

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Environmental Cleanup to Begin at Brownfield Site

Action is about to begin that will address contamination related to the Orangetown Commerce Center site ("site") located at 5 Greenbush Rd, Orangeburg, Rockland County. Please see the map for the site location. The cleanup activities will be performed by BF Orangetown, LLC ("applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). NYSDEC has determined that the Remedial Action Work Plan (RAWP) protects public health and the environment and has approved the plan.

- Access the approved RWP and other project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C344078/>.
- The documents also are available at the location(s) identified at left under "Where to Find Information."

Remedial activities are expected to begin in October 2022 and last about 15 months.

Remedial activities were originally expected to begin in July 2019. However, the start of the work was delayed while the Volunteer pursued and obtained necessary approvals to redevelop the site.

Highlights of the Upcoming Cleanup Activities: The goal of the cleanup action for the site is to achieve cleanup levels that protect public health and the environment. The key components of the remedy are:

- Excavation and off-site disposal of petroleum impacted soil/fill;
- Dewatering and off-site disposal of petroleum-impacted groundwater and non-aqueous phase liquid (NAPL);
- Collection and analysis of end-point samples to evaluate the performance of the remedy with respect to attainment of the Commercial Soil Cleanup Objectives (SCOs);
- Installation of a site cover system consisting of a concrete building foundation, asphalt parking areas, or clean soil.

A site-specific Health and Safety Plan (HASP) and a Community Air Monitoring Plan (CAMP) will be implemented during remediation activities. The HASP and CAMP establish procedures to protect on-site workers and residents and includes required air monitoring as well as dust and odor suppression measures.

BROWNFIELD CLEANUP PROGRAM

Next Steps: After the applicant(s) completes the cleanup activities, they will prepare a Final Engineering Report (FER) and submit it to NYSDEC. The FER will describe the cleanup activities completed and certify that cleanup requirements have been achieved or will be achieved.

When satisfied that the cleanup requirements have been or will be achieved for the site, NYSDEC will approve the Final Engineering Report. NYSDEC will then issue a Certificate of Completion to the applicant(s). The applicant(s) would be able to redevelop the site in conjunction with receiving a Certificate of Completion. In addition, the applicant(s) would be eligible for tax credits to offset the costs of performing cleanup activities and for redevelopment of the site.

NYSDEC will issue a fact sheet that describes the content of the Final Engineering Report. The fact sheet will identify any institutional controls (for example, environmental easements) or engineering controls (for example, a site cover) necessary at the site in relation to the issuance of the Certificate of Completion.

Site Description: The site is located at 5 Greenbush Road, Orangeburg, NY. The site is a triangular parcel bounded to the east by Greenbush Road, to the west by Western Highway and to the north by Highview Avenue. The site is approximately 5.83 acres in size. The property is currently undeveloped; the northern portion of the site is used as a contractor's storage yard while the remainder of the site is vacant. The site was historically developed with commercial and industrial uses since the 1890s. Specific past uses include Orangeburg Pipe, which manufactured paper cylinders impregnated with coal tar pitch, asbestos and wollastonite. Manufacturing ceased in 1973, and the facilities were demolished shortly after. Site re-development plans consist of the construction of storage units and related site improvements to support this commercial use.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the

site ID, C344078) at:

<https://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
<https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
