EXECUTIVE SUMMARY

On behalf of the City of Yonkers (CoY), Paulus, Sokolowski and Sartor, Engineering, PC (PS&S) conducted a Phase I Environmental Site Assessment (Phase I ESA) for the properties located along the west side of Fernbrook Street, between Ludlow Street and the Westchester County Wastewater Treatment Plant (generally known as 70 Fernbrook Street) in Yonkers, Westchester County, New York (herein referred to as the "Site"). The Site is comprised of eight separate tax lots, as detailed in Section 2.1. The Site is also comprised of the historic city street, Pier Street, and some of Yerks Place (Front Street), which are not covered by the aforementioned lots. A Site Location Map is included as **Figure 1**.

Section	Block	Lot	Lot Address	Owner	Size (sq..ft.)
1	615	1	8 Water Grant St	Saviano Enterprises Inc	11,586.00
1	615	6	8 Water Grant St	Saviano Enterprises Inc	8,276.00
1	615	10	102 Pier St	Saviano Enterprises Inc	19,558.00
1	615	35.45	78 Pier Street	Saviano Enterprises Inc	30,361.00
1	622	1	101 Pier St	Saviano Enterprises Inc	25,395.00
1	622	8	12 Yerks Pl	Saviano Enterprises Inc	8,886.00
1	623	1	111 Yerks Pl	Saviano Enterprises Inc	5,227.00
1	623	4	9 Water Grant	Saviano Enterprises Inc	19,209.00
8 Lots owned by	Saviano Enterprises Inc			Total Lot Size:	128,498.00

Based upon a review of historical sources, the subject property appears to have existed as a commercial ice-making facility in 1886, with further development noted by 1917, at which point the remainder of the subject property consisted of commercial/industrial properties for wood/coal storage, oil storage, and oil refining. These properties were identified in the Sanborn Maps as Pure Oil Co., Yonkers City Ice Co./Westchester Service Corporation, Hays & Randolph Co., and Gulf Refining Co, respectively. By 1971, the ice-making facility (Westchester Service Corporation) and wood/coal storage (Hays & Randolph Co.) were no longer present, and structures took their place in the southern properties comprising the Site. The subject property was converted to its current state – a parking lot for buses – between 1991 and 1994. The Site is identified as Tarricone Terminal in the last available Sanborn Map in 2004. During the Phase I ESA site reconnaissance, the Site was found to be operated by All County Bus Co.

This Phase I ESA was conducted pursuant to the ASTM International Standard Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process). Completion of a Phase I ESA in accordance with the ASTM Practice constitutes all appropriate inquiries required to qualify for the bona fide

prospective purchaser liability protections available under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA). The objective of this Phase I ESA was to identify the presence or likely presence on the Site of hazardous substances or petroleum products as defined in ASTM E1527-13 as a Recognized Environmental Condition (REC).

Recognized Environmental Conditions (RECs)

RECs are defined by ASTM in the E1527-13 standard as:

"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

This assessment has revealed evidence of six RECs in connection with the Site. One REC relates to the current site activity, while the others are in connection with historical site activity. Each REC is discussed in more detail in Section 7.0 - Evaluation.

Controlled Recognized Environmental Conditions (CRECs)

The ASTM definition of a CREC in the E1527-13 standard is as follows*: "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*

This assessment has revealed no evidence of CRECs in connection with the Site.

Historical Recognized Environmental Conditions (HRECs)

The ASTM definition of a HREC in the E1527-13 standard is as follows*: "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to*

any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

This assessment has revealed no evidence of HRECs in connection with the Site.

1.0 INTRODUCTION

On behalf of the City of Yonkers (CoY), Paulus, Sokolowski and Sartor, Engineering, PC (PS&S) conducted a Phase I Environmental Site Assessment (Phase I ESA), in conformance with ASTM 1527-13, for the property located along Fernbrook Street, in Yonkers, Westchester County, New York (herein referred to as the "Site"). The Site is comprised of eight (8) tax lots located within the City of Yonkers, as detailed in Section 2.1. A Site Location Map is included as **Figure 1**.

The purpose of this Phase I ESA is to:

1) Identify Recognized Environmental Conditions (RECs) in connection with the Site, as defined in The Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527- 13, which defines RECs as follows:

   "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

   De minimis conditions are defined as conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2) Provide services consistent with the USEPA 40 Code of Federal Regulations (CFR) Part 312 Subpart C Standards and Practices §312.20 All Appropriate Inquiries (AAI) Rule.

1.1 Scope of the Phase I ESA

The scope of services performed in execution of this Phase I ESA was performed in accordance with the ASTM E1527-13 standard and is subject to the limitations identified in this Phase I ESA Report. PS&S reports that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Services. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for identifying RECs associated with the Site.

This Phase I ESA is based on the conditions existing on the date of PS&S's site reconnaissance. The conclusions presented herein are professional opinions based on visual observations of the Site and vicinity, and interpretation of reasonably ascertainable information provided to PS&S. Past conditions were considered based on observations, available records, and interviews.

The Phase I ESA presented herein consisted of the following tasks identified below.

1. February 15, 2022 general site reconnaissance
2. File review and document search regarding the past and current usage of the Site and surrounding properties
3. Review of available Sanborn Maps, aerial photographs, and historical topographic maps; a review of property surveys
4. Review of federal, state, and local databases and records
5. Review of historical city directories; and
6. Review of available property owner records.

PS&S used a commercial environmental information service (Environmental Data Research, Inc.) to obtain data regarding state and federal program records.

Written inquiries requesting information concerning records of storage, disposal, spills, or releases of hazardous substances requiring an environmental response action on or adjacent property to the Site were made to state, county, and municipal agencies.

1.2 Assumptions, Limitations, and Exceptions of Assessment

PS&S does not warrant or guarantee the correctness, completeness, and/or most recent date of the information contained in the environmental record sources and recollections used for this Phase I ESA. Such information is the product of independent investigation by parties other than PS&S and/or information maintained by government agencies.

This Phase I ESA Report is based on current environmental regulations. Future regulatory modifications, agency interpretations, and/or policy changes may affect the compliance status of the Site. PS&S does not warrant or guarantee the property suitable for any purpose or certify the property as clean.

This Phase I ESA Report is not an environmental or compliance audit. This Phase I ESA Report makes no conclusion or recommendation regarding compliance with current regulations. Any references to relevant laws and regulations are not intended to be exhaustive, or to provide legal advice or interpretation. The user should seek legal advice and review the applicable laws and their implications as to overall environmental compliance or to any proposed transaction.

This Phase I ESA Report does not imply or intend inquiry into non-scope considerations such as asbestos-containing building materials, biological agents, cultural and historic resources, endangered species, health and safety, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, receptor analysis and sensitive environment analysis; this list is not intended to be an all-inclusive list of non-scope considerations; however, this list indicates examples of common commercial real estate transaction concerns which require specialized expertise, and were not requested or included as part of this Phase I ESA.

1.3 User Reliance

Nothing herein or in any subsequent performance of services by PS&S will be construed to give any rights of reliance or similar benefits to anyone other than the City of Yonkers, its affiliates, lenders, insurers, and other advisors (collectively, the User Parties).

All duties and responsibilities undertaken in connection with this Phase I ESA are for the sole and exclusive benefit of the City of Yonkers, the User Parties and PS&S, and not for the benefit of anyone else.

2.0 PHASE I ESA SITE LOCATION AND DESCRIPTION

The Site is located on eight (8) separate tax lots along Fernbrook Street, in Yonkers, Westchester County, New York. The Site is also comprised of the historic city street, Pier Street, and some of Yerks Place (Front Street), which are not covered by the aforementioned lots.

Property tax information is listed in Table 1.0.

Table 1.0
Site Location and Site Acreage

Lot Address	Section	Block	Lot	Acres	Current Ownership Status
8 Water Grant Street	1	615	1	0.27	Saviano Enterprises, Inc.
8 Water Grant Street	1	615	6	0.19	Saviano Enterprises, Inc.
102 Pier Street	1	615	10	0.45	Saviano Enterprises, Inc.
78 Pier Street	1	615	35.45	0.70	Saviano Enterprises, Inc.
101 Pier Street	1	622	1	0.58	Saviano Enterprises, Inc.
12 Yerks Place	1	622	8	0.20	Saviano Enterprises, Inc.
111 Yerks Place	1	623	1	0.12	Saviano Enterprises, Inc.
9 Water Grant Street	1	623	4	0.44	Saviano Enterprises, Inc.

Three of the of the eight lots which comprise the Site (Block 615, Lots 1 and 6, and Block 623, Lot 4) are located along the Hudson River and are primarily submerged along the western Site perimeter. Most of the acreage of these lots is therefore not a focus of this ESA.

The Site (approximately 551 feet fronting Fernbrook Street and 150 to 175 ft fronting adjacent properties) is located within the City of Yonkers. With respect to the four cardinal directions, the Site is bounded to the north by a commercial property (Foodliner Terminal), to the west by the Hudson River, to the east by Fernbrook Street, and to the south by the Westchester County Wastewater Treatment Plant. All other surrounding properties to the north and east are commercial/industrial until the railroad tracks.

The Site location is depicted on the included United States Geological Survey (USGS) Topographic Quadrangle map of Yonkers, NY **(**refer to **Figure 1)**. Photographs of the Site

and surrounding area observed during the PS&S general site reconnaissance are included in **Appendix A**.

Based upon a review of historical sources, the subject property appears to have existed as a commercial ice-making facility in 1886, with further development noted by 1917, at which point the remainder of the subject property consisted of commercial/industrial properties for wood/coal storage, oil storage, and oil refining. These properties were identified in the Sanborn Maps as Pure Oil Co., Yonkers City Ice Co./Westchester Service Corporation, Hays & Randolph Co., and Gulf Refining Co, respectively. By 1971, the ice-making facility (Westchester Service Corporation) and wood/coal storage (Hays & Randolph Co.) were no longer present, and structures took their place in the southern properties comprising the Site. The subject property was converted to its current state – a parking lot for buses – between 1991 and 1994. The Site is identified as Tarricone Terminal in the last available Sanborn Map in 2004. During the Phase I ESA site reconnaissance, the Site was found to be operated by All County Bus Co.

3.0 USER PROVIDED INFORMATION

The ASTM User Questionnaire was completed by Paul Summerfield, the COY City Engineer, on February 17, 2022. The following sections are completed using User provided information. The ASTM User Questionnaire is included as **Appendix L**.

3.1 Environmental Liens or Activity Use Limitations

The User is not aware of environmental liens or activity use limitations that are filed or recorded against the Site.

3.2 Specialized and Actual Knowledge

The User stated that the Site was formerly operated as a commercial fuel oil storage facility and is currently a busk parking area.

3.3 Valuation Reduction for Environmental Issues

The User is in the process of determining if the purchase price for this Site reasonably reflects the fair market value of the property.

4.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs at the Site.

4.1 Environmental Database Record (EDR) Research

Federal and state environmental databases were searched to evaluate the environmental regulatory status of the Site, adjoining facilities, and facilities identified within a specific search distance of the Site in the State of New York. This information was compiled by EDR of Shelton, Connecticut and contained in an EDR-Radius Map with GeoCheck. The distance from the Site that each database is searched is established by ASTM Standard E1527-13. The database search report, including the federal and state databases searched, date, and a detailed description of each database, is provided in **Appendix D**.

The following table provides a summary of state and federal databases listings, within the minimum search radius, reveled during this assessment.

Table 2.0
Summary of Federal and State Database Findings

Database	Search Distance (mi)	Is the Target Property Listed? (Y/N)	Other Listed property & Distance from Target Property (mi)					Total

TOTAL		**Y**	**80**	**22**	**48**	**1**	**0**	**151**

4.2 Radius Map

Subject Site

Review of the EDR-Radius Map indicates that the Site was listed as A. Tarricone Inc (ATI)/ATI Ludlow MOSF, a major oil storage facility (MOSF) located in the northern limits of the Site, under the MOSF No. 3-2220. ATI is listed in the NY AST and NY Spills databases and is in the NPDES system as number 0-099546. ATI consisted of 14 aboveground storage tanks (ASTs), each consisting of steel tanks holding large quantities of leaded or unleaded gasoline. Tanks details can be found in the table below:

Tank Number	Tank Volume (Gallons)	Tank Contents
1	169,579	Unleaded Gasoline
2	169,556	Unleaded Gasoline
3	169,541	Leaded Gasoline
4	169,565	Leaded Gasoline
5	449,521	Unleaded Gasoline

6	251,711	Unleaded Gasoline
7	109,832	Unleaded Gasoline
8	108,247	Unleaded Gasoline
9	158,224	Unleaded Gasoline
10	158,106	Unleaded Gasoline
11	176,311	Unleaded Gasoline
12	169,500	Unleaded Gasoline
13	176,002	Unleaded Gasoline
14	176,314	Unleaded Gasoline

A vapor extraction system (VES) was installed at the Site during tank operation to determine potential leaks. The facility, ATI Ludlow MOSF (VES) reported a release of an unknown material in 1983 and 958 Liters of material was recovered. The case was identified by number 8312001 and was closed as of December 4, 1995.

A waterways spill was reported, assigned by NYSDEC as Spill No. 9610421, consisting of approximately 5 gallons of hydraulic oil spilled into the Hudson River during a hydraulic line failure from the Berga Falcon vessel on November 19, 1996. The case was closed on November 20, 1996.

EDR-Radius Map lists All County Bus as an off-site location at 70 Fernbrook Street, but the property is located on Site at the former ATI property. This property is listed in the NY AST database (PBS No. 3-800816). All County Bus consists of 7 aboveground storage tanks (ASTs), each consisting of steel tanks. No spills are recorded for this property. Tanks details can be found in the table below:

Tank Number	Tank Volume (Gallons)	Tank Contents	Tank Status	Installation Year
1	275	#4 Fuel Oil	In Service	1995
2	275	#4 Fuel Oil	In Service	1995
3	275	Waste Oil	In Service	2001
4	2,500	Diesel	In Service	1995
5	275	#4 Fuel Oil	Closed - Removed	2001
6	275	Lube Oil	In Service	2001
7	275	Used Heating Oil	Closed - Removed	2013

A spill was also reported for the Site under the address 101 Fernbrook Street, aka 12 Yerks Place (Execuvan) and is listed in the NY Spills database under Spill No. 0514864. The spill is associated with holes in a 550-gallon underground storage tank (UST) that caused the spill of an unknown amount of #2 fuel oil. NYSDEC assigned Spill No. 8911314 on March 28, 2006. Execuvan hired a contractor to remove the tank and Duchess Environmental to excavate the affected soil. Work was reported as completed, as of the date of the spill assignment, but post-excavation sample results and soil disposal receipts were not accessible due to a dispute between Duchess and Execuvan about payment for the work. The case was administratively closed on May 16, 2019.

Off-Site (Adjacent and Up-gradient Sites)

Review of the EDR-Radius Map indicates that a total of 151 sites were listed within in the databases within the radius search. Information associated with all 151 sites, including remarks from the respective agencies are provided in **Appendix D**.

The following off-Site facilities, located within one eighth of a mile (1/8 mile or 660 ft.) radius of the Site and topographically upgradient from the Site, were reviewed for potential concerns associated with the potential migration of those hazardous substances or petroleum products to the Site. Determination of a REC was evaluated based upon the type of listing and the proximity (within 250 ft.) to the Site.

Petroleum Related Findings

i. Con Edison– Fernbrook Street & Ludlow Street/1 Federal Street : This database entry is associated with a Con Edison site located 525 ft. NE from the Site and was listed in the RCRA NONGEN / NLR database for a Conditionally Exempt Small Quantity Generator, and in the NY MANIFEST database for approximately 4,200 lbs. of petroleum oil, as well as approximately 110 lbs of Benzene and PCBs. No violations are listed for the property.

ii. Fueling Depot/Happy Time Charter – 132 & 140 Fernbrook Street: This database entry is associated with a spill reported in a North Atlantic Petroleum site located across the street from the Site, approximately 70 ft. from the Site. Overfill of an on-site tank spilled approximately 50 gallons of #2 Fuel Oil into the street and associated manhole. Approximately 5 gallons were found in the manhole,

containing 750 gallons of water. Approximately 10 gallons were found in Con Edison vault #6001. Spill Nos. 0010396/0010397 and 0010399 were assigned to the case on December 15, 2000. 0010399 and 0010397 were closed on December 15, 2000. No further action was designated and 0010396 was closed on February 7, 2005.

An additional spill case is reported for the property under Tri County Ambulette Services/Happy Times Transport under Spill No. 0102331. Approximately 5 gallons of waste oil was observed leaking into the sewer from vehicle repair work in the garage on-site. The spill case was closed by WCDH and NYSDEC on December 9, 2003.

iii. Hudson Scenic Studio – 130 Fernbrook Avenue: This property is located across the street from the Site (south of 140 Fernbrook), approximately 50 ft. from the Site. The Site and was listed in the RCRA-VSQG database as a Conditionally Exempt Small Quantity Generator for approximately 100 lbs. of ignitable waste, Barium, Methyl Ethyl Ketone, and for non-halogenated solvents. No violations are listed for the property.

The property is also listed in the NY LTANKS and NY Spills databases as Spill Nos. 0003581 and 9814778. Two underground storage tanks were removed to convert the property to natural gas and contaminated soil and water were observed in the process. Approximately 682 tons of contaminated soil and 10,964 gallons of contaminated groundwater were removed as part of the tank removal on May 26, 1999, and an additional 399.8 tons of contaminated soil were subsequently removed. No further action was declared, and the case was closed on July 5, 2001.

iv. Electra Poly Corp. – 78 Fernbrook Street: The spill is associated with the leakage of an unspecified volume of diesel fuel from on-site pumps located approximately 50-100 ft SE from the Site. The affected area is approximately 60-feet by 60-feet (3,600 sq. ft.). Spill Number 9202656 was assigned to the case on June 4, 1992. The spill was closed on November 21, 1995.

v. Auto Shops- 1 to 3 Bridge St: This property is located approximately 550 ft. NE from the Site. The property is listed in the EDR HIST AUTO database. It appears as the property was a gasoline service station and car dealership from 1974 to 1998 (Smitty's Service Station/Tobias Auto Sales Corp.) and as Gaetano's Auto Styling until 2015. The property was listed in the RCRA NONGEN / NLR, FINDS, and ECHO databases for a Conditionally Exempt Small Quantity Generator, and in the NY MANIFEST database for approximately 5 gallons of ignitable waste, Methyl Ethyl Ketone, and for non-halogenated solvents. No violations are listed for the property.

vi. Sunnyside Drive Properties: This entry is associated with several spills and leaks on Sunnyside Drive – to the east of the railroad tracks. Spill No. 1502074 was assigned to the removal of 550-gallon UST on May 25, 2015, located approximately 525 ft ESE from the Site. Post-excavation soil samples were below DEC guidance values, no further action was declared, and the spill case was closed

on July 7, 2015. Spill No. 0608986 was assigned to a UST removal on November 6, 2006, located approximately 625 ft SSE from the Site. Affected soil was removed, and the spill case was closed on December 8, 2006.

4.3 Tier I Vapor Encroachment Screening (Per ASTM E2600-10)

PS&S reviewed the Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-10), Section 8 (Tier I Screening) to determine if a potential vapor encroachment condition (VEC) exists at the Site. The purpose of this investigation is to identify potential VECs that may emanate from on-Site or off-Site sources.

Using the EDR VEC Application screening tool, a web-based software program calibrated to ASTM E2600 Tier I Screening criteria, PS&S did not identify any potential sources of VECs located upgradient and within 1/3rd of a mile. On-site VEC conditions may exist due to former and current petroleum use at the Site as discussed in Sections 4.1.1 or 4.1.3.

The EDR VEC Screening Map is provided as **Appendix E**.

4.4 Standard Historical Sources

4.4.1 Aerial Photographs

PS&S requested that EDR perform a search of Historical Aerial Photographs that include the Site and immediate vicinity. Based upon EDR's search results, PS&S reviewed Historical Aerial Photographs for the years 1940, 1951, 1954, 1961, 1966, 1974, 1976, 1984, 1989, 1991, 1994, 1995, 2006, 2010, 2013 and 2017. Copies of the Historical Aerial Photographs provided by EDR are included as **Appendix G**. The following is a summary of the Historical Aerial Photographs.

- **1940 –** The Site is developed with multiple structures, including three circular structures toward the north, appearing to cover an otherwise paved lot. The surrounding area is also developed with industrial properties to the

north and northeast, railroad tracks to the east, and paved lots/parking lots to the south.

- **1951 –** The Site appear relatively unchanged since the 1940 aerial photograph, with the exception of a total of seven circular features to the north portion. The surrounding area has seen additional development, particularly new structures to the south and new industrial properties to the north.
- **1954 –** The Site and surrounding areas appear relatively unchanged since the 1951 aerial photograph.
- **1961–** The Site and surrounding areas appear relatively unchanged since the 1954 aerial photograph. New development and structures are visible to the southeast of the Site, between Fernbrook Street and the railroad tracks.
- **1966** – Fewer structures are visible at the Site, however more circular features appear to the north. Fewer structures are visible in surrounding areas since the 1961 aerial photograph. The southern lots appear to have been redeveloped into additional parking area and some buildings, while properties near – but not adjacent to – the property to the north and south appear to have been cleared of most structures. The property directly east of the Site, along Fernbrook Street, shows signs of additional development.
- **1974 –** The Site appear relatively unchanged since the 1966 aerial photograph, but surrounding areas appear to have been seen significant development. A cleared-out property to the north of the Site appears to have been developed into a parking lot. The property to the southeast of the Site appears to have been redeveloped into a property with fewer structures. Most notably, the riverfront to the south of the Site has been filled in and expanded further out to the west with new structures built atop the filled in area.
- **1976 –** The Site and surrounding areas appear relatively unchanged since the 1974 aerial photograph. The filled in riverfront property has additional development/structures visible
- **1984 –** The Site and surrounding areas appear relatively unchanged since the 1974 and 1976 aerial photographs.
- **1989 –** The Site and surrounding areas appear relatively unchanged since the 1984 aerial photograph. A new structure is visible on the property to the southeast of the Site.
- **1991 –** The Site and surrounding areas appear relatively unchanged since the 1989 aerial photograph.
- **1994 –** The Site appears to have been mostly demolished and converted into a parking lot since the 1991 aerial photograph. The surrounding areas appear relatively unchanged since the 1991 aerial photograph, but the photograph lacks enough resolution to comment on changes to those properties.
- **1995 -** The Site appears to have one permanent structure in the center of the Site along the River, however several rows of rectangular features appear throughout the Site. The surrounding areas appear relatively unchanged since the 1991 and 1994 aerial photographs.
- **2006 –** The Site and surrounding areas appear relatively unchanged since the 1995 aerial photograph.

- **2010 –** The Site and surrounding areas appear relatively unchanged since the 2006 aerial photograph.
- **2013 –** The Site and surrounding areas appear relatively unchanged since the 2010 aerial photograph.
- **2017 –** The Site and surrounding areas appear relatively unchanged since the 2013 aerial photograph.

4.4.2 Sanborn Fire Insurance Maps

PS&S requested EDR to perform a search of Sanborn Maps that include the Site and immediate vicinity. Based upon EDR's search results, PS&S reviewed Historical Sanborn Fire Insurance Maps for the years 1886, 1898, 1917, 1942, 1951, 1956, 1957, 1971, 1973, 1978, 1989, 1991, and 2004. Copies of the Historical Sanborn Fire Insurance Maps are included as **Appendix H**. The following is a summary of the Historical Sanborn Fire Insurance Maps.

- **1886** –The Yonkers City Ice Company and its ice pond are present along the Hudson River and appear to comprise part of the Site. Several small commercial/industrial buildings are also present to the north with no data available to the south.
- **1898 –** Limited data is available for the Site. The Yonkers City Ice Company comprises most of the northern limits of the Site, but no data is available for the southern limits of the Site. Pier Street is depicted to the south of the Ice Company. The developed areas of the Site consist of various 1-to-3 story commercial/industrial buildings, while the properties north of the Site are all 1-story commercial/industrial buildings. A coal yard is depicted to the north of the Site.
- **1917 –** The Site is now visible 4 separate properties - Pure Oil Co. along the northern limits, and Yonkers City Ice Co., Hays and Randolph Co., and Gulf Refining Co. from north to south. The Site consists of various yards with oil and coal storage areas, and 1-to-2 story commercial/industrial buildings. Tanks appear in area of the Pure Oil Company and in the Gulf Refining Company. Coal pocket/bins appear in the Hays & Randolph Company area.
  The Yonkers City Ice Co. building is shown to include an engine room for the ice-making machinery and a boiler room with a concrete floor
  Data around the Site appears incomplete, but further development can be seen to the east and northeast, particularly the Cooperage Shop to the north of Ludlow Street.
  A new 12" water pipe is present in West Cross Street, to the east of the Site.
- **1942** – The Sanborn Map shows further signs of development but is mostly unchanged from the 1917 Sanborn Map.

No utilities are shown in this Sanborn Map. West Cross Street to the east and Front Street to the west are now primarily referred to as Fernbrook Street and Yerks Place, respectively.

- **1951** – The Sanborn Map shows further signs of development but is mostly unchanged from the 1942 Sanborn Map.
  The rest of the surrounding area is mostly unchanged, excepting changes/redevelopment to the properties north of Ludlow Street.
- **1956 –** The Site and surrounding areas appear relatively unchanged since the 1951 Sanborn Map.
  12" Water pipes are present within Fernbrook Street and Ludlow Street, with a 6" water pipe visible in Pier Street.
- **1957 –** The Site and surrounding areas appear relatively unchanged since the 1956 Sanborn Map.
- **1971 –** The Site has seen new development since the 1957 Sanborn Map. The property south of Ludlow Street and north of Pier Street has been cleared of all structures and replaced by several steel fuel oil tanks. The properties to the south of Pier Street have also been mostly cleared and redeveloped into 5 separate structures , an office, a loading area, a storage building , and two unlabeled buildings comprising the Gulf Refining Co. Fuel storage tanks are no longer shown to the south of Pier Street.
  The surrounding properties are mostly unchanged, excepting the development of the Atlantic Metal Products Inc. property to the east of Fernbrook Street.
- **1973 -** The Site and surrounding areas appear relatively unchanged since the 1971 Sanborn Map. The two unlabeled buildings along the southern perimeter of Gulf Refining Co. are no longer present.
- **1978 –** The Site and surrounding areas appear relatively unchanged since the 1973 Sanborn Map. The riverfront area to the south of the Site has been filled-in, expanded, and developed into an industrial property with waste gas burners.
- **1989 –** The Site and surrounding areas appear relatively unchanged since the 1978 Sanborn Map**.**
- **1991 –** The Site and surrounding areas appear relatively unchanged since the 1989 Sanborn Map.
- **2004 –** The Site has been redeveloped since the 1991 Sanborn Map. All steel fuel oil tanks have been removed from the Site and converted into school bus parking (identified as Tarricone Terminal). The loading building that was part of Gulf Refining Co. in the southern limits of the Site has been removed. Permanent Site structures include storage and an office building to the north, an office building below Pier Street, and a storage building to the south. The surrounding areas appear relatively

4.4.3 Historical USGS Topographic Maps

PS&S requested EDR to perform a search of historical topographic maps that include the Site and immediate vicinity. Based upon EDR's search results, PS&S

reviewed historical USGS 15-minute series of Harlem for the years 1897, 1898 and 1900; and USGS 7.5-minute series of Yonkers for the years 1947, 1956, 1966, 1979, 1998, 2013, 2016, and 2019. Copies of the historical topographic maps provided by EDR are included as **Appendix I**. The following is a summary of the historical topographic maps.

- **1897 -** 15' Minute Series Quadrangle: Harlem (Scale: 1:62500) – The topographic map from this year covers the Site. The Site appears to be part of the Hudson River, with the railroad tracks comprising the eastern shoreline of the river.
- **1898** – 15' Minute Series Quadrangle: Harlem (Scale: 1:62500) – The Site and surrounding area is relatively unchanged from the 1897 Topographic Map.
- **1900** – 15' Minute Series Quadrangle: Harlem (Scale: 1:62500) – The Site and surrounding area is relatively unchanged from the 1898 Topographic Map.
- **1947**- 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – The Site and surrounding areas have been filled-in to the west of the railroad tracks and developed. Several buildings are present within and to the north of the Site, while the filled-in areas to the south appear undeveloped. Some streets (Pier Street and West Cross Street) are also visible.
- **1956** – 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – This Site is depicted with further development since the 1947 Topographic Map, with the construction of additional streets (Front Street) and alterations to structures within the Site. New structures are visible to the north and south of the Site.
- **1966** – 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – This Site appears to be further depicted with development including five circular features, and with new structures around the Site, particularly to the east of the Site/Fernbrook Street.
- **1979** – 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – The Site and surrounding area is relatively unchanged from the 1966 Topographic Map. New landmarks and structures are visible on the map, but the Site and its adjacent properties appear unchanged.
- **1998** – 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – The Site and surrounding area is relatively unchanged from the 1979 Topographic Map.
- **2013** – 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – This Topographic Map shows no details of the Site and surrounding areas, other than the roads and topography in the area, and the industrial property along the riverfront to the southwest of the Site.
- **2016** – 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – The Site and surrounding area is relatively unchanged from the 2013 Topographic Map

- **2019** – 7.5' Minute Series Quadrangle: Yonkers (Scale: 1:24000) – The Site and surrounding area is relatively unchanged from the 2016 Topographic Map

4.4.4 Local Street Directories

PS&S requested a City Directory Abstract Report from EDR for the Site. In accordance with the Abstract Report (refer to **Appendix J**), local directories from Cole Criss-Cross Directory and EDR Digital Archive information source were available for the area for the following years: 2017; 2014; 2010; 2005; 2000; 1995; 1992; 1987; 1982; 1977; and 1972.

The Site was not listed in the City Directory Abstract Report. A summary of the City Directory Abstract Report findings is noted below:

- 1972 – The City Directory lists properties on Pier Street, almost all of which are residential. Commercial properties are listed at 25 Pier Street (Cleanrite Maintenance and Pier Luncheonette Inc) and 62 Pier Street (Yonkers Parking Authority). All other properties appear to be single family homes, or apartment buildings. The Site is not listed.
- 1977 - The City Directory is relatively unchanged from the 1972 City Directory. Several addresses are now listed as "NP" – No Property, including 28 and 31 Pier Street.
- 1982 – The City Directory is relatively unchanged from the 1977 City Directory. Cleanrite Maintenance is no longer listed at 25 Pier Street.
- 1987– The City Directory is relatively unchanged from the 1982 City Directory, including empty lots and non-residential properties. Several addresses are now listed as "NP" – No Property, including 1, 8, 20, 28, and 31 Pier Street.
- 1992 – The City Directory is relatively unchanged from the 1987 City Directory.
- 1995 – Only commercial properties are listed in the 1995 City Directory – the Nieve Unisex Salon at 25 Pier Street, 27 Pier Street Grocery Corp. at 27 Pier Street, and Yonkers Parking Authority at 62 Pier Street.
- 2000 – The City Directory is relatively unchanged from the 1992 City Directory. 23 Water Grant Street is listed as an apartment building with various residential units.
- 2005 – The City Directory is relatively unchanged from the 2000 City Directory. 25 and 26 Water Grant Street are now listed as residential properties.
- 2010 – The City Directory is relatively unchanged from the 2005 City Directory.

- 2014 – The City Directory is relatively unchanged from the 2010 City Directory. 32 and 71 Water Grant Street are now listed as a residential property and commercial property (Emergency Locksmith, X20 Xaviars on the Hudson) respectively.
- 2017 - The City Directory is relatively unchanged from the 2014 City Directory.

4.5 Regulatory Agency File and Records Review

Freedom of Information Act (federal) and Law (state and local) (FOIA/FOIL) requests were prepared and submitted as part of this Phase I ESA. PS&S requested that the government agencies listed below review their files for pertinent information regarding the Site and/or associated with the Site.

Copies of the FOIA/FOIL requests and responses are included in **Appendix F**.

4.5.1 USEPA Record Review

PS&S reviewed the online EnviroMapper database website on February 17, 2022, for relevant information pertaining to the Site and to identify if there were additional sites not included in the EDR report. PS&S identified an additional automotive repair shop at 320 Riverdale Ave, approximately 1,770 ft SE (upgradient) from the Site. The Electra Poly Corp facility at 78 Fernbrook Street was also identified as Convalence Plastics/Tyco Plastics Yonkers. All other EnviroMapper findings are consistent with the information obtained from the EDR Report, as discussed in Section 4.1.

No FOIA/FOIL requests were submitted to federal agencies.

4.5.2 NYSDEC Record Review

PS&S requested, via an online request form on January 27, 2022, that NYSDEC search their files (**Appendix F**) for relevant information pertaining to the Site under a Freedom of Information Law (FOIL) request. The FOIL request was recorded as

Reference # STUCKER_DOH_20220127173609212/W095420-012722. NYSDEC responded to the FOIL request on February 25, 2022, with documentation regarding eight (8) spills cases which had been recorded at the Site or at nearby properties. Additional documentation was provided regarding the off-Site UST removal at 59 Sunnyside Drive (Spill No. 1502074). Otherwise no additional information was provided by NYSDEC.

4.5.3 NYSDOH Record Review

In 1998, the NYSDEC delegated the authority to administer the Petroleum Bulk Storage Program, for Westchester County sites, to the New York State Department of Health (NYSDOH).

PS&S requested, via an online request form on January 27, 2022, that NYSDOH search their files (**Appendix F**) for relevant information pertaining to the Site under a Freedom of Information Law (FOIL) request. The FOIL request was acknowledged and recorded as Reference #STUCKER_DOH_20220127172712457 / FOIL #22-01-503 on January 28, 2022.

No other information has been provided by NYSDOH, as of the writing of this report.

4.5.4 Westchester County Department of Health

PS&S requested, via online request forms on January 27, 2022, that the Westchester County Department of Health (WCDH) search their files for relevant information pertaining to the Site under a FOIL request for the current and former facilities associated with the Site (ATI Ludlow – NPDES No. 0-099546 and All County Bus – PBS No. 3-800816). The request was acknowledged as request 22-110 on February 7, 2022. PS&S was provided with additional information regarding the seven (7) ASTs registered to the Site under PBS No. 3-800816. No other information has been provided by NYSDEC, as of the writing of this report.

4.5.5 City of Yonkers –Building and Engineering Departments

On February 2, 2022, PS&S requested that the City of Yonkers Department of Housing and Buildings search their files for relevant information pertaining to the Site under a FOIL request (**Appendix F**).

An appointment to review City of Yonkers' records was scheduled for February 9, 2022. The following were findings from the records review. All key documents can be found in **Appendix M**:

- Correspondence issued by the City, most recently dated January 10, 2000, regarding the use of 12 Yerks Place as a used car lot without a certificate of occupancy. A July 29, 1999 application was found requesting permission to use the property as a motor vehicle service station (auto repair shop) and office.
- A February 28, 1997 survey of the Site shows a similar layout to the current Site. No ASTs are shown in the survey.
- A December 15, 1994 application from ATI for construction of a 2,500-gallon diesel AST and conversion of the existing property from a petroleum terminal to an office, garage, and parking at 101 Pier Street. This appears to be the current use of the property.
- A July 25, 1984 memo from Westchester County Bureau of Environmental Quality stating that inspection of the Site found eight (8) ASTs of greater than 40,000 gallons that did not have proper vapor engineering controls installed.
- A March 30, 1961 permit granted by the City on January 11, 1962, to the Gulf Oil Company for construction of eight (8) 25ft x 48ft steel storage tanks (48 ft high) for all lots on the Site except 12 Yerks Place and 78 Pier Street, and for a foam house at 101 Pier Street. Tanks were constructed primarily at 101 Pier Street.
    - A subsequent application dated November 20, 1968, was also filed for construction of a gasoline storage tank at 12 Yerks Place and 101 Pier Street. An attached drawing shows five (5) existing ASTs, labeled A through E, and plans for two future tanks.
- A September 30, 1936 application from The Pure Oil Company for construction of three (3) steel tanks at 12 Yerks Place.
- A December 23, 1930 certificate of occupancy granted by the City to Hays and Randolph Company that certifies the replacement of an existing frame coal pocket at 102 Pier Street with 20 ft inside diameter concrete coal pockets with reinforced a concrete roof.
- A May 29 1929 application from The Pure Oil Company for construction of two (2) pumps and a 550-gallon gasoline UST, placed 18 feet from the property line

- An April 20, 1928 application from The Pure Oil Company for construction of a steel and asbestos canopy on a concrete foundation for the southeast portion of 12 Yerks Place. A previous application had been denied due to insufficient design, but subsequent Sanborn maps show the canopy in place.
- An August 30, 1902 application from The Pure Oil Company for construction of a concrete and stone stable and office building at 12 Yerks Place.

4.6 Physical Setting Sources

In accordance with the ASTM E1527-13, the most current USGS 7.5 Minute Topographic Map (or equivalent) showing the areas on which the Site is located were reviewed.

The Site is located on the USGS 7.5-minute series topographic maps of Yonkers, NY, TP, last revised in 2019; 40.9235/-73.9075. The Site grades towards the Hudson River to the west, staying generally flat, with a gentle gradient to the west throughout the Site. The site coordinates site at an elevation of approximately 1.00 foot below mean sea level (msl).

The Site lies adjacent to the Hudson River, at its closest point.

4.7 Zoning/Land Use Records

According to City of Yonkers public records, the area comprising and surrounding the Site is classified as Zoning Code "I", or industrial properties. One exception is 9 Water Grant Street (Block 623, Lot 4), which is waterfront and underwater property. This property is classified as Zoning Code "S-50" or detached single-family dwellings on 50-foot lots.

4.8 Historical and General Use of the Site

Based on a review of the above referenced records, some of the properties comprising the Site and the surrounding areas were developed sometime prior to 1896, with other property developed on-site and in the vicinity afterwards.

The subject property appears to have included the Yonkers City Ice Company (Depot) at 101 Pier Street (Block 622 Lot 1) since prior to 1886, with the Pure Oil Company at 12

Yerks Place (Block 622 Lot 8), Hays and Randolph Company at 102 Pier Street (Block 615 Lot 10), and Gulf Refining Company at 78 Pier Street (Block 615 Lot 35.45) all developed by 1917. The current structure at 12 Yerks Place was constructed between 1917 and 1942, while all other current structures were constructed between 1957 and 1971. All other structures dating before 1957 were demolished or removed, converting the Site to its current configuration, between 1991 and 2004. An original construction date of 1902 or 1903 has been identified from city records.

The Site was generally developed as commercial/industrial use (fuel storage and ice making), with other commercial/industrial properties to the north, east, and south, and the Hudson River to the west.

Historic operation of the Site includes several activities with the potential for release of petroleum and/or hazardous materials, most notably the use of 101 Pier Street and 12 Yerks Place as an MOSF. A foam house was constructed at the southeastern limits of 101 Pier Street for firefighting purposes, in the case of a petroleum release. Firefighting foam is a known historical source of Per- and Polyfluoroalkyl Substances (PFAS). While PFAS is neither a petroleum nor a regulated hazardous material, it is a known contaminant which is a focus of NYSDEC and NYSDOH investigations.

.

5.0 SITE RECONNAISSANCE

On February 15, 2022, PS&S performed a general Site reconnaissance for the primary purpose of physically and visually identifying RECs on the Site. Observations of the Site areas were documented in the form of field notes. Photographs of the Site and surrounding area observed during the PS&S field reconnaissance are included in **Appendix A**.

5.1 Methodology and Limiting Conditions

The February 15, 2022 PS&S general site reconnaissance was conducted on a clear day. Temperatures were below seasonal average, with a low temperature of 15° F and a high temperature of 30° F. The methodology of the reconnaissance involved walking accessible sections of the Site, observing publicly accessible areas adjacent to the Site, and inspecting interiors for on-site structures.

The February 15, 2022 PS&S general site reconnaissance did not include checking for the presence of the following potential environmental concerns:

1. Materials which are products manufactured and handled on the Site for purposes of resale;
2. Materials used for routine custodial and maintenance operations;
3. Materials within or under buildings or structures which required invasive investigating techniques or destructive testing for discovery;
4. Investigation of asbestos containing materials, lead based paint, radon or mold; and,
5. Testing or sampling of air, soil, water, or building materials.

The building at the Site's northern limits (102 Yerks Place (Block 622, Lot 8) was not accessible, at the second floor, basement, and northern portion of the first floor. This includes an AST which is reported to be in the basement.

5.2 General Site Setting

The Site is generally bound to the north by the Domino Sugar Fleet Maintenance building (Foodliner Terminal), to the west by the Hudson River, to the east by Fernbrook Street,

and to the south by the Westchester County Wastewater Treatment Plant. The Site is currently operating as All County Bus, a school bus service, including parking, office space, and maintenance facilities for the buses. The site is paved throughout, excepting the rear of the 102 Yerks Place building and the riverfront at Block 615, Lots 1 and 6. The Site is fenced on all sides, except along the river or where buildings are present. The site is accessible via two secured gates at the northeast corner (Block 622, Lot 8) and east side (Block 615, Lot 10) of the site, facing onto Fernbrook Street.

5.2.1 Current Use of the Site

The Site is currently operating as All County Bus, a school bus service, including parking, office space, and maintenance facilities for the buses.

5.2.2 Current Use of Adjoining Properties

The properties to the north, south, and east of the Site, are active commercial/industrial properties. The property to the north is Domino Sugar (Foodliner Terminal) Fleet Maintenance building and parking area, which services the greater facility to the northeast. The property to the south is the Westchester County Wastewater Treatment Plant. The facilities to the east of the property, on the other side of Fernbrook Street, are Hudson Scenic Studios and Hudson Sound and Light, LLC– industrial facilities (fabrication, etc.) for various projects in the entertainment industry.

5.2.3 General Description of Structures

There are six existing structures on the Site. The northernmost structure at 102 Yerks Place (Block 622, Lot 8) is a two-story brick building, also containing a basement. 101 Pier Street (Block 622, Lot 1) contains a small one-story concrete building and a storage shed. 102 Pier Street (Block 615, Lot 10) contains a two-story office building with no basement, and two one-story trailers. 78 Pier Street

(Block 615, Lot 35.45) contains a split-level building which is used both as offices and as a garage/vehicle maintenance building.

5.2.4 Potable Water Supply

Several active bathrooms and other sinks were identified during the February 15, 2022 general site reconnaissance. All buildings appear to be connected to a potable water source. Historical documents indicate that public potable water lines are present along Fernbrook Street.

5.2.5 Sewage Disposal System

Several active bathrooms and other sinks were identified during the February 15, 2022 general site reconnaissance. All buildings appear to be connected to a public sewage system, but no historical record of public sewer lines was identified. The county wastewater treatment plant is located immediately to the south of the Site.

5.3 Exterior Observations

The Site is currently in use as a vehicle staging and maintenance facility and as office spaces for All County Bus. The Site has asphalt caps throughout, excepting the riverfront at Block 615, Lots 1 and 6, and the rear of the building at Block 622, Lot 8.

The Site shows some signs of settling and subsequent asphalt wear, including two large holes along the west side of the Site.

5.3.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

Some oils and solvents are used for vehicle cleaning, maintenance, and upkeep including motor oils and antifreeze (Ethylene Glycol). A refueling pump is present at the south side of Tank #4, a 2,500-gallon AST located in the center of the Site.

5.3.2 Storage Tanks

There are five (5) active ASTs which were observed on the site. Two of these ASTs are located outdoors. Information for the tanks is as follows:

Tank Number	Tank Volume (Gallons)	Tank Contents	Tank Location
2	275	#2 Fuel Oil	Outdoors – Block 615, Lot 10
4	2,500	Diesel	Outdoors – Block 622, Lot 1

Personnel on the Site reported that a 6th AST is present in the basement of 12 Yerks Place. However, the basement was not accessible to confirm, and records indicate all other ASTs were closed and removed from the Site. No presence of USTs was observed during the site visit.

5.3.3 Odors

No odors were observed.

5.3.4 Pools of Liquid

No pools of liquid containing potentially hazardous material were observed. However, some staining was observed at the rear of 12 Yerks Place which may indicate a petroleum spill from one of the staged buses.

5.3.5 Drums

Various drums are staged on the Site, primarily at 78 Pier Street, both inside and outside of the building. Five drums are staged outside 78 Pier Street – four of which are windshield washer solvent which is staged on a pallet. The fifth drum is Brake and Parts Cleaner, a blend of solvents and degreasers, which is staged on the pavement.

5.3.6 Hazardous Substances and Petroleum Products Not In Connection With Identified Uses

No other hazardous substances or petroleum products were observed on the Site. Various paint cans and cleaning materials were observed around the Site for vehicle and building upkeep.

5.3.7 Unidentified Substance Containers

No unidentified substance containers were observed on the Site. All substance containers were able to be identified.

5.3.8 PCBs

No transformers or other potential PCB-containing equipment were observed on the Site.

5.3.9 Pits, Ponds or Lagoons

No pits, ponds, or lagoons were observed on the exterior part of the Site.

5.3.10 Stained Soil or Pavement

One area of stained soil was observed in the back of 12 Yerks Place, indicating a potential small leak or spill of oil in this area.

5.3.11 Stressed Vegetation

No unusual signs of stressed vegetation were observed.

5.3.12 Solid Waste

No unusual signs of solid waste were observed.

5.3.13 Wastewater

Two drains are present in the southern half of the Site, one (labeled "1012") is located to the southeast of the office building at 102 Pier Street (Block 623, Lot 1) and another is located at 78 Pier Street (Block 615, Lot 35.45), to the south of the trailers. No clear outfall was observed, but stormwater appears to drain to the inlet at the historic end of Pier Street, to the south of 111 Yerks Place (Block 623, Lot 1).

5.3.14 Wells

No potable wells were observed.

5.3.15 Septic Systems

No visual indication of an on-site septic system was identified during the February 15, 2022 general site reconnaissance.

5.4 Interior Observations

The Site is currently in use as a vehicle staging and maintenance facility and as office spaces for All County Bus. The structure interiors are as follows:

- 102 Yerks Place (Block 622, Lot 8) contains a two-story brick building, also containing a basement. The building is mostly empty, excepting a working bathroom. The space is used for vehicle staging.
- 101 Pier Street (Block 622, Lot 1) contains a small one-story concrete building and a storage shed. The concrete building has an electric connection and is used as an office/hangout space. The shed a is raised above ground level and consists of particle board walls and floors.

- 102 Pier Street (Block 615, Lot 10) contains a two-story office building with no basement, and two one-story trailers. The trailers are raised above ground and are used as hangout spaces with electric connections and bathrooms.
- 78 Pier Street (Block 615, Lot 35.45) contains a split-level building which is used both as offices and as a garage/vehicle maintenance building. The building has an electric connection, bathroom, and concrete floors.

5.4.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

Some oils and solvents are used for vehicle cleaning, maintenance, and upkeep including motor oils, paints and enamels, battery cleaner, and antifreeze (Ethylene Glycol). Some paints, floor strippers, varnish, and other building maintenance were also stored within buildings at the Site.

5.4.2 Storage Tanks

There are five (5) active ASTs which were observed on the site. Three of these ASTs are located indoors. Information for the tanks is as follows:

Tank Number	Tank Volume (Gallons)	Tank Contents	Tank Location
1	275	#2 Fuel Oil	Indoors – Block 615, Lot 35.45
3	275	Waste Oil	Indoors – Block 615, Lot 35.45
6	275	Lube Oil	Indoors – Block 615, Lot 35.45

Personnel on the Site reported that a 6th AST is present in the basement of 12 Yerks Place. However, the basement was not accessible to confirm, and records indicate all other ASTs were closed and removed from the Site. No presence of USTs was observed during the site visit.

5.4.3 Odors

No odors were observed.

5.4.4 Pools of Liquid

No pools of liquid containing potentially hazardous material were observed.

5.4.5 Drums

Various drums are staged on the Site, primarily at 78 Pier Street, both inside and outside of the building. Approximately 10 drums are staged inside 78 Pier Street, including antifreeze. Two of the ten drums are not staged on pallets. The interior floor is all concrete.

5.4.6 Hazardous Substances and Petroleum Products Not In Connection With Identified Uses

No hazardous substances or petroleum products were observed inside the buildings other than those used for vehicle maintenance.

5.4.7 Unidentified Substance Containers

No unidentified substance containers were observed on the Site.

5.4.8 PCBs

No transformers are other potential PCB-containing equipment was observed on the Site.

5.4.9 Stained Soil or Pavement

No stained soil or pavement was observed.

5.4.10 Solid Waste

No unusual signs of solid waste were observed.

5.4.11 Waste Water

A trench drain was observed inside the building at 78 Pier Street, but there was no indication of where the drain flows.

5.4.12 Septic Systems

Several active bathrooms and other sinks were identified during the February 15, 2022 general site reconnaissance. All buildings appear to have running water, but no historical record of public sewer lines was identified. The county wastewater treatment plant is located immediately to the south of the Site.

6.0 INTERVIEWS

6.1 Current Site Representative Interview

An interview was completed in person with Jim Vanderwalker of All County Bus on February 15, 2022.

Mr. Vanderwalker indicated that the Site has been in operation as a parking area/bus service for at least 20 years, and that all tanks associated with the ATI MOSF had been removed before his involvement with the property. Mr. Vanderwalker also indicated that existing ASTs associated with All County Bus had recently passed inspection from Westchester County but had been cited for violations by NYSDEC. No documentation of any violations was available. The ASTs are listed under PBS No. 3-800816.

A previous site investigation consisting of soil borings was conducted at the approximately five years ago, according to Mr. Vanderwalker. No documentation of this investigation was available.

6.2 Proceedings Involving the Property

The Site is currently owned by Tony Mauro, who is in talks with the City of Yonkers for transfer of ownership. No other records are available regarding proceedings involving the property.

6.3 Interviews with State and/or Local Government Officials

An interview was completed with Paul Summerfield, a City Engineer for the City of Yonkers. The interview was completed via questionnaire on February 17, 2022. The completed questionnaire can be found in **Appendix C**.

Mr. Summerfield is aware of past use of the Site for fuel oil storage dating back to 1930 and is also aware of more recent usage as a bus parking area.

Documents requested through the Freedom of Information Law to State and/or Local Government Officials are discussed in Sections 4.3 and 4.5. Documentation of these requests is included in **Appendix F**.

7.0 EVALUATION

7.1 Findings and Opinions

A summary of the findings of the Phase I ESA are presented below. PS&S's opinion regarding the impact on the Site of the identified findings is also presented below. Findings identified as RECs were those determined to comprise a condition meeting the definition of a REC as indicated in Section 1.1.

Research into the history of the Site, identified six (6) areas of petroleum and/or hazardous materials storage at the Site. These six areas of interest are described below:

1) An active 2,500-gallon AST and fueling station for buses which are staged at the Site. The AST and fueling station are located between 101 Pier Street and the historic city street "Pier Street". The AST and fueling station are also located in proximity to the former boiler room associated with Yonkers City Ice Company. Historical activity in this area indicates the possible presence of Volatile Organic Compounds (VOCs) , Semi-Volatile Organic Compounds (SVOCs), Polychlorinated Biphenyls (PCBs), and metals contamination.
2) A former foam storage building which was used for firefighting activities for the Site. This building is located at the southeast corner of 101 Pier Street. Firefighting foam is a known source of Per- and Polyfluoroalkyl Substances (PFAS). While PFAS is neither a petroleum nor a regulated hazardous material, it is a known contaminant which is a focus of NYSDEC and NYSDOH investigations.
3) A former AST and UST area in the back of the building at 12 Yerks Place. Records of installation of the UST date back to 1929, while records of UST removal/leaks are from 2006. The area also housed some of the ASTs associated with the ATI Major Oil Storage Facility (MOSF) facility that existed on Site Additionally, some soil staining from current Site activity was observed in this area. Historical activity in this area indicates the possible presence of VOCs, and SVOCs.
4) A former coal pocket/coal and fuel storage area which was in operation prior to 1917 until sometime between 1957 and 1971. Historical activity in this area indicates the possible presence of VOCs, SVOCs, PCBs, and metals.
5) An active garage/vehicle maintenance building located at 78 Pier Street which includes the improper storage of some vehicle-related petroleum products and a floor drain with an undetermined path for material. This property is also the former location of several ASTs associated with Gulf Refining Company. Historical activity in this area indicates the possible presence of VOCs, and SVOCs.
6) The former location of the ASTs associated with the ATI MOSF facility that were not at 12 Yerks Place. These tanks made up the majority of the MOSF and were

located at 101 Pier Street. Historical activity in this area indicates the possible presence of VOCs, and SVOCs.

PS&S was not able to obtain, information regarding when each of the tanks associated with the ATI MOSF were installed or removed, and no records of spills were available in the available historical documents.

7.2 Data Gaps

The following Data Gaps have been identified for this Phase 1 ESA Report.

1) Agencies responses to FOIL requests submitted to NYDOH and WCDOH are still pending.
2) Information associated with the construction and removal of ASTs for the MOSF.
3) Parts of the building at 12 Yerks Place were not accessible during the site reconnaissance visit, including the basement and second floor.

7.3 Conclusions and Recommendations

PS&S has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Standard E-1527-13. Exceptions to, or deletions from, this practice are described in this Phase I ESA.

To further evaluate these RECs, PS&S recommends the implementation of a Phase II ESA. The Phase II ESA should include soil sampling focusing on the areas identified in Section 7.1. The information gathered during the Phase II ESA would provide information that will aid to confirm the existence of contamination in the limited areas of investigation. Additional investigation may be required to delineate the lateral and vertical extents of the contamination, if applicable. The areas associated with the identified RECs are documented in **Figure 2 - Phase I ESA Areas of Interest**.

9.0 DECLARATION OF THE ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of the Environmental Professional as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

Appendices

Appendix A

Environmental Assessment Site Photographs

Phase I ESA- Site Reconnaissance Photolog

Photo 1: View facing east towards the back of the building at 12 Yerks Place. Buses are staged at/adjacent to this area and some soil staining is visible.

Photo 2: View facing existing AST #4, a 2,500-gallon Diesel tank located in the center of the Site. The AST is currently staged within a metal containment vessel.

Photographs taken by PS&S Engineering, P.C. on February 15, 2022

Photo 3: View facing the fueling station at the south end of AST #4. AST #4 is an active diesel fuel tank for buses on the property.

Photo 4: View facing existing AST #3, a 275-gallon waste oil tank located inside the garage/maintenance building at 78 Pier Street. Drums are also staged in this area with most properly stored on pallets, but not all.

Photo 5: View facing existing AST #6, a 275-gallon lube oil tank located inside the garage/maintenance building at 78 Pier Street, across from AST #3. AST #2, a 275-gallon No. 2 fuel oil tank, is located to the west of ASTs #3 and #6, along the outside of the building.

Photo 6: View facing existing AST #1, a 275-gallon No. 2 fuel oil tank located inside the office building at 102 Pier Street. AST #1 is an active fuel tank for heating the building.

Photo 7: View facing southeast towards the existing inlet to the Hudson River, which borders the Site to the west. A sheen is visible close to the shore, indicating that this is the outfall for on-site storm drains and a potential source of spills/releases to the River.

Photo 8: Photo facing storm drain 1012 – one of two storm drains on site – located to the east/southeast of the office building at 102 Pier Street.

Photo 9: Staged materials at the trailers at 102 Pier Street. Materials include laundry detergent, bleach, antifreeze, and motor oil for vehicle upkeep. Materials are improperly stored with open containers on the ground.

Photo 10: Photo facing outdoor drum storage at 78 Pier Street. Blue drums, which are staged on a pallet, contain windshield washer fluid. The black drum, which is staged on the ground, contains Brake & Parts Cleaner – a flammable liquid.

Photo 11: View inside the building at 12 Yerks Place. The building is used as a garage/storage area, and has running water/sewer, including a bathroom on the first floor.

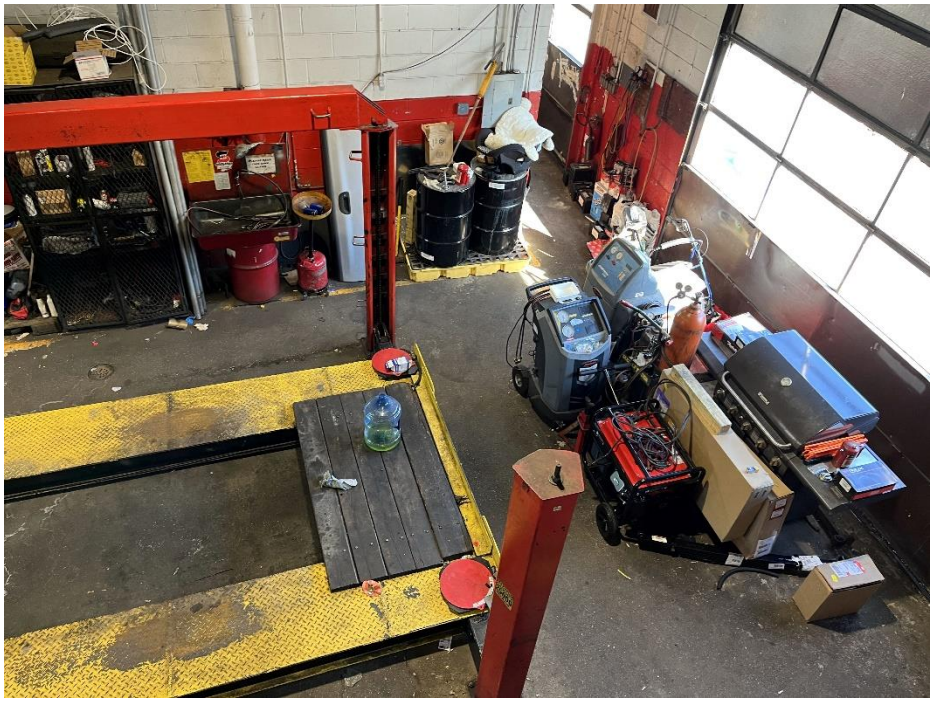

Photo 12: View inside the building at 78 Pier Street. The building is used as a garage/maintenance area, as well as an office space to the south. The building has running water/sewer, including a bathroom.

Photo 13: View facing west towards the river within 111 Yerks Place. The property is primarily paved and used for bus parking, but has experienced some erosion and sinking, resulting in sinkholes along the river.

Photo 14: View inside a shed at the southeast corner of 101 Pier Street, adjacent to the former foam storage building. Various materials and equipment are stored in here (the shed is raised above the ground), including paint, varnish, and motor oils.

Interviews

ASTM E 1527-13 User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must conduct the following inquires required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 3.12.31. These inquires must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquires could result in a determination that "*all appropriate inquires*" is not complete.

Site Name/Address: See attached sheet (Back Page)

Person Interviewed/Title: Paul Summerfield City Engineer Date: 2/17/22

If known, when was the property initially developed? 1930 approx.

If different, when were the current building(s) on the property constructed? 1953

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25).

Are you aware of any environmental liens filed or recorded against the property under federal, tribal, state or local law? NOTE - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

Yes☐ No☑ If you answer yes, please include an explanation in the space provided below:

2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes☐ No☑ If you answer yes, please include an explanation in the space provided below:

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes☐ No☑ If you answer yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes☐ No☐ If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the property?

To be Determined

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the property?

Yes☑ No☐

(b.) Do you know of specific chemicals that are present or once were present at the property?

Yes☐ No☑

(c.) Do you know of spills or other chemical releases that have taken place at the property?

Yes☐ No☑

(d.) Do you know of any environmental cleanups that have taken place at the property?

Yes☐ No☑

If you answered yes to any of the questions above, please include an explanation in the space provided below:

Fuel Oil storage (commercial)
Bus Parking Area

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the *property*?

Yes☑ No☐ If you answer yes, please include an explanation in the space provided below:

Prior Fuel oil storage

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/20/2021 has revealed that there is 1 NPL

site within approximately 1 mile of the target property.

Cerclis ID:: 202229				
EPA Id: NYD980763841				

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/20/2021 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2

RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 08/23/2021 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 01/06/2022 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/09/2021 has revealed that there are 57 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY MOSF UST site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/09/2021 has revealed that there are

EXECUTIVE SUMMARY

29 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CON EDISON - LUDLOW	KNOWLES STREET	ENE 0 - 1/8 (0.120 mi.)	G49	383

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA

HUDSON RIVER PCBS (Continued) **1000384273**

Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

DEC Memo:	"03/28/06: Spoke with Kate, Someone else pulled the tank then Dutchess Environmental was hired to do the remediation. The spill had not been called in during the initial tank pull. Remediation has been completed. D.E. will be submitting report to White Plains Office. 8/2/10 need TCR JO'M 11/24/10: I requested additional info from Dutchess Environmental. Reply received via e-mail from Keith Troccoli of Dutchess: I have everything in my office as the owner of Execuvan doesn't feel he needs to pay to dispose of the soil since oil comes from the ground. The owner partial paid directly however I am still fighting with them to get the balance so I haven t released that paperwork either. My lawyer has that case since they signed and agreed to the costs and terms before hand and during the project. jod 2/09/11: Voice-mail message received from attorney Richard Morris. A settlement is pending and a closure report will then be sent. jod 9/29/16: Message sent to Dutchess requesting status. jod 10/14/16: Original report in DecDocs. jod 6/04/18: Message sent to Dutchess. jod 5/16/19: I spoke with Keith Troccoli at Dutchess. They were never able to settle this case. Dutchess completed the cleanup but were never paid for their work. The sample results and disposal receipts were in the possession of a law office partnership which has since dissolved. Spill administratively closed at this time. jod "

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
OSHA ESTABLISHMENT
US National Pollutant Discharge Elimination System (NPDES) module of

AMERICAN SUGAR REFINING INC (Continued) **1000256403**

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

HAZARDOUS WASTE BIENNIAL REPORTER
GREENHOUSE GAS REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Program: HW
Site Code: 566784
Classification: A
Region: 3
Acres: 1.350
HW Code: 360171
Record Add: 02/13/2018
Record Upd: 03/03/2021
Updated By: AMOMOROG
Site Description: "Location: The site is located at the intersection of Knowles Street and Bridge Street, approximately 300 feet northeast of the Ludlow rail station in Yonkers, Westchester County. The site is 1.35 acres in size. Site Features: The site is an empty lot, with the exception of a small (less than 100 square feet) concrete block structure located at the southeastern corner. The site is rectangular, roughly 440 by 130 (feet), with approximately one-third of the site is

CE- LUDLOW ST-YONKERS MGP (Continued) **S121933895**

covered with gravel. The remainder of the site is overgrown and is approximately 20 feet higher due to the placement of additional fill and debris. The active Metropolitan Transportation Authority railroad is adjacent to the site to the west. A metal fabrication shop lies east of the site. A Dunkin Donuts bakery is across the street to the south. A vacant parcel exists adjacent to the north end of the site. Current Zoning and Land Use: The site is currently zoned industrial and is used by the Yonkers Department of Public Works for salt and general storage in the southern portion of the site. Land use in the vicinity of the site is characterized as mixed use industrial district, containing residential and commercial use properties. Past Use of the Site: Prior uses that may have contaminated the site include the operation of a manufactured gas plant between 1880 and 1898. The site was used as a gas holder station from 1898 to 1936. Site Geology and Hydrogeology: Fill materials (sand, gravel, cobbles, cement, brick and wood) extend from the surface to approximately 10 feet below grade in the southern portion of the site and to approximately 30 feet below grade in the northern portion. An alluvium deposit exists below the fill, consisting predominantly of sand with occasional silt and clay lenses. A schist bedrock was encountered at approximately 39 to 50 feet below ground surface. Groundwater on-site flows to the west northwest towards the Hudson River. The groundwater was typically encountered at 9 to 14 feet below ground surface in the southern area of the site and at 38 to 43 feet below ground surface in the northern area of the site. This site had been tracked under V00562 thru March 31, 2018. "

Env Problem: "Nature and Extent of Contamination: The primary contaminants of concern at the ConEd Ludlow Street MGP site are benzene, toluene, ethylbenzene and xylene (BTEX) and polycyclic aromatic hydrocarbons (PAHs). Non-aqueous phase liquid (NAPL) in the form of coal tar is present. NAPL was found generally in the area of the former 22,800 cubic foot and 50,000 cubic foot gas holders, an area approximately 100 by 150 feet , encompassing the current concrete block retaining wall. The NAPL was typically found within the alluvial deposit at ten to minus ten feet msl elevation. This corresponds to a depth of approximately 7 to 24 feet below grade south of the retaining wall. However, due to the abrupt rise in fill deposit north of the retaining wall, NAPL depth ranges from about 28 to 49 feet north of the retaining wall. (see Fig) Benzene was found in soil at concentrations up to 210 ppm, exceeding the commercial use SCO of 44 ppm. Total PAHs were found in soil at concentrations up to 13,460 ppm, exceeding the commercial use SCO of 500 ppm. The highest soil BTEX concentrations were found at the former 50,000 cubic foot gas holder location. Contaminants of concern were not detected in off-site groundwater. On-site groundwater exceeded groundwater standards in the central portion of the site. The highest levels of BTEX and PAHs were found in monitoring wells located adjacent to the 22,800 cubic foot and 50,000 cubic foot former gas holders. Benzene was found as high as 1,200 ppb, exceeding the groundwater standard of 1 ppb. "

Health Problem: "Persons who dig below the ground surface may come into contact with contaminants in subsurface soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the

CE- LUDLOW ST-YONKERS MGP (Continued) **S121933895**

movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. Furthermore, environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Updated By:	MRDOMARA
Site Description:	"Location: The site is located in an urban and industrial portion of Westchester County, NY. The site is 0.850 acres and approximately one mile south from the downtown area of Yonkers. Site Features: The site is bordered to the north by an undeveloped property and Highland Avenue; to the east by Riverdale Avenue and residential apartment buildings; to the south by a commercial building and an auto body repair shop; and to the west by multi-family residences located along Hawthorne Avenue. Current Zoning and Land Use: The site has been developed as a multi-story senior housing complex, and zoned commercial. Past Use of the Site: Prior uses that led to site contamination include a former automobile dismantling yard, junkyard, machine shop, and commercial laundry service. Site Geology and Hydrogeology: Groundwater flow is towards the west. Depth to groundwater was approximately 6 feet below ground surface (bgs). Bedrock was encountered at 32 and 42.5 feet bgs."
Env Problem:	"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were naphthalene, fluoranthene, phenanthrene, chrysene, pyrene, PCBs, arsenic, barium, chromium, and lead in the soil. Residual contamination in the soil and groundater is being managed under a Site Managment Plan. "
Health Problem:	"Direct contact with residual contaminants in soil is not expected because the site has been covered with pavement, a building and two feet of clean soil in green areas. Exposure to site related contaminants in drinking water is not expected since homes and businesses near the site are connected to public water. Soil vapor intrusion in future buildings is not expected because volatile organic compounds are not a site related contaminant. An environmental easement will restrict the use of groundwater, require implementation of a site management plan and periodic certification that the remedy remains in place and is effective. "

Dt record added:	11/02/2006
Dt rec updated:	03/02/2020
Updated By:	MRDOMARA
Site Code:	59028
Site Description:	"Location: The site is located in an urban and industrial portion of Westchester County, NY. The site is 0.850 acres and approximately one mile south from the downtown area of Yonkers. Site Features: The site is bordered to the north by an undeveloped property and Highland Avenue; to the east by Riverdale Avenue and residential apartment buildings; to the south by a commercial building and an auto body repair shop; and to the west by multi-family residences located along Hawthorne Avenue. Current Zoning and Land Use: The site has been developed as a multi-story senior housing complex, and zoned commercial. Past Use of the Site: Prior uses that led to site contamination include a former automobile dismantling yard, junkyard, machine shop, and commercial laundry service. Site Geology and Hydrogeology: Groundwater flow is towards the west. Depth to groundwater was approximately 6 feet below ground surface (bgs). Bedrock was encountered at 32 and 42.5 feet bgs."
Env Problem:	"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were naphthalene, fluoranthene, phenanthrene, chrysene, pyrene, PCBs, arsenic, barium, chromium, and lead in the soil. Residual contamination in the soil and groundater is being managed under a Site Managment Plan. "
Health Problem:	"Direct contact with residual contaminants in soil is not expected because the site has been covered with pavement, a building and two feet of clean soil in green areas. Exposure to site related contaminants in drinking water is not expected since homes and businesses near the site are connected to public water. Soil vapor intrusion in future buildings is not expected because volatile organic compounds are not a site related contaminant. An environmental easement will restrict the use of groundwater, require implementation of a site management plan and periodic certification that the remedy remains in place and is effective. "

Spiller Company:	WASTE WATER TREATMENT PLANT
Spiller Address:	Not reported
Spiller Company:	999
Contact Name:	MIKE CHICOINE
DEC Memo:	"5/29/19 Left message for notifier to call duty desk. ga 5/29/19 Caller was digging trench for gas line across access road for Yonkers Joint Waste Water Treatment Plant and came across section of soil that smelled highly of petroleum. Soil was oily and black. Soil sample for analysis to be taken tomorrow. Trench is in middle of paved road, 'contaminated' area is 3 ft deep, 2 ft wide, and 75 ft long. Access road will be closed until soil testing results come back. Area is 250 ft from Hudson River - WWTP is on the river bank. ga 05/30/19 William Eilbacher from the WCHD emailedI spoke with Kyle Kennedy (516-492-9196) who is the engineer from CDM at the facility, and he said that the contractor that was digging the trench in the driveway of the Yonkers WWTP (PBS #3-018872) found petroleum contaminated soil while digging. The contractor placed the contaminated soil on plastic sheeting. Sound Environmental will be taking soil samples of the contaminated soil to characterize the waste and determine how to dispose of it. Chris Lalak from the WCHD responded to William Eilbacher, They also need to investigate and remediate the spill. I understand it may be historic contamination and/or it may be from an off-site source, which may affect the project. TG 07/29/19 Carlos Torres reported that soil sample were collected and analyzed and the results were below DEC soil guidance values in CP-51. NFA TG"

DEC Memo:	"Homeowner was adviced to retest. Will make a decision as to how to proceed. 01/12/00: Letter sent to owner outlining requirements for closure and requesting call back. jod 12/16/09 JO'Dee will check up JO'M 1/23/12: Call to dispatch desk. Caller states he is an attorney for this estate. Owner was Jerome Stupp who has passed away. Caller states NES was hired to remove this UST more than 10 years ago and did so. No closure report was submitted. I asked caller if NES was notified of the TTF and open spill number in order to submit a report. I also asked if he contacted NES and he says he has, but they do not have records going back this far. Caller states he does have copies of the invoice/bill from NES, and the Yonker FD work permit. He will fax them to me for review. jod 1/25/12: I reviewed the original invoices from NES. NES removed the 1K UST on 3-29-2000 and then installed a new 1K STIP3 UST on 3-30-2000. Mr Stupp paid the 30%

STUPP (Continued) **S104620779**

down payment - there is no indication the balance was paid. I contacted NES to see if they had a closure report in their records. jod 1/31/12: NES has no record of this job in their files. It is probable this tank removal was handled by Nick Barnaba who no longer works for NES. From the information provided, this UST was removed and replaced, there is no indication the tank was leaking at that time. Based upon the available information, no further action is required at this time. jod"

YONKERS H&I SITE (Continued) **S118141137**

Date Record Added: 07/27/2016
Date Rec Updated: 03/06/2020
Updated By: MSHUBICK
Site Description: "Location: The 3.72-acre site is located in an urban area along the City of Yonkers Waterfront. The site is bound to the east by Water Grant Street followed by the Metro-North rail line and a 10 story residential building; to the south by the American Sugar Facility and to the west by the waterfront sculpture park along the Hudson River. Several waterfront parcels to the North, including these parcels for H&I, were managed under the Environmental Restoration Program (ERP) under the site name, Yonkers Waterfront Redevelopment Site, ERP Site No. B00045. Site Features: The site has been completely redeveloped with a multi-story residential building and parking garage. Asphalt pavement and courtyards have been placed on the proposed Water Grant Street extension side. Topsoil is present in landscaped areas. Current Zoning and Land Use: The site is zoned a Planned Urban Redevelopment (PUR) Area allowing commercial or multi-story residential development. The site has multi-story residential developments to the north, with some commercial on the ground floor, mixed use of commercial and residential beyond the railroad tracks to the east, a waterfront sculpture park to the west, and an industrial sugar refinery to the south. Past Use of the Site: The site was created by filling in the river creating landmass starting in 1951. The site remained vacant except for occasional construction storage. A 55-gallon drum containing No. 2 Fuel Oil was removed in 1998 during the subsurface investigation of Parcel H. Parcel H was used for parking since 2006. Parcel I has been used for storage of approximately 20,000 yards of fill material pursuant to a 2006 Beneficial Use Determination (BUD). The City of Yonkers and Yonkers Community Development Agency entered into a State Assistance Contract (SAC) under the ERP for investigation of the Yonkers Downtown Waterfront in 1998, which included this site. A Record of Decision was issued in 1999. A remedial action was conducted in 2000 at Parcels H and I under the ERP. In 2015, the City and the applicants approached NYSDEC to finish remediation at Yonkers Parcels H&I by entering the BCP. The remediation completed by the City of Yonkers included removal of 19 tons of dieldrin contaminated soil and 3,100 tons lead contaminated soil. The soil was disposed at an off-site permitted disposal facility. On Parcel H, 3 areas of lead impacted soil were removed based on previous test pit sampling results. The maximum depth of each excavation was between 5 and 8 feet. The size of the excavations were 28 feet by 40 feet, 60 feet by 45 feet, and 60 feet by 70 feet. The Parcel I included removal of dieldrin contaminated soils. The Parcel I excavation was 15 feet by 15 feet, and 2 feet deep. Residential use soil cleanup objectives (R SCOs) were achieved in subsurface soils for lead and dieldrin. Those areas not addressed under the ERP where contamination remained in subsurface soils were addressed in the Brownfield Cleanup Program (BCP). Site Geology and Hydrogeology: Fill material consisting of silt, sand, gravel, ash, concrete, brick, plastic wiring, steel I-beams, and rope is found from the surface to depths of approximately 6 to 12 feet below ground surface (bgs). The fill material is underlain by native soil consisting of fine to medium sands with some silt and clay. Groundwater is encountered at relatively shallow depths beneath the site, 6 to 15 feet below ground surface. The water-bearing units appear to be fill material found locally along the Hudson River shoreline. Groundwater flow is to the

YONKERS H&I SITE (Continued) **S118141137**

	west and southwest toward the Hudson River and may be tidally influenced."
Env Problem:	"Remediation at the Site is complete. Certificate of Completion signed on 12/28/2017. Remedial actions have successfully achieved soil cleanup objectives for a restricted residential use. Residual contamination in the soil, groundwater, and soil vapor are being managed under a Site Management Plan. Prior to remediation, the primary contaminants of concern included metals, pesticides, volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOC). "
	Not reported
Health Problem:	"Remedial actions are complete and measures are in place to control the potential for coming into contact with residual contamination remaining at the site."

Site Code: 508538
Site Description: "Location: The 3.72-acre site is located in an urban area along the City of Yonkers Waterfront. The site is bound to the east by Water Grant Street followed by the Metro-North rail line and a 10 story residential building; to the south by the American Sugar Facility and to the west by the waterfront sculpture park along the Hudson River. Several waterfront parcels to the North, including these parcels for H&I, were managed under the Environmental Restoration Program (ERP) under the site name, Yonkers Waterfront Redevelopment Site, ERP Site No. B00045. Site Features: The site has been completely redeveloped with a multi-story residential building and parking garage. Asphalt

YONKERS H&I SITE (Continued) **S118141137**

pavement and courtyards have been placed on the proposed Water Grant Street extension side. Topsoil is present in landscaped areas. Current Zoning and Land Use: The site is zoned a Planned Urban Redevelopment (PUR) Area allowing commercial or multi-story residential development. The site has multi-story residential developments to the north, with some commercial on the ground floor, mixed use of commercial and residential beyond the railroad tracks to the east, a waterfront sculpture park to the west, and an industrial sugar refinery to the south. Past Use of the Site: The site was created by filling in the river creating landmass starting in 1951. The site remained vacant except for occasional construction storage. A 55-gallon drum containing No. 2 Fuel Oil was removed in 1998 during the subsurface investigation of Parcel H. Parcel H was used for parking since 2006. Parcel I has been used for storage of approximately 20,000 yards of fill material pursuant to a 2006 Beneficial Use Determination (BUD). The City of Yonkers and Yonkers Community Development Agency entered into a State Assistance Contract (SAC) under the ERP for investigation of the Yonkers Downtown Waterfront in 1998, which included this site. A Record of Decision was issued in 1999. A remedial action was conducted in 2000 at Parcels H and I under the ERP. In 2015, the City and the applicants approached NYSDEC to finish remediation at Yonkers Parcels H&I by entering the BCP. The remediation completed by the City of Yonkers included removal of 19 tons of dieldrin contaminated soil and 3,100 tons lead contaminated soil. The soil was disposed at an off-site permitted disposal facility. On Parcel H, 3 areas of lead impacted soil were removed based on previous test pit sampling results. The maximum depth of each excavation was between 5 and 8 feet. The size of the excavations were 28 feet by 40 feet, 60 feet by 45 feet, and 60 feet by 70 feet. The Parcel I included removal of dieldrin contaminated soils. The Parcel I excavation was 15 feet by 15 feet, and 2 feet deep. Residential use soil cleanup objectives (R SCOs) were achieved in subsurface soils for lead and dieldrin. Those areas not addressed under the ERP where contamination remained in subsurface soils were addressed in the Brownfield Cleanup Program (BCP). Site Geology and Hydrogeology: Fill material consisting of silt, sand, gravel, ash, concrete, brick, plastic wiring, steel I-beams, and rope is found from the surface to depths of approximately 6 to 12 feet below ground surface (bgs). The fill material is underlain by native soil consisting of fine to medium sands with some silt and clay. Groundwater is encountered at relatively shallow depths beneath the site, 6 to 15 feet below ground surface. The water-bearing units appear to be fill material found locally along the Hudson River shoreline. Groundwater flow is to the west and southwest toward the Hudson River and may be tidally influenced."

Env Problem: "Remediation at the Site is complete. Certificate of Completion signed on 12/28/2017. Remedial actions have successfully achieved soil cleanup objectives for a restricted residential use. Residual contamination in the soil, groundwater, and soil vapor are being managed under a Site Management Plan. Prior to remediation, the primary contaminants of concern included metals, pesticides, volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOC). "
Not reported

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming into contact with residual contamination remaining at the site."

Site Code: 508538
Site Description: "Location: The 3.72-acre site is located in an urban area along the City of Yonkers Waterfront. The site is bound to the east by Water Grant Street followed by the Metro-North rail line and a 10 story residential building; to the south by the American Sugar Facility and to the west by the waterfront sculpture park along the Hudson River. Several waterfront parcels to the North, including these parcels for H&I, were managed under the Environmental Restoration Program (ERP) under the site name, Yonkers Waterfront Redevelopment Site, ERP Site No. B00045. Site Features: The site has been completely redeveloped with a multi-story residential building and parking garage. Asphalt pavement and courtyards have been placed on the proposed Water Grant Street extension side. Topsoil is present in landscaped areas. Current Zoning and Land Use: The site is zoned a Planned Urban Redevelopment (PUR) Area allowing commercial or multi-story residential development. The site has multi-story residential developments to the north, with some commercial on the ground floor, mixed use of commercial and residential beyond the railroad tracks to the east, a waterfront sculpture park to the west, and an industrial sugar refinery to the south. Past Use of the Site: The site was created by filling in the river creating landmass starting in 1951. The site remained vacant except for occasional construction storage. A 55-gallon drum containing No. 2 Fuel Oil was removed in 1998 during the subsurface investigation of Parcel H. Parcel H was used for parking since 2006. Parcel I has been used for storage of approximately 20,000 yards of fill material pursuant to a 2006 Beneficial Use Determination (BUD). The City of Yonkers and Yonkers Community Development Agency entered into a State Assistance Contract (SAC) under the ERP for investigation of the Yonkers Downtown

YONKERS H&I SITE (Continued) **S118141137**

Waterfront in 1998, which included this site. A Record of Decision was issued in 1999. A remedial action was conducted in 2000 at Parcels H and I under the ERP. In 2015, the City and the applicants approached NYSDEC to finish remediation at Yonkers Parcels H&I by entering the BCP. The remediation completed by the City of Yonkers included removal of 19 tons of dieldrin contaminated soil and 3,100 tons lead contaminated soil. The soil was disposed at an off-site permitted disposal facility. On Parcel H, 3 areas of lead impacted soil were removed based on previous test pit sampling results. The maximum depth of each excavation was between 5 and 8 feet. The size of the excavations were 28 feet by 40 feet, 60 feet by 45 feet, and 60 feet by 70 feet. The Parcel I included removal of dieldrin contaminated soils. The Parcel I excavation was 15 feet by 15 feet, and 2 feet deep. Residential use soil cleanup objectives (R SCOs) were achieved in subsurface soils for lead and dieldrin. Those areas not addressed under the ERP where contamination remained in subsurface soils were addressed in the Brownfield Cleanup Program (BCP). Site Geology and Hydrogeology: Fill material consisting of silt, sand, gravel, ash, concrete, brick, plastic wiring, steel I-beams, and rope is found from the surface to depths of approximately 6 to 12 feet below ground surface (bgs). The fill material is underlain by native soil consisting of fine to medium sands with some silt and clay. Groundwater is encountered at relatively shallow depths beneath the site, 6 to 15 feet below ground surface. The water-bearing units appear to be fill material found locally along the Hudson River shoreline. Groundwater flow is to the west and southwest toward the Hudson River and may be tidally influenced."

Env Problem: "Remediation at the Site is complete. Certificate of Completion signed on 12/28/2017. Remedial actions have successfully achieved soil cleanup objectives for a restricted residential use. Residual contamination in the soil, groundwater, and soil vapor are being managed under a Site Management Plan. Prior to remediation, the primary contaminants of concern included metals, pesticides, volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOC). "
Not reported

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming into contact with residual contamination remaining at the site."

YONKERS H&I SITE (Continued) **S118141137**

contaminated soils. The Parcel I excavation was 15 feet by 15 feet, and 2 feet deep. Residential use soil cleanup objectives (R SCOs) were achieved in subsurface soils for lead and dieldrin. Those areas not addressed under the ERP where contamination remained in subsurface soils were addressed in the Brownfield Cleanup Program (BCP). Site Geology and Hydrogeology: Fill material consisting of silt, sand, gravel, ash, concrete, brick, plastic wiring, steel I-beams, and rope is found from the surface to depths of approximately 6 to 12 feet below ground surface (bgs). The fill material is underlain by native soil consisting of fine to medium sands with some silt and clay. Groundwater is encountered at relatively shallow depths beneath the site, 6 to 15 feet below ground surface. The water-bearing units appear to be fill material found locally along the Hudson River shoreline. Groundwater flow is to the west and southwest toward the Hudson River and may be tidally influenced."

Env Problem: "Remediation at the Site is complete. Certificate of Completion signed on 12/28/2017. Remedial actions have successfully achieved soil cleanup objectives for a restricted residential use. Residual contamination in the soil, groundwater, and soil vapor are being managed under a Site Management Plan. Prior to remediation, the primary contaminants of concern included metals, pesticides, volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOC). "
Not reported
Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming into contact with residual contamination remaining at the site."

Site Code: 508538
Site Description: "Location: The 3.72-acre site is located in an urban area along the City of Yonkers Waterfront. The site is bound to the east by Water Grant Street followed by the Metro-North rail line and a 10 story residential building; to the south by the American Sugar Facility and to the west by the waterfront sculpture park along the Hudson River. Several waterfront parcels to the North, including these parcels for H&I, were managed under the Environmental Restoration Program (ERP) under the site name, Yonkers Waterfront Redevelopment Site, ERP Site No. B00045. Site Features: The site has been completely redeveloped with a multi-story residential building and parking garage. Asphalt pavement and courtyards have been placed on the proposed Water Grant Street extension side. Topsoil is present in landscaped areas. Current Zoning and Land Use: The site is zoned a Planned Urban Redevelopment (PUR) Area allowing commercial or multi-story residential development. The site has multi-story residential developments to the north, with some commercial on the ground floor, mixed use of commercial and residential beyond the railroad tracks to the east, a waterfront sculpture park to the west, and an industrial sugar refinery to the south. Past Use of the Site: The site was created by filling in the river creating landmass starting in 1951. The site remained vacant except for occasional construction storage. A 55-gallon drum containing No. 2 Fuel Oil was removed in 1998 during the subsurface investigation of Parcel H. Parcel H was used for parking since 2006. Parcel I has been used for storage of approximately 20,000 yards of fill material pursuant to a 2006 Beneficial Use Determination (BUD). The City of Yonkers and Yonkers Community Development Agency entered into a State Assistance Contract (SAC) under the ERP for investigation of the Yonkers Downtown Waterfront in 1998, which included this site. A Record of Decision was issued in 1999. A remedial action was conducted in 2000 at Parcels H and I under the ERP. In 2015, the City and the applicants approached NYSDEC to finish remediation at Yonkers Parcels H&I by entering the BCP. The remediation completed by the City of Yonkers included removal of 19 tons of dieldrin contaminated soil and 3,100 tons lead contaminated soil. The soil was disposed at an off-site permitted disposal facility. On Parcel H, 3 areas of lead impacted soil were removed based on previous test pit sampling results. The maximum depth of each excavation was between 5 and 8 feet. The size of the excavations were 28 feet by 40 feet, 60 feet by 45 feet, and 60 feet by 70 feet. The Parcel I included removal of dieldrin contaminated soils. The Parcel I excavation was 15 feet by 15 feet, and 2 feet deep. Residential use soil cleanup objectives (R SCOs) were achieved in subsurface soils for lead and dieldrin. Those areas not addressed under the ERP where contamination remained in subsurface soils were addressed in the Brownfield Cleanup Program (BCP). Site Geology and Hydrogeology: Fill material consisting of

Site Description: "Location: The 3.72-acre site is located in an urban area along the City of Yonkers Waterfront. The site is bound to the east by Water Grant Street followed by the Metro-North rail line and a 10 story residential building; to the south by the American Sugar Facility and to the west by the waterfront sculpture park along the Hudson River. Several waterfront parcels to the North, including these parcels for H&I, were managed under the Environmental Restoration Program (ERP) under the site name, Yonkers Waterfront Redevelopment Site, ERP Site No. B00045. Site Features: The site has been completely redeveloped with a multi-story residential building and parking garage. Asphalt pavement and courtyards have been placed on the proposed Water Grant Street extension side. Topsoil is present in landscaped areas. Current Zoning and Land Use: The site is zoned a Planned Urban Redevelopment (PUR) Area allowing commercial or multi-story residential development. The site has multi-story residential developments to the north, with some commercial on the ground floor, mixed use of commercial and residential beyond the railroad tracks to the east, a waterfront sculpture park to the west, and an industrial sugar refinery to the south. Past Use of the Site: The site was created by filling in the river creating landmass starting in 1951. The site remained vacant except for occasional construction storage. A 55-gallon drum containing No. 2 Fuel Oil was removed in 1998 during the subsurface investigation of Parcel H. Parcel H was used for parking since 2006. Parcel I has been used for storage of approximately 20,000 yards of fill material pursuant to a 2006 Beneficial Use Determination (BUD). The City of Yonkers and Yonkers Community Development Agency entered into a State Assistance Contract (SAC) under the ERP for investigation of the Yonkers Downtown Waterfront in 1998, which included this site. A Record of Decision was issued in 1999. A remedial action was conducted in 2000 at Parcels H and I under the ERP. In 2015, the City and the applicants approached NYSDEC to finish remediation at Yonkers Parcels H&I by entering the BCP. The remediation completed by the City of Yonkers included removal of 19 tons of dieldrin contaminated soil and 3,100 tons lead contaminated soil. The soil was disposed at an off-site permitted disposal facility. On Parcel H, 3 areas of lead impacted soil were removed based on previous test pit sampling results. The maximum depth of each excavation was between 5 and 8 feet. The size of the excavations were 28 feet by 40 feet, 60 feet by 45 feet, and 60 feet by 70 feet. The Parcel I included removal of dieldrin contaminated soils. The Parcel I excavation was 15 feet by 15 feet, and 2 feet deep. Residential use soil cleanup objectives (R SCOs) were achieved in subsurface soils for lead and dieldrin. Those areas not addressed under the ERP where contamination remained in subsurface soils were addressed in the Brownfield Cleanup Program (BCP). Site Geology and Hydrogeology: Fill material consisting of silt, sand, gravel, ash, concrete, brick, plastic wiring, steel I-beams, and rope is found from the surface to depths of approximately 6 to 12 feet below ground surface (bgs). The fill material is underlain by native soil consisting of fine to medium sands with some silt and clay. Groundwater is encountered at relatively shallow depths beneath the site, 6 to 15 feet below ground surface. The water-bearing units appear to be fill material found locally along the Hudson River shoreline. Groundwater flow is to the west and southwest toward the Hudson River and may be tidally influenced."

Env Problem: "Remediation at the Site is complete. Certificate of Completion

YONKERS H&I SITE (Continued) **S118141137**

	signed on 12/28/2017. Remedial actions have successfully achieved soil cleanup objectives for a restricted residential use. Residual contamination in the soil, groundwater, and soil vapor are being managed under a Site Management Plan. Prior to remediation, the primary contaminants of concern included metals, pesticides, volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOC). "
	Not reported
Health Problem:	"Remedial actions are complete and measures are in place to control the potential for coming into contact with residual contamination remaining at the site."

Site Description: "Site Location: The site is located on the corner of Riverdale Avenue and St. Andrews Place in the City of Yonkers, Westchester County. This site is bordered to the south and east by St. Andrews Place. The site is bound to the north by a mixed commercial and residential building. The site is bound to the west by Riverdale Ave. Site Features: The site is 0.196 acres in size and is located on a single

RIVERDALE DRY CLEANERS (Continued) **S125896311**

tax lot (1.-132-14.16). The site has approximately 120 feet of road frontage along both Riverdale Ave and St. Andrews Place. There are five buildings on site that are occupied by a dry cleaner (drop-off service), nail spa, restaurant, deli, and a store. Current Zoning and Land Use: The site is in a city restricted business zone (BR). The restricted business zone excludes residential land use. Past Use of the Site: A portion of the site historically operated as a full-service dry-cleaning facility from 1997 through 2006. Site Geology and Hydrogeology: The site topography slopes to the west and groundwater flow in the area is anticipated to flow to the west towards the Hudson River. Shallow groundwater was encountered during a subsurface investigation beneath a neighboring structure to the north of the site. "

Env Problem:	"A subsurface soil vapor investigation was completed at the neighboring property to the north of the site (432 Riverdale Avenue) in April 2018. Elevated levels of volatile organic compounds (VOCs) were encountered during this investigation in both indoor air and sub-slab soil vapor samples. Contaminants of concern include tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-dichloroethene, and methylene chloride. A sub-slab depressurization system (SSDS) was installed beneath the building at 432 Riverdale Avenue in March 2019. "
Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

Site Description: "This site transitioned to the BCP (C360181). Site Location: The site is located on Riverdale Avenue and Vark Street in the City of Yonkers, Westchester County. It is bordered to the west by Hawthorne Avenue. Site Features: The site is rectangular-shaped consisting of one partial tax parcel totaling approximately 0.55 acres. There is approximately 140 feet of frontage on the eastern side of Riverdale Avenue. The site contains multiple apartments continuously connected with commercial businesses on the first floor. The site surface currently consists of some grassy but mostly concrete surfaces. Current Zoning and Land Use: The site is in a BR zone (restricted business, residences excluded). Past Use of the Site: The site was formerly developed with numerous residential and commercial structures in the north and an industrial/manufacturing facility of carpet and hats from as early as 1886. The northern portion of the subject property remained improved with residential and commercial structures through the 1950s. The southern portion of the subject property remained improved with an industrial/manufacturing facility through the late 1910s, and was re-developed with an auto depot and two parking garages circa 1940. By the early 1950s, the southern portion of the subject property was re-developed with a wholesale grocery warehouse, a commercial/industrial facility, a gasoline service station, and a parking garage. By 1971, all existing structures located within the northern portion of the subject property, with the exception of a single fire station, were demolished. All existing structures located within the southern portion of the subject property, with the exception of the wholesale grocery warehouse, which was converted into a pen manufacturing facility, were also demolished. By 1973, all remaining structures on the subject property were removed. The subject property was later re-developed with the current structures in 1975. Guillet Cleaners used a PCE 4th generation dry cleaner machine from 2001 to 2015. A non-PCE machine was used from 2015 to the summer of 2018. No drycleaning is done on-site now, but still stores clothes that were dry cleaned. Site Geology and Hydrogeology: Soil generally consists of brown, fine to medium-grained sandy fill material from the surface

BUENA VISTA APARTMENTS (Continued) **S104194922**

	to approximately 10 feet below surface grade (bsg) medium-grained native sands from approximately 11 to 20 feet bsg. Groundwater flow is to the south/southeast"
Env Problem:	"This site transitioned to the BCP (C360181). Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals; and soil vapor samples were analyzed for VOCs. All samples collected as part of RI were collected on-site. Based on investigations conducted to date, the primary contaminants of concern include VOCs in groundwater and VOCs in soil vapor. Soil - Soil samples were taken from AOCs identified in the 2015 RI. Various VOCs were detected in soil samples along with lead at concentrations above the reporting limits (RLs) but below the unrestricted SCOs. Groundwater - The following contaminants were detected above guidance values: cis-1,2-Dchloroehene 160 ppb, Isopropylbenzene 23 ppb, sec-Butylbenzene 7 ppb, PCE 9.2 ppm, trans-1,2-Dichloroethene 8.1 ppb, TCE 940 ppb. Based on the results of the on-site groundwater investigation, it is possible that groundwater contamination is not migrating off-site. Soil Vapor - Subslab soil samples were collected for laboratory analysis. Samples taken from the source excavation had detections of Chloroform 251 ug/m3, cis-1,2-Dicloroethylene 4.2 mg/m3, PCE 29 mg/m3, and TCE 6.2 mg/m3. Indoor air samples were also collected and have detections of 1,4-Dichlorobenzene 3.8 ug/m3, and Chloroform 4.4 ppb above EPA VISL. Based on the results of the on-site soil vapor investigation, contaminated soil vapor may be migrating across the site and therefore soil vapor intrusion investigations of a larger extent of the apartments are recommended."
Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

Update By:	KABROWNE
Site Description:	"Site Location: The off-site area is located north and east of the Buena Vista Apartments brownfield cleanup site (C360181) at 85 Riverdale Ave, Yonkers, New York. Site Features: The off-site area is comprised of mixed residential and commercial structures. Current Zoning and Land Use: The area is listed on the City of Yonkers zoning database as BR Business Restricted. However, elsewhere on a separate City of Yonkers online property viewer database the area is currently located in the UR-HD/MD-High Density Urban Residential High Density District / Urban Residential Medium Density District and has an occupancy classification of Residential R-2. Past Use of the Site: The brownfield cleanup site was redeveloped in 1975 with the current structures (which currently contain residential units, commercial units, and a dry-cleaner which formerly housed an on-site dry cleaning operation. Guillet Cleaners used a PCE 4th generation dry cleaner machine from 2001 to 2015. A non-PCE machine was used from 2015 to the summer of 2018. No dry-cleaning is done on-site now. Results of the Buena Vista BCP site remedial investigation showed a potential for chlorinated solvent vapors to be migrating off-site. Site Geology and Hydrogeology: On-site of the Buena Vista BCP included observations during field activities indicate primarily urban fill material to approximately 10 feet deep underlain by native sands. Bedrock was encountered between 4-20 feet onsite; with bedrock closer to the surface on the western portion of the site. Groundwater underlying the site generally flows to the southeast; although specific site features (i.e. subsurface utilities, depth of bedrock surface, etc) may cause some flow differences. Depth to groundwater was encountered around 12 feet."
Env Problem:	"Off site results will be made available once the investigation is complete."
Health Problem:	"Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available."

Update By:	RDBENDEL
Site Description:	"Site Location: The property is located in an urban area in the County of Westchester, New York and is identified as Block 505 and Lot 150. The site is situated on an approximately 4.5 acres bounded by a mixed residential and commercial structure to the north, Vark Street to the south, Riverdale Avenue to the east, and Hawthorne Avenue to the west. Site Features: The Site is developed with three interconnected buildings that are mainly residential apartments with some first floor commercial applications. In addition to the current structures, the site includes a parking garage, and two central courtyards with green spaces. A sub-slab depressurization system was

BUENA VISTA APARTMENTS (Continued) **S104194922**

installed in the basement of a portion of the apartment complex as part of an Interim remedial measure. Current Zoning and Land Use: The Site is listed on the City of Yonkers zoning database as BR Business Restricted. However, elsewhere on a separate City of Yonkers online property viewer database the Site is currently located in the UR-HD/MD-High Density Urban Residential High Density District / Urban Residential Medium Density District and has an occupancy classification of Residential R-2. The mixed use residential and commercial is allowable for this zoning. Past Use of the Site: The northern portion of the site remained improved with residential and commercial structures through the 1950s. The southern portion of the site remained improved with an industrial/manufacturing facility through the late 1910s, and was re-developed with an auto depot and two parking garages circa 1940. By the early 1950s, the southern portion of the subject property was redeveloped with a wholesale grocery warehouse, a commercial/industrial facility, a gasoline service station, and a parking garage. Four gasoline underground storage tanks (USTs) of unknown capacity were also located along the eastern elevation of the unmarked parking garage. By the late 1950s, the four gasoline tanks located at the unmarked parking garage were no longer displayed in historic images. By 1971, all existing structures located within the northern portion of the subject property, with the exception of a single fire station, were demolished. All existing structures located within the southern portion of the site, with the exception of the wholesale grocery warehouse, which was converted into a pen manufacturing facility, were also demolished. By 1973, all remaining structures on the site were removed. The site was redeveloped in 1975 with the current structures (which currently contain residential units, commercial units, and a dry-cleaner which formerly housed an on-site dry cleaning operation. Guillet Cleaners used a PCE 4th generation dry cleaner machine from 2001 to 2015. A non-PCE machine was used from 2015 to the summer of 2018. No dry-cleaning is done on-site now. A 2015 Phase I found volatile organic compounds (VOCs) in the groundwater and soil gas resulting in spill#1505681. After additional investigation was performed under the spill project, the site was transitioned into the Brownfield Cleanup Program (C360181) through a Volunteer status Brownfield Cleanup Agreement with the new property owner. Site Geology and Hydrogeology: Onsite observations during field activities indicate primarily urban fill material to approximately 10 feet deep underlain by native sands. Bedrock was encountered between 4-20 feet onsite; with bedrock closer to the surface on the western portion of the site. Groundwater underlying the site generally flows to the southeast; although specific site features (i.e. subsurface utilities, depth of bedrock surface, etc) may cause some flow differences. Depth to groundwater was encountered around 12 feet."

Env Problem:

"Soil and groundwater samples were analyzed for Target Compound List (TCL) and Target Analyte List (TAL) plus 30 tentatively identified compounds (TICs), Total Petroleum Hydrocarbons (TPH), and the emerging contaminants PFAS and 1,4-dioxane. Soil vapor samples were analyzed for volatile organic compounds (VOCs). Based on investigations conducted to date, the primary contaminants of concern include VOCs, metals, and polycyclic aromatic hydrocarbons (PAHs) in soil and VOCs in groundwater and soil vapor. Soil The following PAHs were identified at concentrations that exceed their Restricted-Residential Soil Cleanup Objectives (RRSCOs):

BUENA VISTA APARTMENTS (Continued) **S104194922**

benzo[a]anthracene (1.2 - 2.6 parts per million (ppm) vs. RRSCO of 1 ppm), benzo[b]fluoranthene (1.6 3.5 ppm vs. RRSCO of 1 ppm), benzo(a)pyrene (1.1 2.3 ppm vs. RRSCO of 1 ppm), dibenzo(a,h)anthracene (0.4 ppm vs. RRSCO of 0.33 ppm) and indeno(1,2,3-cd)pyrene (0.52 2 ppm vs. RRSCO of 0.5 ppm). The depth of PAH impacts is within the top foot below ground surface (bgs). The following metals were identified at concentrations that exceed their Restricted-Residential Soil Cleanup Objectives (RRSCO): arsenic (24.6 ppm vs RRSCO of 16), and mercury (0.958 - 1.1 ppm vs RRSCO of 0.81 ppm). The depth of metal impacts is within the top foot below ground surface (bgs). The following compounds of the emerging contaminant class perfluoroalkyl substances (PFAS) were detected in on-site soils: Perfluorodecanesulfonic Acid (PFDS) (1.66 - 6.56 parts per billion (ppb), Perfluorooctanesulfonic Acid (PFOS) (1.49 - 6.11 ppb). No VOCs, pesticides, polychlorinated-biphenyls (PCBs), nor the emerging contaminant 1,4-Dioxane were detected on-site. Based on the on-site soil investigation, it does not appear that soil contamination is migrating off-site. Groundwater - The following VOCs were identified at concentrations that exceed the Ambient Water Quality Standards for groundwater (AWQS): tetrachloroethene (PCE) (12 - 540 ppb vs 5 ppb groundwater standard (GA)), trichloroehene (TCE) (8.3 - 580 ppb vs 5 ppb GA), cis-1,2-dichloroethene (120 - 210 ppb vs 5 GA), trans-1,2-dichloroethene (26 - 65 ppb vs 5 GA), and vinyl chloride (14 - 16 ppb vs 2 ppb GA). The following PAHs were identified at concentrations that exceed the Ambient Water Quality Standards for groundwater (AWQS): benzo[a]anthracene (0.11 ppb vs. 0.002 ppb GA), benzo[b]fluoranthene (0.15 - 0.21 ppb vs 0.0002 ppb GA), and indeno(1,2,3-cd)pyrene (0.13 - 0.2 ppb vs 0.0002 ppb GA). The following compounds of the emerging contaminant class perfluoroalkyl substances (PFAS) were detected in groundwater: perfluorobutanoic acid (PFBA) (12 - 18.1 parts per trilion (ppt)), perfluoropentanoic acid (PFPeA) (14 - 33.2 ppt), perfluorobutanesulfonic acid (PFBS) (5.8 - 9.2 ppt), perfluorohexanoic acid (PFHxA) (13.1 - 32.5 ppt), perfluoroheptanoic acid (PFHpA) (6.3 - 17.2 ppt), perfluorohexanesulfonic acid (PFHxS) (4 - 4.9 ppt), perfluorooctanoic acid (PFOA) (24.2 - 47.2 ppt), perfluorononanoic acid (PFNA) (2.2 - 3.3 ppt), and perfluorooctanesulfonic acid (PFOS) (5.1 - 16.9 ppt). No samples exceeded the Environmental Protection Agency s (EPA) lifetime health advisory level (HAL) of 70 ppt.of PFOA/PFOS individually or combined, and all samples exceeded the New York Drinking Water Quality Council s proposed maximum contaminant level (MCL) of 10 ppt for PFOA/PFOS individually. No pesticides, PCBs, nor the emerging contaminant 1,4-dioxane were detected in any of the groundwater samples. None of the metal contaminants of concern were above the AWQS in any of the groundwater samples. PCE and its associated degradation products detected in the groundwater exhibited a gradient towards the location of the historic dry cleaner. Based on the on-site groundwater investigation, there is a potential for groundwater contamination to migrate off-site. Soil Vapor & Indoor Air Elevated levels of chlorinated volatile organic compounds (CVOCs) were found beneath the slab and in the indoor air of the basement beneath the apartment complex. Several samples of combined sub-slab (SS) and indoor air (IA) results indicate a mitigation requirement per the 2017 New York State Department of Health Vapor Intrusion Matrices. The following are paired data for PCE that indicated mitigation: (SS - 490,000 micrograms per cubic meter (ug/m3), IA - 605 ug/m3), and (SS - 652

BUENA VISTA APARTMENTS (Continued) **S104194922**

	ug/m3, IA - 161 ug/m3). The following are paired data for TCE that indicated mitigation: (SS - 1,930 ug/m3, IA - 0.955 ug/m3), and (SS - 98.3 ug/m3, IA - 3.57 ug/m3). As a result of these levels, an interim remedial measure was approved on August 19th, 2019 to install vapor seals to the sumps located in the basement and a sub-slab depressurization system (SSDS) to address vapor both below the slab and in the basement. Soil vapor has the potential to migrate off-site. On-site soil vapor issues are being mitigated by s sub-slab depressurization system installed in the basement of the apartment complex as part of an interim remedial measure."

DEC Memo:	"Left a message for a call back...mm Spoke to caller. There were 2 investigations done. Found PCE and TCE in groundwater and soil gas. There is a dry cleaner at this property. This project will be handled by E Moore...mm 8/28/2015 -- Several large reports were reviewed and put into D2 earlier this week. Spoke with Jim Duba of ESI (jduba@esi,com) today. Dry cleaner is still operating. RIs have delineated to a large degree, but additional delineation needed. They intend to seal or ssds the basements where impacts have been observed. Will submit a scope of work for further RI soon. With my approval, they will implement during September, hoping to submit RI report and mitigation work plan in October. If those plans are approved, they are seeking funding for the redevelopment. ELM 10/13/2015 -- Contractor drilled new wells and sampled all wells yesterday. Soil vapor sampled in basement near contaminated gw. Report to be submitted late this week for soil gas, next week for groundwater. Technical meeting set for Thursday the 19th. ELM 10/27/2015 -- Met with Partners (Carrie in person, Jim on the phone) today. Very localized, very high PCE contamination in water and soil gas. No PCE in basement, but daughter chemicals had hits. Will propose injection in basement. Location is 15 story apartment building with commercial on bottom floors. FANY may finance and needs approved work plan to provide funding to an aggressive developer. Work plan will be submitted in 2 weeks or so with a few days heads up. ELM 3/1/2017 Remedial Update: Good Afternoon, I am providing an update on the remedial project at 85 Riverdale Avenue. We are scheduled to perform the injection activities (as per the RAP) at this site starting on March 15 through 23 (excluding Sat 3/18 & Sun

BUENA VISTA APARTMENTS (Continued) **S104194922**

3/19). The property owner switched funding agencies which delayed the start of the remedial activities. -Chris Hirschmann, CHMM Director of Geo Services. SS 2/20/2018 -- Email from Chris Hirschmann with update for remediation (injection) project: Wells MW-3 and MW-5 are situated in the main contamination areas of concern in the vicinity of the former dry cleaner. The laboratory results demonstrate that several compounds of concern (particularly TCE and PCE) have been reduced below the applicable GW Standard in MW-5. In addition, several VOCs have been reduced below applicable GW Standards in MW-3, with TCE and PCE significantly reduced from pre-injection levels. Based on this information we expect the groundwater results to continue to attenuate and are planning to propose periodic monitoring in the Remedial Action Report to confirm. Injection seems to have performed to the extent expected. ELM 11/1/2018 -- Reviewed RAWP and historic sample data and confirmed with George H. that the site should not be in the spills program. MDK 11/2/2018 -- Spoke with Chris H. discussing remedial programs. Will receive a decision after speaking with client. MDK 4/10/2019 -- BCP application received, spill closure upon receiving CoC. MDK "

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

Lists of state and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

NJ LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharged occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

NY E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/23/2021
Date Data Arrived at EDR: 08/10/2021
Date Made Active in Reports: 11/08/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

USGS TOPOGRAPHIC MAP

Target Property Map:	14106002 YONKERS, NY
Version Date:	2019

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

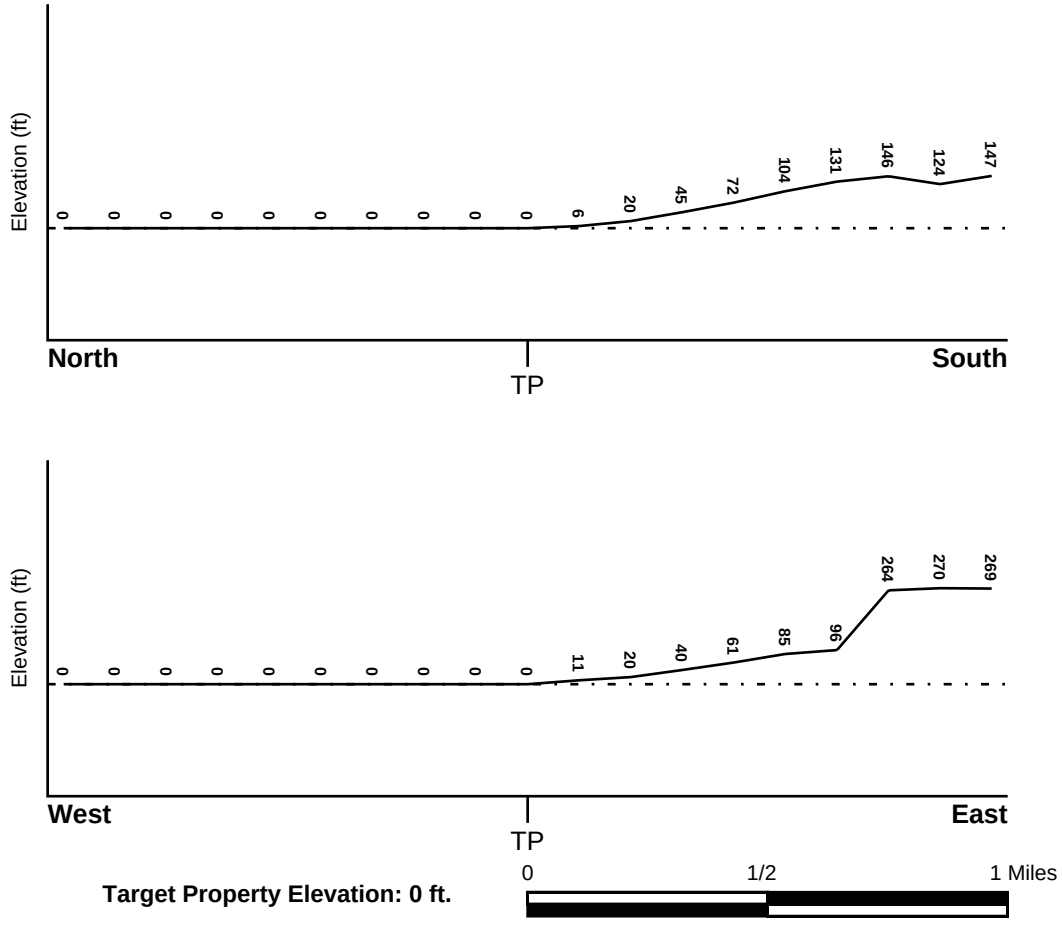

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
36119C0316F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
34003C0210G	FEMA FIRM Flood data
36119C0309F	FEMA FIRM Flood data

36119C0317F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
YONKERS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

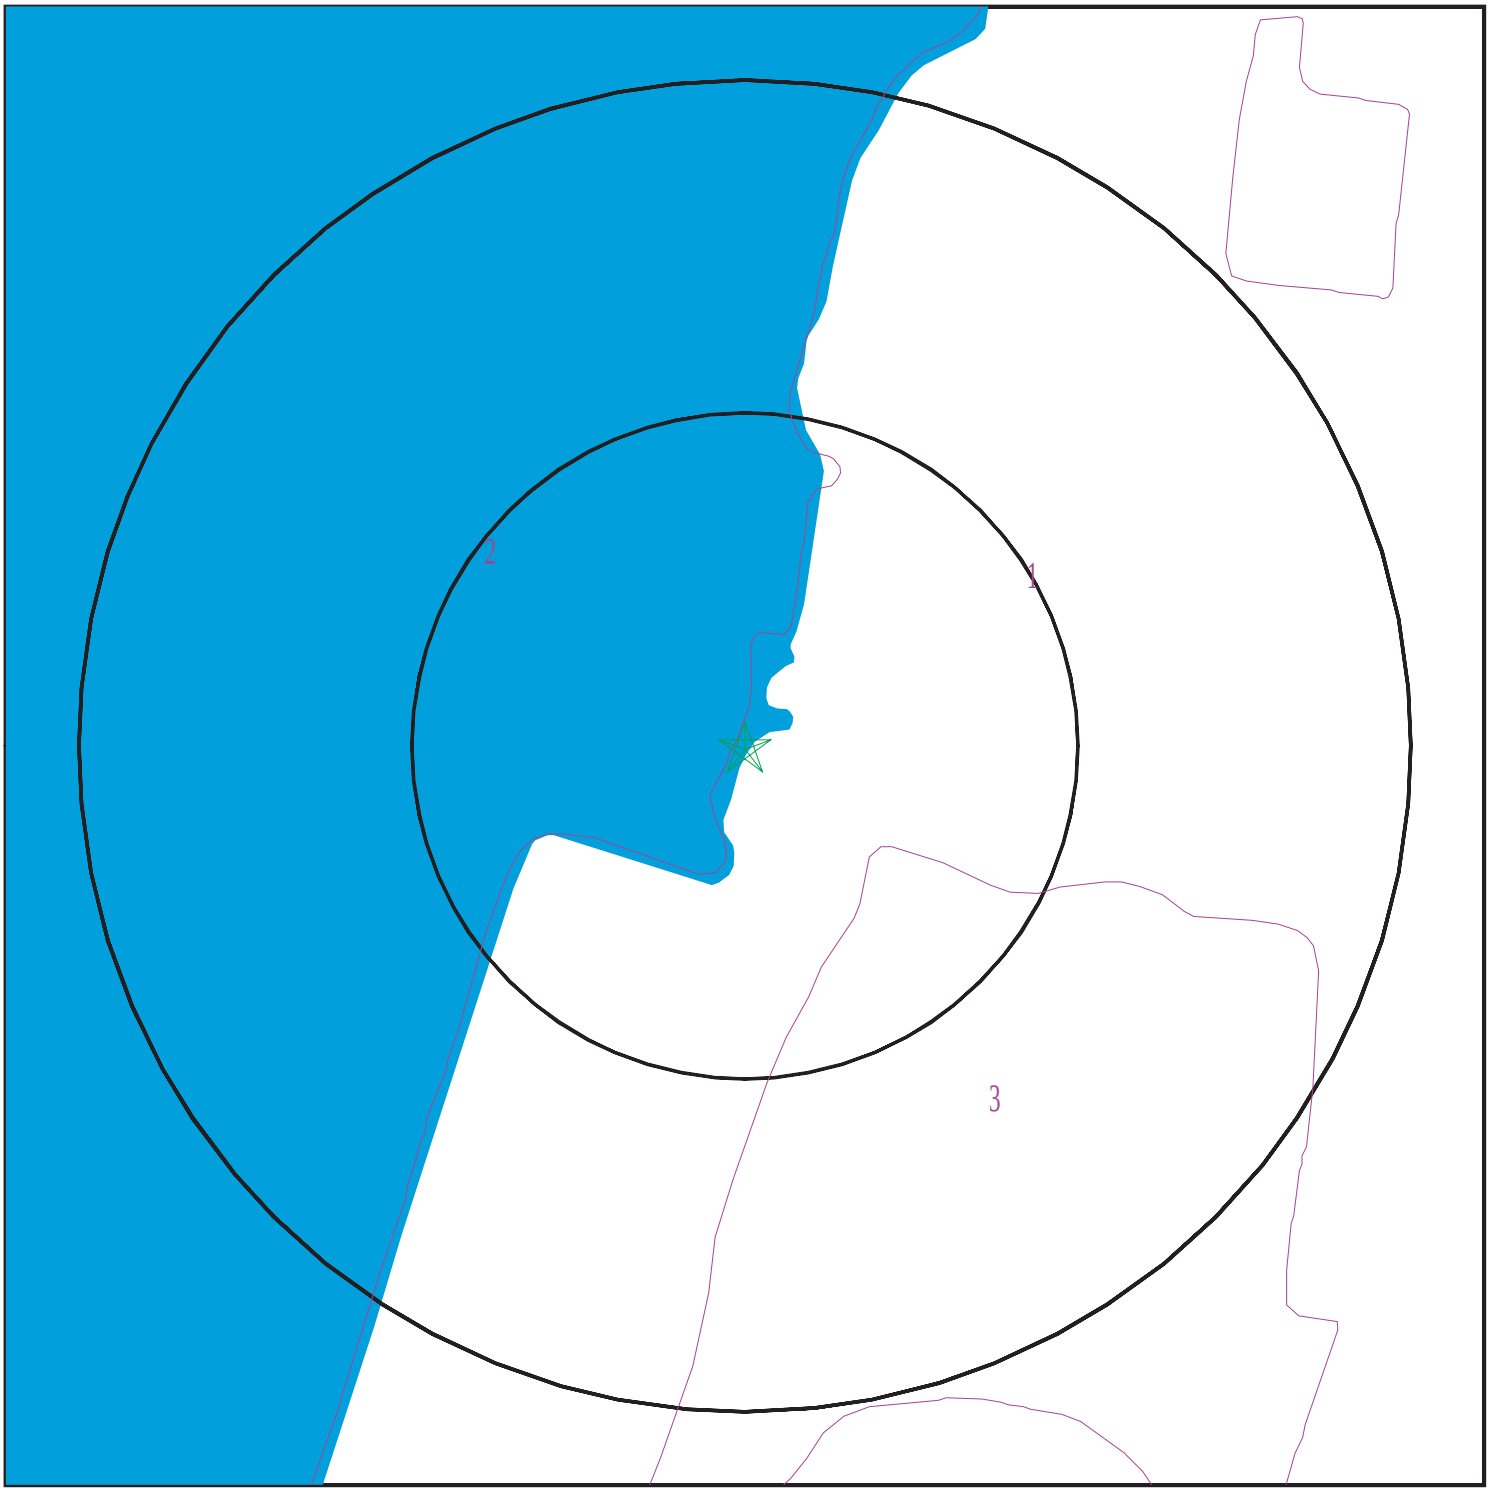

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EXECUTIVE SUMMARY

A search of available environmental records was conducted by EDR. The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

DEC Memo:	"03/28/06: Spoke with Kate, Someone else pulled the tank then Dutchess Environmental was hired to do the remediation. The spill had not been called in during the initial tank pull. Remediation has been completed. D.E. will be submitting report to White Plains Office. 8/2/10 need TCR JO'M 11/24/10: I requested additional info from Dutchess Environmental. Reply received via e-mail from Keith Troccoli of Dutchess: I have everything in my office as the owner of Execuvan doesn't feel he needs to pay to dispose of the soil since oil comes from the ground. The owner partial paid directly however I am still fighting with them to get the balance so I haven t released that paperwork either. My lawyer has that case since they signed and agreed to the costs and terms before hand and during the project. jod 2/09/11: Voice-mail message received from attorney Richard Morris. A settlement is pending and a closure report will then be sent. jod 9/29/16: Message sent to Dutchess requesting status. jod 10/14/16: Original report in DecDocs. jod 6/04/18: Message sent to Dutchess. jod 5/16/19: I spoke with Keith Troccoli at Dutchess. They were never able to settle this case. Dutchess completed the cleanup but were never paid for their work. The sample results and disposal receipts were in the possession of a law office partnership which has since dissolved. Spill administratively closed at this time. jod "

FOIL Requests and Responses

NEW YORK STATE OF OPPORTUNITY. Department of Health

KATHY HOCHUL
Governor

MARY T. BASSETT, M.D., M.P.H.
Commissioner

KRISTIN M. PROUD
Acting Executive Deputy Commissioner

January 28, 2022

Eric Stucker
PS&S
1 Larkin Plaza, 2nd Floor
Yonkers, NY 11701

FOIL #: 22-01-503
RE: PBS/MOSF Information

Dear Eric Stucker:

This will acknowledge receipt of your request for records under the Freedom of Information Law (FOIL), received by this office on January 28, 2022.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 business days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

Rosemarie Hewig, Esq.
Records Access Officer

Commissioner

KRISTIN M. PROUD
Acting Executive Deputy Commissioner

February 28, 2022

Sara Giordano
Insite Group, Inc.
611 S. Irvine Ave
Sharon, PA 16146

FOIL #: 22-01-528

Dear Sara Giordano:

This letter is in regard to your Freedom of Information Law (FOIL) request of January 28, 2022, which is currently being processed.

Please be advised this Office is unable to respond to your request by the date previously given to you because a diligent search for responsive documents is still being conducted.

We estimate that this Office will complete its process by April 11, 2022. The Department will notify you in writing when/if the responsive materials are available for release or if the time needed to complete your request extends beyond the above date.

Should you require additional information or wish to discuss this matter further, please do not hesitate to contact me at (518) 474-8734.

Sincerely,

Rosemarie Hewig, Esq.
Records Access Officer

Subject: FOIL Request :: W095420-012722

Dear Eric:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 1/27/2022 and given the reference number FOIL #W095420-012722 for tracking purposes. You may expect the Department's response to your request no later than **2/25/2022**.

Record Requested: **Please provide all available information regarding ASTs and spills for the following facilities located in Yonkers, NY: ATI (A. Tarricone Inc.)/ATI Ludlow, Pollution DIscharge Elimination System No. 0-099546. This is a former MOSF located at Ludlow Street/Fernbrook Street. This Site contained 14 ASTs, all of 100,000+ gallons. All County Bus, LLC., PBS No, 3-800816, located at 70 Fernbrook Street. This Site contains 5 active ASTs and 2 closed/removed ASTs. Also please provide all available information for the following spill numbers: 8312001 9610421 0514864 0804588 0010399 0003581 9814778 1502074 0608986 0704957**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

RE: PUBLIC RECORDS REQUEST of 1/27/2022, Reference # W095420-012722

Date: 02/25/2022

Dear Eric Stucker,

This is in response to your 1/27/2022 Freedom of Information Law (FOIL) request seeking:

> *Please provide all available information regarding ASTs and spills for the following facilities located in Yonkers, NY: ATI (A. Tarricone Inc.)/ATI Ludlow, Pollution DIscharge Elimination System No. 0-099546. This is a former MOSF located at Ludlow Street/Fernbrook Street. This Site contained 14 ASTs, all of 100,000+ gallons.*
> *All County Bus, LLC., PBS No, 3-800816, located at 70 Fernbrook Street. This Site contains 5 active ASTs and 2 closed/removed ASTs.*
> *Also please provide all available information for the following spill numbers: 8312001 9610421 0514864 0804588 0010399 0003581 9814778 1502074 0608986 0704957*

The Department of Environmental Conservation (DEC) has identified records responsive to your request and has uploaded those records into DEC's online FOIL request system. Please visit the customer portal for DEC's online system by clicking here to log into your DEC FOIL account, where you can view and download the records.

Be advised that DEC has withheld certain responsive documents or portions thereof from disclosure in accordance with one or more of the following provisions of the Public Officers Law (POL):

- POL 87.2.b. Would constitute an unwarranted invasion of personal privacy under POL 89.2

If you believe you have been unlawfully denied access to records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

> FOIL Appeals Officer
> Office of General Counsel
> New York State Department of Environmental Conservation
> 625 Broadway, 14th Floor
> Albany, NY 12233-1500

Your FOIL request is now closed. Please reference FOIL #W095420-012722 in all future correspondence with DEC concerning this request. Thank you.

Sincerely,

1.0 INTRODUCTION

This Underground Storage Tank (UST) Closure Report is prepared for Melinda Billig and the New York State Department of Environmental Conservation (NYSDEC). The site is located at 59 Sunny Side Drive, Yonkers, NY 10705. The closure report details the remedial activities conducted by Castlton Environmental Contractors, LLC (CEC) of Nanuet, New York.

2.0 BACKGROUND INFORMATION

In May 2015, the property owner retained CEC to remove one (1) 550-gallon no. 2 fuel oil Underground Storage Tank (UST) from 59 Sunny Side Drive, Yonkers, NY 10705. The UST was located in the side yard of the property. On May 27, 2015, CEC removed overburden soils to access and remove the tank. The tank was cut open and cleaned with absorbent pads and a squee-gee. Once the tank was cleaned, it was removed from the ground and holes were found along the tank bottom and fuel oil impacted soils were observed in the base of the UST excavation. The discharge was reported to the NYSDEC and spill **No. 15-02074** was assigned for the subject site. CEC immediately began to remove fuel oil impacted soils.

3.0 REMEDIAL ACTIVITIES

The following remedial activities were performed at the subject site:

Excavation

Upon mobilizing to the site, the UST grave was screened with a Photoionization detector (PID) to aid in the detection of the fuel oil impacted soils. Based on elevated field screening results, soil was removed from the base of the excavation and stockpiled on and under 6 mil polyethylene sheeting to prevent cross contamination with surrounding soils. Subsequent to soil removal, composite post-excavation soil samples were collected from the excavation. A detailed description of post-excavation soil sampling is presented in Appendix 3. The resulting excavation following tank and soil removal measured 8 ft n-s, 10 ft e-w, and 8 ft deep. Bedrock was not encountered and CEC did not encounter groundwater.

Liquid Waste Disposal

Residual tank contents were placed into a 55-gallon drum and was then disposed by CEC using a NYSDEC licensed vacuum truck. Appendix 2 shows that Castlton's Work Order 19134 indicates approximately 75 gallons of #2 fuel oil and sludge were removed from the drum. The liquid material was transported to and disposed at Clean water of New York Inc., a licensed disposal facility located in Ossining, NY. The amount of gallons shown on the manifest includes residual waste generated from this site as well as other sites the vacuum truck generated over a period of time.

Backfilling

The excavation was filled to grade with clean overburden and certified fill provided by Van Orden Sand & Gravel, a clean fill supplier located in Ringwood, New Jersey. Appendix 2 contains the backfill receipts.

Subsurface Characteristics

As part of the investigation, the subsurface geology was characterized. Soil encountered during excavation appeared to be similar in type and character. The soil beneath consisted mostly of loam.

4.0 POST EXCAVATION SOIL SAMPLING AND RESULTS

On May 28, 2015 five post excavation composite soil samples were collected. The samples were collected from the sidewalls (N-wall, S-wall, E-wall, W-wall) and floor (Floor) of the excavation. No samples yielded results in accordance with the NYSDEC Standards. The samples were placed into laboratory supplied jars, stored in coolers, and delivered to the laboratory under an appropriate chain-of-custody. The soil samples were analyzed for Volatile Organic Compounds (STARS 8260) and Semi Volatile Compounds (STARS 8270). Figure 1 in Appendix 1, depicts the soil sampling locations associated with the current investigation. Analytical services were performed by Phoenix Environmental Laboratories Inc., of Manchester Connecticut; a NYSDEC certified laboratory (NELAC # 11301). The laboratory report of the post excavation soil samples is included in Appendix 3.

5.0 MANAGEMENT OF EXCAVATED CONTAMINATED SOIL

A composite soil sample was collected from the stockpiled soils and analyzed for waste class parameters. Upon approval 20.79 tons of no. 2 fuel oil impacted soils were transported from the subject property and disposed of at Deep Green of New York, Inc., a licensed petroleum contaminated soil disposal facility, located in New Windsor, New York. The soil disposal receipts are found in Appendix 2.

6.0 CONCLUSIONS

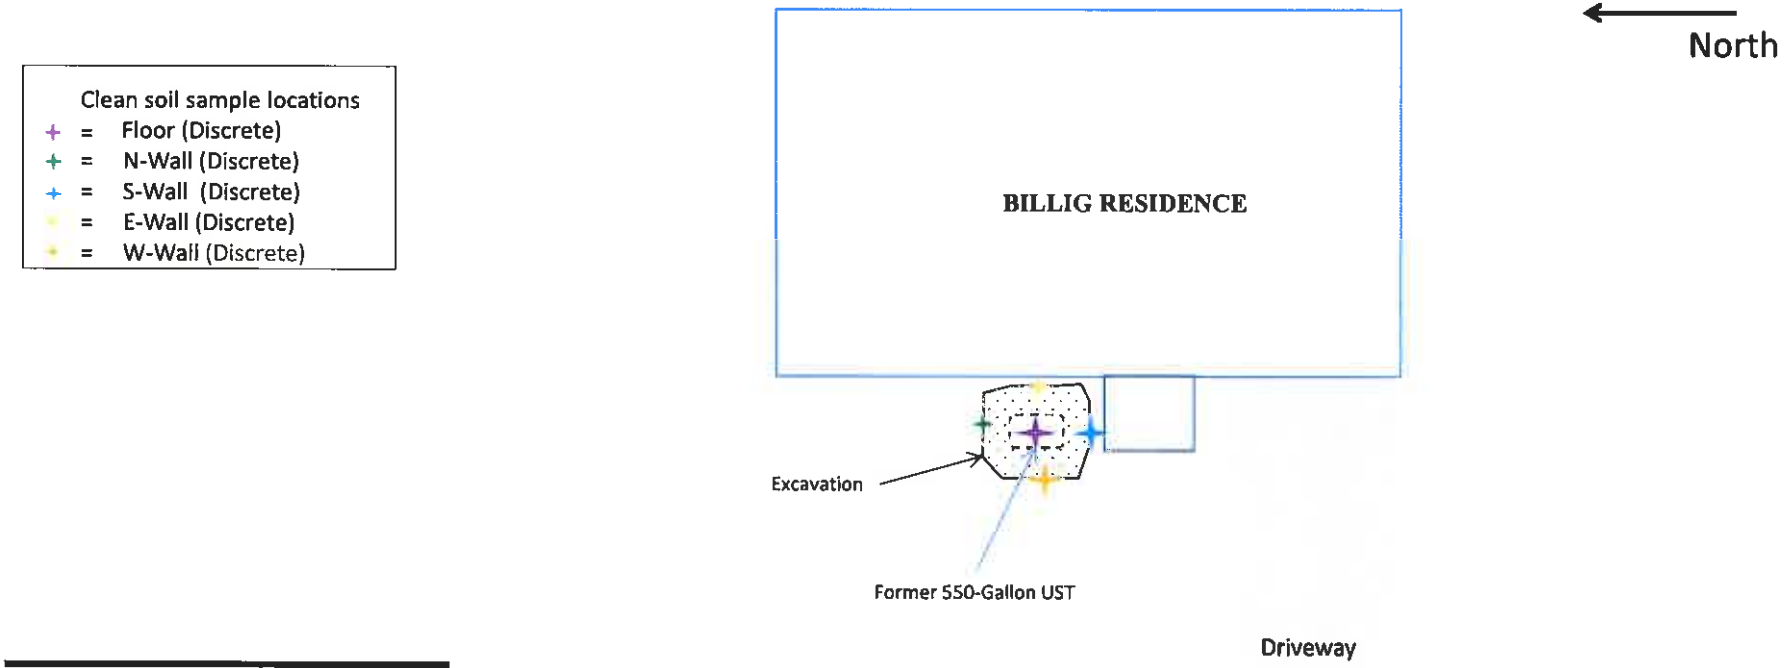

Our investigation revealed that the removed 550-gallon UST, contained holes in the tank upon inspection by CEC. The tank was removed and properly disposed. Fuel oil impacted soils were observed within the base of the UST excavation during the field activities. Upon approval, 20.79 tons of fuel oil impacted soils were removed from the UST excavation and disposed of at Deep Green of New York, Inc., a licensed petroleum contaminated soil disposal facility, located in New Windsor, New York. Three post excavation samples were collected. The laboratory report of the post excavation soil samples is included in Appendix 3. Bedrock was not encountered in the excavation. Groundwater was not encountered during remedial activities. The excavation was filled to grade with clean overburden as well as certified fill provided by Van Orden Sand & Gravel Inc., a certified fill supplier located in Ringwood, New Jersey.

Considering field observations and the laboratory test results previously discussed, Castlton Environmental Contractors recommends that no further remedial action is necessary for this site and therefore request the state to close case No. 15-02074.

Laboratory Report of Post Excavation Soil Sampling

PHOENIX
Environmental Laboratories, Inc.

Tuesday, June 02, 2015

Attn: Mr. Bill Jacobsen
Castlton Environmental Contractors
P.O. Box 609
Nanuet, NY 10954

Project ID: BILLIG
Sample ID#s: BJ23691 - BJ23695

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

Phyllis Shiller

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

Comments:

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

Volatile Comment:
**Surrogate recoveries as well as internal standard responses were outside control limits for volatiles. Sample was analyzed twice with similar results indicating matrix interference.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
This report must not be reproduced except in full as defined by the attached chain of custody.

WCDOH RECORD REQUEST ACKNOWLEDGEMENT 22-100

This is to acknowledge receipt of your Freedom of Information request for records received here on **January 28, 2022** regarding:

- 70 Fernbrook St. - Yonkers, NY 11701

Your request has been assigned this number: 22-100

Although we anticipate providing any records responsive to your request on 3/7/22 *However due to the Pandemic and WCDOH Staffing priority for Covid19 deployment assignments, requests will be taking additional time for responses. Perhaps anywhere between 30 to 60 days. This will remain in effect until further notice as Foil is diligently working to send responses in a timely fashion. Thank You for your patience during this time. - Tonia*

We will contact you when your records are ready.

If you need to communicate with us, please reference the request number indicated above when you email us at FOIL-DOH@WESTCHESTERGOV.COM

Thank You,

Records Request Division on behalf of

Caren Halbfinger
FOIL Officer

Good afternoon Camila,

I am well, thank you and hope all is well with you.

Eric please schedule an appointment to visit the File Room to review the records. https://kiosk.na4.qless.com/kiosk/app/home/201).

We are located at 87 Nepperhan Avenue, adjacent to City Hall.

Please advise if you have any further questions.

Sincerely,

Maria Paulercio
Clerk 1
DHB File Room
914-377-6520

Subject: COY FOIL Request (Water Grant St, Pier St, Yerks Pl) - Fernbrook Park
Importance: High

Good afternoon Maria-

Hope this email finds you well!

PS&S Engineering is conducting a Phase I Environmental Site Assessment on 8 lots located just south of the Domino Sugar Refinery in Yonkers waterfront area:

Lot Address	Section	Block	Lot	Acres	Current Ownership Status
8 Water Grant Street	1	615	1	0.27	Saviano Enterprises, Inc.
8 Water Grant Street	1	615	6	0.19	Saviano Enterprises, Inc.
102 Pier Street	1	615	10	0.45	Saviano Enterprises, Inc.
78 Pier Street	1	615	35.45	0.70	Saviano Enterprises, Inc.
101 Pier Street	1	622	1	0.58	Saviano Enterprises, Inc.
12 Yerks Place	1	622	8	0.20	Saviano Enterprises, Inc.
111 Yerks Place	1	623	1	0.12	Saviano Enterprises, Inc.
9 Water Grant Street	1	623	4	0.44	Saviano Enterprises, Inc.

Please assist us in obtaining facility/building records for the above-mentioned lots related to the following:

- presence of underground storage tanks (UST) or above storage tanks (AST);
- the petroleum bulk storage (PBS) facility certificate/records
- tank abandonment/ removal records
- spills or releases of petroleum products or hazardous materials or chemical materials storage on-site
- Fire records
- Building decommissioning permit /reports
- Site Plans / Surveys

Site Location Map:

Eric Stucker, from PS&S and cc'ed here, will be available to review City records at City Hall. Please let Eric know when is a good day to stop by and/or if we need to make an appointment via https://kiosk.na4.qless.com/kiosk/app/home/201).

Best regards,

Camila Israel

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PS&S Engineering were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 1568-4C21-890E

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

PS&S Engineering (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by PS&S Engineering were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 09021-1820
Project: Fernbrook Park Phase 1

Coordinates:

Latitude:	40.923509 40° 55' 25" North
Longitude:	-73.907468 -73° 54' 27" West
UTM Zone:	Zone 18 North
UTM X Meters:	591990.56
UTM Y Meters:	4530840.44
Elevation:	-1.00' below sea level

Maps Provided:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Additional projects may be added at end of document.

	Eric D. Stucker, PE
	Designer III
	Environmental Services
	Introduction (select ONE)
☒	Mr. Stucker is a licensed Professional Engineer who provides civil and environmental engineering, environmental permitting services, and project management support for various remediation, and site development projects. He has a background in remediation work and construction oversight, including event organization and client interaction, and work with agencies in New York City and Long Island to acquire permitting for site development projects. He is also proficient in CAD and is certified in community noise enforcement training and is proficient in SoundPlan.
☐	
	Relevant Experience (select all appropriate, set order with pull-down if desired)
☐ ORDER	(Atlantic City Electric) Confidential Utility Client, Noise Assessment– Washington Township, NJ: Evaluated state and local ordinances regarding noise sources and scheduled subsequent on-site noise assessments. Evaluated data and modeled potential noise impacts to nearby receptors, using SoundPlan 5.0 modeling software. Generated a report detailing potential noise impacts from client activities on adjacent receptors and coordinated with Client on potential noise abatement measures.
☐ ORDER	(City of Yonkers, Department of Public Works) Public Municipality, Remedial Monitoring Program– Yonkers, NY: Performed work related to an NYSDEC-managed remedial program for historic on-site petroleum spills. Performed excavation/remediation oversight including material tracking of imports/exports, tracking of water pumping, treatment, and discharge activities, and documentation of daily site activities. Also performed quarterly low-flow groundwater sampling and monthly/quarterly SPDES stormwater sampling.
☐ ORDER	(Conifer Realty, LLC) Confidential Developer Client, Phase 1 Environmental Site Assessment – Port Jefferson, NY: Managed the development of Phase 1 Environmental Site Assessment for site development at a mixed-use property. Work included ordering and analyzing historical and adjacent site info from EDR, submitting FOIL requests to relevant agencies and municipalities, performing site reconnaissance, and drafting the report for submittal to the client.
☐ ORDER	(Conifer Realty, LLC) Confidential Developer Client, Phase 1 Environmental Site Assessment and Phase 2 Investigation – Yonkers, NY: Managed the development of Phase 1 Environmental Site Assessment for site development one multiple properties in Yonkers, NY. Work included ordering and analyzing historical and adjacent site info from EDR, submitting FOIL requests to relevant agencies and municipalities, performing site reconnaissance, and drafting the report for submittal to the client. Phase 2 investigation included overseeing soil borings and temporary well installation for soil and groundwater sampling, as well as reporting of Phase 2 investigation findings to the Client.
☐ ORDER	(Conifer) Confidential Real Estate Client – Chappaqua, NY: Performed regular environmental work in compliance for the Site Management Plan (SMP) at an existing DEC Brownfield Site. Work includes quarterly gauging of LNAPL, semi-annual groundwater sampling, and one sub-slab vapor sampling event.

		Performed report drafting for regular events and data management, including EDD submittal to NYSDEC.
	☐ ORDER	Eversource, South Fork / Sunrise Wind Landfall Pre-Construction Programs – Shirley / East Hampton, NY : Acted as on-site Construction Lead for various pre-construction activities for landfall of offshore wind projects, including geotechnical and environmental borings, temporary well installation, bat surveys, and sawcut/utility markouts. Also certified to work within MTA right-of-way for some phases of work. Included oversight and daily reporting for site activities, and public relations/documentation of interactions with local residents.
	☐ ORDER	Harvard University, Building Construction – Allston, MA*: Engineering Staff responsible as a field representative for activities involved with construction and pipe installation for a new building. Oversaw asbestos abatement, soil excavation and shipment off-site and general construction activities including slurry wall removal and fence installation Performed soil sampling for TPH and heavy metal contaminants and performed soil characterization of test pits on site. Regularly coordinated with site personnel to complete daily air sampling, dewatering, and other activities. Was responsible for professional interaction with the client and other representatives on site as well as for submitting detailed daily reports.
	☐ ORDER	Lockheed Martin, Corp., Recharge Basin Stabilization Project– Lake Success, NY: Provided both civil and environmental construction oversight for the restoration/construction of a new recharge basin including headwall and retaining wall construction, manhole installation, and site regrading. Oversaw implementation of work in accordance with the approved plans, documented and tracked material import and export, performed soil and disposal characterization sampling, operated air monitoring stations including Rae Systems MiniRae 3000 photoionization detector (PID) and TSI DustTrak II Aerosol Monitor 8532, and drafted daily and weekly progress reports throughout the length of the Project.
	☐ ORDER	Massachusetts Port Authority, Logan Airport Inspections – Boston, MA*: Engineering Staff responsible for the performance of regular NPDES and SWPPP inspections requiring low-flow and bottle sampling of site outfalls, as well as measurements of flow and water quality parameters using a YSI. Assisted in writing reports and managing data for regular sampling events. Required training for and maintenance of security clearance to access the site.
	☐ ORDER	(PSEG Long Island) Confidential Utility Client, General Wetland Permit Compliance – Various Nassau and Suffolk County Locations, NY: Prepared reports for an on-call contract for scope of work involving the preparation of Notices of Commencement (NOCs) and Notices of Termination (NOT) for NYSDEC review to show compliance with PSEG Long Island General Wetland Permit for electric distribution projects located in tidal and freshwater wetlands and regulated adjacent areas. Conducted pre- and post-excavation field survey and construction-phase permit compliance inspection program relative to the compliance program as well as NOC and NOT report production.
	☐ ORDER	(PSEG Long Island) Confidential Utility Client, Greenport to Shelter Island 13 kV Feeder – Greenport, NY: Performed construction-phase field oversight to assure compliance with NYSDEC and USACE permit conditions associated with a horizontal-directional drill (HDD) across the Peconic Bay and subsequent trenching and installation work, including work within wetland and tidal areas. Performed Managed inadvertent returns associated with HDD. Also operated and maintained the following instruments for air monitoring: Rae Systems MiniRae 3000 photoionization detector (PID), TSI DustTrak II Aerosol Monitor 8532, 3M SoundPro Datalogging Octave TRA noise monitor and White Industrial

		Seismology Mini-Seismograph to ensure that construction activities had minimal adverse effect on the local community.
	☐ ORDER	(PSEG Long Island) Confidential Utility Client, Kings Highway Substation – Hauppauge, NY: Performed weekly Stormwater Pollution Prevention Plan (SWPPP) inspections as a NYSDEC-qualified inspector for a proposed substation facility. These SWPPP inspections ensured all erosion and sediment control practices were maintained in accordance with the SPDES General Permit for Stormwater Discharges from Construction Activity (GP-0-15-002). Prepared weekly inspection reports that detailed erosion and sediment control practices that needed to be improved or rectified by the contractor.
	☐ ORDER	(PSEG Long Island) Confidential Utility Client, Lindbergh Substation – Garden City, NY: Performed weekly Stormwater Pollution Prevention Plan (SWPPP) inspections as a NYSDEC-qualified inspector for a proposed substation facility and associated off-site activities including overhead pole installation, feeder installation, and associated clearing and revegetation of work areas. These SWPPP inspections ensured all erosion and sediment control practices were maintained in accordance with the SPDES General Permit for Stormwater Discharges from Construction Activity (GP-0-15-002). Prepared weekly inspection reports that detailed erosion and sediment control practices that needed to be improved or rectified by the contractor.
	☐ ORDER	(PSEG Long Island) Confidential Utility Client, Noise Assessment– Various Nassau and Suffolk County Locations, NY: Evaluated state and local ordinances regarding noise sources and performed subsequent on-site noise assessments. Modeled potential noise impacts to nearby receptors, using SoundPlan 5.0 modeling software. Generated a report detailing potential noise impacts from client activities on adjacent receptors.
	☐ ORDER	(PSEG Long Island) Confidential Utility Client, Western Nassau Transmission Project – Long Island, NY: Performed field reconnaissance, FOIL requests, NYSDEC database research, and data tracking and report writing activities for Phase 1 work related to the Article VII approval work for an underground 138kV substation connection. Acted as construction lead for Phase 2 assessments of environmental impacts from work along the Project Route, with activities including field oversight, preliminary groundwater and soil sampling, dewatering permitting, waste characterization for disposal alternatives, and subsequent report writing and data management.
	☐ ORDER	(RXR) Confidential Real Estate Client, SWPPP Inspector – Glen Cove, NY: Performed weekly Stormwater Pollution Prevention Plan (SWPPP) inspections as a NYSDEC-qualified inspector for a proposed mixed-use development. These SWPPP inspections ensured all erosion and sediment control practices were maintained in accordance with the SPDES General Permit for Stormwater Discharges from Construction Activity (GP-0-15-002). Prepared weekly inspection reports that detailed erosion and sediment control practices that needed to be improved or rectified by the contractor.
	☐ ORDER	(Wellington Chestnut, LLC) Confidential Developer Client, Phase 1 Environmental Site Assessment – Liberty, NY: Managed the development of Phase 1 Environmental Site Assessment for site development at a mixed-use property. Work included ordering and analyzing historical and adjacent site info from EDR, submitting FOIL requests to relevant agencies and municipalities, performing site reconnaissance, and drafting the report for submittal to the client.

	☐ ORDER	(Westchester County Department of Environmental Facilities) Public Client, Stormwater Monitoring– Westchester County, NY: Organized and performed quarterly, and semi-annual stormwater compliance monitoring at several transfer stations across the county, as well as annual inspections of the facilities. Coordinated sample collection with the Client and submitted quarterly, semi-annual, and annual reports of the results of the monitoring program.

Marissa Magura

Scientist III

Environmental Services

Education

College or University: M.S., Environmental Studies, Adelphi University Garden City, NY/2011

B.S., Biology/Environmental Science Minor, Quinnipiac University, Hamden, CT/2009

Credentials

OSHA 40-Hour HAZWOPER

OSHA 8hr. HAZWOPER Health & Safety Annual Refresher, through 2021

NJDEP Environmental Air Compliance Auditor

Affiliations

American Standard Testing and Materials (ASTM) 50.05 Environmental Committee Member, Task Group E1527 Revision, 2018-Present

NJDEP Air Quality Industrial Stakeholders Group Rep.

Ms. Magura is a skilled Environmental Scientist with over ten (10) years of professional experience in the environmental field with a diverse background in consulting services and ecological management services for the State of New Jersey. Ms. Magura's current responsibilities are focused on environmental facility compliance services including management of environmental permits and applications in the Title V and NJDEP Air Programs, NJPDES Program, Drinking Water, Wastewater, and Stormwater Programs permits, and the SPCC Program. Ms. Magura's current and previous projects range from landfills, sewage treatment plants, medical facilities, department of public works, natural gas pipelines, and a variety of industrial and commercial properties. Ms. Magura is an environmental professional in accordance with ASTM E1527 standards, for completion of Phase I Environmental Site Assessments and has obtained eight (8) years of Phase I ESA experience. Ms. Magura also completes Preliminary Assessments in accordance with N.J.A.C. 7:26E, for a variety of public and private entities.

Relevant Experience

Due Diligence Services – New Jersey: Experienced environmental professional in preparing and submitting Preliminary Site Assessments (PAs) in accordance with N.J.A.C. 7:26E-3.1(c)1 and Environmental Phase I Site Assessments (ESAs) in accordance with ASTM E1527. Duties include site assessments, technical report authoring, review of technical reports, completion of NJDEP forms, identification of contaminated areas of concern, and recommendations.

Phase I Environmental Site Assessments - Tri-State Area: Provided environmental due diligence services through Phase I Environmental Assessments. Services included on-site inspections of facilities, authoring technical reports, open record requests, review of technical environmental reports, review of environmental database listings, historical information, completion of figures and supporting documentation, use of GIS to evaluate potential on-site contamination impacts, evaluation of on-site environmental impacts and providing recommendations. Types of facilities ranged from industrial facilities, multi-family buildings, commercial complexes, retail, and vacant lots. Clients at PS&S also included PSEG and Atlantic City Electric for substation properties.

Environmental Joint Insurance Fund – New Jersey: Responsibilities included providing environmental loss prevention & risk control services for a Municipal Environmental insurance provider. Services included multi-phase facility auditing, storage tank compliance, USEPA SPCC guidance, environmental emergency response, continuing education, data management, and due diligence services.

Bayshore Regional Sewerage Authority (BRSA) - Keyport, NJ: Currently serves as BRSA's Environmental Consultant for Title V air permitting and compliance services. Provides technical guidance in support of BRSA's power resiliency program including the selection of new natural gas emergency generators to be permitted for on-demand services with the power grid. The process includes selection or design of equipment with the applicable SOTA requirements, SCR for NOX reductions, and control technologies to allow for optimal running of equipment to satisfy client objectives. Supporting tasks include a health risk assessment for HAPs and modification of the Title V Operating Permit. PS&S also obtained three general operating permits for natural gas emergency generators.

Borgata Hotel Casino (Atlantic City Municipal Landfill) – Atlantic City, NJ: Responsible for the air permitting compliance of the active and passive landfill gas vent systems operating at the Borgata Atlantic City site located on the former Atlantic City Municipal Landfill. Performed bi-annual landfill gas sampling and screening survey in accordance with permit

to identify the composition of methane, NMOCs, HAPs, air toxics, and measurements of gas. The landfill gas monitoring included using a screening instrumentation for the active and passive vents and integrated summa canisters. Tasks included data analysis, calculation of annual emissions, preparation and submission of reports to the NJDEP, and coordination of services.

Carrier Clinic Wastewater Treatment Plant - NJ: PS&S currently serves as the Engineer providing Water Engineering, Treatment System Upgrade Designs, and NJPDES permit management. Compliance duties include permit management, coordination of sampling, data analysis, preparation and submittal of monthly and annual Discharge Monitoring Reports (DMRs) and sludge reports, and reporting of exceedances. Supporting duties include compliance support and preparation and submittal of Affirmative Defenses.

Monmouth County Air Compliance –Professional Engineer for NJDEP air permit services. Manage air permitting services for facilities with active fueling systems, emergency generators, boilers, fire pumps, and other applicable equipment across 30 minor facilities. Supporting tasks include compliance inspections, NOV support, preparation and submittal of air permits, renewals, and review of equipment.

Musconetcong Sewerage Authority – Air Compliance Services: Prepared and submitted a NJDEP preconstruction permit for a new source operation of a sludge management building through RADIUS in response to a Notice of Violation (NOV); supervised two subconsultants to develop emission rates for Hydrogen Sulfide (H2S) at three locations, prepared a protocol, and modeling report; reviewed and submitted the protocol and modeling report; acted as liaison between the NJDEP and MSA; negotiated the final terms of the permit compliance plan before the final permit was issued to MSA and the NOV was subsequently closed. PS&S worked with the NJDEP to avoid costly emission control equipment. PS&S continues to manage the permit compliance plan in accordance with the schedule.

Appendix L

User Questionnaire

ASTM E 1527-13 User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must conduct the following inquires required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 3.12.31. These inquires must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional.* Failure to conduct these inquires could result in a determination that "*all appropriate inquires"* is not complete**.**

Site Name/Address: _See attached sheet (Back Page)_____

Person Interviewed/Title:_____Date:_____

If known, when was the property initially developed?_____

If different, when were the current building(s) on the property constructed?_____

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25).

Are you aware of any environmental liens filed or recorded against the property under federal, tribal, state or local law?
NOTE - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

Yes☐ No☐ If you answer yes, please include an explanation in the space provided below:

_____

_____

_____

_____

2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and
vi)).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes☐ No☐ If you answer yes, please include an explanation in the space provided below:

_____

_____

_____

_____

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes☐ No☐ If you answer yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes☐ No☐ If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the property?

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the property?

Yes☐ No☐

(b.) Do you know of specific chemicals that are present or once were present at the property?

Yes☐ No☐

(c.) Do you know of spills or other chemical releases that have taken place at the property?

Yes☐ No☐

(d.) Do you know of any environmental cleanups that have taken place at the property?

Yes☐ No☐

If you answered yes to any of the questions above, please include an explanation in the space provided below:

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the *property*?

Yes☐ No☐ If you answer yes, please include an explanation in the space provided below:

_____

_____

_____

_____

Please provide the following property contact information:

Property Owner: _____ Phone Number: _____

The Pure Oil Co.,
420 Lexington Ave.,
New York City.

Dear Sir:

We cannot approve your canopy as same must be computed as required by Section #25, par.3, of the Building Code, which reads as follows:

"Roof Loads. Every roof hereafter erected shall be proportioned to bear safely a live load of 40 pounds per square foot of surface when the pitch of such roof is twenty degrees or less, with the horizontal, and thirty pounds per square foot measured on a horizontal plane, when the pitch is more than twenty degrees."

Very truly yours,

ZONE: "I"

Dear Sir:

An inspection of the above mentioned premises made on May 20, 1999 at 2:00 p.m. by Jamal Marji, Building Inspector, reveals the following conditions existing thereat:

Operating a used car lot without a Certificate of Occupancy (Y.F.&B.C. 56-15 A, G.O. #39-1970 and Y.Z.O. Sec. 43-105 A, Y.F.&B.C. 56-40 A, G.O. #39-1970 and Y.Z.O. Sec. 43-106 A(1) and Y.F.&B.C. 56-45, G.O. #39-1970 and Y.Z.O. Sec. 43-19 Tables 1-6).

56-15 A. Yonkers Fire and Building Code. Building Permits - No person, owner, builder, tenant or contractor shall commence the construction, enlargement, alteration or improvement - without first having obtained a building permit.

56-40 A. Yonkers Fire and Building Code. Certificate of Occupancy. No building erected or altered subject to N.Y. Uniform Code or the Yonkers Fire and Building Code shall be occupied or used until a Certificate of Occupancy is issued.

56-45. Yonkers Fire and Building Code. Change of Occupancy. No change of occupancy or use shall be made in any building or part thereof, hereafter erected or altered, that is not consistent with the last issued certificate of occupancy. In the case of any now existing building, no change of occupancy shall be made unless a certificate is issued by the Department to the effect that the building conforms to the N.Y. Uniform Code, Y.F. & B.C. and the zoning requirements regarding occupancy and use.

You are hereby directed to correct the above violation by June 11, 1999. A reinspection is scheduled to be made on that date, at which time we trust these violations will be removed. Should the violations be removed prior to the indicated date,

please advise this Division so that the violations may be removed from our records.

Failure to comply will result in further appropriate action including legal action, which may result in a fine of up to $1,000 per day.

Should you have any questions, feel free to contact Jamal Marji, Building Inspector by calling 377-6524 during the hours of 9-10 A.M. and 4-4:30 P.M., Monday thru Friday.

Very truly yours,

SR. BUILDING INSPECTOR

RE: 12 Yerks Place
Block 622, Lot 8
ZONE: "I"

Dear Sir:

You are herewith directed to appear in the 5th floor office, Department of Buildings, 87 Nepperhan Avenue, for a hearing with James Hannigan, Sr. Building Inspector, on June 24, 1999 at 9:30 a.m.

The purpose of this hearing is to discuss notice of violation dated May 21, 1999, with regards to operating auto repair shop without a building permit and occupying without a Certificate of Occupancy, a copy of which is attached.

Very truly yours,

SR. BUILDING INSPECTOR

RE: 12 Yerks Place
Block 622, Lot 8
ZONE: "I"

Dear Sir:

An inspection of the above mentioned premises made on May 20, 1999 at 2:00 p.m. by Jamal Marji, Building Inspector, reveals the following conditions existing thereat:

Operating auto repair shop without a building permit and occupying without a Certificate of Occupancy (Y.F.&B.C. 56-15 A, G.O. #39-1970 and Y.Z.O. Sec. 43-105 A and Y.F.&B.C. 56-40 A, G.O. #39-1970 and Y.Z.O. Sec. 43-106 A(1)).

56-15 A. Yonkers Fire and Building Code. Building Permits - No person, owner, builder, tenant or contractor shall commence the construction, enlargement, alteration or improvement - without first having obtained a building permit.

56-40 A. Yonkers Fire and Building Code. Certificate of Occupancy. No building erected or altered subject to N.Y. Uniform Code or the Yonkers Fire and Building Code shall be occupied or used until a Certificate of Occupancy is issued.

You are hereby directed to correct the above violation by June 11, 1999. A reinspection is scheduled to be made on that date, at which time we trust these violations will be removed. Should the violations be removed prior to the indicated date, please advise this Division so that the violations may be removed from our records.

Failure to comply will result in further appropriate action including legal action, which may result in a fine of up to $1,000 per day.

Should you have any questions, feel free to contact Jamal Marji, Building Inspector by calling 377-6529 during the hours of 9-10 A.M. and 4-4:30 P.M., Monday thru Friday.

Very truly yours,

SR. BUILDING INSPECTOR

Re: Gulf Oil Company
New Installation
Ludlow Dock
Yonkers, N. Y.

Dear Mr. Balint;

In regards to the above new installation please be advised that same has the approval of this office as long as they comply with the plans submitted and also comply with the standards set forth by the Board of Fire Underwriters which they have been advised of.

Trust that this is the information you desired, I am,

Yours very truly,

Joseph E. Blatzheim
