

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

<https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters>

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET

Brownfield Cleanup Program

197-201 Canal Street
197 – 201 Canal Street
Staten Island, NY 10304

October 2024

SITE No. C243046
NYSDEC REGION 2

Cleanup Action Completed at Brownfield Site

Action has been completed to address the contamination related to the 197-201 Canal Street site ("site") located at 197 - 201 Canal Street, Staten Island, NY under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by 197-201 Canal St. Realty LLC ("applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicant has submitted a proposed Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been or will be achieved to fully protect public health and the environment for the proposed site use.

- Access project documents online through the DECinfo Locator:
<https://extapps.dec.ny.gov/data/DecDocs/C243046/>.
- The documents also are available at the location(s) identified at left under "Where to Find Information."

Highlights of the Site Cleanup: The following activities have been completed to achieve the remedial action objectives:

- Excavation and off-site disposal of approximately 1,800 tons of contaminated soil/fill material that exceed the applicable soil cleanup objectives;
- Collection and analysis of soil samples to document post-remedial conditions and confirm achievement of cleanup objectives across the site;
- Importation of approximately 830 tons of material to establish design grades;
- Installation of a sitewide cover system consisting of the concrete building slab, and the paved parking lot with a concrete walkway and driveway underlain by at least 2 feet of clean fill;
- Implementation of a Community Air Monitoring Plan during ground intrusive activities;
- Implementation of a Health and Safety Plan during site activities;
- Development of a Site Management Plan (SMP) for long-term management of residual contamination as required by the Environmental Easement, including plans for: (1) Institutional and Engineering Controls; (2) monitoring; (3) operation and maintenance; and (4) reporting; and
- Recording of an Environmental Easement to prevent future exposure to any contamination remaining at the site and to ensure implementation of the SMP.

BROWNFIELD CLEANUP PROGRAM

Next Steps: When NYSDEC approves the FER, it will be made available to the public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicant would be able to redevelop the site after receiving a COC. In addition, the applicant will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

Site Description: The site is located in the Stapleton Heights neighborhood of Staten Island. The site is about 0.290-acres and identified as Block 527, Lot 50 on the Borough of Staten Island Tax Map. The site is bound by vacant land to the east, Canal Street followed by a parking lot and two 2-story residential and commercial buildings to the southeast, a one-story commercial and office building to the southwest, and nine 2-story residential buildings to the north. The site was historically improved with three commercial buildings as early as 1885. The site was used for various commercial and light industrial uses between 1885 and the 1980s, including a hotel, a second-hand furniture store, a millinery, a hand printing shop, a beer garden, a tin/metalworking shop, a bowling alley, a cigar store, a shoe company, a tire sales and services shop, a tackle shop, a barber shop, a food market, and as metal storage. All previous on-site buildings were demolished by 1986 and the site had remained vacant since.

Site redevelopment includes construction of a new 5-story slab-on-grade mixed-use commercial and residential building with parking. The site is within the Special Bay Street Corridor District; area plans include developing additional commercial and residential buildings.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C243046) at:

<https://extapps.dec.ny.gov/cfm/extapps/derexternal/index.cfm?pag eid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://dec.ny.gov/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/brownfield>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
