

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET

Brownfield Cleanup Program

Sun Valley Nursery Filling
Station
136-140 Croton Avenue
Ossining, NY 10562

October 2022

SITE No. C360207
NYSDEC REGION 3

Draft Interim Remedial Measure Work Plan for Brownfield Site Available for Public Comment

The New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), is proposing an expedited cleanup of contamination at the Sun Valley Nursery Filling Station site ("site") located at 136-140 Croton Avenue, Ossining, Westchester County. Please see the map for the site location. NYSDEC is conducting a public comment period because this Interim Remedial Measure (IRM) is likely to represent a significant part of the cleanup for the site.

How to Comment: NYSDEC is accepting written comments about the proposed plan for 30 days, from **October 26** through **November 25, 2022**.

- Access the Draft IRM Work Plan and other project documents online through the DECinfo Locator:
<https://www.dec.ny.gov/data/DecDocs/C360207/>
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Draft Interim Remedial Measure (IRM) Work Plan: An IRM is a cleanup activity that may be performed when a source of contamination or exposure pathway (the way in which a person may contact contamination) can be effectively addressed without extensive investigation and evaluation.

The draft IRM work plan describes proposed upcoming cleanup activities that include:

- Removal and disposal of previously unidentified Underground Storage Tanks (USTs);
- Excavation and off-site disposal of contaminated soil down to weathered bedrock, found at about 10 feet below surface grade across most of the site;
- Importation of clean material that meets the established Soil Cleanup Objectives for use as backfill; and
- Implementing a Health and Safety Plan and Community Air Monitoring Plan during all ground intrusive activities.

Site Description: The site is 0.8 acres and is bordered on the west by Prospect Avenue, on the east by Watson Avenue, on the south by single family housing, and on the north by Croton Avenue. It is currently vacant with no structures. A garden nursery was the last occupant at the site, between 1997 and December 2017. All structures were demolished by February 2020. The site had previously been used as a gas station, taxi service, and auto repair facility between the 1940s and 1997.

The planned redevelopment of the site will be a mix of retail space and apartments. The anticipated cleanup standard will be to restricted residential use.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C360207) at:

<https://www.dec.ny.gov/cfm/external/derexternal/index.cfm?pageid=3>

Next Steps: NYSDEC will consider public comments, revise the plan as necessary, and approve the IRM work plan in consultation with the New York State Department of Health. The approved work plan will be made available to the public (see "Where to Find Information" on the front page).

When the expedited cleanup activities are completed, a Construction Completion Report will be prepared that documents the activities that were performed.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of

contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
