

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Draft Investigation & Interim Remedial Measure Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the Swan Garage Kent Supply Site ("site") located at 64 Centre Ave & 8 Westchester Pl., New Rochelle, Westchester County. Please see the map for the site location.

Draft Investigation Work Plan: The draft work plan, called a "Remedial Investigation/Interim Remedial Measure Work Plan," (RI/IRMWP) was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed by Centre Point Developers LLC & Allstate Capitol LLC ("applicants") with oversight by NYSDEC and the New York State Department of Health (NYSDOH).

Interim Remedial Measure (IRM): An IRM is a cleanup activity that may be performed when a source of contamination or exposure pathway (the way in which a person may contact contamination) can be effectively addressed without extensive investigation and evaluation.

How to Comment: NYSDEC is accepting written comments about the Draft RIWP for 30 days, from **May 12 through June 11, 2021**.

- Access the RIWP and other project documents online through the DECinfo Locator:
<https://www.dec.ny.gov/data/DecDocs/C360210/>.
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Highlights of the Proposed Site Investigation and Interim Remedial Measure: The investigation will define the nature and extent of contamination in soil, groundwater and any other parts of the environment that may be affected.

Previous investigations have detected metals and petroleum related volatile organic compounds (VOCs) in soil and groundwater on-site.

BROWNFIELD CLEANUP PROGRAM

VOCs related to chlorinated solvents and petroleum products were also detected in soil vapor samples.

The IRM will remove suspected underground storage tanks (USTs) identified in previous investigations on-site and associated contaminated soils.

Key components of the investigation work include:

- Drilling and sampling soil borings to identify possible on-site sources of contamination;
- Collecting soil vapor samples; and
- Installing and sampling groundwater wells to monitor impacts from areas of concern both on-site and off-site.

Next Steps: NYSDEC will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to NYSDEC that summarizes the results. NYSDEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a proposed cleanup plan, called a "Draft Remedial Work Plan" will be developed. The cleanup plan will include an evaluation of the proposed site remedy, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The site is 0.560-acres and is bordered on the northwest by Westchester Place and on the southwest by Centre Avenue. It is vacant with all previous structures demolished. The site historically contained automobile servicing garages. Multiple underground storage tanks have been associated with the site.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C360210) at: <https://www.dec.ny.gov/cfm/EXTAPPS/DEREXTERNAL/INDEX.CFM?PAGEID=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit: <https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
