GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	13968	**Lab Number:**	L2525183
Project Number:	13968	**Report Date:**	05/06/25

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	13968	**Lab Number:**	L2525183
Project Number:	13968	**Report Date:**	05/06/25

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Pace Analytical Services performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Pace Analytical Services shall be to re-perform the work at it's own expense. In no event shall Pace Analytical Services be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Pace Analytical Services.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility – 8 Walkup Dr. Westborough, MA 01581
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility – 320 Forbes Blvd. Mansfield, MA 02048
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
MADEP-APH.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

Mansfield Facility – 120 Forbes Blvd. Mansfield, MA 02048
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases

The following test method is not included in our New Jersey Secondary NELAP Scope of Accreditation:

Mansfield Facility – 320 Forbes Blvd. Mansfield, MA 02048
Determination of Selected Perfluorinated Alkyl Substances by Solid Phase Extraction and Liquid Chromatography/Tandem Mass Spectrometry Isotope Dilution (via Alpha SOP 23528)

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility – 8 Walkup Dr. Westborough, MA 01581

Drinking Water
EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B, SM4500NO2-B**
EPA 524.2: THMs and VOCs; **EPA 504.1:** EDB, DBCP.
Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT,SM9222D**.

Non-Potable Water

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Pace Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Pace's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Pace Project Manager and made arrangements for Pace to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Number: 13968 **Report Date:** 05/08/25

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

L2525476-02: The collection date and time on the chain of custody was 24-APR-25 10:40; however, the collection date/time on the container label was 24-APR-25 10:35. At the client's request, the collection date/time is reported as 24-APR-25 10:35.

Volatile Organics

L2525476-03: The internal standard (IS) responses for fluorobenzene (7%), chlorobenzene-d5 (9%), and 1,4-dichlorobenzene-d4 (11%) and the surrogate recoveries for 1,2-dichloroethane-d4 (148%) and dibromofluoromethane (152%) were outside the acceptance criteria; however, re-analysis achieved the following results: fluorobenzene (36%), chlorobenzene-d5 (40%), and 1,4-dichlorobenzene-d4 (45%) and 1,2-dichloroethane-d4 (132%). The results of both analyses are reported; however, since the IS response was below method criteria, all associated compounds and surrogate recoveries are considered to have a potentially high bias.

Semivolatile Organics

L2525476-10D: The sample has elevated detection limits due to the dilution required by the sample matrix.

Total Metals

L2525476-01 through -10: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	34 STATE STREET	**Lab Number:**	L2525476
Project Number:	13968	**Report Date:**	05/08/25

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	34 STATE STREET	**Lab Number:**	L2525476
Project Number:	13968	**Report Date:**	05/08/25

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Pace Analytical Services performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Pace Analytical Services shall be to re-perform the work at it's own expense. In no event shall Pace Analytical Services be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Pace Analytical Services.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility – 8 Walkup Dr. Westborough, MA 01581
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility – 320 Forbes Blvd. Mansfield, MA 02048
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
MADEP-APH.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

Mansfield Facility – 120 Forbes Blvd. Mansfield, MA 02048
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases

The following test method is not included in our New Jersey Secondary NELAP Scope of Accreditation:

Mansfield Facility – 320 Forbes Blvd. Mansfield, MA 02048
Determination of Selected Perfluorinated Alkyl Substances by Solid Phase Extraction and Liquid Chromatography/Tandem Mass Spectrometry Isotope Dilution (via Alpha SOP 23528)

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility – 8 Walkup Dr. Westborough, MA 01581

1.0 PROJECT SUMMARY

SESI Consulting Engineers (SESI), at the request of WB 34 State LLC (User) has conducted a Phase I Environmental Site Assessment (ESA) for the Subject Property located at 34 State Street, Ossining, Westchester County, New York (herein referred to as the "Subject Property"). The Subject Property is identified on local tax maps as Block 2, Lots 17, 18 and 68. A tax map is included on **Figure 1.1**. A Subject Property Location Map is included on **Figure 1.2**. The Subject Property is composed of an approximately 5.858-acre lot that historically was developed with with the Printex Corporation textile scarf manufacturing building, most of which has been demolished, and the historic Smith Robinson estate house, which has served many functions both residential and commercial during its history . The house and a shed are currently vacant and abandoned. A Subject Property Plan is included on **Figure 1.3**.

The Subject Property is currently developed with the one (1) three (3)-story house, one (1) shed, asphalt parking, vacant forested areas and former building pads. The Subject Property is located in a primarily commercial and residential area. The Subject Property was developed prior to 1892 based on topographic maps and contained residential buildings. In 1929 a community center was present. This was later expanded to contain the Printex Corporation of America circa 1940-1981 textile scarf manufacturing facility, which contained a wastewater treatment lagoon, printing and textile design operations, and scarf manufacturing. Another addition was added to this building in 1968 to the south. The factory buildings have since been demolished, but their foundations remain.

Several investigations were completed at this Subject Property, notably the identification of underground storage tanks (USTs) at the north, likely associated with the former Printex manufacturing operations, which are further discussed below.

The Subject Property is proposed to be redeveloped with two (2) mixed-use residential buildings, one for 100 affordable housing units and the other for 50 market rate apartments and associated parking.

The objective of this ESA is to identify the presence or likely presence, use or release on the Subject Property of hazardous substances or petroleum products as defined in the American Standard of Testing and Materials (ASTM) E1527-21 as a Recognized Environmental Condition

(REC). In addition, Business Environmental Risks (BERs), Controlled Recognized Environmental Conditions (CRECs), and Historical Recognized Environmental Conditions (HRECs) were identified, if present.

The following RECs have been identified:

- **REC 1 – Subject Property Historic Operations:** The original residential estate house was erected in 1840 as a residential estate; two (2) additions were built in 1929 as a community center; and in 1940-1981 buildings were added were occupied by the Printex Corporation of America, which operated a scarf printing and textile design manufacturing facility. Another addition was constructed in 1968. The facility utilized a wastewater treatment lagoon at the southeast. The Site was listed as a Class N (No further Action) State Superfund program (Site ID No 360002) but no remediation appears to have been performed because Westchester County Department of Health (WC DOH) noted the lagoons were concrete lined and used for on-site wastewater treatment and not hazardous waste disposal associated with the former Printex operations. Furthermore, there were some laundry operations at the center of the Subject Property circa 1911. The Site was also listed as a US EPA ID NYD013008446 federal Superfund Site, but was removed from the federal list after USEPA apparently conducted an investigation which did not identify contamination that rose to the level of requiring federal Superfund listing. In addition, from the 1980s until approximately 2006, the Site was using for specialty inlay woodwork operations. **Based on this history observed from the Sanborn maps and previous reports, the historic operations from the textile, woodworking and laundry facilities may have adversely impacted the Subject Property and warrant further investigation.**

- **REC 2 – Underground Storage Tanks:** The following USTs were identified to be either closed in place or removed: 1x 10,000-gallon UST, closed in place on September 1, 1986; 1x 1,000-gallon UST, removed or closed in place on December 1, 2003; and 1x 3,000-gallon UST, removed or closed in place on December 1, 2003. It is unclear from conflicting historic reports described below whether the 1,000 gallon and 3,000 USTs were removed or closed in place. No leaking underground storage tank (LUST) releases were reported. **However, no closure reports were identified. Identifying closure documents in a record review or confirming closure in a Phase II is recommended.**

- **REC 3 – Historic Fill:** Historic fill has reportedly been identified at the Subject Property during geotechnical and environmental investigations. **Additional subsurface soil sampling is recommended to characterize fill material should special handling and/or disposal of disturbed soil be required during Subject Property redevelopment.**

The following BERs have been identified:

- **BER 1 – Historic Land Use:** The historic 2006 aerial imagery identified clearing of vegetation on Lot 68; however, this vegetation returned in 2011 per the next available aerial. It was unclear if this area had been regraded or there were former operations on this lot that may have adversely impacted the Subject Property. **Further investigation is recommended into the use of Lot 68 and the reasoning for clearing. Additional soil investigation is recommended to determine if historic fill is present.**

- **BER 2 – Aboveground Storage Tank (AST):** SESI identified one (1) yellow steel aboveground storage tank adjacent to several unused items at the southwest of Lot 17. This tank appeared to not be in use and was intact, with no evidence of staining. **Therefore, no further investigation is warranted; however, proper disposal of this AST is recommended. No closure documentation is required.**

- **BER 3 – Drum:** There was one (1) plastic 55-gallon tote identified to the south of the northern shed. This tote appeared to contain soil and was unlabeled. No staining was visible around the tote and it appeared to be in good condition. **Therefore, SESI recommends proper removal/disposal of this tote.**

- **BER 4 – Stockpiles:** There were several stockpiles of building materials scattered throughout the Subject Property, around building footprints, and on the periphery of the vegetated area of Lot 68. These stockpiles were not observed to have exhibited petroleum impacts. **Therefore, SESI recommends the proper testing and disposal of these demolition debris prior to or during redevelopment.**

- **BER 5 – Hazardous Building Materials:** An asbestos containing material (ACM), lead-based paint (LBP), polychlorinated biphenyl (PCB) caulk and universal waste survey was not conducted as part of this Phase I Environmental Site Assessment. Based on the age

of the house and shed structures located on the Subject Property, the presence of these materials cannot be ruled out. **Therefore, a comprehensive hazardous material survey is recommended prior to demolition or redevelopment.**

The RECs are discussed further in **Section 10.0 CONCLUSIONS AND RECOMMENDATIONS** of this Report.

2.0 INTRODUCTION

2.1. PURPOSE

The purpose of this study is to determine the RECs at the Subject Property for due diligence purposes related to the potential acquisition of the Subject Property.

SESI has developed this Phase I ESA Report on behalf of the User. It has been developed in substantial conformance with the ASTM's International Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-21. According to ASTM E1527-21, the following conditions were identified during this assessment:

REC – "(1) the presence of hazardous substances or petroleum products in, on, or at the property due to release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the property due to a release or likely to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition."

CREC – "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority."

HREC – "A past release that has been remediated to below residential standards and given regulatory closure with no use restrictions."

BER – "A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate and is not an issue required to be investigated under this practice."

2.2. SCOPE OF SERVICES

The scope of this assessment consisted of the following general tasks: a records review; a Subject Property visit; interviews with present and past owners, operators, and occupants to the extent possible; and preparation of this ESA report. Specific tasks that were conducted included the following:

- A review of environmental databases maintained by the United States Environmental Protection Agency (USEPA) and state and local agencies within the minimum search

distance. Environmental Data Resources, Inc. (EDR) prepares environmental databases used in these assessments.

- A Subject Property reconnaissance to observe conditions and to assess the Subject Property location with respect to adjoining and surrounding property uses, types of development, topography, natural surface features, roadways, railroad lines and right-of-ways to identify obvious potential environmental conditions on neighboring properties.

Per ASTM E1527-21, questionnaires were provided to the User (Client), and Owner to obtain information related to the Subject Property.

2.3. SIGNIFICANT ASSUMPTIONS

Information obtained by SESI and by third parties is assumed to be accurate and/or true. SESI makes no warranty, either implied or expressed, regarding the accuracy or validity of information supplied by others.

2.4. LIMITATIONS/METHODOLOGY/RELEVANCE

This ESA was prepared for the exclusive use of WB 34 State LLC, its affiliates and lenders. During the assessment, methodologies were used that conform to generally accepted practices for this type of work. The scope and character of the environmental assessment were, in professional judgment, sufficient to justify the stated conclusions, after giving due consideration to the purpose of the investigation, the data reviewed, the background history of the Subject Property as found in historical records, and visual observation of the Subject Property. No other investigation was performed other than that which is expressly noted in this Report.

This ESA was performed in accordance with ASTM E1527-21 and is subject to reasonable limits of time and cost and is intended to reduce but not eliminate uncertainty regarding the potential for RECs in connection with a property. Sampling and laboratory analysis are required to determine if soil, surface water, groundwater, air, and construction materials have been impacted by a contaminant.

The information presented in this ESA was obtained during the Subject Property reconnaissance and from the Client, representatives of the Client, current/former property owner(s) or tenants, Federal, State, County and Local Officials, and available mapped information obtained by SESI. SESI does not certify the accuracy of the information received from outside sources.

This ESA should be used in its entirety. Use of portions of this ESA may nullify the information and/or conclusions of this ESA. Subject Property observations discussed herein apply to Subject Property conditions as observed during Subject Property reconnaissance only. The conclusions of this ESA do not apply to conditions that were unavailable for inspection and could not be evaluated.

SESI does not certify that the Subject Property is contaminant free and this ESA does not serve as a warranty. SESI's investigation was performed within the time frame requested by the client.

The activities to conduct this ESA did not include sampling and analyses of soil, surface water, groundwater, air, or construction materials unless expressed otherwise and requested by the client. Formal wetland, asbestos, mold, and/or radon evaluations were not performed and are not within the scope of work for an ESA. If additional services including UST testing, construction materials testing, or environmental sampling (soil, surface water, groundwater, air) is recommended, the results and conclusions for these tests will be provided under separate cover.

2.5. DISCLAIMER

This ESA was prepared by SESI for the sole and exclusive use of WB 34 State LLC. Nothing under the Agreement between SESI and the User shall be construed to give any rights or benefits to anyone other than the User and SESI, and all duties and responsibilities undertaken pursuant to the Agreement will be for the sole and exclusive benefit of the User and SESI and not for the benefit of any other party. SESI does not intend, without its written consent, for this ESA to be disseminated to anyone other than the User, or to be used or relied upon by anyone other than the User. Use of the ESA by any other person is unauthorized and such use is at their sole risk.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1. LOCATION/STRUCTURES/LEGAL DESCRIPTION

The Subject Property consists of an approximately cumulative 250,165-square feet (5.858-acres) three (3) parcels located at 34 State Street, 21 James Street and Hunter Street, Ossining, Westchester County, New York. The Subject Property is identified on tax map records as Block 2; Lots 17, 18 and 68. The Subject Property is improved by asphalt paving former building pads, one (1) multi-story building, one (1) shed and forested areas. The Subject Property buildings are vacant. **Figure 1.2** provides a Subject Property Location Map. A Subject Property Plan is shown on **Figure 1.3.**

The Subject Property is bound to the north by a public school, to the west by residential, to the south by residential, and to the east by residential/commercial. A summary of the uses of the adjacent properties is shown on **Table 3.1** below.

Table 3.1—Adjacent Property Uses

Direction	Adjacent Property Use
North	Day Care Center at 32 State Street
South	Residential Dwellings
East	Residential Dwellings, Garages, Parking Areas
West	Residential Dwellings

3.2. SUBJECT PROPERTY AND VICINITY CHARACTERISTICS

The Subject Property is located in a residential and commercial area. The closest notable surface water body is the Hudson River located approximately 760 feet west of the Subject Property. The Subject Property is approximately 70 feet above the elevation of the Hudson River.

3.3. CURRENT USE OF THE PROPERTY

The Subject Property is currently vacant land. The house and shed structures present are abandoned. The former building pads are still present and unused forested land is present. The property is currently zoned for Planned Waterfront Development – Central Waterfront – Hillside District (“PW-c”) which allows for commercial and residential uses. The Subject Property is owned by Ossining Membership, LLC.

4.0 USER PROVIDED INFORMATION

4.1. TITLE INFORMATION

The following title information for the Subject Property was available for SESI to review:

Block 2, Lots 17, 18 and 68

Deed 1

Type of deed: Deed

Title is vested in: Ossining Membership, LLC

Title received from: Ossining Land, LLC

Deed Date: 12/23/2020

Date Recorded: 1/4/2021

The title report is provided in **Appendix A**.

4.2. ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

SESI was provided with a title report that identified several liens associated with the mortgages of the property. These liens did not include any environmental restrictions. This report can be found in **Appendix A**.

4.3. SPECIALIZED KNOWLEDGE/OTHER USER PROVIDED INFORMATION

SESI was provided with the following previous environmental reports regarding the Subject Property:

- Phase I ESA, 34 State Street, Ossining, NY, prepared by Team Environmental Consultants, Inc., date unknown
- Phase II ESA, 34 State Street, Ossining, NY, prepared by DT Consulting Services, dated May 31, 2005
- Phase I ESA, 34 State Street, 17-25 James Street & Hunter Street (Lots 17, 18 and 68), Ossining, NY, prepared by EBI Consulting, dated January 18, 2016

These reports and other relevant historical documents are provided in **Appendix B.** These reports are summarized below:

4.3.1. PHASE I ESA, TEAM ENVIRONMENTAL CONSULTANTS, INC

The following is a summary review of the reports referenced in this Phase I as well as the conclusions therein:

- Phase I ESA, January 21, 1994, prepared by Dames & More
    - Closed in place 10,000-gallon UST at the western portion of the property. Backfilled and covered with concrete.
        - Noted that a previous Phase II by SSI advanced soil samples and identified total petroleum hydrocarbons (TPH) concentrations at 30-114 parts per million (ppm).
    - Closed in place two (2) other USTs after a ground penetrating radar sweep (1,000 and 3,000-gallon USTs with oil/water mix)
        - Centerline samples noted to be collected and reportedly did not indicate TPH
    - Waste treatment lagoon at the southeast was noted not to adversely impact the quality of the property.
- Phase I ESA, May 7, 2003, prepared by EES
    - Recommended ACM survey
    - Recommended identifying tanks, concrete storage lagoons and garage area in a Phase II
- Phase II ESA, May 16, 2003, prepared by EES
    - Nine (9) soil borings within the western area of the 10,000-gallon UST and storage garage areas
    - No samples were collected for laboratory analysis. Just screened with a photoionization detector (PID) and did not identify observable contamination.

No further investigations are recommended.

4.3.2. PHASE II ESA, DT CONSULTING SERVICES, MAY 31, 2005

The following is a summary review of this Phase II ESA as well as the conclusions therein:

- History: Original building erected in 1840 as residential; 2 additions built in 1929 as a community center; 1940-1981 it was the Printex Corporation of America as a clothing printing and textile design facility. Another addition constructed in 1968.
- Site is identified in CERCLIS and PBS
    - Known PBS in the north; three (3) USTs identified on figure

- Waste treatment lagoon in the southeast corner
- General equipment and storage at the west

- Seven (7) soil borings
  - Advanced eight (8) to 12 ft feet below ground surface (bgs)
  - Characterization: light brown sandy loam (fill) with traces of gravel - approximately 0 to four (4) feet bgs, underlain by fine-medium sand with clay and schist fragments.
  - Bedrock encountered between eight (8) and nine (9) feet bgs
  - Groundwater not encountered
  - No visual or olfactory or PID observations/ readings
- Seven (7) borings were composited to form only three (3) sample sets
  - Volatile organic compounds, semi-volatile organic compounds, Metals; Detections of low levels
- Determined no further investigation based on the results

4.3.3. PHASE I ESA, EBI CONSULTING, JANUARY 18, 2016

The following is a summary review of this Phase I ESA as well as the conclusions therein:

- <u>REC - USTs:</u>
  - The USTs documented by Creative Design, a former Tenant are as follows:
    - 1x 10,000-gallon UST, closed in place on September 1, 1986.
    - 1x 1,000-gallon UST, removed on December 1, 2003.
    - 1x 3,000-gallon UST, removed on December 1, 2003.
    - No LUST releases were reported. However, no closure reports were identified.
    - Identifying closure documents in a record review or a Phase II were recommended.
- <u>ACM</u>:
  - EBI conducted a preliminary screening of ACM in the building and identified some suspect ACM. This was out of scope of the Phase I ASTM, and was not considered a REC; however, a full ACM survey was recommended.

4.3.4. INTERVIEWS

An environmental professional from SESI, Tyler Fisher, conducted interviews with operators of the subject property in an effort to acquire pertinent information relating to current and historic Subject Property conditions and these interviews are summarized below.

Name: Chris Hahn

Company Name: Representative of WB State St LLC

Date and Time of Interview: June 3, 2025

Type of Interview: Telephone Interview

SESI conducted a walkthrough of the property without the presence of the owner or prospective buyer on June 3, 2025, at 34 State Street, Ossining, NY. The forested area was assessed to the extent possible. SESI provided the Phase I ESA Environmental Questionnaire to Chris Hahn. Information obtained from this interview, questionnaire and Subject Property inspection is integrated in this Phase I ESA. A completed User Questionnaire is presented as **Appendix A**.

4.4. COMMONLY KNOWN OR REASONABLY ASCERTAINABLE RECORDS

SESI completed a review of publicly available New York State Department of Environmental Conservation (NYSDEC) mapping and database systems and the United States Environmental Protection Agency (USEPA) database system as part of this Report to determine the environmental conditions at the Subject Property and adjacent properties. According to the NYSDEC database, the property is listed in the State Superfund program (ID No. 360002) as a Class N site because the Westchester County Department of Health determined the lagoon was concrete lined and was not used to dispose of hazardous waste, but rather as concrete storage lagoon for treatment of process water. The lagoon is a REC because it does not appear that any subsurface investigation has been performed in association with this historic operation on the Subject Property associated with the Printex Corporation of America which could have resulted in contamination (**REC 1**). The database information is attached to this Report as **Appendix C**. Based on our review, it was determined that the former printing operations and tanks warrant additional investigation to assess the subsurface soil, groundwater and soil vapor.

4.5. VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The Report User indicated no knowledge of any valuation reduction related to environmental concerns.

4.6. OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The Subject Property parcels are currently owned by Ossining Membership, LLC and are occupied by former textile and wood inlay manufacturing and is vacant land not currently in use.

5.0 RECORDS REVIEW

5.1. STANDARD ENVIRONMENTAL RECORD SOURCES: FEDERAL, CITY, STATE

5.1.1. EDR SEARCH

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR) and reported in the EDR Radius Map Report with GeoCheck. The Report meets the government records search requirements of ASTM Standard of Practice for Environmental Site Assessments, E-1527-21. Search distances are per ASTM standards. A Radius Map Check was performed by EDR and are provided in **Appendix D**. All properties in the search area with environmental records are listed below:

Table 5.1—Property Listings

The EDR Radius Map Report identified operations at the Subject Property in the following listings:

Superfund Enterprise Management System Archive (SEMS-Archive)

SEMS-Archive a federal list that tracks hazardous, potentially hazardous, and remedial action sites associated with the USEPA Superfund Program. Following remedial investigation at the facility, the USEPA determined that no additional assessment and/or remediation will be completed under the federal Superfund Program. Therefore, this site listed as Printex Corp., which was historically located on Lot 17 was removed from the Federal Superfund list on November 1, 1980 EPA ID NYD013008446. Nevertheless, the former operations associated with this facility are noted as **REC 1.**

NY State Hazardous Waste Sites (NY SHWS)

NY SHWS is a list of known contaminated facilities in New York. A review of the database as provided by EDR identified one (1) Class N No further action State Superfund listing for the Subject Property (Printer Corp.) Site No. 360002 at the 34 State Street address. The description noted "no known disposal of hazardous wastes at the site: and a "West. Co. D.O.H. investigation has determined that this site has not used lagoons to dispose of hazardous waste, but rather as concrete storage lagoons for treatment of process water" based on an investigation completed in November 1999 of the Printex Corporation of America operations. The lagoon and other former subject property operations are considered **REC 1**.

NY Underground Storage Tanks Sites (NY UST)

The NY UST database contains registered USTs maintained by the associated facilities. USTs are regulated under Subtitle I of the RCRA. A review of the database as provided by EDR identified the Subject Property listed as Creative Design Inc. (a/k/a Hudson River Inlay, Inc.) which was the specialized wood inlay company on the site from the 1980s until 2006. The USTs were noted under PBS No 3-600524. The following USTs were documented: 1x 10,000-gallon UST, closed in place on September 1, 1986; 1x 1,000-gallon UST, closed and removed on December 1, 1993; and 1x 3,000-gallon UST, closed and removed on December 1, 1993. These dates differ from the historic Phase II ESA produced by others, and one historic report said the tanks were closed in place. There were no spills associated with these USTs reported and no closure documentation has been received. These USTs are considered **REC 2**.

RCRA Non-Generators/No Longer Regulated (RCRA NonGen/NLR)

Resource Conservation and Recovery Act Non-Generators (RCRA NonGen) database searches USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information about facilities that generate, transport, store, treat and/ or dispose of hazardous waste as described by RCRA. Non-Generators do not presently generate hazardous waste. A review of RCRA NonGen/NLR list provided by EDR identified two (2) listings for the Subject Property (Con Edison and Hudson Steppe). Since the Subject Property does not generate hazardous waste and was only associated with wastewater treatment of the lagoon associated with the Printex operations, this listing is not considered to adversely impact the Subject Property.

The historic operations are listed as **REC 1.** There were listings of generating lead (2018) and spent solvent (2003) waste as included in the NY MANIFEST listings further discussed below.

Facility Index System/Facility Registry System (FINDS)

The FINDS database provides a list of facilities that maintain or previously maintained environmental permits or are listed under additional EDR report databases. A review of FINDS list provided by EDR identified two (2) listings for the Subject Property (Hudson River Inlay and Con Edison). Hudson River Inlay is noted as formerly manufacturing wood products. Both listings do not have any associated spills or violations that were identified. These listings are not anticipated to have adversely impacted the Subject Property.

USEPA Enforcement and Compliance History Online (ECHO)

The ECHO database provides a list of compliance and enforcement information for regulated facilities. A review of the ECHO list provided by EDR identified two (2) listings for the Subject Property (Hudson River Inlay and Con Edison). There were no listed violations associated with these facilities. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites; rather, each site will be further evaluated for listing on the Registry. So over time they will be added to the registry or not. A review of the database as provided by EDR identified one (1) listing for the Subject Property (Printex Corp). This historic operations associated with State Superfund program ID No 360002 are noted as the site code “leaking tanks, drums, lagoons, other containers.” Although there is no associated documentation, this historic operation is listed as **REC 1**.

MANIFEST Sites

MANIFEST Sites include a list of facilities that have generated hazardous waste or contaminants. A review of the NY MANIFEST list, as provided by EDR identified two (2) listings for the Subject Property (Con Edison and Hudson Steppe). The manifests listed the disposal of drums containing spent solvents, one (1) drum containing benzene and hazardous lead that appears to be associated with building demolition materials. No associated spills of these hazardous wastes were documented, and the quantity of the disposed materials is low. Therefore, these listings are not expected to have adversely impacted the Subject Property.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters. A review of the database as provided by EDR identified one (1) listing for the Subject Property (Hudson Steppe). The permit (NYR11A212) was associated with construction. There are no violations associated with this permit; therefore, the permit activities are not expected to have adversely impacted the Subject Property.

The EDR Radius Map Report identified operations at nearby sites in the following listings. A discussion of these listing is provided below:

National Priority List (NPL)

NPL is a federal list of sites with documented hazardous waste contamination or threatened releases of hazardous compounds/substances. According to the NPL list provided by EDR, there is one (1) NPL facility (GE Hudson River Sediment Remediation Processing An) located within approximately 0.125 miles of the Subject Property. The Hudson River contamination is not expected to adversely impact the Subject Property based on the location of the River as 0.124 miles west and downgradient of the Subject Property.

Superfund Enterprise Management System (SEMS)

SEMS a federal system that tracks hazardous, potentially hazardous, and remedial action sites associated with the USEPA Superfund Program. According to the SEMS list provided by EDR, there is one (1) SEMS facility (GE Hudson River Sediment Remediation Processing An) located within approximately 0.125 miles of the Subject Property. As previously discussed, the Hudson River contamination is not expected to adversely impact the Subject Property based on the location of the River as 0.124 miles west and downgradient of the Subject Property.

Superfund Enterprise Management System Archive (SEMS-Archive)

SEMS-Archive a federal list that tracks hazardous, potentially hazardous, and remedial action sites associated with the USEPA Superfund Program. Following remedial investigation at the site, the USEPA determined that no additional assessment and/or remediation will be completed under the federal Superfund Program. Therefore, this site was removed from the federal Superfund list. According to the SEMS list provided by EDR, there is one (1) SEMS-Archive facility (Ossining Historical Society) located within approximately one-half mile of the Subject Property. This facility is located 1,378 feet to the northeast of the Subject Property and does not have any reported spills or releases; therefore. the facility is not expected to have adversely impacted the Subject Property.

RCRA Large Quantity Generator (RCRA-LQG)

The RCRA-LQG includes a list of facilities that generate over 1,000 kilograms of hazardous waste, or over 1 kilogram of acutely hazardous waste per month. According to the RCRA-LQG list provided by EDR, there are three (3) RCRA-LQG facilities (GE Hudson Reiver Sediment Remediation Processing An, Ossining Village Of, and Con Edison – Ossining MGP - Consoli) within approximately 0.125 miles of the Subject Property. As these facilities are located to the north and west, and downgradient of the Subject Property, and therefore, these facilities are not expected to have adversely impacted the Subject Property.

RCRA Small Quantity Generator (RCRA-SQG)

The RCRA-SQG includes a list of facilities that generate more than 100 but less than 1,000 kilograms of hazardous waste per month and accumulate less than 6,000 kilograms of hazardous waste at any time. According to the RCRA-SQG list provided by EDR, there are two (2) RCRA-SQG facilities (Metallized Carbon Co and Harbor Square LLC.) within approximately 0.25 miles of the Subject Property. As these facilities are located to the north and west, and downgradient of

the Subject Property, and therefore, these facilities are not expected to have adversely impacted the Subject Property.

RCRA Very Small Quantity Generator (RCRA-VSQG)

The RCRA-VSQG includes a list of facilities that generate less than 100 kilograms of hazardous waste, or less than one (1) kilogram of acutely hazardous waste per month. According to the RCRA-VSQG list provided by EDR, there are three (3) RCRA-VSQG facilities (Montague Bros, Ossining Wastewater Treatment Plant, and Millers Cleaners) within approximately 0.25 miles of the Subject Property. These facilities are located greater than 488 feet from the Subject Property. Of these facilities, the Montague Bros facility contained a spill record; however, as this facility is located hydraulically downgradient from the Subject Property, therefore, this facility is not expected to have adversely impacted the Subject Property.

US Engineering Controls (US ENG CONTROL)

The US ENG CONTROL list identifies facilities that utilize caps, building foundations, liners and/or similar methods to protect human health and the environment. According to the US ENG CONTROLS list provided by EDR, there is one (1) US ENG CONTROLS facility (GE Hudson River Sediment Remediation Processing An) within approximately 0.125 miles of the Subject Property. As previously discussed, the Hudson River contamination is not expected to adversely impact the Subject Property based on the location of the river as 0.124 miles west and downgradient of the Subject Property.

US Institutional Controls (US INST CONTROLS)

The US INST CONTROLS list identifies facilities that utilize administrative restrictions to groundwater use, construction, property use and post-remediation care requirements to prevent exposure to remaining contamination. According to the US INST CONTROL list provided by EDR, there is one (1) US INST CONTROL facility (GE Hudson River Sediment Remediation Processing An) within approximately 0.125 miles of the Subject Property. As previously discussed, the Hudson River contamination is not expected to adversely impact the Subject Property based on the location of the river as 0.124 miles west and downgradient of the Subject Property.

NY State Hazardous Waste Sites (NY SHWS)

NY SHWS is a list of known contaminated facilities in New York. One (1) SHWS facility (CE – Ossining MGP) was located within 0.25 miles of the Subject Property. Due to the facility being 791 feet north of the Subject Property and topographically downgradient, this facility is not anticipated to have adversely impacted the Subject Property.

Solid Waste Facility/Landfill (SWF/LF)

The SWF/LF provides a list of facilities that operate solid waste disposal facilities. These facilities may be active or inactive, or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal facilities. A review of the SWF/LF list provided by EDR identified two (2) facilities (Ossining DPW Site and Paradise Heating Oil Site) within approximately 0.125 miles of the Subject Property. These facilities are located downgradient to the northwest of the Subject Property. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

NY Leaking Storage Tanks (NY LTANKS)

The NY LTANKS database contains an inventory of reported leaking underground and aboveground storage tanks. According to the NY LTANKS list provided by the EDR, there are 74 tanks located within one-half mile of the Subject Property. For the tank listings that are hydraulically upgradient of the Subject Property, the spill records were reviewed, and all spills were reported as closed by the NYSDEC. Therefore, all of these listings are not expected to have adversely impacted the Subject Property.

NY Underground Storage Tanks Sites (NY UST)

The NY UST database contains registered USTs maintained by the associated facilities. USTs are regulated under Subtitle I of the RCRA. Fifteen (15) NY UST facilities are located within approximately 0.25 miles of the Subject Property. Of these USTs, one (1) facility contained USTs adjacent to the Subject Property at 15-16 James Street (PBS No 3-800200). These USTs were reported as closed and removed with no associated spill documentation. Therefore, this facility is not expected to have adversely impacted the Subject Property.

NY Chemical Bulk Storage (NY CBS/NY CBS AST)

The NY CBS database contains registered chemical bulk storage facilities. The NY CBS list provided by the EDR identified three NY CBS facilities (Ossining Wastewater Treatment Plant, Ryan Pool Service, and Hudson Wire Co) and three CBS AST facilities (Ossining Wastewater Treatment Plant, Ryan Pool Service, and Hudson International Conductors) located within approximately 0.25 miles of the Subject Property. The location of these facilities is topographically downgradient of the Subject Property. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

Major Oil Storage Facilities (MOSF) Database, MOSF AST, and MOSF UST

The MOSF database identifies facilities that may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. A review of the database as provided by EDR identified one (1) NY MOSF and NY MOSF AST facility (Paradise Heating Oil Inc) within 0.125 miles of the Subject Property. The location of these facilities is topographically downgradient of the Subject Property. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

NY Above Ground Storage Tank Sites (NY AST/NY Tanks)

The NY AST/NY Tanks database contains registered ASTs and/or USTs maintained by the associated facilities. Twelve (12) facilities were identified within approximately 0.25 miles of the Subject Property. Although these facilities operate an AST(s), a release from these storage tanks has not been documented. SESI notes that the EDR report suggests the ASTs are in contact with the ground and cannot be inspected for evidence of failure. However, since failures of these ASTs was not documented, none of these facilities constitute a REC.

NY Engineering Controls (NY ENG CONTROL)/NY Institutional Controls (NY INST CONTROL)

The NY ENG CONTROL list identifies facilities that utilize caps, building foundations, liners and/or similar methods to protect human health and the environment. The NY INST CONTROLS database is a listing of sites that have a legal document (Institutional Controls) that restricts the use a of contaminated property and holds owner(s) and/or other responsible parties to the regulatory/statutory requirements for cleanup. These restrictions ensure protection of human health and the environment as long as they are maintained. According to the NY ENG CONTROL and NY INST CONTROL list provided by EDR, there are two (2) NY ENG CONTROL facilities

and two (2) NY INST CONTROL facilities (The Harbor Square Site and Hudson Wire Co) within approximately 0.25 miles of the Subject Property. The facilities are topographically downgradient to the west and northwest of the Subject Property. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

NY Voluntary Clean Up Program (NY VCP)

The NY VCP is a list of responsible parties, developers, local officials, or individuals working with the department to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment. A review of NY VCP list provided by EDR has identified two (2) (NY VCP facilities, CE – Ossining MGP and Hudson Wire Co), located within approximately 0.25 miles of the Subject Property. The facilities are topographically downgradient to the west and northwest of the Subject Property. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

NY BROWNFIELDS

NY BROWNFIELDS are facilities that are identified as former or current commercial or industrial use facilities that are presently vacant or underutilized, on which there is suspected to have been a discharge of contamination to the soil or groundwater at concentrations greater than applicable cleanup criteria. A review of NY BROWNFIELD list provided by EDR has revealed that there are three (3) NY BROWNFIELD facilities (Ossining DPW Site, The Harbor Square Site and Hudson Wire Co) within approximately 0.25 miles of the Subject Property. The facilities are topographically downgradient to the west and northwest of the Subject Property. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

NY SPILLS

NY SPILLS are facilities that have documented releases/spills associated with either petroleum bulk storage or chemical bulk storage at their facilities. According to the NY SPILLS list provided by EDR, there 61 NY SPILLS sites within 0.125 miles of the Subject Property. Of the facilities within 500 feet of the Subject Property, the spills were documented as closed by the NYSDEC. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

RCRA Non-Generators/No Longer Regulated (RCRA NonGen/NLR)

Resource Conservation and Recovery Act Non-Generators (RCRA NonGen) database searches USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information about facilities that generate, transport, store, treat and/ or dispose of hazardous waste as described by RCRA. Non-Generators do not presently generate hazardous waste. A review of RCRA NonGen/NLR list provided by EDR has revealed that there are 37 facilities within 0.25 miles of the Subject Property. Since none of these facilities currently generate hazardous waste, they are not expected to adversely impact the Subject Property.

CONSENT/ROD

The Consent/ROD list provides an inventory of facilities that have mandated and permanent remedies in place and Superfund sites containing technical and health information to aid in the cleanup. One (1) CONSENT/ROD facility, GE Hudson River Sediment Remediation Processing An, is within 0.125 miles of the Subject Property. As previously discussed, the Hudson River contamination is not expected to adversely impact the Subject Property based on the location of the River as 0.124 miles west and downgradient of the Subject Property.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS. A review of the database as provided by EDR identified one (1) facility (Ossining Wastewater Treatment Plant) within 0.125 miles of the Subject Property. This facility is topographically downgradient to the southwest of the Subject Property. Therefore, this facility is not expected to have adversely impacted the Subject Property.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials. A review of the database as provided by EDR

identified six (6) facilities within 0.5 miles of the Subject Property. Of the facilities that contain reported releases that are upgradient of the Subject Property, these facilities contained the status of “No Further Action”. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

E MANIFEST: Hazardous Waste Electronic Manifest System

EPA established a national system for tracking hazardous waste shipments electronically. This system, known as e-Manifest, will modernize the nation’s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. A review of the database as provided by EDR identified eight (8) facilities within 0.25 miles of the Subject Property. These facilities do not have any violations or spills that were identified. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

NY DRYCLEANERS Sites

NY DRYCLEANERS database provides a listing of active dry cleaner facilities. One (1) NY DRYCLEANERS site (Millers Cleaners) is within approximately 0.25 miles of the Subject Property. This facility does not have any documented spills and is located approximately 847 feet to the northeast and hydraulically downgradient. Therefore, this facility is not expected to have adversely impacted the Subject Property.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So over time they will be added to the registry or not. A review of the database as provided by EDR identified one (1) listing (Ossining Historical Society) within 0.5 miles of the Subject Property. This facility is located 1,378 feet to the northeast of the Subject Property and is

does not have any reported spills; therefore, the facility is not expected to have adversely impacted the Subject Property.

MANIFEST Sites

MANIFEST Sites include a list of facilities that have generated hazardous waste or contaminants. A review of the NY, RI, and NJ MANIFEST list, as provided by EDR, has revealed that there are 33 NY MANIFEST, two (2) RI MANIFEST facilities and 13 NJ MANIFEST facilities within approximately 0.25 miles of the Subject Property. Based on a review of the available database information, documented open spill cases were not found for facilities within the immediate vicinity of the Subject Property. Therefore, these listings are not anticipated to adversely impact the Subject Property.

MGP: Manufactured Gas Plants Listing

From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants. A review of the database as provided by EDR identified one (1) facility (CE- Ossining MGP) within 0.25 miles of the Subject Property. This facility is located to the north and downgradient of the Subject Property. Therefore, this facility is not expected to have adversely impacted the Subject Property.

EDR Manufactured Gas Plant (MGP) Sites

The MGP list provides an inventory of facilities that formerly operated coal gas plants. A review of the EDR MGP database, as provided by EDR, has revealed that there is one (1) MGP facility (Con Edison – Ossining Works – Ossining MGP) within approximately 0.125 miles of the Subject Property. This facility is located to the north and downgradient from the Subject Property. Therefore, this facility is not expected to have adversely impacted the Subject Property.

EDR Hist Auto Sites

The EDR Hist Auto list provides an inventory of facilities that formerly operated automotive repair or automotive gas stations. A review of the EDR Hist Auto database, as provided by EDR, has revealed that there are four (4) Hist Auto facilities (Depot Garage, Keller Amoco, Linard Automotive Repair, and Maresco Ralph) within approximately 0.125 miles of the Subject Property.

These facilities do not identify any known contamination or releases; therefore, these facilities are not expected to have adversely impacted the Subject Property.

EDR Hist Cleaner Sites

The EDR Hist Cleaner list provides an inventory of facilities that formerly/historically operated a dry-cleaning business. A review of the EDR Hist Cleaner database, as provided by EDR, has revealed that there are two (2) Hist Cleaner facilities (D A P Inc and Broad Avenue Laundry & Clrs*) within approximately 0.125 miles of the Subject Property. These facilities are located to the east of the Subject Property and there are no documented releases. Therefore, these facilities are not expected to have adversely impacted the Subject Property.

EDR City Directory

The EDR City Directory for properties in the area surrounding the Subject Property included mainly commercial listings including offices, stores, service businesses, and residences.

5.1.2. LOCAL, COUNTY, AND STATE INFORMATION REQUESTS

On June 2, 2025, SESI filed information requests with the New York State Department of Environmental Conservation; the Westchester County Departments of Health, Emergency Services, and Environmental Facilities; and the city of Ossining for information regarding potential incidents, spills, hazardous material storage/use and UST decommissioning records. On June 9, 2025, SESI submitted a FOIL request to the USEPA seeking information related to EPA ID NYD013008446 and requesting the investigative report for an EPA investigation that did not identify contamination that rose to the level of requiring federal Superfund listing.

At the time of this report, SESI had not received responses to the information requests. Should the responses contain information that alters the opinions and conclusions of this Report, SESI reserves the right to revise this Report based on this information. The information requests are presented in **Appendix C**.

5.2. PHYSICAL SETTING SOURCES

Sources used to evaluate the physical setting of the property include:

- USGS Topographic Maps
- Aerial Photographs

- Subject Property Reconnaissance

5.2.1. TOPOGRAPHY

The Subject Property and regional topography are generally decreasing to the west. According to the United States Geological Survey (USGS) Ossining/Haverstraw, New York, 7.5-minute Series topographic map, the Subject Property's topographic elevation is approximately 161.83 feet above mean sea level (msl). The EDR Topographic Map Report is attached to this Report as **Appendix D.**

5.2.2. SURFACE WATER AND WETLANDS

The closest open surface water to the Subject Property is the Hudson River located approximately 760 feet west of the Subject Property.

5.2.3. GEOLOGY AND GROUNDWATER

As per the USDA National Cooperative Soil Survey (NCSS) map for the area, the soils at the Subject Property are characterized as Uf (Urban Land) with the sloped area to the west containing CsD (Chatfield-Charlton complex), which is classified as containing 15 to 35 percent slopes and is noted as very rocky. Groundwater was not encountered at the Subject Property. The 2025 phase II investigation did not encounter groundwater to a depth of 25 ft bgs on the eastern, higher elevation, portion of the Subject Property. The groundwater flow direction is expected to be in the west direction following topography towards the Hudson River.

5.3. HISTORICAL USE INFORMATION FOR THE PROPERTY

Sources used to determine the historical use of the property include:

- Aerial Photographs,
- EDR City Directory Abstract,
- USGS Topographic Maps,
- Sanborn Fire Insurance Maps, and
- Environmental Lien and AUL Search Report

EDR Reports are attached to this Report as **Appendix D**.

5.3.1. AERIAL PHOTOGRAPHS

Following is a summary of the EDR review of 16 aerial photographs dated1940, 1947, 1953, 1957, 1961, 1964, 1974, 1976, 1985, 1989, 1994, 2006, 2011, 2015, 2019, and 2022:

Table 5.2—Aerial Photographic Review

Year	Quality of Photograph	Observations
1940, 1947	Fair	**Subject Property:** Several buildings are present in the northeast corner of the Subject Property. **Adjacent Parcels:** Structures that resemble residences are present to the north, south and east of the Subject Property.
1953	Good	**Subject Property:** The central to western portion of the Subject Property is wooded. Cleared areas are evident to the west and south of the buildings in the northeast corner. **Adjacent Parcels:** No discernible changes.
1957	Poor	**Subject Property:** A residence is apparent at the south. An additional structure is present at the northeast. **Adjacent Parcels:** No significant discernable changes.
1961. 1964	Good	**Subject Property:** Vehicles and parking are apparent at on Lot 17. **Adjacent Parcels:** Additional buildings are present on the property to the north.
1974. 1976, 1985, 1989, 1994	Good-Poor	**Subject Property:** The building in the northeast has been expanding and runs along the northern boundary of the Subject Property. Parking is evident to the east, west and south of the building. **Adjacent Parcels:** A large structure has been added off the southeast corner of the Subject Property.
2006	Good	**Subject Property:** Portions of the forested area to the west have been cleared with what appear to be some roads. This land use is considered **BER 1**. **Adjacent Parcels:** No significant discernable changes.
2011, 2015	Good	**Subject Property:** The western portion of the Subject Property is wooded again. The buildings in the southern portion of the Subject Property are no longer present. **Adjacent Parcels:** No discernible changes.
2019	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** The property to the north is paved and vacant.
2022	Good	**Subject Property:** Only two (2) structures are now present at the northeast. **Adjacent Parcels:** A new structure is present to the north.

No concerns were identified at the Subject Property. No concerns were identified at the properties surrounding the Subject Property.

5.3.2. HISTORICAL AND CURRENT SUBJECT PROPERTY OPERATIONS

SESI reviewed the City Directory Abstract, provided by EDR, for the Subject Property and conducted a limited municipal tenant search. The City Directory Abstract provides the name and operations of the property. A summary of previous operators at the Subject Property is presented in **Table 5.3** below. A copy of the City Directory Abstract is included in **Appendix D**.

Table 5.3—Historical Subject Property Operations

Year	Operations
1972	Vera Neumann Printex Corp
1977	Vera Neumann Printex Corp
1982	Vera Neumann Printex Corp
1987	The Cortlandt Grp Levine Graphics Vera Neumann Printex Corp Seville Assocs
1992	Art Business Consulting Cortlandt Group The Creative Designs Printex Corp
1995	Cortlandt Group The Creative Designs Han Corp Hudson River Inlay Original World Products
2000	Hudson River Inlay Incorporated Hudson River Valley Inlay U V Sales Incorporated United Vision Sales Incorporated Veith, Gary
2005	HRI Hudson River Inlay Inc Rotindo, D Service For Peace Inc Tavano, Gregory United Vision Sales Inc UV Sales Inc UVG Properties 1 LLC World Carp Inc
2010	Hudson, River I

Year	Operations
2014	Hudson River Inlay Incorporated Hudson, River I U V Sales Incorporated United Vision Sales Incorporated
2017	Hudson River Inlay Inc United Vision Sales Inc

Based on the city directory findings, the Printex Corporation has performed operations at the Subject Property circa 1972 to 1992. However, other documents indicated that operations occurred much earlier than this timeframe. This historic operation may have adversely impacted the Subject Property and is considered **REC 1**. A former laundry circa 1911 and 1980s to mid-2000s wood inlay facility may have also caused contamination associated with their operations and use of USTs

5.3.3. USGS TOPOGRAPHIC MAPS

Following is a summary of the EDR review of Topographic Map Reports:

Table 5.4—Topographic Map Review

Source	Year	Minute	Scale
Tarrytown	1892, 1893, 1902	15	62500
Ossining	1936	7.5	24000
Haverstraw	1938	7.5	24000
Ossining	1943	7.5	25000
Haverstraw/Ossining	1955, 1967, 1979, 2013, 2016, 2019	7.5	24000

The topographic maps depict the Subject Property level with an approximate 161.83 feet above msl. Regional topography slopes downward to the west. No wetlands were noted on the maps within or adjacent to the Subject Property. A review of these maps suggests the Subject Property was developed prior to 1892.

Based on a review of the EDR Historical Topographic Map Report, the surrounding properties to the eastern part of the property where the three (3)-story historic house building is located is relatively level; however, the western portion of the property slopes from approximately 180 to 70 feet above msl. No wetlands were observed within the general vicinity of the surrounding properties on the topographic maps.

5.3.4. SANBORN FIRE INSURANCE MAPS

The Subject Property was covered on 10 of the Sanborn maps from 1886, 1891, 1897, 1903, 1911, 1924, 1931, 1942, 1949, 1971 described below:

Table 5.5—Sanborn Map Review

Year	Quality of Map	Observations
1886	Good	**Subject Property:** One (1) structure is present on the Subject Property: a dwelling in the northeast corner. **Adjacent Parcels:** State Street forms the eastern boundary of the Subject Property. Hunter Street forms the western boundary. James Street is under construction along the southern boundary. Several structures are present to the north of the Subject Property.
1891, 1897, 1903	Good	**Subject Property:** Barn and shed structures associated with the dwelling are present to the southeast of the dwelling. Another dwelling is present as the southwest corner. **Adjacent Parcels:** Additional dwellings are present to the north of the Subject Property. Dwellings and tenements are present to the west, between the Subject Property boundary and Hunter Street.
1911	Good	**Subject Property:** A laundry, two (2) hen houses, and a garage are identified on the Subject Property. The laundry is considered **REC 1**. **Adjacent Parcels:** James Street (Orchard) to the south has been completed.
1924	Good	**Subject Property:** The former laundry is identified as ruins. A community club hall with stage and K of C building is identified in the northeast corner of the Subject Property. **Adjacent Parcels:** Additional apartments are identified to the north and south of the Subject Property.
1931	Good	**Subject Property:** The ruins are no longer present. Two (2) apartment buildings are present in the southern portion of the Subject Property. **Adjacent Parcels:** An additional apartment building is to the south, just outside the property lines.
1942	Fair	**Subject Property:** The structures on the Subject Property have not changed; the property is identified as Columbus Community Club. **Adjacent Parcels:** The property to the north is identified as Blanche Potter.
1949	Good	**Subject Property:** The two (2) buildings in the northeast corner of the Subject Property are identified a Printex

Year	Quality of Map	Observations
		Corporation of America - Screen Cloth printing, Cloth Printing with associated office. This is considered **REC 1.** **Adjacent Parcels:** No discernible changes.
1971	Good	**Subject Property:** Buildings have been added to the Printex campus, identified as printing, storage, boiler house and cloth washing. **Adjacent Parcels:** A parking lot is present to the south of the Subject Property.

Based on the review of Sanborn Maps, one (1) REC was identified associated with the historic operations at the Subject Property:

- A laundry building was identified at the eastern portion of the Subject Property circa 1911.
- Multiple buildings were identified as manufacturing operations that included the Printex Corporation of America, which included screen cloth printing, storage and cloth washing.

These are elements that may have adversely impacted the Subject Property and are considered **REC 1.**

5.3.5. ENVIRONMENTAL LIEN AND AUL SEARCH REPORT

Based on data provided by EDR, no environmental liens or any other activity or use limitations were found.

5.4. ENVIRONMENTAL PERMITS

A review of the EDR Radius Map Report for the Subject Property indicates one (1) State Pollution Discharge Elimination System (SPDES) permit associated with a previous entity (Hudson Steppe), which indicates the permit (NYR11A212) has been active for new construction as of 2003. This permit's activities are not expected to adversely impact the Subject Property. EDR Reports are provided in **Appendix D**.

6.0 SUBJECT PROPERTY RECONNAISSANCE

6.1. METHODOLOGY AND LIMITING CONDITIONS

An environmental professional from SESI, Tyler Fisher, visited the Subject Property on June 3, 2025 to identify potential RECs. The Subject Property was observed to the extent that it was accessible and not obstructed. An inspection photolog is attached to this Report as **Appendix E.**

6.2. SUBJECT PROPERTY OBSERVATIONS

The Subject Property is improved by one (1) three (3)-story historic house building, one (1) shed, parking areas and vacant land. Surfaces are covered by either former concrete building slabs, asphalt or vegetation cover.

6.3. CHEMICAL STORAGE AND USAGE

SESI observed some chemical storage in the shed that appeared to be used for maintenance. However, the concrete slab of the shed appeared to be intact with no observed staining. Therefore, spills from these containers are not expected to have adversely impacted the Subject Property.

6.4. BULK STORAGE TANKS

SESI identified one (1) aboveground yellow steel tank at the south of the Subject Property. The tank appears to be abandoned with the content being unknown. There was no evidence of staining, and the tank appeared to be in decent condition. This is considered **BER 2**.

It is also known that underground storage tanks may have been closed in place on the north central portion of the Subject Property. However, no evidence was identified during this walkthrough. The presence of the storage tanks and lack of closure documentation as previously discussed is considered **REC 2**.

6.5. SUBJECT PROPERTY WASTE AND WASTEWATER

SESI did not observe any waste or wastewater present at the time of the Subject Property reconnaissance. However, there were reports in previous reporting of a waste lagoon that was used to manage wastewater from the site operations on the Subject Property and associated with the State Superfund program (Site ID 360002) Printex Corporation of America operations. This

lagoon is considered part of the historic operations **REC 1**. The location of the former lagoon could not be identified during the Site visit.

6.6. STAINED SOIL, STAINED PAVEMENT, OR STRESSED VEGETATION

SESI did not observe any indications of stained soil, stained pavement, or stressed vegetation during the walkthrough.

6.7. PITS, PONDS, OR LAGOONS

No pits, ponds or lagoons were identified at the Subject Property. As previously discussed, the historic lagoon was not identified, however it is considered part of the historic operations of the Printex Corporation of America and noted as **REC 1**.

6.8. WELLS

SESI did not observe any on-site dry wells, irrigation wells, injection wells, observation wells, monitoring wells, potable water wells, recovery wells, or abandoned wells.

6.9. DRUMS

SESI observed one blue tote near the northern shed. The tote was filled with unknown unstained soil, and no staining was surrounding the plastic tote/drum, nor perforations in the drum itself. This is considered **BER 3.**

6.10. STOCKPILES

SESI observed several stockpiles of former building demolition debris throughout the property, specifically adjacent to the former building pads. This is considered **BER 4**. There appeared to be an excavator and dump truck that may be used for storing and exporting materials for municipal use. There are also some stockpiles of bedrock; however, this is not considered a concern.

6.11. FLOOR DRAINS AND SUMPS

There were no apparent floor drains or sumps that were observed during the walkthrough.

6.12. PCB

No pad or pole mounted transformers were observed on the Subject Property. However, as PCBs are often found in caulking, SESI recommends a survey for PCBs be conducted prior to demolition. This is considered **BER 5**.

6.13. ASBESTOS-CONTAINING MATERIAL

ACM surveying was not included in SESI's scope of work; however, based on the age of the facility, an ACM survey is recommended. This is considered **BER 5**.

6.14. RADON

Radon surveying was not included in SESI's scope of work; however, based on the location of the property, radon is not expected to be a concern as the property is within Zone 3, which is considered to have low levels of radon that are less likely to require mitigation. Therefore, no radon testing is recommended.

6.15. LEAD-BASED PAINT

LBP surveying was not included in SESI's scope of work; however, based on the age of the facility, an LBP survey is recommended prior to building demolition. This is considered **BER 5**.

6.16. VAPOR INTRUSION

Based on a review of information related to the Subject Property, vapor intrusion may be present from the former printing operations. The former operations are considered **REC 1**.

7.0 DATA GAPS

Based on a review of the available documentation, the following data gaps have been identified:

- SESI was not able to investigate the upper stories of the historic house due to the poor condition of the stairway. However, since the investigation of the lower areas where former mechanical equipment would have likely been present was made, SESI does not consider the lack of observation of the upper stories a significant data gap.
- SESI was not provided with responses to FOIA requests from the NYSDEC; Westchester County Departments of Health, Emergency Services, Environmental Facilities; the Village of Ossining, or the USEPA. Should SESI receive responsive records that alter the findings or conclusions of this Phase I ESA, SESI reserves the right to update this Report.

8.0 FINDINGS

Based on our investigation, we conclude that there is evidence to indicate areas of potential environmental concern on the Subject Property due to the historical usage as a textile manufacturing (printing) facility, a woodworking facility and the presence of historically active USTs. See ***Section 10.0 CONCLUSIONS*** of this Report.

9.0 OPINION

In our professional judgment, the scope and character of our environmental assessment were sufficient to justify the stated conclusions, after giving due consideration to the purpose of the investigation, the data reviewed, the background history of the Subject Property as found in historical records, and visual observation of the Subject Property.

10.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the investigation, it is concluded that there is evidence to indicate areas of recognized environmental concern on the Subject Property and that additional investigation of these areas is warranted. The conclusions and recommendations in this regard are as follows:

- **REC 1 – Subject Property Historic Operations:** The original historic house estate building was erected in 1840 as a residential structure; two (2) additions were built in 1929 as a community center; and in 1940-1981 further additions were added in 1968, which were occupied by the Printex Corporation of America as a scarf printing and textile design manufacturing facility. The facility utilized a wastewater treatment lagoon at the southeast. The lagoon was identified as part of the State Superfund program (Site ID No 360002) but based on comments from the Westchester County Department of Health (WCDOH) that the lagoon was only used for on-site wastewater treatment and not hazardous waste disposal associated with the former Printex operations, the Site was listed as a Class N – No further action site. Furthermore, there were woodworking operation on the Site from the 1980s to 2006 and some laundry operations at the center of the Subject Property circa 1911. **Based on this history observed from the Sanborn maps and previous reports, the historic operations from the textile, woodworking and laundry facilities may have adversely impacted the Subject Property and warrant further investigation.**

- **REC 2 – Underground Storage Tanks:** The following USTs were identified to be either closed in place or removed: 1x 10,000-gallon UST, closed in place on September 1, 1986; 1x 1,000-gallon UST, removed or closed in place on December 1, 2003; and 1x 3,000-gallon UST, removed or closed in place on December 1, 2003. No leaking underground storage tank (LUST) releases were reported. **However, no closure reports were identified. Identifying closure documents in a record review or confirming closure in a Phase II is recommended.**

- **REC 3 – Historic Fill:** Historic fill has reportedly been identified at the Subject Property during geotechnical and environmental investigations. **Additional subsurface soil sampling is recommended to characterize fill material should special handling and/or disposal of disturbed soil be required during Subject Property redevelopment.**

The following five (5) BERs have been identified:

- **BER 1 – Historic Land Use:** The historic 2006 aerial imagery identified clearing of vegetation on Lot 68; however, this vegetation returned in 2011 per the next available aerial. It was unclear if this area had been regraded or there were former operations on this lot that may have adversely impacted the Subject Property. **Further investigation is recommended into the use of Lot 68 and the reasoning for clearing. Additional soil investigation is recommended to determine if historic fill is present.**

- **BER 2 – Aboveground Storage Tank (AST):** SESI identified one (1) yellow steel aboveground storage tank adjacent to several unused items at the southwest of Lot 17. This tank appeared to not be in use and was intact, with no evidence of staining. **Therefore, no further investigation is warranted; however, proper disposal of this AST is recommended. No closure documentation is required.**

- **BER 3 – Drum:** There was one (1) plastic 55-gallon tote identified to the south of the northern shed. This tote appeared to contain soil and was unlabeled. No staining was visible around the tote and it appeared to be in good condition. **Therefore, SESI recommends proper removal/disposal of this tote.**

- **BER 4 – Stockpiles:** There were several stockpiles of building materials scattered throughout the Subject Property, around building footprints, and on the periphery of the vegetated area of Lot 68. These stockpiles were not observed to have exhibited petroleum impacts. **Therefore, SESI recommends the proper testing and disposal of these demolition debris prior to or during redevelopment.**

- **BER 5 – Hazardous Building Materials:** An asbestos containing material (ACM), lead-based paint (LBP), polychlorinated biphenyl (PCB) caulk and universal waste survey was not conducted as part of this Phase I Environmental Site Assessment. Based on the age of the structures located on the Subject Property, the presence of these materials cannot be ruled out. **Therefore, a comprehensive hazardous material survey is recommended prior to demolition or redevelopment.**

A figure showing the locations of the RECs identified at this Subject Property is included as **Figure 10.1**.

11.0 DEVIATIONS

This Report was prepared with no significant deviation from ASTM Standard Practice E1527-21.

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

As required in 40 CFR 312.21(d), this section includes statements made by the environmental professional conducting this assessment.

“I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.”

“I declare that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property.”

“I have developed and performed the ‘all appropriate inquiry’ in conformance with the standards, limitations, and practices set forth in 40 CFR Part 312.”

This Report incorporates the consultant's best professional judgment in conductance of this Phase One Environmental Site Assessment.

Client Provided Documents

First American Title™	Certificate of Title
	ISSUED BY **First American Title Insurance Company**
Certificate	

Title No. : BTA83688-E
Premises : 34 State Street, Ossining, NY 10562;
21 James Street, Ossining, NY 10562;
17 James Street, Ossining, NY 10562
Reference : WBP Development LLC from Ossining Membership, LLC

FIRST AMERICAN TITLE INSURANCE COMPANY ("the Company") certifies to the "proposed insured(s)" listed herein that an examination of title to the premises described in Schedule A has been made in accordance with its usual procedure and agrees to issue its standard form of title insurance policy authorized by the Insurance Department of the State of New York, in the amount set forth herein, insuring the interest set forth herein, and the marketability thereof, in the premises described in Schedule A, after the closing of the transaction in conformance with the requirements and procedures approved by the Company and after the payment of the premium and fees associated herewith excepting (a) all loss or damage by reason of the estates, interests, defects, objections, liens, encumbrances and other matters set forth herein that are not disposed of to the satisfaction of the Company prior to such closing or issuance of the policy (b) any question or objection coming to the attention of the Company before the date of closing, or if there be no closing, before the issuance of the policy.

This Agreement to insure shall terminate (1) if the prospective insured, his or her attorney or agent makes any untrue statement with respect to any material fact or suppresses or fails to disclose any material fact or if any untrue answers are given to material inquiries by or on behalf of the Company; or (2) upon the issuance of title insurance in accordance herewith. In the event that this Certificate is endorsed and redated by an authorized representative of the Company after the closing of the transaction and payment of the premium and fees associated herewith, such "redated" Certificate shall serve as evidence of the title insurance issued until such time as a policy of title insurance is delivered to the insured. Any claim made under the redated Certificate shall be restricted to the conditions, stipulations and exclusions from coverage of the standard form of title insurance policy issued by the Company.

In Witness Whereof, First American Title Insurance Company has caused its corporate name to be affixed by its duly authorized officers on the date shown in Schedule A.

CLOSING REQUIREMENTS

1. CLOSING DATE: In order to facilitate the closing of title, please notify the closing department at least 48 hours prior to the closing, of the date and place of closing, so that searches may be continued.

2. PROOF OF IDENTITY: Identity of all persons executing the papers delivered on the closing must be established to the satisfaction of the Company.

3. POWER OF ATTORNEY: If any of the closing instruments are to be executed pursuant to a Power of Attorney, a copy of such Power should be submitted to the Company prior to closing. THE IDENTITY OF THE PRINCIPAL EXECUTING THE POWER AND THE CONTINUED EFFECTIVENESS OF THE POWER MUST BE ESTABLISHED TO THE SATISFACTION OF THE COMPANY. The Power must be in recordable form.

4. CLOSING INSTRUMENTS: If any of the closing instruments will be other than commonly used forms or contain unusual provisions, the closing can be simplified and expedited by furnishing the Company with copies of the proposed documents in advance of closing.

5. LIEN LAW CLAUSE: Deeds and mortgages must contain the covenant required by Section 13 of the Lien Law. The covenant is not required in deeds from referees or other persons appointed by a court for the sole purpose of selling property.

6. REFERENCE TO SURVEYS AND MAPS: Closing instruments should make no reference to surveys or maps unless such surveys or maps are on file.

7. INTERMEDIARY DEEDS: In the event an intermediary will come into title at closing, other than the ultimate insured, the name of such party must be furnished to the Company in advance of closing so that appropriate searches can be made and relevant exceptions considered.

MISCELLANEOUS PROVISIONS

1. This certificate is intended for lawyers only. Your lawyers should be consulted before taking any action based upon the contents hereof.

2. The Company's closer may not act as legal advisor for any of the parties or draw legal instruments for them. The closer is permitted to be assistance only to an attorney.

3. Our policy will except from coverage any state of facts which an accurate survey might show, unless survey coverage is ordered. When such coverage is ordered, this certificate will set forth the specific survey exceptions which we will include in our policy. Whenever the word "trim" is used in any survey exceptions from coverage, it shall be deemed to include, roof cornices, moldings, belt courses, water tables, keystones, pilasters, portico, balcony all of which project beyond the street line.

4. Our examination of the title includes a search for any unexpired financing statements which affect fixtures and which have been properly filed and indexed pursuant to the Uniform Commercial Code in the office of the recording officer of the county in which the real property lies. No search has been made for other financing statements because we do not insure title to personal property. We will on request, in connection with the issuance of a title insurance policy, prepare such search for an additional charge. Our liability in connection with such search is limited to $1,000.00.

5. This company must be notified immediately of the recording or the filing, after the date of this certificate, of any instrument and of the discharge or other disposition of any mortgage, judgment, lien or any other matter set forth in this certificate and of any change in the transaction to be insured or the parties thereto. The continuation will not otherwise disclose the disposition of any lien.

6. If affirmative insurance is desired regarding any of the restrictive covenants with respect to new construction or alterations, please request such insurance in advance of closing as this request should not be considered at closing.

7. If it is discovered that there is additional property or an appurtenant easement for which insurance is desired, please contact the Company in advance of closing so that an appropriate title search may be made. In some cases, our rate manual provides for an additional charge for such insurance.

****NOTICE****

First American will collect fees to enable the recording of documents for this transaction. If it is thereafter determined that a Lender paid all or a portion of those recording fees, First American will promptly refund the amount paid by the Lender to the party from whom it was collected.

Old Republic Title Insurance Company
Stewart Title Insurance Company

The Good Faith Estimate quoted herein is made in accordance with our standard charges published on our website. The compensation to Benchmark Title Agency, LLC is also disclosed herein above. Please visit BenchmarkTA.com for additional information. IMPORTANT DISCLOSURE REQUIRED PURSUANT TO 11 NYCRR 30.3: This is to confirm your application for title insurance placed with Benchmark Title Agency, LLC, as agent for the Title Insurance Company as herein set forth. Agent will receive compensation as shown on this page. Alternative title insurance policy coverag and/or endorsements may be available. Please contact the Agent for a description of alternative coverage and premium quotes or for any other additional information. The premiums for policies of title insurance are approved by the New York State Department of Financial Services Insurance Division, pursuant to rate filings. The Underwriter used herein is a member of the Title Insurance Rate Service Association. These rates are standard for all members of the TIRSA, except for policies for an amount of less than one million dollars issued by the aforementioned underwriter pursuant to a deviation filing approved by the DFS which rate is 15% less than the TIRSA filed rate. The NYS DFS also approves policy and endorsement forms. The Agent does not have any material ownership interest in the Insurer, other than as disclosed in the order confirmation. The Insurance Law prohibits reducing or rebating any portion of the premium paid to the Insurer for the title insurance policy whether by reducing the Agents compensation or otherwise.

Role of the Title Agent: Benchmark Title Agency, LLC is a title insurance agency responsible for underwriting, processing, closing and issuing a title insurance policy to insure title to the property referenced above. Benchmark Title Agency, LLC is an independent agent of the title insurance underwriter insuring the transaction and neither company has ownership interest in the other. The agent / underwriter compensation is provided above and cannot be altered.

Ancillary and Discretionary Charges: This Good Faith Estimate (GFE) may also provide ancillary products and services which are necessary in connection with the issuance of title insurance and/or discretionary products and services which have been required by a party to the transaction. Both ancillary and discretionary products and services are disclosed therein as provided under NYS DFS Regulation 206 Section 35.6(a) and are in accordance with the published rates and fees of Benchmark Title Agency, LLC which can be found at www.BenchmarkTA.com.

Charges Subject to Change: This is a Good Faith Estimate (GFE) only and charges are subject to change. This GFE includes only charges which could be determined as of the GFE date above. Charges may change at any time at or prior to closing due to factors disclosed by the title insurance commitment, changes in the transaction details and/or other factors. An updated GFE may be obtained at any time by contacting the issuing company at (914) 250-2400.

Benchmark Title Agency, LLC

Title No. BTA83688-E

SCHEDULE B

SCHEDULE B in which are set forth the additional matters which will appear in the policy as exceptions from coverage, unless disposed of to the Company's satisfaction prior to the closing or delivery of the policy:

DISPOSITION

1. Rights of tenants or persons in possession, if any.

2. Taxes, tax liens, tax sales, water charges, sewer rents, and assessments as set forth herein.

3. Survey exceptions – see sheet annexed.

4. If the premises to be insured herein are serviced by a water meter, a final meter reading must be obtained and a bill for meter charges must be submitted at the time of closing. In the absence of an actual reading and a water bill, policy will except all meter charges from the date of reading.

   NOTE: CLOSER SHALL NOT OMIT THIS EXCEPTION FOR FEE POLICY UNLESS AN ACTUAL BILL IS PRESENTED AT CLOSING.

5. Subject to the provisions of Section 265-a of the Real Property Law known as the Home Equity Theft Protection Act effective February 1, 2007 and the right of a current or prior owner of the real property consisting of an owner occupied primary residence with one to four family dwelling units to cancel or rescind a conveyance or mortgage of the real property up to two years from the date of the recording of the conveyance or mortgage of the real property.

6. Re: Ossining Membership, LLC

   (a) Proof is required of its formation and that it has not been dissolved. Proof is also required that there has been no change in the composition of the Limited Liability Company.

   (b) A copy of its Articles of Organization, and any amendments thereto, must be delivered to the Company for review in advance of closing.

   (c) A copy of its Operating Agreement and any amendments thereto, must be delivered to the Company for review in advance of closing.

   (d) Proof is required that the transaction to be insured has been duly authorized.

NOTE: At least two-thirds in interest of the members at a duly called and noticed meeting are required to vote for or consent in writing to a sale, lease or mortgage, pursuant to Sections 402, 403, 405 and 407 of the Limited Liability Company Law. Counsel must be advised in advance of the closing if less than two-thirds have voted for or consented in writing to the proposed transaction (or that such a vote or consent is anticipated) to determine if there is or will be due authority to convey. Conveyances by a Limited Liability Company formed on and after August 31, 1999, and a previously formed Limited Liability Company having amended its Operating Agreement to so provide, may proceed on the vote of a majority in interest of its members.
The enclosed schedule of members must be executed by a member/manager of the Limited Liability Company, prior to or at closing.

For an LLC formed on or after June 1, 2006, proof of compliance with the requirement that the certificate of publication and affidavits of publication have been filed with the Department of State within 120 days of the date of its formation (publication for 6 weeks in 2 newspapers).

For an LLC formed before June 1, 2006, proof of compliance with the requirements that the certificate of publication and affidavits of publication were met (publication for 4 weeks in one newspaper). Alternatively, compliance with the new statutory requirements of publication for 6 weeks in 2 newspapers must be filed by May 31, 2007.

7. Searches, including judgments, federal tax liens and liens have been run against Ossining Membership, LLC, the certified owner(s) herein and the following must be disposed of: See returns herein.

8. Deed to be insured must contain the following recital: Being the same premises described in the deed into the grantor herein by deed recorded on 01/14/2021 in Control No. 603423810.

9. Application shows title vested in Ossining Membership, LLC, however, we have certified title subject to the power of sale in the referee pursuant to a judgement of foreclosure sale; Said action must be discontinued and the judgement of foreclosure and sale must be vacated. (Index No. 66698-2020)

10. The following mechanics lien must be disposed of, as same were tolled by the foreclosure action.
    a. Filed 8/11/2020 by Empire ECS LLC in the amount of $135,000.00. (ML-298-2020)
    b. Filed 8/11/2020 by Empire ECS LLC in the amount of 125,618.25 (ML-299-2020)
    c. Filed 10/28/2020 by Warshauer Mellusi Warshauer Architects in the amount of $272,787.33 (ML-390-2020).

Benchmark Title Agency, LLC

Title No. BTA83688-E

SCHEDULE B (continued)

11. Consolidated mortgages (4) held by NH Ossining Lendor, LLC to be disposed of. See Mortgage Schedule herein.

NOTE: The aforesaid mortgages are held of record by a non-institutional lender. Documents required of said lender, such as a satisfaction, assignment or instrument of subordination, must be delivered to Counsel for the Company at or prior to closing. The original note and mortgage must also be delivered if the mortgage is to be satisfied or assigned.

To be omitted upon receipt of a termination. JMP 4.1.25

12. Assignment of Leases and Rents recorded as Control No. 572833514 to be terminated by NH Ossining, Lendor, LLC.

Omit JMP 3.6.25 – prior FA policy in TP

13. The following mortgages are open of record and must be satisfied of record. See Mortgage Schedule herein:
    a. Consolidated mortgages held by Marine Midland Bank.
        (i) Assignment of Leases and Rents relating to said mortgage in Liber 8674 Page 259 Liber 9307 Page 258, Liber 10917 Page 237 and Control No. 460770088.
    b. Mortgage held by Union State Bank,
        (i) Assignment of Leases and Rents relating to said mortgage recorded as Control No. 451990461.
    c. Mortgage held by National City Co., dba Commonwealth United Mortgage Co.
    d. Consolidated mortgages held by Heartland Bank
    e. Mortgage held by Heartland Bank

Clearance from prior insurer
Note: Exception(s) 13 is/are being further investigated with prior title insurer Insignia Title under its title number ITC-7882-W-17FA. Please be advised that the notation that a particular exception is "being further investigated" does not mean that the exception(s) has/have been omitted or that the owner has been relieved of his/her/their obligation to dispose of said exception(s) at or prior to closing. Please note that providing this Company with a copy of the owner's title policy of insurance would assist in disposing of said exceptions.

14. Covenants and Restrictions in Liber 1497 Page 190 re-recorded in Liber 1624 Page 297. *(affects Tax Lot 68)*

SCHEDULE B (continued)

Omit (lot merger) JB 3/13/25

15. Reservation of Easement in Liber 8674 Page 287. *(affects Tax Lot 17)*

Omit (lot merger) JB 3/13/25

16. Declaration of Covenants and Restrictions in Liber 8674 Page 249. *(affects Tax Lot 68)*

Omit (lot merger) JB 3/13/25

17. Easement Agreement recorded as Control No. 441891468. *(affects Tax Lots 18 and 68)*

18. Notes, Easements and Conditions shown on Map No. 22435.

19. Premises are included in the IN REM proceeding filed by the Town of Ossining on July 19, 2022 Index No. 1571-22; Said premises must be removed from the Lis Pendens and the list of delinquent taxes.

NOTE: If the tax search contained herein reflects open taxes, proof of payment is to be displayed at or prior to closing.

NOTE: All Municipal, Departmental and Street Reports are **FOR INFORMATION ONLY**. They are not insured and this Company assumes no liability for the accuracy thereof. They will not be continued to the date of closing.

NOTE: If an assignment of mortgage is to be recorded there must be set forth in the assignment document or attached thereto and recorded as part thereof a statement under oath signed by the mortgagee or any other party to the transaction having knowledge of the facts (provided s/he asserts such knowledge), that the assignee is not acting as a nominee of the mortgagor and that the mortgage continues to secure a bona fide obligation.

NOTE: If there is a mortgage to be paid off at closing, please submit a current payoff letter in advance of closing in order to facilitate confirmation of amount and payoff procedures.

NOTE: Tax block and lot are to appear in the body of all closing instruments.

NOTE: Please be advised that personal checks in excess of $1,000.00 will not be accepted by this company.

Benchmark Title Agency, LLC

Title No. BTA83688-E

SCHEDULE B (continued)

PLEASE NOTE: ALL CHECKS FOR MUNICIPAL TAXES MUST BE MADE PAYABLE TO Benchmark Title Agency, LLC. WE WILL NO LONGER ACCEPT DIRECT CHECKS TO THE RECEIVER OF TAXES OR THE MUNICIPALITY CONCERNED.

NOTE: If the transaction is a sale or transfer the Combined Real Estate Transfer Tax Return and Credit Line Mortgage Certificate (TP-584) is to be signed by ALL PARTIES.

NOTE: If Power of Attorney is to be used to close this transaction, said Power must be submitted to the Company for approval, prior to closing.

New York Tax Law Section 1409(a)
LLC Grantor or Grantee of 1 to 4 Family Residential property

This document is submitted with Form TP-584, Form TP-584-NYC or Form NYC-RPT in compliance with Tax Law Section 1409(a) when a seller (grantor) or buyer (grantee) is a Limited Liability Company (LLC) and the property conveyed is a one-to-four-family residence or residential condominium. The ownership of the LLC and of its business entity members and managers must be disclosed until ultimate ownership by natural persons with 100% ownership of each entity reported.

The □ Grantor □ Grantee is _____, LLC.

The names and business addresses of all members, managers, and any other authorized persons of such LLC are as follow:

Name:	Business Address:

If any member of the LLC is itself an LLC or other business entity (corporation, general or limited partnership), the names and business addresses of the shareholders, directors, officers, members, managers and/or partners of that LLC or other business entity are as follow:

Name:	Business Address:

State: NY **County:** WESTCHESTER **Town:** OSSINING **Village:** OSSINING

Section: 97.07 **Block:** 2 **Lot:** 18

A search of the Building Department records in reference to the above mentioned premises has revealed the following information:

Predate Letter dated 6/2/1987 for a single family dwelling.

Certificate of Closure to close permit #1851 for a new building. permit #1851 was closed as it was superceded by predate letter dated 6/8/1987.

Open permit(s) requiring final inspection and/or certifications:

Building Permit #2743 issued on 11/10/2005 for the removal of one 275 gallon AST.

Note: The attached assessor's property Condominium shows that the single family dwelling was demolished in 2008 and that the property is currently vacant land. the Building Department is unable to locate a demolition permit for this particular parcel.

R. I. EMERICK
BUILDING INSPECTOR

June 2, 1987

TO WHOM IT MAY CONCERN:

Re: 21 James Street, Ossining, N. Y.
Section 3, Plate 12, Block 27, Lot 21

There is no record of a Certificate of Occupancy for the above referenced building. It is not the policy of the Village of Ossining to issue C.O.'s for buildings already constructed.

However, an inspection of the premises was made on June 2, 1987, which indicated that the present one family use of the structure is a legal, allowable use in this two family zone.

There are no current building violations of record.

Very truly yours,

George Pires

BARGAIN AND SALE DEED

THIS BARGAIN AND SALE DEED, made as of this 23 day of December, 2020, between **Ossining Land, LLC**, a New York limited liability company ("Grantor"), with an address of 405 Lexington Avenue, 59th Floor, New York, New 10174, and **Ossining Membership, LLC**, a Delaware limited liability company ("Grantee"), with an address of 405 Lexington Avenue, 59th Floor, New York, New York 10174.

W I T N E S S E T H :

That the Grantor, in consideration of Ten Dollars ($10.00) and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, does hereby grant and release unto the Grantee, their successors and assigns forever, the following:

ALL THAT TRACT OR PARCEL OF LAND, situate in the Village of Ossining, County of Westchester, State of New York, and being further described on the attached **Schedule A** hereto and made a part hereof.

TO HAVE AND TO HOLD the premises herein granted unto the Grantee, its successors and assigns forever.

[signature page follows]

IN WITNESS WHEREOF, the Grantor has caused this instrument to be executed and delivered as of the day and year first above written.

OSSINING LAND, LLC,
a New York limited partnership

…..The party of the second part however herby covenants and agrees and this indenture is made upon the conditions that the party of the second part shall not use or occupy said lot for the purpose of a saloon or Hotel nor use and building erected thereon for such a purpose and that the will not manufacturer or sell or keep for sale any malt spirituous nor intoxicating liquors nor permit the same to be manufactured stored sold or kept for sale upon said premises or any part thereof. The covenants and agreements herein contained on the part of the party of the second pare are to bind his grantees heirs and assignees. And it is mutually understood and agreed upon by and between the said parties hereto that each and every lot belonging to the party of the first part on the east side of Duration Avenue aforesaid and sold by her grantees heirs or assigns shall have the aforesaid restrictions in the conveyance thereof.….

Privacy Information

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet.
In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site.
There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.
FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.
Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.
Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.
Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.
Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.
Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

Phase I Environmental Site Assessment Questionnaire
For ASTM E 1527-21

According to the American Society for Testing and Materials (ASTM) standard practice for environmental site assessments (Designation: E 1527-21) "All Appropriate Inquiry" (AAI) (40 CRF 312.20) standard, the client must provide the following information (if available) to the environmental consultant during a Phase I Environmental Site Assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Client/Responsible Party Information (person completing this questionnaire) :

Name: James Wendling
Title: COO
Interest to Property: Purchaser
Ownership/Operational Duration: _____
Street Address: 480 Bedford Road
City: Chappaqua
State: NY
Phone: _____

Property Owner/Tenant Site Information:

Company Name: _____
Description of Operations: _____
Ownership/Operational Duration: _____
Street Address: _____
Township: _____
City: _____
County/State: _____
Size of Property: _____
Block/Lot: _____
Phone: _____
Contact: _____

I, James Wendling, to the best of my knowledge, have truthfully provided the information herein.
(FULL NAME)

SIGNATURE

6/3/25
DATE

Identification of the site contact and how the contact can be reached (person who will conduct or conducted the site walk and/or will provide or provided access):

1. ENVIRONMENTAL CLEANUP LIENS/OTHER LIENS

a. Are there any environmental cleanup liens/and or other liens that are filed or recorded against the site in any applicable jurisdiction?

No

2. ACTIVITY OR USE LIMITATIONS AND WETLANDS

A) Are you aware of any environmental restrictions/limitations to the use of the property? (i.e. Engineering or Institutional Controls)

No

i) If yes, please explain.

ii) Can you provide any lien or deed restriction paperwork (ie. deed notice or environmental lien)?

B) Is any of the site to your knowledge used as a child-care facility or are plans in place to have a child-care facility on-site?

No

C) Are there any wetlands or marshlands at the site to your knowledge?

No

3. COMMONLY KNOW OR REASONABLE ASCERTAINABLE INFORMATION ABOUT THE PROPERTY

A) Do you have any knowledge of the past uses of the property?

i) If so, please explain (dates or tenant contracts should be collected if available for any commercial or industrial uses).

Previously a cloth printing / washing company and residential, currently vacant / abandoned

ii) Has the property ever been used for industrial purposes?

Yes

a. If yes can you provide the NAICS code for the industrial use?

B) Do you know of any Environmental Spills Incident Numbers or Notices of Violation? (i.e., tank removals/Unregulated Heating Oil Tank removals)?

No

i) If yes, please provide information or available paperwork (ie. former reports or incident numbers)

C) Do you know if the site has been subject to an environmental cleanup or received a Closure Approval (No Further Action) or other Environmental Outcome in the past?

No

D) Do you know of any underground storage tanks (USTs), aboveground storage tanks (ASTs) and/or septic tanks?

No

E) Do any buildings on the site have a basement or crawlspace?

Basement

F) Does the site use/have an incinerator, compactor, or dumpster? (This should include any cooking oil containers or other media.)

No

G) How is heating and cooling supplied to the site?

a. If by oil, name of usual supplier:

N/A

b. If by gas, name of utility company:

N/A

c. If by electric, name of utility company:

Con Ed

H) How is water supplied to the site?

a. Local municipal hookup?
    i. If so, name of provider:

Village of Ossining

b. Potable Well?
    i. If so, well number/designation and location:

I) Is any portion of the site prone to flooding or has had a significant flood?

No

4. ADJOINING PROPERTIES

A) Have any of the adjoining properties been used for Industrial purposes currently or in the past?

No

i) If yes, please provide compass direction and name (if known) of the property.

B) Have any of the adjoining properties been used as a gas station, dry cleaner or auto shop currently or in the past?

No

i) If yes, please provide compass direction and name (if known) of the property.

C) Have any of the adjoining properties been used for commercial purposes currently or in the past?

No

i) If yes, please provide compass direction and name/ industry (if known) of the property.

D) Have any adjoining properties been used as a school currently or in the past?

No

i) If yes, please provide compass direction and name (if known) of the property.

E) Are any of the adjoining properties currently or in the future (to your knowledge) a child-care facility?

Yes

i) If yes, please provide compass direction and name (if known) of the property.

North, Ossining Children's Center

5. ENVIRONMENTAL SITE CONDITIONS

A) Are there any present environmental conditions at the site that may prove an obvious threat to the environment or human health?

No

B) Do you have any chemical storage areas?

No

C) Do you have any drum storage areas?

No

D) Do you have any USTs or ASTs not related to heating?

No

E) Do you have any of the following at or on the site:

a. On-site dry cleaning or washing machine facilities?

No

b. Landfills or known fill areas?

No

c. Machinery or equipment that uses hazardous or petroleum compounds?

Yes

d. Dust collectors?

No

e. Spray booths?

No

f. Floor drains or sumps?

No

g. Other machinery or equipment?

Yes

7. ADDITIONAL PERTINENT INFORMATION

A) Please provide the reason why the Phase I is required (i.e., sale, purchase, transfer, due diligence, cessation of operation, off-site source of groundwater contamination).

Purchase

B) Please provide the complete and correct address or addresses for the property (any previous surveys maps or any change in tax lot and blocks that are proposed or not yet recorded at the local/county municipality or re- zoning plans):

Subject Property			
Lot	**Property Owner(s) Name(s)**	**Property Address**	**Section-Block-Lot**
1	Ossining Membership LLC	34 State Street	97.07-2-17
2	Ossining Membership LLC	27 Hunter Street	97.07-2-68

C) Any additional services or out-of-scope services you wish to be provided in addition to the standard set of services (mold assessment/asbestos assessment/geotechnical/ lead-based paint/indoor or sub-slab air sampling):

D) Please identify all parties to your knowledge who will rely on this ESA? (excluding regulatory agencies)

E) Please provide any former Phase I or Phase II reports, incident reports, state records, reports, current or former permits for the operation of machinery, tank registration documents, AIRS permits, or other environmental permits.

Appendix B:

Environmental Reports and Relevant Historical Documents

Jonathan Kloos

Subject: Fwd: ossining - 34 state street phase 1
Attachments: Phase I ESA - Ossining 34 State Street.pdf

attached is the report we received and got reliance letters for

the review of the phase 2 gave us and the lender sufficient comfort that the 10k gallon tank had been dealt with in an appropriate manner

i believe that it is our intent to excavate and remove it as part of our site work

---------- Forwarded message ----------

1.0 EXECUTIVE SUMMARY

Team Environmental Consultants, Inc. (TEAM), was authorized by Union State Bank to conduct a Phase I Environmental Site Assessment (ESA) for a commercial property located at 34 State Street in Ossining, New York. The objective of this effort was to identify significant environmental impairments and liability issues associated with the subject properties. The requested scope of work included the following tasks: 1) Review of previously conducted Phase I and II ESA reports; 2) Performance of site interviews and a walk-through property inspection; 3) Review of a federal and state environmental database report; and 4) Documentation of findings in a Phase I ESA Report.

Based on the commercial site setting, availability of a municipal water supply, review of available information, performance of site interviews, and findings of the property walk-through inspection, no significant and immediate environmental liability issues associated with the subject property were identified.

2.0 PROPERTY DESCRIPTION

2.1 Site Description

The subject property is located along the western side of State Street, approximately one-quarter mile west of U.S. Route 9 (South Highland Avenue), in the Village and Town of Ossining, Westchester County, New York (Figures 1 and 2). The site is bordered to the north by a funeral home and private residences, to the east by State Street, residential properties, commercial businesses, and Broad Avenue, to the south by James Street and private residences, and to the west by an undeveloped wooded property (proposed location of a 46-unit condominium complex) and a residential apartment house structure located along James Street. The site topography rises gradually to moderately upwards from State Street and then slopes downwards towards the west/southwest. Photographs obtained during performance of the site inspection are presented within Attachment A.

The irregularly shaped 2.90-acre (~126,000-ft^2) property is currently operated as Creative Design, Inc. (CDI), a specialty woodworking (inlaid wood pictures) manufacturing business. The property is improved with a one, two, and part three-story approximately 60,000-ft^2 building which was reportedly constructed in three stages. The original three-story structure (~10,000-ft^2) was built circa 1840 as a private residence (current administrative office area). In 1929, an approximate

29,000-ft^2 three-story addition was completed and operated as a community club. The third building addition (~20,000-ft^2 two-story office/manufacturing area) was constructed in 1968. No documentation detailing historic site development or the performance of building renovation efforts was available for TEAM review. Proposed site development plans call for the demolition of portions of the current building and construction of a 54-unit residential townhouse complex. No site development plans were available for review.

CDI woodworking manufacturing operations are conducted on the first floor level. Also located within the ground floor building sections are assorted warehouse areas and utility rooms. The upper two-stories contain product storage/shipping facilities and office space. Two one-story garage structures are found within the western portion of the site. Paved parking areas are located within the southern and western sections of the property.

The site is located within a Town of Ossining Zoning Class WD-2 (Waterfront Development) district. The property is provided with a municipal water supply and sanitary waste treatment service (Village of Ossining and Westchester County Sewer District, respectively). Electrical service and natural gas are supplied by Consolidated Edison Utilities (ConEd). No site or regulatory information concerning the current onsite presence of any underground petroleum storage tanks was available. Non-hazardous solid waste is removed for offsite disposal by a private hauler. Utility connections are located both aboveground and underground.

2.2 Property Ownership

Information obtained from the Town of Ossining Tax Assessor's Office indicates the subject parcel (Tax Map Section 3.12, Block 27, Lot 20) to be owned by Creative Designs International. The property was reportedly formerly owned by Hudson River Inlay. No previously conducted title searches or documentation detailing historic property ownership was available for TEAM review.

2.3 Previously Conducted Environmental Site Assessments

TEAM was provided with the following three environmental reports associated with the 34 State Street property.

- January 21, 1994 - Dames & Moore Phase I Environmental Assessment
- May 7, 2003 - Elite Environmental Services Phase I Environmental Assessment
- May 16, 2003 - Elite Environmental Services Phase II Investigative Report

Summarized below for each document are the various findings, conclusions, and recommendations TEAM determined to be of a significant nature. Copies of these reviewed reports (text portions only) are provided within Attachment B.

January 21, 1994 - Phase I Environmental Site Assessment

This report was prepared by Dames & Moore (D&M), of Pearl River, New York, on behalf of Creative Design, Inc. (CDI). The Phase I ESA scope of work included a site description, review of property history and previously conducted 1992 Subsurface Investigations, Inc., Phase I and II environmental reports, performance of a site walkthrough inspection, and review of Sanborn Fire Insurance Maps and a federal/state environmental database report. The following findings and conclusions were presented in the D&M report:

- An asbestos survey was noted to have been conducted by Asbestos Research & Environmental Associates, Inc. (AREA) on September 24, 1992. The D&M report states that, "Based on the findings of this survey, an asbestos removal effort was undertaken by AREA to remove friable asbestos at the site. AREA, a licensed NYS asbestos abatement company, has determined that areas of known friable asbestos have been remediated." The D&M building inspection noted the presence of two areas of suspected asbestos containing materials (ACM), specifically the exterior wall tiles (observed to be in good condition) and sheetrock wallboard (indicated to be deteriorated due to moisture intrusion). D&M recommended that these materials be "managed" during future renovations or demolition;

- A closed in-place 10,000-gallon capacity underground fuel oil storage tank (UST) is situated within the western section of the property. The D&M report indicated that, "Subsequent to the purchase of the property, CDI uncovered and emptied the tank and abandoned it by filling with sand. The area was then back filled and covered with concrete. A subsurface investigation of the UST and other areas of concern was undertaken by Subsurface Investigations Inc. (SII) in a previous Phase II Environmental Assessment prepared for CitiBank. During the investigation of the UST, two borings were advanced to obtain soil samples. These samples were screened for volatile organic chemicals (VOC's) on site and were analyzed for Total Petroleum Hydrocarbons (TPH) by a NYS licensed laboratory. SII stated that the results of this analysis indicated that TPH concentrations were present in the range from 30 ppm to 114 ppm. Subsequently, Dames & Moore was retained by CDI to register this UST with the NYSDEC and apply for formal closure of the tank;"

• In an attempt to locate additional USTs, D&M conducted a ground penetrating radar (GPR) survey in October of 1993. Based on the findings of this investigation, "...two USTs (one 1,000 gallon and one 3,000 gallon) which contained a fuel oil/water mix were identified. In December of 1993, CDI retained Elmendorf Environmental Inc. of Elmsford, New York to perform an in-place closure of these tanks. In addition, CDI retained Dames & Moore to register the tanks with the NYSDEC, conduct the necessary soil sampling for tank closure and apply for tank closure with the NYSDEC. Results of soil sample analyses collected beneath the centerline of these tanks did not indicate the presence of petroleum hydrocarbon constituents in excess of NYSDEC soil cleanup criteria. Both of these USTs are found within the western section of the main manufacturing building;

• A waste treatment lagoon which was utilized by Printex Corp., was reportedly located within the southeastern section of the property. To identify issues of potential environmental concern associated with former use of this lagoon, SII performed a subsurface sampling investigation within this area. D&M indicated that based on review of an SII December 1992 Phase II report that, "SII concluded that the treatment lagoon had not adversely impacted the environmental quality of the property." TEAM was unable to obtain a copy of the SII report;

• The subject property is noted to have been placed on the CERCLIS (Comprehensive Environmental Response, Compensation, and Liability System - Potential hazardous waste sites that U.S. EPA is investigating for an existing or threatened release of hazardous substances) list for potential inclusion on the NPL (National Priority List - National listing of abandoned or uncontrolled hazardous waste sites). A site screening investigation and preliminary assessment of the site were reportedly conducted. The D&M report stated that, "At this time, the regulatory agency data base search lists that no further action has been taken by Federal or State agencies regarding this site. However, based upon information provided by CDI personnel, this site was delisted in 1983 after NYSDEC and EPA investigations failed to identify any potential hazards; and

• During the D&M building inspection, floor drains were identified at various locations. CDI personnel indicated that these drains and all generated wastewater streams discharge to the municipal sewer system. A paint/lacquer spray booth (vented to the outside of the building) and several dust collection devices were also observed. CDI manufacturing operations utilize paint thinners, wood stains, sealants, and glue products. No indications of improper storage or product leakage/spillage were referenced in the D&M report.

May 7, 2003 - Phase I Environmental Site Assessment

This report was prepared by Elite Environmental Services, Inc. (EES), of Thornwood, New York, on behalf of proposed property purchaser, Daniel Beaton. The Phase I ESA scope of work included a site description, review of property history and historic Sanborn Fire Insurance Maps (1886-1971), performance of a property walkthrough inspection, and review of a federal/state environmental database report. The following findings and conclusions were presented in the EES report:

- During performance of the EES property inspection, no water supply wells, aboveground petroleum/chemical storage tanks, active underground petroleum storage tanks, septic systems, PCB-containing equipment, hazardous substance use, or suspected onsite wetland areas were identified. A visual asbestos survey noted the presence of suspected asbestos containing floor tiles within the "work areas in the site building." These tiles were reported to be in "good condition at the time of inspection." EES recommended performance of an asbestos survey prior to the performance of any renovation or demolition activities;

- The EES report stated that, "According to the environmental database, concrete storage lagoons for the treatment of process water were located on-site. During the inspection, storage lagoons were not located;" and

- Based on historic site use and the presence of three closed in-place underground petroleum storage tanks, EES recommended performance of a Phase II subsurface investigation. Identified "target areas" included: 1) location of underground storage tanks, 2) areas of concrete storage lagoons, and 3) garage area where automobile and truck repair work is performed.

May 16, 2003 - Phase II Environmental Site Assessment

Based on the findings of the Elite Environmental Services, Inc. (EES) Phase I ESA, property purchaser, Daniel Beaton authorized EES to perform a Phase II site investigation. The scope of work included the installation of nine soil borings within the western (vicinity of closed in-place 10,000-gallon UST and storage garages) section of the property utilizing a van mounted Geoprobe system.

Field activities were conducted on May 14, 2003. Collected soil samples were field screened utilizing a portable Mini Rae Photo Ionization Detector (PID) to provide a "direct reading of the

concentration of volatile organic vapors in the sample, reported in ppm" (parts per million). The EES report stated that, "Field screening results indicate no volatile organic vapor compounds were found in the soil samples collected during the soil boring program" No samples are indicated to have been collected for laboratory analysis.

3.0 SITE INSPECTION

On April 28, 2005, TEAM together with proposed property purchaser, Dan Beaton (34 State Street, LLC), conducted an inspection of accessible portions of the site building and surrounding property. The requested scope of work did not include performance of any field sampling activities (e.g., asbestos, soil, radon, or groundwater) or completion of a formal regulatory compliance audit, as it would relate to the use, handling, storage, permitting, or disposal of regulated materials and waste products.

3.1 Property Inspection

Inspection of accessible property surrounding the building (extremely difficult due to the property terrain and presence of parked vehicles, stored equipment, leaf litter, and vegetation) revealed no unusual odors or visual evidence of significant surface staining that could be indicative of leaking petroleum storage tanks, chemical spills, or industrial waste disposal. No PCB-labeled electrical equipment, aboveground petroleum storage tanks, suspected underground petroleum storage tank fill ports or vent pipes, water supply or groundwater monitoring wells, or industrial waste storage or disposal facilities within the exterior property confines were observed.

No surface water bodies or significant freshwater wetland habitat areas were observed within or proximate to the subject property. The Hudson River is situated approximately one-quarter mile to the west. The requested Phase I ESA scope of work did not include performance of formal wetland or flood plain delineation surveys.

During the April 28, 2005 site inspection, TEAM observed performance of a test pit investigation in the vicinity of the closed in-place 10,000-gallon UST by Elite Environmental Services, Inc. (EES). As part of this investigation, EES uncovered the top portion of the tank and excavated sand/gravel located within the UST. In addition, test pits were advanced on two sides of the tank (below the bottom of the UST). No petroleum odors or visual evidence of soil staining were noted by either TEAM or EES field personnel. At the completion of this effort, the tank and excavated test pits were subsequently backfilled to grade.

3.2 Building Inspection

Inspection of accessible interior building sections (extremely difficult due to the size of the structure and the presence of woodworking equipment and supplies) revealed no unusual odors or visual evidence of underground or aboveground petroleum/chemical storage tanks, PCB-labeled electrical equipment, significant chemical spillage/surface stains, or industrial waste storage facilities. According to CDI representatives no commercial vehicle servicing or maintenance operations are conducted onsite. Generally good housekeeping practices were observed throughout the facility.

No exposed suspected friable asbestos containing materials (e.g., pipe wrap, electrical or boiler insulation) were observed during performance of the facility walkthrough inspection. Due to the age of the building, asbestos containing materials (ACM) may be associated within the site structure. The requested scope of work did not include performance of a formal asbestos or lead-based paint sampling survey.

3.3 DTCS Phase II Environmental Site Assessment

Based on historic site use and proposed property development plans, TEAM recommended performance of a property-wide Phase II ESA site investigation. Property purchaser, Dan Beaton (34 State Street, LLC) subsequently retained DT Consulting Services (DTCS) to perform a subsurface investigation of the 34 State Street property. DTCS concentrated its investigation in the following areas:

- Known PBS locations found in the northern quadrant of the site;
- Reported location of waste treatment lagoon (utilized by Printex Corp.) situated within the southeastern corner of the property; and
- General equipment maintenance and storage area located within the western portion of the site.

As part of this May 10, 2005 site investigation, a track mounted Geoprobe drill rig installed soil borings at seven property locations to depths ranging from approximately eight to twelve feet below grade. A DTCS geologist performed soil screening and classification immediately following collection of subsurface soil samples. Samples were screened for volatile organic compounds

(VOCs) utilizing an HNu photoionization detector (PID). Three composite soil samples were also collected for laboratory analysis of volatile/semi-volatile organic compounds (VOC's/SVOC's) and priority pollutant metals. Groundwater was not encountered during performance of the Phase II field investigation. A May 31, 2005 DTCS Phase II ESA report (copy found in Attachment C) presented the following field observations and conclusions.

- "While performing this investigation, headspace screening yield the non-detect total petroleum hydrocarbons in parts-per-million within each soil profile analyzed. In addition, no visual or olfactory signs of subsurface contamination were encountered while field testing soils from each borehole location;

- Based upon field observations and testing, DTCS can conclude that noticeable signs of subsurface contamination were not detected while collecting samples from each borehole location. Although laboratory analysis revealed the presence of some targeted VOC's/SVOC's and priority metals, all were within New York State Department of Environmental Conservation (NYSDEC) Soil Quality Guidance Values (TAGM #4046, January 1994); and

- Currently, the need to perform additional investigative and/or remedial measures does not appear warranted based upon the findings of this Phase II ESA. Therefore, it is DTCS's opinion that no further action is required at this time within the area of study."

4.0 RECORDS REVIEW AND DOCUMENTATION

4.1 Federal and State Database Report

TEAM has obtained an Environmental FirstSearch Network (EFSN) Site Assessment Report which provides information concerning the target property and those sites located within an ASTM established radius and listed in any of the following Federal and State databases:

- National Priority List (NPL);
- Resource Conservation and Recovery Information System (RCRIS),
  Large Quantity Generators and TSD Facilities,
  Small Quantity Generators and Transporters;
- State Spills Database (SPILLS);

- Comprehensive Environmental Response, Compensation, and Liability System (CERCLIS);
- Emergency Response Notification System (ERNS);
- Leaking Storage Tanks (LUST);
- Active Solid Waste Facility Register (SWL); and
- Registered Bulk Storage Tanks (UST/AST).

The EFSN Database Report presented in Attachment D, identifies no NPL, CERCLIS, or SWL sites within the ASTM established survey radius. Two LUST, fourteen SPILLS, one NFRAP, and one STATE site are located within a one-eighth to one-quarter mile distance. The subject 34 State Street property (Printex Corp./Hudson River Inlay) is identified in the NFRAP, RCRIS, and STATE Databases. The NFRAP listing notes performance of a Preliminary Assessment and Site Inspection on November 1, 1980. The STATE Database site description states that, "Westchester County Department of Health investigation has determined that this site has not used lagoons to dispose of hazardous waste, but rather concrete storage lagoons for treatment of process water...No known disposal of hazardous wastes at this time." The RCRIS Database notes the Hudson River Inlay facility to be a small quantity hazardous waste generator. No violations are noted for this business.

The nearest SPILLS site (private residence) is situated approximately 200-feet to the northeast at 6 Broad Avenue. The Spill Date for this property is listed as April 24, 1997 (5-gallon No. 2 fuel oil tank overfill). The remedial status is indicated to be "closed." The closest LUST site Descon Woodworking) is found approximately 600-feet to the northeast at 100 Spring Street. The Spill Date is identified as October 11, 2002 (gasoline tank failure). The remedial status is noted to be "closed." The proximity of EFSN identified sites would not appear to impact or pose significant environmental liabilities with respect to current property use or water quality issues.

4.2 Regulatory Review - NYSDEC/Westchester County Health Department

The requested Phase I ESA Update scope of work did not included submittal of Freedom of Information Legislation (FOIL) requests to Region 3 of the New York State Department of Environmental Conservation (NYSDEC) or Westchester County Health Department Office of Environmental Health Risk Control, which administers the NYSDEC Petroleum Bulk Storage Program in Westchester County.

5.0 CONCLUSIONS

Based on the commercial site setting, availability of a municipal water supply, review of available information, performance of site interviews, and findings of the property walk-through inspection, no significant and immediate environmental liability issues associated with the subject property were identified. No additional environmental site investigations are recommended at this time.

6.0 LIMITATIONS

The conclusions stated are based on the limits of the investigation described herein. TEAM can offer no assurances and assumes no responsibility for site conditions or activities which were outside the scope of the inquiry requested. In performing its investigations, TEAM has used reasonable care and has performed its work in keeping with industry standards and standard engineering practice, as appropriate. It should be understood that TEAM has relied on the accuracy of documents, oral information, and other material and information provided by sources documented in this report. There can be no assurance, and TEAM offers no assurance, that site conditions do not exist or could not exist in the future which were undetected and which could lead to liability in connection with the site. Similarly, past and present activities on the site indicating potential environmental concerns may not have been discovered by TEAM's inquiries.

The Phase I Environmental Site Assessment Update was prepared for Union State Bank in accordance with all regulatory and good management standards, and to the best of our knowledge, is complete and accurate.

RE: PHASE II ENVIRONMENTAL SITE ASSESSMENT
34 State Street
Ossining, Westchester County, New York

Dear Mr. MacIntosh:

Pursuant to your request for a Phase II Environmental Site Assessment (ESA) to be performed at the above referenced facility, DT Consulting Services (DTCS) is pleased to submit the following report for your review.

If you should have any questions regarding the enclosed, please feel free to contact me at (845) 658-3484. DTCS thanks you for the opportunity to work with you on this project.

Sincerely,
DT CONSULTING SERVICES

Deborah J. Thompson
Senior Geologist / Project Manager

ANALYTICAL PACKAGE ..... A

1.0 INTRODUCTION/ SITE INFORMATION

DT Consulting Services (DTCS) has been contracted by Union State Bank to perform a Phase II Environmental Site Assessment (ESA) or Subsurface Investigation on the property located at 34 State Street, Ossining, Westchester County, New York. A site location map and a site (base) plan (**Figures 1 and 2**, respectively) are included for your reference. At present, said property is being utilized as a specialty woodworking shop/warehouse and houses associated office facilities. At the time of this report, businesses including Creative Designs, Inc. and Original World Products share the site to perform business activities.

The ±3 acre property is improved with a ±60,000 square foot structure historically constructed in three separate phases. The original building was erected in 1840 as a residential unit. In 1929 two additions were built (approximately 7,000 and 22,000 square feet respectively) onto the structure, then utilized as a community center. Afterward, from the mid 1940's until 1981 the property was employed by Printex Corporation of America as a cloth printing and textile design facility. A final addition, which encompasses the site structure as seen today, was constructed in 1968.

At present, potable water and wastewater disposal are provided by the City of Ossining Water and Sewer Districts, respectively. A majority of adjacent land-use includes various residential complexes (both single and multi-family) in each cardinal direction.

The purpose of this Phase II Environmental Site Assessment is to determine if historical – present day operations have impacted subsurface materials on the property located at 34 State Street, Ossining, New York. Phase I ESA (due diligence) activities as performed by Team Environmental Consultants, Inc. (TEAM) and others (Dames & Moore, 1994) have identified historic industrial site use including petroleum bulk storage (PBS) operations on the subject property. In addition, the site had been placed on the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list for potential inclusion on the National Priority List in April of 1980. Upon completion of investigative activities, the site was de-listed in 1983 after potential environmental hazardous were not identified. Thus, based upon knowledge of site activities and the potential future development of the subject property for residential use, a Phase II ESA was deemed appropriate for the site to characterize and quantify any contaminants present within subsurface materials.

2.0 SUBSURFACE INVESTIGATION

Based upon operations throughout the active history of the subject property, DTCS concentrated its investigative efforts surrounding:

1. The known PBS locations located in the northern quadrant of the property.

2. The waste treatment lagoon historically documented in the southeast corner of the property, as utilized by Printex Corporation of America.

3. The general equipment maintenance and storage area along the western portion of the site.

The Phase II ESA was concentrated in these areas due to their potential for environmental liability issues. To provide background conditions of the subsurface, a select up gradient location was also chosen as a sample collection point. Thus, DTCS focused field activities to provide the following data:

- Collect and classify subsurface materials encountered surrounding the aforementioned area(s) in question.

- Provide quantitative data on targeted volatile/semi-volatile organic compounds (VOC/SVOC) and priority pollutant metals (if detected) within subsurface materials on-site.

- Offer recommendations as necessary, to address subsurface contamination if encountered during the course of this investigation.

The location of each borehole (SB-1 – SB-7) may be reviewed in **Figure 2**, attached.

2.1 *Soil Sampling Procedures*

DTCS mobilized to the site on May 10, 2005 to perform the subsurface investigation. Employing a Geoprobe track mounted 4x4 drill rig, soil samples were collected at each borehole location continuously from grade to an approximate depth of eight (8) - twelve (12) feet below grade surface (bgs) or until resistance was encountered. The samples were obtained by advancing a twenty-four (24) inch long, two (2) inch outer diameter, split spoon sampler into undisturbed soils. To prevent cross-contamination, all sampling equipment was

decontaminated between each soil boring location. A total of seven (7) soil borings were performed during this investigation.

An on-site DTCS Geologist performed screening and classification immediately following collection of subsurface materials. The screening was conducted using a HNu Photoionization Detector or PID. As most petroleum products contain volatile organic compounds, PID screening can indicate the presence of volatile organics in a soil sample.

2.2 *Soil Characterization*

As detected during this investigation, the lithology of overburden materials encountered at the facility can be characterized as light brown sandy loam (fill) with traces of gravel - approximately 0-4 feet bgs, underlain by fine-medium sand with clay and schist fragments. Based upon localized outcrops as observed on-site, resistance on account of detection of the bedrock surface was encountered between eight (8) and nine (9) feet below grade within soil borings SB-1 – SB-3 and SB-5 & SB-6. Overburden materials as encountered adjacent to the site structure were found to thin, when bedrock was detected between three (3) and four (4) feet below grade surface. Groundwater was not encountered during the Phase II ESA performed on site.

Upon removal from the subsurface, headspace screening was subsequently performed on each soil sample interval (i.e. 0-4'/4-8'). This screening was performed by placing the selected soil sample in a Ziploc® style freezer bag, sealing the bag, and after a short pause, yielding stabilized readings with a PID calibrated to 100 parts-per-million (ppm) isobutylene standard. While performing this investigation, headspace screening yielded the non-detect total petroleum hydrocarbons in parts-per-million within each soil profile analyzed. In addition, no visual or olfactory signs of subsurface contamination were encountered while field testing soils from each borehole location.

2.3 *Laboratory Analysis*

During investigative procedures, soil samples were collected from the bottom two (2) feet of each borehole, pending detection of the bedrock surface. Samples submitted for laboratory analysis were composited as follows:

Sample No. 001 = SB-1 – SB-3
Sample No. 002 = SB-4 & SB-5
Sample No. 003 = SB-6 & SB-7

Soils collected during the investigation were analyzed for volatile and semi-volatile organic compounds and priority pollutant metals via EPA Test Methods 8260w/MTBE, 8270 B/N and 7471 respectively. The complete laboratory package may be found in **Attachment A** for your review.

3.0 FINDINGS/CONCLUSIONS

The property located at 34 State Street, Ossining, Westchester County, New York has historically been utilized to operate commercial/industrial businesses. Upon review of documented environmental issues previously identified in available due diligence reports, a Phase II ESA was deemed necessary for the site prior to its alternate development as residential property.

Based upon field observations and testing, DTCS can conclude that noticeable signs of subsurface contamination were not detected while collecting samples from each borehole location. Although laboratory analysis revealed the presence of some targeted VOC's/SVOC's and priority metals, all were within New York State Department of Environmental Conservation (NYSDEC) Soil Quality Guidance Values (TAGMS #4046, January 1994) as follows:

VOLATILES/SEMI-VOLATILES (8260/8270 B/N)

Parameter	*Guidance Value (ug/kg)*	*Soil Boring #1 - #3*	*Soil Boring #4 & #5*	*Soil Boring #6 & #7*
Naphthalene	13,000	15	U	U
n-Butyl benzene	10,000	6	U	U
Benzo[a]anthracene	224 or MDL	61	U	U
Fluoranthene	50,000	90	U	U
Pyrene	50,000	78	U	U

PRIORITY POLLUTANT METALS (7471)

Parameter	Guidance Value (mg/kg)	Eastern USA Soil Background (mg/kg)	Soil Boring #1 - #3	Soil Boring #4 & #5	Soil Boring #6 & #7
Antimony	*SB*	N/A	5.85	8.55	5.54
Arsenic	*7.5 or SB*	3 – 12	5.84	4.79	8.44
Beryllium	*0.16 or SB*	0 – 1.75	U	U	U
Cadmium	*1 or SB*	0.1 – 1	0.53	0.60	0.51
Chromium	*10 or SB*	1.5 – 40	15.5	20.8	21.7
Copper	*25 or SB*	1 – 50	22.3	27.1	18.7
Lead	*SB*	*	18.6	17.2	32.3
Nickel	*13 or SB*	0.5 – 25	11.6	16.7	14.5
Selenium	*2.0 or SB*	0.1 – 3.9	1.83	2.81	2.39
Silver	*SB*	N/A	U	U	U
Thallium	*SB*	N/A	U	U	U
Zinc	*20 or SB*	9 – 50	44.5	52.2	45.1
Mercury	*0.1*	0.001 – 0.2	U	U	U

NOTES:

- The presented guidance values were adopted by NYSDEC in Appendix A of TAGM #4046, Soil Cleanup Objectives.
- Guidance and sample concentrations are reported in ug/kg or parts-per-billion for VOC/SVOC parameters and mg/kg or parts-per-million on the Priority Metals.
- U = Not detected.
- SB indicates average Eastern USA background soil levels.
- *Background levels for lead vary widely. Average levels in undeveloped, rural areas may range from 4-61 ppm. Average background levels in metropolitan or suburban areas or near highways are much higher and typically range from 200-500 ppm.

Currently, the need to perform additional investigative and/or remedial measures does not appear warranted based upon the findings of this Phase II ESA. Therefore, it is DTCS's opinion that no further action is required at this time within the area of study.

4.0 LIMITATIONS

DTCS has prepared this site assessment using reasonable efforts in each phase of its work to determine the extent of subsurface petroleum contamination (if any) within the locations of potential environmental concern. This report is not definitive, and should not be assumed to be a complete or specific definition of all conditions above or below grade. The conclusions/recommendations set forth herein are applicable only to the facts and conditions described at the time of this report.

Ossining, New York
EBI Project No. 1117000093

Dear Mr. Stefan Malter:

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you. This report has been completed in general conformance with the ASTM Standard E 1527-13.

The purpose of this report is to assist *Ossining Land Holdings LLC* in its underwriting of a proposed mortgage loan on the Subject Property described herein.

This report is addressed to *Ossining Land Holdings LLC* and their respective successors and assigns.

Reliance on the report and the information contained herein shall mean (i) the report may be relied upon by *Ossining Land Holdings LLC*, in determining whether to make a loan evidenced by a note secured by the Subject Property ("the Mortgage Loan"); (ii) the report may be relied upon by any loan purchaser in determining whether to purchase the Mortgage Loan from *Ossining Land Holdings LLC*, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the report may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; and (iv) the report speaks only as of its date in the absence of a specific written update of the report signed and delivered by EBI Consulting.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to *Ossining Land Holdings LLC*. Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,
EBI CONSULTING

EXECUTIVE SUMMARY

At the request of Ossining Land Holdings LLC, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 34 State Street, 17-25 James Street, & 27 Hunter Street - (Sec. 97.07;Lots 17, 18, 68) in Ossining, New York, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes three contiguous irregular-shaped parcels cumulatively totaling approximately 5.9 acres. The Subject Property is currently improved with two, three-story, former manufacturing buildings. There is a basement beneath the northern building and a crawl space beneath the southern building. The original part of the northern building was constructed in the 1830s and expanded in the 1920s. The southern building was constructed in the 1950s. Three small single-story outbuildings are located west of the northern building, and a single-car garage building is located to southwest.

At the time of assessment, the buildings at the Subject Property were vacant. The western part of the site, west of the developed portion, is undeveloped wooded land. There are currently no manufacturing or industrial operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

ASSESSMENT SUMMARY TABLE
34 STATE STREET, 17-25 JAMES STREET, & 27 HUNTER STREET - (SEC. 97.07;LOTS 17, 18, 68)
OSSINING, NEW YORK

Vapor Migration	**4.1.4**	☒	☐	☐	☐	☐	No Further Action	

(1) All available documentation regarding the USTs removed from the Property or closed in-place at the Property should be provided to EBI for review to further determine if environmental concerns remain. If this additional information is inconclusive or if no additional information is available, then a review of the State files for these tanks is recommended to gather additional information. Cost to review any additional information provided and to review any regulatory files will be $100 per hour, not to exceed $1,000 without prior client approval. If information from the State is inconclusive or if no additional pertinent information is available, then a Phase II subsurface investigation is recommended to determine if these tanks have adversely impacted the environmental integrity of the Property. The scope of work for a subsurface investigation could be influenced by the findings of the document review, therefore a cost for subsurface investigation activities is not available at this time.

(2) It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

1.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 34 State Street, 17-25 James Street, & 27 Hunter Street - (Sec. 97.07;Lots 17, 18, 68) in Ossining, New York.

1.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

1.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, and radon.

1.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of Ossining Land Holdings LLC, in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by Ossining Land Holdings LLC (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the

extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of *ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit Ossining Land Holdings LLC to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject

Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with authorities having jurisdiction over the Subject Property. Ossining Land Holdings LLC agrees that EBI has no obligation to independently verify the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI Services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

1.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to assist Ossining Land Holdings LLC in its underwriting of a proposed mortgage loan on the Subject Property. This report can be relied upon by only the parties stated in the transmittal letter at the front of this report. In the event that EBI provides a purchaser written permission to use this report, EBI's liability to such purchaser is limited to the cost of the report. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and EBI's contract and report extends to Ossining Land Holdings LLC only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

1.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report. It should be noted that at the time this report was issued EBI had not received responses to requests for information from the Village of Ossining Building Department and Fire Department, and the Westchester County Department of Health. However, based on the historical information obtained through other sources, this historical data gap is not considered to have significantly impacted the ability to identify recognized environmental conditions and does not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Westchester County Assessor's Office, the Subject Property is currently owned by Ossining Land LLC and Hunter James Associates LLC.

The Subject Property is located at 34 State Street, 17-25 James Street, & 27 Hunter Street - (Sec. 97.07;Lots 17, 18, 68) in Ossining, Westchester County, New York. The Subject Property includes three contiguous irregular-shaped parcels, identified by the Westchester County Assessor's Office as Tax ID 97.07-2-17, -18 and -68, cumulatively totaling approximately 5.9 acres. The Subject Property is located in the northwest quadrant of the intersection of State Street and James Street. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Ossining, New York. Figure 2 - Locus Map depicts the location of the Subject Property on the Ossining, New York United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is currently improved with two, three-story, former manufacturing buildings. There is a basement beneath the northern building and a crawl space beneath the southern building. The original part of the northern building was constructed in the 1830s and expanded in the 1920s. The southern building was constructed in the 1950s. Three small single-story outbuildings are located west of the northern building, and a single-car garage building is located to southwest.

The existing buildings are located on the northeastern and eastern portion of the property. An asphalt-paved surface parking area is located to south. The western portion of the Subject Property is undeveloped land. Land and building areas are as follows:

SUBJECT PROPERTY IMPROVEMENTS				
Address	**Floors**	**Basement**	**DOC**	**Lot Size (Acres)**
North building	3	Yes	1830-1920s	5.9
South building	3	No (crawl space)	1950s	Inclusive

SF: Gross Square Feet (estimated)
DOC: Date of Construction

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of assessment, the buildings at the Subject Property were unoccupied. The western part of the site, west of the developed portion, is undeveloped wooded land. There are currently no manufacturing or industrial operations conducted at the Subject Property.

Please refer to Section 5.2 for discussion regarding hazardous substances and petroleum products at the Subject Property.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	**Provider/Source**
Potable Water Supply	Town of Ossining
Sewage Disposal System	Town of Ossining
Electrical Service	Consolidated Edison
Natural Gas Service	Not applicable
Oil Service	Not applicable
Heating/Cooling Systems	None observed
Emergency Power	Not applicable

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by residential and retail/commercial development, as well as undeveloped, wooded land.

ADJOINING PROPERTIES	
North	The eastern part of the Subject Property is bound to the north by the Leech & Thomas Funeral Home (32 State Street) while the western part of the Subject Property is bound to the north by undeveloped land.
South	The central and eastern part of the Subject Property is bound to the south by James Street, beyond which are single-family homes. The western part of the Subject Property is bound to the south by an apartment complex, Oxford House Apartments (15 and 16 James Street) and by single-family homes that front on Hunter Street to west.
East	The Subject Property is bound to the east by State Street, beyond which are single-family homes, apartments and a convenience store (Nunez Mini Mart, (9 Broad Avenue).
West	The Subject Property is bound to the west by Hunter Street, with single-family homes beyond. One single-family home is present on the east side of Hunter Street but is not a part of the site.

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by Ossining Land Holdings LLC with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The User Questionnaire and any additional documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by Ossining Land Holdings LLC. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

Ossining Land Holdings LLC provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

Ossining Land Holdings LLC provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Ossining Land Holdings LLC provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Ossining Land Holdings LLC provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Ossining Land Holdings LLC provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

Ossining Land Holdings LLC retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in Appendix E.

The database report identified three "orphan" sites. Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**
Federal NPL Sites	1.0 mile	No	**1**
Federal Delisted NPL Sites	0.5 mile	No	0
Federal SEMS Sites	0.5 mile	No	**1**
Federal SEMS-ARCHIVE Sites	0.5 mile	**Yes**	**1**
Federal RCRA CORRACTS Sites	1.0 mile	No	0
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	**Yes**	0
Federal Engineering / Institutional Control Sites	0.5 mile	No	**1**
Federal ERNS Sites	Property	No	NA
Federal FINDS Sites	Property	**Yes**	NA
State and Tribal equivalent NPL / CERCLIS Sites	1.0 / 0.5 mile	**Yes**	0
State and Tribal Spills Sites	Property	No	NA
State and Tribal Landfill or Solid Waste Disposal Sites	0.5 mile	No	**2**
State and Tribal Leaking Storage Tank Sites	0.5 mile	No	**70**
State and Tribal Registered Storage Tank Sites	Property & Adjoining	**Yes**	**1**
State and Tribal Engineering / Institutional Control Sites	0.5 mile	No	**1**
State and Tribal Voluntary Cleanup Sites	0.5 mile	No	**2**
State and Tribal Brownfield Sites	0.5 mile	No	**1**

4.1.1 Federal Agency Database Records

National Priority List (NPL)

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. The Subject Property was not identified on the NPL database. However, one site located within 1.0 mile of the Subject Property was identified on the NPL database. Information regarding the listed site is presented in the following table:

NPL			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Hudson River PCBs No Street Applicable Hudson River, New York	700 feet / West / Downgradient	NYD980763841	Discovery: 07/01/1983 Proposed: 09/08/1983 Status: Final 09/21/1984 Contaminants: PCBs Media Impacted: Surface water, sediments

* Presumed hydrogeologic gradient based upon regional topography

The Hudson River PCBs Site includes a nearly 200 river-mile stretch of the Hudson River in eastern New York State from the Village of Hudson Falls to the Battery in New York City. This federal Superfund Record of Decision (ROD) addresses the risks to people and ecological receptors associated with polychlorinated biphenyls (PCBs) in the in-place sediments of the Upper Hudson River. The Site is divided into the Upper Hudson River, which is the length of river between Hudson Falls and the Federal Dam at Troy, New York and the Lower Hudson River, which is the length of river between Federal Dam at Troy and the Battery. EPA further divided the Upper Hudson River area into three main sections known as River Section 1, River Section 2, and River Section 3. The Site also includes five Remnant Deposits, which are areas of PCB-contaminated sediment that became exposed after the river water level dropped following removal of the Fort Edward Dam in 1973. The Upper Hudson River portion of the Site extends from the Fennimore Bridge in Hudson Falls to the Federal Dam at Troy, a distance of just over 43 river miles. The Lower Hudson River extends from the Federal Dam to the southern tip of Manhattan at the Battery in New York City. The Mid-Hudson River, which is primarily a subset of the Lower Hudson River, extends from the Federal Dam at Troy to just south of Poughkeepsie.

The predominant sources of PCB contamination to the Upper Hudson River were two capacitor manufacturing plants owned and operated by GE. The plants are located adjacent to or near the Hudson River in the Village of Hudson Falls and the Town of Fort Edward. Over a 30-year period, the plants discharged a substantial amount of PCBs into the river. At the GE Hudson Falls plant, leakage of non-aqueous phase PCB-bearing oils through bedrock to the river continues to be a source of PCB contamination. Regarding the former outfall to the Hudson River from the GE Fort Edward plant, New York State Department of Environmental Conservation (NYDEC) issued a ROD in January 2000 that calls for the excavation of PCB-contaminated soil and sediment in this area of the Upper Hudson River shoreline in order to eliminate this source of PCBs to the river. EPA's analysis assumes a significantly reduced PCB loading to the river from these sources once the State's plans for remediation are implemented. PCBs, the chemicals of concern addressed in this decision document, have been classified by EPA as probable human carcinogens. They are also linked to other serious non- cancer adverse health effects based on observations in animals and emerging evidence in humans. Once discharged from the GE plants, the PCBs adhered to river sediment and accumulated downstream as they settled in impounded pools and other depositional areas.

Historic fish and sediment data indicated PCBs were accumulating downstream of the old Fort Edward Dam as well as accumulating behind the dam. The removal of the dam in 1973 resulted in a remobilization and downstream distribution of PCBs that had accumulated behind the dam. Historically, the highest PCB sediment concentrations have been detected in the cohesive sediments within the Upper Hudson River. River scouring and erosion and other mechanisms have mobilized PCB contaminated sediments from the extensive cohesive deposits, redepositing them farther downstream all the way to the Battery. The preponderance of data indicates that burial of contaminated sediment by cleaner materials is not universally or uniformly occurring. Data also indicate that contaminated sediments in River Sections 1, 2 and 3 continue to serve as the major source of PCBs to the water column and the fish within the Upper Hudson River. During an approximate 30-year period ending in 1977, PCBs were used in capacitor manufacturing operations Hudson Falls and Fort Edward, New York facilities. PCB oils were discharged both directly and indirectly from these plants into the Hudson River. This included both non-permitted and permitted discharges. Even after permits were received in 1975, permit exceedances occurred. Estimates of the total quantity of PCBs discharged directly from the two plants into the river from the 1940s to 1977 are as high as 1,330,000 pounds (about 605,000 kg). The Site passes through 14 different counties as the river flows to its final discharge point in New York Harbor. Four counties (Albany, Washington, Rensselaer, and Saratoga) lie adjacent to the more highly contaminated portions (areas of proposed active remediation in River Sections 1, 2 and 3) of the Upper Hudson River between Troy (Federal Dam) and Hudson Falls. Within these four counties, forests and farmlands surround urban centers and historic villages. A Record of Decision (ROD) addressing operable unit 1 (OU 01) was completed in September 1984. A Record of Decision addressing OU 2 was completed in February 2002.

Based upon the nature of the contamination, the ongoing remediation activities and distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified NPL facility represent an environmental concern to the Subject Property.

Delisted National Priority List (NPL)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)

SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Subject Property was not identified on the SEMS database. However, one site located within 0.5 mile of the Subject Property was identified on the SEMS database. Information regarding the listed site is presented in the following table:

SEMS			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Hudson River PCBs No Street Applicable Hudson River, New York	700 feet / West / Downgradient	NYD980763841	Discovery: 07/01/1983 Proposed: 09/08/1983 NPL Status: Final NPL Listing 09/21/1984 Contaminants: PCBs Media Impacted: Surface water, sediments

* Presumed hydrogeologic gradient based upon regional topography

The Hudson River PCBs Site was discussed previously as an NPL site.

SEMS – ARCHIVE

SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. The Subject Property and one site located within 0.5 mile of the Subject Property were identified on the SEMS-ARCHIVE database. Information regarding the listed sites is presented in the following table:

SEMS-ARCHIVE			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Printex Corp 34 State St Ossining, New York	Subject Property	NYD013008446	Discovery: 04/01/1980 Preliminary Assessment: 11/01/1980 Status: SEMS-ARCHIVE
Ossining Historical Society 36 South Highland Ave Ossining, New York	0.26 mile / East-Northeast / Crossgradient	NYD987001450	Discovery: 05/05/1992 Preliminary Assessment: 12/26/1992 Status: SEMS-ARCHIVE

* Presumed hydrogeologic gradient based upon regional topography

According to our review of historical records Printex Corp was a tenant at the Subject Property from the 1940s through the 1990s and was a silk screening operation. Based upon the current regulatory status, it was determined that this facility didn't qualify for the NPL.

Based upon the distance and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified SEMS-ARCHIVE facility represent an environmental concern to the Subject Property.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. The Subject Property was identified on the RCRA Generator database. Information regarding the listing is presented in the following table:

RCRA GENERATORS			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Hudson Steppe 34 State St Ossining, New York	Subject Property	NYR000119529	RCRA SQG as of 07/27/2016 No violations found

* Presumed hydrogeologic gradient based upon regional topography

The Subject Property (Hudson Steppe) is listed as a RCRA Small Quantity generator. Based upon information presented in the environmental database report, Hudson Steppe generated hazardous waste (lead), presumably during abatement of lead-based paint that was reportedly performed at the existing buildings in 2016. No violations were reported for Hudson Steppe. The regulatory database shows that a former tenant of the Subject Property, Hudson River Inlay, was listed as a RCRA Small Quantity Generator from 1979 through 2006 and generated ignitable waste. No violations are listed. Another former tenant, Con Edison, is listed as a RCRA Non-Generator as of 2008. No violations are listed. Based upon the absence of reported violations and the site conditions observed at the time of EBI's reconnaissance, the RCRA-SQG database listings for Hudson Steppe and Hudson River Inlay are not considered to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. The Subject Property was not identified on Federal Engineering Control or Institutional Control Registries. However, two sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries. Information regarding the listed sites is presented in the following table:

FEDERAL ENGINEERING CONTROL AND INSTITUTIONAL CONTROL REGISTRIES			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Hudson River PCBs No Street Applicable Hudson River, New York	700 feet / West / Downgradient	NYD980763841	Agency: USEPA Engineering Control: Sediment/SW dewatering, excavation, disposal, & treatment Institutional Control: NA Status: Final 09/21/1984 Contaminants: PCBs Media Impacted: Surface water, sediments

* Presumed hydrogeologic gradient based upon regional topography

The Hudson River PCBs Site was discussed previously as an NPL site.

Emergency Response Notification System (ERNS)
ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

Facility Index System/Facility Registry System (FINDS)
FINDS is a centrally managed database by the EPA that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The database provides information regarding environmental activities that may affect air, water, and land in the United States. It is usually a cross-reference to other sources/databases that contain more detail. Two former tenants of the Subject Property (Hudson River Inlay and Con Edison) are listed on the FINDS database on the Environmental Interest/Information System. No violations are reported. Based on our observations during the site reconnaissance, it is considered unlikely that conditions associated with the FINDS listing represent an environmental concern to the Subject Property.

4.1.2 State and Tribal Agency Database Records

State and Tribal equivalent NPL Sites and CERCLIS Sites
State and tribal equivalent NPL and CERCLIS databases were searched for sites located within 1.0 mile and 0.5 mile of the Subject Property, respectively. The Subject Property was identified on state and/or tribal equivalent NPL and CERCLIS databases. Information regarding the listing is presented in the following table:

STATE AND TRIBAL EQUIVALENT NPL SITES AND CERCLIS SITES			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Printer Corp 34 State St Ossining, New York	Subject Property	NYD013008446	Notification Date: Not reported Contaminants: Not reported Media Impacted: NA Status Date: 12/16/2003 Date of Closure: NA

According to the database report, a former tenant of the Subject Property, Printer Corp, is listed on the New York SHWS database. The database indicates the Subject Property was investigation by the Westchester Department of Health (DOH) which determined the tenant did not use lagoons to dispose of hazardous waste, but used concrete storage lagoons for the treatment of process water. The listing also indicates "no known disposal of hazardous wastes at this site." Based upon the current regulatory status and EBI's observations during our site reconnaissance, there do not appear to be any releases reported and it is considered unlikely that conditions associated with the identified listing represent an environmental concern to the Subject Property.

State and Tribal Spills Sites (Spills)

A review of available Spills databases was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the Spills database.

State and Tribal Landfill Sites and Solid Waste Disposal Sites

The state and tribal landfill and solid waste disposal site databases identify active or inactive landfill and transfer station facilities, as well as open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The Subject Property was not identified on state or tribal landfill and solid waste disposal site databases. However, two sites located within 0.5 mile of the Subject Property were identified on state or tribal landfill and solid waste disposal site databases. Information regarding the listed sites is presented in the following table:

STATE AND TRIBAL LANDFILL SITES AND SOLID WASTE DISPOSAL SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Facility Status**
North Water Street Organic Transfer Station 30 Water St Ossining, New York	0.114 mile / North-northwest / Crossgradient to Downgradient	60R24	Facility Type: Transfer Station Facility Status: Active No Reported Violations
Paradise Heating Oil 1 Quimby St Ossining, New York	0.135 mile / Northwest / Crossgradient to Downgradient	60O01	Facility Type: Waste Oil Storage, reprocessing or re-refining facility Facility Status: Active No Reported Violations

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of reported violations and distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

State and Tribal Leaking Storage Tank Sites

Leaking Storage Tank Sites are properties where releases of hazardous substances or petroleum products from underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) have been identified and reported to state, tribal, or local agencies. The Subject Property was not identified on state or tribal Leaking Storage Tank databases. However, 70 sites located within 0.5 mile of the Subject Property were identified on state or tribal Leaking Storage Tank databases. The 70 listed sites are all listed with a regulatory status of "closed," and because the Subject Property is located on a hilltop none of the listed sites are upgradient of the Subject Property. Based upon the regulatory status and hydrogeologic position relative to the Subject Property, these sites are considered unlikely to represent

an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property.

State and Tribal Registered Storage Tanks

The Subject Property and one adjoining property were identified on state or tribal Registered Storage Tank databases. Information regarding the listed sites is presented in the following table:

STATE AND TRIBAL REGISTERED STORAGE TANKS				
Location	**Distance / Direction / Gradient***	**Capacity / Contents**	**Year Installed**	**Status**
Creative Design Inc 34 State St Ossining, New York	Subject Property	(1) 3,000-gallon UST / Contents not reported	Not reported	Removed (1993)
		(1) 1,000-gallon UST / Contents not reported	Not reported	Removed (1993)
		(1) 10,000-gallon UST / Contents not reported	Not reported	Closed in place (1988)
15-16 James Street 15-16 James Street Ossining, New York	Adjacent / South / Crossgradient	(2) 2,000- gallon UST / Contents not reported	Not reported	Removed (1999)
		(2) 2,000- gallon UST / Fuel Oil	2008	Removed (2015)

* Presumed hydrogeologic gradient based upon regional topography

Creative Design is a former tenant of the Subject Property and is listed as having three USTS. According to the database, a 10,000-gallon UST was closed in place at the Subject Property on September 1, 1986. Two more USTs, a 1,000-gallon capacity tank and a 3,000-gallon tank, were removed on December 1, 2003. No releases (LUSTs) were reported. EBI was not provided with any prior reports or closure documents regarding the UST removals/abandonment, or any plans or other documents indicating the location of the former USTs. Because it isn't known if they adversely impacted the Subject Property, these former USTs are considered a *recognized environmental condition (REC)*.

15-16 James Street are the two apartment buildings (Oxford House Apartments) that bound the western part of the Subject Property to south. The apartments are listed as having two 2,000-gallon UST removed in 1999, with two additional USTs removed in 2015. No releases (LUST cases) were reported. Based upon the absence of reported releases and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with this identified state or tribal Registered Storage Tank site represent an environmental concern to the Subject Property.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. The Subject Property was not identified on state or tribal Engineering Control or Institutional Control Registries. However, one site located within 0.5 mile of the Subject Property was identified on state or tribal Engineering Control or Institutional Control Registries. Information regarding the listed site is presented in the following table:

STATE AND TRIBAL ENGINEERING CONTROL / INSTITUTIONAL CONTROL REGISTRIES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Hudson Intl Conductors 62 Water St Ossining, New York	0.202 mile / North-northwest / Crossgradient to Downgradient	57382	Notification Date: Not reported Contaminants: Cadmium, chromium, zinc, cyanide, chlorinated solvents Media Impacted: Soil & GW Status: Closed, with ongoing monitoring Date of Closure: 12/2010

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified site represent an environmental concern to the Subject Property.

State and Tribal Voluntary Cleanup Sites

The Subject Property was not identified on state or tribal Voluntary Cleanup Site databases. However, two sites located within 0.5 mile of the Subject Property were identified on state or tribal Voluntary Cleanup Site databases. Information regarding the listed sites is presented in the following table:

STATE AND TRIBAL VOLUNTARY CLEANUP SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
CE-Ossining MGP 39 Central Ave and 30 Water St Ossining, New York	0.150 mile / North-northwest / Crossgradient to Downgradient	57904	Site Type: Former manufactured gas plant Responsible Party: Con Edison Notification Date: Not reported Contaminants: Coal tar, VOCs, SVOCs, BTEX Media Impacted: Soil & GW Status: Active Date of Closure: NA
Hudson Intl Conductors 62 Water St Ossining, New York	0.202 mile / North-northwest / Crossgradient to Downgradient	57382	Site Type: Former wire manufacturing Responsible Party: The Wire Mill, LLC Notification Date: Not reported Contaminants: Cadmium, chromium, zinc, cyanide, chlorinated solvents Media Impacted: Soil & GW Status: Closed, with ongoing monitoring Date of Closure: 12/2010

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status and/or presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified Voluntary Cleanup Sites represent an environmental concern to the Subject Property.

State and Tribal Brownfield Sites

The Subject Property was not identified on state or tribal Brownfield Sites databases. However, one site located within 0.5 mile of the Subject Property was identified on state or tribal Brownfield Sites databases. Information regarding the listed site is presented in the following table:

STATE AND TRIBAL BROWNFIELD SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Hudson Intl Conductors 62 Water St Ossining, New York	0.202 mile / North-northwest / Crossgradient to Downgradient	57382	Notification Date: Not reported Contaminants: Cadmium, chromium, zinc, cyanide, chlorinated solvents Media Impacted: Soil & GW Status: Closed, with ongoing monitoring Date of Closure: 12/2010

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status and presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified Brownfield Site represent an environmental concern to the Subject Property.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

Village/Town of Ossining Building Department
EBI submitted a written request to Village of Ossining Building Department for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI had not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

Westchester County Department of Health
EBI submitted a written request to the Westchester County Department of Health for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI had not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

Village/Town of Ossining Fire Department
EBI submitted a written request to the Village/Town of Ossining Fire Department for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI had not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the

Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property elevation varies from a high of approximately 180 feet above mean sea level (msl) on the northeast part of the site to a low of approximately 80 feet at the western end of the site. The Subject Property is located on a ridge that overlooks the Hudson River to west. The eastern developed part of the site slopes generally gently downward to the south and east. The western undeveloped part of the site slopes moderately to steeply downward to the west. The Subject Property is located east of the Hudson River, and the general slope of the surrounding region is to the west towards the river (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Ossining, New York USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, New York region (1995). The Subject Property is located within the New England Upland Section physiographic province, which consists of Precambrian metamorphic and igneous rocks, primarily gneiss, mica schist, and granite. Cambrian and Ordovician sedimentary rocks, primarily carbonate rocks, sandstone, and shale, underlie parts of western New England.

According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) website (http://websoilsurvey.nrcs.usda.gov/app/), the dominant soil composition in the vicinity of the Subject Property is classified as Urban land-Charlton-Chatfield complex, rolling, very rocky, 2 to 15 percent slopes (UIC). This soil consists of well-drained soils consisting of loam, sandy loam and flaggy silt loam overlying unweathered bedrock. The soil extends to a depth of 24 to 60 inches. Permeability is low to high, and the available water capacity is moderate to low. The depth to bedrock ranges from 20 to over 60 inches.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is the Hudson River, located approximately 700 feet east of the Subject Property.

Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow overall to the west. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to the earlier of 1940 or first developed use. It should be noted that data failure occurred per Section 8.3.2.3 of ASTM Standard E 1527-13. Specifically, EBI could only identify records back to 1886, at which time the Subject Property was developed as a single-family residential property. The prior use of the property is unknown. However, it is anticipated that the Subject Property would have been undeveloped prior to this use, or that any prior uses would not have been involved in any activities that at this point would be considered an environmental concern. Therefore, this data failure is not considered to be significant. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
At least 1830s-1910	Single-family home (mansion) on the northeastern part of the site, with a few outbuildings to southwest. A few single-family homes at the west end of the site from the 1890s.	Limited single-family residential development. A school (Mount Pleasant Military Academy) is present to northeast from the 1880s.	Fire Insurance Maps Topographic Maps Other Historical Records
1920s-1940s	The home has been expanded with an addition on the north side and is now a Knights of Columbus Club. A few single-family homes are present on the southern end of the site.	Single-family residential development. A school (Mount Pleasant Military Academy) is present through the 1920s and is then gone.	Fire Insurance Maps Topographic Maps Other Historical Records
Late 1940s – 1990s	Existing buildings now occupied by Printex Corporation, a silk screening company, and are expanded in the 1960s and 1970s. A few single-family homes are present on the southern end of the site.	Single-family residential and limited retail development.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories
1990s – 2013s	Existing buildings occupied by offices and by Hudson Inlay, a woodworking company.	Single-family residential and limited retail development.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Personal Interviews
2014 to Present	Vacant	Single-family residential and limited retail development.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Personal Interviews

According to our review of historical records Printex Corp was a tenant at the Subject Property from the 1940s through the 1990s and was a silk screening operation. Another tenant of the Subject Property, Creative Design, is listed as having had three USTS. These tanks were discussed previously in Section 4.1.2 and are considered a recognized environmental condition (REC).

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). It should be noted that the scale of the available aerial photographs precludes the distinct identification of structures and/or land uses on or in the vicinity of the Subject Property. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected aerial photographs are presented in Appendix F.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
1941	No	**Subject Property:** The resolution of the photograph is poor, no details about the occupancy of the site can be discerned.
		Surrounding Area: The resolution of the photograph is poor, no details about the occupancy of the surrounding properties can be discerned.
1953	No	**Subject Property:** The Subject Property is occupied by an L-shaped building (the existing structure) located in the northeastern corner of the site. Three single-family homes are located on the southern part of the site.
		Surrounding Area: The surrounding properties are primarily single-family residential, with apparent retail/commercial buildings located to northeast.
1957 1961 1964	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1953 photograph, with the exception that the building to south of the northern building is present.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1953 photograph.
1974 1985 1989 1994	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1964 photograph, except additional small buildings are located west of the building on the northern part of the site.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1964 photograph, except the existing apartment buildings that adjoin the western part of the site to south are present.
2006 2009 2011	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1994 photograph, except the single-family residences on the southern part of the site are no longer present.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1994 photograph.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected fire insurance maps are presented in Appendix F.

FIRE INSURANCE MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1886	No	**Subject Property:** The Subject Property is occupied by a single residential building located on the northeastern part of the site.
		Surrounding Properties: Features depicted on surrounding properties included single

FIRE INSURANCE MAP SUMMARY		
Year	**Issues Noted**	**Observations**
		family homes to east and south and a school (military academy) to northeast.
1891 1897 1903	No	**Subject Property:** The Subject Property is occupied by a single residential building located on the northeastern part of the site. Two barns/outbuildings are located southwest of the residence.
		Surrounding Properties: Features depicted on surrounding properties included single family homes to northeast, east, south and southwest and a school (military academy) to northeast.
1911	No	**Subject Property:** Conditions on the Subject Property are similar to those as depicted on the 1903 map, with the addition of an additional outbuilding (a hen house) southwest of the outbuildings and a single-family residence on the southern part of the site.
		Surrounding Properties: Features depicted on surrounding properties included single family homes to northeast, east, south and southwest and a school (military academy) to northeast.
1924 1931 1942	No	**Subject Property:** The residential building has been expanded, is now L-shaped, and is shown to be a Knights of Columbus hall. Three single-family homes are now on the southern part of the site.
		Surrounding Properties: Features depicted on surrounding properties included single family homes to northeast, east, south and southwest. The school (military academy) to northeast is gone in the 1931 map.
1949	No	**Subject Property:** The building on the Subject Property is shown to be occupied by Printex Corp of America, cloth printing. The three residences on the southern part remain.
		Surrounding Properties: Features depicted on surrounding properties included single family homes to northeast, east, south and southwest.
1971	No	**Subject Property:** The Subject Property is developed with the existing two large buildings and outbuildings, and is shown to be Printex Corp of America, screen cloth printing.
		Surrounding Properties: Features depicted on surrounding properties included single family homes to northeast, east, south and southwest. The existing apartment buildings to south are present.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected topographic maps are presented in Appendix F.

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1892 1893	No	**Subject Property:** One structure is shown on the northeastern part of the site.
		Surrounding Properties: The surrounding street grid is shown, with small buildings

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1902		(apparently residences) located along the streets.
1936	No	**Subject Property:** One structure which appears to be L-shaped is shown on the northeastern part of the site.
		Surrounding Properties: The surrounding street grid is shown, with small buildings (apparently residences) located along the streets.
1955	No	**Subject Property:** One structure which appears to be L-shaped is shown on the northeastern part of the site.
		Surrounding Properties: The surrounding properties are shaded to represent urban development; no distinct structures or other notable features are depicted.
1967 1979	No	**Subject Property:** The Subject Property is shaded to represent urban development; no distinct structures or other notable features are depicted.
		Surrounding Properties: The surrounding properties are shaded to represent urban development; no distinct structures or other notable features are depicted.
2013	No	**Subject Property:** No structures or other notable features are shown on the site.
		Surrounding Properties: No structures or other notable features are shown on the surrounding properties.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
1972 1977 1982	No	Subject Property is occupied by Printex Corp and Vera Neumann.
1987	No	Subject Property is occupied by Printex Corp, Levine Graphics, The Cortlandt Group, Vera Neumann and Seville Associates.
1992	No	Subject Property is occupied by Printex Corp, Art Business Consulting, The Cortlandt Group and Creative Designs.
1995	No	Subject Property is occupied by Cortlandt Group, Creative Designs Han Corp and Hudson River Inlay.
1999	No	Subject Property is occupied by PG Arbor & Co, Hudson River Inlay, and United Vision Sales.
2003	No	Subject Property is occupied by D Rotindo, Gregory Tavano, and Hudson River Valley Inlay.
2008	No	Subject Property is occupied by PG Arbor & Co, River Hudson, and United Vision Sales.
2013	No	Subject Property is occupied by Hudson River Inlay, River Hudson, and United Vision Sales.

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

Property tax records for the Subject Property were obtained from the Westchester County Assessor's Office. The property records identify the current owners as Ossining Land LLC and Hunter James Associates LLC. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was provided with the following previous environmental document regarding the Subject Property:

New York Department of Labor, Division of Safety and Health, Letter dated September 30, 2015

- The letter is addressed to Adelaide Environmental Health Associates (Adelaide) and indicates the agency granted a variance for interior friable debris cleanup and various ACM removal at the Vacant 3-Story building located at 34 State Street in Ossining New York. The variance refers to a proposed interior cleanup of friable debris in the attic and boiler room and the removal of ACM joint compound in the attic. Attachments to the letter indicate the abatement will address the following materials: 14,600 square feet (sf) of roofing materials, 2,500 sf of joint compound, 600 sf of pin mastic, 600 sf of duct cover, 1,200 sf of floor tile, 25 sf of debris, 26 mudded fittings, 16,000 sf of transite, and approximately 1,700 linear feet of caulk.

- One of the attachments to the letter is a portion of an asbestos and lead-based paint survey report by Adelaide that indicates a survey was conducted on August 12, 13 and 27th and September 2, 2015. The survey included 273 asbestos samples, 385 XRF readings and 3 PCB samples. Nineteen samples/homogeneous areas tested positive for asbestos, 53 XRF readings tested positive for lead, and zero PCB samples tested positive. Note that EBI was not provided with a copy of the inspection report.

Relevant information from the document is discussed in the appropriate sections of this report, and the provided document is presented in Appendix G.

4.3.9 Other Historical Records and Interviews

Mr. Chris Dos Anjos, Day Porter, was interviewed to obtain information regarding the history of the Subject Property. According to Mr. Dos Anjos, he has been familiar with the Subject Property for approximately 10 years and the original part of the northern building constructed in the 1830s. Mr. Dos

Anjos stated that asbestos and lead-based paint abatement was performed at the site in 2016 and is complete. However, he did not provide any related documentation to EBI to verify this statement.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Herb Spitz, EBI Senior Scientist, on January 13, 2017. Mr. Spitz was accompanied by and interviewed Mr. Chris Dos Anjos, the Subject Property Day Porter.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Unimproved portions of the Subject Property were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was sunny and approximately 45° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

No notable hazardous substances or petroleum products were observed at the Subject Property.

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL			
Classification	**Type of Waste / Generation Process**	**Type of Storage / Location**	**Disposal Method / Contractor**
Non-regulated Solid Waste	Municipal Solid Waste / Routine Site Operations	None observed	NA
Non-regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	NA (Municipal Sanitary Sewer)	Town/Village of Ossining
Regulated Solid or Liquid Waste	None identified	NA	NA
Biomedical Waste	None identified	NA	NA

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTS) & ABOVEGROUND STORAGE TANKS (ASTS)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs or ASTs located at the Subject Property.

5.4.2 Former Storage Tanks

According to the regulatory database, a former tenant of the Subject Property (Creative Designs) is listed as having three USTS. According to the database, a 10,000-gallon UST was closed in place at the Subject Property on September 1, 1986. Two more USTs, a 1,000-gallon capacity tank and a 3,000-gallon tank, were removed on December 1, 2003. No releases (LUSTs) were reported. EBI was not provided with any prior reports or closure documents regarding the UST removals/abandonment, or any plans or other documents indicating the location of the former USTs. Because it isn't known if they adversely impacted the Subject Property, these former USTs are considered a *recognized environmental condition (REC)*.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

No potential PCB-containing equipment was identified at the Subject Property.

One overhead traction freight elevator services the southern building. The elevator is electrically powered and cable operated and does not contain hydraulic equipment.

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	**Identified**
Interior Drains, Trenches, or Sumps	No
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	**Yes**

ADDITIONAL SITE CONDITIONS	
Condition	**Identified**
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	**Yes**
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	No
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No

At the time of our site visit part of the basement of the northern building was flooded, apparently from a leaking water line.

Piles of fill soils and construction debris (asphalt, concrete, wood, etc.) were observed at the western edge of the developed part of the site. No evidence of hazardous materials or contamination was observed in these materials, therefore they are not considered a recognized environmental condition.

6.0 INTERVIEWS

The site contact or Key Site Manager was contacted to be interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has not been completed and returned to our offices. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property.

KEY SITE MANAGER INTERVIEW			
Contact / Affiliation	**Date of Communication**	**Years Associated with Subject Property**	**Telephone No.**
Mr. Chris Dos Anjos Day Porter	01/13/2017	10	(914) 906-1011

The following additional persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property.

ADDITIONAL INTERVIEWS			
Contact / Affiliation	**Date of Communication**	**Years Associated with Subject Property**	**Telephone No.**
Counter Staff Clerk's Office Town/Village of Ossining	01/13/2017	NA	(914) 762-8428

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

A previous letter from the New York Department of Labor, dated September 30, 2015 and referenced in Section 4.3.8 of this report, included an attachment which was a portion of an asbestos and lead-based paint survey report by Adelaide Environmental Health Associates (Adelaide) that indicates a survey was conducted on August 12, 13 and 27th and September 2, 2015. The survey included 273 asbestos samples. Nineteen samples/homogeneous areas tested positive for asbestos. Attachments to the letter indicate the abatement will address the following materials: 14,600 square feet (sf) of roofing materials, 2,500 sf of joint compound, 600 sf of pin mastic, 600 sf of duct cover, 1,200 sf of floor tile, 25 sf of debris, 26 mudded fittings, 16,000 sf of transite, and approximately 1,700 linear feet of caulk. Mr. Dos Anjos stated that asbestos abatement was performed at the site in 2016 and is complete. However, he did not provide any related documentation to EBI to verify this statement. EBI was not provided with a copy of the inspection report.

EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of textured ceiling and wall surfacing materials, sheetrock/joint compound composite material, lath and plaster systems, and 2'x4' white perforated acoustical ceiling tile and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, various construction mastics and caulking, and roofing materials. Because EBI wasn't provided with a copy of the previous inspection report, it is not known if these materials were sampled as part of the previously-discussed asbestos inspection and abatement activity.

Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also present in areas of the buildings that were accessed as part of this assessment. EBI's limited visual screening should not be considered a pre-demolition survey.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Westchester County is located within a Zone 3 radon area. Zone 3 is defined as an area that has a low potential for radon gas, with a predicted average indoor radon screening level less than 2.0 picoCuries per liter (pCi/L). The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the location in a Zone 3 area and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm^2) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the non-residential use of the existing buildings and in accordance with the scope of work of this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

Municipal water service is provided to the Subject Property by the Village of Ossining. Potable water is reportedly obtained from the Croton reservoir. Based upon review of the Annual Drinking Water Quality Report for 2015, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead.

Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property, except for the following:

- Creative Design is a former tenant of the Subject Property and is listed as having three USTS. According to the database, a 10,000-gallon UST was closed in place at the Subject Property on September 1, 1986. Two more USTs, a 1,000-gallon capacity tank and a 3,000-gallon tank, were removed on December 1, 2003. No releases (LUSTs) were reported. EBI was not provided with any prior reports or closure documents regarding the UST removals/abandonment, or any plans or other documents indicating the location of the former USTs. Because it isn't known if they adversely impacted the Subject Property, these former USTs are considered a *recognized environmental condition (REC)*.

In addition, the following *consideration outside the scope of ASTM Practice E 1527-13* was identified in connection with the Subject Property:

- EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI's limited visual screening should not be considered a pre-demolition survey. EBI identified friable suspect ACM in the form of textured ceiling and wall surfacing materials, sheetrock/joint compound composite material, lath and plaster systems, and 2'x4' white perforated acoustical ceiling tile and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, various construction mastics and caulking, and roofing materials. Because EBI wasn't provided with a copy of the previous inspection report, it is not known if these materials were sampled as part of the previously-discussed asbestos inspection and abatement activity. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following recommendations:

- EBI recommends that all available documentation regarding the USTs removed from the Property or closed in-place at the Property be provided to EBI for review to further determine if environmental concerns remain. If this additional information is inconclusive or if no additional information is available, then a review of the State files for these tanks is recommended to gather additional information. Cost to review any additional information provided and to review any regulatory files will be $100 per hour, not to exceed $1,000 without prior client approval. If information from the State is inconclusive or if no additional pertinent information is available, then a Phase II subsurface investigation is recommended to determine if these tanks have adversely impacted the environmental integrity of the Property. The scope of work for a subsurface investigation could be influenced by the findings of the document review, therefore a cost for subsurface investigation activities is not available at this time.

- It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

Re: Environmental Site Assessment Questionnaire for property known as or located at

34 STATE STREET, 17-25 JAMES STREET, & 27 HUNTER STREET

We have been requested by:	Subject:	EBI Project #:
Paradigm Capital Group, LLC	**To complete an Environmental survey of the above mentioned property.**	**1117000093**

1. **Please read these instructions and those on the following page carefully.**
2. **Please assemble this original questionnaire and one copy of pertinent property documents, and forward all information to the site or the site contact for the Engineer and/or Scientist to use during the site visit. This documentation will be included in our report.**
3. **Please fill out this questionnaire to the best of your knowledge and email or fax it back to us within three business days.**
4. **The Scientist will contact you directly to schedule the site visit.**
5. **This information is extremely time sensitive and necessary to provide your lender with accurate and timely report.**

EBI Consulting
environmental | engineering | due diligence

Please fill out and sign this questionnaire to the best of your knowledge for the Scientist's site visit. Email to Kim Holland at REResearchGroup@ebiconsulting.com or fax to781-425-3623, for our report files, and keep the original to provide to the Scientist.

6.

Subject Property Name: 34 State Street, 17-25 James Street, & 27 Hunter Street
EBI Project #: 1117000093

Address: 34 State Street, 17-25 James Street, & 27 Hunter Street - (Sec. 97.07; Lots 17, 18, 68) Ossining NY

Subject Property Owner: _____ **Purchase Date:** _____

On-Site Property Contact: _____ **Telephone:** _____

Fax: _____ **Email:** _____

Your Name and title **Signature** **Date**

Additional plans and documentation (see page 4) must be forwarded to the site for the Scientist during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Environmental report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #? _____
2. What is the legal Municipality or County that has jurisdiction over the property? _____
3. What is the assessors file ID number and tax file ID number if available? _____

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? _____
5. How many buildings comprise the subject property? _____
   a. If the property is a mall or large retail center, please confirm and list ownership of each building. _____
6. What is the gross and net rentable square footage of the building(s)? _____
7. What is the date of construction of the building(s)? When was the building(s) first occupied? _____
8. How many tenant spaces or apartments are at the Subject Property? _____
9. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems. _____
10. Please list any deficiencies noted during any Building, Fire or Health Department inspections in the last three years. _____
11. Please list the following utility providers:
    Water: _____ Electricity: _____
    Sanitary Sewer: _____ Storm Drainage: _____
    Trash Hauler: _____ and, Frequency of Pick-ups: _____ Natural Gas or Oil: _____
12. Please attach a brief history of the property.

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. _____

2. Describe the past uses of the property noting tenant names and oil/chemical usage.

3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy?

4. (Y) (N) Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property?

5. (Y) (N) Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation?

6. (Y) (N) Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation?

7. (Y) (N) Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation?

8. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation?

9. (Y) (N) Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation?

10. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation?

11. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe.

12. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them?

13. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at **or** adjacent to the property? If yes, please describe.

14. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe.

15. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe.

16. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe.

17. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation:

19. Additional comments and/or pertinent information relevant to this Phase I ESA:_____

_____

_____

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Scientist can proceed with the survey of the property.

A. Plans	B. Municipal Documents	C. Additional Information
▪ ALTA Survey or Site Plan ▪ Reduced scale Site and Building Plans	▪ Certificate of Occupancy ▪ Building Permit ▪ Copy of tax cards ▪ UST/AST Registrations	▪ Tenant Rent Roll ▪ Historical Uses ▪ Previous Due Diligence Reports ▪ Copy of most Recent Appraisal

EBI ACCESS REQUIREMENTS

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building interiors, including as applicable, common areas, lobbies, a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, garages.
- All building perimeters
- All site amenities
- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

Re: Phase I Environmental Site Assessment Public Records Request
34 State Street, 17-25 James Street, & 27 Hunter Street
Ossining, New York 10562
EBI Project No. 1117000093

To Whom It May Concern:

EBI Consulting (EBI) is conducting a Phase I Environmental Site Assessment (ESA) at the above-referenced Subject Property. As part of the ESA process, we would like to request access to records regarding the following, as applicable:

- Current and historical environmental health code violations
- Current and historical environmental health permits
- Asbestos or lead-based paint abatement

We understand that these records may not be available. Please complete the applicable area below regarding record availability and return to our attention either via email at REResearchGroup@ebiconsulting.com or via fax at (781) 425-3623. If these records are available, EBI field personnel will be stopping by to review these records in the next several days. If there are any questions or concerns, please do not hesitate to contact us.

Sincerely,

Herb Spitz

Address: 34 State Street, 17-25 James Street, & 27 Hunter Street, Ossining, New York

1. Are you aware of any environmental cleanup liens against the Subject Property that are filed or recorded under federal, tribal, state or local law?

   No

   If yes, please provide a copy.

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

   There is an approved site plan for redevelopment of the entire property

   If yes, please provide a copy.

3. As the user of this ESA do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Or, do you have documentation (i.e., Phase I ESAs, Phase II subsurface investigations, Tank Removal reports, remedial reports, asbestos sampling and/or abatement reports, lead-based paint sampling and/or abatement reports, etc.) for the Subject Property that may be relevant to the Phase I ESA?

   We recently completed an asbestos remediation program on the existing improvements

   Comments:

4. Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property?

   N/a

   If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?

Comments:

5. Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of release or threatened releases? For example, as user,
   a. Do you know the past uses of the Subject Property? Some - Silkscreen, woodwork
   b. Do you know the specific chemicals that are present or once were present at the Subject Property? No
   c. Do you know of spills or other chemical releases that have taken place at the Subject Property? No
   d. Do you know of any environmental cleanups that have taken place at the Subject Property? only the asbestos remediation prog

   Comments:

6. As the user of this ESA, based on your knowledge and experience related to the Subject Property are there any obvious indicators that point to the presence or likely presence of contamination at the Subject Property? No

   Comments:

Herb Spitz, PG, LEED AP
Senior Scientist
Farmington, CT 06032
Mobile: 602.909.1112

SUMMARY OF EXPERIENCE

Mr. Herb Spitz, PG, is a Senior Scientist with over twenty-five years of project management and supervisory experience in environmental consulting and property condition assessments. He has experience in all phases of Environmental Assessments and Remedial action including soil and groundwater characterization, remedial action plans, remediation oversight, brownfields assessments, and UST investigations and removals. He also has extensive experience in facilities-related services including property condition assessments, asbestos and lead-based paint surveys, radon testing, and indoor air quality/mold assessments.

Mr. Spitz has significant experience throughout the U.S. He has completed projects for commercial, financial, industrial, telecommunications and real estate management firms as well as for local and state governmental clients. Administrative aspects of his experience include technical report review, personnel training, project management, client relations, quality control, regulatory compliance, contract administration and department management.

Relevant Project Experience

Environmental Site Assessments: Mr. Spitz has performed and managed over 1,400 phase I environmental site assessment projects on industrial, commercial, residential, agricultural and undeveloped properties in connection with real estate transactions and telecommunications facilities. Duties included performing site and area reconnaissance, reviewing regulatory searches and researching site history, interviewing site managers/owner and identifying and evaluating potential environmental concerns. Duties also included proposal writing, oversight and training of junior staff, report review and quality control, and client liaison.

Property Condition Assessments: Mr. Spitz has performed over 300 engineering assessments of apartment complexes, healthcare facilities, retail shopping centers and commercial office buildings in accordance with ASTM protocols as well as numerous equity investment scope requirements.

Phase II Environmental Site Assessments: Mr. Spitz has conducted and managed over 350 phase II site assessment projects to evaluate potential soil and groundwater contamination. Duties included proposal and budget development, oversight of drillers, logging soil borings, and collecting and field screening soil and groundwater samples and installation of groundwater monitoring wells. Additional duties have included data evaluation, report writing, client liaison, developing recommendations for further work and/or remedial action, and training of junior staff.

UST Investigations/Remedial Action: Mr. Spitz has developed workplans for UST assessments, designed and implemented subsurface investigations, developed removal specifications, managed contractor bidding and assisted clients with contractor selection, and managed UST removal projects. Conducted site characterizations and coordinated regulatory closures.

EBI Consulting
environmental | engineering | due diligence

Herb Spitz, PG, LEED AP
Senior Scientist
Farmington, CT 06032
Mobile: 602.909.1112

Indoor Air Quality Investigations: Mr. Spitz has conducted onsite investigations in response to tenant complaints, conducted air sampling for various constituents (temperature, humidity, carbon monoxide, carbon dioxide, VOCS and microbial contaminants including mold spores). Evaluated data and wrote reports.

Microbial Surveys: Mr. Spitz has conducted building inspections and sample collection on single-family homes as well as multi-tenant residential and commercial facilities with tenant complaints or "sick building" syndrome. Visual investigation and air sample collection was utilized to determine the possible presence of microbial (fungal) contamination in various indoor spaces. Evaluated data, compared indoor microbial levels to background (outdoor) levels, and wrote reports.

Asbestos/Lead Surveys: Mr. Spitz has conducted building inspections and sample collection on approximately 250 industrial, commercial, and residential properties. Sampling included collection of bulk samples/chip samples and XRF usage as well as quantifying and mapping of all materials sampled. Prepared proposals and reports.

David V. Maglietta
Program Manager
6876 Susquehanna Trail South
York, PA 17403
Office/Mobile: 410.499.8833

Summary of Experience

Mr. Maglietta is an environmental scientist with over 31 years of experience in performing and managing environmental investigations and site assessments in the U.S., Canada, and Mexico. Mr. Maglietta also has extensive experience conducting regulatory file reviews and performing asbestos, radon, lead paint, lead in water, and indoor air quality surveys.

Mr. Maglietta has performed or managed over 12,000 Phase I and II Environmental Site Assessments, Transaction Screens, Desk Reviews, Database Reviews, and regulatory file reviews for a wide range of properties for the purpose of evaluating site conditions, potential off-site liabilities, and site remediation costs. These services have been performed in order to advise property owners, operators and prospective purchasers of potential and existing environmental concerns. Mr. Maglietta has worked with corporate environmental officers, numerous Wall Street lending institutions, legal counsel, governmental agencies including HUD, SBA, FDIC and state governments, rating agencies, investment companies and real estate brokers to develop strategies for managing properties with environmental concerns.

Relevant Project Experience

Environmental Site Assessments: Mr. Maglietta has conducted ASTM Phase I Environmental Site Assessments, Environmental Site Screenings, and soil and groundwater sampling for various clients and has prepared Phase I and Phase II reports for a variety of properties located in the United States, Canada, and Mexico. These properties have included industrial, commercial, retail, healthcare, raw land, and multi-family residential properties. Mr. Maglietta has provided project management for underground storage tank removals and site characterizations, and has performed sampling for radon, asbestos-containing materials, lead-based paint and lead in water.

Subsurface Investigations: Mr. Maglietta has completed subsurface investigations at retail, commercial and industrial properties. Subsurface investigations have included direct-push sampling methodology, hollow-stem auger methodology, the installation of soil borings and shallow and deep groundwater monitoring wells, and subsequent sampling of soil and groundwater.

RE: File No. 15-1247

Dear Sir/Madam:

STATE OF NEW YORK
DEPARTMENT OF LABOR
DIVISION OF SAFETY AND HEALTH

The attached is a copy of Decision, dated, 9/30/2015, which I have compared with the original filed in this office and which I DO HEREBY CERTIFY to be a correct transcript of the text of the said original.

If you are aggrieved by this decision you may appeal within 60 days from its issuance to the Industrial Board of Appeals as provided by Section 101 of the Labor Law. Your appeal should be addressed to the Industrial Board of Appeals, State Office Building Campus, Building 12, Room 116, Albany, New York, 12240 as prescribed by its Rules and Procedure, a copy of which may be obtained upon request.

WITNESS my hand and the seal of the
NYS Department of Labor, at the City of
Albany, on this day of 9/30/2015.

Edward A. Smith, P.E.
Associate Safety and Health Engineer

Variance Petition

Of

Adelaide Environmental Health Associates, Inc
Petitioner's Agent on Behalf of

Ossining Land, LLC
Petitioner

in re

Premises: Vacant 3-Story Building
34 State Street
Ossining, NY 10562

Interior Friable Debris Cleanup & Various ACM Removal

File No. 15-1247

DECISION

Case(s) 1 - 3

ICR 56

The Petitioner, pursuant to Section 30 of the Labor Law, having filed Petition No. 15-1247 on September 29, 2015 with the Commissioner of Labor for a variance from the provisions of Industrial Code Rule 56 as hereinafter cited on the grounds that there are practical difficulties or unnecessary hardship in carrying out the provisions of said Rule; and the Commissioner of Labor having reviewed the submission of the petitioner dated September 29, 2015; and

Upon considering the merits of the alleged practical difficulties or unnecessary hardship and upon the record herein, the Commissioner of Labor does hereby take the following actions:

Case No. 1	ICR 56-7.10(c)
Case No. 2	ICR 56-7.11(e)

Case No. 3 ICR 56-9.1(b,c)

VARIANCE GRANTED. The Petitioner's proposal for interior cleanup of friable debris in the attic & boiler room and removal of ACM joint compound in the attic, quantities as stated in the attached proposal, at the subject premises in accordance with the attached 12-page stamped copy of the Petitioner's submittal, is accepted; subject to the Conditions noted below:

THE CONDITIONS

1. Full time project monitor shall be on site and responsible for oversight of the abatement contractor during all abatement activities to ensure compliance with ICR 56 as modified by the variance conditions and that no visible emissions are generated.

2. All contaminated non-porous floors, walls, ceilings, fixtures, and movable and fixed objects contaminated with asbestos debris shall be cleaned as part of this cleanup and abatement project. All porous materials and generated waste shall be disposed of as RACM.

3. One layer of 6-mil fire retardant plastic sheeting shall be used as a dropcloth below ACM removal locations. The dropcloth may be limited to beneath the immediate removal locations and the surrounding ten (10) feet.

4. After removal and cleanings are complete and a minimum drying period has elapsed, an authorized and qualified Project Monitor shall determine if the area is dry, the scope of work complete, and the work area free of visible asbestos debris/residue. If the area is determined to be acceptable and the aggressive clearance air sample results meet 56-4.11 clearance criteria, the final dismantling of the site may begin.

5. Usage of this variance is limited to those asbestos removals identified in this variance or as outlined in the Petitioner's proposal.

In addition to the conditions required by the above specific variances, the Petitioner shall also comply with the following general conditions:

GENERAL CONDITIONS

1. A copy of this DECISION and the Petitioner's proposals shall be conspicuously displayed at the entrance to the personal decontamination enclosure.

2. This DECISION shall apply only to the removal of asbestos-containing materials from the aforementioned areas of the subject premises.

3. The Petitioner shall comply with all other applicable provisions of Industrial Code Rule 56-1 through 56-12.

4. The NYS Department of Labor Engineering Service Unit retains full authority to interpret this variance for compliance herewith and for compliance with Labor Law Article 30. Any deviation to the conditions leading to this variance shall render this variance Null and Void pursuant to 12NYCRR 56-12.2. Any questions regarding the conditions supporting the need for this variance and/or regarding compliance hereto must be directed to the Engineering Services Unit for clarification.

5. This DECISION shall terminate on December 30, 2015.

Date: September 30, 2015

Subject: 34 State Street, Ossining, NY SSV

Importance: High

Ravi

Per our phone conversation:

- The buildings are all sharing one footing and are all connected.
- The only two areas to be decontaminated are the attic with the joint compound and the boiler room with the debris.
- The boiler room will be decontaminated in its entirety instead of using a two layer tent.

Re: Petition for Variance, 34 State Street, Ossining, New York – Building Demolition

Question 9 - Reason for Request

Nature of Work: The asbestos work is to be performed at 34 State Street in Ossining, New York. All of the buildings are to be demolished except for the main building that will be renovated. There is significantly damaged, friable asbestos on the interior of two of the buildings that will need to be decontaminated prior to demolition. The spaces are currently vacant and locked out to the public.

Based on the above information and reasoning, we are requesting relief from standard full containment requirements during the removal of the referenced materials. We feel the requested relief is justified and the proposed abatement means and methods outlined in Question 11 (attached) are sufficient to contain any asbestos fibers that may be released during abatement activities and will sufficiently protect the Abatement Workers, Facility Employees/Occupants and the General Public. Specific Relief is requested from the following sections:

Section - Title	Reason / Proposed Plan for Protection w/o literal compliance
56-7.10	Based on the fact that all of the surfaces will need to be decontaminated throughout the work areas we are proposing critical/isolation barriers only.
56-7.11(e)	There will not be a full containment as containments shall be critical/isolation barriers only.
56-9.1(b)&(c)	In as much as there will be only isolation/critical barriers constructed we are requesting relief from 1st and 2nd cleaning and propose only one final cleaning and visual inspection. Wait times will be per 56-9.1(f).

Proposed means and methods for abatement operations are present in Question 11.

Re: Petition for Variance, 34 State Street, Ossining, New York – Building Demolition

Question 10 – Hardship Description

Nature of Work: The asbestos work is to be performed at 34 State Street in Ossining, New York. All of the buildings are to be demolished except for the main building that will be renovated. There is significantly damaged, friable asbestos on the interior of two of the buildings that will need to be decontaminated prior to demolition. The spaces are currently vacant and locked out to the public.

In addition, the facility needs to clean up the debris to prevent further spread of the asbestos.

Albany, NY 12240

September 29, 2015

Re: Petition for Variance, 34 State Street, Ossining, New York – Building Demolition

Question 11 - Proposed Methods

As stated in Question 9, the asbestos containing materials to be affected as a part of the building demolition and renovation project at 34 State Street in Ossining, New York are roofing materials, pin mastic, duct cover, floor tile, debris, joint compound, mudded fittings, transite siding and caulk. We propose the following work methods be utilized during removal operations in the specified areas:

The following materials and associated quantities are to be included in the abatement:

- Roofing Materials: Approximately 14,600 square feet.
- Joint Compound: Approximately 2,500 square feet
- Pin Mastic: Approximately 600 square feet
- Duct Cover: Approximately 600 square feet
- Floor Tile: Approximately 1,200 square feet
- Debris: Approximately 25 square feet
- Mudded Fittings: Approximately 26 fittings
- Transite: Approximately 16,000 square feet
- Caulk: Approximately 1,700 linear feet

- The building is currently vacant and will remain so during all abatement operations.

- Signage shall be in accordance with 12NYCRR Part 56 utilizing asbestos barrier tape and signs.

- A personal and waste decontamination unit setup which complies with ICR 56-7 shall be constructed and be attached or remote to the work area depending on the removal taking place and the size of the removal. The unit(s) will be fully sheathed and lockable and shall remain operational until satisfactory final clearance air sample results are achieved.

- The roofing materials, pin mastic, duct cover, floor tile, mudded fittings, transite and caulk will all be removed using the standard procedures in NYS Code Rule 56. One debris area is less than ten square feet and will be decontaminated as per NYS Code Rule 56.

- There are two debris locations with the specifics described below:
  - The asbestos joint compound is located in the attic of one of the buildings to be demolished and has been damaged over the years with debris now on the floor. This area will have an attached large personal and waste decontamination unit. Critical barriers will be installed on all openings with the work area.
  - The small project debris located in a boiler room will have a ~~tent constructed~~ and an attached small project decontamination unit. ~~A two layer tent will be constructed around the work area~~.

- With the containment constructed, negative air will be established within the work area creating at a minimum, eight (8) air changes per hour and -.02" W.C. minimum. Once the containment is constructed and negative air established, a 4-hour pre-abatement settling period will be observed.

- Following the 4-hour pre-abatement settling period and a pre-abatement inspection by the Project Monitor to verify work area integrity, removal operations will commence.

- All debris and contaminated movable objects within the area will be decontaminated and/or removed as asbestos. The asbestos joint compound will be removed using wet methods and a drop cloth underneath. All cleanable surfaces will be wet wiped and/or HEPA vacuumed. Any non cleanable surfaces will be disposed of as asbestos containing material.

- Upon completion of removal and cleaning operations an eight hour waiting/drying period shall be observed. After the waiting/drying period a final visual inspection will be performed by the project monitor. Following this visual clearance, if it passes, the aggressive clearance final air sampling will begin. If the final visual clearance does not pass, another cleaning will commence along with another eight hour waiting/drying period.

- All containments and/or critical/isolation barriers shall remain in place until satisfactory clearance air sample results are achieved.

- All waste will be double-bagged, labeled, and moved from the work area to the waste decontamination unit and finally to a lined dumpster.

We request that this variance expire on ~~9/30/15 or upon the projects completion, whichever comes first.~~ 12/30/15. 9/30/15

Utilizing the proposed methods would in no way compromise the security or safety of the General Public, Facility Employees/Occupants, or any workers involved with the project, and would also allow the timely completion of the abatement operations.

If you have any questions or require any additional information, please feel free to contact Jason Fullum of Adelaide Environmental Health Associates at (845) 278-7710.

1.0 BACKGROUND/PURPOSE

Adelaide Environmental Health Associates, Inc. (Adelaide) was retained by Ossining Land, LLC to perform a demolition asbestos, lead based paint and PCB survey at 34 State Street in Ossining, New York. This survey was based on the scope to renovate the original building and demolish the surrounding buildings in preparation for the upcoming project. The inspection was performed on August 12th, 13th, 27th and September 2nd, 2015 by Adelaide representatives Jason Fullum, David Seddon, Robert See and Jimmie Downes (NYS Asbestos Inspector/ EPA Risk Assessor/Inspectors).

2.0 EXECUTIVE SUMMARY OF INSPECTION RESULTS

Following the scope of work that was given to us, Adelaide inspected all of the buildings on the interior and exterior. Adelaide collected two hundred and seventy three (273) asbestos samples, three hundred eighty five (385) XRF readings and three (3) PCB samples from the above mentioned areas. Nineteen (19) samples/homogenous areas tested positive for asbestos, fifty three (53) XRF readings tested positive for lead based paint and zero (0) PCB samples tested positive..

All painted surfaces in the main building are considered to be positive for lead based paint.

2.1 SUMMARY OF ASBESTOS CONTAINING MATERIALS

Sample #	Material Sampled	Approximate Quantity	Condition	Areas Affected
7	Vent Pipe Tar	40 SF	Damaged	Roof B, M, N and R Vent Pipes and Exhaust Units
11	Exhaust Unit Pin Mastic	600SF	Damaged	Roof B
13	HVAC Curb Roof Material	300 SF	Damaged	Roof B
15	Flashing Tar	700 SF	Damaged	Roof B
17	Pitch Pocket Tar	6SF	Damaged	Roof B
19	HVAC Duct Cover	600SF	Damaged	Roof B
24	Bottom Layer on Wood	2,000SF	Damaged	Roof G,H,L,K,P,Q and R
26	Flashing Tar	20SF	Damaged	Roof G
28	Tar at Gutter	800SF	Sig. Damaged	Roof A and C Gutters Roof A Chimneys, Raised Roof Sections and Interior of Building C

36	Vapor Barrier on Metal	4,500SF	Sig. Damaged	Roof A and C
44	9x9 Gray Floor Tile	1,200SF	Damaged	Building A – 4th Floor Building B and C Stairwells
113	Rope Gasket Debris	20 SF	Sig. Damaged	Building A – Basement Boiler Room
131	Bottom Layer of Roofing	6,000SF	Damaged	Roofs E,F,I,M,N and J
178	Joint Compound	2,500SF	Sig. Damaged	Building C Attic (Joint Compound Debris on Floor – Decontamination required for this area see Appendix F)
193	Mudded Fittings	26 Fittings	Damaged	Building B Storage Room and Stairwell Closet
196	Debris on Floor	4SF	Sig. Damaged	Building C – Boiler Room
231	Transite Barrier	16,000 SF	Damaged	Building B
233	Old White Caulk at Transite and Windows	1,700 LF	Sig. Damaged	Building A and B Exterior Windows
239	Tar at Parapet Wall	250SF	Sig. Damaged	Roof M and N

2.2 SUMMARY OF LEAD BASED PAINT

Sample #	Sample Location	Material Sampled	Reading (mg/cm2)
28	Building A 1st floor right of foyer	Colum – White - Brick	19.50
29	Building A 1st floor right of foyer	Colum – White - Brick	2.70

2.3 SUMMARY OF PCB'S

Sample #	*Sample Location*	*Material Sampled*	*Reading (mg/Kg)*
No Positive Samples			

2.4 NEGATIVE MATERIALS LIST:

Building A

- 9x9 Floor Mastic
- Linoleum and Vapor Barrier
- Brown Wall Mastic
- Electrical Wire Insulation
- 12x12 Brown Mottled Floor Tile and Mastic
- 12x12 White Floor Tile and Mastic
- 12x12 Gray Floor Tile and Mastic
- White Insulation Debris
- 4 Inch Covebase and Mastic
- Plaster Wall – Top and Base Coats
- Plaster Ceiling – Textured Coat, Top and Base Coats
- White Firebrick and Mortar
- Red Firebrick
- 4x4 Ceramic Tile Adhesive and Grout
- Millboard Wall
- Epoxy Floor Yellow and Gray Coating
- 2x2 Ceiling Tile
- Popcorn Texture on Drywall Ceiling
- Drywall and Joint Compound

Building B

- Roof Vapor Barrier at Wood
- Exhaust Unit Vibration Cloth
- Red Ceramic Vinyl Tile
- 12x12 Stick On Tile with Flowers

- 12x12 Stick On Tile – Gray
- Yellow Carpet Mastic
- Gray Linoleum Floor and Adhesive
- Window Glazing Compound
- Green Caulk at Transite
- Asphalt Siding
- Fiberglass Pipe Insulation Wrap
- Wallpaper
- Ceramic Tile Grout and Mudset
- 1x1 Spline Ceiling Tile
- 2x2 Ceiling Tile
- 2x4 Ceiling Tile
- Millboard Wall and Adhesive
- Newer Caulk at Transite
- Stone Ballast Roof Layers
- Joint Compound

Building C

- Green Roofing under Metal Roof
- Window Glazing Compound
- Insulation at Door Header
- Exterior Caulk at Louver
- Surface Coat on Brick
- Popcorn Texture on Drywall
- Popcorn Texture on Plaster
- Popcorn Ceiling Coat
- Carpet Mastic
- Blown In Insulation
- Paper From Batt Insulation
- Ceramic Tile Grout and Adhesive
- Drywall Brown
- Drywall White
- Boiler Section Sealant
- Exterior Plaster
- Parge Coat on Exterior
- Tar on Fiberglass
- Joint Compound on the First thru Second Floors and Basement

Building E

- CMU and Mortar
- Stone Mortar
- Concrete

Roof D

- Roof Shingles and Vapor Barrier
- Tar Paper at Exhaust Vents

Roof J

- Top Layer Rolled Roof
- Asphalt Layer Rolled Roof

Roof E

- Top Layer Rolled Roof
- Brown Board Layer
- Asphalt Layer Rolled Roof

Roof N

- Tar at Edge of Roof

Roof M

- Coping Stone Mortar

Roof O

- All Roofing Layers

3.0 ASBESTOS FIELD PROCEDURES AND ANALYSIS METHODOLOGY

3.1 INSPECTION

Guidelines used for the inspection were established by the U.S. Environmental Protection Agency (EPA) in the Guidance for Controlling Asbestos Containing Materials in Buildings, Office of Pesticides and Toxic Substances, DOC# 560/5-85-024 and 40 CFR Part 763, Asbestos Hazard Emergency Response Act (AHERA). Field information was organized as per the AHERA concept of a homogeneous area (HA); that is, suspect Asbestos Containing Materials (ACM) with similar age, appearance, and texture were grouped together, sampled and assessed for condition.

For the purposes of this inspection, suspect ACM has been placed in three material categories: thermal, surfacing, and miscellaneous.

Surfacing materials are those that are sprayed on, troweled on or otherwise applied to surfaces for fireproofing, acoustical, or decorative purposes (e.g., wall and ceiling plaster).

Thermal materials are those applied to heat pipes or other structural components to prevent heat loss or gain or prevent water condensation (e.g., pipe and fitting insulation, duct insulation, boiler flue).

APPENDIX H

TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or

substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

Re: **Letter of Reliance**
Phase I Environmental Site Assessment dated January 18, 2016
EBI Project 1117000093
34 State Street, 17-25 James Street, & 27 Hunter Street, Ossining, NY 10562

Dear Mr. Kimche:

On behalf of EnviroBusiness, Inc. (dba EBI Consulting, hereinafter "EBI"), I am pleased to provide this Letter of Reliance to NH Ossining Lender, LLC regarding the above referenced Report.

Upon receipt of this letter, signed below by an authorized representative of NH Ossining Lender, LLC, EBI hereby agrees that NH Ossining Lender, LLC is authorized to use and rely upon our prior reports listed above for purposes of underwriting a proposed mortgage loan, subject to the same Standard Terms and Conditions for Engagement and Scope of Work under which the report was completed for Paradigm Capital Corp II ("client"), a copy of which is attached. Please note that the client authorized this request. Additionally reliance is subject to the same Conditions and Limitations listed in the Report and the following additional limitations:

- No additional assessment or due diligence activities were completed in conjunction with this letter. As such, EBI's recommendations and findings for the Subject Property are original to the date of the prior Reports as noted above and have not been updated.

- As of the date of this letter, our Phase I report is dated January 18, 2016 and conditions on the Subject Property may have changed and EBI's opinions may have changed since our original site reconnaissance.

- Please note that the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527- 13 standard has established that the shelf life for a Phase I report is one (1) year. In addition, certain aspects of the original Phase I ESA must be updated after 180 days, including the site visit, regulatory database report review, search for environmental liens and interviews. Based on this stipulation, the report may no longer be valid for ASTM purposes unless it is updated per the ASTM guidelines.

- As part of ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, we ask that you complete the below User Questionnaire as cited in the Appendix X3 of ASTM Standard E 1527-13. This questionnaire is designed to address one of the requirements to satisfy the intent of the Standard, as noted in Section 1.1 of ASTM E 1527-13. Specifically, in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), all appropriate inquiry must be conducted, and a Questionnaire completed by the User of the report is one component of such inquiry. While the Questionnaire is not required, failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. If NH Ossining Lender, LLC does not possess or have knowledge of the information requested in the Questionnaire, it is acceptable to mark such questions accordingly. If you decline to complete and return the Questionnaire, please initial here: AVE.

- The original purpose of the Reports was to assist in the underwriting of a proposed mortgage loan on the Subject Property described in the Reports. Reliance upon the Reports does not extend to property owners, or entities or individuals interested in purchasing the subject property. The Reports were completed in accordance with a refinancing scope, American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527- 13, and are not intended for use in making property purchase or sale decisions.

- This Reliance letter, and any rights or liabilities created under the aforementioned Contract, may not be assigned by Customers Bank without the express written permission of the EBI.

Regardless of whether EBI receives a copy of this letter countersigned by NH Ossining Lender, LLC, by accepting draft and/or final copies of the Report and/or asserting reliance thereon, NH Ossining Lender, LLC agrees to the terms, conditions and limitations set forth in this Reliance Letter.

Please sign below and return this letter to me via facsimile to klafond@ebiconsulting.com. **Please note that all pages of this letter must be initialed and returned with the signed authorization, along with the completed user questionnaire.**

Sincerely,
EBI Consulting,

Josh Simon

FREEDOM OF INFORMATION- Acknowledgment Letter
FOIL Request #0475-2025

06/05/2025

Dear Annmarie Yannaco:

Your FOIL request dated 06/02/2025 was received by the Village of Ossining on 06/05/2025.

A copy of your request is attached below this letter for your records.

The request is being reviewed and I anticipate you will be contacted regarding your request on or before ***07/03/2025***, 20 business days from the date of this acknowledgment.

Please note that FOIL requests cannot be rushed for any reason.

Access to the records, in whole or part, will be determined in accordance with Article 89 section 5 of the Freedom of Information Law.

Once the research has been completed, you will be notified of the results of the records search and, if necessary, set a time and date for pick up of copies if available. you

Pursuant to FOIL, a fee of $.25 per page for photocopies not exceeding 9'x14' will be charged. All other fees will be based on the material requested. You may make an appointment to view the records prior to copying to avoid cumbersome fees.

If your FOIL is denied, you may appeal the denial to:
Corporation Counsel Stuart Kahan
16 Croton Ave
Ossining, NY 10562

Thank you in advance for your cooperation. If you have any questions, or require further information, please do not hesitate to contact me.

Sincerely,

Susanne Donnelly
Records Access Officer

EMAILED TO: annmarie.yannaco@sesi.org

RE: Acknowledgment Letter - EPA FOIA Request 2025-EPA-06493

Dear Annmarie Yannco Annmarie Yannaco:

This letter concerns the above-referenced Freedom of Information Act (FOIA) request, received by the U.S. Environmental Protection Agency (EPA), National FOIA Office (NFO) on 06/09/2025 in which you are seeking the following: "Site Address: 34 State Street, Ossining, NY Site Parcels: Section 97.07 Block 2, Lots 17 & 68 As part of a Phase I Environmental assessment, SESI requests the following: information about the property associated with EPA ID NYD013008446. The USEPA conducted an investigation which did not identify contamination that rose to the level of requiring federal Superfund listing. SESI is seeking the investigation report for this EPA work. (Date Range for Record Search: From 01/01/1960 To 06/06/2025)."

Your FOIA request was assigned for processing. If you have any questions about your request, please contact the office mentioned below and reference your EPA FOIA request number 2025-EPA-06493.

Region 2 FOIA Program: You may contact Region 2's Wanda Calderon at calderon.wanda@epa.gov or (212) 637-3668. You may also contact Jennifer Sukra at sukra.jennifer@epa.gov or (212) 637-3109.

If you need any further assistance or would like to discuss any aspect of your request, you may seek assistance from EPA's FOIA Public Liaison at hq.foia@epa.gov or call (202) 566-1667. You may also seek assistance from the Office of Government Information Services (OGIS). You may contact OGIS in any of the following ways: by mail, Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001; email: ogis@nara.gov; telephone: (202) 741-5770 or (877) 684-6448; or fax: (202) 741-

5769.

Sincerely,

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.

Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

34 STATE STREET
OSSINING, NY 10562

COORDINATES

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
GE HUDSON RIVER SEDI Cerclis ID:: 202229 EPA Id: NYD980763841	***446 LOCK 8 WAY***	***WSW 0 - 1/8 (0.123 mi.)***	***0***	***26***

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS

site within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 01/29/2025 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 01/29/2025 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/03/2025 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/02/2025 has revealed that there are

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 15 NY UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 3 NY CBS AST sites within approximately 0.25 miles of the target property.

NY MOSF AST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY MOSF AST site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/02/2025 has revealed that there are 61 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 35 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: NYD980763841

CONSENT: Major Legal settlements that establish responsibility and standards for cleanup at NPL (superfund) sites. Released periodically by U.S. District Courts after settlement by parties to litigation matters.

A review of the CONSENT list, as provided by EDR, and dated 12/31/2024 has revealed that there is 1 CONSENT site within approximately 1 mile of the target property.

GE HUDSON RIVER SEDI	***446 LOCK 8 WAY***	***WSW 0 - 1/8 (0.123 mi.)***	***0***	***26***

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/24/2025 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are

8 E MANIFEST sites within approximately 0.25 miles of the target property.

Facility Id: 3-5542-00105				

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

NY MGP: From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

A review of the NY MGP list, as provided by EDR, and dated 02/28/2025 has revealed that there is 1 NY MGP site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within

approximately 1 mile of the target property.

CON EDISON - OSSININ	65 MAIN ST. AND SECT	N 0 - 1/8 (0.112 mi.)	I101	292

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

DEPOT GARAGE	20 MAIN ST	NW 0 - 1/8 (0.064 mi.)	F34	165

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible

GE HUDSON RIVER SEDIMENT REMEDIATION PROCESSING AND TRANSPOR (Continued) **1000384273**

parties notifying them of possible legal action under CERCLA.

DEC Memo:	7/18/19; I spoke to Ken Eck (Quality Environmental Solutions) regarding the site who mentioned it was formerly an old funeral parlor(building demolished). Soil samples were taken across the old drain as a result of the purchase of the property revealing SCO exceedances of mercury and elevated levels of formaldehyde. I have assigned the spill to myself. MDK 9/16/19: Based on the data submitted By Conor Tarbell of PVE, the site does not constitute a significant threat to human health and the environment, at this time. As such, the spill number (1903984) associated with this site will be closed. Since the site is not a part of one of the Department of Environmental Conservation s remedial programs, the soil reuse or export from the site is not reviewed by the Department. It is recommended that any soil is properly characterized

OLD FUNERAL PARLOR (DEVELOPMENT PROJECT) (Continued) **S124518940**

prior to removal from the
site, then properly disposed off-site in accordance with all
applicable rules, regulations and
guidance. It is recommended that all related documentation is
maintained by the owner and
environmental professional. MDK

Remarks: Materials discovered during work on the project. R3 DEC Spills Mike (unknown last name) was advised yesterday, but no report was filed. Cleanup is pending.

Hazardous Waste Summary:

Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	11-25-15 Spoke with Lisa. She confirms tank test failure. They believe piping was cause. Plans are to isolate and retest. jc 3/23/16: Elite Environmental disposed of the leaking UST and approximately 9.13 tons of petroleum contaminated soil. Soil sample results submitted for review. Some residual contamination over CP-51 guidance could not be excavated. Tank Closure Report entered into DecDocs system. Based upon the information provided, no further action is required at this time. jod

Remarks:	Reported by member of the public Photos taken by Riverkeeper at 4:45

ON THE ROADWAY (Continued) **S120701770**

p.m. Wednesday 4/5/17 Original reporter contacted Ossining police, who investigated. I, on behalf of Riverkeeper, spoke with investigating officers, who confirmed the substance being washed into the storm drain is a glass byproduct, essentially sand, that is washed out of buckets or some other holding device by Mirage Glass, a business located at 1 depot plaza, Ossining.The photos below are the rear of Mirage Glass, by their loading door, on Water Street. So that is confirmed as the source, I wonder if this product or the method of disposal represents a violation? I am Neale Gulley at Riverkeeper. 716 534 4237

DEC Memo:	9/27/10 - Waiting on sampling results before conduct clean up. KAB 11/17/10: While I was meeting with Joe Tomasulo of Madison Energy at another location, Joe reported that his company was not hired to complete the clean up at this site. Madison removed the tank and stokpiled some contaminated soil. When Madison retruned to the site to continue, the stockpiled soil was gone and the excavation had been backfilled. Madison was informed that the owner had gotten someone else to finish the work. jod 12/06/10: I called Station Plaza Realty and spoke with the office manager. Left a message for the contact John Count requesting a call back concerning this spill. jod 12/09/10: C/B from John Count; also received a message from Jeneen at NES concerning my call from earlier in the week. NES completed the remedial work and the closure report is being prepared. jod 1/18/11: NES disposed of 7.05 tons of petroleum contaminated soil. Exit samples show contaminated soil over guidance values, no further excavation was possible. Closure report will be entered into eDocs. Based upon the information provided, no further action is required at this time. jod

DEC Memo:	7/09/2023: Caller is Ossining Town Supervisor. Incident reported near Louis Engel waterfront park, so caller contacted river keeper who recommended they call DEC spill hotline. I advised that I will bring this to the attn of DEC s Div of Air. Also recommended that they report to WCDOH in case they have interest. Caller states that, over the past week, this facility that manufactures lubricants has been emitting a different kind of smoke beginning in the evening. Lighter in color with a sewage and or sulfur-like odor. Previously, this facility would emit a darker smoke without an odor. Caller is aware that this facility may soon be shutting down operations and moving to another location. -MS 7/30/23- Update from town supervisor, Elizabeth: Incident is occurring again. I have forwarded the update to Div of Air. -MS
Remarks:	sewage/Sulfur smell coming from the facility going on for about a week. Only occurs at night. You can see smoke emitting from the building.

Environmental Interest/Information System:

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the

METALLIZED CARBON CO (Continued) **1000149138**

Toxic Substances Control Act (TSCA).
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Spoke to Doug at Brinkerhoff. Area of investigation is a parking lot where bldgs. did exist. Soil impacts found at some 12 feet below grade. They are preparing RAP. DT 10/4/10 10/26/10 Remedial Action Plan (RAP) Submitted by Doug Harm: Brinkerhoff Environmental Services 1913 Atlantic Ave Suite R5 Manasquan, NJ 08736 (732) 223-2225 RAP identifies Soil contamination at 12-15' below grade which will be excavated and disposed accompanied by dewatering during the excavation process. They estimate 150 tons of soil will be removed from an area identified in a GeoProbe study as SB-3. . TG 01/25/11 Brinkerhoff submitted a spill closure report. Report in Edocs. NFA> TG
Remarks:	Caller advised was doing a phase 2 environmental testing and came across a #2 fuel oil smell.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	7/30/21 I spoke to caller from Ossining Code Enforcement. 2 fuel tanks were moved to a flat surface prior to being crushed by contractor. Spill was on concrete outside according to Mr. Gibbs, and is being cleaned up by the property owner. Caller will be checking on the cleanup and will call back on Monday AM. No outside environmental impact. dw 8/2/21 Village of Ossining called back to say that cleanup appears incomplete. A site visit is needed. dw 08-02-21 Site visit. Speedy dry was still on concrete and entrance. Property to pick up the material today. No waterways were impacted. NFA. BTR
Remarks:	Fuel tank left behind by former business and during demo work, tank was crushed and spilled to soil and roadway. Cleanup was started by local DPW. Additional contact for property owner 914-715-5531. Further cleanup is continuing by property owner.

DEC Memo:	Advanced Tank reports that test was done for potential buyer, Anthony Santini- 917-328- 2420. No Further info available. DT 4/20/11 05/18/11 Grazi 1 and Taylord Environmental on site removing a 750 gallon LUST. Tank was removed yesterday and free product entered the hole over night. Ground water is about 7 feet bg. Test pits dug outside of the tank grave suggest that the contamination is localized. Contractor will dig the soil out and submit UST removal report. TG 07/12/11 Grazi 1 reported that they removed the tank along with 109.04 tons of impacted soil. Report in Edocs. NFA. TG
Remarks:	TANK TEST FAIL

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	11/25/20: Spoke with Wayne. They were prepping an UST for close in place. Found contamination under tank when cut hole in bottom. Tank is under a patio area that Wayne says has a porch/deck area over it. He has taken a sample and says he will contact O'Dee to discuss options. He also says he will email John the owner and insurance info. jc 1/15/21: Update from Barrier via email: Attached is the spill closure report for 131 Spring street Ossining, Spill 2007625. We attempted to fill a 1000 gallon tank in place. The tank was under a 2 story patio. We cut a large section out of the bottom and removed 4.41 tons. The tank had been out of service for years. We took a grab sample from the bottom and a composite of the walls. The base has 7 exceedances and the walls had 3. We did 2 soil borings to the west of the tank (downgradient towards the street) and the results showed ND. The property and area has municipal water with no sensitive receptors in close proximity. We recommend no further action is necessary jod 01/20/2021: Report from Barrier Environmental reviewed. Leaking tank and 4.41 tons of petroleum contaminated soil removed. Some residual soil contamination over DEC guidance values could not be excavated due to safety/structural considerations. Based upon the information provided, no further action is required at this time. Report will be entered in to

DEC Memo:	4/19/19 Building Dept. of Ossining called regarding a spill that occurred on 4/18. Spill occurred in the commercial lot of former American Plumbing when a wall collapsed between the 2 properties (60/80 Main) and equipment was crushed. Ossining FD was on scene but did not report a spill. DPW cleaned the 3 wide section of a slick from the road. Confirmed with DPW Michael Duffy. no roads closed. NFA
Remarks:	there is about a half of mile spill from the parking lot to Rt 9 and the corner of Church St. A wall collapsed in top of the truck.

DEC Memo:	11-25-14 Spoke with Nick and then homeowner, Eric Shatz 914-274-7021. 275 Horizontal tank under porch. This was initially a NO HEAT call. When fuel company arrived they observed fuel oil odors at tank and tank was empty. Unknown qty lost but Eric says he typically goes through a dozen or so fill ups in a year. Sounds like alot of vegatation/leafy debris in contact with tank. Oil company is installing temporary oil setup in basement. They will also remove tank to see what's up. Eric will be contacting Envirostar for assessment/cleanup. Told him to contact White Plains office with update. jm 2/12/15 Spoke to Eric Shatz who stated that the tank was removed by EnviroStar. He will call them and have them send a closure report. TG 3/3/2015: Cleanup completed by Envirostar. Report/Documentation has been reviewed and entered into DecDocs. Based

DEC Memo:	1/27/22 Advanced retained to remove 550 gallon #2 fuel oil UST from a small storage facility. During tank removal impacted soil was identified around and underneath the tank. The former UST was in good condition and the spill is likely due to equipment failure from a former return line. Remediation is expected to be completed in 2-3 weeks. BW 5/12/2022: Advanced Environmental removed the leaking UST and disposed of a total of 194.29 tons of petroleum contaminated soil. Post excavation soil sample results were below CP-51 Guidance values.

COMMERCIAL - UST (Continued) **S128044819**

Report has been reviewed and
entered in DecDocs. Based upon the information provided, no further action is required at this
time. jod

Remarks: 550 ust removed - unsure of what caused - no holes in tank - cleanup pending

DEC Memo:	1-11-10 Called and left message for Mario to return my call asap. Recv'd callbeack from Mario. 275 tank in basement. Mario is the owner of the oil co and also the adjacent rental property. He says that oil leaked from piping into a sump pit that was not turned on. The oil company pumped the oil out into buckets and cleaned up the floor with pads and speedi-dri. Mario says that they recently fired an employee and that this former employee vandalized the tank causing the leak. He also said that the Police were involved. jm
Remarks:	APPROX 30 GALLONS SPILLED TO BASEMENT FLOOR, PUMPED INTO A DRUM AND REST CLEANED UP WITH SPEEDI DRY. SUSPECTED VANDALISM, POLICE ON SCENE. Not reported

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

OSSINING DPW SITE (Continued) **S128177640**

10562. The Site is in a mixed-use commercial, residential, and industrial neighborhood. Central Avenue and a Consolidated Edison Company of New York, Inc. (Consolidated Edison) substation are located north of the Site. Water Street, a residential structure and commercial structures are located west of the Site. Main Street and residential dwellings are located south of the Site. Residential properties are located east of the Site. Site Features The Site consists of four lots in the Village of Ossining excluding the Sing Sing Kill Brook, which run through the center of the Site, and has been excluded from the Site since it is underwater land. The buildings and structures south of the Brook have been demolished and the current Village DPW operations on that side of the Brook only include equipment and mulch storage. This portion of the Site is mostly covered with asphalt and concrete pads. The area north of the Brook is occupied by the Village s ODPW vehicle storage building. This building on the north side of the Site was historically used by ODPW from the 1960 s to approximately the end of the 1990 s for vehicle repair and a petroleum dispensing facility. However, as a result of interviews with current ODPW employees who have worked there for as long as 20 years, the petroleum bulk storage facility was closed in 2005 and they had no recollection of truck repair activities on the northern portion of the Site for many years. Historically, the ODPW vehicles were fueled on Lot 27 until 2005, after which time the trucks have been fueled off-Site. The Site is located within a fenced area. The Sing Sing Kill Brook connects to the Hudson River approximately 0.189 miles west of the Site. A retaining wall is present along portion of the side walls of the Brook. Steep-nearly vertical bedrock walls also effectively serve as a bulkhead on certain sides of the Brook. The Site is in a flood zone. The eastern portion of the Site is known as a riparian fringe forest, which consists of grasses, herbaceous species, shrubs, and trees. Current Zoning and Land Use The Site is currently located in the PW-b: Central Waterfront Transient Oriented Subdistrict. This zoning district permits recreational, open space, commercial, business, and residential uses. The Site is currently used for storage of equipment and vehicles, recycled materials, yard waste, salt, and sand. The area south of Kill Brook is mostly covered with asphalt and concrete pads. Past Use of the Site Lot 26 Sanborn maps between January 1881 and August 1924 reveal multiple buildings were present on this small lot. Historical documents are unclear about the use of these buildings, but these buildings were likely ancillary buildings for the MGP operations since Consolidated Edison s predecessors Northern Westchester Lighting Company and then Westchester Lighting Gas Manufacturing Co. appear to have commenced ownership of this lot in 1860. Successor Consolidated Edison sold this lot and the remaining lots that make up the Site to the Village of Ossining in late 1957. The lot appears to be vacant until 1971, when a portion of a building is present on the lot. The remaining portion of the building was present on Lot 27. Historic documents suggest the building appears to have been used originally for truck repair by ODPW as of 1971 and for truck storage as well as general equipment storage later. Lot 27 In 1868, Issac Terwillinger Sash and Blind Shop occupied the lot. Historical documentation is unclear as to the exact nature of this business, but later occupants suggest that the business may have been associated with the lumber yard that was present on the lot from approximately July 1886 until August 1924. The name of the company also suggests that it was a

OSSINING DPW SITE (Continued) **S128177640**

lumber-based operation to make windows and doors. It appears that the sale from Anna Terwillinger to Northern Westchester Lighting Company occurred in Fall of 1923. Between 1930 and 1942, based on Sanborn maps, multiple buildings, gas holders, and oil tanks were present on the lot. Some of the buildings were used for storage related to the production of manufactured gas. In 1949, no buildings were present. By 1954, all above ground portions of all gas holders and tanks were removed from this lot. New buildings were present on the lot in 1960. In 1971, a portion of a building was present on the lot. The other portion of the building was present on lot 26. As of 1971, the lot appears to be operated by the ODPW for truck repair, storage, and general storage. In May 2002, the lot contained two adjacent truck repair/storage buildings and associated paved areas. Road salt was stored on the lot during winter months. Historically, there was a petroleum bulk storage (PBS) facility used by ODPW to fuel vehicles that was present on this lot based on interviews with ODPW staff who recalled the location of the fueling facility. The PBS facility was closed in 2005 according to closure documentation from Westchester County. Lot 28 Lot 28 was historically occupied by Ossining Heat, Light and Power Company by Sing Sing Gas Manufacturing Company dating back as far back as of 1901 and then later by Northern Westchester Lighting Company and Westchester Lighting Gas Manufacturing Co. (predecessors of Consolidated Edison of New York, Inc. and hereinafter Consolidated Edison), which conducted Manufactured Gas Plant (MGP) operations from approximately the mid-1800 s until 1929. During that period, the MGP experienced changes in the type and size of production. Maps from January 1881 until November 1897 show that the operation initially consisted of a single gas holder as well as a coal gas production building. Over time, additional gas holders and buildings were added to this Lot. On-site buildings contained retorts, purification facilities, boilers, gas meters, generator houses, and storage tanks. Other buildings were used as tenement buildings, carpenter shop, dwelling, storage, and other miscellaneous uses associated with the MGP. In 1901, the MGP began producing carbureted water/lowe in conjunction with coal gas production. In 1904, the operations transitioned into carbureted gas production exclusively. In 1926, the MGP was placed on standby. Between 1926 and 1942, some of the on-Site buildings were removed. In 1943, the MGP retired from service. Other portions of the MGP were removed after this time. In 1959, the buildings remaining on the lot were switched to natural gas. Maps from 1971 depict multiple small buildings on this lot but then later all buildings were demolished, and this lot was mostly paved. The lot is currently operated by the ODPW for equipment storage and the remainder of the lot is used to store mulch and sand. Lot 29 Between January 1881 and August 1924, multiple buildings were present on this lot. The deed suggests that Northern Westchester Lighting Company acquired lot 29 in early 1922. Historical documents are unclear about the use of these buildings. The known occupants during that period (Terwilliger & Allison Gasn. Doors) suggest that the buildings were associated with the lumber yard operations present on Lot 27. The lot is depicted as vacant between 1924 and 1949. The lot was later used by the ODPW for storage. Site Geology and Hydrogeology Surface elevations at the Site range from approximately 15 feet above mean sea level (amsl) along North Water Street to 50 feet amsl along Main Street. Site soils consist of a 2 to 18 ft thick fill layer, underlain by areas of a sand and gravel layer, silt and clay/peat layer, and/or glacial

OSSINING DPW SITE (Continued) **S128177640**

deposits, all ranging in thickness from 8 to 28 feet. Bedrock, classified as metamorphic schist, is present at depths ranging from 15 to greater than 40 ft-bgs. Portions of bedrock are exposed at several locations on the Site. Groundwater was encountered at the Site between 5 and 8 ft-bgs. Groundwater is expected to flow west/southwest towards the Hudson River. Most on-Site drainage currently flows to the Kill Brook, which flows through the Site at a surface elevation about 5 feet lower than the surrounding area. Kill Brook is classified as Class G fresh surface water per 6 NYCRR 876.4."
Not reported

Env Problem: "Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor samples were collected and analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern are VOCs, including benzene, toluene, ethylbenzene, and xylene (referred to as BTEX), and SVOCs in soil and groundwater related to the site s historic MGP operations. Evidence of dense non-aqueous phase liquids (DNAPL), staining and sheens were noted in several borings onsite, primarily in the southern portion of the site. Soil - SVOCs were detected in subsurface soils, primarily in the southern portion of the site within the vicinity of historic MGP operations and structures. Naphthalene was detected up to 1600 parts per million (ppm) in exceedance of the restricted residential soil cleanup objective (RRSCO) of 100 ppm. BTEX was also detected above applicable SCOs: benzene up to 1900 ppm (RRSCO of 4.8 ppm); toluene up to 450 ppm (RRSCO of 100 ppm); ethylbenzene up to 260 ppm (RRSCO of 41 ppm); and total xylene up to 570 ppm (RRSCO of 100 ppm). Groundwater SVOCs and BTEX were also detected in onsite groundwater above applicable standards. Naphthalene was detected up to 640 parts per billion (ppb), greatly exceeding the 10 ppb groundwater standard. Other SVOCs, including acenaphthene up to 140 ppb and benzo(a)anthracene up to 22 ppb, were also detected above their applicable groundwater standard of 20 ppb and 0.002 ppb, respectively. BTEX components were also detected, including benzene up to 7 ppb exceeding the 1.0 ppb groundwater standard, ethylbenzene up to 100 ppb exceeding the 5 ppb groundwater standard, and xylene up to 32 ppb exceeding the 5 ppb groundwater standard for total xylene. For PFAS, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were reported at concentrations of up to 104 parts per trillion (ppt) and 83.9 ppt, respectively, exceeding their corresponding ambient water quality guidance values of 6.7 ppt and 2.7 ppt, respectively. Soil Vapor - VOCs were detected in onsite soil vapor samples with maximum detections for cis-1,2-dichloroethane up to 99.5 micrograms per cubic meter (ug/m3), tetrachloroethene up to 116 ug/m3, trichloroethene up to 12.7 ug/m3, and vinyl chloride up to 246 ug/m3. Name:	OSSINING WASTEWATER TREATMENT PLANT
Address:	75 WESTERLY ROAD
City,State,Zip:	OSSINING, NY 10562
PBS Number:	3-018805
Site Status:	Active
GDS Number:	Not reported
Operator Name:	Dianne Barrowman
Owner Name:	Westchester County DEF
Owner Street:	270 North Avenue, 6th Floor
Owner Address2:	Not reported
Owner City/State/Zip:	New Rochelle, NY 10801
Tank Number:	001
Status:	1. In-Service
Date Installation:	09/01/2004
Capacity:	1000
Product Stored:	0008. Diesel
Product Stored Percent:	Not reported
Date Perm Closure:	01/01/1900
Tank Location:	3. Aboveground on saddles,legs,stilts,racks or cradle
Tank Type:	1. Steel/Carbon steel/Iron
Tank Internal Protection:	0. None
Tank External Protection:	1. Painted/Asphalt Coating
Tank Leak Detection:	1. Electronic Interstitial Monitoring
Tank Secondary Containment:	9. Modified double-walled (aboveground only)
Piping Location:	1. Aboveground
Piping Type:	1. Steel/Carbon/ Steel/Iron
Piping External Protection:	0. None
Piping Leak Detection:	0. None
Piping Secondary Containment:	0. None
Overfill Prevention:	2. High Level Alarm,5. Vent Whistle
Spill Prevention:	1. Catch Basin
Dispenser:	2. Suction
Tank Number:	002
Status:	1. In-Service
Date Installation:	02/01/1999
Capacity:	275

DEC Memo: 4/11/24 AMC Engineering conducting subsurface investigation on behalf of Paradise Heating as part of MOSF license closure (MOSF #03-2360). Concurrently closing Part 360 facility. Investigation had detection of SVOCs and Arsenic in soil. Report submitted. JG 4/11/24 Assessment report to satisfy Special Condition 4a, as facility moves to terminate license, received 4/10/24. VOC/SVOC/Metals soil and groundwater contamination across facility. Some PCB and pesticide hits also. Report to be D2'd under MOSF and spill. Tank system closures not completed yet, but the large tanks have been demonstrated to be empty and clean. jc 9/4/24 Rev'd assessment report. Seems general soil and gw contamination for VOCs and SVOCs. Report offers possible explanation of migration from neighboring Brownfields site but need more information. Note there is a stream between the two locations. Other concerns identified for metals, pesticides and PCBs in report also. Sent email to consultant and Paradise identifying Paradise as an RP and requesting work plan for remediation. Actions still needed to move facility to MOSF license termination. jc
Remarks: Results of soil sample exceedances.

DEC Memo:	01/29/07 E-Mail from Stefan Goreau of WCDOH: 0511794, 73 Spring Street, Ossining. Tank removal....can be closed, some Chlorinated VOC's in GW probably coming from offsite (reported in the early 1990's) Soil samples for petroleum contamination were good. I consulted with Ram Pergardia about the Chlorinated VOC's. January 29, 2007 Richard Aryeh Lionheart Ossining 20 River Terrace, Suite 16A New York, NY 10282 re: 73 Spring Street, Ossining, NY PBS# 3-600437 DEC Spill # 0511794 Dear Mr. Aryeh: The work permit closure report and subsequent groundwater and soil sampling reports for the removal of the petroleum storage tank at the above referenced site was received and reviewed by this Department: (Tank# X631929, #2 fuel oil, 3,000 gallon UST,) Although some chlorinated VOCs were detected in the groundwater samples, these appear to be coming from an offsite source and are not related to tank removal activities at this facility. The results of the soil samples taken were satisfactory when compared with the New York State Department of Environmental Conservation s Technical and Administrative Guidance Memorandum #4046. It is the recommendation of this Department that this work permit and NYSDEC Spill number requires No Further Action. A copy of this letter has been forwarded to the NYSDEC for spill closure consideration. Sincerely, Stefan Goreau Sanitarian Office of Environmental Health Risk Control

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

HW Code:	C360091
Control Code:	18
Control Type:	ENG
Date Record Added:	12/10/2008
Date Rec Updated:	05/20/2024
Updated By:	CBJALANT
Site Description:	"Location: The 4.5 acre site is located on the Hudson River waterfront in the Village of Ossining, Westchester County. Site Features: The Sing Sing Kill (a.k.a. Kill Brook) forms the northern

THE HARBOR SQUARE SITE (Continued) **S109416442**

site border; the Hudson River borders the site to the west; Westerly Road and the Metro-North Commuter Railroad border the site to the east; and the Ossining Boat and Canoe Club, Louis B. Engel Town Park, a wastewater treatment facility, and a correctional facility are located immediately south of the site. Current Zoning and Land Use: The site is currently zoned for commercial and residential use. The surrounding parcels are currently used for a combination of commercial, residential and light-industrial practices. Past Use of the Site: Prior uses that appear to have led to site contamination include utilization by a chemical manufacturer of fragrances and flavoring; petroleum bulk storage; a manufactured gas plant (MGP); a coal and lumber yard and a bus storage and maintenance facility. Site Geology and Hydrogeology: Overburden consists of fill at the surface, running sands, clayey-silts and discontinuous clay layer at approximately 25 feet below grade. Bedrock (Gneiss), which can be found at 185 feet below grade, dips steeply towards the river. Groundwater flows southwest toward the river. Groundwater can be found at depths ranging from 3.5 to 7 feet below grade, and fluctuates with the tides from 0.124 to 1.04 feet. "

Env Problem:	"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX), and styrene; semi-volatile organic compounds (SVOCs) including naphthalene; metals; light non-aqueous phase liquid (LNAPL); dense non-aqueous phase liquid (DNAPL). Five petroleum underground storage tanks (USTs) and associated piping were found at the site. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan was developed which includedes routine monitoring, inspection, and periodic certification requirements to ensure the remedial components (e.g., soil cover, DNAPL extraction, etc.) remain in place and effective. "
Health Problem:	"No human exposure to contamination from this site is expected. Contaminated soil is either removed or covered by roads, sidewalks, buildings, or clean soil, and public water serves the area. All new buildings will be constructed with a sub-slab depressurization system to eliminate the potential for exposure to contaminated soil vapor. "

HW Code:	C360091

THE HARBOR SQUARE SITE (Continued) **S109416442**

Control Code:	13
Control Type:	ENG
Date Record Added:	12/10/2008
Date Rec Updated:	05/20/2024
Updated By:	CBJALANT
Site Description:	"Location: The 4.5 acre site is located on the Hudson River waterfront in the Village of Ossining, Westchester County. Site Features: The Sing Sing Kill (a.k.a. Kill Brook) forms the northern site border; the Hudson River borders the site to the west; Westerly Road and the Metro-North Commuter Railroad border the site to the east; and the Ossining Boat and Canoe Club, Louis B. Engel Town Park, a wastewater treatment facility, and a correctional facility are located immediately south of the site. Current Zoning and Land Use: The site is currently zoned for commercial and residential use. The surrounding parcels are currently used for a combination of commercial, residential and light-industrial practices. Past Use of the Site: Prior uses that appear to have led to site contamination include utilization by a chemical manufacturer of fragrances and flavoring; petroleum bulk storage; a manufactured gas plant (MGP); a coal and lumber yard and a bus storage and maintenance facility. Site Geology and Hydrogeology: Overburden consists of fill at the surface, running sands, clayey-silts and discontinuous clay layer at approximately 25 feet below grade. Bedrock (Gneiss), which can be found at 185 feet below grade, dips steeply towards the river. Groundwater flows southwest toward the river. Groundwater can be found at depths ranging from 3.5 to 7 feet below grade, and fluctuates with the tides from 0.124 to 1.04 feet. "
Env Problem:	"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX), and styrene; semi-volatile organic compounds (SVOCs) including naphthalene; metals; light non-aqueous phase liquid (LNAPL); dense non-aqueous phase liquid (DNAPL). Five petroleum underground storage tanks (USTs) and associated piping were found at the site. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan was developed which includedes routine monitoring, inspection, and periodic certification requirements to ensure the remedial components (e.g., soil cover, DNAPL extraction, etc.) remain in place and effective. "
Health Problem:	"No human exposure to contamination from this site is expected. Contaminated soil is either removed or covered by roads, sidewalks, buildings, or clean soil, and public water serves the area. All new buildings will be constructed with a sub-slab depressurization system to eliminate the potential for exposure to contaminated soil vapor. "

Prior to remediation, the primary contaminants of concern were volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX), and styrene; semi-volatile organic compounds (SVOCs) including naphthalene; metals; light non-aqueous phase liquid (LNAPL); dense non-aqueous phase liquid (DNAPL). Five petroleum underground storage tanks (USTs) and associated piping were found at the site. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan was developed which includedes routine monitoring, inspection, and periodic certification requirements to ensure the remedial components

Site Code: 367322
Site Description: "Location: The 4.5 acre site is located on the Hudson River waterfront in the Village of Ossining, Westchester County. Site Features: The Sing Sing Kill (a.k.a. Kill Brook) forms the northern site border; the Hudson River borders the site to the west; Westerly Road and the Metro-North Commuter Railroad border the site to the east; and the Ossining Boat and Canoe Club, Louis B. Engel Town Park, a wastewater treatment facility, and a correctional facility are located immediately south of the site. Current Zoning and Land Use: The site is currently zoned for commercial and residential use. The surrounding parcels are currently used for a combination of commercial, residential and light-industrial practices. Past Use of the Site: Prior uses that appear to have led to site contamination include utilization by a chemical manufacturer of fragrances and flavoring; petroleum bulk storage; a manufactured gas plant (MGP); a coal and lumber yard and a bus storage and maintenance facility. Site Geology and Hydrogeology: Overburden consists of fill at the surface, running sands, clayey-silts and discontinuous clay layer at approximately 25 feet below grade. Bedrock (Gneiss), which can be found at 185 feet below grade, dips steeply towards the river. Groundwater flows southwest toward the river. Groundwater can be found at depths ranging from 3.5 to 7 feet below grade, and fluctuates with the tides from 0.124 to 1.04 feet. "
Env Problem: "Nature and Extent of Contamination: Remediation at the site is

Name: THE HARBOR SQUARE SITE
Address: ONE HARBOR SQ (FRMRLY WESTERLY ROAD)
City,State,Zip: OSSINING, NY 10562
Site Code: 367322
Control Name: Landuse Restriction
HW Code: C360091
Control Code: 25
Control Type: INST
Dt record added: 12/10/2008
Dt rec updated: 05/20/2024
Updated By: CBJALANT
Site Code: 367322
Site Description: "Location: The 4.5 acre site is located on the Hudson River waterfront in the Village of Ossining, Westchester County. Site Features: The Sing Sing Kill (a.k.a. Kill Brook) forms the northern

THE HARBOR SQUARE SITE (Continued) **S109416442**

site border; the Hudson River borders the site to the west; Westerly Road and the Metro-North Commuter Railroad border the site to the east; and the Ossining Boat and Canoe Club, Louis B. Engel Town Park, a wastewater treatment facility, and a correctional facility are located immediately south of the site. Current Zoning and Land Use: The site is currently zoned for commercial and residential use. The surrounding parcels are currently used for a combination of commercial, residential and light-industrial practices. Past Use of the Site: Prior uses that appear to have led to site contamination include utilization by a chemical manufacturer of fragrances and flavoring; petroleum bulk storage; a manufactured gas plant (MGP); a coal and lumber yard and a bus storage and maintenance facility. Site Geology and Hydrogeology: Overburden consists of fill at the surface, running sands, clayey-silts and discontinuous clay layer at approximately 25 feet below grade. Bedrock (Gneiss), which can be found at 185 feet below grade, dips steeply towards the river. Groundwater flows southwest toward the river. Groundwater can be found at depths ranging from 3.5 to 7 feet below grade, and fluctuates with the tides from 0.124 to 1.04 feet. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX), and styrene; semi-volatile organic compounds (SVOCs) including naphthalene; metals; light non-aqueous phase liquid (LNAPL); dense non-aqueous phase liquid (DNAPL). Five petroleum underground storage tanks (USTs) and associated piping were found at the site. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan was developed which includedes routine monitoring, inspection, and periodic certification requirements to ensure the remedial components (e.g., soil cover, DNAPL extraction, etc.) remain in place and effective. "

Health Problem: "No human exposure to contamination from this site is expected. Contaminated soil is either removed or covered by roads, sidewalks, buildings, or clean soil, and public water serves the area. All new buildings will be constructed with a sub-slab depressurization system to eliminate the potential for exposure to contaminated soil vapor. "

BROWNFIELDS:

Name:	THE HARBOR SQUARE SITE
Address:	ONE HARBOR SQ (FRMRLY WESTERLY ROAD)
City,State,Zip:	OSSINING, NY 10562
Program:	BCP
Site Code:	367322
Acres:	4.550
HW Code:	C360091
SWIS:	6042
Town:	Ossining
Record Added Date:	07/19/2006
Record Updated Date:	06/07/2023
Update By:	KAMALONE
Site Description:	"Location: The 4.5 acre site is located on the Hudson River waterfront in the Village of Ossining, Westchester County. Site Features: The Sing Sing Kill (a.k.a. Kill Brook) forms the northern site border; the Hudson River borders the site to the west; Westerly Road and the Metro-North Commuter Railroad border the site to the east; and the Ossining Boat and Canoe Club, Louis B. Engel Town Park, a wastewater treatment facility, and a correctional facility are located immediately south of the site. Current Zoning and Land Use: The site is currently zoned for commercial and residential use. The surrounding parcels are currently used for a combination of commercial, residential and light-industrial practices. Past Use of the Site: Prior uses that appear to have led to site contamination include utilization by a chemical manufacturer of fragrances and flavoring; petroleum bulk storage; a manufactured gas plant (MGP); a coal and lumber yard and a bus storage and maintenance facility. Site Geology and Hydrogeology: Overburden consists of fill at the surface, running sands, clayey-silts and discontinuous clay layer at approximately 25 feet below grade. Bedrock (Gneiss), which can be found at 185 feet below grade, dips steeply towards the river. Groundwater flows southwest toward the river. Groundwater can be found at depths ranging from 3.5 to 7 feet below grade, and fluctuates with the tides from 0.124 to 1.04 feet. "
Env Problem:	"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX), and styrene; semi-volatile organic compounds (SVOCs) including naphthalene; metals; light non-aqueous phase liquid (LNAPL); dense non-aqueous phase liquid (DNAPL). Five petroleum underground storage tanks (USTs) and associated piping were found at the site. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan was developed which includedes routine monitoring, inspection, and periodic certification requirements to ensure the remedial components (e.g., soil cover, DNAPL extraction, etc.) remain in place and effective. "
Health Problem:	"No human exposure to contamination from this site is expected. Contaminated soil is either removed or covered by roads, sidewalks, buildings, or clean soil, and public water serves the area. All new buildings will be constructed with a sub-slab depressurization system

THE HARBOR SQUARE SITE (Continued) **S109416442**

	to eliminate the potential for exposure to contaminated soil vapor. "

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Date Record Updated:	11/30/2017
Updated By:	DACROSBY
Site Description:	"Location: The site is located in an urban area of downtown Ossining, Westchester County, and approximately 1/4 of a mile from the Hudson River. The site encompasses both sides of Central Avenue, east of North Water Street. The site was previously occupied by a manufactured gas plant (MGP). The MGP was located on the block between Central Avenue and Main Street, along Kill Brook (a.k.a. Sing Sing Creek). Site Features: The main site features include several buildings along Central Avenue, Kill Brook, and a Con Edison Substation on the northern side of Central Avenue. Current Zoning and Land Use: The site is zoned commercial/industrial and is actively used by Con Edison and the Ossining Department of Public Works (DPW). Con Edison operates this relatively new substation, and the DPW has maintenance garages along Central Avenue. The DPW occupies/utilizes office and storage space in other on-site buildings. The surrounding parcels are currently used for commercial/manufacturing, neighborhood businesses, a train station (Metro North) with commuter parking lot, and multi-story residences. Past Use of the Site: The MGP site operated from the 1850's to 1940's. The coal gas operations have impacted groundwater and soil beneath the former MGP and areas downgradient with coal tar, a reddish brown oily liquid(a dense non-aqueous phase liquid (DNAPL)) by-product which formed as a condensate as the gas cooled. Operable Units: The site is currently being managed as three operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit No. 1 (OU1) is the on-site source area. Operable Unit No. 2 (OU2) and Operable Unit No. 3 (OU3) address the areas of off-site impact including off-site groundwater contamination, DNAPL, and soil vapor. Site Geology and Hydrogeology: Groundwater is 5-8ft below ground surface (bgs). Groundwater flows towards the west-southwest to the Hudson River. Bedrock outcropping is along the eastern and southern boundaries of OU1, and starts to dip down from 0-20ft bgs to 42ft bgs as you go west-northwest at OU2, and 50 to 100ft bgs closer to the river at OU3. A thin layer of glacial material is likely to be present at the site and is comprised of silty clay with occasional boulders. Bedrock is exposed in the hillside at several locations at

CE- OSSINING MGP (Continued) **S105684700**

	the site and is located within several feet of the surface across the site."
Env Problem:	"Nature and Extent of Contamination: For OU1: On-Site Areas Based upon investigations conducted to date, the primary contaminant of concern for OU1 include a dense non-aqueous phase liquid (DNAPL) in the subsurface at the former MGP Site. Soil- Surface and subsurface soil contamination has been identified on the former manufactured gas plant. Several metals have also been detected in the surface soils and the subsurface associated with fill material. Groundwater- Sampling revealed concentrations of volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX) and styrene, exceeding groundwater standards. Semi-volatile organic compounds (SVOCs), including naphthalene, were also identified above the groundwater standards. For OU2 and 3: Off-Site Areas Based upon investigations conducted to date, the primary contaminant of concern for OU2 and OU3 include a dense non-aqueous phase liquid (DNAPL) in the subsurface of the Parking Lot and at the Harbor Square Site. Soil- These areas downgradient OU2 Parking Lot & OU3 Harbor Square. Several metals have also been detected in the surface soils and the subsurface associated with fill material. Groundwater- Sampling revealed concentrations of volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX) and styrene, exceeding groundwater standards. Semi-volatile organic compounds (SVOCs), including naphthalene, were also identified above groundwater standards."
Health Problem:	"Site access is restricted by fencing so the potential for exposure to contaminated soils is limited to site workers and any trespassers. Additionally, the site is covered by either asphalt or structure foundations, eliminating the potential for people coming in direct contact with contaminated soil. The area is served by public water so exposure to contaminated groundwater is not expected. Based on the results of the Remedial Investigation Report, a soil vapor survey has been requested for the area. "

CE- OSSINING MGP (Continued) **S121933896**

Site Description: "Location: The 3.8-acre site is located in an urban area of downtown Ossining, Westchester County, and approximately 1/4 of a mile from the Hudson River. The site encompasses both sides of Central Avenue, east of North Water Street. The site was previously occupied by a manufactured gas plant (MGP). The MGP was located on the block between Central Avenue and Main Street, along Kill Brook (a.k.a. Sing Sing Creek). Site Features: The main site features include several buildings along Central Avenue, Kill Brook, and a Con Edison Substation on the northern side of Central Avenue. Current Zoning and Land Use: The site is zoned commercial/industrial and is actively used by Con Edison and the Ossining Department of Public Works (DPW). Con Edison operates this relatively new substation, and the DPW has maintenance garages along Central Avenue. The DPW occupies/utilizes office and storage space in other on-site buildings. The surrounding parcels are currently used for commercial/manufacturing, neighborhood businesses, a train station (Metro North) with commuter parking lot, and multi-story residences. Past Use of the Site: The MGP operated from the 1850's to 1940's. The coal gasification operations impacted groundwater and soil beneath the former MGP and areas downgradient with coal tar, a reddish brown oily liquid (a dense non-aqueous phase liquid (DNAPL)) by-product which formed as a condensate as the gas cooled. In April 2018 the site transitioned from the voluntary cleanup program (VCP) to the state superfund (SSF) program. See site V00568 for past remedial history. Operable Units: The site is currently being managed as three operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit No. 1 (OU1) is the on-site source area. Operable Unit No. 2 (OU2) and Operable Unit No. 3 (OU3) address the areas of off-site impact including off-site groundwater contamination, DNAPL, and soil vapor. Site Geology and Hydrogeology: Groundwater is 5 to 8 feet bgs. Groundwater flows towards the west-southwest to the Hudson River. A thin layer of glacial material comprised of silty clay with occasional boulders is likely to be present at the site. Bedrock is exposed in the hillside at several locations at the site and is located within several feet of the surface across the DPW area. The bedrock outcropping is observed along the eastern and southern boundaries of OU1. Bedrock dips down from 0-20 ft bgs to 42 feet bgs as you go west-northwest at OU2, and 50 to 100 feet bgs closer to the river at OU3."

Env Problem: "Nature and Extent of Contamination: For OU1: On-Site Areas Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), SVOCs, metals, and cyanide. Based upon the investigations to date, the primary constituents of concern are benzene, toluene, ethylbenzene, and xylene (BTEX) compounds, and polycyclic aromatic hydrocarbons (PAHs). Inorganic compounds are also observed in exceedance of Restricted Residential (RR) SCOs but would not be considered primary constituents of concern for MGP sites with the exception of cyanide. Since polychlorinated biphenyls (PCBs) and pesticides are not associated with MGP operations, they were not required analytes for this site. Soil: MGP coal tar in the form of NAPL was observed in soils and at the top of bedrock in only a few places at the site, mostly near the Kill Brook and the older gas holders, ranging from 5 to 35 feet bgs. BTEX and PAHs exceed RR SCOs deeper than 5 feet bgs across the site. BTEX contamination in

CE- OSSINING MGP (Continued) **S121933896**

concentrations above SCOs is present within a small area near the northern gas holder, while total PAH contamination above the 500 parts per million (ppm) guideline concentration extends from the northern gas holder to the southern and western gas holders at the site. Benzene was detected in soil at concentrations up to 1,600 ppm, exceeding the restricted residential use SCO of 4.8 ppm; toluene was found as high as 3,000 ppm, exceeding the restricted residential use SCO of 100 ppm; ethylbenzene was found as high as 3,500 ppm, exceeding the restricted residential use SCO of 41 ppm; total xylene was found as high as 3,400 ppm, exceeding the restricted residential use SCO of 100 ppm. Data does not indicate any off-site impacts in soil related to this site. Cyanide was detected in only one location at 46 ppm, exceeding the restricted residential SCO of 27 ppm. Surface soils at the site have not yet been sampled. Village of Ossining DPW operations includes storage of wrecked police cars and old equipment, and sand and salt storage. There's no indication of MGP contamination in the shallow soil. Groundwater - VOCs were detected in onsite groundwater above applicable standards: benzene was detected up to 7.9 micrograms/liter (ug/L), exceeding the standard of 0.7 ug/L; ethylbenzene detections up to 41 ug/L compared to the standard of 5 ug/L; and total xylenes were detected up to 20.4 ug/L exceeding the 5 ug/L standard. SVOCs were also detected, acenaphthene up to 58.1 ug/L and naphthalene up to 60.3 ug/L, both exceeding their applicable standard of 20 ug/L and 10 ug/L, respectively. Soil Vapor - Based on the data collected to date, soil vapor was not found to be impacted by site-related contamination. For OU2 and 3: Off-Site Areas (OU2 Parking Lot & OU3 Harbor Square) Based upon investigations conducted to date, the primary contaminant of concern for OU2 and OU3 is a DNAPL in the subsurface of the Parking Lot and at the Harbor Square Site. Soil- Several metals have also been detected in the surface soils and the subsurface associated with fill material. Lead was detected in 3 soil borings at 708 ppm, 822 pm, and 1,1680 in subsurface soils around 4 to 5 feet bgs. Groundwater- Sampling revealed concentrations of VOCs including BTEX and styrene, exceeding groundwater standards. SVOCs, including naphthalene, were also identified above groundwater standards."

Health Problem: "Site access is restricted by fencing so the potential for exposure to contaminated soils is limited to site workers and any trespassers. Additionally, the site is covered by either asphalt or structure foundations, eliminating the potential for people coming in direct contact with contaminated soil. The area is served by public water so exposure to contaminated groundwater is not expected. Based on the results of the Remedial Investigation Report, a soil vapor survey has been requested for the area."

MGP:

Site ID:	360172
Name:	CE- OSSINING MGP
Address:	39 CENTRAL AVE. AND 30 WATER STREET
City,State,Zip:	OSSINING, NY 10562
Region:	3
Class:	Active: The classification assigned to a non-registry site in any remedial program where work is underway and not yet complete (i. e., Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program and RCRA Corrective action Program sites). This may be used for Manufactured Gas Plant sites or those being remediated under an EPA Cooperative Agreement.
Swis Code:	6042
Town:	Ossining
Disp Start:	Not reported
Disp Term:	Not reported
Acres:	3.84
Fuse:	Restricted-Residential
Description:	Location: The 3.8-acre site is located in an urban area of downtown Ossining, Westchester County, and approximately 1/4 of a mile from the Hudson River. The site encompasses both sides of Central Avenue, east of North Water Street. The site was previously occupied by a manufactured gas plant (MGP). The MGP was located on the block between Central Avenue and Main Street, along Kill Brook (a.k.a. Sing Sing Kill). Site Features: The main site features include several buildings along Central Avenue, the Sin Sing Kill, and a Con Edison Substation on the northern side of Central Avenue. Current Zoning and Land Use: The site is zoned commercial/industrial and is actively used by Con Edison and the Ossining Department of Public Works (DPW). Con Edison operates this relatively new substation, and the DPW has maintenance garages along Central Avenue. The DPW occupies/utilizes office and storage space in other on-site buildings. The surrounding parcels are currently used for commercial/manufacturing, neighborhood businesses, a train station (Metro North) with commuter parking lot, and multi-story residences. Past Use of the Site: The MGP operated from the 1850's to 1940's. The coal gasification operations impacted groundwater and soil beneath the former MGP and areas downgradient with coal tar, a reddish-brown oily liquid (a dense non-aqueous phase liquid (DNAPL)) by-product which formed as a condensate as the gas cooled. In April 2018 the site transitioned from the voluntary cleanup program (VCP) to the state superfund (SSF) program. See site V00568 for past remedial history. Operable Units: The site is currently being managed as three operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit No. 1 (OU1) is the on-site source area. Operable Unit No. 2 (OU2) and Operable Unit No. 3 (OU3) address the areas of off-site impact

CE- OSSINING MGP (Continued) **S121933896**

including off-site groundwater contamination, DNAPL, and soil vapor. The portion of OU1 that is bound by Central Ave to the north, Water Street to the west and Main Street to the south is being remediated under the Brownfield Cleanup Program. See site C360172 for further information on the remediation of this portion of OU1. OU3 was remediated under the Brownfield Cleanup Program. See site C360091 for additional information on the remedial efforts that were completed for OU3. Site Geology and Hydrogeology: Groundwater is 5 to 8 feet below ground surface (bgs). Groundwater flows west-southwest towards the Hudson River. A thin layer of glacial material comprised of silty clay with occasional boulders is likely to be present at the site. Bedrock is exposed in the hillside at several locations at the site and is located within several feet of the surface across the DPW area. The bedrock outcropping is observed along the eastern and southern boundaries of OU1. Bedrock dips down from 0-20 ft bgs to 42 feet bgs as you go west-northwest at OU2, and 50 to 100 feet bgs closer to the river at OU3.

Assess Env: Nature and Extent of Contamination: For OU1: On-Site Areas The full nature and extent of contamination on OU1 is summarized and being addressed as part of the Brownfield Cleanup Program (Site No. C360172). Two soil borings were completed on the portion of OU-1 that is north of Central Avenue. Both locations were advanced using hand tools to approximately 2 feet below ground surface (bgs) before bedrock was encountered. No visual impacts were observed from either sampling location and no samples were collected from this portion of OU-1. OU2: Off-Site Areas Soil, sediment, and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, and cyanide. Based upon the investigations to date, the primary constituents of concern on OU2 are benzene, toluene, ethylbenzene, and xylene (BTEX), and polycyclic aromatic hydrocarbons (PAHs). Inorganic compounds are also observed in exceedance of Restricted Residential SCOs (RRSCOs) but would not be considered primary constituents of concern for MGP sites with the exception of cyanide. Since polychlorinated biphenyls (PCBs) and pesticides are not associated with MGP operations, they were not required analytes for this site. Based upon investigations conducted to date, the primary contaminant of concern for OU2 is coal tar, a dense non-aqueous phase liquid (DNAPL), in the subsurface which is a source of elevated total BTEX and total PAH contaminants in soil and groundwater. Soil - Total BTEX was detected in soil up to 1,750 ppm, exceeding the 10-ppm action level for BTEX in soil. Benzene was detected up to 272 ppm, toluene was detected up to 595 ppm, ethylbenzene was detected up to 221 ppm, and total xylenes were detected up to 659 ppm. Each compound exceeded their respective RRSCOs of 4.8 ppm, 100 ppm, 41 ppm, and 100 ppm. Total PAH was detected in soil up to 24,400 ppm exceeding the 500-ppm action level for total PAHs in soil. Total PAH is calculated by combining the total concentrations of individual PAH compounds. Compounds that exceeded the RRSCOs were acenaphthene up to 1,380 ppm, acenaphthylene up to 225 ppm, anthracene up to 1,670 ppm, benzo(a)anthracene up to 1,270 ppm, benzo(a)pyrene up to 800 ppm, benzo(b)fluoranthene up to 647 ppm, benzo(g,h,i)perylene up to 303 ppm, chrysene up to 366 ppm, dibenzo(a,h)anthracene up to 229 ppm, dibenzofuran up to 995 ppm, fluoranthene up to 3,650 ppm, fluorene up to 1,380 ppm, indeno(1,2,3-cd)pyrene up to 445 ppm, naphthalene up to 3,210 ppm, phenanthrene up to 5,400 ppm, and pyrene up to 2,320 ppm. The RRSCO is 100 ppm for acenaphthene, acenaphthylene, anthracene,

CE- OSSINING MGP (Continued) **S121933896**

benzo(g,h,i)perylene, fluoranthene, fluorene, phenanthrene, and pyrene, 1 ppm for benzo(a)anthracene, benzo(a)pyrene, and benzo(b)fluoranthene, 3,9 ppm for chrysene, 0.33 ppm for dibenzo(a,h)anthracene, 59 ppm for dibenzofuran, and 0.5 ppm for indeno(1,2,3-cd)pyrene. Groundwater - Sampling revealed concentrations of VOC, SVOCs, and metals exceeding groundwater standards. VOCs were detected in groundwater included benzene up to 150 micrograms per liter (ug/L), ethylbenzene up to 320 ug/L, styrene up to 5.8 ug/L, and toluene up to 110 ug/L. The ambient water quality standard is 0.7 ug/L for benzene and 5 ug/L for ethylbenzene, styrene, and toluene. SVOCs detected in groundwater above their respective ambient water quality standards included acenaphthene up to 230 ug/L, benzo(a)anthracene up to 0.4 ug/L, chrysene up to 0.4 ug/L, and phenol up to 3.2 ug/L. The ambient water quality standard is 20 ug/L for acenaphthene, 0.002 ug/L for benzo(a)anthracene and chrysene, and 1 ug/L for phenol. Lead was detected in groundwater samples up to 90.7 ug/L, exceeding the water quality standard of 25 ug/L. Sediments - Samples collected from the Sing Sing Kill show contamination of PAHs up to 7.27 ppm, exceeding the Department Class A sediment guidance value of 4 ppm. OU3: Off-site Area The full nature and extent of contamination is summarized and being addressed as part of the Brownfield Cleanup Program (Site No. C360091).

Assess Doh: Site access is restricted by fencing so the potential for exposure to contaminated soils is limited to site workers and any trespassers. Additionally, the site is covered by either asphalt or structure foundations, eliminating the potential for people coming in direct contact with contaminated soil. The area is served by public water so exposure to contaminated groundwater is not expected. Based on the results of the Remedial Investigation Report, a soil vapor survey has been requested for the area.

Latitude: 41.159317055
Longitude: -73.867169488

Site ID: Not reported
Name: CE- OSSINING MGP
Address: 39 CENTRAL AVE. AND 30 WATER STREET
City,State,Zip: OSSINING, NY 10562
Region: 3
Class: No Further Action at this Time: Sites are given a classification of "N" when: the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program; a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced; a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate

CE- OSSINING MGP (Continued) **S121933896**

or remediate the site.
Swis Code: 6042
Town: Ossining
Disp Start: Not reported
Disp Term: Not reported
Acres: 3.84
Fuse: Industrial
Description: The Voluntary Cleanup Program ended in July 2018. The remedial party did not complete the remedial program and no release will be issued under the Voluntary Cleanup Program. The site has transitioned to the Superfund program. See site number 360172. Location: The site is located in an urban area of downtown Ossining, Westchester County, and approximately 1/4 of a mile from the Hudson River. The site encompasses both sides of Central Avenue, east of North Water Street. The site was previously occupied by a manufactured gas plant (MGP). The MGP was located on the block between Central Avenue and Main Street, along Kill Brook (a.k.a. Sing Sing Creek). Site Features: The main site features include several buildings along Central Avenue, Kill Brook, and a Con Edison Substation on the northern side of Central Avenue. Current Zoning and Land Use: The site is zoned commercial/industrial and is actively used by Con Edison and the Ossining Department of Public Works (DPW). Con Edison operates this relatively new substation, and the DPW has maintenance garages along Central Avenue. The DPW occupies/utilizes office and storage space in other on-site buildings. The surrounding parcels are currently used for commercial/manufacturing, neighborhood businesses, a train station (Metro North) with commuter parking lot, and multi-story residences. Past Use of the Site: The MGP site operated from the 1850's to 1940's. The coal gas operations have impacted groundwater and soil beneath the former MGP and areas downgradient with coal tar, a reddish brown oily liquid(a dense non-aqueous phase liquid (DNAPL)) by-product which formed as a condensate as the gas cooled. Operable Units: The site is currently being managed as three operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit No. 1 (OU1) is the on-site source area. Operable Unit No. 2 (OU2) and Operable Unit No. 3 (OU3) address the areas of off-site impact including off-site groundwater contamination, DNAPL, and soil vapor. Site Geology and Hydrogeology: Groundwater is 5-8ft below ground surface (bgs). Groundwater flows towards the west-southwest to the Hudson River. Bedrock outcropping is along the eastern and southern boundaries of OU1, and starts to dip down from 0-20ft bgs to 42ft bgs as you go west-northwest at OU2, and 50 to 100ft bgs closer to the river at OU3. A thin layer of glacial material is likely to be present at the site and is comprised of silty clay with occasional boulders. Bedrock is exposed in the hillside at several locations at the site and is located within several feet of the surface across the site.
Assess Env: Nature and Extent of Contamination: For OU1: On-Site Areas Based upon investigations conducted to date, the primary contaminant of concern for OU1 include a dense non-aqueous phase liquid (DNAPL) in the subsurface at the former MGP Site. Soil- Surface and subsurface soil contamination has been identified on the former manufactured gas plant. Several metals have also been detected in the surface soils and the subsurface associated with fill material. Groundwater-

CE- OSSINING MGP (Continued) **S121933896**

Sampling revealed concentrations of volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX) and styrene, exceeding groundwater standards. Semi-volatile organic compounds (SVOCs), including naphthalene, were also identified above the groundwater standards. For OU2 and 3: Off-Site Areas Based upon investigations conducted to date, the primary contaminant of concern for OU2 and OU3 include a dense non-aqueous phase liquid (DNAPL) in the subsurface of the Parking Lot and at the Harbor Square Site. Soil- These areas downgradient OU2 Parking Lot & OU3 Harbor Square. Several metals have also been detected in the surface soils and the subsurface associated with fill material. Groundwater- Sampling revealed concentrations of volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylene (BTEX) and styrene, exceeding groundwater standards. Semi-volatile organic compounds (SVOCs), including naphthalene, were also identified above groundwater standards.

Assess Doh: Site access is restricted by fencing so the potential for exposure to contaminated soils is limited to site workers and any trespassers. Additionally, the site is covered by either asphalt or structure foundations, eliminating the potential for people coming in direct contact with contaminated soil. The area is served by public water so exposure to contaminated groundwater is not expected. Based on the results of the Remedial Investigation Report, a soil vapor survey has been requested for the area.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
