

	<b>Daily Activity Report</b>			
	Former United Hospital Port Chester, NY			
	BCP No. C360202			
<b>General Site Information</b>				
Date:	Wednesday, May 1, 2024			
Weather:	Partly Cloudy, 70°F			
Wind Direction/Speed:	Southeast @ 4 mph			
AKRF Personnel on Site:	Steve Schmid			
AKRF Equipment on Site:	Handheld PID and Dust Monitor			
Visitors:	None			
<b>Contractor Information</b>				
<b>Contracting Company</b>	<b>Key Personnel</b>		<b>Equipment</b>	
Coastal Environmental Solutions (Well Driller)	Nick Turro		Geoprobe 7822DT, Air Rotary Tooling, Compressor, etc.	
<b>Description and Location of Work Activities Performed</b>				
<p>Coastal Environmental Solutions (Coastal) continued the installation of bedrock monitoring wells in accordance with the Supplemental Groundwater Investigation Work Plan (SGWIWP). Bedrock monitoring well RI-MW-02BR was installed in the northern portion of the site to a depth of approximately 20 feet below ground surface (bgs). During installation, bedrock was encountered at approximately 10 feet bgs and the first water bearing zone was documented at approximately 15.5 feet bgs. The well was constructed by setting 10 feet of 2-inch diameter, 0.02-slot PVC well screen across the observed water bearing zone in bedrock with riser pipe to grade, and included a sand pack extending 1 foot above the well screen, followed by 2 feet of bentonite above the sand pack and cement-bentonite grout to grade (with locking j-plug and flush-mount cover). The well was developed by pumping and surging to remove sediment/accumulated fines until the water ran clear, and will be further developed in accordance with the SGWIWP prior to sampling. The investigation derived waste generated during the well installation activities was containerized in DOT-approved 55-gallon drums for future off-site disposal at a permitted facility(ies).</p>				
<b>Site Soil Disposal Tracking Information</b>
