Re: Village of Haverstraw
Damiani and Empire State Chair Factory Properties

Dear Mr. Ryan:

Enclosed you will find 3 copies of the Citizen Participation Plan for the above referenced project, as per the regulation stated in the New York State Brownfields Procedures Handbook. We will coordinate with the Village to distribute copies to the designated repository location.

Very truly yours,

MALCOLM PIRNIE, INC.

1.0 INTRODUCTION

1.1 PROJECT OVERVIEW

The Village of Haverstraw, New York, would like to remediate the Damiani and Empire State Chair Factory properties located on Allison Avenue and Liberty Street (encompassing approximately 11 to 12 acres) in Haverstraw, New York at some point in the future, develop the water front property to benefit the people of the village. In order to achieve this goal, the Village will need to define the nature and extent of contamination on the site and develop a plan to remove from the site the contamination and debris that could potentially restrict or prohibit the redevelopment and beneficial reuse of the site. The Village has received funds through the New York State Department of Environmental Conservation (NYSDEC) Clean Water/ Clean Air Bond Act for Environmental Restoration (Brownfields) along with an EPA grant to assist in defining the nature and extent of contamination at the site.

The Citizens Participation (CP) Program is aimed at increasing public understanding of the remedial process. Its purpose is to keep the public abreast of the activities such as public meetings and mailings. The CP Program also opens up two-way communication between the public and the appropriate State departments. This communication provides the Village and NYSDEC with an opportunity to:

- Obtain site information from you that will assist in selecting the appropriate Remedial Action Plan and in implementing the adopted plan.
- Answer your questions and learn your concerns regarding the site and the remedial process.

The site remediation and development begins with site investigations and follows a path through remedial action evaluation and selection, design, construction, and monitoring.

1.2 SITE DESCRIPTION AND BACKGROUND

Both the project sites border the Village of Haverstraw waterfront. The Damiani site, at some point in the past, may have been used to store above ground fuel storage tanks. The site was also reportedly used to store vehicles in a garage structure that no longer exists on site. It is possible that debris may have also been dumped on the property. The Chair Factory site was historically used to assemble and finish chairs. There is an existing mason block building on site that was reportedly used to assemble and finish the chairs. At some point the building was later expanded. The property near the building was reportedly used to store containers filled with lacquer for finishing the chairs. Uncharacterized materials may have also been deposited on site.

2.0 PROJECT DESCRIPTION

2.1 PROJECT OBJECTIVE

2.1.1 Project Objective

The objective of the project is to develop an investigation program, implement this program, provide a findings report identifying concerns, recommended clean-up alternatives, conceptual costs, and the scope of additional investigations, if necessary. The anticipated dates for the significant elements of this process are listed below:

September 2003 – March 2004

Approval of the Work Plan Field work including:

- Visual survey
- Soil, gas and magnetometer surveys
- Global Positioning System (GPS) survey
- Test pits
- Surface water sampling (3 upstream and downstream sampling events)
- Sediment sampling and testing (3 samples)
- Soil sampling and testing (5 samples)

December 2004 – January 2005

Prepare Draft Site Investigations and Remedial Alternatives Report (SIRAR).

February 2005

Submittal of Final SIRAR to the NYSDEC.

2.1.2 Project Contact Personnel

The following individuals are available to answer your questions regarding:

Mr. Mike Ryan
New York State Department of Environmental Conservation
625 Broadway 11th Floor
Albany, New York 12233-7015
(518) 402-9662

Environmental and Technical Concerns:

Mr. Mike Ryan
New York State Department of Environmental Conservation
625 Broadway 11th Floor
Albany, New York 12233-7015
1-800-342-9296

Mr. William Gilday
New York State Department of Health
547 River Street Room 300
Troy, NY 12180
1-800-458-1158 ext. 2-7880

Kathy Quinn
Rockland County Department of Health
50 Sanatorium Road Building D
Pomona, NY 10970
1-845-364-2512

Citizen Participation:

Mr. Michael J. Knipfing
New York State Department of Environmental Conservation
21 South Putt Corners Road
New Palz, NY 12561
(914) 256-3154

Mr. Mark Van Deusen
Public Outreach Unit
New York State Department of Health
547 River Street, Room 300
Troy, NY 12180
1-800-458-1158 ext. 2-7530

Other State Representatives:

All of the following can be reached at:

21 South Putt Corners Road
New Paltz, NY 12561

Marc Moran, Regional Director
NYSDEC

Ellen Stoutenburgh, Public Affairs Officer
NYSDEC

Ram Pergadia

State Capitol
Albany, NY 12224

3.0 CITIZEN PARTICIPATION ACTIVITIES

3.1 OVERVIEW

This Section describes the specific citizen participation activities planned to be carried out during the Damiani and Empire State Chair Factory Restoration Project. These activities will be developed in phases as the investigation progresses, and may be supplemented as the NYSDEC Project Manager and assigned Citizen Participation Specialist gain insight into local interest in the project, or as the Technical program and information on the site changes.

All information materials will be reviewed and approved by the NYSDEC Project Manager, assigned Citizen Participation Specialist, and appropriate NYSDOH personnel for clarity and accuracy prior to release to the public.

3.2 PUBLIC NOTIFICATION LIST

The NYSDEC has established a preliminary site mailing list. This contact list will be updated as necessary. Attachment 1 includes the Public Notification List.

3.3 DOCUMENT REPOSITORIES

Document repositories are established at the following locations, to make site documents easily accessible for the public to read and review. During the remedial process various documents will be placed in these repositories as they become available. The Department encourages you to use these repositories and review site documents prior to attending public meetings whenever possible. The document repositories for this site are:

- Village of Haverstraw Library
  85 Main Street
  Haverstraw, NY 10927
  (914) 835-0324
  Monday 10:00AM - 8:00PM
  Tuesday, Wednesday, Thursday, 10:00AM - 6:00PM
  Friday 10:00 AM – 5:30 PM
  Saturday 10:00 AM - 5:00PM

- Village of Haverstraw Municipal Building
  40 New Main Street
  Haverstraw, NY 10927
  (914) 835-2000
  Monday-Friday 9:00AM - 4:00PM

- NYDEC Region 3
  21 South Putt Corners Road
  New Paltz, NY 12561
  (914) 256-3154
  Monday-Friday 8:30AM - 4:45PM

3.4 SIGNIFICANT DOCUMENTS

All reports pertaining to the various investigations at the Damiani and Empire State Chair Factory sites as well as related studies and legal documents will be available for review in NYSDEC's Albany, New York office.

As various documents become available during the remedial process they will automatically be placed in the Document Repositories. These documents may include:

- Approved SI/RAR Work Plan
- Fact sheets
- Health and Safety Plans
- Testing, sampling and monitoring data
- Quality Assurance/Quality Control Plans
- Citizen Participation Plan
- SIRAR Report
- Proposed Remedial Action Plan (RMP)
- Record of Decision (ROD)

3.5 PROJECTED SCHEDULE OF ACTIVITIES

The anticipated dates for the significant elements of Citizen Participation Plan are listed below:

Winter 2004-2005	Establish Public Notification Contact List
Winter 2004-2005	Establish Local Document Repositories
Winter 2004-2005	Mailing of first Fact Sheet to announce the availability of the SI/RAR Work Plan
Spring 2005	Mailing of second Fact Sheet to present the Remedial Action Plan (PRAP)
Spring 2005	Public Meeting and 45-day Comment Period on the PRAP
Summer 2005	Mailing of Announcement of Availability of the Record of Decision

As previously noted, additional citizen participation activities may be added, and the plan revised, at the discretion of the NYSDEC.

4.0 GLOSSARY AND ACRONYMS

4.1 COMMONLY USED CITIZEN PARTICIPATION TERMS

NOTE: "Department" refers to New York State Department of Environmental Conservation (NYSDEC)

Administrative Record: Part of a site's **Record of Decision** which lists and defines documents used in the development of NYSDEC's decision about selection of a remedial action.

Availability Session: A scheduled gathering of program staff and members of the public in a casual setting, without a formal presentation or agenda but usually focusing on a specific aspect of a site's remedial process.

Citizen Participation: A program of planning and activities to encourage communication among people affected by or interested in hazardous waste sites and the government agencies responsible for investigating and remediating them.

Citizen Participation Plan: A document which must be developed at a site's **Remedial Investigation** stage. A CP Plan describes the citizen participation activities that will be conducted during a site's remedial process.

Citizen Participation Record: A document prepared at a major remedial stage which describes the citizen participation activities required at that state. A CP Record also directs a scoping process to determine if additional citizen participation activities are appropriate and feasible.

Citizen Participation Specialist: A staff member from an NYSDEC central office or regional office who has specialized training and experience to assist a **project manager** and other staff to plan, conduct and evaluate a site-specific citizen participation program.

Classification: A process to place a hazardous waste site within a category which defines its hazardous waste status and its threat or potential threat to public health and the environment. Sites are listed along with their classifications in the **Registry of Inactive Hazardous Waste Disposal Sites**.

Class 1 - causing or representing an imminent danger of causing irreversible or irreparable damage to public health or environment -- immediate action required.
Class 2 - significant threat to public health or environment -- action required.

Class 2a - temporary classification assigned to a site for which there is inadequate or insufficient data for inclusion in any other classification.
Class 3 - does not present a significant threat to public health or environment -- action may be deferred.
Class 4 - site properly closed -- requires continued management.
Class 5 - site properly closed -- no further action required.
Delisted - site no longer considered an inactive hazardous waste disposal site.

Comment Period: A time period for the public to review and comment about various documents and DER actions. For example, a 30-day comment period is provided when DER issues a **Proposed Remedial Action Plan (PRAP)**, and when DER proposes to **Delist** a site from the **Registry of Inactive Hazardous Waste Disposal Sites**.

Consent Order: A legal and enforceable agreement negotiated between NYSDEC and a **responsible party**. The order sets forth agreed upon terms by which a responsible party will undertake site investigation and/or cleanup, or pay for the costs of those activities. The order includes a description of the remedial actions to be taken by the responsible party with NYSDEC oversight, and a schedule for implementation.

Contact List: Names, addresses and/or telephone numbers of individuals, groups, organizations, government officials and media affected by or interested in a particular hazardous waste site. The size of a contact list and the categories included are influenced by population density, degree of interest in a site, the state of the remedial process and other factors. It is an important tool needed to conduct outreach activities.

Delist: Action by which DER removes a hazardous waste site from the **Registry of Inactive Hazardous Waste Disposal Sites** upon determination that: the site contains inconsequential amounts of hazardous waste; or that a remediated site no longer requires **Operation and Maintenance**; or that a remediated site does not require Operation and Maintenance. A proposal to delist a site triggers a public notifications and **comment period** process.

Division of Environmental Enforcement (DEE): A unit within the New York State Department of Environmental Conservation which works with the **Division of Environmental Remediation** and others to negotiate with **responsible parties** to achieve agreements for the investigation and remediation of hazardous waste sites. A negotiated agreement is contained in a **consent order**.

Division of Environmental Remediation: Formerly the **Division of Hazardous Waste Remediation**, a major program unit within the New York State Department of Environmental Conservation created to manage the hazardous waste site remedial program from site discovery through **Operation and Maintenance** activities. Staff include: engineers, geologists, chemists, attorneys, citizen participation specialists, environmental program specialists and support staff.

Division of Hazardous Waste Remediation: (See **Division of Environmental Remediation).**

Document Repository: A file of documents pertaining to a site's remedial and citizen participation programs which is made available for public review. The file generally is maintained in a public building near the hazardous waste site to provide access at times and a location convenient to the public.

Enforcement: NYSDEC's efforts, through legal action if necessary, to compel a **responsible party** to perform or pay for site remedial activities. NYSDEC may perform this effort by itself or in concert with other agencies.

Environmental Quality Bond Act (EQBA): The 1986 Environmental Quality Bond Act which gives New York State bonding authority of up to $1.2 billion to fund the State's share of the total cost of remediating hazardous waste sites in New York State.

Fact Sheet: A written discussion about part of all of a site's remedial process, prepared and provided by DER to the public. A fact sheet may focus on: a particular element of the site's remedial program; opportunities for public involvement; availability of a report of other information, or announcement of a **public meeting** or **comment period**. A fact sheet may be mailed to all or part of a site's **contact list**, distributed at meeting, placed in a **document repository** and/or sent on an "as requested" basis.

Interim Remedial Measure (IRM): A discrete action which can be conducted at a site relatively quickly to reduce the risk of people's health and the environment from a well-defined hazardous waste problem. An IRM can involve removing contaminated soil and drums, providing alternative water supplies or securing a site to prevent access.

National Priorities List: The U.S. Environmental Protection Agency's list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial response using money from a special trust fund.

New York State Department of Health: Agency within the executive branch of New York State government which: performs health-related inspections at suspected hazardous waste sites; conducts health assessments to determine potential risk from environmental exposure; reviews Risk Assessments prepared during the **Remedial Investigation and Feasibility Study**; conducts health-related community outreach around sites; and reviews remedial actions to assure that public health concerns are adequately addressed.

New York State Department of Law: Agency within the executive branch of New York State government which takes the lead on hazardous waste sites requiring civil enforcement through court action. Litigation can involve negotiations and court action with **responsible parties** to clean up sites; natural resource damage claims, and recovery of remedial costs.

New York State Registry of Inactive Hazardous Waste Disposal Sites: The "Registry". A document which NYSDEC is directed by law to maintain and which lists and provides information about every hazardous waste site in New York State which meets criteria established through a definition of hazardous waste and a classification system.

Operable Unit: A discrete part of an entire site that produces a release, threat of release, or pathway of exposure. An Operable Unit can receive specific investigation, and a particular remedy may be proposed. A **Record of Decision** is prepared for each Operable Unit.

Operations and Maintenance: A period in which remedial action may be conducted following construction at a site (for example, operation of a "pump and treat" system), or which is performed after a remedial action to assure its continued effectiveness and protection of people's health and the environment. Activities can include site inspections, well monitoring and other sampling.

Preliminary Site Assessment (PSA): A PSA is DER's first investigation of a site. A PSA is performed to determine if a site meets New York State's definition of an inactive hazardous waste disposal site by confirming the presence of hazardous waste and determining if the site poses a significant threat to public health or the environment.

Project Manager: An NYSDEC staff member within the **Division of Environmental Remediation** (usually an engineer, geologist or hydrogeologist) responsible for the day-to-day administration of remedial activities at, and ultimate disposition of, a hazardous waste site. The Project Manager works with legal, health, **citizen participation** and other staff to accomplish site-related goals and objectives.

Proposed Remedial Action Plan (PRAP): An analysis by DER of each alternative considered for the remediation of a hazardous waste site and a rationale for selection of the alternative it recommends. The PRAP is created based on information developed during the site's **Remedial Investigation and Feasibility Study**. The PRAP is reviewed by the public and other state agencies.

Public Meeting: A scheduled gathering of **Division of Environmental Remediation** staff with the affected/interested public to give and receive information, ask questions and discuss concerns about a site's remedial program. Staff from other NYSDEC divisions, legal and health staff, and staff from consultants and a responsible party often also attend. A public meeting, unlike an **availability session**, generally features a formal presentation and a detailed agenda.

Reclassification: A process by which DER redefines the threat posed by a hazardous waste site to public health and the environment by developing and assessing site information and, based on findings and conclusions, assigning a new **classification** code.

Record of Decision (ROD): A document which provides definitive record of the cleanup alternative that will be used to remediate a hazardous waste site. The ROD is based on information and analyses developed during the **Remedial Investigation/Feasibility Study** and public comment.

Remedial Alternatives Report (RAR): A report that contains an evaluation of options for the remediation of any contamination in, on, or under, or emanating from, a property that includes an analysis of data and other information concerning the nature and extent of that property's contamination and is generally performed concurrently, and in an interactive fashion, with the **site investigation**.

Remedial Construction: The physical development, assembly and implementation of the remedial alternative selected to remediate a site. Construction follows the **Remedial Design** and state of a site's remedial program.

Remedial Design: The process following finalization of a **record of Decision** in which plans and specifications are developed for the **Remedial Construction** of the alternative selected to remediate a site.

Remedial Investigation/Feasibility Study (RI/FS): The RI fully defines and characterizes the type and extent of hazardous waste contamination at the site. The FS, which may be conducted during or after the RI, uses information developed during the RI to develop alternative remedial actions to eliminate or reduce the threat of hazardous waste contamination to public health and the environment.

Responsible Party: An individual or business who: currently owns or operates a hazardous waste site; or historically owned or operated a site when hazardous waste was disposed; or generated hazardous waste at a site; or transported hazardous waste to a site.

Responsiveness Summary: A written summary of major oral and written comments received by DER during a **comment period** about key elements of a site's remedial program, such as a **Proposed Remedial Action Plan**, and DER's response to those comments.

Site Investigation (SI): A process undertaken to determine the nature and extent of contamination in, on and under, and emanating from a property. The SI includes the gathering of sufficient information to determine the necessity for, and the selection of the appropriate method of, remediation of contamination in on, or under, or emanating from a property.

Site Issues and Community Profile Scoping Sheet: A document prepared to support each **Citizen Participation Record**. Each Scoping Sheet identifies issues and information important to DER and the community and information that needs to be exchanged at a particular remedial stage. The Scoping Sheet also summarizes information about the surrounding community, including demographics, special needs, etc.

Superfund: The common name for the Federal program established by the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended in 1986. The Superfund law authorizes the U.S. Environmental Protection Agency to investigate and clean up sites nominated to the **National Priorities List**.

Title 3 Project: Remediation of a municipally owned site through the State Superfund title 3 Program whereby New York State pays 75 percent of eligible costs for remediation and the municipality pays 25 percent.

Toll-Free "800" / "888" Number: An information line maintained by the **Division of Environmental Remediation** to provide convenient access for people who have questions, concerns or information about hazardous waste sites and their remedial programs.

4.2 ACRONYMS

AG	New York State Attorney General's Office
