Anthony Bollasina, P.G.
Assistant Geologist - Bureau D, Section D
New York State Department of Environmental Conservation
625 Broadway, 12th Floor
Albany, NY 12204

**RE: Weekly Progress Report (Week 2 - May 16-20, 2022)
EJ Victory Building – 59 Lester Avenue, Johnson City, Broome County, New York
NYSDEC Site Number: C704060**

Dear Mr. Bollasina:

On behalf of EJ Victory Building, LLC, NEU-VELLE, LLC (NEU-VELLE) has prepared this Weekly Progress Update to summarize the work performed from May 16-20, 2022 at the EJ Victory Building project located at 59 Lester Avenue in the Village of Johnson City, New York (New York State Department of Environmental Conservation [NYSDEC] Brownfield Cleanup Program [BCP] Site #C704060).

SCOPE OF WORK

The following activities were conducted during the reporting period:

GENERAL PROTOCOLS

Whenever potentially-contaminated soil was being handled (excavated, staged, backfilled, etc.), NEU-VELLE observed the activities, noted any staining, odors, or sheens, screened soils for volatile vapors with a photo-ionization detector (PID), and conducted air monitoring for volatile vapors and particulates at locations upwind and downwind of the Work Area in accordance with the project's Community Air Monitoring Program (CAMP). Real-time air monitoring results were reported using telemetry technology coupled with instrument-supported (Environet) software. Real-time alerts were programmed to notify NEU-VELLE personnel (via text message) when action levels were exceeded.

WORK ZONE #1 – SOUTHERN EXCAVATIONS

Under the direction of the General Contractor (LeChase Construction Services) the Site Work subcontractor (Pritchard Property Development) excavated a trench along Helen Drive to install a new hydrant, and another (perpendicular) trench along Avenue B to connect with the water main at a hydrant adjacent to the southwestern corner of the subject site. Although not required due to its off-site location, NEU-VELLE observed the trenching along Avenue B for additional gasoline-contaminated soils and performed CAMP air monitoring to verify that the trench excavation along Avenue B isn't impacting on-site or off-site receptors. This arrangement was discussed with and agreed to by the NYSDEC manager assigned to Spill 22-01296 (Mr. Michael Kane) and the Village of Johnson City (owner of Avenue B).

As part of the trenching activities along Helen Drive and Avenue B:

- the old water main pipe was removed

- new pipe bedding (pre-approved imported stone material) was placed
- new pipe was installed
- the trench was backfilled with excavated material and topped with pre-approved imported stone material as needed

After the excavation work had been completed, Pritchard Property Development scraped remaining asphalt along Helen Drive, from the western property border to near the intersection of Avenue B, to accommodate future excavations associated with new sewer lines.

Samples of the staged gasoline-contaminated soil were collected for waste characterization analysis (in accordance with Broome County Landfill requirements).

WORK ZONE #2 – NORTHERN EXCAVATIONS

On May 18-19, 2022, work was performed in Work Zone #2. The work consisted of excavations associated with a new loading dock foundation adjacent to the central-east portion of the Annex Building.

OBSERVATIONS

The following observations were noted during the reporting period:

- Asphalt roadway and associated gravel bedding was observed in the top 6 inches of the excavation. Excavated soils typically consisted of rock (round, pebble- to cobble-sized) with some brown/gray sand and little pebble-sized angular gravel. Soils below approximately 6 feet bgs along Helen Drive, and soils below approximately 2 feet bgs along Avenue B, tended to be of similar composition, but lighter (tan) in color and slightly more sandy.
- A gasoline odor was detected in soils in discrete pockets directly below the asphalt pavement along Helen Drive. These soils were a continuation of Spill # 22-01296, which was identified and reported on May 13. The excavation further revealed:
 - No point-source was identified.
 - No free product or sheens were observed.
 - Headspace analysis revealed maximum PID readings of approximately 40 ppm.

A limited amount of additional contaminated soils were added to the main staged pile along Helen Drive, and were subsequently re-covered with polyethylene sheeting.

- No contamination associated with Spill # 22-01296 was observed along the length of Avenue B.
- A former rail bed was observed while excavating for the loading dock. The associated material consisted of angular gravel with some black sand and tar. The rail bed was approximately 10 feet wide and 2 feet thick. The bedding was located near the surface in the eastern and western portions, and appeared to dip to approximately 4 feet bgs in the vicinity of a former foundation that was excavated (possibly an old hopper). The rail bedding was staged in a separate pile (on and covered with polyethylene sheeting) located along the Annex Building in the vicinity of the loading dock excavation.
- Wind strength and direction was variable. NEU-VELLE attempted to accurately place the upwind and downwind air monitoring stations, and frequently re-assessed the prevailing wind direction.

However, the presence of the large subject building was conducive to swirling winds, and winds sometimes blew in the opposite direction for short periods of time.

- Construction activities unrelated to remediation (movement of large motorized lifts, forklifts, bobcats, etc., dumping of materials within dumpsters, etc.) created visible dust for short periods of time. This dust primarily consisted of fine powder created by the heavy equipment pulverizing stone on the asphalt roadways, and was exacerbated by sunny conditions, dry winds, and unusually low humidity. Areas within the remediation work zone were wetted by use of a garden hose, as needed.
- CAMP air monitoring alert notifications were limited to the following:
 - On the morning of May 16, the action level for particulates was exceeded immediately upon startup. The issue almost immediately resolved with the concentrations decreasing to acceptable levels.

The following activities are anticipated to occur during the next week:

- Removal of asphalt along Helen Drive, from the intersection of Avenue B to an area between Avenues A and B.
- Removal of asphalt along the northeastern section of Avenue C (behind the site building, along the northern property border), to accommodate utility excavations.
- Either the continuation of the trench excavation along Helen Drive for the installation of new water mains, or the installation of new storm sewer and sanitary sewer lines along the portions of Helen Drive, adjacent to the areas excavated for the new water main.
- Soils previously excavated during the installation of the interior drainage trench (and staged on the interior slab-on-grade) may be moved to an exterior location (on and covered with polyethylene sheeting).
- Construction associated with the renovation of the subject building (unrelated to remediation) will continue to be coordinated with remedial efforts.

CLOSING

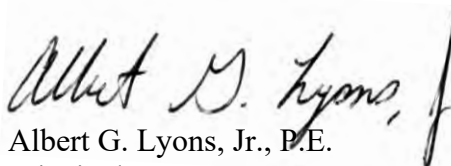

If you have any questions or comments pertaining to this proposal, please call me at (315) 345-1649 or e-mail me at rmckenna@neu-velle.com.

Sincerely,

NEU-VELLE, LLC

Richard D. "Rico" McKenna
Senior Project Manager
