1.0 INTRODUCTION

This report describes the work procedures performed to close the eight (8) petroleum storage tanks at the First Prize Center facility located at 76 Exchange Street in Albany, New York, and C.T. Male Associates, P.C. observations during portions of the tank closures. The closure work was performed between August 20, 1991 and September 9, 1991. Seven (7) underground petroleum storage tanks were closed in place and one (1) above ground No. 6 fuel oil storage tank was closed and disposed of off-site as scrap metal.

C.T. Male Associates, P.C. was contracted by Realty Assets, Inc., the property management company, to prepare construction specifications and drawings for the closure of the abandoned petroleum storage tanks and to observe portions of the closure work. A copy of the Tank Closure Specifications, CTMA Drawing No. 90-560, is enclosed in Appendix A.

Portions of the work including uncovering the underground tanks, filling the tanks with a sand slurry and backfilling the excavations were performed by staff of the First Prize Center facility. Removal of the tanks contents, cleaning and purging the tanks and ancillary piping, transportation and disposal of the waste, and removal and disposal of the above ground No. 6 fuel oil

C.T. MALE ASSOCIATES, P.C.

storage tank were performed by Clean Harbors of Albany and Kingston, New York.

Prior to conducting the work, the New York State Department of Environmental Conservation (NYSDEC) Region 4 Office was notified by C.T. Male Associates, P.C. of the intended tank closures in accordance with 6 NYCRR Part 613.9(c) requirements. A building permit to close the tanks was obtained from the Albany County Office of Code Enforcement.

C.T. MALE ASSOCIATES, P.C.

2.0 TANK CLOSURE PROCEDURES AND FIELD OBSERVATIONS

According to Mr. Percy Kleinhans of the First Prize Center, he uncovered the top of the seven (7) underground petroleum storage tanks on August 20, 1991 so that openings could be made by Clean Harbors personnel to access the tanks for cleaning. Approximately 1 to 2 feet of the top of each tank was uncovered. The piping from the tanks to the pump island were also visible. The contents of the tanks were removed by a vacuum truck owned and operated by Clean Harbors of Kingston, Inc. on August 23, 26 and 27, 1991. The tanks and ancillary piping were cleaned during this same time period by Clean Harbors personnel.

C.T. Male Associates, P.C. personnel visited the site on August 23, 1991 during the tank closure work. At the time of the visit, the contents of Tanks 1, 3, 4 and 5 had been removed and the tanks cleaned. The interior of these tanks were observed and no product or wastes were observed to be present in the tanks. Some rust and pitting of the steel were observed on the bottom interior of Tank 1. Approximately one half of a 55 gallon drum of sludge had been removed and was present adjacent to the tank. The interior of Tanks 3, 4 and 5 were observed to be in good condition with no evidence of pitting of the steel and with some evidence of rust. One 55 gallon drum was present adjacent to the excavation for disposal of protective clothing. Tanks 6 and 7 were being purged

C.T. MALE ASSOCIATES, P.C.

with air to reduce the lower explosive limit (LEL) reading to acceptable levels, so the tanks could be cut open by Clean Harbors for cleaning. Workers from Clean Harbors were attempting to gain access to above ground Tank 2 to be able to remove the tank's contents and clean the tank.

The exposed soil around the perimeter of the underground petroleum storage tanks was screened with a Photovac Microtip Photoionization Detector (PID). Negligible readings of 0.1 ppm to 2.6 ppm total volatile compounds were obtained on the PID meter. No visible evidence of contamination was observed in the excavations.

On August 30, 1991 C.T. Male Associates, P.C. personnel visited the site to observe the interior of Tanks 2, 6, 7 and 8. No product or wastes were observed in the interior of the tanks. Some rust spots were observed on the interior of Tanks 6, 7 and 8. Two 55 gallon drums were present adjacent to the tank excavation and labeled as "oil solids" and "contaminated benzene".

The ancillary piping associated with the underground storage tanks (from Tanks 3 to 8 to the pump island) was removed by First Prize Center personnel on September 3 and 4, 1991 and placed in a Tri-Den Waste dumpster on-site. The metal will be disposed of as clean scrap metal with other scrap metal salvaged from on-site.

C.T. MALE ASSOCIATES, P.C.

According to Mr. Larry Johnson, the Clean Harbors foreman at the site during the tank closure work, the No. 6 fuel oil storage tank was cut-up on September 6 and 9, 1991; and removed from the site along with the exterior ancillary piping and vent piping from Tanks 3 to 8 on September 6, 1991. The metal was disposed of as clean scrap metal at Schiabo-Hudson Corporation at the Port of Albany according to Mr. Johnson. Mr. Johnson also indicated that Clean Harbors disconnected the fuel pumps at the fuel island on September 6, 1991; and that the vent riser piping associated with Tanks 3 to 8 was removed along the building wall, and the vent piping below grade capped and plugged just below grade at the building wall on September 9, 1991. The fuel pumps were recycled (i.e., sold).

The underground storage tanks were filled with a sand slurry supplied by Electric City Concrete Company, Inc. on September 6, 1991. Approximately 140 cubic yards of material were used to fill the seven (7) underground storage tanks according to First Prize Center personnel. The tank excavations were then backfilled with the existing excavated material and the areas graded by First Prize Center personnel. According to Mr. Kleinhans the concrete from the fuel island and concrete pad over the tanks was broken up and disposed of on-site as clean fill and covered with sand.

C.T. MALE ASSOCIATES, P.C.

C.T. Male Associates, P.C. personnel revisited the site on September 13, 1991 and observed that the above ground No. 6 fuel oil tank and exterior ancillary piping had been removed. Two 55 gallon drums labeled as "oil solids" were observed in the area of the former No. 6 fuel oil tank. In total, four (4) 55 gallon drums of waste from the tank cleanings were observed at the facility.

Photographs of the tank closure work are enclosed in Appendix B.

C.T. MALE ASSOCIATES, P.C.

3.0 WASTE TRANSPORTATION AND DISPOSAL

The liquid fuel wastes removed from the tanks and cleaning wastes, approximately 1,696 gallons total, were transported for disposal on August 27, 1991 by Clean Harbors of Kingston, Inc., a 6 NYCRR Part 364 permitted waste transporter (#MA-006). The waste was transported to Clean Harbors of Braintree, Inc. for temporary disposal. The waste will be re-manifested from Clean Harbors of Braintree, Inc. to its ultimate disposal destination where it will be incinerated. Certification of the wastes' incineration will be submitted to First Prize Center once it occurs.

During C.T. Male Associates, P.C. August 23, 1991 site visit to the facility (during the tank closure work), Clean Harbors' 6 NYCRR Part 364 permit for the vacuum truck was reviewed and determined to be a current permit (expiration date of 1/31/92). The plate number on the vacuum truck, #16704, was listed on the transporters permit.

A copy of the hazardous waste manifest and Clean Harbors 6 NYCRR Part 364 permit are enclosed in Appendix C.

The four (4) 55 gallon drums of solid wastes generated from cleaning the tanks were transported on September 16, 1991 by Clean Harbors of Kingston, Inc. to Clean Harbors of Braintree, Inc. for

C.T. MALE ASSOCIATES, P.C.

disposal by landfilling. The plate number of the transportation vehicle, #654975, is listed on Clean Harbors of Kingston, Inc. 6 NYCRR Part 364 permit. A copy of the manifest and land disposal restriction notification are enclosed in Appendix C.

C.T. MALE ASSOCIATES, P.C.

4.0 SUMMARY

The closure in place of seven (7) underground petroleum storage tanks and the closure and removal off-site of one (1) above ground petroleum storage tank was completed August 20, 1991 through September 9, 1991 by First Prize Center staff and by Clean Harbors of Albany and Kingston, New York.

The tank closures were conducted in accordance with 6 NYCRR Part 613.9 requirements.

Respectfully submitted,

C.T. MALE ASSOCIATES, P.C.

THIS DOCUMENT IS A VIOLATION OF SECTION
7209 SUBDIVISION 2 OF THE NEW YORK STATE
EDUCATION LAW.

1. THE OWNER WILL UNCOVER THE TOP OF EACH UNDERGROUND TANK (SEVEN (7) TOTAL), AREA THREE FEET BY THREE FEET AT A MINIMUM, SO TO THE CONTRACTOR CAN ACCESS THE TANK.
2. CONTRACTOR TO CUT OPENING IN THE TANKS TO ACCESS THE TANKS FOR CLEANING AND REMOVAL OF WASTE.
3. REMOVE ALL LIQUID AND ANY SLUDGE FROM ALL SEVEN UNDERGROUND STORAGE TANKS AND THE 20,000 GALLON ABOVE GROUND #6 FUEL OIL STORAGE TANK, AND FROM ALL ANCILLARY PIPING ASSOCIATED WITH ALL TANKS. CLEAN AND PURGE TANKS AND ANCILLARY PIPING.
4. CUT UP AND REMOVE THE 20,000 GALLON ABOVE GROUND NO. 6 FUEL OIL STORAGE TANK AND PROPERLY DISPOSE OF TANK OFF-SITE. CUT ANCILLARY PIPING AT BUILDING WALL AND PLUG PIPING. REMOVE EXTERIOR PIPING ASSOCIATED WITH NO. 6 FUEL OIL TANK AND PROPERLY DISPOSE OF IT OFF-SITE.
5. PERMANENTLY DISCONNECT AND CAP ALL ANCILLARY PIPING AT THE VENT STACKS ALONG THE GOODYEAR FACILITY SITE BUILDING, WITHIN THE PUMP ISLAND (AND AT THE TANKS WHERE POSSIBLE). PURGE, REMOVE AND PROPERLY DISPOSE OF OFF-SITE THREE (3) EXISTING FUEL PUMPS FROM THE PUMP ISLAND.
6. WASTE PRODUCT AND CLEANING WASTES FROM THE TANKS AND ASSOCIATED PIPING SHALL BE TRANSPORTED BY A 6 NYCRR PART 360 FACILITY PERMITTED TO TRANSPORT THIS TYPE OF WASTE, AND DISPOSED OF AT A TREATMENT, STORAGE OR DISPOSAL FACILITY PERMITTED TO ACCEPT THE TYPE OF WASTE BEING DELIVERED IN ACCORDANCE WITH ALL APPLICABLE LOCAL, STATE AND FEDERAL REGULATIONS. THE WASTE TRANSPORTATION AND DISPOSAL SHALL BE PROPERLY DOCUMENTED WITH APPROPRIATE TRANSPORTATION AND DISPOSAL DOCUMENTS.
7. ALL WORK, TRANSPORTATION AND DISPOSAL SHALL BE CONDUCTED IN ACCORDANCE WITH ALL APPLICABLE LOCAL, STATE AND FEDERAL REGULATIONS AND REQUIREMENTS. A COPY OF ALL APPLICABLE PERMITS (I.E., APPROVAL FORM FROM TSDP FOR WASTE DISPOSAL, 6 NYCRR PART 364 PERMIT), TRANSPORTATION AND DISPOSAL DOCUMENTS SHALL BE SUBMITTED TO C.T. MALE ASSOCIATES AND THE ~~OWNER~~.
8. ALL WORK SHALL BE COORDINATED WITH C.T. MALE ASSOCIATES, P.C.
9. THROUGHOUT THE PROGRESS OF WORK, ALL PERSONNEL WILL BE REQUIRED TO FOLLOW PERSONAL SAFETY AND PROTECTIVE PRECAUTIONS ACCORDING TO APPLICABLE OSHA REQUIREMENTS.
10. C.T. MALE ASSOCIATES, P.C. WILL BE RESPONSIBLE FOR NOTIFYING NYSDEC REGION 4 DIVISION OF WASTE SPILL RESPONSE SECTION AND THE TOWN OF COLONIE FIRE PREVENTION UNIT, FIVE DAYS PRIOR TO EXCAVATION AND REMOVAL OF THE TANKS.
11. THE OWNER WILL BE RESPONSIBLE FOR FILLING THE UNDERGROUND TANKS WITH AN INERT MATERIAL, BACKFILLING THE EXCAVATIONS TO THE TOP OF THE TANKS, AND REPAVING THE AREAS.
