1.0 PROJECT SUMMARY

SESI Consulting Engineers (SESI), at the request of GSD Urban Solutions LLC dba MSquared (User) has conducted a Phase I Environmental Site Assessment (ESA) for the Subject Property located at 22-24 South Water Street, Peekskill, Westchester County, New York (herein referred to as the "Subject Property"). The Subject Property is identified on local tax maps by Tax IDs 32.12-2-3 and 32.12-2-4. A tax map is included on **Figure 1.1.** A Subject Property Location Map is included on **Figure 1.2.** The Subject Property is composed of an approximately 0.89-acre lot that has been improved with an asphalt parking lot. A Subject Property Plan is included on **Figure 1.3.**

The objective of this ESA is to identify the presence or likely presence, use or release on the Subject Property of hazardous substances or petroleum products as defined in the American Standard of Testing and Materials (ASTM) E1527-21 as a Recognized Environmental Condition (REC). In addition, Business Environmental Risks (BERs), Controlled Recognized Environmental Conditions (CRECs), and Historical Recognized Environmental Conditions (HRECs) were identified, if present.

The following RECs have been identified:

- **REC 1 – Historic Fire Brick Manufacturing Operations:** Based on a review of Sanborn Map records, historic fire brick manufacturing operations began as early as 1887 and continued until at least 1942. Such operations are commonly associated with potential environmental impacts, including the use of raw materials, fuels, and additives that may contribute to releases of metals, polycyclic aromatic hydrocarbons (PAHs), and other combustion-related byproducts to soil and groundwater. Investigation of historic operations was conducted during SESI's 2026 Phase II sampling events. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 1.**

- **REC 2 – Historic Coal Storage Area:** Based on a review of Sanborn Map records, historic coal storage was documented in 1887, and the historic fire brick manufacturing facility was noted to use coal as a fuel source until at least 1932. Historic coal storage and handling areas are commonly associated with potential environmental impacts, including releases of coal ash, cinders, and related byproducts that may contain metals and PAHs.

Investigation of the historic coal storage area was conducted during SESI's 2026 Phase II sampling events. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 2.**

- **REC 3 – Historic Fill:** A review of historical topographic maps indicates that areas immediately west of the Site were subject to filling activities between approximately 1901 and 1936. Findings from the 2026 Phase II investigation identified the presence of contaminants in Site soils consistent with historic fill material. Soil conditions within the borings consisted of fill material (asphalt millings, brick, concrete, coal) at depths ranging from approximately 1.0 to 11.0 ft-bgs. Historic fill is commonly associated with urban and industrial development and may include ash, cinders, demolition debris, and other anthropogenic materials that can contain metals, PAHs, and other contaminants. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 3.**

- **REC 4 - NY SPILL No. 0507823**: One incident, identified as "City Parking Lot" (Spill No. 0507823), was reported in the NY SPILL database due to petroleum contamination of unknown origin detected in soil borings during a historical site investigation. No additional details were available for this listing. Investigation of side wide subsurface conditions was conducted during SESI's 2026 Phase II sampling events. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 4.**

- **REC 5 – Confirmed Soil, Groundwater and Soil Vapor Contamination**: Based on findings from SESI's 2026 Phase II investigation, soil, groundwater, and soil vapor contamination were confirmed at the Site. Soil analytical results identified acetone and metals at concentrations exceeding the New York State Department of Environmental Conservation (NYSDEC) Soil Cleanup Objectives (SCOs). Groundwater sampling detected semi-volatile organic compounds (SVOCs), metals, and per- and polyfluoroalkyl substances (PFAS) at concentrations above NYSDEC Ambient Water Quality Standards (AWQS). Additionally, volatile organic compounds (VOCs), specifically heptane and hexane, were detected in soil vapor at concentrations exceeding the New York State Department of Health (NYSDOH) lower and upper guidance values, respectively. An

application will be submitted to enroll the Site in the NYSDEC Brownfield Cleanup Program (BCP). **Participation in the BCP will involve further investigation to delineate the extent of contamination and the implementation of appropriate remedial actions to address identified impacts across the Site.**

- **REC 6 – Adjacent Railroad Operations**: The Metro-North Railroad Hudson Line has been located immediately west of the Site since at least 1887. The nearest station, Peekskill Station, is approximately 550 feet southwest of the Site. Railroad operations are commonly associated with potential environmental concerns, including the use and handling of fuels, lubricants, herbicides, and historic materials such as creosote-treated railroad ties, which may contribute to releases of petroleum hydrocarbons, metals, and PAHs to adjacent properties. Given the proximity of the active rail corridor, there is a potential for migration of contaminants onto the Site via surface runoff, groundwater flow, or historical fill placement. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 6.**

The following BERs were identified:

- **BER 1 – Waste Disposal Area**: During the Site inspection, the shed structure in the northwestern corner of the Site was utilized as a waste disposal area for the north adjacent property operating as a bakery. Eight (8) general waste and cardboard dumpsters were observed in and around the structure. **Based on the nature of the waste in the containers and lack of evidence of release, no further investigation is required.**

SESI did not identify any CRECs or HRECs. The RECs and BERs are discussed further in **Section 10.0** of this Report.

2.0 INTRODUCTION

2.1. PURPOSE

The purpose of this study is to determine the RECs at the Subject Property for due diligence purposes related to the potential acquisition of the Subject Property.

SESI has developed this Phase I ESA Report on behalf of the User. It has been developed in substantial conformance with the ASTM's International Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-21. According to ASTM E1527-21, the following conditions were identified during this assessment:

Recognized Environmental Condition (REC) – "(1) the presence of hazardous substances or petroleum products in, on, or at the property due to release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the property due to a release or likely to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition."

Controlled Recognized Environmental Condition (CREC) – "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority."

Historical Recognized Environmental Condition (HREC) – "A past release that has been remediated to below residential standards and given regulatory closure with no use restrictions."

Business Environmental Risk (BER) – "A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate and is not an issue required to be investigated under this practice."

2.2. SCOPE OF SERVICES

The scope of this assessment consisted of the following general tasks: a records review; a Subject Property visit; interviews with present and past owners, operators, and occupants to the extent possible; and preparation of this ESA report. Specific tasks that were conducted included the following:

- A review of environmental databases maintained by the United States Environmental Protection Agency (USEPA) and state and local agencies within the minimum search distance. Environmental Data Resources, Inc. (EDR) prepares environmental databases used in these assessments.
- A Subject Property reconnaissance to observe conditions and to assess the Subject Property location with respect to adjoining and surrounding property uses, types of development, topography, natural surface features, roadways, railroad lines and right-of-ways to identify obvious potential environmental conditions on neighboring properties.

Per ASTM E1527-21, questionnaires were provided to the User (Client), and Owner to obtain information related to the Subject Property.

2.3. SIGNIFICANT ASSUMPTIONS

Information obtained by SESI and by third parties is assumed to be accurate and/or true. SESI makes no warranty, either implied or expressed, regarding the accuracy or validity of information supplied by others.

2.4. LIMITATIONS/METHODOLOGY/RELEVANCE

This ESA was prepared for the exclusive use of GSD Urban Solutions LLC dba MSquared, its affiliates and lenders. During the assessment, methodologies were used that conform to generally accepted practices for this type of work. The scope and character of the environmental assessment were, in professional judgment, sufficient to justify the stated conclusions, after giving due consideration to the purpose of the investigation, the data reviewed, the background history of the Subject Property as found in historical records, and visual observation of the Subject Property. No other investigation was performed other than that which is expressly noted in this Report.

This ESA was performed in accordance with ASTM E1527-21 and is subject to reasonable limits of time and cost and is intended to reduce but not eliminate uncertainty regarding the potential for RECs in connection with a property. Sampling and laboratory analysis are required to determine if soil, surface water, groundwater, air, and construction materials have been impacted by a contaminant.

The information presented in this ESA was obtained during the Subject Property reconnaissance and from the Client, representatives of the Client, current/former property owner(s) or tenants, Federal, State, County and Local Officials, and available mapped information obtained by SESI. SESI does not certify the accuracy of the information received from outside sources.

This ESA should be used in its entirety. Use of portions of this ESA may nullify the information and/or conclusions of this ESA. Subject Property observations discussed herein apply to Subject Property conditions as observed during Subject Property reconnaissance only. The conclusions of this ESA do not apply to conditions that were unavailable for inspection and could not be evaluated.

SESI does not certify that the Subject Property is contaminant free and this ESA does not serve as a warranty. SESI's investigation was performed within the time frame requested by the client.

The activities to conduct this ESA did not include sampling and analyses of soil, surface water, groundwater, air, or construction materials unless expressed otherwise and requested by the client. Formal wetland, asbestos, mold, and/or radon evaluations were not performed and are not within the scope of work for an ESA. If additional services including underground storage tank (UST) testing, construction materials testing, or environmental sampling (soil, surface water, groundwater, air) are recommended, the results and conclusions for these tests will be provided under separate cover.

2.5. DISCLAIMER

This ESA was prepared by SESI for the sole and exclusive use of GSD Urban Solutions LLC dba MSquared. Nothing under the Agreement between SESI and the User shall be construed to give any rights or benefits to anyone other than the User and SESI, and all duties and responsibilities undertaken pursuant to the Agreement will be for the sole and exclusive benefit of the User and SESI and not for the benefit of any other party. SESI does not intend, without its written consent, for this ESA to be disseminated to anyone other than the User, or to be used or relied upon by anyone other than the User. Use of the ESA by any other person is unauthorized and such use is at their sole risk.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1. LOCATION/STRUCTURES/LEGAL DESCRIPTION

The Subject Property consists of two (2) parcels identified on tax map records as Tax IDs 32.12-2-3 and 32.12-2-4 and located at 22-24 South Water Street, Peekskill, Westchester County, New York. The Site is approximately 0.89-acres and improved by an asphalt parking lot used as public parking for nearby commercial businesses and public transportation. The parking lot is identified as the City of Peekskill "Lot C". **Figure 1.2** provides a Subject Property Location Map. A Subject Property Plan is shown on **Figure 1.3.**

The Subject Property is proposed to be redeveloped with a multi-family residential building of which minimum of 50% of units will be affordable.

3.2. SUBJECT PROPERTY AND VICINITY CHARACTERISTICS

The Subject Property is located within Peekskill Zoning District W-F2 (Waterfront Inland), which includes various commercial properties as well as several multi-family housing units. The closest notable surface water body is the Hudson River located approximately 500 feet west of the Subject Property.

3.3. CURRENT USE OF THE PROPERTY

The Subject Property is currently utilized for public parking and is identified as the City of Peekskill "Lot C". The Subject Property is owned by the City of Peekskill.

3.4. DESCRIPTION OF STRUCTURES/ROADS/AND SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is an irregular-shaped approximately 0.89-acre property developed as an asphalt parking lot utilized for automotive parking. The Site is not developed with any structures, with the exception of one (1) shed in the northwestern corner of the Site, which is utilized by the north-adjacent business for dumpster storage.

3.5. CURRENT USES OF ADJOINING PROPERTIES

The Subject Property is bound to the north by commercial businesses (Homestyle Desserts & Creamery), to the west by a rail line (New York Central Railroad) followed by Riverfront Park, to the south by West Street followed by commercial storefronts (Dylan's Wine Cellar, Home on the

Hudson), and to the east by South Water Street followed by multi-family residential housing, commercial storefronts (Peekskill Brewery, Nunzio Tailor & Cleaners), vacant lots and asphalt parking lots. A summary of the uses of the adjacent properties is shown on **Table 3.1** below.

Table 3.1—Adjacent Property Uses

Direction	Adjacent Property Use
North	Commercial
South	Commercial
East	South Water Street, Commercial, Vacant Lot, Parking Lots
West	Railroad

4.0 USER PROVIDED INFORMATION

4.1. TITLE INFORMATION

Title information for the Subject Property was not available for SESI to review.

4.2. ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

SESI did not find any information regarding environmental liens or activity and use limitations.

4.3. SPECIALIZED KNOWLEDGE/OTHER USER PROVIDED INFORMATION

SESI was not provided with previous environmental reports regarding the Subject Property. If previous environmental documents are provided to SESI at a later date and are identified to have an impact on the findings and recommendations of this Report, a new Report will be issued to include these findings.

4.3.1. INTERVIEWS

SESI conducted interviews with operators of the subject in an effort to acquire pertinent information relating to current and historic Subject Property conditions and these interviews are summarized below.

Name: Samuel Warden-Hertz
Company Name: City of Peekskill
Date and Time of Interview: January 9, 2026
Type of Interview: User Questionnaire

Samuel Warden-Hertz, a planner for the City of Peekskill, completed the User Questionnaire for the Site. Information obtained from this interview, questionnaire and Subject Property inspection is integrated in this Phase I ESA. A completed User Questionnaire is presented as **Appendix B**.

4.4. COMMONLY KNOWN OR REASONABLY ASCERTAINABLE RECORDS

SESI completed a review of publicly available New York State Department of Environmental Conservation (NYSDEC) mapping and database systems and the United States Environmental Protection Agency (USEPA) database system as part of this Report to determine the environmental conditions at the Subject Property and adjacent properties. According to the NYSDEC database, no environmental sites of concern were identified. Based on our review, it

was determined that railroad operations west of the Subject Property have the potential to impact the Subject Property. Additional investigation in this portion of the Subject Property is warranted to assess subsurface soil conditions and potential migration of off-site contamination.

4.5. VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The Report User indicated no knowledge of any valuation reduction related to environmental concerns

4.6. OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The Subject Property parcels are currently owned by the City of Peekskill and utilized as a municipal commuter public parking lot identified as “Lot C”.

5.0 RECORDS REVIEW

5.1. STANDARD ENVIRONMENTAL RECORD SOURCES: FEDERAL, CITY, STATE

5.1.1. EDR SEARCH

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR) and reported in the EDR Radius Map Report with GeoCheck. The Report meets the government records search requirements of ASTM Standard of Practice for Environmental Site Assessments, E-1527-21. Search distances are per ASTM standards. A Radius Map Check was performed by EDR and is provided in **Appendix A.** All properties in the search area with environmental records are listed below:

Table 5.1—Property Listings

Environmental Listing	Subject Property	0- 1/8 Miles	1/8 - 1/4 Miles	1/4 - 1/2 Miles	1/2 -1 Mile

The EDR Radius Map Report identified the Subject Property in the following listings:

NY SPILLS

NY SPILLS are facilities that have documented releases/spills associated with either petroleum bulk storage or chemical bulk storage at their facilities. The facilities listed in the NY Spill database include documented spills as of April 1, 1986, as well as spills occurring since this date. According to the NY SPILLS database records provided by EDR, two (2) spill incidents are listed in association with the subject property. One incident, identified as "City Parking Lot" (Spill No. 0507823), was reported due to petroleum contamination of unknown origin detected in soil borings during a historical site investigation. No additional details were available for this listing. Based on the documented presence of petroleum-impacted soil and the unidentified source, this condition is considered a REC and is identified as **REC-4**. The second spill listing (NY Spill 1106148) is associated with a Sewage Pump Station located at 100 South Water Street. This incident was reported as a result of flooding and overflow at a treatment plant during Hurricane Irene in 2011. The case has since been closed. Based on available information, SESI has determined that this listing is not associated with the subject property and, therefore, does not constitute a REC.

The EDR Radius Map Report identified operations at nearby sites in the following listings. A discussion of these listing is provided below:

National Priority List (NPL)

NPL is a federal list of sites with documented hazardous waste contamination or threatened releases of hazardous compounds/substances. According to the NPL list provided by EDR, there is one (1) NPL facility (Hudson River PCBs) located within approximately 0.125 miles of the Subject Property. This listing is associated with the Hudson River located approximately 500 feet east of the Site. Based on the groundwater/surface water flow direction, contamination from the Hudson River is not expected to adversely impact the Subject Property.

Superfund Enterprise Management System (SEMS)

SEMS a federal system that tracks hazardous, potentially hazardous, and remedial action sites associated with the USEPA Superfund Program. According to the SEMS list provided by EDR, there is one (1) SEMS facility (Hudson River PCBs) within approximately 0.125 miles of the Subject Property. As previously discussed, this facility is not expected to adversely impact the Subject Property.

RCRA CORRACTS (CORRACTS)

The CORRACTS list identifies Resource Conservation and Recovery Action (RCRA) facilities that incurred corrective action activity associated with their operation. According to the SEMS list provided by EDR, there are three (3) CORRACTS facilities (Ednalite Corp, N D L Organization Inc, and Mearl Corp) within one (1) mile of the Subject Property. Based on the distance from the Subject Property to the facility sources, these facilities are not expected to adversely impact the Subject Property.

RCRA – Treatment, Storage, and Disposal Facilities (RCRA-TSDF)

The RCRA-TSDF includes a list of facilities that generate, transport, store, and/or dispose of hazardous waste. According to the RCRA-TSDF list provided by EDR, there is one (1) RCRA-TSDF facility (Ednalite Corp) within approximately 0.5 miles of the Subject Property. Based on the distance from the Subject Property to the facility sources, this facility is not expected to adversely impact the Subject Property.

RCRA Large Quantity Generator (RCRA-LQG)

The RCRA-LQG includes a list of facilities that generate over 1,000 kilograms of hazardous waste, or over 1 kilogram of acutely hazardous waste per month. According to the RCRA-LQG list provided by EDR, there is one (1) RCRA-LQG facility (Hudson River PCBs) within approximately 0.125 miles of the Subject Property. As previously discussed, this facility is not expected to adversely impact the Subject Property.

RCRA Small Quantity Generator (RCRA-SQG)

The RCRA-SQG includes a list of facilities that generate more than 100 but less than 1,000 kilograms of hazardous waste per month and accumulate less than 6,000 kilograms of hazardous waste at any time. According to the RCRA-SQG list provided by EDR, there is one (1) RCRA-

SQG facility (NYSDOT – RTE 9 RTE 9A) within approximately 0.125 miles of the Subject Property. However, a review of the facility did not identify any environmental release(s) of hazardous materials. Therefore, this facility is not expected to adversely impact the Subject Property.

RCRA Very Small Quantity Generator (RCRA-VSQG)

The RCRA-VSQG includes a list of facilities that generate less than 100 kilograms of hazardous waste, or less than one (1) kilogram of acutely hazardous waste per month. According to the RCRA-VSQG list provided by EDR, there is one (1) RCRA-VSQG facility (E M Autobody Inc) within approximately 0.125 miles of the Subject Property. However, a review of the facility did not identify any environmental release(s) of hazardous materials. Therefore, this facility is not expected to adversely impact the Subject Property.

US Engineering Controls (US ENG CONTROL)

The US ENG CONTROL list identifies facilities that utilize caps, building foundations, liners and/or similar methods to protect human health and the environment. According to the US ENG CONTROLS list provided by EDR, there is one (1) US ENG CONTROLS facility (Hudson River PCBs) within approximately 0.125 miles of the Subject Property. As previously discussed, this facility is not expected to adversely impact the Subject Property.

US Institutional Controls (US INST CONTROLS)

The US INST CONTROLS list identifies facilities that utilize administrative restrictions to groundwater use, construction, property use and post-remediation care requirements to prevent exposure to remaining contamination. According to the US INST CONTROL list provided by EDR, there is one (1) US INST CONTROL facility (Hudson River PCBs) within approximately 0.125 miles of the Subject Property. As previously discussed, this facility is not expected to adversely impact the Subject Property.

NY State Hazardous Waste Sites (NY SHWS)

NY SHWS is a list of known contaminated facilities in New York. Two (2) SHWS facilities (CE Pemart Ave – Peekskill MGP and CE – Central Ave- Peekskill MGP) are located within 0.5 miles of the Subject Property. Based on the distance from the Subject Property to the facility sources, these facilities are not expected to adversely impact the Subject Property.

NY Leaking Storage Tanks (NY LTANKS)

The NY LTANKS database contains an inventory of reported leaking underground and aboveground storage tanks. According to the NY LTANKS list provided by the EDR, there are 50 tanks located within one-half mile of the Subject Property. One listing was identified within close proximity of the Site, including Spill No. 0104651 reported on July 31, 2007 during the removal of two (2) 1,000-gallon No. 2 Fuel Oil USTs. Holes were identified in both tanks and excavations were completed to remove approximately 100 tons of impacted soils. All tanks within close proximity to the Subject Property and upgradient of the Subject Property have completed cleanup and require no further action. Therefore, these tanks do not constitute a REC.

NY Underground Storage Tanks Sites (NY UST)

The NY UST database contains registered USTs maintained by the associated facilities. USTs are regulated under Subtitle I of the RCRA. Five (5) NY UST facilities (Water Street Pump Station, Crestwood Associates, Ron's Service Texaco, Automotive Technical Services, and Peekskill Middle School) are located within approximately 0.25 miles of the Subject Property. Documented evidence of UST failure at these facilities has not been identified. Additionally, no USTs were identified on adjacent properties. Therefore, these facilities do not constitute a REC.

NY Chemical Bulk Storage (NY CBS/NY CBS AST)

The NY CBS database contains registered chemical bulk storage facilities. The NY CBS list provided by the EDR identifies one (1) facility (Peekskill Middle School) located approximately 0.25 miles from the Subject Property. This facility is located cross-gradient of the Site and has no documented spills or violations. Therefore, the CBS facility is not expected to have adversely impacted the Subject Property

NY Above Ground Storage Tank Sites (NY AST/NY Tanks)

The NY AST/NY Tanks database contains registered ASTs and/or USTs maintained by the associated facilities. Four (4) facilities (Walter G. Legge Co., Inc, Gasland Mobil, Motor In Catch Basin, and Automotive Technical Services) were identified within approximately 0.25 miles of the Subject Property. Although these facilities operate an AST(s), a release from these storage tanks has not been documented, the spill case has been closed, or the nature of the spill does not have the potential to impact the Site. Therefore, none of these facilities constitute a REC.

NY Engineering Controls (NY ENG CONTROL)/NY Institutional Controls (NY INST CONTROL)

The NY ENG CONTROL list identifies facilities that utilize caps, building foundations, liners and/or similar methods to protect human health and the environment. The NY INST CONTROLS database is a listing of sites that have a legal document (Institutional Controls) that restricts the use a of contaminated property and holds owner(s) and/or other responsible parties to the regulatory/statutory requirements for cleanup. These restrictions ensure protection of human health and the environment as long as they are maintained. According to the NY ENG CONTROL and NY INST CONTROL list provided by EDR, Peekskill Landing Site is listed on both databases and located within 0.125 miles of the subject property. The facility is topographically cross-gradient of the Subject Property and remediation was completed. With the documentation of completed remedial activities, the implementation of engineering and institutional controls, and the reported groundwater flow, the Peekskill Landing site does not constitute a REC.

NY Voluntary Clean Up Program (NY VCP)

The NY VCP is a list of responsible parties, developers, local officials, or individuals working with the department to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment. A review of NY VCP list provided by EDR has identified two (2) NY VCP facilities, CE- Pemart Ave – Peekskill MGP and CE Ave – Peekskill MPG, located within approximately 0.5 miles of the Subject Property. Based on the distance to the Site, these facilities are not expected to have adversely impacted the Subject Property.

NY BROWNFIELDS

NY BROWNFIELDS are facilities that are identified as former or current commercial or industrial use facilities that are presently vacant or underutilized, on which there is suspected to have been a discharge of contamination to the soil or groundwater at concentrations greater than applicable cleanup criteria. A review of NY BROWNFIELD list provided by EDR has revealed that there are three (3) NY BROWNFIELD facilities (Railroad Avenue Apartments, Charcoal Tablet Mill Site, and Mill Printing Corporation) within approximately 0.5 miles of the subject. Based on our review of available information and mapping for these facilities, the following was concluded: groundwater and soil contamination from these facilities does not extend to the Subject Property as all facilities are either cross- or downgradient of the Site or remediation was completed.

Therefore, none of the brownfield facilities are expected to have adversely impacted the Subject Property.

Environmental Restoration Program Listing (ERP)

The ERP list provides an inventory of New York brownfield facilities that have received grants to reimburse eligible cleanup costs for site investigation and remediation activities under this state program to allow the property to be reused for commercial, industrial, residential, or public use. Peekskill Landing Site, located within 0.125 miles of the Subject Property, is identified in the ERP database. With the documentation of completed remedial activities, the implementation of engineering and institutional controls, and the reported groundwater flow, the Peekskill Landing site does not constitute a REC.

NY SPILLS

NY SPILLS are facilities that have documented releases/spills associated with either petroleum bulk storage or chemical bulk storage at their facilities. According to the NY SPILLS list provided by EDR, there are 17 NY SPILLS sites within 0.125 miles of the Subject Property. The facilities listed in the NY Spill database include documented spills as of April 1, 1986, as well as spills occurring since this date. Every spill facility listed in the NY Spills database has been closed or is located cross- or downgradient of the Site. Additionally, facilities listed in this database that may potentially impact the Subject Property are likely listed in multiple databases already referenced in this Report, which provide more detailed information on the nature and extent of the reported spills. Therefore, none of the NY Spills sites constitute a REC.

RCRA Non-Generators/No Longer Regulated (RCRA NonGen/NLR)

Resource Conservation and Recovery Act Non-Generators (RCRA NonGen) database searches USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information about facilities that generate, transport, store, treat and/ or dispose of hazardous waste as described by RCRA. Non-Generators do not presently generate hazardous waste. A review of RCRA NonGen/NLR list provided by EDR has revealed that there are 20 facilities within 0.25 miles of the Subject Property. Since none of these facilities currently generate hazardous waste, they are not expected to adversely impact the Subject Property.

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands. A review of the database as provided by EDR identified one (1) facility (NG Camp Smith TNG Site) within one (1) mile of the subject property. Based on the distance to the Site, this facility is not expected to adversely impact the Subject Property.

CONSENT/ROD

The Consent/ROD list provides an inventory of facilities that have mandated and permanent remedies in place and Superfund sites containing technical and health information to aid in the cleanup. One (1) CONSENT/ROD facility, Hudson River PCBs, is within a 0.125 miles of the Subject Property. Based on the groundwater/surface water flow direction, contamination from the Hudson River is not expected to adversely impact the Subject Property.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires. A review of the database as provided by EDR identified one (1) facility (Ron's Service Texaco) within 0.25 miles of the subject property. As previously discussed, the conditions associated with this facility do not constitute a REC.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials. A review of the database as provided by EDR identified two (2) facilities (Sunoco Station and Brian's Automotive) within 0.5 miles of the subject

property. Based on the distance to the Site, these facilities are not expected to adversely affect the Subject Property.

E MANIFEST: Hazardous Waste Electronic Manifest System

EPA established a national system for tracking hazardous waste shipments electronically. This system, known as e-Manifest, will modernize the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. A review of the database as provided by EDR identified one (1) facility (E M Autobody Inc) within 0.125 miles of the subject property. Based on the downgradient location and lack of violations identified at the facility, this facility is not expected to adversely affect the Subject Property.

MANIFEST Sites

MANIFEST Sites include a list of facilities that have generated hazardous waste or contaminants. A review of the NY, NJ, and PA MANIFEST list, as provided by EDR, has revealed that there are 18 NY MANIFEST and four (4) NJ MANIFEST facilities within approximately 0.25 miles of the Subject Property. Based on a review of the available database information, documented release events have not occurred at these facilities and therefore do not constitute a REC.

MGP: Manufactured Gas Plants Listing

From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants. A review of the database as provided by EDR identified two (2) NY MGP facilities (CE – Pemart Ave – Peekskill MGP and CE – Central Ave – Peekskill MGP) within 0.5 miles of the subject property. Based on hydraulic gradient and/or distance to the Site, these facilities are not expected to adversely affect the Subject Property.

EDR Manufactured Gas Plant (MGP) Sites

The MGP list provides an inventory of facilities that formerly operated coal gas plants. A review of the EDR MGP database, as provided by EDR, has revealed that there are two (2) MGP facilities (Con Edison – Pemart Ave Works – Peek. MGP and Con Edison – Central Ave Works – Peek. MGP) within approximately 0.5 miles of the Subject Property. Based on hydraulic gradient and/or distance to the Site, these facilities are not expected to adversely affect the Subject Property.

EDR Hist Auto Sites

The EDR Hist Auto list provides an inventory of facilities that formerly operated automotive repair or automotive gas stations. A review of the EDR Hist Auto database, as provided by EDR, has revealed that there are three (3) Hist Auto facilities (Walts Amaco, On Way, and R D S Auto Body Inc) within approximately 0.125 miles of the Subject Property. These facilities are situated either downgradient or side gradient from the Subject Property. A review available database information did not identify known contamination of soil and/or groundwater migrating from these facilities. Therefore, these facilities do not constitute a REC.

EDR Hist Cleaner Sites

The EDR Hist Cleaner list provides an inventory of facilities that formerly/historically operated a dry-cleaning business. A review of the EDR Hist Cleaner database, as provided by EDR, has revealed that there are two (2) Hist Cleaner facilities (Nunzio Tailor & Cleaners and His Her Cleaners) within approximately 0.125 miles of the Subject Property. These facilities are situated either downgradient or side gradient from the Subject Property. A review available database information did not identify known contamination of soil and/or groundwater migrating from these facilities. Therefore, these facilities do not constitute a REC.

5.1.2. PREVIOUS ENVIRONMENTAL REPORTS

Previous environmental reports were not provided for review as part of this assessment. However, a Phase II ESA was conducted and prepared concurrently with this Phase I ESA. Results of the Phase II ESA are discussed throughout this report. Specifically, soil, groundwater and soil vapor contamination confirmed in the Phase II are identified as **REC-5**.

5.1.3. LOCAL, COUNTY, AND STATE INFORMATION REQUESTS

On January 9, 2026, SESI filed information requests with the NYSDEC; Westchester County Clerk and Departments of Health, Emergency Services, and Environmental Facilities, and the Peekskill Clerk and Fire Department for information regarding potential incidents, spills, hazardous material storage/use and UST decommissioning records. Information request responses submitted to the NYSDEC and the City of Peekskill did not identify responsive records. At the time of this report, a response was not received from Westchester County. Information requests and responses from government agencies are included as **Appendix C**.

5.2. PHYSICAL SETTING SOURCES

Sources used to evaluate the physical setting of the property include:

- USGS Topographic Maps
- Aerial Photographs
- Subject Property Reconnaissance

5.2.1. TOPOGRAPHY

The Subject Property is relatively level with regional topography decreasing to the West toward the Hudson River. According to the United States Geological Survey (USGS) Peekskill, New York 2023 7.5-minute Series topographic map, the Subject Property's topographic elevation is approximately 16.07 feet above mean sea level (msl). The EDR Topographic Map Report is attached to this Report as **Appendix A.**

5.2.2. SURFACE WATER AND WETLANDS

The closest open surface water to the Subject Property is the Hudson River located approximately 450 feet west of the Subject Property.

5.2.3. GEOLOGY AND GROUNDWATER

As per the USDA National Cooperative Soil Survey (NCSS) map for the area, the soils at the Subject Property are characterized as a mix of UpC (Urban Land – Paxton complex, 3 to 8 percent slopes) and Uc (Udorthents, wet substratum). Based on the 2026 Phase II investigation, the depth of the groundwater at the Subject Property is approximately 4.5 to 10 feet below ground surface (bgs), and groundwater flow direction is expected to be in the west-southwest direction.

5.3. HISTORICAL USE INFORMATION FOR THE PROPERTY

Sources used to determine the historical use of the property include:

- Aerial Photographs,
- EDR City Directory Abstract,
- USGS Topographic Maps,
- Sanborn Fire Insurance Maps, and
- Environmental Lien and AUL Search Report

EDR Reports are attached to this Report as **Appendix A.**

5.3.1. AERIAL PHOTOGRAPHS

Following is a summary of the EDR review of 16 aerial photographs dated 1940, 1947, 1954, 1958, 1960, 1974, 1984, 1989, 1994, 2006, 2009, 2013, 2017, 2021, and 2024:

Table 5.2—Aerial Photographic Review

Year	Quality of Photograph	Observations
1940	Fair	**Subject Property:** Several structures are present throughout the subject property. **Adjacent Parcels:** A railroad is evident along the western boundary, and a road forms the eastern boundary. One (1) structure is present to the north of the subject property, and one (1) structure is present to the south of the subject property.
1947	Poor	**Subject Property:** The poor image quality makes details difficult to discern. **Adjacent Parcels:** The poor image quality makes details difficult to discern.
1954	Fair	**Subject Property:** Structures are evident along the eastern border of the subject property. **Adjacent Parcels:** A large building is present to the north of the subject property.
1958	Good	**Subject Property:** The subject property is vacant. **Adjacent Parcels:** Two (2) large structures are present to the north of the subject property.
1960	Poor	**Subject Property:** The poor image quality makes details difficult to discern. **Adjacent Parcels:** The poor image quality makes details difficult to discern.
1964	Fair	**Subject Property:** Small structures are present throughout the subject property. **Adjacent Parcels:** No discernible changes.
1974	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** No discernible changes.
1984	Fair	**Subject Property:** The buildings in the northern portion of the subject property are surrounded by paved parking. **Adjacent Parcels:** Two (2) large buildings are present to the north of the subject property.
1989	Poor	**Subject Property:** The poor image quality makes details difficult to discern. **Adjacent Parcels:** The poor image quality makes details difficult to discern.
1994	Good	**Subject Property:** The north to central portion of the subject property consists of paved parking. Small structures are present on the southern portion.

Year	Quality of Photograph	Observations
		Adjacent Parcels: No discernible changes.
2006	Good	**Subject Property:** The entire subject property consists of paved parking. **Adjacent Parcels:** No discernible changes.
2009 2013 2017	Good Good Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** No discernible changes.
2021	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** Parking is evident between the subject property and the buildings to the north.
2023	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** No discernible changes.

No concerns were identified at the Subject Property. No concerns were identified at the properties surrounding the Subject Property.

5.3.2. EDR CITY DIRECTORY ABSTRACT

SESI obtained historical city directory data from EDR for the Subject Property. SESI reviewed the City Directory listings for the years 1965, 1968, 1972, 1977, 1982, 1987, 1992, 1995, 2000, 2005, 2010, 2014, 2017, and 2022. The Site was not listed in the years 1968, 1982, 1987, and 2000.

A summary of previous operators at the Subject Property based on the City Directory listings is presented in **Table 5.3** below.

5.3.3. HISTORICAL AND CURRENT SUBJECT PROPERTY OPERATIONS

SESI reviewed the City Directory Abstract, provided by EDR, for the Subject Property and conducted a limited municipal tenant search. The City Directory Abstract provides the name and operations of the property. A summary of previous operators at the Subject Property is presented in **Table 5.3** below. A copy of the City Directory Abstract is included in **Appendix A**.

Table 5.3—Historical Subject Property Operations

Year	Owner
2005 - 2022	Homestyle Desserts Inc
2022	Jason Elias
1992 - 2017	TAP Plumbing & Heating
1995	The Last Detail
1992 -1995	Siegfried Donuts Inc
1972 - 1977	Phase One Graphics
1965	Monument Printers & Lithographers Inc

5.3.4. USGS TOPOGRAPHIC MAPS

Following is a summary of the EDR review of Topographic Map Reports:

Table 5.4—Topographic Map Review

Source	Year	Minute	Scale
West Point	1892, 1894, 1899, 1901, 1941	15	62500
West Point	1936	15	48000
West Point	1946	15	50000
Peekskill	1947, 1950, 1957, 1981, 2013, 2016, 2019, 2023	7.5	24000

The topographic maps depict the Subject Property level with an approximate 16.07-feet above msl. Regional topography slopes downward to the West toward the Hudson River. No wetlands were noted on the maps within or adjacent to the Subject Property. A review of these maps suggests the Subject Property was developed prior to 1892.

Based on a review of topographic maps, the area to the West of the site was filled between 1901 and 1936. Based on findings from the 2026 Phase II investigation, contaminants typical of historic fill material were identified in Site soils (**REC-3**).

5.3.5. SANBORN FIRE INSURANCE MAPS

The Subject Property was covered on 12 of the Sanborn maps from 1887, 1895, 1900, 1905, 1911, 1923, 1942, 1950, 1958, 1964, 1971, and 1972 described below:

Table 5.5—Sanborn Map Review

Year	Quality of Map	Observations
1887	Fair	**Subject Property:** A north-south-oriented railroad track is present along the western boundary of the property. Two (2) kilns are present in the north of the subject property. Numerous buildings are present in the northern portion of the property, identified as Horton & Mabie Fire Brick MFG. The fuel source is identified as coal. The Grand Central Hotel is identified in the south of the subject property. Several additional structures are present in the southern portion of the subject property. **Adjacent Parcels:** Water Street forms the eastern boundary of the subject property. A saloon, a barber and another business are present to the south of the subject property. To the north, a building identified as Drying NYC and HRRRR is present.
1895	Fair	**Subject Property:** Several stores have been added in the southern portion of the property. The hotel is no longer present. **Adjacent Parcels:** A cattle pen and two (2) lumber storage buildings have been added to the north. The drying building is no longer identified as part of NYC and HRRRR, and a carpenter shop has been added. To the south, two buildings are identified as either a house or a hotel. West Street appears to be under development to the south of the subject property, with the portion to the west of the subject property completed.
1900	Good	**Subject Property:** A grocery is identified in the southern portion of the subject property. **Adjacent Parcels:** No discernible changes.
1905	Good	**Subject Property:** A vacant building is identified along the western portion of the subject property. **Adjacent Parcels:** No discernible changes.
1911	Good	**Subject Property:** A clay pile is identified in the center of the subject property. An additional grocer has been added south of the grocer present on the previous map. **Adjacent Parcels:** An oil and paint room is identified to the north, as an addition to the carpenter shop. In addition, scattered lumber piles are noted on the northern property.
1923	Good	**Subject Property:** The kiln in the northeast corner has been removed; a second kiln has been added in the northwest corner. **Adjacent Parcels:** The houses/hotels located to the south are now identified as stores. A cider mill with cider tank is identified on the property to the north. West Street appears to be completed to the south of the subject property.
1942	Poor to Fair	**Subject Property:** The poor map quality makes details difficult to discern. **Adjacent Parcels:** The poor map quality makes details difficult to discern.
1950	Good	**Subject Property:** The subject property is now vacant; no buildings are present. **Adjacent Parcels:** A manufacturer of charcoal products is identified on the property to the north.

Year	Quality of Map	Observations
1958	Good	**Subject Property:** The property to the north is now identified as Stamford Processing Co. **Adjacent Parcels:** No discernible changes.
1964	Good	**Subject Property:** The property to the north is now identified as a printing company. **Adjacent Parcels:** No discernible changes.
1971	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** No discernible changes.
1972	Good	**Subject Property:** In the northwestern portion of the subject property, a storage facility is identified, with automobiles noted. Dwellings are present from the central to southern portion of the subject property, with stores along the southern boundary. **Adjacent Parcels:** The property to the north is identified as storage, with a parking lot beyond.

Based on the review of Sanborn Maps, two (2) RECs were identified:

- Historic fire brick manufacturing operations were documented between 1887 and 1942 at the Subject Property (**REC 1**).
- Historic coal storage was documented in 1887 and the facility was noted to use coal as a fuel source until at least 1932 (**REC 2**).
- The Metro-North Railroad Hudson Line has been located immediately west of the Site since at least 1887 (**REC 6**).

5.3.6. ENVIRONMENTAL LIEN AND AUL SEARCH REPORT

Based on data provided by EDR, no environmental liens or any other activity or use limitations were found.

5.4. ENVIRONMENTAL PERMITS

Review of the EDR Radius Map Report for the Subject Property indicates no environmental permits attributed to the Subject Property. EDR Reports are provided in **Appendix A**.

6.0 SUBJECT PROPERTY RECONNAISSANCE

6.1. METHODOLOGY AND LIMITING CONDITIONS

An environmental professional from SESI, MaryKate Chorazak, visited the Subject Property on February 3, 2026 to identify potential RECs. The Subject Property was observed to the extent that it was accessible and not obstructed. It should be noted that the property was inspected following a snowstorm, and certain areas were not accessible. However, given the use of the Subject Property, these limitations are not considered significant. An inspection photolog is attached to this Report as **Appendix D.**

6.2. SUBJECT PROPERTY OBSERVATIONS

The Subject Property is not developed with structures. Surfaces are covered by either asphalt parking lots or landscaped areas.

6.3. CHEMICAL STORAGE AND USAGE

SESI did not observe any chemical usage or storage on the Subject Property.

6.4. BULK STORAGE TANKS

SESI personnel did not observe any evidence of bulk storage tanks at the Subject Property.

6.5. SUBJECT PROPERTY WASTE AND WASTEWATER

SESI did not observe any waste or wastewater present at the time of the Subject Property reconnaissance.

6.6. STAINED SOIL, STAINED PAVEMENT, OR STRESSED VEGETATION

SESI did not observe any indications of stained soil, stained pavement, or stressed vegetation.

6.7. PITS, PONDS, OR LAGOONS

No pits, ponds or lagoons were identified at the Subject Property.

6.8. WELLS

SESI did not observe any on-site dry wells, irrigation wells, injection wells, observation wells, monitoring wells, potable water wells, recovery wells, or abandoned wells.

6.9. FLOOR DRAINS AND SUMPS

SESI did not observe any floor drains or sumps at the Subject Property.

6.10. PCB

One (1) pole-mounted transformer was observed at the southeast corner of the Site with a "Non-PCB" label. No evidence of spills from the transformers was observed on the ground surface beneath the transformers. Furthermore, the transformer is not located within the parcel Site boundaries, but rather on the sidewalks adjacent to the parcel boundaries. Therefore, the transformer is not considered a REC for the Site.

6.11. ASBESTOS-CONTAINING MATERIAL (ACM)

ACM surveying was not included in SESI's scope of work; however, based on the lack of structures at the Site with the exception of a shed, an ACM survey is not warranted.

6.12. RADON

Radon surveying was not included in SESI's scope of work; however, based on the lack of structures at the Site with the exception of a shed, an ACM survey is not warranted.

6.13. LEAD-BASED PAINT (LBP)

LBP surveying was not included in SESI's scope of work; however, based on the lack of structures at the Site with the exception of a shed, an ACM survey is not warranted.

6.14. VAPOR INTRUSION

Based on a review of information related to the Subject Property, vapor intrusion is not anticipated to be a concern on the Subject Property.

7.0 DATA GAPS

Based on a review of the available documentation, the following data gaps have been identified:

- The Freedom of Information Law (FOIL) request filed with Westchester County has not been received to date. This is not considered a significant data gap.

8.0 FINDINGS

Based on our investigation, we conclude that there is evidence to indicate areas of potential environmental concern on the Subject Property. The confirmed contamination can likely be attributed to the historical usage as a fire brick manufacturer, the historic storage of coal, and the presence of historic fill material. However, additional investigation is recommended to further investigate subsurface conditions. See ***Section 10.0 CONCLUSIONS*** of this Report.

9.0 OPINION

In our professional judgment, the scope and character of our environmental assessment were sufficient to justify the stated conclusions, after giving due consideration to the purpose of the investigation, the data reviewed, the background history of the Subject Property as found in historical records, and visual observation of the Subject Property.

10.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the investigation, it is concluded that there is evidence to indicate areas of recognized environmental concern on the Subject Property and that additional investigation of these areas is warranted. The conclusions and recommendations in this regard are as follows:

- **REC 1 – Historic Fire Brick Manufacturing Operations:** Based on a review of Sanborn Map records, historic fire brick manufacturing operations began as early as 1887 and continued until at least 1942. Such operations are commonly associated with potential environmental impacts, including the use of raw materials, fuels, and additives that may contribute to releases of metals, polycyclic aromatic hydrocarbons (PAHs), and other combustion-related byproducts to soil and groundwater. Investigation of historic operations was conducted during SESI's 2026 Phase II sampling events. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 1.**

- **REC 2 – Historic Coal Storage Area:** Based on a review of Sanborn Map records, historic coal storage was documented in 1887, and the historic fire brick manufacturing facility was noted to use coal as a fuel source until at least 1932. Historic coal storage and handling areas are commonly associated with potential environmental impacts, including releases of coal ash, cinders, and related byproducts that may contain metals and PAHs. Investigation of the historic coal storage area was conducted during SESI's 2026 Phase II sampling events. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 2.**

- **REC 3 – Historic Fill:** A review of historical topographic maps indicates that areas immediately west of the Site were subject to filling activities between approximately 1901 and 1936. Findings from the 2026 Phase II investigation identified the presence of contaminants in Site soils consistent with historic fill material. Soil conditions within the borings consisted of fill material (asphalt millings, brick, concrete, coal) at depths ranging from approximately 1.0 to 11.0 ft-bgs. Historic fill is commonly associated with urban and industrial development and may include ash, cinders, demolition debris, and other anthropogenic materials that can contain metals, PAHs, and other contaminants. **Sitewide**

soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 3.

- **REC 4 - NY SPILL No. 0507823**: One incident, identified as "City Parking Lot" (Spill No. 0507823), was reported in the NY SPILL database due to petroleum contamination of unknown origin detected in soil borings during a historical site investigation. No additional details were available for this listing. Investigation of side wide subsurface conditions was conducted during SESI's 2026 Phase II sampling events. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 4.**

- **REC 5 – Confirmed Soil, Groundwater and Soil Vapor Contamination**: Based on findings from SESI's 2026 Phase II investigation, soil, groundwater, and soil vapor contamination were confirmed at the Site. Soil analytical results identified acetone and metals at concentrations exceeding the New York State Department of Environmental Conservation (NYSDEC) Soil Cleanup Objectives (SCOs). Groundwater sampling detected semi-volatile organic compounds (SVOCs), metals, and per- and polyfluoroalkyl substances (PFAS) at concentrations above NYSDEC Ambient Water Quality Standards (AWQS). Additionally, volatile organic compounds (VOCs), specifically heptane and hexane, were detected in soil vapor at concentrations exceeding the New York State Department of Health (NYSDOH) lower and upper guidance values, respectively. An application will be submitted to enroll the Site in the NYSDEC Brownfield Cleanup Program (BCP). **Participation in the BCP will involve further investigation to delineate the extent of contamination and the implementation of appropriate remedial actions to address identified impacts across the Site.**

- **REC 6 – Adjacent Railroad Operations**: The Metro-North Railroad Hudson Line has been located immediately west of the Site since at least 1887. The nearest station, Peekskill Station, is approximately 550 feet southwest of the Site. Railroad operations are commonly associated with potential environmental concerns, including the use and handling of fuels, lubricants, herbicides, and historic materials such as creosote-treated railroad ties, which may contribute to releases of petroleum hydrocarbons, metals, and PAHs to adjacent properties. Given the proximity of the active rail corridor, there is a potential for migration of contaminants onto the Site via surface runoff, groundwater flow,

or historical fill placement. **Sitewide soil, groundwater and soil vapor contamination is addressed under REC 5. Therefore, no further action is required for REC 6.**

The following BERs were identified:

- **BER 1 – Waste Disposal Area**: During the Site inspection, the shed structure in the northwestern corner of the Site was utilized as a waste disposal area for the north adjacent property operating as a bakery. Eight (8) general waste and cardboard dumpsters were observed in and around the structure. **Based on the nature of the waste in the containers and lack of evidence of release, no further investigation is required.**

A figure showing the locations of the RECs and BERs identified at this Subject Property is included as **Figure 10.1.**

11.0 DEVIATIONS

This Report was prepared with no significant deviation from ASTM Standard Practice E1527-21.

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

As required in 40 CFR 312.21(d), this section includes statements made by the environmental professional conducting this assessment.

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312."

"I declare that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property."

"I have developed and performed the 'all appropriate inquiry' in conformance with the standards, limitations, and practices set forth in 40 CFR Part 312."

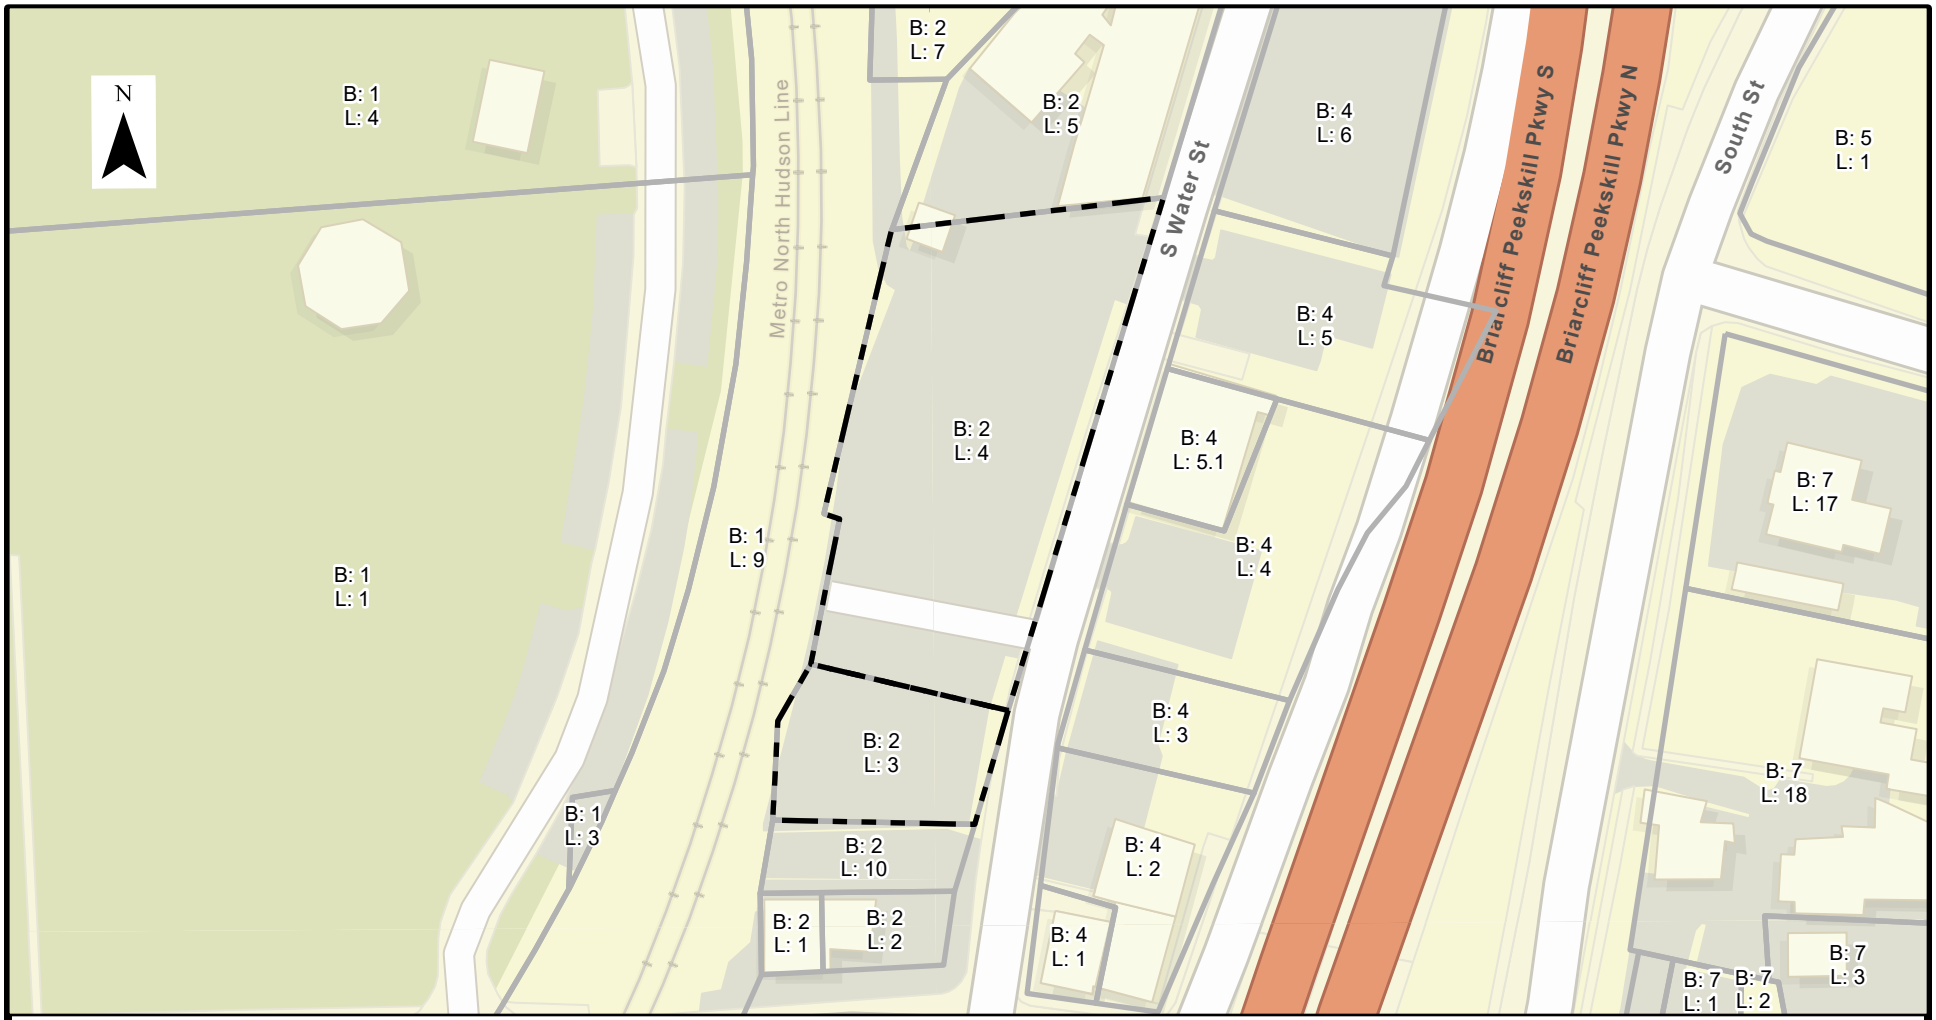

This Report incorporates the consultant's best professional judgment in conductance of this Phase One Environmental Site Assessment.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/29/2025 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/29/2025 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/30/2025 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/30/2025 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/04/2025 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking

underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/03/2025 has revealed that there are 50 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 5 NY UST sites within approximately 0.25 miles of the target property.

NY ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the NY ERP list, as provided by EDR, and dated 08/04/2025 has revealed that there is 1 NY ERP site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/03/2025 has revealed that there are 17 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there are 20 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

NY MGP: From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

A review of the NY MGP list, as provided by EDR, and dated 08/27/2025 has revealed that there are 2 NY MGP sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
WALTS AMACO	50 HUDSON ST	SSW 0 - 1/8 (0.011 mi.)	B4	39
ON WAY	55 HUDSON AVE	S 0 - 1/8 (0.035 mi.)	B13	51
R D S AUTO BODY INC	341 RAILROAD AVE	SSW 0 - 1/8 (0.051 mi.)	B18	73

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

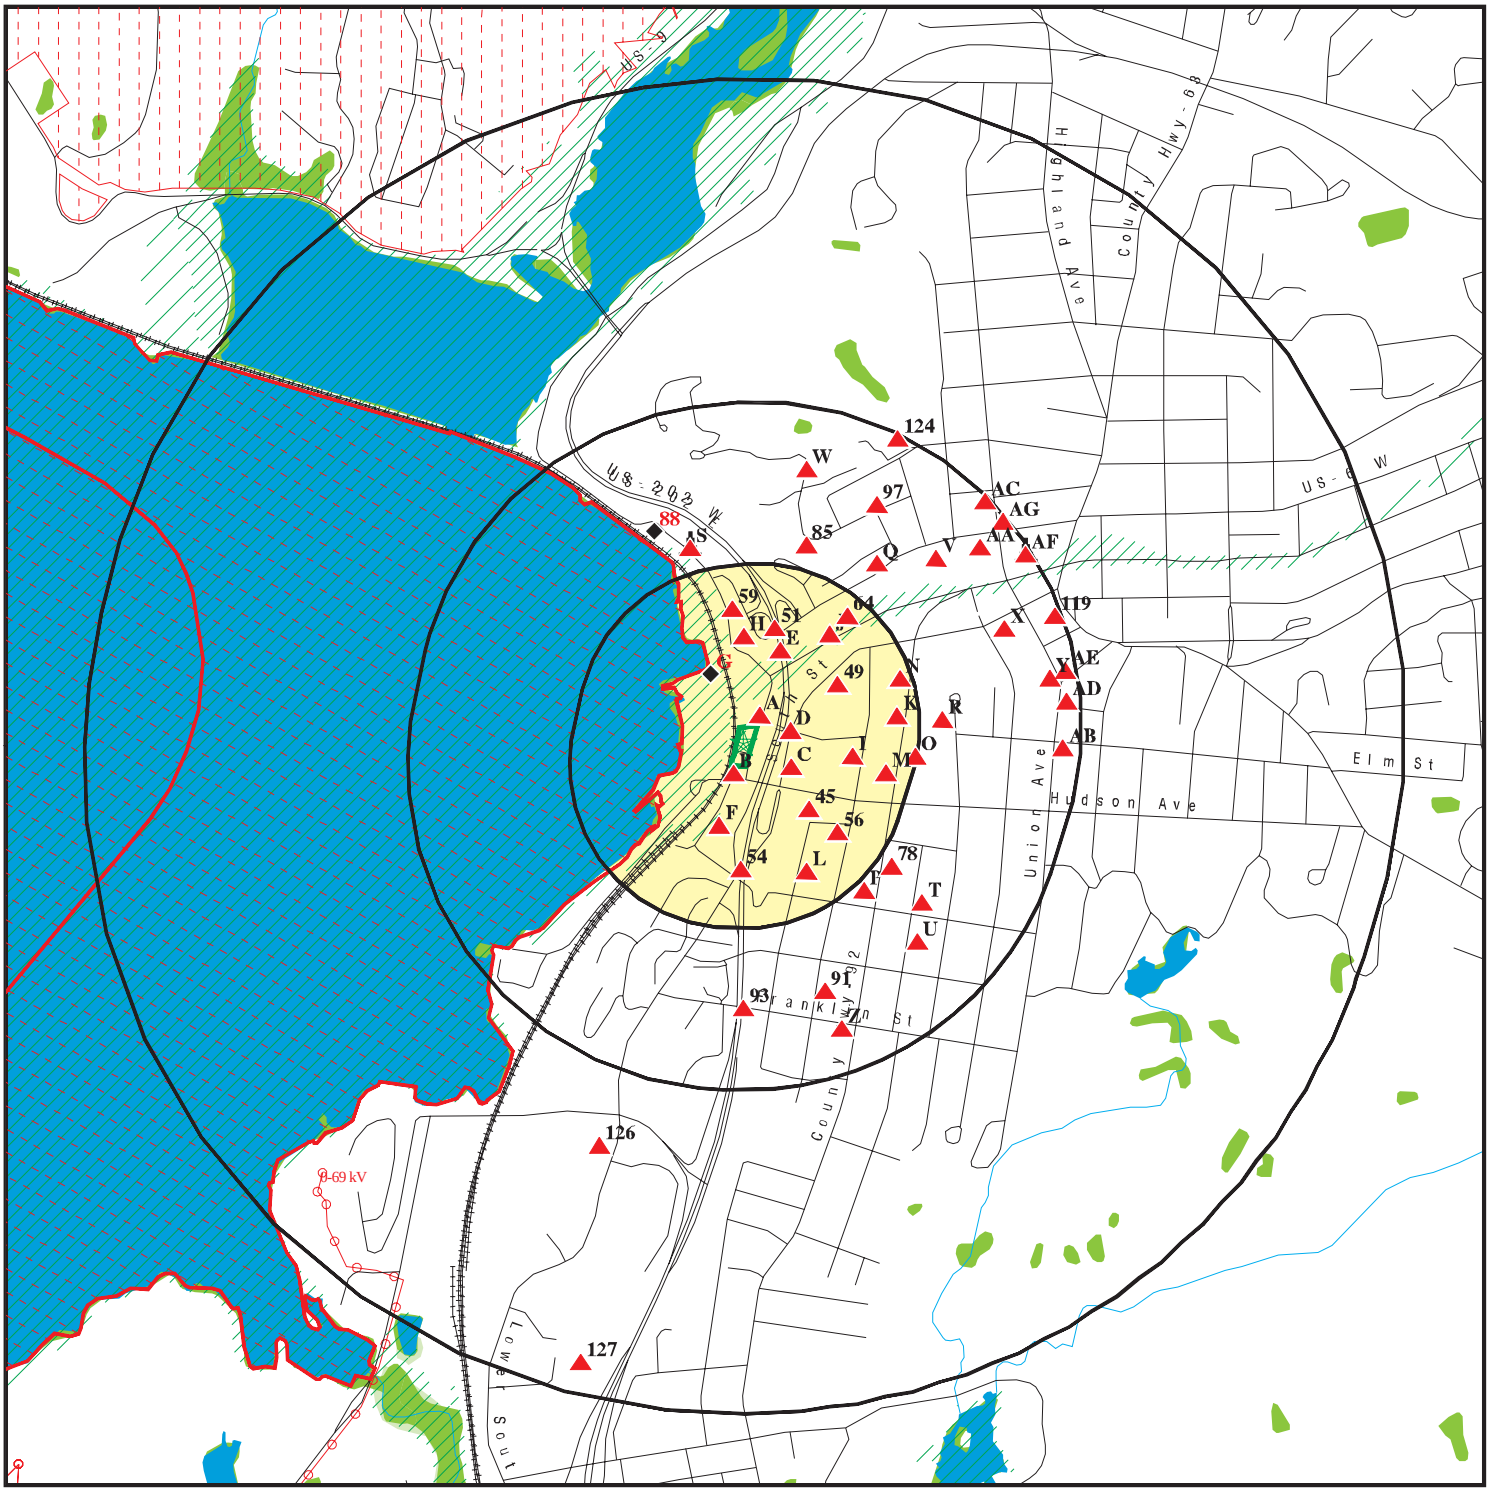

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NUNZIO TAILOR & CLEA	400 SOUTH ST STE A	SSE 0 - 1/8 (0.017 mi.)	A8	43

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

DEC Memo:	Spoke to caller. He did the investigation for a potential buyer. When the buyer was notified that significant contamination was discovered, he decided to back of the deal and he did not want the samples sent to the lab. Caller will send his field notes and a diagram to D Bendell....mm 08-22-14

SITE ASSESSMENT (Continued) **S117269441**

email from Cinmenllo, I apologize for the delay in providing this information; I just secured my client s approval to send these excerpts of our report.ESI conducted a Phase I/II assessment on the site, with the intention of analyzing soil samples collected during the field work. Field observations documented the presence of grossly contaminated soils in every boring on the Site, and ESI s Client (prospective purchaser) opted to terminate his purchase agreement. The samples that were collected were therefore not analyzed.I recognize that this information is incomplete, but it is the best I can provide given the Client s decision not to pay for laboratory analyses. Should you have any questions, please call myself or Danielle Bonneau in my office, as both of us were on the Site during the field work. RDB 2-26-16 phone call from neighbor, Steve Zwick 914-424-8769
10/28/2022: County Tax data lists the owner of this property as Keith Bobolia. jod

Remarks: Caller advised received results from phase 2 and showing gasoline in the soil and possibly water from the borings. Clean up is pending.

DEC Memo:	3/10/11 FD responded to water in basement. FD has left scene, but says WCHD on scene no name available. Initially they did not see any oil when pump out began. They noticed some oil come floating over to where they could see it on water and FD shut down pump out. Owner has been

GENEVA GRILL (Continued) **S110768868**

contacted and told he needs to hire a contractor. Called Carlos to confirm someone was there. He
said Barbara was there and oil is from tank in basement. Tank tipped over as water level lowered.
Stefan also on scene. Told Carlos to let us know if oil not contained in basement or if he needs
us. jc 05/27/11 B McDonald, WCDOH reported that the cleanup has been completed. NFA TG

Remarks: Caller advised that the tank was being pumped out and the tank fell over. Clean up is pending.

DEC Memo:	5/22/09 Con Ed reported a truck leaking what they thought was fuel out the rear end of the vehicle. They initially thought it was a fuel co., which they did not get the name, as it was traveling past their workers on the road. Called Peekskill PD to investigate, and WCHD (Barbara McDonald). PD reported that it was a masonry truck which leaked out hydraulic fluid, and Peekskill DPW was doing

I/A/O SOUTH WATER ST & HUDSON AVE (Continued) **S109583115**

the cleanup. No storm drains were impacted, according to PD, and it was not 30 gal, as reported by
Con Ed, but much less. WCHD will be sending somebody to take a look.
NFA dw WCDH reported the Town
placed sand. No need for a response from DEC.

Remarks: WHILE ON THE STREET CON ED EMPLOYEES WITNESSES A TRUCK SPILL ABOUT 30 GALLONS TO THE STREET. SPILL IS CONTAINED. PEEKSKILL WILL BE DOING THE CLEAN UP.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed

E M AUTOBODY INC (Continued) **1000413609**

In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

DEC Memo:	11-26-15 Spoke to Carol. She says a mechanic was dispatched to location for a no hot water call. Tech reported to her that tank had been replaced recently and there was evidence of a historic spill. She had no other details. Called Sebastian and left a voicemail. He called me back a short time later. He said he did not believe tank was leaking but that he would investigate and get back to me. Sebastian's brother Tino called back and said that this location is a rental and Slomins is on contract to fill his properties. He says that there are two outside ASTs manifolded and on a concrete pad. He says there is a small stain on the concrete that he believes is from Slomin's deliveries. Tino couldn't provide date of last delivery. He says that tank is not leaking and confirms that tank was replaced not too long ago. He says they replaced tank at Slomins direction. Tino believes that Slomins reported the spill in an effort to pressure them into changing some devices on the tank. He also believes that because the spill is from Slomin's deliveries that they are required to clean it up. He plans to contact Slomin's to discuss with them. Sounds like no hot water was due to one of the devices, but Tino said to call him if we need to visit site to investigate further. Tino # is 914/904-7058 jc
Remarks:	loss to soil- historic , homeowner contacting insurance.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene,

E M AUTO BODY (Continued) **1004760036**

2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

City,State,Zip:	PEEKSKILL, NY 10566
Program:	BCP
Site Code:	636588
Acres:	1.461
HW Code:	C360229
SWIS:	6012
Town:	Peekskill (c)
Record Added Date:	05/19/2022
Record Updated Date:	04/25/2023
Update By:	KATHOMPS
Site Description:	Location The Site is an irregularly-shaped 1.491-acre mixed-use (small commercial, residential, parking and vacant)urban parcel comprised of eight contiguous tax lots located on the eastern side of Railroad Avenue, northern side of Requa Street, and western side of South Street. The Site is adjoined to the east by South Street followed by vacant land associated with NY Route 9, to the south by a parking lot and the facilities of the Sisters of Saint Francis, to the west by the Metro North train station, and to the north by an automotive body shop and a residential building. The Hudson River is nearby to the west. Site Features A single-family house is located at 303 Requa Street (Lot 2) and a small structure used as a delicatessen is located at 329 Railroad Avenue (Lot 16). An abandoned, small one-story block structure is located at 321 Railroad Avenue (Lot 17; originally associated with a former filling station). 305, 307 & 321 Railroad Avenue (Lots 1, 17, and 18) are used as parking lots. 318, 322 and 330 South Street (Lots 4, 5, 6) are vacant lots. The Site lots are covered by buildings, pavement and/or overgrown vegetation. Current Zoning and Land Use The Site is in a WF-2 waterfront district, which allows for the planned mixed use (small commercial and residential) development. Adjoining uses include residential and

RAILROAD AVENUE APARTMENTS (Continued) **S106735912**

commercial buildings, and railroad facilities. Past Uses of the Site Site development first occurred prior to 1887, and multiple residential and commercial structures have since been demolished. Former structures included a saloon and then restaurant at 307 Railroad Avenue (Lot 18), and residences at 318, 322 and 330 South Street (Lots 4, 5, 6). The existing block structure at 321 Railroad Avenue (Lot 17) was utilized as an automotive repair/filling station in the 1950s/1960s, and then subsequently as a taxi facility and a drop-off drycleaner. The existing residence at 303 Requa Street (Lot 2) dates from the late 1800s and the delicatessen building at 329 Railroad Avenue (Lot 16) dates from the 1960s. Site Geology and Hydrogeology The Site is in a relatively flat area near the Hudson River, and is bordered to the east by steep, westward sloping terrain. Surface elevations are approximately 40 to 50 feet above sea level (the eastern margin is located on the hillside). Subsurface soil exposed during soil borings to 12 feet below grade generally consisted of variable texture sands (likely fill), consistent with USGS Soil Survey data, which indicate the likely presence of Udorthents, wet substratum (0-3% slopes) soils (poorly drained soils that have been altered by cutting and filling activities). No bedrock was encountered during subsurface investigations. Saturated soils were observed in borings at approximately 6 - 8 feet below grade. Groundwater flow at and near the Site is likely to be westerly, toward the Hudson River, located approximately 0.15 mile west.

Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

PEEKSKILL LANDING SITE (Continued) **S113917306**

Site Description:	Location: The Peekskill Landing site is located in an urban portion in the City of Peekskill, Westchester County. The site consists of a waterfront parcel along the shore of the Hudson River. The site is bordered to the north by a small parcel of undeveloped land and to the east by the Metro-North Railroad, and to the south, by the Peekskill Riverfront Green Park. Site Features: The main site features include a refurbished waterfront bulkhead, large flat grass-covered areas, and scattered trees, some well established and some newly planted. Current Zoning and Land Use: The site is zoned WFI Water Adjacent. This zoning allows municipal parks and the possibility of special permits for uses such as: marinas; boat clubs; repair and manufacture of boats, sails, and equipment; ferry terminal or boat charter; standard restaurants; and motel/hotels. Past Use of the Site: Past uses include office space, the Tallix Art Foundry operation, a lumber yard, boat repairing/storage facility, stone crushing operation, stove works, and coal storage. Site Geology and Hydrogeology: The site soils were identified as mostly fill material from unknown sources. The depth of fill ranges from 8 to 18 feet below ground surface (bgs) and was composed of materials: asphalt, ash, coal ash, cinders, wood, railroad ties, brick, slag and various types of fill soils. The natural underlying soil was characterized as silt and clay with varying sands and gravel mixed in. Groundwater exists at the site ranging from approximately 3 to 6 feet bgs. Bedrock was not encountered. The groundwater levels at the site are directly related to the tidal influence of the adjacent Hudson River. Groundwater flows from to the west to the southwest.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), and metals. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.
Health Problem:	People are not drinking contaminated groundwater because the area is served by public water. Measures are in place to control the potential for coming into contact with subsurface soil and groundwater contamination remaining on the site. Volatile organic compounds in the soil and groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. An evaluation of the potential for soil vapor intrusion to occur will be completed should buildings be constructed on the site.

Dt record added: 07/19/2010
Dt rec updated: 07/26/2023
Updated By: RWRICHAR
Site Code: 58509
Site Description: Location: The Peekskill Landing site is located in an urban portion in the City of Peekskill, Westchester County. The site consists of a waterfront parcel along the shore of the Hudson River. The site is bordered to the north by a small parcel of undeveloped land and to the east by the Metro-North Railroad, and to the south, by the Peekskill Riverfront Green Park. Site Features: The main site features include a refurbished waterfront bulkhead, large flat grass-covered areas, and scattered trees, some well established and some newly planted. Current Zoning and Land Use: The site is zoned WFI Water Adjacent. This zoning allows municipal parks and the

PEEKSKILL LANDING SITE (Continued) **S113917306**

possibility of special permits for uses such as: marinas; boat clubs; repair and manufacture of boats, sails, and equipment; ferry terminal or boat charter; standard restaurants; and motel/hotels. Past Use of the Site: Past uses include office space, the Tallix Art Foundry operation, a lumber yard, boat repairing/storage facility, stone crushing operation, stove works, and coal storage. Site Geology and Hydrogeology: The site soils were identified as mostly fill material from unknown sources. The depth of fill ranges from 8 to 18 feet below ground surface (bgs) and was composed of materials: asphalt, ash, coal ash, cinders, wood, railroad ties, brick, slag and various types of fill soils. The natural underlying soil was characterized as silt and clay with varying sands and gravel mixed in. Groundwater exists at the site ranging from approximately 3 to 6 feet bgs. Bedrock was not encountered. The groundwater levels at the site are directly related to the tidal influence of the adjacent Hudson River. Groundwater flows from to the west to the southwest.

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), and metals. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

Health Problem: People are not drinking contaminated groundwater because the area is served by public water. Measures are in place to control the potential for coming into contact with subsurface soil and groundwater contamination remaining on the site. Volatile organic compounds in the soil and groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. An evaluation of the potential for soil vapor intrusion to occur will be completed should buildings be constructed on the site.

HW Code: B00183
Control Code: 25
Control Type: INST
Dt record added: 07/19/2010
Dt rec updated: 07/26/2023
Updated By: RWRICHAR
Site Code: 58509
Site Description: Location: The Peekskill Landing site is located in an urban portion in the City of Peekskill, Westchester County. The site consists of a waterfront parcel along the shore of the Hudson River. The site is bordered to the north by a small parcel of undeveloped land and to the east by the Metro-North Railroad, and to the south, by the Peekskill Riverfront Green Park. Site Features: The main site features include a refurbished waterfront bulkhead, large flat grass-covered areas, and scattered trees, some well established and some newly planted. Current Zoning and Land Use: The site is zoned WFI Water Adjacent. This zoning allows municipal parks and the possibility of special permits for uses such as: marinas; boat clubs; repair and manufacture of boats, sails, and equipment; ferry terminal or boat charter; standard restaurants; and motel/hotels. Past Use of the Site: Past uses include office space, the Tallix Art Foundry operation, a lumber yard, boat repairing/storage facility, stone crushing operation, stove works, and coal storage. Site Geology and Hydrogeology: The site soils were identified as mostly fill material from unknown sources. The depth of fill ranges from 8 to 18 feet below ground surface (bgs) and was composed of materials: asphalt, ash, coal ash, cinders, wood, railroad ties, brick, slag and various types of fill soils. The natural underlying soil was characterized as silt and clay with varying sands and gravel mixed in. Groundwater exists at the site ranging from approximately 3 to 6 feet bgs. Bedrock was not encountered. The groundwater levels at the site are directly related to the tidal influence of the adjacent Hudson River. Groundwater flows from to the west to the southwest.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), and metals. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.
Health Problem: People are not drinking contaminated groundwater because the area is

PEEKSKILL LANDING SITE (Continued) **S113917306**

served by public water. Measures are in place to control the potential for coming into contact with subsurface soil and groundwater contamination remaining on the site. Volatile organic compounds in the soil and groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. An evaluation of the potential for soil vapor intrusion to occur will be completed should buildings be constructed on the site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Called (914)231-1903 - Dispatch: They said that the 30 - 40 gal motor oil went into a catch basin and FD cleared the scene. They gave me the Fire Chief's number: (914) 382-1559. fjk 9-15-2020 There is approximately 25 gallons of oil in the catch basin. I dipped an absorbent pad in the basin and it immediately soaked up motor oil. Recommend a contractor to come do the work today. The equipment that leaked has been removed. This is an out of service PBS facility with USTs that should have been removed a long time ago. BTR 9-15-20 Email to WCHD requesting FIR and last inspection. jc 9/15/20 APECCO called out to recover product from the catch basin. Vac truck ETA is 1 hr. Beynan will meet on site to direct work. JG 9/15/20 APECCO is here sweeping up the absorbents. Catch basin has been vac d down and American is planning to return tomorrow to remove oil soaked debris at the bottom. Bottom of the basin is 5 x 5 wide and the oil soaked everything in the bottom. BTR 9-23-20 Inspected facility 9/17 for PBS. Stain from vicinity of small roller along back retaining wall to street. Appears stain on sidewalk and in street was hit with some absorbent. Stain on facility property appears untouched. jc

Bx/West Trbl. Shtr. Hv. J.
Winkelman # 08224 reported that while responding to an emergency
complaint at Automotive Tech.
Services at 231 Washington St. in the Town of Peekskill he discovered
~ 1/2 Ounce of dielectric
fluid on concrete and asphalt in a 6' diameter area. There was/is no
smoke or fire or injuries
involved. There was/is no sewers or waterways affected. J. Winkelman #
08224 also reported that he
spoke to the consumer a Mr. Dartrey Thomas (914)736-3626 the owner of
Automotive Tech. Services who
stated that he was struck by one drop of oil from the aerial joint and
that one drop landed on his
vehicle. Engineering Controls have been placed on the ground to
contain any further leaks and a
trained San Mateo Flaging person will secure the area until the
leaking aerial joint can be
addressed. Bx/West EH&S Sr. Specialist R. Benkwitt # 38373 will be
dispatched to evaluate this
incident. R. Browne # 21646

DEC Memo:	3/20/18: attempted calls to the two numbers listed on the WCDOH PBS FIR, both numbers inactive. attempted to email the address listed on the WCDOH PBS FIR, email is not active. Sending an NOV/STIP letter to the address on the WCDOH PBS FIR via certified mail. BW 4/16/18 calls made to 914-760-0268 (voicemail left with DB) no answer and voicemail box full. BW 4/25/18 NOV sent to Dartrey Thomas returned to DEC on April 11, 2018, not deliverable as addressed . Uploaded to D2. SRK 4/25/18 phone call with site owner Dartrey Thomas (914-760-0268), discussed the NOV/STIP and the new PBS regulation that requires any tank that has been out of service for over 1 year be removed and that we do not know what is going on at the site. He mentioned that they are looking to sell the property. I emailed him a copy of the NOV/STIP to his email (Studebaker24@gmail.com) for him to review and call me with any questions. BW 5/25/18 meeting with Dartrey Thomas, discussed remedial action required including removal of tanks that have been out of service for greater than 1 year. Re-issued Stipulation agreement, he indicated that he is intending to sign but wanted time to review. 6/15/18 signed stipulation agreement received from Dartrey Thomas. RSE executed. BW 6/18/18 sent out email of executed STIP to Dartrey and all CCs. workplan due by 6/28/18. BW 6/28/18 email from Dart indicating that they are getting all parties together and have the terms agreed upon. will reach out to me with a plan this weekend. BW 7/2/18 Dart indicating that the plan will be submitted this afternoon or evening. BW 7/3/18 email received from Dart indicating that the contract is set to be signed within 30 days and then he will complete tank removal and soil sampling. email in D2. BW 7/9/18 update from dart Good morning Brian. I finally was able to get a hold of John Pizzella he will be doing the tank removal. The company for the soil testing and consulting will be Luzon oil. I guess he is a gentleman that works

AUTOMOTIVE TECHNICAL SERVICES (Continued) **S121984237**

with John quite
frequently.Thanks Dart BW 7/18/18 Good morning Brian, I spoke to my attorney last night. Dan is
going to reach out to their attorney today and find out how they are making with the bank. I ll
keep you posted over the next few days. Thanks Dart BW 7/27/18 Good afternoon Brian, yes I do have
some updates ,are you going to be in the office Monday morning where I can talk to you for a few
minutes. If so just let me know what time is good for you so I can give you a call. It s hard for
me to talk right now and I m not sure if you re in the office or not. Thanks Dart BW 8/27/18 sent
email to Dart requesting an update to his plan that has stalled. Called Dart and he discussed he is
having CT Male walkthrough the site to determine equipment needed for tank pull and any other
environmental areas discovered. BW 8/28/18 email to Dart As discussed during our phone conversation
you indicated that you are having CT Associates complete a site assessment on September 11, 2018 to
best determine equipment needed to remove the tanks on the property. Per the attached Stipulation
Agreement please have CT Associates send a workplan, by September 14, 2018, that documents their
plan for tank removal and contamination removal (if encountered) and a schedule of implementation.
I understand that a property transaction has been ongoing at this location but that does not
preclude the fact that you entered into a Stipulation Agreement, on June 15, 2018, in which you
agreed to remove Tanks 1a, 1b, and 4 by July 15, 2018. Three months will have passed without any
action at the site. I would prefer to not move this forward through enforcement and penalties but
without action on your end I will have no choice. BW 9/5/18 email received from CT Male indicating
they are completing a phase 1 site walkthrough on 9/11/18. BW 4/22/19 email from CT Male As we
discussed, C.T. Male Associates is requesting approval to proceed with removal of the
compartmentalized UST at 231 Washington Street as a first step, but we have not been authorized by
our client to conduct any remedial activities at this time. Would you please confirm that this is
acceptable. DEC response As discussed tank removal is an appropriate first step but any spills that
are open on the property cannot be closed until they are remediated. Please reach out to the WCDOH
for permitting required for tank removal. BW 11/4/20 received workplan for site investigation from
EAR. BW 11/12/20 approve of investigation workplan. BW 01-15-21 Investigations completed at both
sites. Castlton working on city permit. Once permits are received we can schedule a start date.
Disposal prices are confirmed. Summary of site investigation is forthcoming. BTR 02-09-21 Castlton

AUTOMOTIVE TECHNICAL SERVICES (Continued) **S121984237**

received permits for UST removal. Sending Greg to the site note areas of snow removal and condition
of utility mark outs. BTR 2/23/21 reassigned to BTR. BW 03-03-21 Castlton mobilized to the site and
removed Tank 1a/1b a compartmentalized 6,000 gallon UST. New spill 2009787 reported for observed GW
contamination. BTR 03-04-21 Tank was inspected by WCHD. Approximately 1,500 gallons liquid vac'd to
holding tank. BTR 03-05-21 Two frac tanks delivered to site to hold contaminated water. Tank 1A/1B
was removed from the site. BTR 03-09-21 Approx. 150 tons of contaminated soil is stockpiled on
site. Ordering backfill material and soil disposal trucks. Excavation reached clean endpoints along
south excavation wall. BTR 03-10-21 Removed canopy and pump island. Begin breaking up concrete. BTR
03-11-21 Castlton backfilled the tank grave and installed a recovery well to continue liquid
removal. BTR 03-12-21 Backfilling complete along the south end of excavation. Breaking up concrete
today and loading out soil next week. BTR 03-15-21 Two trucks arrived to load out soil. BTR
03-16-21 Additional loads of item 4 were delivered and used to continue backfilling previously
excavated tank pit area. The frac tanks are about three quarters full and will be unloaded tomorrow
as dewatering continues. The stockpile was cleared from the southeast corner and excavation
continued in that direction. BTR 03-17-21 Site visit by BDW. Excavation is progressing north. BTR
03-24-21 Site visit by BTR. Excavation was being backfilled with stone. The dispenser island to the
north still has contaminated soil underneath it. The vac truck was dewatering and pumping the water
into frac tanks. Approximately 3,000 gallons per day. Another vac truck used to haul water away.
BTR 03-29-21 EAR estimates 10 days of work remaining. Excavation advances to the north toward
dispenser island. Backfilling will continue after additional material is stockpiled and loaded out.
BTR 04-07-21 The remedial excavation is within a few feet of the main building. The remaining waste
oil AST will be removed when an inspection can be scheduled with the county. Only the northwest
corner of the pump island remains to be excavated. BTR 8/23/21 received closure report from EAR. BW
5/7/24 review closure report. Based upon the information provided this spill is closed. BW

Remarks: NYSDEC completed site visit, noted liquid in the fill spill bucket

Town:	Peekskill (c)
Record Added Date:	02/12/2019
Record Updated Date:	12/27/2021
Update By:	JEBROWN
Site Description:	Location: The Charcoal Mill Tablet Site (site) is 1.51 acres in size, located in a mixed-use area of the City of Peekskill, Westchester County, New York. The site is bordered to the north by Main Street and by Central Avenue to the south. McGregory Brook runs along the southern border of the site through an eight-foot diameter culvert pipe. The site is approximately 0.3 miles east of Peekskill Landing Park and the Hudson River. Site Features: The site has been vacant for 70 years. A majority of a new structure has been erected on-site. The site has a steep grade, the northern portion of the site is approximately 50 feet higher in elevation than the southern portion of the site. Part of the site is within the McGregory Brook flood zone. This brook flows to the west toward the Hudson River. Current Zoning and Land Use: Site zoning is currently Waterfront District-Inland (WF-2), which provides for mixed commercial and residential use. The current zoning allows for the planned use of the site (affordable housing) following remediation. Surrounding properties are used for a mix of residential, commercial, and industrial purposes. Past Use of the Site: Site use dates back to as early as 1830, at which time the western portion of the site operated as a stove works facility and the eastern portion of the site operated as a foundry. In 1902, the foundry mill burned down and was rebuilt. In 1923, the stove works facility burned down. The stove works facility was rebuilt and reopened in 1929. The site was later used for clothing manufacturing and charcoal tablet production. In the 1950s, all site use ended, and all site buildings were demolished. Site Geology and Hydrogeology: The site slopes steeply from north to south. Site soils are characterized as urban land and are generally sandy and gravelly. Depth to groundwater at the site varies due to topography and is approximately 13 feet below ground surface (bgs) in the southern portion of the site. Groundwater flows southwest in the direction of McGregory Brook, an open surface water body bordering the southeastern portion of the site. McGregory Brook is buried in a culvert along the southwest boundary of the site and to the west of the site.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern include SVOCs and metals in soil, cyanide and metals in the groundwater, and VOCs in soil vapor. Remedial actions have achieved soil cleanup objectives for unrestricted use. Prior to Completion of Remediation: Soil and groundwater samples were analyzed for volatile organic compounds

CHARCOAL TABLET MILL SITE (Continued) **S123658105**

(VOCs), semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), metals, cyanide, pesticides, and the emerging contaminants per- and polyfluorinated substances (PFAS) and 1,4-dioxane. Soil vapor samples were analyzed for VOCs. Based on investigations conducted to date, the primary contaminants of concern include SVOCs, metals and PFAS in soils, metals and PFAS in groundwater, and VOCs in soil vapor. Soil: Surface (0-2 inches) and subsurface soil (deeper than 2 inches) samples were collected throughout the site during the RI to document soil conditions in all areas of the site. Surface soil samples were collected from five locations from a depth of 0-2 inches and subsurface samples were collected from 43 locations to depths of up to 40 feet below ground surface (bgs). No VOCs were detected in the soil. Several SVOCs and metals were identified at concentrations that exceed their Restricted Residential Soil Cleanup Objectives (RRSCOs) and Unrestricted Soil Cleanup Objectives (USCOs) including benzo[a]anthracene, benzo[a]pyrene, benzo[b]fluoranthene, chrysene, dibenzo(a,h)anthracene, indeno(1,2,3-c,d)pyrene, cadmium, lead, mercury, selenium, barium, and arsenic. The greatest concentrations for SVOCs were benzo(a)anthracene and benzo(b)fluoranthene at 4.7 parts per million (ppm) each (RRSCO: 1 ppm). These exceedances were found at a depth of 12.5-13 feet bgs. The greatest concentrations for metals encountered were lead at 771 ppm (RRSCO: 400 ppm), barium at 657 ppm (RRSCO: 400 ppm), arsenic at 16.1 ppm (RRSCO: 16 ppm), cadmium at 9.5 ppm (RRSCO: 4.3 ppm), selenium at 4.9 ppm (RRSCO: 4 ppm), and mercury at 1.1 ppm (RRSCO: 0.73 ppm). Within the central portion of the site, USCOs exceedances were encountered to a maximum depth of 16 feet; however, some areas within the central portion did not exceed USCOs. USCO exceedances are present at depths greater than 15 feet in soils along the northern perimeter of the site, but none above RRSCOs in that area, with the exception of the eastern-most sample location. There were several locations across the site that did not exceed any of the unrestricted SCOs (e.g., the southern perimeter). The presence of PAHs and metals on site is related to the historical use of the site and/or was present in fill material added to the site in the past. Detections of perfluorooctanesulfonic acid (PFOS) were found in several soil samples up to 11.1 parts per billion (ppb), compared to the screening level of 1 ppb. Detections of PFOA (perflouorooctanoic acid) were reported in soil samples up to 0.078 ppb; however, all detections were qualified from the laboratory as having blank contamination. VOCs were not detected in site soils. There is no indication soil contamination is migrating off-site. Groundwater: Groundwater samples were collected from 13 monitoring wells throughout the site. Groundwater samples were analyzed for VOCs, SVOCs, metals, cyanide, pesticides, and PCBs as well as the emerging contaminants PFAS and 1,4-dioxane. No VOCs, SVOCs, pesticides, PCBs or 1,4-dioxane were detected in any groundwater samples. Cyanide and the metals iron, manganese, and sodium were detected in groundwater samples collected from the site in exceedance of groundwater standards. The metals observed above standards in groundwater are commonly associated with naturally occurring phenomenon and/or road salt application and were present across the site. Cyanide marginally exceeded the groundwater standard of 0.2 parts per billion (ppb) at one well (MW-11) with a total concentration of 0.22 ppb. The cyanide is possibly associated with historic site operations or an additive to road salt. (PFOA and (PFOS were reported at concentrations of up to 35.5 and 42.5 parts per

CHARCOAL TABLET MILL SITE (Continued) **S123658105**

trillion (ppt), respectively, exceeding the 10 ppt screening levels for groundwater for each. No other individual (non PFOA/PFOS) PFASs exceeded the 100 ppt screening level. The concentrations of total PFAS, including PFOA and PFOS, were reported at levels up to 169.94 ppt, below the 500 ppt screening level for total PFAS in groundwater. Similar concentrations of PFAS were detected in monitoring wells at both the upgradient and downgradient boundaries of the site; however, based on the distribution of PFOS in the soil samples, there may be a slight on-site contribution to PFOS concentrations in groundwater. Soil Vapor: Soil vapor samples were collected at seven locations throughout the site. Soil vapor samples were collected at a depth of 15 feet bgs in the southern portion of the site and a depth of 30 feet bgs in the northern portion of the site. These sampling depths coordinate with the proposed building (parking garage) excavation depths. Soil vapor samples were analyzed for VOCs. The VOCs methylene chloride, tetrachloroethene (PCE), and trichloroethene (TCE) were detected at elevated levels in soil vapor samples. Methylene chloride was detected in two soil vapor samples with a maximum concentration of 240 micrograms per cubic meter (ug/m^3) PCE was detected in all seven soil vapor samples with a maximum concentration of 150 ug/m^3, and TCE was detected in two out of seven soil vapor samples with a maximum concentration of 19 ug/m^3. Soil vapor contamination is likely from an off-site source since VOCs were not detected in soil or groundwater.

Health Problem:	Contact with contaminated soil is no longer a potential concern since all contaminated soil has been removed from the site and replaced with clean fill material. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. A soil vapor intrusion evaluation indicates that soil vapor intrusion is no longer a potential concern for either on-site or off-site buildings.

Site Description:	Location: The Charcoal Mill Tablet Site (site) is 1.51 acres in size, located in a mixed-use area of the City of Peekskill, Westchester County, New York. The site is bordered to the north by Main Street and by Central Avenue to the south. McGregory Brook runs along the southern border of the site through an eight-foot diameter culvert pipe. The site is approximately 0.3 miles east of Peekskill Landing Park and the Hudson River. Site Features: The site has been vacant for 70 years. A majority of a new structure has been erected on-site. The site has a steep grade, the northern portion of the site is approximately 50 feet higher in elevation than the southern portion of the site. Part of the site is within the McGregory Brook flood zone. This brook flows to the west toward the Hudson River. Current Zoning and Land Use: Site zoning is currently Waterfront District-Inland (WF-2), which provides for mixed commercial and residential use. The current zoning allows for the planned use of the site (affordable housing) following remediation. Surrounding

CHARCOAL TABLET MILL SITE (Continued) **S123658105**

properties are used for a mix of residential, commercial, and industrial purposes. Past Use of the Site: Site use dates back to as early as 1830, at which time the western portion of the site operated as a stove works facility and the eastern portion of the site operated as a foundry. In 1902, the foundry mill burned down and was rebuilt. In 1923, the stove works facility burned down. The stove works facility was rebuilt and reopened in 1929. The site was later used for clothing manufacturing and charcoal tablet production. In the 1950s, all site use ended, and all site buildings were demolished. Site Geology and Hydrogeology: The site slopes steeply from north to south. Site soils are characterized as urban land and are generally sandy and gravelly. Depth to groundwater at the site varies due to topography and is approximately 13 feet below ground surface (bgs) in the southern portion of the site. Groundwater flows southwest in the direction of McGregory Brook, an open surface water body bordering the southeastern portion of the site. McGregory Brook is buried in a culvert along the southwest boundary of the site and to the west of the site.

Summary: Contact with contaminated soil is no longer a potential concern since all contaminated soil has been removed from the site and replaced with clean fill material. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. A soil vapor intrusion evaluation indicates that soil vapor intrusion is no longer a potential concern for either on-site or off-site buildings.

Summary: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern include SVOCs and metals in soil, cyanide and metals in the groundwater, and VOCs in soil vapor. Remedial actions have achieved soil cleanup objectives for unrestricted use. Prior to Completion of Remediation: Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), metals, cyanide, pesticides, and the emerging contaminants per- and polyfluorinated substances (PFAS) and 1,4-dioxane. Soil vapor samples were analyzed for VOCs. Based on investigations conducted to date, the primary contaminants of concern include SVOCs, metals and PFAS in soils, metals and PFAS in groundwater, and VOCs in soil vapor. Soil: Surface (0-2 inches) and subsurface soil (deeper than 2 inches) samples were collected throughout the site during the RI to document soil conditions in all areas of the site. Surface soil samples were collected from five locations from a depth of 0-2 inches and subsurface samples were collected from 43 locations to depths of up to 40 feet below ground surface (bgs). No VOCs were detected in the soil. Several SVOCs and metals were identified at concentrations that exceed their Restricted Residential Soil Cleanup Objectives (RRSCOs) and Unrestricted Soil Cleanup Objectives (USCOs) including benzo[a]anthracene, benzo[a]pyrene, benzo[b]fluoranthene, chrysene, dibenzo(a,h)anthracene, indeno(1,2,3-c,d)pyrene, cadmium, lead, mercury, selenium, barium, and arsenic. The greatest concentrations for SVOCs were benzo(a)anthracene and benzo(b)fluoranthene at 4.7 parts per million (ppm) each (RRSCO: 1 ppm). These exceedances were found at a depth of 12.5-13 feet bgs. The greatest concentrations for metals encountered were lead at 771 ppm (RRSCO: 400 ppm), barium at 657 ppm (RRSCO: 400 ppm), arsenic at 16.1 ppm (RRSCO: 16 ppm),

CHARCOAL TABLET MILL SITE (Continued) **S123658105**

cadmium at 9.5 ppm (RRSCO: 4.3 ppm), selenium at 4.9 ppm (RRSCO: 4 ppm), and mercury at 1.1 ppm (RRSCO: 0.73 ppm). Within the central portion of the site, USCOs exceedances were encountered to a maximum depth of 16 feet; however, some areas within the central portion did not exceed USCOs. USCO exceedances are present at depths greater than 15 feet in soils along the northern perimeter of the site, but none above RRSCOs in that area, with the exception of the eastern-most sample location. There were several locations across the site that did not exceed any of the unrestricted SCOs (e.g., the southern perimeter). The presence of PAHs and metals on site is related to the historical use of the site and/or was present in fill material added to the site in the past. Detections of perfluorooctanesulfonic acid (PFOS) were found in several soil samples up to 11.1 parts per billion (ppb), compared to the screening level of 1 ppb. Detections of PFOA (perflouorooctanoic acid) were reported in soil samples up to 0.078 ppb; however, all detections were qualified from the laboratory as having blank contamination. VOCs were not detected in site soils. There is no indication soil contamination is migrating off-site.
Groundwater: Groundwater samples were collected from 13 monitoring wells throughout the site. Groundwater samples were analyzed for VOCs, SVOCs, metals, cyanide, pesticides, and PCBs as well as the emerging contaminants PFAS and 1,4-dioxane. No VOCs, SVOCs, pesticides, PCBs or 1,4-dioxane were detected in any groundwater samples. Cyanide and the metals iron, manganese, and sodium were detected in groundwater samples collected from the site in exceedance of groundwater standards. The metals observed above standards in groundwater are commonly associated with naturally occurring phenomenon and/or road salt application and were present across the site. Cyanide marginally exceeded the groundwater standard of 0.2 parts per billion (ppb) at one well (MW-11) with a total concentration of 0.22 ppb. The cyanide is possibly associated with historic site operations or an additive to road salt. (PFOA and (PFOS were reported at concentrations of up to 35.5 and 42.5 parts per trillion (ppt), respectively, exceeding the 10 ppt screening levels for groundwater for each. No other individual (non PFOA/PFOS) PFASs exceeded the 100 ppt screening level. The concentrations of total PFAS, including PFOA and PFOS, were reported at levels up to 169.94 ppt, below the 500 ppt screening level for total PFAS in groundwater. Similar concentrations of PFAS were detected in monitoring wells at both the upgradient and downgradient boundaries of the site; however, based on the distribution of PFOS in the soil samples, there may be a slight on-site contribution to PFOS concentrations in groundwater.
Soil Vapor: Soil vapor samples were collected at seven locations throughout the site. Soil vapor samples were collected at a depth of 15 feet bgs in the southern portion of the site and a depth of 30 feet bgs in the northern portion of the site. These sampling depths coordinate with the proposed building (parking garage) excavation depths. Soil vapor samples were analyzed for VOCs. The VOCs methylene chloride, tetrachloroethene (PCE), and trichloroethene (TCE) were detected at elevated levels in soil vapor samples. Methylene chloride was detected in two soil vapor samples with a maximum concentration of 240 micrograms per cubic meter (ug/m^3) PCE was detected in all seven soil vapor samples with a maximum concentration of 150 ug/m^3, and TCE was detected in two out of seven soil vapor samples with a maximum concentration of 19 ug/m^3. Soil vapor contamination is likely from an off-site source since VOCs were not detected in soil or groundwater.

DEC Memo:	11/05/12: Tank was supposed to be removed. Unknown action at this time. Still waiting on report. jod 5/03/17: I spoke with Alex at Dorson Environmental. At the time this TTF Spill was reported, the previous owner had a new AST installed. This UST was left in the ground and no further work was performed. A new owner bought the property. New owner was made aware that an out of service UST was present, but did not know there was an open TTF spill report. Tank was removed in December of 2016 by Dorson. Contaminated soil was evident. Remediation work has been completed. Dorson will submit a full report. jod 6/1/17: Dorson Environmental disposed of the leaking UST and a total of 93.75 tons of petroleum contaminated soil. Post excavation soil sample results were submitted for review. Some residual contamination over CP-51 guidance could not be excavated due to safety/structural considerations. Ground water was also impacted and sampled. Sample results show contamination in excess of ground water standards. Area service by municipal water and sewer. Report has been entered into DecDocs. Based upon the available information, no further action is required at this time. jod

Record Added Date:	08/11/2004
Record Updated Date:	01/13/2009
Update By:	JEBROWN
Site Description:	Location Description: The Mill Printing site is located at 102 Ringgold St. in a residential area of the City of Peekskill, Westchester County, NY. Predominant Site Features: The site is located on an incline and depth to bedrock is shallow. The property is currently overgrown. Current Use: Vacant and unused Surrounding Uses: The surrounding use is residential. There is a Senior Living facility nearby, as well as a school. Historical Sources of Contamination: A fire was reported on the site in June of 1991. Explosions were witnessed and unknown quantities of contaminants were potentially released. Investigations/Actions To Date: draft RI rec'd 3/06; supplemental investigation was pending, but never performed by applicant. Current Actions: The site was sold to a new developer (closing 12/1/08). As a condition of the closing, the applicant withdrew from the BCP.
Env Problem:	Contaminants of Concern: Initially unknown pending results of environmental investigation. At the time of the fire, the building contained as many as thirty-five drums of cyanoacrylates (an adhesive), toluene and isopropyl alcohol (flammable solvents) and motor oil. Impacted Media: Based on the draft RI, site soils samples exhibited very minor exceedances of a few SVOCs and lead over the Track 1, unrestricted use RSCOs. There is no overburden groundwater. Bedrock groundwater has not been investigated. Site soil gas data indicate there may be a potential for soil gas to migrate off-site. Further investigation was planned but never performed as site was sold. However, discussions with the consultant for the new owner indicated they would continue investigation activities outside of the BCP, but following applicable regulations/guidance. Known SCG Exceedances: Based on the draft RI, the following exceedances were noted: lead in soil at 410 ppm (vs. 400 ppm SCO), benzo(a)anthracene at 1.3 ppm and benzon(a)pyrene at 1.1 ppm (vs. 1 ppm SCO), freon-113 in soil gas at 857 ug/cu. m, PCE in soil gas at 75.9 ug/cu. m Special Resources Impacted: None
Health Problem:	Not reported

Updated By:	GWCROSS
Site Description:	Location: The site is a former Manufactured Gas Plant (MGP) located on Pemart Avenue in Peekskill, Westchester County (Figure 1). The site is bounded on the west by the Hudson River and Metro North railroad tracks. Vacant land and US Highway 6 border the site to the north and east. A city park and the Peekskill Landing Environmental Restoration Program (ERP) site are located to the south. Site Features: Several buildings occupy the site including the former electric generating plant building. Remnants of one of the former MGP gas holders are still present on the hillside along the eastern part of the site. The Metro North railroad runs through the site. Current Zoning and Land Use: The Site is located on inland property that is zoned WF-2. This zoning generally allows commercial uses, parks and playgrounds, and restaurants of limited size. A homeless shelter occupies one of the on-site buildings. Also a taxi service operates out of a garage. The remainder of the building space is vacant. Past Use of the Site: The MGP operated from 1899 through 1931, when it was placed into stand-by status for several years prior to closure. The electric generating plant operated from 1905 to 1950. After closure of the MGP, the site operated as a gas storage station until 1966. Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. OU-1 is the contaminated area on-site. It consists of the upland area including the railroad tracks and the former MGP and electric generating plant structures. OU-2 is the area of off-site contamination located west of the railroad tracks. It consists of a contaminated portion of land along the railroad tracks and contamination in the sediments of Peekskill Bay of the Hudson River. Site Geology and Hydrogeology: The geology consists of fill underlain by sands, silt, clay and sediment. The fill unit varies across the site but is generally ten to fifteen feet thick. Below the fill is

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S108239547**

the silt and clay layer, which is located at various depths ranging from ten to twenty feet deep. There are interbedded layers of sand present in the silt/clay material. Groundwater is located at approximately 3 to 8 feet below ground surface. Groundwater flow is to the west towards the Hudson River.

Env Problem: Nature and Extent of Contamination: For OU 1: On Site Areas Based upon investigations conducted to date, the primary contaminants of concern include benzene, toluene, ethylbenzene, xylene (BTEX), non-aqueous phase liquid (NAPL), in the form of coal tar and polyaromatic hydrocarbons (PAHs). Soil Soil exceeds cleanup goals for MGP related coal tar and PAHs. Areas of subsurface soil in the vicinity of the gas holders are grossly contaminated with coal tar. Significant non-aqueous phase liquid (NAPL) is present in the former holder areas at depths of approximately three to eight feet below ground surface (bgs). Grossly contaminated soil is evident to the west along the top of the silt and clay layer. In addition, PAH exceedances are found in the surface/subsurface soil across the site. The highest concentrations of total PAHs for surface soil samples were detected at 110 parts per million (ppm) of benzo(a)anthracene, 100 ppm of benzo(a)pyrene, 83 ppm of benzo(b)fluoranthene, 110 ppm of chrysene, 16 ppm of dibenzo(a,h)anthracene and 43 ppm of indeno(1,2,3-cd). In addition, total PAHs were detected in subsurface soil above 500 ppm at numerous locations. The highest detection of total PAHs was in the two to three foot interval of a soil boring at 52,630 ppm. Groundwater - Overburden groundwater quality is impacted with coal tar. Several groundwater monitoring wells were observed to contain MGP related NAPL. The most highly contaminated wells are located downgradient (to the west) of the former gas holders. NAPL has been observed in wells screened at depths ranging from five to twenty feet. The contamination is generally observed in wells screened along the top of the confining silt and clay layer. BTEX compounds were detected in overburden groundwater above their respective groundwater standards. The highest detections of BTEX compounds were in a well located downgradient of the former gas holders screened from 4 - 14 feet below grade. In this well benzene was detected at 51 ppb, ethylbenzene at 560 ppb, toluene at 6.4 ppb and xylene (total) at 100 ppb. The standards are 5 parts per billion (ppb) for each compound except benzene which has a standard of 1 ppb. In general, BTEX was detected in areas where coal tar was observed. Wells which contained NAPL or sheen were not sampled. Soil Vapor - Sub-slab and indoor air samples were collected from both on-site and off-site buildings during the heating season. In addition, five soil vapor samples were collected on-site. Some volatile organic compounds were detected in indoor air at both the on- and off-site sample locations, but at or below typical background concentrations. Upon comparison to corresponding sub-slab soil vapor concentrations and products used and stored within the buildings, it appears the indoor air detections are related to current or past operations within the buildings. Several chlorinated volatile organic compounds, not related to historic MGP operations, were detected at elevated concentrations in both on- and off-site sub-slab soil vapor samples. 1,1,1-trichloroethane (1,1,1-TCA), tetrachloroethene (PCE), and trichloroethene (TCE) were detected in on-site sub-slab soil vapor at concentrations as high as 50, 110, and 4,400 micrograms per cubic meter (mcg/m3), respectively. PCE was detected as high as 130 mcg/m3 in sub-slab soil vapor at the off-site location. PCE and TCE were also detected in the on-site soil vapor samples as high as 1,000

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S108239547**

mcg/m3 and 170,000 mcg/m3, respectively. Sampling indicates that exposure to site-related MGP contamination from soil vapor intrusion is not a concern for the site. However, exposure to volatile organic compounds unrelated to the former MGP facilit) through the soil vapor intrusion pathway represents a concern for one on-site building and exposure to non-MGP related volatile organic compounds represents a potential concern for one off-site building. The Volunteer, in accordance with the Voluntary Cleanup Agreement, is not responsible for remediation of non-MGP related contamination. The owners of affected properties have been notified where mitigation or monitoring of impacts to indoor air is required. For OU 2: Off Site Areas Based upon investigations conducted to date, the primary contaminants of concern include benzene, toluene, ethylbenzene, xylene (BTEX), non-aqueous phase liquid (NAPL) in the form of coal tar, and polyaromatic hydrocarbons (PAHs). Soil - Off-site soil exceeds cleanup goals for MGP related coal tar and PAHs. Off-site areas of subsurface soil downgradient of the former gas holder are grossly contaminated with coal tar. The grossly contaminated soil is the result of coal tar migration to the west from the site along the top of the silt and clay layer and is generally present at depths of approximately 20 to 25 feet in this area. In addition, PAH exceedances were found in the subsurface soil at concentrations above 500 ppm. The highest detection of PAHs was in the 17 to 19 foot interval of a soil boring at 2,034 ppm. Groundwater - Several off-site groundwater monitoring wells were observed to contain MGP related NAPL. The most highly contaminated wells are located downgradient of the former gas holders. NAPL was observed in these wells at depths of approximately 20 to 25 feet below ground surface (bgs). NAPL is generally observed in wells screened along the top of the confining silt and clay layer. BTEX compounds were only detected in wells located in OU-2, which contained NAPL or sheens. Sediment - Coal tar was observed in several sediment borings at depths ranging from five to ten feet below the riverbed in the impacted portion of the Hudson River. The contamination has migrated beneath the river along the top of the confining silt/clay layer and surface sediments. PAHs were also detected in sediment. The highest detection of PAHs was 117,362 ppm in a sediment sample from the 0.5 to 2 foot interval. The sediment investigation indicated that PAH contamination is coincident with visual contamination. Soil Vapor - There are no structures on OU-2 and thus no sampling was performed. Special resources impacted/threatened: During the RI, a Fish and Wildlife Impact Assessment (FWIA) was completed. The FWIA documented that contamination has migrated into the nearby Hudson River sediments and is likely impacting the habitat in the river.

Health Problem: Contact with contaminated soil or groundwater is unlikely unless an individual digs below the ground surface. Contaminated groundwater at the site is not used for drinking or other purposes and the surrounding community is served by a public water supply that obtains water from a distant source. People may come in contact with contaminants present in sediments while entering and exiting the river during recreational activities. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion sampling identified impacts beneath one on-site building

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S108239547**

but none in the indoor air. Therefore, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a current concern. The potential, however, exists for the inhalation of non-MGP related contaminants due to soil vapor intrusion for any future on-site redevelopment. Sampling indicates a similar soil vapor intrusion concern for one off-site building.

Site Description: Transitioning from VCP site V00566 CE - Pemart Ave-Peekskill MGP Site Description Location: The site is a former Manufactured Gas Plant (MGP) located on Pemart Avenue in Peekskill, Westchester County. The site is bounded on the west by the Hudson River and Metro North railroad tracks. Vacant land and US Highway 6 border the site to the north and east. A city park and the Peekskill Landing Environmental Restoration Program (ERP) site are located to the south. Site Features: Several buildings occupy the site including the former electric generating plant building. Remnants of one of the former MGP gas holders are still present on the hillside along the eastern part of the site. The Metro North railroad runs through the site. Current Zoning and Land Use: The Site is located on inland property that is zoned WF-2. This zoning generally allows commercial uses, parks and playgrounds, and restaurants of limited size. A homeless shelter had occupied one of the on-site buildings. Also a taxi service operates out of a garage. The remainder of the building space is vacant. Past Use of the Site: The MGP operated from 1899 through 1931, when it was placed into stand-by status for several years prior to closure. The electric generating plant operated from 1905 to 1950. After closure of the MGP, the site operated as a gas storage station until 1966. Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. OU-1 is the contaminated area on-site. It consists of the upland area including the railroad tracks and the former MGP and electric

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S121933892**

generating plant structures. OU-2 is the area of off-site contamination located west of the railroad tracks. It consists of a contaminated portion of land along the railroad tracks and contamination in the sediments of Peekskill Bay of the Hudson River. Site Geology and Hydrogeology: The geology consists of fill underlain by sands, silt, clay and sediment. The fill unit varies across the site but is generally ten to fifteen feet thick. Below the fill is the silt and clay layer, which is located at various depths ranging from ten to twenty feet deep. There are interbedded layers of sand present in the silt/clay material. Groundwater is located at approximately 3 to 8 feet below ground surface. Groundwater flow is to the west towards the Hudson River.

Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were MGP coal tar in site soil, groundwater and nearby sediments. Coal tar contains BTEX compounds (benzene, toluene, ethylbenzene, and xylene) and PAHs (polycyclic aromatic hydrocarbons). Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil, groundwater and sediment will be managed under a forthcoming Site Management Plan.
Health Problem:	Remedial actions are complete, and measures are in place to prevent potential exposures to remaining site contamination. Additionally, sampling will be conducted to ensure that no additional actions are needed to address via soil vapor intrusion.

Region:	3
Class:	Active: The classification assigned to a non-registry site in any remedial program where work is underway and not yet complete (i. e., Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program and RCRA Corrective action Program sites). This may be used for Manufactured Gas Plant sites or those being remediated under an EPA Cooperative Agreement.
Swis Code:	6012
Town:	Peekskill (c)
Disp Start:	Not reported
Disp Term:	Not reported
Acres:	2.75
Fuse:	Not Identified
Description:	Transitioning from VCP site V00566 CE - Pemart Ave-Peekskill MGP Site Description Location: The site is a former Manufactured Gas Plant (MGP) located on Pemart Avenue in Peekskill, Westchester County. The site is bounded on the west by the Hudson River and Metro North railroad tracks. Vacant land and US Highway 6 border the site to the north and east. A city park and the Peekskill Landing Environmental Restoration Program (ERP) site are located to the south. Site Features: Several buildings occupy the site including the former electric generating plant building. Remnants of one of the former MGP gas holders are still present on the hillside along the eastern part of the site. The Metro North railroad runs through the site. Current Zoning and Land Use: The Site is located on inland property that is zoned WF-2. This zoning generally allows commercial uses, parks and playgrounds, and restaurants of limited size. A homeless shelter had occupied one of the on-site buildings. Also a taxi service operates out of a garage. The remainder of the building space is vacant. Past Use of the Site: The MGP operated from 1899 through 1931, when it was placed into stand-by status for several years prior to closure. The electric generating plant operated from 1905 to 1950. After closure of the MGP, the site operated as a gas storage station until 1966. Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. OU-1 is the contaminated area on-site. It consists of the upland area including the railroad tracks and the former MGP and electric generating plant structures. OU-2 is the area of off-site contamination located west of the railroad tracks. It consists of a contaminated portion of land along the railroad tracks and

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S121933892**

	contamination in the sediments of Peekskill Bay of the Hudson River. Site Geology and Hydrogeology: The geology consists of fill underlain by sands, silt, clay and sediment. The fill unit varies across the site but is generally ten to fifteen feet thick. Below the fill is the silt and clay layer, which is located at various depths ranging from ten to twenty feet deep. There are interbedded layers of sand present in the silt/clay material. Groundwater is located at approximately 3 to 8 feet below ground surface. Groundwater flow is to the west towards the Hudson River.
Assess Env:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were MGP coal tar in site soil, groundwater and nearby sediments. Coal tar contains BTEX compounds (benzene, toluene, ethylbenzene, and xylene) and PAHs (polycyclic aromatic hydrocarbons). Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil, groundwater and sediment will be managed under a forthcoming Site Management Plan.
Assess Doh:	Remedial actions are complete, and measures are in place to prevent potential exposures to remaining site contamination. Additionally, sampling will be conducted to ensure that no additional actions are needed to address via soil vapor intrusion.

Address:	189-199 NORTH WATER STS.
City,State,Zip:	PEEKSKILL, NY 11111
Region:	3
Class:	No Further Action at this Time: Sites are given a classification of "N" when: the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program; a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced; a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate or remediate the site.

Description:	VCP ended in July 2018. This site was transferred to the SSF program and is being tracked as #360166. Location: The site is a former

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S121933892**

Manufactured Gas Plant (MGP) located on Pemart Avenue in Peekskill, Westchester County (Figure 1). The site is bounded on the west by the Hudson River and Metro North railroad tracks. Vacant land and US Highway 6 border the site to the north and east. A city park and the Peekskill Landing Environmental Restoration Program (ERP) site are located to the south. Site Features: Several buildings occupy the site including the former electric generating plant building. Remnants of one of the former MGP gas holders are still present on the hillside along the eastern part of the site. The Metro North railroad runs through the site. Current Zoning and Land Use: The Site is located on inland property that is zoned WF-2. This zoning generally allows commercial uses, parks and playgrounds, and restaurants of limited size. A homeless shelter occupies one of the on-site buildings. Also a taxi service operates out of a garage. The remainder of the building space is vacant. Past Use of the Site: The MGP operated from 1899 through 1931, when it was placed into stand-by status for several years prior to closure. The electric generating plant operated from 1905 to 1950. After closure of the MGP, the site operated as a gas storage station until 1966. Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. OU-1 is the contaminated area on-site. It consists of the upland area including the railroad tracks and the former MGP and electric generating plant structures. OU-2 is the area of off-site contamination located west of the railroad tracks. It consists of a contaminated portion of land along the railroad tracks and contamination in the sediments of Peekskill Bay of the Hudson River. Site Geology and Hydrogeology: The geology consists of fill underlain by sands, silt, clay and sediment. The fill unit varies across the site but is generally ten to fifteen feet thick. Below the fill is the silt and clay layer, which is located at various depths ranging from ten to twenty feet deep. There are interbedded layers of sand present in the silt/clay material. Groundwater is located at approximately 3 to 8 feet below ground surface. Groundwater flow is to the west towards the Hudson River.

Assess Env: Nature and Extent of Contamination: For OU 1: On Site Areas Based upon investigations conducted to date, the primary contaminants of concern include benzene, toluene, ethylbenzene, xylene (BTEX), non-aqueous phase liquid (NAPL), in the form of coal tar and polyaromatic hydrocarbons (PAHs). Soil ? Soil exceeds cleanup goals for MGP related coal tar and PAHs. Areas of subsurface soil in the vicinity of the gas holders are grossly contaminated with coal tar. Significant non-aqueous phase liquid (NAPL) is present in the former holder areas at depths of approximately three to eight feet below ground surface (bgs). Grossly contaminated soil is evident to the west along the top of the silt and clay layer. In addition, PAH exceedances are found in the surface/subsurface soil across the site. The highest concentrations of total PAHs for surface soil samples were detected at 110 parts per million (ppm) of benzo(a)anthracene, 100 ppm of benzo(a)pyrene, 83 ppm of benzo(b)fluoranthene, 110 ppm of chrysene, 16 ppm of dibenzo(a,h)anthracene and 43 ppm of indeno(1,2,3-cd). In addition, total PAHs were detected in subsurface soil above 500 ppm at numerous locations. The highest detection of total PAHs was in the two to three foot interval of a soil boring at 52,630 ppm. Groundwater - Overburden groundwater quality is impacted

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S121933892**

with coal tar. Several groundwater monitoring wells were observed to contain MGP related NAPL. The most highly contaminated wells are located downgradient (to the west) of the former gas holders. NAPL has been observed in wells screened at depths ranging from five to twenty feet. The contamination is generally observed in wells screened along the top of the confining silt and clay layer. BTEX compounds were detected in overburden groundwater above their respective groundwater standards. The highest detections of BTEX compounds were in a well located downgradient of the former gas holders screened from 4 - 14 feet below grade. In this well benzene was detected at 51 ppb, ethylbenzene at 560 ppb, toluene at 6.4 ppb and xylene (total) at 100 ppb. The standards are 5 parts per billion (ppb) for each compound except benzene which has a standard of 1 ppb. In general, BTEX was detected in areas where coal tar was observed. Wells which contained NAPL or sheen were not sampled. Soil Vapor - Sub-slab and indoor air samples were collected from both on-site and off-site buildings during the heating season. In addition, five soil vapor samples were collected on-site. Some volatile organic compounds were detected in indoor air at both the on- and off-site sample locations, but at or below typical background concentrations. Upon comparison to corresponding sub-slab soil vapor concentrations and products used and stored within the buildings, it appears the indoor air detections are related to current or past operations within the buildings. Several chlorinated volatile organic compounds, not related to historic MGP operations, were detected at elevated concentrations in both on- and off-site sub-slab soil vapor samples. 1,1,1-trichloroethane (1,1,1-TCA), tetrachloroethene (PCE), and trichloroethene (TCE) were detected in on-site sub-slab soil vapor at concentrations as high as 50, 110, and 4,400 micrograms per cubic meter (mcg/m3), respectively. PCE was detected as high as 130 mcg/m3 in sub-slab soil vapor at the off-site location. PCE and TCE were also detected in the on-site soil vapor samples as high as 1,000 mcg/m3 and 170,000 mcg/m3, respectively. Sampling indicates that exposure to site-related MGP contamination from soil vapor intrusion is not a concern for the site. However, exposure to volatile organic compounds unrelated to the former MGP facilit) through the soil vapor intrusion pathway represents a concern for one on-site building and exposure to non-MGP related volatile organic compounds represents a potential concern for one off-site building. The Volunteer, in accordance with the Voluntary Cleanup Agreement, is not responsible for remediation of non-MGP related contamination. The owners of affected properties have been notified where mitigation or monitoring of impacts to indoor air is required. For OU 2: Off Site Areas Based upon investigations conducted to date, the primary contaminants of concern include benzene, toluene, ethylbenzene, xylene (BTEX), non-aqueous phase liquid (NAPL) in the form of coal tar, and polyaromatic hydrocarbons (PAHs). Soil - Off-site soil exceeds cleanup goals for MGP related coal tar and PAHs. Off-site areas of subsurface soil downgradient of the former gas holder are grossly contaminated with coal tar. The grossly contaminated soil is the result of coal tar migration to the west from the site along the top of the silt and clay layer and is generally present at depths of approximately 20 to 25 feet in this area. In addition, PAH exceedances were found in the subsurface soil at concentrations above 500 ppm. The highest detection of PAHs was in the 17 to 19 foot interval of a soil boring at 2,034 ppm. Groundwater - Several off-site groundwater monitoring wells were observed to contain MGP

CE - PEMART AVE-PEEKSKILL MGP (Continued) **S121933892**

related NAPL. The most highly contaminated wells are located downgradient of the former gas holders. NAPL was observed in these wells at depths of approximately 20 to 25 feet below ground surface (bgs). NAPL is generally observed in wells screened along the top of the confining silt and clay layer. BTEX compounds were only detected in wells located in OU-2, which contained NAPL or sheens. Sediment - Coal tar was observed in several sediment borings at depths ranging from five to ten feet below the riverbed in the impacted portion of the Hudson River. The contamination has migrated beneath the river along the top of the confining silt/clay layer and surface sediments. PAHs were also detected in sediment. The highest detection of PAHs was 117,362 ppm in a sediment sample from the 0.5 to 2 foot interval. The sediment investigation indicated that PAH contamination is coincident with visual contamination. Soil Vapor - There are no structures on OU-2 and thus no sampling was performed. Special resources impacted/threatened: During the RI, a Fish and Wildlife Impact Assessment (FWIA) was completed. The FWIA documented that contamination has migrated into the nearby Hudson River sediments and is likely impacting the habitat in the river.

Assess Doh: Contact with contaminated soil or groundwater is unlikely unless an individual digs below the ground surface. Contaminated groundwater at the site is not used for drinking or other purposes and the surrounding community is served by a public water supply that obtains water from a distant source. People may come in contact with contaminants present in sediments while entering and exiting the river during recreational activities. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion sampling identified impacts beneath one on-site building but none in the indoor air. Therefore, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a current concern. The potential, however, exists for the inhalation of non-MGP related contaminants due to soil vapor intrusion for any future on-site redevelopment. Sampling indicates a similar soil vapor intrusion concern for one off-site building.

DEC Memo:	10/30/11 Same as 1109500. Initially reported by PD and Westchester County. County had said transformer was down in roadway in commercial area. They also reported that there was no issues of concern, just needed clean up. I called ERT, who sent someone investigate. Con Ed then reported this spill number and an NRC report. Catch basin affected. Contractor route. jc 11/4/11: DEC site inspection. Con Ed crew is on site, drilling to install a new utility pole. Several of the poles on this street were knocked down during the storm last weekend. The catch basins are clean. Some large areas of staining still apparent on the black top. A few small areas remain where speddi-dry still needs to be swept up and drummed for disposal. Con Ed still working on this clean up. jod
Remarks:	Caller advised transformer spilled entire contents due to weather unknown if all 75 gallons went into the catch basin. Clean up is pending.

Hazardous Waste Summary:

Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	10-24-12 Called and spoke with Kathy and then Joe Minnerly. They have 5 - 2k tanks on property which all passed except for this one. Air was heard entering tank. City will be uncovering tank so that US Tank Tech can investigate further to determine cause. Tank is only 10-12 years old so they believe it is a piping problem. Told Joe to make sure they contact WCHD with status once they have determined what the problem is. jm 11/14/2012: Tank passed a retest after piping was repaired. Report entered into eDocs. Based upon the information provided, no further action is required at this time. jod

DEC Memo:	9-9-22 PBS 3-410578. Steven Shelewet with Westchester Co. was doing an inspection and directed a spill be called in. Water was observed in the interstitial of the 2K tank, which is the only one associated with the facility. only tank at location. USA Tank Tech has been contracted to conduct a tightness test for the inner and outer tank. Test anticipated to be completed 9-12-22. ML 9/12/22 Spoke with US Tank Tech. Technician Came in this morning. Interstitial port was previously pumped dry by outside contractor. No water found in internal tank and interstitial space was confirmed dry. Internal tank tightness tested and failed. Following test, interstitial port contained ~4 of oil water mixture. Interstitial pumped dry again and held tight. City of Peekskill will uncover top of tank and see what repairs can be performed. BAG Update: Tightness Test Performed @ 8:10 AM Interstitial Space Port Test preformed @ 8:45AM Test reports out tomorrow. BAG 9/27/22- Update from UST Tank Tech who performed another test of the tank at this site today: Today the top of the tank had been uncovered and repairs were attempted. The interstitial port had 3 of mixed product - 1 water and 2 oil. Inside of the tank there was 3 of product and some water. The tank was isolated from the lines, retested and failed the test. After the test the interstitial space had more oil in it. This and test results indicate that the internal wall of the tank is compromised. Carlos Castillo from City of Peekskill indicated that they intend to have the tank removed, likely this week. -MS 10/28/22 Gallinger Environmental Management submitted a Tank Closure report to the William Eilbacher from the WCHD. It was an interstitial leak with no contamination detected in the six soil samples taken from the tank grave. Based on the information in the report, NFA. TG

Record Upd: 05/07/2025
Updated By: AMOMOROG
Site Description: Location: The CE-Central Avenue Peekskill Manufactured Gas Plant (MGP) site is located on Central Avenue in the City of Peekskill, Westchester County. Along the eastern border is a continuous row of buildings containing small shops along North Division Street. To the north of the property is a parking garage and to the west is a parking garage with apartments located above the garage. Site Features: This irregularly shaped site comprises approximately 0.4 acres in a mixed commercial and residential area. On the site are a paved municipal parking lot, a parking garage, and an apartment building. Current Zoning and Land Use: The site is zoned commercial (Central Commercial District). The current use is commercial and residential. Past Uses of the Site: Until approximately 1900, it was an MGP site. Following the operations of the MGP, the site was used for storage from 1900 to around 1920, and then for mixed government (police station and jail) and commercial use (garage, parking) until the mid-1970s. Since that time, the site has been used for parking, with a small portion of the site used for an apartment building since 1990. MGP operations (from the mid 1800s until approximately 1900) led to site contamination. Some of the benzene, toluene, ethylbenzene, and xylenes (BTEX) contamination may be linked to one or more petroleum spills. Site Geology and Hydrology: The soils at the site contain four units above the bedrock. The top layer across the entire site is a fill unit 3 to 11 feet thick. Beneath the fill in the center of the site and along the southern site boundary is a non-continuous sand unit. Beneath the fill or sand unit along the eastern and southern site boundaries is a silt and peat unit. Across much of the site, underneath the fill, sand, and/or the silt and peat units is saprolite, a weathered bedrock unit. The borings did not encounter a saprolite unit beneath the parking garage or the eastern site boundary. Bedrock is at depths of 3 to 16.7 feet below the ground surface. There are no surface water bodies at or near the site. McGregory s Brook may be present in a culvert buried beneath the site but was not encountered in any subsurface activities. Precipitation at the site drains into the storm water system except when it infiltrates to the subsurface in the limited landscaped areas. The water table ranges from 4.25 to 11.42 feet below the ground surface. Groundwater flows in the overburden soils from north to south - southwest. This site had been tracked through March 31, 2018 under the defunct voluntary program with Site No. V00567.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were benzene, toluene, ethylbenzene, xylenes (BTEX) and polynuclear aromatic hydrocarbons (PAHs) in on-site soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under an interim Site Management Plan, pending the issuance of an environmental easement.
Health Problem: This former MGP site is almost entirely covered by asphalt, buildings

CE - CENTRAL AVE-PEEKSKILL MGP (Continued) **S109059130**

and/or a parking garage. The area is served by public water. An interim remedial measure was implemented to remove coal tar and petroleum-impacted soil from under the parking lot. A soil vapor investigation on the site found no evidence of a potential indoor air exposure pathway.

Site Description: This site is now being tracked under Site No. 360167. Location: The CE-Central Avenue Peekskill Manufactured Gas Plant (MGP) site is located on Central Avenue in the City of Peekskill, Westchester County. Along the eastern border is a continuous row of buildings containing small shops along North Division Street. To the north of the property is a parking garage and to the west is a parking garage with apartments located above the garage. Site Features: This irregularly shaped site comprises approximately 0.4 acres in a mixed commercial and residential area. On the site are a paved municipal parking lot, a parking garage, and an apartment building. Current Zoning and Land Use: The site is zoned commercial (Central Commercial District). The current use is commercial and residential. Past Uses of the Site: Until approximately 1900, it was an MGP site. Following the operations of the MGP, the site was used for storage from 1900 to around 1920, and then for mixed government (police station and jail) and commercial use (garage, parking) until the mid-1970s. Since that time, the site has been used for parking, with a small portion of the site used for an apartment building since 1990. MGP operations (from the mid 1800s until approximately 1900) led to site contamination. Some of the benzene, toluene, ethylbenzene, and xylenes (BTEX) contamination may be linked to one or more petroleum spills. Site Geology and Hydrology: The soils at the site contain four units above the bedrock. The top layer across the entire site is a fill unit 3 to 11 feet thick. Beneath the fill in the center of the site and along the southern site boundary is a non-continuous sand unit. Beneath the fill or sand unit along the eastern and southern site boundaries is a silt and peat unit. Across much of the site, underneath the fill, sand, and/or the silt and peat units is saprolite, a weathered bedrock unit. The borings did not encounter a saprolite unit beneath the parking garage or the eastern site boundary. Bedrock is at depths of 3 to 16.7 feet below the ground surface. There are no surface water bodies at or near the site. McGregory s Brook may be present in a culvert buried beneath the site but was not encountered in any subsurface activities. Precipitation at the site drains into the storm water system except when it infiltrates to the subsurface in the limited landscaped areas. The water table ranges from 4.25 to 11.42 feet below the ground surface. Groundwater flows in the overburden soils from north to south - southwest. This site is being managed under Site #: 360157.
Env Problem: Nature and Extent of Contamination: A Site Characterization was completed in 2003 which revealed localized MGP contamination. In 2004, Con Ed completed an interim remedial measure (IRM) that removed approximately 161 cubic yards of contaminated soil. IRM documentation sampling detected residual contamination in soil that ranged from 2 to 532 parts per million (ppm) for PAHs and non-detect to 22 ppm for BTEX compounds. A Supplemental RI investigation showed lead in soil at 1,100 ppm (5-7ft) and 1,680 ppm (9-10ft) at one of the well locations up gradient from the IRM. Groundwater contamination is localized. Since the IRM, the groundwater contamination decreased from 7,107 to 212 parts per billion (ppb) for PAHs and from 3,936 to 2,262 ppb for BTEX compounds.
Health Problem: This former MGP site is almost entirely covered by asphalt, buildings and/or a parking garage. The area is served by public water. An interim remedial measure was implemented to remove coal tar and petroleum-impacted soil from under the parking lot. A soil vapor

Address:	900 CENTRAL AVE & 901 MAIN ST
City,State,Zip:	PEEKSKILL, NY 10566
Region:	3
Class:	No Further Action at this Time: Sites are given a classification of "N" when: the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program; a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced; a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate or remediate the site.

Assess Env: Nature and Extent of Contamination: A Site Characterization was completed in 2003 which revealed localized MGP contamination. In 2004, Con Ed completed an interim remedial measure (IRM) that removed approximately 161 cubic yards of contaminated soil. IRM documentation sampling detected residual contamination in soil that ranged from 2 to 532 parts per million (ppm) for PAHs and non-detect to 22 ppm for BTEX compounds. A Supplemental RI investigation showed lead in soil at 1,100 ppm (5-7ft) and 1,680 ppm (9-10ft) at one of the well locations up gradient from the IRM. Groundwater contamination is localized. Since the IRM, the groundwater contamination decreased from 7,107 to 212 parts per billion (ppb) for PAHs and from 3,936 to 2,262 ppb for BTEX compounds.

Assess Doh: This former MGP site is almost entirely covered by asphalt, buildings and/or a parking garage. The area is served by public water. An interim remedial measure was implemented to remove coal tar and petroleum-impacted soil from under the parking lot. A soil vapor investigation on the site found no evidence of a potential indoor air exposure pathway.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

MEARL CORP (Continued) **1000363825**

Waste Code: D022
Waste Description: Chloroform

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: K006
Waste Description: Wastewater Treatment Sludge From The Production Of Chrome Oxide Green Pigments (Anhydrous And Hydrated).

Waste Code: K007
Waste Description: Wastewater Treatment Sludge From The Production Of Iron Blue Pigments.

Waste Code: LABP
Waste Description: Lab Pack

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

MEARL CORP (Continued) **1000363825**

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U069
Waste Description: 1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate

Waste Code: U088
Waste Description: 1,2-Benzenedicarboxylic Acid, Diethyl Ester (Or) Diethyl Phthalate

Waste Code: U102
Waste Description: 1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U119
Waste Description: Ethyl Methanesulfonate (Or) Methanesulfonic Acid, Ethyl Ester

Waste Code: U151
Waste Description: Mercury

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

ORPHAN SUMMARY

City	EDR ID	Site Name	Site Address	Zip	Database(s)
		NO SITES FOUND			

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

ILI: New York State Inactive Landfill Initiative
A solid waste site priority list of mitigation and remedial activities to address sites causing, or substantially contributing to, impairments of drinking water quality. Inactive solid waste disposal sites, primarily landfills, and their potential impact on New York?s drinking water resources from site-related contaminants, with a focus on emerging contaminants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2025

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

UTM Y (Meters):	4570921.0
Elevation:	16 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50025441 PEEKSKILL, NY
Version Date:	2023

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

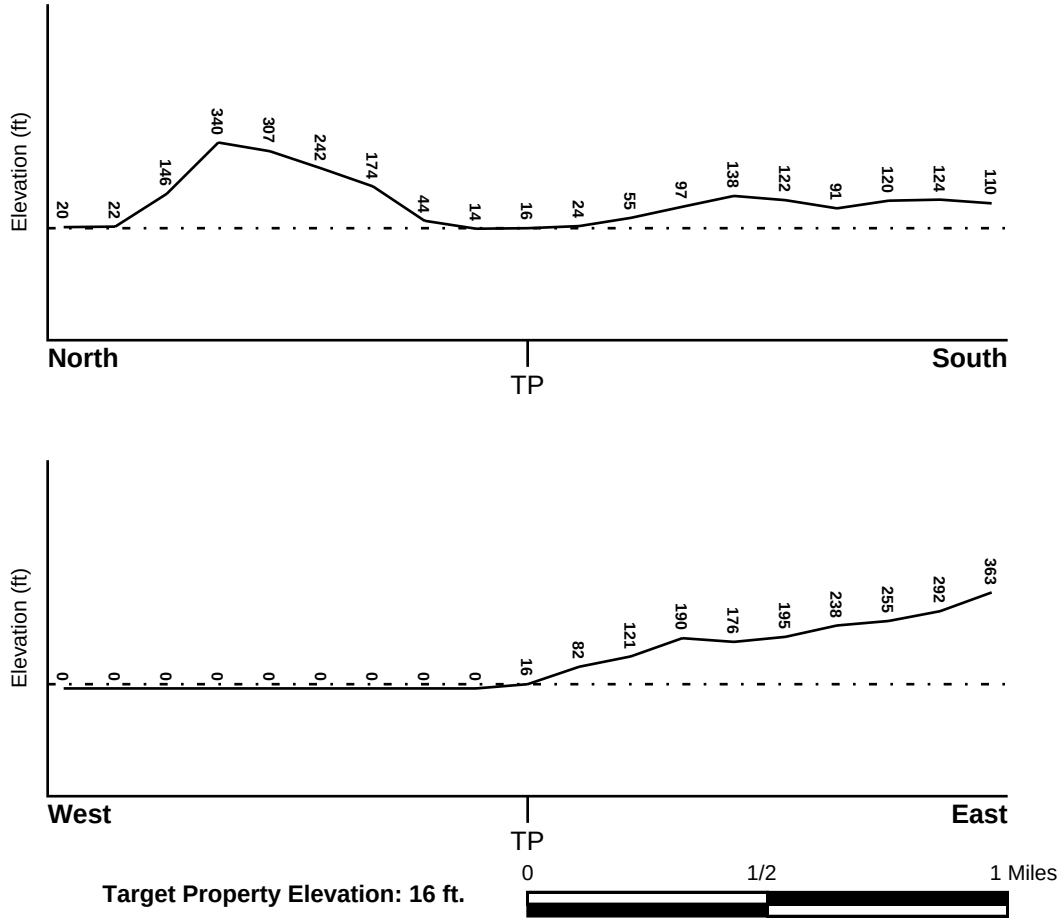

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 16 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
36119C0016F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
36087C0037G	FEMA FIRM Flood data
36087C0039G	FEMA FIRM Flood data
36119C0018F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PEEKSKILL	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

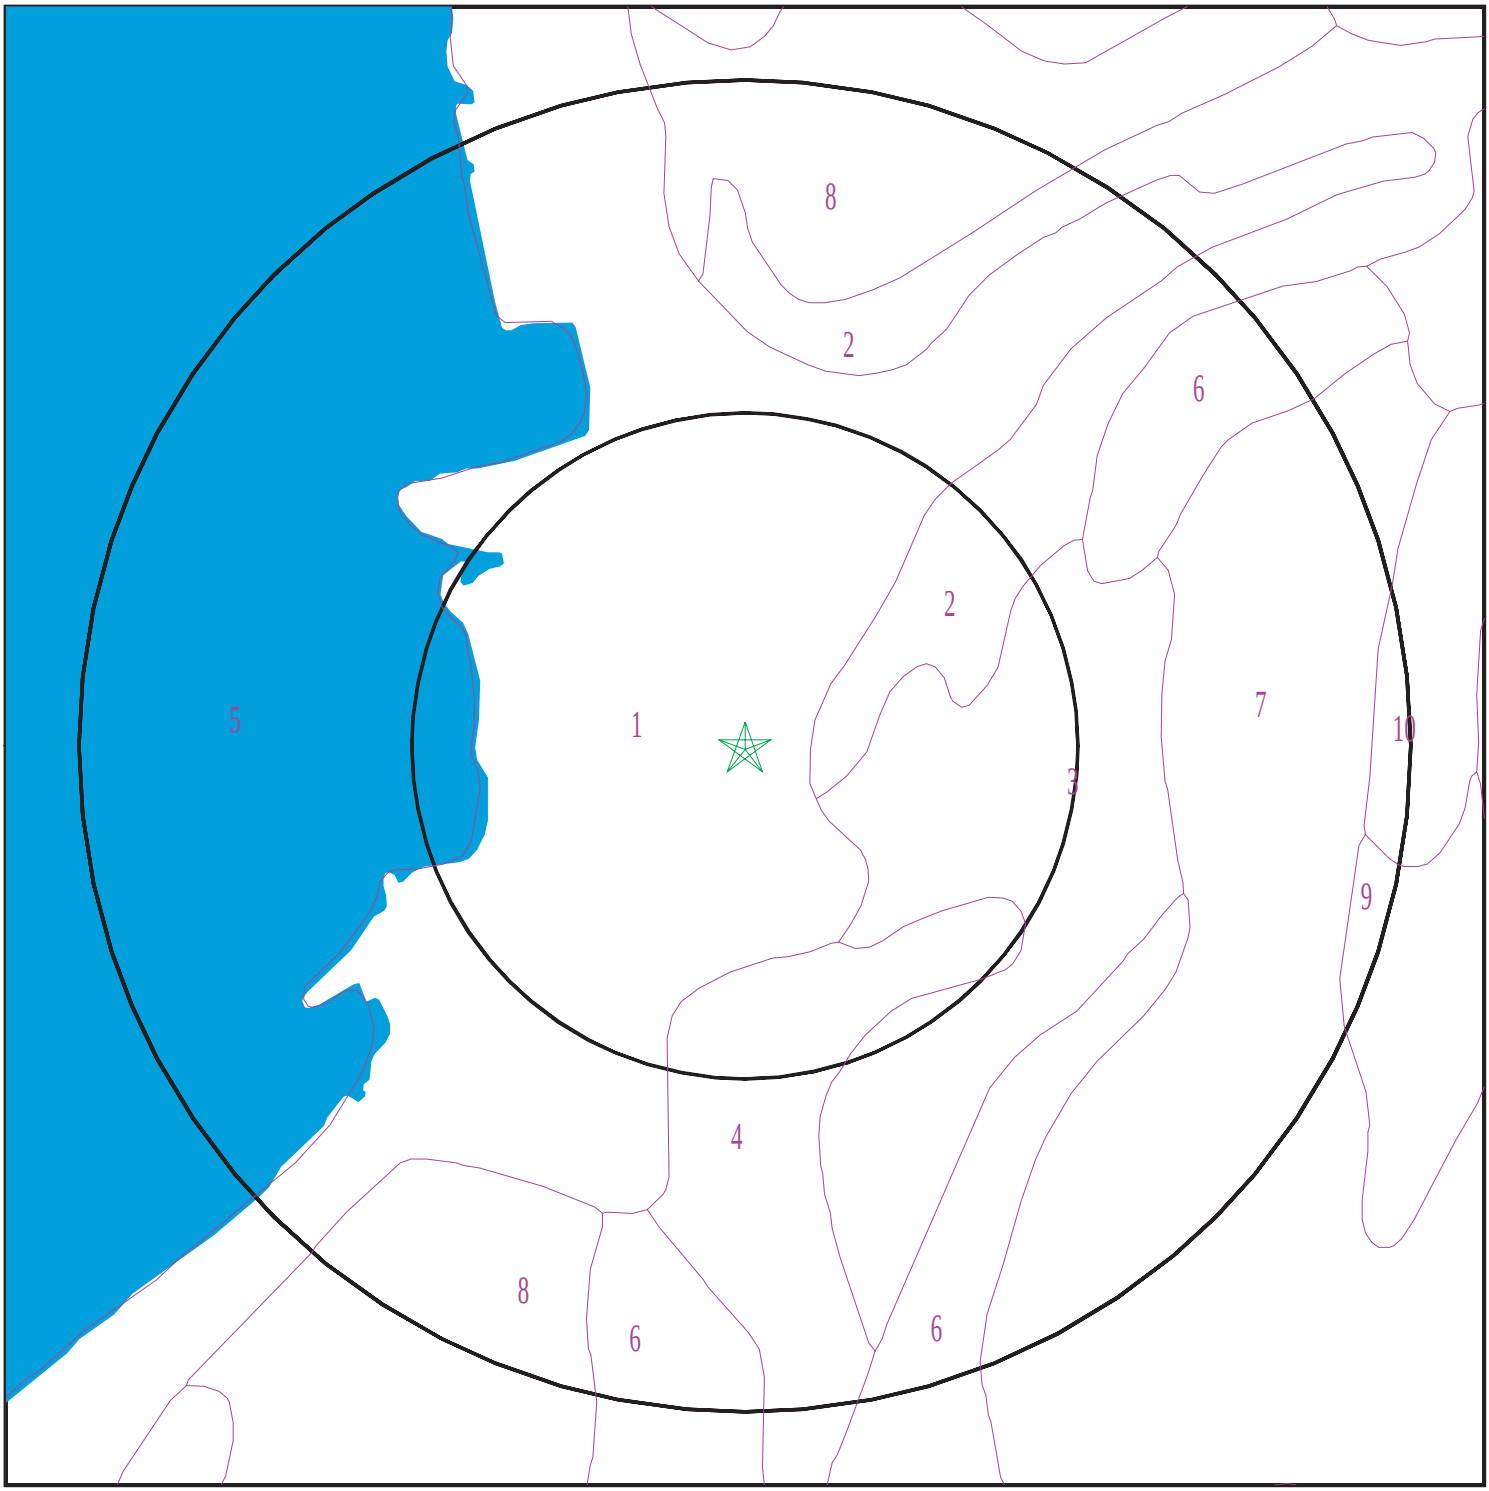

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udorthents

Soil Surface Texture: gravelly loam

Hydrologic Group: Not reported

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 127 inches

Depth to Watertable Min: > 38 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 42 Min: 0.42	Max: 8.4 Min: 4.5
2	3 inches	72 inches	very gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 42 Min: 0.42	Max: 8.4 Min: 4.5

Soil Map ID: 2

Soil Component Name: Charlton

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 4	Max: 6 Min: 4.5
2	7 inches	24 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 4	Max: 6 Min: 4.5
3	24 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 4	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Charlton

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SESI Consulting Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by SESI Consulting Engineers were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA
Project: 14373

Phase I Environmental Site Assessment Questionnaire
For ASTM E 1527-21

According to the American Society for Testing and Materials (ASTM) standard practice for environmental site assessments (Designation: E 1527-21) "All Appropriate Inquiry" (AAI) (40 CRF 312.20) standard, the client must provide the following information (if available) to the environmental consultant during a Phase I Environmental Site Assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

SESI Project Name: 22-24 South Water Street
SESI Project Number: 14373

Client/Responsible Party Information (person completing this questionnaire) :

Name: Samuel S. Warden-Hertz
Title: Planner
Interest to Property: City of Peekskill
Street Address: 840 Main Street
City: Peekskill
State: New York
Phone: 914-734-4214

Property Owner/Tenant Site Information:

Company Name:
Description of Operations:
Street Address:
Township:
City:
County/State:
Size of Property:
Block/Lot:
Phone:
Contact:

I, Samuel Warden-Hertz, to the best of my knowledge, have truthfully provided the information herein.

DATE

Identification of the site contact and how the contact can be reached (person who will conduct or conducted the site walk and/or will provide or provided access):

1. ENVIRONMENTAL CLEANUP LIENS/OTHER LIENS

a. Are there any environmental cleanup liens/and or other liens that are filed or recorded against the site in any applicable jurisdiction?

None known.

2. ACTIVITY OR USE LIMITATIONS AND WETLANDS

A) Are you aware of any environmental restrictions/limitations to the use of the property? (i.e. Engineering or Institutional Controls)

None known

i) If yes, please explain.

ii) Can you provide any lien or deed restriction paperwork (ie. deed notice or environmental lien)?

B) Is any of the site to your knowledge used as a child-care facility or are plans in place to have a child-care facility on-site?

No

C) Are there any wetlands or marshlands at the site to your knowledge?

No

3. COMMONLY KNOW OR REASONABLE ASCERTAINABLE INFORMATION ABOUT THE PROPERTY

A) Do you have any knowledge of the past uses of the property?

Please refer to historic maps for past uses. No known uses beyond historic maps beyond current use as municipal commuter parking

i) If so, please explain (dates or tenant contracts should be collected if available for any commercial or industrial uses).

ii) Has the property ever been used for industrial purposes?

See above

a. If yes can you provide the NAICS code for the industrial use?

B) Do you know of any Environmental Spills Incident Numbers or Notices of Violation? (i.e., tank removals/Unregulated Heating Oil Tank removals)?

None known

i) If yes, please provide information or available paperwork (ie. former reports or incident numbers)

C) Do you know if the site has been subject to an environmental cleanup or received a NYSDEC Certificate of Completion in the past?

None known

D) Do you know of any underground storage tanks (USTs), aboveground storage tanks (ASTs) and/or septic tanks?

None known

E) Do any buildings on the site have a basement or crawlspace?

N/A

F) Does the site use/have an incinerator, compactor, or dumpster? (This should include any cooking oil containers or other media.)

I believe the adjacent property to the north uses a portion of the site to hold a dumpster for their business, Homestyle Bakery

G) How is heating and cooling supplied to the site?

N/A

a. If by oil, name of usual supplier:

b. If by gas, name of utility company:

c. If by electric, name of utility company:

H) How is water supplied to the site?

N/A

a. Local municipal hookup?
    i. If so, name of provider:

b. Potable Well?
    i. If so, well number/designation and location:

I) Is any portion of the site prone to flooding or has had a significant flood?

Per the 2007 FEMA FIRM 36119C0016F, all or portions of the site are within Zone X.

Per the 2014 Preliminary FIRM, all or portions of the site are within Zone AE with a Base Flood Elevation of 9 FEET

4. ADJOINING PROPERTIES

See #3

A) Have any of the adjoining properties been used for Industrial purposes currently or in the past?

i) If yes, please provide compass direction and name (if known) of the property.

B) Have any of the adjoining properties been used as a gas station, dry cleaner or auto shop currently or in the past?

i) If yes, please provide compass direction and name (if known) of the property.

C) Have any of the adjoining properties been used for commercial purposes currently or in the past?

i) If yes, please provide compass direction and name/ industry (if known) of the property.

D) Have any adjoining properties been used as a high school in currently or in the past?

i) If yes, please provide compass direction and name (if known) of the property.

E) Are any of the adjoining properties currently or in the future (to your knowledge) a child-care facility?

i) If yes, please provide compass direction and name (if known) of the property.

5. ENVIRONMENTAL SITE CONDITIONS

A) Are there any present environmental conditions at the site that may prove an obvious threat to the environment or human health?

None known

B) Do you have any chemical storage areas?

No

C) Do you have any drum storage areas?

No

D) Do you have any USTs or ASTs not related to heating?

None known

E) Do you have any of the following at or on the site:

a. On-site dry cleaning or washing machine facilities?

No

b. Landfills or known fill areas?

None known

c. Machinery or equipment that uses hazardous or petroleum compounds?

No

d. Dust collectors?

No

e. Spray booths?

No

f. Floor drains or sumps?

No

g. Other machinery or equipment?

No

7. ADDITIONAL PERTINENT INFORMATION

A) Please provide the reason why the Phase I is required (i.e., sale, purchase, transfer, due diligence, cessation of operation, off-site source of groundwater contamination).

The City of Peekskill is in negotiations with MSquared for the sale of the property for Transit-Oriented Development

B) Please provide the complete and correct address for the property (any previous surveys maps or any change in tax lot and blocks that are proposed or not yet recorded at the local/county municipality or re- zoning plans):

This site consists of 2 Tax Lots:
- 22 South Water Street | SBL: 32.12-2-3 | OLD SBL:18-1-3 | Previous frontage was West St, now demapped
- 24 South Water Street | SBL: 32.12-2-4 | OLD SBL: 18-1-4

C) Any additional services or out-of-scope services you wish to be provided in addition to the standard set of services (mold assessment/asbestos assessment/geotechnical/ lead-based paint/indoor or sub-slab air sampling):

N/A

D) Please identify all parties to your knowledge who will rely on this ESA? (excluding regulatory agencies)

N/A

E) Please provide any former Phase I or Phase II reports, incident reports, NYSDEC Reports, current or former permits for the operation of machinery, tank registration documents, AIRS permits, or other environmental permits.

Dear Annmarie:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 1/9/2026 and given the reference number FOIL #W158760-010926 for tracking purposes. You may expect the Department's response to your request no later than **2/9/2026**.

Record Requested: **Site Address: 22-24 South Water Street Peekskill NY**
Site Parcels: Tax IDs 32.12-2-3 and 32.12-2-4
As part of a Phase I Environmental assessment, SESI requests the following: Documentation of storage tank operation, illegal dumping; hazardous material storage or use; documented release(s), spills or discharges of hazardous chemicals; site inspections, code violations; emergency responses, fires, and environmental reports associated with soil/groundwater investigative sampling.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

RE: PUBLIC RECORDS REQUEST of 1/9/2026, Reference # W158760-010926

Date: 01/22/2026

Dear Annmarie Yannaco,
In response to your Freedom of Information Law (FOIL) request seeking:

> *Site Address: 22-24 South Water Street Peekskill NY*
> *Site Parcels: Tax IDs 32.12-2-3 and 32.12-2-4*
> *As part of a Phase I Environmental assessment, SESI requests the following: Documentation of storage tank operation, illegal dumping; hazardous material storage or use; documented release(s), spills or discharges of hazardous chemicals; site inspections, code violations; emergency responses, fires, and environmental reports associated with soil/groundwater investigative sampling.*

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

> FOIL Appeals Officer
> Office of General Counsel
> New York State Department of Environmental Conservation
> 625 Broadway, 14th Floor
> Albany, NY 12233-1500

Your FOIL request is now closed. For further assistance, please reference FOIL #W158760-010926, and simply reply to this email. Thank you.

Sincerely,

Region 3 FOIL Coordinator

OFFICE OF THE CITY CLERK

Cassandra Redd
City Clerk

Jeanette Moore
Deputy City Clerk

Date: 1.12.26

Request No.: 24

Dear Applicant:

This letter acknowledges receipt of your submitted Freedom of Information Law (FOIL) request dated 1.9.26 and received in this office on 1.9.26 for records maintained by the City of Peekskill under Public Officers Law, Article 6.

Your request will be forwarded to the appropriate department within the City and will be either granted or denied within twenty (20) business days of this acknowledgement. If your request is granted, all documents will be made available to you at a standard cost of $.25 per page except for records exceeding 9 x 14 inches, where the actual cost of production will be charged. Records will be emailed at no charge when possible.

The fee charged for a copy of any other record is based on the actual cost of reproduction and may include only the following: 1. an amount equal to the hourly salary attributed to the lowest paid employee who has the necessary skill required to prepare a copy of the requested record, but only when more than two hours of the employee's time is necessary to do so; and 2. the actual cost of the storage devices or media provided to the person making the request in complying with such request; or 3. the actual cost to the agency of engaging an outside professional service to prepare a copy of a record, but only when an agency's information technology equipment is inadequate to prepare a copy, and if such service is used to prepare the copy.

We will process your request as soon as possible. After the records are forwarded to us from the appropriate department, you will be notified by this office.

If you have any questions regarding your FOIL request, please direct them to the Office of the City Clerk at (914) 737-3400.
