EXECUTIVE SUMMARY

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) was retained by 2SM Development, LLC (the User) to prepare this Phase I Environmental Site Assessment (ESA) for the mixed-use 26,893-square-foot Subject Property, which consists of the following ten lots in Port Chester, Westchester County, New York:

- 2 South Main Street (Tax ID 142.30-2-53) a three-story mixed-use commercial and residential building with a partial cellar
- 4 South Main Street (Tax ID 142.30-2-52) a three-story mixed-use commercial and residential building with a partial cellar
- 6 South Main Street (Tax ID 142.30-2-51) a two-story commercial and retail building
- 8 South Main Street (Tax ID 142.30-2-50) a two-story mixed-use commercial and residential building with a partial cellar
- 10 South Main Street (Tax ID 142.30-2-49) a two-story mixed-use commercial and residential building
- 14 South Main Street (Tax ID 142.30-2-48) a three-story mixed-use commercial and residential building with a partial cellar
- 16 South Main Street (Tax ID 142.30-2-47) a four-story mixed-use commercial and residential building with a partial cellar
- 7 East Broadway (Tax ID 142.30-2-57) a municipal asphalt surface parking lot
- 15 East Broadway (Tax ID 142.30-2-58) a three-story residential building
- 106 Westchester Avenue (Tax ID 142.30-2-54) a three-story mixed-use commercial and residential building with a partial cellar

The Subject Property is bound to the north by Westchester Avenue followed by a two-story mixed-use commercial and residential building (101-111 Westchester Avenue); to the east by South Main Street followed by a five-story commercial and retail building (Waterfront PI/Westchester Avenue); to the south by vacant land (18 South Main Street); and to the west by a two-story mixed-use commercial and residential building (110 Westchester Avenue) and East Broadway followed by the New Haven line of the Metro North Railroad (Metro North). The surrounding area is occupied by residential, commercial, and mixed-use residential and commercial buildings.

According to the 2012 United States Geological Survey (USGS) Glenville Quadrangle 7.5-minute Series Topographic Maps, the Subject Property elevation is about 15 to 35 feet above mean sea level (msl), relative to the North American Datum of 1983 (NAD 1983). Areas to the west and southwest are at higher elevations relative to the Subject Property, and areas to the east and northeast are at lower elevations. Groundwater in the vicinity is expected to flow east toward the Byram River.

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) International Standard Practice for ESAs E1527-13 and the U.S. Environmental Protection Agency's (USEPA) All Appropriate Inquiry (AAI) Rule for identifying Recognized Environmental Conditions (REC), Historical RECs (HREC), and Controlled RECs (CREC) in connection with the Subject Property. The following RECs were identified in relation to the Subject Property:

REC 1: Petroleum Bulk Storage (PBS) at the Subject Property

During the site reconnaissance, the Property Owner and the Property Manager of 2, 4, 6, 8, 14, and 16 South Main Street informed Langan that two out-of-service aboveground storage tanks (AST) are located within the cellar of 14 South Main Street, and one in-service AST is located within the cellar of 16 South Main Street. At the time of the site reconnaissance, the cellar room containing the ASTs at 14 South Main Street was inaccessible due to clutter and/or debris, and access to 16 South Main Street was not provided. According to the New York State Department of Environmental Conservation (NYSDEC) PBS database, the building at 2 South Main Street previously contained a 2,000-gallon steel/carbon underground storage tank (UST) within the cellar that was removed. Details on installation and removal dates, contents, and/or containment are not provided in the PBS listing. The Environmental Data Resources (EDR) report did not include documentation of a tank test completed immediately prior to the closure or a subsurface investigation completed after closure to evaluate for impacts from tank operations. Based on the absence of documentation regarding installation, contents, closure and/or removal information, the potential for subsurface impacts at the subject property as a result of undocumented releases from the ASTs and/or former UST is identified as a REC.

REC 2: Historical Use, Open New York State Department of Environmental Conservation (NYSDEC) Spill Incidents, and PBS at Surrounding Properties

Historical and current operations at surrounding properties have included petroleum storage, reported releases, and automotive repair which may have resulted in subsurface impacts at the Subject Property due to known release, undocumented releases, or cumulative impacts. Historical uses of concern were identified at surrounding up-gradient properties including a historical filling station at 29 New Broad Street, auto sales and service stations at 29 New Broad Street and 5 New Broad Street, a historical auto repair shop and gas station at 28 Pearl Street, and a residential spill of No. 2 fuel oil 25 East Broadway.

Review of the NY SPILLS, NY PBS UST and AST, and RCRA database listings for the Property at 28 Pearl Street revealed that six 2,000-gallon USTs were previously removed from the site, and at present the site contains three to four 250- to 275-gallon ASTs that are active and in-service.

Based on close proximity to the Subject Property and up-gradient locations, the above-listed open NY SPILLS site, historical filling station, auto sales and service stations, and historical auto repair shop and gas station are considered RECs based the potential for inadvertent releases of

petroleum products, solvents, and/or other hazardous substances that may have migrated to and impacted groundwater and/or soil vapor at the Subject Property.

There were no HRECs or CRECs identified in relation to the Subject Property.

Non-Scope Considerations

A Non-Scope Consideration is identified by ASTM E1527-13 as an environmental issue or condition at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM E1527-13.

The following non-scope considerations were identified:

• The buildings within the Subject Property were constructed as early as 1885. Based on the age of the buildings, asbestos containing materials (ACM), lead based paint (LBP), and polychlorinated biphenyls (PCB) may be present in building materials. An intrusive survey to identify ACM, LBP, and PCB-containing material was not conducted as part of this Phase I ESA.

1.0 INTRODUCTION

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) was retained by 2SM Development, LLC (the User) to prepare this Phase I Environmental Site Assessment (ESA) for the mixed-use 26,893-square-foot Subject Property, which consists of the following ten lots in Port Chester, Westchester County, New York:

- 2 South Main Street (Tax ID 142.30-2-53) a three-story mixed-use commercial and residential building with a partial cellar
- 4 South Main Street (Tax ID 142.30-2-52) a three-story mixed-use commercial and residential building with a partial cellar
- 6 South Main Street (Tax ID 142.30-2-51) a two-story commercial and retail building
- 8 South Main Street (Tax ID 142.30-2-50) a two-story mixed-use commercial and residential building with a partial cellar
- 10 South Main Street (Tax ID 142.30-2-49) a two-story mixed-use commercial and residential building
- 14 South Main Street (Tax ID 142.30-2-48) a three-story mixed-use commercial and residential building with a partial cellar
- 16 South Main Street (Tax ID 142.30-2-47) a four-story mixed-use commercial and residential building with a partial cellar
- 7 East Broadway (Tax ID 142.30-2-57) a municipal asphalt surface parking lot
- 15 East Broadway (Tax ID 142.30-2-58) a three-story residential building
- 106 Westchester Avenue (Tax ID 142.30-2-54) a three-story mixed-use commercial and residential building with a partial cellar

The Subject Property is bound to the north by Westchester Avenue followed by a two-story mixed-use commercial and residential building (101-111 Westchester Avenue); to the east by South Main Street followed by a five-story commercial and retail building (Waterfront PI/Westchester Avenue); to the south by vacant land (18 South Main Street); and to the west by a two-story mixed-use commercial and residential building (110 Westchester Avenue) and East Broadway followed by the New Haven line of the Metro North Railroad (Metro North). The surrounding area is occupied by residential, commercial, and mixed-use residential and commercial buildings.

1.1 Purpose

The purpose of this Phase I ESA is to accomplish the following:

(1) Identify Recognized Environmental Conditions (REC) in connection with the Subject Property, as defined in the American Standard for Testing and Materials (ASTM) International Standard Practice for Environmental Site Assessments: Phase I ESA Process, Designation E1527-13, which states: The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

(2) Satisfy the criteria of United States Environmental Protection Agency (USEPA) 40 Code of Federal Regulations (CFR) Part 312 Subpart C Standards and Practices §312.20 All Appropriate Inquiries.

For the purpose of this ESA report, a REC is defined as follows:

"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

A Historical REC (HREC) is defined as follows:

"A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

A Controlled REC is defined as follows:

"A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

A Business Environmental Risk (BER) is defined as follows:

"A risk that can have a material environmental or environmental-driven impact on business associated with the current or planned use of a parcel of commercial real estate." A Non-Scope Consideration is defined as follows:

"An environmental issue or condition at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM International E1527-13."

1.2 Scope of the Phase I ESA

This Phase I ESA was conducted using a standard of good commercial and customary practice consistent with the ASTM International E1527-13. Any significant scope-of-services additions, deletions, or deviations to ASTM International E1527-13 are noted in Section 8.0 of this report. In general, the scope of this assessment consisted of obtaining information from the User; reviewing reasonably ascertainable information and environmental data relating to the Subject Property; reviewing maps and records maintained by federal, state, and local regulatory agencies; interviewing persons knowledgeable about the Subject Property; and conducting a site inspection. The specific scope of this assessment included the following:

- 1. A site reconnaissance to characterize conditions and assess the Subject Property's location with respect to adjoining and surrounding property uses and natural surface features. The reconnaissance included the surrounding roads and observations of surrounding properties from public rights-of-way to identify obvious potential environmental conditions on neighboring properties. The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Subject Property and then progressing to adjoining and surrounding properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.
- A review of environmental databases maintained by the USEPA, state, and local agencies within the approximate minimum search distance. The environmental database report was provided by Environmental Data Resources, Inc. (EDR), and is included in Appendix B.
- 3. Filing of Freedom of Information Law (FOIL) and Freedom of Information Act (FOIA) requests with federal, state, and local agencies. Copies of the FOIL/FOIA requests and received responses are included in Appendix C.
- 4. A review of physical characteristics of the Subject Property through a review of referenced sources for geologic, soil, and hydrologic data. A copy of the Federal Emergency Management Agency (FEMA) flood map is included as Appendix D.
- A review and interpretation of aerial photographs, Sanborn Fire Insurance Maps (Sanborn Maps), historical topographic maps, and city directories to identify previous activities on and in the vicinity of the Subject Property. Copies are included in Appendices E, F, G, and H, respectively.
- 6. A review of an Environmental Lien search for the Subject Property. A copy of the environmental lien search report is included as Appendix I.

7. A review of published radon occurrence maps to evaluate whether the Subject Property is in an area with a propensity for elevated radon levels.

1.3 Assumptions, Limitations and Exceptions

This Phase I ESA report was prepared for 2SM Development, LLC (the User) for the property referenced as 10 S Main Street in Port Chester, New York (the Subject Property), which is comprised of the Westchester County Tax Parcels 142.30-2-47 through 142.30-2-54, 142.30-2-57, and 142.30-2-58. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the Subject Property addressed herein, or by any other third party without a written authorization from Langan.

Langan's scope of services, which is described in Section 1.2, was limited to that agreed to with the User and no other services beyond those explicitly stated are implied. The services performed and agreed upon for this effort comports to those prescribed in the ASTM International Standard E1527-13. Intrusive sampling (i.e., soil borings and groundwater sampling) at the Subject Property was not performed as part of this Phase I ESA.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the Subject Property. The purpose of this investigation was limited to determining whether there is reason to suspect the possibility of RECs at the Subject Property. It should be understood that even the most comprehensive Phase I ESA might fail to detect environmental liabilities at particular Subject Properties. Therefore, Langan cannot "insure" or "certify" that the Subject Property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our client, with the customary standard of care exercised by professionals performing similar services under similar circumstances within the same jurisdiction.

The conclusions and opinions provided in this report are based solely on the specific activities as required for the performance of ASTM International E1527-13 and are intended exclusively for the purpose stated herein, at the specified Subject Property, as it existed at the time of our site visit.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Location and Description

The approximately 26,893-square-foot Subject Property is located in Port Chester, Westchester County, New York. The Subject Property is comprised of the following ten lots, as identified on the Westchester County Tax Map:

- 2 South Main Street (Tax ID 142.30-2-53) a three-story mixed-use commercial and residential building with a partial cellar
- 4 South Main Street (Tax ID 142.30-2-52) a three-story mixed-use commercial and residential building with a partial cellar
- 6 South Main Street (Tax ID 142.30-2-51) a two-story commercial and retail building
- 8 South Main Street (Tax ID 142.30-2-50) a two-story mixed-use commercial and residential building with a partial cellar
- 10 South Main Street (Tax ID 142.30-2-49) a two-story mixed-use commercial and residential building
- 14 South Main Street (Tax ID 142.30-2-48) a three-story mixed-use commercial and residential building with a partial cellar
- 16 South Main Street (Tax ID 142.30-2-47) a four-story mixed-use commercial and residential building with a partial cellar
- 7 East Broadway (Tax ID 142.30-2-57) a municipal asphalt surface parking lot
- 15 East Broadway (Tax ID 142.30-2-58) a three-story residential building
- 106 Westchester Avenue (Tax ID 142.30-2-54) a three-story mixed-use commercial and residential building with a partial cellar

The Subject Property is bound to the north by Westchester Avenue followed by a two-story mixed-use commercial and residential building (101-111 Westchester Avenue); to the east by South Main Street followed by a five-story commercial and retail building (Waterfront PI/Westchester Avenue); to the south by vacant land (18 South Main Street); and to the west by a two-story mixed-use commercial and residential building (110 Westchester Avenue) and East Broadway followed by the New Haven line of the Metro North. The surrounding area is occupied by residential, commercial, and mixed-use residential and commercial buildings. A Subject Property Location Map is included as Figure 1 and a Site Plan is included as Figure 2.

According to the 2012 United States Geological Survey (USGS) Glenville Quadrangle 7.5-minute Series Topographic Maps, the Subject Property elevation is about 15 to 35 feet above mean sea level (msl), relative to the North American Datum of 1983 (NAD 1983). Areas to the west and southwest are at higher elevations relative to the Subject Property, and areas to the east and

northeast are at lower elevations. Groundwater in the vicinity is expected to flow east toward the Byram River.

Based on visual observations of the surrounding area during the site reconnaissance, the Subject Property is located within a mixed-use urban area, characterized by residential, commercial, and mixed-use residential and commercial development. Site reconnaissance photographs are included in Appendix A.

Direction	Westchester County Tax Parcel	Adjoining Properties	Surrounding Properties
		Westchester Avenue	
North	142.30-2-24	101-111 Westchester Avenue	
	142.30-2-24	2-story mixed-use residential & commercial building	
		South Main Street	
East	142.31-1-43.1	Waterfront PI/Westchester Avenue	
		5-story mixed-use residential & commercial building	Mixed-use
South	142.30-2-67	18 South Main Street	residential and
South		Vacant Land	commercial
	142.30-2-56	106 Westchester Avenue	buildings
		3-story mixed- use residential & commercial building	
West	1 40 00 0 55	110 Westchester Avenue	
vvest	142.30-2-55	2-story mixed-use residential & commercial	
		East Broadway	
		followed by the New Haven Line of the Metro North	

Adjoining and surrounding property usage is summarized in the following table:

Improvements at the Subject Property are summarized in the following table. Photographs showing the current condition of the Subject Property are provided in Appendix A.

Subject Property Improvements					
Size of the Subject Property Approximately 26,893-square-feet					
	2 South Main Street (142.30-2-53) –three-story mixed-use				
	residential and commercial building with a partial cellar.				
	4 South Main Street (142.30-2-52) –three-story mixed-use				
	residential and commercial building with a partial cellar.				
	6 South Main Street (142.30-2-51) –two-story commercial				
	building.				
	8 South Main Street (142.30-2-50) –two-story mixed-use				
	residential and commercial building with a partial cellar.				
	10 South Main Street (142.30-2-49) –two-story mixed-use				
Buildings/Spaces/Structures	residential and commercial building.				
Dunungo, opucco, ou uctures	14 South Main Street (142.30-2-48) –three-story mixed-use				
	residential and commercial building with a partial cellar.				
	16 South Main Street (142.30-2-47) –four-story mixed-use				
	residential and commercial building with a partial cellar.				
	7 East Broadway (142.30-2-57) – municipal asphalt surface				
	parking lot.				
	15 East Broadway (142.30-2-58) –three-story residential				
	building.				
	106 Westchester Avenue (142.30-2-54) –three-story mixed-use				
	residential and commercial building with a partial cellar. None				
Unimproved Areas Surface Water	None				
Potable Water Source	Village of Port Chester				
Sanitary and Storm Sewer					
Utilities	Suez Water through the Village of Port Chester				
Electrical Utilities	Consolidated Edison (Con Ed)				
Natural Gas Utilities	Con Ed				
	2, 4, 6, 8, 10, 14, and 16 South Main Street and 106				
Construction Completion Date	Westchester Avenue – Approximately 1885				
	15 East Broadway – Approximately 1908				
General Construction Type	Stone masonry with brick facade				
Cooling and Ventilation System Type	Window Units				
i î î he	2 South Main – Oil burner AST				
	4 South Main – Heat supplied through 2 South Main				
	6 South Main – Heat supplied through 8 South Main				
	8 South Main – Natural gas boiler				
Heating System Type	10 South Main – Unknown				
	14 South main – Two oil burner ASTs				
	16 South Main – Oil burner AST				
	15 East Broadway – Natural gas boiler				
	106 Westchester Avenue – Natural gas boiler				
Emergency Power None					

2.2 Ownership and Title Records

Langan researched ownership records for the Subject Property on the Town of Rye System Development Group's (SDG) Imagemate Online database at <u>https://townofrye.sdgnys.com/index.aspx</u>. Ownership and title information for the Subject Property was not available. The title search did not reveal liens. Langan's review of ownership records did not reveal RECs associated with the property.

3.0 USER PROVIDED INFORMATION

3.1 User Questionnaire

As per ASTM International E1527-13, questionnaires were provided to the User and the owner/operator. Questionnaires completed by the User and/or the owner/operator have not yet been received. Should completed questionnaires be received following completion of this Phase I, an addendum will be issued.

3.2 Previous Environmental Reports

No previous reports were provided to Langan for review.

4.0 ENVIRONMENTAL RECORDS REVIEW

A regulatory database search provided by EDR is included in Appendix B. The EDR report lists sites identified on select federal and state standard source environmental databases within the approximate search radii specified by ASTM International E1527-13. Langan reviewed each environmental database on a record-by-record basis to evaluate whether the identified sites represent a potential for environmental impact to the Subject Property. "Orphan sites" are those sites that could not be mapped because of inadequate address information. The three identified orphan sites were found to be outside of the search radii.

The following table lists the number of sites identified in standard and additional environmental record databases within the prescribed search radius and appearing in the EDR Report.

DATABASE RECORD SUMMARY							
Database Reviewed (Date of government version)	Minimum Search Area	Subject Property Listed	Number of Sites Within Minimum Search Area				
USEPA DATABASES							
National Priorities List (NPL) (12/30/2020)	1-Mile Radius	No	0				
Delisted NPL (12/30/2020)	1/2-Mile Radius	No	0				
Superfund Enterprise Management System (SEMS) and SEMS-ARCHIVE (12/30/2020)	1/2-Mile Radius	No	2

NY MANIFEST (1/1/2019)	Subject Property	Yes	2			
NJ MANIFEST (12/31/2018)	Subject Property	Yes	1			

N/A: databases with a "Not Applicable" Minimum Search Radius are databases reviewed as part of the Phase I ESA but not required per ASTM E1527-13.

A description of the reviewed databases is provided in the EDR Report (Appendix B). A summary of Subject Property database listings and other sites identified within the prescribed search areas are provided below.

4.1 Federal Agency Database Findings

The Subject Property and/or listings within their respective minimum search distances as specified by ASTM E1527-13 were not listed in the following federal agency databases: NPL, Delisted NPL, RCRA CORRACTS, RCRA TSDF, ERNS, EC and IC. The following summary describes the listings that were identified within the designated search radii:

SEMS and SEMS-ARCHIVE Databases

The SEMS database tracks hazardous waste sites, potentially hazardous waste sites and remedial activities under the USEPA Superfund Program. The database compiles data on potentially hazardous waste sites reported to the USEPA and sites that are either proposed for listing or listed on the NPL. The database, formerly known as CERCLIS, was renamed SEMS by

the USEPA in 2015. Former CERCLIS sites that have been granted the status of no further remedial action planned (NFRAP) are now included in the SEMS-ARCHIVE database. The SEMS ARCHIVE database, formerly known as CERCLIS NFRAP, tracks sites that have no further interest under the Federal Superfund Program based on available information. In accordance with ASTM E1527-13, the minimum search radius for the databases is within ½-mile from the Subject Property.

The Subject Property was not listed in the SEMS or SEMS-ARCHIVE databases. Two SEMS-Archive sites were within the search radius. The listed sites are located more than 1,250 feet from the Subject Property at up-gradient locations. Based on the location of the sites relative to the Subject Property, the two SEMS-ARCHIVE sites are not RECs.

RCRA Generators

The RCRA Generators database is USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by the RCRA. LQGs generate over 1,000 kilograms (kg) of hazardous waste or over 1 kg of acutely hazardous waste per month; SQGs generate between 100 and 1,000 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month; and non-generators do not presently generate hazardous waste.

The Subject Property was included in the RCRA database as detailed below:

Site Name: Eternal Images & Gifts Inc Site Address: 16 South Main Street

Location: Subject Property

Description: Eternal Images & Gifts Inc is listed as a RCRA Non-Generator under EPA ID NYR000078352, and was historically listed as a SQG in 1999. Listed wastes generated include silver (D011). A NY MANIFEST dated 2000 reported a waste quantity of 250 pounds of silver. No violations are listed for this generator. Based on the lack of violations reported for this site and minimal waste quantities generated, hazardous waste generation at the Subject Property is not a REC.

The Subject Property was included in the RCRA database for a facility associated with Con Ed, at 2 South Main Street. The Con Ed facility, EPA ID NYP0047484786, is listed as a RCRA Non-Generator, was historically listed as a LQG in 2015, and is listed in the NY MANIFEST and NJ MANIFEST databases. No waste codes or violations were reported for this listing. Based on the lack of reported violations, the RCRA listing for Con Ed does not indicate the likely presence of hazardous substances that have impacted the Subject Property, and, therefore is not a REC.

Seven adjoining facilities (associated with Con Ed services, manholes, transformers, and utility poles) were also identified in the RCRA Generators database. No waste codes or violations were reported for the listings. Based on the lack of violations and no information regarding generated

wastes, the RCRA listings for the Con Ed services do not indicate the likely presence of hazardous substances that have impacted the Subject Property, and, therefore are not RECs.

4.2 State Agency Database Findings

The Subject Property and listings within the respective minimum search distances, as specified by ASTM E1527-13, were not listed in the following state agency databases: SHWS, HSWDS, NY ENG CONTROL, NY INST CONTROL, NY Brownfields, CBS AST and UST, and MOSF UST and AST. The following summary describes the listings that were identified within the designated search radii:

NY SWF/LF Database

The Solid Waste Facilities/Landfill Sites (SWF/LF) records are an inventory of solid waste disposal facilities or landfills in a particular state. Per ASTM E1527-13, the approximate minimum search distance required for SWF/LF sites is within ½-mile of the Subject Property.

The Subject Property was not listed in the SWF/LF database; however, two facilities were listed within the search radius. The two SWF/LF facilities are located at least 950 feet away at down-gradient locations in relation to the Subject Property. Based on the locations relative to the Subject Property and the general direction of groundwater flow, these identified sites are not RECs.

LTANKS

The LTANKS database contains an inventory of reported leaking storage tank incidents, including leaking USTs and ASTs. Per ASTM E1527-13, the approximate minimum search distance required for LTANKS incidents is within ½-mile of the Subject Property.

The Subject Property was included in the LTANKS database as detailed below:

Site Name: Sinis Res.

Site Address: 14 South Main Street

Location: Subject Property

Description: The NYSDEC memo for this spill incident, reported on November 27, 2001, indicated that 12 gallons of No. 2 Fuel Oil was spilled due to a tank overfill incident involving the company Westmore Fuel. The spill case was closed on November 27, 2001 by the NYSDEC case manager. The memo notes "Owner satisfied with cleanup. No further action...All material recovered". Due to the nature of this spill and closed regulatory status, this LTANKS listing is not a REC.

Eighty-seven LTANKS sites were listed within the ½-mile search radius. The listed incidents were primarily caused by tank test failures, tank failures, and tank overfills. Eighty-five of the listings were not located at adjoining properties and were closed by the NYSDEC. Two open incidents are located over 1,900 feet away (up-gradient) from the Subject Property. Based on the distance from the Subject Property and the general direction of groundwater flow, the open LTANKS sites are not a REC.

NY SPILLS Database

The NY SPILLS database, maintained and updated by the NYSDEC, is an inventory of sites where spills have been identified and reported to the NYSDEC. The minimum search radius for the SPILLS database includes the Subject Property and any listings within a 1/8-mile search radius.

The Subject Property was included in the NY SPILLS database as detailed below:

Site Name: Sinis Res. Site Address: 14 South Main Street Location: Subject Property

Description: Spill No. 9609630 was reported on November 1, 1996 in relation to a human error involving the company Westmore Fuel. The report indicates that 2 gallons of No. 2 Fuel Oil were released and the NYSDEC memo states "Clean up complete". The spill was closed on November 1, 1996. Because of the incidental amount of released petroleum and a swift cleanup action, this incident is not a REC.

Thirty-eight NY SPILLS incidents were identified within 1/8-mile of the Subject Property; 31 of these incidents have been granted closed status by the NYSDEC and are not RECs. Six of the open spills are more than 284 feet away at up-gradient locations or more than 450 feet away at down-gradient locations and are not RECs. The remaining open SPILLS incidents are described below:

Site Name: Flores - Lust

Site Address: 25 East Broadway

Location: Approximately 109 feet to the south (up-gradient) of the Subject Property **Description:** Spill No. 0409239 was reported on November 18, 2004 in relation to an equipment failure of a 550-gallon tank and subsequent release of an unknown quantity of No. 2 fuel oil. The spill is currently open. The NYSDEC memo states that "01/07/05 Contamination is extensive. As of 12/13/04 No clean up has been initiated..". An update to the spill case was provided by the NYSDEC case manager, on May 5, 2017 as follows, "DEC file including sample results entered into DecDocs. Nothing heard back from property owner. Unknown if any remediation was performed." Based on the up-gradient location proximate to the Subject Property and the current regulatory status, this NY SPILLS incident is a REC.

Site Name: Joes Garage

Site Address: 29 Pearl Street (Reported address: 28 Pearl Street)

Location: Approximately 542 feet to the west (up-gradient)

Description: Spill No. 0605839 was reported on August 21, 2006 in relation to elevated photoionization detector (PID) readings encountered at the site by HydroEnvironmental Solutions (HES) during a Phase II investigation. The NY SPILLS incident is listed as 29 Pearl Street in the EDR, however the site address in the NY SPILLS listing is reported as 28 Pearl Street. The spill case is currently open with the NYSDEC. The site at 28 Pearl

Street is included in the NY LTANKS and NY MANIFEST databases. The NYSDEC memo for Spill No. 0605839 indicates that as of July 24, 2020, the site is currently used as an auto repair shop, and was historically used as a gas station. According to the memo, four 2,000-gallon gasoline USTs and two 2,000-gallon diesel USTs were removed from the site in 2007, and at present the site contains three 275-gallon ASTs. The NYSDEC memo also states that at present the site at 28 Pearl Street contains three 275-gallon ASTs. A NY MANIFEST dated 2007 reported a waste quantity of 375 gallons of ignitable waste and benzene. No violations are listed for this generator. Further, the memo indicates that that the site is associated with the PBS listing for Joseph Gianfrancesco JR., INC. at 28 Pearl Street, Site ID: 3-074861. The site at 28 Pearl Street is registered in the NY PBS UST and AST, RCRA Generators, and Historical Auto databases. Based on the open regulator status, elevated PID readings detected in soil at the site, and proximity to the Subject Property, Spill No. 0605839 at 29 Pearl Street (reported address: 28 Pearl Street) is a REC.

Four adjoining properties are included in the NY SPILLS database for spills relating to equipment failure, construction operations, and/or bus tank failures. The reported spill events are not associated with any other database listings, and the four spills have been granted closed status by the NYDSEC. Based on the incidental amount of released petroleum and a swift cleanup action for these events, the NY SPILLS listings at four adjoining properties are not RECs.

New York VCP

The VCP is a program in which private money is used to remediate sites to levels allowing for productive use. According to ASTM E1527-13, the approximate minimum search distance required for VCP sites is within ½-mile of the Subject Property. The Subject Property was not listed in the VCP database; however, two facilities were identified within the ½-mile search radius. The listed VCP sites are located more than 850 feet down-gradient from the Subject Property and, therefore, are not RECs.

Brownfield Sites

Brownfield sites are properties at which redevelopment or re-use may be complicated by the presence or potential presence of hazardous substances, pollutants, or contamination. The NYSDEC Brownfield Cleanup Program offers tax credits for redeveloping contaminated sites. The Subject Property was not listed as a Brownfield site; however, one Brownfield site was identified within ½-mile of the Subject Property. The site, Pecora Brothers Inc, is located more than 1,400 feet down-gradient from the Subject Property, and is not a REC.

Petroleum Bulk Storage Facilities

The PBS Facilities UST and AST databases contain records of registered USTs and/or ASTs. A registered PBS UST and/or AST does not constitute a REC in and of itself; however, properties listed on the UST and/or AST databases including a reported leak, spill, or release could constitute

a REC with respect to the Subject Property. Per ASTM E1527-13, the minimum search distance required for USTs and ASTs is the Subject Property and adjoining properties. One UST was listed at the Subject Property under Madelon Estates Inc, 2 South Main Street (Facility ID No. 3-600479), and is described below:

Tank Number	Туре	Capacity (gallon)	Contents	Install Date	Removal Date	Status
1	UST	2,000	NR	NR	NR	Closed - Removed

The tank associated with the Subject Property at 2 South Main Street (Madelon Estates Inc) is not associated with open NY SPILLS/LTANK cases, however, based on the absence of closure documentation provided for the tank, this PBS listing is a REC.

Adjoining properties were not identified in the PBS Facilities UST and AST databases.

Registered Drycleaners (DRYCLEANERS)

The DRYCLEANERS database is a listing of registered dry cleaning facilities. Dry cleaning facilities are associated with the use of tetrachloroethylene (PCE), a chlorinated solvent with the potential to infiltrate groundwater if released and readily migrate to surrounding properties. The Subject Property was not listed in the DRYCLEANERS database; however, four facilities were identified within ¼-mile of the Subject Property. Of the four facilities, two are located over 750 feet to the west and are hydraulically up-gradient from the Subject Property, and are not associated with documented spills or releases and therefore are not RECs. The remaining two facilities are discussed below:

Site Name: Commuter Cleaners

Site Address: 29 N Main Street

Location: Approximately 444 feet to the northeast (down-gradient)

Description: The facility, Commuter Cleaners, was listed as a DRYCLEANER site from 2003 to 2017, and is listed as a Historical Cleaner for the years 1992 to 2014, and is currently shutdown. The site is currently listed as a RCRA SQG with waste types including halogenated solvents (F002). Information regarding chemicals used at this facility was not provided. No violations are reported for this site, and there are no listed spills or releases associated with this facility. Based on the location of this facility and the general direction of groundwater flow, this facility is not a REC.

Site Name: Everyday Cleaners

Site Address: 45 South Main Street

Location: Approximately 300 feet to the south (down-gradient)

Description: The facility, Everyday Cleaners, was listed as a DRYCLEANER site in 2010 and is currently shutdown. This site is included in the LTANKS database for closed Spill No. 9407697, which was reported to the NYSDEC on September 9, 1994. A NY MANIFEST from 1995 documents the disposal of 195 pounds of halogenated solvents.

No violations are reported for the site. Based on the location of the site relative to the Subject Property, the inferred direction of groundwater flow, and the lack of reported violations, this facility is not a REC.

4.3 Proprietary EDR Databases

MGP

The MGP database is a proprietary database that lists potential MGP sites compiled by EDR's researchers. MGPs were used in the United States (US) from the 1800's to the 1950's to produce a gas that could be distributed and used as fuel. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination. EDR's search distance for the MGP database includes the Subject Property and sites within a 1-mile radius. The Subject Property was not listed in the EDR MGP database; however, one MGP facility was identified within the minimum search radius. The facility is located over 950 feet to the east and hydraulically down-gradient of the Subject Property. Based on the location relative to the Subject property, this site does not indicate the likely presence of hazardous substances and/or petroleum that may have migrated to and impacted the Subject Property, and is not a REC.

Historical Auto

The Historical Auto database is a proprietary database that lists potential gas station/filling station/service station sites based on review of national collections of business directories that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The Subject Property was not listed in the EDR Historical Auto database; however, three facilities were identified within the minimum search criteria. Two of the facilities are located over 450 feet from the Subject Property, and are not RECs. The remaining site is listed below:

• Gianfrancesco Joseph Jr Inc (28 Pearl Street, approximately 542 feet west (up-gradient) of the Subject Property: gasoline service station from 1969 to 2014

The site at 28 Pearl Street is also listed in the NY PBS UST and AST, and RCRA Generators databases. The NY PBS UST and AST listing for 28 Pearl Street (Facility ID No. 3-074861), details four 2,000-gallon gasoline USTs and two 2,000-gallon diesel USTs that are registered as closed and removed from the site. Further, the database details two 250-gallon waste/used oil ASTs and two 250-gallon No. 2 fuel oil ASTs that are active and in-service at the site. The site is also registered as a RCRA LQG (EPA ID: NYR000149815), and was historically registered as a SQG in 2007. Listed wastes generated include ignitable waste (D001) and benzene (D018). No manifests or violations were reported for this generator.

As previously discussed in Section 4.2, the site at 28 Pearl Street is associated with the listing for 29 Pearl Street (reported address: 28 Pearl Street), which is listed in the NY LTANKS, NY SPILLS, and NY MANIFEST databases. The site at 28 Pearl Street is listed in the NY SPILLS database for open spill No. 0605839. Elevated PID readings were encountered in the soil at the site during a Phase II investigation conducted by HES. Further, the site is listed in the NY PBS UST and AST database for the removal of four 2,000-gallon gasoline USTs and two 2,000-gallon diesel USTs in 2007. According to the NYSDEC memo for the NY SPILLS listing No. 0605839, at present the site at 28 Pearl Street contains three 275-gallon ASTs. The NY Manifest database contained 2 manifests for the generation of ignitable waste (D001) and benzene (D018) in 2007. No violations are listed for this generator.

Based on the proximity to the Subject Property and up-gradient location, the listing Gianfrancesco Joseph Jr Inc, is considered a REC based on the potential for inadvertent releases of petroleum products, solvents, and/or other hazardous substances that may have migrated to and impacted groundwater and/or soil vapor at the Subject Property.

Historical Cleaners

The Historical Cleaners database is a proprietary database that lists potential drycleaner sites based on a review of national collections of business directories that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash and dry facilities, etc. The Subject Property was not listed in the EDR Historical Cleaners database; however, three facilities were identified within the minimum search radius. The three facilities are located over 100 feet to the south or over 400 feet to the north, and hydraulically cross-gradient of the Subject Property. The three facilities are not associated with any documented spills or releases, and are not currently occupied by dry cleaning facilities; therefore, these sites are not RECs.

4.4 Other Ascertainable Regulatory Records

NY MANIFEST

The NY MANIFEST database tracks hazardous waste from the generator through the transporters and ultimately the disposal facility. The Subject Property was listed in the database for the Eternal Images and Gifts Inc facility, at 16 South Main Street. As previously discussed in Section 4.1, this facility is currently listed as a RCRA Non-Generator, was historically listed as a SQG in 1999, and is on the NY MANIFEST database. Listed wastes generated include silver (D011). No violations are listed for this site, and there are no documented spills or releases associated with this facility; however, 1 manifest was available for the generation of photo fixer silver solution (D011) at the Subject Facility in 2000. Based on the lack of violations and that the reported metal is generally insoluble in groundwater, former hazardous waste generation at the Subject Property does not represent a REC.

The Subject Property was listed in the database for a facility associated with Con Ed, at 2 South Main Street. As previously discussed in Section 4.1, this facility, EPA ID NYP0047484786, is currently listed as a RCRA Non-Generator, was historically listed as a LQG in 2015, and is on the NY MANIFEST and NJ MANIFEST databases. No waste codes, violations, or manifests were reported for this listing. Based on the lack of reported violations, the NY MANIFEST listing for Con Ed does not indicate the likely presence of hazardous substances that have impacted the Subject Property, and, therefore is not a REC.

NJ MANIFEST

The NJ MANIFEST database tracks hazardous waste from the generator through the transporters and ultimately the disposal facility. The Subject Property was listed in the database for a facility associated with Con Ed, at 2 South Main Street. As previously discussed in Section 4.1, this facility, EPA ID NYP0047484786, is currently listed as a RCRA Non-Generator, was historically listed as a LQG in 2015, and is on the NY MANIFEST and NJ MANIFEST databases. No waste codes or violations were reported for this listing. Based on the lack of reported violations, the NJ MANIFEST listing for Con Ed does not indicate the likely presence of hazardous substances that have impacted the Subject Property, and, therefore is not a REC.

4.5 Local Regulatory Agency Findings

Freedom of Information Law and Freedom of Information Act Requests

FOIL/FOIA requests were submitted by Langan to the following federal, state, and local agencies in May 2021:

- USEPA, Region 2
- NYSDEC, Region 3
- New York State Department of Health (NYSDOH)
- Westchester County Department of Health (WCDOH)
- Westchester County
- Port Chester Building Department

Responses have been received from the NYSDEC and NYSDOH. Responses indicated the agencies did not locate relevant records.

Complete responses have not yet been received. Copies of the FOIL/FOIA requests and any responses received are included in Appendix C. Should pending responses alter the conclusions provided within this report, we will issue an addendum detailing the modified conclusions.

4.6 Physical Setting Sources

4.6.1 Topography

According to the 2012 USGS Glenville Quadrangle 7.5-minute Series Topographic Maps, the Subject Property elevation is about 15 to 35 feet above msl, relative to the North American Datum of 1983 (NAD 1983). The Subject Property is located within a relatively hilly area. Areas to the west and southwest sit at higher elevations relative to the Subject Property, with areas to the east and northeast at lower elevations. Groundwater in the vicinity is expected to flow east towards the Byram River.

4.6.2 Geology

Bedrock outcrops were observed on the western sidewalls of the cellars of 2 South Main Street and 4 South Main Street at the Subject Property.

According to the NYS Geological Survey Surficial Geologic Map of New York and Geologic Map of New York, Lower Hudson Sheets, the Subject Property is underlain by gneiss of the Harrison Gneiss formation. Based on the geotechnical evaluation for the Subject Property, bedrock is estimated to be about 2 to 15 feet below existing grade at the Subject Property.

4.6.3 Hydrology

Groundwater flow is typically topographically influenced, as shallow groundwater tends to originate in areas of topographic highs and flows toward areas of topographic lows, such as rivers, stream valleys, ponds, and wetlands. A broader, interconnected hydrogeologic network often governs groundwater flow at depth or in the bedrock aquifer. Groundwater depth and flow direction are also subject to hydrogeologic and anthropogenic variables such as precipitation, evaporation, extent of vegetation cover, and coverage by impervious surfaces. Other factors influencing groundwater include depth to bedrock, the presence of artificial fill, and variability in local geology and groundwater sources or sinks.

Based on information contained in the EDR report for surrounding properties, and Langan's experience at sites in the vicinity of the Subject Property, depth to groundwater at the Subject Property is expected to be approximately 8 to 10 feet below ground surface (bgs). Based on the general topography of the surrounding area, inferred groundwater flow is generally to the west toward the Byram River, which is located about 500 feet to the east of the Subject Property. Potable water is provided to the Subject Property by the City of Port Chester.

According to Federal Emergency Management Agency (FEMA) Flood Map 36119C0293F (effective 9/28/2007), the eastern portion of the Subject Property along South Main Street is located within Zone X (areas determined to be within the 0.2% annual chance floodplain). The western portion of the Subject Property along East Broadway is located within Zone X, which represents areas determined to be outside the 0.2% annual chance floodplain and to be of minimal flood hazard. A copy of the FEMA Map is included in Appendix D.

4.7 Historical Use Information

Langan reviewed available historical resources (including aerial photographs, Sanborn maps, topographic maps, and city directories) dated 1885 to 2017 provided by EDR. Findings from the reviews are presented below.

4.7.1 Aerial Photographs

Langan reviewed aerial photographs of the Subject Property and surrounding areas for the years 1934, 1941, 1949, 1951, 1954, 1960, 1966, 1971, 1974, 1985, 1989, 1991, 1994, 1996, 2008, 2011, 2014, and 2017. Copies of the Aerial Photographs are included in Appendix E.

The photographs indicate that the Subject Property was located in a densely developed mixeduse residential and commercial urban area since at least 1934. Multiple multi-story buildings and one undeveloped lot were present in 1934. By 1949 the entire Subject Property is developed with multiple multi-story buildings, and appears unchanged through 1985. A building within the western portion of the Subject Property appears to have been demolished, and the current building configuration at the Subject Property is visible in the 1985 photograph. In the 2008 photograph, roofing materials at buildings along South Main Street at the Subject Property appear to have been resurfaced, and a building along the western portion of Block 47 appears dilapidated with no roof present. The Subject Property remains unchanged through 2017. The surrounding area of the Subject Property appears densely developed with multi-story mixed-use residential and commercial as early as 1934 through 2017. The Metro North is shown extending along the western boundary of the Subject Property, and the Byram River is shown to the east of the Subject Property. The aerial photographs did not reveal any RECs.

4.7.1 Sanborn Fire Insurance Maps

Langan reviewed Sanborn Maps for the years 1885, 1890, 1895, 1902, 1908, 1915, 1934, 1942, 1950, 1990, 1993, 1994, 1995, 1996, and 2006. Sanborn Maps constitute a database of prior site uses for real properties located in many cities and towns across the United States. Copies of the maps are included in Appendix F.

A review of the Sanborn Maps revealed that the Subject Property was developed with multiple two- and three-story mixed-use residential and commercial buildings as early as 1885. Various commercial businesses are shown at the Subject Property, and the Metro North is shown extending to the west of the Subject Property beyond East Broadway. By 1902, the western portion of the Subject Property along East Broadway is developed with multiple two-story residential buildings. In the 1908 map, the property at 16 South Main Street has been redeveloped to extend westward to East Broadway. By 1990, four of the five residential dwellings that were depicted along East Broadway are now demolished, and the building configuration at the Subject Property remains relatively unchanged through 2006.

Adjoining and surrounding properties are primarily shown as multi-story residential, commercial, and light industrial buildings. A filling station with gasoline tanks was located to the west of the Subject Property at 29 New Broad Street in 1934, an auto sales and service facility was located

at 29 New Broad Street from 1950 through 2006, and an auto sales and service station was located at 5 New Broad Street from 1990 through 1994. The Metro North is shown extending along the western boundary of the Subject Property as early as 1934 through 2017.

Based on close proximity to the Subject Property and up-gradient locations, the filling station at 29 New Broad Street, and auto sales and service stations at 29 New Broad Street and 5 New Broad Street, are considered RECs based the potential for inadvertent releases of petroleum products, solvents, and/or other hazardous substances that may have migrated to and impacted groundwater and/or soil vapor at the Subject Property.

4.7.2 Historical USGS Topographic Quadrangles

Langan reviewed historical USGS Topographic Quadrangles obtained from EDR for information regarding past uses of the Subject Property. Quadrangle maps were available for the years 1892, 1893, 1897, 1898, 1899, 1900, 1944, 1947, 1951, 1955, 1960, 1967, 1971, 1975, 2012, and 2013. Copies of topographic maps reviewed are included in Appendix G.

Based on a review of the historic topographic maps, the Subject Property has been located in a densely developed urban area since at least 1897. The Subject Property remains largely the same in all reviewed maps, sitting at an elevation of around 15 to 35 feet above msl. The review of the historic topographic maps did not identify any RECs in connection to the Subject Property.

4.7.3 City Directories

The City Directory Abstract, obtained from EDR, is a review of available business directories, including city, cross-reference, and telephone directories, at approximately five-year intervals for the years spanning 1972 through 2017. A copy of the City Directory report is provided in Appendix H.

According to the city directory, the Subject Property has been occupied by residential and commercial tenants for the span of the available records. Commercial businesses including grocers, bakeries, and banks, have been located at the Subject Property since 1972. Moy Laundry is listed at 8 South Main Street within the Subject Property from 1987 through 2000. The listing, Moy Laundry, was not reported in any of the available databases. Based on the lack of information provided and/or association with drycleaning operations, the listing Moy Laundry is not a REC.

Adjoining and surrounding properties listed various residential, commercial, and light industrial businesses including banks, shoe repairs, and grocers. A dry cleaner, Everyday Cleaners, was located at 45 South Main Street, which is about 300 feet down-gradient of the Subject Property, from 1977 through 2000. The facility is identified in the NY CLEANERS, RCRA Non-Generator, and NY MANIFEST database. As previously discussed in Section 4.2, based on the location of the site relative to the Subject Property, the inferred direction of groundwater flow, and the lack of reported violations, this facility is not a REC.

4.7.4 Title Records, Environmental Liens and Use Limitations

Reasonably ascertainable recorded land title records and lien records that are filed under federal, tribal, state, or local law should be reviewed to identify environmental liens or Activity and Use Limitations (AUL), if any, that are currently recorded against the property. Any environmental liens or AULs must be reported to the Environmental Professional conducting the ESA per ASTM E1527-13.

Langan contracted EDR to conduct an Environmental Lien search for the Subject Property. The results of the search, which included a compilation of available data and verification of the findings with the appropriate regulatory authorities, revealed that there are no Environmental Liens or other Activity and AUL associated with the Subject Property. A copy of the Environmental Lien Search is provided in Appendix I.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

A site reconnaissance was conducted in a systematic manner that focused on the spatial extent of the Subject Property and then progressed to the adjacent and surrounding properties. The assessment of the adjacent and surrounding properties was limited to identifying, if possible, any indications of past or current use that may involve the use, storage, disposal, or generation of hazardous substances or petroleum products; noting the general type of current use; the general topography of the surrounding area; and providing a general description of adjoining or adjacent structures. The adjacent properties were observed from an on-site vantage point and public rights-of-way. Site reconnaissance photographs that illustrate the current condition of the Subject Property are presented in Appendix A.

5.1.1 Date and Time of Site Reconnaissance

The site reconnaissance was performed by Laura Grose of Langan on May 6, 2021. Ms. Grose was accompanied by Marie Sinis, the Property Owner of 2 through 8 South Main Street, 14 South Main Street, and 16 South Main Street, and Olga Sinis, the Property Manager of 2 through 8 South Main Street, 14 South Main Street, and 16 South Main Street. The weather at the time of the inspection was sunny and approximately 60° F. Ms. Marie Sinis has 40 years of experience with the Subject Property, and Ms. Olga Sinis has 20 years of experience with the Subject Property. According to Ms. Marie Sinis, the Subject Property has been occupied by the current building configuration since the early 1900s. Site reconnaissance photographs are included in Appendix A.

5.1.2 General Subject Property Setting and Reconnaissance Observations

The approximately 26,893-square-foot Subject Property is comprised of ten lots; 2 through 10 South Main Street, 14 and 16 South Main Street, 106 Westchester Avenue, and 7 and 15 East Broadway. The existing buildings at the Subject Property were constructed between about 1885 and 1908. At the time of the inspection, the buildings at the Subject Property were occupied and operated by:

- A convenience store, Salvadorian restaurant, and residential tenants (2 South Main Street);
- Two vacant commercial spaces, and residential tenants (4 South Main Street);
- A bird shop and vacant commercial space (6 South Main Street);
- A restaurant and an insurance company (8 South Main Street);
- Vacant commercial and vacant residential space (14 South Main Street);
- A Peruvian deli and residential tenants (105 Westchester Avenue); and,
- Residential tenants (15 East Broadway).

Access to 10 South Main Street and 16 South Main Street was not provided at the time of the inspection. As previously discussed in section 4.7.1, the address at 16 South Main Street is occupied by two buildings. According to Ms. Olga Sinis and Ms. Marie Sinis, the building along East Broadway has been vacant and in a dilapidated state since the early 1990s, and at present, the building along South Main Street is occupied by two vacant commercial spaces, and residential tenants. A representative for 10 South Main Street was not available to discuss the conditions of, or existing tenants at 10 South Main Street. Roof access to the remaining buildings at the Subject Property was not provided at the time of the inspection.

Pits, Ponds, Lagoons

No pits, ponds or lagoons were observed.

Pools of Liquid

Pooled liquid, presumed to be water, were observed within the cellar levels at 2 South Main Street and 4 South Main Street. A source of the liquid was not identified, however, no sheen, odor, or other indications of a release of petroleum or hazardous substances were observed.

Storm Drains, Wells, and Cisterns

No storm drains were observed within the footprint of the Subject Property. Two storm drains were observed within the sidewalk along South Main Street. No wells or cisterns were observed at the Subject Property.

Polychlorinated Biphenyl Transformers (PCB) and Suspect Equipment

No transformers or other suspect PCB-containing equipment were observed on the Subject Property.

Floor Drains

Multiple floor drains were observed throughout the ground floor levels and cellars of 2, 4, 6, 8, and 14 South Main Street, and 106 Westchester Avenue. Gray and brown staining was observed throughout the cellar in the vicinity of the floor drains at 2 and 4 South Main Street; however, the stains did not appear to be petroleum-related, but rather a result of pooled water. The source of the water was unknown at the time of the site reconnaissance. According to Ms. Olga Sinis, the floor drains connect to the Village of Port Chester sanitary sewer system.

Storage Containers and Drums

Langan observed the following chemicals and products stored throughout the Subject Property:

Subject Property Location	Use	Containers (Approx.)	Container Size
	Kitchen Grease	1	55-gallon steel drum
2 South Main Street Coller	Paint Thinner	1	1-gallon
2 South Main Street Cellar	Cleaner	1	1-gallon
	Joint Compound	1	5-gallon
4 South Main Street Cellar Joint Compound		1	5-gallon

Subject Property Location	Use	Containers (Approx.)	Container Size
8 South Main Street Cellar	Kitchen Grease	2	55-gallon steel drum
106 Westchester Avenue Cellar	Joint Compound	1	5-gallon

Staining and/or odors were not observed within the vicinity of drums or the other noted stored products.

Waste Generation, Storage, and Disposal

According to Ms. Olga Sinis and Ms. Marie Sinis, the Village of Port Chester Department of Sanitation collects trash from the Subject Property twice a week.

Air Emissions or Wastewater Discharges

Ms. Olga Sinis informed Ms. Grose during the site reconnaissance that commercial exhaust hoods are in place on the roofs of 2, 4, and 8 South Main Street. The exhaust hoods are used for restaurant kitchen ventilation purposes.

UST or AST

During the site reconnaissance, Ms. Marie Sinis informed Ms. Grose that two out-of-service ASTs are in place within the cellar of 14 South Main Street, and one in-service No. 2 fuel oil AST is in place within the cellar 16 South Main Street. The building at 14 South Main Street is included in the LTANKS and NY SPILLS databases. The cellar room containing the ASTs at 14 South Main Street was inaccessible at the time of the site reconnaissance due to clutter and/or debris. The AST at 16 South Main Street is not associated with any NY SPILLS, LTANKS, and/or NY PBS listings. Access to the occupied building at 16 South Main Street was not provided at the time of the site reconnaissance.

According to the NYS PBS UST database, the building at 2 South Main Street previously contained a fuel oil UST that was removed. During the site reconnaissance, Ms. Marie Sinis and Ms. Olga Sinis did not have any knowledge of, and/or information regarding the former UST at the Subject Property.

Fill ports for an AST and/or UST were observed on the front porch of the building at 15 East Broadway. According to the resident, Jose Paez, an AST was removed from the property prior to his occupancy. The date of the removal was unknown. The address at 15 East Broadway is not associated with any NY SPILLS, LTANKS, and/or NY PBS listings.

Sumps and Pits

2 South Main Street

Langan observed one sump in the northeastern corner of the cellar. The sump pump appeared to be constructed of concrete and contained water. No sheen or odors were observed.

<u> 4 South Main Street</u>

Langan observed one sump in the southeastern corner of the cellar. The sump pump appeared to be constructed of concrete and contained water. No sheen or odors were observed.

8 South Main Street

Langan observed one sump in the southeastern corner of the cellar. The sump pump appeared to be constructed of concrete and contained water. A slight sheen was observed on the surface of the water within the pit. No odors were observed within the vicinity of the sump pump.

14 South Main Street

Langan observed one sump along the western wall within the cellar. The sump pump was inaccessible during the site reconnaissance and Langan could not determine the condition of the pump, water level, and/or the presence of a sheen. Musty and mildew-like odors were observed throughout the cellar. Staining or potential indications of a release of petroleum or hazardous substances could not be observed due to absence of electricity and/or light sources in the cellar at the time of the inspection.

106 Westchester Ave

Langan observed one sump in the southeastern corner of the cellar. The sump pump appeared to be constructed of concrete and contained water. No sheen or odors were observed.

Monitoring Wells or Remedial Activities

No monitoring wells or other evidence of remedial activities were observed at the Subject Property.

Stained or Discolored Soils

Stained or discolored soil was not observed; however, Langan observed gray and brown staining on the concrete floor throughout the cellars of 2, 4, 8, and 14 South Main Street, and 106 Westchester Ave. The observed staining did not appear to be petroleum-related, but rather a result of pooled water, and/or spills from kitchen grease collection containers.

Leachate or Seeps

Leachate or seeps were not observed.

Adjoining and Surrounding Property Uses

The Subject Property is bound to the north by Westchester Avenue followed by a two-story mixed-use commercial and residential building (101-111 Westchester Avenue); to the east by South Main Street followed by a five-story commercial and retail building (Waterfront PI/Westchester Avenue); to the south by vacant land (18 South Main Street); and to the west by a two-story mixed-use commercial and residential building (110 Westchester Avenue) and East Broadway followed by the New Haven line of the Metro North. The surrounding area is occupied by residential, commercial, and mixed-use residential and commercial buildings.

Site Reconnaissance Conclusions

The site reconnaissance did not reveal RECs associated with adjoining or surrounding properties. The following REC was identified based on the site reconnaissance:

• According to Ms. Olga Sinis, two out-of-service ASTs are located within the cellar at 14 South Main Street and one in-service AST is located within the cellar at 16 South Main Street. Access to 16 South Main Street was not provided at the time of the inspection. The ASTs are a REC.

6.0 INTERVIEWS

Ms. Marie Sinis, the Property Owner of 2 through 8 South Main Street, 14 South Main Street, and 16 South Main Street, and Ms. Olga Sinis, the Property Manager of 2 through 8 South Main Street, 14 South Main Street, and 16 South Main Street, accompanied Ms. Grose during the site reconnaissance. Relevant information provided by Ms. Marie Sinis and Ms. Olga Sinis is incorporated in Section 5 where appropriate.

7.0 ADDITIONAL SERVICES

7.1 Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uraniumcontaining minerals in soil, rock, and water that subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building's foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithological conditions.

According to the USEPA Radon Zone Map, the Subject Property is in Zone 3, where there is a predicted average indoor radon screening level less than 2 picoCuries per liter (pCi/L). The USEPA maintains a recommended radon action level of 4.0 pCi/L for residences. The NYSDOH maintains a database of radon test results on a local and county level. According to the database, 26 and 107 radon tests were conducted on first floors and basements, respectively, in homes in Rye, New York. The average radon levels in first floors and basements were 0.87 pCi/L and 2.31 pCi/L, respectively. A total of 100% of indoor radon tests for first floors and 83% for basement areas conducted in Rye, New York resulted in a radon concentration less than 4.0 pCi/L. Based on this information, elevated levels of radon gas at the Subject Property are not expected.

7.2 ACM, LBP, and PCBs

A formal survey to identify asbestos containing material (ACM), lead based paint (LBP), and PCBcontaining material was not conducted as part of the Phase I ESA. The mixed-use residential and commercial buildings at the Subject Property were constructed by at least 1910; therefore, ACM, LBP and PCB-containing materials may be present in the building.

8.0 DEVIATIONS AND DATA GAPS

8.1 Deviations

Langan has performed a Phase I ESA of the Subject Property using a standard of good commercial and customary practice that is consistent with the ASTM E1527-13. Significant deviations were not made to the above-referenced standards.

8.2 Data Gaps

To address data gaps, additional sources of information may be consulted. According to ASTM E 1527-13, Section 8.3.2.3, "historical research is complete when either: (1) the objectives in 8.3.1 through 8.3.2.2 are achieved; or (2) data failure is encountered. Data failure occurs when all standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. If data failure is encountered, the report shall document the failure and, if any of the standard historical sources were excluded, give the reasons for the exclusion." This Phase I ESA was completed with the following data gaps:

- Complete responses to FOIL/FOIA requests have not been received;
- Access to 10 and 16 South Main Street was not provided during the site reconnaissance; and,
- Certain historical resources including aerial photos and topographic maps were not available in five-year increments during some time periods.

The above-listed data gaps are not expected to impact the overall conclusions of this Phase I ESA. If information becomes available which alters the conclusions of this Phase I, an addendum will be issued.

9.0 FINDINGS, CONCLUSIONS, AND OPINIONS

This Phase I ESA was conducted in accordance with the ASTM International Standard Practice E1527-13, which also satisfies the USEPA AAI Rule needed to qualify for the bona fide (in good faith) prospective purchaser liability protections available under the Comprehensive Environmental Response Compensation and Liability Act CERCLA. The objective of this Phase I ESA was to identify RECs, HRECs, or CRECs, as defined in ASTM E1527-13, in connection with the Subject Property. The following RECs were identified at the Subject Property:

REC 1: PBS at the Subject Property

During the site reconnaissance, the Property Owner and the Property Manager of 2, 4, 6, 8, 14, and 16 South Main Street informed Langan that two out-of-service ASTs are located within the cellar of 14 South Main Street, and one in-service AST is located within the cellar of 16 South Main Street. At the time of the site reconnaissance, the cellar room containing the ASTs at 14 South Main Street was inaccessible due to clutter and/or debris, and access to 16 South Main Street was not provided. According to the NYSDEC PBS database, the building at 2 South Main Street previously contained a 2,000-gallon steel/carbon UST within the cellar that was removed. Details on installation and removal dates, contents, and/or containment are not provided in the PBS listing. The EDR did not include documentation of a tank test completed immediately prior to the closure or a subsurface investigation completed after closure to evaluate for impacts from tank operations. Based on the absence of documentation regarding installation, contents, closure and/or removal information, the potential for subsurface impacts at the subject property as a result of undocumented releases from the ASTs and/or former UST is identified as a REC.

REC 2: Historical Use, Open NYSDEC Spill Incidents, and PBS at Surrounding Properties

Historical and current operations at surrounding properties have included petroleum storage, reported releases, and automotive repair which may have resulted in subsurface impacts at the Subject Property due to known release, undocumented releases, or cumulative impacts. Historical uses of concern were identified at surrounding up-gradient properties including a historical filling station at 29 New Broad Street, auto sales and service stations at 29 New Broad Street and 5 New Broad Street, a historical auto repair shop and gas station at 28 Pearl Street, and a residential spill of No. 2 fuel oil 25 East Broadway.

Review of the NY SPILLS, NY PBS UST and AST, and RCRA database listings for the Property at 28 Pearl Street revealed that six 2,000-gallon USTs were previously removed from the site, and at present the site contains three to four 250- to 275-gallon ASTs that are active and in-service.

Based on close proximity to the Subject Property and up-gradient locations, the above listed open NY SPILLS site, historical filling station, auto sales and service stations, and historical auto repair shop and gas station are considered RECs based the potential for inadvertent releases of

petroleum products, solvents, and/or other hazardous substances that may have migrated to and impacted groundwater and/or soil vapor at the Subject Property.

There were no HRECs or CRECs identified in relation to the Subject Property.

Non-Scope Considerations

A Non-Scope Consideration is identified by ASTM E1527-13 as an environmental issue or condition at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM E1527-13.

The following non-scope considerations were identified:

• The buildings within the Subject Property were constructed as early as 1885. Based on the age of the buildings, ACM, LBP, and PCBs may be present in building materials. An intrusive survey to identify ACM, LBP, and PCB-containing material was not conducted as part of this Phase I ESA.

11.0 STATEMENT OF QUALIFICATIONS AND SIGNATURES

Langan declares that, to the best of its professional knowledge and belief, the personnel who performed this Phase I ESA meet the definition of Environmental Professional as defined in Subsection 312 10 of 40 CFR 312 and that they have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Properties. They have developed and performed the Phase I ESA in conformance with the standards and practices set forth in ASTM International Practice E1527-13, which also satisfies the USEPA AAI Rule. Resumes outlining the qualifications of the Environmental Professionals who performed this Phase I ESA are provided in Appendix J.

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 4

RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 7 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/31/2020 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/09/2020 has revealed that there are 88 NY LTANKS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 43 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2021 has revealed that there are 2 FINDS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FORMER MGP - PURDY A	INTERSECTION - PURDY	SSE 1/8 - 1/4 (0.183 mi.)	S159	412

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist

Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

reportedly entirely natural gas and electric and has no petroleum storage tanks. While cleaning out basement, suspected petroleum staining and petroleum odors were noted. Mr Pagano contacted US Tank Tech and a suspected out-of-service UST was detected next to the building. Caller has contacted Dweayne Monaco of Northeast Environmental for further investigation/removal of the UST. jod 7/17/13: Additional information received from HES, entered into EDocs. jod 03/21/14 Requested an updated progress report from HES. TG 04/25/14 HES submitted a Groundwater Recovery report which described the pumping of contaminated gw through a O/W separator into GAC drums and a belt skimmer to remove FP from the recovery well. TG 07/28/15 Emailed Tim Bishop from HES for an update. TG 01/25/17 HydroEnvironmental Solutions submitted Groundwater Monitoring report including a request for spill closure. TG 04/04/17 HES reported has been reviewed and based on the information presented in that report, no further action is required. TG" "Caller advised found staining of unknown petroleum on basement floor of building. Caller requesting a call back to see what he can do next."

	Paltz. jod 1/10/17 Sandra Called with update. Compco did a helium test on tank. Issue was the riser caps and copper siphen activate line on STP. Caps have been replace, copper siphen line corrected, tank is now sound and about to be refilled with product. ga 1/10/17: Email update from Chris Lalak of WCDoH: I spoke with Sandra from Sunoco. Crompco on site today, doing Helium testing. Riser cap and Copper siphon activator line issues. Minor repairs and tank passed a retest. Tank going back in service. Full paperwork will be submitted to me and Dan. Once the paperwork is in and reviewed, this one should be closed out. jod 3-10-17 contacted Alta East, they stated that they are not involved with site for the current spill . Met with Alta East, they said that they paid fine and corrected the 14 spill in 2015, asked for documentation, then asked about 95 spill number. Alta East said that they did a Phase II at site before they purchased in 2009 and spill should be closed? Asked for report. RDB 5-4-17 Meeting with WCDOH, WC is NFA, DEC to assume lead. GPH"

All Materials: Site ID: Operable Unit ID: Operable Unit: Equipment Failure C3 6048 2015-03-12 RDBENDEL Not reported 2015-03-12 Not reported Not reported Gasoline Station or other PBS Facility Other Not reported False Not reported False False 4 2015-03-12 2017-03-10 Not reported PORT CHESTER VALERO Not reported 999 SEBASTIAN BIMONTE "3/12/15- WCDOH reports the following: Sebastian is at this gas station for a routine inspection. PBS 3-413143 3 spills into containment 2 tank top sumps and a dispenser. Sebastian tried to call in 3 spills but it is all under one number. He will follow up. DT More from DOH: Kerosene Tank #005: Tank Top Sump with product. Diesel Tank #004: Tank top Sump with Product and Water. Dispenser (5/6): Diesel in dispenser sump. I could not open Kerosene dispenser but there is most likely product in there as well. They have a contractor on the way. I had them take the Diesel and Kerosene out of service. I also asked that the Diesel and Kerosene line and leak detector be tested because of the spills. 1-13-17 emailed Sunoco about this, the 95 and 16 spill, Sunoco stated that only the 16 spill is theirs. I asked if they could help with the 14 spill. RDB 1-13-17 Sunoco response, Spill 95-13471: is the responsibility of Alta East.Spill 14-11596: is also the responsibility of Alta East, and I know none of the details of the incident. If you could send a spill report, I could make some calls to see if AE (or Sunoco) can provide the info needed to get that closed out.Sunoco purchased the property and UST system from AE on 12/15/15, so anything after that date is our responsibility RDB 2-28--17 email from WCHD, stating that Alta East involved??? thought sold 3-1-17 emailed Alta East for verification-RDB-- 3-10-17 contacted Alta East, they stated that they are not involved with site for the current spill . Met with Alta East, they said that they paid fine and corrected this spill in 2015, asked for documentation, then asked about 95 spill number. Alta East said that they did a Phase II at site before they purchased in 2009 and spill should be closed? Asked for report. RDB" "spill to sump on dispenser 5 and 6 clean up and repairs pending item 3 - tank top sump tank #004 "

in that pit was covered with oil. FD and Code Enforcment stated that old streams exist under many of the older buildings in Post Chester, so the Byram River was inspected for signs of fuel oil. Even though it was low tide, there was NO indication that oil discharged into the river. The building is owned by Jay Feinsod who retained Northeast Environmental to clean up the spill. DLE responded and is investigating the spill because it appeared that the UST for the building is not in compliance with PBS regulations. Joe Mancini from the WCHD was also on-scene for the PBS issues. TG 11/26/13 Dwayne Monaco reported that NE Env completed the cleanup last night by vaccing about 2000 galllons of oil and water from the subterranean vault. NFA. TG " "OIL HAS LEAKED INTO THE WATERWAY UNKNOWN HOW MUCH OR CAUSE *** UPDATE FROM PORT CHESTER PD LT CONWAY** 1000 GALLON TANK HAS RUPTURED AND IS LEAKING INTO THE RIVER CURRENTLY" 489368

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State. AIR MINOR

FORMER MGP - PURDY & TRAVERSE AVENUES (Continued) Control Code: 15 Control Type: ENG 11/10/2009 Date Record Added: Date Rec Updated: 01/30/2018 Updated By: WBBENNET Site Description: Site Location: The former Port Chester manufactured gas plant (MGP) site is located in an urban portion of the Village of Port Chester, Westchester County, New York. The site is located at the southernmost point of the Port Chester Marina Redevelopment Area. Site Features: The site has been remediated and redeveloped into a multi-story commercial retail building which covers most of the site. Current Zoning/Use: The site building is occupied by multiple retailers. The site is zoned for commercial use. The site is bordered on the west by Waterfont Place (formerly Don Bosco Place), on the east by Traverse Avenue, on the south by Purdy Avenue, and on the north by a parking garage. The surrounding parcels are used for a combination of commercial and residential purposes. Past Use of the Site: The site was utilized for the MGP operation from the 1860s to the 1880s. It was then used for a variety of commercial and industrial purposes (iron works, waste oil reclamation facility, mail distribution facility, office space, and warehouse space) until 2001. All buildings related to previous operations were demolished and removed. The site entered the Voluntary Cleanup Program in 2002. A Site Investigation was completed in 2004 and remedial construction was substantially completed in 2006. The remedy included excavation of former MGP structures and coal tar contaminated soil/wastes. A deed restriction was placed on the site in 2010 which requires adherence to a Site Management Plan and Periodic Reviews. Site Geology and Hydrogeology: The site topography is relatively flat and the site is approximately 10 feet above sea level. Overburden soil consists of historic fill material which was placed in various stages in the late 1800's and early 1900's. The fill is approximately 4 to 6 feet thick and is underlain by natural silt and sands grading to weathered bedrock. Bedrock was encountered at depths of 12 to 20 feet. Shallow groundwater beneath the site generally occurs within sandy material at a depth of approximately 12 feet. The depth to water coincides roughly with the top of fractured weathered bedrock underlaying the site. There are limited tidal effects in the western most portion of the site. Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. The primary contaminants of concern prior to remediation were volatile and semi-volatile organic compounds associated with coal tar and other petroleum products. Remedial work conducted in 2005 and 2006 removed the coal tar and coal tar contaminated soil. The new commercial building has a sub slab vapor depressurization system installed to prevent vapor intrusion. The entire site is covered by a cap consisting of clean stone overlaid by concrete. A deed restriction and Site Management Plan are in place. Special Resources: The site is located in an urban area of the City of Port Chester. No special resources were identified. Health Problem: Contact with contaminated soils is not expected because the site is covered by buildings and pavement. Drinking contaminated groundwater is not likely since the area is supplied with public water. A

sub-slab depressurization system has been installed in the on-site structure to prevent exposure to site contaminants potentially

entering the buildings via soil vapor intrusion.

	commercial retail building which covers most of the site. Current Zoning/Use: The site building is occupied by multiple retailers. The site is zoned for commercial use. The site is bordered on the west by Waterfont Place (formerly Don Bosco Place), on the east by Traverse Avenue, on the south by Purdy Avenue, and on the north by a parking garage. The surrounding parcels are used for a combination of commercial and residential purposes. Past Use of the Site: The site was utilized for the MGP operation from the 1860s to the 1880s. It was then used for a variety of commercial and industrial purposes (iron works, waste oil reclamation facility, mail distribution facility, office space, and warehouse space) until 2001. All buildings related to previous operations were demolished and removed. The site entered the Voluntary Cleanup Program in 2002. A Site Investigation was completed in 2004 and remedial construction was substantially completed in 2006. The remedy included excavation of former MGP structures and coal tar contaminated soil/wastes. A deed restriction was placed on the site in 2010 which requires adherence to a Site Management Plan and Periodic Reviews. Site Geology and Hydrogeology: The site topography is relatively flat and the site is approximately 10 feet above sea level. Overburden soil consists of historic fill material which was placed in various stages in the late 1800's and early 1900's. The fill is approximately 4 to 6 feet thick and is underlain by natural silt and sands grading to weathered bedrock. Bedrock was encountered at depths of 12 to 20 feet. Shallow groundwater beneath the site generally occurs within sandy material at a depth of approximately 12 feet. The depth to water coincides roughly with the top of fractured weathered bedrock underlaying the
Env Problem:	site. There are limited tidal effects in the western most portion of the site. Nature and Extent of Contamination: Remediation at the site is complete. The primary contaminants of concern prior to remediation were volatile and semi-volatile organic compounds associated with coal tar and other petroleum products. Remedial work conducted in 2005 and 2006 removed the coal tar and coal tar contaminated soil. The new commercial building has a sub slab vapor depressurization system installed to prevent vapor intrusion. The entire site is covered by a cap consisting of clean stone overlaid by concrete. A deed restriction and Site Management Plan are in place. Special Resources: The site is located in an urban area of the City of Port Chester. No special resources were identified.
Health Problem:	Contact with contaminated soils is not expected because the site is covered by buildings and pavement. Drinking contaminated groundwater is not likely since the area is supplied with public water. A sub-slab depressurization system has been installed in the on-site structure to prevent exposure to site contaminants potentially entering the buildings via soil vapor intrusion.

FORMER MGP - PURDY & TRAVERSE AVENUES (Continued)

Updated By: WBBENNET 58556 Site Code: Site Location: The former Port Chester manufactured gas plant (MGP) Site Description: site is located in an urban portion of the Village of Port Chester, Westchester County, New York. The site is located at the southernmost point of the Port Chester Marina Redevelopment Area. Site Features: The site has been remediated and redeveloped into a multi-story commercial retail building which covers most of the site. Current Zoning/Use: The site building is occupied by multiple retailers. The site is zoned for commercial use. The site is bordered on the west by Waterfont Place (formerly Don Bosco Place), on the east by Traverse Avenue, on the south by Purdy Avenue, and on the north by a parking garage. The surrounding parcels are used for a combination of commercial and residential purposes. Past Use of the Site: The site was utilized for the MGP operation from the 1860s to the 1880s. It was then used for a variety of commercial and industrial purposes (iron works, waste oil reclamation facility, mail distribution facility, office space, and warehouse space) until 2001. All buildings related to previous operations were demolished and removed. The site entered the Voluntary Cleanup Program in 2002. A Site Investigation was completed in 2004 and remedial construction was substantially completed in 2006. The remedy included excavation of former MGP structures and coal tar contaminated soil/wastes. A deed restriction was placed on the site in 2010 which requires adherence to a Site Management Plan and Periodic Reviews. Site Geology and Hydrogeology: The site topography is relatively flat and the site is approximately 10 feet above sea level. Overburden soil consists of historic fill material which was placed in various stages in the late 1800's and early 1900's. The fill is approximately 4 to 6 feet thick and is underlain by natural silt and sands grading to weathered bedrock. Bedrock was encountered at depths of 12 to 20 feet. Shallow groundwater beneath the site generally occurs within sandy material at a depth of approximately 12 feet. The depth to water coincides roughly with the top of fractured weathered bedrock underlaying the site. There are limited tidal effects in the western most portion of the site Env Problem: Nature and Extent of Contamination: Remediation at the site is complete. The primary contaminants of concern prior to remediation were volatile and semi-volatile organic compounds associated with coal tar and other petroleum products. Remedial work conducted in 2005 and 2006 removed the coal tar and coal tar contaminated soil. The new commercial building has a sub slab vapor depressurization system installed to prevent vapor intrusion. The entire site is covered by a cap consisting of clean stone overlaid by concrete. A deed restriction and Site Management Plan are in place. Special Resources: The site is located in an urban area of the City of Port Chester. No special resources were identified. Health Problem: Contact with contaminated soils is not expected because the site is covered by buildings and pavement. Drinking contaminated groundwater is not likely since the area is supplied with public water. A sub-slab depressurization system has been installed in the on-site structure to prevent exposure to site contaminants potentially entering the buildings via soil vapor intrusion. False Dump: Structure: False Lagoon: False Landfill: False

the station operator to address spill #15-11950.Dissolved BTEX concentrations continue to be present in the northern portion of the Site. Antea roup will continue monitoring site conditions on a quarterly basis. The next groundwater sampling even is scheduled for February 2017. RDB 5/30/18 Email from Cody Hume, Antea to RDB: A subsurface investigation was completed in 2017 that provided vertical delineation of impacts in northern portion of the site. Antea Group will prepare a remedial action plan in 2018 to address these impacts in-situ. The site operator performed VEFR events in the southern portion of the site in 2017 in relation to NYSDEC spill number 15-11950. Impacts in the southern portion of the site will continue to be monitored, and Antea Group will continue to work with the station operator to address spill number 15-11950 as necessary. Antea Group will continue monitoring site conditions on a quarterly basis. The next groundwater sampling event is scheduled for the second quarter 2018. 1st qtr QMR in D2. SRK 11/23/18 Quarterly GW Monitoring Report received and uploaded to DecDocs. TJP 2/6/19 4thQ2018 QMR received from antea. BW 2/27/19 - DEC (DB, BW, MS) meeting with Antea (Tim) and Getty (Brad). Vac events performed by Global in 2017. Concentrations of contaminants decreased but have recently rebounded (increased). DEC requesting 2017 soil sampling analytical data and a plan to continue to vac and monitor site wells. more aggressive activities maybe required. - MS 10/25/19 received 2ndQ GWS report. A subsurface investigation was completed in 2017 that provided vertical delineation of impacts in northern portion of the site. The site operator performed VEFR events in the southern portion of the site in 2017 in relation to NYSDEC spill number 15-11950. Impacts in the southern portion of the site will continue to be monitored, and Antea Group will continue to work with the station operator to address spill number 15-11950 as necessary. BW 12/11/19 meeting with antea & getty: Submit a Remedial Action Work Plan to complete a remedial excavation in conjunction with the anticipated UST system replacement activities likely to occur on Q1 2020. Dan explained he would likely request Getty sign a Stipulation Agreement (STIP) for spill number 93-05467 and Global to sign a STIP for spill number 15-11950. BW 1/31/20 4q20 GWS QMR received from antea. BW" "REMOVING SIX TANKS AT SITE DISCOVERED CPNTAMINATED SOIL AND FOUND HOLE IN TANK WILL STOCKPILE SOIL"

Environmental Interest/Information System: RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Database(s) EPA ID

EDR ID Number EPA ID Number

COSTCO (Continued)

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. HAZARDOUS WASTE BIENNIAL REPORTER ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State. 	Environmental Interest/Information System: RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State. <u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.		ng of CRA nent

Hazardous Waste Summary:

Waste Description:

Waste Code:

F003

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

 Waste Code:
 F005

 Waste Description:
 THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

 KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,
 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS

 CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF
 ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS

 LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF
 THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

OFFICE BUILDING (Continued)	
	above location. The soil samples are acceptable to the Department. The Department requires no further action with regards to the removal at this time. A request is being sent to NYSDEC to close the above mentioned spill #. There is no paperwork for the install of the new AST tank. The plans for the new tank as well as an updated PBS application (completed and signed) are needed to close the work permit. The Department also needs the remainder of the disposal paperwork. Submit this paperwork by February 23, 2007. Sincerely, Danielle Jackson Sanitarian Office of Environmental Health Risk

	DER Facility ID: DEC Memo:	"10-18-11 Steve reported spill to duty desk. He said he was out to do	
	DEC Mento.	a retest and was calling for the spill number that had been reported	
		with the original failure. 1105533 was reported in August, but does	
		not identify which tank failed. Steve decided to report a new spill	
		in case site told him wrong tank. Steve says today's test is an	
		ullage failure and he thinks it is at the vent line. Tyree has been	
		on site to assist Steve. Tank is double wall and there is no evidence	
		of a leak in interstitial. Forwarded spill to O'Mara and Carlos and	
		Stefan, WCHD since spill will not automatically be distributed. jc	
		2/24/2012 WCDOH provided the following description of tank test	
		failure: these spills occurring at 152 King St in Port Chester. They	
		were both TTFs on the same tank, the first in August, the second in	
		October. The tank passed a TT in July prior to replacement of its	
		tank top sump. After that the tank started to accumulate water	
		through the sump so the cause of the failures was suspected to be	
		related to the sump. The second ttf in October was after an attempt	
		to repair the tank top sump. Ultimately, the cause of both failures	
		was due to a vent issue which was resolved. The tank passed another	
		test in December and spill 1105533 was closed. Spill 1109057 should	
		be closed as well. nfa ELM "	
	Remarks:	"Spill taken at duty desk, see DEC Remarks. jc"

Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a completed Environmental Condition Assessment Form (ECAF)(DEP-PERD-PTP-200). 03/08/2007 09/18/2007 10/02/2007

Environmental Inter	est/Information System:	
	NCDB (National Compliance Data Base) supports implementation of the	
	Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the	
	Toxic Substances Control Act (TSCA). The system tracks inspections in	
	regions and states with cooperative agreements, enforcement actions,	
	and settlements.	
	ICIS (Integrated Compliance Information System) is the Integrated	
	Compliance Information System and provides a database that, when	
	complete, will contain integrated Enforcement and Compliance	
	information across most of EPA's programs. The vision for ICIS is to	
	replace EPA's independent databases that contain Enforcement data with	
	a single repository for that information. Currently, ICIS contains all	
	Federal Administrative and Judicial enforcement actions. This	
	information is maintained in ICIS by EPA in the Regional offices and	
	it Headquarters. A future release of ICIS will replace the Permit	
	Compliance System (PCS) which supports the NPDES and will integrate	
	that information with Federal actions already in the system. ICIS also	
	has the capability to track other activities occurring in the Region	
	that support Compliance and Enforcement programs. These include;	
	Incident Tracking, Compliance Assistance, and Compliance Monitoring.

"8/12/16 Sovereign Consulting tested tank (EZ3 test) - failed. NY Fuel Distribution (owner) retesting all UST. Pump truck en route to empty failed tank. No GW impacted for this spill, but site has contaminated GW being remediated - occasional product (Onapo) found in wells. ga 1-3-17-email from BW, Yes, the tanks are single-wall fiberglass, installed in 1983. There are currently the (3) open spill numbers.. 07-13196 and 09-08831 were transferred from Motiva to NY Fuel during the liability transfer. 16-04861 was opened during the failed tightness test in August. The wells are gauged at least twice per month to measure LNAPL levels.EFR (vac events) were conducted twice per month from March 2015 until September 2016. At that point, LNAPL levels had decreased.Currently, two (2) passive bailers are installed in MW-1 and MW-4 to collect LNAPL. The passive bailers are emptied at least twice per month during gauging events, and are rotated with MW-5 as needed.LNAPL levels have decreased since the summer months. RDB 12/6/17 Sent e-mail requesting tank change date based on contamination in wells increasing through time. 4Q report in D2. mt 1/17/18 met with NY Fuels, EFR to continue on MW-1,4,& 5, tank removal scheduled for 3/1/18, replace monitoring wells if destroyed. BW 02-26-18 Site visit during test pit excavation. Stained pea gravel with petroleum odor observed. Tank excavation to proceed on Tuesday and Wednesday. BTR 5/15/18 STIP signed, in D2. mt 2-14-19 Meeting with RDB, ML, DG, BG, Pat Dunn, Hani Sadallah and Alex Guardia. Reviewed portfolio of the sites owned: 33 stations in R3-Carmel, Brewster, Valley Cottage and Nyack. Other 29 in Westchester. Follow up meeting scheduled for 3-6-19. Breakdown of all 54 open spills by Region requested by OGC.ML 7-16-19 NY Fuels, and their consultant APECCO, met with the DEC and OGC to discuss site progress and a schedule for the removal of their single wall USTs. They agreed to submit RIWP for at least four of their 8 remaining sites and terms of a consent order were discussed. The Department approves the request to consolidate open spills under the 0713196 and 1710701 number.

DEC Memo:	"5/26/09 10/20/08 report shows levels low across site. highest level
	about 1200ppb btex in mw1. highest mtbe 120 also in mw1; new report
	due shortly jhardy 11/11/09 aug sampling results lower across site.
	no need for further action at this time. (sent email to enviro trac
	asking for pdf copies of first and second half 2009 samr)jh 6/30/10
	bp submitted samr and request for closure. Levels are relatively low
	but there are not a lot of wells and there is no soil data. jh 7/9/10
	asked bp to submit investigation reports that led to calling in this
	spill. Location of soil contamination will be used to identify, as
	possible, if wells are located properly and if follow up soil testing
	is needed jh The historic high concentrations of BTEX detected here
	in 2002 were order of magnitude 10ppm. No remediation was
	required/undertaken at that time. No significant discharge is noted
	by review of historic spills. Monitoring only has been taking place
	here from 2002 to 2010. The Feb. 2010 concentrations were
	insignificant and submitted with a request for closure which was
	recently resurrected by the RP's consultant. No further action
	required. PJD Sept. 2011"

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/09/2021 Number of Days to Update: 26 Source: EPA Telephone: N/A Last EDR Contact: 04/01/2021 Next Scheduled EDR Contact: 07/12/2021 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/09/2021 Number of Days to Update: 26 Source: EPA Telephone: N/A Last EDR Contact: 04/01/2021 Next Scheduled EDR Contact: 07/12/2021 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/09/2021 Number of Days to Update: 26 Source: EPA Telephone: N/A Last EDR Contact: 04/01/2021 Next Scheduled EDR Contact: 07/12/2021 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 03/30/2021 Next Scheduled EDR Contact: 07/12/2021 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/18/2021 Number of Days to Update: 35 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 04/01/2021 Next Scheduled EDR Contact: 07/26/2021 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/18/2021 Number of Days to Update: 35 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 04/01/2021 Next Scheduled EDR Contact: 07/26/2021 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: (212) 637-3660 Last EDR Contact: 03/23/2021 Next Scheduled EDR Contact: 07/05/2021 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: (212) 637-3660 Last EDR Contact: 03/23/2021 Next Scheduled EDR Contact: 07/05/2021 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

NY ENV RES DECL: Environmental Restrictive Declarations

The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

Date of Government Version: 11/19/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 03/05/2021 Number of Days to Update: 78 Source: New York City Department of City Planning Telephone: 212-720-3300 Last EDR Contact: 03/15/2021 Next Scheduled EDR Contact: 06/28/2021 Data Release Frequency: Varies

NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

CT ENG CONTROLS: Engineering Controls Listing

An Engineered Control is a permanent physical structure designed to safely isolate pollutants which would otherwise not comply with the self-implementing remedial options allowed in the Connecticut Remediation Standard Regulations (RSRs). The ECGD includes a description of what is eligible to be considered as an Engineered Control under section 22a-133k-2(f)(2) of the RSRs, a description of the information necessary for the preparation of complete and approvable applications, a step-by-step outline of the review and approval process, and supplemental resources provided in the appendices.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 02/02/2021 Next Scheduled EDR Contact: 05/17/2021 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/17/2020 Date Made Active in Reports: 09/10/2020 Number of Days to Update: 85 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 03/19/2021 Next Scheduled EDR Contact: 06/28/2021 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2018 Date Data Arrived at EDR: 08/14/2020 Date Made Active in Reports: 11/04/2020 Number of Days to Update: 82 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 02/02/2021 Next Scheduled EDR Contact: 05/31/2021 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40 Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

South Map:	5940545 MAMARONECK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
 Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

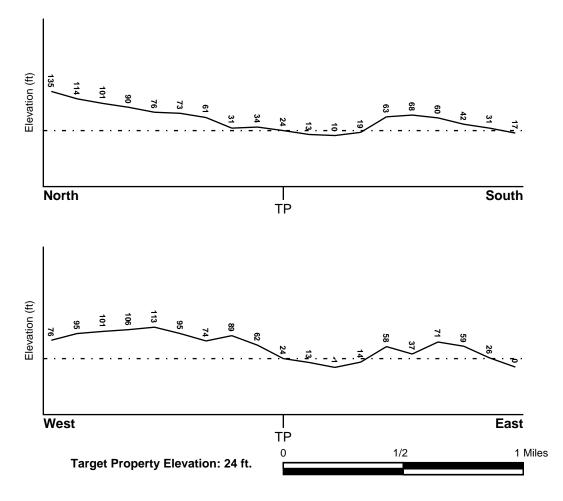

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
36119C0293F	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type

NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property	NWI Electronic Data Coverage
GLENVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION
MAP ID	FROM TP	GROUNDWATER FLOW
8	1/2 - 1 Mile SE	VARIES
1G	1/2 - 1 Mile SE	VARIES

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Re: Freedom of Information Request 10 S Main Street Section 142.30, Block 2, Lots 47, 48, 49, 50, 51, 52, 53, 54, 57, and 58 Port Chester, New York Langan Project No. 170653201

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above property, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The Subject Property is located at **10 South Main Street** in **Port Chester, New York**. The Subject Property is identified as **Section 142.30**, **Block 2**, **Lots 47**, **48**, **49**, **50**, **51**, **52**, **53**, **54**, **57**, **and 58**. The Subject Property is bound by Westchester Avenue followed by mixed-use residential & commercial buildings to the north, South Main Street followed by commercial and retail buildings to the east, residential buildings to the south, and East Broadway followed by the Metro North Railroad and mixed-use residential & commercial buildings to the west.

Please contact me at 914-323-7432 with any questions or send your response to my attention at <u>lgrose@langan.com</u> or at the below address:

Langan Engineering and Environmental Services, P.C. 1 North Broadway, Suite 910 White Plains, New York 10601

Thank you in advance for your cooperation.

Sincerely,

Langan Engineering, Environmental, Surveying Landscape Architecture, and Geology D.P.C.

RE: PUBLIC RECORDS REQUEST of 5/3/2021, Reference # W082165-050321

Date: 06/08/2021

Dear Laura Grose,

I write in response to your Freedom of Information Law (FOIL) request seeking:

Re: Freedom of Information Request 10 S Main Street Section 142.30, Block 2, Lots 47, 48, 49, 50, 51, 52, 53, 54, 57, and 58 Port Chester, New York Langan Project No. 170653201

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above property, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The Subject Property is located at 10 South Main Street in Port Chester, New York. The Subject Property is identified as Section 142.30, Block 2, Lots 47, 48, 49, 50, 51, 52, 53, 54, 57, and 58. The Subject Property is bound by Westchester Avenue followed by mixed-use residential & commercial buildings to the north, South Main Street followed by commercial and retail buildings to the east, residential buildings to the south, and East Broadway followed by the Metro North Railroad and mixed-use residential & commercial buildings to the west.

Please contact me at 914-323-7432 with any questions or send your response to my attention at Igrose@langan.com or at the below address:

Langan Engineering and Environmental Services, P.C. 1 North Broadway, Suite 910 White Plains, New York 10601

Thank you in advance for your cooperation.

Sincerely,

Langan Engineering, Environmental, Surveying Landscape Architecture, and Geology D.P.C. Laura Grose Senior Staff Scientist

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

FOIL Appeals Officer Office of General Counsel New York State Department of Environmental Conservation 625 Broadway, 14th Floor Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at 845 256-3154 and reference FOIL #W082165-050321, or simply reply to this email. Thank you.

Sincerely,

FOIL #: 21-05-030 Re: Project # 170653201

Dear Laura Grose:

This letter responds to your Freedom of Information Law (FOIL) request of May 3, 2021, in which you requested environmental records pertaining to "10 S. Main Street and 58 Port Chester, New York."

Please be advised that after conducting a diligent search, no records responsive to your request have been located.

Records pertaining to asbestos or asbestos abatement are maintained by the New York State Department of Labor's Asbestos Control Bureau. The contact information for this office is as follows:

> Records Access Officer New York State Department of Labor State Office Campus, Building 12, Room 509 Albany, NY 12240 Fax: (518) 485-1819

Should you feel that you have been unlawfully denied access to records, you may appeal such denial in writing within 30 days to the Records Access Appeals Officer, Division of Legal Affairs, Empire State Plaza, 2438 Corning Tower, Albany, New York 12237-0026.

If you require additional information or wish to discuss this matter further, please do not hesitate to contact me at (518) 474-8734.

Sincerely,

Rosemarie Hewig

From: FOIL-DOH <<u>FOIL-DOH@westchestergov.com</u>> Sent: Wednesday, May 5, 2021 5:37 PM To: Laura Grose <<u>lgrose@langan.com</u>> Subject: RE: Foil Request (L. GRO) not enough information

Ms. Grose,

The Health Department only searches for information by exact and full street address only. The Programs do not use section block and lot numbers. If you would please provide this information so that the programs can begin a search that would be great.

Thank You, Tonia

From: Laura Grose <<u>lgrose@langan.com</u>> Sent: Monday, May 3, 2021 10:20 AM To: FOIL-DOH <<u>FOIL-DOH@westchestergov.com</u>> Subject: Foil Request

Information is being requested of: FOIL-DOH@westchestergov.com.

Individual or organization requesting the information:

Name: Laura Grose

Street Address: 1 North Broadway, Suite 910

City: White Plains

Zip: 10601

E-mail address: lgrose@langan.com

Comments and request explained:

Re: Freedom of Information Request 10 S Main Street Section 142.30, Block 2, Lots 47, 48, 49, 50, 51, 52, 53, 54, 57, and 58 Port Chester, New York Langan Project No. 170653201 Dear Sir or Madam: Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above property, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have. The Subject Property is located at 10 South Main Street in Port Chester, New York. The Subject Property is identified as Section 142.30, Block 2, Lots 47, 48, 49, 50, 51, 52, 53, 54, 57, and 58. The Subject Property is bound by Westchester Avenue followed by mixed-use residential & commercial buildings to the north, South Main Street followed by commercial and retail buildings to the east, residential buildings to the south, and East Broadway followed by the Metro North Railroad and mixed-use residential & commercial buildings to the west. Please contact me at 914-323-7432 with any questions or send your response to my attention at lgrose@langan.com or at the below address: Langan Engineering and Environmental Services, P.C. 1

North Broadway, Suite 910 White Plains, New York 10601 Thank you in advance for your cooperation. Sincerely, Langan Engineering, Environmental, Surveying Landscape Architecture, and Geology D.P.C. Laura Grose Senior Staff Scientist

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan Engineering, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

ENVIRONMENTAL LIEN SEARCH

PROJECT GATEWAY 10 S MAIN STREET PORT CHESTER, NY 10573

Inquiry Number: 6472092.7S MAY 2, 2021

EDR Environmental Lien and AUL Search

6 Armstrong Road, 4th floor Shelton, CT 06484 Toll Free: 800.352.0050 www.edrnet.com

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business. Please contact EDR at 1-800-352-0050 with any guestions or comments.

- Bargain and Sale Deed, with Covenant against Grantor's Acts - Individual or Corporation (Single Sheet)

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT-THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.

THIS INDENTURE, made the 25th day of March, in the year 2009

BETWEEN JOSE PEDRO CARMONA and AYDA A. CARMONA residing at 229 South Regent Street, Port Chester, New York 10573

party of the first part, and JANET C. CARMONA and AYDA A. CARMONA, residing at 229 South Regent Street, Port Chester, New York 10573, as Joint Tenants With Right of Survivorship

party of the second part,

WITNESSETH, that the party of the first part, in consideration of

paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

zero dollars

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the

ALL that certain plot, piece or parel of land, situated, lying and being in the Village of Port Chester, Town of Rye, County of Westchester and State of New York, bound and described as follows:

BEGINNING on the northwesterly side of South Main Street and at a point distant 117.80 feet southwesterly from the southwesterly side of Westchester Avenue; and

RUNNING thence along side South Main Street, South 36 degrees 28 minutes 30 seconds West 17.53 feet;

THENCE North 54 degrees 19 minutes West 90.00 feet;

RUNNING thence North 36 degrees 28 minutes 30 seconds East 17.14 feet; and

RUNNING thence South 54 degrees 34 minutes East 90.00 feet to the point and place of BEGINNING

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose. The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.
