Steve,

The pea gravel from Braen Stone does meet the requirement for testing exemption, but the permit is missing. The ¾" RCA also meets the exemption requirement. Please resubmit the form for the RCA with the appropriate gradation report and the new permit if a renewal had been granted.

Mike, thanks for your feedback. I have an updated sieve analysis for RCA (see attached) which passes the sieve analysis, but it will not be used until we can resolve the permit issue.

I've attached another import form for pea stone which should be acceptable. Please let me know.

Thanks,

-Steve

Subject: RE: Cottage - garden

Steve,

The Rip rap from Tilcon is good to go.

The RCA from Hunters Point Recycling has multiple issues. Section 2 question two asks if the gradation meets the requirements to not require sampling. Based on the attached gradation report, ~34% of the material passes through the 80 mesh sieve. The third question asks if virgin material is from a permitted mine or quarry. Hunter Point Recycling is a recycling center and not a permitted mine or quarry. Since the material does not meet the sampling exemption, section 3 will have to be modified to include the sample results. The permit attached from the NYC Department of Sanitation is expired.

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Michael, attached please finds an import request form for Cottage Garden BCP Site. This is a request to import more pea gravel for the SOE solder piles, and is the same source that was previously approved.

Let me know if you have any questions.

Regards,

-Steve

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e). Use of this form is not a substitute for reading the applicable Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is:

Have Ecological Resources been identified?

Is this soil originating from the site?

How many cubic yards of soil will be imported/reused?

If greater than 1000 cubic yards will be imported, enter volume to be imported:

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone?

Does it contain less than 10%, by weight, material that would pass a size 80 sieve?

Is this virgin material from a permitted mine or quarry?

Is this material recycled concrete or brick from a DEC registered processing facility?

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

#8 pea stone from virgin quarry

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

No Sampling was conducted because the material contains less than 10% that passes seive #80.

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

Braen Stone of Sparta

Location where fill was obtained:

Virgin quarry, borough of Sparta, Sussex County, NJ

Identification of any state or local approvals as a fill source:

N/A

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Virgin quarry

Provide a list of supporting documentation included with this request:

sieve analysis

The information provided on this form is accurate and complete.

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Mike attached please find a import form for the Cottage – Garden site. As per our conversation this morning this material is crushed rock from a virgin source in Yonkers New York. This material was previously approved by your department in November 2019 for use a another BCP site in New Rochelle.

Regarding this spill that occurred at the material donor site yesterday afternoon, a hydraulic oil leak occurred from the on-site equipment and spilled onto the soil late yesterday afternoon. The spill was reported to the Department within 2 hours of discovery. Todd Ghiosay is the spills project manager. As per our conversation, the spill occurred in a small area in the equipment staging area away from the site operations and stockpiling areas. I've attached a site plan depicting the rock crushing and stockpiling area, and the equipment staging area where the spill occurred. I have also attached photos of these areas as well.

Let us know if you have any questions or need any additional information.

Thanks,

-Steve

DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e). Use of this form is not a substitute for reading the applicable Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is:

Have Ecological Resources been identified?

Is this soil originating from the site?

How many cubic yards of soil will be imported/reused?

If greater than 1000 cubic yards will be imported, enter volume to be imported:

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone?

Does it contain less than 10%, by weight, material that would pass a size 80 sieve?

Is this virgin material from a permitted mine or quarry?

Is this material recycled concrete or brick from a DEC registered processing facility?

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

7-inch crushed stone from virgin source

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

No sampling was conducted because the material contains less than 10% that passes sieve #80

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

SFC Yonkers LLC (Owner)

Location where fill was obtained:

Central Park Avenue & Heights Drive, Yonkers, NY

Identification of any state or local approvals as a fill source:

none

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Source site has existed as vacant, undeveloped land. Site materials is virgin rock that were crushed at the site and were separated into current stockpiles.

Provide a list of supporting documentation included with this request:

sieve analysis and certification letter.

The information provided on this form is accurate and complete.

DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e). Use of this form is not a substitute for reading the applicable Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is:

Have Ecological Resources been identified?

Is this soil originating from the site?

How many cubic yards of soil will be imported/reused?

If greater than 1000 cubic yards will be imported, enter volume to be imported:

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone?

Does it contain less than 10%, by weight, material that would pass a size 80 sieve?

Is this virgin material from a permitted mine or quarry?

Is this material recycled concrete or brick from a DEC registered processing facility?

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

7-inch crushed stone from virgin source

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

No sampling was conducted because the material contains less than 10% that passes sieve #80

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

SFC Yonkers LLC (Owner)

Location where fill was obtained:

Central Park Avenue & Heights Drive, Yonkers, NY

Identification of any state or local approvals as a fill source:

none

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Source site has existed as vacant, undeveloped land. Site materials is virgin rock that were crushed at the site and were separated into current stockpiles.

Provide a list of supporting documentation included with this request:

sieve analysis and certification letter.

The information provided on this form is accurate and complete.

RE: 1969 Central Park Avenue
Yonkers, New York

To Whom it May Concern:

I, as a part owner and developer of 1969 Central Park Avenue, certify that the referenced site is undeveloped vacant land that has never been developed. The material generated from the site is derived from virgin rock material that is being excavated to grade the site for future development. The rock is crushed on the site to different gradation to facilitate the removal of the material and prepare for development.

If you have any question please call me directly,

A large, stylized handwritten signature in black ink, appearing to read "William Fonte", is written over the company name.
TRIFONT REAL ESTATE MANAGEMENT

William Fonte

This is to certify that this map and the survey on which it is based were made in accordance with the "Minimum Standard" Detail Requirements for the New York State Association of Land Surveyors.
