**Subject: Phase I Environmental Site Assessment, 41 N Main Street, Port Chester, NY
41 N Main Street, Port Chester, New York 10573
EBI Project # 1119002339**

Dear Mr. DeWitt:

Attached please find EBI's *Phase I Environmental Site Assessment*, (the *Report*) for the above-mentioned asset (the Subject Property). During the property survey and research, EBI's property surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the property and its history. The *Report* was completed according to the terms and conditions authorized by you, the Client. This *Report* has been completed in general conformance with ASTM E 1527-13 and Ivy Realty Services, LLC's Scope of Work.

The purpose of this report is to acquire environmental information, observe the general condition and maintenance status of the Subject Property, to suggest remediation and/or maintenance practices considered customary for the Subject Property to continue in its current operation, compared to properties of similar age and condition, and to identify recognized environmental conditions in connection with the Subject Property described in this report.

This *Report* was performed utilizing methods and procedures consistent with established commercial practices and in conformance with industry standards. The suggestions represent EBI Consulting's opinion based on written, graphic or verbal information, the property condition and data available to us at the time of the survey. Factual information regarding operations, conditions or data provided by the Client, occupants, owner or their representative has been assumed to be correct and complete.

Reliance on the *Report* and the information contained herein shall mean (i) the *Report* may be relied upon by a lender to be selected by Ivy Realty Services, LLC, in determining whether to make a loan evidenced by a note secured by the Property ("the Mortgage Loan"); (ii) the *Report* may be relied upon by any purchaser in determining whether to purchase the Mortgage Loan (but not the Subject Property) from that lender, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the *Report* may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; (iv) the *Report* speaks only as of its date in the absence of a specific written update of the *Report* signed and delivered by EBI Consulting.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI Consulting is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the *Report* or on the closing of any business transaction.

EBI Consulting declares that, to the best of our professional knowledge and belief, EBI meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and EBI has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. EBI Consulting has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you for the opportunity to prepare this *Report*, and assist you with this project. Please call us if you have any questions or if EBI Consulting may be of further assistance.

EXECUTIVE SUMMARY

At the request of Ivy Realty Services, LLC, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 41 N Main Street in Port Chester, New York 10573, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes one rectangular-shaped parcel, totaling approximately 0.04 acre. At the time of assessment, the Subject Property consisted primarily of undeveloped land, with flower planters and a brick walkway being the only site improvements.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

ASSESSMENT SUMMARY TABLE 41 N MAIN STREET, PORT CHESTER, NY 41 N MAIN STREET, PORT CHESTER, NEW YORK 10573

I.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 41 N Main Street in Port Chester, New York 10573.

I.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

I.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, and radon.

I.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of Ivy Realty Services, LLC, in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by Ivy Realty Services, LLC (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of *ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit *Ivy Realty Services, LLC* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute “all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice” as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the

information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with authorities having jurisdiction over the Subject Property. *Ivy Realty Services, LLC* agrees that EBI has no obligation to independently verify the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

I.4 SPECIAL TERMS AND CONDITIONS

The purpose of this Report is to observe the general physical condition and maintenance status of the property, and to suggest repair or maintenance items considered customary for the property to continue in its current operation, compared to properties of similar age and condition.

This Report was performed utilizing methods and procedures consistent with established commercial practices and in conformance with industry standards. The suggestions represent EBI Consulting's opinion based on written, graphic or verbal information, the property condition and data available to us at the time of the survey. Factual information regarding operations, conditions or data provided by the Client, occupants, owner or their representative has been assumed to be correct and complete.

Reliance on the Report and the information contained herein shall mean (i) the Report may be relied upon by a lender to be selected by Ivy Realty Services, LLC, in determining whether to make a loan evidenced by a note secured by the Property ("the Mortgage Loan"); (ii) the Report may be relied upon by any purchaser in determining whether to purchase the Mortgage Loan (but not the Subject Property) from that lender, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the Report may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; (iv) the Report speaks only as of its date in the absence of a specific written update of the Report signed and delivered by EBI Consulting.

I.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Town of Rye Assessor's Office and Mr. Neil Pagano, Property Owner, the Subject Property is currently owned by 41 North Main Street, LLC.

The Subject Property is located at 41 N Main Street in the Village of Port Chester, Town of Rye, Westchester County, New York. The Subject Property includes one rectangular-shaped parcel, identified by the Town of Rye Assessor's Office as Tax ID 142.31-1-, totaling approximately 0.04 acre. The Subject Property is located approximately 130 feet southwest of the intersection of North Main Street and Adele Street. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Port Chester, NY. Figure 2 - Locus Map depicts the location of the Subject Property on the Glenville, CT, Mamaroneck, NY United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

At the time of assessment, the Subject Property consisted primarily of undeveloped land, with flower planters and a brick walkway being the only site improvements.

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of assessment, the Subject Property consisted primarily of undeveloped land, with flower planters and a brick walkway being the only site improvements.

Please refer to Section 5.2 for discussion regarding hazardous substances and petroleum products at the Subject Property.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	Provider/Source
Potable Water Supply	Not provided to the site
Sewage Disposal System	Not provided to the site
Electrical Service	Not provided to the site
Natural Gas Service	Not provided to the site
Oil Service	Not provided to the site
Heating/Cooling Systems	Not provided to the site
Emergency Power	Not provided to the site

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by commercial retail development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by a commercial retail building (43 North Main

ADJOINING PROPERTIES	
	Street).
South	The Subject Property is bound to the south by a vacant lot (39 North Main Street), utilized as a park.
East	The Subject Property is bound to the east by a commercial retail building (37 North Main Street).
West	The Subject Property is bound to the west by North Main Street, beyond which are commercial retail buildings (36-40, and 42 North Main Street).

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties. However, 43 North Main Street is further discussed in Section 4.1.2 as a Registered Storage Tank site.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by Ivy Realty Services, LLC with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The User Questionnaire and any additional documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by Ivy Realty Services, LLC. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

Ivy Realty Services, LLC provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

Ivy Realty Services, LLC provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Ivy Realty Services, LLC provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Ivy Realty Services, LLC provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Ivy Realty Services, LLC provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

Ivy Realty Services, LLC retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded “orphan” properties within the same zip code. The database report is presented in Appendix E.

The database report identified one “orphan” sites. Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listings Within Search Distance
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal SEMS Sites	0.5 mile	No	0
Federal SEMS-ARCHIVE Sites	0.5 mile	No	1
Federal RCRA CORRACTS Sites	1.0 mile	No	0
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	No	0
Federal Engineering / Institutional Control Sites	0.5 mile	No	0
Federal ERNS Sites	Property	No	NA
State and Tribal equivalent NPL / CERCLIS Sites	1.0 / 0.5 mile	No	0
State and Tribal Spills Sites	Property	No	NA
State and Tribal Landfill or Solid Waste Disposal Sites	0.5 mile	No	3
State and Tribal Leaking Storage Tank Sites	0.5 mile	No	83
State and Tribal Registered Storage Tank Sites	Property & Adjoining	No	1
State and Tribal Engineering / Institutional Control Sites	0.5 mile	No	2
State and Tribal Voluntary Cleanup Sites	0.5 mile	No	4
State and Tribal Brownfield Sites	0.5 mile	No	1

4.1.1 Federal Agency Database Records

National Priority List (NPL)

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)

SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS database.

SEMS – ARCHIVE

SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. The Subject Property was not identified on the SEMS-ARCHIVE database. However, one site located within 0.5 mile of the Subject Property was identified on the SEMS-ARCHIVE database. Information regarding the listed site is presented in the following table:

SEMS-ARCHIVE			
Site	Distance / Direction / Gradient*	EPA ID No.	Regulatory Status
Technical Recovery Service Corp. 1 Martin Place Port Chester, NY	0.233 mile / South-southeast/ Crossgradient	NYD980651475	Discovery: 06/06/1989 Preliminary Assessment: 09/18/1989 Status: SEMS-ARCHIVE

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, distance, and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified SEMS-ARCHIVE facility represent an environmental concern to the Subject Property.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the

Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. Neither the Subject Property nor any adjoining properties were identified on the RCRA Generator database.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

4.1.2 State and Tribal Agency Database Records

State and Tribal equivalent NPL Sites and CERCLIS Sites

State and tribal equivalent NPL and CERCLIS databases were searched for sites located within 1.0 mile and 0.5 mile of the Subject Property, respectively. Neither the Subject Property nor any sites located within the specified minimum search distances were identified on state and/or tribal equivalent NPL and CERCLIS databases.

State and Tribal Spills Sites (Spills)

A review of available Spills databases was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the Spills database.

State and Tribal Landfill Sites and Solid Waste Disposal Sites

The state and tribal landfill and solid waste disposal site databases identify active or inactive landfill and transfer station facilities, as well as open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The Subject Property was not identified on state or tribal landfill and solid waste disposal site databases. However, three sites located within 0.5 mile of the Subject Property were identified on state or tribal landfill and solid waste disposal site databases. Information regarding the listed sites is presented in the following table:

STATE AND TRIBAL LANDFILL SITES AND SOLID WASTE DISPOSAL SITES			
Site	Distance / Direction / Gradient*	ID No.	Facility Status
Fox Island Road SLF 110 Willet Avenue Port Chester, NY	0.094 mile / North / Crossgradient	60S05	Facility Type: Solid Waste Landfill Facility Status: Active No Reported Violations
Fox Island Station TS Fox Island Road Port Chester, NY	0.123 mile / North-northwest / Crossgradient	60T09	Facility Type: Transfer Station Facility Status: Inactive No Reported Violations
Peckham Materials – Port Chester 1 Purdy Avenue Port Chester, NY	0.385 mile / South-southeast/ Crossgradient	60W13	Facility Type: Solid Waste Landfill Facility Status: Active No Reported Violations

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of reported violations, distance, and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

State and Tribal Leaking Storage Tank Sites

Leaking Storage Tank Sites are properties where releases of hazardous substances or petroleum products from underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) have been identified and reported to state, tribal, or local agencies. The Subject Property was not identified on state or tribal Leaking Storage Tank databases. However, 83 sites located within 0.5 mile of the Subject Property were identified on state or tribal Leaking Storage Tank databases. Of the listed sites, 76 sites are located greater than 0.1 mile from the Subject Property. Based upon the distance from the Subject Property, these 76 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. Information regarding the seven LST sites located within 0.1 mile of the Subject Property is presented in the following table:

STATE AND TRIBAL LEAKING STORAGE TANK SITES			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Spill Number 9509548 47 North Main Street Port Chester, NY	0.016 mile / North / Crossgradient	9509548	Notification Date: 11/02/1995 Contaminants: No. 2 fuel oil Media Impacted: Concrete Status: Closed Date of Closure: 11/02/1995

STATE AND TRIBAL LEAKING STORAGE TANK SITES			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Authentic Barbecue Rest 112 North Main Street Port Chester, NY	0.062 mile / North / Crossgradient	9507793	Notification Date: 09/26/1995 Contaminants: No. 2 fuel oil Media Impacted: Concrete Status: Closed Date of Closure: 04/23/2005
JM Sarge, Inc. 58 Westchester Avenue Port Chester, NY	0.076 mile / South-southwest / Crossgradient	0109103	Notification Date: 12/13/2001 Contaminants: Gasoline Media Impacted: Soil Status: Closed Date of Closure: 05/02/2002
Spill Number 0106163 Don Bosco Place Port Chester, NY	0.078 mile / South-southwest / Crossgradient	0106163	Notification Date: 09/05/2001 Contaminants: No. 2 fuel oil Media Impacted: Soil Status: Closed Date of Closure: 03/20/2002
Spill Number 0106580 72 Westchester Avenue Port Chester, NY	0.082 mile / South-southwest / Crossgradient	0106580	Notification Date: 09/20/2001 Contaminants: No. 2 fuel oil Media Impacted: Soil Status: Closed Date of Closure: 03/20/2002
Bank of New York 122 North Main Street Port Chester, NY	0.088 mile / North-northeast / Crossgradient	8901840	Notification Date: 05/23/1989 Contaminants: No. 2 fuel oil Media Impacted: Concrete Status: Closed Date of Closure: 07/30/1992
Caldors Post Road Port Chester, NY	0.095 mile / North-northeast / Crossgradient	9703467	Notification Date: 06/19/1997 Contaminants: Diesel Media Impacted: Pavement Status: Closed Date of Closure: 06/20/1997

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, distance, presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified Leaking Storage Tank sites represent an environmental concern to the Subject Property.

State and Tribal Registered Storage Tanks

The Subject Property was not identified on state or tribal Registered Storage Tank databases. However, one adjoining property was identified on state or tribal Registered Storage Tank databases. Information regarding the listed site is presented in the following table:

STATE AND TRIBAL REGISTERED STORAGE TANKS				
Location	Distance / Direction / Gradient*	Capacity / Contents	Year Installed	Status
Feinsod Hardware Co. 43 North Main Street Port Chester, NY	Adjacent / North / Crossgradient	(1) 1,500-gallon UST / No. 2 fuel oil	1970	Active

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of reported releases and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified state or tribal Registered Storage Tank listing represent an environmental concern to the Subject Property.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. The Subject Property was not identified on state or tribal Engineering Control or Institutional Control Registries. However, one site located within 0.5 mile of the Subject Property was identified on state or tribal Engineering Control or Institutional Control Registries. Information regarding the listed site is presented in the following table:

STATE AND TRIBAL ENGINEERING CONTROL / INSTITUTIONAL CONTROL REGISTRIES			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Former MGP – Purdy & Traverse Avenues 10-14 Waterfront Place Port Chester, NY	0.252 mile / South-southwest / Crossgradient	58556	Notification Date: Not reported Contaminants: VOCs, SVOCs Media Impacted: Soil & GW Status: Closed Date of Closure: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, distance, and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified site represent an environmental concern to the Subject Property.

State and Tribal Voluntary Cleanup Sites

The Subject Property was not identified on state or tribal Voluntary Cleanup Site databases. However, four sites located within 0.5 mile of the Subject Property were identified on state or tribal Voluntary Cleanup Site databases. Information regarding the listed sites is presented in the following table:

STATE AND TRIBAL VOLUNTARY CLEANUP SITES			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Reckson (Royal) Executive Park 111 King Street Rye Brook, NY	0.133 mile / North-northwest / Crossgradient	56866	Responsible Party: Not reported Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported
Hasco Electric (Former) 84 South Water Street Greenwich, CT	0.143 mile / East / Crossgradient	8790	Responsible Party: Not reported Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported

STATE AND TRIBAL VOLUNTARY CLEANUP SITES			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Pecora Brothers Inc 84 South Water Street Greenwich, CT	0.143 mile / East / Crossgradient	13252	Responsible Party: Not reported Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported
Former MGP – Purdy & Traverse Avenues 10-14 Waterfront Place Port Chester, NY	0.252 mile / South- southwest / Crossgradient	58556	Responsible Party: Not reported Notification Date: Not reported Contaminants: VOCs, SVOCs Media Impacted: Soil & GW Status: Closed

* Presumed hydrogeologic gradient based upon regional topography

The Hasco and Pecora Brothers sites are located across the Byram River. Based upon the current regulatory status, distance and/or presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified Voluntary Cleanup Sites represent an environmental concern to the Subject Property.

State and Tribal Brownfield Sites

The Subject Property was not identified on state or tribal Brownfield Sites databases. However, one site located within 0.5 mile of the Subject Property was identified on state or tribal Brownfield Sites databases. Information regarding the listed site is presented in the following table:

STATE AND TRIBAL BROWNFIELD SITES			
Site	Distance / Direction / Gradient*	ID No.	Regulatory Status
Pecora Brothers Inc 84 South Water Street Greenwich, CT	0.143 mile / East / Crossgradient	13252	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the distance and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified Brownfield Site represent an environmental concern to the Subject Property.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

Village of Port Chester Building Department

EBI reviewed available files regarding the Subject Property at the Village of Port Chester Building Department for information regarding past uses of the Subject Property. Building permits for general tenant improvements were on file for the Subject Property. EBI additionally identified a demolition permit for a former three-story commercial retail and residential building, dated 1980. This former building was demolished following a fire earlier the same year. The review of Building Department records did not identify past uses of the Subject Property that would constitute a recognized environmental condition.

Village of Port Chester Fire Department

EBI reviewed available files regarding the Subject Property at the Village of Port Chester Fire Department, Fire Prevention Division. The review of Fire Department records did not identify past uses of the Subject Property that would constitute a recognized environmental condition.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 12 feet above mean sea level (msl). The topography of the Subject Property is relatively flat and slopes gently to the east. The Subject Property is located in a relatively undulating area, and the general slope of the surrounding region is to the east (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Glenville, CT, Mamaroneck, NY USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS National Water Summary (1984), New York region. The Subject Property is located within the New England Upland section of the New England physiographic province, which consists of a discontinuous mantle of till and stratified drift underlain by crystalline metamorphic and igneous rocks.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is the Byram River, located approximately 330 feet east of the Subject Property.

Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the east. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	Historical Uses		Source(s)
	Subject Property	Surrounding Area	
At least 1885-1980	Commercial retail development and limited residential occupancy.	Commercial retail development.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records Personal Interviews
1980 to Present	Vacant lot utilized as public park.	Commercial retail development.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records Personal Interviews

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). It should be noted that the scale of the available aerial photographs precludes the distinct identification of structures and/or land uses on or in the vicinity of the Subject Property. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected aerial photographs are presented in Appendix F.

AERIAL PHOTOGRAPH SUMMARY		
Year	Issues Noted	Observations
1934, 1941, 1949, 1954, 1960, 1966, 1971, 1974	No	<p>Subject Property: The Subject Property appears to be improved with a commercial retail building.</p> <p>Surrounding Area: Surrounding properties to the north, south, east, and west appear to be improved with commercial retail buildings.</p>
1989, 1991, 1996, 2005, 2008, 2011, 2014, 2017	No	<p>Subject Property: The Subject Property appears as it exists at the present day. The Subject Property is occupied by a park, with no notable structures or improvements.</p> <p>Surrounding Area: The surrounding properties to the north, east, and west are occupied by commercial retail buildings. The southern adjacent property is occupied by an extension of the park on the Subject Property.</p>

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected fire insurance maps are presented in Appendix F.

FIRE INSURANCE MAP SUMMARY		
Year	Issues Noted	Observations
1885, 1890	No	Subject Property: The Subject Property is occupied by a three-story commercial retail building.
		Surrounding Properties: Commercial retail buildings occupy the properties to the south, north, and west. An inlet of the Byram River is located to the east.
1895, 1902, 1908, 1915, 1919	No	Subject Property: Conditions on the Subject Property are similar to those as depicted on the 1885 map.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1885 map, with the exception of the easterly river inlet, which has been filled, and beyond which is a lumber mill.
1934, 1942, 1950	No	Subject Property: Conditions on the Subject Property are similar to those as depicted on the 1895 map.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1895 map, with the addition of a commercial retail building to the east.
1990, 1993, 1994, 1995, 1996, 2006	No	Subject Property: The Subject Property appears as it exists at the present day. The Subject Property is occupied by a park, with no notable structures or improvements.
		Surrounding Properties: The surrounding properties to the north, east, and west are occupied by commercial retail buildings. The southern adjacent property is occupied by an extension of the park on the Subject Property.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected topographic maps are presented in Appendix F.

TOPOGRAPHIC MAP SUMMARY		
Year	Issues Noted	Observations
1892, 1893/1897, 1898/1899	No	Subject Property: The Subject Property is shaded to represent urban development; no distinct structures or other notable features are depicted.
		Surrounding Properties: The surrounding properties are shaded to represent urban development; no distinct structures or other notable features are depicted.
1900	No	Subject Property: The Subject Property is unmapped.
		Surrounding Properties: The surrounding properties are unmapped.

TOPOGRAPHIC MAP SUMMARY		
Year	Issues Noted	Observations
1944/1947, 1951/1955, 1960, 1967/1971	No	Subject Property: The Subject Property is shaded to represent urban development; no distinct structures or other notable features are depicted.
		Surrounding Properties: The surrounding properties are shaded to represent urban development; no distinct structures or other notable features are depicted.
1975	No	Subject Property: The Subject Property is unmapped.
		Surrounding Properties: The surrounding properties are unmapped.
2012/2013	No	Subject Property: No structures or other notable features are depicted on the Subject Property.
		Surrounding Properties: No distinct structures or other notable features are depicted on the surrounding properties.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

STREET DIRECTORY SUMMARY		
Year	Issues Noted	Occupants
1972, 1977	No	Sams Army & Navy Str
1982, 1987, 1992, 1995, 2000, 2005, 2010, 2014		Subject Property is not listed in research source.

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A “chain of title” is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

The property card for the Subject Property was obtained at the Village of Port Chester Assessor’s Office. The property card identifies the current owner as 41 North Main Street, LLC, which acquired the Subject Property in 1982. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was not provided with or made aware of previous environmental assessments or other documentation regarding environmental investigations performed for the Subject Property. EBI did not identify previous environmental reports for the Subject Property at local agencies or other sources contacted during this assessment.

4.3.9 Other Historical Records and Interviews

Mr. Neil Pagano, Property Owner, was interviewed to obtain information regarding the history of the Subject Property. According to Mr. Pagano, he has been familiar with the Subject Property for approximately 40 years and the former building was demolished in 1980. Mr. Pagano stated that prior to 1980 the Subject Property was improved with a commercial retail and residential building.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Stephen Ferro, EBI Field Assessor, on April 26, 2019. Mr. Ferro was accompanied by and interviewed Mr. Neil Pagano, the Subject Property Owner.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Unimproved portions of the Subject Property were observed along the perimeter and in a general grid pattern in safely accessible areas.

At the time of the survey, the weather was rainy and approximately 50° Fahrenheit. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTs) & ABOVEGROUND STORAGE TANKS (ASTs)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs or ASTs located at the Subject Property.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of USTs or ASTs formerly having been located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBs)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

Based upon the absence of transformers, hydraulic equipment, or other oil-containing equipment, no potential PCB-containing equipment was identified at the Subject Property.

5.6 ADDITIONAL SITE CONDITIONS

Based upon site reconnaissance, interviews, and a review of applicable records, EBI identified no additional evidence of additional site conditions or concerns.

6.0 INTERVIEWS

The site contact or Key Site Manager was contacted to be interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has been completed and returned to our offices. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The Pre-Survey Questionnaire and any accompanying documentation are presented in Appendix C.

KEY SITE MANAGER INTERVIEW			
Contact / Affiliation	Date of Communication	Years Associated with Subject Property	Telephone No.
Mr. Neil Pagano Owner 33-35 North Main Street, LLC	04/22/2019	40	(914) 939-1123
	04/23/2019		
	04/26/2019		

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

Based upon the absence of structures and in accordance with the scope of work for this assessment, EBI did not conduct a survey for the presence of ACM.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Westchester County is located within a Zone 3 radon area. Zone 3 is defined as an area that has a low potential for radon gas, with a predicted average indoor radon screening level less than 2.0 picoCuries per liter (pCi/L). The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the non-residential nature of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the absence of structures and in accordance with the scope of work of this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

Water service is not provided to the Subject Property. In accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report.

This assessment has identified no evidence of *recognized environmental conditions (RECs)*, *historical recognized environmental conditions (HRECs)*, *controlled recognized environmental conditions (CRECs)*, *de minimis conditions*, or *considerations outside the scope of ASTM Practice E 1527-13*, in connection with the Subject Property.

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, no further action is recommended.

Your Name and title

Signature

Date

Additional plans and documentation (see page 4) must be forwarded to the site for the Scientist during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Environmental report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #? Sect 142.31 Block 1 Lot 12
2. What is the legal Municipality or County that has jurisdiction over the property? Village of Port Chester, Town of Rye, County of Westchester, NY
3. What is the assessors file ID number and tax file ID number if available? _____

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? 0.04ac
5. How many buildings comprise the subject property? No building. Vacant lot.
 - a. If the property is a mall or large retail center, please confirm and list ownership of each building. NA
6. What is the gross and net rentable square footage of the building(s)? NA
7. What is the date of construction of the building(s)? When was the building(s) first occupied? NA
8. How many tenant spaces or apartments are at the Subject Property? None
9. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems. NA
10. Please list any deficiencies noted during any Building, Fire or Health Department inspections in the last three years.
None
11. Please list the following utility providers:

Electricity:	<u>Con Edison</u>
Water:	<u>Suez Water Co</u>
Sanitary Sewer:	<u>Village of Port Chester</u>
Trash Hauler:	<u>Village of Port Chester</u>
Storm Drainage:	<u>Village of Port Chester</u>
Natural Gas or Oil:	<u>Nat Gas: Con Ed</u>
and, Frequency of Pick-ups:	_____

12. Please attach a brief history of the property.

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. **Vacant Lot.** _____

2. Describe the past uses of the property noting tenant names and oil/chemical usage. **Donated via temporary lease to the Village of Port Chester for use of the site as a municipal park. Lease has since expired c 1995 +/-** _____

3. (Y) **(N)** Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy? _____
4. (Y) **(N)** Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property? _____
5. (Y) **(N)** Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation? _____
6. (Y) **(N)** Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation? _____
7. (Y) **(N)** Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation? _____

8. (Y) **(N)** Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation? _____
9. (Y) **(N)** Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation? _____
10. (Y) **(N)** Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation? _____
11. (Y) **(N)** Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe. _____
12. (Y) **(N)** Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? _____
13. (Y) **(N)** Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at or adjacent to the property? If yes, please describe. _____

14. (Y) **(N)** Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe. _____
15. (Y) **(N)** Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe. _____
16. (Y) **(N)** Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe. _____

17. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation: **No** _____

19. Additional comments and/or pertinent information relevant to this Phase I ESA: **Since the date of purchase (01/05/1982) there have been no improvements made to the site and it has been vacant since the purchase date except for temporary use by the Village of Port Chester as a downtown municipal pocket park. Attached is the current property record card and the historic record card.**

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Scientist can proceed with the survey of the property.

EBI ACCESS REQUIREMENTS

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building interiors, including as applicable, common areas, lobbies, a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, garages.
- All building perimeters
- All site amenities
- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

- THERE ARE NO BUILDINGS ON THIS LOT.**
- NO ALTA SURVEY AVAILABLE. ORIGINAL SURVEY IS ATTACHED**
- THERE IS NO CO FOR THE LOT**
- THERE IS NO BUILDING PERMIT**
- NO TENANTS**
- HISTORICAL USES HAS BEEN THAT AT ONE TIME IT WAS LEASED FOR \$1.00 TO THE VILLAGE OF PORT CHESTER AS A "POCKET PARK". C. 6/1990. 5 YEAR TERM. NOW EXPIRED.**
- NO RECENT APPRAISAL. NO (DUE DILIGENCE) REPORTS**

CERTIFICATION NOTE:

This survey is hereby certified to:
• PC 41 Main Property, LLC

SURVEY NOTES:

I, Gerald T. O'Buckley, L.S., the surveyor who made this map, do hereby certify that the field survey on which this map is based was completed on April 9, 2019 and that this map was completed on April 17, 2019 in accordance with the existing Code of Practice for Land Surveys adopted by the New York State Association of Professional Land Surveyors.

Reference is made to Deed Control No. 402510409 filed in the Office of the Westchester County Clerk in August 21, 2000.

Underground utilities, facilities and structures are not shown hereon. There may be underground utilities the location of which are presently unknown. Any party utilizing the utility information and data depicted on this survey shall contact the "DIG SAFELY NEW YORK" phone number at 800-962-7962 a minimum of forty eight (48) hours prior to any construction activities to verify the location of any and all underground utilities.

Dimensions shown from structures to property lines are not intended to be used for the construction of fences, structures or other improvements.

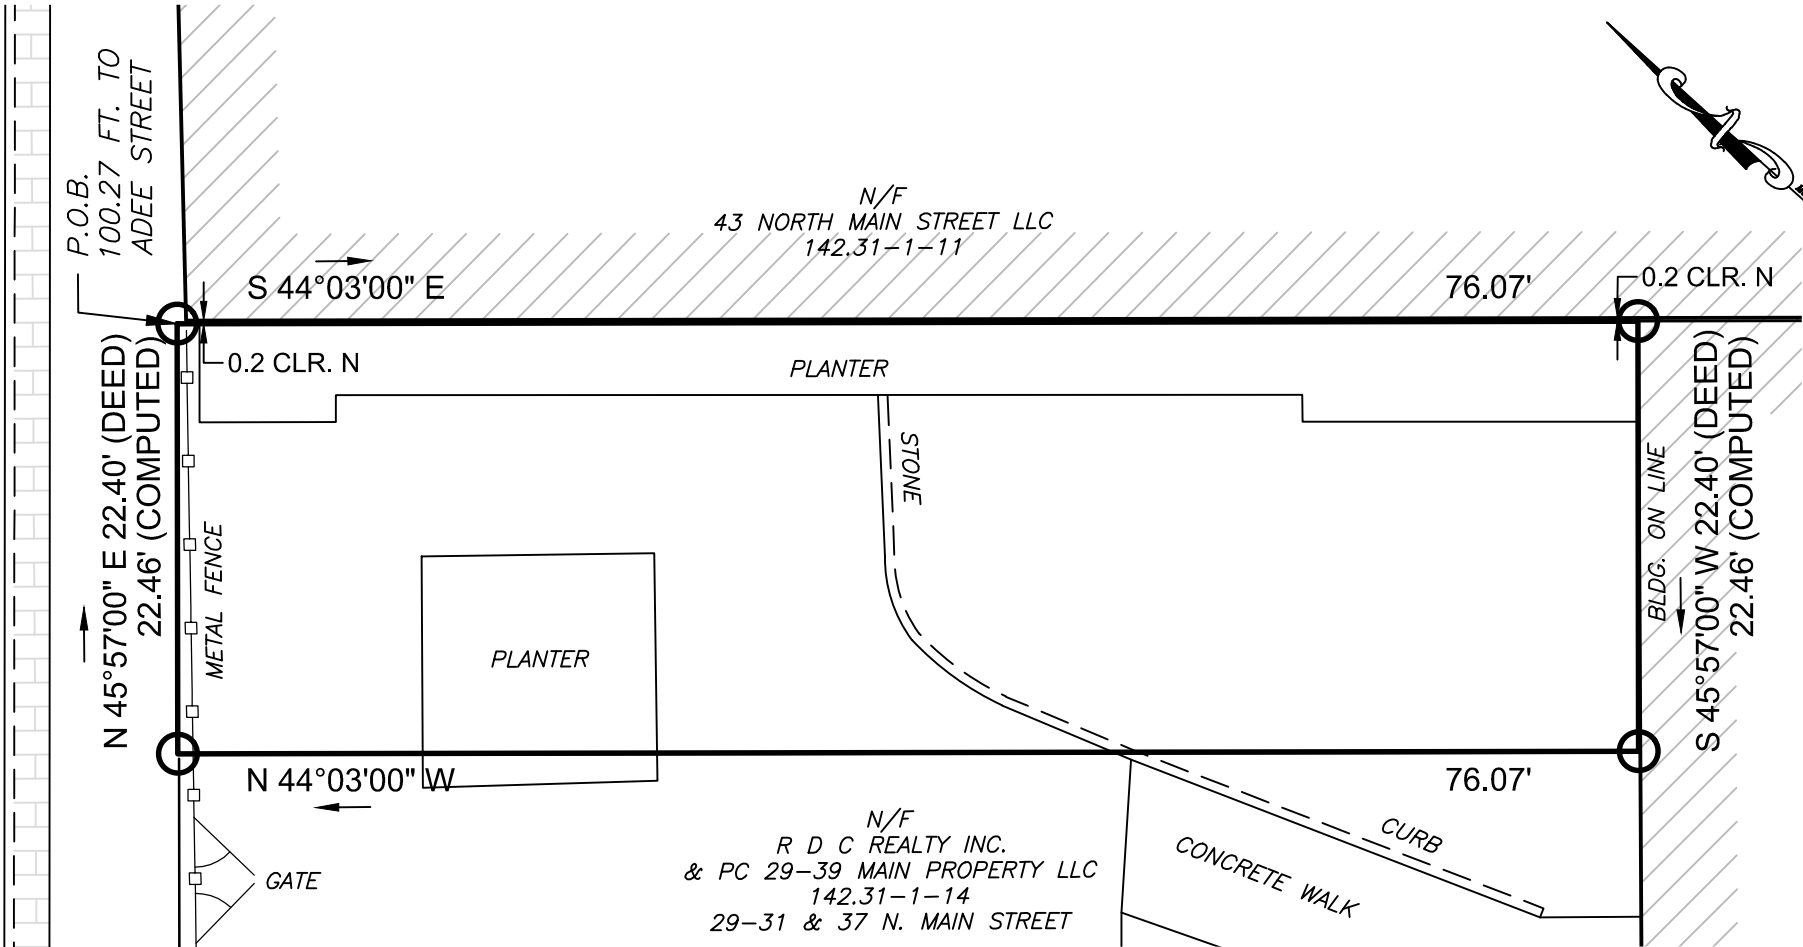

Unauthorized alteration or addition to a survey map bearing a licensed land surveyor's seal is a violation of Section 7209, subdivision 2, of the New York Education Law.

TO THE BEST OF MY KNOWLEDGE AND BELIEF, THIS MAP IS SUBSTANTIALLY CORRECT AS NOTED HEREON.

EBI Project No. 1119002339 and 1119002340**

Dear Records Officer:

EBI Consulting (EBI) is conducting a Phase I Environmental Site Assessment (ESA) at the above-referenced Subject Property. As part of the ESA process, I would like to request access to records regarding the following, as applicable:

- Current and historical environmental health code violations
- Current and historical environmental health permits
- Asbestos or lead-based paint abatement
- Information on any septic system
- Information on any potable water well

I understand that these records may not be available. If these records are available, please forward to EBI at reresearchgroup@ebiconsulting.com; via fax at (781) 425-3623, or at the address below. If the fee for such records will exceed \$50.00, please contact me prior to proceeding. If there are any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shanley Daly

APPENDIX D

PROFESSIONAL QUALIFICATIONS

Summary of Experience

Mr. Maglietta is an environmental scientist with over 31 years of experience in performing and managing environmental investigations and site assessments in the U.S., Canada, and Mexico. Mr. Maglietta also has extensive experience conducting regulatory file reviews and performing asbestos, radon, lead paint, lead in water, and indoor air quality surveys.

Mr. Maglietta has performed or managed over 12,000 Phase I and II Environmental Site Assessments, Transaction Screens, Desk Reviews, Database Reviews, and regulatory file reviews for a wide range of properties for the purpose of evaluating site conditions, potential off-site liabilities, and site remediation costs. These services have been performed in order to advise property owners, operators and prospective purchasers of potential and existing environmental concerns. Mr. Maglietta has worked with corporate environmental officers, numerous Wall Street lending institutions, legal counsel, governmental agencies including HUD, SBA, FDIC and state governments, rating agencies, investment companies and real estate brokers to develop strategies for managing properties with environmental concerns.

Relevant Project Experience

Environmental Site Assessments: Mr. Maglietta has conducted ASTM Phase I Environmental Site Assessments, Environmental Site Screenings, and soil and groundwater sampling for various clients and has prepared Phase I and Phase II reports for a variety of properties located in the United States, Canada, and Mexico. These properties have included industrial, commercial, retail, healthcare, raw land, and multi-family residential properties. Mr. Maglietta has provided project management for underground storage tank removals and site characterizations, and has performed sampling for radon, asbestos-containing materials, lead-based paint and lead in water.

Subsurface Investigations: Mr. Maglietta has completed subsurface investigations at retail, commercial and industrial properties. Subsurface investigations have included direct-push sampling methodology, hollow-stem auger methodology, the installation of soil borings and shallow and deep groundwater monitoring wells, and subsequent sampling of soil and groundwater.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 02/04/2019 has revealed that there are 4 ERNS sites within approximately 0.125 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/31/2018 has revealed that there are 3 NY SWF/LF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/12/2018 has revealed that there are 83 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 24 NY UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

FORMER MGP - PURDY A	INTERSECTION - PURDY	S 1/4 - 1/2 (0.267 mi.)	AD225	501

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 12 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 9 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

NY RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Conservation in New York.

A review of the NY RGA LF list, as provided by EDR, has revealed that there are 5 NY RGA LF sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

DEC Memo: "11-25-13 Spoke with Ed Quinn/Asst Chief. He says there are a number of creeks under the buildings in this section of town. Code Enforcement was there and found oil in one. They think it's the underground tank, but they can't find the tank. Ed says no oil has made it to the Byram yet. Address may be 47. Todd responding. jc 11-25-13 Update: Call from ECO Stevens that Port Chester PD called them that leak has reached Byram. Forwarded info to Todd. jc 11/25/13 Inspected the site and met with Asst Chief Ed Quinn, and PC Code Enforcement officers Joseph Narciso and Joseph Potanovic, Jr. They took me to the boiler room for the building. An equipment failure on the boiler allowed oil to drain onto the surrounding floor and drained into some sort of subterranean pit beneath the boiler. Water in that pit was covered with oil. FD and Code Enforcement stated that old streams exist under many of the older buildings in Port Chester, so the Byram River was inspected for signs of fuel oil. Even though it was low tide, there was NO indication that oil discharged into the river. The building is owned by Jay Feinsod who retained Northeast

Remarks: Environmental to clean up the spill. DLE responded and is investigating the spill because it appeared that the UST for the building is not in compliance with PBS regulations. Joe Mancini from the WCHD was also on-scene for the PBS issues. TG 11/26/13 Dwayne Monaco reported that NE Env completed the cleanup last night by vaccing about 2000 galllons of oil and water from the subterranean vault. NFA. TG "

DEC Memo: "6/24/16 Called and left messages with both Mr. Louis (Enviroshield) and with property owner. Dick Louis called back- he said that all 4 tanks were removed several weeks ago and samples were taken from underneath them. They did not smell any product, but one of the samples came back with SVOC hits. 300 gal were evacuated out of the 4 tanks prior to removal. He said he would talk to O'Dee regarding what, if anything, needs to happen now, as the cost of remediation might outweigh the minimal environmental impact, considering the situation. dw 6/24/16: Dick Louis called me directly. Removal of 2x 275 ASTs in a crawl space. Tanks had been out of service for many years. Enviroshield pumped out approx 380 gallons of oil combined from the 4 ASTs. No evidence of any leak or contamination noted. One soil sample result came back showing slightly elevated levels. Enviroshield will send in the sample results. jod 7/12/16: Report from Enviroshield reviewed and entered into DecDocs system. Based upon the available information, no further action is required at this time. jod"
Remarks: "(4) 275 Gallon tanks in a crawl space. Sample came back

Contact Name: NEIL PAGANO
DEC Memo: "5/17/11: Caller Neil Pagano is new owner (part owner of a Trust) of the property, a two story commercial office building. Building is reportedly entirely natural gas and electric and has no petroleum storage tanks. While cleaning out basement, suspected petroleum staining and petroleum odors were noted. Mr Pagano contacted US Tank Tech and a suspected out-of-service UST was detected next to the building. Caller has contacted Dwayne Monaco of Northeast Environmental for further investigation/removal of the UST. jod 7/17/13: Additional information received from HES, entered into EDocs. jod 03/21/14 Requested an updated progress report from HES. TG 04/25/14 HES submitted a Groundwater Recovery report which described the pumping of contaminated gw through a O/W separator into GAC drums and a belt skimmer to remove FP from the recovery well. TG 07/28/15 Emailed Tim Bishop from HES for an update. TG 01/25/17 HydroEnvironmental Solutions submitted Groundwater Monitoring report including a request for spill closure. TG 04/04/17 HES reported has been reviewed and based on the information presented in that report, no further action is required. TG"
Remarks: "Caller advised found staining of unknown petroleum on basement floor of building. Caller requesting a call back to see what he can do next."

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

FINDS:

Registry ID: 110056330741

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name:
DEC Memo:

ANNA SWEENEY
"1/5/17 Called and left voice mail with Ms. Sweeney. No other contact #s given. # of S/S is 914-935-9880, and the manager there confirmed that the tank had been pumped out, and they will be doing more investigation tomorrow. Sunoco did call back, and said that tank test will be done tomorrow. dw 1/09/17: Call to dispatch from Sandra Carl at Sunoco. 610-833-3726 sandra.carl@sunoco.com This 8K gallon gasoline UST was tested today by Crompco and failed. Tank is currently being pumped out. WCDoh and Dan Bendell notified. Sandra initially called the Hotline to report the TTF but was referred to New Paltz. jod 1/10/17 Sandra Called with update. Compco did a helium test on tank. Issue was the riser caps and copper siphon activate line on STP. Caps have been replace, copper siphon line corrected, tank is now sound and about to be refilled with product. ga 1/10/17: Email update from Chris Lalak of WCDoh: I spoke with Sandra from Sunoco. Crompco on site today, doing Helium testing. Riser cap and Copper siphon activator line issues. Minor repairs and tank passed a retest. Tank going back in service. Full paperwork will be submitted to me and Dan. Once the paperwork is in and reviewed, this one should be closed out. jod 3-10-17 contacted Alta East, they stated that they are not involved with site for the current spill . Met with Alta East, they said that they paid fine and corrected the 14 spill in 2015, asked for documentation, then asked about 95 spill number. Alta East said that they did a Phase II at site before they purchased in 2009 and spill should be closed? Asked for report. RDB 5-4-17 Meeting with WCDOH, WC is NFA, DEC to assume lead. GPH"
Remarks: "found water in product tank/investigation underway"

DEC Memo: "11/11/13: I spoke with the caller William Silveri. Athenica Environmental was performing a Phase II site assessment for the Bank, in a prospective Real Estate transaction. He states ground water samples came backing showing contamination of multiple VOCs well over state ground water standards. This property is currently a Furniture Store. There is an Auto Body Repair shop and former service station located behind and immediately upgradient of this location. That address is 115 North Pearl Street, former PBS 3-172936. But there are also several active Service Stations in the vicinity. Mr Silveri is forwarding a copy of the Athenica report to DEC. jod 11/12/13: Received the report from Athenica. Entered into Edocs and forwarded to WCDoh PBS. As per Chris Lalak, Joe Mancini will follow up. jod"
Remarks: "Lab results came back with reportable levels of gasoline related chemicals in the ground. It is believed to be from the adjacent auto shop, which use to be a gas station. Clean up is unknown."

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 488

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN

FINDS:

Registry ID: 110009451262

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

FINDS:

Registry ID: 110055355495

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110000882992

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Portchester, NY 10573 NYSDEC Spill No.: 07-01977 PBS No.: 3-449377
Re:Removal of (2) 550 Underground Storage Tanks. Removal of
contaminated soils. Dear Mr. Sabato: The closure report for the above
mentioned site was received and reviewed by this department. Soil
sample test results were satisfactory. It is the recommendation of
this department that this site requires No Further Action. If you
have any further questions, please feel free to contact me at (914)
813-5621. Sincerely, Sebastian Bimonte Sanitarian Trainee Office of
Environmental Health Risk Control Information regarding this spill is
being forwarded to the New York State Department of Environmental
Conservation (NYSDEC) for appropriate action. Please note that in
order to address and resolve this open spill case: 1) This Department
acts pursuant to the Westchester County Sanitary Code, 2) The NYSDEC
will act pursuant to New York State Laws and regulations (Article 12
of the Navigation Law/Environmental Conservation Law and implementing
regulations). "
Remarks: "WHILE EXCAVATING AT ABOVE ADDRESS CAME ACCROSS CONTAMINATED SOIL"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

in case site told him wrong tank. Steve says today's test is an ullage failure and he thinks it is at the vent line. Tyree has been on site to assist Steve. Tank is double wall and there is no evidence of a leak in interstitial. Forwarded spill to O'Mara and Carlos and Stefan, WCHD since spill will not automatically be distributed. jc 2/24/2012 -- WCDOH provided the following description of tank test failure: these spills occurring at 152 King St in Port Chester. They were both TTFs on the same tank, the first in August, the second in October. The tank passed a TT in July prior to replacement of its tank top sump. After that the tank started to accumulate water through the sump so the cause of the failures was suspected to be related to the sump. The second ttf in October was after an attempt to repair the tank top sump. Ultimately, the cause of both failures was due to a vent issue which was resolved. The tank passed another test in December and spill 1105533 was closed. Spill 1109057 should be closed as well. nfa ELM "

Remarks: "Spill taken at duty desk, see DEC Remarks. jc"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

DEC Memo: "7/13/15 TJD File review. Spill reassigned from AH Primary (Ahmed) to AH Secondary (DeMeo). 5/20/16 TJD File review. Closure report has been submitted by Petroleum Tank Cleaners. As per report, a tank tightness test was performed on 12K #6 FO AST. The tank was reported to have failed the tightness test due to a problem associated with the manway cover. The contractor reports to have returned to the site on April 3rd, 2014 and replaced the cover and gasket followed by another system test which reported to have passed. No further action is required. All documentation has been uploaded to DECDOCS. Spill closed."
Remarks: "Basement tank failed test following cleaning. Repairs are being suggested to owners."

running for 7+ years. Need to evaluate remedial system for efficiency and PBS system for discharges. Will e-mail consultants with requirements. PJD Feb. 2009 5-29-2014: Tyree will proposed to connect dual phase extraction to GP-1. Quaterly report submitted. 1-8-15 connection not completed; system down in July; still down, report is coming to say system is not working, RDB 11-20-15 report.system repaired and running since July 2015 RDB 12-2-1512-2 met with Getty and Antea;need to have the system run for a year and then evaluate RDB 12-8-15 3qtr 2015 submitted RDB error with saving 12-12-16 4th quarter results RDB 02-17, For spill # 93-05467 we will proceed with the proposed subsurface investigation in the northern portion of the site. We will gauge and sample the MW-4 through MW-7 to determine if there are impacts present associated with spill #15-11950. RDB 1-16-18, Please see the attached 4th Quarter 2017 Monitoring Report for NYSDEC Spill Number 93-05467. Former Getty station #00103 is located at 200 Westchester Avenue, Port Chester, New York. In October 2017, two separate VEFR events were conducted by the current station operator in the southern portion of the site, in relation to NYSDEC Spill #15-11950. Concentrations in MW-4, MW-5, MW-6, MW-7, and MW-15 have all decreased dramatically since the second quarter 2017, which was prior to any VEFR events. Antea Group will continue to work with the station operator to address spill #15-11950.Dissolved BTEX concentrations continue to be present in the northern portion of the Site. Antea roup will continue monitoring site conditions on a quarterly basis. The next groundwater sampling even is scheduled for February 2017. RDB 5/30/18 Email from Cody Hume, Antea to RDB: A subsurface investigation was completed in 2017 that provided vertical delineation of impacts in northern portion of the site. Antea Group will prepare a remedial action plan in 2018 to address these impacts in-situ. The site operator performed VEFR events in the southern portion of the site in 2017 in relation to NYSDEC spill number 15-11950. Impacts in the southern portion of the site will continue to be monitored, and Antea Group will continue to work with the station operator to address spill number 15-11950 as necessary. Antea Group will continue monitoring site conditions on a quarterly basis. The next groundwater sampling event is scheduled for the second quarter 2018. 1st qtr QMR in D2. SRK"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Site Description:

Site Location: The former Port Chester manufactured gas plant (MGP) site is located in an urban portion of the Village of Port Chester, Westchester County, New York. The site is located at the southern most point of the Port Chester Marina Redevelopment Area. Site Features: The site has been remediated and redeveloped into a multi story commercial retail building which covers most of the site. Current Zoning/Use: The site building is currently occupied by Petco and other retailers. The site is zoned for commercial use. The site is bordered on the west by Waterfont Place (formerly Don Bosco Place), on the east by Traverse Avenue, on the south by Purdy Avenue, and on the north by a parking garage. The surrounding parcels are currently used for a combination of commercial and residential purposes. Historical Use: The site was historically utilized for the MGP operation from the 1860s to the 1880s. It was then used for a variety of commercial and industrial purposes (iron works, waste oil reclamation facility, mail distribution facility, office space, and warehouse space) until 2001. All buildings related to previous operations have been demolished and removed. The site entered the Voluntary Cleanup Program in 2002. A Site Investigation was completed in 2004 and remedial construction was substantially completed in 2006. The remedy included excavation of former MGP structures and coal tar contaminated soil/wastes. A deed restriction was placed on the site in 2010 which requires adherence to a Site Management Plan and Periodic Reviews. Site Geology and Hydrogeology: The site topography is relatively flat and the site is approximately 10 feet above sea level. Overburden soil consists of historic fill material which was placed in various stages in the late 1800's and early 1900's. The fill is approximately 4 to 6 feet thick and is underlain

by natural silt and sands grading to weathered bedrock. Bedrock was encountered at depths of 12 to 20 feet. Shallow groundwater beneath the site generally occurs within sandy material at a depth of approximately 12 feet. The depth to water coincides roughly with the top of fractured weathered bedrock underlying the site. There are limited tidal effects in the western most portion of the site.

Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. The primary contaminants of concern prior to remediation volatile and semivolatile organic compounds associated with coal tar and other petroleum products. Remedial work conducted in 2005 and 2006 has removed the coal tar and coal tar contaminated soil. The new commercial building has a sub slab vapor depressurization system installed to prevent vapor intrusion. The entire site is covered by a cap consisting of clean stone overlaid by concrete. A deed restriction and Site Management Plan are in place. Special Resources: The site is located in an urban area of the City of Port Chester. No special resources were identified.

Health Problem: Contact with contaminated soils is not expected because the site is covered by buildings and pavement. Drinking contaminated groundwater is not likely since the area is supplied with public water. A sub-slab depressurization system has been installed in the on-site structure to prevent exposure to site contaminants potentially entering the buildings via soil vapor intrusion.

Site Code: 58556
Site Description: Site Location: The former Port Chester manufactured gas plant (MGP) site is located in an urban portion of the Village of Port Chester, Westchester County, New York. The site is located at the southern most point of the Port Chester Marina Redevelopment Area. Site Features: The site has been remediated and redeveloped into a multi story commercial retail building which covers most of the site. Current Zoning/Use: The site building is currently occupied by Petco and other retailers. The site is zoned for commercial use. The site is bordered on the west by Waterfont Place (formerly Don Bosco Place), on the east by Traverse Avenue, on the south by Purdy Avenue, and on the north by a parking garage. The surrounding parcels are currently used for a combination of commercial and residential purposes. Historical Use: The site was historically utilized for the MGP operation from the 1860s to the 1880s. It was then used for a variety of commercial and industrial purposes (iron works, waste oil reclamation facility, mail distribution facility, office space, and warehouse space) until 2001. All buildings related to previous operations have been demolished and removed. The site enter the Voluntary Cleanup Program in 2002. A Site Investigation was completed in 2004 and remedial construction was substantially completed in 2006. The remedy included excavation of former MGP structures and coal tar contaminated soil/wastes. A deed restriction was placed on the site in 2010 which requires adherence to a Site Management Plan and Periodic Reviews. Site Geology and Hydrogeology: The site topography is relatively flat and the site is approximately 10 feet above sea level. Overburden soil consists of historic fill material which was placed in various stages in the late 1800's and early 1900's. The fill is approximately 4 to 6 feet thick and is underlain by natural silt and sands grading to weathered bedrock. Bedrock was encountered at depths of 12 to 20 feet. Shallow groundwater beneath the site generally occurs within sandy material at a depth of approximately 12 feet. The depth to water coincides roughly with the top of fractured weathered bedrock underlying the site. There are limited tidal effects in the western most portion of the site.

Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. The primary contaminants of concern prior to remediation volatile and semivolatile organic compounds associated with coal tar and other petroleum products. Remedial work conducted in 2005 and 2006 has removed the coal tar and coal tar contaminated soil. The new commercial building has a sub slab vapor depressurization system installed to prevent vapor intrusion. The entire site is covered by a cap consisting of clean stone overlaid by concrete. A deed restriction and Site Management Plan are in place. Special Resources: The site is located in an urban area of the City of Port Chester. No special resources were identified.

Health Problem: Contact with contaminated soils is not expected because the site is covered by buildings and pavement. Drinking contaminated groundwater is not likely since the area is supplied with public water. A

A Site Investigation was completed in 2004 and remedial construction was substantially completed in 2006. The remedy included excavation of former MGP structures and coal tar contaminated soil/wastes. A deed restriction was placed on the site in 2010 which requires adherence to a Site Management Plan and Periodic Reviews. Site Geology and Hydrogeology: The site topography is relatively flat and the site is approximately 10 feet above sea level. Overburden soil consists of historic fill material which was placed in various stages in the late 1800's and early 1900's. The fill is approximately 4 to 6 feet thick and is underlain by natural silt and sands grading to weathered bedrock. Bedrock was encountered at depths of 12 to 20 feet. Shallow groundwater beneath the site generally occurs within sandy material at a depth of approximately 12 feet. The depth to water coincides roughly with the top of fractured weathered bedrock underlying the site. There are limited tidal effects in the western most portion of the site.

Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. The primary contaminants of concern prior to remediation volatile and semivolatile organic compounds associated with coal tar and other petroleum products. Remedial work conducted in 2005 and 2006 has removed the coal tar and coal tar contaminated soil. The new commercial building has a sub slab vapor depressurization system installed to prevent vapor intrusion. The entire site is covered by a cap consisting of clean stone overlaid by concrete. A deed restriction and Site Management Plan are in place. Special Resources: The site is located in an urban area of the City of Port Chester. No special resources were identified.

Health Problem: Contact with contaminated soils is not expected because the site is covered by buildings and pavement. Drinking contaminated groundwater is not likely since the area is supplied with public water. A sub-slab depressurization system has been installed in the on-site structure to prevent exposure to site contaminants potentially entering the buildings via soil vapor intrusion.

Site Description: Site Location: The former Port Chester manufactured gas plant (MGP) site is located in an urban portion of the Village of Port Chester, Westchester County, New York. The site is located at the southern most point of the Port Chester Marina Redevelopment Area. Site Features: The site has been remediated and redeveloped into a multi story commercial retail building which covers most of the site. Current Zoning/Use: The site building is currently occupied by Petco and other retailers. The site is zoned for commercial use. The site is bordered on the west by Waterfont Place (formerly Don Bosco Place), on the east by Traverse Avenue, on the south by Purdy Avenue, and on the north by a parking garage. The surrounding parcels are currently used for a combination of commercial and residential purposes. Historical Use: The site was historically utilized for the MGP operation from the 1860s to the 1880s. It was then used for a variety of commercial and industrial purposes (iron works, waste oil reclamation facility, mail distribution facility, office space, and warehouse space) until 2001. All buildings related to previous operations have been demolished and removed. The site enter the Voluntary Cleanup Program in 2002. A Site Investigation was completed in 2004 and remedial construction was substantially completed in 2006. The remedy included excavation of former MGP structures and coal tar contaminated soil/wastes. A deed restriction was placed on the site in 2010 which requires adherence to a Site Management Plan and Periodic Reviews. DEC Memo: "6-4-12 Spoke with Bob. Karen is contact for bldg mngmnt company, Beneroefe Group. They plan to Excavate, Isolate and Retest. jm 6/15/12: Received a call at the Spills dispatch desk from Bob at Protest. The UST was retested today and failed. Failure listed as a wet leak - below the product line. Arrangements being made to have the tank pumped out. UST will need to be removed and further investigation/remediation will take place. Mitch Beneroefe is the owner of the property. jod 1/30/13 as per WCDOH: It was a tightness test failure. I was sent out for the tank removal. I believe it was only a piping issue, not much contamination. Received satisfactory closure report in August of 2012. Thanks Denise NFA JO'M"

Registry ID: 110070279849

Environmental Interest/Information System
OSHA ESTABLISHMENT

Registry ID: 110004562713

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110010613675

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate

DEC Memo: " February 9, 2007 Mr. David F. Wilshin Wilrock Mgnt. & Consulting, Inc. 200 William Street, Suite 333 Port Chester, NY 10573 Re: PBS # 3-600727- Independence Realty - Port Chester LP, 200 William Street, Port Chester NYSDEC Spill #0609549 - 5000 Gallon UST removal Dear Mr. Wilshin; The Westchester County Department of Health has received a report from Royal Environmental Services Corp dated February 6, 2007, submitted on February 6, 2007, for the removal of the tank at the above location. The soil samples are acceptable to the Department. The Department requires no further action with regards to the removal at this time. A request is being sent to NYSDEC to close the above mentioned spill #. There is no paperwork for the install of the new AST tank. The plans for the new tank as well as an updated PBS application (completed and signed) are needed to close the work permit. The Department also needs the remainder of the disposal paperwork. Submit this paperwork by February 23, 2007. Sincerely, Danielle Jackson Sanitarian Office of Environmental Health Risk Control "

Remarks: "PBS No: 3-600727 -PBS No. not found in UIS, may be invalid. 5000 GALLON TANK HAD HOLES:"

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was WCHD - SCHNEIDER 10-3-02 Team Environmental took samples and will forward the results when completed. 10/17/03: Letter to Len Cusumano, Jr. from Wayne Schneider, WCDOH dated 10/9/2003. Remediation updated by Dutchess Env. Construction has been reviewed. Excavation pit #1 needs no further soil removal or sampling. Groundwater monitoring well installed at pit #2. Samples indicated contamination above TAGM standards. Well must be purged and sampled quarterly. Results to be forwarded to WCDOH. 6/1/04: Letter to Len Cusumano, Jr. from Wayne Schneider, WCDOH dated 25May2004. Report by Dutchess Env. has been reviewed. Levels are below TAGM standards. Two more consecutive quarterly samples yeilding below level results are necessary to close spill. Next sampling due 19Jul2004. 12/6/04: Letter to Len Cusumano, Jr. V Port Chester dated 6Dec2004. Spill closed by Wayne Schneider, WCDOH."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was WADSWORTH 10-03-2002 Marty Wodka from Team Environmental reported that soil borings were completed in the area where the gas tank was removed and that heavy contamination is present. Soil samples were obtained and sent to the lab for analysis. He will submit the results after they are received from the lab. 07-09-03 Met with Mike Segulic of Team Env. and Debbie Thompson of MEG. Grossly contaminated soil from the fuel tank area will be excavated and removed(another spill #) and MEG will prepare and submit and a subsurface investigation plan for this problem. TG 04-02-04 Met with Michael Ritchie from Dolph Rotfeld Engineering. Rotfeld Engineering most likely will be taking over the project. TG. 01/22/08 Shaw environmental has completed a subsurface investigation report which delineates the contamination. They report recommends excavation of contaminated soil. 04/17/08 Steve Goldberg from Shaw Environmental was advised to proceed with the excavation work. TG 07/24/08 Anthony Olivieri from Dolph Rotfeld Engineering reported that bid documents for the soil excavation and removal are being prepared and expected to go out to bid in late August. TG 01/04/11 Shaw Environmental Inc submitted a report documenting the excavation and disposal of petroleum contaminated soil. Between June 2 and June 9, 2010, 463.59 tons of soil was excavated and disposed. 11/12/14 A Groundwater Monitoring Well Replacement and Sampling report was prepared and submitted by Steve Bouton from Action Environmental Group. 2.26 feet of product in MW-4 and elevated levels of VOC's in MW-3. Submission of a supplemental investigation plan is required. TG 01/15/15 Action Environmental submitted a Proposed Limited Subsurface Investigation Work Plan which which was approved on Jan 20, 2015. TG 11/12/15 Cornerstone Environmental was chosen over Action Environmental and they submitted their Phase I Supplemental Subsurface Investigation report. They measured 2.97 feet of product in MW-4. They recommended installing 2 or more geoprobe borings and one or more four inch well for product recovery in the vicinity of MW-4. TG 11/30/16 Cornerstone submitted the Phase II Subsurface Investigation and Initial Remediation Report. Report in DecDocs. Product thickness was measured and found to be 2.7'in MW-4 and 0.45' in MW-4R. Recommendation made to install socks and exchange quarterly, sample GW in one year and evaluate the data to assess future actions. TG 12/29/16 Letter sent to PC village manager and Dolph Rotfeld Engineering requiring gw sampling be performed within 6 months as outlined in the Cornerstone work plan dated 11/12/15. GW monitoring report due by June 1, 2017. TG 06/23/17 Cornerstone submitted a Subsurface Investigation and Continued Remediation Report. Report includes gw sampling results and information about ongoing product recovery from well 4 and MW-4R. Report in DecDocs. TG 10/06/17 Cornerstone submitted a Subsurface Investigation and Continued Remediation Report documenting the recovery of fuel with absorbent socks. NAPL in MW-4 was measured at 1.46' and MW-4R was 0.07'. Report in DecDocs.. TG 07/09/18 Cornerstone PLLC submitted an Update on the Continued Remediation of Phase 3 as of June 12,2018 Report. "

DEC Region: 3
DER Facility ID: 344461
DEC Memo: "8/12/16 Sovereign Consulting tested tank (EZ3 test) - failed. NY Fuel Distribution (owner) retesting all UST. Pump truck en route to empty failed tank. No GW impacted for this spill, but site has contaminated GW being remediated - occasional product (Onapo) found in wells. ga 1-3-17-email from BW, Yes, the tanks are single-wall fiberglass, installed in 1983. There are currently the (3) open spill numbers.. 07-13196 and 09-08831 were transferred from Motiva to NY Fuel during the liability transfer. 16-04861 was opened during the failed tightness test in August. The wells are gauged at least twice per month to measure LNAPL levels. EFR (vac events) were conducted twice per month from March 2015 until September 2016. At that point, LNAPL levels had decreased. Currently, two (2) passive bailers are installed in MW-1 and MW-4 to collect LNAPL. The passive bailers are emptied at least twice per month during gauging events, and are rotated with MW-5 as needed. LNAPL levels have decreased since the summer months. RDB 12/6/17 Sent e-mail requesting tank change date based on contamination in wells increasing through time. 4Q report in D2. mt 1/17/18 met with NY Fuels, EFR to continue on MW-1, 4, & 5, tank removal scheduled for 3/1/18, replace monitoring wells if destroyed. BW 02-26-18 Site visit during test pit excavation. Stained pea gravel with petroleum odor observed. Tank excavation to proceed on Tuesday and Wednesday. BTR 5/15/18 STIP signed, in D2. mt"

DEC Memo: "5/26/09 10/20/08 report shows levels low across site. highest level about 1200ppb btex in mw1. highest mtbe 120 also in mw1; new report due shortly jhardy 11/11/09 aug sampling results lower across site. no need for further action at this time. (sent email to enviro trac asking for pdf copies of first and second half 2009 samr)jh 6/30/10 bp submitted samr and request for closure. Levels are relatively low but there are not a lot of wells and there is no soil data. jh 7/9/10 asked bp to submit investigation reports that led to calling in this spill. Location of soil contamination will be used to identify, as possible, if wells are located properly and if follow up soil testing is needed jh The historic high concentrations of BTEX detected here in 2002 were order of magnitude 10ppm. No remediation was required/undertaken at that time. No significant discharge is noted by review of historic spills. Monitoring only has been taking place here from 2002 to 2010. The Feb. 2010 concentrations were insignificant and submitted with a request for closure which was recently resurrected by the RP's consultant. No further action required. PJD Sept. 2011"

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NY VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

South Map:	5940545 MAMARONECK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
36119C0293F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
36119C0294F	FEMA FIRM Flood data

36119C0357F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GLENVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
7	1/2 - 1 Mile SE	VARIES
1G	1/2 - 1 Mile SE	VARIES

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	material	Not reported	Not reported	Max: 141 Min: 0.07	Max: Min:

Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 77 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 5

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5
2	5 inches	21 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5
3	21 inches	79 inches	very gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5

Soil Map ID: 6

Soil Component Name: Urban land

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).
