RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, end point sampling, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids A2, B1 and C1.

Five truckloads of soil were live loaded for remedial purposes from grid A2 (1 truckload), grid B1 (3 truckloads) and grid C1 (1 truckload) and disposed off-site at Impact Reuse and Recovery Center, Lyndhurst, New Jersey (approval #21182-01-01-1001). Two truckloads of brick and concrete debris were disposed off-site at Inwood Material Terminal LLC.

No material was imported.

C) Sampling Events

The following endpoint samples were collected:

Sample	Depth (feet)
EP-A2 B	6
EP-A2 N	3
EP-A2 E	3
EP-A2 S	3
EP-A2 W	3

Sample	Depth (feet)
EP-B1 B	6
EP-B1 N	3
EP-B1 E	3
EP-B1 S	3
EP-B1 W	3

D) General Compliance with RAWP/Encountered Problems

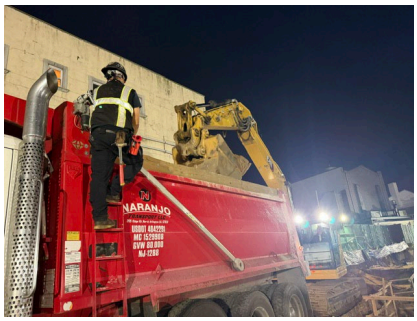

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

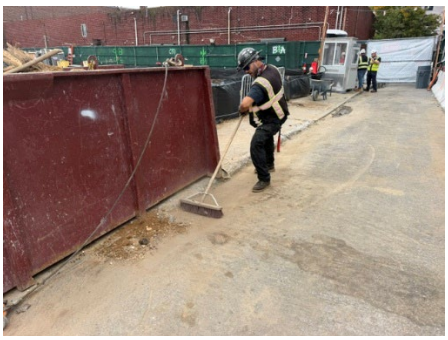

Loading trucks for off-site soil disposal (Grid A1)

CAMP and silt fence (Grid F1)

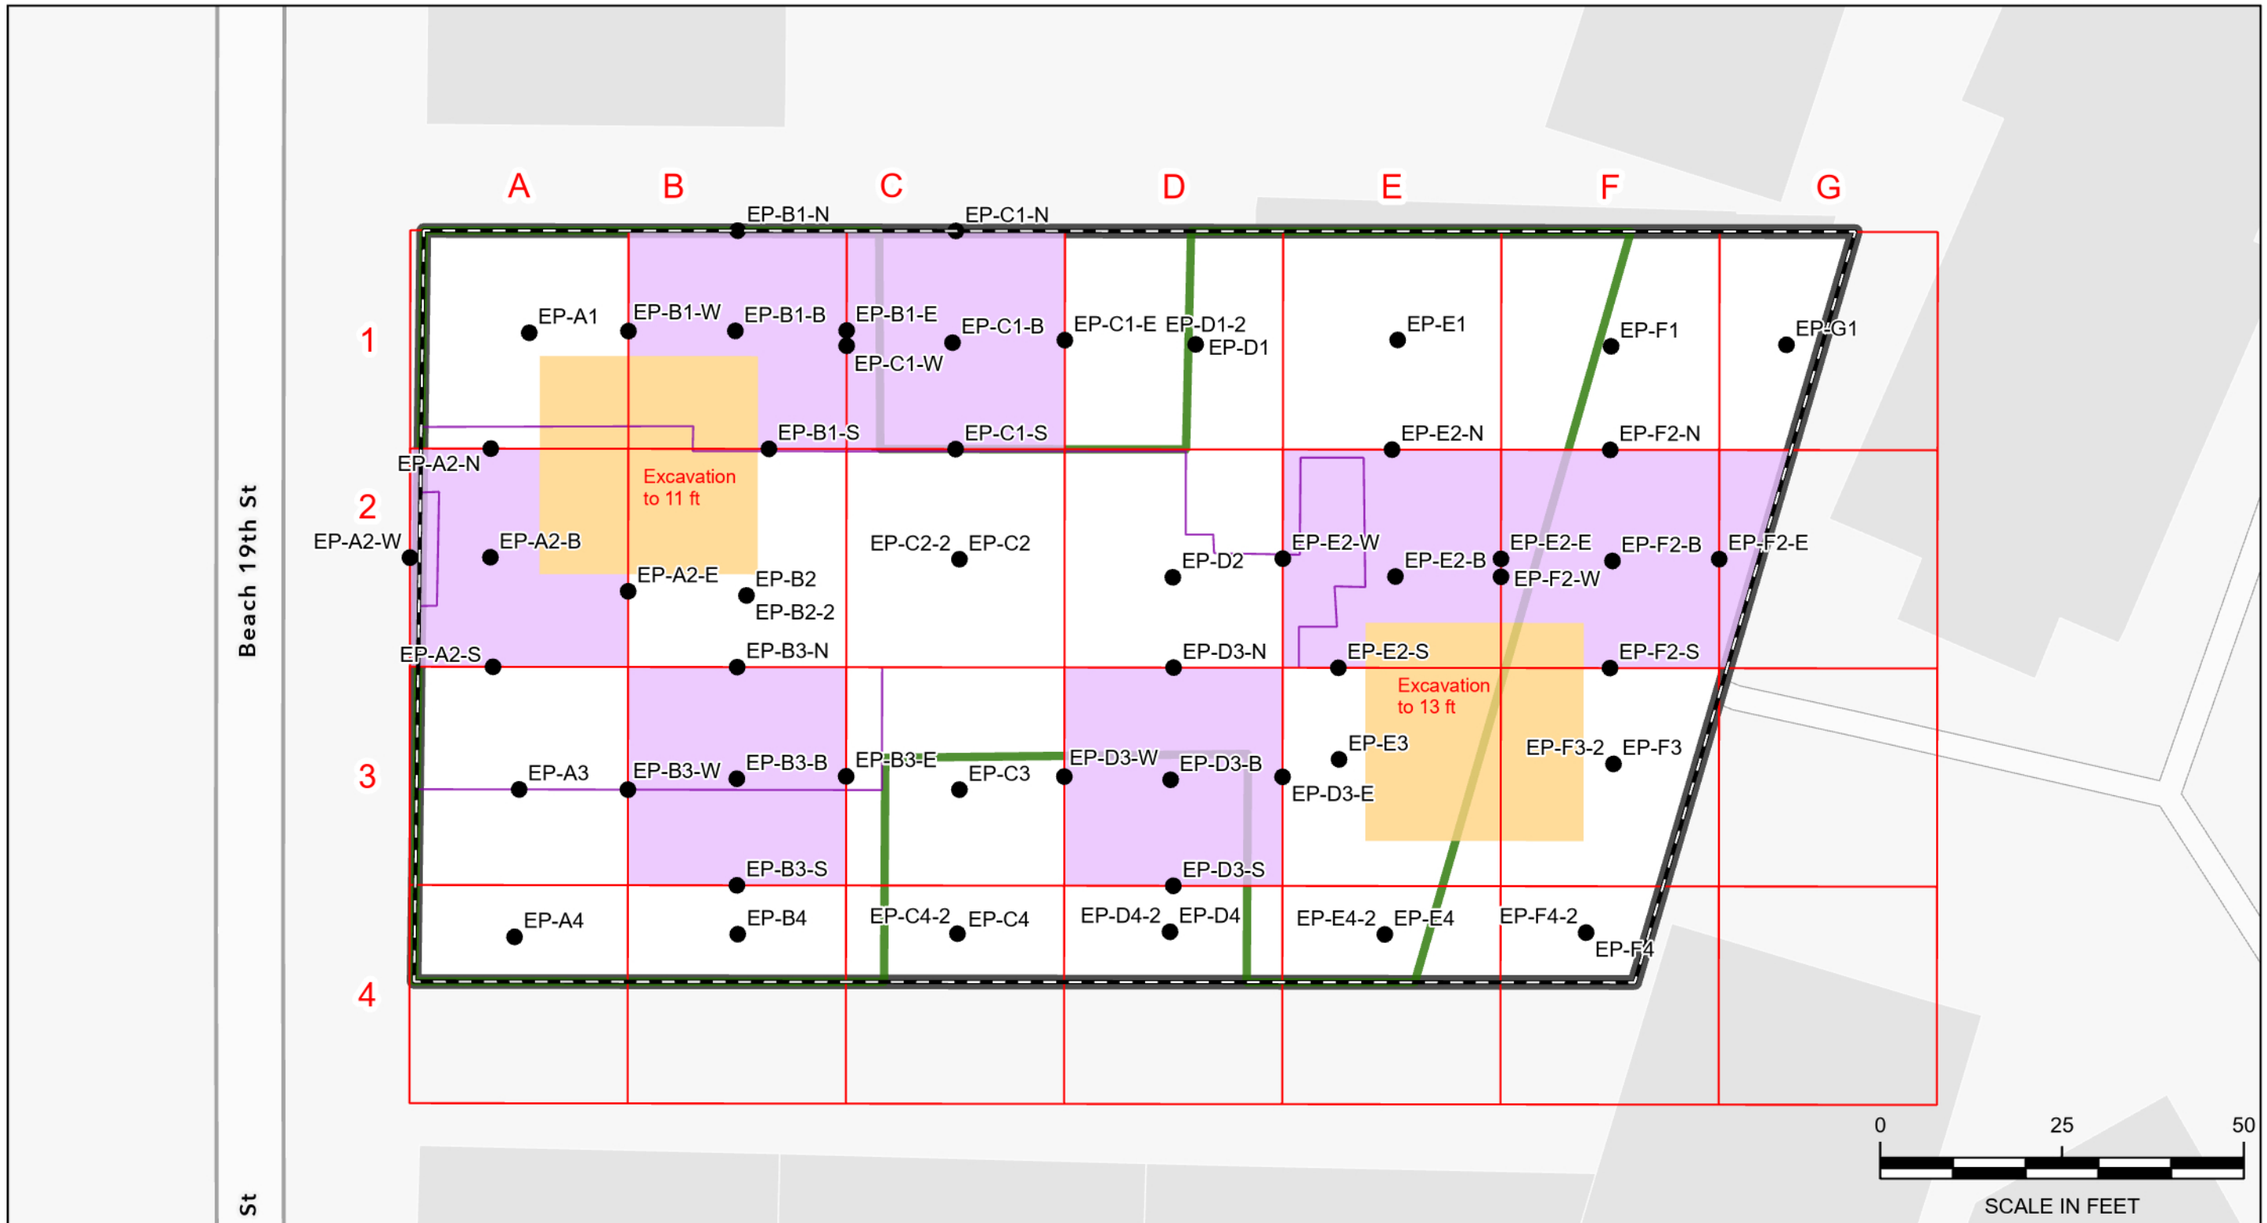

Separate PFAS cooler for endpoint samples (Grid A1)

Maintaining Beach 19th Street (Grid A3)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids A1-A3, C4 and D4

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

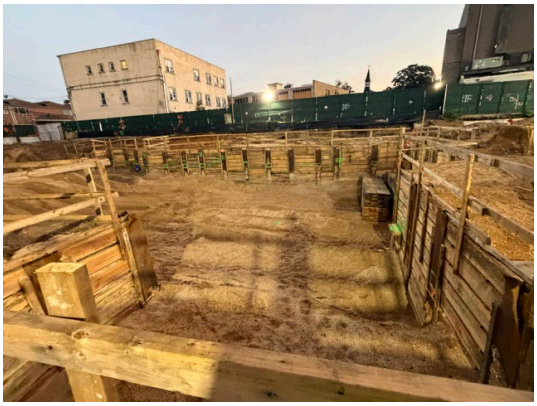

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

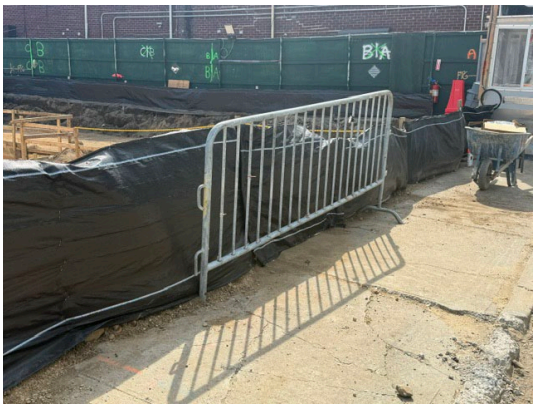

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

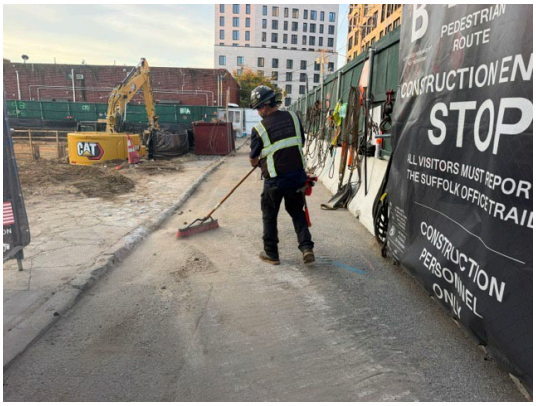

General site conditions (Grid C3)

Silt fence maintenance (Grid A3)

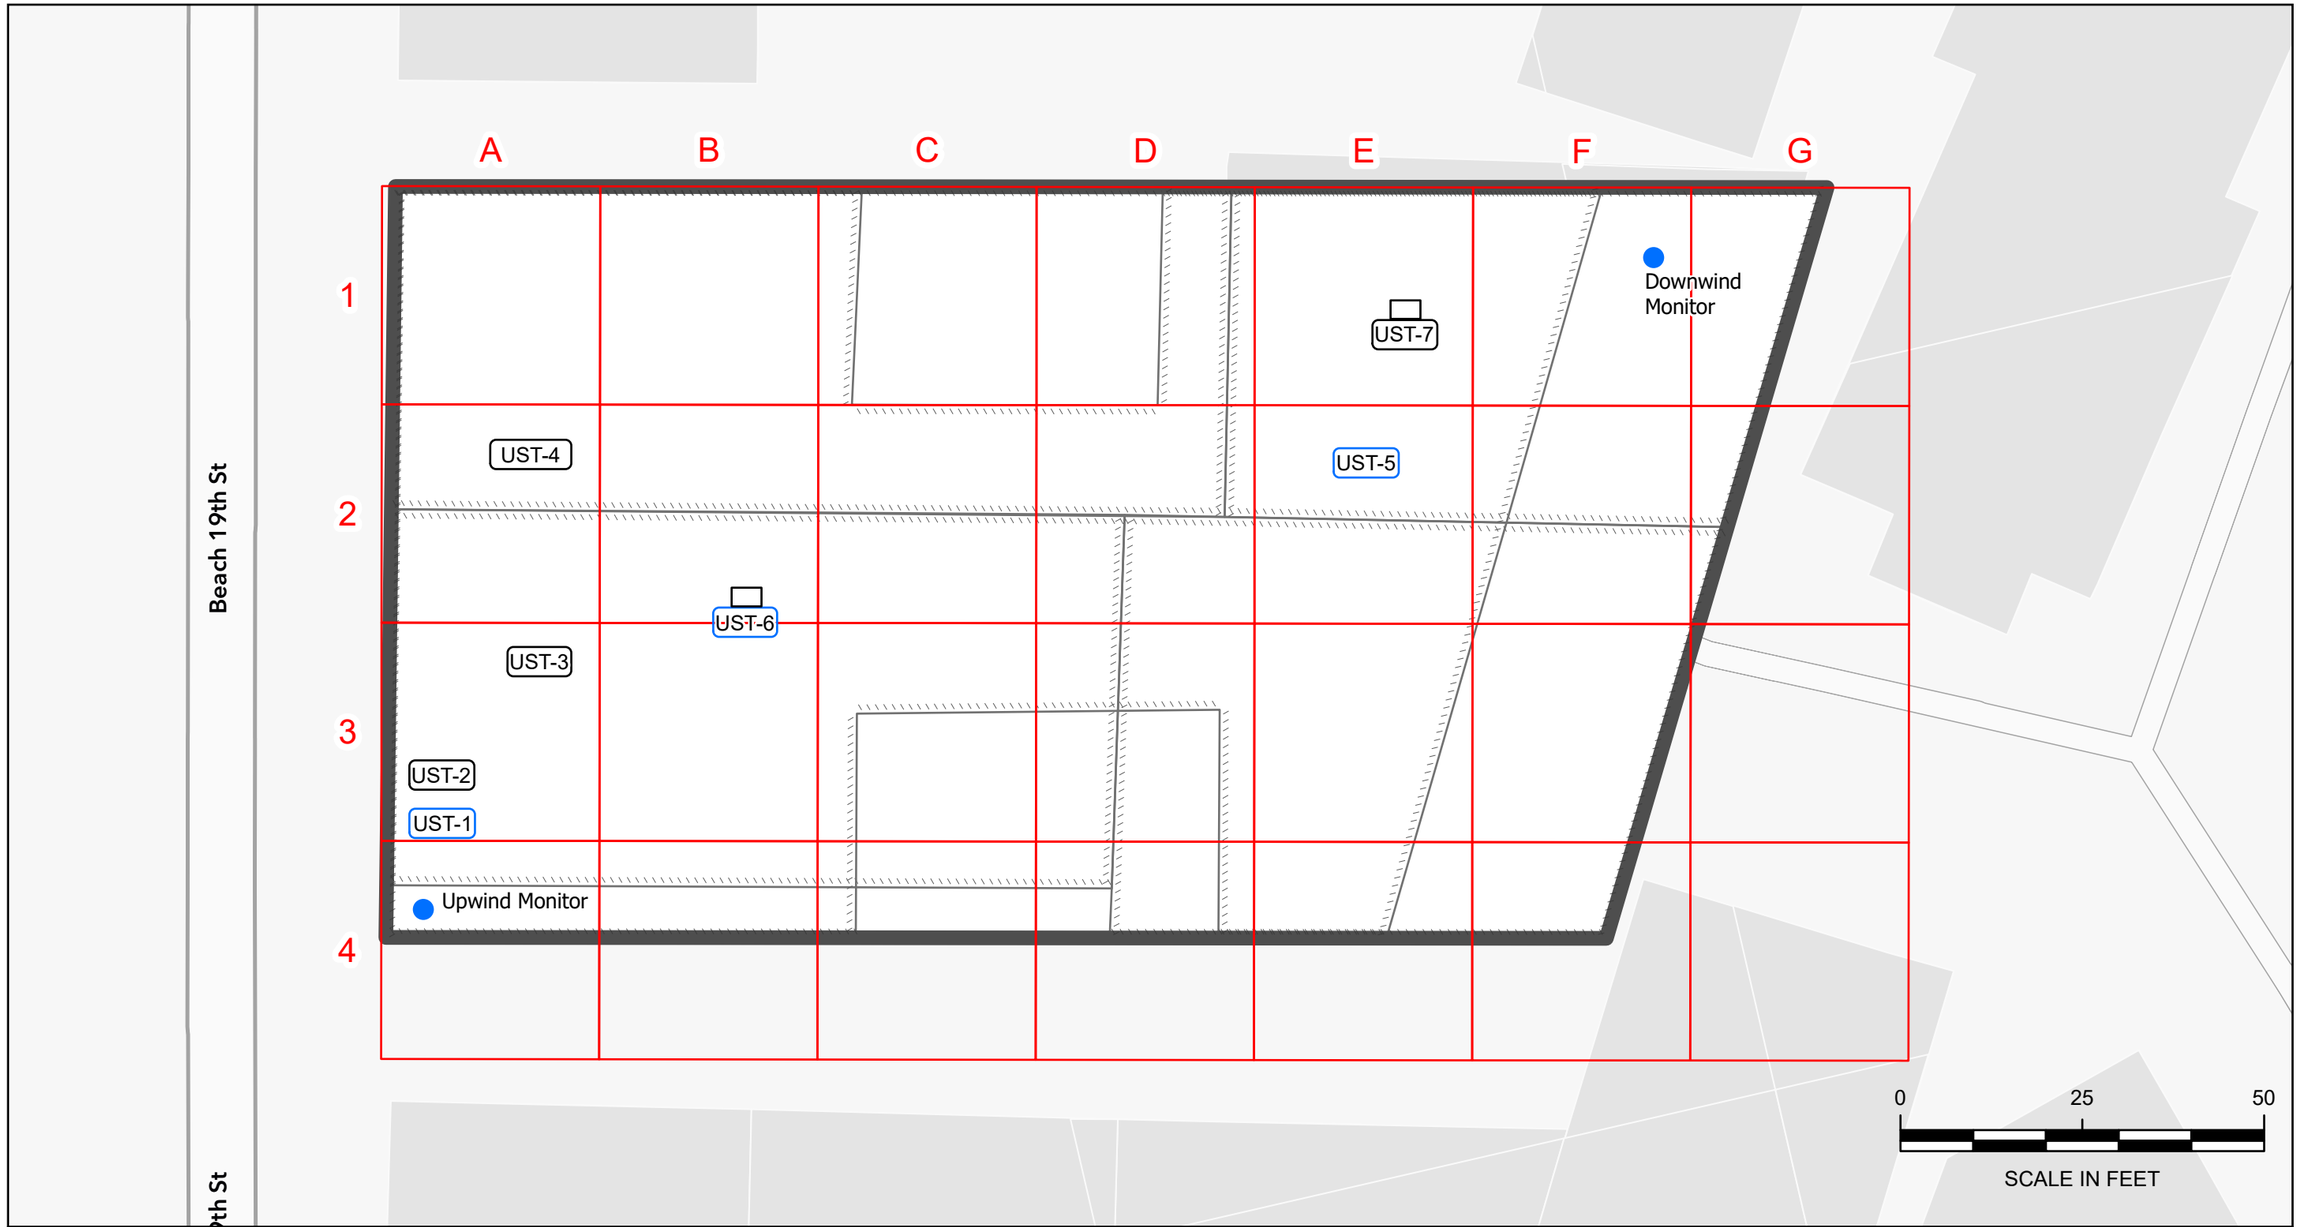

Inspection of sediment controls at storm drain inlet (off-site)

Maintaining Beach 19th Street (Grid A3)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Construction was limited to site maintenance, only. No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of support of excavation, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

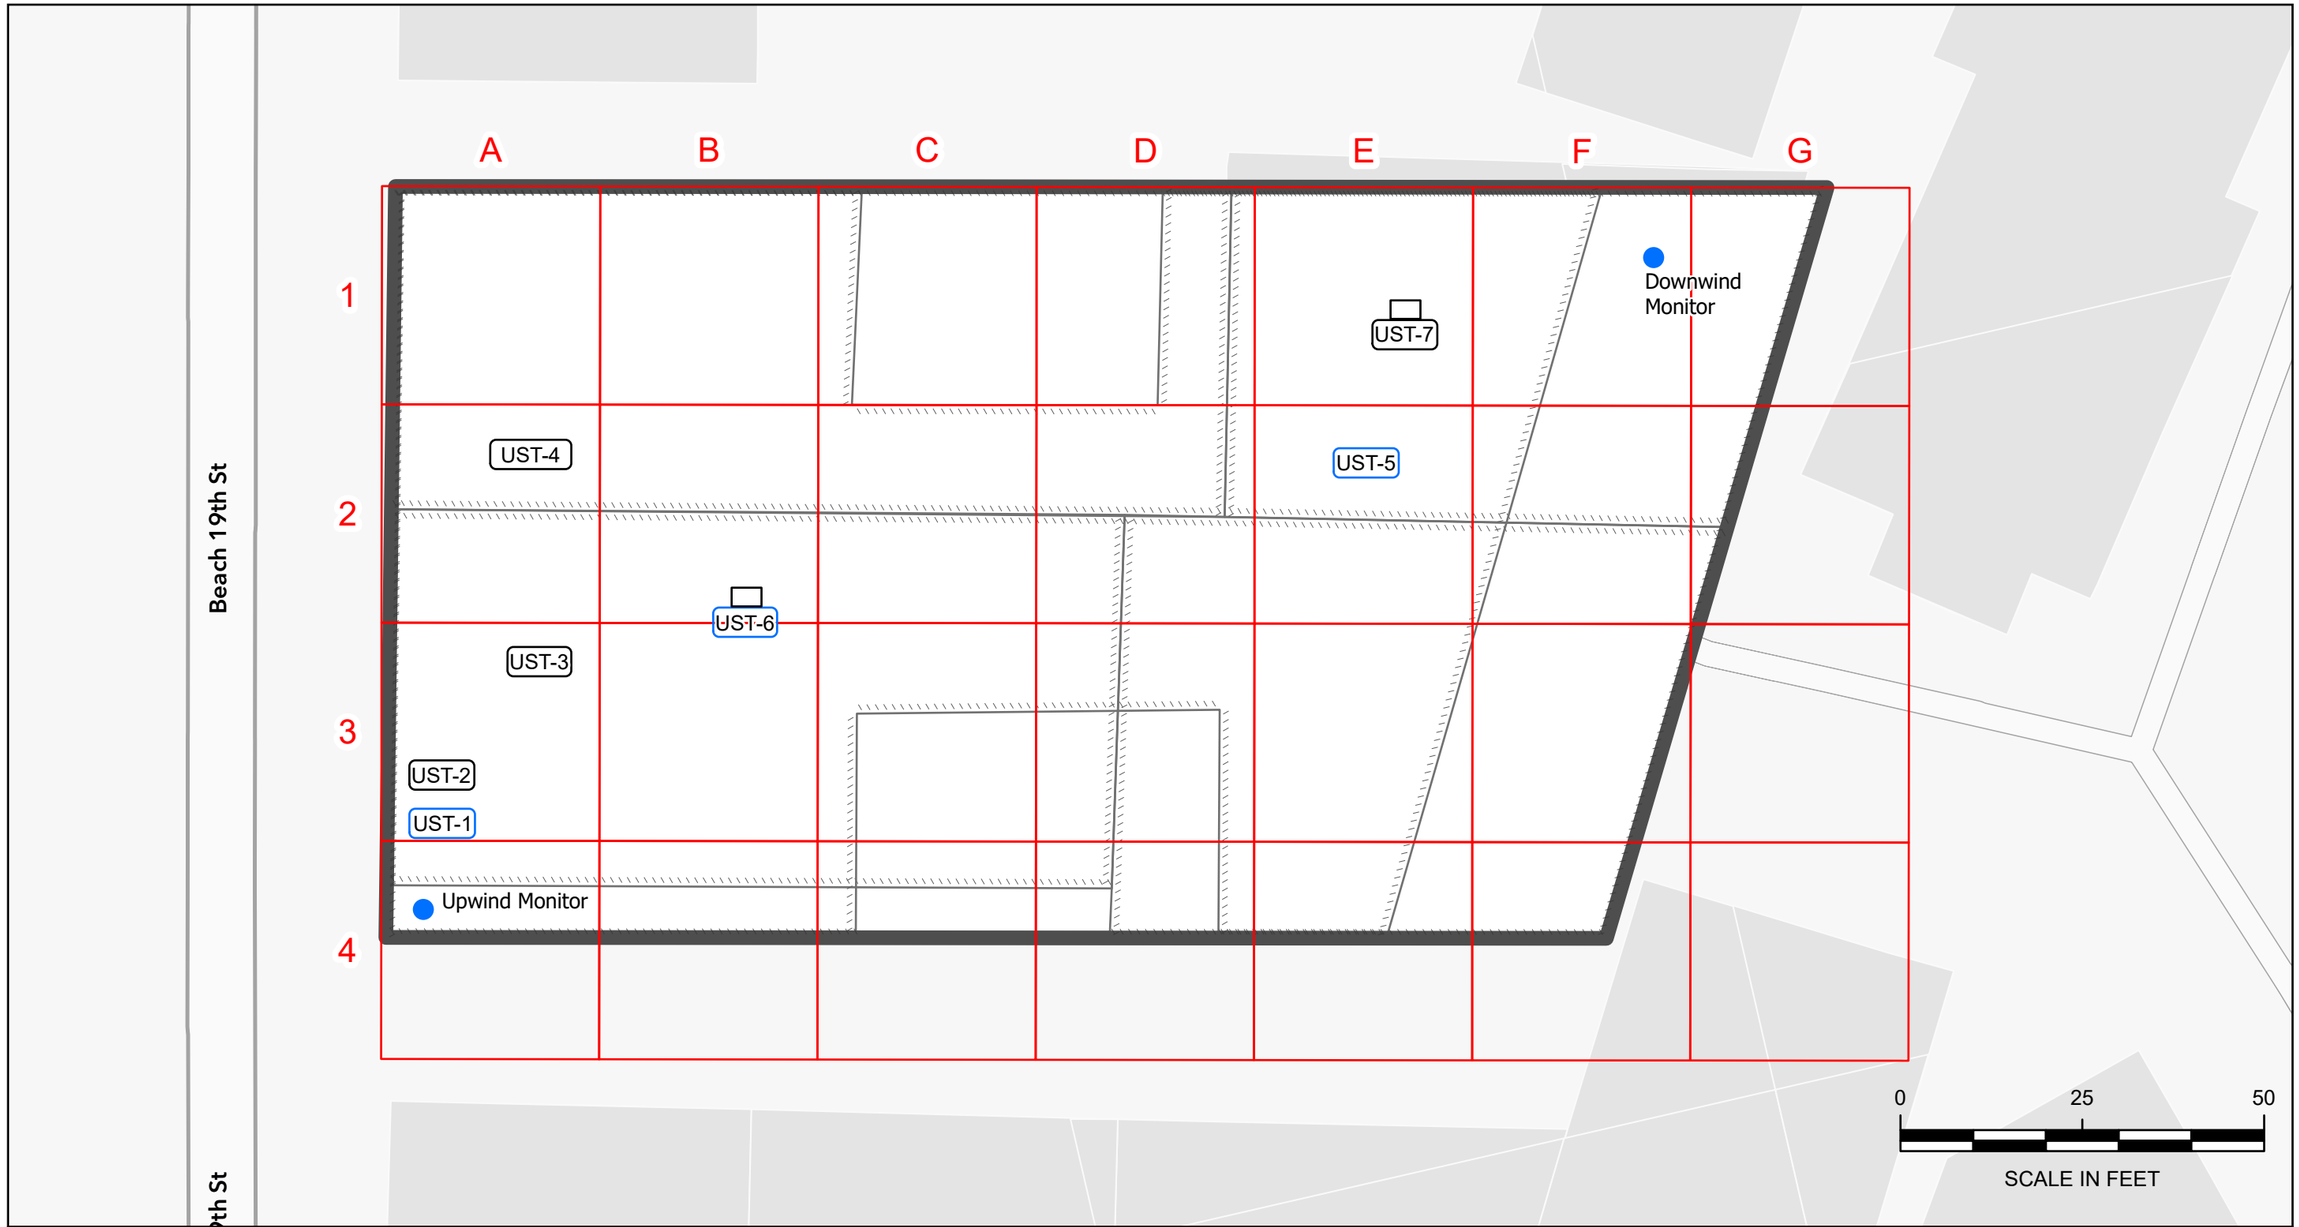

General site conditions (Grid C3)

CAMP station and silt fence (Grid F1)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Construction was limited to site maintenance, only. No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of support of excavation, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

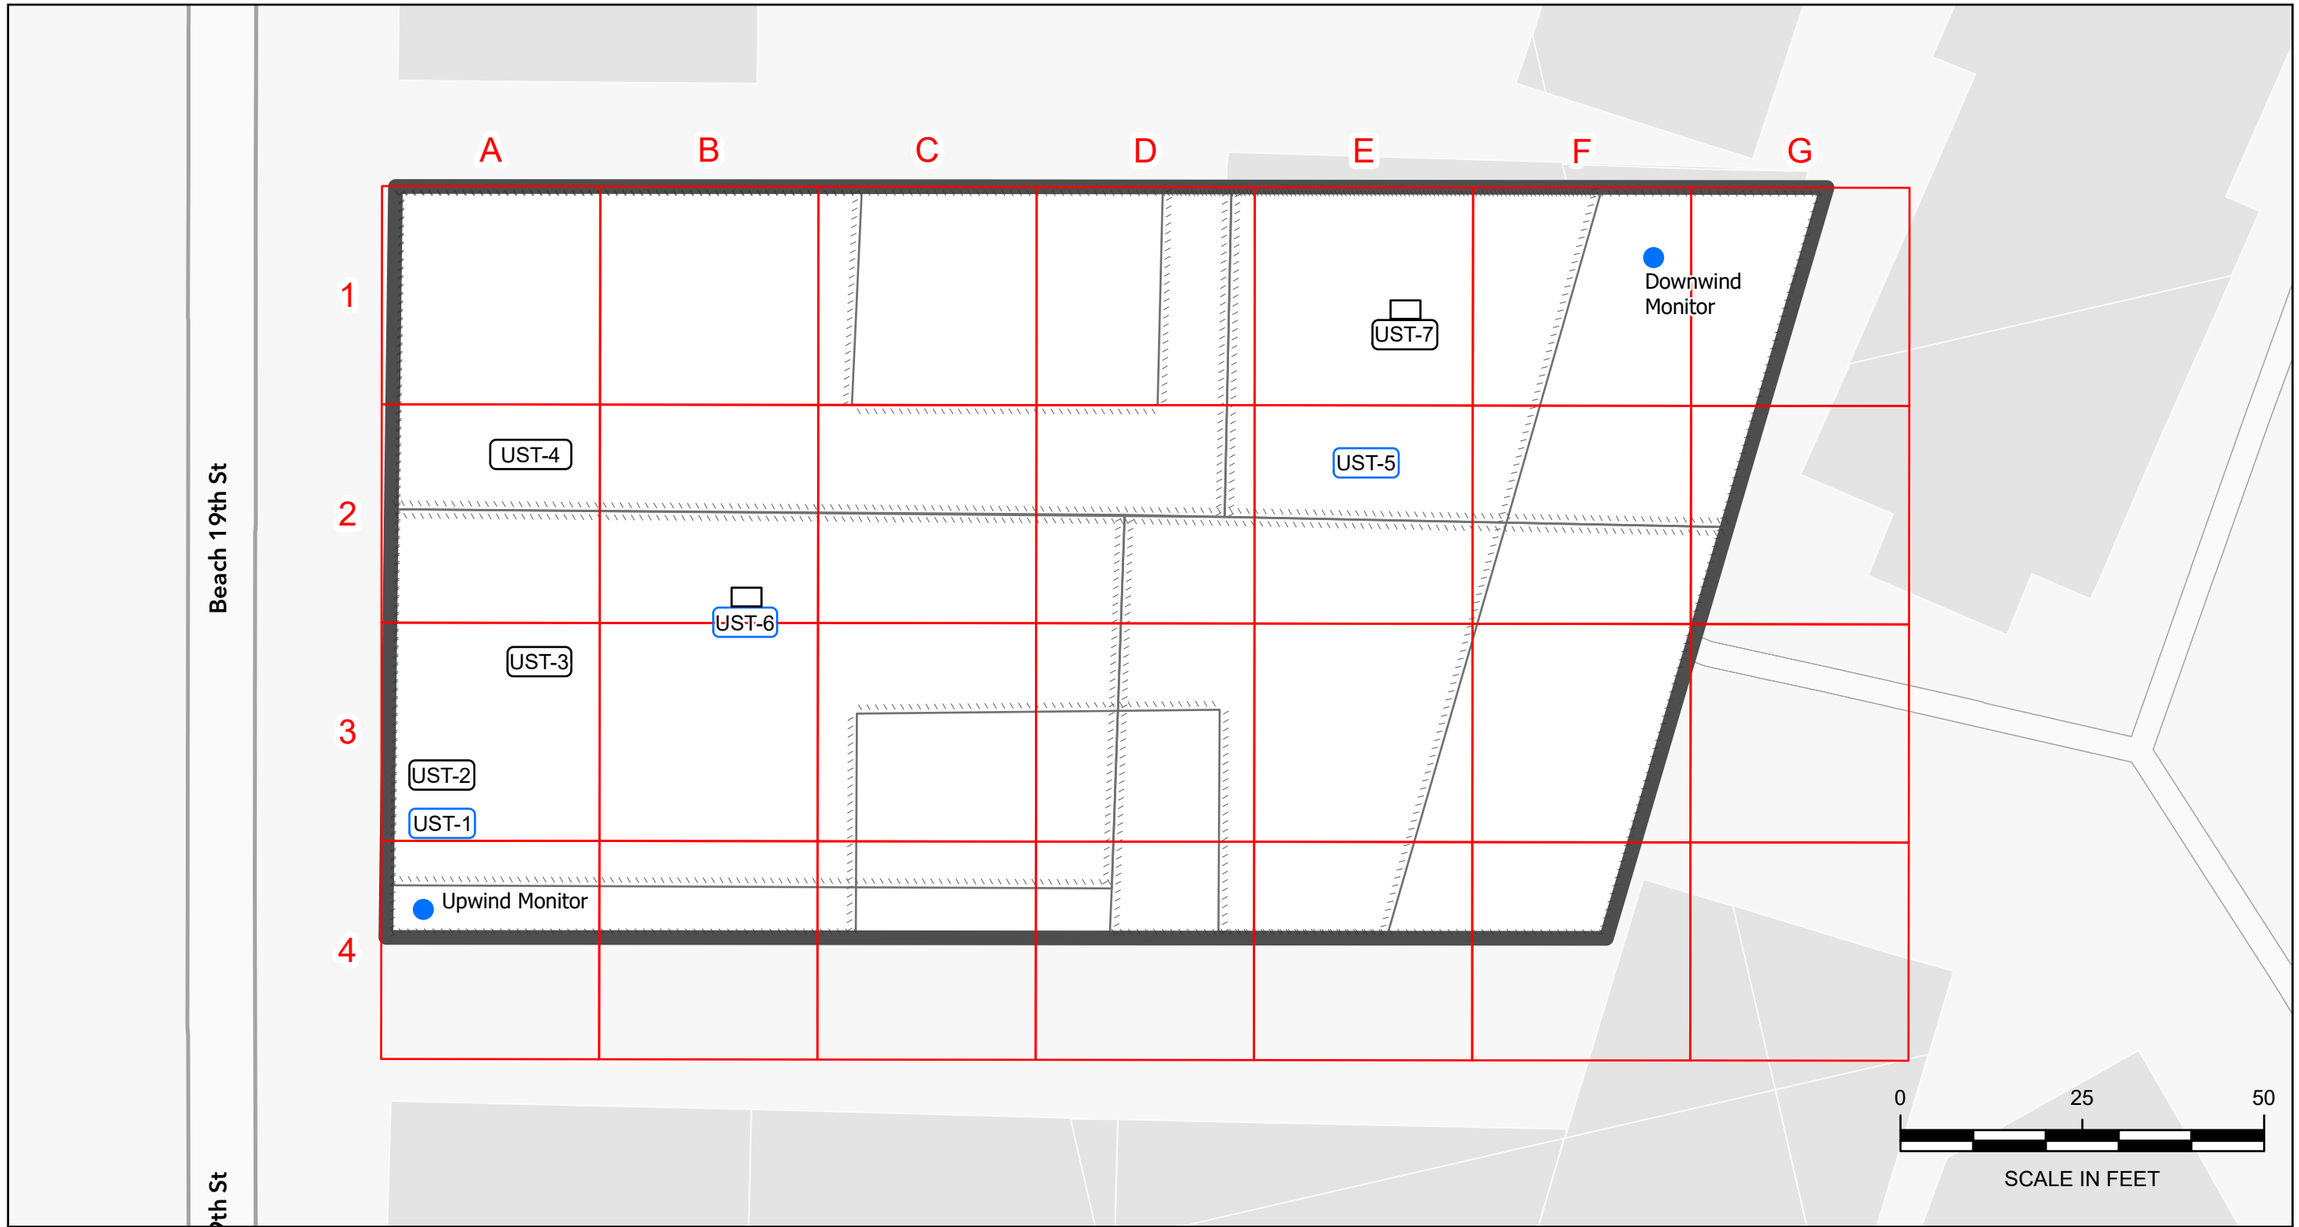

General site conditions (Grid C3)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during excavation, sample collection around former underground storage equipment, and general site maintenance.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: A2, A3 and E1

No material was imported or exported.

C) Sampling Events

The following tank endpoint samples were collected:

Sample	Depth (feet)
UST-1-EP-N-2	4.5
UST-1-EP-E-2	4.5
UST-2-EP-B-2	10
UST-2-EP-N-2	4.5
UST-2-EP-E-2	4.5

Sample	Depth (feet)
UST-2-EP-S-2	4.5
UST-2-EP-W-2	4.5
UST-4-EP-B-2	10
UST-7-EP-B-2	10
UST-7-EP-E-2	4.5

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

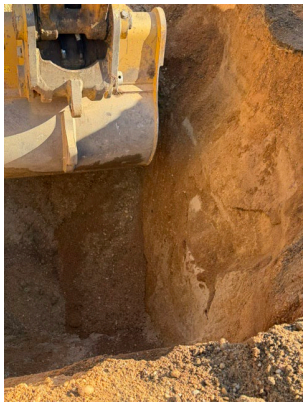

Upcoming work includes excavation of soil, installation of support of excavation, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, excavation, and endpoint sample collection. All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: B1-B2, E2-E3 and F3.

No material was imported or exported.

C) Sampling Events

The following endpoint samples were collected:

Sample	Depth (feet)
EP-HS1 B	11
EP-HS1 N	8
EP-HS1 E	8
EP-HS1 S	8
EP-HS1 W	8
EP-HS1-B-2	15

Sample	Depth (feet)
EP-HS2 B	13
EP-HS2 N	8
EP-HS2 E	8
EP-HS2 S	8
EP-HS2 W	8
EP-HS2-B-2	15

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of support of excavation and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

General site conditions (Grid C3)

Stockpiling soil for off-site disposal (Grid D1)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, receipt of deliveries, and preparation for rebar installation. All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: C4, D4, and F3.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

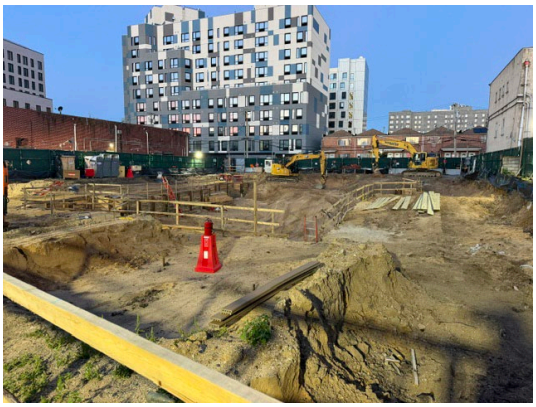

Upcoming work includes excavation of soil, installation of rebar, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

CAMP and silt fence (Grid F1)

General site conditions (Grid F1)

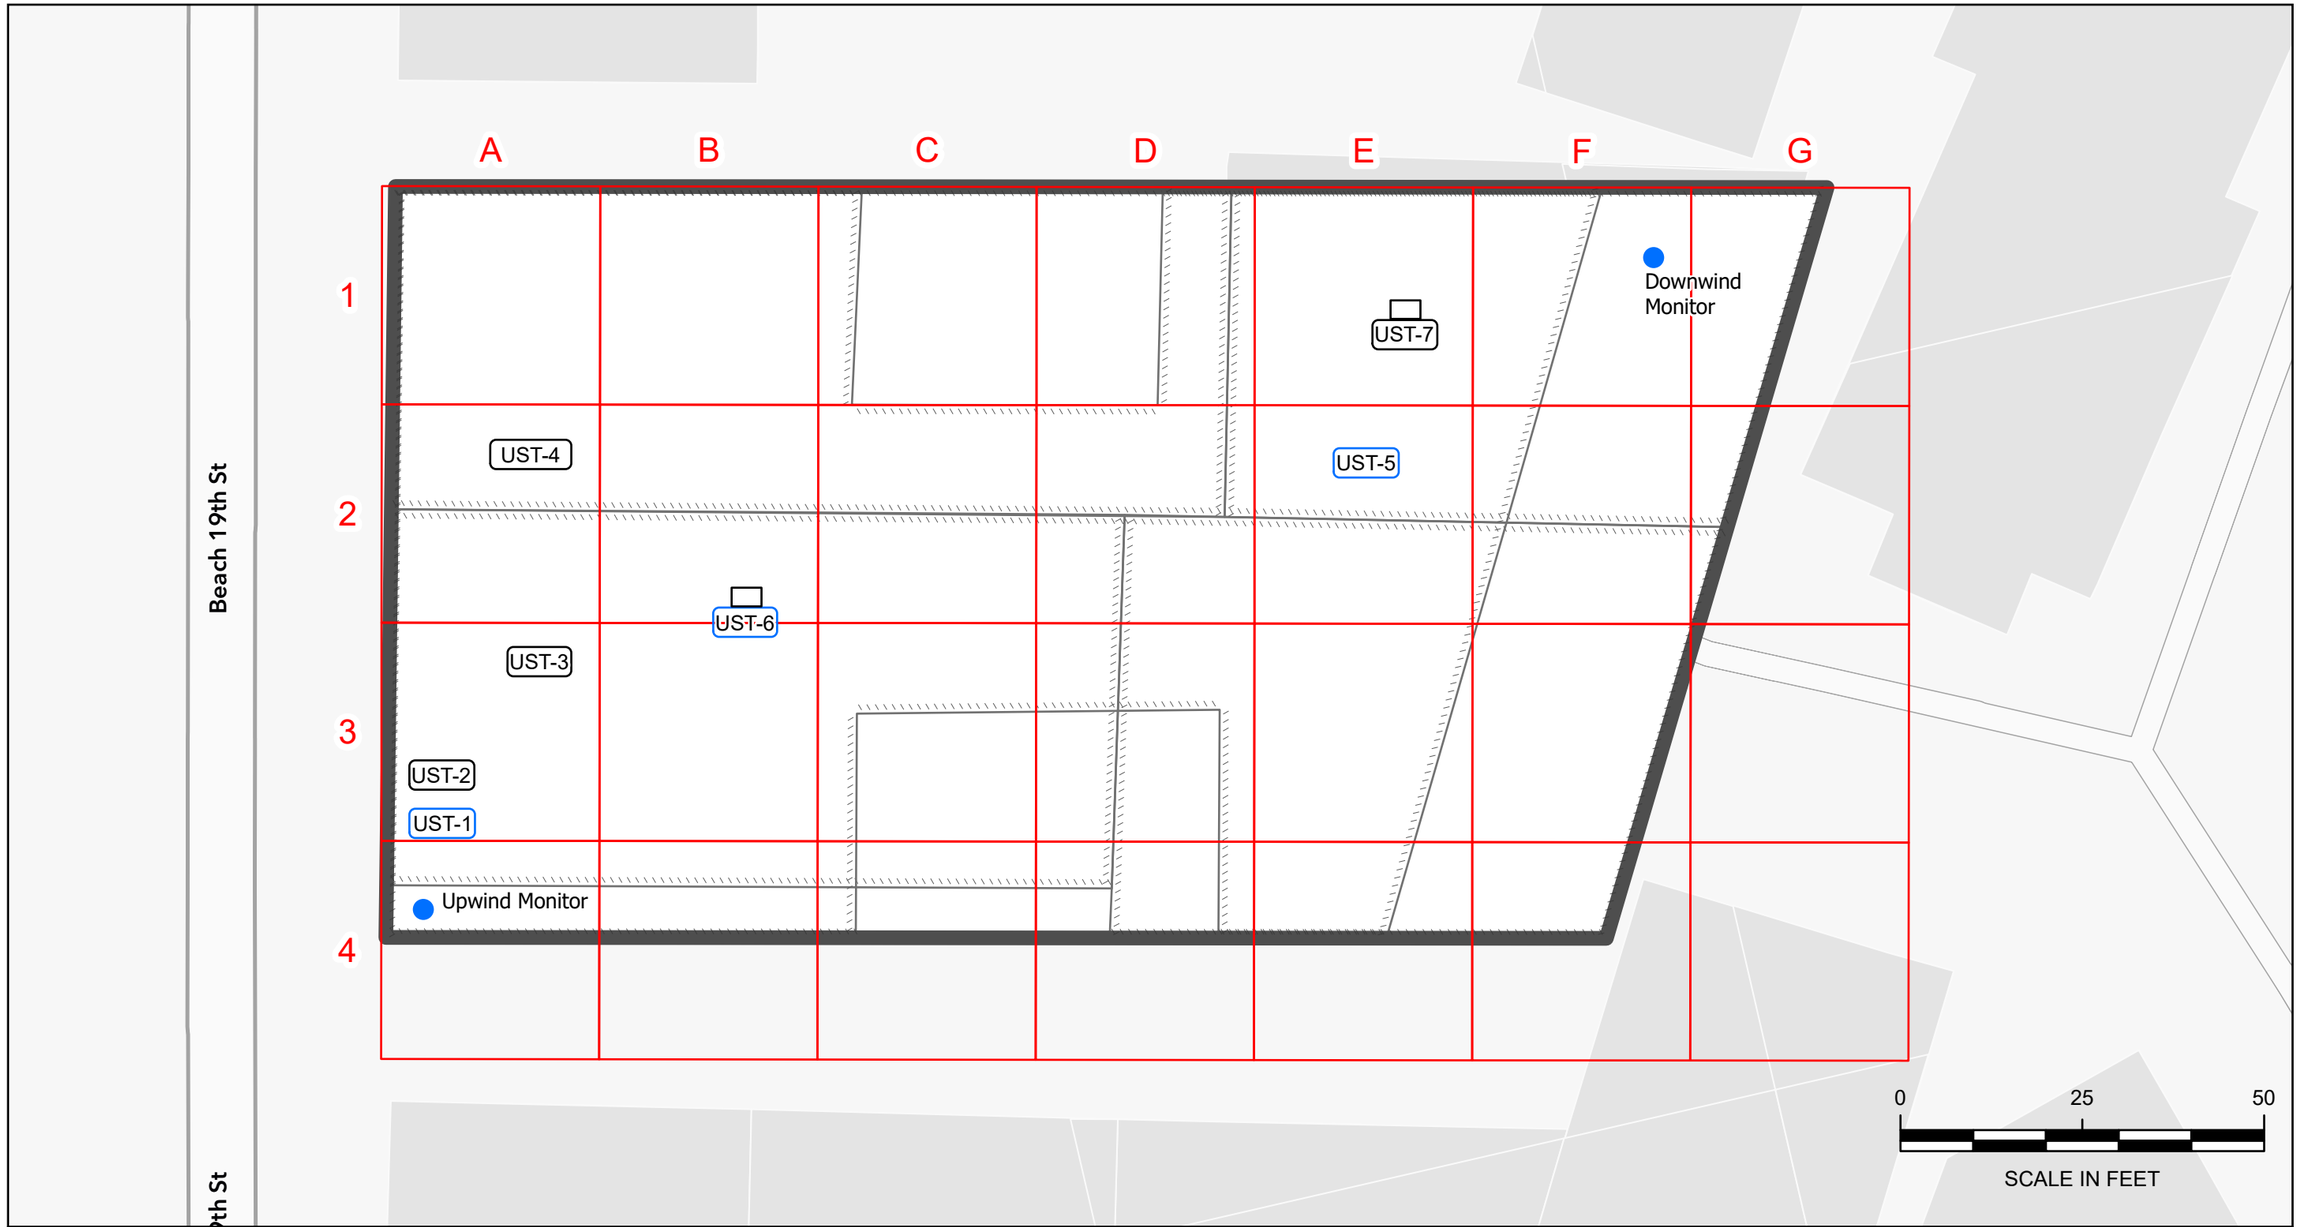

Storing timber (Grid C4)

Footing installation preparation (Grid F3)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, curb cutting, installation of support of excavation (SOE), construction of concrete footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: A3, E1, and F1-F3.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. An exceedance of VOCs was recorded at the downwind monitor due to excavator exhaust (the excavator was moved and the exceedance was resolved). A spike in dust data was recorded at the upwind monitor due to sweeping the street (water was subsequently used to suppress dust and the issue was resolved). There were no other exceedances of action levels for dust or VOCs.

E) Upcoming Work

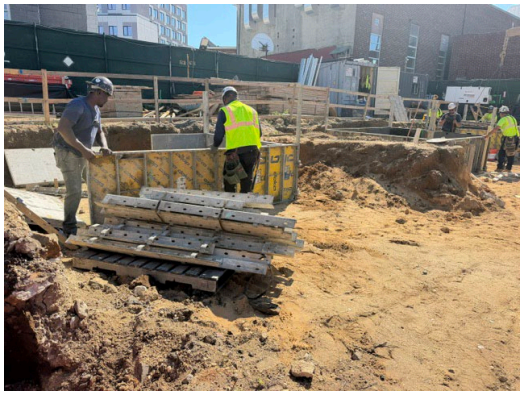

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

F) Photographs

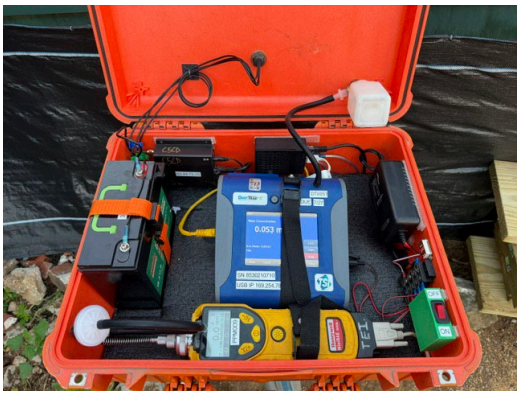

Representative photographs from the reporting period are shown below.

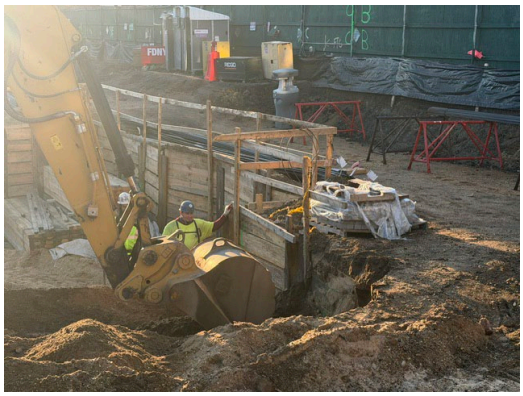

Building forms for concrete footings (Gridline F)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, installation support of excavation (SOE), assembling rebar for footings, placing concrete for footings, and construction of concrete footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: A2-A3, E1, F2 and F3.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

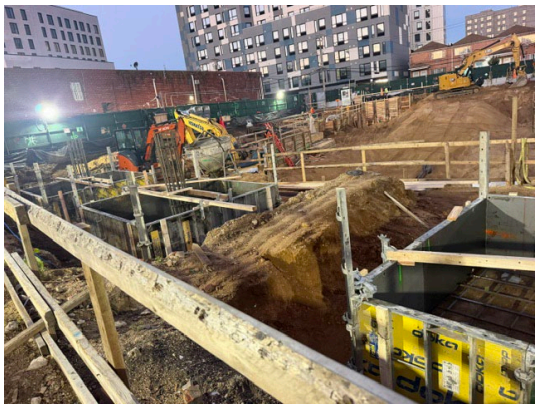

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

Building forms for concrete footings (Gridline F)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, installation of support of excavation (SOE), assembling rebar for footings, loading concrete debris onto trucks for disposal and construction of concrete footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: A2, E1, E2, and F1.

Two truckloads of brick and concrete debris were disposed offsite at Inwood Material Terminal LLC. No material was imported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, installation of support of excavation (SOE), vapor barrier installation, and construction of concrete footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: A2, E2 and D2.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

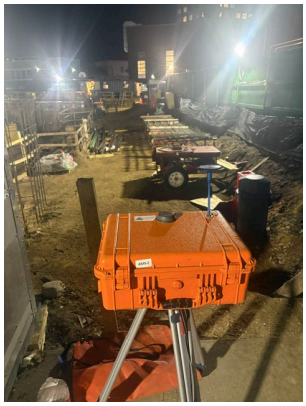

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid F1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

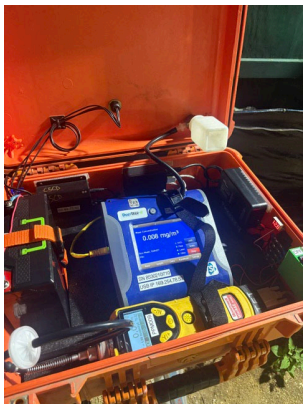

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

F) Photographs

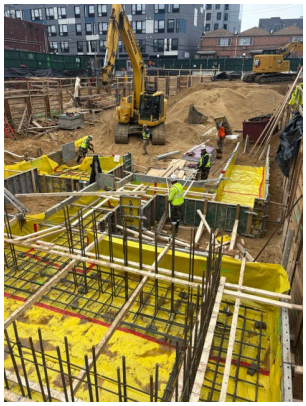

Representative photographs from the reporting period are shown below.

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, and construction of concrete footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids D2, E2 and B4.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

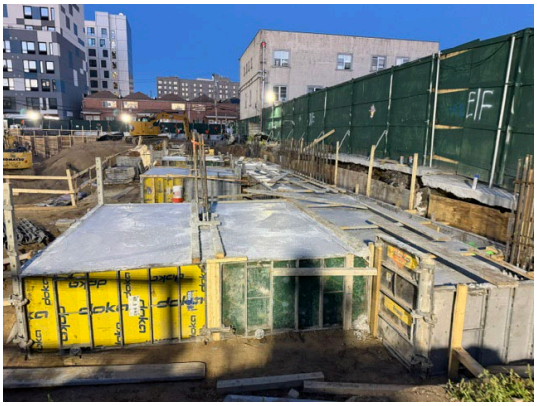

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of support of excavation, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

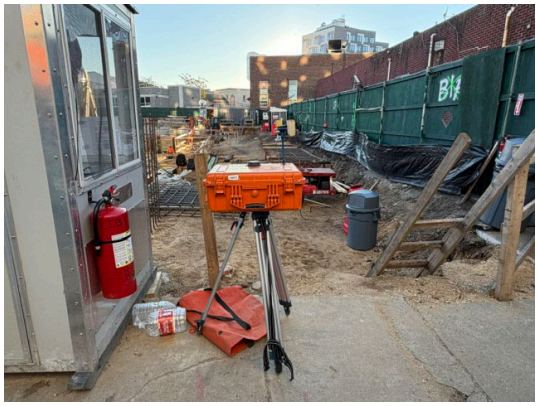

Placing concrete footings (Gridline 1)

Footing formwork in cellar area (Grid D2-D3)

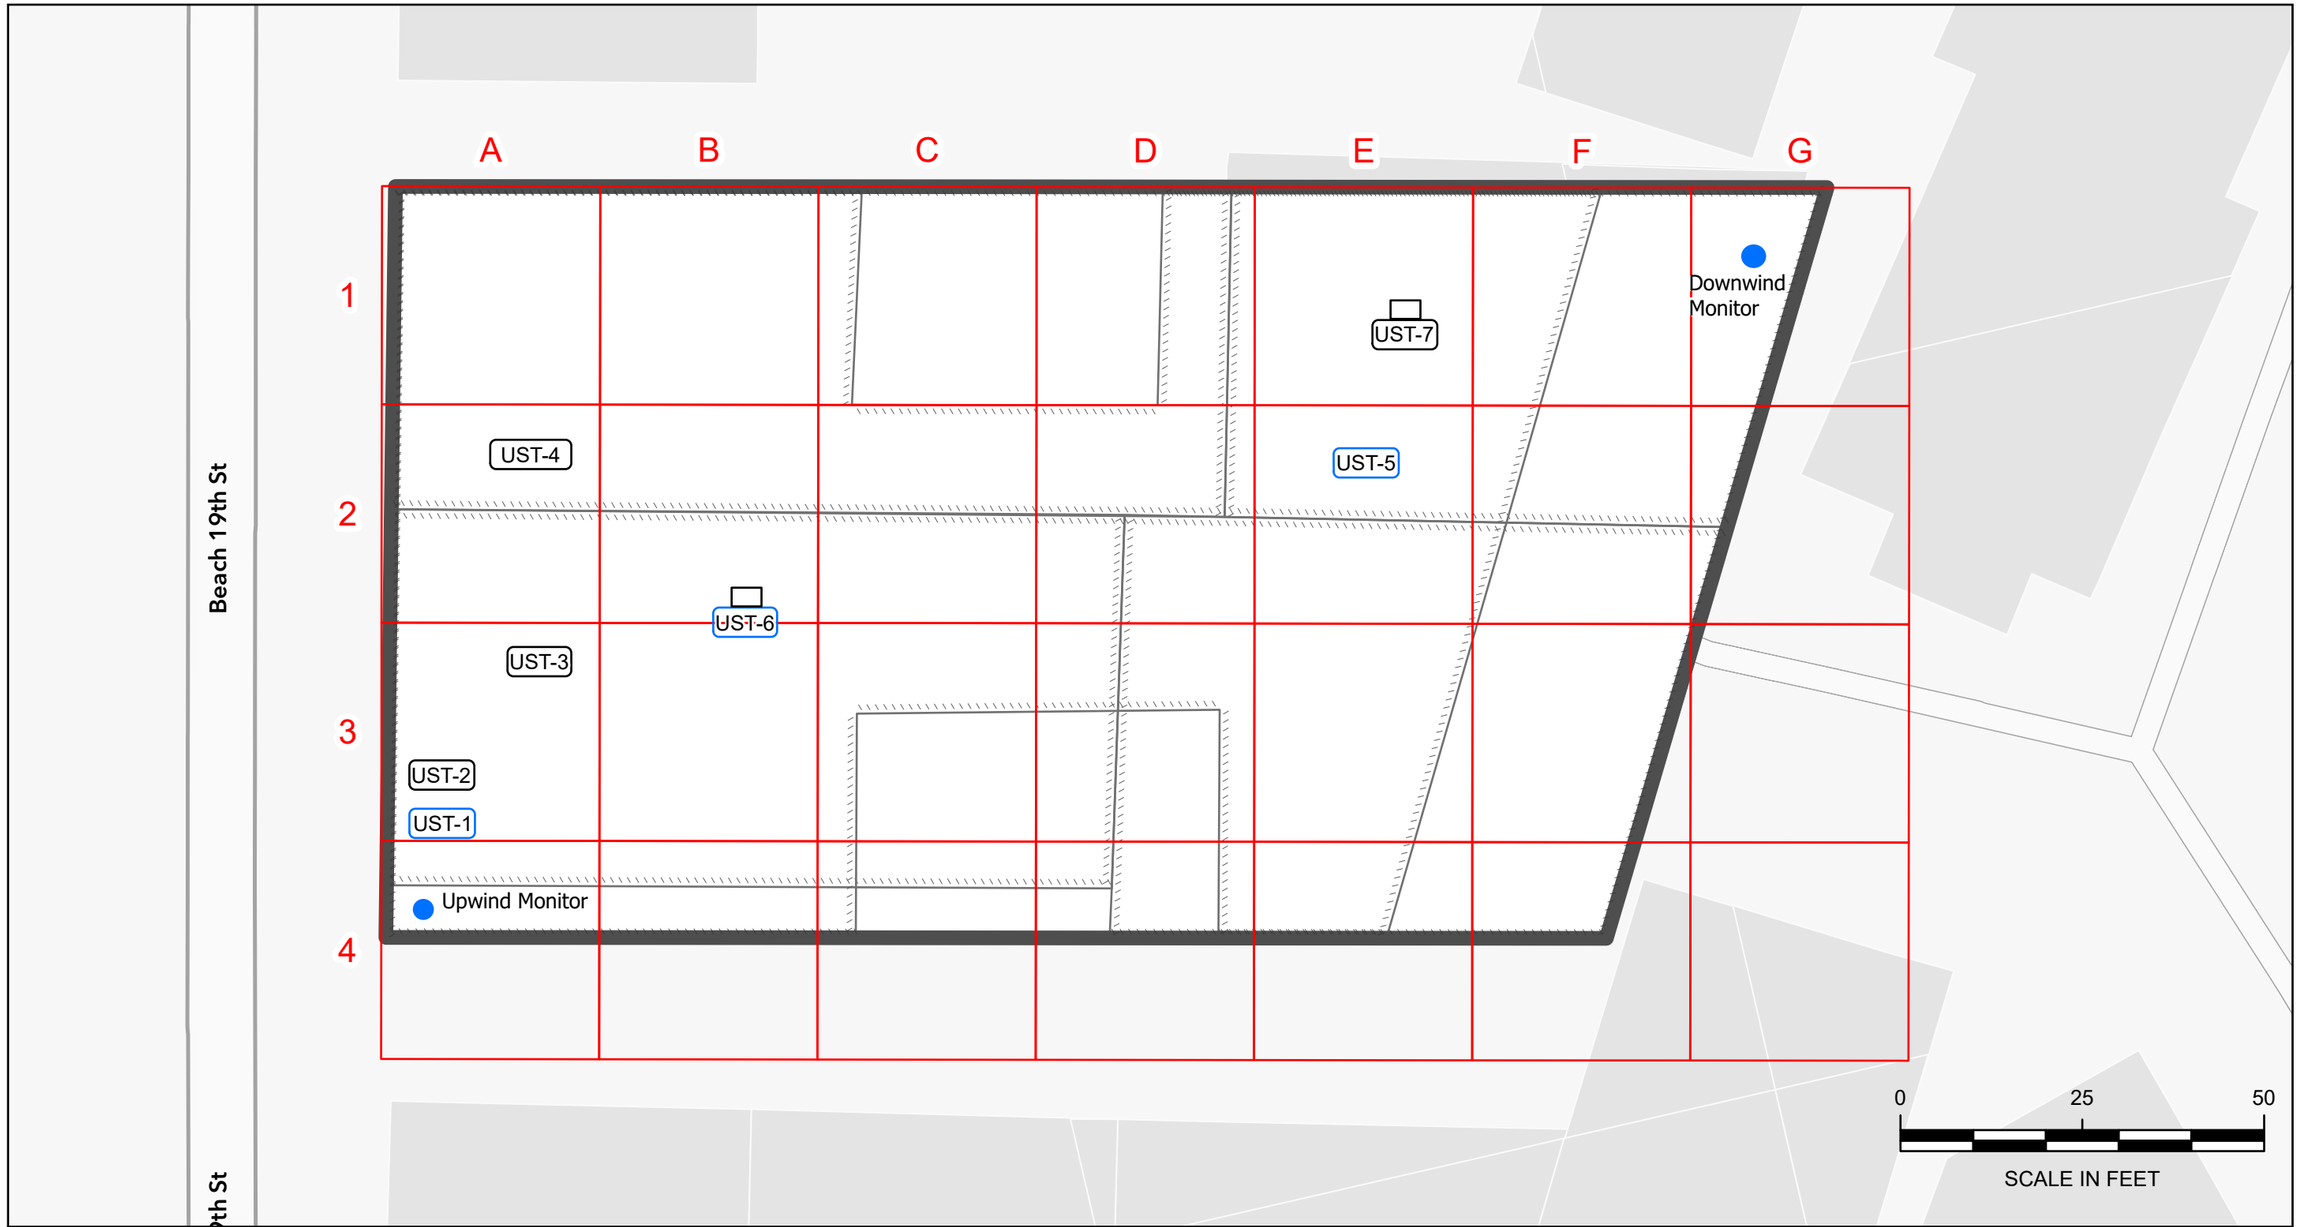

Placing rebar for concrete footings (Grid B4)

CAMP monitor (Grid A4)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, tracking pad maintenance, and construction of concrete footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: D2, E2 and A1.

27.74 tons of ASTM #1 - 3½ inch stone was imported for the tracking pad. No material was exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

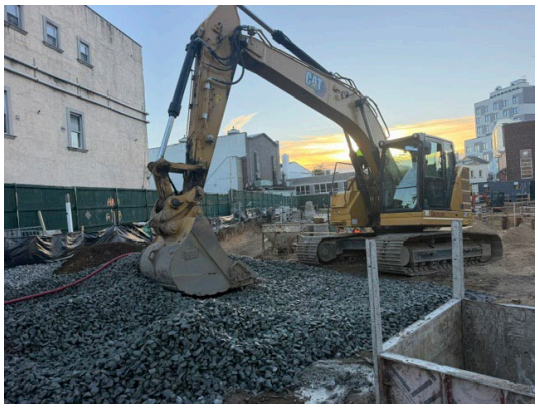

Upcoming work includes excavation of soil, installation of support of excavation, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

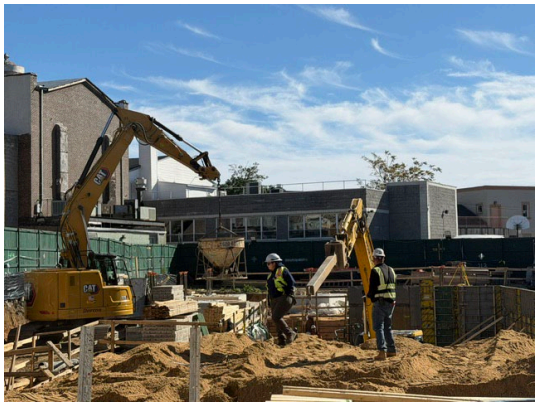

Maintaining tracking pad (Grid A1)

Maintaining tracking pad (Grid A1)

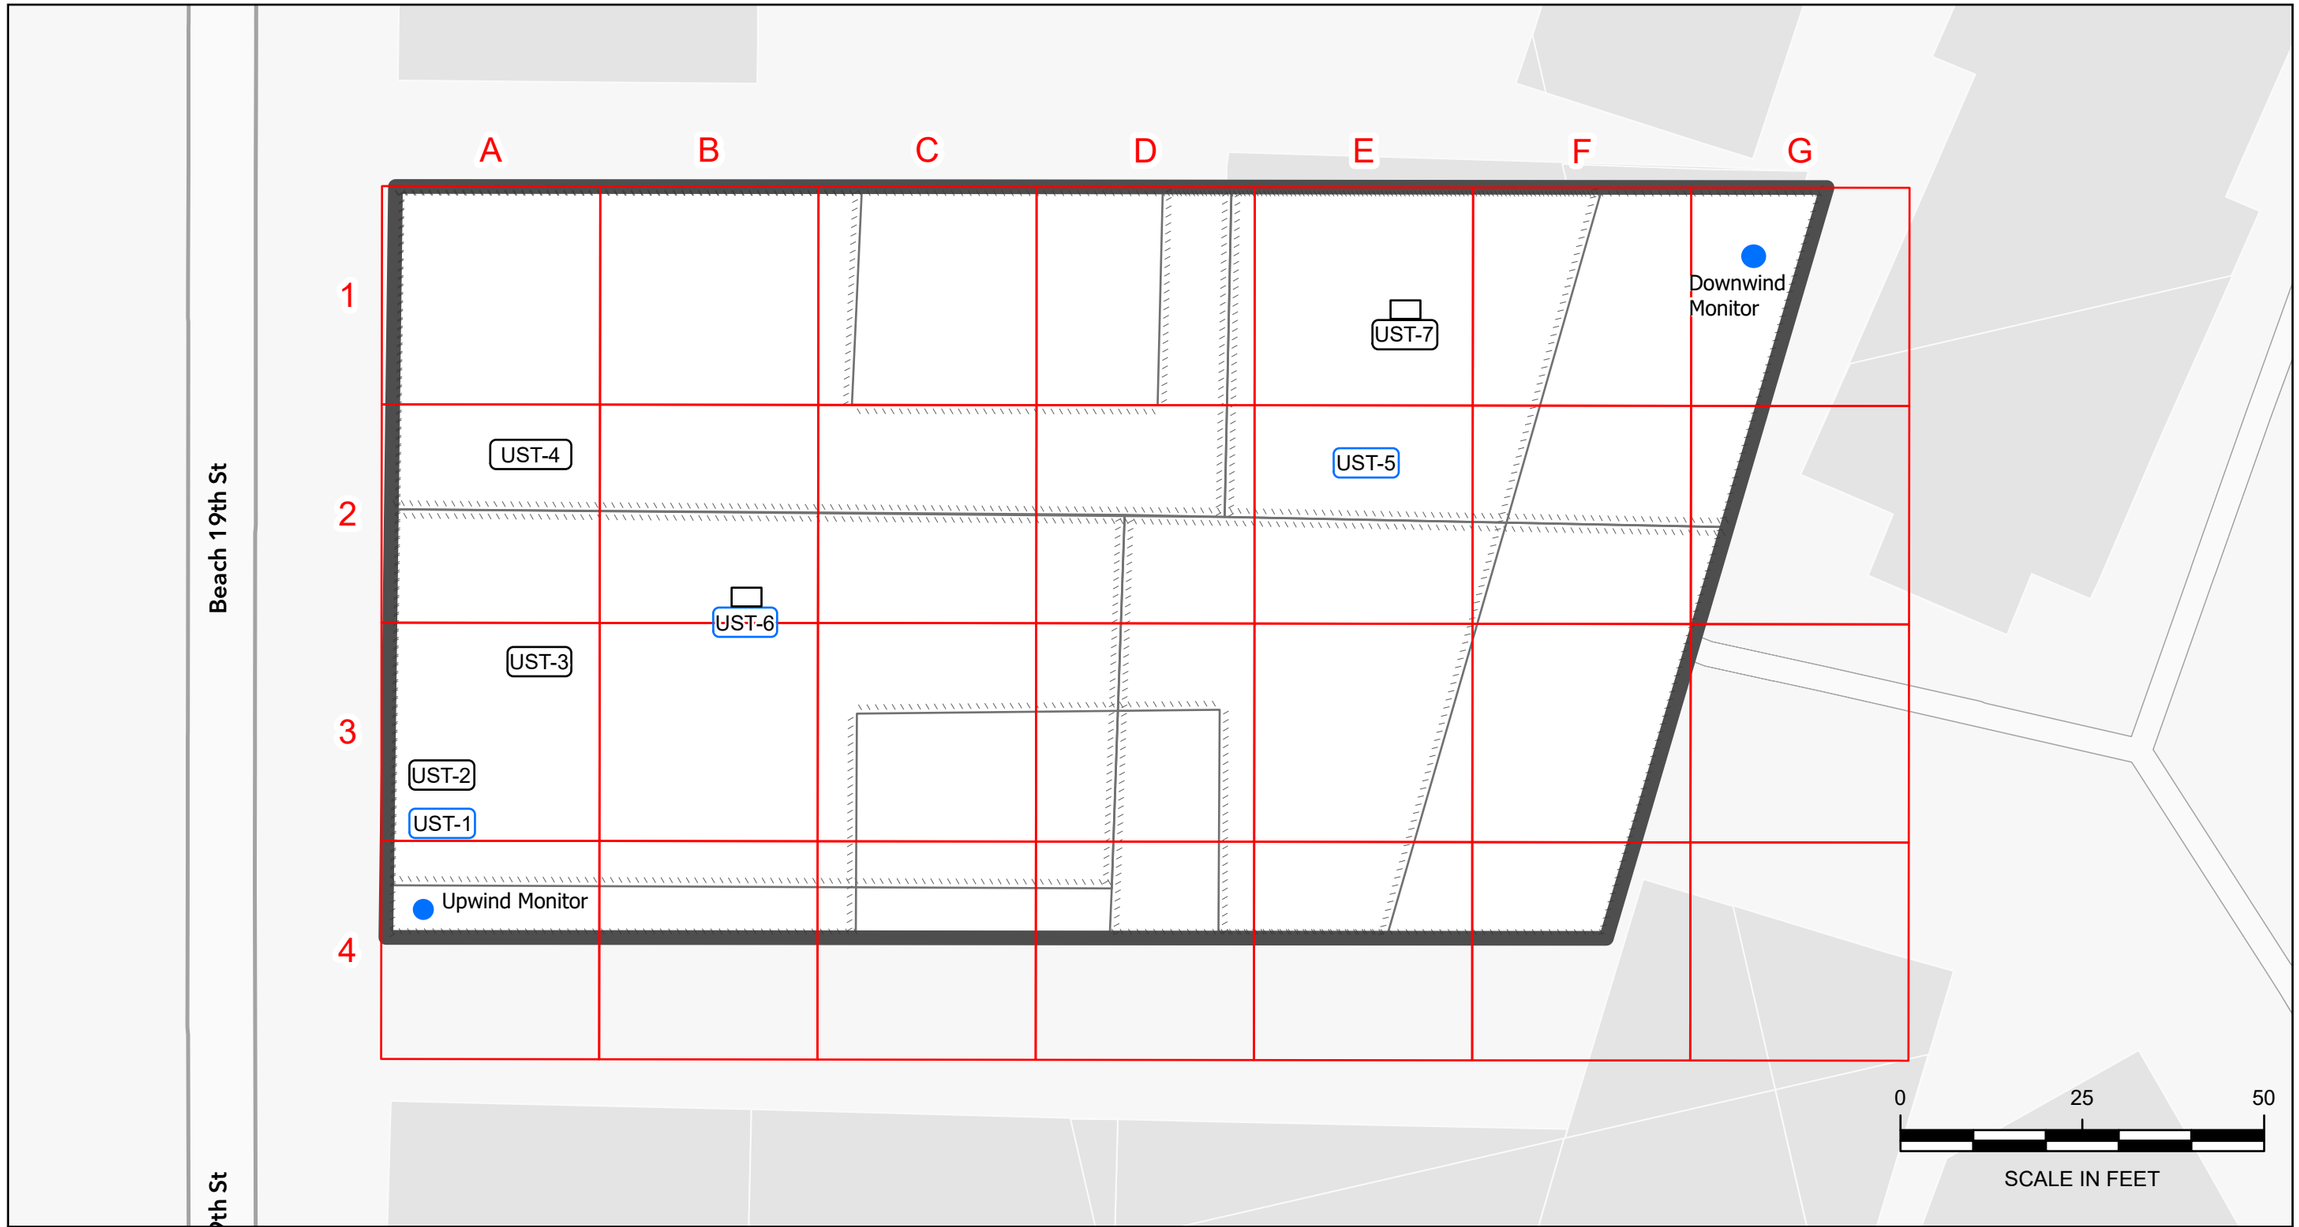

Construction of footings (Grid A1)

Construction of footings (Grid D2)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, installation of support of excavation (SOE), vapor barrier installation, excavation, and construction of concrete footings and walls.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids D2-E2, B1 and C2.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of SOE, and the collection of end point samples.

F) Photographs

Representative photographs from the reporting period are shown below.

CAMP monitor and silt fence (Grid G1)

Wall construction (D2-E2)

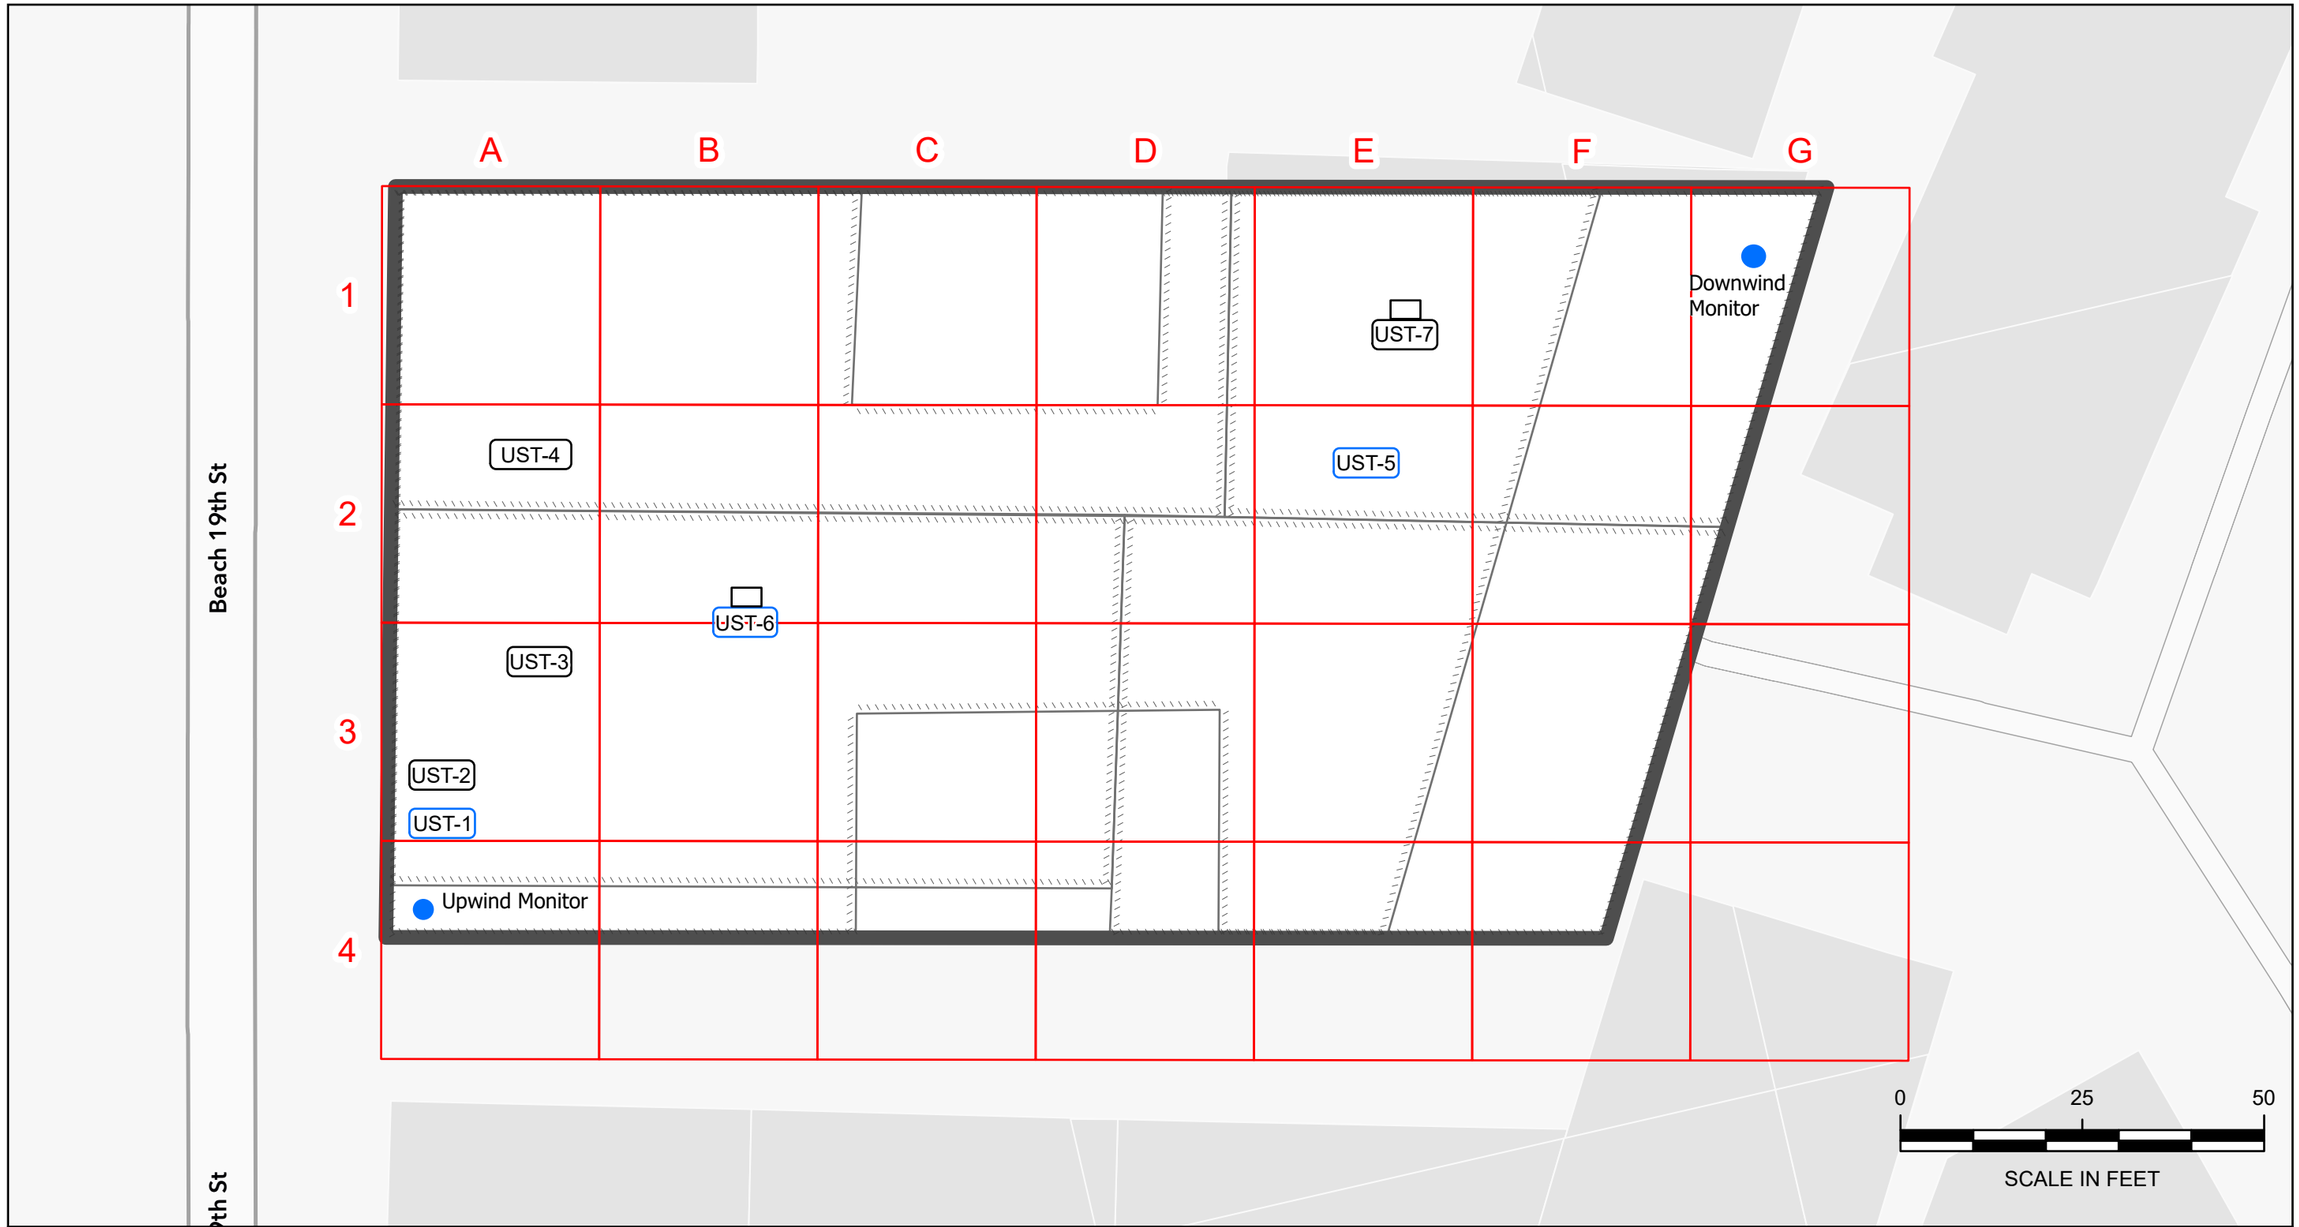

Construction of concrete footings (Grid C2)

Installation of SOE (Grid C2)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, vapor barrier installation, excavation, construction of concrete footings and walls, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: B2, C2, D2 and E2.

Ten truckloads of soil from grids B2 (8 trucks) and C2 (2 trucks) were live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). No material was imported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

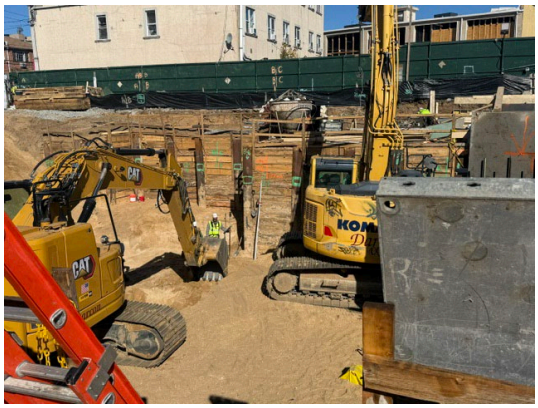

Upcoming work includes excavation of soil, installation of support of excavation, the collection of end point samples, and wall and footing construction.

F) Photographs

Representative photographs from the reporting period are shown below.

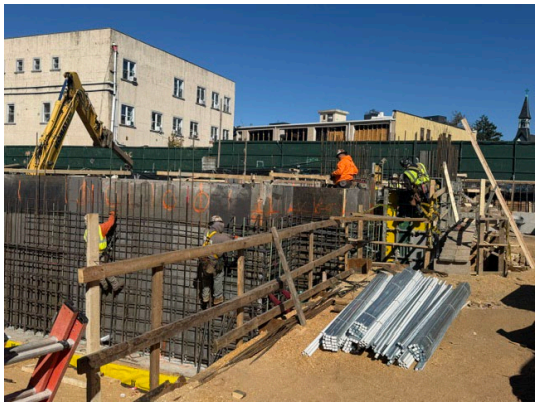

Loading trucks for off-site soil disposal (Grid A1)

Excavation (Grid C2)

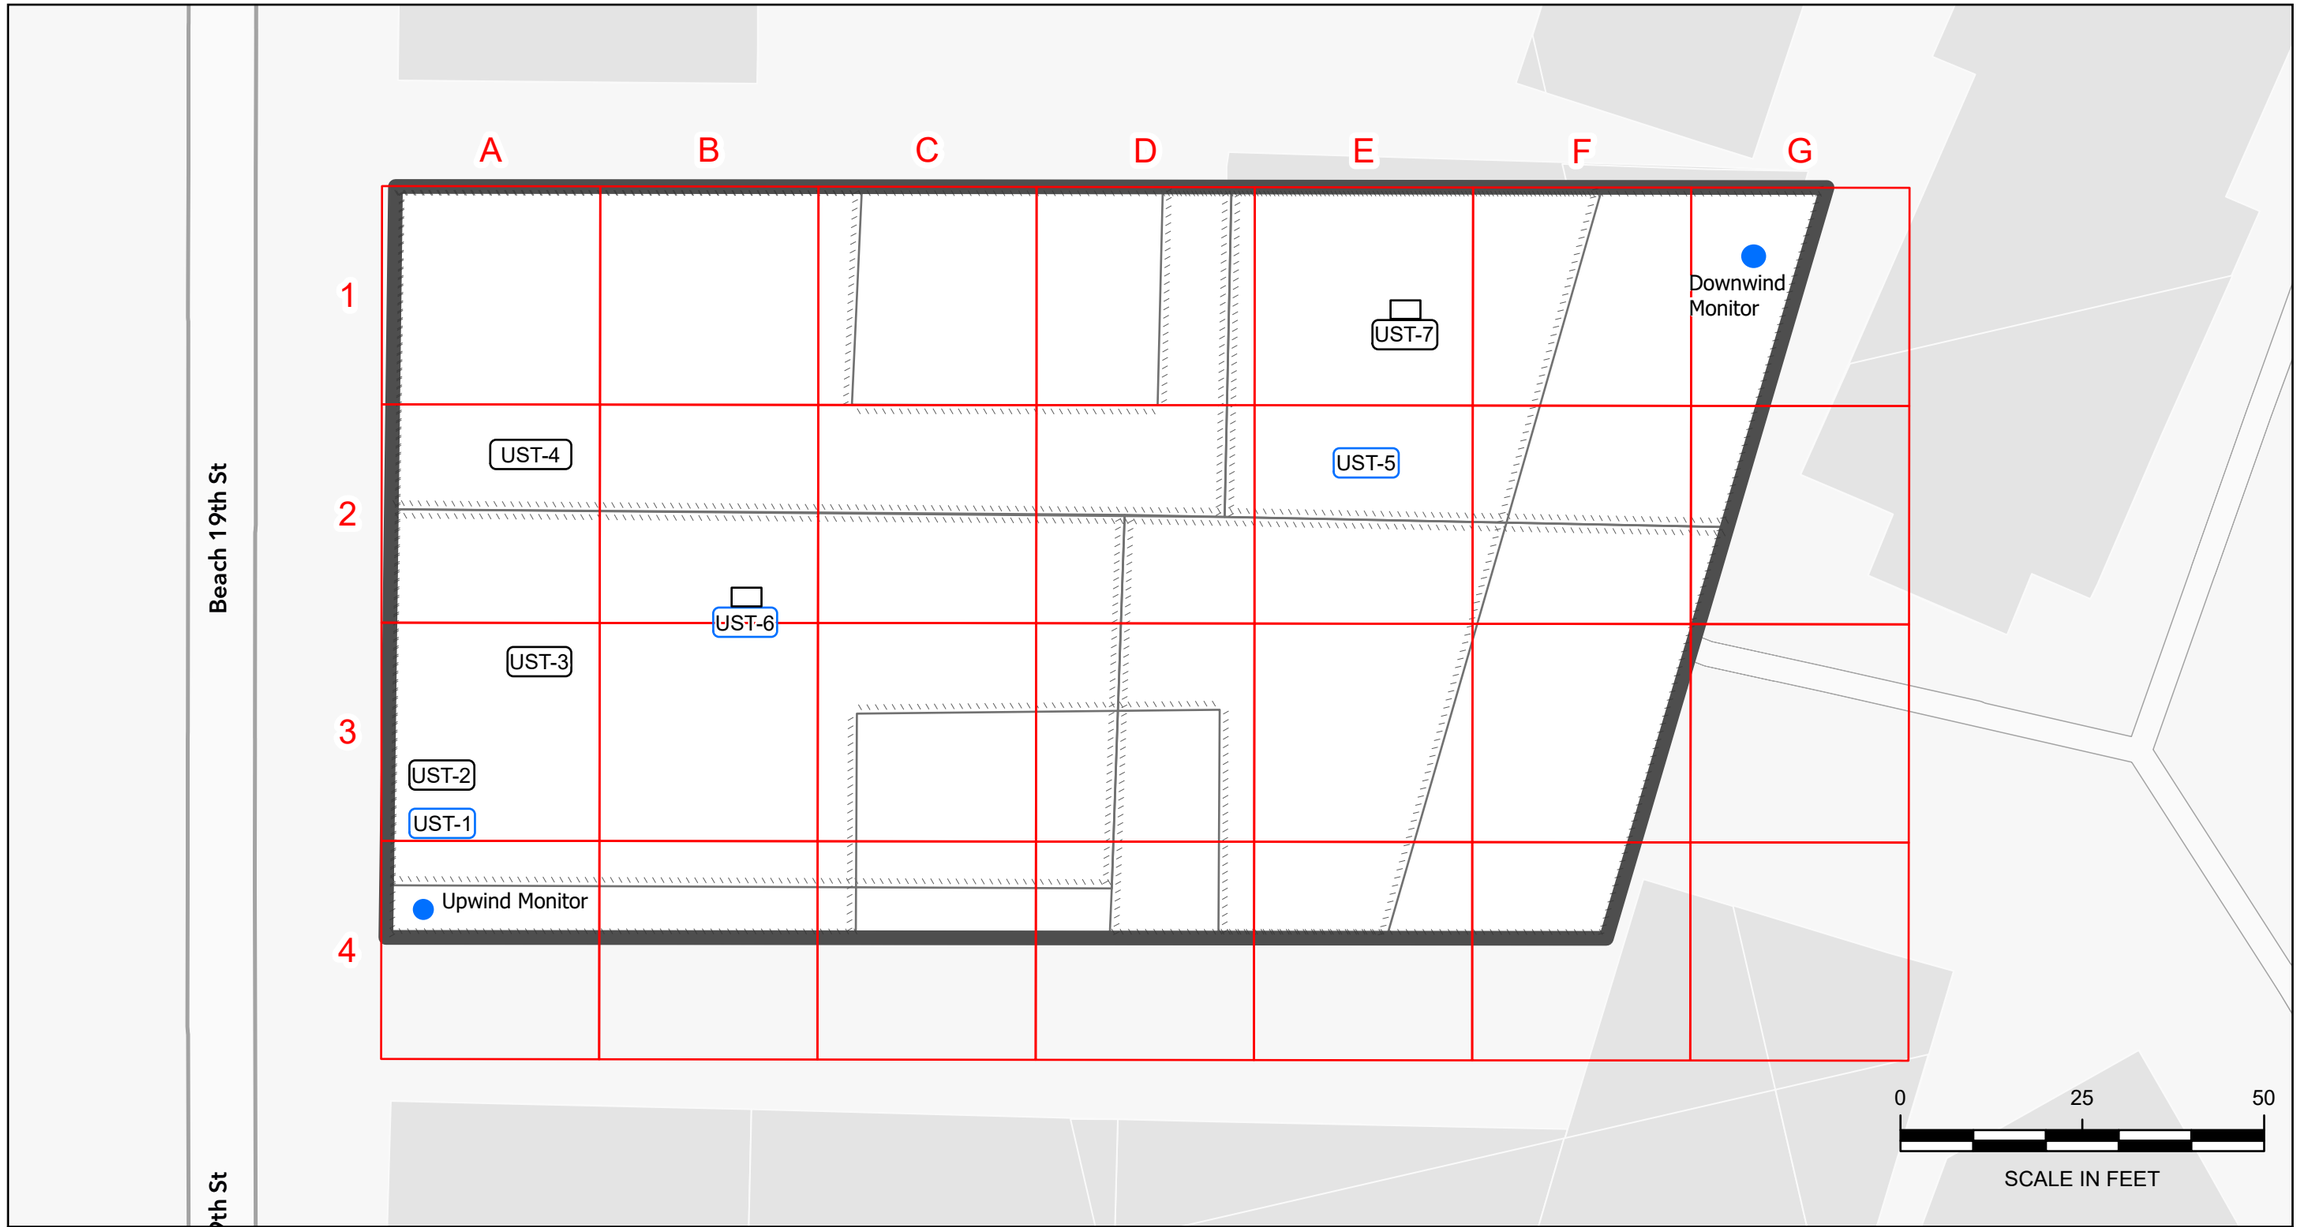

Wall construction (D2-E2)

Wall construction (D2-E2)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, vapor barrier installation, excavation, construction of concrete footings and walls, and off-site soil disposal.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: B2, C2, D2 and E2.

Five truckloads of soil from grid C2 were live loaded and disposed off-site at P Park Facility, Prospect Park, New Jersey (approval #PPNJ26183A). No material was imported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

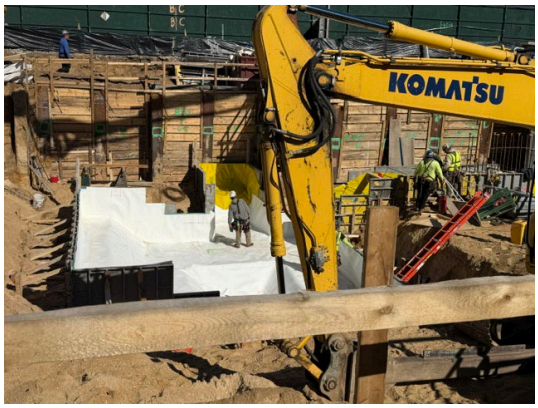

Upcoming work includes excavation of soil, installation of support of excavation, the collection of end point samples, and wall and footing construction.

F) Photographs

Representative photographs from the reporting period are shown below.

Loading trucks for off-site soil disposal (Grid A1)

Vapor barrier installation (Gridline E2)

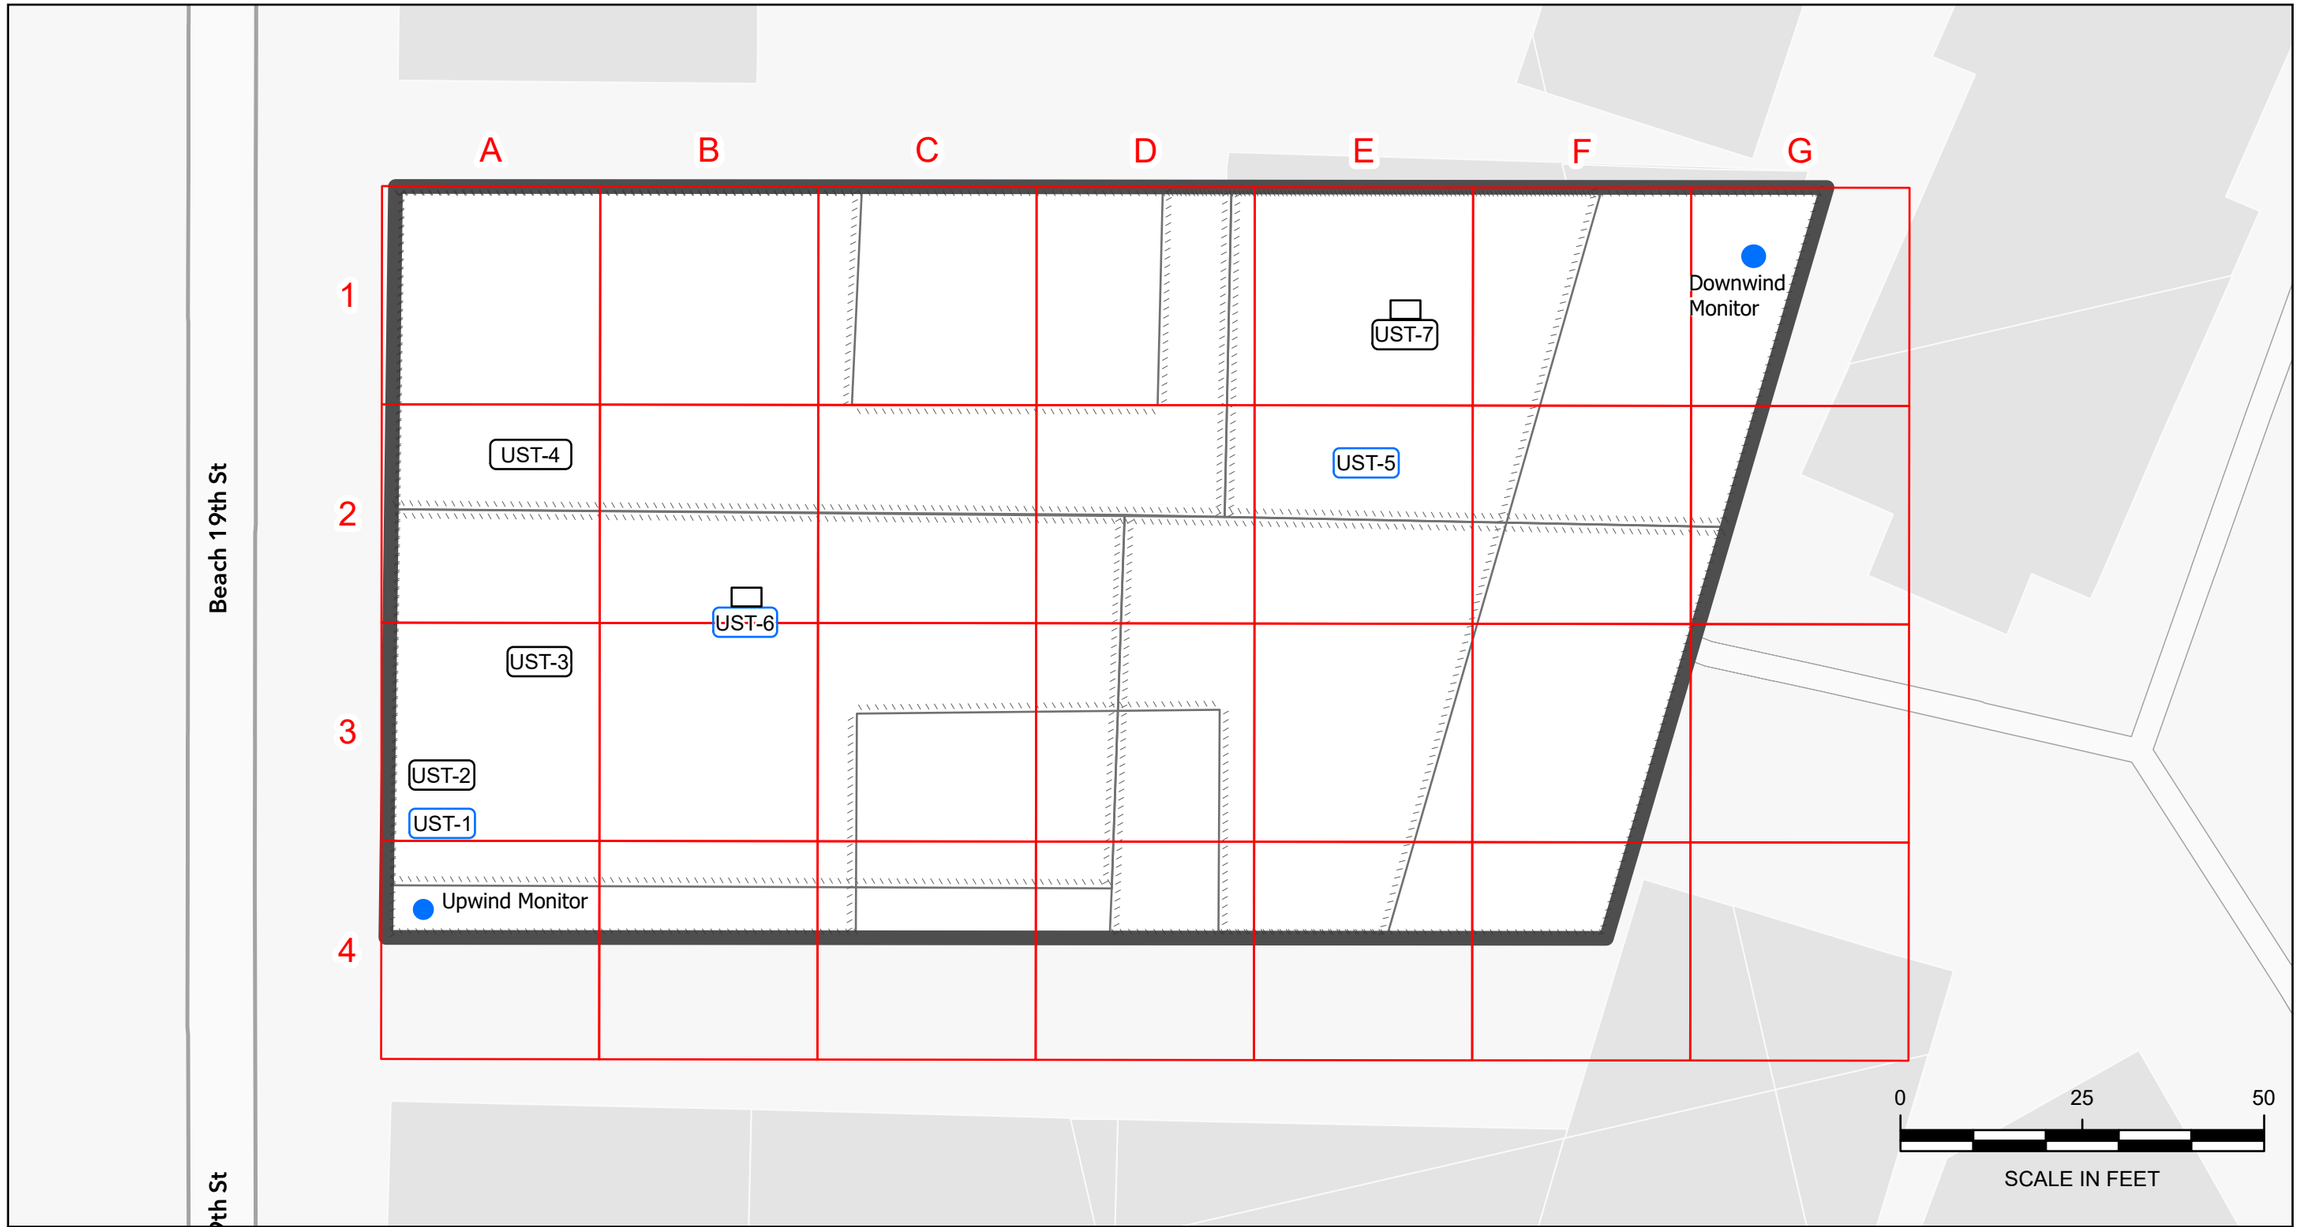

Wall construction (D2-E2)

CAMP monitor and silt fence (Grid G1)

Number of Instances Where Downwind VOCs Exceeds Upwind VOCs + 5 =						0
Number of Comparable Data Points =						495
Start Time:						6:45
End Time:						15:40

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, vapor barrier installation, construction of concrete footings, and installation of support of excavation (SOE).

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: B2, C2, E2 and F2.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of SOE, the collection of end point samples, and wall and footing construction.

F) Photographs

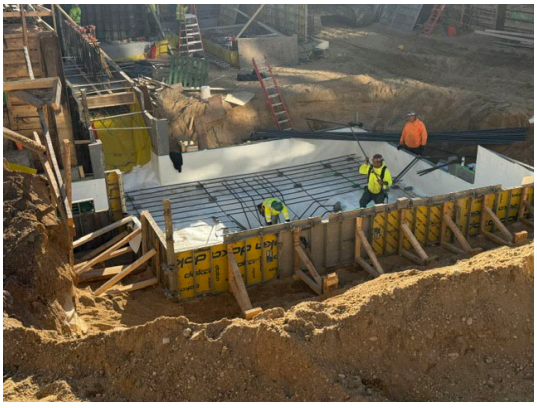

Representative photographs from the reporting period are shown below.

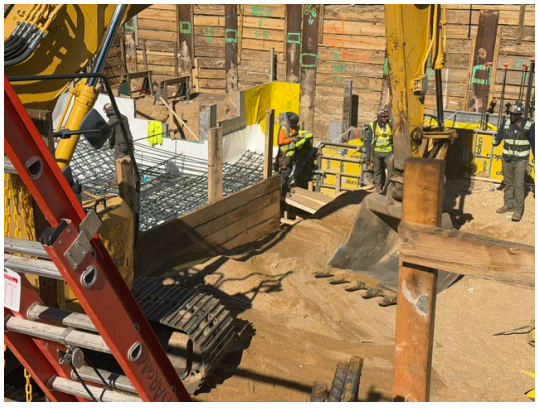

Wall construction (Grids D2-E2)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, vapor barrier installation, construction of concrete footings, and backfilling.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: B2, C2, E2, E3 and F2.

Soil from Grid C2 was reused to backfill Grid E3.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

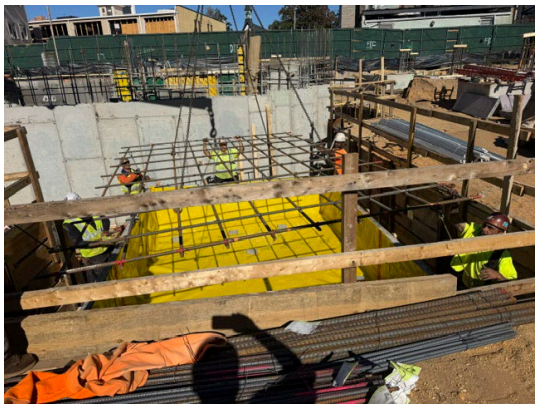

Upcoming work includes excavation of soil, installation of support of excavation, collection of end point samples, and wall and footing construction.

F) Photographs

Representative photographs from the reporting period are shown below.

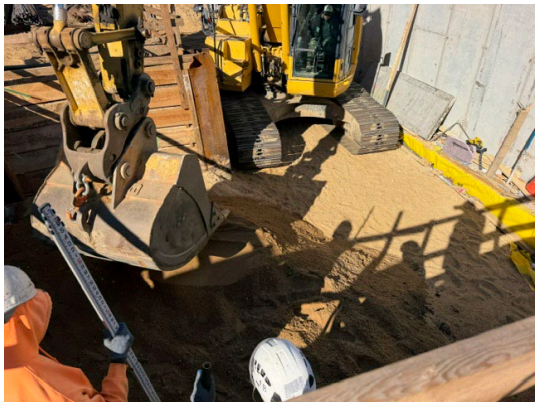

Concrete footings (Gridline E and F)

Footing construction (F2)

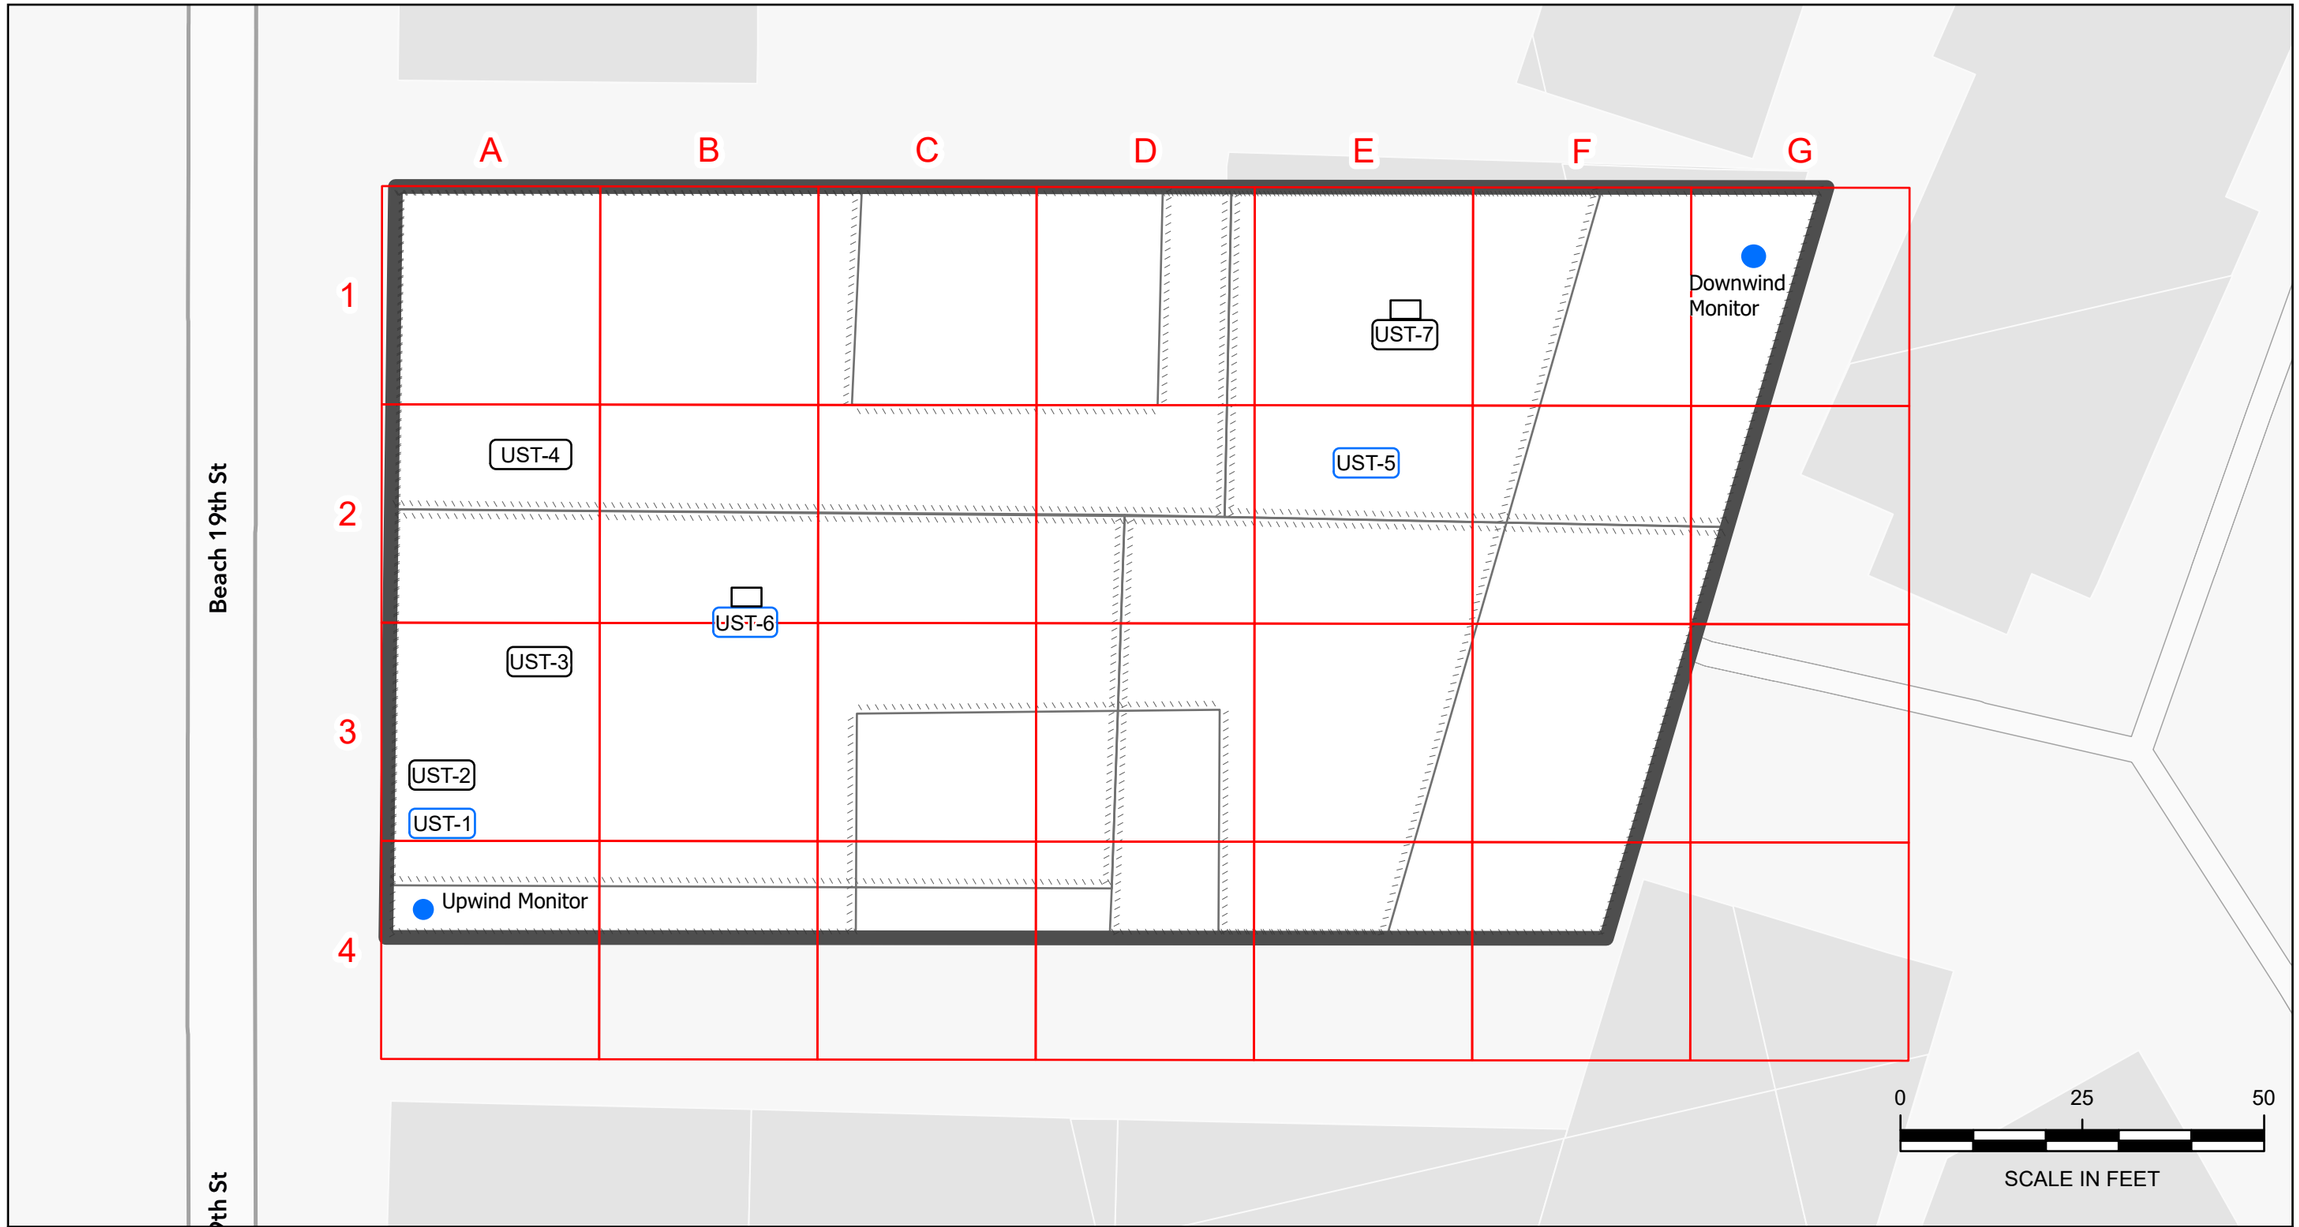

Screening reused backfill (Grid C2)

Backfill (Grid E3)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, vapor barrier installation, and construction of concrete footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: B2, C2, D2, D3, E2, and E3.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

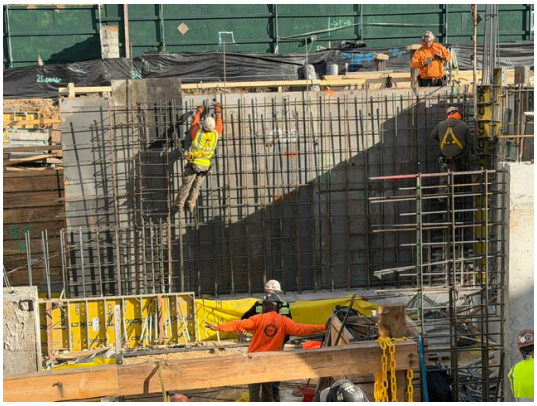

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

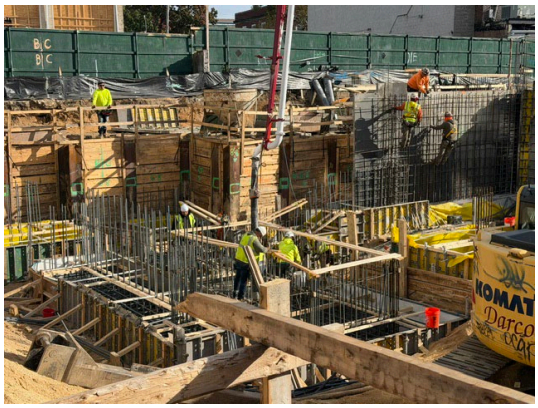

Upcoming work includes excavation of soil, installation of support of excavation, the collection of end point samples, and wall and footing construction.

F) Photographs

Representative photographs from the reporting period are shown below.

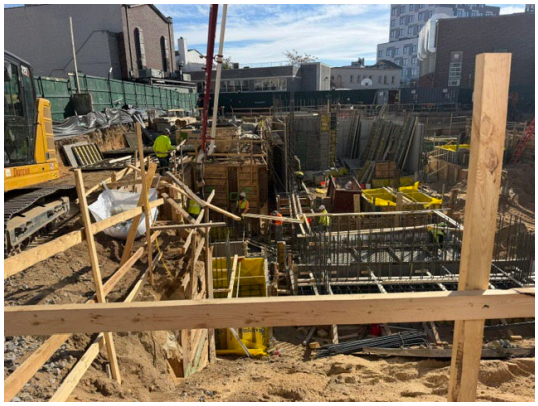

Wall construction (Grids D2-E2)

Wall construction (Grids D2-E2)

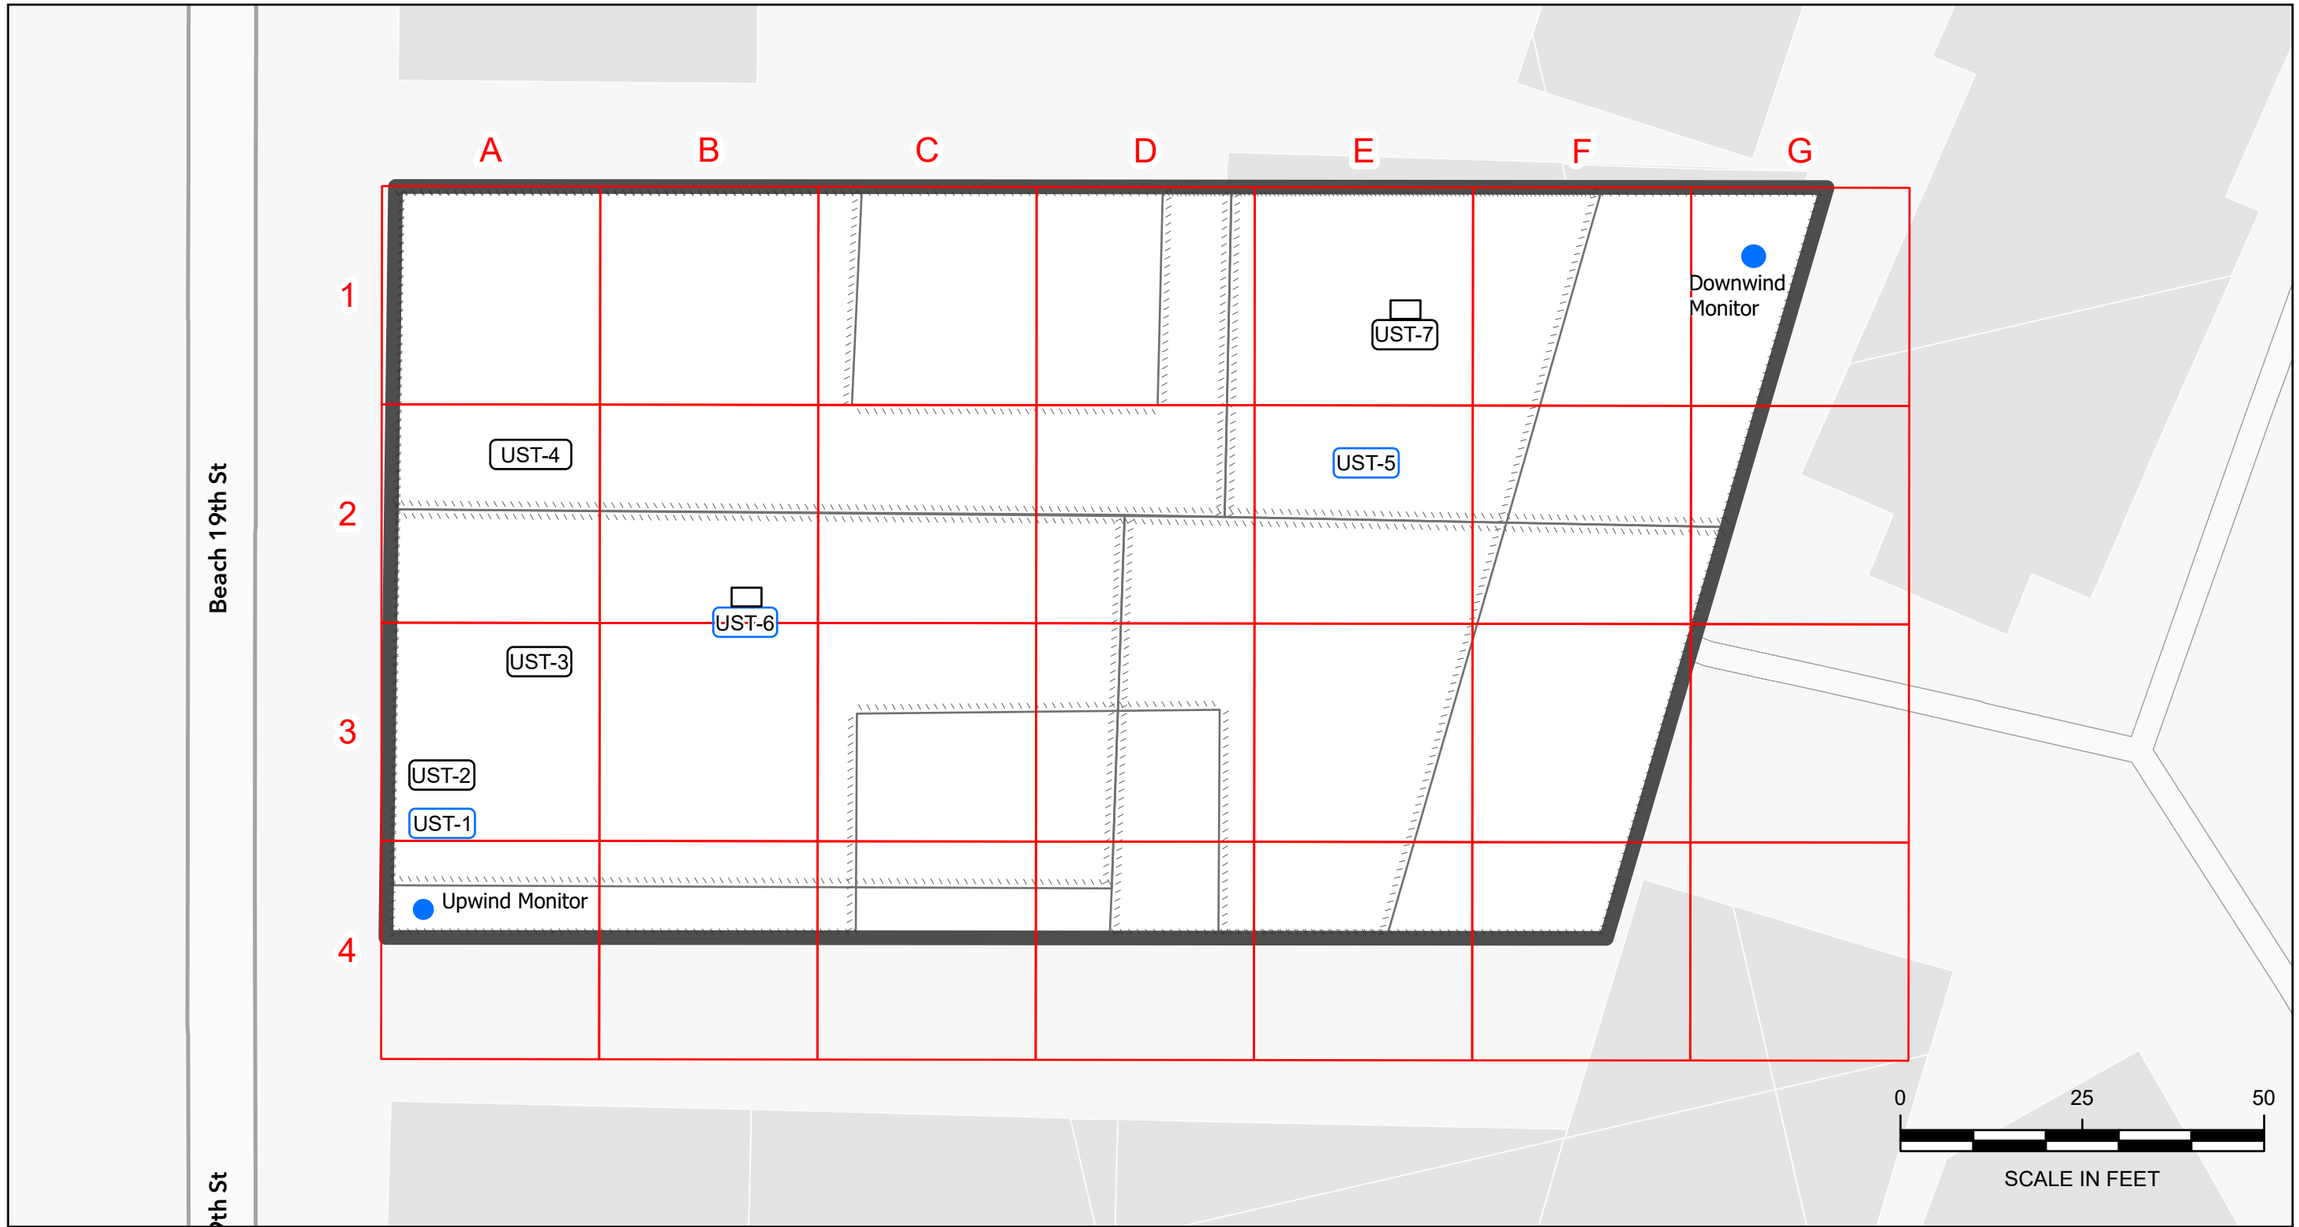

Footing construction (Grid B3)

Footing construction (Grid B2)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, vapor barrier installation, and construction of concrete walls and footings.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: C2, D2, D3, E2, and E3.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

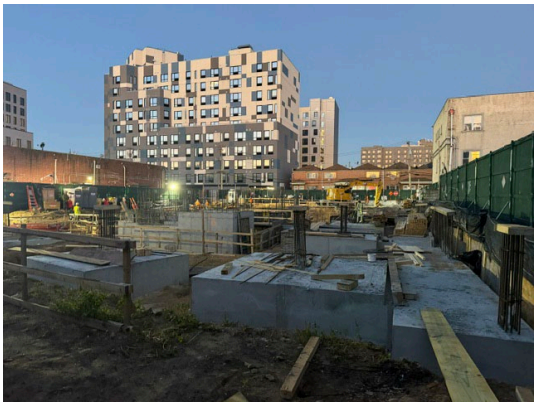

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of support of excavation, collection of end point samples, and wall and footing construction.

F) Photographs

Representative photographs from the reporting period are shown below.

Concrete footings (Gridline E and F)

CAMP monitor and silt fence (Grid G1)

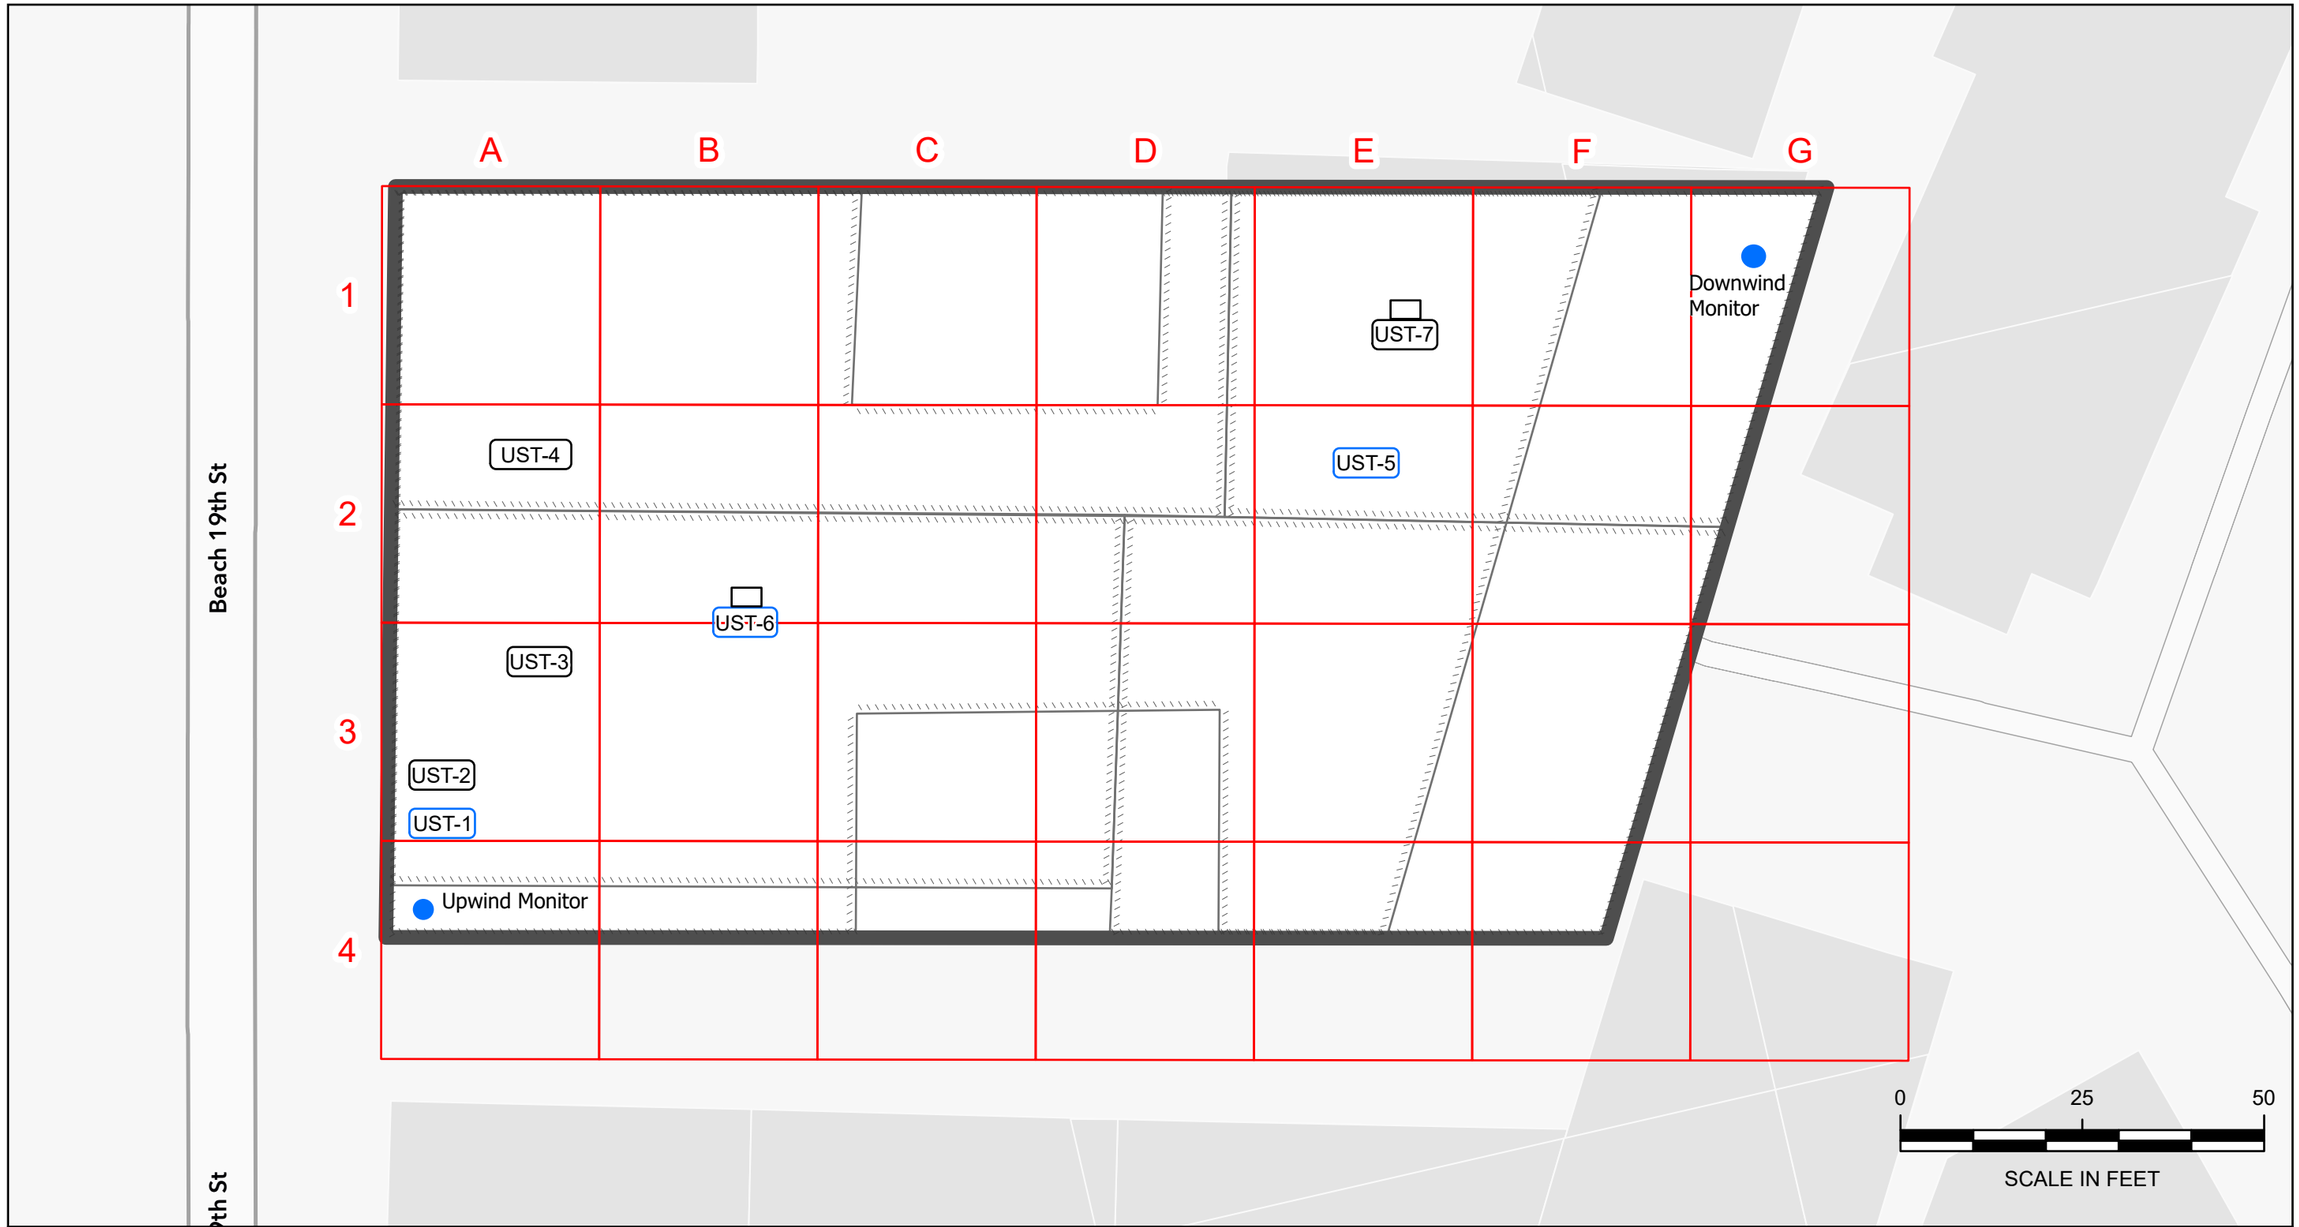

Footing construction (Grid C2)

Footing construction (Grid C2)

RE: Daily Status Report for the 10-16 Beach 19th Street BCP Site,
10-16 Beach 19th Street, Far Rockaway, Queens, New York

Fieldwork activities were performed in conformance with the Remedial Action Work Plan (RAWP, July 2026) and the Decision Document (July 2026) under supervision of qualified personnel from Bellucci Engineering and Gallagher Bassett Technical Services (GBTS).

A) Overview of Remedial Services Completed During Reporting Period

Environmental oversight, including CAMP VOC and dust monitoring, was performed during general site maintenance, vapor barrier installation, construction of concrete footings and walls, and backfilling.

All services were completed in accordance with the RAWP. A Grid Map (indicating any relevant fieldwork activities) is attached.

B) Locations of Work and Quantities of Material Imported and Exported

Grids: C2, D2, F1, and F2.

Soil from Grid C2 was reused to backfill Grids F1 and F2. A request to reuse on-site soils was approved by NYSDEC on October 23, 2026.

No material was imported or exported.

C) Sampling Events

No samples were collected.

D) General Compliance with RAWP/Encountered Problems

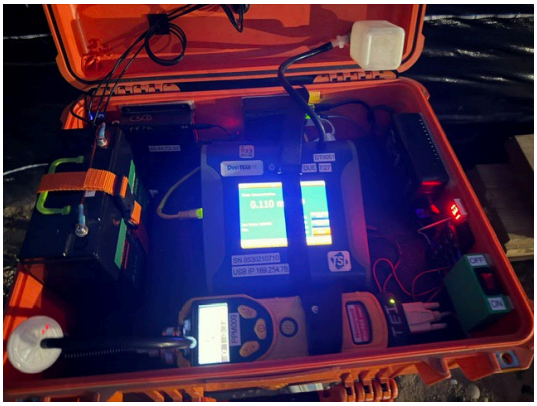

There were no significant deviations from the approved-RAWP, and no complaints were received. Continuous monitoring for VOCs and dust was conducted per the CAMP using two (2) monitoring stations: upwind (Grid A4) and downwind (Grid G1) of construction activities. There were no exceedances of action levels for dust or VOCs.

E) Upcoming Work

Upcoming work includes excavation of soil, installation of support of excavation, collection of end point samples, and wall and footing construction.

F) Photographs

Representative photographs from the reporting period are shown below.

CAMP monitor (Grid G1)

Construction of walls (Grid C2)

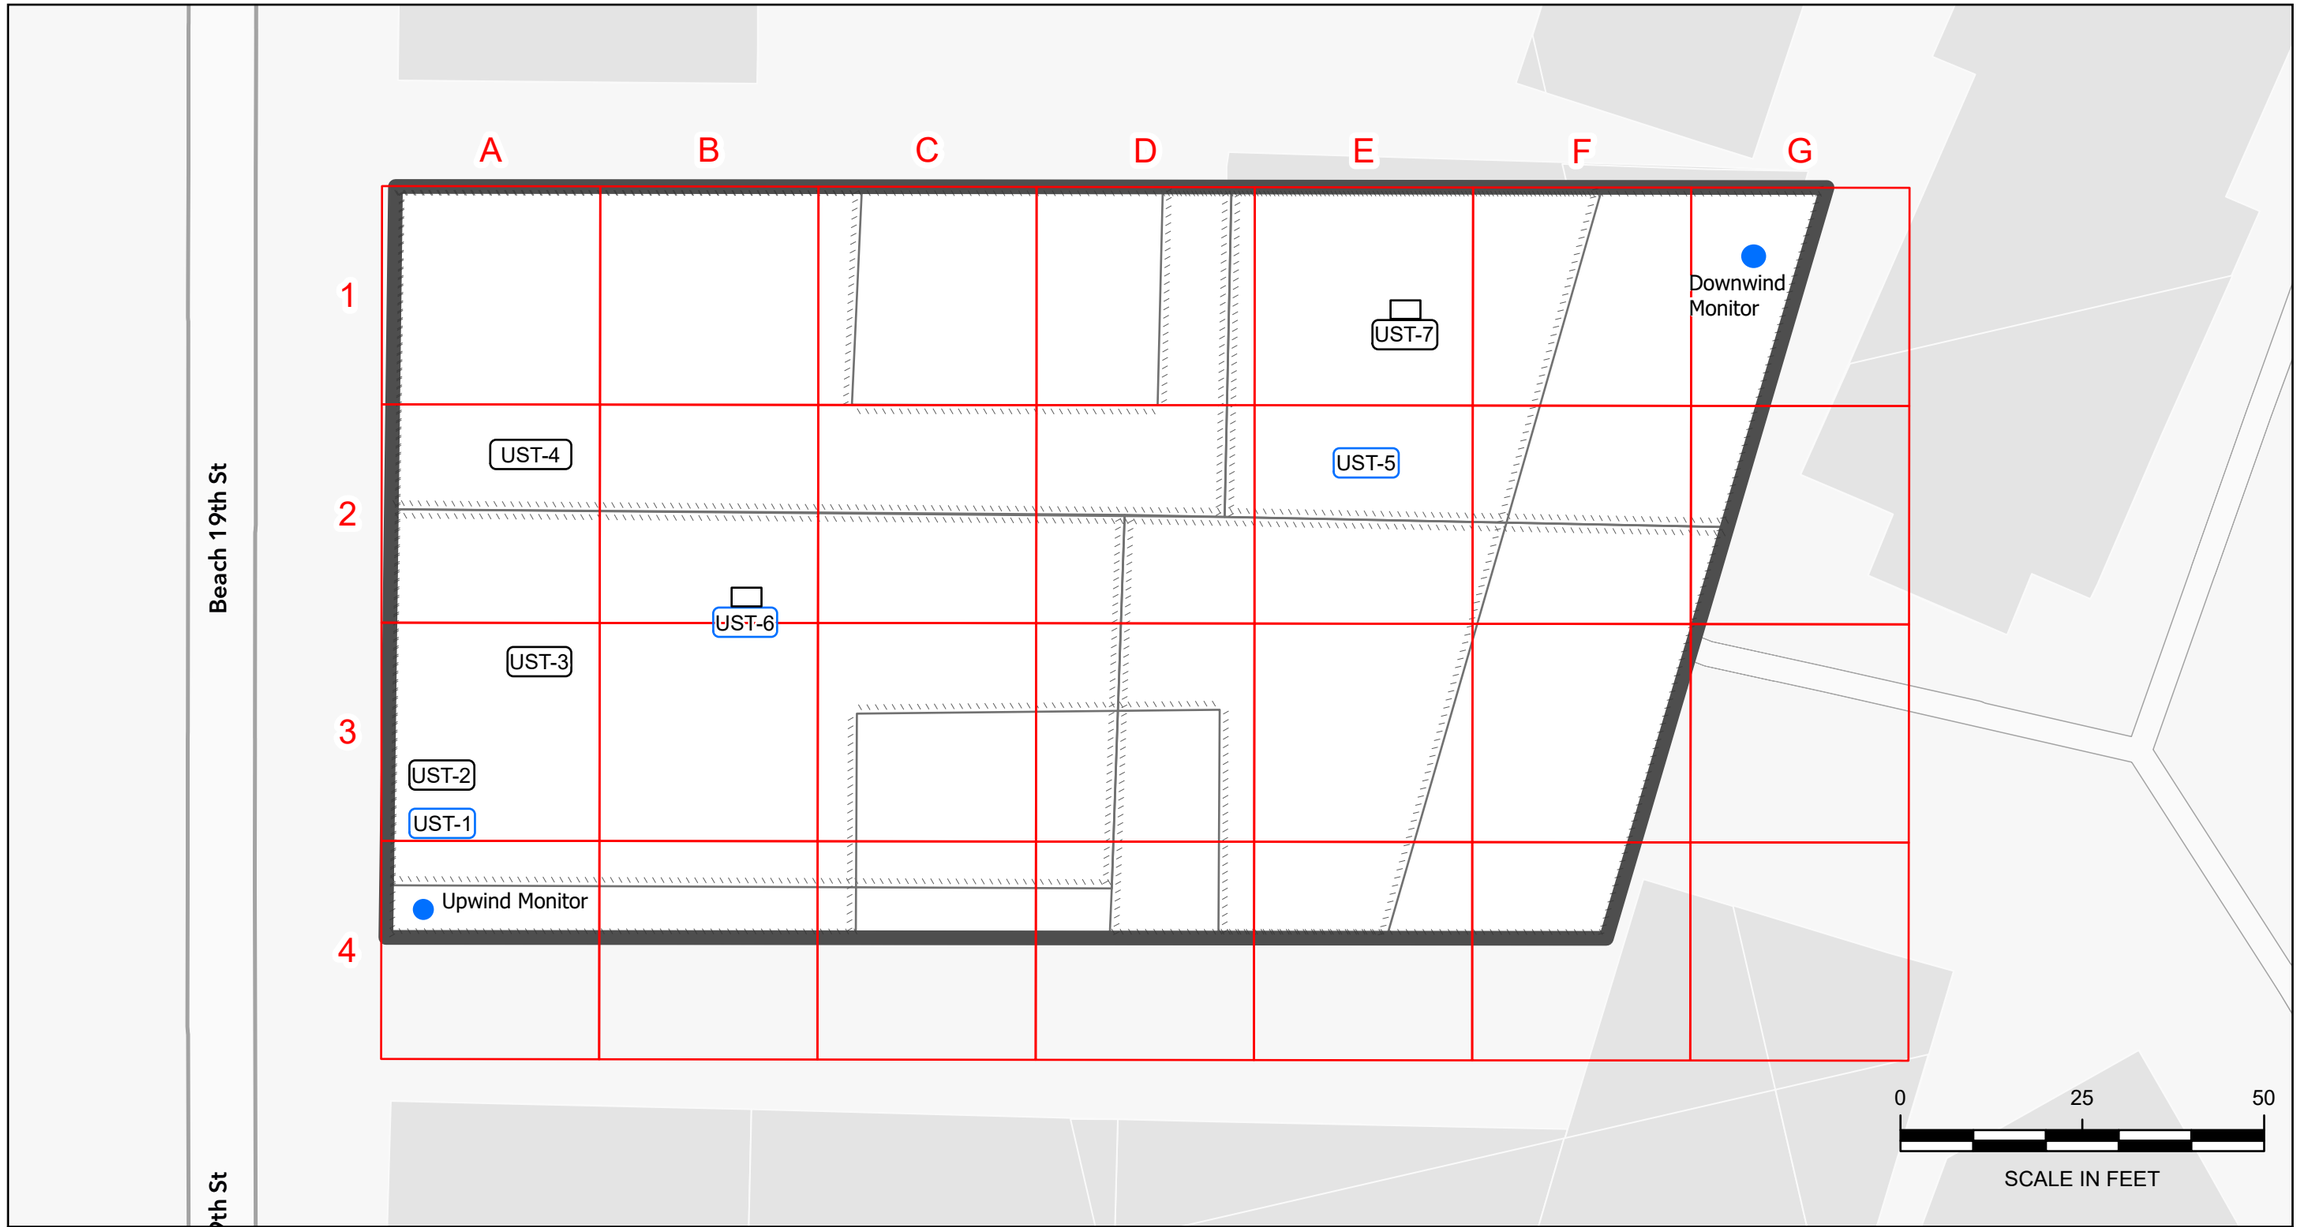

Screening reused backfill (Grid C2)

Inspection of sediment controls at storm drain inlet (off-site)
