RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, loading trucks with concrete debris for off-site disposal, and underground storage tank (UST) removal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A2, A3, A4, E2, and F1.

Aarco Environmental Services Corp. removed a total of five, approximately 500-gallon fuel USTs at grids A2, A3, and E2. Three of the USTs were anticipated from the remedial investigation and two of the USTs were newly encountered. Tank contents were pumped out, and the USTs were removed and cleaned. Petroleum, sludge and water generated during tank cleaning were transported off-site for disposal. The USTs were cut and disposed off-site as scrap metal. Two additional tanks associated with hydraulic lifts currently remain on-site and are scheduled to be removed next week.

Four truckloads of concrete debris were disposed off-site at Inwood Material Terminal LLC. No material was imported.

**C) Sampling Events**

The following tank endpoint samples were collected:

| Grid | Sample |
|---|---|
| A3 | UST1-EP N<br>UST1-EP S<br>UST1-EP E<br>UST1-EP W<br>UST1-EP B |
| | UST2-EP N<br>UST2-EP S<br>UST2-EP E<br>UST2-EP W<br>UST2-EP B |
| | UST3-EP N<br>UST3-EP S<br>UST3-EP E<br>UST3-EP W<br>UST3-EP B |

| Grid | Sample |
|---|---|
| A2 | UST4-EP N<br>UST4-EP S<br>UST4-EP E<br>UST4-EP W<br>UST4-EP B |
| E2 | UST5-EP N<br>UST5-EP S<br>UST5-EP E<br>UST5-EP W<br>UST5-EP B |

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes the removal of hydraulic equipment, excavation of soil for off-site disposal and collection of end point samples.

## F) Photographs

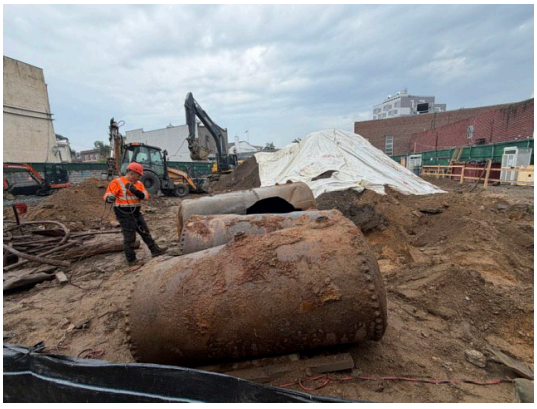

Representative photographs from the reporting period are shown below.

**Exposing USTs (Grid A3)**

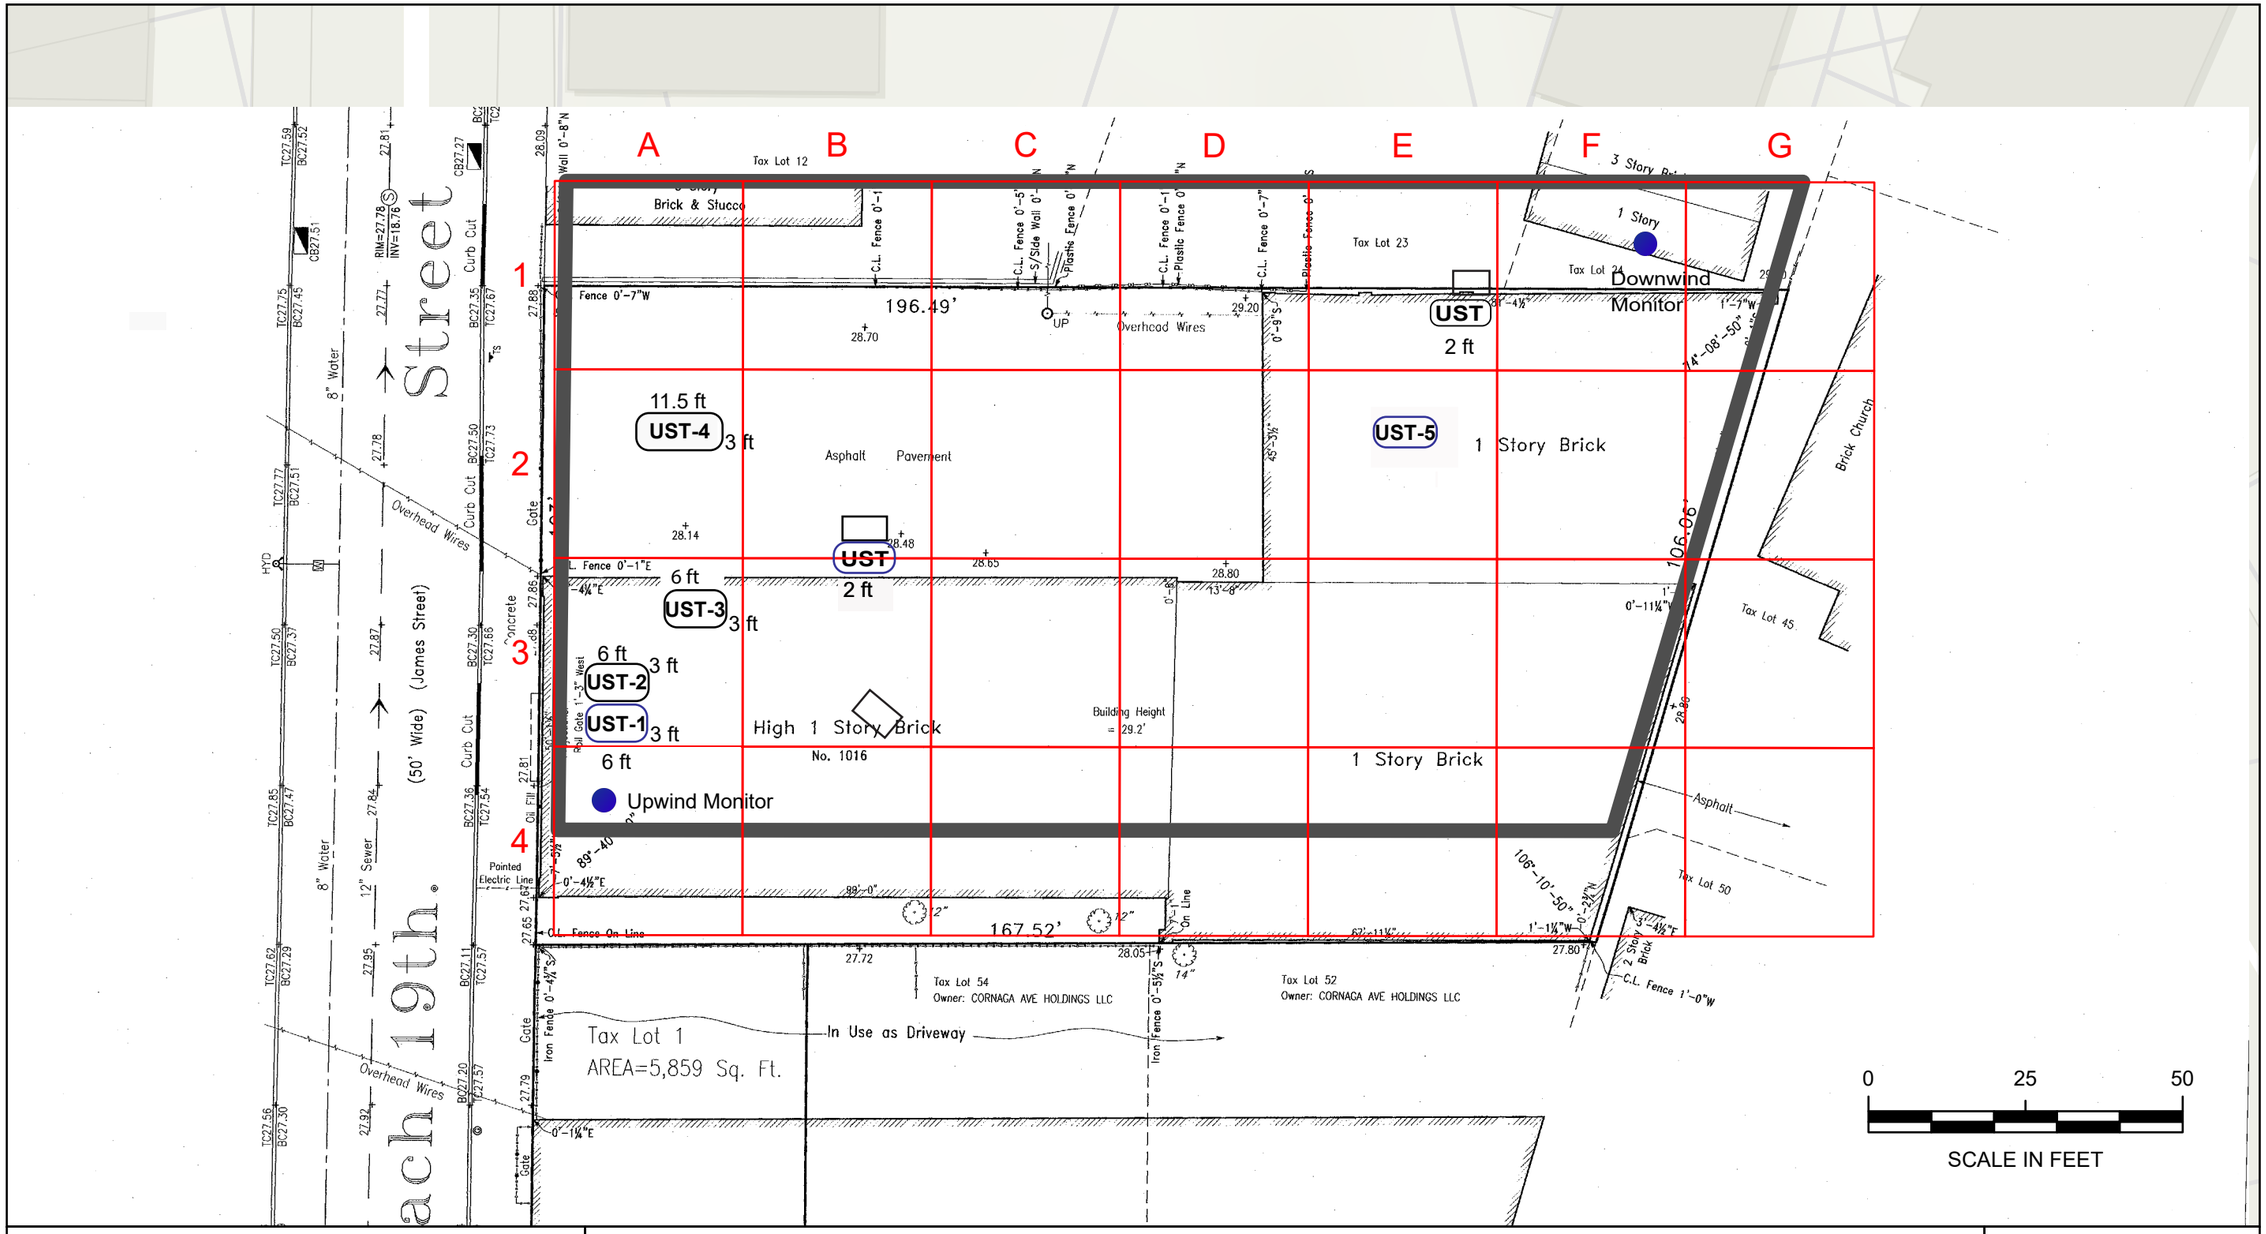

**Pumping out tank contents (Grid A3)**

**USTs prior to cleaning and off-site disposal (Grid A3)**

**Concrete slab disposal (Grid A1)**

## Grid Map

BCP Site No. C241276
10-16 Beach 19th Street
Borough of Queens, NY

## Legend

- 30x30=900 square feet
- BCP Site Boundary
- UST- Newly Encountered
- UST- Expected from Remedial Investigation

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance and stockpiling soil for later disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A3, B3, C3 and D2.

No material was imported or exported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid F1) and downwind (Grid A4) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes the removal of known and suspect underground equipment (storage tanks and hydraulic equipment) and collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

**Stockpiling soil for off-site disposal (Grid B3)**

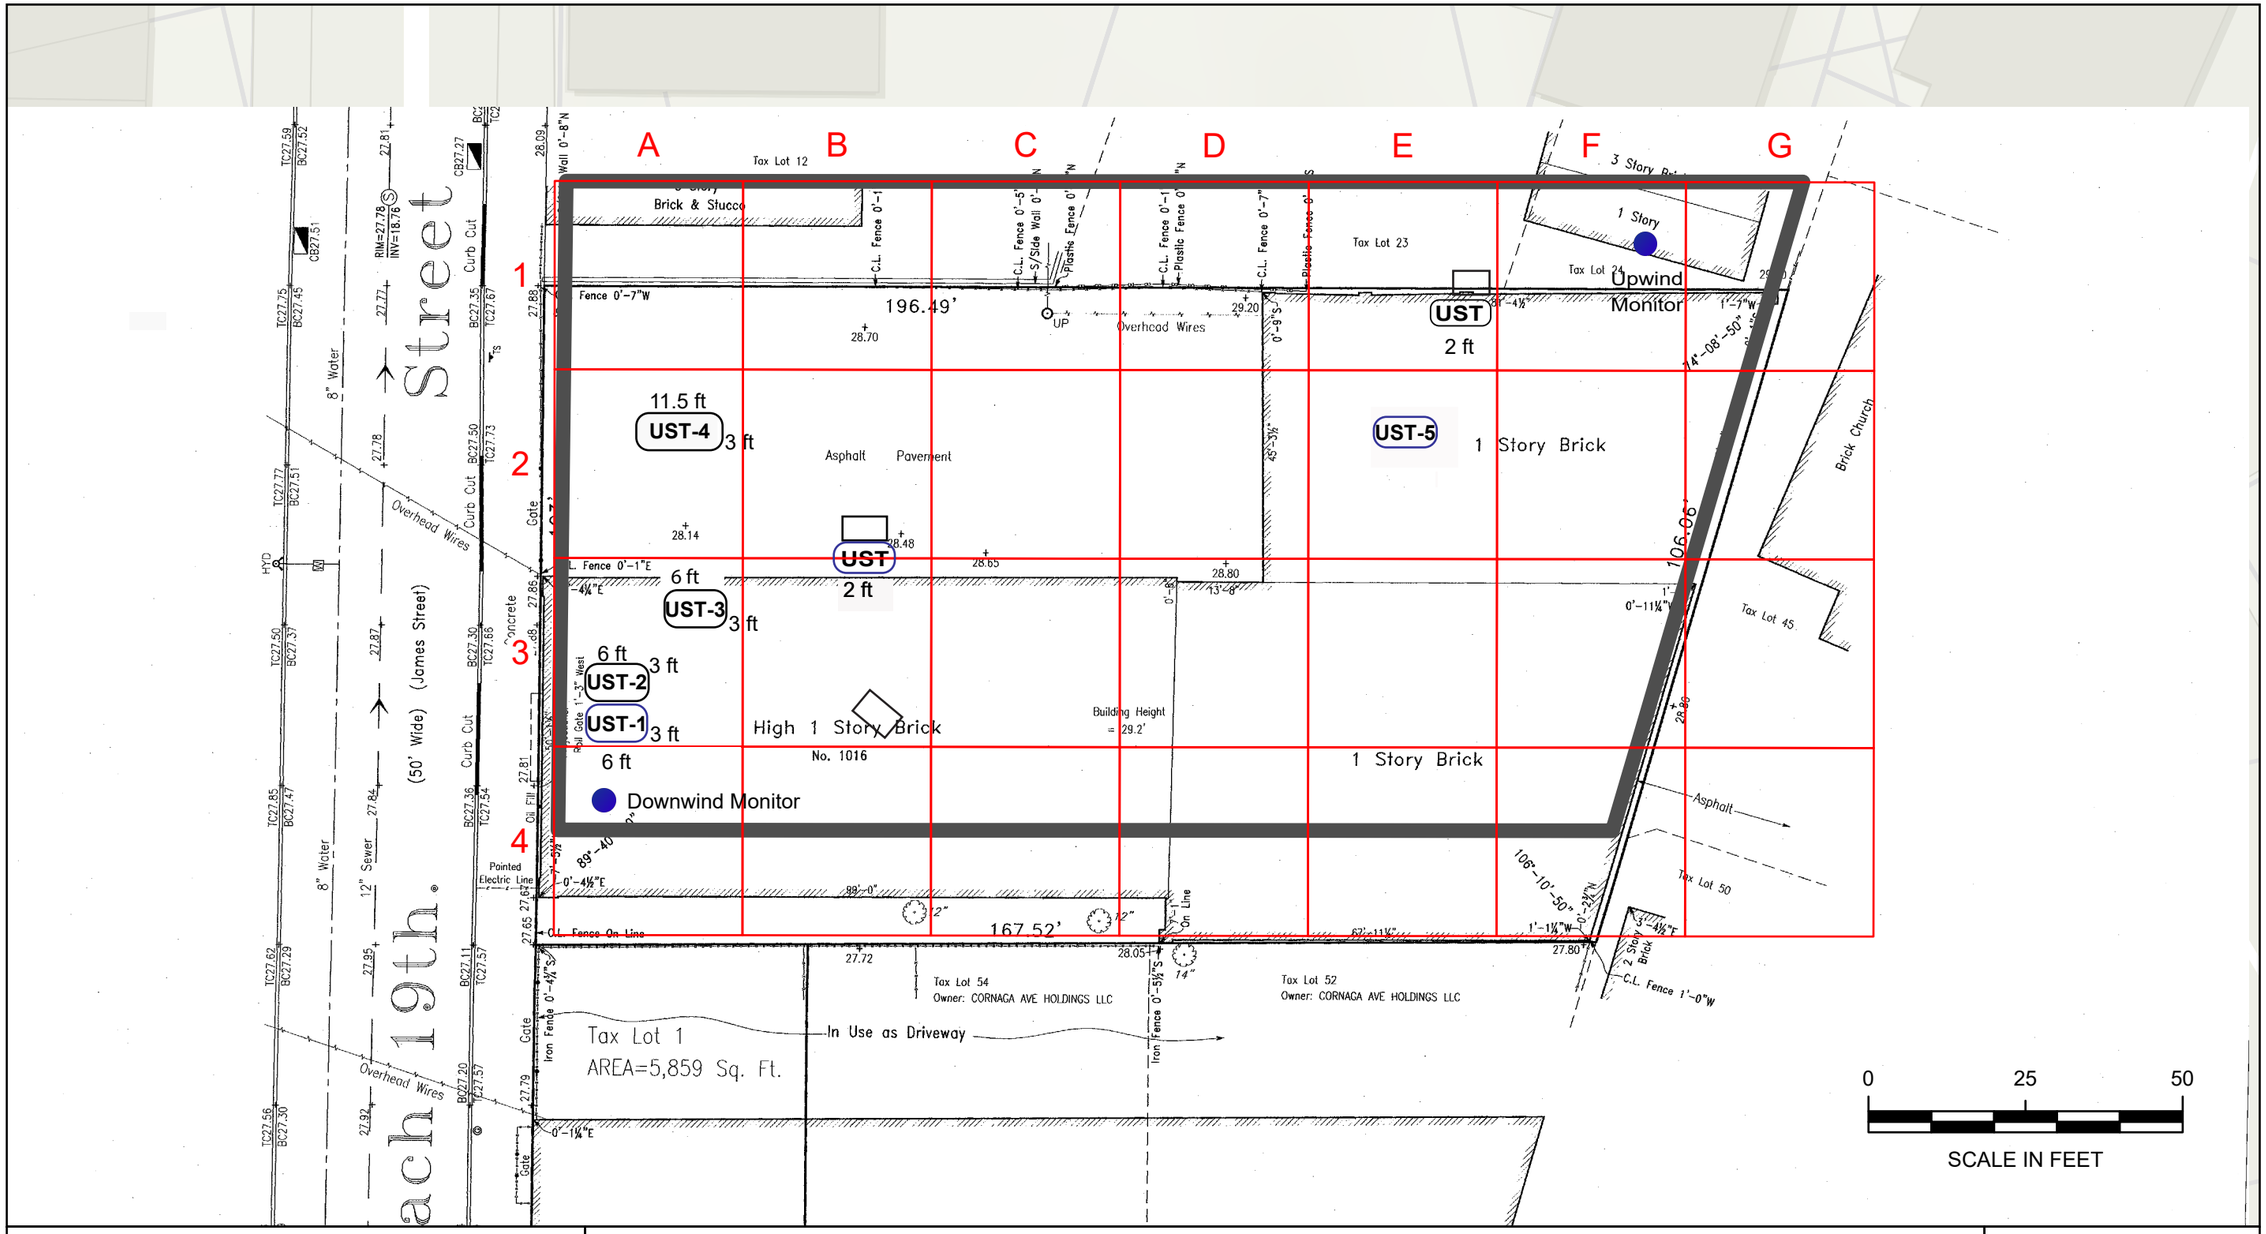

**Excavation around hydraulic lift equipment (Grid B3)**

**Stockpiling soil for off-site disposal (Grid B3)**

**Covering soil stockpile (Grid B3)**

## Grid Map

BCP Site No. C241276
10-16 Beach 19th Street
Borough of Queens, NY

## Legend

- 30x30=900 square feet
- BCP Site Boundary
- UST- Newly Encountered
- UST- Expected from Remedial Investigation
- Hydraulic Lift

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavating and stockpiling soil for later disposal, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A3, B3, D1-D2, E1-E2 and F1-F2

Eight truckloads of soil excavated for construction purposes from grid F1 were loaded from stockpiled material and disposed off-site at Posillico Wash Plant Facility, Farmingdale, New York (permit 26338C).

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid F4) and downwind (Grid A4) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes the removal of hydraulic equipment, excavation of soil for off-site disposal, and collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

**Loading trucks for off-site soil disposal (grid A2)**

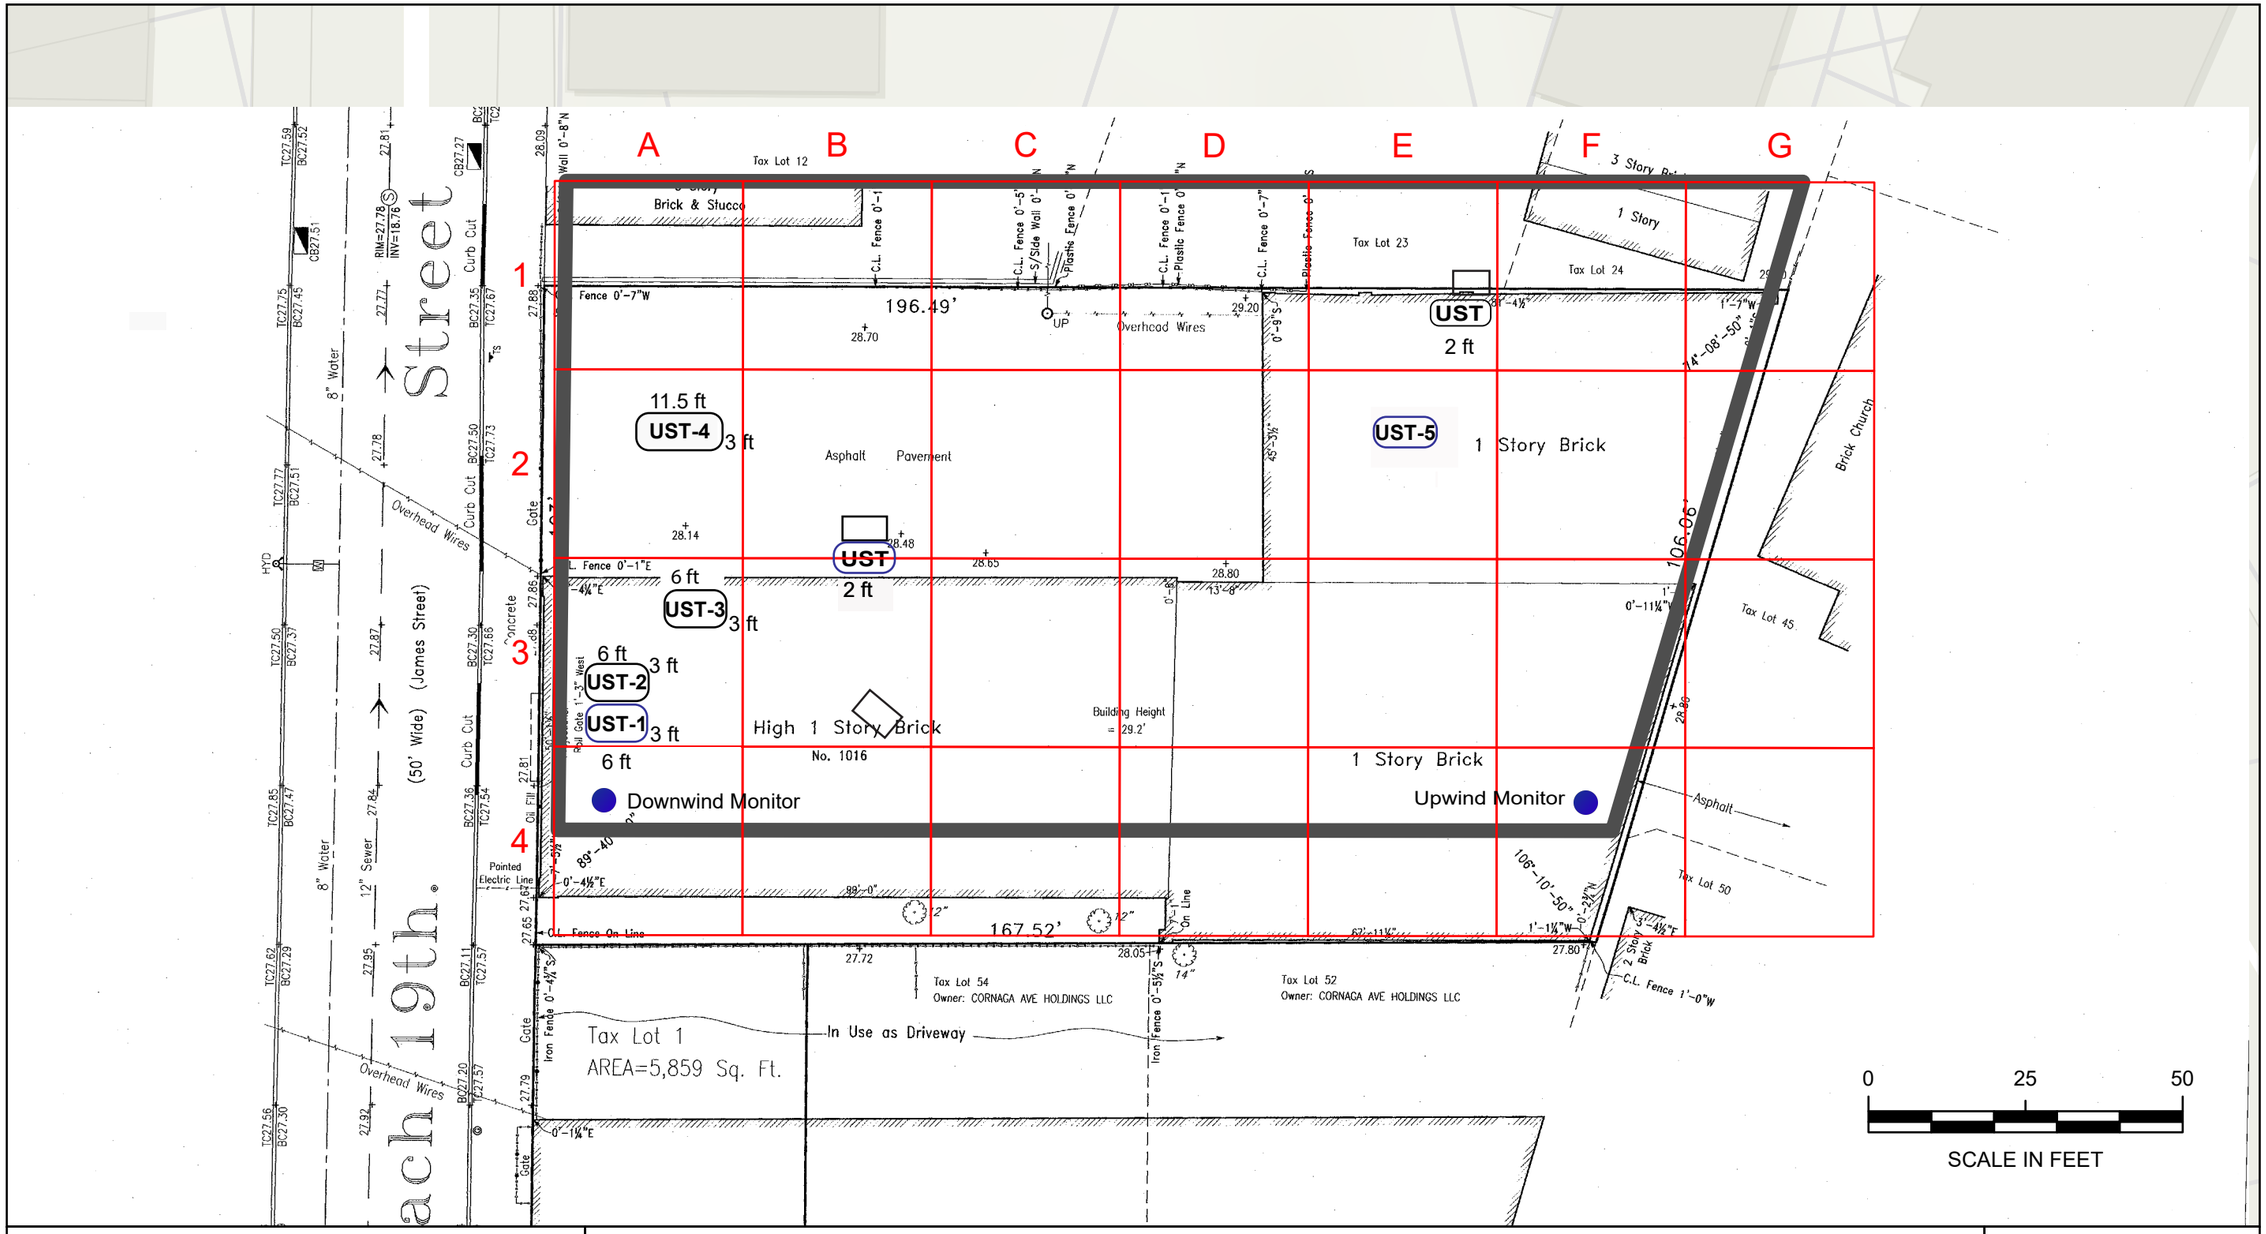

**Loading trucks for off-site soil disposal (grid A2)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, endpoint sampling, excavating and stockpiling soil for later disposal, and off-site soil disposal. Erosion and sediment control measures were inspected and no issues were observed.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A1-A2, B1-B2, C1-C2, D1-D2, G1 and gridline 4.

Sixteen truckloads of soil excavated for remedial purposes (12 from grid F2 and 4 from grid E2) were loaded from stockpiled material and disposed off-site at Posillico Wash Plant Facility, Farmingdale, New York (permit 26338C).

**C) Sampling Events**

Endpoint samples were collected from the following grids: A4, B4, C4, D1, D2, D4, E1, E3, E4, F1, F4, and G1.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid F4) and downwind (Grid A4) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

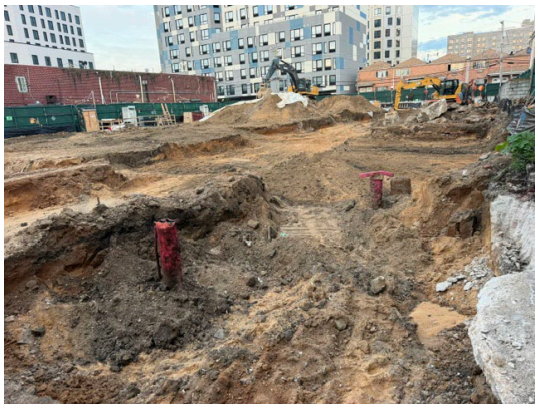

Upcoming work includes the removal of hydraulic equipment, excavation of soil for off-site disposal, and collection of end point samples.

**F) Photographs**

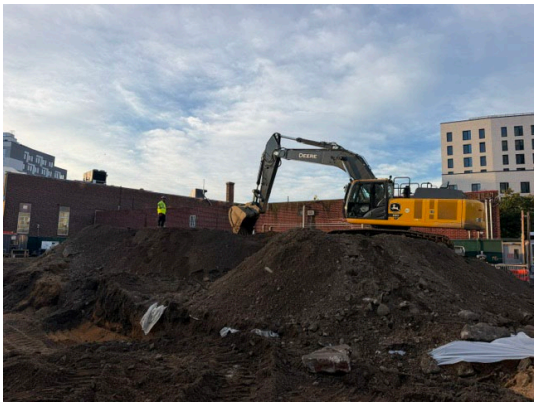

Representative photographs from the reporting period are shown below.

**Loading trucks for off-site soil disposal (Grid A2)**

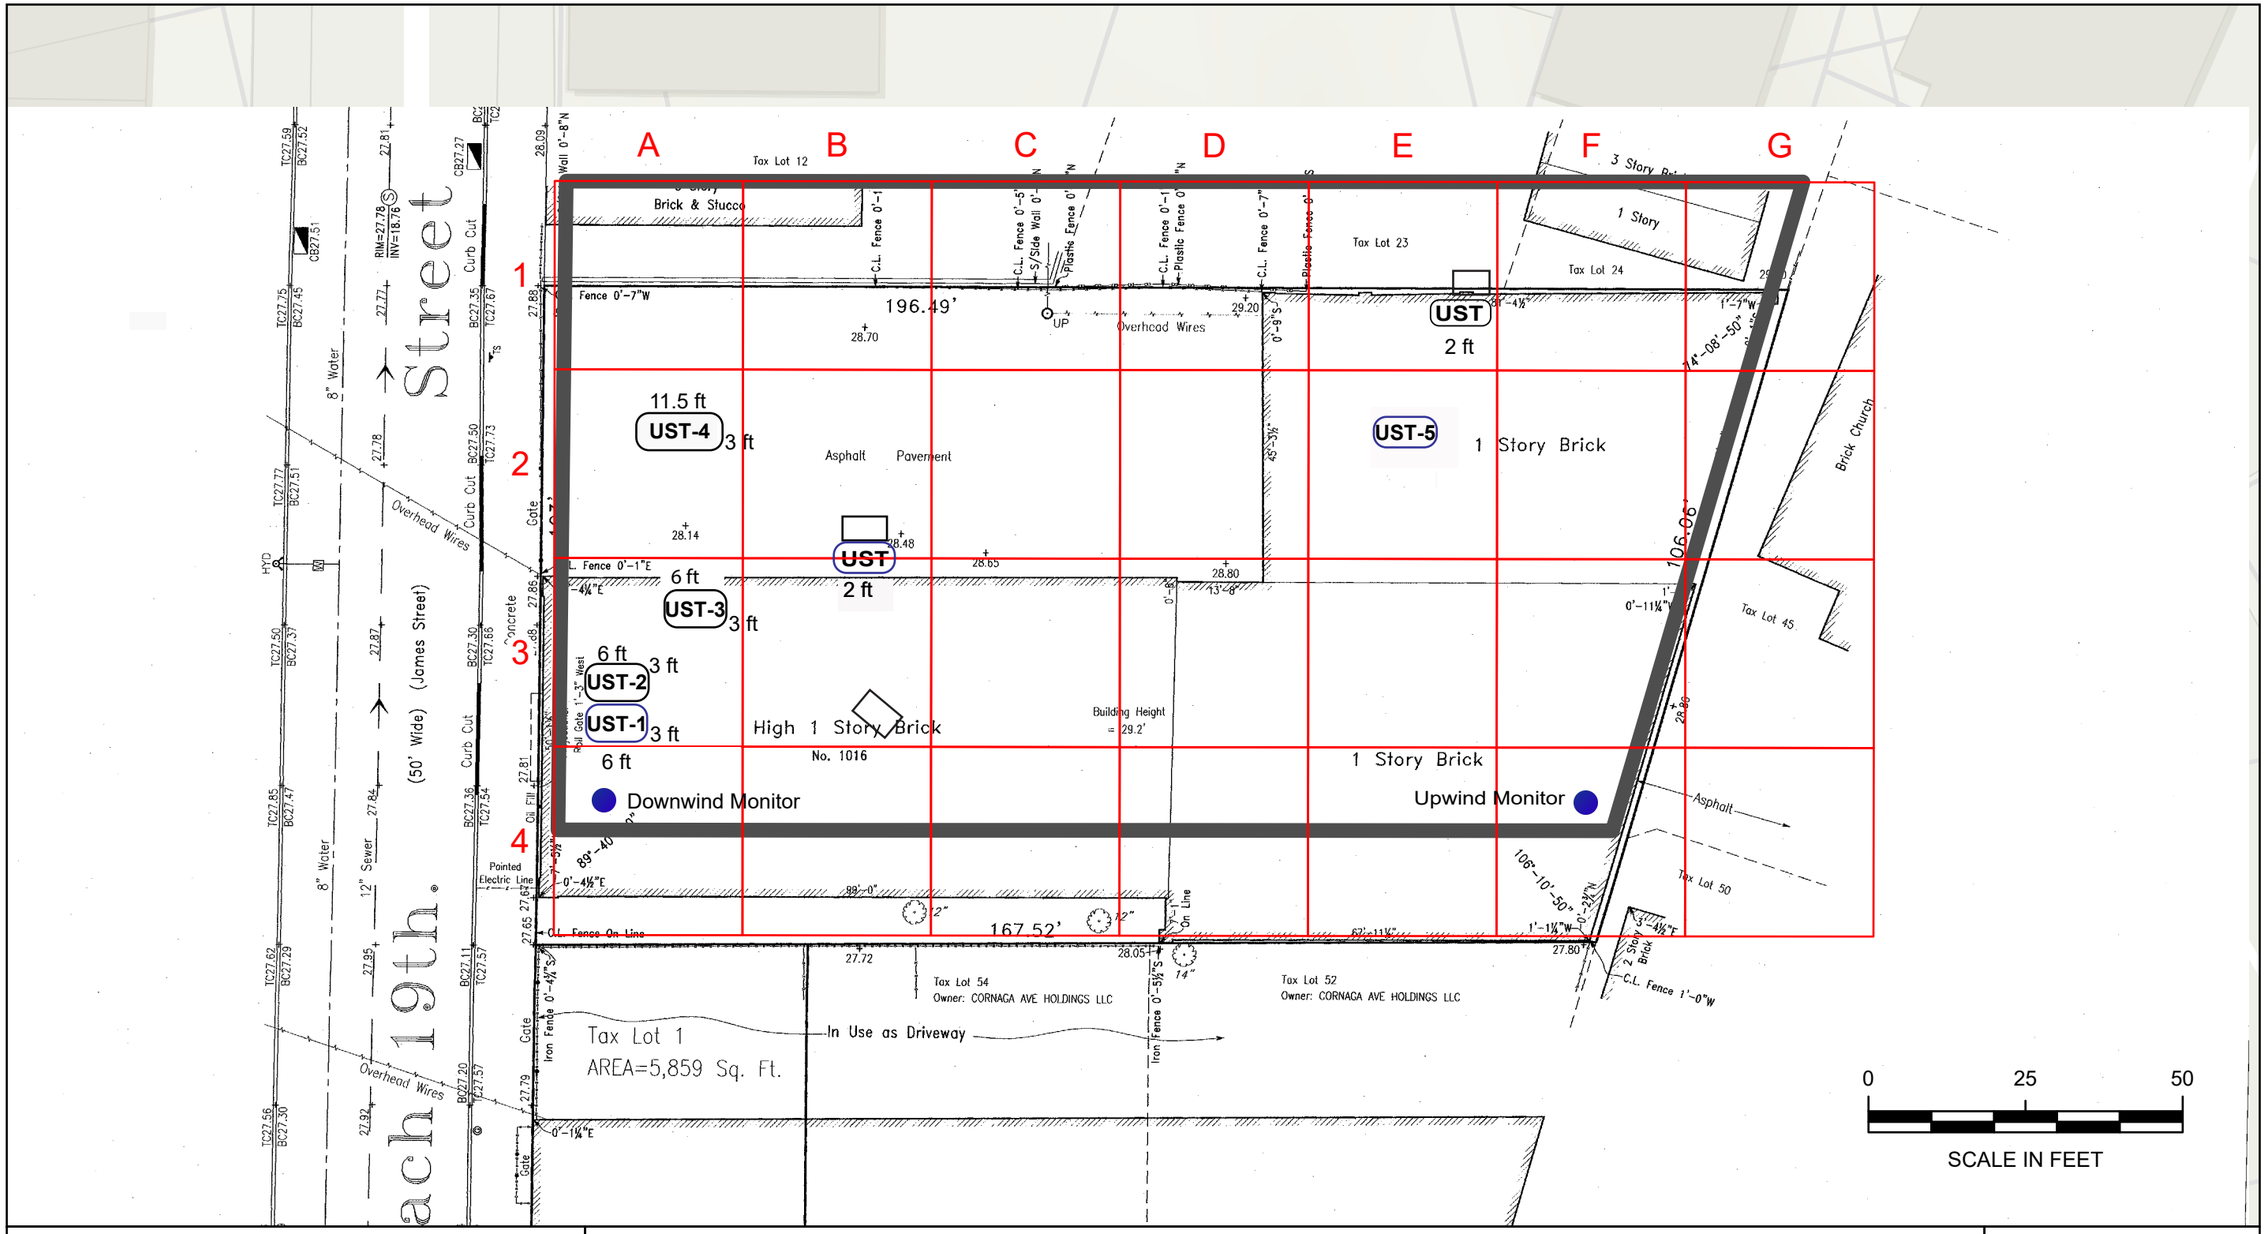

**General site conditions (view from Grid F1)**

**Soil strockpile lined with poly sheeting (Grid B3)**

**Covering soil stockpile (Grid B3)**

## Grid Map

BCP Site No. C241276
10-16 Beach 19th Street
Borough of Queens, NY

## Legend

- 30x30=900 square feet
- BCP Site Boundary
- UST- Newly Encountered
- UST- Expected from Remedial Investigation
- Hydraulic Lift

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavating and stockpiling soil for later disposal, off-site soil disposal, and endpoint sampling.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A1, B2, C2, D1-D4, E1-E4, and F1-F4.

Six truckloads of soil excavated for remedial purposes from grid E2 were live loaded and disposed off-site at Posillico Wash Plant Facility, Farmingdale, New York (permit 26338C).

**C) Sampling Events**

Endpoint samples were collected from the following grids: A1, B2, C2, and F3.

### D) General Compliance with RAWP/Encountered Problems

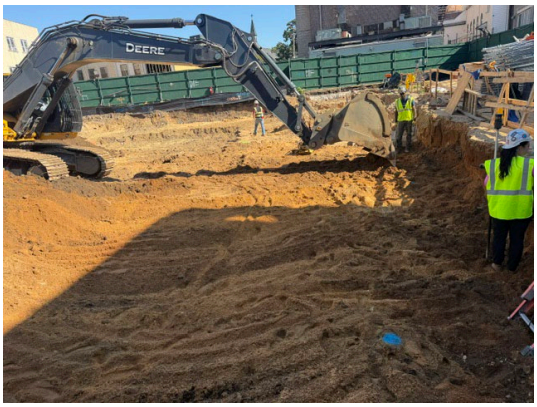

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

### E) Upcoming Work

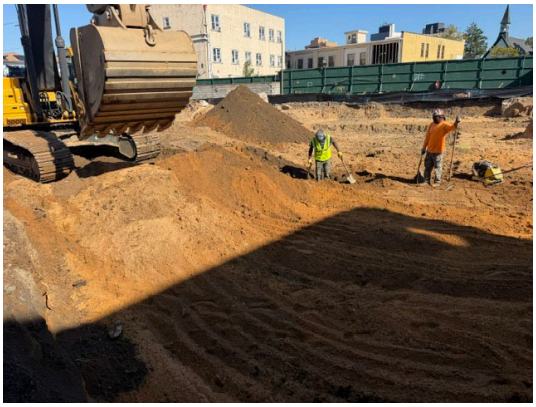

Upcoming work includes the removal of hydraulic equipment and collection of end point samples.

### F) Photographs

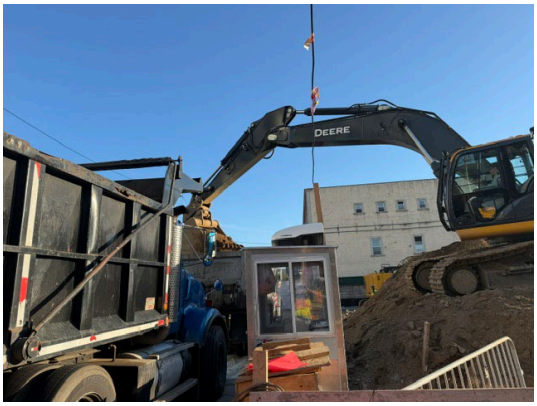

Representative photographs from the reporting period are shown below.

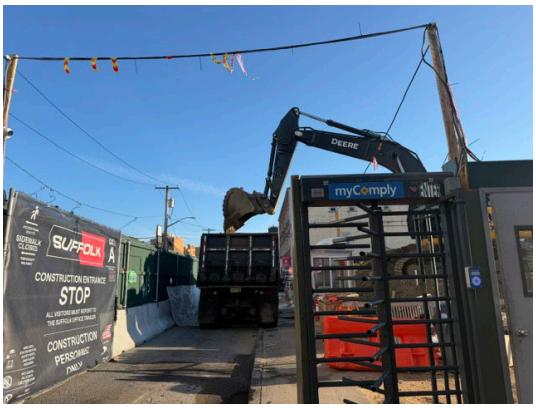

**Excavating soil for off-site disposal (Grid E2)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavating and stockpiling soil for later disposal, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: D2-D4, E1-E4 and F1-F4.

Nine truckloads of soil exported for construction purposes from grid F4 were live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). No material was imported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

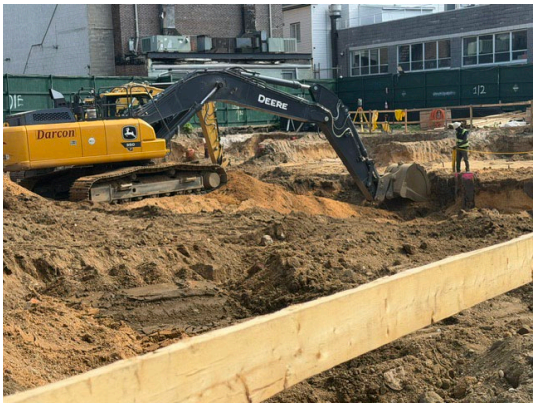

Upcoming work includes the removal of hydraulic equipment and collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

**Excavation (Grid F4)**

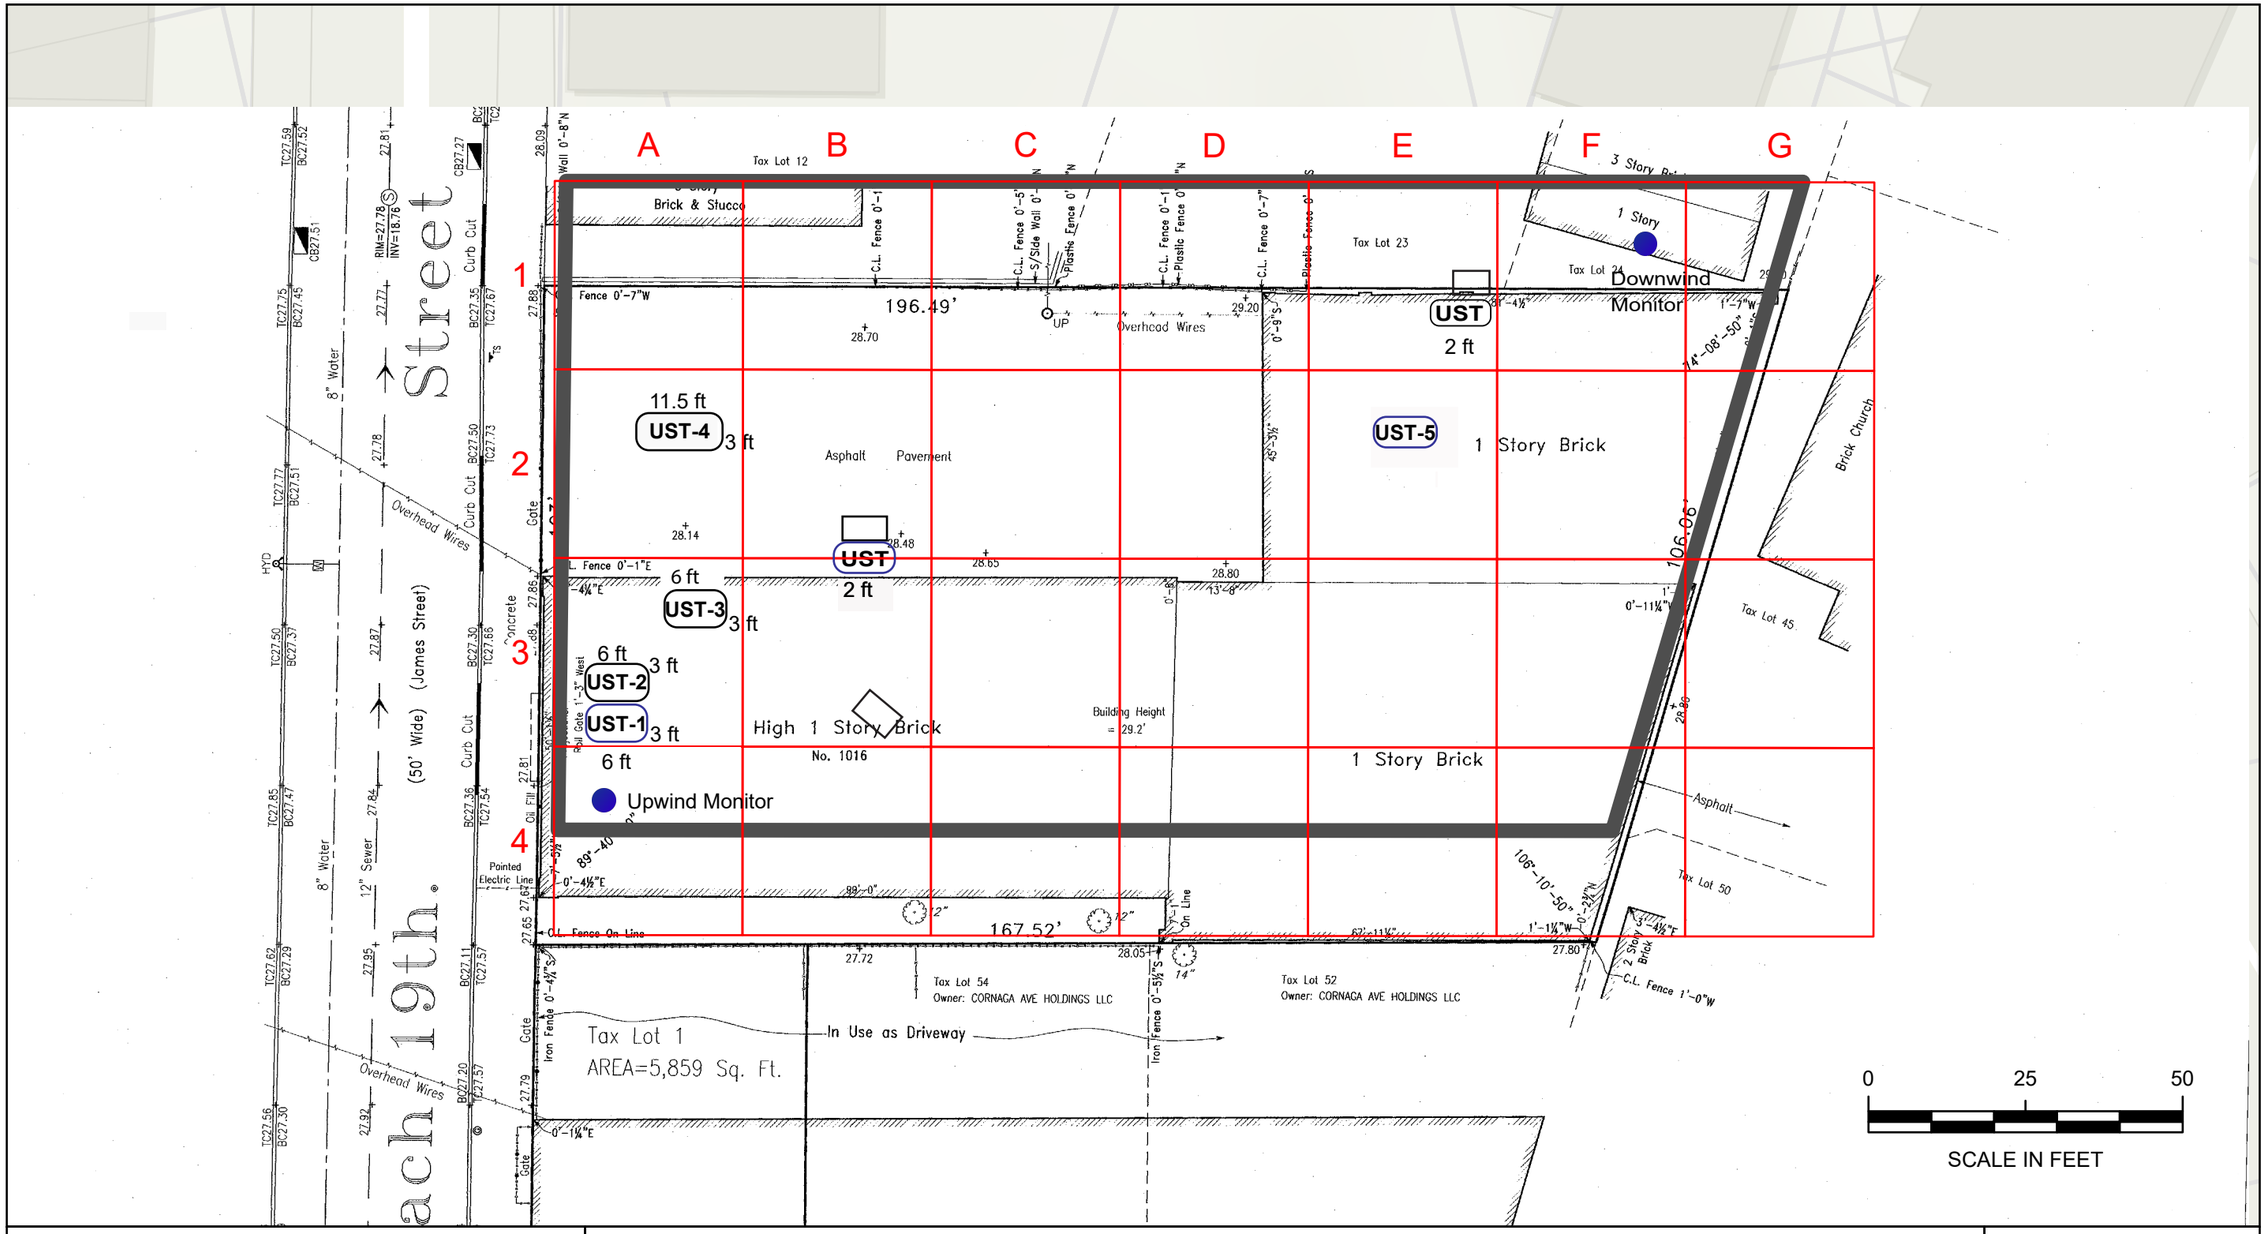

**Excavation (Grid E3)**

**General site conditions (Gridline 4)**

**Covered soil stockpile (Grid B3)**

## Grid Map

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavating and stockpiling soil for later disposal, off-site soil disposal, endpoint sampling, and hydraulic equipment removal. All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: B3, D1-D4, E1-E4, and F1-F4.

Aarco Environmental Services Corp. removed two, approximately 250-gallon underground storage tanks (USTs; supplying oil to former inground hydraulic lifts) at grids B3 and E1. Tank contents were pumped out, and the USTs were removed and cleaned. Hydraulic fluid and water generated during tank cleaning were transported off-site for disposal. The USTs were cut and disposed off-site as scrap metal. All associated hydraulic lift equipment (including pistons and posts) were removed and disposed off-site. No other USTs or underground equipment are known to remain on site.

Soil excavated for construction purposes from grids F3 and F4 (fifteen truckloads) was live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). No material was imported.

### C) Sampling Events

The following endpoint samples were collected:

| Grid | Tank Endpoint Sample |
|---|---|
| B3 | UST6-EP N, UST6-EP S, UST6-EP E, UST6-EP W, and UST6-EP B |
| E1 | UST7-EP N, UST7-EP S, UST7-EP E, UST7-EP W, and UST7-EP B |
| **Grid** | **Excavation Endpoint Sample** |
| D3 | EP-D3 N, EP-D3 S, EP-D3 E, EP-D3 W, and EP-D3 B |
| E2 | EP-E2 N, EP-E2 S, EP-E2 E, EP-E2 W, and EP-E2 B |
| F2 | EP-F2 N, EP-F2 S, EP-F2 E, EP-F2 W, and EP-F2 B |

### D) General Compliance with RAWP/Encountered Problems

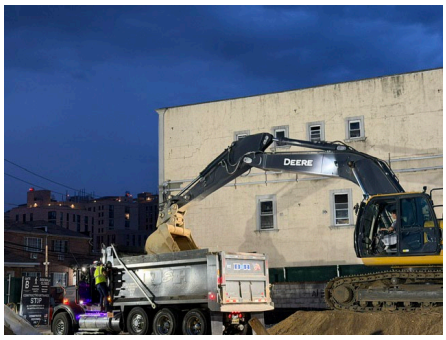

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

### E) Upcoming Work

Upcoming work includes continued soil excavation and the collection of end point samples.

### F) Photographs

Representative photographs from the reporting period are shown below.

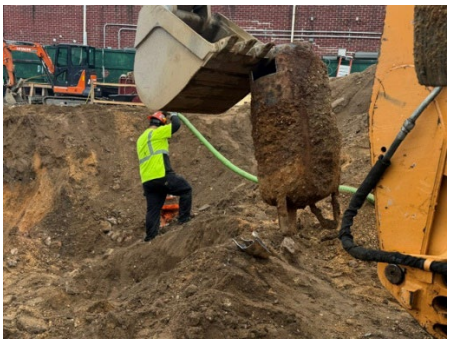

**Loading trucks for off-site soil disposal (Grid A1)**

**Pumping out tank contents (Grid E1)**

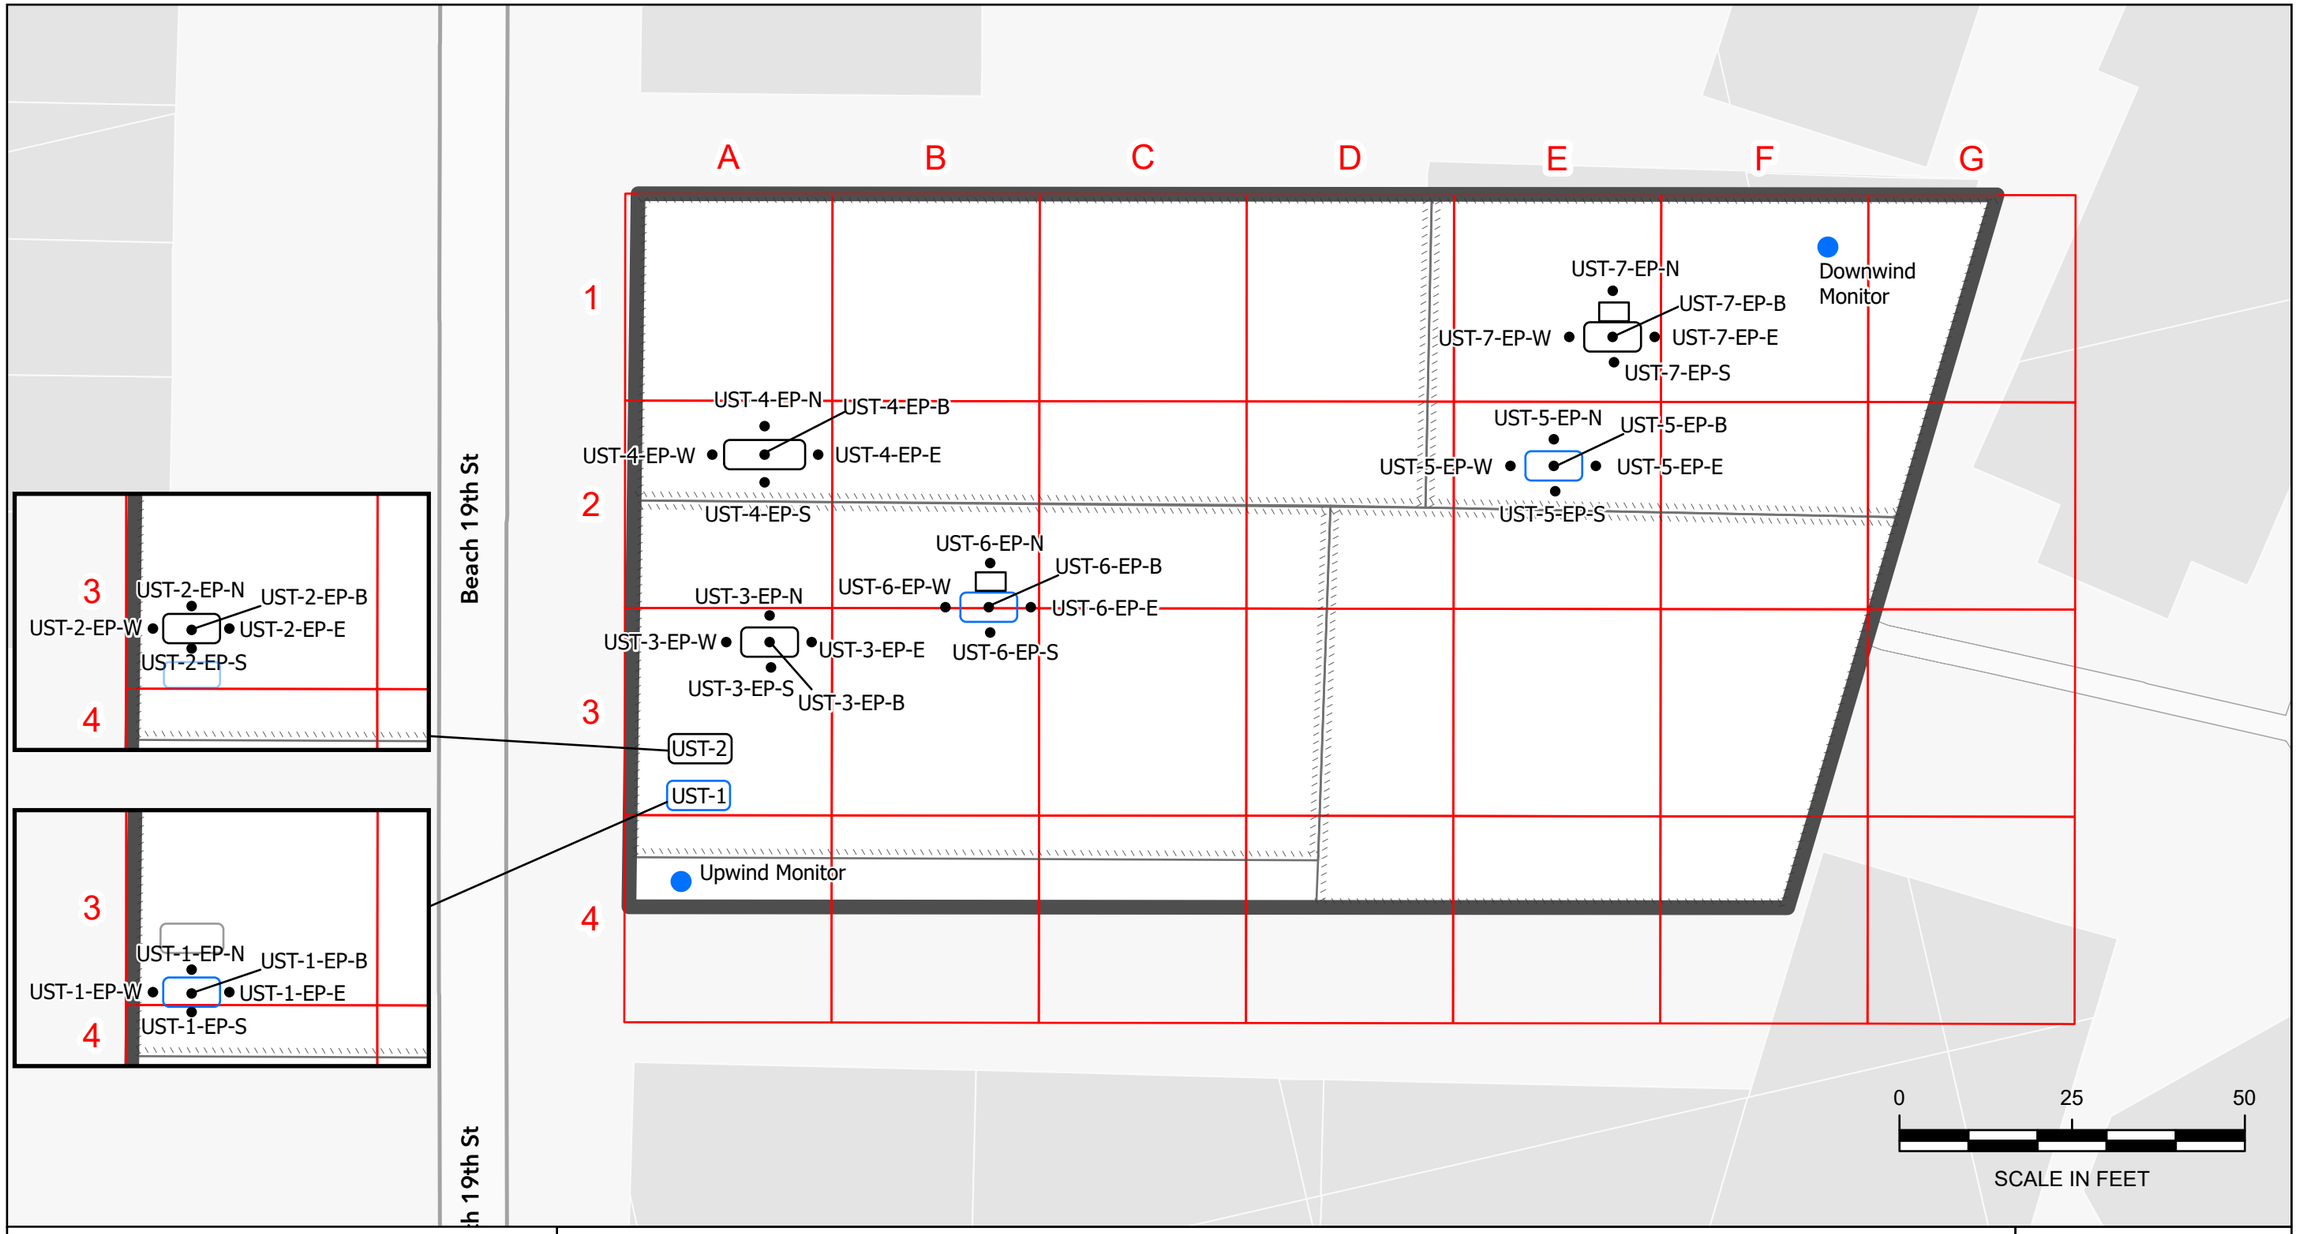

**Pumping out tank contents (Grid B3)**

**Tank removal (Grid B3)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, installation of support of excavation (SOE), stockpiling soil for later disposal, and off-site soil disposal. Erosion and sediment control measures were inspected and no issues were observed.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A1, B1, D3, and F1-F4.

Soil excavated for remedial purposes from grid D3 (two truckloads) was live-loaded, and soil excavated for construction purposes from grid F3 (ten truckloads) was loaded from a stockpile, and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). No material was imported.

**C) Sampling Events**

No samples were collected.

### D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

### E) Upcoming Work

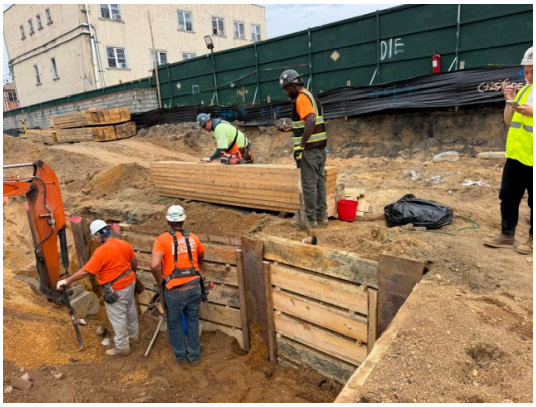

Upcoming work includes continued soil excavation and the collection of end point samples.

### F) Photographs

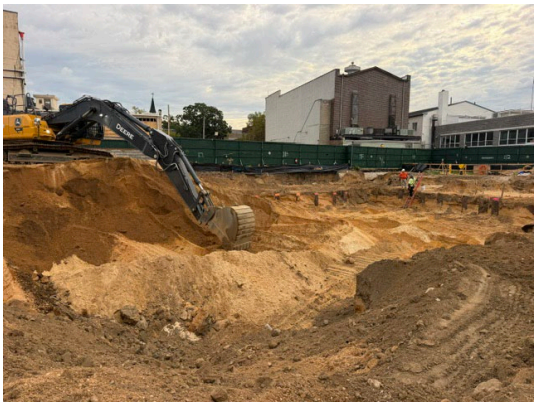

Representative photographs from the reporting period are shown below.

**Loading trucks for off-site soil disposal (Grid A1)**

**SOE installation (Grid E1)**

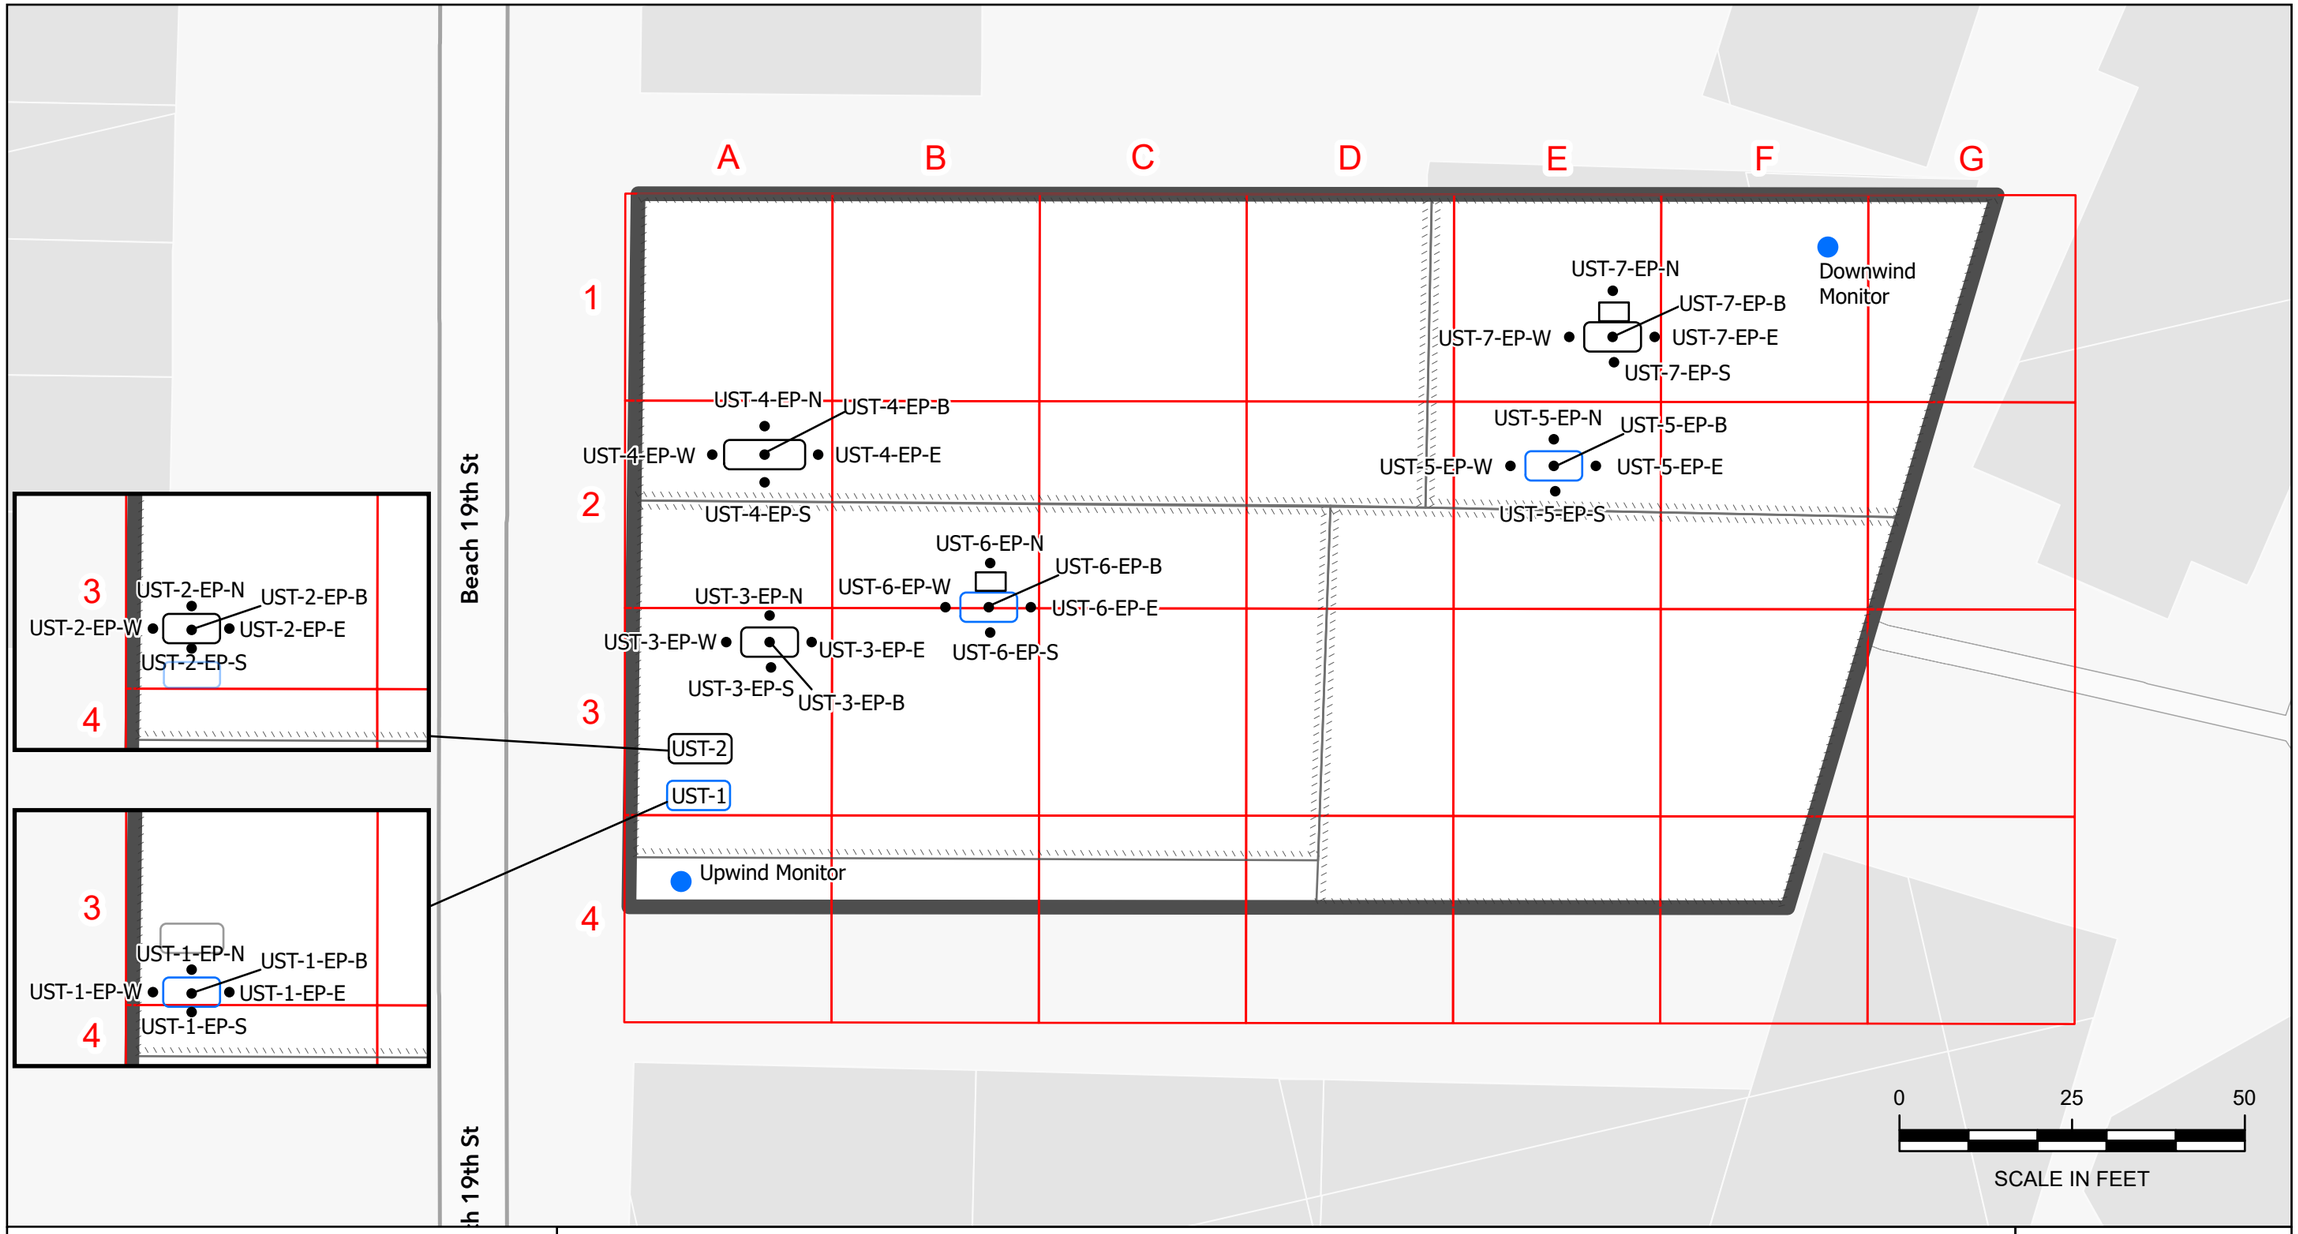

**Excavation (Grid D3)**

**Erosion and sediment controls in place (Beach 19th Street catch basin, off-site)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, installation of support of excavation (SOE), stockpiling soil for later disposal, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: D2, E2-E3, and F2-F3.

Soil excavated for remedial purposes from grid F2 (twelve truckloads) and construction purposes from grid F3 (ten truckloads) was live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). No material was imported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes excavation of soil and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

**Loading trucks for off-site soil disposal (Grid A1)**

**Loading trucks for off-site soil disposal (Grid A1)**

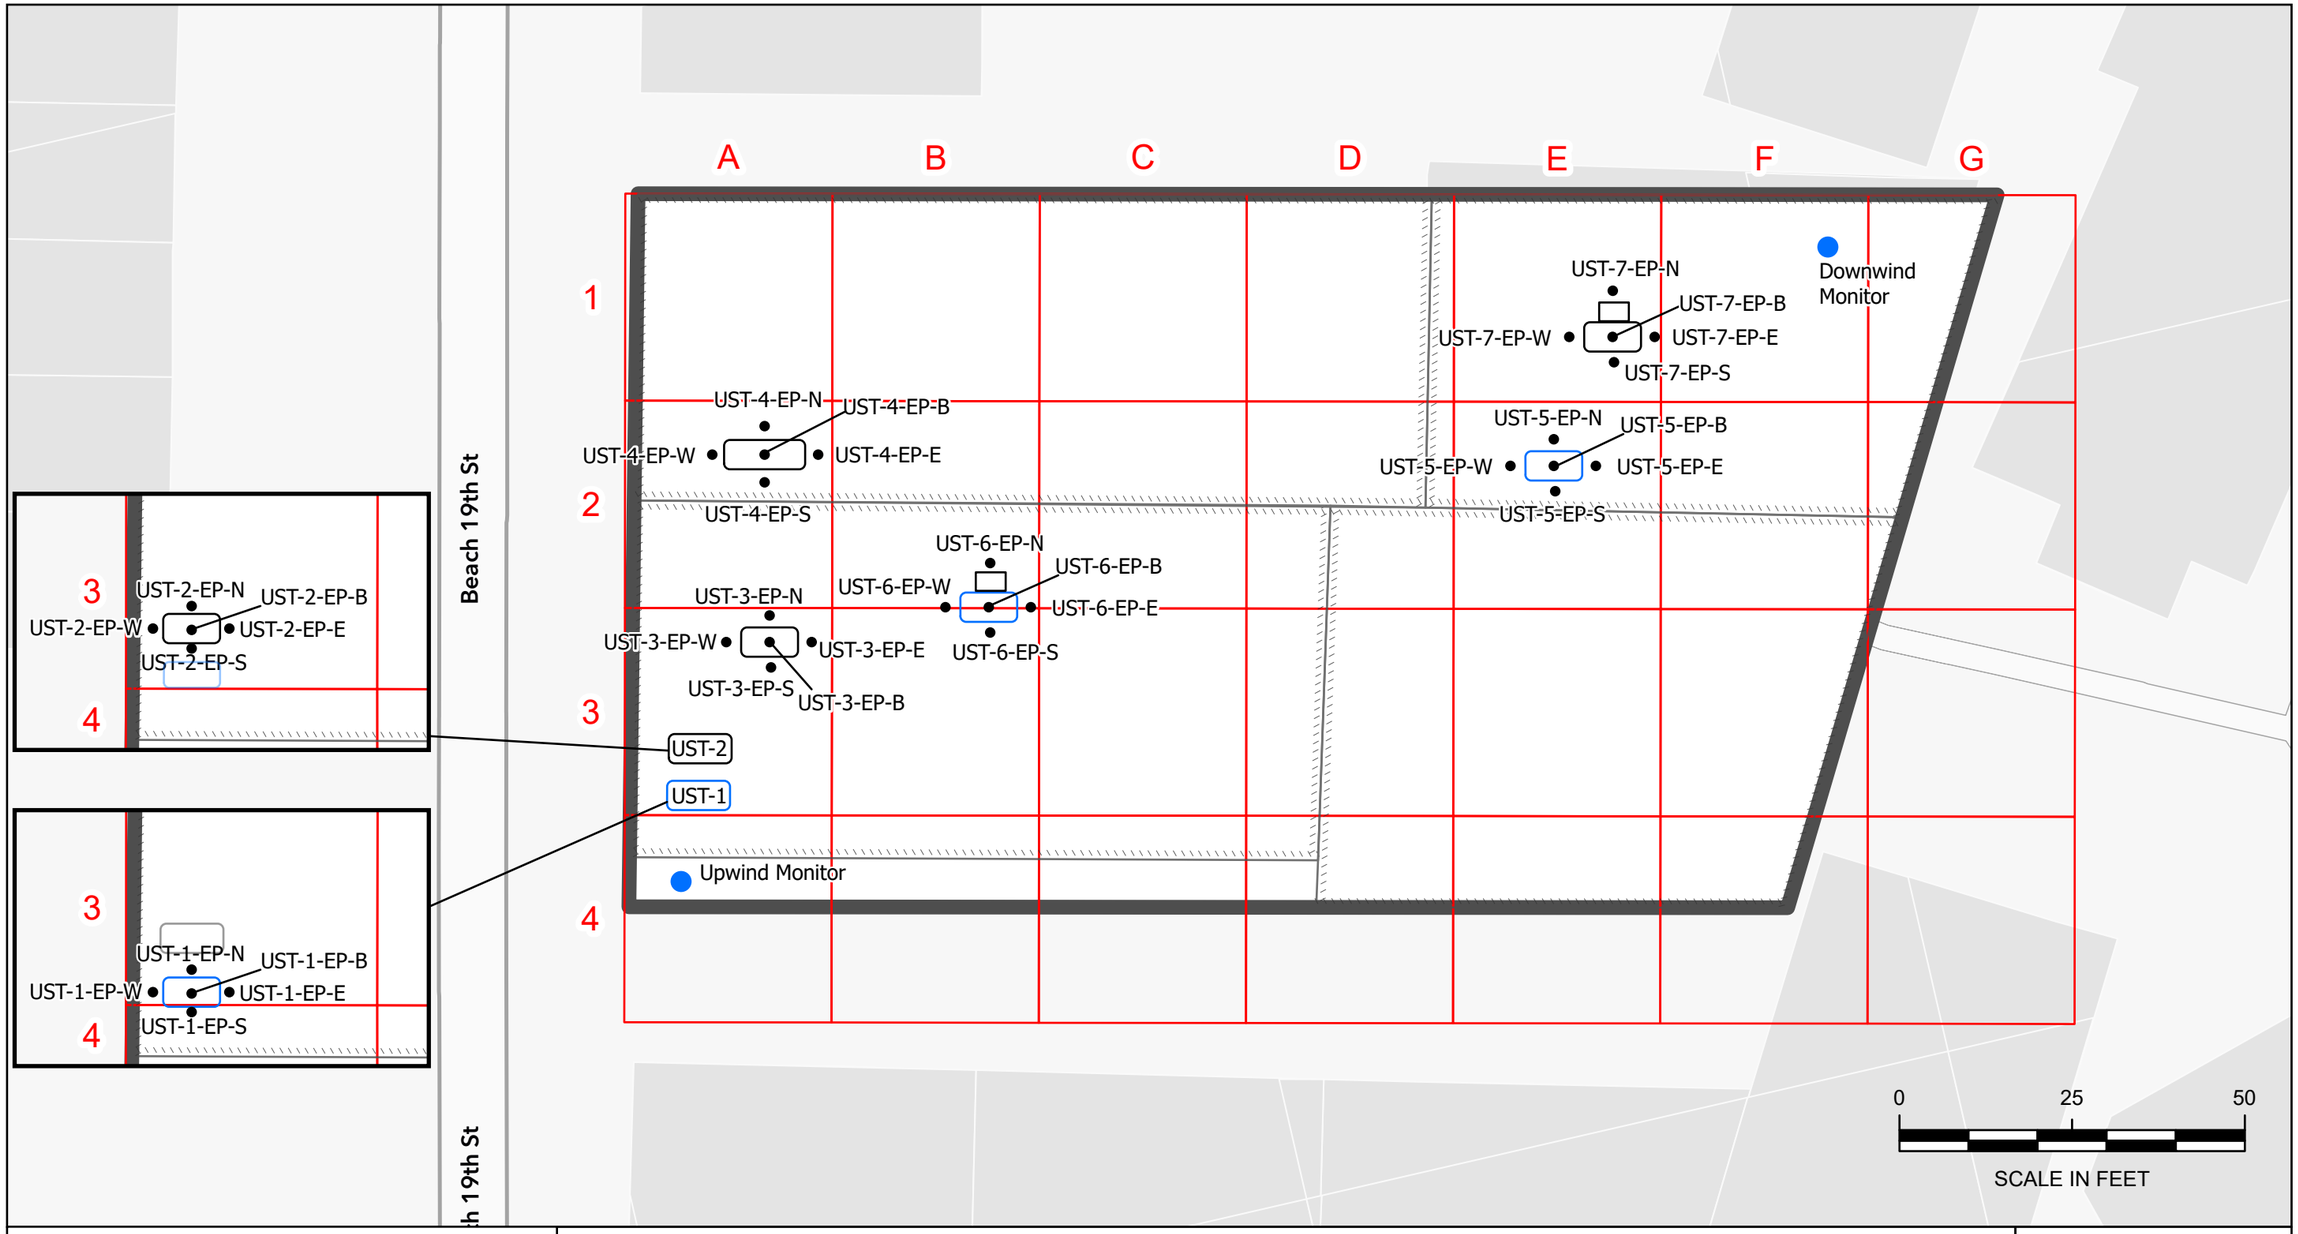

**SOE installation (Grids D2 and E2)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, installation of support of excavation (SOE) and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: C3, D2-D3, E2, and F2.

Soil excavated for remedial purposes from grids E2 and F2 (ten and seven truckloads, respectively) was live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). Soil excavated for remedial purposes from grid E2 (two truckloads) was live loaded and disposed off-site at Posillico Wash Plant Facility, Farmingdale, New York (permit 26338C). No material was imported.

**C) Sampling Events**

No samples were collected.

### D) General Compliance with RAWP/Encountered Problems

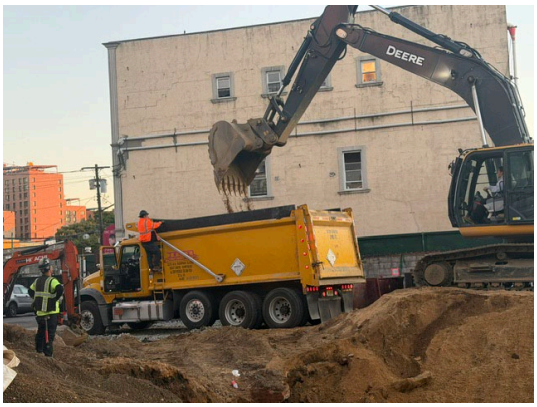

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

### E) Upcoming Work

Upcoming work includes excavation of soil and the collection of end point samples.

### F) Photographs

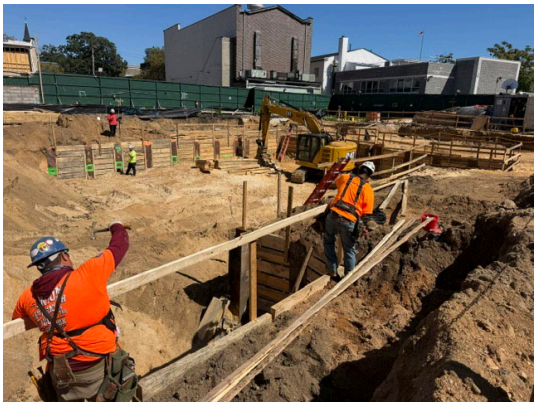

Representative photographs from the reporting period are shown below.

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, installation of support of excavation (SOE) and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: C1-C3 and D3.

Ten truckloads of soil exported for construction purposes from grid D3 were live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). No material was imported.

**C) Sampling Events**

No samples collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

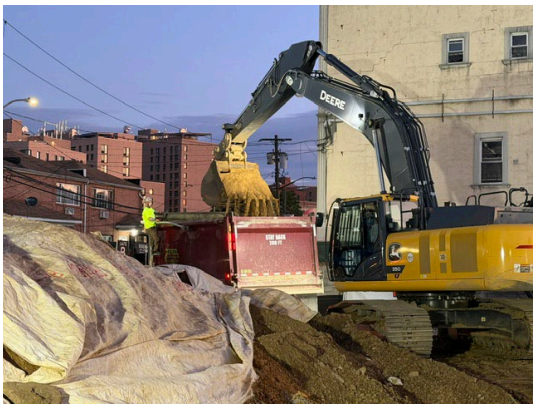

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

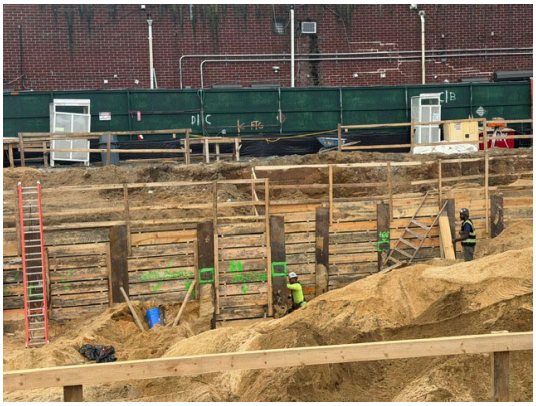

**Loading trucks for off-site soil disposal (Grid A1)**

**Loading trucks for off-site soil disposal (Grid A1)**

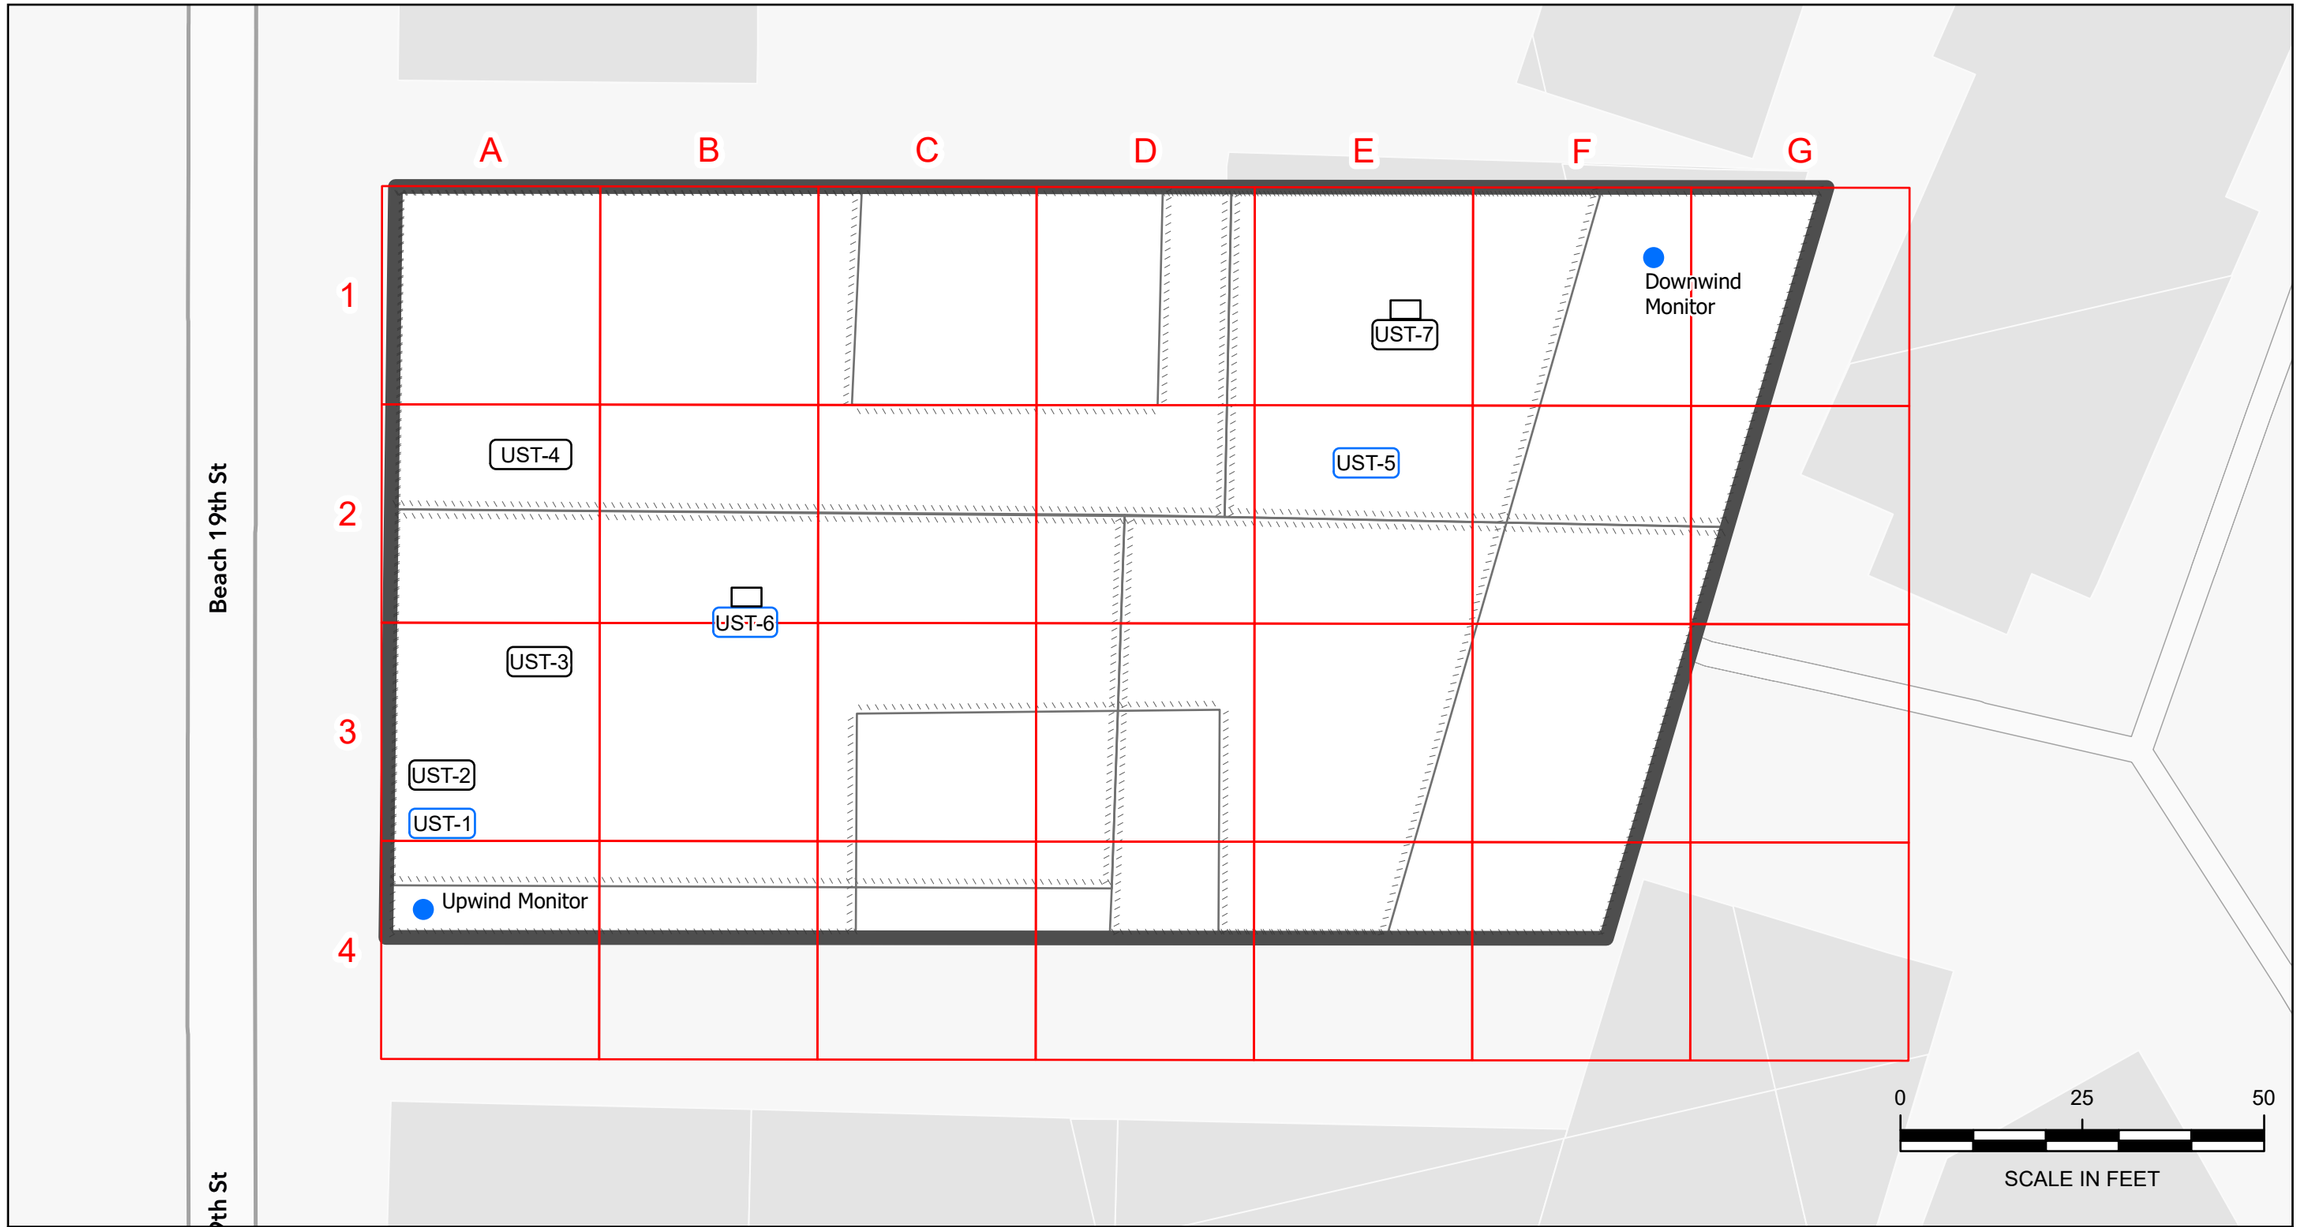

**SOE installation (Grids D2 and E2)**

**SOE installation (Grids D2 and E2)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, installation of support of excavation (SOE) and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: B2, C2, D2 and C3.

Fifteen truckloads of soil exported for construction purposes from grid C2 (five truckloads) and C3 ten truckloads) were live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). Seven truckloads of soil exported for construction purposes from grid F1 were live loaded and disposed off-site at Impact Reuse and Recovery Center, Lyndhurst, New Jersey (approval #21182-01-01-1001). No material was imported.

**C) Sampling Events**

No samples collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

**Loading trucks for off-site soil disposal (Grid A1)**

**Loading trucks for off-site soil disposal (Grid A1)**

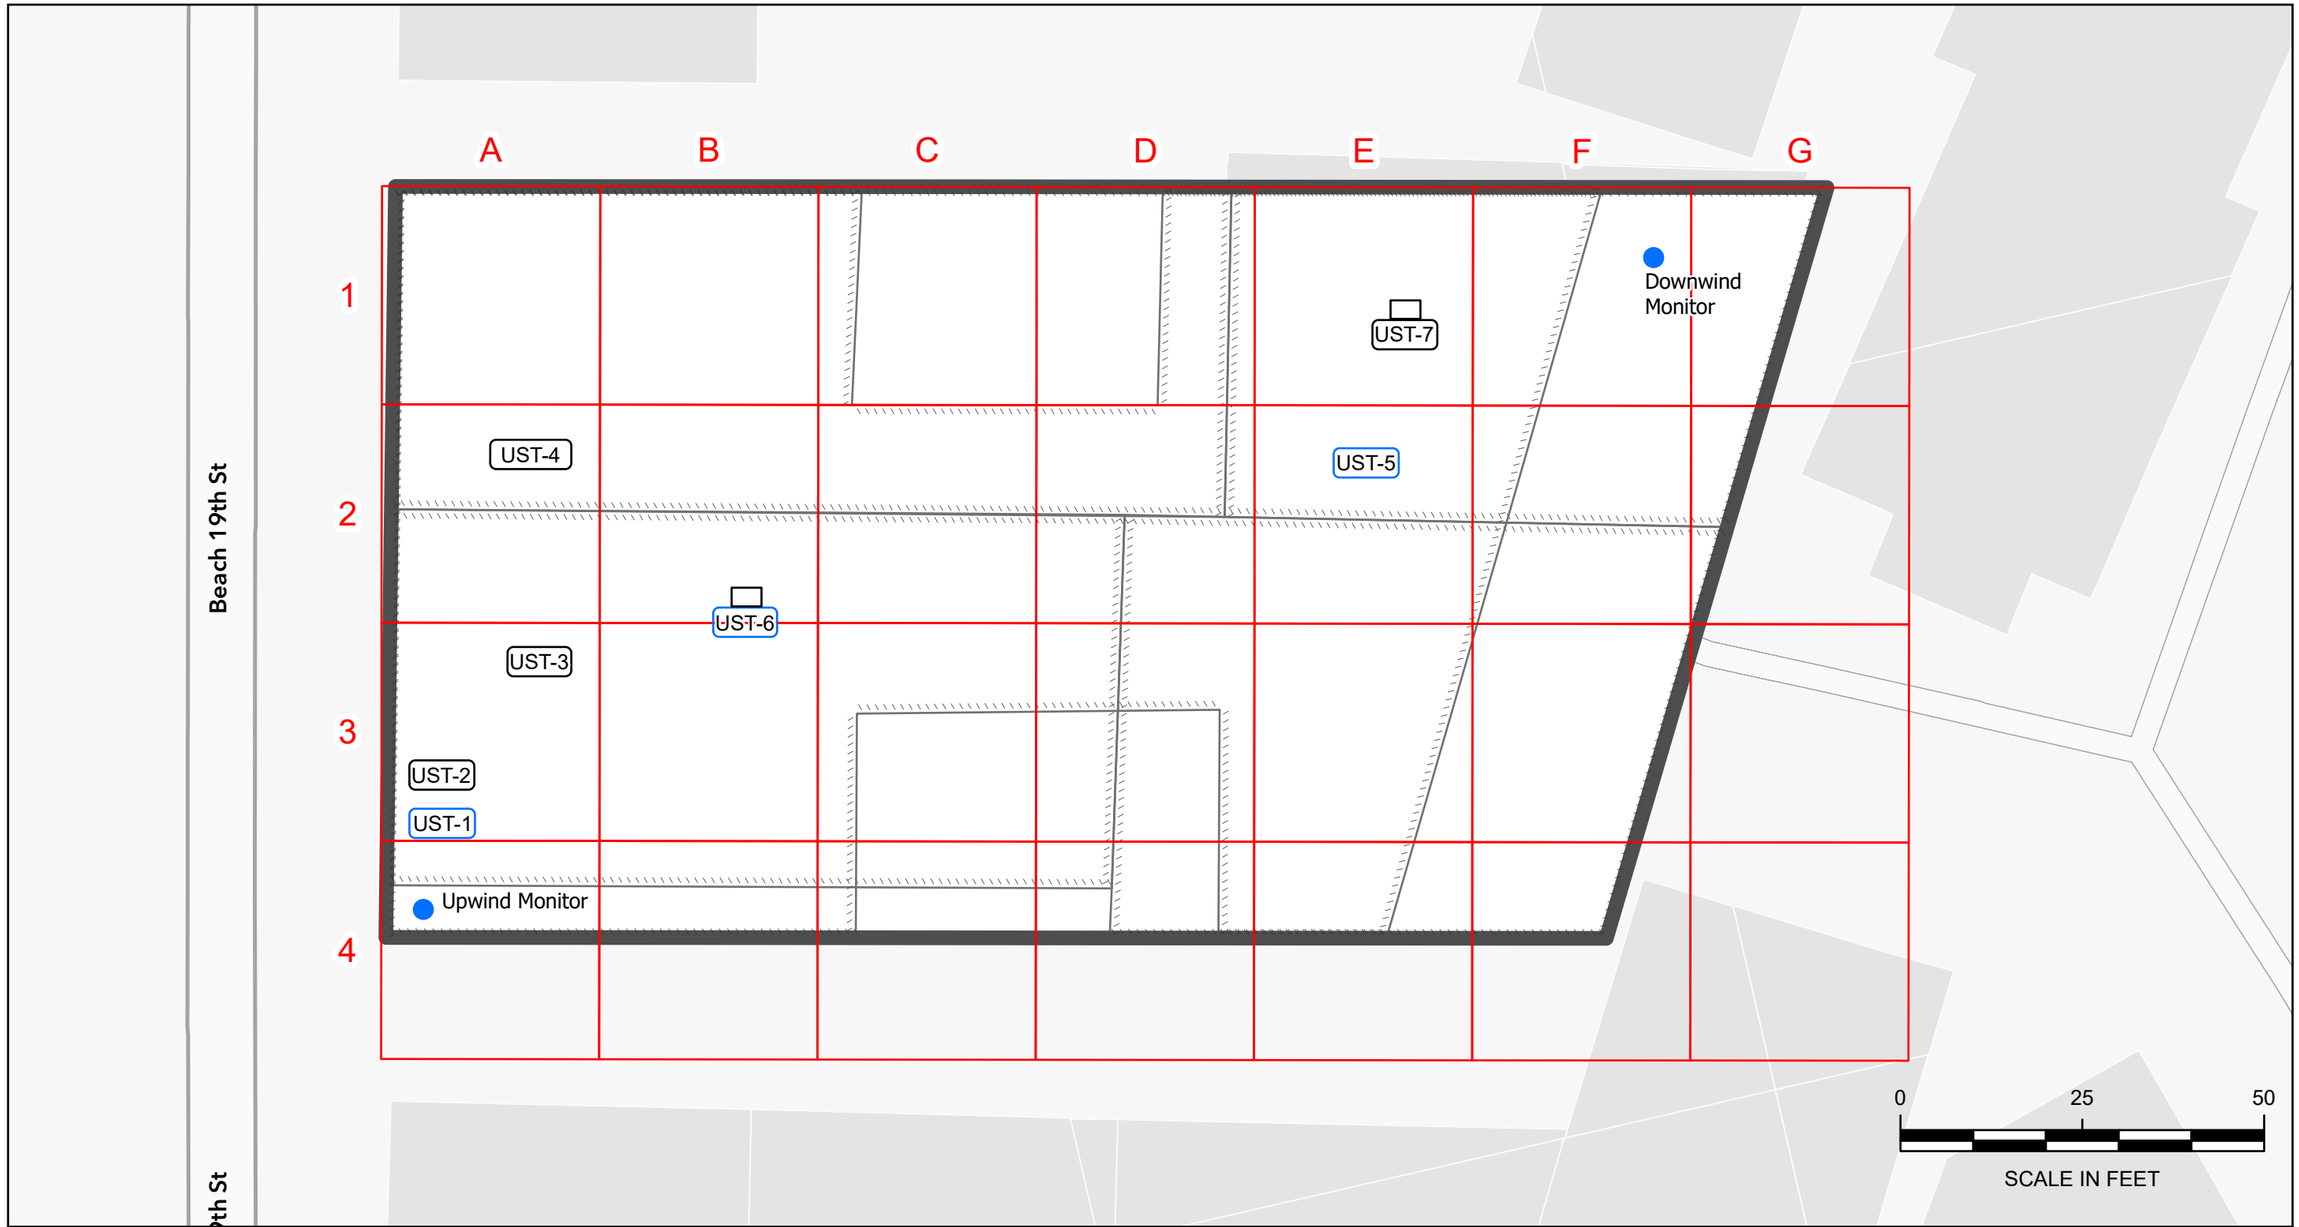

**SOE installation (Grids D2 and E2)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavating, installation of support of excavation (SOE) and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: B1, D2, and F1.

Twelve truckloads of soil exported for construction purposes from grid D2 (eight truckloads) and B2 (four truckloads) were live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). Eight truckloads of soil exported for construction purposes from grid F1 were live loaded and disposed off-site at Impact Reuse and Recovery Center, Lyndhurst, New Jersey (approval #21182-01-01-1001). No material was imported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

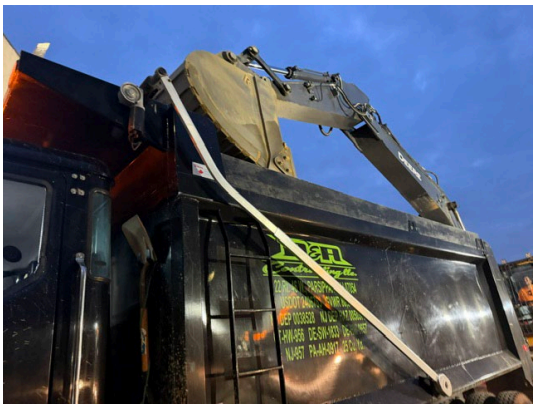

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

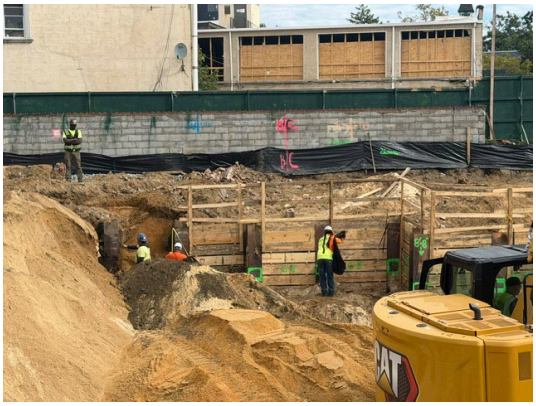

**Loading trucks for off-site soil disposal (Grid A1)**

**Loading trucks for off-site soil disposal (Grid A1)**

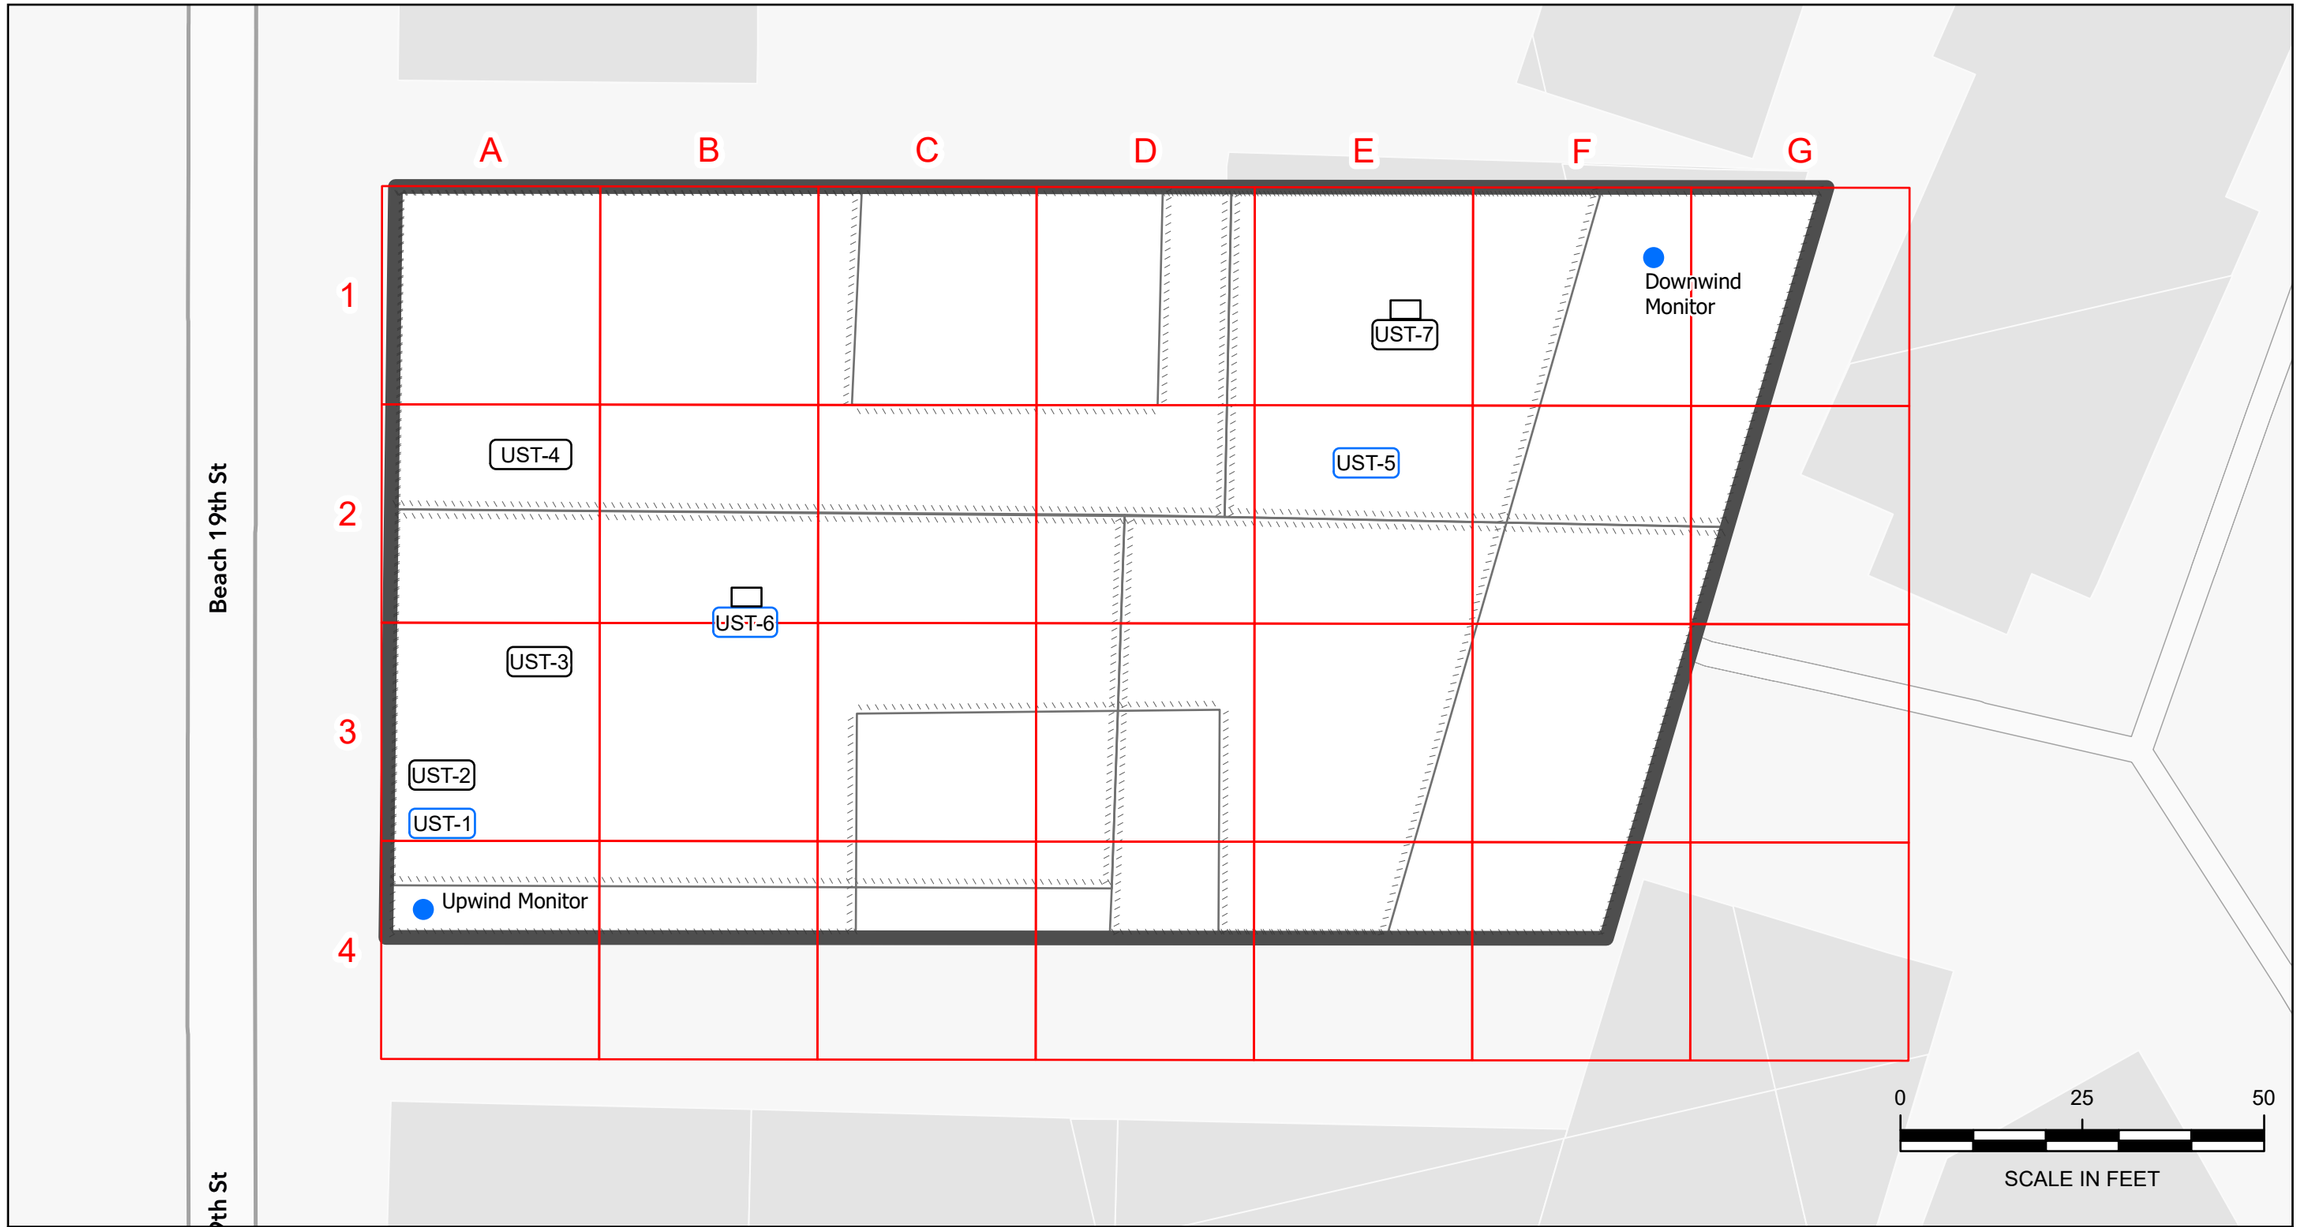

**SOE installation (Grids D2 and E2)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, accepting deliveries, and installation of support of excavation (SOE).

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: B1, A2 and A3.

No material was imported or exported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

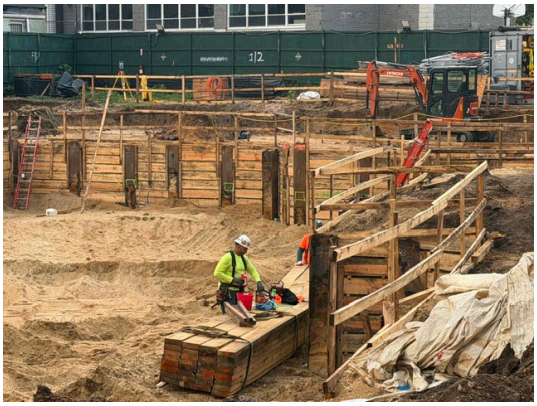

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

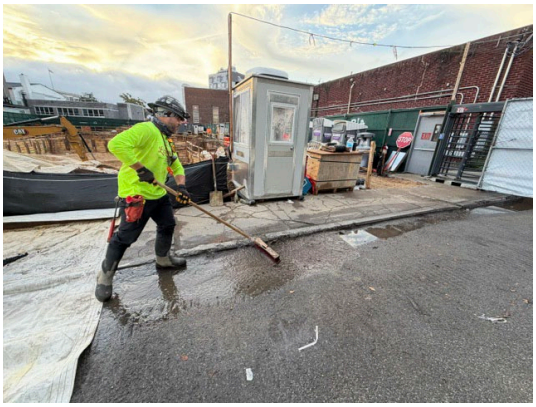

**SOE installation (Grid D2)**

**Material deliveries to the site (Grid A1)**

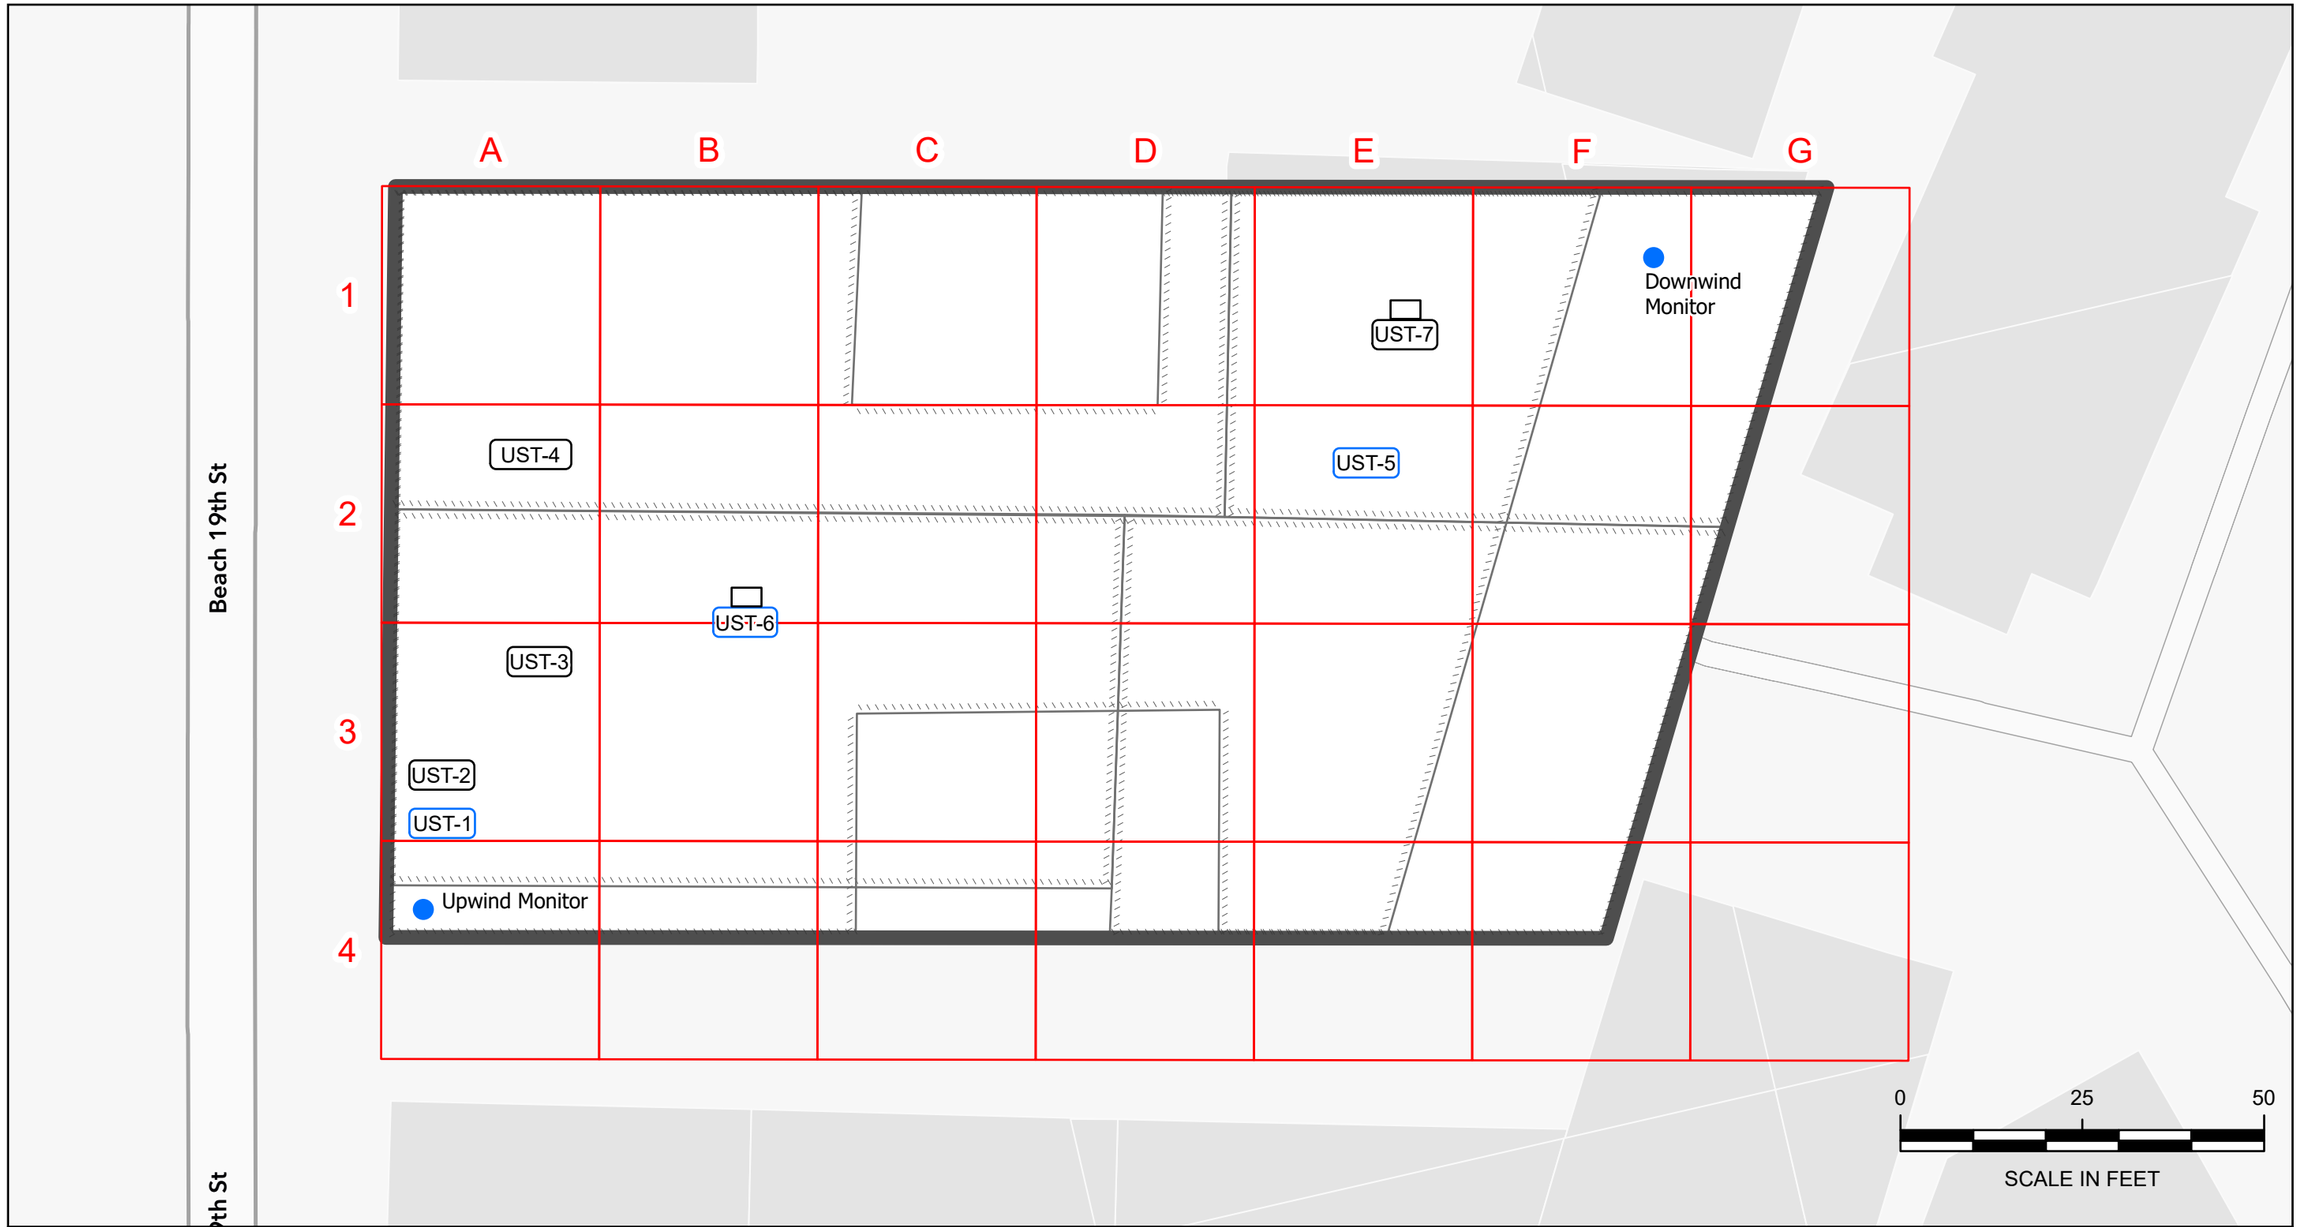

**CAMP and silt fence (Grid F1)**

**Maintaining Beach 19th Street (Grid A3)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

No remedial action services were conducted.

No material was imported or exported.

**C) Sampling Events**

No samples were collected

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

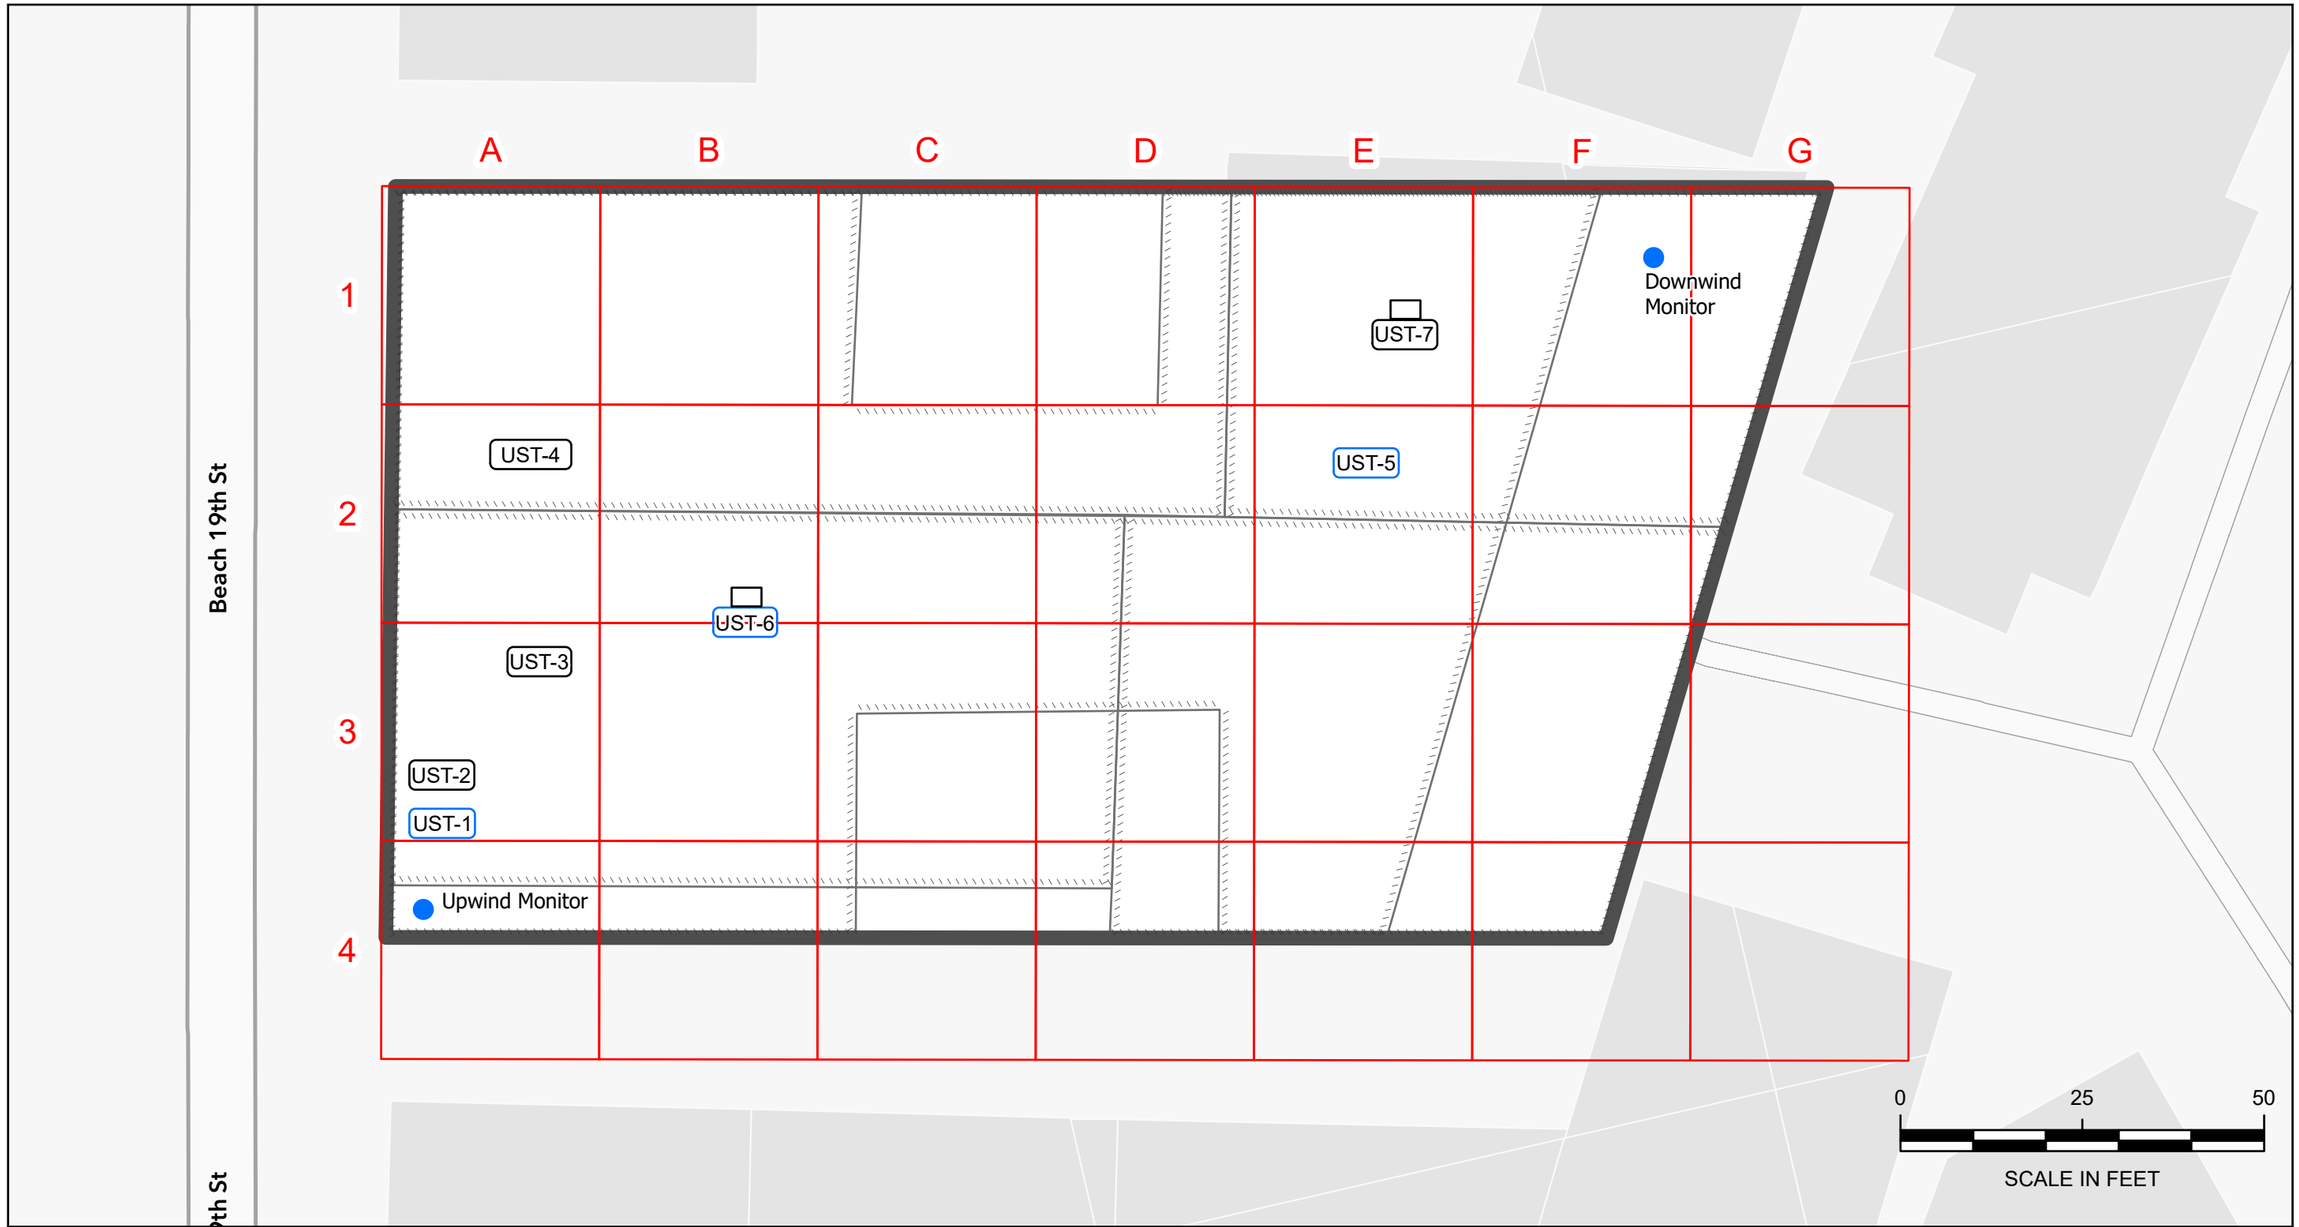

**General site conditions (Grid C3)**

**Maintaining soil stockpile (Grid A3)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

No remedial action services were conducted.

No material was imported or exported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

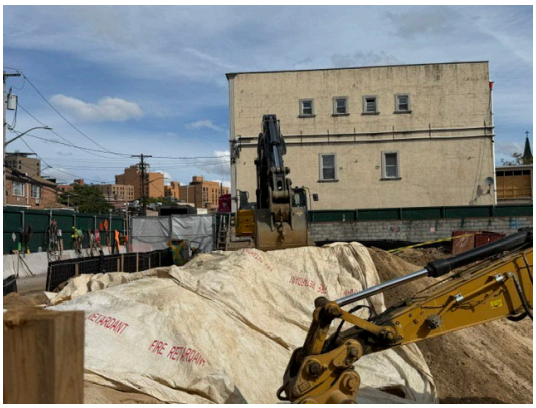

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

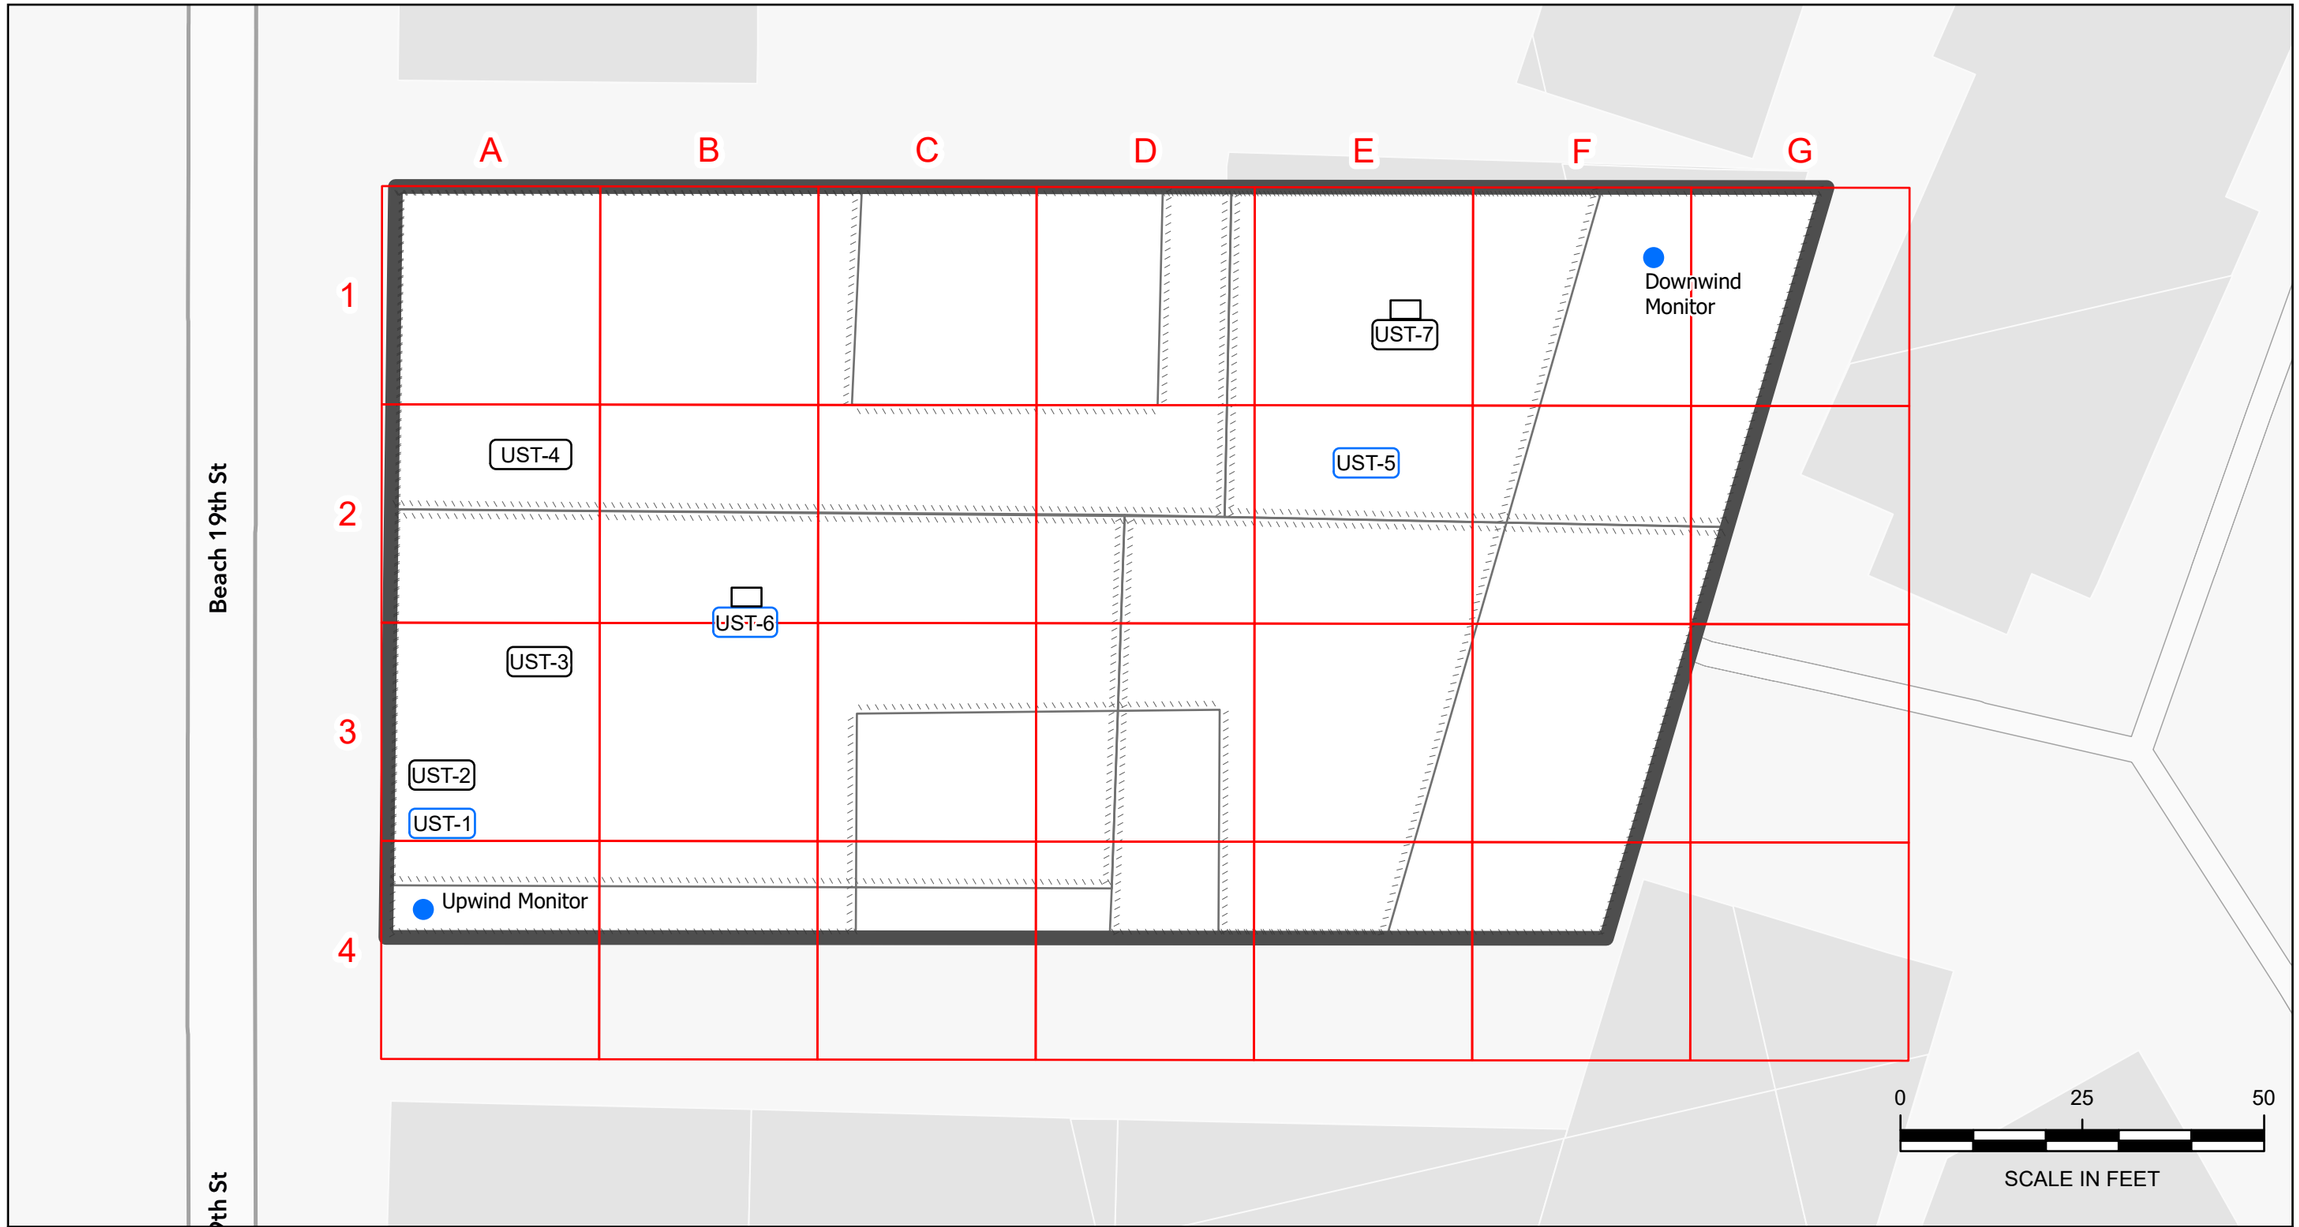

**General site conditions (Grid C3)**

**Maintaining soil stockpile (Grid A3)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance and the demolition of a brick wall along the northern site boundary.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A1, B1 and C1.

Two truckloads of brick and concrete debris were disposed off-site at Inwood Material Terminal LLC. No material was imported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

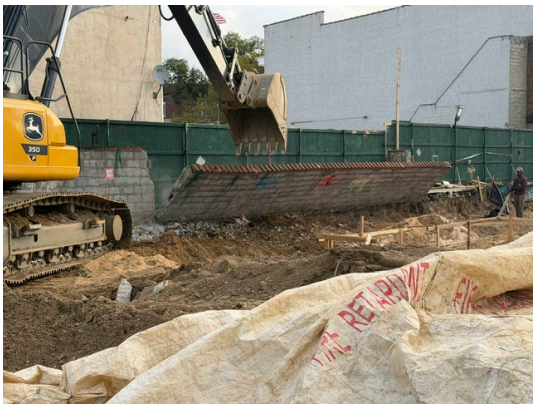

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

**Wall demolition (Gridline 1)**

**Wall demolition (Gridline 1)**

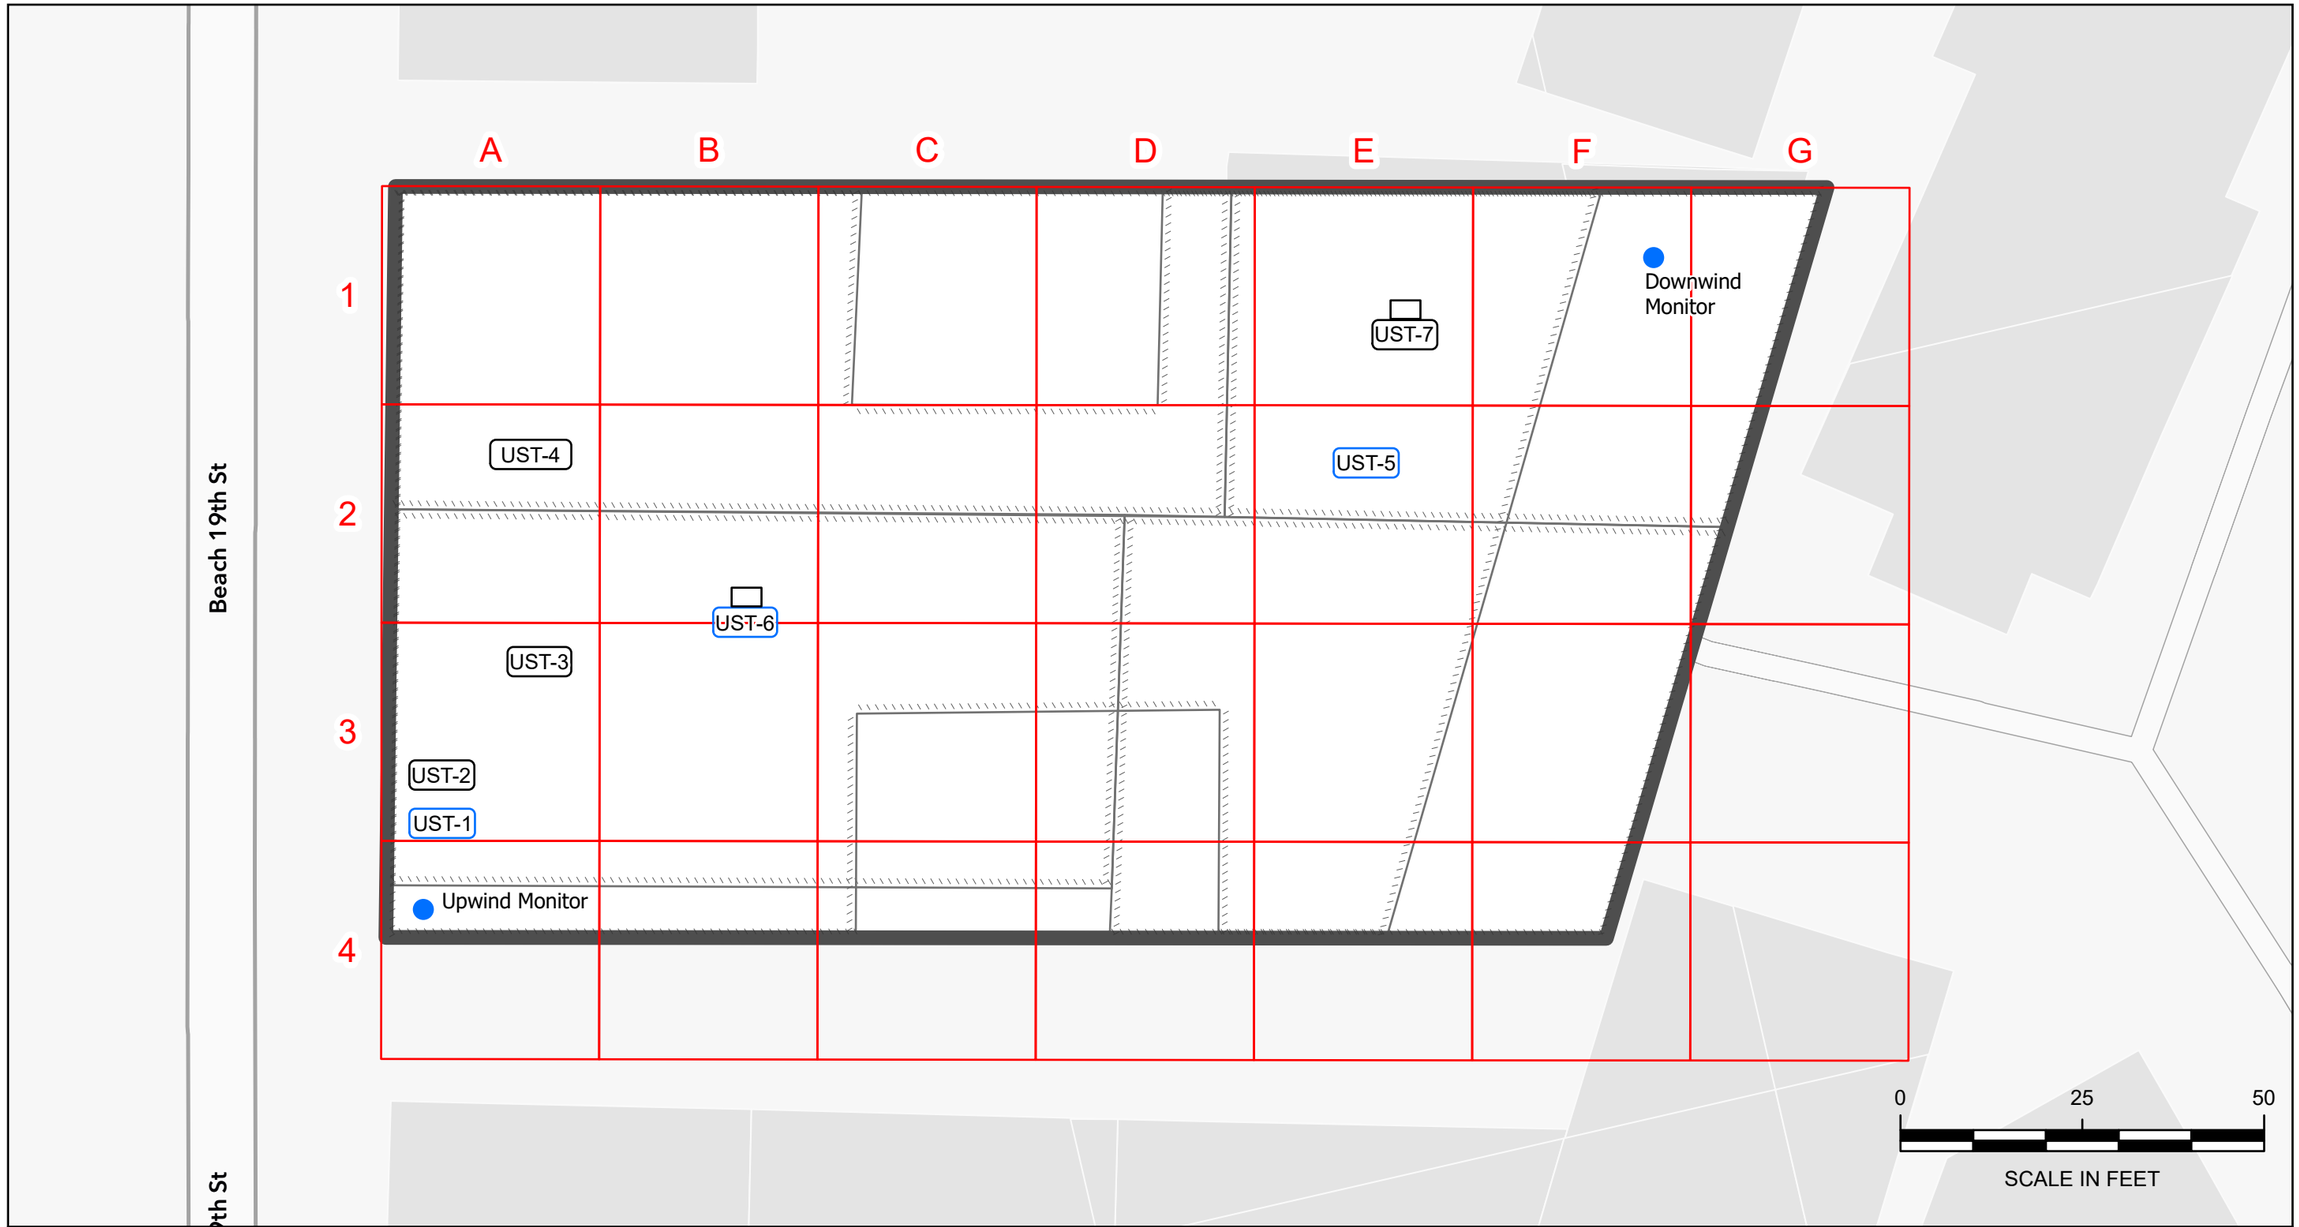

**Loading trucks for off-site disposal of demolition debris (Grid A1)**

**Maintaining silt fence (Gridline 1)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

No remedial action services were conducted.

No material was imported or exported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

Representative photographs from the reporting period are shown below.

**General site conditions (Grid C3)**

**Maintaining silt fence (Gridline 1)**

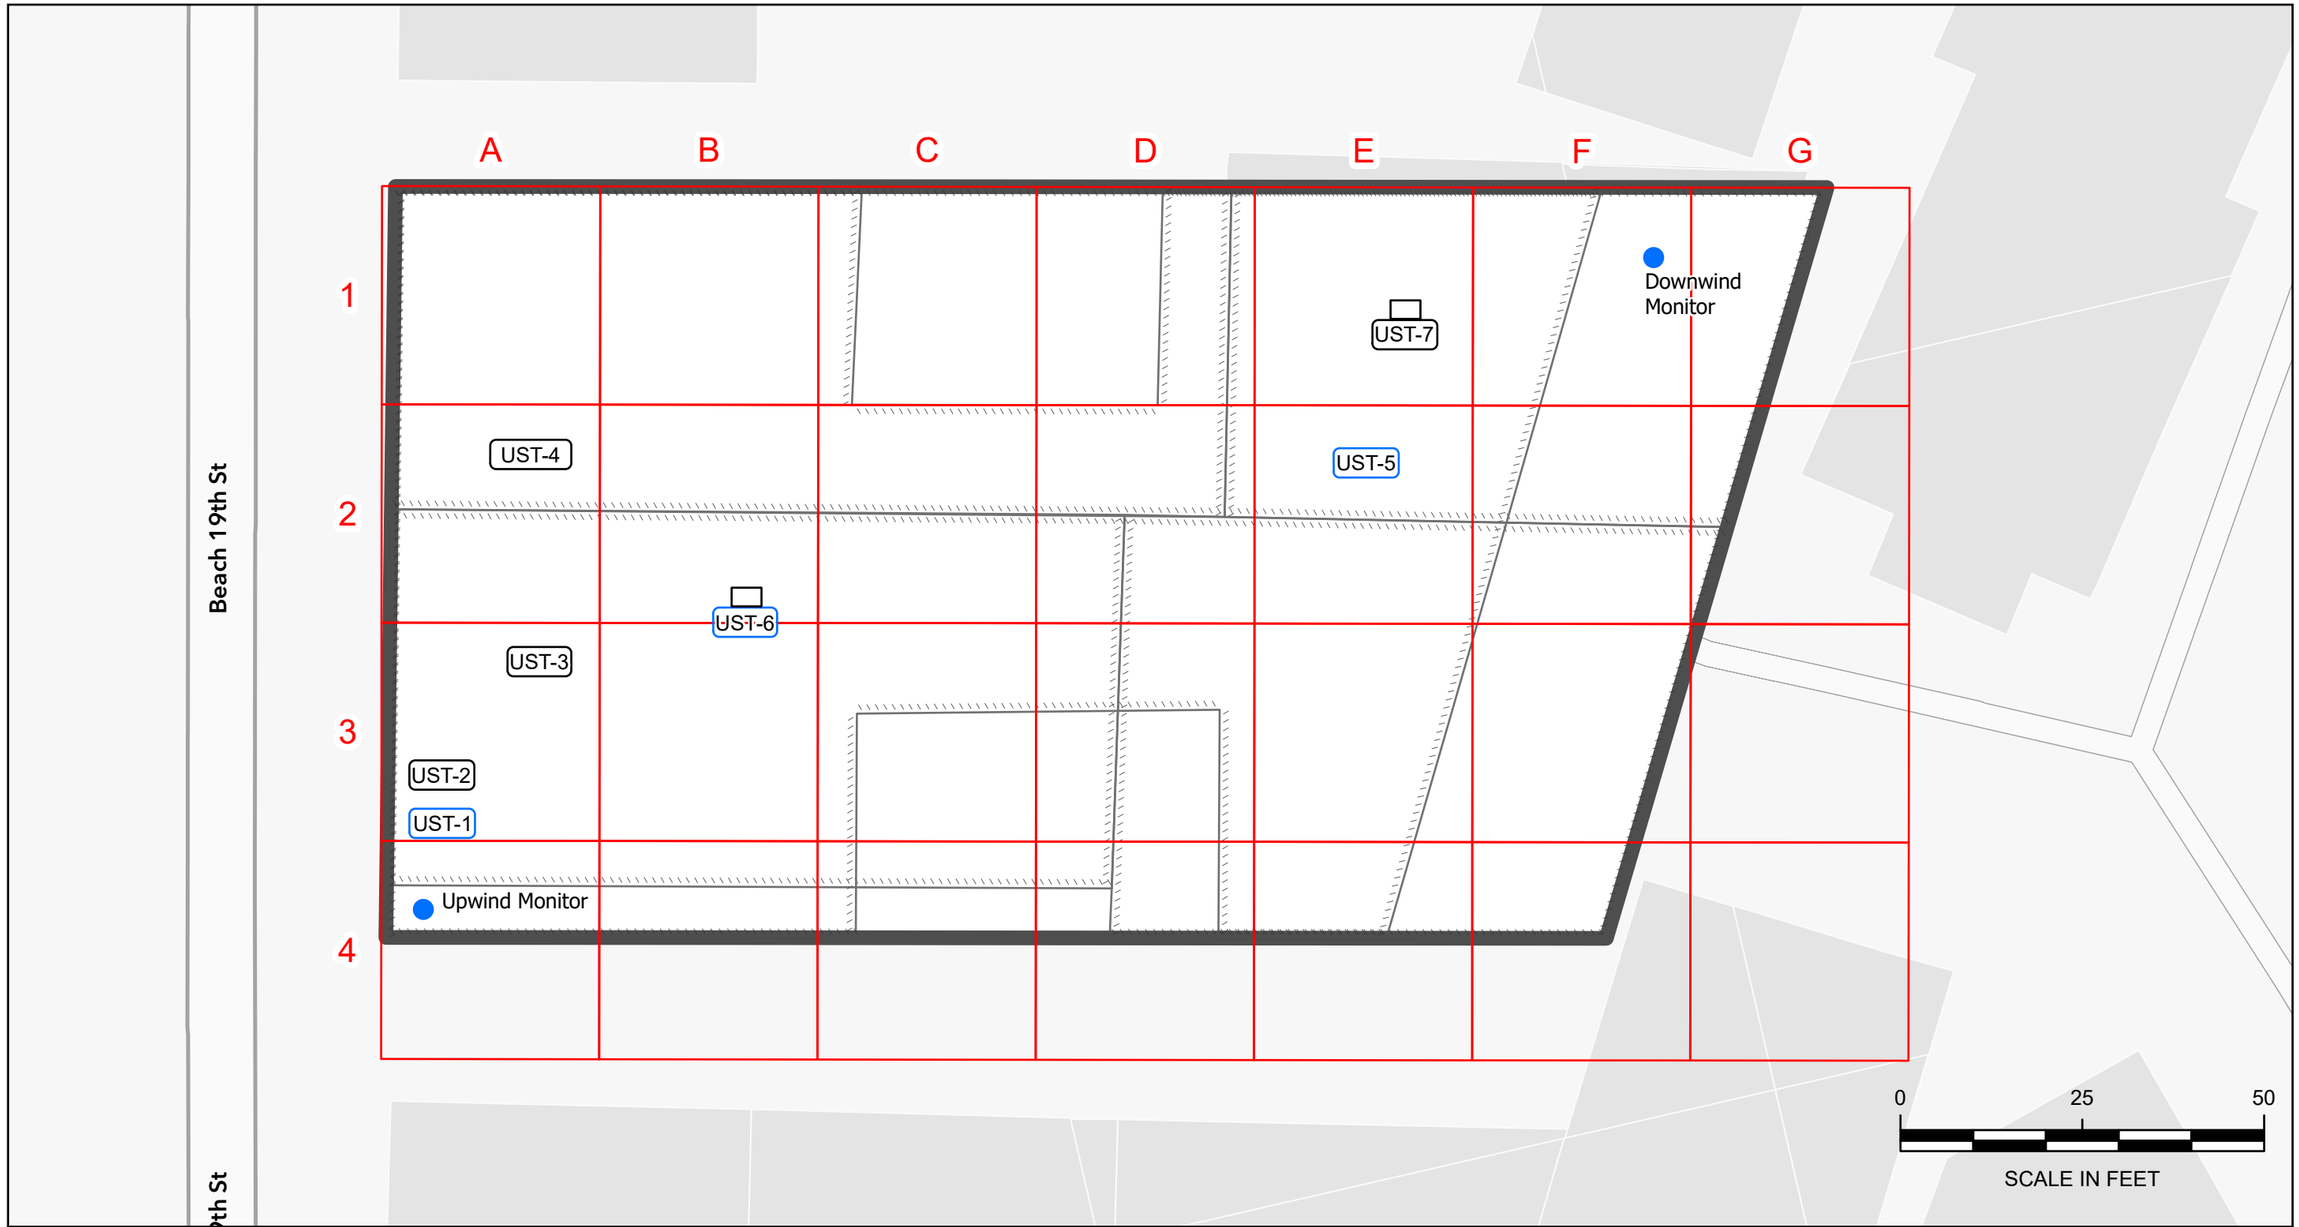

**Maintaining silt fence (Gridline A)**

**Inspection of sediment controls at storm drain inlet (off-site)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

No remedial action services were conducted.

No material was imported or exported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

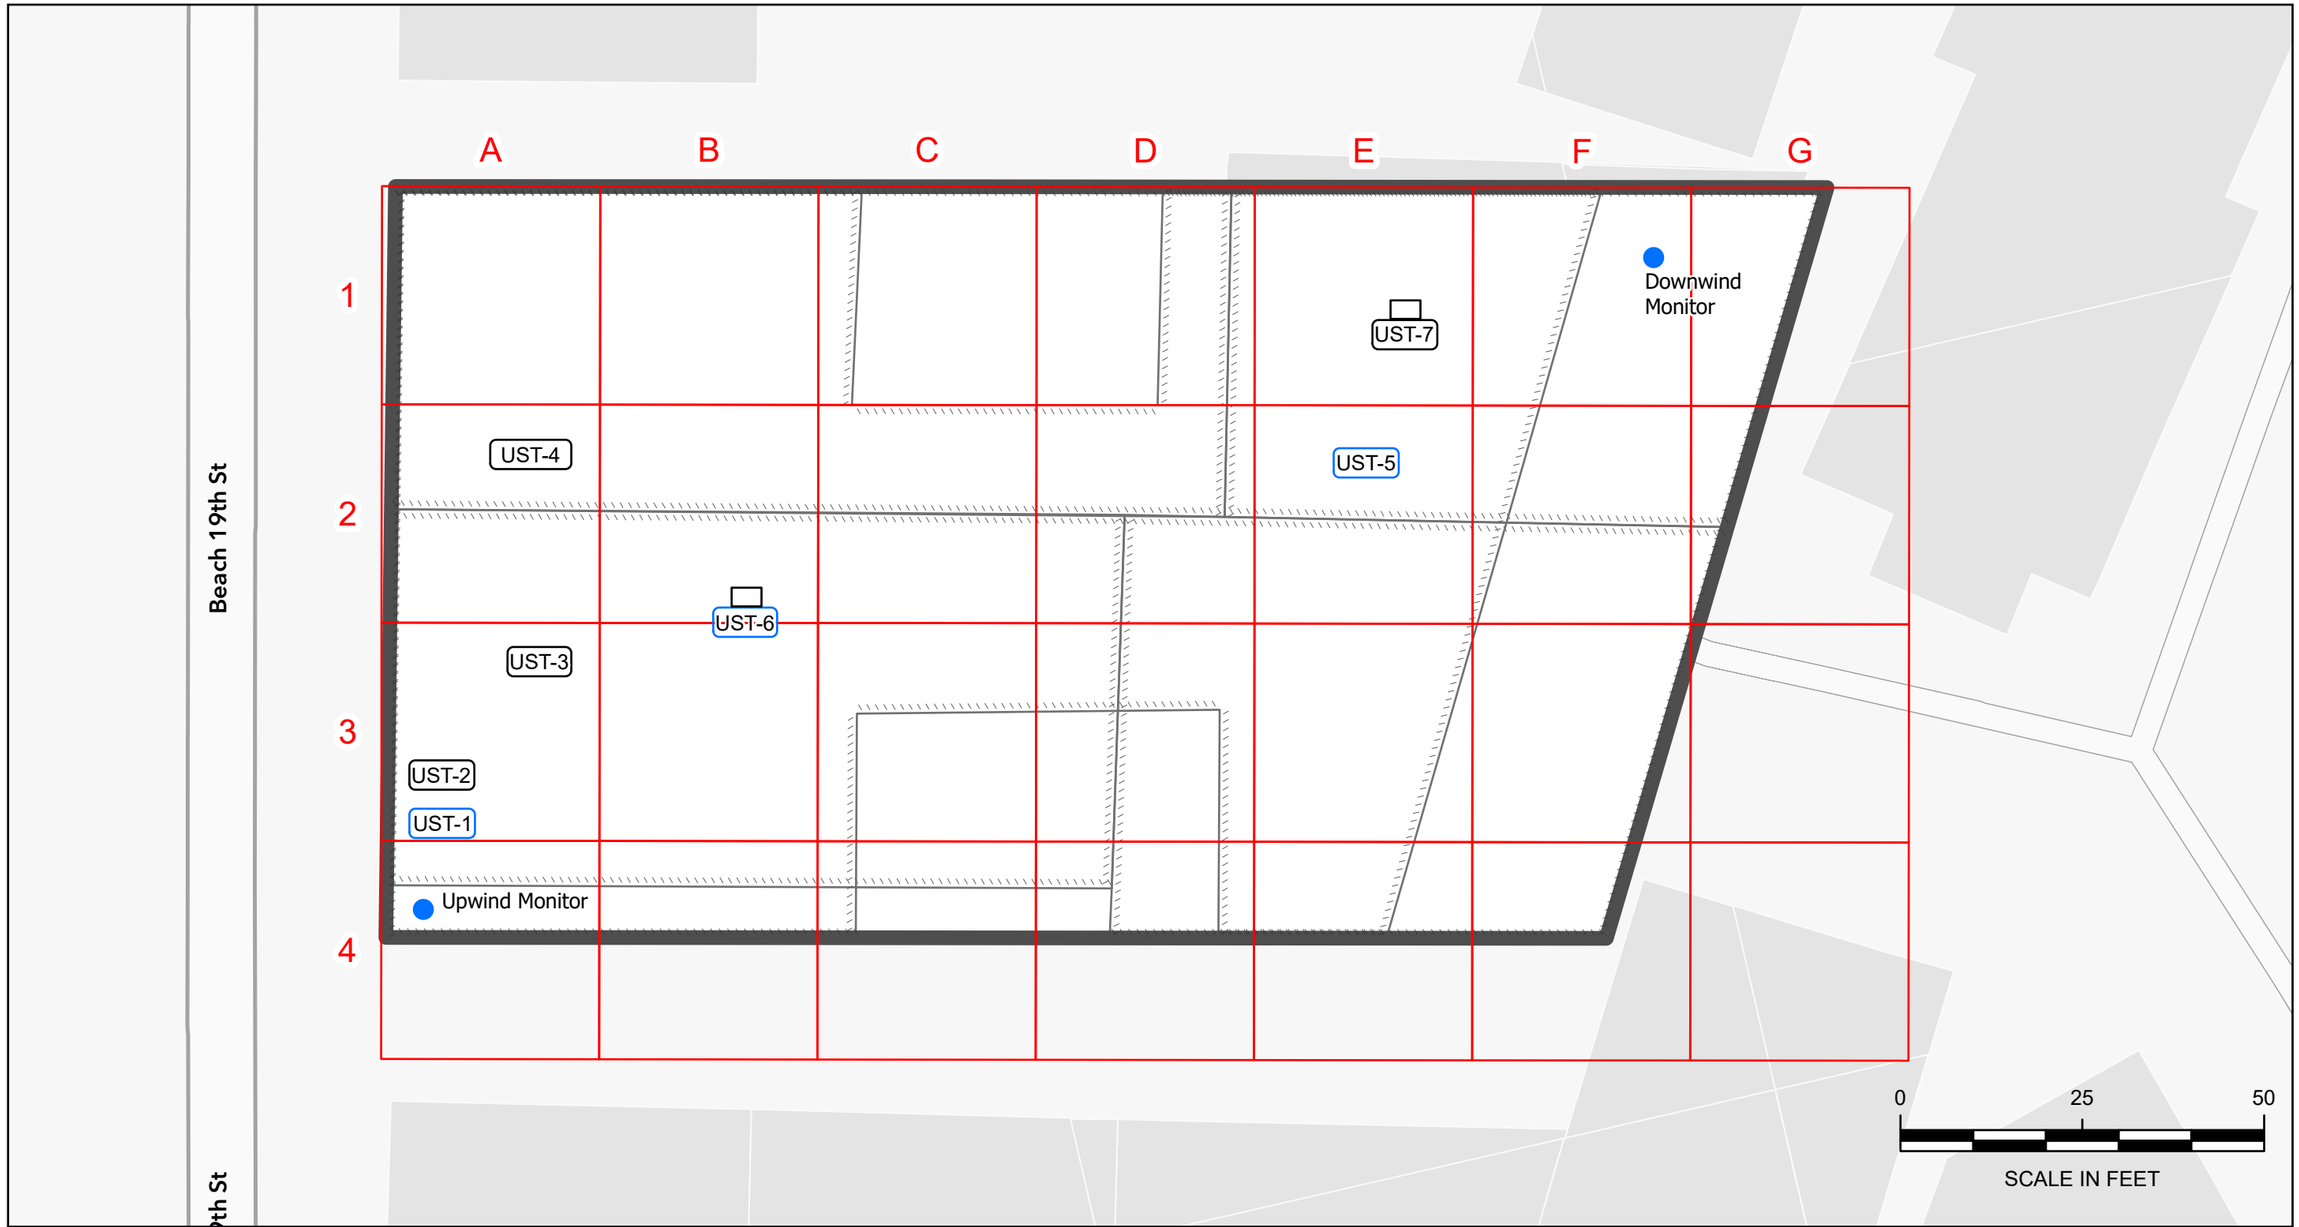

**F) Photographs**

Representative photographs from the reporting period are shown below.

**General site conditions (Grid C3)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids: A2, A4, B4 and D2-F2.

Excavated soil (three truckloads for construction purposes [from grid E1, previously stockpiled at A3] and three truckloads for remedial purposes [from grid A2, live loaded]) was disposed off-site at Impact Reuse and Recovery Center, Lyndhurst, New Jersey (approval #21182-01-01-1001). No material was imported.

**C) Sampling Events**

No samples were collected.

**D) General Compliance with RAWP/Encountered Problems**

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

**E) Upcoming Work**

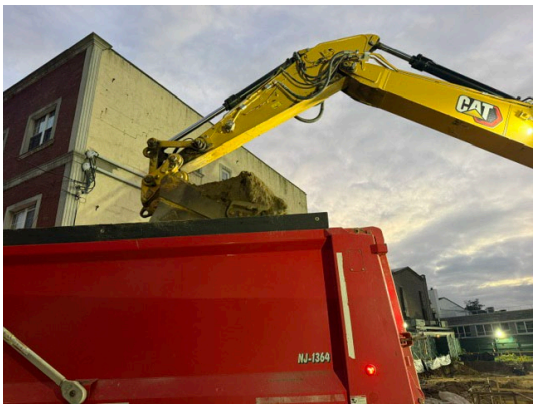

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

**F) Photographs**

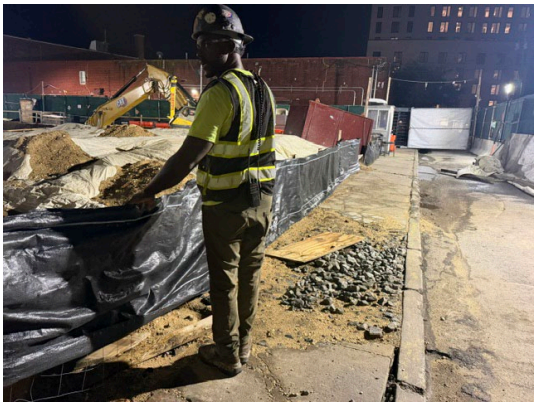

Representative photographs from the reporting period are shown below.

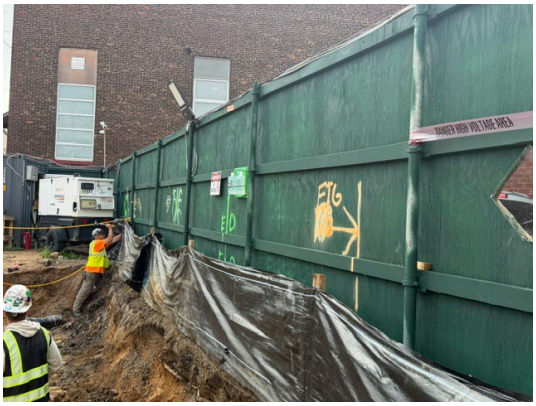

**Loading trucks for off-site disposal (Grid A1)**

**Loading trucks for off-site disposal (Grid A1)**

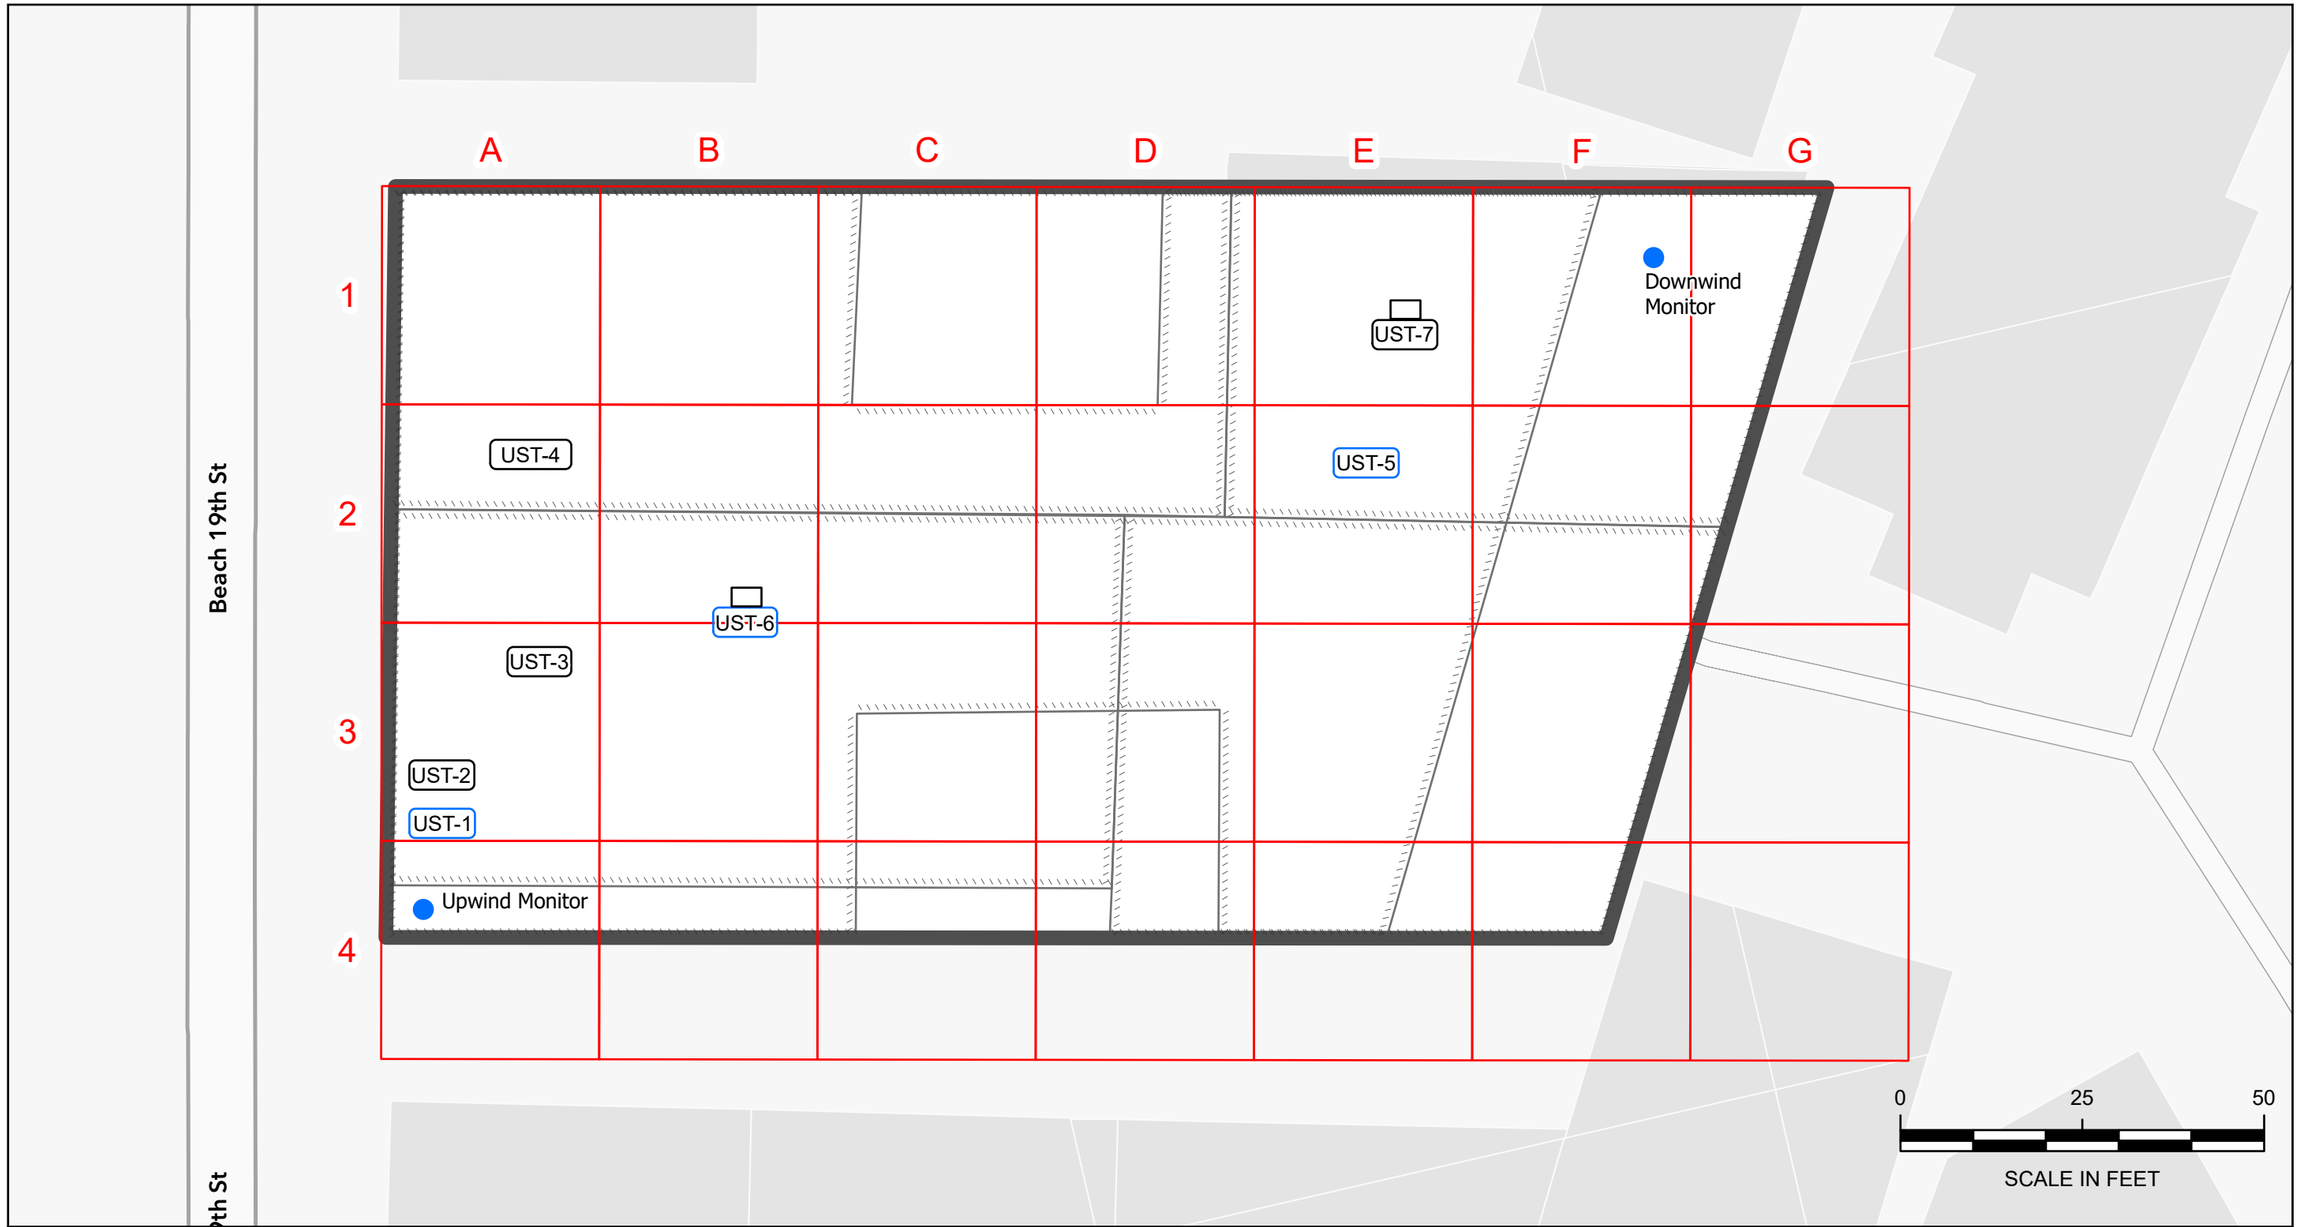

**Maintaining silt fence (Gridline A)**

**Maintaining silt fence (Gridline 4)**

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

**A) Overview of Remedial Services Completed During Reporting Period**

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, end point sampling, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

**B) Locations of Work and Quantities of Material Imported and Exported**

Grids A2, A3, B2, B3, C1-C4, D1, D4, E3, E4, F3, and F4.

Excavated soil (five truckloads for construction purposes [from grids A4 (1 truckload) and B4 (4 truckloads)] and three truckloads for remedial purposes [from grid C1] were live loaded and disposed off-site at Impact Reuse and Recovery Center, Lyndhurst, New Jersey (approval #21182-01-01-1001). Six truckloads of brick and concrete debris were disposed off-site at Inwood Material Terminal LLC. No material was imported.

### C) Sampling Events

The following endpoint samples were collected:

| Sample | Depth (feet) |
|---|---|
| EP-A3 | surface |
| EP-B3 B | 6 |
| EP-B3 N | 3 |
| EP-B3 E | 3 |
| EP-B3 S | 3 |
| EP-B3 W | 3 |
| EP-C3 | surface |

| Sample | Depth (feet) |
|---|---|
| EP-C1 B | 6 |
| EP-C1 N | 3 |
| EP-C1 E | 3 |
| EP-C1 S | 3 |
| EP-C1 W | 3 |
| EP-B2-2 | 2 |
| EP-C2-2 | 2 |

| Sample | Depth (feet) |
|---|---|
| EP-C4-2 | 2 |
| EP-D1-2 | 2 |
| EP-D4-2 | 2 |
| EP-E3-2 | 2 |
| EP-E4-2 | 2 |
| EP-F3-2 | 2 |
| EP-F4-2 | 2 |

### D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. A particulate exceedance was recorded at the downwind monitor due to street sweeping. Water was used for dust suppression and site activities were halted until particulate levels stabilized. There were no other exceedances of action levels for dust or VOCs.

### E) Upcoming Work

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

### F) Photographs

Representative photographs from the reporting period are shown below.

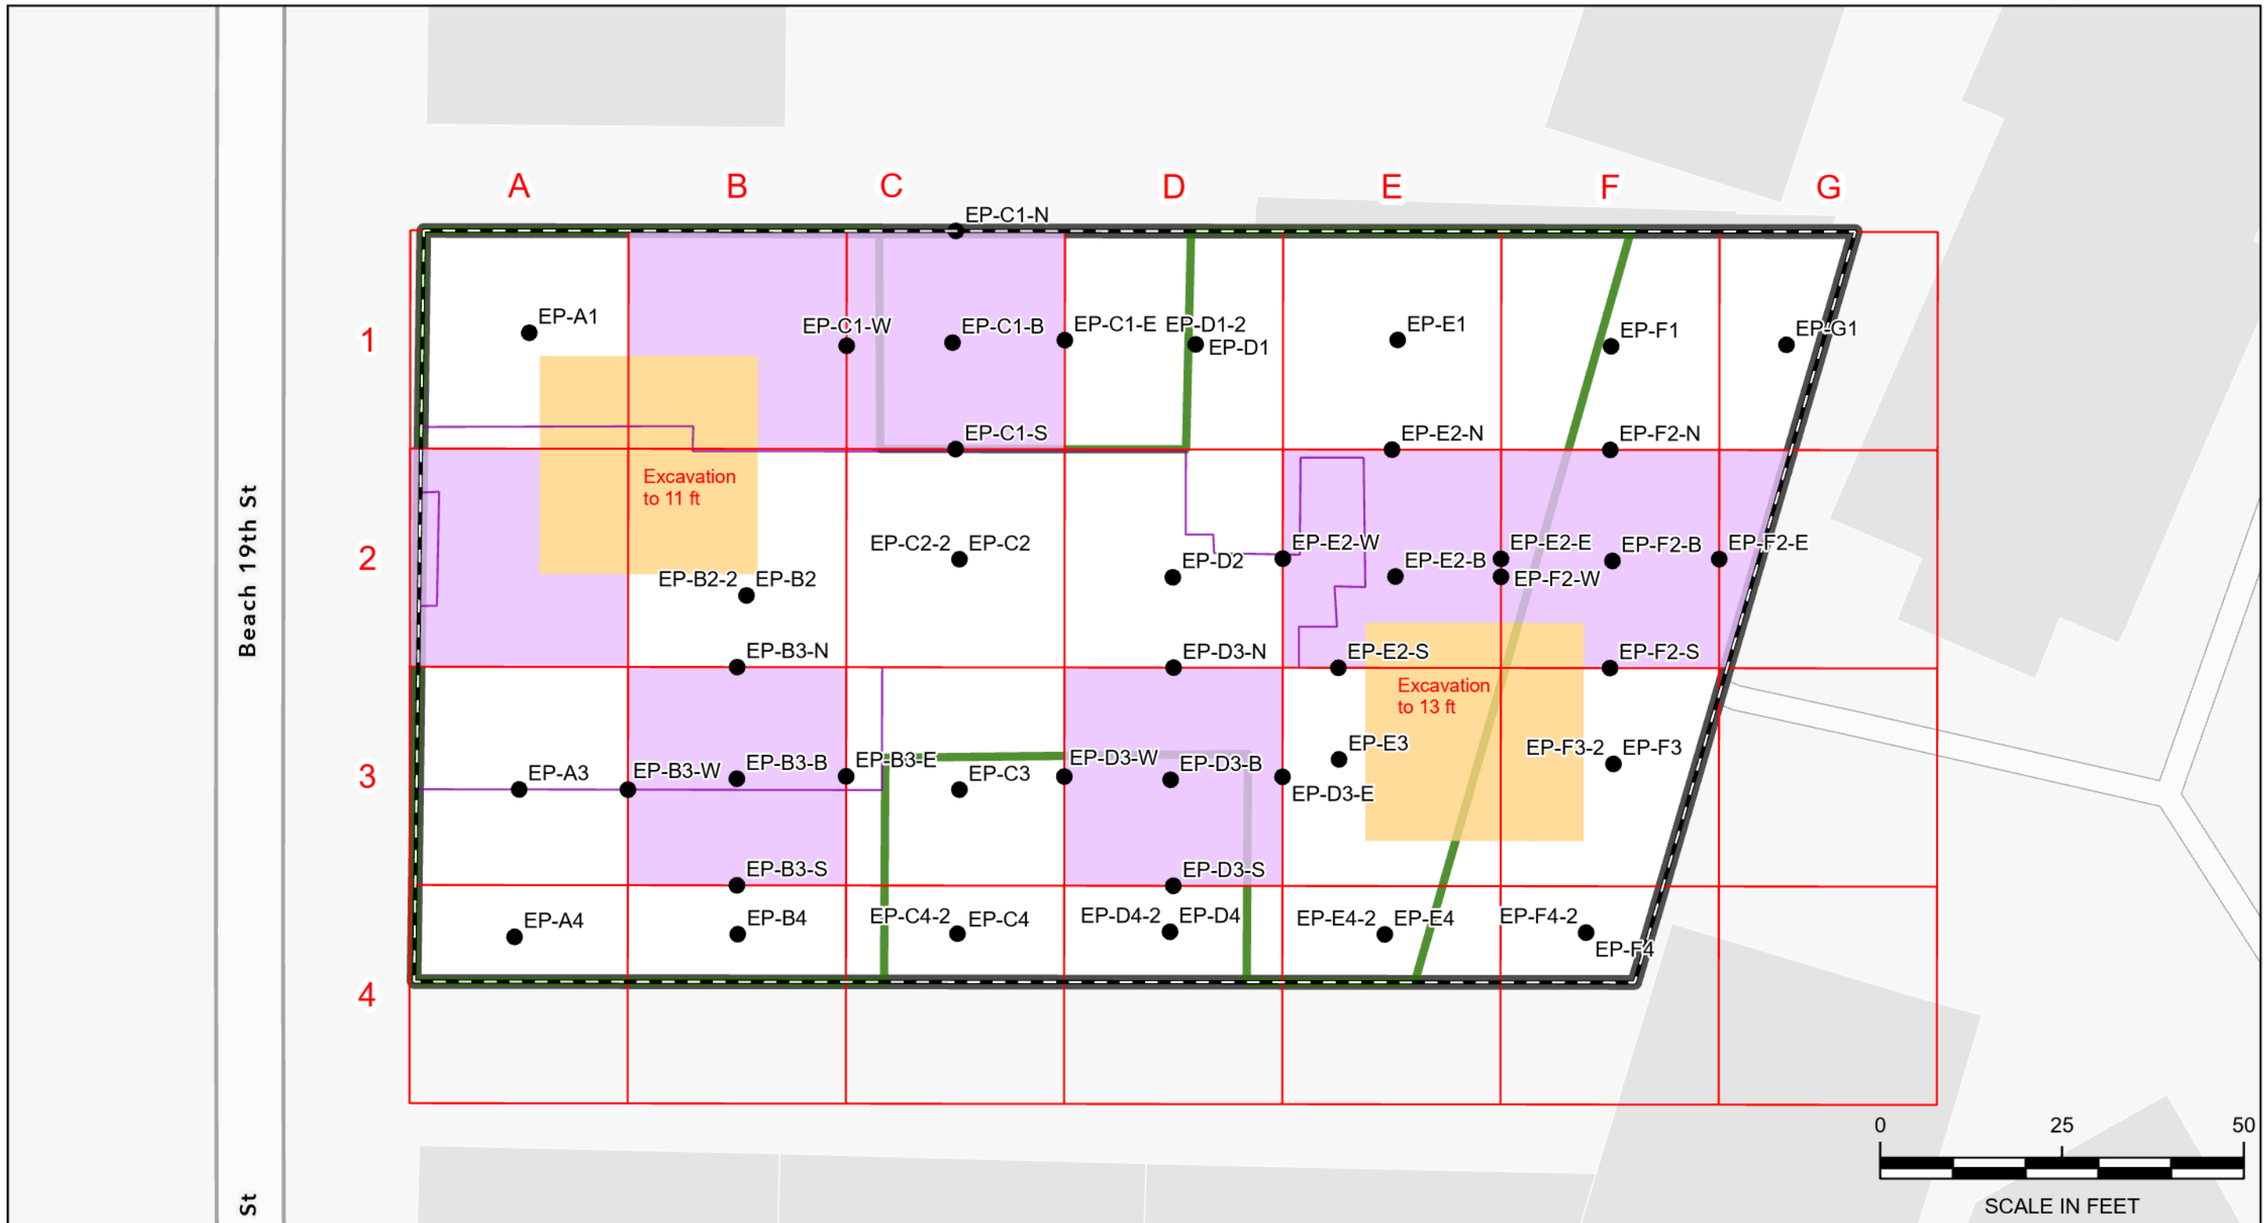

**Loading trucks for off-site soil disposal (Grid A2)**

**Soil compaction (Grid B3)**
