EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ---------- National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROL ---------- Sites with Institutional Controls

Federal ERNS list

ERNS ---------- Emergency Response Notification System

State and tribal leaking storage tank lists

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land
NY HIST LTANKS ---------- Listing of Leaking Storage Tanks

State and tribal registered storage tank lists

Exclusive Recovered Govt. Archives

NY RGA HWS ---- Recovered Government Archive State Hazardous Waste Facilities List
NY RGA LF ---- Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 6 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/12/2018 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/08/2017 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/12/2018 has revealed that there are 161 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 41 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 01/19/2018 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/12/2018 has revealed that there are 22 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there are 76 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CON EDISON-CEDAR ST	ONE RAMADA PLAZA	NE 1/4 - 1/2 (0.340 mi.)	331	579

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110058876550

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name:	FRANK LANZELLI
DEC Memo:	"4-9-14 Last night I traded voicemails with Jerry. He said that he didn't know anymore than provided to the Hotline and I should talk to Frank in the morning. This morning I spoke to Frank. Location has a 1500 gallon vaulted tank with a remote fill at curb. There is currently some oil in the basement sump. Sump is unplugged and it doesn't appear any was pumped out. Frank doesn't know where oil came from, but vault sounds inaccessible. Frank is trying to contact management company to let them know tank needs to be tested. Management Company: Sterling Solutions, 914/437-6245, Aurora is Almeada contact Owner: Milka Iwanow, 914/409-6513 jc 4/09/14: Email received this morning from Chris Lalak: Sebastian went to this one and will follow up. It is a block away from my office. The tank in a vaulted AST (1500 gallon from 1931). There is a spill across the floor and in cracks in the floor getting to a sump pump. The sump goes to the sanitary. The spill may have been going on for so time, the super was very vague. The AST is visible except for a small area that sticks into the floor of the vault. The tank is not visibly leaking. Almeida replaced the underground lines with above ground lines recently. The between the tank, the former underground lines, and the sump is some distance and they will need to excavate the floor. The building has hired Dutchess. Pumping out the tank is not simple. The building has natural gas and oil. jod 04-09-14 followup email, After a second look at this one with a plumber,It looks like the old lines might be leaking. The plumber will uncover the old lines. The tank is not being pumped out at this time. The bottom of the tank is visible for the most part. (the plumber went in the vault, before we were there).Possibly, the remote fill is also an issue. They will replace the tank with an unregulated tank. Sebastian will continue to handle the spill. The floor will be opened up tomorrow to investigate. RDB "
Remarks:	"Caller advised unknown amount of oil spilled onto concrete floor with cracks. Clean up is pending."

CVS PHARMACY #8447 (Continued) **1014958220**

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

P&D TRANSPORT - HOT TAR (Continued) **S106126552**

Contact Name: CALLER
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was GHIOSAY 11-18-03 P&D Transport trailer carrying 5000 gallons of a hot tar product developed several leaks from seams and holes beneath the trailer. The driver, John Culbreath, pulled the vehicle to the shoulder of I-95 NB at mm 5.4 in New Rochelle. The trailer drained hot tar to the road shoulder where it flowed downhill until it cooled and solidified. Approximatley 200 feet of shoulder where affected before the trailer could be offloaded. DEC called out Castlton Environmental contractors when a company Rep stated that he/she would not sent a second truck to offload the damaged trailer. Castlton contacted Mystic Bulk Carriers and requested their assistance. Mystic provided a heated truck, suitable to offload the cargo and return it to Ownes Corning in Kearny where the load was originally picked up. The P&D damaged trailer was towed off the road to a spot near the I-95 toll plaza. Castlton performed the removal of the solidified tar several days later as they were delayed by heavy rain which created hazardous working conditions on busily traveled I-95. As of 11-18-03, Portland Asphalt indicated that they would pay Caslton directly for the cost of the cleanup. "
Remarks: "material goes into a manhole which leads to a water way. poss hutchinson river. spill not controlled yet. caller req call back from rep"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CON EDISON (Continued) **1019906923**

Registry ID: 110069679360

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110058881152

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Record Upd: 09/28/2017
Updated By: DACROSBY
Site Description: Location: The Industrial Overall Service Corporation site is located at 10 Bartels Place in the City of New Rochelle, Westchester County. The site is located east of I-95 and west of US-1 (Huguenot Street) and it is bounded by Reylea Place, Bartels Place, Centre Avenue and the Metro North railroad property and tracks. Site Features: The site is 0.42 acres in size and resides on a slightly sloping irregularly shaped parcel consisting of two tax parcels. The main site feature includes a six-sided building which occupies the majority of the property and a small parking area located to the south and southwest of the building. Current Zoning/ Uses: This property is zoned for commercial use. The building is currently vacant and for sale. The surrounding area is a mix of commercial and residential establishments situated in an urban setting. Past Uses of the Site: Industrial Overall Service Corporation operated at the current location as a uniform and industrial clothing dry cleaning/laundering facility, historically cleaning heavily soiled clothing from industrial, auto body and gasoline dispensing businesses from 1956 until 2010. Dry cleaning equipment was reportedly decommissioned in 1978, but water washing continued. From 1980-1998 Workingman s Closet, an embroidery and uniform retail outfit, operated on the second floor of the building. From 2010 until 2016, Apparel Plus Textile Rental LLC ran a rental linen service company on both floors of the building, which involved water laundering. Historically, a precision scale company also operated out of the second floor of the building from sometime between 1932 and 1956 until sometime before 1973 when Industrial Overall purchased the building to occupy it entirely. Based on a Sanborn Fire Insurance Map from 1931, the site previously operated an automobile sales and service business. This site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable unit 1 (OU1) is the on-site and adjacent Metro-north property. OU1 consists of the entire site property with the addition of an off-site source area which lies to the northeast of the site on the adjacent Metro-north property. Operable unit 2 (OU2) is the off-site groundwater plume. Site Geology and Hydrology: Groundwater is found in the overburden and in the bedrock. Groundwater is generally found 10 to 15 feet below ground surface and flows in a southwesterly direction. Overburden in the vicinity ranges in thickness from 2.2 feet to 32 feet, and consists of fill material (1-5 feet in thickness) and varied amounts of fine to coarse sand with varying amounts of silt. Below the sandy silt is a till like material. Depth to bedrock is variable across the site from a depth of a few feet to over 35 feet below grade. Bedrock in the vicinity is a highly weathered rock which is undulating in nature and is generally more transmissive than the till-like overburden material directly above.
Env Problem: This section summarizes the assessment of existing and potential future environmental impacts presented by the site. Environmental impacts may include existing and potential future exposure pathways to fish and wildlife receptors, wetlands, groundwater resources, and surface water. Based upon the resources and pathways identified and

INDUSTRIAL OVERALL SERVICE CORP. (Continued) **S110043643**

the toxicity of the contaminants of ecological concern at this site, a Fish and Wildlife Resources Impact Analysis (FWRIA) was deemed not necessary for OU 01. Nature and Extent of Contamination: The primary contaminants of concern at the site include the dry cleaning chemicals tetrachloroethene (PCE), trichloroethene (TCE) and their associated breakdown products. PCE and TCE are found in on-site and off-site soil and groundwater. Two primary source areas remain at and adjacent to the site. These include a lint trap within on-site building and an off-site debris and waste disposal area located to the northwest outside the building on the adjacent Metro North Railroad property. Soil: Maximum concentrations of PCE and TCE in on-site soils/wastes located in the remaining lint trap source area exceed 21,000 parts per million (ppm) and 1,200 ppm, respectively. In addition to volatile organic compounds (VOCs), soils on- and off-site were also sampled for semi-volatile organic compounds (SVOCs) and metals. No SVOCs exceeded SCOs, but several metals (barium, cadmium, chromium, lead, and silver) exceeded their respective unrestricted use SCOs directly underneath the lint trap. Also under the lint trap, barium, cadmium, and lead exceeded commercial SCOs, while only barium out of these metals did not exceed protection of groundwater SCOs. Also chromium exceeds the protection of groundwater SCO in one off-site location. On-site and off-site soil contains VOCs mainly in the two source areas, but some soil located under the site parking lot also contained VOCs above protection of groundwater SCOs of 0.47 ppm for TCE and 1.3 ppm for PCE. Generally, however, concentrations of PCE and TCE in on-site soils decrease to below the soil cleanup objectives (SCOs) for the protection of groundwater not far from the actual lint trap. The debris and waste disposal source area on the off-site Metro North property contains a maximum PCE concentration of 500 ppm and a maximum TCE concentration of 11 ppm. Groundwater: Contamination migrating from the two source areas has impacted groundwater in the bedrock and overburden, and created a plume extending downgradient (southwest) more than 1,900 feet from the site. The highest level of PCE in on-site groundwater was 140,000 parts per billion (ppb) near the lint trap, compared to the groundwater standard of 5 ppb. In the off-site debris pile area, PCE concentrations in groundwater reached 38,000 ppb. The maximum level of TCE in on-site groundwater was 5,300 ppb near the lint trap, and 2,100 ppb beneath the off-site debris pile area, compared to the groundwater standard of 5 ppb. Several breakdown products of PCE and TCE were also noted in the groundwater. The maximum on-site cis-1,2 dichloroethene (cis-1,2 DCE) concentration was 5,300 ppb near the lint trap, and 890 ppb beneath the off-site debris pile area. The maximum on-site vinyl chloride (VC) concentration was 250 ppb near the lint trap, and 1-1-1 trichloroethane (1,1,1-TCA) was detected on-site at a maximum concentration of 630 ppb beneath the on-site building. However, 1,1,1-TCA was also detected upgradient of the site at 910 ppb indicating an off-site, upgradient source. Soil vapor: Soil vapor samples were collected from the sub-slab and indoor air of eleven off-site residential structures and five off-site commercial/industrial structures to assess the potential for soil vapor intrusion. The results indicated that PCE and TCE were present in sub-slab soil vapor and indoor air in six structures, two of which have subsequently received active vapor control measures and four of which are undergoing continued monitoring. One of the four actively-monitored structures was recently found to require mitigation, and that process is underway as of the date of this

INDUSTRIAL OVERALL SERVICE CORP. (Continued) **S110043643**

document. Soil vapor samples were collected from three additional off-site locations in the downgradient groundwater plume direction. PCE was detected in all three samples but at low concentrations which did not require actions to address soil vapor intrusion. Special Resources Impacted/Threatened: The site is located in an urban area of the City of New Rochelle. No significant environmental resources have been identified near the site.

Health Problem: Direct contact with contaminants in groundwater is unlikely because the area is served by an uncontaminated public water supply. While the majority of the site is covered with buildings and pavement, trespassers or employees may come in direct contact with some contaminated surficial soils on site and on the adjacent Metro North Railroad property. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion (SVI). Inhalation of site contaminants in indoor air due to soil vapor intrusion is unknown because the on-site building is an active laundry facility. However, an evaluation to determine the potential for soil vapor intrusion to occur, will be needed should the current site use of the building or chemical use change in the future. Sub-slab depressurization systems have been installed in two off-site buildings to prevent the inhalation of site-related contamination. In addition, air monitoring is on-going at four additional off-site buildings to verify further actions are not needed. Sampling indicates soil vapor intrusion may be a concern for additional off-site buildings where sampling has been offered but not accepted by building owners.

FINDS:

Registry ID: 110004505287

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank was tested by WCC on 1-9-09 for the property owner. The tank passed the test and documentation was submitted to the owner and the New Rochelle FD. Elite Environmental tested the tank for a prospective buyer on 2-6-09 and failed the tank, resulting in this spill report to the DEC. On 2-12-09 WCC again tested the tank with reps from New Rochelle FD and Royal Environmental. The tank passed this test. All three tests were preformed with the Horner Locator Plus system. Based upon the information received as of this date, DEC is requiring No Further Action at this time. jod"
Remarks:	"550 gal tank failed test/ failure due to bad fitting"

FINDS:

Registry ID: 110002092967

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:

Program:	BCP
Site Code:	544502
Acres:	Not reported
HW Code:	C360157
SWIS:	6010
Town:	New Rochelle (c)
Record Added Date:	03/29/2017
Record Updated Date:	06/19/2017
Update By:	LSZINOMA
Site Description:	LOCATION: The Site is located at 381-393 Huguenot Street, in an urban area in New Rochelle, New York. The Site is bound to the north by a vacant store (first floor) with residential above; to the south by a three-story residential apartment building and a one-story residential building; to the east by Huguenot Street and beyond by a Gulf labeled gasoline filling station; and to the west by an office building/warehouse. SITE FEATURES: The Subject Property consists of these (3) irregular shaped parcels totaling approximately 0.39 acres. The property currently maintains two structures. Lot 7 currently maintains an irregular shaped one-story building (with partial basement), with an approximate footprint of 3,400-square feet. This building is currently utilized for office and storage space associated with a U-Haul business, a real-estate firm, and a janitorial supply business. The first floor of the buildings maintained on Lots 3A and 4 house a church ministry, with the second floors occupied by one residential unit in each. The basement on Lot 4 is occupied by a hydraulic repair business. CURRENT ZONING AND LAND USE: The Site is currently utilized for mixed commercial and residential uses. The surrounding parcels are currently utilized for mixed commercial and residential uses. The Site is located within the City of New Rochelle s recently designated Downtown Overlay Zone (DOZ). The DOZ is part of a new zoning plan adopted in 2015 to re-establish the downtown as a center of vibrancy within a mixed-use, transit oriented setting. The characteristics of the Site allow a building of up to six stories, with the provision by the developer of a community benefit. Past Use of the Site: The northern portion of the Site (Lots 3A and 4 at 381 and 383 Huguenot Street) has been utilized for dry cleaning services circa 1931, and for manufacturing since the 1970s to 2010s. The potential source of contamination in this area includes former dry cleaning operations and the former fuel oil USTs. The central portion of the Site (385 & 387 Huguenot)has maintained a residential dwelling circa 1931, and as truck and trailer parking since 1990s. The potential source of contamination in this area includes a former fuel oil UST, which was removed prior to 1997. The southern portion of the Site (Lots 5 and 7 at 391 and 393 Huguenot)has maintained a gasoline filling station from 1930s to 1950s, and then as car wash and warehouse from 1970s to 2010s. The potential source of contamination in this area includes former gasoline USTs and car wash operation. In addition, urban fill material was detected throughout the site. Site Geology and Hydrogeology: Per the United State Department of Agriculture (USDA) Natural Resources Conservation Service, the soil at the Subject Property is classified as Uh-Urban. Actual soil conditions observed

THE HUGUENOT (Continued) **S120706214**

	during the Phase II ESA and the SSI field activities revealed that the subsurface soil consists of dark to brown medium to coarse sand from grade to 10 feet below. Groundwater was encountered at approximately 6 to 8 feet below grade. Site-specific groundwater flow direction is towards northwest.
Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Town:	New Rochelle (c)
Record Added Date:	12/29/2005
Record Updated Date:	12/30/2016
Update By:	DACROSBY
Site Description:	Location: The Schmuckler s Dry Cleaners site is located in an urban area located at 258-364 North Avenue in New Rochelle, Westchester County. The site is 0.21 acres, most of which is covered by a two-story row building with a full basement. Site Features: In addition to the former dry cleaners, historically located on the first floor, the site also includes an enclosed backyard area to the immediate west of the building. The backyard is mostly covered by lawn, but also includes elevated planting beds, and a paved walkway. Current Zoning/Use(s): The site is commercially zoned, and currently has five commercial tenants occupying both the first and second floors. Properties along North Avenue are predominantly zoned for commercial or mixed use, some maintaining residential apartments above. Commerical uses dominate areas within one block east and west of North Avenue with the exception of a multi-unit residential building immediately to the west of the site. Drinking water on-site is provided from a municipal source. Past Uses of the Site: The building on-site was built in 1891, and operated by Schmuckler s Cleaners from 1914 to 2006 on the first floor and basement of the building. Additions were added to the building in 1937, and two in 1987. The site was acquired by the Volunteer, HNJ Realty, LLC, in August 2005, and entered into a BCA in June 2006. An interim remedial measure (IRM) was conducted starting in late 2008 to install a combined soil vapor extraction system/sub-slab depressurization system (SVE/SSDS) in the former dry cleaner to mitigate PCE in indoor air. The IRM was deemed complete in December 2013, but the SVE/SSDS continues to operate. A second IRM work plan was approved in May 2015 to conduct a pilot study of an enhanced biological in situ treatment to remediate contaminants under the on-site building slab. Site Geology and Hydrogeology: The site is underlain by fill which is underlain by poorly sorted glacial material (silty-clay with sand and gravel). The highly weathered bedrock surface is between 9 and 13

SCHMUCKLER'S DRY CLEANERS (Continued) **S107787044**

feet below ground surface at site. Groundwater was encountered between 9 to 12 feet below site. Bedrock groundwater flows to the southeast. Only two overburden wells onsite have produced water, therefore a groundwater flow direction in overburden cannot be determined. It is assumed that it flows in the same basic southeast direction as the bedrock groundwater.

Env Problem: Based on the investigations conducted to date, the primary contaminants of concern at the site are chlorinated volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE) and its breakdown compounds, in soils, groundwater, sub-slab vapor, and soil gas; petroleum-related VOCs in soils, groundwater, sub-slab vapor, and soil gas; and semi-volatile organic compounds (SVOCs) in groundwater. Soils: Tetrachloroethylene (PCE), trichloroethene (TCE), and multiple petroleum related VOCs were detected in onsite soils underneath the building slab. The highest concentration of PCE at 210 parts per million (ppm), exceeding restricted commercial soil cleanup objectives (SCOs), was located underneath the former dry cleaning equipment room. Other contaminants detected in soils only exceeded the Protection of Groundwater SCOs. These exceedences were largely in soils located downgradient of the dry cleaning equipment room and consisted of: TCE at 1.3 ppm, cis-1,2 dichloroethene (cis-1,2-DCE) at 3 ppm, n-propylbenzene at 16 ppm, m+p xylenes at 15 ppm, ethylbenzene at 6.6 ppm, 1,3,5-trimethylbenzene at 63 ppm, and 1,2,4-trimethylbenzene at 99 ppm. Groundwater: Petroleum-based floating product (LNAPL, or light non-aqueous phase liquid) was observed in groundwater under much of the on-site building slab, a maximum of 6 inches thick under the former dry cleaning equipment room. Also observed were very high concentrations of select VOCs also under the former drycleaning equipment room. The maximum detected PCE was 830,000 parts per billion (ppb), and TCE at 58,000 ppb, indicating the presence of these compounds as free product DNAPLs (dense non-aqueous phase liquid) in groundwater. 25 individual VOCs were also detected in site groundwater samples exceeding NYS Class GA groundwater standards. These include the above-mentioned PCE, TCE, as well as other maximum detected concentrations of PCE breakdown products: cis-1,2-DCE at 8,700 ppb, and vinyl chloride at 28 ppb. BTEX was detected, with benzene at 62 ppb, toluene at 130 ppb, ethylbenzene at 150 ppb, m+p xylene at 520 ppb, and o-xylene at 290 ppb. Other significant concentrations of VOCs detected in groundwater include 1,3,5-trimethylbenzene at 890 ppb, and 1,2,4-trimethylbenzene at 840 ppb. Eight SVOCs were detected over groundwater standards in groundwater under the building slab, including napthalene at a concentration of 1300 ppb, phenanthrene at 2400 ppb, acenapthene at 710 ppb, and antracene at 280 ppb. Bedrock wells were installed off-site in the downgradient, sidegradient, and upgradient directions. Petroleum-based VOCs and SVOCs were detected in the bedrock aquifer at concentrations above groundwater standards. For VOCs, total maximum BTEX concentration of 722 ppb was detected in a downgradient bedrock well. 11 individual SVOC contaminants were detected over groundwater standards in the same downgradient off-site bedrock well, including naphthalene at 4100 ppb, phenanthrene at 2800 ppb, acenapthene at 710 ppb, and antracene at 300 ppb. The extent of groundwater contamination is concentrated underneath the on-site building slab, with petroleum-based VOC and SVOC contaminants and LNAPL extending off-site in the bedrock downgradient or southeast direction. Soil Gas/Soil Vapor: The high concentrations of PCE (787,000 ug/m3), TCE (15,200 ug/m3), cis-1,2-DCE (46,000 ug/m3), and

SCHMUCKLER'S DRY CLEANERS (Continued) **S107787044**

	Vinyl Chloride (34 ug/m3) in soil vapor under the slab of the on-site building required the installation and continuing operation of a combined soil vapor extraction and sub-slab mitigation system during a 2008-2013 Interim Remedial Measure (IRM) action. PCE (at 91 ug/m3) and TCE (13.4 ug/m3) were also detected in soil gas outside of the building near the location of a former drywell. Benzene (37 ug/m3), toluene (126 ug/m3), ethylbenzene (85 ug/m3), xylene (555 ug/m3), 1,3,5-trimethylbenzene (3 ug/m3), and 1,2,4-trimethylbenzene (14 ug/m3) were also detected in subslab vapor and soil gas. Special Resources Impacted/Threatened: The site is located in an urban area of the City of New Rochelle. There are no special resources identified near the site.
Health Problem:	While direct contact with contaminants in the soil is unlikely because most contaminated soils are found beneath the on-site building, persons who dig below the ground surface adjacent to the building may come into contact with contaminants in subsurface soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. A sub-slab depressurization system was installed in the on-site building to prevent vapors beneath the slab from entering the building. Sampling indicates soil vapor intrusion is not a concern in one adjacent off-site building. However, the potential exists for inhalation of site contaminants due to soil vapor intrusion for other nearby off-site buildings.

MONTEFIORE - NEW ROCHELLE HOSPITAL (Continued) **1000130172**

Registry ID: 110004368620

Environmental Interest/Information System
COMPLIANCE AND EMISSIONS REPORTING

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004534709

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110067684303

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110067686793

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004333720

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110067684358

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Record Added Date:	06/03/2009
Record Updated Date:	03/08/2017
Update By:	DACROSBY
Site Description:	Location: This site is the off-site component of the former Flamingo Dry Cleaners site (C360078). The site is located in an urban area of New Rochelle, Westchester County, at the southeastern corner of the intersection of Clinton Place and North Avenue. Site Features: The site itself is a one-story commercial building which includes four stores including the vacant dry cleaners. This off-site component is comprised of immediately-surrounding areas. Current Zoning/Uses: Surrounding land uses include parking lots, commercial establishments, a residential apartment complex, a college, a medical facility, and a church. Historical Uses: The on-site building was constructed in 1941 and used for retail. Flamingo Cleaners began operations in 1958 and ran until 2005 when all dry-cleaning equipment

OFF-SITE FLAMINGO CLEANERS (Continued) **S110043637**

	was removed. On-site contamination is a result of the former dry cleaner operations from improper management, disposal, and leaks of tetrachloroethylene (PCE). A referral for off-site work was completed in December 2007 and a SSF RI/FS Work assignment was approved in March 2009. The RI field work was conducted in the summer of 2009 and fall of 2009. Additional round of gw analyses occurred in spring 2010. The on-going off-site investigation thus far indicates that PCE is not present in environmental media above standards in the area surrounding the site. Site Geology/Hydrogeology: The area surrounding the site is underlain by glacial till which sit atop highly weathered bedrock. Area bedrock ranges from 5-25 feet below ground surface. The water table ranges from 5-11 feet below ground surface. Groundwater flow direction is dominantly to the south-southwest toward Long Island Sound, but site specific groundwater flow direction is radial and seasonally affected.
Env Problem:	Nature and Extent of Contamination: Based on investigations to date, the primary contaminant of concern at the site is tetracholoroethylene (PCE), a dry cleaning solvent. On-site, PCE has been detected in soils, soil vapor, indoor air, and groundwater. The off-site investigation to date indicates that there are no off-site impacts. Special Resources Impacted/Threatened: The site is located in an urban area of the City of New Rochelle. There are no special resources identified near the site.

Update By: DACROSBY
Site Description: Location: The Flamingo Cleaners site is located in an urban area of New Rochelle, Westchester County, at the southeastern corner of the intersection of Clinton Place and North Avenue. Site Features: The site is a one-story commercial building with a full basement. The building is divided into four tenant spaces which include a bar/lounge, beauty salon, and two vacant spaces that previously housed a travel agency and a dry-cleaner. Current Zoning/use(s): The site consists of four retail spaces, two of which are currently occupied. The site is zoned for commercial use. The surrounding land uses include parking lots, commercial establishments, a residential apartment complex, a medical center, and a church. The dry cleaning operation is no longer active and the space is currently vacant. Past Uses of the Site: The existing building was constructed in 1941 and used for retail. Flamingo Cleaners began dry cleaning operations in 1958, and ran until 2005 when all dry-cleaning equipment was removed. Site contamination is a result of the former dry cleaner operations from improper management, disposal, and leaks of tetrachloroethylene (PCE). Prior completed investigations include a Phase I Investigation in October of 2003 and a Phase II Investigation completed in March of 2004. The Volunteer entered into a Brownfield Cleanup Agreement in April 2005. A Decision Document was issued in March 2012 for a remedy involving source soil removal and in situ chemical oxidation treatment of groundwater. Based on the extent of the site contamination, a referral to State Superfund for an off-site investigation was completed in December 2007. The groundwater plume was found to be isolated to immediately behind the building and little to no off-site impacts were noted in groundwater, soils, nor in soil vapor. Site Geology/hydrogeology: The site is underlain by glacial till which sits atop highly weathered bedrock. Bedrock ranges from 5 - 22 feet below ground surface. The water table is between 5 -

FLAMINGO CLEANERS (Continued) **1000299848**

	11 feet below ground surface. Groundwater flow direction dominantly to the south-southeast toward Long Island Sound, however, site specific groundwater flow direction is radial, and seasonally affected.
Env Problem:	Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE or perc) which was present in soils, groundwater, and indoor air. PCE breakdown products Trichloroethene (TCE) and 1,2-dichloroethene (1,2-DCE), vinyl chloride, as well as 1,1,1 trichloroethane (1,1,1 TCA), were also present at the site. Remedial actions have removed source soils, treated groundwater, and have prevented contaminants from entering the indoor air. Residual contamination in the soil, groundwater, and indoor air is being managed under a Site Management Plan.
Health Problem:	Measures are in place to control the potential for coming in contact with subsurface soil and ground water contamination remaining on the site. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in groundwater and/or soil may move into the soil vapor (air space within the soil), which in turn may move into overlying building and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system (system that ventilate/remove the air beneath the building) has been installed in the on-site building to prevent the indoor air quality from being affected by the contamination in the soil vapor beneath the building. Sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Double wall fiberglass piping from dispensers to tanks. Leak is contained in tanktop sump. System has has been shut down at this time until they figure out what they are going to do. They believe they will probably replace lines. Chris says no leak to environment and he will be taking lead. jm 5-15 new

CUMBERLAND FARM (Continued) **1000553075**

spill 15-01325; Phase 2report 10-15-15 email status request sent to WCHD & Cumby RDB 10-22-15, from Cumby In response to the line failure, CFI engaged Island Pump & Tank (IPT) to perform the repairs. In lieu of replacing the product piping, IPT installed a siphon bar on the regular tanks and removed the submersible pump from the regular tank that had the failed product piping. IPT then removed and capped the regular product piping that had failed. The secondary line was tested and the dispenser pans and STP sumps were hydrostatically tested and passed. RDB 2-16 new SPills 15-10746 3-8-16 during meeting with WCHD, Singh, his att, his consultant, Cumby, their consultant and att, taking place in New Rochelle. Closure was denied on spills 14-05322 & 15-01325and RPs agreed to a scope of work by March 16. RDB 5-4-17 Work completed, waiting for closure report. GHP"

DEC Memo:	"This house is the estate of R Demellia's late mother. Tank failed with only hissing, maybe a line leak but cant be sure. House is being prep'ed for sale....mm 12/08/14: From Envirostar: We pulled a 550 UST at 95 Washington Ave New Rochelle that had previously failed a tank test (spill # 1406916). The tank did have holes and there was contamination in the soil. The home owner is contacting there insurance. Customer info: Chuck LiVecchi 95 Washington Ave New Rochelle NY jod 3/20/15: Update from Envirostar via email: We removed 6 containers of contaminated soil Between march 12th and yesterday we took samples and back filled the hole. We will Submit for closure. jod 4/13/15: Report with request for closure entered into DecDocs. Post-Ex soil samples show contamination in excess of CP-51 Guidance. Additional information being requested from Envirostar. jod 4/14/2015: Envirostar removed and disposed of the leaking UST and a total of 108.96 tons of petroleum contaminated soil. Some residual contamination over CP-51 Guidance could not be excavated from along the foundation and due to safety concerns with buried utility lines. No evidence of ground water impact noted. Based upon information provided, no further action required at this time. jod"

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U019
. Waste name: BENZENE (I,T)

. Waste code: U140
. Waste name: 1-PROPANOL, 2-METHYL- (I,T) (OR) ISOBUTYL ALCOHOL (I,T)

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U238
. Waste name: CARBAMIC ACID, ETHYL ESTER (OR) ETHYL CARBAMATE (URETHANE)

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

FINDS:

Registry ID: 110009468343

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"6/20/11: This spill initially reported as a residential TTF. Property is actually a commercial office building with apartments on the second floor. Previous Spill number for this site is 1102214 which was reported on May 27th. Owner informed US Tank Tech of the prior Phase I site investigation, but apparently did not inform them of the Phase II which found high levels of contamination. US Tank Tech reports they were hired to test the in-service 550 gallon heating oil tank, and perform a site investigation to locate a second, out-of-service tank. The 550 failed the vaccuum test, petroleum odors evident in the well point. US Tank Tech also reports they believe the second out-of-service tank may be located under the office building. Owner states the second tank is a 275 gallon heating oil, but that can not be confirmed at this time. US Tank Tech also reports there are at least two additional sets of fill and vent pipes, for other out-of-service or abandoned USTs. Tester also noted petroleum odors from the basement sump pit. jod 6/21/11: US Tank Tech reported that the owner says he hired Northeast Environmental to address these two spills issues. Message sent to Northeast asking for confirmation. jod 9/29/11: Northeast reports the owner has hired them to begin investigation and remediation. jod 10/21/11: The UST has been removed by Northeast and contaminated soil is evident. Remediation work is being scheduled. jod 4/26/2012: Closure report from Northeast Environmental entered into eDocs. Based upon information provided, no further action required at this time. jod"
Remarks:	"repair/retest pending"

Site Description: The Baker?s Pride site is located at 30 Pine Street in the City of New Rochelle, Westchester County, NY. The surrounding area is urban with commercial and residential establishments mixed in between the commercial businesses. The Baker?s Pride site is an approximately 3.75 acre flat to severely sloping irregularly shaped parcel. The Baker?s Pride building occupies approximately 111,450 sf of building space and occupies the majority of the property. Baker?s Pride owns the Bakers Pride Oven Company Inc and is engaged in the production of restaurant/commercial grade ovens and broilers. The site is bordered

BAKERS PRIDE OVEN CO INC (Continued) **1004571492**

by Metro North railroad tracks to the west and northwest, a mix of commercial and residential properties to the northeast, east, and south. Interstate (I-95) is located to the west of the Metro North railroad tracks. In 2005, a Phase II Environmental Assessment report was completed by Enercon as part of closure proceedings for a 3,000 gallon fuel oil UST that was closed in place and a 10,000 gallon fuel oil UST that was removed. Monitoring wells installed as part of this assessment revealed the presence of PCE in groundwater at levels up to 1,430 ppb. (The State groundwater standard for PCE is 5 ppb.) Also, this report noted chemical storage for cutting oils, lubricants, solvents and paints. No products were indicated that contained PCE. In 2007 a follow up report was conducted which revealed PCE in groundwater at levels up to 1,700 ppb. The site was added as a potential inactive hazardous waste disposal site ("P site") in 2007. A State funded site characterization was initiated in 2008 to determine the source of the PCE groundwater plume. A total of 9 monitoring wells were installed in the fall of 2008. Groundwater contaminated with PCE showed higher levels of PCE in wells upgradient from the Baker?s Pride facility. The PCE concentrations were as high as 3,700 ppb in MW-13 which is located about 300 feet upgradient from the Baker?s Pride facility. This prompted the State to do a second round of groundwater sampling further upgradient of MW-13. Two additional wells (MW-24 and MW-25) were installed about 150 feet upgradient of MW-13 in the winter of 2009. MW-24 revealed PCE at 5,300 ppb. The second round of sampling further defined a groundwater plume with a source area upgradient from the Bakers Pride site. Since the site information for Baker?s Pride indicates that the plume of PCE is coming from an off-site source, the Baker?s Pride site (360087) will not be listed in the Registry of Inactive Hazardous Waste Disposal sites. A separate site was added to the Registry to address the source of the PCE plume (See site #360109.)

Env Problem: Based upon investigations to date, the primary contaminants of concern at the site include tetrachloroetylene (PCE) and its associated breakdown products. PCE was detected in upgradient groundwater as well as on-site and also in indoor air in residences upgradient of the site. PCE was detected on-site in groundwater from non-detect up to 3,200 parts per billion (ppb) at MW-1) above the respective groundwater standard of 5 ppb. Upgradient off-site levels of PCE were as high as 5,300 ppb. Indoor air was impacted in two residences with the highest level being 530 micrograms per cubic meter (ug/m3) at a property on Bartels Place. Since the highest levels of PCE were identified in the groundwater upgradient of the site this suggests an off-site source that is impacting the Baker?s Pride site. The source of this contamination is the Industrial Overall Service Corp. Class 2 site (#360109)

FINDS:

Registry ID: 110002092949

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Left message for callback. DT 11/4/10 11/5/10: Call back from Abraham Wathcell of NY Tank Testing to dispatch desk. This was a test failure of an 8K heating oil tank at a co-op. PBS #3-413925 will handled by WCDOH. Mr Wathcell stated he had discussed the results with the management compny and was recommending removal of the tank rather than retest. jod 3/10/11 As per WCDOH eplaced fill pipe, manway gasket and repaired gauge. Passed retest on 2/14/11. NFA JO'M "

DEC Memo: "3/26/10 Tyree to go there on Mon. 3/29 to do repairs. dw 4/29/10 Getty 340 Main St New Rochelle line test failed do to faulty check valve. Tyree replaced check valve. Passed retest on 4/12/10 NFA JO'M 10-23-17 SEND OUT 30 day tank letter- RDB 10-25-17 call from Raul Naube @ 5168027171; retuned call; explained the current situation. offered to remove tanks for him. he is waiting for a court case, I advised him that he is in violation of the NYS CRRR pertaining to tanks, he has other sites on Long Island. Never in Westchester, I welcomed him to region; he will move forward with the permits and intends to remove the tanks- RDB 12-12-17 Rahul@lotusmgmt.com 340 Main Street Realty Inc. 25 Newbridge Road, Suite 312, Hicksville, NY 11801 _RDB 12-12-17 called and left another message RDB 12-18-17 email sent, I called your office last week and left a message. The tanks at your facility need to be removed. Please contact me today and discuss the schedule for the tank s removal or this case will be referred to Region 3, Regional Attorney for enforcement. RDB 1-3-18 email from Cider, The owner of the above referenced property has received the permit for removal of the USTs (NR BD/NR FM).We are only waiting on the contractors schedule.In the meantime, we wanted to confirm that there is nothing else required by your department?As soon as the schedule is confirmed, we will let you know. RDB 1-4-18 response, Thanks for the email and call. Who is the contractor for the tank removal? Do you have a guesstimate for the removal date? As I have explained to Rahul, this site is progressing towards enforcement and penalties. RDB 1-4-18, The contractor for the tank removals will be Felik s and Sons. Rahul is pushing them to get out there as soon as possible. My guestimate would be about two/three weeks to begin. As soon as we get the schedule from the contractor/Rahul, I will let you know. RDB Tank removal began. New Spill called in 17-09698 This spill closed- RDB "

DEC Memo:	"4-4-12: V.Mc. call to Mr.Kumar: Phone # no longer is service. 4-4-12: V.Mc. call to SEBASTIAN/WCHD: Left Mess.: Req. callbk. to Dispt. Update from WCDOH: greater than greater than greater than Bimonte, Sebastian greater than spb4@westchestergov.com greater than 4/5/2012 9:46 AM greater than greater than greater than John, SSN Realty 210 Webster Ave New Rochelle NY Super Tank product in interstitial space. Manual check during PBS inspection yesterday. Product clear no water or dirt. Diesel Tank product in interstitial space. Manual check during PBS Inspection yesterday. Product clear no water of dirt. Tanks One was hired to test inner and outer tanks. Super, inner wall passed, outer wall failed. Diesel inner wall

CITGO WEBSTER FOOD MART (Continued) **S103568792**

failed, outer wall passed. Both tanks should be pumped out by today. Sebastian Bimonte jod 5/23/2012 -- After a meeting in NPO among owner, tank maintenance contractor, Mr. Nesci (attorney), WC DOH, and CK last Friday (5/18), Ispoke to Rachel at Hydro Environmental about a site assessment. Work plan to be submitted shortly. ELM 6/05/12: Update received from Sebastian Bimonte of WCDOH PBS: 1200103: SNN Realty in Mount Vernon. This was product in the interstitial during PBS inspection. No release to environment. Tank repaired NOH issued and can be closed. jod 6/5/2012 -- Site assessment being conducted at my request: field work on 210 Webster Ave in New Rochelle on Tuesday, June 12, 2012 per email from Hydro Enviro. ELM 7/31/2012 -- RI report clearly shows groundwater contamination (BETX/MTBE) around the tank field and dispensers. Need further delineation and RAP. Nothing in unsaturated soils. ELM 8/22/2012 -- Contractor working on a Phase II RI work plan. ELM 9/19/2012 -- Approved an RI work plan. Except that they did include the schedule and failed to mention RAP possibilities. ELM 1/22/2013 -- HydroTech informed me that they have the permit needed from the muny to perform the remediation. ELM 2/21/2013 -- Still no word on mobilizing for remediation. ELM 11-6-13 email from county, There is a whole history here.The 1200103 was for product in the interstitial. Sebastian and Carlos worked with Ed Moore on it.Basically double walled tanks leaked into the interstitial. It appear to be the striker plate were missing and from sticking the tanks they wore out. Eastmond lined the tanks and had trouble removing the product from the IS (completely). We requested spill closure and Ed Moore kept the spill open and continued to work on the PBS issues. They are replacing all tanks now. American Petroleum (Ed- Thank You for making this happen)Wayne Schneider is inspected the site this afternoon and will handle the spill. I suggest we close out spill 1200103 and keep 1307998.(Wayne please provide a brief update to all after your inspection today.) 11-6-13 tanks yanked, new spill 13-07998, close this one RDB "

Remarks: "12 oz per product found during investigation on inter.cont., on the super tank and diesel tank."

AMOCO SERVICE STATION #736 (Continued) **1001128018**

REMEDIATION THEY FOUND NEWER PRODUCT INFLUENCING THEIR CLEAN UP. 04/24/97 LETTER & STIPULATION AGREEMENT SENT TO BE SIGNED. 12/10/97 COPY OF SIGNED STIPULATION SENT BACK 08/11/98 LETTER SENT; IMMEDIATE ACTION TOWARD AUTOMATED PRODUCT REMOVAL AND GROUNDWATER CONTROL AT SITE IS REQUIRED. 12/07/00 LETTER SENT TO DELTA ENVIRONMENTAL BY J. HARDY; PROPOSE A REMEDIAL ACTION PLAN WHICH IS SUBSTANTIALLY MORE AGRESSIVE THAN THE ONE EXISTING AT THIS TIME. 01/11/01 LETTER SENT TO DELTA ENV. BY J. HARDY; CONCEPTUAL REMEDIAL ACTION PLAN OF 12/13/00 IS APPROVED & REQUIRED. 4/23/04: Letter to Aaron Lapine, Delta Env. Consultants by J. Hardy. Submit one report per year. Include operating data and GW monitoring data in same report. 8/9/04: Letter to A. Lapine, Delta Env. from J Hardy. Reduce monitor well sampling to semi-annual. Report annually. 6/15/09 annual submitted 6/9/09 shows relatively stable groundwater levels but no info as to system operation--sent email to envirotrac to submit operation info jh 4/20/10 site in remediation as system has been operating for many years. Original impacts to adjoining restaurant have also been resolved for years so it seems spill is contained; spill cannot be closed however as there is still significant contamination jh 07/02/12 Contaminated soils on the station have been excavated down to bedrock. 4 gw wells remain, 1 on-site upgradient, 2 off-site downgradient , 1 in the tank field. After review of the documentation and a phone conversation, consultant will submit a quarterly groundwater monitoring plan for the next year, after which time the monitoring frequency may be adjusted based on results. It appears the source has been removed. mt 4/26/13 Spill Closed, asymptptic conditions approaching gw standards in final well. no further action required. mt "

DEC Memo:	"1/2/14 - WCDOH is oversight the ongoing tank tests. KAB 1/2/2014 -- APECCO hired by new operator (lease signed within past 6 weeks). Piping and dispensers and electronic leak monitoring equipment to be replaced. Based on lack of leak detection records for past 10 to 12 years, DEC requested TT and IS tests and system check of electronics. Tanks are probably suitable for service, but testing required for confirmation. It appears to be loose fittings. Electronics recently rewired at the computer console within past couple of weeks, but wiring ended near the top of the tanks. No probes in the interstitial space, just loose wiring near top of tank. Owner's representative took electronic system wire ends from the site despite WCDOH's request to take custody. ELM 2-13-14 closed and referred to spill 13-10365 which revealed contaminated soils when the failed lines were removed. RDB"

Program: HW
Site Code: 56077
Classification: P
Region: 3
Acres: 3
HW Code: 360016
Record Add: 11/18/1999
Record Upd: 05/01/2017
Updated By: GWHEITZM
Site Description: Location The Site is located at 78 Echo Avenue in New Rochelle, Westchester County, New York. This 3 acre site is bordered to the north by Echo Bay, an estuary of the Long Island Sound. It is bordered to the east and south by residential properties, to the southwest by Echo Bay Avenue, and to the west by a landscaping company (formerly a fuel oil terminal). Site Features All the former structures and underground utility services have been removed, and the whole site has been levelled, top-soiled and grassed. Current Use The site is currently vacant Past Use of the Site Con Edison used the site as an electrical distribution substation until 1981. PCBs transformers were stored and used at the site. Leaks and spills of PCBs may have occurred in the handling or servicing of these transformers. The soil on site and the sediment in the Bay were contaminated with PCBs.
Env Problem: Prior to remediation the contaminant of concern was PCBs. Remediation of the site is complete. The cleanup of PCBs and other incidentally detected contaminants has mitigated the threat to the environment, and in particular to the natural habitat in the bay.
Health Problem: As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

FINDS:

Registry ID: 110004335808

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"4/4/11 - To retest tank. KAB 4/28/11 Morris called in for follow up. Tank failed again. He said tank top was exposed for most of length and one side and some samples taken. Morris said whoever did repairs, sounds like they only put a new vent riser on. Did not check piping, which is heavily crusted. jc 5-6-11 Failed 2nd retest today. Owner giving Kathy a hard time. Morris will retest again next week. Kathy said road name should be Bayview not Dayview, made change. jc 5/13/11 Tank failed for a 3rd time. Plan to pull, according to Tank Tech. dw 8-4-11 Homeowner called dispatch desk. He wants to remove the tank himself and do ALL of the work. He says he would cut open the tank and clean with speedi dri, dispose of tank at scrap yard, etc. I recommended that he hire an environmental consultant to AT LEAST oversee project because the DEC will need a TCR which would include soil samples, manifests, disposal receipts, etc. I told him that this spill will not be closed out until a proper and acceptable Tank Closure Report has been submitted to this office for review. I told him to contact J O'Dee in White Plains for further info. This guy seems bent on doing everything himself even though it was recommended that he hire a consultant to oversee the project. jm 8/4/11: Recieved call from Sandy Perratta 914-557-0142. He is the same individual who

FIUMFREDO RESIDENCE (Continued) **S111012239**

called the dispatch desk earlier today. He is not the property owner but a friend of the owner. States he is in the construction business and he can remove the tank himself. He states he has the OSHA 30-hour training and also states he knows that he doesn't need confined space entry training if the tank is less than 4 feet below ground . I again stated he should have a professional contractor do the work for safety reasons. jod 8/8/11: Received voice-mail message from Mr Perratta stating he had removed the tank and it was on the lawn awaiting a DEC drive-by inspection. I met New Rochelle Fire Captain Henry Senno on site. The tank was cut and cleaned and is on plastic. The excavation is open and is not fenced or secured. There is no evidence of any holes in the tank, and no evidence of any leak or contamination. Captain Senno states he will follow up with the owner, as no permits were filed for the removal as required in New Rochelle. DEC Spills requires no further action at this time. jod 9/8/11: I left this spill open after discussing the situation with Capt Senno on either August 9th or 10th. There was still a 55-gallon drum of heating oil and heating oil sludge that was removed from the tank remaining on the site. On either Aug 11th or 12th I spoke with Mr Perrotta and stated the spill would be left open until he submitted a disposal receipt to DEC for proper disposal of that waste drum. To date, Mr Perrotta has submitted a disposal recipt for the tank (entered in eDocs) but has not submitted a disposal receipt for the drum. jod 9/22/11: Letter from Linda Enes forwarded to DEC. She states she is in posesseion of the 55-gallon drum, and is using it to fuel a space heater. I called her this morning and she states her husband transported the drum in his pick-up truck from New Rochelle to their home in Dover Plains NY. Letter has been entered into eDocs. DEC requires no further action. jod"

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

Date of Government Version: 11/18/2010

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

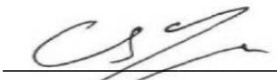
SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

This Phase I Environmental Site Assessment (ESA) Report documents the research methodology used by qualified environmental professionals of Blackstone to identify recognized environmental conditions using the scope and limitations of ASTM Standard Practice E 1527-13, the Fannie Mae Multifamily/Delegated Underwriting and Servicing Guide (April 29, 2011), and the May 23, 2016 proposal (Agreement) between Walker & Dunlop and Blackstone.



We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

Blackstone Consulting LLC (Blackstone) performed a Phase I Environmental Site Assessment (Phase I ESA) of the La Rochelle located at 255 and 275 Huguenot Street in New Rochelle, Westchester County, New York (site). The purpose of the Phase I ESA is to identify recognized environmental conditions (RECs) in general accordance with ASTM Standard E 1527-13, the Fannie Mae Multifamily/Delegated Underwriting and Servicing Guide, dated April 29, 2011 (Fannie Mae DUS Guidelines), and other agreed-upon ASTM *Non-Scope Considerations (Business Environmental Risk Issues)*. It is understood that the site is being evaluated for loan considerations.

SITE INSPECTION

Name of Inspector: John O'Connor

Date of Inspection: May 25, 2016

Site Representative: Ms. Kimberly Periard, Community Manager, and Mr. Lennie Dawson, Maintenance Technician

SITE DESCRIPTION

Street Address: 255 and 275 Huguenot Street

City and State: New Rochelle, New York

County: Westchester

Legal Description: City of New Rochelle Tax Map Identification Numbers: 1-234-0001 (Apartment Building) and 2-418-0001 (Parking Garage)

Owner: New Rochelle Ind. Development Agency (Apartment Building)
Avalon Bay Communities Inc. (Parking Garage)

Site Size: Approximately 2.3 acres

Site Use: The site is developed with a 24-story apartment building, containing 412 total dwelling units, and a five-story parking structure. The site apartment building includes basement and penthouse mechanical levels, four street level commercial tenant spaces, and a single-story building extension containing the apartment amenities. Two of the commercial spaces are currently vacant and the remaining two are currently occupied by Sound Drycleaners (drop-off/pick-up only) and Metro Market (convenience store). The site property is bisected by Memorial Highway, which separates the parking garage from the apartment tower building; however, the apartment building and parking

garage are connected via a covered, elevated walkway over Memorial Highway.

Year Built: 2001

Structures	***Location On Site***	***Number of Stories***	***Size (approx. square feet)***
Apartment Building	Northern	24 with basement and penthouse mechanical levels	431,125 SF
Parking Garage	Southern	5	180,000

Other Site Features: Amenities and additional features at the site include a leasing/management office, a club room, a conference room, a common tenant laundry room, a fitness center, a yoga room, a tot room, an outdoor in-ground swimming pool, a picnic area, and a playground. Vertical transportation for the apartment building is provided by four cable-driven elevators. The remainder of the site consists concrete pedestrian walkways and moderate landscape features.

HISTORICAL INFORMATION

Reasonably ascertainable historical information indicates the site was initially developed with residential structures prior to 1887. By 1900, the northern majority of the site was developed with commercial buildings, and by 1930, the entire site was densely developed with numerous commercial structures containing multiple small businesses, primarily retail storefronts, with commercial businesses and hotels on the upper floors. Historical commercial uses of the site included hotels, office space, retail stores, restaurants, a post office, a bowling alley, a theater, a "Chinese laundry" (1911 only), an auto sales and service facility (southwest corner from the 1930s until the 1980s), and surface parking lots. The former site structures were demolished between the early and mid-1990s, and the site was redeveloped with the present-day high rise apartment building and the present-day parking garage in 2001.

The site was identified with a small "Chinese laundry" facility in 1911. This type of facility in this era was typically a hand washing operation. The use of chlorinated solvents was not introduced into the dry cleaning industry until the late 1930s, and its use became widespread in the late 1940s following World War II. No addition historic cleaners or dry cleaning operations are identified on the site. Based on the era of operation and the duration of time since the facility was identified on the site (over 100 years), this laundry facility is not considered a REC.

Sound Drycleaning has been located at the site since at least the mid-2000s. However, this tenant only operated as a drop-off/pick-up only location, and is not involved in active drycleaning activities. This site tenant is not identified on any databases indicative of the generation or

disposal of hazardous wastes typically associated with an active drycleaning facility. As such, the site drycleaner tenant is not considered a REC.

The site historically contained an auto sales and service facility in the southwest corner of the site between at least the 1930s and the 1980s. This facility is not identified on any databases indicative of the generation, disposal or release of hazardous materials and/or waste, nor the operation of underground storage tanks (USTs). The site area where this facility was located is directly beneath the present-day site parking garage. There was no report of impacted soil or other remnants of the auto service operation encountered during the development of the site parking structure in 2001. Considering the current regulatory status (no reports releases), the amount of time that has passed since this facility was active (approximately 30 years), and that this site area has been redeveloped with a multi-story parking garage that would have necessitated significant excavation during construction, the historical presence of the auto sales and service facility in the southwest corner of the site is not considered a REC.

Historical information reviewed identified a 2000-gallon gasoline UST on the central-western area of the site, near the intersection of Memorial Highway and Railroad Place. According to the regulatory database, the UST was removed from the site on February 1, 2000, with some impacted soil discovered during removal. Based on the minor soil impacts discovered during removal, the site was listed with a Spills case. However, following the over-excavation of the UST area, all of the impacted soil was removed, the cleanup work was identified as having met applicable standards, and the case was issued regulatory closure on April 4, 2000. Review of information on the New York State Department of Environmental Conservation (NYSDEC) Spills Incident Database confirmed that the case has been issued regulatory closure. Considering the current status (UST and impacted soil removed, regulatory closure issued and that the area of the UST has since been redeveloped with a high-rise apartment building with a basement level that required significant site excavation to develop, the historical presence of the UST at the site is not considered a REC.

The north and east-adjoining properties have consisted of urban residential and commercial development since at least the late 1800s. The north-adjoining property beyond Bridge Street consisted of multiple commercial structures, including a "Chinese laundry" in 1911, prior to the construction of the present-day Chase Bank office building in the early 1970s. The east-adjoining properties beyond Huguenot Street consisted of multiple commercial structures between the late 1800s and the late 1900s, including a drycleaning facility in the 1930s in the southern portion of the east-adjoining property, prior to the construction of the present-day improvements. The present-day surface parking lot to the adjoining east was constructed in the 1970s. The present-day Ruby Dee Park on Library Green was developed in the 2000s, the present-day Halstead New Rochelle apartment building to the adjoining east was constructed in the late 2000s, and the commercial development located in the southern portion of the east-adjoining property was constructed in the mid-1900s. The present-day Trinity St. Paul Anglican Episcopal Church to the adjoining south beyond Division Street was reportedly constructed in the 1860s. The present-day railroad tracks to the adjoining west beyond Station Plaza South were developed prior to 1887 and the present-day New Rochelle station was constructed in the early 1900s.

A "Chinese laundry" facility was historically located to the adjoining north in at least 1911 and a drycleaning facility was located in the southern portion of the east-adjoining property in at least the 1930s. These facilities are not identified on any databases indicative of the generation or disposal of hazardous waste. As stated previously, the use of chlorinated solvents was not introduced into the dry cleaning industry until the 1930s, and its use became widespread in the late 1940s following World War II. No addition cleaners or dry cleaning operations are identified on adjacent properties. Based on the era of operation and the duration of time since these facilities were identified (over 80 years), the historical presence of these facilities on the adjoining properties is not considered a REC.

Blackstone performed a Phase I ESA of the site in conformance with the scope and limitations of ASTM Standard Practice E 1527-13, the Fannie Mae Multifamily/Delegated Underwriting and Servicing Guide (April 29, 2011), and the May 23, 2016 proposal (Agreement) between Walker & Dunlop and Blackstone. Any exceptions to or deletions from this practice are described in Sections 1.2 through 1.4 of this report. This assessment has revealed no evidence of *recognized environmental conditions* (*RECs*) in connection with the site. No further investigation is recommended.

This section is only intended to represent a brief summary of our findings, and is not a detailed account of all the information provided in this report. The report should be reviewed in its entirety prior to drawing any final conclusions as to potential environmental conditions associated with the site.

1.0 INTRODUCTION

1.1 PURPOSE

Blackstone Consulting LLC (Blackstone) performed a Phase I Environmental Site Assessment (Phase I ESA) of the La Rochelle located at 255 and 275 Huguenot Street in New Rochelle, Westchester County, New York (site).

The purpose of this Phase I ESA is to investigate and identify *recognized environmental conditions* (*RECs*) associated with the site and/or surrounding properties. ASTM Standard Practice E 1527-13 defines RECs as:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A *de minimis condition* is a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Additionally, this Phase I ESA was conducted to identify *controlled recognized environmental conditions (CRECs)* associated with the site and/or surrounding properties. ASTM Standard Practice E 1527-13 defines CRECs as:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by a regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

This Phase I ESA also was conducted to identify *historical recognized environmental conditions* (*HRECs*) associated with the site and/or surrounding properties. ASTM Standard Practice E 1527-13 defines HRECs as:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

This practice is generally intended for the User to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitations on CERCLA liability; that is, this practice constitutes all appropriate inquiries (AAI) into the

previous ownership and uses of the site consistent with good commercial or customary practice as defined at 42 U.S.C. §9601(35)(B) and the regulations at 40 CFR Part 312.

ASTM *Non-Scope Considerations* (*Business Environmental Risk Issues*) are detailed in Section 1.3 and outlined in the accepted scope detailed in the May 23, 2016 proposal (Agreement) between Walker & Dunlop and Blackstone.

1.2 SPECIAL TERMS AND CONDITIONS

This Phase I ESA has been conducted in accordance with ASTM Standard Practice E 1527-13, the regulations at 40 CFR Part 312, and the Agreement between Walker & Dunlop and Blackstone. In addition, this Phase I ESA was conducted in accordance with the Fannie Mae Multifamily/Delegated Underwriting and Servicing Guide, dated April 29, 2011 (Fannie Mae DUS Guidelines). Qualifications of the professionals conducting this assessment have been provided in Appendix D.

Blackstone performed the professional services, obtained findings, rendered conclusions, and prepared recommendations in accordance with generally accepted practices of other environmental consultants undertaking similar assessments at the same time in the same geographical area.

Historical and environmental information pertaining to the site has been included in this report to the extent that such information is *practically reviewable*, as defined in the above-referenced standard practice.

1.3 SCOPE OF SERVICES

As detailed in the Agreement, this Phase I ESA was conducted in accordance with the industry standard ASTM Standard Practice E 1527-13 and as such in accordance with all appropriate inquiries (AAI) into the previous ownership and uses of the site consistent with good commercial or customary practice as defined at 42 U.S.C. §9601(35)(B) and the regulations at 40 CFR Part 312. In addition, this Phase I ESA was conducted in accordance with the Fannie Mae DUS Guidelines. The Phase I ESA presented herein may vary from "guidelines" or "standards" required by organizations other than ASTM and Fannie Mae. This Phase I ESA included the following services:

1. A site inspection to identify and evaluate potential sources of RECs such as underground storage tanks (USTs), aboveground storage tanks (ASTs), equipment containing polychlorinated biphenyls (PCBs), waste and chemical storage areas, and wastewater and storm water discharges. The inspection included observations for evidence of chemical spills, releases, or on site waste disposal.

2. A review of site records and interviews with site representatives with regard to current and former site operations to identify known or potential environmental concerns.

3. A visual survey of the properties in the vicinity of the site to evaluate the potential for RECs at the site from these properties.

4. A review of historical information to identify RECs at the site from historic on-site and off-site uses. To the extent feasible under the conditions of the assessment, the historical information obtained included verbal information from site and/or local agency representatives. In addition, some or all of the following records, where *publicly available* and *practically reviewable*, were reviewed: construction plans, zoning maps, building permits, property record cards, topographic maps, fire insurance maps, historical city directories, and aerial photographs.

5. A review of State and Federal environmental database information.

Blackstone also performed the following activities to identify *Business Environmental Risk Issues* in addition to the ASTM requirements and as required by the Fannie Mae DUS Guidelines, and as required per the Agreement:

Document research, visual and/or sampling surveys, and interviews for the presence of:

- Asbestos-containing materials (ACM),
- Lead-based paint (LBP),
- Radon,
- Apparent mold growth (AMG),
- Lead in Drinking Water, and
- Wetlands.

The scope of this Phase I ESA did not include surface water, soil, soil vapor, or groundwater sampling. Consequently, conclusions provided with regard to surface water, soil, soil vapor, and groundwater impacts are limited to those that can be formed based on a non-intrusive investigation. The absence of environmental hazards in the subsurface cannot be guaranteed based on conditions observed on the surface.

Where performed, the limited ACM, LBP, AMG, and radon surveys are intended to provide an indication of the potential for significant environmental issues associated with these ASTM *Non-Scope Considerations* (*Business Environmental Risk Issues*). Hidden materials or locations such as those inside walls, inaccessible attics, crawl spaces, and inside ductwork and piping were not evaluated. As such, these surveys should not be regarded as comprehensive surveys for demolition or renovation purposes or indoor air quality health risk assessments, vapor intrusion into buildings, or explosion hazards.

1.4 SIGNIFICANT ASSUMPTIONS AND DATA GAPS

The site inspection consisted of a walkover of the site perimeter and exterior site areas, and a walk-through of the leasing office, common areas, maintenance/storage areas, mechanical rooms, parking garage, the commercial tenant spaces, and 42 representative dwelling units selected by Blackstone (Units 107, 117, 201, 202, 204, 310, 316, 402, 405, 410, 415, 1601, 1604, 1608, 1616, 1703,

1718, 1803, 1806, 1816, 1902, 1903, 1909, 1915, 2005, 2006, 2013, 2017, 2105, 2109, 2114, 2203, 2217, 2315, 2316, 2409, 2411, 2418, 2507, 2508, 2511, and 2516). The building interior was walked through at the direction of the Site Representative. Not all dwelling units were entered nor were all common and/or storage areas observed. Furthermore, during the site inspection, Blackstone did not inspect inaccessible areas of the site including beneath parked motor vehicles, under manholes, or within the elevator pits. The adjoining properties were visually observed from curbside without being entered. There is no reason to believe the inability to inspect these areas would alter the findings or recommendations set forth in this report or be considered a significant data gap.

The historical information reviewed did not confirm the first developed use of the site. *Data failure*, as defined by ASTM, has occurred in attempting to identify obvious uses of the site back to the first developed use, or back to 1940, whichever is earlier. Information regarding the use of the site prior to 1887 was not available from the *standard historical sources* (including available aerial photographs, fire insurance maps, property tax files, recorded land title records, USGS topographic maps, local street directories, building department records, or zoning/land use records). There were no other reasonably ascertainable historical sources available for review that were considered sufficiently useful. It is the opinion of Blackstone that the data failure does not represent a significant data gap that impacts our ability to identify RECs.

Conclusions stated herein are based upon publicly available information and other documented sources. Blackstone has assumed, where reasonable, that the information reviewed is true and accurate. Blackstone assumes no responsibility for inaccurate information that is not otherwise obvious in light of information of which Blackstone has actual knowledge. Blackstone's site observations are of the conditions observed at the time of the assessment.

Blackstone reviewed an environmental database search report. Blackstone's conclusions based on the search report are limited to the accuracy of that report. To the extent possible, Blackstone's field observations are used to verify the information or identify errors and inconsistencies in the search report regarding the listed facilities in the immediate vicinity of the site.

This report provides an estimation of groundwater flow direction at the site based on visual observations and topographical data. This assessment did not include groundwater sampling and water table elevation measurement. True groundwater flow direction can only be determined through direct measurement of groundwater elevations from properly installed on-site groundwater monitoring wells. The groundwater flow direction estimation should not be considered a true measurement of groundwater flow direction.

2.0 USER PROVIDED INFORMATION

As defined under ASTM Standard Practice E 1527-13, Walker & Dunlop and Fannie Mae are considered the "User" of this Phase I ESA report. To qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (the "*Brownfields Amendments")*, the User must provide certain information based on their relationship to the purpose of the due diligence and as required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31.

As part of this Phase I ESA, Blackstone requested certain information from the User. The User did not provide the requested information to Blackstone pursuant to the User's Responsibilities described in ASTM Standard Practice E 1527-13 (Section 6.0) and as outlined below in Sections 2.2 through 2.4. However, there is no reason to believe that the absence of the User provided information would significantly alter the findings or recommendations set forth in this report or be considered a significant data gap.

The owner's representatives, Ms. Kimberly Periard, Community Manager, and Mr. Lennie Dawson, Maintenance Technician (collectively "Site Representative"), provided information about the site. The information requested and associated responses are outlined below in Section 2.5.

2.1 REASON FOR PERFORMING THE PHASE I ESA

Blackstone understands that this assessment was performed for Walker & Dunlop for financing purposes. In addition, this assessment was performed for Fannie Mae in consideration of making a potential loan secured by the site. As such, this Phase I ESA was performed as an appropriate risk management and environmental due diligence review associated with a potential real-estate collateralized lending transaction.

2.2 ENVIRONMENTAL LIENS AND ACTIVITY USE AND LIMITATIONS (AULS)

With reference to environmental liens that are filed or recorded against the site (40 CFR 312.25) in recorded land title records or judicial records, the User did not provide this information to Blackstone or request Blackstone to perform an environmental lien search as part of the scope of work.

With reference to activity and use limitations (AULs) that are in place on the site or that have been filed or recorded against the site (40 CFR 312.26(a)(1)(v) and (vi)) in recorded land title records or judicial records, the User did not provide this information to Blackstone or request Blackstone to perform an AUL search as part of the scope of work. In accordance with ASTM E 1527-13, Blackstone reviewed an environmental database search report that included a search of institutional control and engineering control databases as further discussed in Section 7.0.

2.3 SPECIALIZED KNOWLEDGE, COMMONLY KNOWN & DEGREE OF OBVIOUSNESS

With reference to specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28), the User did not provide any information to Blackstone regarding specialized knowledge or experience related to the site or nearby properties.

With reference to commonly known or *reasonably ascertainable* information about the site (40 CFR 312.30), the User did not provide any information to Blackstone regarding commonly known or *reasonably ascertainable* information about the site that would help the *environmental professional* to identify conditions indicative of releases or threatened releases, such as:

1. Past uses of the site;
2. Specific chemicals that are present or once were present at the site;
3. Spills or other chemical releases that have taken place at the site; and
4. Environmental cleanups that have taken place at the site.

The User provided Blackstone with a prior environmental report for the site, which is further discussed in Section 6.7.

With reference to the degree of obviousness of the presence or likely presence of releases or threatened releases at the site, and the ability to detect releases or threatened releases by appropriate investigation (40 CFR 312.31), the User did not provide any information to Blackstone regarding *obvious* indicators that point to the presence or likely presence of releases at the site.

2.4 VALUE REDUCTION FOR ENVIRONMENTAL ISSUES

The User did not provide information with reference to the relationship of the purchase price to the fair market value of the site if contamination is known or believed to be present at the site (40 CFR 312.29).

2.5 OWNER, KEY SITE MANAGER, AND OCCUPANT INFORMATION

Blackstone interviewed the Site Representative (including the Key Site Manager) regarding environmental conditions at the site. The Site Representative was not aware of: (1) pending, threatened, or past litigation relevant to environmental conditions on the site; (2) any pending, threatened, or past administrative proceedings relevant to environmental conditions in, on, or from the site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to environmental conditions on the site.

The site owner was not available to provide information regarding the environmental conditions at the site. In addition, as the site is used for multi-family residential purposes, the occupants were not interviewed.

2.6 PAST OWNERS, OPERATORS AND OCCUPANT INTERVIEWS

In accordance with ASTM Standard Practice E 1527-13, interviews with past owners, operators, and occupants shall be conducted to the extent that they have been identified and that the information likely to be obtained is not duplicative of information already obtained. There is no reason to believe that such interviews were necessary for this site or would alter the findings or recommendations set forth in this report.

2.7 RELIANCE

Blackstone performed this Phase I ESA on behalf of and exclusively for Walker & Dunlop and Fannie Mae and each of their affiliates, attorneys, lenders, investors, successors and each of their assigns subject to the terms and conditions of the Agreement between Walker & Dunlop and Blackstone. This report is addressed to Walker & Dunlop and its affiliates. Walker & Dunlop and its affiliates, their respective successors and assigns (including, without limitation, investors who purchase the mortgage loan or a participation interest in the mortgage loan and the trustee in a securitization that includes the mortgage loan), each servicer of the mortgage loan, and all rating agencies involved in any sale, securitization or syndication involving the mortgage loan may use and rely upon this Report, including, without limitation, utilizing selected information from the Report in the offering materials (either in electronic or hard copy format) relating to any sale, securitization or syndication involving the mortgage loan. The Assessor agrees to cooperate in answering questions by any of the above parties in connection with the sale, securitization or syndication, as communicated by Walker & Dunlop personnel.

In addition, this assessment is subject to the stated limitations of the above-referenced Fannie Mae DUS Guidelines and other qualifications as described within the report. Any reliance upon this report by third parties beyond its intended purpose shall be at the parties' sole risk.

3.0 SITE DESCRIPTION

The site is located at 255 and 275 Huguenot Street in New Rochelle, Westchester County, New York. A Site Location Map, depicted on the U.S. Geological Survey (USGS) *Mount Vernon, New York* topographic quadrangle, is included in Appendix A.

3.1 SITE CHARACTERISTICS AND FEATURES

Street Address: 255 and 275 Huguenot Street

City and State: New Rochelle, New York

County: Westchester

Legal Description: City of New Rochelle Tax Map Identification Numbers: 1-234-0001 (Apartment Building) and 2-418-0001 (Parking Garage)

Owner: New Rochelle Ind. Development Agency (Apartment Building)
Avalon Bay Communities Inc. (Parking Garage)

Site Size: Approximately 2.3 acres

Zoning: DMUR (Downtown Mixed Use Urban Renewal District) and is located with the Central Parking Area Overlay District

Site Use: The site is developed with a 24-story apartment building, containing 412 total dwelling units, and a five-story parking structure. The site apartment building includes basement and penthouse mechanical levels, four street level commercial tenant spaces, and a single-story building extension containing the apartment amenities. Two of the commercial spaces are currently vacant and the remaining two are currently occupied by Sound Drycleaners (drop-off/pick-up only) and Metro Market (convenience store). The site property is bisected by Memorial Highway, which separates the parking garage from the apartment tower building; however, the apartment building and parking garage are connected via a covered, elevated walkway over Memorial Highway.

Year Built: 2001

Structure	***Location On Site***	***Number of Stories***	***Size (approx. square feet)***
Apartment Building	Northern	24 with basement and penthouse mechanical levels	431,125 SF
Parking Garage	Southern	5	180,000

Construction Materials	
Apartment Building	The apartment building is structural steel and concrete framed with reinforced concrete beams, columns and floor decks. The foundation systems are presumed to be constructed of a concrete slab below grade with piers at column locations and perimeter grade beams with reinforced concrete foundation walls. The building exterior finishes consist of brick veneer with decorative aluminum elements at the window openings. The low-slope roofs are concrete framed and are primarily covered with IRMA (inverted roof membrane assembly) membranes; the mechanical penthouse low-slope roof is covered with modified bitumen cap sheets.
Parking Garage	The parking garage is reinforced concrete framed with reinforced concrete floor decks.
Heating/Cooling Systems:	Heating is provided by five central, natural gas-fired low-pressure boilers which distribute heated water to individual thru-wall mounted PTAC units within the dwelling units. The PTAC units also contain integral compressors/condensers for cooling. Domestic hot water is provided by four total central, natural gas-fired low-pressure boilers with external storage tanks.
Other Site Features:	Amenities and additional features at the site include a leasing/management office, a club room, a conference room, a common tenant laundry room, a fitness center, a yoga room, a tot room, an outdoor in-ground swimming pool, a picnic area, and a playground. Vertical transportation for the apartment building is provided by four cable-driven elevators. The remainder of the site consists concrete pedestrian walkways and moderate landscape features.

A Site Plan and Site Photographs are provided in Appendix A.

3.2 UTILITIES

Electricity Provider: Con Edison

Natural Gas Provider: Con Edison

Potable Water: United Water New York

Sewer Services: City of New Rochelle

According to the Site Representative, the site has been connected to the municipal systems for sanitary sewage disposal and potable water supply since construction was completed in 2001. The site was previously developed with multiple commercial and residential structures since at least the 1880s. The City of New Rochelle water and sewer systems date back to at least the late 1800s; therefore, it is likely that the former site buildings were connected to the municipal potable water and sanitary sewer systems.

No RECs were identified as a result of the review of the site as described in this section of the report.

4.0 VICINITY RECONNAISSANCE

The site is located in the City of New Rochelle, New York, within an area characterized by urban commercial development. Adjoining property use is summarized as follows:

North: Bridge Street followed by Chase Bank office building (270 North Avenue)

East: Huguenot Street followed by a surface parking lot, the Ruby Dee Park on Library Green, the Halstead New Rochelle apartments (40 Memorial Highway), and commercial development (multiple addresses along Huguenot Street, uses include a florist, a restaurant, and a market)

South: Division Street followed by the Trinity St. Paul Anglican Episcopal Church (311 Huguenot Street)

West: Station Plaza South followed by the New Rochelle train station, parking garage and associated railroad tracks

Source	Findings
Field observations	Blackstone observed no industrial, manufacturing or military operations such as outdoor chemical or hazardous waste storage or handling activities that may impact the site and no evidence of chemical spills, releases, or waste disposal was observed. From accessible vantage points, Blackstone identified no outdoor chemical or waste storage, wastewater treatment facilities, or other operations that may impact the site and no pits, ponds or lagoons for apparent discharge and/or treatment of process water.
Environmental databases search	Adjoining and/or nearby properties identified in the environmental databases searched are further discussed in Section 7.0.

No RECs were identified as a result of the vicinity reconnaissance.

5.0 PHYSICAL SETTING

	Findings	*Sources of Findings*
Surficial Soils Beneath Site	Urban land	EDR Report
Depth to Bedrock	Between 5 and 50 feet bgs	EDR Report
Topography	The site is relatively flat with an overall area declination to the east.	Site observations, USGS *Mount Vernon, New York,* topographic map and EDR Report
Elevation	Approximately 84 feet NAVD	USGS *Mount Vernon, New York,* topographic map and EDR Report
Depth to Shallow Groundwater	Approximately 10-30 feet bgs	EDR Report
Estimated Groundwater Flow Direction	East	USGS *Mount Vernon, New York,* topographic map and EDR Report

bgs: below ground surface
EDR Report: Environmental Data Resources Database Report with GeoCheck®
NAVD: North American Vertical Datum, 1988-1990
USGS: United States Geological Survey

No RECs were identified as a result of the physical setting records review.

6.0 HISTORICAL INFORMATION REVIEW

As part of this Phase I ESA, Blackstone reviewed historical information to identify RECs associated with the historical use of the site and surrounding properties. Blackstone obtained historical information from interviews with site representatives and other individuals familiar with the site as well as aerial photographs, historical maps, and other *practically reviewable* standard historical sources that are considered *reasonably ascertainable*.

6.1 HISTORICAL FIRE INSURANCE MAPS

Environmental Data Resources, Inc. (EDR) conducted a search of available historical fire insurance maps for the site and site vicinity. Historical fire insurance maps are scaled drawings that indicate the location and use of building structures present in a given area from as early as the late 1800s. The maps provide information regarding the development and historical use of site structures and can indicate the historical presence of tanks at the site and other potential environmental concerns.

Sanborn Fire Insurance Company maps were available for the site from EDR. Select Sanborn maps are reproduced in Appendix B and are summarized as follows:

SUMMARY OF HISTORICAL SANBORN MAP REVIEW

Year	Site	Adjoining Properties
1887	The site is depicted with three residential dwellings.	The north and east adjoining properties are depicted with residential and commercial development. The west-adjoining property is depicted with railroad tracks and a railroad passenger depot. The present-day church is depicted to the adjoining south.
1892	Multiple commercial structures are depicted along the northern perimeter of the site.	A portion of the east-adjoining property is depicted with a hospital.
1896	Additional commercial development is depicted at the site, including a hotel, several restaurants, a post office, and multiple offices.	The hospital is no longer depicted to the adjoining east.
1903	The site is depicted as similar to the previous Sanborn map.	The adjoining properties are depicted as similar to the previous Sanborn map.
1911	The site is depicted with multiple commercial structures, including a theater and a "Chinese laundry".	The north and east adjoining properties are depicted with urban commercial development. A "Chinese laundry" is depicted to the adjoining north.
1931	The site is depicted with multiple commercial structures, including a bowling alley. A used car sales and storage structure is depicted in the southwest corner of the site.	The north and east adjoining properties are depicted with urban commercial development. A drycleaning facility is depicted to the adjoining east.

SUMMARY OF HISTORICAL SANBORN MAP REVIEW

Year	Site	Adjoining Properties
1942	The former used car storage structure is identified as Hill Motors Corporation Chevrolet.	The adjoining properties are depicted as similar to the previous Sanborn map. The former drycleaning facility is no longer depicted to the adjoining east.
1951	Several surface parking lots are depicted in the northwest corner of the site.	The adjoining properties are depicted as similar to the previous Sanborn map.
1990	The site is depicted with multiple commercial structures and surface parking lots. A gas tank is depicted along the western perimeter of the site, near the intersection of Memorial Highway and Railroad Place (location of the present-day apartment building) adjoining a small retail building (identified with three retail stores).	The present-day office building is depicted to the adjoining north. Commercial development and surface parking lots are depicted to the adjoining east. The present-day church is depicted to the adjoining south. The present-day railroad station is depicted to the adjoining west.
1991	The site is depicted as similar to the previous Sanborn map.	The adjoining properties are depicted as similar to the previous Sanborn map.
1992	The site is primarily vacant land and surface parking lots, with one three-tenant retail structure and the adjoining gas tank remaining depicted along the western perimeter.	The adjoining properties are depicted as similar to the previous Sanborn map.
1993	The site is depicted as similar to the previous Sanborn map.	The adjoining properties are depicted as similar to the previous Sanborn map.
1994	The site is depicted as similar to the previous Sanborn map.	The adjoining properties are depicted as similar to the previous Sanborn map.
1995	The site is depicted as similar to the previous Sanborn map.	The adjoining properties are depicted as similar to the previous Sanborn map.
1996	The site is depicted as similar to the previous Sanborn map.	The adjoining properties are depicted as similar to the previous Sanborn map.
2003	The site is depicted with the present-day apartment building and parking garage. None of the former improvement remain.	The present-day park is depicted to the adjoining east. The location of the present-day apartment building to the adjoining east is depicted as vacant land.

Findings: As further discussed in Section 6.8, the former auto sales and service facility, "Chinese laundry", and gas tank depicted on the site are not considered RECs, and the historical north adjoining "Chinese laundry" and east-adjoining drycleaning facility are not considered a REC. No RECs were identified as a result of the review of historical fire insurance maps.

6.2 AERIAL PHOTOGRAPHS

Aerial photographs of the site area were obtained from EDR. The aerial photographs are reproduced in Appendix B and are summarized as follows:

Year	Aerial Photographs: Development/Land Uses	
	Site	*Adjoining Properties*
1951	The site appears to be developed with multiple commercial structures. The northwest corner of the site appears to be a surface parking lot.	Urban commercial development is visible to the adjoining north and east. The present-day church structure is visible to the adjoining south. Railroad tracks and a presumed rail station are visible to the adjoining west.
1954	The site appears similar to the previous aerial photograph.	The adjoining properties appear similar to the previous aerial photograph.
1961	The site appears similar to the previous aerial photograph.	The adjoining properties appear similar to the previous aerial photograph.
1966	The site appears similar to the previous aerial photograph.	The adjoining properties appear similar to the previous aerial photograph.
1974	The site appears similar to the previous aerial photograph.	The present-day bank structure is visible to the adjoining north. The present-day surface parking lot is visible to the adjoining east.
1980	The site appears similar to the previous aerial photograph.	The adjoining properties appear similar to the previous aerial photograph.
1985	The site appears similar to the previous aerial photograph.	The adjoining properties appear similar to the previous aerial photograph.
1994	The site is primarily vacant land, with a surface parking lot visible in the northeast corner of the site and a small commercial-type structure along the western perimeter.	The adjoining properties appear similar to the previous aerial photograph.
2006	The site is developed with the present-day apartment building and parking garage.	The present-day park area is visible to the adjoining east. The present-day east-adjoining apartment building appears to be undergoing development.
2009	The site appears similar to the previous aerial photograph.	The present-day apartment building to the adjoining east is visible.
2011	The site appears similar to the previous aerial photograph.	The adjoining properties appear similar to the previous aerial photograph.

Findings: No RECs were identified as a result of the review of historical aerial photographs.

6.3 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps of the site area were obtained from EDR. The historical topographic maps are included in Appendix B and are summarized as follows:

Year	Historical Topographic Maps: Development/Land Uses	
	Site	*Adjoining Properties*
1897	The site is depicted with areas of black shading (indicative of areas covered with buildings).	The adjoining properties are depicted with areas of black shading. Railroad tracks are depicted to the adjoining west.
1898	The site is depicted as similar to the previous topographic map.	The adjoining properties are depicted as similar to the previous topographic map.
1900	The site is depicted as similar to the previous topographic map.	The adjoining properties are depicted as similar to the previous topographic map.
1947	The site is depicted as similar to the previous topographic map.	The adjoining properties are depicted as similar to the previous topographic map.
1956	The site is depicted with pink shading (indicative of dense urban development).	The adjoining properties are depicted with pink shading. Railroad tracks are depicted to the adjoining west.
1966	The site is depicted as similar to the previous topographic map.	The adjoining properties are depicted as similar to the previous topographic map.
1979	The site is depicted as similar to the previous topographic map.	The adjoining properties are depicted as similar to the previous topographic map.
1995	The site is depicted as similar to the previous topographic map.	The adjoining properties are depicted as similar to the previous topographic map.
2013	The 2013 topographic map does not include structures or shading (similar to a street map, except with contour lines).	

Findings: No RECs were identified as a result of the review of historical topographic maps.

6.4 AGENCY RECORDS, INTERVIEWS AND OTHER HISTORICAL SOURCES

In accordance with ASTM E1527-13, Blackstone requested site history and/or regulatory information regarding the site from federal, state and/or local government officials. Information regarding the site is obtained from regulatory agency officials either by:

1) Conducting interviews by telephone or in-person at various federal, state and/or local agencies; or

2) Requesting file information via submission of an open records request to the appropriate agency contact based upon applicable agency requirements, and in accordance with the Freedom of Information Act (FOIA).

Findings from the interviews/records review are summarized below:

Agency Records, Interviews and Other Historical Sources		
Source	*Information Requested*	*Findings*
City of New Rochelle Tax Assessor website	On-line query for development, ownership information, and tax assessment data.	No environmental concerns were identified. Typical site ownership and tax assessment data were obtained.
City of New Rochelle, City Clerk, FOIL Request Form, via email cityclerkinfo@newrochelleny.com	Aboveground and/or underground storage tanks, past hazardous materials spills, and/or any emergency environmental responses or incidents	A FOIA request was submitted to this agency. A response has not been received to date and is not considered reasonably ascertainable for inclusion in this report.
Zoning Map of the City of New Rochelle, New York, revised December 14, 2010	Zoning information	The site is zoned DMUR (Downtown Mixed Use Urban Renewal District) and is located with the Central Parking Area Overlay District.
New York State Department of Environmental Conservation (NYSDEC), online database	On-line spills incident, Petroleum Bulk Storage (PBS), and remediation database	Information obtained from the NYSDEC database is discussed in pertinent sections of the report.
NYSDEC FOIL Coordinator, via email (no name provided) access.records@dec.ny.gov	Aboveground and/or underground storage tanks, past hazardous materials spills, and/or any records of emergency environmental responses or incidents	A FOIA request was submitted to this agency. To date a response has not been received and available records are not considered reasonably ascertainable for inclusion in this report.

Findings: No RECs were identified from the review of the local agency records, interviews, or other readily available historical sources.

6.5 CITY DIRECTORIES

Blackstone requested a city directory review for the site address from EDR. City directories were reviewed at approximately five-year intervals for the years spanning 1972 through 2013. The present-day site address of 255 Huguenot Street was identified as the Portuguese American Club in the 1987 city directory and as the Avalon on the Sound Apartments with multiple residential listings in the city directories dated between 2003 and 2013. The present-day site address of 275 Huguenot Street was not identified in the city directories provided for review. The historical site addresses of 245-295 Huguenot Street (odd), 58-73 Memorial Highway (odd and even) and 55-65 Division Street (odd) was primarily identified with multiple commercial listings, including restaurants, offices, and retail outlets, in the city directories dated between 1972 and 1992. No listings of environmental concern were identified for the site.

The north-adjoining property at 270 North Avenue was identified as the National Bank of Westchester and professional office listings in the city directories dated between 1972 and 1982 and as Chase Bank and professional office listings in the city directories dated between 1987 and

2013. The east-adjoining properties are primarily identified with commercial listings in the city directories dated between 1972 and 2013. The east-adjoining property at 40 Memorial Highway is identified with multiple residential listings in the 2013 city directory. The south-adjoining property at 311 Huguenot Street is identified as the Trinity Episcopal Church in the city directories dated between 1972 and 2013. No listings of environmental concern were identified for the site.

No RECs were identified during the review of city directories.

6.6 ENVIRONMENTAL LIEN/AUL SEARCH

As previously discussed in Section 2.2, an environmental lien and activity & use limitation (AUL) search was not included in the scope of this assessment and was not provided to Blackstone for review by the User.

6.7 PREVIOUS ENVIRONMENTAL REPORTS

Blackstone was not provided with any previous environmental reports for review regarding the site.

6.8 HISTORICAL INFORMATION CONCLUSIONS

Reasonably ascertainable historical information indicates the site was initially developed with residential structures prior to 1887. By 1900, the northern majority of the site was developed with commercial buildings, and by 1930, the entire site was densely developed with numerous commercial structures containing multiple small businesses, primarily retail storefronts, with commercial businesses and hotels on the upper floors. Historical commercial uses of the site included hotels, office space, retail stores, restaurants, a post office, a bowling alley, a theater, a "Chinese laundry" (1911 only), an auto sales and service facility (southwest corner from the 1930s until the 1980s), and surface parking lots. The former site structures were demolished between the early and mid-1990s, and the site was redeveloped with the present-day high rise apartment building and the present-day parking garage in 2001.

The site was identified with a small "Chinese laundry" facility in 1911. This type of facility in this era was typically a hand washing operation. The use of chlorinated solvents was not introduced into the dry cleaning industry until the late 1930s, and its use became widespread in the late 1940s following World War II. No addition historic cleaners or dry cleaning operations are identified on the site. Based on the era of operation and the duration of time since the facility was identified on the site (over 100 years), this laundry facility is not considered a REC.

Sound Drycleaning has been located at the site since at least the mid-2000s. However, this tenant only operated as a drop-off/pick-up only location, and is not involved in active drycleaning activities. This site tenant is not identified on any databases indicative of the generation or disposal of hazardous wastes typically associated with an active drycleaning facility. As such, the site drycleaner tenant is not considered a REC.

The site historically contained an auto sales and service facility in the southwest corner of the site between at least the 1930s and the 1980s. This facility is not identified on any databases indicative of the generation, disposal or release of hazardous materials and/or waste, nor the operation of underground storage tanks (USTs). The site area where this facility was located is directly beneath the present-day site parking garage. There was no report of impacted soil or other remnants of the auto service operation encountered during the development of the site parking structure in 2001. Considering the current regulatory status (no reports releases), the amount of time that has passed since this facility was active (approximately 30 years), and that this site area has been redeveloped with a multi-story parking garage that would have necessitated significant excavation during construction, the historical presence of the auto sales and service facility in the southwest corner of the site is not considered a REC.

The Sanborn maps from the 1990s included the depiction of a gasoline tank on the western portion of the site. As further discussed in Section 7.1, a 2000-gallon UST was removed from this area of the site in February 2000, during redevelopment activities. Some minor soil impacts were identified and excavated during the UST removal process, and the UST closure was approved by the lead regulatory agency; therefore, the historical presence of the UST at the site is not considered a REC.

The north and east-adjoining properties have consisted of urban residential and commercial development since at least the late 1800s. The north-adjoining property beyond Bridge Street consisted of multiple commercial structures, including a "Chinese laundry" in 1911, prior to the construction of the present-day Chase Bank office building in the early 1970s. The east-adjoining properties beyond Huguenot Street consisted of multiple commercial structures between the late 1800s and the late 1900s, including a drycleaning facility in the 1930s in the southern portion of the east-adjoining property, prior to the construction of the present-day improvements. The present-day surface parking lot to the adjoining east was constructed in the 1970s. The present-day Ruby Dee Park on Library Green was developed in the 2000s, the present-day Halstead New Rochelle apartment building to the adjoining east was constructed in the late 2000s, and the commercial development located in the southern portion of the east-adjoining property was constructed in the mid-1900s. The present-day Trinity St. Paul Anglican Episcopal Church to the adjoining south beyond Division Street was reportedly constructed in the 1860s. The present-day railroad tracks to the adjoining west beyond Station Plaza South were developed prior to 1887 and the present-day New Rochelle station was constructed in the early 1900s.

A "Chinese laundry" facility was historically located to the adjoining north in at least 1911 and a drycleaning facility was located in the southern portion of the east-adjoining property in at least the 1930s. These facilities are not identified on any databases indicative of the generation or disposal of hazardous waste. As stated previously, the use of chlorinated solvents was not introduced into the dry cleaning industry until the 1930s, and its use became widespread in the late 1940s following World War II. No addition cleaners or dry cleaning operations are identified on adjacent properties. Based on the era of operation and the duration of time since these facilities were identified (over 80 years), the historical presence of these facilities on the adjoining properties is not considered a REC.

No RECs were identified as a result of the historical records review.

7.0 ENVIRONMENTAL DATABASE SEARCH AND REVIEW

EDR provided Blackstone a search report of federal, state, local, tribal and proprietary environmental databases to determine the environmental regulatory status of the site, adjoining facilities, and facilities identified within the specified approximate minimum search distance (AMSD) of the site. ASTM Standard E 1527-13 establishes the distance from the site that each database is searched. The database search report, including the date and a detailed description of each database searched, is provided in Appendix C.

The federal, state, local, tribal and proprietary databases searched, the search distances specified for each database, and the results of the environmental database search are summarized as follows:

7.1 FEDERAL, STATE, LOCAL, TRIBAL AND PROPRIETARY DATABASES

Blackstone reviewed the following databases:

RGA LF: Recovered Government Archive Solid Waste Facilities List	Site only

The results of the database search are summarized as follows:

SITE:
The site, under the name Office Building at 8-10 Railroad Place, is identified on the Spills database. Review of the available Spills information indicates that the site dates to November 28, 1990, pertained to a release of gasoline from an underground storage tank (UST) that appeared to be leaking, the cleanup work was identified as having met standard, and the case was issued regulatory closure on May 8, 1991. Review of information on the New York State Department of Environmental Conservation (NYSDEC) Spills Incident Database confirmed that the case has been issued regulatory closure. Considering the current regulatory status, the amount of time that has passed since the case was active (over 25 years), and that the site has since been redeveloped with a high-rise apartment building and a parking garage that required significant site excavation, the site listing on the Spills database is not considered a REC.

The site, under the name Sound Cleaners at 255 Huguenot Street/63 Memorial Highway, is identified on the EDR Historical Cleaners and Drycleaners databases. The site address is identified Sound Cleaners between 2009 and 2012. The EDR Historical Cleaners database is a proprietary database compiled exclusively from EDRs internal review of historical city directories and names potentially associated with dry cleaning related businesses, and is not indicative of a confirmed business location or operation. This site tenant is not identified on any additional databases indicative of the generation or disposal of hazardous wastes typically associated with an active drycleaning facility. Based on the site inspection and interviews, this facility has only been occupied as a drop off/pick up location, and dry cleaning performed on the site. As such, the site drycleaner listing is not considered a REC.

The site, under the name AvalonBay Communities/Avalon on the Sound at Memorial Highway and Huguenot Street, is identified on the UST and Spills databases. According to the UST database, a 2,000-gallon UST was removed from the site on February 1, 2000. Review of the available Spills information indicates that the spill dates to February 4, 2000, and pertained to the discovery of impacted soils during the removal of a UST, the cleanup work was identified as having met standard, and the case was issued regulatory closure on April 4, 2000. Review of information on the NYSDEC Spills Incident Database confirmed that the case has been issued regulatory closure. Considering the current regulatory status, the amount of time that has passed since the case was active (over 15 years), and that the site has since

been redeveloped with a high-rise apartment building and a parking garage that required significant site excavation, the site listings on the UST and Spills databases are not considered a REC.

ADJOINING OR FACILITIES IN CLOSE PROXIMITY:

Vacant Lot (Huguenot Street/Division Street) is located approximately 100 feet to the adjoining east of the site and downgradient of the site relative to the inferred groundwater flow direction. This facility is identified on the LTANKS database. According to the LTANKS database, the case dates to 2005, pertained to the discovery of a release during a UST removal, cleanup work was performed, and the case was issued regulatory on March 15, 2006. Considering the current regulatory status and the downgradient position in relationship to the site, this facility is not considered a REC.

Shoreline Oil (296 Huguenot Street Rear) is located approximately 100 feet to the adjoining east of the site and downgradient of the site relative to the inferred groundwater flow direction. This facility is identified on the LTANKS database. According to the LTANKS database, the case dates to 1988, pertained to a tank overfill, cleanup work was performed, and the case was issued regulatory on April 6, 1988. Considering the current regulatory status and the downgradient position in relationship to the site, this facility is not considered a REC.

Jones Residence/Trinity St. Paul's Episcopal Church (311 Huguenot Street) is located approximately 100 feet to the adjoining south of the site and crossgradient of the site relative to the inferred groundwater flow direction. This facility is identified on the UST and LTANKS databases. Review of the available UST information indicates that this facility previously contained a UST that was closed in place in 2005. According to the LTANKS database, the case dates to 2004, pertained to the closure of a UST, no contamination was discovered in the soil samples obtained, and the case was issued regulatory on September 11, 2005. Considering the current regulatory status and the crossgradient position in relationship to the site, this facility is not considered a REC.

Con Edison (Memorial Highway and Huguenot Street/Division Street and Huguenot Street) is located to the adjoining east and downgradient of the site based on inferred direction of groundwater flow. This facility is listed on the RCRA-LQG, RCRA Non Gen/NLR, and Manifest databases. Con Edison has at least eight listings for the east-adjoining roadways on the Manifest database, presumably for the replacement of electrical transformers, that date to between 2007 and 2014. Con Edison is identified as a large quantity generator of hazardous waste in the form of lead and was previously a non-generator of hazardous waste. No RCRA violations have been identified. Based on the current regulatory status, this west adjoining facility is not considered a REC.

NON-ADJOINING FACILITIES WITHIN APPROXIMATE MINIMUM SEARCH DISTANCE:

As detailed in the EDR Report, several other facilities on various databases are within the Fannie Mae designated search parameters and the ASTM E 1527-13 Approximate Minimum Search Distance (AMSD). Based on factors such as distance to the site, topography, media affected (surface water, soil, soil vapor, groundwater, or air), depth to groundwater, anticipated and reported groundwater flow direction away from the site, hydrological separation, and/or a "Closed Out" and/or "No Further Action (NFA)" regulatory status, these non-adjoining facilities within the Fannie Mae designated search parameters and the AMSD are unlikely to have current or former releases of hazardous substances and/or petroleum products that could migrate to the site and are not considered RECs.

7.2 UNMAPPABLE FACILITIES

Due to inadequate address information or other erroneous facility information, several facilities listed in the environmental databases searched could not be plotted by EDR on a radius map. However, these facilities are still identified in the EDR report by grouping them into an unmappable facility summary. Blackstone reviewed this summary to determine if any of the listed facilities include or adjoin the site. The unmappable facility listings are summarized as follows:

SITE:
Not listed

ADJOINING FACILITIES:
None listed

7.3 AFFIRMATION

Blackstone's conclusions based on the EDR report are limited to the accuracy of that report. To the extent possible, field observations are used by Blackstone to verify the information or identify errors and inconsistencies in the search report regarding the listed facilities in the immediate vicinity of the site. The database reviewed is sufficiently complete and current to be used as a source to satisfy the regulatory database requirements outlined in ASTM Standard E1527-13.

7.4 ENVIRONMENTAL DATABASE SEARCH AND REVIEW CONCLUSIONS

Based upon Blackstone's review of the EDR database report, no regulatory file reviews are warranted. No RECs were identified as a result of the environmental database search and review.

8.0 SITE INSPECTION

Name of Inspector: John O'Connor
Date of Site Inspection: May 25, 2016

SITE REPRESENTATIVE		
Name	*Title or Association with Site*	*Years Associated with Site*
Ms. Kimberly Periard	Community Manager	2.5 years
Mr. Lennie Dawson	Maintenance Technician	1 year

The site inspection consisted of a walkover of the site perimeter and exterior site areas, and a walk-through of the leasing office, common areas, maintenance/storage areas, mechanical rooms, parking garage, the commercial tenant spaces, and 42 representative dwelling units selected by Blackstone (Units 107, 117, 201, 202, 204, 310, 316, 402, 405, 410, 415, 1601, 1604, 1608, 1616, 1703, 1718, 1803, 1806, 1816, 1902, 1903, 1909, 1915, 2005, 2006, 2013, 2017, 2105, 2109, 2114, 2203, 2217, 2315, 2316, 2409, 2411, 2418, 2507, 2508, 2511, and 2516). The building interior was walked through at the direction of the Site Representative. Not all dwelling units were entered nor were all common and/or storage areas observed. Furthermore, during the site inspection, Blackstone did not inspect inaccessible areas of the site including beneath parked motor vehicles, under manholes, or within the elevator pits. The adjoining properties were visually observed from curbside without being entered. There is no reason to believe the inability to inspect these areas would alter the findings or recommendations set forth in this report or be considered a significant data gap.

8.1 UNDERGROUND STORAGE TANKS (USTS)

Number of USTs	*Capacity (gallons)*	*Contents*	*Location*	*Status/Notes*	*REC*
None					No

No physical evidence of current or former USTs was identified during the site inspection. The Site Representative was unaware of current or former USTs.

8.2 ABOVEGROUND STORAGE TANKS (ASTS)

Number of ASTs	*Capacity (gallons)*	*Contents*	*Location*	*Status/Notes*	*REC*
1	175	Diesel	Exterior northern side of apartment building	Fuels emergency generator; registration not required. Equipment is owned by the site. No visible evidence of leaks or spills was observed. No concerns were identified.	No

No physical evidence of other current or former ASTs was identified during the site inspection. The Site Representative was unaware of any other current or former ASTs.

8.3 CHEMICALS AND MATERIALS USAGE

The following section describes non-bulk (55-gallons or less) chemical and petroleum storage at the site. Where applicable, all bulk fixed chemical and petroleum product storage (i.e. USTs and/or ASTs) is discussed in Sections 8.1 and 8.2.

Chemical or Material	*Use*	*Container Type*	*Location*	*REC*
Cleaning supplies	General maintenance	5-gallons or smaller	Maintenance storage areas and dwelling units	No
Pool chemicals	Pool maintenance	5-gallons or smaller	Pool equipment enclosure	No
General maintenance supplies (paints, cleaners, degreasers, adhesives, etc.)	General maintenance	5-gallons or smaller	Maintenance storage areas	No

No evidence of surface staining, spills, or releases was apparent in the chemical storage areas. All chemicals were observed to be properly stored. According to the Site Representative, no releases of chemicals or materials requiring emergency response and/or agency notification have occurred at the site.

8.4 HAZARDOUS WASTES

Hazardous Waste	*Generated By*	*Storage Container*	*Storage Location*	*Disposal Details*	*REC*
None					No

No physical evidence of on-site hazardous waste generation, storage, or disposal was identified during the site inspection. The Site Representative was unaware of any on-site hazardous waste generation, storage, or disposal.

8.5 NON-HAZARDOUS WASTES

Non-Hazardous Waste	*Generated By*	*Storage Container*	*Storage Location*	*Disposal Details*	*REC*
General refuse and recyclables	Residents and employees	Trash compactor	Trash room in the apartment building	Emptied regularly by contracted waste hauler	No

No physical evidence of on-site non-hazardous waste disposal was identified during the site inspection. The refuse area was observed in good condition. The Site Representative was unaware of any on-site non-hazardous waste disposal.

8.6 POLYCHLORINATED BIPHENYLS (PCBS)

PCBs can be present in coolants or lubricating oils used in older electrical transformers, hydraulic systems, and other similar equipment. The 1976 Toxic Substances Control Act (TSCA) extended regulatory control over the use of PCBs to the United States Environmental Protection Agency (USEPA). In November 1979, the USEPA generally prohibited the domestic manufacture of PCBs in electromagnets, transformers, and heat-transfer and hydraulic equipment.

Equipment	*Location*	*Owner*	*Status/Notes*	*REC*
Vaulted transformers	Presumed to be under the sidewalk site perimeters	Con Edison	See discussion below	No
Trash compactor	Eastern portion of the site	Site	See discussion below	No
Hydraulic elevator	Parking garage	Site	See discussion below	No

Blackstone did not observe any pad or pole-mounted transformers on the site, and it is assumed that the transformers serving the site are vaulted (presumed to be located under the sidewalk along the site perimeters). Based on the date the site buildings were constructed (2001), the presence of PCB-containing fluid is unlikely. In addition, should fluid spills or releases from an electrical transformer occur, associated remediation efforts are typically the responsibility of the transformer owner (Con Edison) per Federal regulation (40 CFR 761.125). As such, the transformers are not considered a REC.

The site contains a hydraulic trash compactor within a trash room in the apartment building. The compactor is owned by the site and is maintained and regularly emptied by a contracted waste disposal firm. The compactor hydraulic reservoir was observed in generally good condition, with no signs of staining or leakage beneath the reservoirs. Considering the presumed installation date of the compactor (2001), the presence of PCB-containing fluid is unlikely. As such, the hydraulic compactor is not considered a REC.

The site contains a hydraulic elevator that is located within the site parking garage. According to the Site Representative, the site elevator is are regularly maintained by a contracted service firm. No visible evidence of leakage was observed in connection with the hydraulic equipment. The elevator pit was not available for inspection. Based on the reported date of installation and the absence of observed leaks, the hydraulic elevator is not considered a REC.

8.7 WASTEWATER DISCHARGES

Type	*Generated By*	*Discharged To*	*Status/Notes*	*REC*
Sanitary	Residents and staff	Municipal sewer	No concerns noted	No

No physical evidence of septic systems, cesspools, clarifiers, or oil/water separators was observed during the site inspection. The Site Representative was unaware of other such features on the site.

8.8 STORMWATER DISCHARGES

Discharged From	*Discharged To*	*Status/Notes*	*REC*
Roof through internal inlets	Direct discharge to the municipal stormwater system	No concerns noted	No
Parking garage	Trench drains, with eventual discharge to the municipal stormwater system	No concerns noted	No
Exterior site surfaces	Directed to the adjoining streets and municipal stormwater system	No concerns noted	No

No stormwater retention ponds were observed on the site. No environmental issues were observed associated with the on-site stormwater flow. The Site Representative was unaware of any stormwater issues on the site.

8.9 PITS, PONDS, AND LAGOONS (ON-SITE PROCESS WATER DISCHARGE)

Type	*Contents*	*Location*	*Status/Notes*	*REC*
Grease trap (aboveground)	Cooking grease	Metro Market commercial tenant space	The grease trap is emptied on a monthly basis. No concerns were identified.	No

No other pits, ponds or lagoons used for process water discharge were observed at the site. The Site Representative was unaware of other such features on the site.

8.10 WELLS

Type	*Location*	*Status/Notes*	*REC*
None			No

No physical evidence of groundwater monitoring wells, injection wells, extraction wells, vapor wells, drywells, or groundwater production wells was identified during the site inspection. The Site Representative was unaware of any on-site wells.

8.11 UNDERGROUND PRODUCT PIPELINES

Type	*Location*	*Status/Notes*	*REC*
None			No

No physical evidence of underground product pipelines carrying petroleum or other hazardous substances was identified during the site inspection. The Site Representative was unaware of on-site product pipelines.

8.12 ODORS

Odors	*Location*	*Status/Notes*	*REC*
None			No

No unusual odors indicative of environmental concerns were identified during the site inspection. The Site Representative was unaware of such odors at the site.

8.13 POOLS OF LIQUID

Pools of Liquid	*Location*	*Status/Notes*	*REC*
None			No

No pools or sumps containing liquids indicative of environmental concerns were identified during the site inspection. The Site Representative was unaware of pools or sumps containing liquids at the site.

8.14 STRESSED VEGETATION OR STAINED SURFACES

Stressed Vegetation or Stained Surfaces	*Location*	*Status/Notes*	*REC*
None			No

No stained soils or stressed vegetation were observed by Blackstone. The Site Representative was unaware of stressed vegetation or stained surfaces.

8.15 SITE INSPECTION CONCLUSIONS

No evidence of RECs was identified in connection with the site as a result of the site inspection.

9.0 ASTM NON-SCOPE CONSIDERATIONS

Blackstone performed the following client-specific activities to identify ASTM *Non-Scope Considerations* (*Business Environmental Risk Issues*) in addition to the ASTM and as required per the Agreement and Fannie Mae.

9.1 ASBESTOS-CONTAINING MATERIALS (ACM)

Frequently encountered types of ACM used in building construction include floor tile and mastic, spray-applied fireproofing, acoustical/decorative ceiling plaster, wallboard and joint compound, insulation, and many other building materials in common use prior to 1981. Materials that contain greater than one percent asbestos fibers are considered regulated ACM and must be handled according to USEPA and Occupational Safety and Health Administration (OSHA) regulations.

Based on the construction date of the site buildings (2001) and in accordance with the Fannie Mae DUS Guidelines, no bulk samples were collected and the presence of regulated ACM is unlikely. No further evaluation of ACM is recommended.

This limited survey should not be construed as a comprehensive asbestos survey for pre-demolition or pre-renovation purposes. As such, prior to demolition or renovation activities at the site, additional sampling of the specific materials to be disturbed will be necessary to satisfy National Emissions Standards for Hazardous Air Pollutants (NESHAPs) and state regulations. Furthermore, all regulated ACM must be handled in accordance with applicable regulations. These regulations may include removal of certain ACMs prior to renovation activities.

9.2 LEAD-BASED PAINT (LBP)

Considering the site buildings were developed after the recognized 1978 LBP determination date, the presence of LBP is unlikely and sampling of painted surfaces was not conducted as part of the scope of this assessment. No further evaluation of LBP is recommended.

9.3 RADON GAS

A review of records regarding radon concentrations in Westchester County, New York, was conducted to determine if concentrations of radon in the general area of the site are within the USEPA guidelines. The USEPA uses a continuous exposure level of 4.0 pCi/L (picoCuries per liter of air) or greater as a guidance level at which further evaluation and potential remedial actions are recommended.

According to USEPA Office of Radiation and Indoor Air information/mapping, the site is located within a Radon Zone Level 3. This zone has a predicted average indoor radon gas screening level less than 2.0 pCi/L, which is within USEPA guidance levels.

Based on the absence of ground-floor (on-slab) residential units, radon screening was not conducted at the site. No further evaluation of radon is recommended.

9.4 APPARENT MOLD GROWTH (AMG)

As part of this site assessment, Blackstone performed the following tasks: looked for evidence of AMG in the areas surveyed during the site assessment; made inquiries of property management regarding past and current leaks or known mold issues; made inquiries of property management whether there have been tenant complaints regarding health problems, musty odors or water leaks; observed areas where significant leaks were reported; and conducted a representative visual/olfactory survey for evidence of current or past water leakage and/or mold.

No AMG was observed within the dwelling units or common areas accessed. The Site Representative was not aware of AMG issues at the site and no tenant complaints were reported. As such, no further evaluation is recommended.

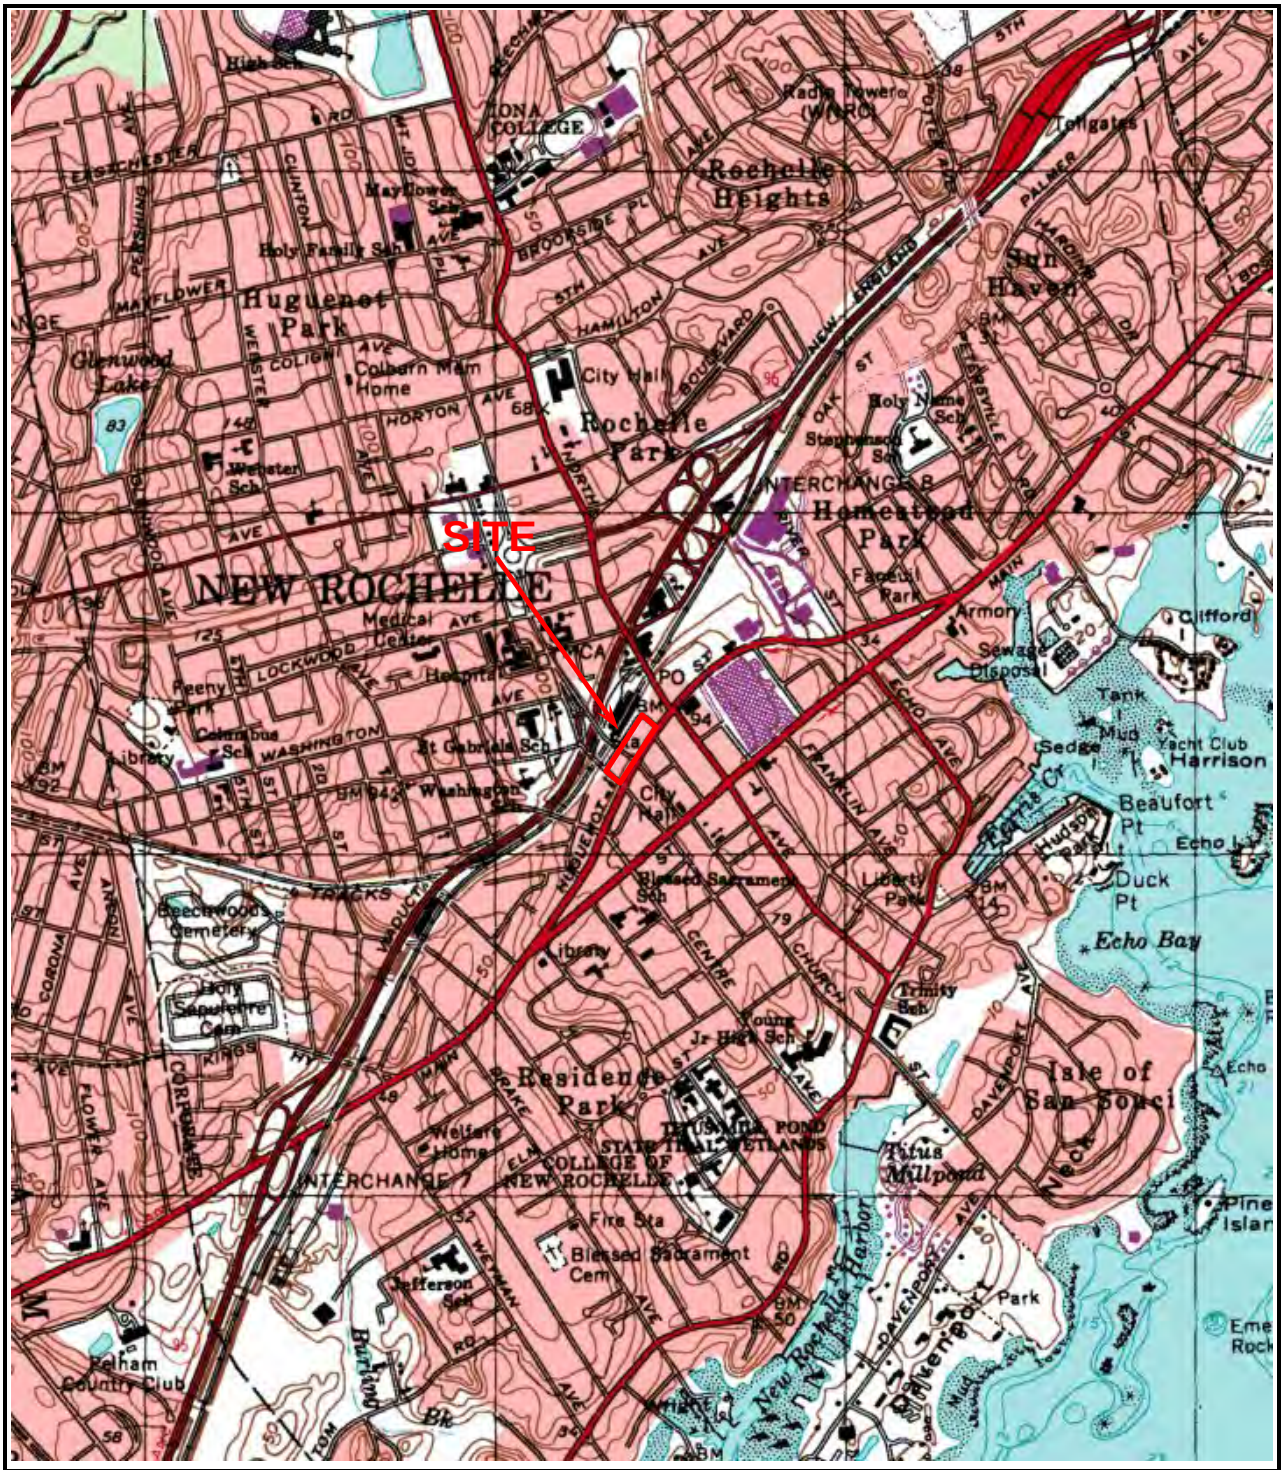
The limited AMG visual survey is intended to provide an indication of the potential for significant environmental issues associated with AMG. Due to the size of the site, all apartment units could not be examined for AMG. In addition, inaccessible areas such as behind walls, in crawl spaces, and inside ductwork were not inspected. As such, the limited AMG visual survey should not be regarded as a comprehensive survey.

9.5 LEAD IN DRINKING WATER

United Water New York provides drinking water to the site. The United Water New York 2015 Annual Water Quality Report indicates the municipal water system meets the requirements as established by the USEPA, state, and local authorities for lead content in drinking water. As such, no further investigation is recommended.

9.6 WETLANDS

As defined by the USEPA and U.S. Army Corps of Engineers (USACE), wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions."



Wetlands possess three essential characteristics: (1) hydrophytic vegetation; (2) hydric soils; and (3) hydrology. All three characteristics must be prevalent to document an area as a jurisdictional wetland.

Wetlands	
Information Source	***Findings***
National Wetlands Inventory (NWI) on-line Wetland Mapper:	No mapped federal wetlands are located at the site.

Wetlands	
Information Source	***Findings***
(http://www.fws.gov/wetlands/Data/Mapper.html)	
Field observations	No vegetation or ponded areas that are characteristic of wetlands were observed at the site.

10.0 CONCLUSIONS, RECOMMENDATIONS AND O&M PROGRAMS

Blackstone performed a Phase I ESA of the site in conformance with the scope and limitations of ASTM Standard Practice E 1527-13, the Fannie Mae Multifamily/Delegated Underwriting and Servicing Guide (April 29, 2011), and the May 23, 2016 proposal (Agreement) between Walker & Dunlop and Blackstone. Any exceptions to or deletions from this practice are described in Sections 1.2 through 1.4 of this report. This assessment has revealed no evidence of *recognized environmental conditions* (*RECs*) in connection with the site. No further investigation is recommended.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Exclusive Recovered Govt. Archives

NY RGA HWS ---------- Recovered Government Archive State Hazardous Waste Facilities List
NY RGA LF ---------- Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1

CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/17/2016 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 01/05/2016 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/17/2016 has revealed that there are 163 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, and dated 03/29/2016 has revealed that there are 44 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/17/2016 has revealed that there are 22 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 59 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within

approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CON EDISON-CEDAR ST	ONE RAMADA PLAZA	NE 1/4 - 1/2 (0.340 mi.)	294	613

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"4-9-14 Last night I traded voicemails with Jerry. He said that he didn't know anymore than provided to the Hotline and I should talk to Frank in the morning. This morning I spoke to Frank. Location has a 1500 gallon vaulted tank with a remote fill at curb. There is currently some oil in the basement sump. Sump is unplugged and it doesn't appear any was pumped out. Frank doesn't know where oil came from, but vault sounds inaccessible. Frank is trying to contact management company to let them know tank needs to be tested. Management Company: Sterling Solutions, 914/437-6245, Aurora is Almeada contact Owner: Milka Iwanow, 914/409-6513 jc 4/09/14: Email received this morning from Chris Lalak: Sebastian went to this one and will follow up. It is a block away from my office. The tank in a vaulted AST (1500 gallon from 1931). There is a spill across the floor and in cracks in the floor getting to a sump pump. The sump goes to the sanitary. The spill may have been going on for so time, the super was very vague. The AST is visible except for a small area that sticks into the floor of the vault. The tank is not visibly leaking. Almeida replaced the underground lines with above ground lines recently. The between the tank, the former underground lines, and the sump is some distance and they will need to excavate the floor. The building has hired Dutchess. Pumping out the tank is not simple. The building has natural gas and oil. jod 04-09-14 followup email, After a second look at this one with a plumber,It looks like the old lines might be leaking. The plumber will uncover the old lines. The tank is not being pumped out at this time. The bottom of the tank is visible for the most part. (the plumber went in the vault, before we were there).Possibly, the remote fill is also an issue. They will replace the tank with an unregulated tank. Sebastian will continue to handle the spill. The floor will be opened up tomorrow to investigate. RDB "
Remarks:	"Caller advised unknown amount of oil spilled onto concrete floor with cracks. Clean up is pending."

Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was GHIOSAY 11-18-03 P&D Transport trailer carrying 5000 gallons of a hot tar product developed several leaks from seams and holes beneath the trailer. The driver, John Culbreath, pulled the vehicle to the shoulder of I-95 NB at mm 5.4 in New Rochelle. The trailer drained hot tar to the road shoulder where it flowed downhill until it cooled and solidified. Approximatley 200 feet of shoulder where affected before the trailer could be offloaded. DEC called out Castlton Environmental contractors when a company Rep stated that he/she would not sent a second truck to offload the damaged trailer. Castlton contacted Mystic Bulk Carriers and requested their assistance. Mystic provided a heated truck, suitable to offload the cargo and return it to Ownes Corning in Kearny where the load was originally picked up. The P&D damaged trailer was towed off the road to a spot near the I-95 toll plaza. Castlton performed the removal of the solidified tar several days later as they were delayed by heavy rain which created hazardous working conditions on busily traveled I-95. As of 11-18-03, Portland Asphalt indicated that they would pay Caslton directly for the cost of the cleanup. "
Remarks:	"material goes into a manhole which leads to a water way. poss hutchinson river. spill not controlled yet. caller req call back from rep"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

Registry ID: 110058877390

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Trans1 EPA ID:	NYR000025767
Trans2 EPA ID:	Not reported
TSDF ID:	NYD981182769
Waste Code:	D011 - SILVER 5.0 MG/L TCLP
Quantity:	00030
Units:	G - Gallons (liquids only)* (8.3 pounds)
Number of Containers:	001
Container Type:	DF - Fiberboard or plastic drums (glass)
Handling Method:	R Material recovery of more than 75 percent of the total material.
Specific Gravity:	100
Year:	1997

Document ID:	NYB6575904
Manifest Status:	Completed copy
Trans1 State ID:	GE9561
Trans2 State ID:	Not reported
