## Cleanup Action Completed at Brownfield Site

Action has been completed to address the contamination related to the Firestone Tire and Auto Repair site ("site") located at 316 Huguenot Street, New Rochelle, Westchester County under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by Allstate Acquisitions LLC ("applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicant has submitted a proposed Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been or will be achieved to fully protect public health and the environment for the proposed site use.

- Access project documents online through the DECinfo Locator:  
<https://www.dec.ny.gov/data/DecDocs/C360215/>.
- The documents also are available at the location(s) identified at left under "Where to Find Information."

**Highlights of the Site Cleanup:** The following activities have been or will shortly be completed to achieve the remedial action objectives:

- Excavation - Excavation across the entire site to bedrock and off-site disposal of about 7,640 cubic yards of contaminated historic fill material exceeding the Unrestricted Use soil cleanup objectives, the site-specific cleanup criteria.
- Vapor Barrier - A vapor barrier will be installed in the building to protect against soil vapor intrusion.
- Development of a Site Management Plan (SMP) for long-term management of residual contamination as required by the Environmental Easement, including plans for: (1) Institutional and Engineering Controls (IC/ECs); (2) monitoring; (3) operation and maintenance; and (4) reporting.
- An Environmental Easement was recorded to prevent future exposure to any contamination remaining at the site and to ensure implementation of the SMP.

# BROWNFIELD CLEANUP PROGRAM

**Next Steps:** When NYSDEC approves the FER, it will be made available to the public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicant would be able to redevelop the site after receiving a COC. In addition, the applicant will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

**Site Description:** The 0.281-acre site is bordered on the west by Huguenot Street and on the east by Westchester Place. The former on-site structure was constructed in 1957 and housed the Firestone Tire & Auto Repair business.

The future development includes mixed-use apartments with first-floor commercial applications.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C360215) at:  
<https://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3>

**Brownfield Cleanup Program:** New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels

exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:  
<https://www.dec.ny.gov/chemical/8450.html>
