (s): Bay Crane Service

Property Name: Peebble Lane Associates, Inc.

Address: 57-00 47th Street, Maspeth, NJ

Property Type: Industrial

Type of Property Transaction:

Purchase of property	☒
Financing of property	☐
Sale of property	☐

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

LANGAN

	Yes	No
(1.) Environmental liens that are filed or recorded against the property (40 CFR 312.25). Did a search of recorded land title records (or judicial records, where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	☐	☒

Note 1 – In certain jurisdictions, federal, tribal, state or local statutes or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

	Yes	No
(2.) Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)). Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	☒	☐

per 2021 NYSDEC consent oder

	Yes	No
(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐	☒

	Yes	No
(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).		
(a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Part 5.]	☐	☒
(b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	☐	☒

	Yes	No
(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,	☐	☒
(a.) Do you know the past uses of the property?	☐	☒
(b.) Do you know of specific chemicals that are present or once were present at the property?	☐	☒
(c.) Do you know of spills or other chemical releases that have taken place at the property?	☐	☒
(d.) Do you know of any environmental cleanups that have taken place at the property?	☐	☒

	Yes	No
(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	☐	☒

Queens County, Tax Block 2601, Lot 6

ORDER ON CONSENT

DEC FILE NO. R2-20210416-53

Jurisdiction

1. The Department of Environmental Conservation ("the Department" or "NYSDEC") is a department of the state of New York ("the State") with authority under section 3-0301 of the Environmental Conservation Law ("ECL") to enforce the environmental laws of the State and the rules, regulations and orders issued pursuant to that authority.

2. Pursuant to Article 15 of the ECL and Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York ("NYCRR") Part 608, the Department has administrative jurisdiction over and is responsible for regulating the building of structures in, on, or above waters of the State and the placement of fill in the navigable waters of the State or wetlands adjacent thereto.

3. The Department is also responsible for the management of tidal wetlands and adjacent areas of the State and thus regulates, among other activities, the placement of fill and other materials or structures therein by requiring permits for these of activities pursuant to ECL Article 25 and 6 NYCRR Part 661.

4. Furthermore, the Department is responsible for the administration and enforcement of laws and regulations pertaining to the abatement and prevention of pollution of state waters pursuant to Article 17 of the ECL and 6 NYCRR Part 750.

5. The Department has jurisdiction over the abatement and prevention of pollution to the waters of the State pursuant to Article 17 of the ECL and 6 NYCRR Part 750, *et seq.* This jurisdiction also authorizes NYSDEC, as a State agency with an approved program per Sections 318, 402 and 405 of the federal Clean Water Act ("CWA"), 33 U.S.C. Section 1251, *et seq.*, and its implementing regulations under 40 C.F.R. Part 123 to regulate the discharge of pollutants from point sources into the waters of the State in conformity with the CWA.

6. Pursuant to this authority to protect the waters of the State, the Department administers the State Pollutant Discharge Elimination System ("SPDES") permit program, ECL §17-0801, *et seq.* In general, the SPDES program prohibits any discharge of pollutants to the waters of the State without a permit establishing pollutant limitations and treatment requirements. SPDES permits set certain effluent limitation parameters ("parameters"), determined according to ECL §17-0809 and 6 NYCRR §750-1.11, in keeping with water pollution control mandates and consistent with meeting water quality standards ("WQS"). Those conditions address not only the allowable range of parameters for discharge of pollutants to the waters of the State, but also the

manner in which the permittee is to operate, maintain, monitor, and report on its regulated facilities and activities.

7. The Department further has jurisdiction over the transportation, storage, treatment, and disposal of solid waste under Articles 27 and 71 of the ECL and Part 360 of 6 NYCRR. NYS ECL §27-0703 authorizes NYSDEC to adopt and promulgate, amend and repeal rules and regulations governing the operation of SWMFs. Pursuant to §27-0703, NYSDEC promulgated 6 NYCRR Parts 360, 361, 362, 363, and 365 governing the operation of SWMFs, effective November 4, 2017. NYCRR 360.4(f), as the transition rule applicable to a facility registered under the previously promulgated Part 360 in effect prior to November 4, 2017 (generally, as "Prior 360") that now requires a permit under 6 NYCRR Part 360, requires that such facilities must continue to operate in compliance with the conditions of the previously issued registration until a SWMF permit is issued by the Department. Any facility operating under Prior 360 Registration must comply with all applicable regulations under Prior 360. Therefore, all references in this order to 6 NYCRR Part 360 are to Prior 360.

Respondents

8. Respondent Pebble Lane Associates, Inc. (hereinafter "Pebble Lane") is a foreign limited liability company with a mailing address at 1218 Central Avenue, Suite 100, Albany, NY 12205 and was a lessee of Queens County, Tax Block 2601, Lots 1 and 6.

9. Respondent Emilio Lamanna is a corporate officer of Respondent Pebble Lane, who at all pertinent times has been involved in the day-to-day business activities of Pebble Lane, including those that gave rise to the violations. Respondent Emilio is also the co-owner of Queens County, Tax Block 2601, Lot 1.

10. Respondent Rossana Bortone (hereinafter "Bortone") is a corporate officer of Respondent Pebble Lane, who at all pertinent times has been involved in the day-to-day business activities of Pebble Lane, including those that gave rise to the violations.

11. Respondent Mary Jean Lamanna (hereinafter "Mary Jean") is a corporate officer of Respondent Pebble Lane, who at all pertinent times has been involved in the day-to-day business activities of Pebble Lane, including those that gave rise to the violations.

12. Respondent 57-00 Maspeth Avenue, LLC (hereinafter "57-00 Maspeth Ave LLC") is a domestic limited liability company with a mailing address at 57-05 47th Street, Maspeth, NY 11378. 57-00 Maspeth Ave is the owner of Queens County, Tax Block

2601, Lot 6.

13. Respondent Sabatino Lamanna is an individual who until November 2020 was the owner of Queens County, Tax Block 2601, Lot 1, together with Respondent Emilio Lamanna.

14. Respondent RL Family Property Owner LLC is a domestic limited liability company with an address at 248-22 Brookville Boulevard, Rosedale, NY 11422.

15. Respondent EL Family Property Owner LLC is a domestic limited liability company with an address at 248-22 Brookville Boulevard, Rosedale, NY 11422.

16. Respondent SLMJL Family Property Owner LLC is domestic limited liability company with an address at 248-22 Brookville Boulevard, Rosedale, NY 11422.

Site

17. The "Site," as the term is used in this Order, extends over two commercial waterfront parcels identified as Queens County Tax Block 2601, Lots 1 and the northern portion of Lot 6, as well as the area immediately adjacent thereto. Specifically, the Site encompasses the portion of the parcels that has been used for an aggregate facility as depicted in Figure 1, below:

Figure 1: The Site (Lot 1 and p/o Lot 6), facing east

18. The mailing address for Queens County Tax Block 2601 Lot 1 is 58-20 47th Street,

Maspeth, NY 11378.

19. The mailing address for Queens County Tax Block 2601 Lot 6 is 57-00 47th Street, Maspeth, NY 11378.

20. Respondent 57-00 Maspeth Ave LLC acquired Lot 6 on April 30, 1998.

21. By deed dated November 13, 2020, Respondent 57-00 Maspeth Avenue, LLC conveyed titled to Lot 6 to Respondents RL Family Property Owner LLC, EL Family Property Owner LLC, and SLMJL Family Property Owner LLC, each holding 1/3 of the undivided interested in Lot 6 as tenants in common.

22. Respondents Emilio Lamanna and Sabatino Lamanna acquired Lot 1 on December 31, 2008, and conveyed the lot by deed dated November 13, 2020, to EL Family Property Owner LLC and SLMJL Family Property Owner LLC.

23. The Site abuts, and a portion of the Site extends into, Newtown Creek, a navigable water of the State, which at the Site is mapped as a regulated tidal wetland on official tidal wetlands maps #590-506 and #590-508.

24. Portions of the Site are mapped as high marsh area and littoral zone, both areas that are protected and regulated under articles 15 and 25 of the ECL.

The 2009 Consent Order

25. On April 30, 2009, under file numbers R2-20061227-560 and R2-20090331-188, DEC entered into an order on consent ("the 2009 Order") with respondents Pebble Lane Associates, Inc.; Emilio Lamanna; Mary Jean Lamanna; Rossana Bortone; Sabatino Lamanna; and 57-00 Maspeth Avenue, LLC to address multiple violations at the Site involving ECL Art. 15, 17, 25, and 27 and the corresponding regulations.

26. Paragraph I of the 2009 Order required Pebble Lane Associates, Inc.; Emilio Lamanna; Mary Jean Lamanna; Rossana Bortone; Sabatino Lamanna; and 57-00 Maspeth Avenue, LLC to impose the obligation to comply with the 2009 Order onto any tenant, lessee or transferee and to provide DEC with any contract of sale or lease.

27. The 2009 Order required, among numerous other compliance activities, the development and implementation of a Best Management Practices Plan, the restoration of the wetland on the Site, the installation of a vegetated buffer area, and the relocation of the commercial operation on the Site pursuant to a tidal wetlands permit application the respondents to the 2009 Order were supposed to submit and complete.

28. On May 1, 2009, Respondents Emilio Lamanna and Sabatino Lamanna leased lot 6 to Pebble Lane Associates, LLC, a foreign limited liability company registered with the New York State Department of State on May 7, 2009, and a subsidiary of U.S. Concrete Inc., a corporation headquartered in Texas.

29. Also on May 2, 2009, 57-00 Maspeth Avenue LLC leased a portion of lot 1 to Pebble Lane Associates, LLC.

30. In violation of the 2009 Order, Respondents did not provide DEC with either lease.

31. Based on the lease agreement, Pebble Lane Associates, LLC and New York Sand & Stone LLC owned and operated a solid waste registration facility and aggregate facility on the Site but never obtained a tidal wetlands permit for their facility.

32. On or before September 17, 2012, a new concrete wall was installed at the northwest portion of the Site in the regulated tidal wetlands area without a DEC permit.

33. In violation of the 2009 Order, Respondents did not provide DEC with the sales or transfer agreements on which the November 13, 2020 deeds referenced in paragraphs 21 and 22, above, are based.

Applicable Law

34. ECL §15-0503(1)(b) and 6 NYCRR Part 608 prohibit the construction, placement, or expansion of any dock, wharf, platform, or other structure in, on, or above waters without a NYSDEC permit.

35. ECL §15-0107(4) defines “waters” to include, among other water bodies, “estuaries, marshes, inlets, canals, the Atlantic Ocean within the territorial limits of the state of New York, and all other bodies of surface or underground water, natural or artificial, inland or coastal, fresh or salt, public or private, which are wholly or partially within or bordering the state or within its jurisdiction.”

36. ECL §15-0505 and 6 NYCRR Part 608 prohibit the excavation and placement of fill in the navigable waters of the State or in marshes, estuaries, tidal marshes, and wetlands that are adjacent to and contiguous at any point to any of the navigable waters of the State and that are inundated at mean high water level or tide, without a permit from the NYSDEC.

37. ECL §71-1107 provides for a civil penalty of up to five thousand dollars ($5,000) for

each violation of section 15-0505 as well as criminal sanctions and injunctive relief.

38. ECL §71-§1127 provides that any person who violates or fails to comply with any rule, regulation, determination or order of the department under ECL Art. 15 shall be liable for a civil penalty of not more than $2,500 for each such violation and an additional civil penalty of not more than $500 for each day during which such violation continues.

39. ECL §17-0501 and 6 NYCRR §703.1 *et seq.* prohibit any discharge into the waters of the state that shall cause or contribute to a condition in contravention of the State's Surface Water and Groundwater Quality Standards and Groundwater Effluent Limitations.

40. Newtown Creek at the Site is categorized as Class SD saline surface water pursuant to 6 NYCRR §890.6 item 54.

41. Pursuant to 6 NYCRR §703.2 a discharge into a Class SD surface water must not increase turbidity in a manner that causes a substantial visible contrast to natural conditions.

42. ECL §17-0803 and 6 NYCRR §750-1.4 prohibit any discharge into the waters of the state not permitted by the provisions of Article 17 of the ECL, the rules and regulations adopted or applicable pursuant thereto, the Federal Water Pollution Control Act, or provisions of a permit issued pursuant to ECL Article 17, including General Permit GP-0-15-002.

43. Pursuant to 40 C.F.R. 122.26(b)(15)(i) the term "construction activities" requiring coverage under General Permit GP-0-15-002 includes clearing, grading, and excavating that result in land disturbance of equal to or greater than one acre.

44. ECL §17-0503(2) provides that "[g]arbage, cinders, ashes, oils, sludge or refuse of any kind shall not be thrown, dumped or permitted to run into the waters of the marine district."

45. Pursuant to ECL § 13-0103, the marine district encompasses the waters of the Atlantic Ocean within three nautical miles from the coast line and all other tidal waters within the state.

46. ECL 71-1929 provides for a civil penalty of up to thirty-seven thousand five hundred dollars ($37,500) per day for each violation of titles 1 through 11 inclusive and title 19 of

Article 17, or the rules, regulations, orders, or determinations of the Commissioner promulgated thereto.

47. ECL §25-0401 and 6 NYCRR § 661.8 prohibit regulated activities in a tidal wetland or regulated tidal wetland adjacent area without a permit from NYSDEC.

48. 6 NYCRR § 661.4(ee)(1) defines "regulated activity" to encompass, among other activities,

a. "any form of [...] excavation or removal, either directly or indirectly, of soil, mud, sand, shells, gravel or other aggregate;"

b. "any form of dumping, filling or depositing, either directly or indirectly, of any soil, stones, sand, gravel, mud, rubbish or fill of any kind;"

c. "the erection of any structures or construction of any facilities or roads, the driving of any pilings or placing of any other obstructions, whether or not changing the ebb and flow of the tide;"

d. "any form of pollution;"

e. "any portion of a subdivision of land located in any tidal wetland or adjacent area;" and

f. "any other new activity within a tidal wetland or on an adjacent area which directly or indirectly may substantially alter or impair the natural condition or function of any tidal wetland."

49. 6 NYCRR § 661.4(gg) defines the term "subdivision" to include "any grading, road construction, installation of utilities or other improvements or any other land use and development preparatory or incidental to any such division."

50. ECL § 71-2503 authorizes the imposition of a civil penalty of up to ten thousand dollars ($10,000) per day for each violation of Article 25 as well as injunctive relief.

51. ECL § 27-0707 and 6 NYCRR § 360-1.5(a) prohibit the disposal of solid waste except at a properly authorized disposal facility or one that is exempt from the requirements of Part 360.

52. Section 360-1.7(a) of 6 NYCRR states that no person shall construct, operate,

modify, or expand a solid waste management facility except in accordance with a valid permit issued by the Department.

53. Section 360-1.7(a)(2)(iv) of 6 NYCRR provides that new solid waste management facilities must not be constructed or operated within the boundary of a regulated wetland.

54. Section 360-1.14(b)(1) of 6 NYCRR provides that solid waste shall be prevented from entering surface and/or groundwater.

55. Section 360-16.1(c) of 6 NYCRR states that no person shall construct or operate a facility used to receive, treat or process construction and demolition debris ("C&D debris") without first having obtained a permit to do so from the department.

56. Section 360-16.4(f)(3) of 6 NYCRR states that processed or unprocessed C&D debris storage piles shall not exceed 20 feet in height, and the area of the storage pile at the base shall not exceed 5,000 square feet.

57. Pursuant to ECL §71-2703(1), any violation of 6 NYCRR Part 360 or any order issued thereunder subjects the violator(s) to a civil penalty of up to $7,500 for each violation and an additional penalty of $1,500 for each day the violation continues, as well as to criminal penalties and injunctive relief. Violations related to the laws and regulations involving waste transporter permits or solid waste management and resource recovery facilities may be sanctioned by a civil penalty of up to $22,500 if they involve the release of ten cubic yards or more of solid waste in the environment. If construction and demolition debris is involved, an additional civil penalty of up to $15,000 per day for each violation may be imposed pursuant to ECL § 71-2703(3).

58. By failing to comply with the 2009 Order, by operating or causing the operation of the registration facility in the tidal wetland and adjacent area without permit, by installing an additional wall structure, Respondents violated ECL §15-0503(1)(b), 71-1929, 25-0401, and 71-2703(1) as well as the corresponding regulations of Part 608, 703, 661, and 360.

59. In settlement of the Respondents' civil liability for the aforesaid violations Respondents affirmatively waive their rights to notice and hearing in the manner provided by law and consent to the payment of the sums specified below, and the issuance and entry of this Order. Respondents agree to be bound by the terms, provisions and conditions contained herein.

NOW, having considered this matter and being duly advised, it is ORDERED:

I. Respondents shall carry out their respective obligations set forth in the attached Schedule of Compliance ("Schedule A") which is hereby made part of this Order. Unless otherwise specified in this Order, Respondents shall certify in writing completion of the respective activities for which they are responsible within fifteen (15) days of the completion of each activity. Should Respondents sell, transfer, or otherwise convey the subject property or any ownership or controlling interest therein, they shall impose the obligation to comply with said Schedule and all other terms and conditions of this Order on the purchaser, successor, or assign by contract. Respondents shall submit to NYSDEC a copy of any contract of sale of the premises or of a controlling interest therein within five days of the execution thereof or at least thirty days prior to any such conveyance or sale, whichever shall be earlier.

II. This Order on Consent, once it is signed by the Respondents and their signatures have been notarized, shall be returned to

NYSDEC Region 2
Attention: Udo Drescher
Office of General Counsel
47-40 21st Street, Fl. 4
Long Island City NY 11101-5401

along with any pertinent submissions.

III. Civil Penalty: With respect to the aforesaid violations, Respondents shall be jointly and severally liable to pay a civil penalty in the amount of eight hundred twenty-four thousand dollars ($824,000) to be paid as follows:

A. Half of the assessed civil penalty, that is, four hundred twelve thousand dollars ($412,000), shall be paid in four equal monthly installments as follows:

1. One hundred three thousand dollars ($103,000) shall be due and payable within thirty (30) days after the Department's execution of this Order.

2. One hundred three thousand dollars ($103,000) shall be due and payable within sixty (60) days after the Department's execution of this Order.

3. One hundred three thousand dollars ($103,000) shall be due and payable within ninety (90) days after the Department's execution of this Order.

4. One hundred three thousand dollars ($103,000) shall be due and payable within one hundred twenty (120) days after the Department's execution of this Order.

All payments shall be made by electronic payment at http://www.dec.ny.gov/about/61016.html#On-Line or by check made payable to the order of the "New York State Department of Environmental Conservation," with the enclosed invoice and the Case Number of this Order on Consent "R2-20210416-53" written in the memo section of the check, which shall be sent to the Department of Environmental Conservation, Division of Management and Budget Services, 625 Broadway, 10th Floor, Albany, NY 12233-4900.

B. The remainder of the penalty in the amount of four hundred twelve thousand dollars ($412,000) shall be suspended, provided Respondents strictly and timely comply with the requirements of this Order and the attached Schedule of Compliance.

C. The suspended portion of the civil penalty shall become payable by all Respondents, jointly and severally, immediately upon service of a Notice of Non-Compliance to any Respondent.

D. Default of Payment. The penalty assessed in the Order constitutes a debt owed to the State of New York. Failure to pay the assessed penalty, or any part thereof, in accordance with the schedule contained in the Order, may result in referral to the New York State Attorney General for collection of the entire amount owed (including the assessment of interest, and a charge to cover the cost of collecting the debt), or referral to the New York State Department of Taxation and Finance, which may offset any tax refund or other monies that may be owed to you by the State of New York by the penalty amount. Any suspended or stipulated penalty provided for in this Order will constitute a debt owed to the State of New York when and if such penalty become due.

IV. Permit Requirement/Schedule of Compliance: Respondents as well as their successors and assigns shall apply for any required NYSDEC permits for future work on the site to be conducted by or on behalf of Respondents and obtain them before doing any such work, except that a NYSDEC permit shall not be required for the performance of the work described in the annexed Schedule of Compliance.

V. Access: For the purpose of monitoring compliance with this Order and with applicable provisions of the ECL and regulations promulgated thereunder, duly authorized representatives of NYSDEC shall be permitted access to the Site and to relevant records without prior notice during reasonable hours at such times as may be desirable or necessary in order to inspect and perform tests the Department deems appropriate to determine the status of the property and Respondent's compliance. Such permitted access to ensure compliance shall include overhead flights by Department owned and operated remotely piloted aircraft systems upon reasonable notice to Respondent.

VI. Violation of this Order: In the event that NYSDEC determines that there is a violation of this Order on Consent, the NYSDEC reserves the right to initiate actions based upon the violation(s) of this Order on Consent and also to seek penalties for such additional violations (including continued violations) that occur after the date of this order.

VII. Binding Effect: The provisions of this Order shall be deemed to bind the Respondents and the Respondents' successors and assigns, including but not limited to any successor in title to the Site or any interest therein, receivers, trustees in bankruptcy, and all persons, officers, directors, employees, or agents acting under or for Respondents.

VIII. Indemnification: Respondents shall indemnify and hold harmless New York State, NYSDEC, and any of their employees, agents, or contractors for all claims, actions, damages, and costs resulting from Respondents' acts in fulfillment or attempted fulfillment of the provisions of this Order.

IX. Settlement and Reservation of Rights.

A. Upon completion of all obligations created in this Order, this Order settles only all claims for civil and administrative penalties concerning the violations described in this Order against Respondents and their successors (including successors in title) and assigns.

B. Except as provided in Subparagraph IX(A) of this Order, nothing contained in this Order shall be construed as barring, diminishing, adjudicating or in any way affecting any of the civil, administrative, or criminal rights of the Department or of the Commissioner or his designee (including, but not limited to, nor exemplified by, the rights to recover natural resources damages and to exercise any summary abatement powers) or authorities with respect to any party, including Respondent.

C. NYSDEC reserves the right to require the Respondents to undertake any additional measures required by law to protect human health and the environment, subject to Respondents' procedural rights under the State Administrative Procedures Act and NYSDEC Uniform Procedures Regulations at 6 NYCRR Parts 620 to 622.

X. Communication: All reports, submissions, and certifications herein required shall be made to the New York State Department of Environmental Conservation, Region 2, 47-40 21st Street, Long Island City, NY 11101, Attn: Justin Falls, Marine Resources Program. A copy of each shall also be sent to Udo M. Drescher, Asst. Regional Attorney, at the same address or by email at udo.drescher@dec.ny.gov. The NYSDEC file number appearing on the first page of this Order shall be endorsed on the face of each such submission.

XI. Miscellaneous:

A. No changes in this Order shall be binding upon NYSDEC unless such changes are authorized in writing by the NYSDEC Region 2 Director.

B. The provisions of this Order constitute the complete and entire Order issued to Respondents concerning resolution of the violations identified in this Order. No term, condition, understanding or agreement purporting to modify or vary any term hereof shall be binding unless made in writing and subscribed by the party to be bound. No informal oral or written advice, guidance, suggestion, or comment by the Department regarding any report, proposal, plan, specification, schedule, comment, or statement made or submitted by the Respondent shall be construed as relieving the Respondents of their obligations to obtain such formal approvals as may be required by this Order.

C. This Order resolves only those violations specifically described herein and does not relieve Respondent of liability for any acts, omissions, or

violations not articulated herein, nor does it relieve Respondent of any liability pursuant to the jurisdiction of any other local, state, or federal agency.

XII. Force Majeure: If a Respondent cannot comply with a deadline or requirement of this Order on Consent, because of natural disaster, epidemic or pandemic, war, terrorist attack, strike, riot, judicial injunction, or other, similar unforeseeable event which was not caused by the negligence or willful misconduct of Respondent and which could not have been avoided by the Respondent through the exercise of due care, Respondent shall apply in writing to the Department within a reasonable time after obtaining knowledge of such fact and request an extension or modification of the deadline or requirement. Respondent shall include in such application the measures taken by Respondent to prevent and/or minimize any delays. Failure to give such notice constitutes a waiver of any claim that a delay is not subject to penalties. Respondent shall have the burden of proving that an event is a defense to a claim of non-compliance with this Order on Consent pursuant to this subparagraph.

XIII. Effective Date and Termination: The effective date of this Order shall be the date upon which it is signed on behalf of NYSDEC. This Order shall terminate when all requirements imposed by this Order will have been completed to the Department's satisfaction.

DATED: Long Island City, New York

SCHEDULE OF COMPLIANCE (SCHEDULE A)

RESPONDENTS: PEBBLE LANE ASSOCIATES, INC.; EMILIO LAMANNA; MARY JEAN LAMANNA; ROSSANA BORTONE; 57-00 MASPETH AVENUE, LLC; SABATINO LAMANNA; RL FAMILY PROPERTY OWNER, LLC; EL FAMILY PROPERTY OWNER, LLC; AND SLMJL FAMILY PROPERTY OWNER, LLC

NYSDEC FILE NO. R2-20210416-53

1. **Within sixty (60) days after the effective date of this Order** Respondents must:

   1.1. Close the solid waste operation on the Site by removing all waste material and submitting to the Department's Division of Materials Management, 47-40 21st Street, 4th Floor, Long Island City, NY 11101-5407, a completed and signed Inactive Solid Waste Management Facility or Activity Notification Form together with a closure report which must include

   1.1.1. a narrative that explains that the facility is closed - the attached form (Attachment 1) should be completed and included, which provides for termination of the facility registration;

   1.1.2. the date when the facility ceased acceptance of solid waste;

   1.1.3. a statement that all solid wastes and solid waste processing/handling equipment specific to the facility have been removed from the facility;

   1.1.4. an explanation that the closure will "minimize the need for further maintenance or corrective actions and to prevent or remedy adverse environmental or health impacts such as, but not limited to, contravention of surface water and groundwater quality standards, gas migration, odors and vectors."

   1.1.5. a final survey documenting that materials have been removed; and

   1.1.6. photographs that document the conditions at the time of closure, depicting the entire area that was utilized for the operation of the facility and taken in such sequence, frequency, and clarity that a compliance determination can be made using he photographs. The photos must be accompanied by a photo map, showing the location and direction of each photo.

The form and report must be signed by a properly authorized, competent representative of the facility.

1.2. Complete a solid waste management facility annual report for activities conducted during calendar year 2021, using Attachment 2, and submit it via email to swmfannualreport@dec.ny.gov and SWMFannualreportR2@dec.ny.gov.

1.3. Schedule an inspection by Department Division of Materials Management staff to occur after all solid waste and facility equipment have been removed from the facility. Respondents shall schedule such inspection by contacting Udo Drescher at udo.drescher@dec.ny.gov.

2. **Within sixty (60) days after the effective date of this Order** Respondents must implement the wetlands restoration plan, identified as "Consent Order Site Plan" Drawing A-001.00 – A-003.00, prepared by Sheldon L. Reich, P.C., Consulting Engineers & Architects, dated 06.08.18 and last revised 04.19.21, a reduced copy of which is attached hereto as Attachment 3.A – 3.C, removing all aggregate material, structures and structural elements (including, but not limited to, concrete blocks, the concrete wall[s], and any concrete blocks that have tumbled down on the shoreline) from the tidal wetland and buffer area and creating a functioning high marsh area. .

3. **The high marsh area must be planted with a mixture of the following** grasses and shrubs:

3.1. The shrubs must consist at least six hundred (600) shrubs, consisting of *Iva frutescens* and *Baccharis halimifolia,* which must be at least 2.5 feet (thirty inches) tall at the time of planting and must be planted three feet (3 ft) on center.

3.2. Grasses must include one thousand (1,000) grass culms of either Distichlis spicata or Spartina patens but may also include Panicum virgatum, Scirpus punges and Juncus gerardii. The grasses must be planted three feet (3') on center and must be 2.3 feet (twenty-eight inches) tall at the time of planting.

4. **In the buffer planting area**, landward of the high marsh area, one thousand one hundred (1,100) plants comprised of a mixture of at least two (2) but possibly more of the following plant species must be planted and should be shown on the plan(s)): *Ammophila breviligulata, Andopogon virginicus, Cares Pensylvanica , Panica virgatum , Schizachyrium scoparium or Sorghastrum nultans.* These must be planted three feet (3') on center and must be 2.3 feet (twenty-eight inches) tall at the time of planting.

5. All plantings must be arranged in a random and naturalistic arrangement.

6. The plantings must be monitored for five (5) years following planting.

   6.1. If during the monitoring period the survival rate or areal coverage within the respective planting area drops below 85%, dead plants must be replaced and the planting area must be monitored again until an 85% survival rate is accomplished over at least two (2) consecutive growing seasons.

   6.2. An annual inspection report must be submitted to the Department no later than December 31 of each year during the monitoring period(s). The reports must be signed by a party taking responsibility for the reports' accuracy on behalf of Respondents and must include:

      6.2.1. Written observations of the condition of the plants as well as a description of percent survival, and

      6.2.2. Color photographs of such size, detail and sharpness and taken in such sequence that the photos clearly and completely depict the monitored area in a manner that a compliance determination can be made exclusively by using those photographs.

7. **During** the removal and planting activities, best management practices (BMPs) in the form of silt fencing and hay bales or similarly effective methods must be deployed and maintained in good working condition to prevent soil and other material from eroding into the tidal wetland and from the planting area into Newtown Creek. These BMPs must be maintained until a vegetative cover has formed that prevents erosion.

8. **Within two (2) weeks after the effective date of this Order** Respondents must record in the property records for lots 1 and 6 a restrictive declaration, consistent with the draft attached as Attachment 4, having inserted and missing information and having the document signed by the appropriate, authorized representatives of the lot owners and having those signatures properly notarized prior to recording. The purpose of the restrictive declaration is to identify and protect the tidal wetland and vegetated buffer area as such against incursions by current or future owners, tenants, and occupants. Prior to recording, Respondents must submit both declarations with the respective attachments to the Department (udo.drescher@dec.ny.gov) for review and approval. The documents must be prepared in such a manner that the content of the declarations and the attachments, including the fine print, will be legible to an average viewer of New York City's ACRIS system.

Attachment 4. A (Declaration for Lot 1) Page 1 of 5

D E C L A R A T I O N

THIS DECLARATION is made by EL Family Property Owner LLC and SLMJL Family Property Owner LLC, whose address is 248-22 Brookville Boulevard, Rosedale, NY 11422, hereinafter jointly called the "Declarant."

W I T N E S S E T H :

WHEREAS the Declarant is the owner of certain real property located in Queens County, City and State of New York, Queens County Tax Map Block 1, Lot 1, which real property is described in the metes and bounds description annexed hereto as "Attachment A" and which real property is hereinafter referred to as the "Subject Property;" and

WHEREAS the Subject Property is within the jurisdiction of the New York State Department of Environmental Conservation ("NYSDEC" or "Department")) under the article 25 of the New York State Environmental Conservation Law (the Tidal Wetlands Act") because it contains regulated tidal wetland and/or regulated wetland adjacent area; and

WHEREAS, Declarant has entered into an order on consent with NYSDEC under NYSDEC File number R2-20210416-53 (the Consent attached hereto as "Attachment B"), which requires among other things the creation and protection of the regulated tidal wetland on the Subject Property, which includes an area mapped as high marsh on the official tidal wetland inventory as shown on maps #590-506 and #590-508, and a thirty foot (30') wide vegetated buffer around that high marsh area partially on the Subject Property; and

WHEREAS, Declarant represents and warrants that no restriction of record on the use of the Subject Property, nor any present or presently existing future estate or interest in the Subject Property nor any right, obligation, covenant, limitation, or encumbrance of any kind precludes, prohibits or potentially, the imposition of the restrictions, covenants, obligations, easements and agreements of this Declaration or the development of the Subject Property in accordance therewith.

NOW, THEREFORE, Declarant does hereby declare that the Subject Property shall only be held, sold, conveyed and occupied subject to the following restrictions, covenants, obligations, and agreements, which are for the purpose of maintaining and protecting the tidal wetland and area adjacent thereto for the benefit of the citizens of the State of New York generally and for the benefit specifically of the owners and/or occupants of property

DRAFT

Attachment 4. A (Declaration for Lot 1) Page 2 of 5

identified as Queens County Tax Block 2601, Lot 1, which maintenance and protection is in mitigation of the impacts to such regulated wetland and adjacent area from unauthorized filling and the extended duration of unauthorized commercial activities on the Subject Property, which restrictions, covenants, obligations, and agreements shall run with such real property, binding every party having any right, title, or interest in the Subject Property or any part thereof and binding all heirs, executors, administrators, successors, and assigns.

1. Declarant hereby covenants and agrees to develop and maintain in perpetuity as high marsh and vegetated buffer area the portion of the Subject Property depicted as such on, and in accordance with, the site plan identified as "Order Site Plan" Drawing A-001.00 – A-003.00, prepared by [illegible] Consulting Engineers & Architects, dated 06.08.18, and last revised 0[illegible]21, a copy of which is appended hereto as Attachment [illegible].

2. Declarant hereby covenants and agrees to further restrict and prohibit any person or party from performing, ordering, agreeing, any activity, change in grade, or change in vegetation [illegible] said high marsh and vegetated buffer area other than required pursuant to [illegible] Order. Declarant further covenants and agrees to restrict and prohibit any person or party from performing, any regulated activity, as defined in Part 661 of Chapter Six of the Official Compilation of Rules and Regulations of the State of New York (and any successor regulation) on or within such high marsh and vegetated buffer area.

3. Declarant, its successors and assigns and future grantees of all or a portion of any interest in the Subject Property shall set forth these covenants, restrictions and declarations in any and all transfer documents and leases of the property and shall by the terms of such lease subject the transferee or lessee to the covenants and restrictions contained herein. Failure by Declarant, its successors or assigns to so comply with such transfers or leases shall not invalidate the automatic subjugation of the transferee or lessee to these covenants, restrictions and declarations.

4. Declarant shall include a copy of this Declaration, executed and affixed with the file stamp and seal of the Clerk of the City of New York, County of Queens, as part of any application pertinent to the Subject Property submitted to the Department of Buildings of the City of New York, or to any agency succeeding to said department's jurisdiction.

5. If any section, subsection, paragraph, clause, phrase, or provision of these covenants, restrictions, and agreements shall, by a court of competent jurisdiction, be adjudged illegal, unlawful, or invalid, or held to be unconstitutional, the same judgment shall not affect the validity of this Declaration as a whole or any other part or provision hereof other than the parts so adjudged.

Attachment 4. A (Declaration for Lot 1) Page 3 of 5

6. The provisions herein contained shall be enforceable by the Attorney General of the State of New York, by the Commissioner of the Department, or by such agencies or regulatory authorities having jurisdiction over the Subject Property, and/or over the Declarant, its successors, and/or occupants of the Subject Property currently identified as Queens County Tax Block 2601, Lot 1. The failure of any such party individually or collectively to enforce any of the covenants, restrictions, and/or agreements contained herein shall in no event be deemed a waiver of the right to do so thereafter.

7. Any violation of these restrictions, covenants and agreements shall cause the violator, in addition to any fines, penalties, and/or forfeitures prescribed by law, to pay for any and all reasonable legal fees and expenses incurred by any party in enforcing the covenants, restrictions, and agreements herein.

8. If the Declarant, its successors, and/or assigns at the time of any interest in the Subject Property shall fail to comply with the obligations hereunder within five (5) days after receipt of a notice from any party entitled to enforce this Declaration, stating the obligation not complied with, and stating that the obligation cannot be complied with within such five-day period but compliance has been commenced and is being diligently pursued, said five-day period shall be extended for such time as may be reasonably necessary to effectuate compliance], the party or parties entitled to enforce this Declaration may cure such non-compliance and may come upon the Subject Property with such workers and materials as may be reasonably required for effectuating such compliance any time after five (5) days following the giving of such notice by Declarant, its successors, and/or assigns, or future owners-in-interest. The owner, owners, lessees, occupants, or other parties-in-interest of the Subject Property shall pay to the party enforcing and effectuating such compliance with this Declaration all reasonable costs incurred in effectuating compliance, including court costs, legal fees, disbursements, and paralegal charges. The remedy set forth above shall not be exclusive and parties seeking to enforce such Declaration shall have all rights and remedies at law or in equity to do so. In the event any party or parties having the right to enforce such Declaration shall bring any action at law or in equity for enforcement, and such enforcement is granted, the party against whom such enforcement is sought shall pay all legal fees, court costs, and other expenses of the party or parties seeking to enforce such Declaration, and if not paid the same shall become a lien against the Subject Property.

9. Each of the covenants, restrictions, and agreements contained in this Declaration shall run with the land in perpetuity, binding the Declarant and its successors and/or assigns, and each shall be so construed.

10. Declarant recognizes that the Department is an interested party to this Declaration

Attachment 4. A (Declaration for Lot 1) Page 4 of 5

and consents to the enforcement by the DEC of the covenants, restrictions, and agreements contained in such Declaration by whatever means are appropriate.

11. This Declaration may be amended, modified, or canceled only with the express written approval and consent of the Commissioner of the Department, or the head of the agency succeeding to its jurisdiction. No other approval or consent shall be required or accepted from any public body, private person, or legal entity of any kind.

12. Declarant hereby covenants and agrees that it shall immedia[illegible] record this Declaration after execution by Declarant in the [illegible] Cler[illegible] of New York, Queens County, and Declarant shall ensu[illegible] at s[illegible] Decla[illegible] dexed against the Subject Property. Declarant further cov[illegible] nts [illegible] gree[illegible] e a copy of this Declaration as stamped, recorde[illegible] ed, [illegible] s a [illegible] f such Declaration by the Cit[illegible] ounty, to the Regional Permit Administrator for Region 2 ([illegible] Yo[illegible] tment. The Department shall also have the r[illegible] and record th[illegible] with the Clerk of the City of New York, Que[illegible]

NOW, THEREFORE, Declarant does hereby declare that the Subject Property shall only be held, sold, conveyed and occupied subject to the following restrictions, covenants, obligations, and agreements, which are for the purpose of maintaining and protecting the tidal wetland and area adjacent thereto for the benefit of the citizens of the State of New York generally and for the benefit specifically of the owners and/or occupants of property

DRAFT

Attachment 4. B (Declaration for Lot 6) Page 2 of 6

identified as Queens County Tax Block 2601, Lot 6, which maintenance and protection is in mitigation of the impacts to such regulated wetland and adjacent area from unauthorized filling and the extended duration of unauthorized commercial activities on the Subject Property, which restrictions, covenants, obligations, and agreements shall run with such real property, binding every party having any right, title, or interest in the Subject Property or any part thereof and binding all heirs, executors, administrators, successors, and assigns.

1. Declarant hereby covenants and agrees to develop and m[illegible]in in perpetuity as high marsh and vegetated buffer area the portion of the Sub[illegible]roperty depicted as such on, and in accordance with, th[illegible] site[illegible]ider[illegible]Consent Order Site Plan" Drawing A-001.00 – A-003.00, [illegible]pare[illegible]She[illegible]ch, P.C., Consulting Engineers & Architects, dated 06[illegible]18, [illegible]st re[illegible] 04.19.21, a reduced copy of which is appen[illegible]ere[illegible]ment

2. Declarant hereby covenants and a[illegible]rees to [illegible]er re[illegible]prohibit any person or party from performi[illegible]rderi[illegible]g, agri[illegible]y, change in grade, or change in vegetati[illegible]said h[illegible]m[illegible]tated buffer area other than required pursua[illegible]mplia[illegible]er. Declarant further covenants and agrees to rei[illegible]d to [illegible] person or party from performing, any [illegible]d a[illegible]ity, as [illegible]Par[illegible]661 of Chapter Six of the Official Compilatio[illegible]Rule[illegible]d Reg[illegible]of the State of New York (and any successor regu[illegible]or [illegible]hin such hi[illegible]marsh and vegetated buffer area.

3. Declarant, its su[illegible]s ar[illegible]s al[illegible]ure grantees of all or a portion of any i[illegible]the [illegible]ct P[illegible]l set fo[illegible]n these covenants, restrictions and de[illegible]y and all transfe[illegible]eases of the property and shall by the terms of such leas[illegible]ject t[illegible]nsferee or lessee to the covenants and restrictions co[illegible]here[illegible]e fa[illegible]e Declarant, its successors or assigns to so c[illegible]sfers[illegible]ases[illegible]ot invalidate the automatic subjugation of the tran[illegible]sse[illegible]ese covenants, restrictions and declarations.

4. D[illegible]rant[illegible]inc[illegible]t copy of this Declaration, executed and affixed with the file [illegible]p a[illegible]of th[illegible]Clerk of the City of New York, County of Queens, as part of any [illegible]plicati[illegible]pertinent to the Subject Property submitted to the Department of Buildings[illegible]he City of New York, or to any agency succeeding to said department's jurisdiction.

5. If any section, subsection, paragraph, clause, phrase, or provision of these covenants, restrictions, and agreements shall, by a court of competent jurisdiction, be adjudged illegal, unlawful, or invalid, or held to be unconstitutional, the same judgment shall not affect the validity of this Declaration as a whole or any other part or provision hereof other than the parts so adjudged.

Attachment 4. B (Declaration for Lot 6) Page 3 of 6

6. The provisions herein contained shall be enforceable by the Attorney General of the State of New York, by the Commissioner of the Department, or by such agencies or regulatory authorities having jurisdiction over the Subject Property, and/or over the Declarant, its successors, and/or occupants of the Subject Property currently identified as Queens County Tax Block 2601, Lot 6. The failure of any such party individually or collectively to enforce any of the covenants, restrictions, and/or agreements contained herein shall in no event be deemed a waiver of the right to do so thereafter.

7. Any violation of these restrictions, covenants and agreements shall cause the violator, in addition to any fines, penalties, and/or forfeitures prescribed by law, to pay for any and all reasonable legal fees and expenses incurred by any party in enforcing the covenants, restrictions, and agreements herein.

8. If the Declarant, its successors, and/or assigns at the time of any interest in the Subject Property shall fail to comply with the obligations hereunder within five (5) days after receipt of a notice from any party entitled to enforce this Declaration, stating the obligation not complied with, and stating that the obligation cannot be complied with within such five-day period but compliance has been commenced and is being diligently pursued, said five-day period shall be extended for such additional time as reasonably necessary to effectuate compliance], the party or parties entitled to enforce this Declaration may cure such non-compliance and may come upon the Subject Property with such workers and materials as may be reasonably required for effectuating such compliance any time after five (5) days following the mailing of such notice by Declarant, its successors, and/or assigns, or future owners-in-interest. The owner, owners, lessees, occupants, or other parties-in-interest of the Subject Property shall pay to the party enforcing and effectuating such compliance with this Declaration all reasonable costs incurred in effectuating compliance, including court costs, legal fees, disbursements, and title search charges. The remedy set forth above shall not be exclusive of any other parties seeking to enforce such Declaration shall have all rights at law or equity to do so. In the event any party or parties having the right to enforce such Declaration shall bring any action at law or in equity for enforcement, and such enforcement is granted, the party against whom such enforcement is sought shall pay all legal fees, court costs, and other expenses of the party or parties seeking to enforce such Declaration, and if not paid the same shall become a lien against the Subject Property.

9. Each of the covenants, restrictions, and agreements contained in this Declaration shall run with the land in perpetuity, binding the Declarant and its successors and/or assigns, and each shall be so construed.

10. Declarant recognizes that the Department is an interested party to this Declaration

Attachment 4. B (Declaration for Lot 6) Page 4 of 6

and consents to the enforcement by the DEC of the covenants, restrictions, and agreements contained in such Declaration by whatever means are appropriate.

11. This Declaration may be amended, modified, or canceled only with the express written approval and consent of the Commissioner of the Department, or the head of the agency succeeding to its jurisdiction. No other approval or consent shall be required or accepted from any public body, private person, or legal entity of any kind.

12. Declarant hereby covenants and agrees that it shall immedia[illegible] record this Declaration after execution by Declarant in the [illegible] Cler[illegible]y of New York, Queens County, and Declarant shall ensu[illegible]at s[illegible]ecla[illegible]dexed against the Subject Property. Declarant further co[illegible]ants [illegible]gre[illegible]e a copy of this Declaration as stamped, recorde[illegible]d, [illegible]s a [illegible]f such Declaration by the Clerk of the Cit[illegible]ounty, to the Regional Permit Administrator for Region 2 ([illegible]Yo[illegible]tment. The Department shall also have the [illegible]and record th[illegible]with the Clerk of the City of New York, Que[illegible]

APPENDIX: OFFSET INFORMATION FORM

This form should be signed by any Respondent requesting a penalty payment schedule in an Order

** FORM TO BE DESTROYED AFTER PAYMENT IS MADE **

NYS Department of Environmental Conservation
Tax Information Form and Statewide Offset Program Notice

In reference to the debt to the State of New York
• memorialized in document number R2-20210416-53
• signed by Respondent _____

State agencies may refer past-due accounts to a private collection agency or the New York State Attorney General's Office. Further, Section 171-f of 'the State Tax Law authorizes State agencies to certify a past-due legally enforceable debt to the New York State Department of Taxation and Finance, for collection by offset of tax overpayments or other payments due from the State. In addition, State agencies are authorized to charge a collection fee, up to 22 percent of the outstanding debt; on accounts that are more than 90 days past due.

This form serves to notify you that the above referenced debt may be certified to the Department of Taxation and Finance for offset if not timely paid. The Department of Taxation and Finance is authorized, by law to collect your past-due debt through the offset of certain State and tax Refunds and other State payments.

You have the right to present written evidence, or to appear at a conference with a representative of this agency to present oral or written evidence in support of a defense to this certification. However, you may not challenge the underlying debt at that time, nor reargue any issue which was, or could have been previously heard.

Defenses that would be acceptable include (1) the debt has been paid, (2) you are not the person identified as the debtor in this notice, (3) the total amount owed is incorrect, (4) a deferred payment agreement is in effect and payments have been paid as agreed, (5) the debt has been discharged in bankruptcy, or (6) the debt is currently in bankruptcy.
Tax Identification Number
Social Security Number __. ____ -- ____ --_____
Employer Identification Number ____ --_____ _

One copy to be retained by New York State Department of Environmental Conservation.
One copy to be retained by the above referenced Respondent.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Site ID: 0206282
EPA Id: NYN000206282

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/09/2021 has revealed that there are 14 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/31/2020 has revealed that there are 24 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/09/2021 has revealed that there are 40 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 2 NY VCP sites within approximately 0.5 miles of the target property.

NY ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the NY ERP list, as provided by EDR, and dated 02/09/2021 has revealed that there is 1 NY ERP site within approximately 0.5 miles of the target property.

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/09/2021 has revealed that there are 18 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 15 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Registry ID:: 110019301726				

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there are 5 NY HSWDS sites within approximately 0.5 miles of the target property.

NY SPDES: New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

A review of the NY SPDES list, as provided by EDR, and dated 02/11/2021 has revealed that there is 1 NY SPDES site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

DEC Memo:	"12/21/07 Received call from Sean Healy of Getty. He believes the vent line failed due to fitting at tank was loose. No contamination found. Metro Environmental will be testing line tonight. Will send test report and letter. bf 12/28/07 received fax from Laurie Jodice of Tyree. There was a crossover line that was not removed. Fitting for line was plugged and tank was restested by Metro Environmental and passed. Called Sean Healy and he told me no signs of petroleum contamination was found during repairs. He then transferred me to Laurie Jodice of Tyree who is the project manager. I told her I need test results and letter regarding contamination. She said that she will send letter and send test results when she gets them. Letter stating no visdible signs of petroleum contamination received by fax from L. Jodice. Received passing tightness test results. NFA. bf"

DEC Memo:	"10/21/08-Zhune visited the site, spoke to Rossana Bortone (718) 456-8636 owner of Almar Supplies. She said they will hired a contractor to do the cleaned up. 08/27/12-Environmental Management Solutions, Inc. sent the Limmited Subsurface Investigation Report dated January 23, 2009. Six soil borings locations were selected according to visual petroleum related staining. All soil samples were collected at a depth of 1.5 feet(BGS). There were olfatory inidcations of petroleum related contamination in samples S-1, S-5, S-6. The soil Analytical results identified samples S-1 and S-5, having seven and two VOCs respectively in excess of the limit. S-1 (Total xylenes 2500 ppb, 1,3,5 Trimethyl Benzene 11000 ppb) and S-5(Total Xylene 34000 ppb, n-propylbenzene 3800 ppb, 1,2,5 Trimethyl Benzene 2300 ppb, 1,2,4 Trimethyl Benzene 58000 ppb, n-butylbenzene 11000 ppb, napgthalene 24000 ppb. 08/27/12- Environmental management Solutions, Inc. sent the Investigation Summary Report dated November 2010. On March 17 through 19 381.04 tons of contaminated soil was excavated. depth of excavation was approximately eight feet (Bgs). Groundwater was observed in the excavation and is estimated to be at 7 feet(bgs). Subsequent to the excavation of contaminate soil a total of five samples were collected arround the perimeter of the pit approximately on foot from the floor of the excavation. The endpoint soil analytical results inidcated that there were no VOCs exceeding the limit. There was no collection system encountered or any piping associated with the floor drain in the concrete pad. 08/27/12- Taylor Environmental sent the report for the instalation and sampling of a monitoring well date August 20, 2012. A groundwater sample was collected from the well. The groundwater analitycal result are within the accetable limit. Spill CLosed. "
Remarks:	"CALLER STATES THAT THERE IS ACTIVE SPILLING AND ILLEGAL STORAGE. THERE IS SPEEDY DRY ALL OVER BUT NOTHING HAS BEEN CLEANED UP, CALLER STATES THAT THIS HAS BEEN GOING ON FOR 10 YEARS. THEY HAVE 2 O/S FUEL TRUCKS FOR STORAGE AND FOR TRANSFERING FUEL TO VEHICLES. THE CATCH

Click Here:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Description of Events:	(A)The pail was unloaded with leakage noted. Examination of the pail revealed the pail had a loose cap/lid and leaked. The leakage was contained. The cap/lid was secured. Undamaged product was returned to the shipper. The damaged product was properly disposed of in accordance with Federal Regulations. (B)The package was dropped in handling. Examination of the inner container revealed a ruptured seam which allowed the contents to escape. The leakage was contained. The undamaged portion of the package was repacked for return to shipper.

Preparer of Incident Report:	Carrier
Description of Events:	(A)The pail was unloaded with leakage noted. Examination of the pail revealed the pail had a loose cap/lid and leaked. The leakage was contained. The cap/lid was secured. Undamaged product was returned to the shipper. The damaged product was properly disposed of in accordance with Federal Regulations. (B)The package was dropped in handling. Examination of the inner container revealed a ruptured seam which allowed the contents to escape. The leakage was contained. The undamaged portion of the package was repacked for return to shipper.

Total number evacuated: 0
Evacuation time in hours: 0
Road/facility was closed: False
No. of hours closed: 0
Hazmat invloved in crash/derailment: False
Estimated speed of crash: 0
Crash weather conditions: Not reported
Vehicle overturned: Not reported
Did vehicle leave road/track: Not reported
Where incident occurred/discovered: Not reported
Shipment handling details: Not reported

Incident report preparer details:
Preparer name: Mike Evers
Preparer title: Sr Manager - Hazardous Materials
Hazmat registration ID: 062904001002M
Employer business name: Fedex Ground Package System, Inc.
Address: 1000 Fedex Drive
MOON TOWNSHIP, PA 15108
Country: US
Report date: 04/19/07
Telephone: 412-859-5051
Fax: 412-859-5045
Business type: C
Preparer other function: Not reported

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

DEC Memo:	"1/18/18 TJD Teleconference with Mandy at Windmill to obtain further information. Provided contact info for foreman Mike Jr. at site. Spoke with Mike Jr. He states that he was retained to remove (1) 1K UST at spill address and a second 1K UST at adjoining property 55-80 - same owner. Tank was uncovered and contractor observed rotten oil lines with black oil in soil surrounding tank - tank currently contains #2 FO. Second tank not yet uncovered. As location is nearby to R2 office with open excavation, daytime runner (Patel) was advised to inspect - runner declined response an instructed duty desk officer to send CSL letter. Letter sent to owner following teleconference with staff at number provided by Windmill. Initial contact information provided is a follows: Carco Builders Corp (516)997-4100 Called above number an spoke with Janet - requested owner information to send DEC requirement letter, provided following information: Owner: Fred Carillo Morgan Realty Company 25 South Service Road Suite 320 Jericho, NY 11753 An internet search of provided company name was conducted yielding no results. A subsequent search was conducted with owners name - Fred Carillo is the Mayor of Old Westbury. Patel updated with information. CSL letter was prepared and sent via US Mail to owner listed above, Patel and contractor were copied on correspondence via email with attached CSL. DECDOCS for this spill is unavailable, PM to upload at his convenience. 01/19/18-Hiralkumar Patel. searched NYC DOB and google maps, but could not locate site address. 12:55 PM:- spoke with Mandy at Windmill. she stated that the site is located north of a recycling facility (5 Boro Recycling), near Maspeth Ave. searched google maps and found a recycling facility (5 Boro Green Services, LLC.) near Maspeth Ave on block # 2600/lot # 80. as per NYC DOB record, address for block 2600/lot 80 is 55-80 48th Street and the site is owned by Morgan Realty Company. Morgan Realty Co. also owns block 2600/lot 70. as per NYC DOB record, address for lot # 70 is 55-70 48th Street. google map shows addresses

IN YARD (Continued) **S121463896**

on these buildings as 55-70 47th Street and 55-80 47th Street. 1:26 PM:- spoke with John at recycling facility (718-482-7180), who confirmed that landlord has retained a contractor to remove a tank from their facility. John stated that the landlord also owns the neighboring property to the north where the same contractor is removing an another tank. the neighboring property is occupied by a bakery (Bimbo Bakeries USA). based on available information, added address 55-70 48th Street in Site Address info of the spill report. as per NYCDOB/NYC digital tax lot map/google map, the subject site is located at the intersection of Maspeth Ave and 48th Street, along the Maspeth Creek. 2:16 PM:- called Mr. Carillo's office and received his email address. Morgan Realty Company **property owner** 25 South Service Road, Suite 320 Jericho, NY 11753 Attn.: Fred Carillo Ph. (516) 997-4100 email: fcarillo@carcocorp.com 2:25 PM:- sent email to Mr. Carillo including copy of letter dated 01/18/18. 01/25/18-Hiralkumar Patel. 9:05 AM:- received call from Mandy. she mentioned that the tank was actually 2,000 gal in size and was containing oil prior to removal. asked her to register the tank. tank was removed and excavation has been backfilled. informed Mandy that the department requires endpoint samples from bottom and sidewalls of excavation for 8260/8270 analyses. she will confirm excavation size and # of endpoint samples collected prior to backfilling. 02/22/18-Hiralkumar Patel. 12:07 PM:- spoke with Mandy regarding endpoint sample results. she is waiting for sample results and will submit it once received. 09/25/18-Hiralkumar Patel. received message from Ryan (at 4:13 PM on 09/24/18) from Windmill Services. 7:51 AM:- received email from Ryan including incomplete report. 2:10 PM:- spoke with Mike at Windmill and asked him to submit a revised report including following: - tank size - length/diameter - original excavation dimensions - complete lab report for samples collected on 01/19/18 - final excavation dimensions - complete lab report for samples collected on 06/22/18 - confirmed depth of groundwater - scaled site map including tank, initial excavation dimension, final excavation dimensions and endpoint sample locations - piping status 2:23 PM:- sent email to Ryan and asked him to submit a revised report including above details. 3:21 PM:- received email from Ryan including a revised report. during removal of a 1,000 gal UST, no piping were found attached to the tank. prior to tank removal, Windmill removed 889 gal of #2 fuel oil. corrosion holes were noted on tank top and upper sidewalls, but no holes were noted on bottom of the tank. the tank was 4 ft in dia. and 10 ft long. after tank removal, contaminated soil was removed from 14 ft by 8 ft area to 12 ft depth where groundwater was found. one plug hole was dug down to approx. 15 ft bg to allow recharge for water sample. one groundwater sample and four sidewall samples were collected on 01/19/18. no VOC contamination was noted in endpoint samples, but some minute SVOC detection was noted in all soil samples. based on detection of SVOCs in sidewall soil samples, excavation was expanded 1 ft on all four sides and another set of sidewall samples were collected on 06/22/18. no contamination was noted in additional sidewall samples. all sidewall samples were collected at 10 ft bg. 09/26/18-Hiralkumar Patel. case closed based on available information. 10:54 AM:- sent spill closure letter to Mr. Carillo. letter emailed to Mr. Carillo and Ryan."

Remarks: "contained and clean up is ongoing, unknown amount lost"

Vehicle overturned:	Not reported
Did vehicle leave road/track:	Not reported
Where incident occurred/discovered:	Not reported
Shipment handling details:	Not reported

Incident report preparer details:

Preparer name:	Mike Evers
Preparer title:	Sr Manager - Hazardous Materials
Hazmat registration ID:	062904001002M
Employer business name:	Fedex Ground Package System, Inc.
Address:	1000 Fedex Drive MOON TOWNSHIP, PA 15108
Country:	US
Report date:	07/03/07
Telephone:	412-859-5051
Fax:	412-859-5045
Business type:	C

55-90 47 TH ST (Continued) **2008432728**

Preparer other function: Not reported

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Shipper Details:

Shipper ID: 433177
Shipper name: divertech
Address: 2175 e park pl
CONYERS, GA 30013
Shipper country: US
Hazmat papers #: 250670731592407
Shipment origin: Not reported
Not reported
Shipment origin country: US

Details of material being shipped:

Material ID: 439268
Material name: CORROSIVE LIQUID, BASIC, INORGANIC, N.O.S.
UN ID: UN3266
Hazard class code: 80
Trade name: contains sodium hydr
Packing group: Not reported
Amount reported released: 1 Gallon(s)
Amount released: 1 Gallon(s)
Material listed as hazardous waste: False
EPA manifest number of haz. waste: Not reported
Material listed as toxic inhalant: False
Hazard zone of toxic inhalant: Not reported
Material shipped under exemption/ approval/ Competent Authority Cert.
False
Exemption/approval/CAC number: Not reported
Undeclared Hazmat shipment: False
Package ID: 439695
Hazmat shipment destination: 10-11 38TH AVENUE
LONG ISLAND CITY, NY 11101
Package type: A
Package other description: Not reported
Packaging markings: Not reported
Package code: 77

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Details of fatalities by vapor/fire/explosion of hazardous material:
- Did Fatalities occur: False
- No. of employee fatalities: 0
- No. of responder fatalities: 0
- No. of public fatalities: 0

Details of fatalities not due to hazardous material:
- Did fatalities occur: Not reported
- No. of dead persons: 0

Details of injuries due to hazardous material:
- Did injuries occur: False
- No. of employees hospitalized: 0
- No. of employees not hospitalized: 0
- No. of responders hospitalized: 0
- No. of responders not hospitalized: 0
- No. of public hospitalized: 0
- No. of public not hospitalized: 0
- Evacuation was required: False
- No. of employees evacuated: 0
- No. of public evacuated: 0
- Total number evacuated: 0
- Evacuation time in hours: 0
- Road/facility was closed: False
- No. of hours closed: 0
- Hazmat invloved in crash/derailment: False
- Estimated speed of crash: 0
- Crash weather conditions: Not reported
- Vehicle overturned: Not reported
- Did vehicle leave road/track: Not reported
- Where incident occurred/discovered: Not reported
- Shipment handling details: Not reported

Incident report preparer details:
- Preparer name: Travis McEwen
- Preparer title: Safety Specialist III - Hazmat
- Hazmat registration ID: 062904001002M
- Employer business name: Fedex Ground Package System, Inc.
- Address: 1000 Fedex Drive
  MOON TOWNSHIP, PA 15108
- Country: US
- Report date: 09/11/07
- Telephone: 412-859-5061
- Fax: 412-859-5045
- Business type: C
- Preparer other function: Not reported

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Shipper Details:
- Shipper ID: 436401
- Shipper name: prestiage labs

Incident damage: 0

Inner and Outer Container Information:

Container type:	DRUM MTL
Container capacity:	100.00
Number failed:	1
Number in shipment:	1
Container gauge:	Not reported
Manufacture's ID:	16222
Manuf. name:	Not reported UNKNOWN, XX
Tank serial #:	Not reported
Label:	Not reported
Registration #:	Not reported
Inspection date:	/ /
Exemption #:	Not reported
Contributing cause:	Dropped
Contributing Object:	Water
Contributing failure:	Burst/int. pressure
Affected side:	Top
Other contributing cause:	Fitting valve
Capacity container code:	Not reported
Number failed code:	Not reported
Shipment code number:	Not reported
Container type:	BOX FBR
Container capacity:	100.00
Number failed:	1
Number in shipment:	1
Container gauge:	Not reported
Manufacture's ID:	16222
Manuf. name:	Not reported UNKNOWN, XX
Tank serial #:	Not reported
Label:	RED
Registration #:	Not reported
Inspection date:	/ /
Exemption #:	Not reported
Contributing cause:	LEAKED
Contributing Object:	No object
Contributing failure:	LEAKED
Affected side:	Bottom
Other contributing cause:	Package material
Capacity container code:	Not reported
Number failed code:	Not reported
Shipment code number:	Not reported

Remarks:

The package was dropped in handling. Examination of the metal drum revealed a burst seam which allowed the contents to escape. The leakage was contained. The package was repacked for return to the shipper.

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Incident report preparer details:

Preparer name:	Travis McEwen
Preparer title:	Safety Specialist III - Hazmat
Hazmat registration ID:	062904001002M
Employer business name:	Fedex Ground Package System, Inc.
Address:	1000 Fedex Drive MOON TOWNSHIP, PA 15108
Country:	US
Report date:	10/03/07
Telephone:	412-859-5061
Fax:	412-859-5045
Business type:	C
Preparer other function:	Not reported

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

DEC Memo:	"07/16/08-Hiralkumar Patel. DEC Steve gave spill report to me on 07/15/08 with information about property owner only. property owner: FDNY Building maintenance 48-34 35th Street Long Island City, NY 11101 contact: Joseph Mastropietro Ph. (718) 784-6510 spoke with Tom Larison at Shaw environmental. he mentioned that investigation report will be ready by next week. asked him to submit sample analytical summary table with site map (including sampling locations). received fax from Ms. Novillo with sample analyticals and unscaled/unclear site map. Shaw enrironmental removed one 15,000 gal UST and collected two sidewall (north and south) and two endpoint bottom samples. no VOC contamiantion found in samples. few SVOCs found in almost all samples. samples were taken at 12 ft depth. spoke with Ms. Novillo, who is handling project in Ms. Cozza's absence. asked her about not having east and west sidewall samples. also asked to submit complete report for review. Agustina Novillo Shaw Environmental Ph. (914) 633-9324 08/04/08-Hiralkumar Patel. left message for Tom. 08/08/08-Hiralkumar Patel. received tank closure report. abstract: - 15,000 gal #4 oil UST was abandoned - facility performs preventative maintenance and repairs for FDNY ambulances and support vehicles <-------- - UST was located in the northwest portion of the building, located inside of the building in an north-south orientation <--------- - site is approx. 25 ft above mean sea level - groundwater was not encountered during field abandonment activities - based upon the site hydrogeology, groundwater flow direction is estimated to be to the west-southwest towards the Maspeth creek <--------- - will abandoned second 15000 gal UST that is located on the east side of the UST of concren - approx. 2500 gal of #4 oil was removed by PTC; additionally 250 gal of sludge and 300 gal of oily water was removed - no pitting or holes were visible inside the tank - soil samples from the bottom and lower portion of two sidewalls were collected - UST was filled with concrete slurry - samples were taken at 12 ft bg under tank which is now abandoned in-place - no VOC contamination found in samples - SVOC contamination found in three samples at 12 ft bg 08/12/08-Hiralkumar Patel. left message for Mikhail Altshilar (718-784-6568, cell: 347-672-7169) at FDNY building maintenance. left message for Ms. Novillo at Shaw environmental. received call from Ms. Novillo. they haven't removed lines for tank that been abondoned recently. they don't know how those lines runs. 08/13/08-Hiralkumar Patel. received call from Mr. Altshilar. he mentioned that he has submitted different report to DEC Nick. discussed with Nick. he mentioned that he always forward report to project manager for that open spill case. he doesn't have report at his desk. spoke with Mr. Altshilar. he mentioned that contractor closed all lines in-place. they will abandoned second tank, which is also being used to store #4 oil, and then will install new AST. PBS #: 2-246131 as only SVOC contamination found at 12 ft bg and as there will be no change in

DER Facility ID: 328171
DEC Memo: "3/27/07 bf: Called joseph Mastropietro of FDNY (718)784-6510. Tank is vaulted with access. They believe failure was due to fill line piping, which is between 8 and 12 feet in length. I told him we will need documentatiuon regarding the failure cause and repair and that i will send him a lketter with the requirements of such documentation. He said we will probably see report by middle of next week. Sent ttf letter to: Joseph Mastropietro FDNY Building Maintenance 48-34 35th St. Long Island City, NY 11101 11/1/10 Sent ttf letter to: Joseph M. Mastropietro, Assistant Commissioner FDNY Building Maintenance Division 48-34 35th Street Long Island City, NY 11101 Also, provided General Counsel a request to add the requirement of documentation for closure of the spill case to the PBS consent order. bf 11/30/10 DEC received letter from Mikhail Altshiler of FDNY dated 11/24/10. He previously called me and requested clarification of what documentation is required. At this time i told General Counsel to not takwe action on the sopen spill as it appears that FDNY was cooperating in closure. 1/5/11 The 11/24/10 letter states that the tank was closed in place and was encased in a concrete vault and that no contamination was found during the closure. A letter from James Giustiniani of Empire Environmental was attached that supports the FDNY letter. bf"

DEC Memo:	"3/14/08 bf: Called NYCDOS. mr. Carrante not in today. Spoke to Kenny. Tank shut down. Faxed ttf to Carrante at (718)3349088. Sent ttf to: G. Carrante NYC Department of Sanitation 125 Worth St., Room 823B New York, NY 10013 4/30/08 On 4/22/08, received letter, dated 4/18/08, from Neil Gallagher of NYCDOS. Line for mechanical leak detector indicated there may be a leak. DOS contact Finley and Nicol. Line was tested and failed. Fueling shut down until repairs are made. bf 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 06/03/2014 - V. Brevdo. After discussion with Liro (consultant for the DDC) at May 29, 2014 quarterly meeting, and consistent with the request from Liro (Mr. John Proios' e-mail of 6/3/14), the following is done: This spill case 1203897 is re-assigned to V. Brevdo. Duplicating spill case 0713159 (TTF) assigned to V. Brevdo is consolidated with this spill 1203897 and spill case 0713159 is administratively closed as of June 3, 2014. V. Brevdo discussed the above course of action with Sarah Carlson on June 3, 2014. Sarah Carlson had no objection against consolidating these two spill cases and re-assignment of Spill case 1203897 to V.

NYC DOS QUEENS 5 (Continued) **S109060573**

Brevdo. Spill case 0713159 is consolidated with spill case 1203897. This spill case No. 0713159 is administratively closed effective June 3, 2014 via consolidation with spill case no. 1203897. No spill case closure letter is issued. V. Brevdo"

DEC Memo:	"Cross Ref to Spill #0904484 which related to a #2 heating oil spill/tank Also cross ref spill #0713159 at the same site. 9/20/10 On 8/16/10, DEC received closure report for the fuel oil tank. Contaminated soil was found and further investigation for clean-up will be conducted by LiRo. Closure plan is in e-docs PBS#2-605736. bf 2/6/15 There is another spill at the same site (0904484). Spill transferred to T. Demeo, Spills. bf 2/6/15 TJD File review. In August 2009 a subsurface geotechnical investigation was performed in the vicinity of the failed UST to a reported depth of 26 ft bgs. In August 2010 the 2,500 gallon #2 FO tank was pumped, purged, cleaned and removed - additionally a total of 250 tons of petroleum impacted soils were excavated, transported and properly disposed. The former UST area was overexcavated to a depth of 14 ft bgs - groundewater elevation is approximately 6 ft bgs and is tidally influenced. Endpoint samples were collected from the excavation prior to backfill - analytical results reveal VOC exceedances on the east and west walls (data is summarized in Table 3 of September 2013 report). Following the tank removal and soil excavation a total of (4) groundwater monitoring wells were installed. Wells have been monitored during (3) seperate events (2/13, 10/13 & 2/14)- each monitoring event revealed some minor VOC exceedances indicating a low concentration and localized disolved phase groundwater VOC plume which is tidally influenced. Based upon the file review - no further investigation or remedial action is required. All documentation has been uploaded to DECDOCS. File review was performed for both DEC spill 0904484 & 1001456. Documentation is DECDOC'd under spill 0904484. Spill closed."
Remarks:	"readings showed gasoline elevated readings - tank had heating oil - cleanup pending - no known contact - just the organization responsible"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TYREE, UNDER LIRO SUPERVISION, REMOVED 5 TANKS FROM IN FRONT OF GARAGE (ALONG 53RD AVE.). TANKS WERE THREE 550'S: TWO MOTOR OIL, ONE HOIST OIL; AND TWO 2,000-GAL USTS: ONE DIESEL AND ONE GASOLINE. SOIL AT NORTHWEST AND WEST ENDS OF EXCAVATION WAS CONTAMINATED, SMELLS LIKE DIESEL. WILL ASK DDC TO ADD SITE TO THEIR LIST, HAVE LIRO PERFORM SITE INVESTIGATION. SEE ALSO SPILL #9513871. LiRo installed and is currently operating a soil vapor extraction system to address contaminated soil at this site, monitoring groundwater. This spill transferred from Kolleeny to A. Zhitomirsky on 4/15/05. - JK 6/27/2005 Reviewed Quaterly Monitoring Report November 2004-Jauary 2005.SVE system is effectively treating soil VOCs. LiRo recommended continued operation and monitoring for SVE system. The Department concurred. AZ 7/21/2005 Reviewed Quaterly Monitoring Report February 2005-April 2005.SVE system is effectively treating soil VOCs. Soil Monitoring data show significant reductions in soil Voc levels compared to historical results. LiRo recommended continued operation and monitoring for SVE system. The Department concurred. AZ 10/21/2005 Reviewed a Monitoring Report received on September 1, 2005. The report presents monitoring data. The report states that SVE system is effectively collecting soil VOCs. A product skimmer is currently installed in well MW-3 where a layer of free product was observed during the monitoring period. The groundwater data have not shown great improvement. In order to enhance attenuation of groundwater contaminant levels, LiRo recommends installing ORC socks in five wells. LiRo recommends replacement of well MW-6 and continuing the monitoring plan at this site. The Department concurred with these proposals.AZ 1/4/2006 Reviewed a Monitoring Report received on November 29, 2005. The report presents monitoring data. The report states that SVE system is effectively collecting soil VOCs. A product skimmer is currently installed in well MW-3 where a layer of free product was observed during the monitoring period. Groundwater sampling in August 2005 showed VOC levels that were somewhat higher than the previuos samples. The groundwater data have not shown great improvement. Groundwater quality may inmprove as more

DOS QUEENS 6 GARAGE (Continued) **S103940952**

soil VOCs are removed. LiRo installed ORC socks in five wells. LiRo recommends continuing the monitoring plan at this site. AZ 4/5/2006 Reviewed Monitoring Data Report dated March 13, 2006. LiRo is no longer responsible for the site as of the end of December 2005. System was working effectively. AZ 7/18/2006 Reviewed Work Plan dated July 6, 2006, and received on July 10, 2006. The Work Plan was dicussed with Jon K. The plan cannot be approved at this point since it lacks essential information. Existing soil data must accompany the plan and must be plotted on the site map. Soil and groundwater plume maps must be included in the Work Plan. A short description of the site status and groundwater flow direction should be shown on the plan. A brief description of the remediation system, if any, current contamination levels, performed remedial activities and status of the tanks at the site should be included in the work plan. Upon submission of hard copies with this information, this work plan will be reviewed again. The information listed above has been routinely submitted by other consultants in their work plans. An e-mail with these comments was sent to Wendy Shen (Roux). AZ 12/4/2006 Reviewed Monitoring Data Report for April through June 2006 and dated August 31, 2006 by Roux. The SVE system has been successful. The observed rate of natural attenuation in gw has been slow. The total VOCs in MW-3 was 14,166 ppb. Groundwater contamination in this well should be addressed by DDC. Compared to previous sampling event in crease in total VOC concentrations was observed in MW-07 (195 ppb). On Dec. 1, 2006 I contacted Brian Morrissey (Roux) and reiterated that DEC rejected the submitted Work Plan for soil boring in July 2006. No other soil sampling plan was submitted to DEC. Brian Morrissey confirmed this fact. Roux suggested continue operating SVE system, replace spent carbon drum, reduce frequency of gauging from monthly to quarterly, attempt to repair casing in wells MW-01 and MW-02, repair the cracked covers of extraction wells EW-2and EW-3, remove ORC sock in MW-5. These recommendations were approved. A letter was sent to DEC. AZ 5/29/2007 Reviewed Monitoring Data Report for July through December 2006 and dated January 31, 2007 by Roux. SVE system had an uptime 100%. MW-03 has total VOC concentration of 11,810 ppb. A slight to a moderate increase in total VOC concentrations was observed in MW-07 between June and August 2006. Roux listed as upcoming tasks evaluation of alternative methods to remediate contaminated gw, perform quarterly sampling. Roux recommended removing MW-04 from the sampling program, replace two of the damaged and inaccessible monitoring wells in the vicinity of MW-02, MW-06 or other'hot spots . DEC approved these recommendations. AZ 5/30/2007 An e-mail was sent to DDC/Greyhawk/Roux: Roux recommended removing MW-04 from the sampling program, replace two of the damaged and inaccessible monitoring wells in the vicinity of MW-02, MW-06 or other hot spots . DEC approved these recommendations.AZ 8/9/2007 Reviewed Monitoring Data for January through March 2007 and dated June 15, 2007 by Roux. SVE system had an uptime 100%. MW-03 has total VOC concentration 6,196 ppb in groundwater. The riser pipe in EW-2 was broken. The covers of extraction well EW-03 require replacement. Additional site investigation including the replacement of monitoring wells MW-02 and MW-06 was approved by DEC on May 30, 2007. Wells MW-08, MW-09 and MW-01 were not sampled. E-mail was sent: I have reviewed Monitoring Report for the above site for the period of January through March 2007 and dated June 15, 2007. SVE system had an uptime 100%. Monitoring well MW-03 has total VOC concentration of 6,196 ppb in groundwater. The riser pipe in EW-2 was broken. The

DOS QUEENS 6 GARAGE (Continued) **S103940952**

covers of extraction well EW-03 require replacement. Repairs to these wells were requested by DEC on 12/4/2006 via e-mail. Additional site investigation plan including the replacement of monitoring wells MW-02 and MW-06 was approved by DEC on May 30, 2007 and should be performed. Wells MW-08, MW-09 and MW-01 were not sampled. Well MW-01 has cracked casing. This well should be repaired. Wells which have not been sampled should be sampled. Vacuum was not measured in a number of wells during March 2007 monitoring round. Vacuum should be measured in these wells. Ventillation wells VW-01 and VW-04 have zero vacuum readings. Vacuum should be increased in these wells. AZ 4-14-2008 E-maol was sent to Roux/Greyhawk/DDC/VB: I have reviewed Monitoring Report for the above site for the period of April - September 2007 and dated February 11, 2008. The riser pipe in EW-2 was broken and the covers of extraction well EW-03 require replacement. Repairs to these wells were requested by DEC on 12/4/2006 via e-mail and again in August 2007. However, these repairs have yet to be performed. Well MW-01 has cracked casing and should be repaired. Vacuum is insufficient in monitoring and ventilation wells. DEC requested in August 2007 that vacuum should be increased but it has not been done. Monitoring well MW-03 has total VOC concentrations of 6,160 ppb in groundwater. High VOC readings in monitoring well MW-03 should be addressed. DEC approves proposed sampling groundwater for bioremediation parameters. SVOCs could be removed from the sampling program but naphthalene sampling should be continued. AZ 4-17-2008 E-mail from Roux: I contacted Greyhawk regarding the system repairs. The work is already underway. Completion is expected by April 28, 2008. AZ 4-6-2009 An e-mail was sent to Brian Morrissey, V. Brevdo, Fatemeh Ashkan: I have reviewed a report for this site for the period of October 2007 through September 2008 and dated January 21, 2009. Roux submitted Enhanced Bioremediation Work Plan. This plan is approved. Roux recommended removing monitoring wells MW-01, MW-08, MW-09 and MW-10 from the sampling schedule. This recommendation is approved. Roux recommended removing monitoring wells MW-01, MW-08, MW-09 and MW-10 from the sampling schedule. This recommendation is approved. However, downgradient well MW-06, which was previously destroyed, should be re-installed. Roux recommended removing SVOCs from the sampling program but continue sampling for STARS VOCs including naphthalene. This proposal is approved. Most monitoring and SVE ventilation wells showed insufficient vacuum readings. As per Roux recommendations, SVE system should optimized and, if needed pulsed. Vacuum should be increased within the radius of influence. Sampling and reporting for this site should be performed quarterly. AZ 12-1-2010 An e-mail was sent to S. Frank and F. Ashkan: I have reviewed Site Turn Over Status Report submitted by LiRo. LiRo recommended replacement of downgradient well MW-06, redevelopment of monitoring wells MW-02, MW-03, and MW-04. and land survey of all wells. These recommendations are approved. LiRo should submit proposals for the site remediation to DEC. AZ 3-22-2011 Reviewed quarterly monitoring report received on 1-3-2011. The report stated that Low to moderate gw contamination remains in three wells. Bioremediation was performed at the site, however, the results were inconclusive with regard to the success of the injections. Residual soil contamination identified in 2007 in boring RXMW/RXSB-03 appears to be impacting groundwater. LiRo will continue sampling. Recommendations for further gw remediation will be determined following a review of the initial sampling data for well MW-06R. AZ 7-18-2011 An email was sent to LiRo/DDC/V.Brevdo: Dear Steve, I have

DOS QUEENS 6 GARAGE (Continued) **S103940952**

reviewed a quarterly monitoring report dated April 13, 2011. In order to define contamination present in the area of MW-03 and LBR-01, LiRo proposed the advancement of two borings. If contamination is present during drilling the borings will be converted to wells. This plan is approved. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Also, LiRo proposed to discontinue bioremediation parameter groundwater sampling. This proposal is approved. AZ 11-2-2011 Reviewed a quarterly monitoring report dated July 28, 2011. The report reiterated proposals made in April 2011 report and approved by DEC in July 2011. AZ 6-22-2012 Reviewed monitoring report dated February 2, 2012. Residual soil contamination remains in MW-07. LiRo will implement approved work plan. AZ 7-11-2012 Reviewed monitoring report dated March 20, 2012. Petroleum impacted soil was mainly identified in the Q2 and Q4 portions of the site. Sampling indicated elevated VOCs in the vicinity of hoist oil tank at Q4. Th highest contamination was observed from 12 to 35 ft bgs. ORC sock is lodged in well RXMW--02 and will be removed via overdrilling. LiRo will implement approved work plan. An e-mail was sent to LiRo/ V. Brevdo/F. Ashkan: Dear Steve, I have reviewed a quarterly monitoring report for the period of November 2011 - January 2012. LiRo stated that based on the latest groundwater sampling results, groundwater sampling should be reduced from quarterly to semi-annual. I concur with this proposal. Sincerely, Alexander Zhitomirsky Engineering Geologist 2 NYSDEC Region 2 Division of Environmental Remediation AZ 2-4-2013 The approved additional investigation was completed in June 2012. Results will be presented in the next monitoring report. AZ 3-26-2014 Reviewed semi-annual monitoring report dated 8-12-2013. The report sated that LiRo will attempt to redevelop the wells with a pump and surge (wells MW-03, LMW-08 and LMW-09). LiRo removed approximately 62-gallons of groundwater from wells LMW-08 and LMW-09 with a whale pump. Well LMW-08 exhibited 3,696 ppb of total VOCs. AZ 9-3-2014 Reviewed semi-annual monitoring report dated 01-07-2014. LiRo will attempt to remove ORC sock from MW-02. If the sock can not be removed, the well will be replaced. If redevelopment of LMW-08 does not clear the well, low flow sampling methods will be attempted. Well LMW-08 exhibited 5.076 ppb of total VOCs. AZ 3-3-2015 An e-mail was sent to V. Brevdo and and S. Frank: Dear Steve, I have reviewed a semi-annual monitoring report for this site. In order to sufficiently monitor and delineate dissolved groundwater plume monitoring wells MW-02, MW-03 and LMW-08 should sampled and, if necessary, reinstalled. An additional groundwater monitoring well should be installed south of monitoring well LMW-08. Sincerely, Alex Zhitomirsky 7-8-2015 Four USTs were removed Soil samples were collected. No VOCs or SVOCs were reported at concentrations above CP-51 SCLs. Well MW-02 was replaced with MW-2R. AZ 4-25-2016 Reviewed semi-annual monitoring report dated 09-15-2015, for the period of January 2015 through June 2015. Well LMW-08 exhibited 2,142 ppb of total VOCs in May 2015. AZ 10-25-2016 Reviewed semi-annual monitoring report for the period of July through December 2015. Four USTs were removed in July 2014. Soil samples collected didn't exceed the standards. The total VOC concentration in the four wells ranged from 17 ppb to in well MW-07 to 6,893 ppb in LMW-08 in October 2015. An increase of VOC concentrations was reported in three of the wells in the vicinity of the Q2 facility. AZ 3-17-2017 Reviewed semi-annual monitoring report dated 8-16-2016 for the period of January through June 2016. Three additional monitoring wells were installed in May

DOS QUEENS 6 GARAGE (Continued) **S103940952**

2016. Soil samples collected didn't exceed the standards. The total VOC concentration in the four wells ranged from 8 ppb to in well MW-02 to 6,379 ppb in LMW-08 in March 2016. AZ 8-11-2017 Reviewed a semi-annual monitoring report dated 2-10-2017, for the period of July through December 2016. The total VOC concentration in the four wells ranged from 19 ppb to 198 ppb in LMW-08 in September 2016. AZ 12-19-2017 Reviewed a semi-annual monitoring report dated 8-11-2017, for the period of January through June 2017. The total VOC concentrations in the three wells ranged from 58 ppb to 511 ppb (in LMW-08) in May 2017. LiRo requested a closure of this spill. However, VOC concentrations in MW-8 fluctuate and increased from September 2016 to May 2017. I have contacted S. Frank and discussed this site over the phone. It was decided to wait for another monitoring report to see the downward VOCs trend in MW-08. AZ 9-7-2018 Reviewed a semi-annual monitoring report dated 1-12-2018, for the period of July through December 2017. The total VOC concentrations in the two wells ranged from 70 ppb to 3,014 ppb (in LMW-08). Damaged monitoring well RXMW-01 will be replaced. AZ 4-23-2019 Reviewed a semi-annual monitoring report dated 8-24-2018, for the period of January 2018 through June 2018. The total VOC concentrations in the two wells ranged from ND to 1,601 ppb (in LMW-08). Damaged monitoring well RXMW-01 was replaced in February 2018. Total soil VOC concentrations were less 50,000 ppb. AZ 9-11-2019 Reviewed a semi-annual monitoring report dated 1-23-2019, for the period of July 2018 through December 2018. During this monitoring period, a significant reduction in VOC concentrations was reported for well LMW-08. LiRo stated that the depth to groundwater was reported at a lower elevation than normal during this sampling even. AZ 10-30-2019 Reviewed a semi-annual monitoring report dated 8-23-2019, for the period of January 2019 through June 2019. During this monitoring period, the highest concentration in Site wells was 114 ppb (MW-03). Recent soil data indicates reduction to below cleanup levels in areas where were historical VOC impacts. Depth to groundwater is greater than 36' below grade. VOC concentrations in downgradient monitoring wells since at least 2017 indicate the dissolved phase VOC plume is stable and not migrating. USTs removal was conducted in 2014. Free phase hasn't been present since at least 20006. SVE system operated at the site until 2007. ORC socks were installed in wells. Bioremediation via injection of Petrozyme and CBN was performed in 2009. Groundwater results were inconclusive with regards to the success of the bioremediation program. AZ 11-4-2019 LiRo proposed closing of this spill. Based on the above information, this spill is closed. The following letter email was sent to S. Frank and V. Brevdo: Dear Mr. Frank, Based on the documentation provided to date, the New York State Department of Environmental Conservation (the Department) has closed the above-referenced spill case. All monitoring wells associated with this spill case should be properly closed in accordance with the Department's guidance document, Groundwater Monitoring Well Decommissioning Procedures . The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates that corrective action was not

DOS QUEENS 6 GARAGE (Continued) **S103940952**

sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts may need to be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.go "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO 08/01/03. On August 1, 2003 at approximately 5:20 a.m. Sanitation Garage personnel discovered a spill of ~ 600 gallons of diesel fuel. The spill occurred at NYC DOS Queens 6 Garage at 52-35 58th Street, Maspeth. Initially, the incedent was reported to the Spill Hotline at 5:44 a.m. with an unknown amount spilled. At 6:40 a.m. DOS updated the spill information and reported that about 600 gallons has been spilled. Jie Zhao responded to the incident and arrived at the site at 7:30 am. The FDNY Haz-mat unit and DEP also responded to the incident. The spill was contained by sand on the paved surface of a parking lot within the garage affecting a 100'x100' area. According to DEP, the drainage basins and adjacent sewers were not affected by this release. Based on inventory records, the actual amount of diesel spilled was 528 gallons. The cause of this incident is under investigation by DOS officials. A preliminary investigation revealed that a valve on the dispenser and nozzle handle was left open. DOS has hired the contractor All State Power Vac (888-897-8733) to perform the cleanup. About 10 tons of contaminated sand should be picked up and disposed of. Frank Conroy, Director of DOS BBM is a point of contact regarding the cleanup at (718)334-9117. YK."
Remarks:	"FUEL WAS LEAKING FROM THE PUMP NOZZEL. THE SPILL HAS BEEN STOPPED AND IS BEING CONTAINED AT THIS TIME."

DEC Memo:	"10/23/2013: Emailed response to LiRo: The Department requires that groundwater wells continue to be sampled and monitored quarterly to better assess the site conditions and determine what further action is warranted. Copied to T.DeMeo and B.Falvey for related spills. eDocs. 6/6/13-Vought-Spill transferred from Vought to Maycock as per DEC John. 6/26/2013: Letter dated 6/26/2013, requesting Remedial Investigation Work Plan sent to consultant, Ryan O'Connor of LiRo Engineers, Inc. Letter uploaded to eDocs and copied to several represenatives of the NYC Department of Design and Construction - CM 8/2/2013: Rec'd letter response to DEC 6/26/2013 letter from Steve Frank of LiRo Engineers, Inc. Investigation Summary and Remedial Plan (ISRP) to be submitted to DEC in August 2013 for Spill cases 1203897, 0904484 & 1001456. (eDOCs)- CM 10/7/2013: Rec'd hard copy of Investigation Summary and Remediation Plan from LiRo on 9/17/2013. Reviewed report and uploaded version received 9/11/2013 by email to eDocs. 4/21/14 - Carlson: Sent email to Afsar Samani (SamaniA@ddc.nyc.gov) - quarterly report overdue. Received email response from Afsar Samani. Groundwater was sampled in February 2014, quarterly report to be submitted by the end of April 2014. 5/12/14 - Carlson: Reviewed Quarterly Report dated 4/25/14. Low level VOC exceedance in MW6. MW-5 was not sampled (inaccessible). Site is directly adjacent to Newtown Creek. Report proposes installation of two additional monitoring wells - MW-09 and MW-10. Report proposes well installation in accordance with procedures detailed in the December 2010 Site Specific Investigation Plan. This report is not in our files. Emailed Afsar Samani - please resubmit 2010 Plan, electronic submittal preferred. 06/03/2014 - V. Brevdo. After discussion with Liro (consultant for the DDC) at May 29, 2014 quarterly meeting, and consistent with the request from Liro (Mr. John Proios' e-mail of 6/3/14), the following is done: This spill case 1203897 is re-assigned to V. Brevdo. Duplicating spill case 0713159 (TTF) assigned to V. Brevdo is consolidated with this spill 1203897 and spill case 0713159 is administratively closed as of June 3, 2014. V. Brevdo discussed the above course of action with Sarah Carlson on June 3, 2014. Sarah Carlson had no objection against consolidating these two spill cases and re-assignment of Spill case 1203897 to V. Brevdo. V. Brevdo 08/01/2014 - V. Brevdo Liro submitted Quartelry Monitoring Report for April-June 2014. VB 08/05/2014 - V. Brevdo Spill Case Project Summary DSNY New Queens 5 Maintenance Garage, 58-05 58th Road, Queens (Spill No. 1203897) The Site is bounded by Newtown Creek and Maspeth Creek to the west and north

QUEENS 5 (Continued) **S112147904**

respectively, 58th Road to the south, and 48th Street to the east. The Site was acquired by DSNY in 1989. Tank Area #2 where this spill occurred contained several USTs (1,000-gallon hydraulic oil, 1000-gallon motor oil, 2,500-gallon gasoline, and two 4,000-gallon diesel fuel) at the northwest corner of the garage. During the 2012 UST replacement work in Tank Area #2, the tank area soil was excavated, and approximately 750 tons of contaminated soil was removed from the site. Limited residual soil contamination remains at a depth of 6.0 feet below ground surface. In August 2013, NYCDDC and their engineering consultant (LiRo) initiated a site investigation which included the installation of four monitoring wells in the area surrounding Tank Area #2. The investigation was completed in October 2012, and was summarized in the September 6, 2013 Investigation Summary and Remedial Plan (ISRP). ISRP recommended no further action for soil and additional groundwater sampling to evaluate possibility of spill closure. Groundwater sampling was conducted on October 7, 2013. On October 23, 2013, the Department required NYCDDC to conduct quarterly groundwater monitoring to better assess site conditions and to determine if further action is warranted for Tank Area #2. Quarterly groundwater monitoring was conducted from February 11, 2014 to May 30, 2014. In July 31, 2013 Quarterly Monitoring Report LiRo reiterated conclusion that based on the previously conducted excavation work and the limited extent of residual soil contamination, no further remedial action for soil is warranted. VOC concentrations in groundwater at the site vary at moderate levels (lower than 1000 ppb) with no apparent increasing or decreasing trend. LiRo recommended continuation of quarterly groundwater monitoring and installation of two new groundwater monitoring wells downgradient of Tank Area #2 to determine the extent of the groundwater dissolved phase plume closer to Newtown Creek. There was no observation of measureable free-phase product in any of the site wells. The Department concurred with LiRo s July 31, 2014 recommendations on August 5, 2014. VB 11/14/2014 - V. Brevdo LiRo submitted the November 13, 2014 Quarterly Monitoring Report Containing Recommendations/Proposals. The Department approved Recommendations/Proposals contined in the report and issued approval letter to that effect. Spill Case Project Summary: DSNY New Queens 5 Maintenance Garage, 58-05 58th Road, Queens (Spill No. 1203897) The Site is bounded by Newtown Creek and Maspeth Creek to the west and north respectively, 58th Road to the south, and 48th Street to the east. The Site was acquired by DSNY in 1989. Tank Area #2 where this spill occurred contained several USTs (1,000-gallon hydraulic oil, 1000-gallon motor oil, 2,500-gallon gasoline, and two 4,000-gallon diesel fuel) at the northwest corner of the garage. During the 2012 UST replacement work in Tank Area #2, the tank area soil was excavated, and approximately 750 tons of contaminated soil was removed from the site. Limited residual soil contamination remains at a depth of 6.0 feet below ground surface. In August 2012, NYCDDC and their engineering consultant (LiRo) initiated a site investigation which included the installation of four monitoring wells in the area surrounding Tank Area #2. The investigation was completed in October 2012, and was summarized in the September 6, 2013 Investigation Summary and Remedial Plan (ISRP). ISRP recommended no further action for soil and additional groundwater sampling to evaluate possibility of spill closure. Groundwater sampling was conducted on October 7, 2013. On October 23, 2013, the Department required NYCDDC to conduct quarterly groundwater monitoring to better assess site conditions and

QUEENS 5 (Continued) **S112147904**

to determine if further action is warranted for Tank Area #2. Quarterly groundwater monitoring was conducted from February 11, 2014 to September 5, 2014. On November 13, 2014, Liro submitted Quarterly Monitoring Report for the period from July 2014 to September 2014. In the November 13, 2014 Quarterly Monitoring Report LiRo reiterated conclusion that based on the previously conducted excavation work and the limited extent of residual soil contamination, no further remedial action for soil is warranted. VOC concentrations in groundwater at the site vary at moderate levels (between 100 ppb to 1,350 ppb) with no apparent increasing or decreasing trend. LiRo recommended no further action (NFA) for soil at the Site and monitored natural attenuation (MNA) for a period of one (1) year, as the groundwater remedial alternative at the Site. Should groundwater VOCs continue showing downward trend after one year of MNA, LiRo will petition the Department for closure of this spill case. Should groundwater VOCs show increasing trend after one year of MNA, LiRo will evaluate and propose active (i.e. groundwater pump and treat) or in-situ (i.e. in-situ chemical oxidation) remedial alternative. The Department approved LiRo s recommendations / proposals on November 14, 2014. V.B. 03/17/2015 - V. Brevdo Current Project Status and Spill Case Closure Decision. DSNY New Queens 5 Maintenance Garage, 58-05 58th Road, Queens (Spill No. 1203897) The Site is bounded by Newtown Creek and Maspeth Creek to the west and north respectively, 58th Road to the south, and 48th Street to the east. The Site was acquired by DSNY in 1989. Tank Area #2 where this spill occurred contained several USTs (1,000-gallon hydraulic oil, 1000-gallon motor oil, 2,500-gallon gasoline, and two 4,000-gallon diesel fuel) at the northwest corner of the garage. During the 2012 UST replacement work in Tank Area #2, the tank area soil was excavated, and approximately 750 tons of contaminated soil was removed from the site. Limited residual soil contamination remains at a depth of 6.0 feet below ground surface. In August 2012, NYCDDC and their engineering consultant (LiRo) initiated a site investigation which included the installation of four monitoring wells in the area surrounding Tank Area #2. The investigation was completed in October 2012, and was summarized in the September 6, 2013 Investigation Summary and Remedial Plan (ISRP). ISRP recommended no further action for soil and additional groundwater sampling to evaluate possibility of spill closure. Groundwater sampling was conducted on October 7, 2013. On October 23, 2013, the Department required NYCDDC to conduct quarterly groundwater monitoring to better assess site conditions and to determine if further action is warranted for Tank Area #2. Quarterly groundwater monitoring was conducted from February 2014 to November 2014. On March 13, 2015, LiRo submitted Quarterly Monitoring Report for the period from October 2014 to December 2014. In the March 13, 2015 Quarterly Monitoring Report LiRo reiterated conclusion that based on the previously conducted excavation work and the limited extent of residual soil contamination, no further remedial action for soil is warranted. VOC concentrations in the groundwater at the site have shown declining trend from moderate levels in February 2014 (between 100 ppb to 1,350 ppb) to low levels (between Non-Detect to 24 ppb) in November 2014. SVOCS have declined to Non-Detect levels. Based on the analysis and conclusions contained in the March 13, 2015 report, LiRo recommended closure of this spill case. The Department concurs with Liro s analysis and recommendations, and closed spill case on March 17, 2015. VB"

Remarks: "tank pulls/loss of product"

Date Last Modified: 2015-11-18

Tank Info:

Tank Number: 001
Tank ID: 60354
Tank Status: Closed - Removed
Material Name: Closed - Removed
Capacity Gallons: 2500
Install Date: 01/02/1990
Date Tank Closed: 05/31/2012
Registered: True
Tank Location: Underground
Tank Type: Equivalent technology
Material Code: 0009
Common Name of Substance: Gasoline

Tightness Test Method: 21
Date Test: 03/30/2001
Next Test Date: Not reported
Pipe Model: Not reported
Modified By: NRLOMBAR
Last Modified: 04/14/2017

Equipment Records:

A00 - Tank Internal Protection - None
L08 - Piping Leak Detection - Tank Top Sump
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
F04 - Pipe External Protection - Fiberglass
C03 - Pipe Location - Aboveground/Underground Combination
E04 - Piping Secondary Containment - Double walled UG
J01 - Dispenser - Pressurized Dispenser
D06 - Pipe Type - Fiberglass Reinforced Plastic (FRP)
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
B04 - Tank External Protection - Fiberglass
H05 - Tank Leak Detection - In-Tank System (ATG)
G04 - Tank Secondary Containment - Double-Walled (Underground)

Tank Number: 001A
Tank ID: 245123
Tank Status: In Service
Material Name: In Service
Capacity Gallons: 2500
Install Date: 06/06/2012
Date Tank Closed: Not reported
Registered: True
Tank Location: Underground
Tank Type: Equivalent technology
Material Code: 2712
Common Name of Substance: Gasoline/Ethanol

Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL C 03/26/04. Transferred from Sacaccio to Rommel. Followup phone call made on 11/23/05 by Will Welling to Edward Ramowski, Temo sales. Awaiting reply. 11/28/2005 Call made by Will Welling to Marietta Teitler. Ms. Tietler had made the initial call in to DEC. She said that a trucker backing up to their loading dock missed and ruptured a fuel tank. She called in the spill because otherwise the trucker was just going to leave. The spill was on the road. A response was made, the spill was cleaned up, she said. I told her I would close the file."

DEC Memo:	"12/23/04 Tipple updating//all prior notes lost in database// Tipple has conducted two site visits, the last of which was 12/22 PM. There had been a machinery problem in the recycling facility which required the excavation of a large area of the floor. Tipple met with Joel Adrian of the Jacques Whitford company to conduct a visual/ olfactory inspection of the excavation. The excavation was approximately 20-25' long by 10-12' wide and extended about 6 foot below the floor surface. The excavation revealed no visual, olfactory /PID evidence of petroleum products, what the excavation did reveal was broken brick, some concrete, glass and what I observed to be clean brown soil. Jacques Whitford will grab one sample from this excavation and advance two geoprobe borings to groundwater and collect samples from the soil/water interface. The results of the three above described samples will be used to determine weather any additional actions will be required. 12/29/04 tipple delivering a STIP and CAP to the site while the two additional borings are being advanced. Upon arrival at the site, the Rig was too large to maneuver through the available space, the additional borings have been tentatively rescheduled for next Tuesday Jan. 4, 05 1/31/05 reviewed submission, discussed with DEC Attorney Nehila, Oliva & Nehila ok with closing if data is ok. Data has some SVOC exceedances which can be associated with the broken asphalt pieces in the urban fill material which I witnessed in the excavation. NFA letter written including a caveat which reads if excavation is to proceed, a health and safety plan must be followed. "
	Not reported
Remarks:	"11/18/04 site mtg. with contractor, purchaser, and agent. Discussed the future actions necessary to attain a NFA."

DEC Memo:	"ttf sent to: Al Mignone Dept of Sanitation Bureau of Bldg Maintenance. 52-35 58th St. Woodside 11377 7/29/09 Yesterday, there was a PBS inspection at this site. Tank was repaired and retested. Tank passed tightness test. Repair made at tank top. No sign of a product release. Al Mignone of DSNY will provide documentation to DEC on Tuesday for closure of the spill. bf 08/10/09. According to DSNY (see eDocs) removal of the failed tank (#10) and if necessary remediation is currently scheduled for the first quarter of 2010. JK. 2/17/10 Received e-mail from V. Aromsombatee with attached letter stating that due to snow emergencies, tank will be removed in April 2010. Letter is in e-docs. bf 01/07/11 - LZ The report (edocs) indicates that the tank was remowed and the soil sample taken below the bottom of the tank shows no contamainted soila above 375-6.(8) - unrestrictive use. The spill case is closed. "
Remarks:	"1458 The caller stated the system test failed. NYC Sanitation will be conducting the fixing of teh equipment. 1601 DISPATCH RECEIVED A CALL FROM MICHAEL SEPPE ADVISING OF AN ADDITIONAL TANK TEST FAILURE. THE LOCAITON IS THE SAME SITE. THE CALLER IS REQUESTING A CALL BACK

DEC Memo:	"2/9/06, Dyber: Received letter from GZA asking for extension for Remedial action Plan (RAP) submission. Remedial Action Plan is expected by April 14. Next Step: Review Remedial Action Plan when it arrives. 12/20/05, Dyber: Left message for Maria Ramirez of GZA about status of RI Report 10/25-10/26/05, Dyber: Kerry Maloney oversaw sampling at site. 8/24/05, Dyber: Approved remedial investigation work plan. 8/11/05, Dyber: Ben Alter told me that he would email the work plan to me by tomorrow. 7/22/05, Dyber: Ben Alter has not received authorization from client. He will call client today and call me when he has authorization. 6/28/05: Ben Alter promised a work plan to investigate soil and groundwater contamination by 7/22/05. 6/21/05: Spoke with Ben Alter of GZA (973) 256-7800. Told him that we need evidence that tank was removed and soil contamination was cleaned up. Also told him we will need more groundwater investigation. He will call me on 6/28/05 after speaking with client. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel. Spill transferred back to Region 2 3/10/08 - Austin - Spill assigned to Ahmed for followup - end 10/27/11 - Austin - Transferring

ABF FREIGHT SYSTEM INC (Continued) **S102147083**

this case from Ahmed to Zhune - end 10/23/13-Zhune visited the site met Matt Kuczonski (Branch Manager). He took me to the back and showed me the location of a gas station that was closed in 1995. He also showed me the location of a aboveground heating oil tank that supply with heat the shaft. He said the building use gas as a heating system. He will seach for closure report. 10/28/13-Zhune called Benjamin Alter from GZA. He said next week he will send the Remedial Action Work Plan. 01/12/14- Zhune sent an email to Benjamin resquesting the 2000 report (installation of the three wells), the 2005 report. and the appendixes for the 2006 report. 8/5/14-Zhune reviewed the reports and sent a letter requesting the following. 1.-Collection of new round of groundwater samples and determination of groundwater flow direction. 2/12/16- Benjamin emailed the Site Investigatio Report dated April 13, 2000 The report stated that on December-1996 Enviro- Logical Solutions , Inc. supervised the removal of ten diesel containing underground tanks (USTs) from the site. Enviro- Logical Solutions noted evidence of petroleum release and notified NYSDEC. In a letter dated January 27, 2000 NYSDEC required that three monitoring wells be installed to investigate for soil and groundwater at the site. On February 28, 2000, Aquifer Drilling and testing installed three soil borings (MW-1, MW-2, MW-3)in the vicinity of the former UST excavation to depth of approximately 12 to 13 feet bgs and completed them as monitoring wells. The soil analytical results indicated detected SVOCs in the soil samples collected which are consistent with the presence of historic fill in this area. The soil sample from MW-3 was the only sample to contain detectable concentrations of VOCs slightly in excess of the NYSDEC CP-51 guidance. The groundwater from monitoring well MW-3 contains the highest concentration of MTBE, elevated concentrations of total BTEX compounds, and is downgradient of the Gaseteria property but cross-gradient of the former UST excavation. Groundwater from well MW-2 detected elevated levels of BTEX. 2/12/16- Benjamin sent the Remedial Investigation Report dated December 2005. On August 12, 2005, GZA submitted the Remedial Investigation Workplan (RIW) to comply with the additional requirements listed in NYSDEC letter dated August 15, 2005. The RIW was revised on August 19, 1005 and approved by NYSDEC on August 24, 2005. The subsurface investigation was to complete the delineation of the soil and the groundwater contamination documented in GZA’s Site Investigation Report (SIR) dated April 13, 2000 and to address additional sampling activity requirements indicated by Mr. Jeffrey Dyber, NYSDEC Case manager. GZA completed the following activities in accordance with the revised RIW 1. Inspect the conditions of the three existing wells 2. Install thirteen additional soil borings 3. Complete six of the borings as permanent monitoring wells. Two of these wells replaced MW2-and MW-3 since they could not be located despite several attempts by GZA and ABF personnel to find them. 4. Collect soil samples for laboratory analysis at 6 inch discrete intervals; 5. Collect groundwater samples for laboratory analysis from six newly installed wells and one pre existing (MW-1); 6. Complete a relative survey of all wells to determine groundwater elevations and flow direction; 7 Prepare a RIR for NYSDEC submittal. The soil analytical data indicated that VOC contaminated soils were present in the southern portion of the tank excavation, There was a slight exceedance of benzene in the soil sample collected in the southwest boundary of the site. SVOCs were consistently found in most of the soil borings to approximately 9.00 feet bgs. Groundwater monitoring well MW-3R installed at the southern

ABF FREIGHT SYSTEM INC (Continued) **S102147083**

end of the former UST excavation, contained the highest concentrations of BTEX compound observed at the site with some of the heavier VOC concentration above regulatory standards. The concentrations of target VOC compounds appear to decrease to the north and northeast and the south and east of the former UST excavation. 2/12/16- Benjamin Alter sent the Remedial Investigation Report dated December 2006 A January 2006 letter from NYSDEC requested that a RAWP be prepared to address the remediation of the on -Site contamination. In response to this letter, GZA conducted a feasibility study to obtain additional soil and groundwater information for the design of a remedial action work plan. Based on the results of the feseability study, GZA prepared a RAWP. In this report, GZA completed the following activities : 1. File review of the former Gaseteria facility, the adjacent property to the west ; 2. Install three shalloew soil borings to the top of the water table to delineate VOC and SVOC contamination in the site soil 3. Complete one boring as a permanent monitoring well and two borings as temporary monitoring wells; 4. Install one shallow boring in the former tank excavation to characteriza the impacted fill; 5. Install one deep soil boring to obtain a vertical profile of the soil and locate a competent confining layer; and 6. Collect groundwater samples for laboratory analysis from four permanent groundwater monitoring wells and two temporary wells. The feseability study detected high levels of metals in the soil and groundwater, which would affect the in situ remediation technologies that were under the consideration for the site. Based on this findings, GZA does not recommend in situ remediation, but recommends physical removal of the impacted soil and groundwater as the optimal remedial action for the site. During the soil excavation, groundwater and the free product will be pumped out of the excavation area. The excavation area will be backfilled to grade and covered with asphalt. After the soil is backfilled, groundwater monitoring wells will be installed in the remediation area and the groundwater will be monitored. Basedonthe evidence described in section #3. GZA reiterates its recommendation that the state designate the contamination detected on the portion of the site south of monitoring wells MW-5 and MW-7 as background contamination, and hold Ditmas oil responsible for its remediation. With the state’s approval, ABF will remediate the impacted soils and groundwater to the north of these well points. 8/7/15-Benjamin sent the following email The purpose of this email is to document GZA s observations at the above-referenced Site. In a telephone conversation with you and Jeffrey Vought of DEC, it was agreed that groundwater samples should be collected from all existing on-site monitoring wells. If there was no order-of-magnitude increase in the concentrations of one or more compounds in any monitoring wells, then DEC would close the spill case. GZA visited the Site on July 22. The area had recently been repaved, and no wells could be found. GZA returned to the Site a couple of days later and used a hand-held magnetometer in an attempt to locate the wells. We believe that we located MW-5, MW-6, and MW-7 (see attached map). Please let me know if accessing these wells would be sufficient to comply with DEC s directives. 8/10/15-Zhune sent the following email to Benjamin, I discussed your email dated August 2, 1015 with my supervisor for the above site. Based on the submitted documentation to date, accessing MW-5, MW-6 and MW-7 would be sufficient to comply with the Department directions."

Remarks: "UNDER GROUND TANK WITH UNKNOWN PROBLEM WAS DISCOVERED THIS DATE SHOWING SOIL CONTAMINATION-TANK TO BE REMOVED AND SITE INVESTIGATION

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 10/7/03 1700 Hrs - Sawyer - Responded to the site. Met FDNY on their way out and talked to FF Carbone as well as the owner Mr. Stephen Duffy. He explained that the FDNY had traced the smell all the way up to the roof before they lost PID reading. I was thoroughly through the warehouse and could not find the source. The smell was strongest in a catch basin and the bathroom. It may have been a loose cap or pipe. NYCDEP's Celeste Okoli showed up near the end of my visit and I thought he was going to request an industrial waste audit on the sewers in the area. He did not. 10/8/03 1000 Hrs - Sawyer - The owner Mr. Duffy called metoday to say that his neighbor's bathroom was now being impacted and was saturated with the smell. I went back to the site and waited 1 hour for Andy Kelly to show and PID meter the same catch basin. I think DEP will handle the situation from here on. Closed. "
Remarks:	"unknown fumes coming from building. request call back"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Install Date: 12/01/1988
Date Tank Closed: Not reported
Registered: True
Tank Location: Underground
Tank Type: Equivalent technology
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Pipe Model: Not reported
Modified By: TRANSLAT
Last Modified: 04/14/2017

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)
D06 - Pipe Type - Fiberglass Reinforced Plastic (FRP)
L09 - Piping Leak Detection - Exempt Suction Piping
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
H99 - Tank Leak Detection - Other

DEC Memo:	"7/30/10 - Raphael Ketani. Advanced Tank Service (Jeff McKenzie - (800) 440-8265) did a tank system test. The system failed and the spill was called in today. The subject UST is 1,000 gal. and contains #2 oil. It was installed on 12/1/88. The site is Roadway Express Inc., 1313 Grand Street, Brooklyn. The local contact is Marc Shirley (212) 292-2210. There are two PBS cases, #2-157724 and 32-043826. The #2-157724 case shows 17 tanks that were all closed prior to March 1991. The #2-043826 case shows 21 tanks. Most of the tanks had diesel or gasoline. One 1,000 gal. tank has #2 oil. Sixteen tanks were closed prior to March 1991. Four tanks were closed and removed on 9/1/88. The one active tank is the 1,000 gal. UST. Mail goes to Roadway Express Inc., 1077 Gorge Blvd., Akron, OH, 44310, attn: Phyllis Tainish - Dept. A-20, (330) 258-2475. The owner is Roadway Express, 1077 Gorge Blvd., Akron, OH, 44309, (216) 384-1717, local number (718) 821-5410 - Jack Leslie T.M. A TTF letter was sent to the mailing address. 8/27/10 Received 2 voicemail messages from Jeff

YRC BROOKLYN (187) (Continued) **1004756458**

Lawson, consultant from Cleveland, OH. Phone: (440)268-0333. He requested more time to respond to ttf letter. I was not aware of this spill case until yesterday. This is a non-regulated site since the tank stores less than 1000 gallons of heating oil. He requested more time to respond to the ttf letter and he believed the site was unregulated. I called him today at approximately 3:15 PM and left a message allowing more time for a response; stating that based on the info in DEC database the site is unregulated, but the spill must be addressed as per NL; and that he should call me this afternoon or next week so we can discuss the case. bf 9/20/10 Found letter dated 8/27/10 on my desk. It was received by DEC on 9/3/10. The letter asks the questions that were answeered in the voicemail on 8/27/10. Letter is in e-docs. bf 1/19/11 Received voicemail from PBS Voicemail at 9:46 from Jeff Lawson. Phone:(440)268-0333. He stated that they are ready to close the tank and would like to discuss. I returned call at approx. 1:30 PM and left a message to call me. bf 1/26/11 Spoke to Mike Ruffoni of Reliance Environmental (717)735-9508. Explained that he needs to address ttf. They are still not sdure why tank failed. Tank removal is planned. bf 2/22/13-Vought-This spill transferred from Falvey to Vought as Vought performing comprehensive file and site review in relation to reviewing results for above tank excavation and removal as well as all former tanks on property. This spill closed and referred to open Spill 0910021 at same site.''

Remarks: "cleanup pending - sub contractor reporting"

DEC Memo:	"Phase 2 being done for a property transfer. Two groundwater samples slightly over limits for Benzene. Property Owner is: North American Terminals Management Inc. Attn: Miss Coleman Natmi Truck Terminals LLC c/o LaSalle Investment Management Inc. 100 East Pratt St.20th Flr Baltimore, Maryland 21202 No CSL letter was sent out, because Mr. Kearns said a full Phase 2 report was completed and he believes NYSDEC may just close the case out with the minor benzene numbers. Sangesland asked Mr. Kearns to submit the report to Hasan Ahmed and wait for further direction from the DEC for either closure or additional work. 02/24/10-HRAHMED-Deric Kearns (267 685 1800) called to get an update. Ask him to send me an electronic version of the report. 10/27/11 - Austin - Spill Transferred from Ahmed to Vought - end 7/31/12-Vought-Received call from and spoke to Mathew Sabbetta (Arcadis Ph:267-685-1800x1803). Contact is Robert Zimmermann (Arcadis Ph:330-434-1995). Site has a 1000-gallon #2 fuel tank that was noted in 2/11. Approximately fifteen soil borings were performed and one monitoring well was installed. 8/30/12-Vought-Reviewed July 2011 Subsurface Investigation Report and UST Investigation Report received via email on 7/31/12 from Matt Sabbetta. Complete file review by Vought: Vought reviewed Spills and PBS Database: PBS #2-043826 (expired 12/01): One 1000-gallon #2 fuel oil UST in service; one 2000-gallon diesel UST closed in 1998; two 4000-gallon diesel USTs closed in 1998; one 500-gallon gasoline UST closed in 1998; eight

YRC BROOKLYN (187) (Continued) **1004756458**

550-gallon gasoline USTs and eight 550-gallon diesel USTs in service. PBS #2-157724(expired 10/92): Seventeen 550-gallon diesel USTs in service. SPILL 8708981: 1000-gallon UST system failed hydrostatic test and product to be removed and tank replaced as per caller remarks. No spill notes and no reports in e-docs. Spill closed 10/7/92. SPILL 9808077: As per DEC Remarks, Tank Closure Report from APEX shows that site has been adequetely cleaned after the removal of fuel, diesel, and waste oil USTs. Approx 300 tons of soil was disposed of properly and the excavations were all backfilled with certified clean fill. A NFA letter was sent to Phyllis Tainish - the representative of Roadway Express Inc., at 1077 Gorge Blvd in Akron, OH 44310. This spill case closed on 9/12/07. (JS/MS) Vought noted no report in edocs and no file able to be located in historical file room. SPILL 0103983: Caller Remarks noted that CRACK IN FUEL LINE CAUSED SPILL - SPEEDY DRY CONTAINED SPILL AND CLEAN UP IN PROGRESS . Spill closed on 7/28/01 and DEC remarks spill was all cleaned up . No reports in e-docs. SPILL 1004888: Tank Test failure of a 1000-gallon fuel oil UST and still spill open. No files in e-docs. SPILL 1130727: Spill report of contaminated soil. E-docs had Underground Storage Tank Closure report submitted by Reliance Environmental dated 3/28/11. Spill closed on 11/30/11. Removal of one 1000-gallon UST containing #2 fuel oil. Tank was out of service since 11/09 and was used as part of the maintenance garage heating system. UST was in concrete vault and 50-gallons of sludge and waste was removed from UST and tank and associated piping was removed from the ground. No holes or voids observed in tank and tank appeared to be in good condition . Groundwater was encountered at an initial depth of 5 feet below ground surface within the tank grave and was observed to contain a petroleum hydrocarbon layer . Elevated PID readings and staining in soils in northeastern sidewall of excavation at approximately 4.5’bg. Final excavation was 15’ x 12’ x 6’. No soil samples collected from base of excavation as they were below soil water interface. Photo in report shows recovery from water table in excavation. Soil analyticals show PAH exceedences attributable to fill. Spill closed by DEC Piper on 11/30/11 as no CP-51 Unrestricted Use exceedences for VOCs. 9/17/12-Vought-Continued File Review by Vought. Vought spoke with DEC Falvey (project manager of open TTF spill 1004888 and noted that UST that was subject of TTF in 1004888 was removed as subject of closed spill spill 1130727. Falvey agreed that spill 1004888 could be closed and that no PBS update was needed to reflect closure of 1000-gallon #2 fuel oil UST since all other tanks were administratively closed and the site falls currently under the 1100-gallon PBS registration requirement. July 2011 Subsurface Investigation Report (Arcadis)-4/25/12. Sampling done without written instruction from DEC as numerous requests submitted to DEC project manager Hasan Ahmed with out a response. Groundwater sampling done following discussion with DEC Ahmed and RSE in 6/10. DEC required soil and groundwater sample be taken across various locations onsite however DEC did not send letter formalizing requirements. Soil borings from previous investigations also included in report. Phase I and Phase II completed in 2009 and showed elevated SVOCs, metals in soil and 43ppb benzene in groundwater. In 2009 soil temporary wells were installed and subsequently abandoned. Maximum benzene concentrations in groundwater of 17ppb and spill 0910021 was reported. A Groundwater Investigation Report was submitted to DEC on 12/21/09. DEC Ahmed during a follow up conversation requested borings locations be placed around various former USTs, near a GPR anomoly

YRC BROOKLYN (187) (Continued) **1004756458**

and in the central asphalt lot. Soil analyticals showed no CP51 SCO exceedences and groundwater analyticals showed 57ppb napthalene(SW5). Report concludes that additional investigation is not warranted. Vought spoke to DEC Ahmed who forwarded email for 12/21/09 report however due to large file size, a separate CD would have to be sent from Arcadis. Former 1000 Gallon Underground Storage Tank (UST) Investigation (Arcadis)-4/25/12. Seven soil borings installed around 1000-gallon gasoline UST including collection of seven groundwater samples. No soil samples were above Part 375 Unrestricted SCOs excluding elevated PAHs which can be attributed to fill material. Groundwater samples also showed no TOGs exceedences. 9/17/12-Vought-Called and left message for Arcadis (Zimmerman) to send in Groundwater Investigation Report dated 10/23/09 via CD and Tank Closure Report for spill 9808077. Vought reviewed abbreviated Phase II Groundwater Investigation Report received from email from DEC Ahmed. Vought added Abbreviated Phase II to e-docs. Additional groundwater samples collected in August 2009 around the existing and former USTs. Cover Letter dated 12/21/09 for Report notes that either Newtown Creek or historic fill is source of dissolved phase benzene observed in site groundwater . Seven borings installed via Geoprobe and four of these were installed to assess downgradient locations of potential sources areas . Maximum concentrations of 17ppb benzene were noted. Report notes that there is not ample background information available at this time to determine potential sources . 9/18/12-Vought-Called Deric Kearns and left message to return call and that DEC needed copy of 1998 Tank Closure Report. Vought also sent email to Kearns with DEC requirements including submission of USTs and piping on site plans for both PBS Registrations, Submission of Tank Closure Report for closed spill 9808077 or possible investigation around USTs and piping as no leak detection and no tightness testing data in PBS Registration, closure of open spill 104888 at same site and referral to open spill 1103727, Submission of complete Groundwater Investigation Report dated 12/21/09. Vought received email from Kearns that We received your email and voicemail messages, thanks for laying these items out for us. We have begun to review our historic files and are actively trying to track down these items. I will contact you directly if we have any questions. 12/12/12-Vought-Received call from contact (Claudio) who is working for potential purchaser (Tony Argento) who is wishing to purchase property for use of production films. Contact for Claudio is Ph:917-939-8034 email:claudio@broadway-stages.com). Vought forwarded 9/18/12 email string to Kearns to Claudio with cc to Kearns. 2/12/13-Vought-Received call from and spoke to Ruben Byerley (YRC Freight Ph:913-344-3644 email:ruben.byerley@yrcfreight.com) and he is manager of environmental services for the corporate owner and operator. He was requesting file review and Vought told him to return call to Vought in one week for update. 2/20/13-Vought-File review by Vought. Vought received two CDs dated 12/13/12 that contained the following files: APEX UST Closure Report(9/20/99) ARCADIS Subsurface Investigation (4/25/12)-reviewed by Vought above ARCADIS UST Investigation and Closure Report(4/25/12)-reviewed by Vought above ARCADIS Groundwater Investigation(10/23/99) ATC Phase I ESA (4/27/09) ATC Phase II ESA (4/27/09) Misc. Documents Relating to Former 3000-Gallon UST (1988) Document Review by Vought of above documents: Misc. Documents Relating to Former 3000-Gallon UST-1988. Proposal to replace 1000-gallon heating oil tank with all associated piping into the garage furnace and fill and abandon second tank near office with

YRC BROOKLYN (187) (Continued) **1004756458**

concrete slurry. Contamination was minimal because leak was caught almost immediately . 1000-gallon UST was replaced and 3000-gallon UST by office was filled with concrete. UST Closure Report (APEX Environmental)-9/20/99. One 2000-gallon, two (4000-gallon) and one 500 gallon UST were removed on 9/29/98. Diesel fuel used for refueling tractor trailers. English Kills/Maspeth Creek to the north and east and commercial properties to the south and west of site. Facility has two story office building with a large connecting loading dock. Product dispenser was dismantled and product was removed from the USTs. Tanks were reported to be in good condition with minor pitting and no holes. Soil excavation at diesel USTs was 28'x36'x10'deep and seven endpoint samples collected. Used motor oil UST excavation in garage was 12'x6' and five endpoint samples were collected. 171 tons of soil were removed from the site. Soil endpoint analyticals for alll three tanks were non-detect for VOCs. Report recommends No Further Action. Phase I Environmental Site Assesssment (ATC)-4/27/09. Report notes that YRC Logistics is at site and report prepared for NATMI Trucking Terminals, LLC. Property was occupied by a saw mill and lumber yard before trucking terminal and maintenance facility was built onsite in 1959. Fill port and vent pipe noted adjacent to western exterior wall of the property's office building. Scrap metal facility is potentially upgradient of site. Report recommends performance of a Phase II investigation. Property currently used as a cross-dock truck terminal by YRC Logistics and a truck maintenance facility is on the northern portion of the property. Phase II Environmental Site Assessment (ATC)-4/27/09. Phase II included a GPR survey and subsuface investigation. GPR found a 6-foot by 6-foot anamoly approximately two feet below grade in the area of the observed fill port and vent pipe on the southwestern portion of the property . Five Geoprobe borings installed to a maximum depth of 15'bg. Groundwater at 15'bg. Peat found at 6-10'bg in some borings and groundwater is from 5-8'bg. No petroleum related VOCs in soil and groundwater samples noted 43ppb benzene in sample B1. ATC recommends additional investigation to see if GPR anamoly is a UST and installation of monitoring wells to delineate bezene contamination in groundwater. Groundwater Investigation Report (ARCADIS)-10/23/09. Additional investigation by ARCADIS upon review of Phase II by ATC dated 4/27/09. Metals and PAHs in soils were indicative of historic fills and were not observed in groundwater. Purpose of investigation was to confirm 43pp benzene in B1 groundwater sample in ATC Phase II. Seven borings installed via Geoprobe. Groundwater analyticals show: 1.6ppb benzene (TW5) and 17ppb benzene(TW7). Groundwater samples analyzed for 8260/8270 analyses. Groundwater sample collected at B1 of ATC Phase II was non-detect for benzene. Possible sources of benzene include historic fill materials beneath the site and the close proximity of the sample locations to the heavily polluted Newtown Creek . Report recommends submission to DEC. 2/22/13-Vought-After completion of file review by Vought, spill closed due to minor benzene only detections in groundwater possibly attributable to historic fill and or contaminant contribution fron adjacent Newtown Creek or English Kills. Area also heavy industrialized for past 100 years. Groundwater benzene concentrations are within natural attenuation parameters and likley oxidizing conditions in soil necessary for promotion of aerobic degradation. Vought called YRC Byerly for address of spill closure letter for this spill and Spill 1004888 for same site and 1000-gallon UST TTF (removal discussed above). Received email from YRC Byerly

YRC BROOKLYN (187) (Continued) **1004756458**

that mailing address for Spill Closure Letter is: YRC Freight Attn: Ruben Byerley (MS-A650) 10990 Roe Ave. Overland Park, KS 66211 Vought sent out Closure Letter to Byerly via mail and email with cc to ARCADIS Kearns. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN TANK REMOVAL. SOIL AROUND FILL CONTAMINATED, STOCKPILED. SAMPLES TAKEN. SOIL SAMPLES SHOWED HIGH SEMI-VOLS. TCLP DONE ON SAMPLES 11/3/03 - AUSTIN - REVIEW OF PBS FOR SITE FOUND ALL TANKS

YRC BROOKLYN (187) (Continued) **1004756458**

CLOSED OUT - CLOSURE REPORT IN UNASSIGNED SPILLS FILE - REASSIGN THIS REPORT AS PART OF PROJECT TRANSFERS BETWEEN SECTIONS - END 06/16/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang. 10/30/06 Reassigned from Tang to Sun. (MS) 8/6/07: Tank Closure Report re-located. Performed by Apex Environmental in February 1999. Reviewing for possible closure. (JS/MS) 9/11/07: All VOC was non-detect, SVOC was above but re-submited for TCLP and was below. (JS/MS) 9/12/07: TCR from APEX shows that site has been adequetely cleaned after the removal of fuel, diesel, and waste oil USTs. Approx 300 tons of soil was disposed of properly and the excavations were all backfilled with certified clean fill. A NFA letter was sent to Phyllis Tainish - the representative of Roadway Express Inc., at 1077 Gorge Blvd in Akron, OH 44310. This spill case closed on 9/12/07. (JS/MS)"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE See also 98-03753. 08/10/04 - NYCT performed a Remedial Investigation of the two 550 USTs and the former Avis USTs. An area of soil and groundwater contamination was identified. The RI recommeded soil excavation and ORC for the dissolved. RI was approved and a Remedial Plan/Design is forthcoming. 06/23/05: Remediation onsite performed and completed. It consisted of excavation and ORC application. The offsite, Ambrosino Property, was investigated. Minimal soil VOC's and groundwater VOC's and SVOC's. High soil SVOC's indiciative of urban fill material both on and off site. "
Remarks:	"CONTRACTORS EXCAVATING AND THEY DIDNT REALIZE A TANK WAS THERE, DID NOT REACH WATER"

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D035

NYCT GRAND AVENUE BUS FACILITY (Continued) **1000708504**

Waste Description: METHYL ETHYL KETONE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 4 gallons of hydraulic fluid leaked from a pile driver. Oil sprayed to soil. Absorbants initially used to soak up oil. Soil was eventally excavated and stockpiled (4.5 cuyds). Endpoint samples taken which showed minimul contamination mostly associated with exisiting fill. Stock piled soil will be disposed of with excavated soil from the remediation of spill # 04-02830. "
Remarks: "BROKEN LINE ON A PILE DRIVER: IN PROCESS OF CLEANING UP: "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill was transferred from DEC Sigona to Rommel on 2/2/04. Spill closed due to lack of significant residual contamination. 10/10/95: This is additional information about material spilled from the translation of the old spill file: CONTAM. SOIL-8 TANKS. 12/18/95 - SUMMARY OF INVESTIGATION. DEC RECEIVED INFORMATION FROM NEW PENN MOTOR RELATED TO REMEDIATION OF THE FORMER PBS FACILITY. ON NOVEMBER 6, 1995 DEC RECEIVED REQUESTED CLOSURE REPORT DOCUMENTING THE REMOVAL OF GASOLINE AND DIESEL TANKS AT THE SITE. I NOTICED THAT INTERNATIONAL TECHNOLOGY CORP (ITC) PERFORMED A SITE ASSESSMENT OF THE PROPERTY IN JULY 1989. ON NOVEMBER 21, 1995, DEC RECEIVED COPY OF RISK ASSESSMENT DATA RELATED TO HAZ WASTE FOR

NEW PENN MOTOR EXPRESS INC (Continued) **S104495352**

ALUMINUM. ON DECEMBER 18, 1995, DEC FAXED AND MAILED LETTER TO TIM HOFFMAN AFTER NOT HAVING TURNOVER OF MY PHONE CALLS PLACED OVER LAST FEW WEEKS TO REQUEST COPY OF THE ITC SITE ASSESSMENT. THE SITE ASSESSMENT IS KEY TO UNDERSTANDING THE LEVEL AND EXTENT OF PETROLEUM CONTAMINATION PRESENT PRIOR TO INITIATING THE TANK REMOVAL."

Remarks: "WILL SAMPLE STOCK PILING- 4 TANKS SETS & 4 TANK SETS -200YDS APART."

Tank Info:

Tank Number:	01
Tank ID:	48697
Tank Status:	Closed - In Place
Material Name:	Closed - In Place
Capacity Gallons:	10000
Install Date:	Not reported
Date Tank Closed:	10/01/1994
Registered:	True
Tank Location:	Underground
Tank Type:	Steel/carbon steel
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Pipe Model:	Not reported
