# DATA REPORTING QUALIFIERS

Client: AKRF Inc Job Number: 460-137545-1

| Lab Section | Qualifier | Description |
|---|---|---|
| GC/MS VOA | | |
| | U | Analyzed for but not detected. |
| | J | Indicates an estimated value. |
| | * | LCS or LCSD is outside acceptance limits. |
| | * | MS or MSD is outside acceptance limits. |
| | B | The analyte was found in an associated blank, as well as in the sample. |
| GC/MS Semi VOA | | |
| | U | Analyzed for but not detected. |
| | J | Indicates an estimated value. |
| | * | LCS or LCSD is outside acceptance limits. |
| | * | MS or MSD is outside acceptance limits. |
| | * | Surrogate is outside acceptance limits. |
| GC Semi VOA | | |
| | U | Analyzed for but not detected. |
| | * | Surrogate is outside acceptance limits. |
| Metals | | |
| | U | Indicates analyzed for but not detected. |
| | 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| | J | Sample result is greater than the MDL but below the CRDL |
| | N | Spiked sample recovery is not within control limits. |

| Question | Answer | Comment |
|---|---|---|
| Radioactivity wasn't checked or is </= background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | N/A | Not present |
| Sample custody seals, if present, are intact. | N/A | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | 4.6°C, IR #8 |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <6mm (1/4"). | False | See NCM |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | No analysis requiring residual chlorine check assigned. |

## Qualifiers

### Air - GC/MS VOA

| Qualifier | Qualifier Description |
|---|---|
| U | Indicates the analyte was analyzed for but not detected. |
| * | LCS or LCSD is outside acceptance limits. |

### Air - GC/MS VOA TICs

| Qualifier | Qualifier Description |
|---|---|
| J | Indicates an Estimated Value for TICs |
| N | This flag indicates the presumptive evidence of a compound. |

## Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|---|---|
| ¤ | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| PQL | Practical Quantitation Limit |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |

## Job ID: 200-39428-1

**Laboratory: TestAmerica Burlington**

**Narrative**

# CASE NARRATIVE

## Client: AKRF Inc

## Project: Brookfield

## Report Number: 200-39428-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

**RECEIPT**
The samples were received on 07/24/2017; the samples arrived in good condition.

**VOLATILE ORGANIC COMPOUNDS**
Samples SV-2, SV-3, SV-1, AA-1 and SV-5 were analyzed for Volatile Organic Compounds in accordance with EPA Method TO-15. The samples were analyzed on 07/25/2017 and 07/26/2017.

Samples SV-2[2X], SV-3[2X], SV-1[2X] and SV-5[4X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

The laboratory control sample (LCS) for analytical batch 200-118877 recovered outside control limits for n-Butane. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported. Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

| | | | | | | | | |

[1] Criteria: Return Pressure should be between -1 and -10 ("Hg) with the exception of grab samples or those using 100 or 200mL/minute flow controllers. These samples must be returned at no lower than -10"Hg, but have no specific criteria otherwise.

[2] If return pressure is not within criteria, initiate Non-Conformance Memo.

[3] Record the ID of the FC used for sampling if information is provided, otherwise leave blank.

[4] Record the Flow Controller Set Flow Rate Logbook ID and Page number in which the original FC Check was recorded

| Question | Answer | Comment |
|---|---|---|
| Radioactivity wasn't checked or is </= background as measured by a survey meter. | True | Lab does not accept radioactive samples. |
| The cooler's custody seal, if present, is intact. | True | Not present |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | N/A | Thermal preservation not required. |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | N/A | Thermal preservation not required. |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | N/A | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <6mm (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

**Re: Soil Waste Characterization Results**
**Brookfield Commons Phase 2**
**135 South Lexington Avenue, White Plains, NY 10601**

Dear Mr. Musa:

AKRF, Inc. (AKRF) is pleased to present this summary report detailing the sampling methodology and laboratory results from waste characterization soil sampling conducted at 135 South Lexington Avenue in White Plains, NY (the Site), associated with the Brookfield Commons Phase 2 project (the Project). The investigation described in this report includes soil sampling to characterize material anticipated to be excavated and disposed of off-site during construction at the Site. The sampling program was designed to satisfy the typical sampling frequency and analytical requirements for the various types of soil disposal facilities located in the greater New York-New Jersey area. Nonetheless, it is possible that once a specific facility is selected by the Contractor, additional testing may be required. This report is intended to be used as a supplement to applications being submitted to soil disposal facilities considering accepting excavated material generated from the Site.

## Project Description

The Site is located at 135 South Lexington Avenue in White Plains, New York, and is identified as Section 125.83, Block 7, Lot 1 on the City of White Plains Tax Map. At the time of this investigation, the Site was developed with a vacant nine-story apartment building with a basement and associated landscaped and paved areas, as shown on Figure 1. The Site, which is part of a multi-story apartment building complex identified as Brookfield Commons, is maintained by the White Plains Housing Authority. The surrounding area is mixed-use, including residential and commercial uses, filling stations, a hospital, churches, and municipal buildings.

The Project consists of the demolition of the existing vacant apartment building followed by the construction of a new approximately 16,000-square foot apartment building and associated landscaped and paved areas. Based on a review of existing construction documents, the Project will require excavation of soil to a maximum final elevation of approximately 190 feet above the North American Vertical Datum of 1988 (NAVD88) within the footprint of the new building and at the ancillary utility excavations around the perimeter of the new building. Existing grade at the Site varies in elevation from approximately 197 feet above NAVD88 in the northwestern portion of the Site to approximately 199 feet above NAVD88 in the southeastern portion of the Site. These existing conditions result in maximum

excavation depths of approximately 7 to 9 feet below existing grade. It is anticipated that approximately 6,400 cubic yards of soil (or approximately 9,600 tons, using an estimate of 1.5 tons per cubic yard of soil) may be excavated for off-site transportation and disposal during the construction process.

**Waste Characterization Soil Sampling**

On September 13 and 14, 2018, AKRF conducted a waste characterization sampling program, which included the collection of one composite and one grab soil sample from eight approximately 800-cubic yard or less zones (designated zones) to satisfy typical disposal facility requirements of one sample per 800 to 1,000 cubic yards. A total of eight waste characterization soil samples (WC-1 through WC-8) were collected from 12 waste characterization soil borings (WC-1 through WC-3, WC-4A and B, WC-5, and WC-6A and B through WC-8A and B), as shown on Figure 1. The borings were advanced within the footprints of the new building and ancillary excavation areas around the perimeter of the new building.

The areas of Zones 6, 7 and 8 represent utility corridors, which will have relatively narrow trenches within their respective zones and expected to have maximum excavation/export volumes of 800 cubic yards.

All waste characterization soil samples were collected using a track-mounted Geoprobe® 6610DT direct push probe (DPP) unit to advance 2-inch diameter, 5-foot long macrocore rods lined with disposable acetate liners. The soil within each extracted liner was field-screened for evidence of contamination (e.g., odors, staining), and logged using the modified Burmister soil classification system. Soil cores were screened for volatile organic compounds (VOCs) using a photoionization detector (PID), which was calibrated at the start of the each day with 100 parts per million (ppm) isobutylene standard gas. Soil encountered during this investigation included a fill layer extending from ground surface to depths ranging from approximately 5 to 7 feet below grade. The fill layer included sand, silt, and gravel with varying amounts of ash, brick, coal, concrete, fabric, glass, slag, tile, and wood. Apparent native soils composed of varying amounts of sand, silt, gravel, and clay were identified underlying the fill layer extending to approximately 10 feet below grade (the maximum boring depth). No odors, non-aqueous phase liquid (NAPL), or PID detections were noted during soil screening activities. Groundwater was encountered at depths ranging from approximately 7 to 7.5 feet below grade during this investigation. No evidence of gross contamination was noted during this investigation; therefore, the borings were backfilled with soil cuttings and clean sand, and, where applicable, were patched with asphalt to match existing surface finishes. Soil boring logs documenting soil conditions are included as Appendix A.

Each waste characterization sample was collected using soil from the corresponding borings within each designated zone (e.g., one boring for WC-1, WC-2, WC-3, and WC-5; and two borings for WC-4 (WC-4A & WC-4B), WC-6 (WC-6A & WC-6B), WC-7 (WC-7A & WC-7B), and WC-8 (WC-8A & WC-8B). One five-point composite sample was collected by compositing aliquots of soil from five discrete sampling depths within the borings from each zone. In addition, one discrete grab sample was collected from a 1-foot interval from one of the borings in each zone. In the absence of evidence of contamination, the grab samples were collected from a representative 1-foot interval at least 1-foot below grade. The waste characterization samples were collected from the unsaturated zone, between 0 and 7 feet below grade (i.e., above the water table and within the observed fill layer).

Samples slated for laboratory analysis were placed in laboratory-supplied containers, and within a chilled cooler in accordance with EPA protocols. Samples were preserved to maintain a temperature of 4 ºC. The soil samples were transported via courier under appropriate chain of custody documentation for analysis at TestAmerica Laboratories (TA), located in Edison, New Jersey, a New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP)-certified and New Jersey Department of Environmental Protection (NJDEP)-certified laboratory.

Composite samples were analyzed for semi-volatile organic compounds plus tentatively identified compounds (SVOCs+20) by United Stated Environmental Protection Agency (EPA) Method 8270D,

Target Analyte List (TAL) metals by EPA Method 6010D, Toxicity Characteristic Leaching Procedure (TCLP) Resource Conservation and Recovery Act (RCRA) 8 Metals (arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver) plus copper, nickel, and zinc by EPA Method 6010D, mercury by EPA Method 7471B, TCLP mercury by EPA Method 7470A, hexavalent chromium by EPA Method 7196A, polychlorinated biphenyls (PCBs) by EPA Method 8082A, pesticides by EPA Method 8081B, herbicides by EPA 8151A, New Jersey Extractable Petroleum Hydrocarbons (NJEPH), total petroleum hydrocarbons (TPH) for diesel range organics (DRO) by EPA Method 8015D, total sulfur by EPA Method 9038, total cyanide by EPA Method 9012B, and RCRA characteristics of ignitability, corrosivity, and reactivity by EPA Methods 1030, 9045D, and 9014/9034, respectively. One composite sample for the entire Site was also analyzed for paint filter by EPA method 9095B. Grab samples were analyzed for VOCs plus tentatively identified compounds (VOCs+10) by EPA Method 8260C.

## Sampling Results

PCB Aroclor 1260 was detected at a concentration of 0.38 milligrams per kilogram (mg/kg) in sample WC-3 (0-7'). No PCBs were detected above the laboratory reporting limit in the remaining seven soil samples. Low concentrations of VOCs, including the common laboratory contaminants acetone and methylene chloride, were detected in some samples. SVOCs, metals, and pesticides were the detected at concentrations typical of historic fill, which is commonly identified at many urban sites, including in White Plains.

None of the soil samples analyzed for TCLP metals had concentrations exceeding hazardous waste thresholds.

No additional substantive contamination was identified in the waste characterization analytical results. Laboratory analytical results are summarized in Tables 1 through 6. The complete laboratory analytical report is provided in Appendix B.

## Conclusions

Based on the soil sample analytical results, it is possible that all on-site soil can be managed as non-hazardous fill material by a variety of off-site soil disposal facilities. Notwithstanding, the contractor, soil broker, and proposed off-site disposal facilities must complete independent reviews of the complete soil sampling data provided as part of this report to independently assess the analytical results. This report shall be provided to the proposed disposal facilities for review.

In addition, all soil intended for on-site reuse or off-site disposal should also be field screened and reassessed during excavation to confirm that excavated soil does not exhibit any signs of gross contamination. Any soil exhibiting field evidence of contamination should be segregated, resampled, and managed as a new, discrete waste stream until representative analytical data has been reviewed. All on-site reuse and/or off-site disposal of soil should be conducted in accordance with the Soil Management Plan (SMP) and Construction Health and Safety Plan (CHASP).

Any approval letters issued by the selected disposal facilities based on this waste characterization data shall be reviewed by the Client and/or their representative prior to off-site transportation and disposal of any material generated from the Site.

If you have any questions, please feel free to contact Patrick McHugh at (914) 922-2387 or pmchugh@akrf.com.

Sincerely,

Soil Waste Characterization Analytical Results
*Notes*

**GENERAL**

**NA :** Not applicable.

**U :** The analyte was not detected at the indicated concentration.

**J :** The concentration given is an estimated value.

**B :** The analyte was found in an associated blank, as well as in the sample.

**p :** The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.

*** :** LCS or LCSD is outside acceptable limits.

**HF :** Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

**mg/kg :** milligrams per kilogram = parts per million (ppm)

**µg/L :** micrograms per Liter = parts per billion (ppb)

# CASE NARRATIVE

## Client: AKRF Inc

## Project: Brookfield Commons; #170131

## Report Number: 460-164549-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

**RECEIPT**
The samples were received on 9/13/2018 6:10 PM and 9/14/2018 5:35 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 2.2º C and 2.7º C.

**Receipt Exceptions**

The following sample were received at the Savannah laboratory for sulfur analysis outside the required temperature criteria due to a FedEx delay: WC-7(0-7') (460-164549-1), WC-8(0-7') (460-164549-2), WC-1(0-7') (460-164549-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5). There was melted ice present in the cooler - temperature recorded at 24.6 deg C. These samples were discarded and additional volume was sent from Edison to Savannah on 9/17/18. The additional volume was received at an acceptable temperature of 2.8 deg C on 9/18/18.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

**VOLATILE ORGANIC COMPOUNDS (GC-MS)**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for Volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260C. The samples were prepared on 09/14/2018 and 09/15/2018 and analyzed on 09/17/2018 and 09/19/2018.

Methylene Chloride was detected in method blank MB 460-553153/9 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Refer to the QC report for details.

No other difficulties were encountered during the volatiles analysis.

All other quality control parameters were within the acceptance limits.

**DIESEL RANGE ORGANICS**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for diesel range organics in accordance with EPA SW-846 Method 8015D - DRO. The samples were prepared on 09/14/2018 and 09/16/2018 and analyzed on 09/14/2018, 09/16/2018 and 09/17/2018.

#2 Diesel Fuel failed the recovery criteria high for the Matrix Spike/Matrix Spike Duplicate (MS/MSD) of sample 460-164516-1 in batch 460-552663.

Refer to the QC report for details.

Samples WC-7(0-7') (460-164549-1)[5X] and WC-3(0-7') (460-164549-5)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the DRO analysis.

All other quality control parameters were within the acceptance limits.

**PESTICIDES**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 09/14/2018 and 09/16/2018 and analyzed on 09/15/2018, 09/17/2018 and 09/18/2018.

The DCB Decachlorobiphenyl surrogate recovery for the following samples was outside acceptance limits (high biased) on the primary column due to matrix interference: (460-164545-E-3-H MS). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

The continuing calibration verification (CCV) associated with batch 552216 recovered above the upper control limit for Endrin ketone on the confirmation column, but recovered within control limit on the primary column .The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following sample is impacted: (CCVIS 460-552390/3).

The %RPD between the primary and confirmation columns exceeded 40% for 4,4'-DDT for the following sample: WC-3(0-7') (460-164549-5). The lower value has been reported and qualified in accordance with the laboratory's SOP.

The %RPD between the primary and confirmation column exceeded 40% for 4,4'-DDT for the following sample: WC-6 (0-7) (460-164661-1). The lower value(s) has been reported and qualified in accordance with the laboratory's SOP.

Several analytes failed the recovery criteria low for the Matrix Spike (MS) of sample 460-164545-3 in batch 460-552390. 4,4'-DDE failed the recovery criteria high.

For the Matrix Spike Duplicate (MSD) of sample 460-164545-3 in batch 460-552390, Endosulfan II, Endosulfan sulfate, Endrin aldehyde and Endrin ketone failed the recovery criteria low. Several analytes failed the recovery criteria high. Also, delta-BHC, Endosulfan sulfate and Endrin aldehyde exceeded the RPD limit.

Endosulfan sulfate, Endrin aldehyde and Endrin ketone failed the recovery criteria low for the MS of sample 460-164583-1 in batch 460-552763. 4,4'-DDD, 4,4'-DDE, 4,4'-DDT and Endrin failed the recovery criteria high.

Endosulfan II, Endosulfan sulfate, Endrin aldehyde and Endrin ketone failed the recovery criteria low for the MSD of sample 460-164583-1 in batch 460-552763. Several analytes failed the recovery criteria high.

Refer to the QC report for details.

No other difficulties were encountered during the Pesticides analysis.

All other quality control parameters were within the acceptance limits.

**POLYCHLORINATED BIPHENYLS**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 09/14/2018 and 09/16/2018 and analyzed on 09/15/2018 and 09/17/2018.

No difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

**CHLORINATED HERBICIDES**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for chlorinated herbicides in accordance with EPA SW-846 Method 8151A. The samples were prepared on 09/14/2018 and 09/17/2018 and analyzed on 09/18/2018.

The closing continuing calibration verification (CCVC) associated with batch 460-553076 recovered above the upper control limit for 2,4-D on the primary column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

The closing continuing calibration verification (CCVC) associated with batch 460-553215 recovered above the upper control limit for 2,4-D on the primary column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

The continuing calibration verification (CCV) associated with batch 460-553215 recovered above the upper control limit for 2,4-D on the primary column. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Refer to the QC report for details.

No other difficulties were encountered during the herbicides analysis.

All other quality control parameters were within the acceptance limits.

**SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270D. The samples were prepared on 09/15/2018 and 09/16/2018 and analyzed on 09/16/2018 and 09/17/2018.

The continuing calibration verification (CCV) analyzed in batch 460-552682 was outside the method criteria for the following analyte(s): Benzidine. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Surrogates recoveries for the following laboratory control sample (LCS) associated with batch 460-552479 were outside the upper control limits. All spike recoveries were within limits. Sample has been qualified and reported.

The continuing calibration verification (CCV) associated with batch 460-552736 recovered above the upper control limit for 2-Nitroaniline, 2,4-Dinitrophenol, 2,4-Dinitrotoluene, 2,6-Dinitrotoluene, 2-Nitrophenol, 4,6-Dinitro-2-methylphenol, Bis(2-ethylhexyl) phthalate, Di-n-octyl phthalate, Nitrobenzene and Pentachlorophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Surrogates recoveries for the following laboratory control sample (LCS) associated with batch 460-552653 were outside the upper control limits. All spike recoveries were within limits. Sample has been qualified and reported.

The surrogate recovery for the blank associated with preparation batch 460-552653 and analytical batch 460-552736 was outside the upper control limits.

The laboratory control sample (LCS) for preparation batch 460-552653 and analytical batch 460-552736 recovered outside control limits for the following analytes: 2,4-Dinitrophenol, 2-Nitrophenol and 4,6-Dinitro-2-methylphenol. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: WC-7(0-7') (460-164549-1), WC-8(0-7') (460-164549-2) and WC-1(0-7') (460-164549-3). These results have been reported and qualified.

2,4,6-Tribromophenol (Surr), 2-Fluorobiphenyl and Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria high for 460-164595-E-8-A MS and 460-164595-E-8-B MSD.

3-Nitroaniline failed the recovery criteria low for the MS of sample 460-164595-8 in batch 460-552736. Several analytes failed the recovery criteria high.

For the MSD of sample 460-164595-8 in batch 460-552736, 4-Nitrophenol and N-Nitrosodimethylamine failed the recovery criteria low. Several analytes failed the recovery criteria high. Also, 3-Nitroaniline, 4-Nitrophenol and Di-n-butyl phthalate exceeded the RPD limit.

Several analytes failed the recovery criteria low for the MS of sample WC-5 (0-7)MS (460-164661-3) in batch 460-552682.

Several analytes failed the recovery criteria low for the MSD of sample WC-5 (0-7)MSD (460-164661-3) in batch 460-552682.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

**EXTRACTABLE PETROLEUM HYDROCARBONS (EPH)**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for extractable petroleum hydrocarbons (EPH) in accordance with NJDEP EPH. The samples were prepared and analyzed on 09/14/2018 and 09/17/2018.

Total EPH (C9-C40) failed the recovery criteria high for the MS/MSD of sample 460-164558-4 in batch 460-552324.

Total EPH (C9-C40) failed the recovery criteria high for the MS/MSD of sample 460-164618-1 in batch 460-552895.

Refer to the QC report for details.

No other difficulties were encountered during the NJEPH analysis.

All other quality control parameters were within the acceptance limits.

**TCLP METALS**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for TCLP metals in accordance with 6010D. The samples were leached on 09/14/2018 and 09/15/2018, prepared on 09/16/2018 and 09/18/2018 and analyzed on 09/16/2018 and 09/19/2018.

Nickel was detected in method blank LB 460-552265/1-D at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Arsenic and Nickel were detected in method blank LB 460-552539/1-F at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Cadmium exceeded the RPD limit for the duplicate of sample WC-4 (0-7)DU (460-164661-2).

Refer to the QC report for details.

No other difficulties were encountered during the TCLP metals analysis.

All other quality control parameters were within the acceptance limits.

**METALS**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for Metals in accordance with 6010D. The samples were prepared on 09/15/2018 and 09/19/2018 and analyzed on 09/16/2018, 09/19/2018 and 09/20/2018.

Antimony, Calcium and Magnesium failed the recovery criteria low for the MS of sample WC-8(0-7')MS (460-164549-2) in batch 460-552661. Aluminum, Iron and Manganese failed the recovery criteria high.

Antimony, Arsenic, Iron and Selenium failed the recovery criteria low for the MS of sample 460-164922-4 in batch 460-553733. Aluminum failed the recovery criteria high.

Barium, Calcium and Magnesium exceeded the RPD limit for the duplicate of sample WC-8(0-7')DU (460-164549-2). for the duplicate of sample 460-164922-4.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Refer to the QC report for details.

Samples WC-7(0-7') (460-164549-1)[4X], WC-6 (0-7) (460-164549-1)[4X], WC-8(0-7') (460-164549-2)[4X], WC-4 (0-7) (460-164549-2) [4X], WC-1(0-7') (460-164549-3)[4X], WC-5 (0-7) (460-164549-3)[4X], WC-2(0-7') (460-164549-4)[4X] and WC-3(0-7') (460-164549-5) [4X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the Metals analysis.

All other quality control parameters were within the acceptance limits.

**HEXAVALENT CHROMIUM**

Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were prepared on 09/16/2018 and 09/18/2018 and analyzed on 09/17/2018 and 09/19/2018.

No difficulties were encountered during the hexchrome Cr6 analysis.

All quality control parameters were within the acceptance limits.

**TCLP MERCURY**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 09/14/2018 and 09/15/2018, and prepared and analyzed on 09/17/2018 and 09/18/2018.

No difficulties were encountered during the TCLP Hg analysis.

All quality control parameters were within the acceptance limits.

**TOTAL MERCURY**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared and analyzed on 09/18/2018 and 09/19/2018.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

**IGNITABILITY**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for Ignitability in accordance with EPA SW-846 Method 1030. The samples were analyzed on 09/14/2018 and 09/19/2018.

No difficulties were encountered during the Ignitability analysis.

All quality control parameters were within the acceptance limits.

**TOTAL CYANIDE**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for total cyanide in accordance with EPA SW-846 Method 9012B. The samples were prepared and analyzed on 09/20/2018.

Cyanide, Total failed the recovery criteria high for the MS of sample WC-7(0-7')MS (460-164549-1) in batch 460-553804.

Cyanide, Total failed the recovery criteria high for the MSD of sample WC-7(0-7')MSD (460-164549-1) in batch 460-553804.

Refer to the QC report for details.

No other difficulties were encountered during the cyanide analysis.

All other quality control parameters were within the acceptance limits.

**REACTIVE CYANIDE**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for reactive cyanide in accordance with EPA SW-846 Method 7.3.3/9014. The samples were prepared and analyzed on 09/17/2018 and 09/19/2018.

No difficulties were encountered during the reactive cyanide analysis.

All quality control parameters were within the acceptance limits.

**REACTIVE SULFIDE**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for reactive sulfide in accordance with EPA SW-846 Method 7.3.4/9034. The samples were prepared and analyzed on 09/17/2018 and 09/19/2018.

No difficulties were encountered during the reactive sulfide analysis.

All quality control parameters were within the acceptance limits.

**TOTAL SULFUR**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for total sulfur in accordance with EPA SW-846 Method 9038. The samples were prepared and analyzed on 09/18/2018.

No difficulties were encountered during the sulfur analysis.

All quality control parameters were within the acceptance limits.

**CORROSIVITY (PH)**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for corrosivity (pH) in accordance with EPA SW-846 Method 9045D. The samples were analyzed on 09/15/2018 and 09/17/2018.

No difficulties were encountered during the corrosivity (pH) analysis.

All quality control parameters were within the acceptance limits.

**PAINT FILTER**
Sample WC-7(0-7') (460-164549-1) was analyzed for Paint Filter in accordance with EPA SW-846 Method 9095B. The samples were analyzed on 09/15/2018.

No difficulties were encountered during the Free Liquids analysis.

All quality control parameters were within the acceptance limits.

**PERCENT SOLIDS/PERCENT MOISTURE**
Samples WC-7(0-7') (460-164549-1), WC-6 (0-7) (460-164661-1), WC-8(0-7') (460-164549-2), WC-4 (0-7) (460-164661-2), WC-1(0-7') (460-164549-3), WC-5 (0-7) (460-164661-3), WC-2(0-7') (460-164549-4) and WC-3(0-7') (460-164549-5) were analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 09/17/2018.

No difficulties were encountered during the %solids/moisture analysis.

All quality control parameters were within the acceptance limits.

# DATA REPORTING QUALIFIERS

Client: AKRF Inc Job Number: 460-164549-1

| Lab Section | Qualifier | Description |
|---|---|---|
| GC/MS VOA | | |
| | U | Analyzed for but not detected. |
| | J | Indicates an estimated value. |
| | B | The analyte was found in an associated blank, as well as in the sample. |
| GC/MS Semi VOA | | |
| | U | Analyzed for but not detected. |
| | * | Duplicate RPD exceeds control limits |
| | J | Indicates an estimated value. |
| | * | LCS or LCSD is outside acceptance limits. |
| | * | MS or MSD is outside acceptance limits. |
| | * | Surrogate is outside acceptance limits. |
| | A | The tentatively identified compound is a suspected aldol-condensation product. |
| | N | This flag indicates the presumptive evidence of a compound. |
| GC Semi VOA | | |
| | U | Analyzed for but not detected. |
| | E | Compound concentration exceeds the upper level of the calibration range of the instrument for that specific analysis. |
| | * | Duplicate RPD exceeds control limits |
| | J | Indicates an estimated value. |
| | * | MS or MSD is outside acceptance limits. |
| | * | Surrogate is outside acceptance limits. |
| | p | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported. |

# DATA REPORTING QUALIFIERS

Client: AKRF Inc Job Number: 460-164549-1

| Lab Section | Qualifier | Description |
|---|---|---|
| Metals | | |
| | B | Compound was found in the blank and sample. |
| | * | Duplicate analysis not within control limits. |
| | U | Indicates analyzed for but not detected. |
| | 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| | J | Sample result is greater than the MDL but below the CRDL |
| | N | Spiked sample recovery is not within control limits. |
| General Chemistry | | |
| | HF | Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. |
| | U | Indicates analyzed for but not detected. |
| | J | Sample result is greater than the MDL but below the CRDL |
| | N | Spiked sample recovery is not within control limits. |

NOTE #1 - IN INDICATIONS OF THIS TYPE: 85 OF 23, FIRST DIGIT INDICATES REVISED QUANTITIES OF SHRUBS & SECOND DIGIT INDICATES KEY NO. (See DWG. L-11). LOCATION OF SHRUB BEDS IDENTICAL WITH DWG. L-11.

NOTE #2 - THE ADDITIONS, DELETIONS AND REVISIONS INDICATED HEREIN REPRESENT ALTERATIONS TO THE CONTRACT DOCUMENTS, WHICH DOCUMENTS SHALL GOVERN WITH RESPECT TO ALL OTHER ITEMS OF WORK.

NOTE #3 - TREE PLANTING, SHRUB PLANTING AND ADDITIONAL LAWN (SEE LEGEND), TO BE AS PER PRESENT DWG. Y-12 A. - OTHER LAWN TO BE IN ACCORDANCE WITH DWG. L-11. - ALL OTHER WORK NOT SPECIFICALLY REVISED BY THE PRESENT DWG., TO BE AS PER DWG. Y-12.

NOTE #4 - ALL TREES NOT NEARER THAN 5 FEET FROM WALKS OR CURBS, EXCEPT SOME TREES AT PLAY AREA.

## LEGEND

- ADDITIONAL AREA TO BE BLENDED BY PROVIDING TOP SOIL & DEVELOPING LAWN BEYOND C.L.L.
- PAVED AREA TO BE OMITTED AND SUBSTITUTED BY LAWN
- POST & CHAIN FENCE TO BE RELOCATED
- PROPOSED CONTOUR & PARTIAL REVISION
- PROPOSED CONTOUR, SUPERSEDED
- EXISTING TREE TO BE REMOVED WITH STUMPS CUT AT LEAST 4" BELOW FINAL GRADES
- EXISTING TREE TO REMAIN

# GENERAL NOTES
CELLARS ALL BLDGS.

1 EXTERIOR WALL DIMENSIONS READ TO EXTERIOR FACE OF CONCRETE WALLS, WHICH ARE SET BACK 1" FROM " BRICK " ABOVE, WHERE EXTERIOR WALLS ARE SHOWN AS BRICK. DIMENSIONS READ TO FACE OF BRICK WALLS WHICH ARE ON LINE WITH BRICK WALLS ABOVE.

2 INTERIOR WALLS & PARTITION DIMENSIONS ARE TO FACE OF ROUGH MASONRY & TO ¢ OF PLASTER PARTITIONS.

3 EXTERIOR COLUMN DIMENSIONS ARE FROM FACE CONC. WALLS AT CORNERS TO FIXED FACE OF COLUMNS ON FIRST FLOOR.

4 INTERIOR COLUMN DIMENSIONS ARE FROM OUTSIDE FACE OF MASONRY TO FIXED FACE OF COLUMNS.

5 ALL EXTERIOR WALLS SHALL BE 8" CONC - UNLESS OTHERWISE INDICATED.

6 PARTITIONS SHALL BE 4" HOLLOW CINDER CONC-BLOCK UNLESS OTHERWISE INDICATED. SPACE OVER ROOF OF INCINERATOR CHAMBER SHALL BE ENTIRELY ENCLOSED TO CEILING AND IN LINE WITH ABUTTING PARTITIONS WITH 4" CINDER CONC. BLOCKS, USE 6" 3616 CONC. BLOCKS WHERE FACING ON STAIR OR STAIR PASSAGE AND ENCLOSING ELEV. SHAFT UNLESS OTHERWISE INDICATED.

7 SEE STRUCTURAL DWGS FOR FOOTINGS, PILE CAPS & ALL REINFORCED CONC. WORK. DWG. FS-101 AND FOLLOWING. FLOORS ON EARTH SHALL BE 4" CONC. SLAB UNLESS OTHERWISE NOTED.

8 EXCEPT WHERE OTHERWISE NOTED, TOILET RMS. SLOP SINK CLOS. TO HAVE HYDROLITHIC CEMENT FLOOR & BASE. SHOWERS TO HAVE " " WALLS & FLOORS

9 NON-SLIP SURFACE TO BE PROVIDED FOR ALL EXTERIOR CONC. RAMPS BY A ROUGHENED CONC. SURFACE INCLUDING ENTRANCE RAMPS OUTSIDE OF BLDGS.

10 "B" TYPE WINDOWS AT SHOP ONLY SHALL HAVE WINDOW GUARDS, SEE DWG. A-301

11 EXTERIOR DOORS (U) FROM STAIR PASSAGE T TO SWING OUT & TO BE EQUIPPED WITH PANIC BOLT

12 PIPE SHAFTS TO HAVE 3" SCD. ON FIXTURE SIDE & 2" S.C.D. ON OTHER. 1" CLEAR BETWEEN SPACES WITH SOILS REMAINING SPACED 3" UNLESS OTHERWISE NOTED.

13 INCINERATOR ROOM DUCTS SHALL BE 8-16" 14 USG BIB METAL AT CEILING COVERED WITH NOT-LATH & 1" CEM. PLAS. UNLESS OTHERWISE INDICATED.

PLAN OF CORE
BUILDING 1 ONLY

DETAILS OF PARTITION DIMENSIONING AT COLUMNS
SCALE 3/4" = 1'-0"

NOTE A.
INCREASE PARTITION TO ACCOMODATE FUSE-BOXES AT CEILING

## GENERAL NOTES

1. DIMENSIONS WHERE GIVEN TO C.P. OF BUILDING ARE TO A LINE EXTENDED FROM C.P. PARALLEL TO FACE CONCERNED. ALL DIMENSIONS READ FROM CENTER LINE OF PLASTER PARTITIONS, FACE OF MASONRY AND, WHERE INDICATED, TO AXIS LINES AND CENTER POINT OF BUILDING. AXIS LINES OF BUILDING RADIATE FROM A POINT ON THE PLAN IN THE STAIR AND ARE SET AT EACH 36° OF A FULL CIRCLE. FOR DIMENSIONING OF PARTITIONS AT COLS. SEE DETAIL ON THIS DWG.

2. EXTERIOR WALLS SHALL BE 4" FACING BRICK WITH 6" BACK UP TILE, BONDED TO BRICK. EXTERIOR WALLS SHALL HAVE FREE-STANDING FURRING OF METAL CHANNELS & LATH, WITH FINISHED SURFACE 2" FROM MASONRY.

3. INCINERATOR FLUE TO HAVE 4½" FIRE BRICK LINING UP TO 30 FEET ABOVE THE TOP OF INC. CHAMBER IN CELLAR SEE DWG. #A-302.

4. ALL PARTITIONS SHALL BE 2" SOLID PLASTER WITH METAL CHANNELS AND METAL LATH EXCEPT THOSE ENCLOSING STAIRS PUBLIC HALLS, VENTS & ELEVATOR SHAFTS. PARTITIONS BETWEEN PUBLIC HALL & APARTMENTS SHALL BE 4" CINDER BLOCK & PLASTER BOTH SIDES. HALL & LOBBY ON 1ST FL. SHALL BE UNGLAZED FACING TILE, SCORED FOR PLASTER, WHERE BACKING ON PLASTERED SPACES.

5. FOR OTHER WALLS ENCLOSING PUBLIC HALLS, STAIR HALLS & ELEVATOR SHAFT SEE DRAWINGS A-201 & A-301 & A-302.

6. ALL FREE STANDING PARTITION ENDS IN KITCHENS AND BROOM CLOSETS TO HAVE 2" METAL TRIM EXTENDING FROM FLOOR TO CEILING.

7. LOCATION OF CURTAIN RODS, FOR WHICH ROD BRACKETS ARE TO BE PROVIDED ARE SHOWN THUS ⊐——⊏

8. FLOORS IN PIPE SHAFTS SHALL BE SLABBED IN AT EVERY OTHER FLOOR CONTRACTOR TO CHECK WITH ALL TRADES FOR LOCATIONS OF PIPE SLEEVES, CONDUIT RUNS HANGERS, ANCHORS AND OPENINGS BEFORE POURING CONC.

9. TELEPHONE PIPE SLEEVES TO EXTEND THRU FLOOR SLAB & TO BE 1¼ ø AS DETAILED DWG A-307

10. THE FOLLOWING SPACES SHALL BE PACKED WITH ROCK WOOL.
A- BETWEEN INCINERATOR & FLOOR SLABS
B- BETWEEN INCINERATOR & STAIR PARTITION AT FLOOR.
C- BETWEEN BOILER FLUE & FLOOR SLABS.

11. ALL CLOSETS INDICATED "C" SHALL HAVE ONE 11½" WIDE SHELF WITH CLOTHES POLE UNDER.

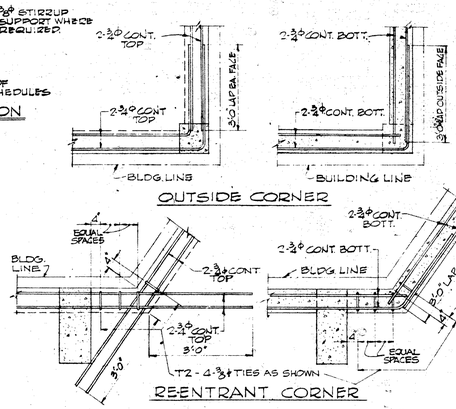
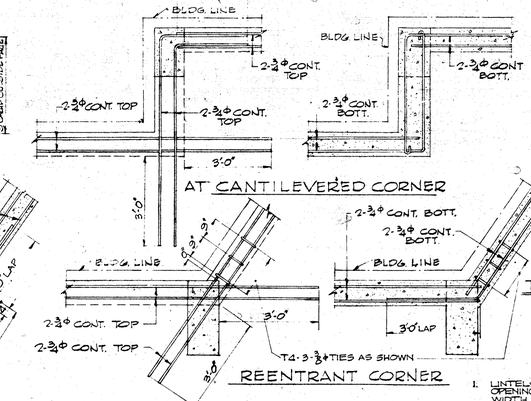
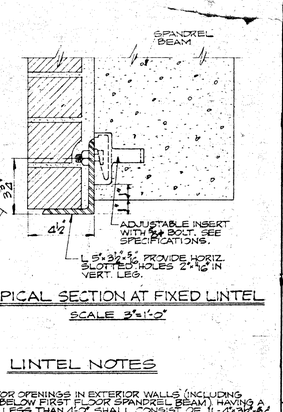
## DETAIL 'Y'





## TYPICAL DETAILS OF PLACING OF SPANDREL REINF'T. AT CORNERS



## TYPICAL SECTION AT FIXED LINTEL

SCALE 3"=1'-0"

### LINTEL NOTES

1. LINTELS FOR OPENINGS IN EXTERIOR WALLS (INCLUDING OPENINGS BELOW FIRST FLOOR SPANDREL BEAM) HAVING A WIDTH OF 6'-0" OR MORE SHALL CONSIST OF L 6" x 3½" x ⅝" (6" LEG x 3½" LOOSE) LENGTH OF LINTELS SHALL BE EQUAL TO WIDTH OF OPENING PLUS 10".
2. LINTELS FOR OPENINGS IN EXTERIOR WALL (INCLUDING OPENINGS BELOW FIRST FLOOR SPANDREL BEAMS) HAVING A WIDTH OF 6'-0" OR MORE SHALL CONSIST OF L 5" x 3½" x ⅝" (5" LEG x 3½") ATTACHED TO CONCRETE MEMBER BEHIND WITH ADJUSTABLE INSERTS. INSERTS SHALL BE SPACED NOT MORE THAN 2'-6" c AND THE DISTANCE FROM THE END OF THE ANGLE TO THE FIRST INSERT SHALL NOT EXCEED 6". LENGTH OF ANGLES SHALL BE EQUAL TO WIDTH OF OPENING MINUS 1". BOLTS FOR INSERTS, SHALL HAVE A DIAMETER OF ⅝". ANGLES SHALL RECEIVE ¾" x 2" HORIZONTALLY SLOTTED HOLES TO ALLOW FOR HORIZONTAL ADJUSTMENT (SEE INSERT DETAIL).

## GENERAL SUPERSTRUCTURE NOTES

1. ALL CONCRETE SHALL BE 3000 LBS. PER SQUARE INCH CONTROLLED CONCRETE AND COMPLY WITH ALL REQUIREMENTS OF AMER. CONC. INST. BLDG. CODE AND THE SPECIFICATIONS. FOR EXCEPTIONS SEE NOTE NO. 13
2. ALL REINFORCING STEEL SHALL BE DEFORMED BARS OF INTERMEDIATE GRADE NEW BILLET STEEL.
3. ALL BEAMS, SPANDREL BEAMS AND SLABS SHALL BE POURED MONOLITHICALLY AND FLOOR SLABS FINISHED AS REQUIRED BY THE SPECIFICATIONS.
4. ALL REINFORCING BARS MARKED CONTINUOUS (CONT) SHALL BE LAPPED 48 x BAR DIAM. AT SPLICES & CORNERS AND HOOKED AT NON-CONTINUOUS ENDS.
5. PROVIDE TEMPERATURE REINFORCEMENT IN THE BOTTOM OF ALL ONE-WAY REINFORCED SLABS AT RIGHT ANGLES TO MAIN REINFORCEMENT:
   ⅜Ø @ 12"c FOR FLOOR SLABS UP TO 5½" THICK.
   ⅜Ø @ 10"c FOR FLOOR SLABS 6" & 6½" THICK.
   ⅜Ø @ 10"c FOR ROOF SLABS UP TO 8½" THICK.
6. ALL REINFORCING SHOWN ON PLANS IS BOTTOM REINFORCING UNLESS OTHERWISE MARKED.
7. ALL SLABS POURED ON GROUND SHALL HAVE A THICKNESS OF 4" UNLESS OTHERWISE CALLED FOR ON PLANS. SLABS ARE UNREINFORCED UNLESS OTHERWISE CALLED FOR ON PLANS OR SPECIFICATIONS.
8. EXTERIOR CONCRETE SLABS POURED ON GROUND SHALL BE REINFORCED WITH WELDED WIRE MESH #10 - 6"/10 - 6" UNLESS OTHERWISE NOTED ON PLANS. WIRE MESH TO BE PLACED ONE INCH BELOW TOP OF SLAB. INTERIOR CONCRETE SLABS POURED ON GROUND SHALL BE UNREINFORCED UNLESS OTHERWISE NOTED ON PLANS.
9. IF CONSTRUCTION JOINTS ARE NECESSARY IN FLOORS THEY SHALL BE LOCATED IN CENTER OF BAY BETWEEN COLUMNS. FOR ADDITIONAL REINFORCEMENT AT CONSTRUCTION JOINTS, SEE DETAIL.
10. CONTRACTOR SHALL INSTALL ANCHOR BOLTS ETC. AS REQUIRED BY OTHER TRADES (SEE SPECIFICATIONS). PIPE SLEEVES TO BE SET BY MECHANICAL CONTRACTORS AND TO BE BUILT IN BY THIS CONTRACTOR
11. CONTRACTOR SHALL VERIFY THE DIMENSIONS AND LOCATION OF ALL SLOTS, SLEEVES ETC. FOR MECHANICAL WORK WITH THE VARIOUS TRADES BEFORE SETTING FORMS.
12. ALL PLUMBING SLOTS SHALL BE FILLED WITH CONCRETE TO THE SAME DEPTH AS FLOOR SLABS AFTER PIPING IS INSTALLED.
13. EXCEPT WHERE OTHERWISE NOTED ALL SLABS POURED ON GROUND SHALL BE 2000 LBS. PER SQUARE INCH CONTROLLED CONCRETE

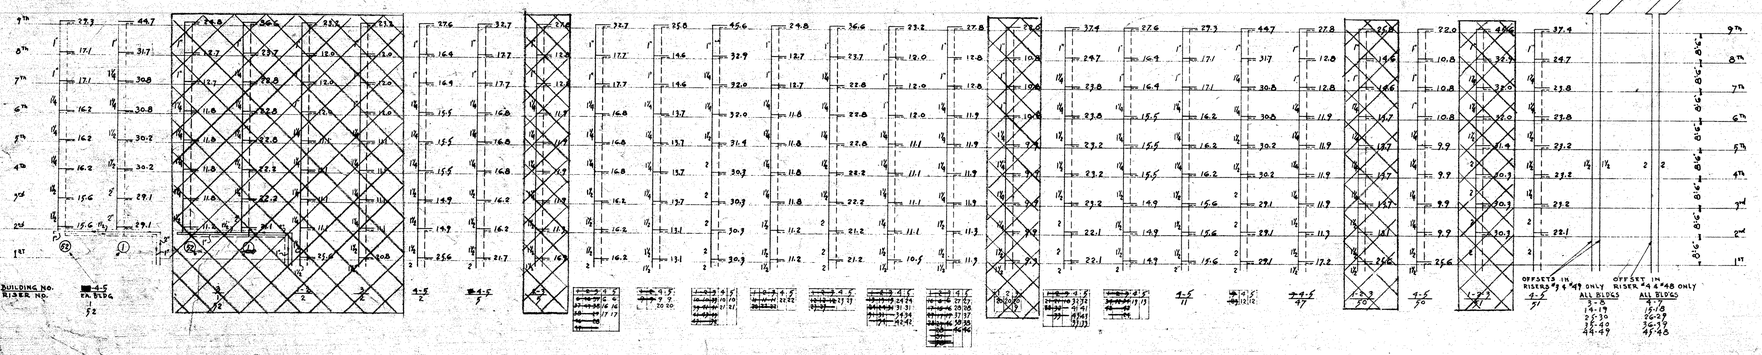
## GENERAL NOTES

INDICATES
- 10# PRESSURE STEAM SUPPLY (H.P.)
- LOW PRESSURE STEAM SUPPLY.
- RETURN.
- PUMP DISCHARGE LINE (P.D.).
- DRIP LINE.
- 10# STEAM DRIP.
- DIRECTION OF FLOW.
- PITCH OF PIPE.
- GATE VALVE.
- GLOBE VALVE.
- HEAT CONTROL VALVE AND STRAINER.
- GATE VALVE, STRAINER AND F&T. TRAP
- THERMOSTATIC TRAP IN PLAN.
- ANCHOR FOR PIPE.
- UNION.
- CHECK VALVE.
- PLUGGED TEE FOR FUTURE RADIATOR. SIZE OF TEE IS SIZE OF MAIN x ¾".
- RADIATOR AND CONNECTIONS.
- DROP OR RISE IN PIPE.
- SUPPLY RISER.
- RETURN RISER.
- UP TO RADIATOR.
- VACUUM PUMP.
- ELEVATION.
- CLEANOUT DOOR.
- CHAIN OPERATED.
- HOT WATER HEATER.
- WORK UNDER OTHER CONTRACT.
- INSERTS.
- EXPANSION JOINT.
- TOP REGISTER.

1.- FOR LOCATION OF RADIATORS AND RISERS NOT SHOWN ON HEATING DRAWINGS, SEE ARCHITECTURAL DRAWINGS.
2.- ALL RADIATORS IN CELLARS SHALL BE "PEERLESS" WALL TYPE, HUNG FROM CEILING.
3.- IN PIPE ACCESS SPACES & TANK ROOMS THE RISER RUNOUTS FROM THE STEAM MAIN TO THE SUPPLY RISERS SHALL BE COVERED.
4.- ALL HEATING PIPES IN CELLARS SHALL CLEAR THE SWING SPACES FOR OPENING OF WINDOWS.
5.- ALL PIPING IN ELECTRIC SERVICE ROOMS SHALL CLEAR ELECTRIC CONDUITS. ECCENTRIC FITTINGS SHALL BE USED IN ALL HORIZONTAL STEAM LINES WHERE CHANGE OF SIZE OCCURS. ALL HEATING PIPES IN OCCUPIED CELLAR SPACES SHALL BE INSTALLED AT SUCH ELEVATIONS AS TO MAINTAIN NOT LESS THAN 7'-0" CLEAR HEADROOM UNDER COVERING OR HANGERS, EXCEPT WHERE NOTED. ELEVATIONS ARE FIGURED TO BOTTOM OF PIPES. THESE ELEVATIONS ARE FOR CONTRACTORS GUIDE ONLY AND DO NOT RELIEVE HIM OF THE 7'-0" HEADROOM REQUIREMENTS. FOR FLOOR ELEVATIONS SEE ARCHITECTURAL DWGS.
6.- LEG RADIATORS AT WINDOWS SHALL BE CENTERED UNDER WINDOWS.
7.- RADIATORS UNDER LIVING ROOM WINDOWS SHALL BE 5 TUBE 28"H WITH 4½" LEGS. ALL OTHERS SHALL BE 5TUBE 25"HIGH..... A TUBE RADIATOR 22" HIGH AND 28" HIGH WITH 4½" LEGS CAN BE SUPPLIED IN PLACE OF 5 TUBE RADIATORS.
8.- ALL CONTROL VALVES SHALL BE PROVIDED WITH A 4" BY-PASS WITH GLOBE VALVE



RISER DIAGRAM (NO SCALE)

ALL RETURN RISERS 3/4"

NOTE:- ANCHORS SHALL BE PROVIDED ON ALL SUPPLY AND RETUEN RISERS AT 5TH FLOOR.
HEATING LOOPS AT TOP FLOOR CEILING SHALL BE 4'0" LONG AND 2'0" WIDE.

**ENVIRONMENTAL FINDINGS RESOLUTION**

Environmental Findings Resolution for the application submitted on behalf of the White Plains Housing Authority regarding the extension of site plan and special permit approvals to permit construction of a new building within the Winbrook Community at 223-225 Rev. Dr. Martin Luther King Jr. Blvd.

*ADOPTED BY THE*

COMMON COUNCIL

of the

CITY OF WHITE PLAINS

1st July 2013

ENVIRONMENTAL FINDINGS RESOLUTION FOR THE APPLICATION SUBMITTED ON BEHALF OF THE WHITE PLAINS HOUSING AUTHORITY REGARDING THE EXTENSION OF SITE PLAN AND SPECIAL PERMIT APPROVALS TO PERMIT CONSTRUCTION A NEW BUILDING WITHIN THE WINBROOK COMMUNITY AT 223- 225 REV. MARTIN L. KING BOULEVARD

WHEREAS, the Common Council on August 6, 2012, completed the environmental review and granted Special Permit and Site Plan approvals ("2012 Approval") on behalf of the White Plains Housing Authority to permit the construction of a new building within the Winbrook Public Housing site ("Winbrook") at 223- 225 Rev. Martin L. King Boulevard; and

WHEREAS, under Section 7.6 of the Zoning Ordinance, Special Permit and Site Plan approvals shall expire if substantial construction has not been completed within one year from the date of issue; and

WHEREAS, the application for a one year extension of the 2012 Approval (hereinafter referred to as the "Proposed Action" or "Project"), has been reviewed for compliance with the New York State Environmental Quality Review (SEQR) regulations; and.

WHEREAS, the The 2012 Approval and the Proposed Action involves development to be know as Winbrook Redevelopment - Phase I, ("Phase I Project") to consist of the following:

1. Construction of a new, free-standing, ten (10) story building with a height of 106 feet, to be located within a designated, approximately 1.7 acre building project site ("Project Site") at the intersection of South Lexington Avenue and Quarropas Street, which Project Site represents a portion of and is contained in the overall 9.71 acre Winbrook Public Housing site which is owned by the White Plains Housing Authority.

2. The proposed mixed use building will contain 103 residential units replacing an equivalent number of existing units at Winbrook for current residents and the Winbrook Community Education Facility to be operated by the City of White Plains Youth Bureau.

3. The proposed mixed use building will also contain 13,500 square feet of community facility space on the first floor to be occupied by the Winbrook Community Education Facility and 266,600 square feet of residential floor area for a total of 280,000 square feet.

4. The construction of 23 additional parking spaces will be provided for the functional operation of the Winbrook Community Education Facility but not required for zoning compliance; and

WHEREAS, the Proposed Action involves the following approval actions:

5. Common Council approval of site plan amendment under Section 7 of the White Plains Zoning Ordinance.

6. Common Council approval of a Special Permit in accordance with Section 5.3,

Schedule of Dimensional Regulations: Non-Residential, footnote (x) of the Zoning Ordinance to allow the building height to exceed 50 feet, up to 100 feet for residential floors above the 50 foot level within the Central Parking Area, and permit construction of a new ten (10) story residential project, situated in the B-3 Zoning District, to be constructed to a height of approximately one hundred and six (106) feet.

7. Common Council approval and designation of the premises as a Development Site so that the dimensional and use regulations under the Zoning Ordinance apply to the whole 9.71 acre Winbrook property whether or not there is divided ownership. Due the nature of the anticipated financing structure for the redevelopment of the Project Site and future phases, the individual sub-parcels will be independently owned.

8. Approval by the Commissioner of Public Works of the Stormwater Pollution Prevention Plan ("SWPPP").

9. Approval by the Commissioner of Public Works of a street opening permit.

10. Approvals by the Westchester County Board of Legislators regarding project funding.

11. Approvals by the NYS Housing Finance Agency regarding project funding.

12. Approvals by the NYS Homes and Community Renewal - NYS Housing Trust Fund Corporation, regarding project funding.

13. Other necessary actions and approvals related to the implementation of the above actions; and

WHEREAS, regarding the 2012 approval, the Common Council determined that the project was consistent with the Comprehensive Plan, conformed to the dimensional regulations, Site Plan and Special Permit standards of the White plains Zoning Ordinance, and determined that the project would not have a significant effect on the environment; and

WHEREAS, since the 2012 Approval, the project has not been changed and there are no other relevant changes in circumstances related to the project.

Based on the above discussion, it is recommended that the Common Council find that:

1. The project continues to be consistent with the Comprehensive Plan and the Zoning Ordinance.

2. The conditions contained in the August 6, 2012 approval should remain in full force and effect.

4. That are no relevant changes in circumstances related to the project that would require an amendment to the 2012 SEQR Findings as amended by the

project extensions.

WHEREAS, the Environmental Officer has recommended that the Common Council (a) reconfirm itself to serve as the Lead Agency for the environmental review; (b) reconfirm that the Proposed Action is an Unlisted Action; (c) determine that the Proposed Action has not changed in any significant way and there are no other relevant changes in circumstances related to the project that would require an amendment to the 2012 Approval; (d) reconfirm the SEQR findings adopted August 6, 2012; and (f) reconfirm that the Proposed Action will not have a significant effect on the environment; now, therefore, be it

RESOLVED, based on the above, that the Common Council hereby reconfirms itself as the Lead Agency for the environmental review of the Proposed Action; and be it further

RESOLVED, based on the above, that the Common Council hereby reconfirms that the Proposed Action is an Unlisted Action for the environmental review; and be it further

RESOLVED, based on the above, that the Common Council hereby determines that the Proposed Action has not changed in any significant way and there are no other relevant changes in circumstances related to the project that would require an amendment to the 2012 Approval; and be it further

RESOLVED, based on the above, that the Common Council hereby reconfirms the SEQR findings adopted August 6, 2012; and and be it further

RESOLVED, based on the above, that the Common Council hereby reconfirms that the Proposed Action will not have a significant effect on the environment; and be it further

RESOLVED, that the Environmental Officer is authorized to distribute the appropriate notice as required by SEQR.

STATE OF NEW YORK }
COUNTY OF WESTCHESTER } ss.:
CITY OF WHITE PLAINS }

I, the undersigned, City Clerk, of the City of White Plains, NY, do hereby certify that I have compared the proceeding with the original resolution adopted by the Common Council of the City of White Plains, NY, by a vote of the majority of the members of the Common Council at a Regular Stated Meeting, held the 6th August 2012, and I do hereby certify the same to be a correct transcript therefrom and of the whole of said original.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the corporate seal of the City of White Plains, NY, this 7th August 2012.

Anne M. McPherson, CMC
City Clerk, City of White Plains, NY

**ENVIRONMENTAL FINDINGS RESOLUTION**

*in relation to*

Environmental Findings Resolution for the application submitted on behalf of the White Plains Housing Authority regarding approval of a site plan amendment and special permit to permit construction of a new building within the Winbrook Community at 223 - 225 Rev. Martin L. King Jr. Boulevard.

**ADOPTED BY THE**

## COMMON COUNCIL

**of the**

**CITY OF WHITE PLAINS**

6th August 2012

ENVIRONMENTAL FINDINGS RESOLUTION FOR THE APPLICATION SUBMITTED ON BEHALF OF THE WHITE PLAINS HOUSING AUTHORITY REGARDING APPROVAL OF A SITE PLAN AMENDMENT AND SPECIAL PERMIT TO PERMIT CONSTRUCTION A NEW BUILDING WITHIN THE WINBROOK COMMUNITY AT 223- 225 REV. MARTIN L. KING BOULEVARD

WHEREAS, the application submitted on behalf of the White Plains Housing Authority regarding approval of a site plan amendment and special permit to permit the construction of a new building within the Winbrook community at 223- 225 Rev. Martin L. King Boulevard (herein after referred to as "Proposed Action" ), has been reviewed for compliance with the New York State Environmental Quality Review (SEQR) regulations; and

WHEREAS, the proposed development to be known as Winbrook Redevelopment - Phase I, consists of the following:

1. Construction of a new, free-standing, ten (10) story building with a height of 106 feet, to be located within a designated, approximately 1.2 acre building project site and 0.9 acre access drive with parking and refuse storage ("Phase I Project Site" or "Project Site") at the intersection of South Lexington Avenue and Quarropas Street, which Project Site represents a portion of and is contained in the overall 9.68 acre Winbrook Public Housing site which is owned by the White Plains Housing Authority.

2. The proposed mixed use building will contain 103 multifamily residential units replacing an equivalent number of existing units at Winbrook for current residents and the Winbrook Community Education Facility to be operated by the City of White Plains Youth Bureau.

3. The proposed mixed use building will also contain approximately 13,500 square feet of community facility space on the first floor to be occupied by the Winbrook Community Education Facility and 266,600 square feet of residential floor area for a total of approximately 280,000 square feet.

4. The construction of 23 additional parking spaces will be provided for the functional operation of the Winbrook Community Education Facility but not required for zoning compliance. They will also serve as drop-off and pick-up for both the Community Education Family and residential units.

WHEREAS, the Proposed Action involves the following approval actions:

1. Common Council approval of a Site Plan amendment under Section 7 of the White Plains Zoning Ordinance.

2. Common Council approval of a Special Permit in accordance with Section 5.3, Schedule of Dimensional Regulations: Non-Residential, footnote (x) of the Zoning Ordinance to allow the building height to exceed 50 feet by up to 100 feet for residential floors above the 50 foot level within the Central Parking Area, and permit construction of a new ten (10) story residential project, situated in the B-3 Zoning District, to be constructed to a height of approximately one hundred and six (106) feet.

3. Common Council approval and designation of the premises as a Development Site so that the dimensional and use regulations under the Zoning Ordinance apply to the whole 9.68 acre Winbrook property whether or not there is divided ownership. Due the nature of the financing structures for the redevelopment of the Project Site and future phases, the individual sub-parcels may need to be independently owned by affiliated entities.

4. Approval by the Commissioner of Public Works of the Stormwater Pollution Prevention Plan ("SWPPP").

5. Approval by the Commissioner of Public Works of a street opening permit.

6. Approvals by the Westchester County Board of Legislators regarding project funding.

7. Approvals by the NYS Housing Finance Agency regarding project funding.

8. Approvals by the NYS Homes and Community Renewal - NYS Housing Trust Fund Corporation, regarding project funding.

9. Other necessary actions and approvals related to the implementation of the above actions.

WHEREAS, the Applicant has submitted the following materials in support of the Proposed Action ("Application Materials") :

1. Site Plan & Special Permit Application packet dated April 2012, including:

   a Letter of application from William Null, Esq. Of Cuddy & Feder dated April 24, 2012.

   b. Figures and drawings:
      1. Site Aerial Photo.
      2. List of Full Size Drawings.
      3. Site Plan Application.
      4. Exterior Material Samples Board.

   c. Expanded Environmental Assessment Form with Supplemental Information.

   d. Appendix - EAF Supplemental Studies.
      1. Zoning Compliance Table.
      2. Utility Summary, dated April 13, 2012.
      3. Phase I and Limited Phase II Environmental Site Assessment Summary, dated April 13, 2012.

| A-6.0 | West and East Elevations | 04/19/12 |

WHEREAS, based on the recommendations of the various City Departments, Boards and agencies, the Environmental Officer recommends that following conditions be included as part of the Proposed Action and are hereby considered to be a part of the Proposed Action for purposes of the environmental review and site plan approval (hereinafter referred to as "Conditions"):

1. To ensure that development of the Winbrook site in this multi-year process remains within the overall established development potential for the overall Winbrook site, the Common Council should determine that the Winbrook site is a "Development Site" as defined in Section 2 of the Zoning Ordinance. By declaring the entire Winbrook site as the Winbrook Development Site, the Phase I Application and future development of the site will remain within the within the dimensional parameters established in the 2009 rezoning.

2. The Housing Authority should submit to the Corporation Counsel of the City of White Plains copies of any and all subdivision plats, deeds, easements or leases of land within the Winbrook Development Site as the same are approved and/or executed by the Housing Authority or its successor or assigns.

3. The Common Council should reaffirm the Comprehensive Plan strategies related to Winbrook, in particular the 2009 strategy regarding the preservation of at 450 units of public housing or publicly assisted housing, based on the Federal regulations governing such housing, on the Winbrook Development Site.

4. The Applicant should revise Plan Sheet SP-3.0 Landscape Plan to show landscaping around the refuse storage area off of the driveway which landscaping should be subject to the approval of the Tree Preservation Committee.

5. The Special Permit/Site Plan Approval should contain a condition that the Applicant meet with the Tree Preservation Committee to develop a site landscaping maintenance plan showing how all existing and proposed plantings and vegetative cover on site will be maintained, including plans for the protection and maintenance of significant trees on the site.

6. The Phase I Application should be made subject to the City's Construction Management Protocol.

7. The Applicant should provide detail sheets on the GARDCO pole and wall mounted fixtures and that these fixtures be subject to the approval of the Design Review Board.

8. The Planning Department recommends that the Applicant amend Plan Sheet SP 1.0 Site Plan to provide a location for bike racks that can serve both the residents of the new building and those persons coming to the Community Education Facility by bike; and

WHEREAS, among the Application Materials submitted as part of the WPHA Application is the Long Form Environmental Assessment Form which identifies at Section B.25 other local, regional and State approvals required as part of the WPHA Application including the White Plains Common Council, White Plains Commissioner of Public Works, Westchester County Board of Legislators and the NYS Housing Finance Agency; and

WHEREAS, since there are other agencies with jurisdiction over such other approvals required for the WPHA Application, the Common Council notified such agencies of its intent to be Lead Agency for such environmental review, and gave such agencies an opportunity to respond as to whether they would seek to be Lead Agency; and

WHEREAS, at its June 11, 2012 meeting, the White Plains Common Council declared its intent to serve as the Lead Agency to conduct a coordinated SEQR environmental review to assess the potential impacts of the Proposed Action, if the Lead Agency status was confirmed; and

WHEREAS, a notice requesting a coordination of the Lead Agency status and a response within a 30 day period was sent to the NY Housing Finance Agency, the NYS Homes and Community Renewal - NYS Housing Trust Fund Corporation, the Westchester County Board of Legislators and the City of White Plains Commissioner of Public Works; and

WHEREAS, the Environmental Officer received correspondence from the NYS Housing Finance Agency, dated June 14, 2012, the NYS Homes and Community Renewal - NYS Housing Trust Fund Corporation, dated June 24, 2012, and the White Plains Commissioner of Public Works, dated June 22, 2012, consenting to the designation of the White Plains Common Council to serve as Lead Agency for the coordinated environmental review of the Proposed Action; and

WHEREAS, the Westchester County Board of Legislators did not submit a response within the 30 day response period; and

WHEREAS, since no other involved agency indicated an intent to serve as Lead Agency within the 30 day response period, the Environmental Officer recommends that the Common Council designate itself Lead Agency for environmental review of the Proposed Action; and

Segmentation

WHEREAS, the White Plains Housing Authority has adopted a long-term objective for phased modernization and redevelopment of the Winbrook community by replacing the existing multi-family residential buildings as part of a long-range concept plan. The Proposed Action represents the first phase of the Housing Authority's phased modernization and redevelopment; and

WHEREAS, since 2009, the Housing Authority has been engaged in securing a development partner for this redevelopment, and seeking to: (a) identify funding sources and refining plans for an initial, free-

standing, Phase I project; and (b) engage the Winbrook residents, Housing Authority Board and City in a community planning process for developing a concept plan for the remainder of the site; and

WHEREAS, the Housing Authority has secured a private sector development partner, the Jonathan Rose Companies; and

WHEREAS, while over the long-term, the entire approximately 9.68 acre Winbrook site will be revitalized with replacement buildings, the design of the other structures, their layout and the layout and types of amenities and resources, such as recreation, open space, services, etc. for the community remains in formation through a the community conceptual planning process; and

WHEREAS, to assist in the review of this Phase I Application and put it in context, the Applicant has submitted as an attachment to the Full Environmental Assessment Form ("EAF"), a Conceptual Development Site Sub-Area Plan showing the entire Winbrook site and tentative locations for future development thereon which concept plan has no definitive status other than to demonstrate that the Winbrook Development Site can be developed within the densities permitted by the zoning adopted in 2009 and include housing and community resources; and

WHEREAS, the Applicant has submitted detailed analyses in the revised Full EAF for the site specific impacts of the Phase 1 Application. This revised EAF includes Phase I specific:

1. Electric, Gas, Water and Sanitary Sewer Demand Summary, dated March 6, 2012, revised March 13, 2012, and April 13, 2012;
2. Phase I and limited Phase II Environmental Site Assessment Report, dated April 13, 2012;
3. Solid Waste Management Plan, undated;
4. Tree Inventory, dated March 2012;
5. Stormwater Management Report; dated April 10, 2012;
6. Traffic Study, dated March 28, 2012 with revisions dated June 26, 2012;
7. Phase 1A Historic Assessment Literature Review and Sensitivity Analysis, dated April 2012; and

WHEREAS, SEQR regulations (6 NYCRR 617.3 (g) (1)) permit the segmented or separate environmental review for each of several related actions, if a determination is made by the Common Council that the independent and separate reviews for each of the individual actions is appropriate and no less protective of the environment; and

WHEREAS, the Environmental Officer that the Common Council find that the segmented review of the Phase I Project separate from Conceptual Development Site Sub-Area Plan of any subsequent, unspecified site plan approval for the future redevelopment of sub-areas or the overall Winbrook site is appropriate and no less protective of the environment for the following reasons:

1. The Comprehensive Plan includes the strategy to "maintain on the Winbrook housing site no less than 450 units of public housing for 450 eligible families; with additional housing units and retail uses to enhance the neighborhood character of Winbrook and the adjacent area."

   The Zoning Ordinance does permit additional development and the flexibility to expand the housing services onsite.

   The White Plains Housing Authority has long recognized the age, condition and anticipated life span of the 450-unit Winbrook Housing facility and has established a long term policy objective to explore and pursue opportunities to meet the community's housing needs by various means including

modernization, construction of replacement buildings, and providing additional housing and community services solutions to provide a wider range of housing resources.

Based on the above, the Housing Authority has proposed a development concept to provide future commercial and retail uses and approximately 574 additional housing units within the Winbrook campus. At this time, there are no specific plans or funds to proceed with the full development concept.

2. The Housing Authority has applied for and received preliminary funding to construct a new Community Education Facility, with $1.5 million committed by the City of White Plains and $3.5 million committed by the U.S. Department of Housing and Community Renewal. Several involved agencies in this environmental review are involved agencies as relates to obtaining financing for the residential component. While known as Winbrook Redevelopment - Phase I, the Housing Authority does not have any specific project or plans to initiate any phase II development at this time.

3. Phase I is a replacement of existing 103 residential units within Winbrook and does not represent any additional units. Once the proposed building is constructed and occupied, 103 units will be vacated, secured and closed down within the Premises so that there will be no net increase in the number of occupied units as a result of the completion of the Proposed Action.

4. The Proposed Action, Phase I Redevelopment does not generate demand for any future action.

5. The Proposed Action, Phase I Redevelopment does not preclude or limit future development permitted by the existing Zoning Ordinance.

6. The Storm water SWPP submitted to and approved by the Commissioner of Public Works addresses Phase I construction only.

7. There will be no additional parking required for the replacement or relocation of housing units within Winbrook.

8. There will be no new points of traffic ingress or egress to other portions of the Winbrook Development Site and therefore no potential changes to traffic patterns beyond those generated by Phase I.

   The project does involve the construction of a new driveway to access the a new parking area which will provide 23 new parking spaces accessory to the Winbrook Community Education Facility. This new driveway will connect to Fisher Court street right-of-way. The level of traffic service for Fisher Court will continue at Level A.

9. There is no funding or other resources at this time to undertake any construction of any additional mixed use or residential unit replacement, or construction of additional units above the existing 450 units above that proposed in the Phase I Application.

10. The are no plans to review for the development concept.

11. While over the long-term, the entire Winbrook campus ultimately is planned to be revitalized with replacement buildings, facilities and amenities, the design of the other structures and the layout for the community remains as a policy objective only and will be formulated through a community conceptual planning process

12. Any future phases of the Winbrook modernization or redevelopment will require a full SEQR review.

13. The site plan/special permit approval for Phase I does not represent or include approval for any other than the 103 units and the education center; and

WHEREAS, the Environmental Officer has recommended that the Common Council (a) designate itself to serve as the Lead Agency for the environmental review; (b) find that the Proposed Action should be considered an Unlisted Action for the environmental review; ( c) find that segmented review of the Phase I Project separate from Conceptual Development Site Sub-Area Plan and any subsequent, unspecified site plan approval for the future redevelopment of sub-areas or the overall Winbrook site is appropriate and no less protective of the environment; and (d) find that the Proposed Action will not have a significant effect on the environment; and

WHEREAS, the Common Council has considered the application, supporting materials, and reports from the various City departments, boards or commissions and involved agencies, and public comments which, when considered together, constitute the Environmental Review Record which serves as a basis for the SEQR determination; now, therefore, be it

RESOLVED, based on the above, that the Common Council hereby designates itself as the Lead Agency for the environmental review of the Proposed Action; and be it further

RESOLVED, based on the above, that the Common Council hereby finds that the Proposed Action is an Unlisted Action for the environmental review; and be it further

RESOLVED, based on the above, that the Common Council hereby finds that the segmented review of the Phase I Project separate from a conceptual development plan and any subsequent, unspecified site plan approval for the future redevelopment of sub-areas or the overall Winbrook site is appropriate and no less protective of the environment; and be it further

RESOLVED, based on the above, that the Common Council hereby finds that the Proposed Action will not have a significant adverse effect on the environment; for the following reasons:

(a) The Proposed Action is consistent with the 1977 White Plains Comprehensive Plan and 2006 Amendments, as further amended in 2009, and the Zoning Ordinance.

On July 6, 2009, the Common Council adopted amendments to the Comprehensive Plan and the Zoning Ordinance which anticipated the modernization and redevelopment of the Winbrook community including the Proposed Action now under consideration as follows:

* Amendments to the City of White Plains 1997 Comprehensive Plan, as amended by the 2006 Plan Update, to (1) extend the Comprehensive Plan Core Area to include properties located on the westerly side of South Lexington Avenue from Fisher Lane to Denison Street, and (2) amend a strategy providing for 450 units of public housing at the Winbrook Public Housing Property to permit additional units of housing to be located on the property while maintaining a minimum of 450 public housing units for eligible residents.

* Amendments to the White Plains Zoning Ordinance Zoning Map to (1) change the Zoning Map designation for a portion of the Winbrook Public Housing Property

fronting on South Lexington Avenue from RM-0.35 to B-3 and (2) to extend the Central Parking Area to include the Winbrook Public Housing Property and the properties located on the westerly side of South Lexington Avenue from Fisher Lane to Denison Street.

The 1997 Comprehensive Plan, as amended in 2006 and most recently on July 6, 2009, includes the following strategies that directly reference the importance of (1) maintaining 450 units of public housing on the site, (2) avoiding displacement of existing public housing residents, and (3) providing retail and service uses appropriate to the needs of Winbrook and surrounding community:

- Maintain on the Winbrook housing site no less than 450 units of public housing for 450 eligible families; with additional housing units and retail uses to enhance the neighborhood character of Winbrook and the adjacent area. The City is committed to preserving 450 public housing units at Winbrook. No off-site displacement of Winbrook public housing residents shall take place as a result of redevelopment or additional development on the Winbrook Public Housing site, and any relocation from any one unit to another unit on the Winbrook Public Housing site shall be subject to all rules and regulations applicable to the White Plains Housing Authority.

- Maintain the Winbrook housing complex as a public housing development for 450 families. The City is committed to preserving Winbrook as public housing. No displacement shall take place through development.

- Maintain and enhance the community facilities and services, including the Slater Center and the reconstructed Strateman Park, which serve the Winbrook community. Winbrook functions as a residential neighborhood, and needs the support services and facilities of a neighborhood.

- The stores closest to the Winbrook public housing complex are an important neighborhood focus, but do not provide the full range of products and services which are needed by local residents. Revitalization of the area needs to address developing a mix of retail uses that better serve the Winbrook neighborhood and the White Plains Hospital Center. A number of the businesses along Post Road cater to the City's growing Hispanic population. The area generally requires physical improvements both to the buildings and the public infrastructure.

- Encourage upgrading of retail uses in the small retail strip along South Lexington with uses that better serve the Winbrook and Fisher Hill neighborhoods.

- Encourage redevelopment of the northwest corner of Post Road and South Lexington Avenue and adjacent properties with land uses that relate to the surrounding residential neighborhoods, including Winbrook and Fisher Hill, as well as to the hospital. This block should not be redeveloped with exclusively hospital-related uses. Ground-floor retail with medically-related uses above should be considered.

The Proposed Action is consistent with and aids in the implementation of the objectives and strategies of the 1997 Comprehensive Plan as amended by the 2006 Plan Updates and the 2009

further amendments with respect to the Winbrook Public Housing property and surrounding properties described in the Comprehensive Plan as a "Core Area Neighborhood."

Potential Development Permitted by the Zoning Ordinance with the Overall Winbrook Site.

As part of the July 6, 2009 rezoning analysis, the Planning Department conducted a zoning density analysis of the total 11.71 acre area which was the subject of one or both of the proposed Zoning Map amendments, including the Winbrook site and the western side of S. Lexington Avenue from Fisher Avenue to Denison Street. The following tables summarize the maximum build out permitted under the prior RM-0.35 District and remapped B-3 District densities. These tables have been updated to reflect more accurate acreage for the Winbrook site and therefore slight modifications in the number of units permitted (+/- 4 to 5 units).

As the tables demonstrate, there is only a slight increase in residential development potential created under the proposed new zoning for the entire 11.71 acre area affected by the rezoning, and a much more significant decrease in permitted non-residential development potential of 266,880 square feet in that area.

As indicated by the **Total Build Out Comparison** table, there was substantial development potential on the Public Housing Authority's 9.68 acre Winbrook site under the RM-0.35 District permitted density, and the Zoning Map change for a portion of the Winbrook site to B-3 actually reduced residential development potential by 79 units and reduced commercial development potential by 266,880 square feet. On the western side of S. Lexington Avenue the only increase was in permitted residential density (+101 units).

## DEVELOPMENT POTENTIAL COMPARISON
## PREVIOUS AN REVISED ZONING

| USE | AREA | ZONE | DENSITY | |
|---|---|---|---|---|
| ***PREVIOUS ZONING*** | | | | |
| *WINBROOK* (RM-0.35) | | 9.68 acres | | |
| Residential | | 350 sf/DU | 1,204 DU | |
| Non-residential | | FAR = 3.2 | 1,353,497 sf | |
| *WEST SIDE S. LEX.* | | 2.03 acres | | |
| Residential | | 800sf/DU | 110 DU | |
| Non-residential | | FAR = 2.0 | 177,242 sf | |
| **BUILD OUT: PREVIOUS ZONING** | **11.71 acres** | **RESIDENTIAL** | **1,314 DU** | |
| | | **NON-RES.** | **1,530,739 sf** | |
| ***ZONING CHANGE*** | | | | |
| *WINBROOK* | | 9.68 acres | | |
| Along S. Lexington (B-3) | | | | |
| Residential | | 5.1 acres | 400sf/DU | 555 DU |
| Non-residential | | | FAR = 2.0(1) | 444,800 sf |
| Balance of Site (RM-0.35) Residential | | 4.58 acres | 350sf/DU | 570 DU(2) |
| Non-residential | | | FAR = 3.2 | 641,817 sf |

| | | | | |
|---|---|---|---|---|
| *WEST SIDE S. LEX.* | | 2.03 acres | | |
| | Residential | | 400sf/DU | 221 DU |
| | Non-residential | | FAR = 2.0(1) | 177,242 sf |
| **BUILD OUT: WITH REZONING** | | **11.71** | **RESIDENTIAL** | **1346 DU** |
| | | | **NON-RES.** | **1,263,859 sf** |

(1) may be increased to 2.5 in CPA with special permit from Common Council
(2) may be increased to 325 sf/dwelling unit in CPA with special permit from Common Council which would result in maximum of 1167 to 1169 units depending on final survey of area.

**TOTAL BUILD OUT COMPARISON (3)**

| | Winbrook | | Net Change | West Side of S. Lexington Ave. | | Net Change |
|---|---|---|---|---|---|---|
| | Before | After | | Before | After | |
| **Residential** | **1,204 DU** | **1125 DU (4)** | **-6.3%** | **110 DU** | **221 DU** | **+100%** |
| **Non-Res.** | **1,353,497 sf** | **1,086,617 sf** | **-19.8%%** | **177,242 sf** | **177,242 sf** | **+ 0%** |

| **Total Change** | | |
|---|---|---|
| **Residential** | **+32 units** | **+ 2.5%** |
| **Non-res.** | **-266,880 sf** | **- 17.5%** |

(3) The exact number of units is subject to final survey of area.
(4) This is based on 350 sf/unit in RM-0.35 portion of site. This increases to 1167 to 1169 if lot area per dwelling unit is 325 sf/unit subject to footnote (f) of Zoning Ordinance Section 5.3 Schedule of Dimensional Standards: Residential which requires a special permit from the Common Council.

Conformance pf the Phase I Project to the Zoning Ordinance Regulations

The Proposed Action involves the first phase of redevelopment on the Winbrook Public Housing site. It involves the construction within the B-3 District portion of the site, at the corner of S. Lexington Avenue and Quarropas Street, of a 106 foot high, 103 new units of housing and a 13,500 sf Community Education Facility to be operated and managed by the City, with access to the new building solely from Quarropas Street. No units are proposed to be demolished in Phase I. Occupancy of the new units will come from the relocation of tenants from other units on site, thereby maintaining the number of units on the Winbrook site at 450 units (together "Phase I Application or Application").

No new designated residential parking is being provided on the Phase I site. Since the 103 resident households who will occupy the new building are being relocated from existing units on the Winbrook site and 103 units are being held vacant on the overall site, there will be no changes to the number of residential parking provided on the overall Winbrook site. Again, it should be noted that there is no special permit use being constructed, the residential use is a principal permitted use and the Community Education Facility is a use of the City of White Plains. There are 23 new parking spaces being provided adjacent to the new building for the Community Education Facility, including 2 van spaces and 2 handicapped accessible spaces. These spaces can also be used for pick-up/drop-off for both the new residential units and the Community Education Facilility. There are no parking lots being constructed.

Based on the above, the Phase I Project is in conformance with the Zoning Ordinance Regulaltions.

(b) The Proposed Action should not cause a substantial adverse change in existing air quality, ground or surface water quality, traffic or noise levels, solid waste production levels or potential for erosion, flooding, leaching or drainage problems.

The stormwater management design of the redeveloped facility adheres to the requirements of the New York State Department of Environmental Conservation's (NYSDEC) New York State Stormwater Management Design Manual (NYSSMDM), dated August 2010.

The Applicant has prepared and the Commissioner of Public Works has approved a detailed Stormwater Pollution Prevention Plan (SWPPP) regarding the requirements included in the New York State Department of Environmental Conservation (NYSDEC) SPDES General Permit GP-0-10-001.

The Phase I Application includes a number of sustainable stormwater systems including a green roof on the building, permeable pavers and stormwater planters.

Through the use of proposed site planning methods and planned green infrastructure techniques at the Phase I Project, the proposed peak rates of stormwater runoff are estimated to be at or below existing conditions for each 24-hour storm event up to and including the 100-year storm event.

Access to the new building will be from an approximately 250 foot drive off of Fisher Court located in the right-of-way of the former Brookfield Street. This is not a through street. Since the number of occupied units on the Winbrook site will remain at 450 units, with the construction of the 103 new units and the vacating of 103 other units on site, the ratio of parking to units on the overall site will not change. There are currently 178 parking spaces serving the 450 units. An additional 23 spaces will be created along the access drive at the new building, including 2 handicapped and 2 van spaces. These spaces will serve the Community Education Center and drop off/pick up and delivery for the new building.

The Applicant has undertaken a Traffic Study with revisions through June 26, 2012, for the proposed residential building and Community Education Facility to assess the effect of the Phase I project on the existing street system. This analysis demonstrates that the level of service at the new intersection of the proposed site driveway and Fisher Court will be level of service A and the level of service at the existing intersection of Fisher Court and Quarropas Street will continue to be level of service A. The level of service at the intersection of MLK Blvd. and Fisher Court will remain level of service B. The traffic traveling two and from the Community Education Center will primarily be off-peak traffic. The traffic generated by the residents will come to and from the existing parking lot and will not increase the numbers at those locations.

The site does not exist in a natural state. There are no wetlands, unique wildlife habitats, or historic "structures" on the site.

The Phase I Project will be subject to the City' Construction Management Protocol which requires measures to avoid construction related impacts. This includes erosion control, traffic management noise and air pollution controls, etc.

( c) No large quantities of vegetation or fauna will be removed by the Proposed Action. No endangered species of plant or animal should be adversely affected by the Proposed Action. No other significant adverse impacts to natural resources will result from the Proposed Action.

The site of the proposed building is located within an area landscaped with trees and grass lawn. The condition of the existing trees on the Phase I Project Site, and a delineation of which ones will be preserved or removed are shown on Plan Sheet SP-3.0 and the accompanying Tree Inventory with conditions assessments contained in the EAF Appendices.

In all, approximately 8 significant trees will be preserved in the lawn area along Quorropus Street and Soputh Lexington Avenue. These trees will serve to maintain the character of the street scape in the neighborhood. In addition, the proposed landscaping plan includes an additional 12 trees to be planted on site.

(d) The character or quality of important historical, archeological, architectural or aesthetic resources of the City or any neighborhood will not be adversely affected by the Proposed Action.

The Proposed Action conforms to the building bulk, height, setback and number of dwelling units permitted in the B-3 Zoning District. This does involve the Common Council's approval of a Special Permit to allow the building height to exceed 50 feet, by up to 100 feet for residential floors above the 50 foot level within the Central Parking Area. The proposed building is ten stories and approximately 106 feet in height.

There are other buildings within the nearby area are of similar height or scale. The five Winbrook residential buildings are nine stores ane approximately 75 feet in height. To the north, the Westchester County Courthouse is 20 stories and 242 feet in height. To the south, buildings at the White Plans Hospital Center range up to 7 stories and approximately 80 feet in height. Lexington Hill (formerly Grant Manor) at 236 South Lexington Avenue is twelve stories and approximately 110 feet in height.

The quality of building and overall site design willserve to enhance and improve the character and property values of the adjacent neighborhood. The current 103 households now residing in units in the existing buildings at Winbrook which were constructed in the late 1940's will have the opportunity to move into the new building and enjoy modern, enhanced facilities

The building's placement would not obstruct any significant scenic views or view corridors and would provide an attractive visual statement for people headed south on South Lexington Avenue from downtown and the railroad station area. This latter effect would be an initial step in revitalizing the South Lexington Avenue corridor and making it an attractive front door for the Winbrook community.

A Phase IA Historic Assessment Literature Review for the Winbrook campus was performed by CITY/SCAPE Cultural Resource Consultants. The report considered both potential historic and prehistoric resources that might potentially be impacted by the proposed redevelopment of Winbrook, including architectural evaluations of the existing Winbrook buildings. The report concluded that "the Winbrook campus lacks the potential to contain either prehistoric or historic cultural resources," and recommended that "no further investigation is warranted and that the project be allowed to proceed."

The construction of the proposed 106 foot building will not hinder future development on the site, nor does it necessitate such development. It is consistent with the long range objectives of the Applicant to revitalize the entire Winbrook site with new mixed income, and in some cases mixed use buildings.

There are two major recreation areas and additional grassed areas at the Winbrook site. The former Strateman Park was demapped by the Common Council at its meeting of December 7, 1981 and a request was sent to the NY State Legislature to introduce a bill to demap the Strateman Park as parkland and permit it to be conveyed to the Housing Authority. The NYS Legislature authorized this action in Chapter 767 of the Laws of the State of New York of 1982. On October 4, 1982, the Common Council adopted an ordinance amending the Official Map of the City of White Plains to remove the parklands known as Strateman Park from the Official Map and convey the property to the White Plains Housing Authority. There are now two recreation areas located on the site which have been named after former Winbrook residents. The Applicant has stated its intent to preserve areas dedicated to these former residents, although the location of these areas may be moved within the site to accommodate the

redevelopment. The future development of the overall Winbrook Development Site will address the open space and recreational uses as a design component of future site plan approvals.

(e) No major change in type or quantity of energy used will result from the Proposed Action.

The Proposed Action does not represent a significant increase in density of permitted residential or commercial land uses permitted by the Zoning Ordinance.

The type and quantity of energy demand for any development permitted by the Zoning Ordinance or the proposed amendments in the subject area will not be significant in the context of the City of White Plains as a regional employment, retail, office and governmental center. The existing providers of utility services have the capacity to support development permitted by the Zoning Ordinance or the proposed amendments.

(f) No hazard to health or human safety will be created.

There is no reason to expect any hazard to human health or safety resulting from this Proposed Action. All development is subject to the appropriate municipal safety codes and approved by the Departments of Building, Public Safety, Public Works and Traffic.

(g) The Proposed Action will not create a substantial change in the use, or intensity of use, of land or other natural resources or the area's capacity to support existing uses. It will not attract a significantly large number of people to the place, neighborhood or community.

Since the 103 resident households who will occupy the new building are being relocated from existing units on the Winbrook site and 103 units are being held vacant on the overall site, there will be no changes to the number of residential parking provided on the overall Winbrook site.

(h) The Proposed Action will not result in the creation of a material demand for other actions which would result in one of the above consequences.

(I) The Proposed Action will not result in changes in two or more elements of the environment, no one of which has a significant effect on the environment, but which when taken together, result in a substantial adverse impact on the environment.

(j) The Proposed Action does not represent a change in two or more related actions that, when considered cumulatively, would result in substantial environmental impacts.

(k) No significant impacts have been identified as a result of the Proposed Action when assessed in connection to its setting, duration, geography scope, magnitude and number of people affected; and be it further

RESOLVED, that the Environmental Officer is authorized to distribute the appropriate notice as required by SEQR.

STATE OF NEW YORK }
COUNTY OF WESTCHESTER } ss.:
CITY OF WHITE PLAINS }

I, the undersigned, City Clerk, of the City of White Plains, NY, do hereby certify that I have compared the proceeding with the original Resolution, adopted by the Common Council of the City of White Plains, NY, by the affirmative vote of a majority of the members of the Common Council at a Regular Stated Meeting, held the 6th July 2009and I do hereby certify the same to be a correct transcript therefrom and of the whole of said original.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the corporate seal of the City of White Plains, NY, this 6th July 2009.

Anne M. McPherson, RMC, CMC
City Clerk, City of White Plains, NY

**RESOLUTION**

*in relation to*

Environmental findings resolution regarding amendments to the Comprehensive Plan and zoning Ordinance on behalf of the White Plains Housing Authority.

*ADOPTED BY THE*

COMMON COUNCIL
of the
CITY OF WHITE PLAINS

6th July 2009

ENVIRONMENTAL FINDINGS RESOLUTION REGARDING
AMENDMENTS TO THE COMPREHENSIVE PLAN AND ZONING ORDINANCE ON BEHALF OF THE WHITE PLAINS HOUSING AUTHORITY

WHEREAS, the application submitted on behalf of the White Plains Housing Authority regarding amendments to the White Plains Comprehensive Plan and Zoning Ordinance (herein after referred to as "Proposed Action" ), has been reviewed for compliance with the New York State Environmental Quality Review (SEQR) regulations; and

WHEREAS, the Proposed Action involves the following approval actions:

(A) Amendments to the Comprehensive Plan to:

(1) extend the Comprehensive Plan Core Area to include properties located on the westerly side of South Lexington Avenue from Fisher Avenue to Denison Street, and

(2) amend the strategy providing for 450 units of public housing at the Winbrook Public Housing Property to permit additional units of housing to be located on the property while maintaining a minimum of 450 public housing units for eligible residents as follows:

"Maintain on the Winbrook housing site ~~complex as a~~ no less than 450 units of public housing ~~development~~ for 450 eligible families~~,~~ with additional housing units and retail uses to enhance the neighborhood character of Winbrook and the adjacent area. The City is committed to preserving 450 public housing units at Winbrook ~~as public housing~~. No off-site displacement of Winbrook public housing residents shall take place ~~through~~ as a result of redevelopment or additional development on the Winbrook Public Housing site, and any relocation from any one unit to another unit on the Winbrook Public Housing site shall be subject to all rules and regulations applicable to the White Plains Housing Authority."

(B) Amendments to the White Plains Zoning Ordinance Zoning Map to:

(1) change the Zoning Map designation for a portion of the Winbrook Public Housing Property fronting on South Lexington Avenue from RM-0.35 to B-3 and

(2) to extend the Central Parking Area ("CPA") to include the Winbrook Public Housing Property and the properties located on the westerly side of South Lexington Avenue from Fisher Avenue to Denison Street; and

WHEREAS, under the New York State Environmental Quality Review (SEQR) regulations (6 NYCRR 617), the Common Council is required to incorporate environmental considerations in approval actions by (a) identifying environmental issues; (b) taking a "hard look" at relevant environmental concerns; and ( c) making a "reasoned elaboration" as a basis for an environmental determination; and

SEQR Unlisted Action

WHEREAS, the components of the Proposed Action individually, or taken together do not qualify as a Type I Action and should be considered an Unlisted Action for the following reasons:

15

1. The proposed Zoning Amendment does not meet the criteria to qualify as a Type I Action in that it does not represent the (a) the adoption of a municipality's land use plan, or the initial adoption of a municipality's comprehensive zoning regulations; (b) adoption of changes in the allowable uses within any zoning district, affecting 25 or more acres of the district; or ( c) the construction of new residential units in a city having a population of greater than 150,000, 250 units to be connected to existing public water and sewerage systems.

2. The proposed Zoning Amendment does not represent a significant increase in permitted levels of residential or non-residential development. With only a slight increase in residential development potential and a significant decrease in non-residential development potential over the entire affected area of 11.71 acres, the proposed rezoning does not reach any of the thresholds for a Type I Action under SEQR requirements.

3. The zoning use changes do not trigger the 25 acre affected area threshold for a Type I Action under SEQR as they affect only 5.1 acres for use changes in a B-3 zoning district or 11.71 acres for the extension of the CPA.

4. The proposed Comprehensive Plan amendment also does not trigger any Type I thresholds, as the amendment is not a substantial amendment to the Comprehensive Plan, but a modification which clarifies the intent of the City to protect the current public housing residents of Winbrook during any redevelopment of the property and ensure their continued residency on the Winbrook site; and.

Combined Actions

WHEREAS, SEQR regulations permit the combined environmental review of separate but related actions which, when considered cumulatively, may achieve the thresholds listed in the criteria for determining significance; and

WHEREAS, the Environmental Officer has recommended that the Comprehensive Plan Amendment and the Zoning Amendment should be reviewed together as a Combined Action for the following reasons:

1. Under General Municipal Law, the land use recommendations of the Comprehensive Plan serve as the basis for assigning the land use regulations incorporated within the Zoning Ordinance.

3. The Plan Amendment and the Zoning Amendment are being considered concurrently by the Common Council.

4. The Zoning Ordinance provides that the Zoning regulations should be consistent with the City's Comprehensive Plan.

5. These amendments to the Comprehensive Plan and Zoning Ordinance do not represent a significant increase in the permitted density or level of development.

6. Neither the amendments to the Comprehensive Plan nor the Zoning Ordinance represent an approval of any specific development improvements or site plan approval; and

Segmentation

WHEREAS, SEQR regulations permit the segmented environmental review of separate, but related approval actions if a determination is made by the Common Council that such a review is appropriate and no less protective of the environment: and

WHEREAS, the White Plains Housing Authority will soon be submitting a funding application under the 2009 Federal Stimulus program for the Winbrook Revitalization program which will involve replacement of older buildings with newer mixed use residential and commercial buildings; and

WHEREAS, the Environmental Officer has recommended that the segmented review of the Combined Comprehensive Plan and Zoning Ordinance Amendments separate from any subsequent site plan approval is appropriate and no less protective of the environment for the following reasons:

1. The Combined Comprehensive plan and Zoning Ordinance Amendments are applicable to numerous properties along South Lexington Avenue. The extension of the Zoning Ordinance Central Parking Area will apply to the Winbrook site but also approximately ten other properties comprising 2 aces of area on the western side of South Lexington Avenue, outside the Winbrook Housing site.

2. The Comprehensive plan and Zoning Ordinance amendments together are separate and independent actions which must first be completed prior to any consideration by City Agencies of a site plan regarding the Winbrook Housing site.

3. Any application for site plan approval that involves Winbrook Housing site will receive a full environmental review in conformance with SEQR regulations.

4. Any application for site plan approvals that involve properties on the western side of South Lexington Avenue, outside the Winbrook Housing site will similarly receive a full environmental review in conformance with SEQR regulations.

5. The specific land use components for a site plan approval have not yet been determined and are, in fact, dependent on the initial approval of the Combined Comprehensive Plan and Zoning Ordinance Amendments; and

SEQR Findings.

WHEREAS, the Environmental Officer has recommended that the Common Council (a) designate itself to serve as the Lead Agency for the environmental review; (b) find that the Comprehensive Plan Amendment and the Zoning Amendments considered individually, or taken together do not qualify as a Type I Action and should be considered an Unlisted Action for the environmental review; ( c) find that the Comprehensive Plan Amendment and the Zoning Amendment should be reviewed together as a Combined Action; (d) find that the segmented review of the Combined Comprehensive plan and Zoning Ordinance Amendments separate from the future site plan approval is appropriate and no less protective of the environment; and (d) find that the Proposed Action will not have a significant effect on the environment; and

WHEREAS, the Common Council has considered the application, supporting materials, and reports

from the various City departments, boards or commissions and involved agencies, and public comments which, when considered together, constitute the Environmental Review Record which serves as a basis for the SEQR determination; now, therefore, be it

RESOLVED, based on the foregoing reasons, that the Common Council hereby (a) designates itself to serve as the Lead Agency for the environmental review; (b) finds that the Comprehensive Plan Amendment and the Zoning Amendments considered individually, or taken together do not qualify as a Type I Action and should be considered an Unlisted Action for the environmental review; ( c) finds that the Comprehensive Plan Amendment and the Zoning Amendment should be reviewed together as a Combined Action; (d) finds that the segmented review of the Combined Comprehensive plan and Zoning Ordinance Amendments separate from any future site plan approval is appropriate and no less protective of the environment; and be it further

RESOLVED that the Common Council has examined the potential environmental effects of the Proposed Action and makes the following environmental findings:

(a) The Proposed Action is consistent with the White Plains Comprehensive Plan and Zoning Ordinance.

The Comprehensive Plan 1997 strategies and 2006 updates directly reference the importance of (1) maintaining 450 units of public housing on the site, (2) avoiding displacement of existing public housing residents, and (3) providing retail and service uses appropriate to the needs of Winbrook and surrounding community:

- Maintain the Winbrook housing complex as a public housing development for 450 families. The City is committed to preserving Winbrook as public housing. No displacement shall take place through development.

- Maintain and enhance the community facilities and services, including the Slater Center and the reconstructed Strateman Park, which serve the Winbrook community. Winbrook functions as a residential neighborhood, and needs the support services and facilities of a neighborhood.

- The stores closest to the Winbrook public housing complex are an important neighborhood focus, but do not provide the full range of products and services which are needed by local residents. Revitalization of the area needs to address developing a mix of retail uses that better serve the Winbrook neighborhood and the White Plains Hospital Center. A number of the businesses along Post Road cater to the City's growing Hispanic population. The area generally requires physical improvements both to the buildings and the public infrastructure.

- Encourage upgrading of retail uses in the small retail strip along South Lexington with uses that better serve the Winbrook and Fisher Hill neighborhoods.

- Encourage redevelopment of the northwest corner of Post Road and South Lexington Avenue and adjacent properties with land uses that relate to the surrounding residential neighborhoods, including Winbrook and Fisher Hill, as well as to the hospital. This block should not be redeveloped with exclusively hospital-related uses. Ground-floor retail with medically-related uses above should be considered.

The Proposed Action is substantially consistent with and aids in the implementation of the objectives and strategies of the Comprehensive Plan with respect to the Winbrook Public Housing property and surrounding properties described in the Comprehensive Plan as a "Core Area Neighborhood," for the following reasons:

a. According to the Comprehensive Plan, Winbrook is located in the Core Area which encompasses a complimentary mix of land uses that provide support services and employment opportunities. The Core Area has excellent transportation services with access to the Metro-North Railroad Station and numerous local and regional bus routes which run along Main Street, Mamaroneck Avenue, Bank Street, Water Street, and Martine Avenue. Therefore it is appropriate that it be located within the CPA.

b. The Comprehensive Plan supports S. Lexington Avenue being developed with retail uses consistent with the needs of the Winbrook community and adjacent area.

c. The remapping of the portion of the Winbrook property fronting on S. Lexington from RM-0.35 to B-3 district enables retail and services uses to be developed at the ground level on the Winbrook side of S. Lexington and across the street on the western side that can serve the needs of Winbrook residents and the surrounding community, which is not the case with the current uses.

d. Moving the CPA line to include Winbrook enables additional residential height (25 more feet than the RM-0.35 district) but reduces the residential density from 350 square feet of lot area to 400 square feet of lot area per dwelling unit. This enables the 450 unit count currently at Winbrook to be maintained while additional units are added to create a more diverse income range for residents.

e. Although the western side of S. Lexington is not shown in the Comprehensive Plan as located within the Core Area, the Plan clearly identifies Winbrook as a Core Area Neighborhood and states explicitly in the strategies that "Winbrook functions as a residential neighborhood, and needs the support services and facilities of a neighborhood." The strategies further state "The stores closest to the Winbrook public housing complex are an important neighborhood focus, but do not provide the full range of products and services which are needed by local residents." In order to provide the facilities, support services and retail appropriate to the Winbrook Core Area Neighborhood, it is necessary and appropriate to enable appropriate uses to be established on both sides of S. Lexington Avenue; therefore, appropriate parking requirements, as provided within the CPA, need to be provided on both sides of the street. With the addition of the Longview Municipal Parking Garage, there is now a significant supply of municipal parking to enable the CPA parking standards to be applied in this area.

Zoning Density Analysis

The following is a zoning density analysis of the Winbrook site, the western side of S. Lexington Avenue from Fisher Avenue to Denison Street, and of the total 11.71 acre area which is the subject of one or both of the proposed Zoning Map amendments. The tables summarize the maximum build out permitted under the existing RM-0.35 and B-3 District densities, and under the changes proposed in the Application.

As the tables demonstrate, there is only a slight 2.5% increase in residential development potential (+32 units) created under the proposed new zoning for the entire 11.71 acre area affected by the rezoning, and a much more significant 17.5% decrease in permitted non-residential development potential of 266,880 square feet in that area.

As indicated by the Total Build Out Comparison table, there is currently substantial development potential on the Public Housing Authority 9.68 acre Winbrook site under the RM-0.35 District, and the proposed Zoning Map change for a portion of the property to B-3 actually reduces residential development potential by 79 units and reduces commercial development potential by 266,880 square feet. On the western side of S. Lexington Avenue the only increase is in residential density (+101 units).

**DEVELOPMENT POTENTIAL COMPARISON**
**CURRENT AND PROPOSED ZONING**

| | USE | AREA ZONE | DENSITY | |
|---|---|---|---|---|
| ***EXISTING ZONING*** | | | | |
| *WINBROOK* (RM-0.35 only) | | 9.68 acres | | |
| | Residential | | 350 sf/DU | 1,208 DU |
| | Non-residential | | FAR = 3.2 | 1,353,497 sf |
| *WEST SIDE S. LEX.* | | 2.03 acres | | |
| | Residential | | 800 sf/DU | 110 DU |
| | Non-residential | | FAR = 2.0 | 177,242 sf |
| **TOTAL BUILD OUT: CURRENT ZONING** | | **11.71 acres** | **RESIDENTIAL** | **1,318 DU** |
| | | | **NON-RES.** | **1,530,739 sf** |
| ***PROPOSED ZONING CHANGE*** | | | | |
| *WINBROOK* | | 9.68 acres | | |
| Along S. Lexington (B-3) | Residential | 5.1 acres | 400sf/DU | 556 DU |
| | Non-residential | | FAR = 2.0(1) | 444,800 sf |
| Balance of Site (RM-0.35) | Residential | 4.58 acres | 350sf/DU | 573 DU(2) |
| | Non-residential | | FAR = 3.2 | 641,817 sf |
| *WEST SIDE S. LEX.* | | 2.03 acres | | |
| | Residential | | 400 sf/DU | 221 DU |
| | Non-residential | | FAR = 2.0(1) | 177,242 sf |
| **TOTAL BUILD OUT: REZONING** | | **11.71 acres** | **RESIDENTIAL** | **1350 DU** |
| | | | **NON-RES.** | **1,263,859 sf** |

(1) may be increased to 2.5 in CPA with special permit from Common Council
(2) may be increased to 325 sf/dwelling unit in CPA with special permit from Common Council

## TOTAL BUILD OUT COMPARISON

| | Winbrook | | Net Change | West Side of S. Lexington Ave. | | Net Change |
|---|---|---|---|---|---|---|
| | Before | After | | Before | After | |
| Residential | 1,208 DU | 1129 DU | -6.3% | 110 DU | 221 DU | +100% |
| Non-Res. | 1,353,497 sf | 1,086,617 sf | -19.8%% | 177,242 sf | 177,242 sf | + 0% |

| Total Change | | |
|---|---|---|
| Residential | +32 units | + 2.5% |
| Non-res. | -266,880 sf | - 17.5% |

Permitted Uses

Although there are differences in the density of residential uses permitted between the existing zoning and the proposed Zoning Map changes, there is no difference in the types of residential uses permitted. There are, however, important changes in the non-residential uses permitted in the proposed B-3 District as opposed to the existing RM-0.35 District on the Winbrook site. Specifically, the retail uses that are permitted in the B-3 District are uses necessary to enable the Applicant to develop retail and office uses along S. Lexington Avenue to serve the needs of the residents of Winbrook and the surrounding area, as contemplated in the Comprehensive Plan. For example, although the RM-0.35 District permits a substantial amount of non-residential use (FAR=3.2), the types of such uses it permits are predominantly governmental, educational, very limited medical, and philanthropic office uses, which do not meet the needs of Winbrook area residents. The B-3 District permits the types of retail and office uses needed to support these residents.

Because the uses permitted in the RM-0.35 District do not meet the needs of the Winbrook Core Area Neighborhood and do not address the needs identified in the Comprehensive Plan, the rezoning of the proposed portion of the Winbrook site along S. Lexington Avenue to B-3, is necessary to permit the development of appropriate uses.

Parking Analysis

A very important change that will be brought about by the amendment to the Zoning Map extending the CPA line to include the Winbrook site and the western side of S. Lexington Avenue is the change in the parking requirement.

The higher parking requirement outside the CPA reflects the greater use of private cars and need for parking on individual sites due to (1) the lack of public parking resources, (2) the lack of "walkability" among retail, office and residential uses, and (3) the reduced availability of public transportation outside the CPA. To address this private car dominated environment, the parking requirement for residential units outside the CPA is higher. For the RM-0.35 District outside the CPA it is based on one per unit plus 1/4 space per bedroom. (For example, a studio would require one space, a two bedroom 1 ½ spaces, and a four bedroom 2 spaces.) The parking requirement for retail uses is 5.7 spaces per 1,000 square feet of retail use. The parking requirement for office uses is 3.3 spaces per 1,000 square feet of office use.

Uses within the CPA have a lower parking requirement because of (1) the number of public parking spaces available in municipal garages and lots, which meet the needs of visitors to residential units,

office workers and shoppers, (2) the accessibility of public transportation, and (3) the "walkability" of uses within the CPA. The parking requirement in the CPA is one space per unit for residential, 3.3 spaces per 1,000 square feet of retail space, and 2.0 spaces per 1,000 square feet of office uses.

Winbrook and the surrounding area is considered a Core Area Neighborhood in the Comprehensive Plan because, among other things it is located within:

(1) easy access to public transportation, being served by lines 40 and 41 of the "Bee" Line bus service, and being within less than 1.2 mile walk to the Metro North train station, and

(2) a short walking distance (less than ½ mile) to the Core Area retail and business center, and

(3) with the construction of the Longview Municipal Parking Garage, a short walking distance to a municipal parking garage.

With the Comprehensive Plan describing Winbrook and the surrounding area as a Core Area Neighborhood, with the availability of public parking and public transportation and with the pedestrian proximity of the Winbrook Core Area Neighborhood to the downtown, it is appropriate that the Winbrook site and western side of S. Lexington Avenue from Fisher Avenue to Denison St. Be incorporated into the CPA.

Building Coverage and Open Space

*A. Building Coverage*

The Zoning Ordinance provides for a maximum building coverage in the RM-0.35 District both in and outside the CPA of 60%. The Zoning Ordinance provides for a maximum building coverage in the B-3 outside the CPA of 80%. Moving the B-3 into the CPA reduces the maximum coverage for buildings over 50 feet to 60% coverage, which is the same as is permitted in the existing RM-0.35 District.

*B. Open Space*

There are two major recreation areas and additional grassed areas at the Winbrook site. There is no open space on the western side of S. Lexington Avenue from Fisher Avenue to Denison Street.

On the Winbrook site, the former Strateman Park was demapped by the Common Council at its meeting of December 7, 1981 and a request was sent to the NY State Legislature to introduce a bill to demap the Strateman Park as parkland and permit it to be conveyed to the Housing Authority. The NYS Legislature authorized this action in Chapter 767 of the Laws of the State of New York of 1982. On October 4, 1982, the Common Council adopted an ordinance amending the Official Map of the City of White Plains to remove the parklands known as Strateman Park from the Official Map and convey the property to the White Plains Housing Authority. There are now two recreation areas located on the site which have been named after former Winbrook residents. The Applicant has stated its intent to preserve areas dedicated to these former residents, although the location of these areas may be moved within the site to accommodate the redevelopment. The future development of the overall Winbrook Community will address the open space and recreational uses as a design component of the site plan approval.

(b) The Proposed Action should not cause a substantial adverse change in existing air quality, ground or

surface water quality, traffic or noise levels, solid waste production levels or potential for erosion, flooding, leaching or drainage problems.

The amendment to the Comprehensive Plan and Zoning Ordinance do not represent a specific development proposal and will not, without further applications, result in a specific action that would alter the physical environment. Any subsequent application for construction on a specific site will require review for and compliance with municipal codes. The future environmental review in regard to the site plan approval will address these issues.

( c) No large quantities of vegetation or fauna will be removed by the Proposed Action. No endangered species of plant or animal should be adversely affected by the Proposed Action. No other significant adverse impacts to natural resources will result from the Proposed Action.

Neither the amendments to the Comprehensive Plan nor the Zoning Ordinance represent an approval of any specific development improvements or site plan approval.

(d) The character or quality of important historical, archeological, architectural or aesthetic resources of the City or any neighborhood will not be adversely affected by the Proposed Action.

These amendments do not represent a significant increase in density of permitted residential or commercial land uses permitted by the Zoning Ordinance.

Neither the amendments to the Comprehensive Plan nor the Zoning Ordinance represent an approval of any specific development improvements or site plan approval.

Any application for site plan approval that involves Winbrook Housing site or properties on the western side of South Lexington Avenue, will receive a full environmental review in conformance with SEQR regulations.

(e) No major change in type or quantity of energy used will result from the Proposed Action.

The Proposed Action does not represent a significant increase in density of permitted residential or commercial land uses permitted by the Zoning Ordinance.

The type and quantity of energy demand for any development permitted by the Zoning Ordinance or the proposed amendments in the subject area will not be significant in the context of the City of White Plains as a regional employment, retail, office and governmental center. The existing providers of utility services have the capacity to support development permitted by the Zoning Ordinance or the proposed amendments.

(f) No hazard to health or human safety will be created.

There is no reason to expect any hazard to human health or safety resulting from this Proposed Action. All development is subject to the appropriate municipal safety codes and approved by the Departments of Building, Public Safety, Public Works and Traffic.

(g) The Proposed Action will not create a substantial change in the use, or intensity of use, of land or other natural resources or the area's capacity to support existing uses. It will not attract a

significantly large number of people to the place, neighborhood or community.

As state above, the amendment to the Comprehensive Plan and Zoning Ordinance do not represent a specific development proposal and will not, without further applications, result in a specific action that would alter the physical environment.

The Zoning Density Analysis discussed above demonstrates, there is only a slight 2.5% increase in residential development potential (+32 units) created under the proposed new zoning for the entire 11.71 acre area affected by the rezoning, and a much more significant 17.5% decrease in permitted non-residential development potential of 266,880 square feet in that area.

Any subsequent application for construction within the subject area will require a review for compliance with municipal codes A future environmental review in regard to the site plan approval will address these issues.

(h) The Proposed Action will not result in the creation of a material demand for other actions which would result in one of the above consequences.

(I) The Proposed Action will not result in changes in two or more elements of the environment, no one of which has a significant effect on the environment, but which when taken together, result in a substantial adverse impact on the environment.

(j) The Proposed Action does not represent a change in two or more related actions that, when considered cumulatively, would result in substantial environmental impacts.

(k) No significant impacts have been identified as a result of the Proposed Action when assessed in connection to its setting, duration, geography scope, magnitude and number of people affected; and be it further

RESOLVED, that, based on the foregoing findings, the Common Council determines that the Proposed Action will not have a significant effect on the environment; and be it further

RESOLVED that the Environmental Officer is authorized to file the appropriate notice as required by SEQR. .

# SEMI-ANNUAL MONITORING REPORT

## FORMER GETTY SERVICE STATION #00369

**26 East Post Road**
**White Plains, New York**
**Westchester County**

**NYSDEC Spill #97-13110**
**Tyree Project #2120016-422**

**Report Prepared For:**

**Mr. Ben Rieger**
**Antea Group, on behalf of Getty Properties Corp.**
**2 Bridgewater Road, Suite 202**
**Farmington, Connecticut 06032**

**Report Prepared By:**

**Mr. Paul Hatcher**
**Tyree Environmental Corp.**
**208 Route 109, Suite 100**
**Farmingdale, NY 11735**

**REPORTING PERIOD –FEBRUARY 2012 THROUGH NOVEMBER 2012**

## INTRODUCTION

This Semi-Annual Monitoring Report has been prepared by Tyree Environmental Corp. (Tyree), on behalf of Getty Properties Corp. (Getty), to summarize the groundwater sampling and gauging conducted at the subject site (Service Station) in accordance with the requirements set forth by the New York State Department of Environmental Conservation (NYSDEC) regarding spill number 97-13110. A map depicting the current site layout is included as **Figure 1**.

## SITE HISTORY

The site is located at 26 East Post Road, White Plains, New York. The property was used as a retail gasoline filling station by Getty from 1973 to 1988, and by other companies dating back to 1933.

During site divestment activities conducted in 1988, four (4) 10,000-gallon gasoline underground storage tanks (USTs), the gasoline dispensers and the associated gasoline product piping were removed from the Service Station. The property was occupied by a used car sales company through the early 1990s and is currently vacant.

At the request of the White Plains Urban Renewal Agency (WPURA), Roy F. Weston of New York, Inc. (Weston) conducted a Phase I Environmental Site Assessment (ESA) and a Phase II site investigation in late 1997 at the former Service Station. As part of the Phase II investigation, seven (7) soil borings were advanced across the site and soil and groundwater samples were collected. Volatile organic compounds (VOCs) were detected above NYSDEC Guidelines in soil samples collected at two locations west of the former gasoline dispenser island. Groundwater samples collected from temporary PVC wells installed at three of the soil boring locations returned results above NYSDEC Groundwater Quality Standards for one or more VOCs. As a result of these findings, NYSDEC spill number 97-13110 was issued.

In April 1998, Tyree conducted a subsurface investigation, which resulted in the installation of monitoring wells MW-1 through MW-4 on the property. Soil samples were collected from each location at a depth of 10-12 feet below ground surface (ft bgs). Laboratory analytical results from soil samples collected from monitoring wells MW-2 through MW-4 indicated one or more VOC present exceeding NYSDEC Guidelines.

On August 3, 1999, seven (7) soil borings designated GP-1 through GP-7 were advanced across the site to further delineate soil and groundwater impacts. Levels of VOCs detected in soil samples collected from all seven soil borings exceeded NYSDEC Guidelines. Temporary PVC monitoring wells were installed in six (6) of the borings where groundwater was encountered. Groundwater samples collected from the temporary PVC wells returned results above NYSDEC Groundwater Quality Standards.

In June 2000, thirteen (13) one-inch diameter monitoring wells (GP-8 through GP-20) and two four-inch monitoring wells (MW-5 and RW-1) were installed on the site and surrounding properties. Levels of VOCs detected in soil samples collected from five (5) of the monitoring well locations (GP-9, GP-13, GP-15, GP-18 and RW-1) exceeded NYSDEC standards. Groundwater samples collected from the monitoring wells exceeded NYSDEC Groundwater Quality Standards in eight of the thirteen wells (GP-9, GP-10, GP-12, GP-14, GP-17, GP-19, GP-20 and RW-1).

On October 26, 2000, Tyree completed the installation of three (3) additional micro-wells [GP-21 through GP-23] at five, ten and fifteen foot intervals surrounding RW-1. The micro-wells were installed to gauge the influence during the pilot test.

On May 1, 2001, Tyree oversaw the installation of four (4) monitoring wells [MW-11-MW-14].

A Dual Phase High Vacuum Extraction System (DPHVES) was installed and became operational in August 2001. The system was maintained and operated through April

2007. Following NYSDEC approval in April 2007, the DPHVES was shut down in favor of initiating an Enhanced Vapor / Fluid Recovery (EVFR) program to focus remedial efforts on monitoring wells MW-11, MW-12 and GP-19. Monthly EVFR events continued through the end of 2009.

During a meeting with the NYSDEC in March 2009, it was determined that the focus of remedial efforts would be limited to offsite impacts and that all on-site wells would no longer be sampled. With NYSDEC approval, monitoring wells MW-1 through MW-10, MW-13, MW-14, GP-8, GP-16 through GP-20 and RW-1 were removed from the sampling schedule.

In order to further delineate down-gradient groundwater and soil petroleum hydrocarbon impacts, a limited Subsurface Investigation was conducted on January 14, 2010 that included the advancement of five soil borings (SB-1 and SB-3 though SB-6) and the collection of soil / groundwater samples in the vicinity of GP-19. Groundwater monitoring well MW-101 was installed at the location of soil boring SB-4 to be able to monitor groundwater quality downgradient of GP-19.

Analytical results identified soil and dissolved phase VOC impacts north and east of GP-19 (SB-4 and SB-5). Soil and groundwater samples collected at these locations were reported above NYSDEC standards. The analytical results further indicated that soil and groundwater is delineated to the west and east. Further delineation to the north was not possible due to access issues (fenced-in basketball and tennis courts) immediately to the north of current monitoring well MW-101. Residual VOC concentrations remain in the area of GP-19.

On January 4, 2011, LPH was detected in monitoring wells MW-8 and MW-14. Monitoring well MW-8 is located at the Former Getty Service Station property along the southwestern property boundary with 22- 24 East Post Road. Monitoring well MW-14 is in a parking area behind a commercial building located at 22-24 East Post Road, southwest of the former Service Station. LPH has not historically been present in either of these monitoring wells.

On March 21, 2011 two LPH samples were collected from monitoring wells MW-8 and MW-14. The LPH samples were submitted to Accutest Laboratories of Marlborough, Massachusetts for fingerprint analysis by American Society for Testing and Materials (ASTM) Method D3328-78 and US EPA Method 3580A.

Laboratory analytical results showed a match for Diesel / Fuel Oil #2 (C9-C22) from the sample collected from MW-14. Laboratory analytical results did not detect a match for any petroleum compound in the analytical method ranging from gasoline (C4-C12) to #6 fuel oil (C11-C26) from the sample collected from MW-8.

On November 23, 2011 wells GP-8, MW-1 through MW-10 and RW-1 were properly abandoned, as per NYSDEC approval.

## WELL GAUGING / SAMPLING INFORMATION

Prior to sampling, each monitoring well was gauged for static water level and then purged of three well volumes or until dry. Once the groundwater within each monitoring well recharged to at least 90 percent of its static water level, groundwater samples were collected. Summaries of the groundwater elevation data and groundwater chemistry data measured during the July 31, 2012 groundwater sampling event have been provided as **Tables 1 and 2**, respectively. A hydrograph plotting the change in groundwater elevations at this site over time is presented as **Graph 1.**

| | |
|---|---|
| **Date Wells Gauged –** | 7/31/12 |
| **Number of Wells Gauged –** | Nine (9) |
| **Gauged Well Identifications –** | GP-14 through GP-16, GP-19, GP-20, MW-11 through MW-13 and MW-101 |
| Wells Not Gauged and Reason – | GP-18 and MW-14– located beneath immobile vehicles<br>GP-8, MW-1 through MW-10 and RW-1 – wells properly abandoned on 11/23/11 as per NYSDEC approval |
| **Date Wells Sampled –** | 7/31/12 |
| **Number of Wells Sampled –** | Six (6) |
| **Sampled Well Identifications –** | GP-14, GP-15, GP-19, MW-11, MW-12 and MW-101 |
| **Wells Not Sampled and Reason –** | GP-8, MW-1 through MW-10 and RW-1 – wells properly abandoned on 11/23/11 as per NYSDEC approval |
| **Liquid Phase Hydrocarbons (LPH) Detected and LPH Thickness –** | Sheen detected in GP-19 and MW-11 |
| **Approximate Depth to Groundwater –** | 5.5 ft. |
| **Generalized Groundwater Flow Direction** – | Northwest |

**Wells Not Used in Contouring and Reason –** None

**Laboratory Analytical Parameters and Methods** – Benzene, toluene, ethylbenzene, total xylenes (Total BTEX), methyl tert-butyl ether (MTBE) via United States Environmental Protection Agency (USEPA) Method 8260

**New York-Certified Laboratory** – Accutest Laboratories; Dayton, New Jersey

## LABORATORY ANALYTICAL RESULTS

Laboratory analytical results associated with the July 31, 2012 groundwater sampling event indicates that target compounds of concern (COCs) exceeded NYSDEC groundwater standards at the following monitoring well locations:

| | |
|---|---|
| **GP-14** | none |
| **GP-15** | none |
| **GP-19** | benzene (628 ppb), toluene (94.1 ppb), ethylbenzene (776 ppb) and total xylenes (528 ppb) |
| **MW-11** | benzene (8.9 ppb) |
| **MW-12** | benzene (32.0 ppb) |
| **MW-101** | benzene (236 ppb), toluene (102 ppb), ethylbenzene (2,010 ppb) and total xylenes (1,370 ppb) |

Historical groundwater analytical results are summarized in **Table 2** and plotted in **Graph 2** (Total BTEX Concentration vs. Time**)** and **Graph 3** (MTBE Concentration vs. Time). A groundwater elevation map for the July 31, 2012 groundwater gauging events is included as **Figure 1**. Total BTEX and MTBE plume maps associated with the July 31, 2012 groundwater sampling event are included as **Figures 2 and 3**, respectively. In addition, a copy of the original laboratory analytical data package associated with the July 31, 2012 groundwater sampling event has been included in **Appendix A**.

## SITE PROGRESS UPDATE

Tyree submitted an Ozone Injection Pilot Test Work Plan to the NYSDEC Region 3 on September 14, 2011. The Ozone Injection Pilot Test Work Plan details the objectives of the pilot test, including injection point installation, determining the site specific radius of influence of ozone injections to the groundwater, establishing optimal injection pressure and injection flow rates, and evaluating the effectiveness of ozone in treating the contaminant mass. The Ozone Injection Pilot Test is to take place in the vicinity of MW-101 and GP-19, north of former Service Station.

The Ozone Injection Pilot Test Work Plan was approved by the NYSDEC Region 3 on September 16, 2011. Tyree is in the process of coordinating activities to conduct the Ozone Injection Pilot Test. Once an access agreement is executed with the adjacent property owner, Tyree will schedule the injection well installations and pilot test. As of the writing of this report, there is still not an executed access agreement from the property owner.

On September 28, 2011, during a conference call between Tyree, the Antea Group and the NYSDEC Region 3, it was agreed to abandon the following groundwater monitoring wells that are present on the former Service Station property: GP-8, MW-1 through MW-10 and RW-1. These wells were abandoned on November 23, 2011.

## SUMMARY OF UPCOMING EVENTS

| | |
|---|---|
| **Next Groundwater Sampling Event** – | January 2012 |
| **Next Report Submittal Date** – | March 2012, First Half 2013 Semi-Annual Monitoring Report |
| **Ozone Injection Well Installations and Pilot Test** – | Pending offsite access agreement |

This report is a true report of results obtained from our tests of this material. The report relates only to those samples received and analyzed by the laboratory. All results meet the requirements of the NELAC Institute standards. Laboratory reports may not be reproduced, except in full, without the written approval of the laboratory.

In lieu of a formal contract document, the total aggregate liability of Hampton-Clarke to all parties shall not exceed Hampton-Clarke's total fee for analytical services rendered.

*This case narrative is in the form of an exception report. Method specific and/or QA/QC anomalies related to this report only are detailed below.*

## Volatile Organic Analysis:

Samples AD09236-002, -005 were analyzed at a dilution due to high concentration of target analytes.

The Method Blank Spike for batch 76295 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

The MS/MSD, Matrix Spike and/or Matrix Spike Duplicate for batch 76295 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

2-Chloroethylvinylether did not recover in the Matrix Spike and Matrix Spike Duplicate in batch 76295 due to acid preservation of sample. 2-Chloroethylvinylether readily decomposes under acidic conditions. The recovery of 2-Chloroethylvinylether is within QC limits in the Laboratory Control Sample. Please refer to the applicable Form 3 for the recoveries.

## Metals Analysis:

Data conforms to method requirements.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data has been authorized by the Laboratory Manager or his designee, as verified by the following signature.

# Reporting Limit Definitions

# HC Reporting Limit Definitions/Data Qualifiers

## REPORTING DEFINITIONS

**DF** = Dilution Factor

**MDL** = Method Detection Limit

**RL*** = Reporting Limit

**ND** = Not Detected

**RT** = Retention Time

**NA** = Not Applicable

**Samples with elevated Reporting Limits (RLs) as a result of a dilution may not achieve client reporting limits in some cases. The elevated RLs are unavoidable consequences of sample dilution required to quantitate target analytes that exceed the calibration range of the instrument.*

## DATA QUALIFIERS

**A-** Indicates that the Tentatively Identified Compound (TIC) is suspected to be an aldol-condensation product. These compounds are by-products of acetone and methylene chloride used in the extraction process.

**B-** Indicates analyte was present in the Method Blank and sample.

**d-** For Pesticide and PCB analysis, the concentration between primary and secondary columns is greater than 40%. The lower concentration is generally reported.

**E-** Indicates the concentration exceeded the upper calibration range of the instrument.

**J-** Indicates the value is estimated because it is either a Tentatively Identified Compound (TIC) or the reported concentration is greater than the MDL but less than the RL. For samples results between the MDL and RL there is a possibility of false positives or misidentification at the quantitation levels. Additionally, the acceptance criteria for QC samples may not be met.

**R-** Retention Time is out.

**Y-** Indicates a contaminant found in the blank at less than 10% of the concentration of a contaminant found in the sample.

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration usea*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

Worksheet #: 501567

***Total Target Concentration*** 0

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration usea*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

**Additional Notes**
TCL VOCs, Total Pb

**Comments, Notes, Special Requirements, HAZARDS**

Indicate if low-level methods required to meet current groundwater standards (SPLP for soil):
- [ ] BN or BNA (8270D SIM)
- [ ] VOC (8260C SIM or 8011)
- [ ] SPLP (BN, BNA, Metals)
- [ ] 1,4 Dioxane

For NJ LSRP projects, indicate which standards need to be met:
- [ ] NJDEP GWQS
- [ ] NJDEP SRS
- [ ] NJDEP SPLP
- [ ] Other (specify):

Check if applicable:
- [ ] Project-Specific Reporting Limits
- [ ] High Contaminant Concentrations
- [ ] NJ LSRP Project (also check boxes above/right)

Cooler Temperature: 3.5

Please note NUMBERED items. If not completed your analytical work may be delayed.
A fee of $5/sample will be assessed for storage should sample not be activated for any analysis.

Internal use: sampling plan (check box) HC [ ] or client [ ] FSP#

**Internal Standard Areas**

Upper Limit = + 100% of internal standard area from daily cal or mid pt.

Lower Limit = - 50% of internal standard area from daily cal or mid pt.

**Flags:**

A - Indicates the compound failed the internal standard area criteria

R - Indicates the compound failed the internal standard retention time criteria.

**Retention Times:** Limit = within +/- 0.5 min of internal standard retention time from the daily cal or mid pt.

**Internal Standard Areas**

Upper Limit = + 100% of internal standard area from daily cal or mid pt.

Lower Limit = - 50% of internal standard area from daily cal or mid pt.

**Flags:**

A - Indicates the compound failed the internal standard area criteria

R - Indicates the compound failed the internal standard retention time criteria.

**Retention Times:** Limit = within +/- 0.5 min of internal standard retention time from the daily cal or mid pt.

Worksheet #: 501570

***Total Target Concentration*** 3200

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration used*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

Worksheet #: 501567

***Total Target Concentration*** 0

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration used*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

Worksheet #: 501567

***Total Target Concentration*** 1000

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration usea*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

Worksheet #: 501567

***Total Target Concentration*** 0

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration used*
*Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

*Flags*

*a - failed the min rf criteria*

*c - failed the minimum correlation coeff criteria(if applicable)*

*Note:* Avg Rsd: 10.7

*Corr 1 = Correlation Coefficient for linear Eq.*

*Corr 2 = Correlation Coefficient for quad Eq.*

*Fit = Indicates whether Avg RF, Linear, or Quadratic Curve was used for compound.*

# Form 6
## Initial Calibration

Method: EPA 8260C

Instrument: GCMS_3

Avg Rsd: 10.7

***Flags***

*a - failed the min rf criteria*

*c - failed the minimum correlation coeff criteria(if applicable)*

***Note:***

*Corr 1 = Correlation Coefficient for linear Eq.*

*Corr 2 = Correlation Coefficient for quad Eq.*

*Fit = Indicates whether Avg RF, Linear, or Quadratic Curve was used for compound.*

# Form 6
## Initial Calibration

Method: EPA 8260C

Instrument: GCMS_3

*Flags*
*a - failed the min rf criteria*
*c - failed the minimum correlation coeff criteria(if applicable)*

*Note:* Avg Rsd: 10.7
*Corr 1 = Correlation Coefficient for linear Eq.*
*Corr 2 = Correlation Coefficient for quad Eq.*
*Fit = Indicates whether Avg RF, Linear, or Quadratic Curve was used for compound.*

Worksheet #: 501567

***Total Target Concentration*** 0

ColumnID: (^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.*
*B - Indicates the analyte was found in the blank as well as in the sample.*
*E - Indicates the analyte concentration exceeds the calibration range of the instrument.*
*R - Retention Time Out*
*J - Indicates an estimated value when a compound is detected at less than the specified detection limit.*
*d - Pesticide %Diff>40% between columns due to coelution. Lower concentration usea*
*Chlordane (Total) is sum of a-Chlordane and y-Clordane.*

# Veritech Internally Prepared Standard Log

## Veritech Lot Number: V-290754

Prepared By: Cousineau, Paul
Description: Antimony Intermediate 1PPM
Prep Date: 10/29/2018
Expiration Date: 2/28/2019
Department: Metals
BatchNumber:
Concentration: 1000 ppb
Final Volume: 100 ml
ApprovedBy: shiamala
ApproveDate: 11/01/18
Checked: Yes
